That is the UK law rule; conceivably the preamble was thought to be significant in the USA.

2 See 102.15.2 (Abuse/avoidance/evasion: Terminology).

3 If authority is needed, see *Fowler v HMRC* [2020] UKSC 22 discussing the South Africa/UK DTA (2002). The treaty has a preamble in (more or less) standard 1992 form, referring to “a new Convention for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on income and on capital gains”. SC stated at [15]: “the recited objective of dealing with tax evasion is dealt with by provisions for exchange of information and mutual assistance in tax collection in articles 25 and 25A”.

4 See 103.5.1 (Abusive double non-taxation).

5 In 1995 there was a stylistic change which did not affect the meaning: the phrase “double taxation conventions being left aside” became: “irrespective of double taxation conventions”.

This made it clear that OECD Model did *not* contain an anti-abuse rule. The text remained essentially unchanged until 2003, which substituted the current text:<sup>6</sup>

54. The principal purpose of double taxation conventions is to promote, by eliminating international double taxation, exchanges of goods and services, and the movement of capital and persons. *As confirmed in the preamble of the Convention, it is also part of the purposes of tax conventions to prevent tax avoidance and evasion.*

The second sentence is (more or less) the opposite of what was said in 1977. OECD described the change as “clarification”<sup>7</sup> but “clarify” is often used tendentiously to disguise substantive changes.<sup>8</sup>

#### 104.2.4 2017 Model form

The current (2017) Model form has a revised title:

***Title***

Convention between (State A) and (State B) for the elimination of double taxation with respect to taxes on income and on capital and the prevention of tax evasion and avoidance

The reference to fiscal evasion has been replaced by “the prevention of tax evasion and avoidance”.

A new preamble also identifies the purpose(s) of the DTA:<sup>9</sup>

***Preamble to the Convention***

(State A) and (State B),

[1] Desiring to further develop their economic relationship and to

---

6 Pursuant to the 2002 Reports Related to the OECD Model Tax Convention: “Restricting the Entitlement to Treaty Benefits”, “Treaty Characterisation Issues Arising from E-Commerce”, “Issues Arising Under Article 5 (Permanent Establishment) of the Model Tax Convention”.

7 OECD/G20 “Base Erosion and Profit Shifting Project Preventing the Granting of Treaty Benefits in Inappropriate Circumstances (2015) provides: “In 2003, [paragraph 7] was amended *to clarify* that the prevention of tax avoidance was also a purpose of tax treaties.”

8 See App.1.2 (Clarify/modernise/reform).

9 In English domestic drafting, this would normally be called a recital, rather than a preamble, but the words are synonymous here. When discussing the OECD Model, it is normally better to use the OECD terminology, but it does not matter.

enhance their co-operation in tax matters,  
 [2] Intending to conclude a Convention for the elimination of double taxation with respect to taxes on income and on capital without creating opportunities for non-taxation or reduced taxation through tax evasion or avoidance (including through treaty-shopping arrangements aimed at obtaining reliefs provided in this Convention for the indirect benefit of residents of third States),  
 Have agreed as follows...

I refer to these as:

- (1) The economic co-operation preamble
- (2) The tax avoidance preamble

It is difficult to see that the economic co-operation preamble has any legal effect, though I suppose the exhortation might inform the approach adopted by HMRC and their foreign counterparts.

### 104.3 BEPS MLI preambles

The BEPS MLI (in short) brings older DTAs into line with 2017 OECD Model form.

#### 104.3.1 *Anti-avoidance preamble*

Art 6(1) BEPS MLI provides:

1. A Covered Tax Agreement<sup>10</sup> shall be modified to include the following preamble text:

“Intending to eliminate double taxation with respect to the taxes covered by this agreement without creating opportunities for non-taxation or reduced taxation through tax evasion or avoidance (including through treaty-shopping arrangements aimed at obtaining reliefs provided in this agreement for the indirect benefit of residents of third jurisdictions),”.

This is substantially the same as the OECD model anti-avoidance preamble, with changes only to conform to MLI’s terminology.

Art 6(2) BEPS MLI provides:

---

<sup>10</sup> See 103.15.3 (Covered tax agreement).

2. The text described in paragraph 1 shall be included in a Covered Tax Agreement in place of or in the absence of preamble language of the Covered Tax Agreement referring to an intent to eliminate double taxation, whether or not that language also refers to the intent not to create opportunities for non-taxation or reduced taxation.

Art 6 BEPS MLI provides an opt-out:

4. A Party may reserve the right for paragraph 1 not to apply to its Covered Tax Agreements that already contain preamble language describing the intent of the Contracting Jurisdictions to eliminate double taxation without creating opportunities for non-taxation or reduced taxation, whether that language is limited to cases of tax evasion or avoidance (including through treaty-shopping arrangements aimed at obtaining reliefs provided in the Covered Tax Agreement for the indirect benefit of residents of third jurisdictions) or applies more broadly.

The UK has exercised this opt-out, but only in relation to the 3 contracting jurisdictions whose DTAs already contain the preamble: Belarus, Ukraine and Uzbekistan.<sup>11</sup>

### 104.3.2 *Economic cooperation*

Art 6 BEPS MLI provides:

3. A Party may also choose to include the following preamble text with respect to its Covered Tax Agreements that do not contain preamble language referring to a desire to develop an economic relationship or to enhance co-operation in tax matters:

“Desiring to further develop their economic relationship and to enhance their co-operation in tax matters,”.

This is identical to the OECD Model economic co-operation preamble. The UK has opted to adopt this provision. But as noted above, it will have little if any legal effect.

---

11 UK MLI Notifications

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/725261/Final\\_list\\_of\\_UK\\_reservations\\_and\\_notifications\\_made\\_on\\_deposit\\_of\\_the\\_instrument\\_of\\_ratification.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf)

#### 104.4 Purpose of DTAs: Summary

It is necessary to distinguish:

- (1) Treaties using 2017 Model text, or BEPS MLI text
- (2) Other DTAs (“Old-style DTAs”).

The position for DTAs in the first category is clear. It is stated from the title or preamble that at least one of the purposes is the prevention of avoidance. As these treaties also have express principal purpose test, this text is simply dotting *I*'s and crossing *T*'s.

Old-style DTAs are diminish in number so the identifying their purpose is perhaps of decreasing interest. If one could apply a strict approach, the position must be that is no anti-abuse in the pre-MLI OECD Model, and no anti-abuse purpose should be implied:

- (1) Pre-1995 DTAs should be construed without regard to the current commentary.
- (2) 1977-1995 treaties should be construed on the basis that the then applicable commentary broadly regarded anti-avoidance as a matter of domestic law.
- (3) Post-1995 treaties should be construed on the same basis, as the current commentary text is unjustified.

But courts hostile to abuse will not find that a palatable view.

*Se non è vero, è ben trovato.* The BEPS MLI introduced a principal purpose test<sup>12</sup> “to mirror the guidance”.<sup>13</sup> That rather makes the point, as commentary is normally intended to mirror the text, rather than text inserted to mirror the commentary.

#### 104.5 Domestic anti-abuse rules

This section discusses the question whether domestic law anti-abuse rules which override a treaty would breach treaty obligations.<sup>14</sup>

OECD Commentary states that domestic law anti-abuse rules do not conflict with the Model treaty:

---

12 See 104.8 (Principal purpose test).

13 OECD Draft Commentary to principal purpose test, para 1.

14 As to how far a conflict actually matters, see 103.18.7 (Conflict between DTAs and UK law).

... as a general rule, there will be no conflict between [domestic anti-abuse] rules and the provisions of tax conventions.<sup>15</sup>

The GAAR guidance is therefore correct, or at least, supported by OECD Commentary, in stating that the GAAR may override DTAs:

... where there are abusive arrangements which try to exploit particular provisions in a double tax treaty, or the way in which such provisions interact with other provisions of UK tax law, then the GAAR can be applied to counteract the abusive arrangements. See the example at D12 (Huitson - DTAs).<sup>16</sup>

The reader may find OECD reasoning unconvincing;<sup>17</sup> but a breach of the treaty (even if there were a breach) would not matter in a jurisdiction like the UK where domestic law may override treaty agreements.

#### 104.6 Implied treaty anti-abuse rule

An implied treaty anti-abuse rule is important where there are no domestic anti-abuse rules, as was (more or less) the case in the UK before the GAAR.

An implied treaty anti-abuse rule may of course overlap with domestic law anti-abuse rules. Substance over form rules, or economic substance

---

15 OECD Commentary on Art 1, para 58.

16 HMRC, “GAAR Guidance” (2017) para B5.3.

<https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules>

17 OECD Commentary on art 1 provides: “58. Many States address that question by taking account of the fact that taxes are ultimately imposed through the provisions of domestic law, as restricted (and in some rare cases, broadened) by the provisions of tax conventions. Thus, any abuse of the provisions of a tax convention could also be characterised as an abuse of the provisions of domestic law under which tax will be levied. For these States, the issue then becomes whether the provisions of tax conventions may prevent the application of the anti-abuse provisions of domestic law, which is the question addressed in paragraphs 66 to 80 below. As explained in these paragraphs, as a general rule, there will be no conflict between such rules and the provisions of tax conventions”

Para 22.1 formerly provided: “2.1 Such rules are part of the basic domestic rules set by domestic tax laws for determining which facts give rise to a tax liability; these rules are not addressed in tax treaties and are therefore not affected by them. Thus, as a general rule and having regard to paragraph 9.5, there will be no conflict.”

rules, may be classified as treaty-based (construction of the treaty), or as domestic anti-abuse rules. They are two routes to the same destination.

OECD Commentary on art 1 supports the view that the OECD model convention includes an implied anti-abuse rule:

59. Other<sup>18</sup> States prefer to view some abuses as being abuses of the convention itself, as opposed to abuses of domestic law. These States, however, then consider that a proper construction of tax conventions allows them to disregard abusive transactions, such as those entered into with the view to obtaining unintended benefits under the provisions of these conventions. This interpretation results from the object and purpose of tax conventions as well as the obligation to interpret them in good faith.<sup>19</sup>

60. Under both approaches, therefore, it is agreed that States do not have to grant the benefits of a double taxation convention where arrangements that constitute an abuse of the provisions of the convention have been entered into.

I am not sure about the reasoning, but the conclusion is clear.

In practice the courts will construe a DTA to avoid double non-taxation in abuse cases, and maybe even in some non-abuse cases: see 103.5 (Double non-taxation).

## 104.7 OECD-concept abuse

### 104.7.1 “OECD concept abuse”

If there is an anti-abuse rule in a DTA (or if domestic-law rules may override a treaty provision where there is abuse) then it is necessary to consider what constitutes abuse.

OECD Commentary provides:

It is important to note, however, that it should not be lightly assumed that a taxpayer is entering into the type of abusive transactions referred to above.

---

18 Strictly the reference to “other” states cannot be right: *all* states should seek to construe DTAs the same way. But the Commentary adopts a pragmatic approach. A state with domestic anti-avoidance rule need not bother about construction of the treaty: it does not matter what the treaty says.

19 The Commentary refers to art 31 Vienna Convention; see 103.9 (DTA interpretation: Principles).

A guiding principle is that the benefits of a double taxation convention should not be available where

- [a] a main purpose for entering into certain transactions or arrangements was to secure a more favourable tax position and
- [b] obtaining that more favourable treatment in these circumstances would be contrary to the object and purpose of the relevant provisions.<sup>20</sup>

I refer to this as “**OECD-concept abuse**”.

OECD Commentary uses the term avoidance as well as abuse, but does not draw a distinction between them, and I think they are used synonymously. Given OECD meaning, the term “abuse” seems more apt, at least for tax practitioners who choose their words carefully.

OECD Commentary gives two examples of abuse. The first example may be described as treaty-shopping:

This would be the case, for example, if a person (whether or not a resident of a Contracting State), acts through a legal entity created in a State essentially to obtain treaty benefits that would not be available directly.<sup>21</sup>

Treaty-shopping was in the OECD view “unsatisfactory” as far back as 1986.

#### 104.7.2 *Emigration to treaty-state*

The second example of abuse in OECD Commentary is emigration by an individual to a foreign treaty-state. The Commentary continues:

- Another case would be an individual who
- [1] has in a Contracting State [“the original home State”] both
    - [a] his permanent home and
    - [b] all his economic interests, including a substantial shareholding in a company of that State, and
  - [2] who, essentially in order to sell the shares and escape taxation in that State on the capital gains from the alienation (by virtue of paragraph 5 of Article 13[DTA CG relief]), transfers his permanent home to the other Contracting State, where such gains are subject to little or no

---

20 OECD Commentary on Art 1, para 61.

21 OECD Commentary on Art 1, para 56.

tax.<sup>22</sup>

I find it surprising that emigration by an individual should be categorised as abuse, even in a case where:

- (1) the purpose of emigration to a treaty State is to qualify for DTA relief; and
- (2) the individual retains their economic interests in the original State.

Emigration by a *company* to a treaty jurisdiction might be abuse, in the absence of economic substance. That would be the EU-law approach.<sup>23</sup> But in the case of an individual, the permanent home (which is, in short, required to be treaty-resident) effectively constitutes economic substance.

Conceivably an individual approaches the abusive end of the spectrum if the period of treaty non-residence is kept as short as the “permanent home” requirement may permit.<sup>24</sup> The concept of abuse is not only vague and subjective but also very fact sensitive.

### 104.7.3 UN Model Commentary

The UN Model Commentary (rewritten in 2011) agrees with OECD, but contains a slightly more comprehensive discussion. The UN Commentary approves the OECD conclusion that “States do not have to grant the benefits of a double taxation convention where arrangements that constitute an abuse of the provisions of the convention have been entered into.”<sup>25</sup> It continues:

23. That conclusion leads logically to the question of what is an abuse of

---

22 In UK tax law, a non-resident is not in principle subject to tax on a disposal of UK shares, so if a UK resident wishes to avoid CGT on a sale of UK shares, all they need do is become non-resident: they need not become treaty-resident in a foreign State. They do not in principle need any DT relief. However this example envisages that the original home State imposes CGT on non-residents who dispose of shares situate in that State, subject only to treaty relief. As the UK does not do this, this scenario does not arise in the UK.

23 See 102.15.1 (Selection of MS for tax: Not abuse); 5.41 (Tax motivated non-residence).

24 That may be quite short: see 8.12.2 (“Permanent”). In the UK planning by short-term residence in a foreign treaty-state would now be caught by the TNR rules. Prior to the introduction of those rules, HMRC accepted that DT relief could apply.

25 See 104.6 (Implied treaty anti-abuse rule).

a tax treaty. The OECD did not attempt to provide a comprehensive reply to that question, which would have been difficult given the different approaches of its member countries. Nevertheless, the OECD presented the following general guidance, which was referred to as a “guiding principle”.

[The commentary quotes OECD Commentary on art 1, para 61<sup>26</sup> and continues]:

24. The members of the Committee endorse that principle. They considered that such guidance as to what constitutes an abuse of treaty provisions serves an important purpose as it attempts to balance the need to prevent treaty abuses with the need to ensure that countries respect their treaty obligations and provide legal certainty to taxpayers. Clearly, countries should not be able to escape their treaty obligations simply by arguing that legitimate transactions are abusive and domestic tax rules that affect these transactions in ways that are contrary to treaty provisions constitute anti-abuse rules.

25. Under the guiding principle presented above, two elements must therefore be present for certain transactions or arrangements to be found to constitute an abuse of the provisions of a tax treaty:

- [1] a main purpose for entering into these transactions or arrangements was to secure a more favourable tax position, and
- [2] obtaining that more favourable treatment would be contrary to the object and purpose of the relevant provisions.

This quotes the OECD commentary (more or less) exactly.

26. These two elements will also often be found, explicitly or implicitly, in general anti-avoidance rules and doctrines developed in various countries.

27. In order to minimize the uncertainty that may result from the application of that approach, it is important that this guiding principle be applied on the basis of objective findings of facts, not solely the alleged intention of the parties. Thus, the determination of whether a main purpose for entering into transactions or arrangements is to obtain tax advantages should be based on an objective determination, based on all the relevant facts and circumstances, of whether, without these tax advantages, a reasonable taxpayer would have entered into the same transactions or arrangements.

---

26 See 104.7.1 (“OECD concept abuse”).

This is similar to the EU-law concept of abuse.<sup>27</sup> That is not surprising. It is also similar to “abusive” as defined in the GAAR.

GAAR guidance gives the scheme in *Huitson* as an example of an abuse which would be caught by the GAAR, and no doubt constitutes OECD-abuse.<sup>28</sup> As is common in GAAR guidance examples, that is both an easy case and somewhat academic (as the scheme has been stopped by legislation).

#### 104.7.4 Canadian approach

Courts in other common law jurisdictions have not been as obliging in categorisation of abuse as tax administrations would desire. The Canadian Revenue say:

... the leading Canadian treaty shopping case involving the GAAR was decided in favour of the taxpayer. In *MIL (Investments) SA*,<sup>29</sup> the corporate taxpayer was continued [migrated] from Cayman Islands (a jurisdiction with which Canada does not have a tax treaty) to Luxembourg (a treaty country) shortly before it realized capital gains on the disposition of taxable Canadian property.<sup>30</sup>

In UK legal terminology, the company migrated to Luxembourg and became treaty-resident there. This is the example which OECD identified as abuse in the case of an individual;<sup>31</sup> one might have thought that the case of a company was clearer. But the court found this was not abuse:

Upon its continuance [migration] to Luxembourg, the corporate taxpayer became a resident of Luxembourg for purposes of the Canada-Luxembourg Convention, positioning it to make a claim under the Convention to exempt the capital gain from tax in Canada. The

---

27 See 102.15.3 (Abuse).

28 HMRC, “GAAR Guidance” (2017) para D12 [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/605502/gaar-part-d-2017.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/605502/gaar-part-d-2017.pdf) for the *Huitson* scheme, see 82.24 (DT relief: Partnership).

29 [2007] DTC 5437.

30 Footnote original: A non resident of Canada is taxable in Canada on, among other things, capital gains arising on the disposition of taxable Canadian property, subject to the provisions of an applicable tax treaty.

31 See 104.7.2 (Emigration to treaty-state).

Crown argued that this case involved treaty shopping and, as such, represented an abuse of the provisions of the Convention that exempted the capital gain from tax in Canada. The Tax Court of Canada concluded that the GAAR was not applicable and that there was no inherent anti-abuse rule in the Convention. The Tax Court stated:

“...I do not agree that Justice Iacobucci’s obiter dicta can be used to establish a prima facie finding of abuse arising from the choice of the most beneficial treaty. There is nothing inherently proper or improper with selecting one foreign regime over another. Respondent’s counsel was correct in arguing that the selection of a low tax jurisdiction may speak persuasively as evidence of a tax purpose for an alleged avoidance transaction, but the shopping or selection of a treaty to minimize tax on its own cannot be viewed as being abusive. It is the use of the selected treaty that must be examined.”<sup>32</sup>

In a short decision, the Federal Court of Appeal dismissed the Crown’s appeal in *MIL (Investments)* on the basis that it was unable to find an object or purpose of the exempting provision of the Convention whose abuse would justify a departure from the plain meaning of the words of the provision. This decision is a particularly strong statement by the Federal Court of Appeal, indicating that the courts in Canada require further legislative direction before finding that treaty shopping is an improper (and abusive) use of tax treaties.<sup>33</sup>

#### 104.7.5 Treaty-shopping

OECD returned to this topic in 2015:

##### a) Treaty shopping

17. The first requirement that must be met by a person who seeks to obtain benefits under a tax treaty is that the person must be “a resident of a Contracting State”, as defined in Article 4 of the OECD Model Tax Convention. There are a number of arrangements through which a person who is not a resident of a Contracting State may attempt to obtain benefits that a tax treaty grants to a resident of that State. These arrangements are generally referred to as “treaty shopping”. Treaty

---

32 See at [72].

33 Department of Finance Canada “Consultation Paper on Treaty Shopping – The Problem and Possible Solutions” (2013) <http://www.fin.gc.ca/activty/consult/ts-cf-eng.asp>

shopping cases typically involve persons who are residents of third States attempting to access indirectly the benefits of a treaty between two Contracting States.<sup>34</sup>

## 104.8 Principal purpose test

### 104.8.1 OECD Model/BEPS PPT

The principal purpose test (PPT) in OECD Model and BEPS are effectively identical (with changes only to conform to MLI's terminology):

#### Art 29(9) OECD Model

Notwithstanding the other provisions of this Convention, a benefit under this Convention shall not be granted in respect of an item of income or capital

[a] if it is reasonable to conclude,<sup>35</sup> having regard to all relevant facts and circumstances, that obtaining that benefit was one of the principal purposes of any arrangement or transaction that resulted directly or indirectly in that benefit,

[b] unless it is established that granting that benefit in these circumstances would be in accordance with the object and purpose of the relevant provisions of this Convention.

#### Art 7(1) BEPS MLI

Notwithstanding any provisions of a Covered Tax Agreement, a benefit under the Covered Tax Agreement shall not be granted in respect of an item of income or capital

[a] [identical]

[b] unless it is established that granting that benefit in these circumstances would be in accordance with the object and purpose of the relevant provisions of the Covered Tax Agreement.

The PPT is a TAAR by another name. Instead of “tax avoidance” (ie evident intention of parliament), we have “object and purpose” of the

---

34 Footnote original: Cases where a resident of the Contracting State in which income originates seeks to obtain treaty benefits (e.g. through a transfer of residence to the other Contracting State or through the use of an entity established in that other State) could also be considered to constitute a form of treaty shopping...

35 The wording adopts current UK drafting practice; see App.2.21 (Reasonable-to-assume).

DTA. This is a nod to the Vienna Convention,<sup>36</sup> but the concepts are (more or less) the same.

Art 7(1) BEPS MLI continues:

2. Paragraph 1 shall apply in place of or in the absence of provisions of a Covered Tax Agreement that deny all or part of the benefits that would otherwise be provided under the Covered Tax Agreement where the principal purpose or one of the principal purposes of any arrangement or transaction, or of any person concerned with an arrangement or transaction, was to obtain those benefits.

3. A Party that has not made the reservation described in subparagraph a) of paragraph 15 may also choose to apply paragraph 4 with respect to its Covered Tax Agreements.

4. Where a benefit under a Covered Tax Agreement is denied to a person under provisions of the Covered Tax Agreement (as it may be modified by this Convention) that deny all or part of the benefits that would otherwise be provided under the Covered Tax Agreement where the principal purpose or one of the principal purposes of any arrangement or transaction, or of any person concerned with an arrangement or transaction, was to obtain those benefits, the competent authority of the Contracting Jurisdiction that would otherwise have granted this benefit shall nevertheless treat that person as being entitled to this benefit, or to different benefits with respect to a specific item of income or capital, if such competent authority, upon request from that person and after consideration of the relevant facts and circumstances, determines that such benefits would have been granted to that person in the absence of the transaction or arrangement. The competent authority of the Contracting Jurisdiction to which a request has been made under this paragraph by a resident of the other Contracting Jurisdiction shall consult with the competent authority of that other Contracting Jurisdiction before rejecting the request.

5. Paragraph 4 shall apply to provisions of a Covered Tax Agreement (as it may be modified by this Convention) that deny all or part of the benefits that would otherwise be provided under the Covered Tax Agreement where the principal purpose or one of the principal purposes of any arrangement or transaction, or of any person concerned with an arrangement or transaction, was to obtain those benefits.

---

36 See 103.8 (DTA interpretation principles).

The UK has chosen to opt in to article 7(4).<sup>37</sup>

OECD Commentary is somewhat verbose, but it is necessary to consider all of it.

It has recently become common for UK domestic law to adopt this wording in a treaty-override:

Topic	See para	Date
Trading in land	21.4.2	2016
Transactions in land	21.15.1	2016
Royalty withholding tax	31.13	2016
Offshore IP receipts	31.35	2019
UK land/land rich asset: Non-residents CGT/CT	54.13.2	2019

#### 104.8.2 PPT/LoB: Relationship

OECD Commentary on art 29 provides:

171. Paragraph 9 supplements and does not restrict in any way the scope or application of the provisions

[1] of paragraphs 1 to 7 (the limitation-on-benefits rule)<sup>38</sup> and

[2] of paragraph 8 (the rule applicable to a permanent establishment situated in a third jurisdiction):

a benefit that is denied in accordance with these paragraphs is not a “benefit under the Convention” that paragraph 9 would also deny. Moreover, the guidance provided in the Commentary on paragraph 9 should not be used to interpret paragraphs 1 to 8 and vice-versa.

172. Conversely, the fact that a person is entitled to benefits under paragraphs 1 to 7 does not mean that these benefits cannot be denied under paragraph 9. Paragraphs 1 to 7 are rules that focus primarily on the legal nature, ownership in, and general activities of, residents of a Contracting State. As illustrated by the example in the next paragraph, these rules do not imply that a transaction or arrangement entered into by such a resident cannot constitute an improper use of a treaty provision

173. ... Assume, for instance, that a public company whose shares are regularly traded on a recognised stock exchange in the Contracting State of which the company is a resident derives income from the other

---

37 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/725261/Final\\_list\\_of\\_UK\\_reservations\\_and\\_notifications\\_made\\_on\\_deposit\\_of\\_the\\_instrument\\_of\\_ratification.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf)

38 See 105.1 (Limitation on Benefits).

Contracting State. As long as that company is a “qualified person” as defined in paragraph 2, it is clear that the benefits of the Convention should not be denied solely on the basis of the ownership structure of that company, e.g. because a majority of the shareholders in that company are not residents of the same State. The object and purpose of subparagraph c) of paragraph 2 is to establish a threshold for the treaty entitlement of public companies whose shares are held by residents of different States. The fact that such a company is a qualified person does not mean, however, that benefits could not be denied under paragraph 9 for reasons that are unrelated to the ownership of the shares of that company. Assume, for instance, that such a public company is a bank that enters into a conduit financing arrangement intended to provide indirectly to a resident of a third State the benefit of lower source taxation under a tax treaty. In that case, paragraph 9 would apply to deny that benefit because subparagraph c) of paragraph 2, when read in the context of the rest of the Convention and, in particular, its preamble, cannot be considered as having the purpose, shared by the two Contracting States, of authorising treaty-shopping transactions entered into by public companies.

#### 104.8.3 “Benefit”

OECD Commentary provides:

The term “benefit” includes

- [1] all limitations (e.g. a tax reduction, exemption, deferral or refund) on taxation imposed on the State of source under Articles 6 through 22 of the Convention,
- [2] the relief from double taxation provided by Article 23, and
- [3] the protection afforded to residents and nationals of a Contracting State under Article 24 or any other similar limitations.

... When a tax convention includes other limitations (such as a tax sparing provision), the provisions of this Article also apply to that benefit.<sup>39</sup>

#### 104.8.4 *Directly or indirectly*

OECD Commentary on art 29 provides:

176. The phrase [arrangement or transaction] “that resulted directly or indirectly in that benefit” is deliberately broad and is intended to include situations where the person who claims the application of the benefits

---

39 Commentary on art 29, para 175.

under a tax treaty may do so with respect to a transaction that is not the one that was undertaken for one of the principal purposes of obtaining that treaty benefit. This is illustrated by the following example:

The example is the assignment of a debt to a treaty resident group company:

TCo, a company resident of State T, has acquired all the shares and debts of SCo, a company resident of State S, that were previously held by SCo's parent company. These include a loan made to SCo at 4% interest payable on demand.

State T does not have a tax convention with State S and, therefore, any interest paid by SCo to TCo is subject to a withholding tax on interest at a rate of 25% in accordance with the domestic law of State S.

Under the State R-State S tax convention, however, there is no withholding tax on interest paid by a company resident of a Contracting State and beneficially owned by a company resident of the other State; also, that treaty does not include provisions similar to paragraphs 1 to 6. TCo decides to transfer the loan to RCo, a subsidiary resident of State R, in exchange for three promissory notes payable on demand on which interest is payable at 3.9%.

In this example, whilst RCo is claiming the benefits of the State R-State S treaty with respect to a loan that was entered into for valid commercial reasons, if the facts of the case show that one of the principal purposes of TCo in transferring its loan to RCo was for RCo to obtain the benefit of the State R-State S treaty, then the provision would apply to deny that benefit as that benefit would result indirectly from the transfer of the loan.

This is the same as the example considered in the context of the US DTA conduit arrangement rule; see 104.10.3 (Conduit: Interest WHT).

#### 104.8.5 “Arrangement”

OECD Commentary on art 29 provides:

177. The terms “arrangement or transaction” should be interpreted broadly and include any agreement, understanding, scheme, transaction or series of transactions, whether or not they are legally enforceable.

One can detect UK influence in the drafting here.<sup>40</sup>

---

40 See App 2.2.3 (Definitions of “arrangement”).

In particular they include the creation, assignment, acquisition or transfer of the income itself, or of the property or right in respect of which the income accrues. These terms also encompass arrangements concerning the establishment, acquisition or maintenance of a person who derives the income, including the qualification of that person as a resident of one of the Contracting States, and include steps that persons may take themselves in order to establish residence. An example of an “arrangement” would be where steps are taken to ensure that meetings of the board of directors of a company are held in a different country in order to claim that the company has changed its residence. One transaction alone may result in a benefit, or it may operate in conjunction with a more elaborate series of transactions that together result in the benefit. In both cases the provisions of paragraph 9 [PPT] may apply.

#### 104.8.6 *Principal purpose*

OECD Commentary on art 29 provides:

178. To determine whether or not one of the principal purposes of any person concerned with an arrangement or transaction is to obtain benefits under the Convention, it is important to undertake an objective analysis of the aims and objects of all persons involved in putting that arrangement or transaction in place or being a party to it. What are the purposes of an arrangement or transaction is a question of fact which can only be answered by considering all circumstances surrounding the arrangement or event on a case by case basis. It is not necessary to find conclusive proof of the intent of a person concerned with an arrangement or transaction, but it must be reasonable to conclude, after an objective analysis of the relevant facts and circumstances, that one of the principal purposes of the arrangement or transaction was to obtain the benefits of the tax convention. It should not be lightly assumed, however, that obtaining a benefit under a tax treaty was one of the principal purposes of an arrangement or transaction and merely reviewing the effects of an arrangement will not usually enable a conclusion to be drawn about its purposes. Where, however, an arrangement can only be reasonably explained by a benefit that arises under a treaty, it may be concluded that one of the principal purposes of that arrangement was to obtain the benefit...

180. The reference to “one of the principal purposes” in paragraph 7 means that obtaining the benefit under a tax convention need not be the sole or dominant purpose of a particular arrangement or transaction. It is

sufficient that at least one of the principal purposes was to obtain the benefit.

There is an echo of *Brebner* here.<sup>41</sup>

For example, a person may sell a property for various reasons, but if before the sale, that person becomes a resident of one of the Contracting States and one of the principal purposes for doing so is to obtain a benefit under a tax convention, paragraph 9 could apply notwithstanding the fact that there may also be other principal purposes for changing residence, such as facilitating the sale of the property or the re-investment of the proceeds of the alienation.

This is questionable.<sup>42</sup>

181. A purpose will not be a principal purpose when it is reasonable to conclude, having regard to all relevant facts and circumstances, that obtaining the benefit was not a principal consideration and would not have justified entering into any arrangement or transaction that has, alone or together with other transactions, resulted in the benefit. In particular, where an arrangement is inextricably linked to a core commercial activity, and its form has not been driven by considerations of obtaining a benefit, it is unlikely that its principal purpose will be considered to be to obtain that benefit. Where, however, an arrangement is entered into for the purpose of obtaining similar benefits under a number of treaties, it should not be considered that obtaining benefits under other treaties will prevent obtaining one benefit under one treaty from being considered a principal purpose for that arrangement. Assume, for example, that a taxpayer resident of State A enters into a conduit arrangement with a financial institution resident of State B in order for that financial institution to invest, for the ultimate benefit of that taxpayer, in bonds issued in a large number of States with which State B, but not State A, has tax treaties. If the facts and circumstances reveal that the arrangement has been entered into for the principal purpose of obtaining the benefits of these tax treaties, it should not be considered that obtaining a benefit under one specific treaty was not one of the principal purposes for that arrangement. Similarly, purposes related to the avoidance of domestic law should not be used to argue that obtaining a treaty benefit was merely accessory to such purposes.

---

41 See 49.12 (Consequence and purpose).

42 See 104.7 (OECD-concept abuse).

182. The following examples illustrate the application of the paragraph (the examples included in paragraph 187 below should also be considered when determining whether and when the paragraph would apply in the case of conduit arrangements)

A set of examples now follow. They are lengthy, but we are spared the childish names and irrelevant details that characterise examples in HMRC domestic-law guidance.<sup>43</sup> In summary:

<b>Example</b>	<b>Facts</b>	<b>Abuse</b>
A, B	Assignment of dividends	Yes
C, D	Investment in treaty jurisdiction	No
E	Acquisition to meet 25% (non-portfolio) test	No
F	Acquisition of Co	No
G, H	Setting up management Co	No
I	Copyright licence arrangement	No
J	Fragmentation to avoid PE	Yes

#### 104.8.7 *Dividend assigned to treaty-co*

Example A is the assignment of a right to a dividend:

Example A: TCo, a company resident of State T, owns shares of SCo, a company listed on the stock exchange of State S. State T does not have a tax convention with State S and, therefore, any dividend paid by SCo to TCo is subject to a withholding tax on dividends of 25% in accordance with the domestic law of State S. Under the State R-State S tax convention, however, there is no withholding tax on dividends paid by a company resident of a Contracting State and beneficially owned by a company resident of the other State.

TCo enters into an agreement with RCo, an independent financial institution resident of State R, pursuant to which TCo assigns to RCo the right to the payment of dividends that have been declared but have not yet been paid by SCo.

OECD analysis is as follows:

In this example, in the absence of other facts and circumstances showing otherwise, it would be reasonable to conclude that one of the principal purposes for the arrangement under which TCo assigned the right to the payment of dividends to RCo was for RCo to obtain the benefit of the

---

43 See App 1.8 (Technical Notes).

exemption from source taxation of dividends provided for by the State R-State S tax convention and it would be contrary to the object and purpose of the tax convention to grant the benefit of that exemption under this treaty-shopping arrangement.

Example B is the same, but the assignment is by way of a 3 year usufruct:

Example B: SCo, a company resident of State S, is the subsidiary of TCo, a company resident of State T. State T does not have a tax convention with State S and, therefore, any dividend paid by SCo to TCo is subject to a withholding tax on dividends of 25% in accordance with the domestic law of State S. Under the State R-State S tax convention, however, the applicable rate of withholding tax on dividends paid by a company of State S to a resident of State R is 5%. TCo therefore enters into an agreement with RCo, a financial institution resident of State R and a qualified person under subparagraph 3 a) of this Article, pursuant to which RCo acquires the usufruct of newly issued non-voting preferred shares of SCo for a period of three years. TCo is the bare owner of these shares. The usufruct gives RCo the right to receive the dividends attached to these preferred shares. The amount paid by RCo to acquire the usufruct corresponds to the present value of the dividends to be paid on the preferred shares over the period of three years (discounted at the rate at which TCo could borrow from RCo).

OECD analysis is as follows:

In this example, in the absence of other facts and circumstances showing otherwise, it would be reasonable to conclude that one of the principal purposes for the arrangement under which RCo acquired the usufruct of the preferred shares issued by SCo was to obtain the benefit of the 5% limitation applicable to the source taxation of dividends provided for by the State R-State S tax convention and it would be contrary to the object and purpose of the tax convention to grant the benefit of that limitation under this treaty-shopping arrangement.

#### 104.8.8 *Investment in treaty State*

Example C is choice of investment in a treaty-favoured jurisdiction:

Example C: RCo, a company resident of State R, is in the business of producing electronic devices and its business is expanding rapidly. It is now considering establishing a manufacturing plant in a developing country in order to benefit from lower manufacturing costs. After a preliminary review, possible locations in three different countries are

identified. All three countries provide similar economic and political environments. After considering the fact that State S is the only one of these countries with which State R has a tax convention, the decision is made to build the plant in that State.

OECD analysis is as follows:

In this example, whilst the decision to invest in State S is taken in the light of the benefits provided by the State R-State S tax convention, it is clear (!) that the principal purposes for making that investment and building the plant are related to the expansion of RCo's business and the lower manufacturing costs of that country. In this example, it cannot reasonably be considered that one of the principal purposes for building the plant is to obtain treaty benefits.

In addition, given that a general objective of tax conventions is to encourage cross-border investment, obtaining the benefits of the State R-State S convention for the investment in the plant built in State S is in accordance with the object and purpose of the provisions of that convention.

The second argument is more convincing than the first, though either would suffice.

Example D is the same but the investor is a collective investment scheme:

Example D: RCo, a collective investment vehicle resident of State R, manages a diversified portfolio of investments in the international financial market. RCo currently holds 15% of its portfolio in shares of companies resident of State S, in respect of which it receives annual dividends. Under the tax convention between State R and State S, the withholding tax rate on dividends is reduced from 30% to 10%.

RCo's investment decisions take into account the existence of tax benefits provided under State R's extensive tax convention network. A majority of investors in RCo are residents of State R, but a number of investors (the minority investors) are residents of States with which State S does not have a tax convention. Investors' decisions to invest in RCo are not driven by any particular investment made by RCo, and RCo's investment strategy is not driven by the tax position of its investors. RCo annually distributes almost all of its income to its investors and pays taxes in State R on income not distributed during the year.

OECD analysis is as follows:

In making its decision to invest in shares of companies resident of State

S, RCo considered the existence of a benefit under the State R-State S tax convention with respect to dividends, but this alone would not be sufficient to trigger the application of paragraph 9 [PPT]. The intent of tax treaties is to provide benefits to encourage cross-border investment and, therefore, to determine whether or not paragraph 9 applies to an investment, it is necessary to consider the context in which the investment was made. In this example, unless RCo's investment is part of an arrangement or relates to another transaction undertaken for a principal purpose of obtaining the benefit of the Convention, it would not be reasonable to deny the benefit of the State R-State S tax treaty to RCo.

#### 104.8.9 *Acquisition of shares*

Example E is a share acquisition to meet a 25% test:

Example E: RCo is a company resident of State R and, for the last 5 years, has held 24% of the shares of company SCo, a resident of State S. Following the entry-into-force of a tax treaty between States R and S (Article 10 of which is identical to Article 10 of this Model), RCo decides to increase to 25% its ownership of the shares of SCo. The facts and circumstances reveal that the decision to acquire these additional shares has been made primarily in order to obtain the benefit of the lower rate of tax provided by Article 10(2)a) of the treaty.

OECD analysis is as follows:

In that case, although one of the principal purposes for the transaction through which the additional shares are acquired is clearly to obtain the benefit of Article 10(2)a), paragraph 9 [PPT] would not apply because it may be established that granting that benefit in these circumstances would be in accordance with the object and purpose of Article 10(2) a). That subparagraph uses an arbitrary threshold of 25% for the purposes of determining which shareholders are entitled to the benefit of the lower rate of tax on dividends and it is consistent with this approach to grant the benefits of the subparagraph to a taxpayer who genuinely increases its participation in a company in order to satisfy this requirement.

Example F is a commercial acquisition:

Example F: TCO is a publicly-traded company resident of State T. TCO's information technology business, which was developed in State T, has grown considerably over the last few years as a result of an aggressive merger and acquisition policy pursued by TCO's management. RCO, a company resident of State R (a State that has concluded many tax treaties

providing for no or low source taxation of dividends and royalties), is the family-owned holding company of a group that is also active in the information technology sector. Almost all the shares of RCO are owned by residents of State R who are relatives of the entrepreneur who launched and developed the business of the RCO group. RCO's main assets are shares of subsidiaries located in neighbouring countries, including SCO, a company resident of State S, as well as patents developed in State R and licensed to these subsidiaries. TCO, which has long been interested in acquiring the business of the RCO group and its portfolio of patents, has made an offer to acquire all the shares of RCO.

OECD analysis is as follows:

In this example, in the absence of other facts and circumstances showing otherwise, it would be reasonable to conclude that the principal purposes for the acquisition of RCO are related to the expansion of the business of the TCO group and do not include the obtaining of benefits under the treaty between States R and S. The fact that RCO acts primarily as a holding company does not change that result. It might well be that, after the acquisition of the shares of RCO, TCO's management will consider the benefits of the tax treaty concluded between State R and State S before deciding to keep in RCO the shares of SCO and the patents licensed to SCO. This, however, would not be a purpose related to the relevant transaction, which is the acquisition of the shares of RCO.

#### 104.8.10 *PPT: Treaty-shopping*

OECD model commentary provides:

Example G: TCO, a company resident of State T, is a publicly-traded company resident of State T. It owns directly or indirectly a number of subsidiaries in different countries. Most of these companies carry on the business activities of the TCO group in local markets. In one region, TCO owns the shares of five such companies, each located in different neighbouring States. TCO is considering establishing a regional company for the purpose of providing group services to these companies, including management services such as accounting, legal advice and human resources; financing and treasury services such as managing currency risks and arranging hedging transactions, as well as some other non-financing related services. After a review of possible locations, TCO decides to establish the regional company, RCO, in State R. This decision is mainly driven by the skilled labour force, reliable legal system, business friendly environment, political stability, membership of a

regional grouping, sophisticated banking industry and the comprehensive double taxation treaty network of State R, including its tax treaties with the five States in which TCO owns subsidiaries, which all provide low withholding tax rates.

OECD analysis is as follows:

In this example, merely reviewing the effects of the treaties on future payments by the subsidiaries to the regional company would not enable a conclusion to be drawn about the purposes for the establishment of RCO by TCO. Assuming that the intra-group services to be provided by RCO, including the making of decisions necessary for the conduct of its business, constitute a real business through which RCO exercises substantive economic functions, using real assets and assuming real risks, and that business is carried on by RCO through its own personnel located in State R, it would not be reasonable to deny the benefits of the treaties concluded between State R and the five States where the subsidiaries operate unless other facts would indicate that RCO has been established for other tax purposes or unless RCO enters into specific transactions to which paragraph 7 [PPT] would otherwise apply (see also example F in paragraph 15 below with respect to the interest and other remuneration that RCO might derive from its group financing activities).

Example H: TCO is a company resident of State T that is listed on the stock exchange of State T. It is the parent company of a multinational enterprise that conducts a variety of business activities globally (wholesaling, retailing, manufacturing, investment, finance, etc.). Issues related to transportation, time differences, limited availability of personnel fluent in foreign languages and the foreign location of business partners make it difficult for TCO to manage its foreign activities from State T. TCO therefore establishes RCO, a subsidiary resident of State R (a country where there are developed international trade and financial markets as well as an abundance of highly-qualified human resources), as a base for developing its foreign business activities. RCO carries on diverse business activities such as wholesaling, retailing, manufacturing, financing and domestic and international investment. RCO possesses the human and financial resources (in various areas such as legal, financial, accounting, taxation, risk management, auditing and internal control) that are necessary to perform these activities. It is clear that RCO's activities constitute the active conduct of a business in State R.

As part of its activities, RCO also undertakes the development of new manufacturing facilities in State S. For that purpose, it contributes equity

capital and makes loans to SCO, a subsidiary resident of State S that RCO established for the purposes of owning these facilities. RCO will receive dividends and interest from SCO.

OECD analysis is as follows:

In this example, RCO has been established for business efficiency reasons and its financing of SCO through equity and loans is part of RCO's active conduct of a business in State R. Based on these facts and in the absence of other facts that would indicate that one of the principal purposes for the establishment of RCO or the financing of SCO was the obtaining of the benefits of the treaty between States R and S, paragraph 9 [PPT] would not apply to these transactions.

#### 104.8.11 *Copyright licences*

OECD Commentary on art 29 provides:

Example I: RCO, a company resident of State R, is one of a number of collective management organisations that grant licenses on behalf of neighbouring right and copyright holders for playing music in public or for broadcasting that music on radio, television or the internet. SCO, a company resident of State S, carries on similar activities in State S.

Performers and copyright holders from various countries appoint RCO or SCO as their agent to grant licenses and to receive royalties with respect to the copyrights and neighbouring rights that they hold; RCO and SCO distribute to each right holder the amount of royalties that they receive on behalf of that holder minus a commission (in most cases, the amount distributed to each holder is relatively small).

RCO has an agreement with SCO through which SCO grants licenses to users in State S and distributes royalties to RCO with respect to the rights that RCO manages; RCO does the same in State R with respect to the rights that SCO manages.

SCO has agreed with the tax administration of State S that it will process the royalty withholding tax on the payments that it makes to RCO based on the applicable treaties between State S and the State of residence of each right holder represented by RCO based on information provided by RCO since these right holders are the beneficial owners of the royalties paid by SCO to RCO.

OECD analysis is as follows:

In this example, it is clear that the arrangements between the right holders and RCO and SCO, and between SCO and RCO, have been put in place

for the efficient management of the granting of licenses and collection of royalties with respect to a large number of small transactions. Whilst one of the purposes for entering into these arrangements may well be to ensure that withholding tax is collected at the correct treaty rate without the need for each individual right holder to apply for a refund on small payments, which would be cumbersome and expensive, it is clear that such purpose, which serves to promote the correct and efficient application of tax treaties, would be in accordance with the object and purpose of the relevant provisions of the applicable treaties.

#### 104.8.12 *Fragmentation*

Example J is a division of a contract to avoid a PE:

Example J: RCO is a company resident of State R. It has successfully submitted a bid for the construction of a power plant for SCO, an independent company resident of State S. That construction project is expected to last 22 months. During the negotiation of the contract, the project is divided into two different contracts, each lasting 11 months. The first contract is concluded with RCO and the second contract is concluded with SUBCO, a recently incorporated wholly-owned subsidiary of RCO resident of State R. At the request of SCO, which wanted to ensure that RCO would be contractually liable for the performance of the two contracts, the contractual arrangements are such that RCO is jointly and severally liable with SUBCO for the performance of SUBCO's contractual obligations under the SUBCO-SCO contract.

OECD analysis is as follows:

In this example, in the absence of other facts and circumstances showing otherwise, it would be reasonable to conclude that one of the principal purposes for the conclusion of the separate contract under which SUBCO agreed to perform part of the construction project was for RCO and SUBCO to each obtain the benefit of the rule in paragraph 3 of Article 5 of the State R-State S tax convention. Granting the benefit of that rule in these circumstances would be contrary to the object and purpose of that paragraph as the time limitation of that paragraph would otherwise be meaningless.

#### 104.8.13 *EC principal purpose test*

The EC recommendation is slightly different:

Where Member States, in tax treaties which they conclude among

themselves or with third countries, include a principal purpose test based general anti-avoidance rule in application of the template provided for in the OECD Model Tax Convention, Member States are encouraged to insert in them the following modification:

“Notwithstanding the other provisions of this Convention, a benefit under this Convention shall not be granted in respect of an item of income or capital if it is reasonable to conclude, having regard to all relevant facts and circumstances, that obtaining that benefit was one of the principal purposes of any arrangement or transaction that resulted directly or indirectly in that benefit, unless it is established that it reflects a genuine economic activity or that granting that benefit in these circumstances would be in accordance with the object and purpose of the relevant provisions of this Convention.”<sup>44</sup>

We will have to wait and see what effect this may have.

#### 104.8.14 IRD anti-abuse rule

A different PPT is found in the Interest and Royalties Directive. Art 5 IRD provides:

1. This Directive shall not preclude the application of domestic or agreement-based provisions required for the prevention of fraud or abuse.
2. Member States may, in the case of transactions for which the principal motive or one of the principal motives is tax evasion, tax avoidance or abuse, withdraw the benefits of this Directive or refuse to apply this Directive.

CFE say:

9. Secondly, the Court addressed the question whether there is the need for a specific domestic or agreement based provision implementing the general anti-abuse reservation of Article 5 of the IRD, according to which the IRD “shall not preclude the application of domestic or agreement-based provisions required for the prevention of fraud or abuse” and “Member States may, in the case of transactions for which the principal motive or one of the principal motives is tax evasion, tax avoidance or abuse, withdraw the benefits of this Directive or refuse to apply this Directive”. The referring Danish court asked whether

---

44 C(2016) 271 Commission Recommendation of 28.1.2016 on the implementation of measures against tax treaty abuse  
[http://ec.europa.eu/taxation\\_customs/sites/taxation/files/resources/documents/taxation/company\\_tax/anti\\_tax\\_avoidance/c\\_2016\\_271\\_en.pdf](http://ec.europa.eu/taxation_customs/sites/taxation/files/resources/documents/taxation/company_tax/anti_tax_avoidance/c_2016_271_en.pdf)

Danish domestic law or the beneficial ownership clauses in the applicable tax treaties were a sufficient implementation of Article 5 of the IRD. The Grand Chamber of the Court took a different approach: It discounted the implementation requirement seemingly established in *Kofoed*<sup>45</sup> (on which AG Kokott's Opinion relied in rejecting the idea that non-implemented anti-avoidance provisions of the company tax directives could be applied directly against taxpayers)<sup>46</sup> and instead focused on the "general legal principle that EU law cannot be relied on for abusive or fraudulent ends"<sup>47</sup> This general principle, according to the Court, has been established in the context of the fundamental freedoms,<sup>48</sup> in various fields of EU law,<sup>49</sup> and more specifically also in the area of customs (e.g., in *Emsland-Stärke*)<sup>50</sup> and VAT (e.g., in *Italmoda and Cussens*).<sup>51</sup> Applying that principle

and its considerations in *Cussens* to the IRD, the Court stated that where a case is about the abuse of a Directive’s provision, the general principle of EU law applies irrespective of any domestic implementation:

“In the main proceedings, the rules that are claimed by SKAT to have been abused are the provisions of [the IRD], which was adopted in order to foster the development of a single market having the characteristics of a domestic market and provides for an exemption, in the source Member State, of interest paid to an associated company established in another Member State. As is apparent from the proposal for a directive referred to in paragraph 90 above, certain definitions set out in Directive 2003/49 are based on the definitions in Article 11 of the OECD 1996 Model Tax Convention. [...] Whilst Article 5(1) of [the IRD] provides that the directive is not to preclude the application of domestic or agreement-based provisions required for the prevention of fraud or abuse, that provision cannot be interpreted as excluding the application of the general principle of EU law [...] that abusive practices are prohibited. The transactions alleged by SKAT to constitute an abuse of rights fall within the scope of EU law [...] and could prove incompatible with the objective pursued by that directive. [...] Furthermore, whilst Article 5(2) of [the IRD] provides that Member States may, in the event of evasion, avoidance or abuse, withdraw the benefits of the directive or refuse to apply it, that provision likewise cannot be interpreted as excluding the application of the principle of EU law that abusive practices are prohibited, since the application of that principle is not — as the provisions of the directive are — subject to a requirement of transposition [...]”.<sup>52</sup>

Focusing on the objective of the IRD to eliminate double taxation of interest and royalties, the Court noted that it would not be consistent with such objectives “[t]o permit the setting up of financial arrangements whose sole aim is to benefit from the tax advantages resulting from the application” of the IRD and, on the contrary, “would undermine economic cohesion and the effective functioning of the internal market by distorting the conditions of competition”.<sup>53</sup> This would also be the case if the transactions do not exclusively pursue such an aim, as it is sufficient for the general principle of prohibition of abusive practices in tax matters to apply “where the accrual of a tax advantage constitutes the essential aim of the transactions at issue”.<sup>54</sup> Neither taking advantage of tax competition between Member States nor a taxpayer’s right to pursue the most favorable regime allows a taxpayer to “enjoy a right or advantage arising from EU law where the transaction at issue is purely artificial economically and is designed to circumvent the

53 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), paras 106-107.

54 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para 106, referring to ECJ, 21 February 2008, Case C-425/06, *Ministero dell’Economia e delle Finanze v Part Service Srl*, EU:C:2008:108, para. 45, and *Cussens* (C-251/16), para. 53.

application of the legislation of the Member State concerned”.<sup>55</sup> It is therefore “incumbent upon the national authorities and courts to refuse to grant entitlement to rights provided for by [the IRD] where they are invoked for fraudulent or abusive ends”,<sup>56</sup> even in the absence of domestic or agreement-based anti-abuse provisions.<sup>57</sup> The Court moreover held that Kofoed must not be misunderstood to require implementing legislation,<sup>58</sup> specifically “since [...] abusive or fraudulent acts cannot found a right provided for by EU law, the refusal of an advantage under a directive [...] does not amount to imposing an obligation on the individual concerned under that directive, but is merely the consequence of the finding that the objective conditions required for obtaining the advantage sought, prescribed by the directive as regards that right, are met only formally [...]”.<sup>59</sup>

This, however, is not only an option for Member States, but, as the Court stated, an obligation: The general principle that abusive practices are prohibited forces national authorities and courts to refuse the advantage resulting from the IRD in such circumstances, even if there are no domestic or agreement-based provisions providing for such a refusal.<sup>60</sup>

10. Thirdly, without mentioning the recent landmark decisions on the concept of abuse in the PSD in *Eqiom*<sup>61</sup> and *Deister and Juhler*,<sup>62</sup> the Court (a) identified a number of

55 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), paras 108-109, referring, inter alia, to *Cadbury Schweppes* (C-196/04), para. 51, ECJ, 7 November 2013, C-322/11, K, EU:C:2013:716, para. 61, and ECJ, 25 October 2017, C-106/16, *Polbud — Wykonawstwo*, EU:C:2017:804, paras 61 to 63.

constituent elements of an abuse of rights and the relevant evidence,<sup>63</sup> (b) determined the effect of tax treaty benefits on the finding of abuse,<sup>64</sup> and (c) addressed the allocation of the burden of proof.<sup>65</sup>

a. As for the constituent elements of an abuse of rights, the Grand Chamber of the Court clarified that abuse consists of an objective and a subjective element, noting that “proof of an abusive practice requires, first, a combination of objective circumstances in which, despite formal observance of the conditions laid down by the EU rules, the purpose of those rules has not been achieved and, second, a subjective element consisting in the intention to obtain an advantage from the EU rules by artificially creating the conditions laid down for obtaining it”.<sup>66</sup> This requires an examination of the facts to “establish whether the constituent elements of an abusive practice are present, and in particular whether economic operators have carried out purely formal or artificial transactions devoid of any economic and commercial justification, with the essential aim of benefiting from an improper advantage”.<sup>67</sup> While this is the task of the domestic court (including to establish whether the indications of abuse are objective and consistent, and whether the applicants in the main proceedings have had the opportunity to adduce evidence to the contrary), the Grand Chamber went on to specify a number of indicia: ? The Court first noted that “[a] group of companies may be regarded as being an artificial arrangement where it is not set up for reasons that reflect economic reality, its structure is purely one of form and its principal objective or one of its principal objectives is to obtain a tax advantage running counter to the aim or purpose of the applicable tax law. That is so inter alia where, on account of a conduit entity interposed in the structure of the group between the company that pays interest and the entity which is its beneficial owner, payment of the tax on the interest is avoided.”<sup>68</sup>

- It is therefore an indication of the existence of an arrangement intended to obtain improper entitlement to the exemption under the IRD “that all or almost all of the aforesaid interest is, very soon after its receipt, passed on by the company

65 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), paras 140-144.

66 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 124, referring to *Emsland-Stärke* (C-110/99), paras 52 and 53, and ECJ, 12 March 2014, Case C-456/12, *O. v Minister voor Immigratie* EU:C:2014:135, para. 58.

67 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 125.

68 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 127.

that has received it to entities which do not fulfil the conditions for the [IRD], either because those entities are not established in any Member State, or because they are not incorporated in one of the forms referred to in the annex to the directive, or because they are not subject to one of the taxes listed in Article 3(a)(iii) of the directive without being exempt, or because they do not have the status of associated company within the meaning of Article 3(b) of the directive.”<sup>69</sup> This would be the case where the beneficial owners are entities resident for tax purposes outside the European Union.

- Likewise, “the artificiality of an arrangement is capable of being borne out by the fact that the relevant group of companies is structured in such a way that the company which receives the interest paid by the debtor company must itself pass that interest on to a third company which does not fulfil the conditions for the application of [the IRD], with the consequence that it makes only an insignificant taxable profit when it acts as a conduit company in order to enable the flow of funds from the debtor company to the entity which is the beneficial owner of the sums paid.”<sup>70</sup> An entity’s characteristic as a “conduit company” may be established where its “sole activity is the receipt of interest and its transmission to the beneficial owner or to other conduit companies”.<sup>71</sup> The absence of actual economic activity must, “in the light of the specific features of the economic activity in question, be inferred from an analysis of all the relevant factors relating, in particular, to the management of the company, to its balance sheet, to the structure of its costs and to expenditure actually incurred, to the staff that it employs and to the premises and equipment that it has”.<sup>72</sup>
- Also, “indications of an artificial arrangement may also be constituted by the various contracts existing between the companies involved in the financial transactions at issue, giving rise to intragroup flows of funds which, as is mentioned in Article 4 of [the IRD], may have the aim of transferring profits from a profit-making commercial company to shareholding entities in order to avoid the tax burden or reduce it as much as possible. The way in which the transactions are financed, the valuation of the intermediary companies’ equity and the conduit companies’ inability to have economic use of the interest received may also be used as indications of such an arrangement.”<sup>73</sup>
- In that connection the Court also indirectly addressed a question that the

73 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 132.

domestic referring court raised with regard to the 2014 OECD Update on “beneficial ownership”,<sup>74</sup> where the OECD clarified that an entity is not the beneficial owner of interest income where “that recipient’s right to use and enjoy the interest is constrained by a contractual or legal obligation to pass on the payment received to another person”, a conclusion that would normally derive from relevant legal documents “but may also be found to exist on the basis of facts and circumstances showing that, in substance, the recipient clearly does not have the right to use and enjoy the interest unconstrained by a contractual or legal obligation to pass on the payment received to another person”.<sup>75</sup> Addressing that “in substance”-determination, the Court noted that the above indications “are capable of being constituted not only by a contractual or legal obligation of the company receiving interest to pass it on to a third party but also by the fact that, ‘in substance’ [...] that company, without being bound by such a contractual or legal obligation, does not have the right to use and enjoy those sums.”<sup>76</sup>

- Finally, the Court argued that “such indications may be reinforced by the simultaneity or closeness in time of, on the one hand, the entry into force of major new tax legislation, such as the Danish legislation at issue in the main proceedings, which some of the groups of companies strive to circumvent and, on the other hand, the setting up of complex financial transactions and the grant of intragroup loans”.<sup>77</sup>
- b. The second and third issue, i.e., the impact of a tax treaty and the burden of proof, are somewhat intermingled: AG Kokott had, inter alia, argued that an abuse within the meaning of Art 5 of the IRD would only exist where “interest disbursed directly” to the (third state) beneficial owner “would have been taxed accordingly in Denmark”.<sup>78</sup> Such taxation would, however, be precluded under Danish law if, disregarding the conduit companies, “the actual interest recipient is also an undertaking registered in a different Member State or the interest recipient is resident in a State with which Denmark has concluded a DTC”.<sup>79</sup> Consequently, “in order to determine whether a more favourable tax result is achieved as a result of the arrangement qualified as abusive”, AG Kokott concluded “that a Member State that

79 Footnote original: *Id.*

does not wish to recognise a company resident in a different Member State, to which the interest was paid, as the beneficial owner of the interest must in principle state whom it considered to be the beneficial owner in order to assume that abuse exists”, but that “[i]n particular in cross-border cases, the taxable person may have an enhanced duty to assist”.<sup>80</sup> The Court’s Grand Chamber, however, arrived at a different conclusion: “The existence of such a convention cannot in itself rule out an abuse of rights”<sup>81</sup> and that “the existence of a double taxation convention is not, as such, capable of establishing that a payment was really made to recipients resident in the third State with which that convention has been concluded”,<sup>82</sup> but that (if the “beneficial owner” is not in a third State)<sup>83</sup>

“it remains possible, in a situation where the interest would have been exempt had it been paid directly to the company having its seat in a third State, that the aim of the group’s structure is unconnected with any abuse of rights. In such a case, the group cannot be reproached for having chosen such a structure rather than direct payment of the interest to that company”.<sup>84</sup>

- c. As for the burden of proof, the Court referenced the obligation of a company to establish that it is the beneficial owner of the interest (Art 1(11), (12) and (13)(b) of the IRD) on the one hand and the obligation of the tax authorities, when refusing the exemption under Art 1(1) IRD based on abuse, to establish the existence of elements constituting an abuse practice while taking account of all the relevant factors, in particular the fact that the company to which the interest has been paid is not its beneficial owner on the other hand.<sup>85</sup> However, as the Court found in contrast to AG Kokott’s Opinions,<sup>86</sup> the tax authority has no obligation to identify the entity or

83 Footnote original: The Court had also noted the different effects of the beneficial ownership requirement and the anti-abuse principle, as – irrespective of any finding of fraud or abuse – “beneficial owners” in third states are not beneficiaries of the IRD in the first place (see *N Luxembourg I et al* [C-115/16, C-118/16, C-119/16 and C-299/16], para. 138).

84 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 137.

85 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), paras 140-142.

86 Footnote original: See the Opinions of AG Kokott of 1 March 2018 in Cases C-115/16 (*N Luxembourg I*, EU:C:2018:143, para. 96), C-118/16 (*X Denmark*, EU:C:2018:146, para. 105), C-119/16 (*C Danmark I*, EU:C:2018:147, para. 94),

entities which it regards as being the beneficial owner or owners of the interest. In the words of the Court, it:

“has the task not of identifying the beneficial owners of that interest but of establishing that the supposed beneficial owner is merely a conduit company through which an abuse of rights has been committed. Indeed, identification of that kind may prove impossible, in particular because the potential beneficial owners are unknown. Given the complexity of certain financial arrangements and the possibility that the intermediary companies involved in the arrangements are established outside the European Union, the national tax authority does not necessarily have information enabling it to identify those owners. That authority cannot be required to furnish evidence that would be impossible for it to provide. [...] Furthermore, even if the potential beneficial owners are known, it is not necessarily established which of them are or will be the actual beneficial owners. Thus, where a company receiving interest has a parent company, which itself has a parent company, the tax authorities and courts of the source Member State are, in all probability, unable to determine which of those two parent companies is or will be the beneficial owner of the interest. Moreover, the allocation of that interest may have been decided upon after the tax authority’s findings relating to the conduit company.”<sup>87 88</sup>

Clearly, treaty abuse is a subset of a wider set of issues relating to abuse of law.

## 104.9 Savings Clause

### 104.9.1 Terminology

There are (at least) 3 DTA Savings Clause rules. I coin the following terminology:

Term	Definition
<i>OECD Savings Clause(s):</i>	
OECD Model Savings Clause	art 1(3) OECD Model
BEPS MLI <sup>89</sup> Savings Clause	art 11(1) BEPS MLI
US Savings Clause	art 1(4) USA/UK DTA

---

and C 299/16 (*Z Denmark*, EU:C:2018:148, para. 96).

87 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), paras 143-144.

88 CFE Opinion Statement ECJ-TF 2/2019

[http://taxadviserseurope.org/wp-content/uploads/2019/06/ECJ-TF\\_2-2019\\_Beneficial-Ownership.pdf](http://taxadviserseurope.org/wp-content/uploads/2019/06/ECJ-TF_2-2019_Beneficial-Ownership.pdf)

89 See 103.14 (BEPS MLI).

The term “Savings Clause” is used because, with limited exceptions, it preserves (‘saves’) the right of a State to tax its residents irrespective of other provisions of the treaty.

I use initial capitals to reflect the technical nature of the expression.

### 104.9.2 *OECD Model Savings Clause*

Article 1(3) OECD Model provides:

- [a] This Convention shall not affect the taxation, by a Contracting State, of its residents
- [b] except with respect to the benefits granted under paragraph 3 of Article 7, paragraph 2 of Article 9 and Articles 19, 20, 23 A [23 B], 24 and 25 and 28.

Article 1(3)[b] provides 7 exceptions to the general rule:

<b>Article</b>	<b>Topic</b>
7(3)	Deduction for expenses of PE
9(2)	Transfer pricing
19	Government service
20	Students
23A/B	Foreign tax credit relief
24	Non-discrimination
25	Mutual agreement procedure

The effect (in the terminology of this book) is to override third-party DTA relief.<sup>90</sup>

The drafting is based on the US Savings Clause.

OECD have CFC rules in mind in particular.<sup>91</sup> Whatever the position may have been before, third party DTA relief does not override CFC rules, where a treaty includes the OECD Savings Clause.

OECD commentary to art 1(3) provides:

17. Whilst some provisions of the Convention (e.g. Articles 23 A and 23 B) are clearly intended to affect how a Contracting State taxes its own residents, the object of the majority of the provisions of the Convention is to restrict the right of a Contracting State to tax the residents of the other Contracting State. In some limited cases, however, it has been

---

<sup>90</sup> See 103.21 (Third-party DT relief).

<sup>91</sup> See OECD Model Commentary on art 1(3), para 81.

argued that some provisions could be interpreted as limiting a Contracting State's right to tax its own residents in cases where this was not intended (see, for example, paragraph 81 below, which addresses the case of controlled foreign company provisions).

18. Paragraph 3 confirms the general principle that the Convention does not restrict a Contracting State's right to tax its own residents except where this is intended and lists the provisions with respect to which that principle is not applicable.

The suggestion is that the introduction of OECD Savings Clause does not change the law, and merely confirms the generally accepted interpretation. That is not correct, and the introduction of the OECD Savings Clause will have a significant effect in UK taxation. But tax reform by stealth is not an uncommon phenomenon.

Of course "residence" here means treaty-residence. OECD Model Commentary provides:

The term "resident", as used in paragraph 3 and throughout the Convention, is defined in Article 4. Where, under paragraph 1 of Article 4, a person is considered to be a resident of both Contracting States based on the domestic laws of these States, paragraphs 2 and 3 of that Article make it generally possible to determine a single State of residence for the purposes of the Convention. Thus, paragraph 3 does not apply to an individual or legal person who is a resident of one of the Contracting States under the laws of that State but who, for the purposes of the Convention, is deemed to be a resident only of the other Contracting State.<sup>92</sup>

### 104.9.3 BEPS MLI Savings Clause

Article 11 BEPS MLI<sup>93</sup> provides:

1. A Covered Tax Agreement shall not affect the taxation by a Contracting Jurisdiction of its residents, except with respect to the benefits granted under provisions of the Covered Tax Agreement:

There follows a list of 10 cases where the Savings Clause does not apply. Of course (unlike the OECD Model Savings Clause) this has to be

---

<sup>92</sup> Commentary on art 1, para 21.

<sup>93</sup> See 103.14 (BEPS multilateral instrument).

specified in general terms, without reference to specific article numbers:

<b>Exception</b>	<b>OECD Model</b>
a) which require that Contracting Jurisdiction to grant to an enterprise of that Contracting Jurisdiction a correlative or corresponding adjustment following an initial adjustment made by the other Contracting Jurisdiction, in accordance with the Covered Tax Agreement, to the amount of tax charged in the first-mentioned Contracting Jurisdiction on the profits of a permanent establishment of the enterprise or the profits of an associated enterprise;	7(3)
b) which may affect how that Contracting Jurisdiction taxes an individual who is a resident of that Contracting Jurisdiction if that individual derives income in respect of services rendered to the other Contracting Jurisdiction or a political subdivision or local authority or other comparable body thereof;	19
c) which may affect how that Contracting Jurisdiction taxes an individual who is a resident of that Contracting Jurisdiction if that individual is also a student, business apprentice or trainee, or a teacher, professor, lecturer, instructor, researcher or research scholar who meets the conditions of the Covered Tax Agreement;	20 - <sup>94</sup>
d) which require that Contracting Jurisdiction to provide a tax credit or tax exemption to residents of that Contracting Jurisdiction with respect to the income that the other Contracting Jurisdiction may tax in accordance with the Covered Tax Agreement (including profits that are attributable to a permanent establishment situated in that other Contracting Jurisdiction in accordance with the Covered Tax Agreement);	23A/ B
e) which protect residents of that Contracting Jurisdiction against certain discriminatory taxation practices by that Contracting Jurisdiction;	24

---

94 Some treaties make provision for teachers etc, though this is not in the OECD Model.

- f) which allow residents of that Contracting Jurisdiction to request that the competent authority of that or either Contracting Jurisdiction consider cases of taxation not in accordance with the Covered Tax Agreement; 25
- g) which may affect how that Contracting Jurisdiction taxes an individual who is a resident of that Contracting Jurisdiction when that individual is a member of a diplomatic mission, government mission or consular post of the other Contracting Jurisdiction; 28
- h) which provide that pensions or other payments made under the social security legislation of the other Contracting Jurisdiction shall be taxable only in that other Contracting Jurisdiction; 18
- i) which provide that pensions and similar payments, annuities, alimony payments or other maintenance payments arising in the other Contracting Jurisdiction shall be taxable only in that other Contracting Jurisdiction; or 18
- j) which otherwise expressly limit a Contracting Jurisdiction's right to tax its own residents or provide expressly that the Contracting Jurisdiction in which an item of income arises has the exclusive right to tax that item of income. -

Article 11(2) BEPS MLI provides:

2. Paragraph 1 shall apply in place of or in the absence of provisions of a Covered Tax Agreement stating that the Covered Tax Agreement would not affect the taxation by a Contracting Jurisdiction of its residents.

#### 104.9.4 *Savings Clause opt-out*

Article 11 BEPS MLI provides two possible opt-outs:

3. A Party may reserve the right:
- a) for the entirety of this Article not to apply to its Covered Tax Agreements;
  - b) for the entirety of this Article not to apply to its Covered Tax Agreements that already contain the provisions described in paragraph 2.

The UK has not made either of the reservations described in art

11(3)(a)(b); in short, it has adopted the BEPS MLI Savings Clause.

4. [a] Each Party that has not made the reservation described in subparagraph a) or b) of paragraph 3 shall notify the Depository of
- [i] whether each of its Covered Tax Agreements contains a provision described in paragraph 2,
  - [ii] and if so, the article and paragraph number of each such provision.
- [b] Where all Contracting Jurisdictions have made such a notification with respect to a provision of a Covered Tax Agreement, [ie where all parties to a DTA have not opted out] that provision shall be replaced by the provisions of paragraph 1.
- [c] In other cases, [ie where any party to a DTA has opted out] paragraph 1 shall supersede the provisions of the Covered Tax Agreement only to the extent that those provisions are incompatible with paragraph 1.

UK MLI Notifications<sup>95</sup> sets out a list of 23 jurisdictions which contain the provision described in art 11(2); these will fall within para 4[c] if the jurisdiction opts out of art 11.

#### 104.9.5 US Savings Clause

Article 1(4) USA/UK DTA provides:

- Notwithstanding any provision of this Convention except paragraph 5 of this Article, a Contracting State may tax
- [1] its residents (as determined under Article 4 (Residence), and
  - [2] by reason of citizenship may tax its citizens,
- as if this Convention had not come into effect.

I call this “**the US Savings Clause**” to distinguish it from OECD Savings Clause discussed above. With limited exceptions, it preserves (‘saves’) the right of the US to tax its citizens/residents irrespective of any other provision of the treaty.

So subject to the art 1(5) exceptions:

- (1) US may tax US citizens and US treaty-residents ignoring treaty relief.
- (2) UK may tax UK treaty-residents ignoring treaty relief.

---

95 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/725261/Final\\_list\\_of\\_UK\\_reservations\\_and\\_notifications\\_made\\_on\\_deposit\\_of\\_the\\_instrument\\_of\\_ratification.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf)

On the other hand, UK must allow treaty relief to US treaty-residents, and US must allow relief to UK treaty-residents who are not US citizens.

The US Treasury Technical Explanation of the Convention<sup>96</sup> provides:

Paragraph 4 contains the traditional saving clause found in U.S. tax treaties. The Contracting States reserve their rights, except as provided in paragraph 5, to tax their residents and citizens as provided in their internal laws, notwithstanding any provisions of the Convention to the contrary. For example, if a resident of the UK performs professional services in the United States and the income from the services is not attributable to a permanent establishment in the United States, Article 7 (Business Profits) would by its terms prevent the United States from taxing the income. If, however, the resident of the UK is also a citizen of the United States, the saving clause permits the United States to include the remuneration in the worldwide income of the citizen and subject it to tax under the normal Code rules (i.e., without regard to Code section 894(a)). However, subparagraph 5(a) of this Article preserves the benefits of special foreign tax credit rules applicable to the U.S. taxation of certain U.S. income of its citizens resident in the UK. See paragraph 6 of Article 24 (Relief from Double Taxation).

#### 104.9.6 *US Savings Clause: Residence*

Of course “residence” here means treaty-residence:

For purposes of the saving clause, “residence” is determined under Article 4 (Residence). Thus, an individual who is a U.S. resident under the Internal Revenue Code but who is deemed to be a resident of the UK under the tie-breaker rules of Article 4 would be subject to U.S. tax only to the extent permitted by the Convention. For example, if an individual who is not a U.S. citizen is a resident of the United States under the Code, and is also a resident of the UK under its law, and that individual has a permanent home available to him in the UK and not in the United States, he would be treated as a resident of the UK under Article 4 and for purposes of the saving clause. The United States would not be permitted to apply its statutory rules to that person if they are inconsistent with the treaty.<sup>97</sup>

---

96 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

97 The treaty continues with a comment that UK treaty-residence does not preclude US domestic-law residence, a point only relevant to the US (though a comparable rule

### 104.9.7 US Savings Clause exceptions

Art 1(5) sets out a list of exceptions to the US Savings Clause. The list is quite limited:

The provisions of paragraph 4 of this Article shall not affect—

- (a) the benefits conferred by a Contracting State under
  - [i] paragraph 2 of Article 9 (Associated Enterprises),
  - [ii] sub-paragraph (b) of paragraph 1 and paragraphs 3 and 5 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support),
  - [iii] paragraphs 1 and 5 of Article 18 (Pension Schemes) and
  - [iv] Articles 24 (Relief From Double Taxation),
  - [v] [Art] 25 (Non-discrimination), and
  - [vi] [Art] 26 (Mutual Agreement Procedure) of this Convention; ...

The US Treasury Technical Explanation of the Convention<sup>98</sup> summarises the exceptions:

Some provisions are intended to provide benefits to citizens and residents even if such benefits do not exist under internal law. Paragraph 5 sets forth certain exceptions to the saving clause that preserve these benefits for citizens and residents of the Contracting States.

Subparagraph (a) lists certain provisions of the Convention that are applicable to all citizens and residents of a Contracting State, despite the general saving clause rule of paragraph 4:

- (1) Paragraph 2 of Article 9 (Associated Enterprises) grants the right to a correlative adjustment with respect to income tax due on profits reallocated under Article 9.
- (2) Subparagraph 1(b) and paragraphs 3 and 5 of Article 17 (Pensions,

---

applies in the UK): “However, the person would be treated as a U.S. resident for U.S. tax purposes other than determining the individual’s U.S. tax liability. For example, in determining under Code section 957 whether a foreign corporation is a controlled foreign corporation, shares in that corporation held by the individual would be considered to be held by a U.S. resident. As a result, other U.S. citizens or residents might be deemed to be United States shareholders of a controlled foreign corporation subject to current inclusion of Subpart F income recognized by the corporation. See Treas. Reg. section 301.7701(b)-7(a)(3). The application of the saving clause to former citizens and long-term residents is addressed not in paragraph 4 but in paragraph 6.”

98 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

Social Security, Annuities, Alimony, and Child Support) provide exemptions from source or residence State taxation for certain pension distributions, social security payments and child support.

(3) Paragraph 1 of Article 18 (Pension Scheme) provides an exemption for certain investment income of pension schemes located in the other State, while paragraph 5 provides benefits for certain contributions by or on behalf of a U.S. citizen to certain pension schemes established in the UK.

(4) Article 24 (Relief from Double Taxation) confirms the benefit of a credit to citizens and residents of one Contracting State for income taxes paid to the other, even if such a credit may not be available under the Code.

(5) Article 25 (Non-Discrimination) requires one Contracting State to grant national treatment to nationals of the other Contracting State in certain circumstances. Excepting this Article from the saving clause requires, for example, that the United States give such benefits to a national of the UK even if that person is a citizen of the United States.

(6) Article 26 (Mutual Agreement Procedure) may confer benefits on residents or nationals of the Contracting States. For example, the statute of limitations may be waived for refunds and the competent authorities are permitted to use a definition of a term that differs from the internal law definition. As with the foreign tax credit, these benefits are intended to be granted by a Contracting State to its citizens and residents.

The list of exceptions in art 1(5) continues:

The provisions of paragraph 4 of this Article shall not affect ...

(b) the benefits conferred by a Contracting State under

[i] paragraph 2 of Article 18 (Pension Schemes) and

[ii] Articles 19 (Government Service),

[iii] Art 20 (Students),

[iv] Art 20A (Teachers), and

[v] Art 28 (Diplomatic Agents and Consular Officers)

of this Convention, upon individuals who are neither citizens of, nor have been admitted for permanent residence in, that State.

The US Treasury Technical Explanation of the Convention<sup>99</sup> provides:

Subparagraph (b) of paragraph 5 provides a different set of exceptions to

---

99 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

the saving clause. The benefits referred to are all intended to be granted to temporary residents of a Contracting State (for example, in the case of the United States, holders of non-immigrant visas), but not to citizens or to persons who have acquired permanent residence in that State. If beneficiaries of these provisions travel from one of the Contracting States to the other, and remain in the other long enough to become residents under its internal law, but do not acquire permanent residence status (i.e., in the U.S. context, they do not become “green card” holders) and are not citizens of that State, the host State will continue to grant these benefits even if they conflict with statutory rules. The benefits preserved by this paragraph are: the host country exemptions for the following items: government service salaries and pensions under Article 19 (Government Service); certain income of visiting students, trainees, teachers, professors, and researchers under Articles 20 (Students) and 20A (Teachers); the income of diplomatic agents and consular officers under Article 28 (Diplomatic Agents and Consular Officers); and the beneficial tax treatment of pension fund contributions under paragraph 2 of Article 18 (Pension Schemes).

Green card holders are at a disadvantage compared to US citizens since they pay US taxes but do not have the same benefits under the treaty. HMRC say:

HMRC explained that the UK was not obliged to give credit where the US taxed a green card holder on a world wide basis and the taxpayer was not tax resident in the US, but where we see a recharge to the US for US workdays we will accept the US has the primary taxing rights in the same way as for US citizens and we will give credit for the US tax paid on those US workdays by green cardholders. In the US a green card holder is debarred from claiming relief under a treaty. HMRC suggested that an individual who is taxed in the US on their world wide income because he retains his green card and so is treated as a resident of the US for the purposes of Article 1(4) even though they would be treaty resident in the UK may not have taken all reasonable steps to minimise their US liability, as required by s.795A ICTA if he were to qualify for credit relief. As such, although strictly Article 24(6) may not apply to green card holders in these circumstances, the effect of the minimisation requirement is that the UK will limit relief given in the UK under the treaty to that which would be given if Article 24(6) did apply. Representatives pointed out that giving up the green card might trigger expatriation taxes in the US.

The HMRC position is that we will not give relief in the UK for tax paid in the US as a result of Article 1(4). We believe that the US will give unilateral relief for the UK tax paid on their income at least to the extent it arises in the UK so as far as we know this should not lead to double taxation although it could lead to higher tax payable in the US as a result of the alternative minimum tax provisions.<sup>100</sup>

## 104.10 US DTA: Conduit arrangement

The USA/UK DTA adopts different anti-abuse methods:

- (1) excluding conduit arrangements from relief<sup>101</sup>
- (2) its own limitation on benefit rule<sup>102</sup>

OECD summarise:

The United States has implemented LOB clauses in most of its agreements. It started to include anti-treaty-shopping measures in 1962, and since the seventies, LOB clauses (which initially targeted investment or holding companies) have appeared in agreements concluded by the United States. All of the United States' agreements are supplemented by its anti-conduit regulations.<sup>103</sup>

The 2016 US Model Convention contains an express statement that the tax treaty should not create opportunities for non-taxation or reduced taxation through tax evasion or avoidance (including through treaty-shopping arrangements aimed at obtaining reliefs provided in this Convention for the indirect benefit of residents of third states).

The United States expects to comply with the minimum standard through a detailed LOB which is not available through the MLI. Therefore, the United States did not sign the MLI and will implement the minimum

---

100 <http://webarchive.nationalarchives.gov.uk/+http://www.hmrc.gov.uk/consultations/expat-mins-160409.htm>

101 The term is used in art 7 (Business Profits), art 10 (Dividends), art 11 (Interest), art 12 (Royalties), and art 22 (Other Income).

102 See 105.1 (Limitation on benefits).

103 Footnote original: See I.R.C. § 7701(l), Treas. Reg. § 1.881-3, added to the Internal Revenue Code by section 13238 of the Omnibus Budget Reconciliation Act of 1993, P.L. 103-66. It allows the Internal Revenue Service to re-characterise any multiple-party financing transaction as being a transaction directly among any two or more of its parties whenever appropriate to prevent the avoidance of the United States' tax.

standard bilaterally.<sup>104</sup>

The term “conduit arrangements” is defined in article 3(1)(n) USA/UK DTA:

the term “conduit arrangement” means a transaction or series of transactions—

- (i) which is structured in such a way that
  - [A] a resident of a Contracting State entitled to the benefits of this Convention receives an item of income arising in the other Contracting State but
  - [B] that resident pays, directly or indirectly, all or substantially all of that income (at any time or in any form) to another person
    - [1] who is not a resident of either Contracting State and
    - [2] who, if it received that item of income direct from the other Contracting State, would not be entitled under a convention for the avoidance of double taxation between the state in which that other person is resident and the Contracting State in which the income arises, or otherwise, to benefits with respect to that item of income which are equivalent to, or more favourable than, those available under this Convention to a resident of a Contracting State; and
- (ii) which has as its main purpose, or one of its main purposes, obtaining such increased benefits as are available under this Convention.

Although not treaty usage, I write Conduit Arrangement with initial capitals, to reflect the technical nature of this definition.

The US Treasury Technical Explanation of the Convention<sup>105</sup> provides:

The term is not used in the OECD or U.S. Model, but is included here at the request of the UK in order to ensure that each of the Contracting States can prevent residents of third countries from improperly obtaining the benefits of the Convention. For the UK, these transaction-based

104 OECD “OECD/G20 Base Erosion and Profit Shifting Project Prevention of Treaty Abuse - Peer Review Report on Treaty Shopping” (2019) p.241  
<https://www.oecd-ilibrary.org/docserver/9789264312388-en.pdf?expires=1550998970&id=id&accname=guest&checksum=0714C894B29FF51D6F78DD798D16F034>

105 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

anti-abuse rules are a necessary supplement to the entity-based anti-treaty shopping rules in Article 23 (Limitation on Benefits). On the other hand, U.S. domestic law provides specific anti-conduit rules ... as well as a number of other domestic anti-abuse principles (such as the business purpose doctrine) that apply in the treaty context.

An exchange of letters provides:

With respect to the United States, we intend to interpret the conduit arrangement provisions of the Convention in accordance with U.S. domestic law as it may evolve over time. The relevant law currently includes in particular the rules of regulation section 1.881-3 and other regulations adopted under the authority of section 7701(l)(1) of the Internal Revenue Code. Therefore, the inclusion of the conduit arrangement rules in the Convention does not constitute an expansion (or contraction) of U.S. domestic anti-abuse principles (except with respect to the application of anti-conduit principles to the insurance excise tax).

We understand that the UK does not have domestic law provisions relating to conduit transactions. It has, however, entered into a number of treaties which include provisions aimed at dealing with conduit-type arrangements. We understand that the UK will, subject to the limitations in Article 3(l)(n), interpret the provisions in the proposed convention in a manner consistent with its practice under those other treaties.

In practice, of course, such general principles and practice will be applied to particular fact patterns in determining whether the anti-conduit provisions will apply. In order to further develop our mutual understanding of how we each propose to apply the language, I have set out below a number of examples together with the U.S. view regarding whether benefits would be denied in each case.

HMRC consider the same examples from a UK perspective: It is helpful to read the examples side by side, followed by the US/HMRC analyses. There are 6 examples:

No	Topic
1	Dividend withholding tax
2	Simple inter-group dividend
3	Conduit arrangement: Interest WHT
4	Simple US/UK bank loan
5	“Normal” inter-group royalty
6	“Normal” inter-group finance

104.10.1 Dividend withholding tax

*US example 1*

UKCo, a publicly traded company organized in the UK, owns all of the outstanding stock of USCo. XCo, a company organized in a country that does not have a tax treaty with the US, would like to purchase a minority interest in USCo, but believes that the 30% U.S. domestic withholding tax on dividends would make the investment uneconomic.

UKCo proposes that

[1] USCo instead issue preferred stock to UKCo, paying a fixed return of 4% plus a contingent return of 20% of USCo’s net profits. The maturity of the preferred stock is 20 years.

[2] XCo will enter into a separate contract with UKCo pursuant to which it pays to UKCo an amount equal to the issue price of the preferred stock and will receive from UKCo after 20 years the redemption price of the stock. During the 20 years, UKCo will pay to XCo [a fixed return of] 3% plus 20% of USCo’s net profits.

*UK example 1*

USCo, a publicly traded company organised in the US, owns all of the outstanding stock of UKCo. XCo, a company organised in a country that does not have a tax treaty with the UK, would like to purchase a minority interest in UKCo.

USCo proposes that

[1] UKCo issue preferred stock to USCo, paying a fixed return of 4% plus a contingent return of 20% of UKCo’s net profits.

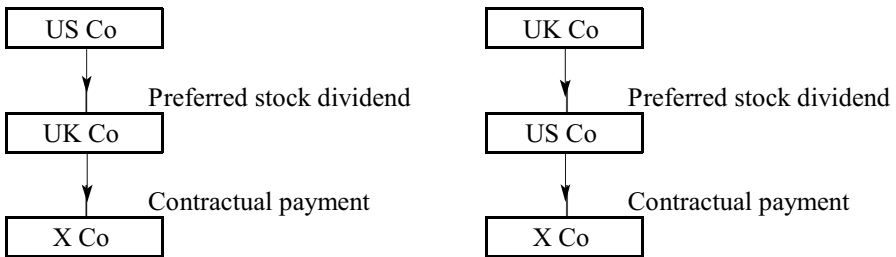

The maturity of the preferred stock is 20 years.

[2] XCo will enter into a separate contract with USCo pursuant to which it pays to USCo an amount equal to the issue price of the preferred stock and will receive from USCo after 20 years the redemption price of the stock. During the 20 years, USCo will pay to XCo 3 % [of the preferred stock subscription price] plus 20% of UKCo’s net profits.

Share structure:

Income flow:

The US analysis is as follows:

This arrangement constitutes a conduit arrangement because UKCo participated in the transaction in order to achieve a reduction in U.S. withholding tax for XCo.

The HMRC analysis is as follows:

The UK considers this arrangement would meet the objective definition of a conduit arrangement at Article 3(1)(n)(i) but because the UK has no withholding tax on dividends the motive test at Article 3(1)(n)(ii) would not be met because no increased treaty benefit would be obtained by the routing through the U.S. Therefore the arrangement would not constitute a conduit arrangement as defined by the treaty.

#### 104.10.2 *Simple inter-group dividend*

##### *US example 2*

USCo has issued only one class of stock, common stock that is 100% owned by UKCo, a company organized in the UK. UKCo also has only one class of common stock outstanding, all of which is owned by XCo, a company organized in a country that does not have a tax treaty with the US. UKCo is engaged in the manufacture of electronics products, and USCo serves as UKCo's exclusive distributor in the US. Under paragraph 4 of Article 23 (Limitation on Benefits), UKCo will

##### *UK example*

UKCo has issued only one class of stock, common stock that is 100% owned by USCo, a company organized in the US. USCo also has only one class of common stock outstanding, all of which is owned by XCo, a company organized in a country that does not have a tax treaty with the UK. USCo is engaged in the manufacture of electronics products, and UKCo serves as USCo's exclusive distributor in the UK. Under paragraph 4 of Article 23 (Limitation on Benefits), USCo will be entitled to benefits with respect to

be entitled to benefits with respect to dividends received from USCo, even though UKCo is owned by a resident of a third country.

dividends received from UKCo, even though USCo is owned by a resident of a third country.

Share structure:

The US analysis is as follows:

Because the common stock owned by UKCo and XCo does not represent a “financing transaction” within the meaning of regulation section 1.881-3 as currently in effect, on these facts, this will not constitute a conduit arrangement.

The HMRC analysis is as follows:

This seems to be a perfectly acceptable and normal commercial structure with real economic activity in both the U.S. and the UK. The payment of dividends by subsidiary companies is a normal feature of commercial life. Accordingly, in the absence of evidence that dividends were flowed through to XCo, these transactions would not constitute a conduit arrangement.

This is straightforward.

### 104.10.3 Conduit: Interest WHT

#### US example 3

XCo, a company organized in a country that does not have a tax treaty with the US, loans \$1,000,000 to USCo, its wholly-owned U.S. subsidiary in exchange for a note issued by USCo. XCo later realizes that it can avoid the U.S. withholding tax by

#### UK example 3

XCo, a company organized in a country that does not have a tax treaty with the UK, loans \$1,000,000 to UKCo, its wholly-owned UK subsidiary in exchange for a note issued by UKCo. XCo later realizes that it can avoid the UK withholding tax by assigning the note to its wholly-owned subsidiary,

assigning the note to its wholly-owned subsidiary, UKCo. Accordingly, XCo assigns the note to UKCo in exchange for a note issued by UKCo. The USCo note pays 7% and the UKCo note pays 6%.

USCo. Accordingly, XCo assigns the note to USCo in exchange for a note issued by USCo. The UKCo note pays 7% and the USCo note pays 6%.

Diagrammatically:

Income flow:

This is a classic conduit arrangement, not just one within the DTA definition. This is the same as the example considered in the context of the PPT test; see 104.8.4 (Directly or indirectly).

It therefore also raises the question whether beneficial ownership requirement of DTA interest relief is met.<sup>106</sup> But because of the Conduit Arrangement provision, it is not necessary for the Revenue authorities to rely on that point.

The example does not consider the taxation of the 6% interest paid to X Co but no doubt it is assumed some relief applies.

The US analysis is as follows:

---

106 See 104.11 (DTA beneficial owner rule).

The transaction constitutes a conduit arrangement because it was structured to eliminate the U.S. withholding tax that XCo otherwise would have paid.

The HMRC analysis is the same:

The loan note was assigned to avoid UK income tax on the payment of interest. The transaction constitutes a conduit arrangement as defined in the treaty as both the objective definition and the motive test at Article 3(l)(n)(i) and (ii) respectively are met.

#### 104.10.4 *Simple US/UK bank loan*

##### *US example 4*

XCo, a company organized in Country X, which does not have a tax treaty with the US, owns all of the stock of USCo, a company resident in the US. XCo has for a long time done all of its banking with UKCo, a company organized in the UK, because the banking system in Country X is relatively unsophisticated. As a result, XCo tends to maintain a large deposit with UKCo. UKCo is unrelated to XCo and USCo.

When USCo needs a loan to fund an acquisition, XCo suggests that USCo deal with UKCo, which is already familiar with the business conducted by XCo and USCo. USCo discusses the loan with several different banks, all on terms similar to those offered by UKCo, but eventually enters into the loan with UKCo, in part because interest paid to UKCo would not be subject to U.S. withholding tax, while interest paid to banks organized in Country X would be.

##### *UK example 4*

XCo, a company organized in Country X, which does not have a tax treaty with the UK, owns all of the stock of UKCo, a company resident in the UK. XCo has for a long time done all of its banking with USCo, a company organized in the US, because the banking system in Country X is relatively unsophisticated. As a result, XCo tends to maintain a large deposit with USCo. USCo is unrelated to XCo and UKCo.

When UKCo needs a loan to fund an acquisition, XCo suggests that UKCo deal with USCo, which is already familiar with the business conducted by XCo and UKCo. UKCo discusses the loan with several different banks, all on terms similar to those offered by USCo, but eventually enters into the loan with USCo, in part because interest paid to USCo would not be subject to UK withholding tax, while interest paid to banks organized in Country X would be.

Company/income flow diagram:

The US analysis is as follows:

The US will consider the fact that UKCo is unrelated to USCo and XCo in determining whether there is a conduit arrangement. Accordingly, this will be treated as a conduit arrangement only if UKCo would not have entered into the transaction on substantially the same terms in the absence of the XCo deposit. Under these facts, there is no conduit arrangement.

The HMRC analysis is as follows:

The fact that UK/US treaty benefits are available if UKCo borrows from USCo, and that similar benefits might not be available if it borrowed elsewhere, is clearly a factor in UKCo’s decision (which may be influenced by advice given to it by its 100% shareholder). It may even be a decisive factor, in the sense that, all else being equal, the availability of treaty benefits may swing the balance in favour of borrowing from USCo rather than from another lender. However, whether the obtaining of treaty benefits was “the main purpose or one of the main purposes” of the transaction would have to be determined by reference to the particular facts and circumstances.

Similarly, for the anti-conduit provision to apply it would have to be established that the interest paid by UKCo was “flowing through” USCo to XCo. The fact that XCo has historically maintained large deposits with USCo might, if anything, be a counter-indication. Against that, there is the question why a cash-rich company would want to increase its overall debt exposure in this way. XCo could redirect its balance with USCo and lend it to UKCo in which case it would face UK withholding tax. It chooses not to, so there is a possible argument that the transactions were structured to avoid UK withholding tax by obtaining benefits under the treaty.

On the specific facts as presented, the transactions would not constitute a conduit arrangement as defined by the treaty.

However, if USCo’s decision to lend to UKCo was dependent on XCo

providing a matching collateral deposit to secure the loan, the indication would be that XCo was in substance lending to UKCo direct but in form routing the loan through a bank with whom it has a close relationship in order to obtain the benefit of the treaty. In such circumstances the transactions would constitute a conduit arrangement as defined by the treaty.

It would be surprising if an arrangement as simple as a single bank loan were caught.

#### 104.10.5 “Normal” inter-group royalty

##### *US example 5*

UKCo, a publicly-traded company organized in the UK, is the holding company for a manufacturing group in a highly competitive technological field. The manufacturing group conducts research in subsidiaries located around the world. Any patents developed in a subsidiary are licensed by the subsidiary to UKCo, which then licenses the technology to its subsidiaries that need it. UKCo keeps only a small spread with respect to the royalties it receives, so that most of the profit goes to the subsidiary that incurred the risk with respect to developing the technology. XCo, a company located in a country with which the US does not have a tax treaty, has developed a process that will substantially increase the profitability of all of UKCo’s subsidiaries, including USCo, a company organized in the US. According to its usual practice, UKCo licenses the technology and sub-licenses the technology to its subsidiaries. USCo pays a royalty to UKCo, substantially all of which is paid to XCo.

##### *UK example 5*

USCo, a publicly-traded company organized in the US, is the holding company for a manufacturing group in a highly competitive technological field. The manufacturing group conducts research in subsidiaries located around the world. Any patents developed in a subsidiary are licensed by the subsidiary to USCo, which then licenses the technology to its subsidiaries that need it. USCo keeps only a small spread with respect to the royalties it receives, so that most of the profit goes to the subsidiary that incurred the risk with respect to developing the technology. XCo, a company located in a country with which the UK does not have a tax treaty, has developed a process that will substantially increase the profitability of all of USCo’s subsidiaries, including UKCo, a company organized in the UK. According to its usual practice, USCo licenses the technology and sub-licenses the technology to its subsidiaries. UKCo pays a royalty to USCo, substantially all of which is

paid to XCo.

Company structure:

Income flow:

The US analysis is as follows:

Because UKCo entered into these transactions in the ordinary course of its business, and there is no indication that it established its licensing business in order to reduce its U.S. withholding tax, the arrangements among USCo, UKCo and XCo do not constitute a conduit arrangement.

The HMRC analysis is as follows:

Because XCo is conforming to the standard commercial organisation and behaviour of the group in the way that it structures its licensing and sub-licensing activities and assuming the same structure is employed with respect to other subsidiaries carrying out similar activities in countries which have treaties which offer similar or more favourable benefits, the inference would be that the absence of a treaty between country X and the UK is not influencing the motive for the transactions described.

Therefore even though the specific fact pattern, as presented, meets the first part of the definition of a “conduit arrangement” at Article 3(1)(n)(i), on balance the conclusion would be that “the main purpose or one of the main purposes” of the transactions was not the obtaining of UK/US treaty benefits. So the structure would not constitute a conduit

arrangement.

#### 104.10.6 “Normal” inter-group finance

##### *US example 6*

XCo is a publicly traded company resident in Country X, which does not have a tax treaty with the US. XCo is the parent of a worldwide group of companies, including UKCo, a company resident in the UK, and USCo, a company resident in the US. USCo is engaged in the active conduct of a trade or business in the US. UKCo is responsible for coordinating the financing of all of the subsidiaries of XCo. UKCo maintains a centralized cash management accounting system for XCo and its subsidiaries in which it records all intercompany payables and receivables. UKCo is responsible for disbursing or receiving any cash payments required by transactions between its affiliates and unrelated parties. UKCo enters into interest rate and foreign exchange contracts as necessary to manage the risks arising from mismatches in incoming and outgoing cash flows. The activities of UKCo are intended (and reasonably can be expected) to reduce transaction costs and overhead and other fixed costs. UKCo has 50 employees, including clerical and other back office personnel, located in the UK. XCo lends to UKCo DM 15 million (worth \$10 million) in exchange for a 10-year note that pays interest annually at a rate of 5% per annum. On the same day, UKCo lends \$10

##### *UK example 6*

XCo is a publicly traded company resident in Country X, which does not have a tax treaty with the UK. XCo is the parent of a worldwide group of companies, including USCo, a company resident in the US, and UKCo, a company resident in the UK. UKCo is engaged in the active conduct of a trade or business in the UK. USCo is responsible for coordinating the financing of all of the subsidiaries of XCo. USCo maintains a centralized cash management accounting system for XCo and its subsidiaries in which it records all inter-company payables and receivables. USCo is responsible for disbursing or receiving any cash payments required by transactions between its affiliates and unrelated parties. USCo enters into interest rate and foreign exchange contracts as necessary to manage the risks arising from mismatches in incoming and outgoing cash flows. The activities of USCo are intended (and reasonably can be expected) to reduce transaction costs and overhead and other fixed costs. USCo has 50 employees, including clerical and other back office personnel, located in the US. XCo lends to USCo DM 15million (worth \$10 million) in exchange for a 10-year note that pays interest annually at a rate of 5% per annum.

million to USCo in exchange for a 10-year note that pays interest annually at a rate of 8% per annum. UKCo does not enter into a long-term hedging transaction with respect to these financing transactions, but manages the interest rate and currency risk arising from the transactions on a daily, weekly or quarterly basis by entering into forward currency contracts.

On the same day, USCo lends \$10 million to UKCo in exchange for a 10-year note that pays interest annually at a rate of 8% per annum. USCo does not enter into a long-term hedging transaction with respect to these financing transactions, but manages the interest rate and currency risk arising from the transactions on a daily, weekly or quarterly basis by entering into forward currency contracts.

Company structure:

Income flow structure:

The US analysis is as follows:

Because UKCo performs significant activities with respect to the transactions between USCo and XCo, the participation of UKCo is presumed not to have as one of its main purposes the avoidance of U.S. withholding tax. Accordingly, based upon the foregoing facts, the loan from XCo to UKCo and the loan from UKCo to USCo do not constitute a conduit arrangement under the Convention.

The HMRC analysis is as follows:

UKCo appears to be a real business performing substantive economic functions, using real assets and assuming real risks. USCo appears to be bearing the interest rate and currency risk. It is assumed that the transactions are typical of USCo's normal treasury business and that that business was carried on in a commercial manner.

So, on the specific facts presented, the transactions would not constitute a conduit arrangement as defined by the treaty.

## 104.11 DTA beneficial owner rule

### 104.11.1 *Beneficial-owner reliefs*

Beneficial ownership is a requirement of DT relief in 3 OECD Model articles:

Article	Topic	See para	OECD Commentary
10	Dividends	29.9	Commentary on art 10, para 12
11	Interest	25.26	Commentary on art 11, para 9
12	Royalties	31.16	Commentary on art 12, para 4

I refer to these as the three “**beneficial-owner reliefs**”.

Beneficial ownership has various meanings<sup>107</sup> and I refer to the meaning here as “DTA beneficial ownership”.

This concept of “beneficial owner” was introduced in 1977.

The Commentary material is repeated three times, in the Commentary on arts 10/11/12 (Dividends/Interest/Royalties). So it is sufficient to consider the Commentary on one article; I consider article 11.<sup>108</sup> This repetition tends to make discussion more difficult, but there it is.

### 104.11.2 *Beneficial owner: References*

DTA beneficial ownership in the following contexts is considered elsewhere:

Context	See para
Settlor-interested trusts	44.18.3

<sup>107</sup> See App.2.3 (Beneficial ownership: Meanings).

<sup>108</sup> I select art 11 because in a UK private client context, the issues perhaps arise most often in relation to interest; though it does not matter.

Fictional income	47.57.2
Hybrids	87.6.2

For further reading, see:

Wheeler, *The Missing Keystone of Income Tax Treaties* (2012) para 2.4.3 (Beneficial ownership)

OECD, “Report of the Informal Consultative Group on the Taxation of Collective Investment Vehicles” (2009) Annex 1: Background Regarding the Meaning of “Beneficial Owner” in Tax Treaties<sup>109</sup>

JBD Oliver et al, “Beneficial Ownership and OECD Model” [2001] BTR 27

### 104.11.3 *Beneficial owner: Commentary*

DTA beneficial ownership is not defined, but it is discussed in the OECD Commentary. The Commentary is not lengthy, but it is of course important:

The requirement of beneficial owner was introduced in [art 11(2)] to clarify the meaning of the words “paid to a resident” as they are used in [art 11(1)]. It makes plain that the State of source is not obliged to give up taxing rights over interest income merely because that income was paid direct to a resident of a State with which the State of source had concluded a convention.<sup>110</sup>

The word “clarify” would allow an argument that:

- (1) Pre-1977 treaties, which do not refer to beneficial ownership, should be construed in the same way.
- (2) Other articles of the OECD model, which do not refer to beneficial ownership, should be construed in the same way.<sup>111</sup>

But given the other DTA anti-abuse rules now applicable, the issue may not arise.

### 104.11.4 *DTA meaning: General*

OECD Commentary on art 11 provides:

---

109 <http://www.oecd.org/dataoecd/34/26/41974553.pdf>

110 OECD Commentary on art 11, para 9.

111 But see App.1.2 (Clarify/modernise/reform).

9.1 Since the term “beneficial owner” was added to address potential difficulties arising from the use of the words “paid to a resident” in [art 11] paragraph 1, it was intended to be interpreted in this context and not to refer to any technical meaning that it could have had under the domestic law of a specific country (in fact, when it was added to the paragraph, the term did not have a precise meaning in the law of many countries). The term “beneficial owner” is therefore not used in a narrow technical sense<sup>112</sup> (such as the meaning that it has under the trust law of many common law countries<sup>113</sup>), rather, it should be understood in its context, in particular in relation to the words “paid to a resident”, and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance.

DTA beneficial ownership is distinct from (what I call) money-laundering beneficial ownership. OECD Commentary on art 11 discusses this:

10.4 The above explanations concerning the meaning of “beneficial owner” make it clear that the meaning given to this term in the context of [Article 11] must be distinguished from the different meaning that has been given to that term in the context of other instruments<sup>114</sup> that concern the determination of the persons (typically the individuals) that exercise

---

112 Author’s footnote: For “technical” as a term of abuse, see App 1.7 (Technical); for the 3 principal senses of beneficial ownership, see App 2.3 (Beneficial ownership: Meanings).

113 Footnote original: For example, where the trustees of a discretionary trust do not distribute dividends earned during a given period, these trustees, acting in their capacity as such (or the trust, if recognised as a separate taxpayer), could constitute the beneficial owners of such income for the purposes of Article 11 even if they are not the beneficial owners under the relevant trust law.

114 The Commentary gives 2 illustrations:

(1) A moneylaundering definition, from Financial Action Task Force, “International Standards on Combating Money Laundering and the Financing of Terrorism & Proliferation – The FATF Recommendations” (2012), which defines beneficial owner (at p.110): “the natural person(s) who ultimately owns or controls a customer and/or the person on whose behalf a transaction is being conducted. It also incorporates those persons who exercise ultimate effective control over a legal person or arrangement.” This is standard in a moneylaundering context; see for example 122.12 (MLR beneficial ownership).

(2) OECD Steering Group on Corporate Governance, “Behind the Corporate Veil: Using Corporate Entities for Illicit Purposes” (2001), at p.14. I do not set out the definition here, as it does not take the discussion any further.

ultimate control over entities or assets. That different meaning of “beneficial owner” cannot be applied in the context of the Convention. Indeed, that meaning, which refers to natural persons (i.e. individuals), cannot be reconciled with the express wording of subparagraph 2 a) of Article 10, which refers to the situation where a company is the beneficial owner of a dividend. In the context of Articles 10 and 11, the term “beneficial owner” is intended to address difficulties arising from the use of the words “paid to” in relation to dividends and interest rather than difficulties related to the ownership of the shares or debt-claims on which dividends or interest are paid. For that reason, it would be inappropriate, in the context of these Articles, to consider a meaning developed in order to refer to the individuals who exercise “ultimate effective control over a legal person or arrangement”

The INT Manual provides:

**INTM332010 Double Taxation Claims And Applications: What Beneficial Ownership Is [Jun 2016]**

Beneficial ownership can be defined as: ‘the sole and unfettered right to use enjoy or dispose of’ the asset or income in question.

This is not an accurate definition, though it may be a usable rule of thumb.

104.11.5 *Beneficial owner: agent/nominee*

OECD Commentary on art 11 provides:

10. Relief or exemption in respect of an item of income is granted by the State of source to a resident of the other Contracting State to avoid in whole or in part the double taxation that would otherwise arise from the concurrent taxation of that income by the State of residence. Where an item of income is paid to a resident of a Contracting State acting in the capacity of agent or nominee it would be inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption merely on account of the status of the direct recipient of the income as a resident of the other Contracting State. The direct recipient of the income in this situation qualifies as a resident but no potential double taxation arises as a consequence of that status since the recipient is not treated as the owner of the income for tax purposes in the State of residence.

That is not controversial; now comes the extended meaning to catch conduit companies:

### 104.11.6 *Beneficial owner: Conduit co*

OECD Commentary on art 11 provides:

10.1 It would be equally inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption where a resident of a Contracting State, otherwise than through an agency or nominee relationship, simply acts as a conduit for another person who in fact receives the benefit of the income concerned. For these reasons, the report from the Committee on Fiscal Affairs entitled “Double Taxation Conventions and the Use of Conduit Companies” concludes that a conduit company cannot normally be regarded as the beneficial owner if, though the formal owner, it has, as a practical matter, very narrow powers which render it, in relation to the income concerned, a mere fiduciary or administrator acting on account of the interested parties.

10.2 In these various examples (agent, nominee, conduit company acting as a fiduciary or administrator), the direct recipient of the interest is not the “beneficial owner” because that recipient’s right to use and enjoy the interest is constrained by a contractual or legal obligation to pass on the payment received to another person.

Such an obligation will normally derive from relevant legal documents but may also be found to exist on the basis of facts and circumstances showing that, in substance, the recipient clearly does not have the right to use and enjoy the interest unconstrained by a contractual or legal obligation to pass on the payment received to another person. This type of obligation would not include contractual or legal obligations that are not dependent on the receipt of the payment by the direct recipient such as

- [1] an obligation that is not dependent on the receipt of the payment and which the direct recipient has as a debtor or as a party to financial transactions, or
- [2] typical distribution obligations of pension schemes and of collective investment vehicles entitled to treaty benefits under the principles of paragraphs 22 to 48 of the Commentary on Article 1.

Where the recipient of interest does have the right to use and enjoy the interest unconstrained by a contractual or legal obligation to pass on the payment received to another person, the recipient is the “beneficial owner” of that interest. It should also be noted that Article 11 refers to the beneficial owner of interest as opposed to the owner of the debt-claim with respect to which the interest is paid, which may be different

in some cases.

This passage was added to the OECD Commentary in 2003. But there is some tension if not inconsistency in saying:

- (1) a company is not the beneficial owner if, though the formal owner, it has, as a practical matter, very narrow powers which render it, in relation to the income concerned, a mere fiduciary or administrator acting on account of the interested parties; but
- (2) This type of obligation would not include contractual or legal obligations that are not dependent on the receipt of the payment by the direct recipient such as
  - (a) an obligation that is not dependent on the receipt of the payment and which the direct recipient has as a debtor or as a party to financial transactions, or
  - (b) typical distribution obligations of pension schemes and of collective investment vehicles

#### 104.11.7 *Indofood*

In *Indofood*,<sup>115</sup> a company (“the Indonesian co”) wished to borrow by issuing loan notes to investors (“noteholders”) not resident in Indonesia. Had it done so itself, it would be obliged to deduct 20% withholding tax from (Indonesian-source) interest payable to the noteholders. So instead:

- (1) A subsidiary in Mauritius (“the Mauritian SPV<sup>116</sup>”) issued the loan notes.
- (2) The Mauritian SPV lent the capital it raised to the Indonesian co.
- (3) The Indonesian co paid (Indonesian-source) interest to the Mauritian SPV, but under the Indonesia/Mauritius DTA (which was so far as relevant in OECD Model form)<sup>117</sup> the rate of withholding tax on the interest was reduced to 10%.

This was a standard conduit arrangement. All went well until Indonesia decided to revoke the Mauritian DTA. In consequence the withholding tax on interest paid from the Indonesian co to the Mauritian SPV would

---

<sup>115</sup> *Indofood International Finance v JP Morgan Chase Bank* [2006] EWCA Civ 158.

<sup>116</sup> SPV is (as is often in this context) a euphemism for conduit company; but I use the more neutral term.

<sup>117</sup> See 25.26 (DT relief: Interest income).

increase to 20%.

The loan notes could be redeemed early if:

- (1) There were a change in the law under which withholding tax on from interest payable from the Indonesian co to the Mauritian SPV exceeded 10%; and
- (2) The withholding tax could not be avoided by taking “reasonable measures”.

The noteholders<sup>118</sup> argued that the reasonable measure was an arrangement under which:

- (1) The Mauritian SPV assigned the benefit of the debt to a new Netherlands company, (“the Dutch SPV”), in consideration of a new debt.
- (2) The Indonesian company would pay interest to the Dutch SPV. The Netherlands/Indonesia DTA was also (so far as relevant) in OECD Model form, so the rate of withholding tax should remain 10%.
- (3) The Dutch SPV would pay interest to the Mauritian SPV, which would then pay the noteholders.

In short, this was the same conduit arrangement as before, but using a group company in the Netherlands rather than Mauritius, as the conduit company.

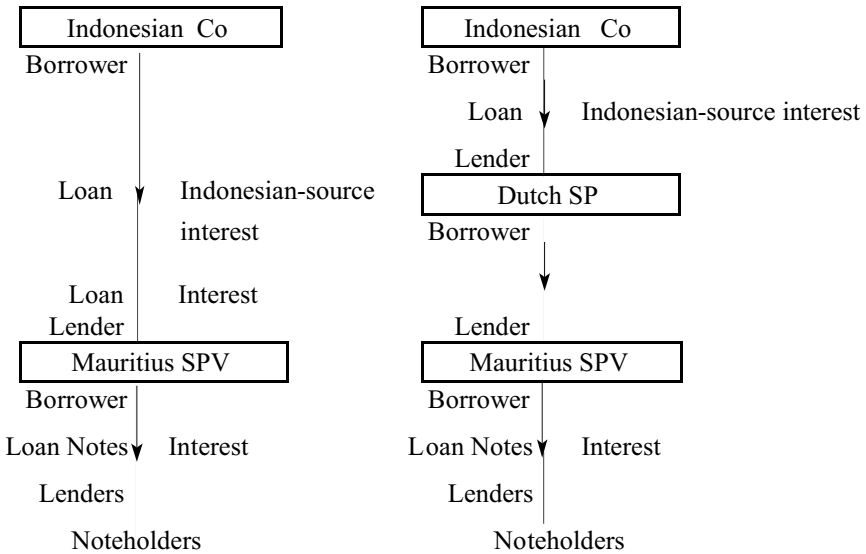

Diagrammatically:

**Original structure**

**Proposed structure**

---

118 For completeness: the noteholders were represented by JP Morgan as trustee, but nothing turns on that so I refer to the noteholders.

The question therefore arose whether the Dutch SPV would be the beneficial owner of the interest which the Indonesian co paid to it (ie whether the beneficial ownership requirement under the Netherlands/Indonesia DTA was met. The Court of Appeal read the OECD Commentary and concluded that the beneficial ownership requirement would not be met:

The fact that neither the Issuer [Mauritian SPV] nor Newco [the Dutch SPV] was or would be a trustee, agent or nominee for the noteholders or anyone else in relation to the interest receivable from the Parent Guarantor [the Indonesian co] is by no means conclusive. Nor is the absence of any entitlement of a noteholder to security over or right to call for the interest receivable from the Parent Guarantor. ... the term “beneficial owner” is to be given an international fiscal meaning not derived from the domestic laws of contracting states. As shown by those commentaries and observations, the concept of beneficial ownership is incompatible with that of the formal owner who does not have “the full privilege to directly benefit from the income”...

Turning to the facts:

The legal, commercial and practical structure behind the loan notes is inconsistent with the concept that the Issuer or, if interposed, Newco

could enjoy any such privilege. In accordance with the legal structure the Parent Guarantor is obliged to pay the interest two business days before the due date to the credit of an account nominated for the purpose by the Issuer. The Issuer is obliged to pay the interest due to the noteholders one business day before the due date to the account specified by the Principal Paying Agent. The Principal Paying Agent is bound to pay the noteholders on the due date. It is hard to see how Newco could be interposed in that chain without some change to the Loan Agreement, but, be that as it may, the Issuer is bound to pay on to the Principal Paying Agent that which it received from the Parent Guarantor because it is precluded from finding the money from any other source by the Note Conditions ...

Applying the law to these facts:

But the meaning to be given to the phrase “beneficial owner” is plainly not to be limited by so technical and legal an approach. Regard is to be had to the substance of the matter. In both commercial and practical terms the Issuer is, and Newco would be, bound to pay on to the Principal Paying Agent that which it receives from the Parent Guarantor. ... In practical terms it is impossible to conceive of any circumstances in which either the Issuer or Newco could derive any ‘direct benefit’ from the interest payable by the Parent Guarantor except by funding its liability to the Principal Paying Agent or Issuer respectively. Such an exception can hardly be described as the ‘full privilege’ needed to qualify as the beneficial owner, rather the position of the Issuer and Newco equates to that of an “administrator of the income”.

This was consistent with the purpose of a DTA:

Such a conclusion appears to me to be consistent with the evident purpose and object of the Mauritian DTA and the Dutch DTA. Their primary purpose is apparent from their respective titles. Accepting that the Dutch DTA also had as its object the encouragement of long term foreign loans, hence the inclusion of Article 11.4, none of such purposes is furthered by affording tax relief to the Parent Guarantor because it has a Mauritian or Dutch Subsidiary when such relief would not have been afforded to the Parent Guarantor had the loan been made direct to it.<sup>119</sup>

It followed that the *original* structure should also not have worked: the

---

119 *Indofood* para [42] - [45].

Mauritian SPV was also not beneficial owner of the Indonesia-source interest. But there it is. The practice of the Indonesian Revenue had changed by the time the use of the Dutch SPV was proposed. No doubt at some point HMRC's own practice changed in the same way.

Would outcome have been different if the noteholders had offered to guarantee the Indonesian co's costs of trying out the proposed arrangement? It should have been easier to argue that was a reasonable measure, if it did not cost the Indonesian company anything. And how should loan note documentation be drafted if it is desired to address this issue in the light of *Indofood*? Discuss.

HMRC naturally approve of the *Indofood* decision. The INT Manual provides:

**INTM332050 HMRC Reaction To Indofood Case [Jun 2018]**

1 As can be seen from the above, the Court did not interpret the various DTAs in the light of Indonesian law but adopted an interpretation consistent with OECD interpretations. Following legal advice, HMRC's view is that the "beneficial ownership" decision, as far as it relates to Double Taxation Conventions (DTCs), is now part of UK law.

More analytically, the decision is one of fact, not law (namely, how would Indonesian Court decide the matter?); so it is persuasive rather than binding in the UK. However the UK courts can be expected to follow this, so the matter is settled below the level of the Supreme Court.

The decision is also likely to be of persuasive force where related issues for UK DTCs are being considered and that, where it is relevant, HMRC is obliged to follow it. Since the Court of Appeal decision is fully consistent with the UK's existing policy HMRC does not think that, in general, the case will have a significant impact on its current practice.

HMRC summarise the decision thus:

2 The key point is that, in *Indofood*, the Court of Appeal has simply confirmed that, in line with the OECD Commentary, beneficial ownership "should be understood in its context and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance" and that tests of the legal structure, and of the commercial and practical substance of the scheme, should be adopted to determine beneficial ownership. The Court of Appeal decision is consistent with HMRC's view of all DTC articles

referring to beneficial ownership. This covers the Articles on interest, royalties and if appropriate dividends. The comments made in this guidance regarding interest will also apply to royalty and dividend payments.

3 It is HMRC policy that, where there is treaty abuse (such as, say, “treaty shopping”), interpreting “beneficial ownership” in what the Court of Appeal called its “narrow technical” UK domestic law meaning would not give effect to the purpose and object of the DTC of preventing fiscal evasion, indeed it would be contrary to the object of the DTC to allow such treaty abuse. On the other hand, interpreting “beneficial ownership” in what the Court of Appeal called its “international fiscal meaning” clearly gives effect to the purpose and object of the DTC by excluding abusive cases such as “treaty shopping” from the benefits of a DTC.

#### 104.11.8 *Beneficial ownership: EU law*

Art 1(1) Interest and Royalties Directive<sup>120</sup> provides:

Interest or royalty payments arising in a Member State shall be exempt from any taxes imposed on those payments in that State ... provided that the beneficial owner of the interest or royalties is

[a] a company of another Member State or

[b] a permanent establishment situated in another Member State of a company of a Member State.

In this case (unlike the OECD Model) there is a definition of beneficial ownership. Article 1(4) IRD provides:

A company of a Member State shall be treated as the beneficial owner of interest or royalties only if it receives those payments for its own benefit and not as an intermediary, such as an agent, trustee or authorised signatory, for some other person.

Perhaps this does not take us far.

CJEU compared the different language versions of the directive, which express the beneficial ownership condition in different ways, whose English equivalents are given as:

- Beneficiary/recipient<sup>121</sup>

---

120 2003/49/EC (3 June 2003).

121 Bulgarian, French, Latvian, Romanian

- Beneficial owner/actual beneficiary<sup>122</sup>
- Owner/person entitled to use<sup>123</sup>
- Person entitled in the end<sup>124</sup>

CJEU said:

The use of those various expressions underscores that the term ‘beneficial owner’ concerns not a formally identified recipient but rather the entity which benefits economically from the interest received and accordingly has the power freely to determine the use to which it is put...

Apart from the Dutch version, perhaps, the reader may question that reasoning; but there it is.

90 ... the directive draws upon Article 11 of the OECD 1996 Model Tax Convention and pursues the same objective, namely avoiding international double taxation. The concept of ‘beneficial owner’, which appears in the bilateral conventions based on that model, and the successive amendments of that model and of the commentaries relating thereto are, therefore, relevant when interpreting Directive 2003/49.

92 It is clear from the development ... of the OECD Model Tax Convention and the commentaries relating thereto that the concept of ‘beneficial owner’ excludes conduit companies and must be understood not in a narrow technical sense but as having a meaning that enables double taxation to be avoided and tax evasion and avoidance to be prevented.

... Article 1(1) of Directive 2003/49, read in conjunction with Article 1(4) thereof, must be interpreted as meaning that the exemption of interest payments from any taxes that is provided for by it is restricted solely to the beneficial owners of such interest, that is to say, the entities which actually benefit from that interest economically and accordingly have the power freely to determine the use to which it is put.

In principle this should be welcomed, as the fewer concepts of Beneficial Ownership, the better.

#### 104.11.9 Abuse of rights

---

122 Spanish, Czech, Estonian, English, Italian, Lithuanian, Maltese, Portuguese, Finnish

123 German, Danish, Greek, Croat, Hungarian, Polish, Slovak, Slovenian, Swedish

124 Dutch

CJEU continue:

The general principle of EU law that EU law cannot be relied on for abusive or fraudulent ends must be interpreted as meaning that, where there is a fraudulent or abusive practice, the national authorities and courts are to refuse a taxpayer the exemption of interest payments from any taxes that is provided for in Article 1(1) of Directive 2003/49, even if there are no domestic or agreement-based provisions providing for such a refusal.

127 A group of companies may be regarded as being an artificial arrangement where it is not set up for reasons that reflect economic reality, its structure is purely one of form and its principal objective or one of its principal objectives is to obtain a tax advantage running counter to the aim or purpose of the applicable tax law. That is so inter alia where, on account of a conduit entity interposed in the structure of the group between the company that pays interest and the entity which is its beneficial owner, payment of the tax on the interest is avoided.

128 Thus, it is an indication of the existence of an arrangement intended to obtain improper entitlement to the exemption provided for in Article 1(1) of Directive 2003/49 that all or almost all of the aforesaid interest is, very soon after its receipt, passed on by the company that has received it to entities which do not fulfil the conditions for the application of Directive 2003/49, either because those entities are not established in any Member State, or because they are not incorporated in one of the forms referred to in the annex to the directive, or because they are not subject to one of the taxes listed in Article 3(a)(iii) of the directive without being exempt, or because they do not have the status of associated company within the meaning of Article 3(b) of the directive.

#### 104.11.10 *Beneficial owner/abuse compared*

CJEU continue:

131 The fact that a company acts as a conduit company may be established where its sole activity is the receipt of interest and its transmission to the beneficial owner or to other conduit companies. The absence of actual economic activity must, in the light of the specific features of the economic activity in question, be inferred from an analysis of all the relevant factors relating, in particular, to the management of the company, to its balance sheet, to the structure of its costs and to expenditure actually incurred, to the staff that it employs and to the premises and equipment that it has.

132 Indications of an artificial arrangement may also be constituted by the various contracts existing between the companies involved in the financial transactions at issue, giving rise to intragroup flows of funds which, as is mentioned in Article 4 of Directive 2003/49, may have the aim of transferring profits from a profit-making commercial company to shareholding entities in order to avoid the tax burden or reduce it as much as possible. The way in which the transactions are financed, the valuation of the intermediary companies' equity and the conduit companies' inability to have economic use of the interest received may also be used as indications of such an arrangement. In this connection, such indications are capable of being constituted not only by a contractual or legal obligation of the company receiving interest to pass it on to a third party but also by the fact that, 'in substance', ... that company, without being bound by such a contractual or legal obligation, does not have the right to use and enjoy those sums.

133 Moreover, such indications may be reinforced by the simultaneity or closeness in time of, on the one hand, the entry into force of major new tax legislation, such as the Danish legislation at issue in the main proceedings, which some of the groups of companies strive to circumvent and, on the other hand, the setting up of complex financial transactions and the grant of intragroup loans.

CFE say:

25. The concepts of beneficial ownership and abuse of law are intertwined in the Court's analysis. This may not seem surprising at first, considering the indubitable purpose of the beneficial ownership concept in tax treaties to counter some specific forms of tax avoidance, i.e., "those involving the interposition of a recipient who is obliged to pass on the interest to someone else".<sup>125</sup> Just like in the OECD MC, however, the "beneficial ownership" concept merely aims at avoiding specific types of abuses and not all possible avoidance structures. As pointed out by AG Kokott, the concerns addressed by the abuse concept and the beneficial ownership concept are fundamentally different,<sup>126</sup> and also the Court appears to recognize the difference between both concepts at certain stages of its analysis, making it clear that denial of a benefit based on a lack of "beneficial ownership" (e.g., because the beneficial owner is an entity resident in a non-EU Member State) does not require tax authorities to prove abuse of law.<sup>127</sup> That seems to be a reasonable

---

125 Footnote original: See, e.g., Art 11 no. 10.3 OECD MC Comm. 2017.

126 Footnote original: See, e.g., the Opinion of AG Kokott in *N Luxembourg I* (C-115/16), para. 60.

127 Footnote original: See *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 138, and *T Danmark et al* (C-116/16 and C-117/16), para. 111.

understanding of the IRD, which explicitly contains a “beneficial owner” requirement, but needs some purposive interpretation of the PSD, which does not explicitly contain such a requirement. Essentially avoiding the Danish court’s question whether the tax treaty concept of beneficial ownership can constitute a legal basis for combating fraudulent and abusive practices in the context of (old) Art 1(2) PSD,<sup>128</sup> the Court took a different path from AG Kokott’s Opinions<sup>129</sup> and seems to assume that a “beneficial owner” requirement is implicit in the PSD as stand-alone anti-avoidance tool.<sup>130</sup> Even in non-abuse situations, therefore, the PSD’s withholding tax exemption in the source Member State would not be applicable if the “beneficial owner” of a dividend resides outside the EU. The Court finds support for that conclusion based on the aim of the PSD to avoid double taxation of profit distributions within the EU<sup>131</sup> and moreover ensures teleological consistency between the IRD and the PSD despite their different wording and definitions.

26. However, “beneficial ownership”-related elements also found their way into the Court’s list of indicative criteria for abuse. As for “beneficial ownership” the Court confined itself to the statement that it is an economic concept denoting the “entity which benefits economically from the interest received and accordingly has the power freely to determine the use to which it is put”.<sup>132</sup> The Court’s subsequent analysis regarding the constituent elements of abuse of rights also employs some similar notions – e.g., the reference to “the conduit companies’ inability to have economic use of the interest

---

128 Footnote original: *T Danmark et al* (C-116/16 and C-117/16), para. 93.

129 Footnote original: See the Opinions of AG Kokott of 1 March 2018 in Cases C-116/16 (*T Danmark*, EU:C:2018:144, paras 78-86) and C-117/16 (*Y Denmark*, EU:C:2018:145, paras 78-86).

130 Footnote original: *T Danmark et al* (C-116/16 and C-117/16), para. 111 (“[W]here the beneficial owner of dividends paid is resident for tax purposes in a third State, refusal of the exemption provided for in Article 5 of [the PSD] is not in any way subject to fraud or an abuse of rights being found”).

131 Footnote original: See *T Danmark et al* (C-116/16 and C-117/16), para. 113: “The mechanisms of Directive 90/435, in particular Article 5, are therefore intended for situations in which, if they were not applied, the exercise by the Member States of their powers of taxation might lead to the profits distributed by the subsidiary to its parent company being subject to double taxation [...]. Such mechanisms are not, on the other hand, intended to apply when the beneficial owner of the dividends is a company resident for tax purposes outside the European Union since, in such a case, exemption of those dividends from withholding tax in the Member State from which they are paid could well result in them not actually being taxed in the European Union.” It might be noted in passing that this argument is not fully intuitive, as the PSD would always lead to non-taxation of the distribution (if the parent company’s Member State has chosen the exemption method under Art 4 PSD); what the Court seems to imply is that a withholding tax exemption in a Member State should not economically benefit a third State.

132 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 89.

received”<sup>133</sup> or “that all or almost all of the aforesaid interest is, very soon after its receipt, passed on by the company that has received it to entities which do not fulfil the conditions for the [IRD]”<sup>134</sup> – but moreover refers to the situation of a recipient company that does not “in substance” have the right to use and enjoy the sum it received: Indications for abuse “are capable of being constituted not only by a contractual or legal obligation of the company receiving interest to pass it on to a third party but also by the fact that, ‘in substance’ [...] that company, without being bound by such a contractual or legal obligation, does not have the right to use and enjoy those sums.”<sup>135</sup> This ostensibly goes beyond the OECD MC Commentary’s guidance on “beneficial ownership” since the 2014 Update, which confines the denial of treaty benefits to situations where such contractual or legal obligation exists.<sup>136</sup> While that conclusion would normally derive from relevant legal documents, it “may also be found to exist on the basis of facts and circumstances showing that, in substance, the recipient clearly does not have the right to use and enjoy the interest unconstrained by a contractual or legal obligation to pass on the payment received to another person”.<sup>137</sup> While the latter “in substance”-determination under the OECD MC might reasonably be understood as a mere procedural standard of proof, the context of the Court’s inquiry suggests that it did not interpret the concept of beneficial ownership in this context but rather within the concept of artificial arrangements. As a result, this may be best understood as clarifying the relationship between beneficial ownership and the abuse of law: An entity may well be the beneficial owner (as interpreted in conformity, most likely, with the OECD material), yet still be denied the directive’s benefits due to the artificiality of the legal structure.

27. As for the constituent elements of an abuse of rights and the relevant evidence, it is quite surprising that the Court refrained from utilizing its recent decisions on the concept of abuse in the PSD in *Eqiom*<sup>138</sup> and *Deister and Juhler*.<sup>139</sup> Possibly creating “new” standards that foreshadow the imminent interpretation of the GAAR in Art 6 ATAD and

139 Footnote original: ECJ, 20 December 2017, C-504/16 and C-613/16, *Deister Holding AG and Juhler Holding A/S v Bundeszentralamt für Steuern*, EU:C:2017:1009.

the minimum anti-avoidance standard in (new) Art 1(2), (3) PSD, the Court identifies a set of indicia that national courts must take into account in assessing whether a transaction abusive.<sup>140</sup> Those criteria include the conduit role of an entity, lack of economic substance and exercise of very limited activities (to be inferred from an analysis of all the relevant facts, including the management of the company, the cost structure, the presence of staff, premises and equipment) and that the structure was put in place simultaneously or shortly after the introduction of changes in the tax laws of the source EU Member State or any other (third) State.<sup>141</sup> Needless to say, all those criteria on one hand may help national courts to identify abusive situations but, on the other hand, they are necessarily vague and may lead to quite some uncertainty going forward.

28. It seems, moreover, that the Court wanted to put a “sword” in the hands of national tax authorities also with regard to the allocation of the burden of proof:

a. First, the Court was rather reluctant to fully embrace the obvious argument that no abuse exists where the same tax burden would result without the interposition of EU intermediary companies because a tax treaty would grant the same benefits also to the “direct” third-State recipients<sup>142</sup> (and the corresponding reasoning of AG Kokott).<sup>143</sup> It is, however, hard to see how a “tax advantage” (as required by the general principle as well as, e.g., by Art 6 ATAD) would be obtained if the “genuine” arrangement, e.g. direct ownership, would have triggered the same (low) tax burden in the source State.<sup>144</sup> The Court seems to recognize that argument half-heartedly by noting that “it remains possible, in a situation where the interest would have been exempt had it been paid directly to the

144 Footnote original: See also, e.g., Opinion AG Kokott, 19 January 2017, C-6/16, *Eqiom SAS, formerly Holcim France SAS and Enka SA v Ministre des Finances et des Comptes publics*, EU:C:2017:34, para. 26 with footnote 14, where a holding of a French subsidiary not through an interposed EU company but rather directly by the Swiss parent would likewise not have triggered a withholding tax because of Art 15 of the EU-Swiss Agreement, [2004] OJ L 385, p. 30 (now Art 9 of the EU-Swiss Agreement, [2015] OJ L 333, p. 12).

company having its seat in a third State, that the aim of the group's structure is unconnected with any abuse of rights. In such a case, the group cannot be reproached for having chosen such a structure rather than direct payment of the interest to that company".<sup>145</sup> Moreover, the Court had also noted the different effects of the beneficial ownership requirement and the anti-abuse principle, as – irrespective of any finding of fraud or abuse – “beneficial owners” in third states are not beneficiaries of the IRD in the first place.<sup>146</sup>

b. Second, the Court found that the tax authorities are not even required to identify the entity which they regard to be the beneficial owner<sup>147</sup> (again departing from AG Kokott's conclusions).<sup>148</sup> The Court based that latter conclusion on the fact that “the national tax authority does not necessarily have information enabling it to identify those owners” so that it “cannot be required to furnish evidence that would be impossible for it to provide”;<sup>149</sup> and even if they were known, said the Court, “it is not necessarily established which of them are or will be the actual beneficial owners”.<sup>150</sup> That said, it is not entirely clear if the taxpayers could nevertheless show – in line with their burden of proof<sup>151</sup> – who the beneficial owner really is and claim corresponding benefits. Assume, for example, that the beneficial owner is a qualified EU company on top of a chain of (artificially interposed) third-State and EU-entities. In that case the Court – in line with the current OECD MC Commentaries<sup>152</sup> – clearly prefers an approach that “ignores” the non-beneficial owners and grants the IRD's benefits if the beneficial owner is indeed a

qualified EU company.<sup>153</sup><sup>154</sup>

#### 104.11.11 *Beneficial owner in treaty State*

CJEU continue:

134 The referring courts are also unsure, in essence, whether there can be an abuse of rights where the beneficial owner of interest transferred by conduit companies is ultimately a company whose seat is in a third State with which the source Member State has concluded a tax convention under which no tax would have been withheld on the interest if the interest had been paid directly to the company having its seat in that third State.

135 In that regard, when examining the structure of the group it is immaterial that some of the beneficial owners of the interest paid by the conduit company are resident for tax purposes in a third State which has concluded a double taxation convention with the source Member State. The existence of such a convention cannot in itself rule out an abuse of rights. Thus, a convention of that kind cannot call into question that there is an abuse of rights where its existence is duly established on the basis of a set of facts showing that economic operators have carried out purely formal or artificial transactions devoid of any economic and commercial justification, with the essential aim of benefiting improperly from the exemption from any taxes that is provided for in Article 1(1) of Directive 2003/49.

136 It should be added that, whilst taxation must correspond to economic reality, the existence of a double taxation convention is not, as such, capable of establishing that a payment was really made to recipients resident in the third State with which that convention has been concluded. If the company owing the interest wishes to benefit from the

---

153 Footnote original: *N Luxembourg I et al* (C-115/16, C-118/16, C-119/16 and C-299/16), para. 94, finding “that the mere fact that the company which receives the interest in a Member State is not its ‘beneficial owner’ does not necessarily mean that the exemption provided for in Article 1(1) of [the IRD] is not applicable. It is conceivable that such interest will be exempt on that basis in the source State when the company which receives it transfers the amount thereof to a beneficial owner who is established in the European Union and furthermore satisfies all the conditions laid down by [the IRD] for entitlement to such an exemption.”

154 CFE Opinion Statement ECJ-TF 2/2019

[http://taxadviserseurope.org/wp-content/uploads/2019/06/ECJ-TF\\_2-2019\\_Beneficial-Ownership.pdf](http://taxadviserseurope.org/wp-content/uploads/2019/06/ECJ-TF_2-2019_Beneficial-Ownership.pdf)

advantages of such a convention, it is open to it to pay the interest directly to the entities that are resident for tax purposes in a State which has concluded a double taxation convention with the source State.

137 That said, it remains possible, in a situation where the interest would have been exempt had it been paid directly to the company having its seat in a third State, that the aim of the group's structure is unconnected with any abuse of rights. In such a case, the group cannot be reproached for having chosen such a structure rather than direct payment of the interest to that company.

138 Furthermore, where the beneficial owner of interest paid is resident for tax purposes in a third State, refusal of the exemption provided for in Article 1(1) of Directive 2003/49 is not in any way subject to fraud or an abuse of rights being found. As has been stated, in essence, in paragraph 86 above, that provision is designed to exempt interest payments in the source Member State only where the beneficial owner of the interest is a company established in another Member State or a permanent establishment situated in another Member State belonging to a company of a Member State.<sup>155</sup>

#### 104.11.12 *Beneficial ownership: Transparent entity*

What is required is beneficial ownership of the dividend/interest/royalty; not beneficial ownership of the underlying shares/loan/intellectual property. See too 87.6.2 (Hybrid is nominee/agent).

### 104.12 **Bona fide conduit co**

The INT Manual provides:

#### **INTM332050 HMRC Reaction To Indofood Case [Jun 2018]**

4 Although, in the context of DTCs, beneficial ownership will take what the Court of Appeal decision accepted as an “international fiscal meaning” rather than a UK domestic meaning, in HMRC's view there are unlikely to be many cases where the difference is material.

The reader may wonder about point 4. The next para of the INT Manual observes that “Many capital market transactions involve SPVs which may

---

155 *Skatteministeriet v Danmark* C-115/16. See CFE Opinion Statement ECJ-TF 2/2019  
[http://taxadviserseurope.org/wp-content/uploads/2019/06/ECJ-TF\\_2-2019\\_Beneficial-Ownership.pdf](http://taxadviserseurope.org/wp-content/uploads/2019/06/ECJ-TF_2-2019_Beneficial-Ownership.pdf)

not satisfy the test of beneficial ownership under an international fiscal meaning.” But the author is anticipating the passage which follows:

... The issue would only arise when the substance of an arrangement amounts to an improper use of the relevant DTC in the light of the DTC’s object of prevention of fiscal evasion and avoidance, for example “treaty shopping”. Treaty shopping is only likely to take place

- [1] where the “real” beneficial owner of the income, such as “the immediate underlying lender” in the case of interest, is resident in a state with which the UK has either no DTC or a DTC less favourable than the DTC applicable to the intermediate lender, or
- [2] if the recipient of an income stream into which an intermediate lender has been interposed is resident in such a state (regardless of whether they themselves are the beneficial owner).

These are the only situations where HMRC believe further consideration of the “international fiscal meaning” will be needed.

5 Where both the intermediate and the underlying lender are resident in states with which the UK has essentially similar DTCs, no issue is likely to arise, even where the intermediate lender is not, under the so called “international fiscal meaning” of the phrase, the beneficial owner of the interest, as there would be no fiscal evasion or avoidance. This is because in these circumstances it is unlikely that the effect of the arrangement is the avoidance of UK withholding tax, since the level of UK withholding tax would have been the same with or without the intermediate lending.

### **INTM332060 Indofood: Impact On Particular Cases** [Jun 2018]

1 Many capital market transactions involve SPVs which may not satisfy the test of beneficial ownership under an “international fiscal meaning”. Securitisation programmes, for example, in respect of mortgage backed loans and other debt receivables are commonplace ways of raising finance. Typically such programmes involve a SPV which issues bonds to third party investors and employs the proceeds from the bonds to purchase the receivables or debt secured on the receivables (see below where these are quoted Eurobonds). The SPV is typically required to pass on the income received from the underlying assets to the bondholders (subject to hedging arrangements and less a small spread to cover fees etc). Where the SPV is resident outside the UK, an application will have to be made by the non-resident to enable the interest that is backed by the receivables to be paid gross to the SPV. The SPV in such an arrangement may not be the beneficial owner of the income under the

international fiscal meaning; it often has very narrow powers over the income and its obligations to the bondholder mean that it is unlikely to ‘enjoy the full privilege to directly benefit from the income’.

2 However, as indicated above in applying the beneficial ownership concept in the context of Double Taxation Conventions (DTCs), regard should be had to the objective of the DTC. Where there is no abuse of the DTC, there is no need, in practice, to apply the “international fiscal meaning” of beneficial ownership. The object of the treaty is likely to be met just as easily using the UK domestic law meaning of beneficial ownership.

3 HMRC will also accept that there is no need to invoke the “international fiscal meaning” of beneficial ownership to deny treaty benefits where the lender receiving income directly from the SPV (the “true” beneficial owner of the interest) would, if they had been the direct recipient of the interest, have been entitled to treaty benefits as a resident of a state with which the UK has a DTC with zero withholding on interest. It is not necessary for the beneficial [owner<sup>156</sup>] in this scenario to have made a formal claim for treaty benefits in order to assess what entitlement to claim would have arisen.

So HMRC allow the 3 beneficial-owner reliefs to a company where:

- (1) The company is the beneficial owner in the English law sense (equitable ownership)
- (2) The person is not the beneficial owner (in the DTA sense) but
- (3) There is no treaty abuse

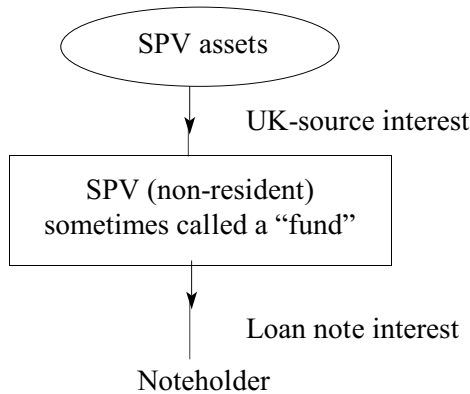

In the following discussion, I refer to the company as the “**bona fide conduit company**”, and the practice is the “**bona fide conduit concession**”.

The reader may think it a flaw in the *Indofood* decision that it did not mention these difficulties; but there it is.

The examples which follow concern the following structure (or some variant):

---

156 The original erroneously reads: lender.

### 104.12.1 Eurobonds

The INT Manual continues:

1 Many of the transactions involve SPVs issuing Quoted Eurobonds. No UK withholding tax is payable on interest from Quoted Eurobonds so no treaty claim is needed.

2 HMRC therefore accept that the question of invoking the “international fiscal meaning” of beneficial ownership to deny treaty benefits will not arise where the bond issued by the non-resident SPV is a Eurobond as defined in ITA07/S987.

One might have thought that what matters is whether the bonds *acquired* by the SPV are Eurobonds (not the bond *issued* by the SPV). It is interest paid to the SPV from the SPV assets which require withholding tax relief of one kind or another. Clearly if the SPV assets are quoted Eurobonds, which are not subject to withholding tax,<sup>157</sup> the issue of DTA relief does not arise.

### 104.12.2 Fund investing in UK loans

The INT Manual continues:

1 A recent capital market development has been the establishment of various types of European-based funds that purchase loans to UK borrowers. Funds of this type include Collateralised Debt Obligations (CDOs) and Collateralised Loan Obligations (CLOs) in addition to mezzanine funds. They will typically own a portfolio of assets and issue several classes of securities whose performance reflects the performance of the underlying

---

<sup>157</sup> See 25.22.7 (Quoted Eurobond).

assets. For a number of reasons such funds may not be resident in the UK. They are therefore required to make treaty applications to receive the interest of the purchased loan assets without deduction of tax.

2 As with securitisation SPVs, many of these arrangements may not satisfy the test of beneficial ownership under an “international fiscal meaning”. The fund often has very narrow powers over the income and its obligations to the investors in the securities mean that it is unlikely to ‘enjoy the full privilege to directly benefit from the income’. It may therefore appear that such funds would be denied treaty benefits under the “international fiscal meaning” of beneficial ownership.

3 However, as indicated above, [the bona fide conduit concession] in applying the beneficial ownership concept in the context of DTCs regard should be had to the object of the DTC. Where there is no abuse of the DTC, there is no need, in practice, to apply the “international fiscal meaning” of beneficial ownership. The object of the treaty is likely to be met just as easily using the UK domestic meaning.

4 As with securitisation SPVs, many of these types of transactions involve Quoted Eurobonds. For the reasons set out above, the intervention of the non-UK SPV does not reduce the level of UK withholding tax. HMRC will therefore accept that there is no need to invoke the “international fiscal meaning” of beneficial ownership to deny treaty benefits where the bond issued by the non-resident SPV is a Quoted Eurobond as defined in ITAO7/S987.

### 104.12.3 *Syndication/sub-participation*

The INT Manual continues:

1 A loan which is made as a normal part of banking business and which is subsequently subject to sub-participation, again in the ordinary course of banking business, is unlikely to have been so structured with the aim of taking advantage of treaty benefits. Subsequent participation will not cause HMRC to change its view on the application of the “international fiscal meaning” to the original lending.

2 However treaty abuse would arise where lenders who would not be entitled to treaty benefits, arrange for the loan to be initiated via a bank lender in a treaty country. HMRC does not consider this to be normal commercial syndication as part of the ordinary course of banking business - the interposition of the bank lender merely serves to gain treaty benefits that would not otherwise have accrued.

3 Examples of the application of the HMRC view are included at INTM332080. These are illustrative only and should not be taken as limiting the circumstances in which HMRC will apply the “international definition”.

4 The general principle underlying HMRC interpretation is that treaty abuse will not normally arise where the interposition of an intermediate lender would not improve the withholding tax position of interest paid by the UK borrower, when compared to the withholding tax that would have arisen had that intermediate lender not been interposed. Cases falling outside the examples would need to be considered on an individual basis.

### 104.12.4 *Claims for DTA relief*

### **INTM332070 DT Applications And Claims: Indofood: Existing And New Cases [May 2019]**

1 Where structures are within the ambit of the Indofood decision, that is to say the structure has the accessing of treaty benefits as one of its effects, it is possible that applications to HMRC for benefits under a Double Taxation Convention (DTC) will fall at the first hurdle unless the applicant can demonstrate beneficial ownership. The application might simply be regarded as invalid and never reach the stage where it can be considered in terms of the object and purpose of the particular DTC under which the application is made.

2 However, where the claimant Special Purpose Vehicle (SPV) does not satisfy the “international fiscal meaning” of beneficial ownership but believes that it is still able to obtain treaty benefits because of the policy confirmed in this guidance, it should make its claim and include a note to that effect. To ease consideration of the claim, the note should include full details as to

- A full structure diagram and explanation of the capital and interest flows;
- why the SPV is considered to be the beneficial owner within the “international fiscal meaning”; or
- demonstrate that the structure does not abuse the DTC under which the claim is made either relating the structure to the examples at INTM332080 or otherwise.

HMRC give 8 examples:

<b>No</b>	<b>Facts</b>	<b>Relief</b>
1	Securitisation using offshore SPV funded by listed bonds	Yes
2	Securitisation using offshore SPV funded by listed bonds and UK bank debt	Yes
3	Securitisation using offshore SPV funded by listed bonds and unlisted debt from resident of a “zero rate country”	Yes
4	Securitisation of non-corporate assets using offshore SPV	Yes
5	Access to US commercial paper market using US SPV	Yes
6	Access to US commercial paper market using US and Irish SPVs	Yes
7	Access to group-sourced funding from Non treaty country using Lux. conduit co	No
8	Access to group-sourced funding from Treaty country using Lux. conduit co	Yes

### **INTM332080 Double Taxation Applications And Claims: Indofood: Examples Of Application [Jun 2018]**

#### **Example 1: Securitisation using offshore Special Purpose Vehicle (SPV) funded by listed bonds**

As part of a securitisation arrangement, an SPV is established in Ireland. It purchases UK interest bearing receivables, funding itself with listed bonds which, if issued by a UK

resident company, would qualify for exemption from withholding tax by virtue of the quoted Eurobond exemption at ITA07/S882.<sup>158</sup> The UK source interest is paid to the SPV which, in turn, pays interest to the bondholders who are resident in a variety of different countries.

The SPV is not the beneficial owner of the income within the “international fiscal meaning” of that phrase because it has only narrow powers over the income and its obligations to the bondholders mean that it is unlikely to ‘enjoy the full privilege to directly benefit from the income’.

But in these circumstances, it is unlikely that the purpose of the arrangement is the avoidance of UK withholding tax, since the UK withholding tax on the UK source interest is the same with the SPV (nil because of the terms of the UK/Ireland Double Taxation Convention (DTC) which provide for a zero rate of UK withholding tax on interest) as it is without the SPV (nil because of ITA07/S882).

Accordingly HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the SPV on the grounds that the SPV is not the beneficial owner of the income within the “international fiscal meaning” of that phrase.

In considering the purpose and effect of the interposing of an SPV, it is also necessary to look at other costs and activities of the SPV. However, expenses which are derived from the financing but which are incidental to the purpose of that financing (such as hedging costs) will not affect the HMRC view set out in this guidance.

**Example 2: Securitisation using offshore SPV funded by combination of listed bonds and UK bank debt**

The facts are the same as Example 1 except that the SPV also issues unlisted debt which is held by a UK financial institution sponsor.

As in Example 1, it is unlikely that the purpose of the arrangement is the avoidance of UK withholding tax since, again, the UK withholding tax on the UK source interest is the same with the SPV (nil because of the terms of the UK/Ireland DTC) as it is without the SPV (nil: partly because of ITA07/S882 [quoted Eurobond exemption] and partly because of section ITA07/S879(1) [interest paid to UK bank]).<sup>159</sup>

As in Example 1, the SPV is not the beneficial owner of the income within the “international fiscal meaning” of that phrase. But, again, HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the SPV on the grounds that the SPV is not the beneficial owner of the income within the “international fiscal meaning” of that phrase.

**Example 3: Securitisation using offshore SPV funded by combination of listed bonds and unlisted debt from resident of a “zero rate country”**

The facts are the same as Example 1 except that the SPV also issues unlisted debt which is held by a US company.

As in Examples 1 and 2, the SPV is not the beneficial owner of the income within the “international fiscal meaning” of that phrase.

---

158 See 104.12.1 (Eurobonds).

159 See 25.22.3 (Interest paid to UK bank).

As in Examples 1 and 2, it is unlikely that the purpose of the arrangement is the avoidance of UK withholding tax, since, again, the UK withholding tax on the UK source interest is the same with the SPV (nil because of the terms of the UK/Ireland DTC) as it is without the SPV (nil: partly because of ITA07/S882 and partly because of the terms of the UK/US DTC which provide for a zero rate of UK withholding tax on interest).

But, again, HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the SPV on the grounds that the SPV is not the beneficial owner of the income within the “international fiscal meaning” of that phrase.

**Example 4: Securitisation of non-corporate assets using offshore SPV**

The facts are the same as Example 1 except that the assets being securitised are loans made by a UK bank to a partnership.

As in Examples 1, 2 and 3, the SPV is not the beneficial owner of the income within the “international fiscal meaning” of that phrase.

As in Examples 1, 2 and 3, it is unlikely that the purpose of the arrangement is the avoidance of UK withholding tax, since, again, the UK withholding tax on the UK source interest is the same with the SPV (nil because of the terms of the UK/Ireland DTC) as it is without the SPV (nil: partly because of ITA07/S882 and partly because of ITA07/S879(1) [quoted Eurobond exemption/interest paid to UK bank]).

But, again, HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the SPV on the grounds that the SPV is not the beneficial owner of the income within the “international fiscal meaning” of that phrase. The above principles would apply equally to collateralised loan arrangements - or indeed to any interest-bearing loans where the question of UK withholding tax is unaffected by the interposition of the intermediate lender.

**Example 5: Access to US commercial paper market using US SPV**

A US SPV is established to provide non-US borrowers with access to the US commercial paper market. On the instructions of a UK borrower, it issues discounted paper and passes the funds on to the UK borrower by way of an interest-bearing loan.

The SPV is not the beneficial owner of the income within the “international fiscal meaning” of that phrase because it has only narrow powers over the income and its obligations to the bondholders mean that it is unlikely to ‘enjoy the full privilege to directly benefit from the income’.

But in these circumstances, it is unlikely that the purpose of the arrangement is the avoidance of UK withholding tax, since the UK withholding tax on the UK source interest is the same with the SPV (nil because of the terms of the UK/US DTC which provide for a zero rate of UK withholding tax on interest) as it is without the SPV (nil because there is no UK withholding tax on discounts). HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the SPV on the grounds that the SPV is not the beneficial owner of the income within the “international fiscal meaning” of that phrase.

**Example 6: Access to US commercial paper market using US and Irish SPVs**

The facts are the same as in Example 5 except that the US SPV acts on instructions of an Irish SPV who is, in turn, acting for the UK borrower. The additional step is introduced to provide the UK borrower with the security that its funding needs will be met

notwithstanding the state of the US market. To provide this security, the Irish SPV enters into arrangements with a UK bank that ensure the bank will provide funds if money cannot be raised at short notice from the US.

Neither SPV is beneficial owner of the relevant income within the “international fiscal meaning” of that phrase because both have only narrow powers over the income and their obligations to their creditors mean that they are unlikely to ‘enjoy the full privilege to directly benefit from the income’.

But in these circumstances, it is unlikely that the purpose of the arrangement is the avoidance of UK withholding tax. The UK withholding tax on the UK source interest is the same with the SPVs (nil because of the terms of the UK/US and UK/Ireland DTCs which provide for a zero rate of UK withholding tax on interest) as it is without the SPVs (nil partly because there is no UK withholding tax on discounts and partly because of ITA07/S878(1)). HMRC will not question the treaty claim required to eliminate the withholding tax otherwise payable on the UK interest paid to the Irish SPV on the grounds that it is not the beneficial owner of the income within the “international fiscal meaning” of that phrase.

**Example 7: Access to group-sourced funding from a Non treaty country using Luxembourg conduit company**

A claim is made under the UK/Luxembourg DTA for relief from UK withholding tax in respect of a loan from a Luxembourg resident company (LuxCo) to a UK group borrower.

- LuxCo was set up (or has been maintained in the group) specifically to deal with this intra group loan and is taxed on a small “turn” for administering loans;
- the source of the loan is an affiliate in a territory with which the UK has no DTA (NoA Co)
- the NoA Co/LuxCo loan agreement shows that this interest bearing loan was predetermined to be on-lent to the UK
- similarly, the interest payable by the UK on its loan from LuxCo is predetermined to be passed on to NoA Co.

The conduit company is not beneficial owner of the relevant income within the “international fiscal meaning”, because it has clear obligations to forward the interest to NoA Co.

The terms and conditions of the loan agreements show that the flow of income out of the UK is predestined to be passed on to NoA Co. It is clear that one of the main purposes of the Luxembourg company is to avoid the withholding tax which would be due on payments of interest to NoA Co. The interest will not benefit from the Luxembourg/UK treaty and tax will be withheld.

**Example 8: Access to group-sourced funding from a Treaty country using Luxembourg conduit company**

The facts are as in example 7 except that this time the source of the funds is a US taxpayer who receives interest directly from the Lux Company. If the interest had gone directly to the US recipient, it would have qualified for exemption under the US/UK treaty. Although the Lux Company will not satisfy the international fiscal meaning, this is irrelevant as its imposition into the arrangement does not affect the withholding tax position. The same conclusion could not be drawn if the US taxpayer had passed funds to a non treaty intermediary, which then lent the funds to the Lux Co.

### 104.13 Beneficial ownership: Canada

In Canada, treaty beneficial ownership has been understood more narrowly:

In *Prévost Car Inc.*,<sup>160</sup> the CRA challenged a treaty shopping case on the basis that a conduit entity was not the “beneficial owner” of the Canadian-source income on which treaty benefits were sought. The case involved dividends paid on the shares of a Canadian resident corporation that were held by a Dutch corporation which in turn was owned by corporate shareholders in Sweden and the UK.

Diagrammatically:

The withholding tax rate on dividends paid to the Dutch holding company were lower than would have been the case had dividends been paid directly to the corporate shareholders in Sweden and the UK. Even though the terms of the shareholders agreement essentially required the Dutch holding company to pass through as dividends to its shareholders any dividends received from its Canadian subsidiary, the Tax Court found that the intermediary Dutch holding corporation was the beneficial owner of the dividends and the Federal Court of Appeal affirmed the Tax Court’s interpretation of beneficial ownership.

The narrow meaning ascribed to beneficial owner in *Prévost Car Inc* means that the beneficial ownership requirement in this context is not sufficient to deny treaty benefits to an intermediary entity. In particular, even though the intermediary foreign holding company in this case was effectively a direct conduit (i.e., it did not pay tax on dividends received, distributed substantially all of its income to third country residents who owned it, and had no employees or activities other than with respect to the ownership of shares of a subsidiary), it was not denied treaty benefits on the basis of beneficial ownership.

---

160 *Prévost Car Inc v The Queen* 2009 DTC 5053.

Similarly, the notion of beneficial owner was also argued by the Government in *Velcro Canada*<sup>161</sup> as the basis on which to deny treaty benefits in a treaty shopping case. In *Velcro Canada*, a corporation resident in the Netherlands Antilles, which would have been subject to a withholding tax rate in Canada of 25% on royalties paid by a Canadian company, incorporated an intermediary company in the Netherlands and essentially assigned to it the right to receive royalty payments from the Canadian company. The intermediary company in the Netherlands remitted 90% of the royalties received to its parent in the Netherlands Antilles within 30 days, pursuant to a sub-licencing agreement between the Dutch intermediary and the Netherlands Antilles company. This was a classic “stepping stone” conduit structure.<sup>162</sup> The Government argued the case on the basis that the Dutch intermediary was not the beneficial owner of the royalties received. The court followed the decision in *Prévost Car Inc.*<sup>163</sup>

#### 104.14 “Subject to tax”

Treaties occasionally provide exemption for income in one State only if it is “subject to tax” in the other State. This is not in OECD Model, and is only found in a diminishing number of treaties, but for instance Article XI(2) Israel/UK DTA formerly provided:

Any pension ... derived from sources within the UK by an individual who is a resident of Israel and subject to Israel tax in respect thereof, shall be exempt from UK tax.<sup>164</sup>

In a treaty context, two issues may arise:

- (1) Whether income is subject to UK tax, which matters in order to qualify for DT exemption in the foreign State

---

161 *Velcro Canada Inc v The Queen* 2012 DTC 1100.

162 Footnote original: See OECD, “Double Taxation Conventions and the Use of Conduit Companies” (1986) para 4.

163 Department of Finance Canada “Consultation Paper on Treaty Shopping – The Problem and Possible Solutions” (2013) <http://www.fin.gc.ca/activty/consult/ts-cf-eng.asp>

164 Under the 2019 Protocol, this has now been replaced by OECD model wording, resulting in double non-taxation of UK source pensions of residents in the foreign treaty State. This is an example of intentional double non-taxation; see 103.5.2 (Acceptable double non-taxation).

(2) Whether income is subject to foreign tax, which matters in order to qualify for DT exemption in the UK

Issue (1) would ultimately be decided by foreign tax authorities and courts, but the HMRC view of what counts as subject to UK tax may represent an international consensus.

104.14.1 *Subject to tax: History*

Avery Jones explains:

The UK pioneered “subject to tax,” including it in all its early treaties in relation to dividends, interest and royalties. The reason was not to cure the disconnect between the resident and the income but because of a quirk of UK tax law that would have enabled the UK to be used for what we would now call treaty shopping. In the absence of a subject to tax clause a resident of anywhere in the world (including a tax haven) could have held assets in the name of a UK resident nominee which would have enabled the taxpayer to have access to all the UK’s tax treaties without paying any UK tax. This would have worked because of a combination of, first, the rule that a person receiving or entitled to income was taxable<sup>165</sup> ... thus making the nominee taxable in principle on account of receiving the income without being entitled to it.

Secondly, just as a non-resident was not taxable on foreign income, a UK resident nominee for a non-resident was not taxable on foreign income either.<sup>166</sup>

Thirdly, UK treaties defined resident for treaty purposes as a person who was resident in the UK and not resident in the other state, thus ducking the problem of dual residence.<sup>167</sup> The result was the same under the OEEC’s definition of a resident as someone liable to tax as it did not then contain what is now the second sentence of Article 4(1) of the OECD Model,<sup>168</sup> which was not introduced until 1977.

---

165 See 14.8 (Receipt by nominee/trustee).

166 See 39.2.2 (Life tenant non-resident).

167 See 8.29.2 (Residence: Pre-1963 DTAs).

168 See 8.8 (Exception where source tax only). The OEEC (Organisation for European Economic Co-operation) became the OECD in 1961. OEEC’s definition of residence was (just about) the same as the first sentence of the OECD Model form. At first sight, a UK nominee for a non-resident principal would not be liable for tax “by reason of his residence”. But there would be a possibility of a tax liability on

Taking all three together resulted in the nominee being resident for the purposes of the treaty (either under the UK's usual [pre-1963] treaty definition, or under the OEEC's definition before the introduction of the second sentence). The ultimate recipient of the income would therefore have been entitled to the benefit of all UK treaties to reduce tax in the treaty partner state without actually being taxable on any such income in the UK because it was foreign income.

Fortunately someone must have spotted this, and all UK treaties contained a subject to tax test for dividends, interest and royalties with the result that the treaty did not apply because the foreign dividends, interest and royalties were not subject to tax in the UK.<sup>169</sup>

The history does not much matter now. However this does explain what is otherwise puzzling, namely why “subject to tax” wording is found in pre-1977 treaties, but is (more or less) not found subsequently. The reason is that the wording was devised for a specifically UK problem, dealing with nominees, and since 1977 it ceased to be needed for that purpose.

#### 104.14.2 *Subject to/liable: Ordinary meaning*

In ordinary speech, subject to tax and liable to tax are used synonymously, and the meaning is somewhat vague and context-dependent.

---

foreign income which was not passed on to the principal, eg if retained for the nominee's expenses. On that basis a UK nominee for a non-resident principal would be UK treaty-resident before the second sentence was introduced in 1977.

169 Avery Jones, “Weiser v HMRC: why do we need ‘liable to tax’ and ‘subject to tax’ clauses?” [2013] BTR 9. Avery Jones discusses the point at greater length in “The Beneficial Ownership concept was never necessary in the Model”, in Lang (ed) *Beneficial Ownership: Recent Trends* (2013).

Avery Jones continues with an intriguing comment: “Subject to tax is not a perfect solution because it prevents charities and pension funds from obtaining treaty benefits. Two solutions could deal with this. Either the second sentence of Article 4(1) of the OECD Model could be added, so that the nominee is no longer a treaty resident because he is not taxable on foreign income of a non-resident, coupled with the deletion of the subject to tax condition, which would enable charities and pension funds to qualify. Or, alternatively, “beneficial ownership” could be substituted for subject to tax, which would exclude nominees but include charities and pension funds. In fact, both solutions were adopted in the 1977 Model. Had anyone realised that the first alternative on its own would have sufficed we would not now still be arguing about the meaning of beneficial ownership.”

In the context of the lower-paid employee exemption,<sup>170</sup> the RDR Manual provides:

**32070 - Remittance Basis: exemption for non-domiciles with small amounts of foreign employment income [Jan 2019]**

...*Subject to Foreign Tax*

Although ‘subject to a foreign tax’ might in some circumstances mean that the individual has actually paid some tax on the foreign income to a foreign tax authority, actual payment is not a necessary requirement to take advantage of this exemption.

For example, given the levels of foreign income involved there might be nothing due to be paid on part or all of the income, as a result perhaps of a foreign countries’ own personal allowances systems, or similar tax provisions which are akin to such allowances, such as a tax rate band of 0%. Such income would still be considered to be ‘subject to a foreign tax’ in the context of this exemption.

#### 104.14.3 *Subject to/liable compared*

In a DTA context, subject to tax/liable to tax have distinct technical meanings, and discussion of one phrase sheds no light on the other. In *Weiser v HMRC*<sup>171</sup>:

22. ... There is, [counsel for HMRC] submitted, an internationally recognised distinction ... which gives the expression “liable to tax” a broader meaning than the expression “subject to tax”...

26. In *General Electric Pension Trust v Director of Income-tax* (2005) 8 ITLR 1053 ... Syed Shah Mohammed Quadri J said (at p 1061):

“It is worth pointing out that the phrase ‘liable to tax’ in para (1) and the phrase ‘subject to tax’ in proviso (b) are not synonymous. If both were read to be synonymous, proviso (b) would become otiose. Whereas para (1) speaks of being in the tax net, proviso (b) speaks of actual taxation.”<sup>172</sup>

170 See 33.42 (Lower-paid employee exemption).

171 [2012] UKFTT 501 (TC).

172 The definition provided: “For the purposes of this Convention, the term “resident of a Contracting State” means any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, citizenship, place of management, place of incorporation, or any other criterion of a similar nature, provided however, that

(a) this term does not include any person who is liable to tax in that State in respect

34. ... the distinction that must in my view be drawn between the use, in double tax treaties, of the expressions “liable to tax” and “subject to tax”  
...

For “liable to tax” see 8.5 (“Liable to tax”); App.2.4 (Chargeable/liable to tax).

#### 104.14.4 *Subject to tax: DTA meaning*

The INTM Manual provides:

##### **INTM332210 Subject to tax: Background** [June 2018]

The expression “subject to tax” usually means that the person must actually pay tax on the income in their country of residence.

However, a person is still regarded as “subject to tax” if, for example, he or she does not pay tax because their income is sufficiently small that it is covered by personal allowances that are available to set against liability to tax in the other country.

A person is not regarded as “subject to tax” if the income in question is exempted from tax because the law of the other country provides for statutory exemption from tax. For example

- the income is that of a charity
- the income is that of an exempt approved superannuation scheme (pension fund).

In such cases the “subject to tax” condition is not met and relief is not allowable.<sup>173</sup>

only of income from sources in that State; and

(b) in the case of income derived or paid by a partnership, estate, or trust, this term applies only to the extent that the income derived by such partnership, estate, or trust is subject to tax in that State as the income of a resident, either in its hands or in the hands of its partners or beneficiaries.”

173 In *Weiser v HMRC* the FTT agreed with this passage: [2012] UKFTT 501 (TC) at [38]. Similar points are made in INTM162090:

##### **‘Subject to tax’** [Jan 2014]

... Examples of where the income is regarded as ‘subject to tax’ but on which no or little tax is actually paid may include the following:

- The customer does not pay any UK tax because their income is covered by personal allowances and reliefs.
- The foreign income arises in a penultimate year and no penultimate year adjustment is made, so the income falls out of assessment in the UK.
- The income is wholly covered by capital allowances so that no UK tax is

In *Weiser v HMRC*<sup>174</sup> the taxpayer (not represented by counsel) claimed relief under Art XI(2) Israel/UK DTA which is set out above. The taxpayer was treaty-resident in Israel but unfortunately qualified for an Israeli tax exemption which applied to foreign source income of new immigrants for a 10 year period. The pension income was not “subject to tax” in Israel, so the DT exemption did not apply:

22. ... “Subject to tax”... requires income actually to be within the charge to tax in the sense that a contracting state must include the income in question in the computation of the individual’s taxable income with the result that tax will ordinarily be payable subject to deductions for allowances or reliefs, etc....

24. An Australian case, *Emanuel v FCT* [1968] HCA 57, concerned the Australia/UK double tax treaty. ... Under the treaty, [the rate of tax on dividends] was reduced to 15% in the case of such dividends to a UK resident “who is subject to UK tax in respect thereof”. The UK resident recipient was not domiciled in the UK, and so, although generally within the scope of UK tax as a resident, was chargeable on income from non-UK sources only to the extent that the income was remitted to the UK. The dividends had not been so remitted.

25. In the High Court of Australia, Windeyer J held that the taxpayer was not entitled to the reduced rate of withholding tax. He said (at [15]):  
 “... in respect of the dividends in question the ‘remittance’ basis would apply. Therefore, in my opinion, unless and until they be remitted and received by him in the UK he is not “subject to UK tax in respect thereof”. These words I think describe a present liability of a person to tax, not the character of income in respect of which he will if it comes to him in the UK in the future incur then a liability to tax.”

26. In *General Electric Pension Trust v Director of Income-tax*

---

payable.

- The customer is entitled to a deduction under ITEPA03/S341 or S376.
- The remittance basis applies: the person is subject to tax only on the sums remitted.

A person is not regarded as subject to tax in the UK if the income in question is exempted from UK tax by an extra-statutory concession or is statutorily exempt from tax, for example the income is that of a charity ...”

174 [2012] UKFTT 501 (TC).

(*International Taxation*) (2005) 8 ITLR 1053, the Indian Authority for Advance Rulings held that a pension fund which was exempt from tax in the US under US tax law was not “subject to tax” in the US ...

34. In my view, consistent with what I regard as the purpose of the treaty in this regard, the ordinary meaning of Art XI(2) is that pension income derived from UK sources is only exempt from UK tax if that income is chargeable to Israel tax such that Israel tax will ordinarily be payable in respect of that income, subject to deductions for allowances and reliefs, etc. This follows from the distinction that must in my view be drawn between the use, in double tax treaties, of the expressions “liable to tax” and “subject to tax”, and also by the requirement, under Art XI(2), that the individual concerned should not only be a resident of Israel (that is, resident in Israel for the purposes of Israel tax), but should be subject to tax in respect of the relevant income. ... This provision is not concerned with the status of the individual, but with the chargeability to tax of the specific income. Income which is exempted from taxation cannot during the currency of that exemption be income in respect of which an individual can be said to be subject to tax.

On the same facts, but under OECD Model wording (lacking the words “subject to tax”) treaty relief would apply.<sup>175</sup>

#### 104.14.5 *Election to waive exemption*

The INT Manual provides:

**INTM162020 certificates of residence: information to be supplied with a request** [Feb 2020]

...

Note that, under CTA09/Part 9A, UK companies are usually exempt from tax on the great majority of dividends received (see INTM650000). If a UK company is exempt from tax on the dividends it receives, HMRC will not be able to issue a CoR [Certificate of Residence] where the DTA in question states that the dividends must be subject to UK tax.

UK companies can, however, elect (under CTA09/S931R(2)) for this exemption not to apply. If such an election is made, the dividends would be subject to UK tax and HMRC could issue a CoR. The company would then be able to claim relief from the foreign tax and if any foreign tax remains payable, credit for that tax may be available against the UK tax

---

<sup>175</sup> See 37.8 (DT relief: pension income).

chargeable on the same income.

UK companies in this situation should therefore consider whether it is in their interest to make an election under S931R(2) (so that the dividends are charged to UK tax with relief being available for the foreign tax under the terms of the DTA) or not (so that the dividends are not subject to UK tax but with no relief being available under the DTA for the foreign tax suffered).

In any case where a company does require a CoR to claim relief from foreign taxes on dividends where the DTA provides that they must be subject to tax on those dividends, the company should provide a copy of the S931R(2) election with their request along with confirmation that the election has not been subsequently revoked.

#### 104.14.6 *Subject to tax/Beneficial ownership compared*

The INT Manual provides:

**INTM332020 Double Taxation Claims And Applications: Why Beneficial Ownership Matters** [Jun 2016]

In some countries, no distinction is made between the concepts of legal and beneficial ownership, so beneficial ownership as a condition for relief may thus not appear in a double taxation agreement between the UK and one of those countries. But in such cases, the agreement usually requires the income to be subject to tax (INTM332200) in the other country. The person who is subject to tax on the income in question can usually be treated for practical purposes of relief under the agreement as if they were its owner.

The first sentence muddles different meanings of beneficial ownership. But as the passage overall suggests, “subject to tax” was in its origin an attempt to provide a rule similar to that which is nowadays expressed in terms of beneficial ownership.

#### 104.14.7 *Subject to tax: Critique*

Avery Jones says:

... do subject to tax clauses not demonstrate that there is something wrong with the structure of tax treaties? That the resident might not be taxable on the particular item of income because of a transitional exemption, as in the *Weiser* case, is only the beginning of the problem. Other issues include the not-uncommon situation in which one state attributes income to one person and the other state to a different person,

or the person may be liable to one type of tax covered by the treaty but not another, or one person may be liable to one tax covered by the treaty and a different person liable to another tax, or one state charges a tax covered by the treaty on a source basis and the other state has no equivalent type of tax, and so on. In such cases, which were not foreseen when the definition of resident was initially drafted, the problem is that by historical accident there is no real connection between the source provisions of the treaty, deriving from impersonal taxes, and the definition of resident, deriving from income taxes. The problem seems to lie not with *subject to tax* but with *liable to tax*. Why should the treaty relief in the source state depend on whether someone is liable to tax in principle on at least some foreign income? Would it not be better for treaties specifically to connect the income to the resident and give a reduction of tax in the source state on particular income only if the income was actually taxed in the residence state (or would have been taxed but for some reason that would be set out, such as an exemption for income of a charity)?<sup>176</sup>

In short, a “subject to tax” requirement would prevent double non-taxation. The EC have made the same point:

### **3. Limitation to the application of rules intended to avoid double taxation**

3.1. Where Member States, in double taxation conventions which they have concluded among themselves or with third countries, have committed not to tax a given item of income, Member States should ensure that such commitment only applies where the item is subject to tax in the other party to that convention.

3.2. To give effect to point 3.1, Member States are encouraged to include an appropriate clause in their double taxation conventions. Such clause could read as follows:

“Where this Convention provides that an item of income shall be taxable only in one of the contracting States or that it may be taxed in one of the contracting States, the other contracting State shall be precluded from taxing such item only if this item is subject to tax<sup>177</sup>

---

176 [2013] BTR 9 at p.14 (footnotes omitted). This idea has been developed in Wheeler, *The Missing Keystone of Income Tax Treaties* (2012).

177 The Recommendation recognises that the expression “subject to tax” can be problematic and provides: “3.4. For the purposes of points 3.1, 3.2 and 3.3 an item of income should be considered to be subject to tax where it is treated as taxable by

in the first contracting State.”

...

3.3. Where, with a view to avoid double taxation through unilateral national rules, Member States provide for a tax exemption in regard to a given item of income sourced in another jurisdiction, in which this item is not subject to tax, Member States are encouraged to ensure that the item is taxed.<sup>178</sup>

But in practice the “subject to tax” requirement is not used in modern treaties. There are various possible reasons for this.

- (1) The requirement is conceptually problematic, as the discussion above shows.
- (2) The requirement is not always effective. The practical effect of the rule that income in a State must be subject to tax can be avoided or mitigated by provisions in the domestic law of that State, such as:
  - (a) A rule that income is subject to tax at a very low rate, say 1%
  - (b) An exemption that can be waived<sup>179</sup>

But these objections do not seem so serious in practice. “Subject to tax” is a rough and ready solution to the problem of avoiding double non-taxation, but there is no short form perfect solution, and to ask for one is to cry for the moon. Tax law often has to settle for the second-best. The test is workability rather than perfection.

The true objection may be that States sometimes *intend* to have double non-taxation.<sup>180</sup>

---

the jurisdiction concerned and is not exempt from tax, nor benefits from a full tax credit or zero-rate taxation.”

178 EC “Recommendation of 6.12.2012 on aggressive tax planning” C(2012) 8806 [https://ec.europa.eu/taxation\\_customs/sites/taxation/files/docs/body/c\\_2012\\_8806\\_en.pdf](https://ec.europa.eu/taxation_customs/sites/taxation/files/docs/body/c_2012_8806_en.pdf)

179 See 104.14.5 (Election to waive exemption).

180 See 103.5 (Double non-taxation).

## LIMITATION ON BENEFITS

### 105.1 Limitation on Benefits

#### 105.1 Limitation on Benefits

##### 105.1.1 Introduction

“Limitation on Benefits” is a label for provisions of the type found in:

- (1) Article 23 USA/UK DTA (under the heading *Limitation on Benefits*)
- (2) OECD Model art 29; the Commentary offers a choice of simplified or detailed versions.
- (3) BEPS MLI article 7(8) - (13), which MLI calls the “Simplified Limitation on Benefits Provision”)

I write it with initial capitals, to reflect the technical nature of the term.<sup>1</sup>

The UK has opted out of the MLI Simplified Limitation on Benefits Provision.<sup>2</sup> However it is possible that future treaties will contain provisions of that kind.

##### 105.1.2 The LoB rule

The rule is broadly that treaty benefits are limited to Qualified Persons (elaborately defined):

**art 27(1) OECD Model**

**art 23(1) USA/UK DTA**

---

1 See Neidle, “The BEPS multilateral convention: who loves SLOBs?” Tax Journal, 30 June 2017.

2 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/725261/Final\\_list\\_of\\_UK\\_reservations\\_and\\_notifications\\_made\\_on\\_deposit\\_of\\_the\\_instrument\\_of\\_ratification.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf)

Except as otherwise provided in this Article, a resident of a Contracting State shall not be entitled to a benefit that would otherwise be accorded by this Convention (other than a benefit under paragraph 3 of Article 4, paragraph 2 of Article 9 or Article 25) unless such resident is a “qualified person”, as defined in paragraph 2, at the time that the benefit would be accorded.

Except as otherwise provided in this Article, a resident of a Contracting State that derives income, profits or gains from the other Contracting State shall be entitled to all the benefits of this Convention otherwise accorded to residents of a Contracting State only if [a] such resident is a “qualified person” as defined in paragraph 2 of this Article and [b] satisfies any other specified conditions for the obtaining of such benefits.

If the US LoB provision applies, it is at present disputed whether unilateral relief applies: see 106.12 (DTA/Unilateral Credit: Priority).

The OECD exceptions referred to are not very significant:

<b>Art</b>	<b>Topic</b>	<b>See para</b>
4(3)	Tie-breaker: Mutual agreement	8.18
9(2)	Transfer pricing adjustment	-
25	Mutual agreement procedure	-

See too 104.8.2 (PPT/LoB: relationship).

## 105.2 Qualified persons

There is a list of 7 or more categories of qualified person.

### 105.2.1 *Individuals*

#### **art 27(2) OECD Model**

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is:

a) an individual;

#### **art 23(2) USA/UK DTA**

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is either—

(a) an individual;

This is straightforward.

### 105.2.2 *Governmental entity*

**art 27(2) OECD Model**

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...

b) that Contracting State, or a political subdivision or local authority thereof, or an agency or instrumentality of that State, political subdivision or local authority;

**art 23(2) USA/UK DTA**

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is...

(b) a qualified governmental entity;

See 8.27.4 (Governmental entity).

105.2.3 *Quoted company*

**art 27(2) OECD Model**

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...

c) a company or other entity, if, throughout the taxable period that includes that time, the principal class of its shares (and any disproportionate class of shares) is regularly traded on one or more recognised stock exchanges,

**art 23(2) USA/UK DTA**

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...

(c) a company, if

(i) the principal class of its shares [a] is listed or admitted to dealings on a recognised stock exchange specified in clauses (i) or (ii) of sub-paragraph (a) of paragraph 7 of this Article and

[b] is regularly traded on one or more recognised stock exchanges,

and either:

(i) its principal class of shares is primarily traded on one or more recognised stock exchanges located in the Contracting State of which the company or entity is a resident;

or  
(ii) the company's or entity's primary place of management and control is in the Contracting State of which it is a resident;

The OECD simplified version provides:

c) a company or other entity, if the principal class of its shares is regularly traded on one or more recognised stock exchanges;

#### 105.2.4 *Subsidiary/consortium company*

##### **art 27(2) OECD Model**

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...

d) a company, if:

(i) throughout the taxable period that includes that time, at least 50% of the aggregate vote and value of the shares (and at least 50% of the aggregate vote and value of any disproportionate class of shares) in the company is owned directly or indirectly by five or fewer companies or entities entitled to benefits under subparagraph c) of this paragraph,

##### **art 23(2) USA/UK DTA**

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...

(c) a company, if ...

(ii) shares representing at least 50% of the aggregate voting power and value of the company are owned directly or indirectly by five or fewer companies entitled to benefits under clause (i) of this sub-paragraph,

provided that, in the case of indirect ownership, each intermediate owner is a resident of the Contracting State from which a benefit under this Convention is being sought or is a qualifying intermediate owner; and

provided that, in the case of indirect ownership, each intermediate owner is a resident of either Contracting State;

(ii) with respect to benefits under this Convention other than under Article 10, less than 50% of the company's gross income, and less than 50% of the tested group's gross income, for the taxable period that includes that time, is paid or accrued, directly or indirectly, in the form of payments that are deductible in that taxable period for purposes of the taxes covered by this Convention in the company's Contracting State of residence (but not including arm's length payments in the ordinary course of business for services or tangible property, and in the case of a tested group, not including intra-group transactions) to persons that are not residents of either Contracting State entitled to the benefits of this Convention under subparagraph a), b), c) or e);

### 105.2.5 *Charity/NPO*

**art 27(2) OECD Model**

**art 23(2) USA/UK DTA**

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...

e) a person, other than an individual, that:  
(i) is a [agreed description of the relevant non-profit organisations found in each Contracting State],

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...

(e) a person described in sub-paragraph ... (c) of paragraph 3 of Article 4 (Residence) of this Convention,<sup>3</sup>

The OECD simplified version provides:

d) a person, other than an individual, that:

- (i) is a [agreed description of the relevant non-profit organisations found in each Contracting State],
- (ii) is a recognised pension fund;

#### 105.2.6 *Pension scheme/EBT*

**art 27(2) OECD Model**

**art 23(2) USA/UK DTA**

---

<sup>3</sup> See 8.27.3 (Charity/NPO).

e) a person, other than an individual, that: ...  
(ii) is a recognised pension fund to which subdivision (i) of the definition of recognised pension fund in paragraph 1 of Article 3 applies, provided that more than 50% of the beneficial interests in that person are owned by individuals resident of either Contracting State, or more than [\_\_%] of the beneficial interests in that person are owned by individuals resident of either Contracting State or of any other State with respect to which the following conditions are met  
A) individuals who are residents of that other State are entitled to the benefits of a comprehensive convention for the avoidance of double taxation between that other State and the State from which the benefits of this Convention are claimed, and

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...  
(e) a person described in sub-paragraph (a), (b) ... of paragraph 3 of Article 4 (Residence) of this Convention,<sup>4</sup> provided that, in the case of a person described in sub-paragraph (a) or (b) of that paragraph, more than 50% of the person's beneficiaries, members or participants are individuals who are residents of either Contracting State;

---

4 See 8.27.1 (Pension scheme); 8.27.2 (Employee benefit trust).

B) with respect to income referred to in Articles 10 and 11 of this Convention, if the person were a resident of that other State entitled to all the benefits of that other convention, the person would be entitled, under such convention, to a rate of tax with respect to the particular class of income for which benefits are being claimed under this Convention that is at least as low as the rate applicable under this Convention; or

(iii) is a recognised pension fund to which subdivision (ii) of the definition of recognised pension fund in paragraph 1 of Article 3 applies, provided that it is established and operated exclusively or almost exclusively to invest funds for the benefit of entities or arrangements referred to in the preceding subdivision;

### 105.2.7 *Structures*

**art 27(2) OECD Model**

**art 23(2) USA/UK DTA**

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...

f) a person other than an individual, if

(i) at that time and on at least half of the days of a twelve-month period that includes that time, persons who are residents of that Contracting State and that are entitled to the benefits of this Convention under subparagraph a), b), c) or e) own, directly or indirectly, shares representing at least 50% of the aggregate vote and value (and at least 50% of the aggregate vote and value of any disproportionate class of shares) of the shares in the person, provided that, in the case of indirect ownership, each intermediate owner is a qualifying intermediate owner, and

(ii) less than 50% of the person's gross income, and less than 50% of the tested group's gross income, for the taxable period that includes that time, is paid or accrued, directly or indirectly, in the form of payments that are deductible for purposes of the taxes covered by this Convention in the person's Contracting State of residence (but not including arm's length payments in the ordinary course of business for services or tangible property, and in the case of a tested group, not including intra-group transactions), to persons that are not residents of either Contracting State entitled to the benefits of this Convention under subparagraph a), b), c) or e) of this paragraph;

e) a person other than an individual if, at that time and on at least half of the days of a twelve-month period that includes that time, persons who are residents of that Contracting State and that are entitled to benefits of this Convention under subparagraphs a) to d) own, directly or indirectly, at least 50% of the shares of the person;

(f) a person other than an individual, if—

(i) on at least half the days of the taxable or chargeable period persons that are qualified persons by reason of sub-paragraphs (a), (b), clause (i) of sub-paragraph (c), clause (i) of sub-paragraph (d), or sub-paragraph (e) of this paragraph own, directly or indirectly, shares or other beneficial interests representing at least 50% of the aggregate voting power and value of the person, and

(ii) less than 50% of the person's gross income for that taxable or chargeable period is paid or accrued, directly or indirectly, to persons who are not residents of either Contracting State in the form of payments that are deductible for the purposes of the taxes covered by this Convention in the State of which the person is a resident (but not including arm's length payments in the ordinary course of business for services or tangible property and payments in respect of financial obligations to a bank, provided that where such a bank is not a resident of a Contracting State such payment is attributable to a permanent establishment of that bank located in one of the Contracting States);

### 105.2.8 *Collective investment scheme*

2. A resident of a Contracting State shall be a qualified person at a time when a benefit would otherwise be accorded by the Convention if, at that time, the resident is ...

g) a collective investment vehicle [a definition of “collective investment vehicle” would then be included in paragraph 7]; *or*

g) a collective investment vehicle, but only to the extent that, at that time, the beneficial interests in the collective investment vehicle are owned by [residents of the Contracting State in which the collective investment vehicle is established or by<sup>5</sup>] equivalent beneficiaries;

g) a collective investment vehicle, but only to the extent that, at that time, the beneficial interests in the collective investment vehicle are owned by residents of the Contracting State in which the collective investment vehicle is established.

*or*

g) a collective investment vehicle if the principal class of shares in the collective investment vehicle is listed and regularly traded on a recognised stock exchange.

Article 23 USA/UK DTA deals with unit trusts expressly:

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...

(d) a person other than an individual or a company, if—

---

5 Footnote original: The words “residents of the Contracting State in which the collective investment vehicle is established” would not be needed if the definition of “equivalent beneficiary” used for the purpose of that provision was identical to the detailed version of the definition of the term “equivalent beneficiary” in paragraph 7; see paragraph 145 below.

- (i) the principal class of units<sup>6</sup> in that person
  - [a] is listed or admitted to dealings on a recognized stock exchange specified in clauses (i) or (ii) of sub-paragraph (a) of paragraph 7 of this Article and
  - [b] is regularly traded on one or more recognised stock exchanges, or
- (ii) the direct or indirect owners of at least 50% of the beneficial interests in that person are qualified persons by reason of clause (i) of sub-paragraph (c) or clause (i) of this sub-paragraph;

### 105.2.9 Trusts

#### Article 23 USA/UK DTA deals with trusts

(2) A resident of a Contracting State is a qualified person for a taxable or chargeable period only if such resident is ...

(g) a trust or trustee of a trust in their capacity as such if at least 50% of the beneficial interest in the trust is held by persons who are either—

(i) qualified persons by reason of sub-paragraphs (a), (b), clause (i) of sub-paragraph (c), clause (i) of sub-paragraph (d), or sub-paragraph (e) of this paragraph; or

(ii) equivalent beneficiaries,

provided that less than 50% of the gross income arising to such trust or trustee in their capacity as such for the taxable or chargeable period is paid or accrued, directly or indirectly, to persons who are not residents of either Contracting State in the form of payments that are deductible for the purposes of the taxes covered by this Convention in the Contracting State of which that trust or trustee is a resident (but not including arm's length payments in the ordinary course of business for services or tangible property and payments in respect of financial

---

6 Art 23(7) USA/UK DTA provides: (c) the term “units” as used in sub-paragraph (d) of paragraph 2 of this Article includes shares and any other instrument, not being a debt-claim, granting an entitlement to share in the assets or income of, or receive a distribution from, the person. The term “principal class of units” means the class of units which represents the majority of the value of the person. If no single class of units represents the majority of the value of the person, the “principal class of units” is those classes that in the aggregate represent the majority of the value of the person;

obligations to a bank, provided that where such a bank is not a resident of a Contracting State such payment is attributable to a permanent establishment of that bank located in one of the Contracting States).

### **105.3 Active conduct of business**

#### **art 27(3) OECD Model**

3. a) A resident of a Contracting State shall be entitled to benefits under this Convention with respect to an item of income derived from the other Contracting State, regardless of whether the resident is a qualified person, if the resident is engaged in the active conduct of a business in the first-mentioned State and the income derived from the other State emanates from, or is incidental to, that business. For purposes of this Article, the term “active conduct of a business” shall not include the following activities or any combination thereof:

- (i) operating as a holding company;
- (ii) providing overall supervision or administration of a group of companies;
- (iii) providing group financing (including cash pooling); or
- (iv) making or managing investments, unless these activities are carried on by a bank or [list financial institutions similar to banks that the Contracting States agree to treat as such], insurance enterprise or registered securities dealer in the ordinary course of its business as such.

#### **art 23(3) USA/UK DTA**

(a) Notwithstanding that a resident of a Contracting State may not be a qualified person, it shall be entitled to the benefits of this Convention with respect to an item of income, profit or gain derived from the other Contracting State, if the resident is engaged in the active conduct of a trade or business in the first-mentioned State (other than the business of making or managing investments for the resident's own account, unless these activities are banking, insurance or securities activities carried on by a bank, insurance company or registered securities dealer), the income, profit or gain derived from the other Contracting State is derived in connection with, or is incidental to, that trade or business and that resident satisfies any other specified conditions for the obtaining of such benefits.

b) If a resident of a Contracting State derives an item of income from a business activity conducted by that resident in the other Contracting State, or derives an item of income arising in the other State from a connected person, the conditions described in subparagraph a) shall be considered to be satisfied with respect to such item only if the business activity carried on by the resident in the first-mentioned State to which the item is related is substantial in relation to the same or complementary business activity carried on by the resident or such connected person in the other Contracting State. Whether a business activity is substantial for the purposes of this paragraph shall be determined based on all the facts and circumstances.

(b) If a resident of a Contracting State or any of its associated enterprises carries on a trade or business activity in the other Contracting State which gives rise to an item of income, profit or gain, sub-paragraph (a) of this paragraph shall apply to such item only if the trade or business activity in the first-mentioned State is substantial in relation to the trade or business activity in the other State. Whether a trade or business activity is substantial for the purposes of this paragraph shall be determined on the basis of all the facts and circumstances.

c) For purposes of applying this paragraph, activities conducted by connected persons with respect to a resident of a Contracting State shall be deemed to be conducted by such resident.

(c) In determining whether a person is engaged in the active conduct of a trade or business in a Contracting State under sub-paragraph (a) of this paragraph, activities conducted by a partnership in which that person is a partner and activities conducted by persons connected to such person shall be deemed to be conducted by such person. A person shall be connected to another if one possesses at least 50% of the beneficial interest in the other (or, in the case of a company, shares representing at least 50% of the aggregate voting power and value of the company or of the beneficial equity interest in the company) or another person possesses, directly or indirectly, at least 50% of the beneficial interest (or, in the case of a company, shares representing at least 50% of the aggregate voting power and value of the company or of the beneficial equity interest in the company) in each person. In any case, a person shall be considered to be connected to another if, on the basis of all the facts and circumstances, one has control of the other or both are under the control of the same person or persons.

#### **105.4 Derivative Benefits**

In the commentary on art 29(4), OECD offer a variety of detailed versions:

4. A company that is a resident of a Contracting State shall also be entitled to a benefit that would otherwise be accorded by this Convention if:

- a) at the time when the benefit otherwise would be accorded and on at least half of the days of any twelve-month period that includes that time, at least 95% of the aggregate vote and value of its shares (and at least 50% of the aggregate vote and value of any disproportionate class of shares) is owned, directly or indirectly, by seven or fewer persons that are equivalent beneficiaries, provided that in the case of indirect ownership, each intermediate owner is a qualifying intermediate owner, and

- b) less than 50% of the person's gross income, and less than 50% of the tested group's gross income, for the taxable period that includes that time, as determined in the person's Contracting State of residence, is paid or accrued, directly or indirectly, in the form of payments that are deductible for purposes of the taxes covered by this Convention in the person's Contracting State of residence (but not including arm's length payments in the ordinary course of business for services or tangible property, and in the case of a tested group, not including intra-group transactions)
  - i) to persons that are not equivalent beneficiaries;
  - ii) to persons that are equivalent beneficiaries only by reason of paragraph 5 of this Article or of a substantially similar provision in the relevant comprehensive convention for the avoidance of double taxation;
  - iii) to persons that are equivalent beneficiaries that are connected persons with respect to the company described in this paragraph and that benefit from a special tax regime, as defined in [reference to the paragraph of the convention that includes the definition of "special tax regime"] of this Convention, with respect to the deductible payment, provided that if the relevant comprehensive convention for the avoidance of double taxation does not contain a definition of a special tax regime analogous to the definition of that term included in this Convention, the principles of that definition shall apply, but without regard to the requirement in subdivision (v) of that definition; or iv) with respect to a payment of interest, to persons that are equivalent beneficiaries that are connected persons with respect to the company described in this paragraph and that benefit from notional deductions of the type described in [reference to the paragraph of Article 11 that relates to notional deductions for equity].

Alternatively:

4. A company that is a resident of a Contracting State shall also be entitled to a benefit that would otherwise be accorded by this Convention if:<sup>7</sup>
- a) at the time when the benefit otherwise would be accorded and on at least half of the days of any twelve-month period that includes that time, at least 95% of the aggregate vote and value of its shares (and at least 50% of the aggregate vote and value of any disproportionate class of shares) is owned, directly or indirectly, by seven or fewer persons that are equivalent beneficiaries, provided that in the case of indirect ownership, each

---

<sup>7</sup> or: 4. A company that is a resident of a Contracting State shall also be entitled to a benefit that would otherwise be accorded under Article 10 if:

- intermediate owner is a qualifying intermediate owner, and
- b) less than 50% of the person's gross income, and less than 50% of the tested group's gross income, for the taxable period that includes that time, as determined in the person's Contracting State of residence, is paid or accrued, directly or indirectly, in the form of payments that are deductible for purposes of the taxes covered by this Convention in the person's Contracting State of residence (but not including arm's length payments in the ordinary course of business for services or tangible property, and in the case of a tested group, not including intra-group transactions)
    - i) to persons that are not equivalent beneficiaries; or
    - ii) to persons that are equivalent beneficiaries only by reason of paragraph 5 of this Article or of a substantially similar provision in the relevant comprehensive convention for the avoidance of double taxation.

OECD simplified version is:

4. A resident of a Contracting State that is not a qualified person shall nevertheless be entitled to a benefit that would otherwise be accorded by this Convention with respect to an item of income if, at the time when the benefit otherwise would be accorded and on at least half of the days of any twelvemonth period that includes that time, persons that are equivalent beneficiaries own, directly or indirectly, at least 75% of the shares of the resident.

Article 23(3) USA/UK DTA provides:

Notwithstanding that a company that is a resident of a Contracting State may not be a qualified person, it shall be entitled to the benefits of this Convention otherwise accorded to residents of a Contracting State with respect to an item of income, profit or gain if it satisfies any other specified conditions for the obtaining of such benefits and—

- (a) shares representing at least 95% of the aggregate voting power and value of the company are owned, directly or indirectly, by seven or fewer persons who are equivalent beneficiaries; and
- (b) less than 50% of the company's gross income for the taxable or chargeable period in which the item of income, profit or gain arises is paid or accrued, directly or indirectly, to persons who are not equivalent beneficiaries, in the form of payments that are deductible for the purposes of the taxes covered by this Convention in the State of which the company is a resident (but not including arm's length payments in the ordinary course of business for services or tangible property and payments in

respect of financial obligations to a bank, provided that where such a bank is not a resident of a Contracting State such payment is attributable to a permanent establishment of that bank located in one of the Contracting States).

### **105.5 Principal purpose test**

LoB provides a principal purpose test for persons who would otherwise lose the benefit of the DTA. In other words, the LoB rule is a safe haven rule specifying those who do not need to pass the PPT:

#### **OECD model**

5/6. If a resident of a Contracting State is neither a qualified person pursuant to the provisions of paragraph 2 of this Article, nor entitled to benefits under paragraph 3[ or 4 (simplified version)] [ , 4 or 5 (detailed version)], the competent authority of the Contracting State in which benefits are denied under the previous provisions of this Article may, nevertheless, grant the benefits of this Convention, or benefits with respect to a specific item of income or capital, taking into account the object and purpose of this Convention, but only if such resident demonstrates to the satisfaction of such competent authority that neither its establishment, acquisition or maintenance, nor the conduct of its operations, had as one of its principal purposes the obtaining of benefits under this Convention. The competent authority of the Contracting State to which a request has been made, under this paragraph, by a resident of the other State, shall consult with the competent authority of that other State before either granting or denying the request.

#### **USA/UK DTA art 23(6)**

(6) A resident of a Contracting State that is neither a qualified person nor entitled to benefits with respect to an item of income, profit or gain under paragraph 3 or 4 of this Article shall, nevertheless, be granted benefits of this Convention with respect to such item if the competent authority of the other Contracting State determines that the establishment, acquisition or maintenance of such resident and the conduct of its operations did not have as one of its principal purposes the obtaining of benefits under this Convention.

The competent authority of the other Contracting State shall consult with the competent authority of the first-mentioned State before refusing to grant benefits of this Convention under this paragraph.

An Exchange of Notes provides:

With reference to paragraph 6 of Article 23 (Limitation on benefits)—

it is understood that in applying paragraph 6 of Article 23, the competent authorities will consider the obligations imposed upon the UK by its membership of the European Community and by its being a party to the European Economic Area Agreement, and on the United States by its being a party to the North American Free Trade Agreement. In particular, they will have regard to any legal requirements for the facilitation of the free movement of capital and persons, the differing internal tax systems, tax incentive regimes and existing tax treaty policies among Member States of the European Community or European Economic Area states, or, as the case may be, parties to the North American Free Trade Agreement.

Paragraph 6 of Article 23 requires the competent authority of the State from which benefits are claimed to consider whether the establishment, acquisition or maintenance of a resident and the conduct of its operations had as one of its principal purposes the obtaining of benefits under the Convention. That competent authority may determine under a given set of facts that a change in circumstances that would cause a qualified person to cease to qualify for treaty benefits under paragraph 2 of Article 23 need not result in a denial of benefits. Such changes in circumstances may include—

- (a) a change in the state of residence of a major participator in a company;
- (b) the sale of part of the ownership interests in a company to a resident of another Member State of the European Community or another European Economic Area state or, as the case may be, another party to the North American Free Trade Agreement; or
- (c) an expansion of a company's activities in other Member States of the European Community or other European Economic Area states or, as the case may be, other parties to the North American Free Trade Agreement,

all under ordinary business conditions.

If the competent authority is satisfied that these changed circumstances are not attributable to tax avoidance motives, this will be a factor weighing in favour of granting benefits in accordance with paragraph 6 of Article 23.

## **105.6 LoB: Definitions**

### *105.6.1 Recognised Stock Exchange*

This is straightforward:

<b>OECD detailed version</b>	<b>Simplified version</b>	
<b>OECD Art 29(7)</b>	<b>OECD Art 29(6)</b>	<b>Art 23(7) USA/UK DTA</b>
a) the term “recognised stock exchange” means:	[identical]	[identical]
(i) [list of stock exchanges agreed to at the time of signature]; and	(i) any stock exchange established and regulated as such under the laws of either Contracting State; and	(i) the NASDAQ System and any stock exchange registered with the US Securities and Exchange Commission as a national securities exchange under the US Securities Exchange Act of 1934; (ii) the London Stock Exchange and any other recognised investment exchange within the meaning of the Financial Services Act 1986 or, as the case may be, the Financial Services and Markets Act 2000; (iii) the Irish Stock Exchange, the Swiss Stock Exchange and the stock exchanges of Amsterdam, Brussels, Frankfurt, Hamburg, Johannesburg, Madrid, Milan, Paris, Stockholm, Sydney, Tokyo, Toronto and Vienna; and
(ii) any other stock exchange agreed upon by the competent authorities of the Contracting States;	[identical to OECD detailed version]	(iv) any other stock exchange which the competent authorities agree to recognise for the purposes of this Article;

### 105.6.2 “Shares”

OECD Model provides:

- b) with respect to entities that are not companies, the term “shares” means interests that are comparable to shares

OECD commentary provides:

120. Neither the simplified nor the detailed version contains an exhaustive definition of the term “shares”, which, under paragraph 2 of Article 3, should generally have the meaning which it has under the

domestic law of the State that applies the Article. Subparagraph b), however, provides that the term “shares”, when used with respect to entities that do not issue shares (e.g. trusts), refers to interests that are comparable to shares. These will typically be beneficial interests that entitle their holders to a share of the income or assets of the entity.

This applies to unit trusts.

Art 23(7) USA/UK DTA provides:

- (ii) the term “shares” shall include depository receipts thereof or trust certificates thereof;

### 105.6.3 “Principal class of shares”

#### OECD Model

c) the term “principal class of shares” means the ordinary or common shares of the company or entity, provided that such class of shares represents the majority of the aggregate vote and value of the company or entity.

If no single class of ordinary or common shares represents the majority of the aggregate vote and value of the company or entity, the “principal class of shares” are those classes that in the aggregate represent a majority of the aggregate vote and value;

#### Art 23(7) USA/UK DTA

(i) the term “principal class of shares” means the ordinary or common shares of the company, provided that such class of shares represents the majority of the voting power and value of the company.

If no single class of ordinary or common shares represents the majority of the aggregate voting power and value of the company, the “principal class of shares” is that class or those classes that in the aggregate represent a majority of the aggregate voting power and value of the company;

OECD Simplified version provides:

- c) the term “principal class of shares” means the class or classes of shares of a company or entity which represents the majority of the aggregate vote and value of the company or entity;

### 105.6.4 “Connected person”

OECD Model provides:

- d) two persons shall be “connected persons” if one owns, directly or indirectly, at least 50% of the beneficial interest in the other (or, in

the case of a company, at least 50% of the aggregate vote and value of the company's shares) or another person owns, directly or indirectly, at least 50% of the beneficial interest (or, in the case of a company, at least 50% of the aggregate vote and value of the company's shares) in each person. In any case, a person shall be connected to another if, based on all the relevant facts and circumstances, one has control of the other or both are under the control of the same person or persons.

#### 105.6.5 *Regularly traded*

Art 23(7) USA/UK DTA provides:

- (e) For the purposes of paragraph 2 of this Article, the shares in a class of shares or the units in a class of units are considered to be regularly traded on one or more recognised stock exchanges in a chargeable or taxable period if the aggregate number of shares or units of that class traded on such stock exchange or exchanges during the twelve months ending on the day before the beginning of that taxable or chargeable period is at least six% of the average number of shares or units outstanding in that class during that twelve-month period.

An Exchange of Notes provides:

With reference to sub-paragraph (e) of paragraph 7 of Article 23 (Limitation on benefits)—  
it is understood that, if a class of shares was not listed on a recognised stock exchange in the twelve months referred to in the sub-paragraph, that class of shares will be treated as regularly traded only if that class meets the aggregate trading requirements of the sub-paragraph for the taxable or chargeable period in which the income arises.

#### 105.6.6 *Equivalent beneficiary*

OECD Model provides:

- e) the term “equivalent beneficiary” means:
  - (i) a resident of any State, provided that:
    - A) the resident is entitled to all the benefits of a comprehensive convention for the avoidance of double taxation between that State and the Contracting State from which the benefits of this Convention are sought, under provisions substantially similar to subparagraph a), b), c) or e) of

paragraph 2 or, when the benefit being sought is with respect to interest or dividends paid by a member of the resident's multinational corporate group, the resident is entitled to benefits under provisions substantially similar to paragraph 5 of this Article in such convention, provided that, if such convention does not contain a detailed limitation on benefits article, such convention shall be applied as if the provisions of subparagraphs a) b), c) and e) of paragraph 2 (including the definitions relevant to the application of the tests in such subparagraphs) were contained in such convention; and

- B) 1) with respect to income referred to in Article 10, 11 or 12, if the resident had received such income directly, the resident would be entitled under such convention, a provision of domestic law or any international agreement, to a rate of tax with respect to such income for which benefits are being sought under this Convention that is less than or equal to the rate applicable under this Convention. Regarding a company seeking, under paragraph 4, the benefits of Article 10 with respect to dividends, for purposes of this subclause:
- I) if the resident is an individual, and the company is engaged in the active conduct of a business in its Contracting State of residence that is substantial in relation, and similar or complementary, to the business that generated the earnings from which the dividend is paid, such individual shall be treated as if he or she were a company. Activities conducted by a person that is a connected person with respect to the company seeking benefits shall be deemed to be conducted by such company. Whether a business activity is substantial shall be determined based on all the facts and circumstances; and
  - II) if the resident is a company (including an individual treated as a company), to determine whether the resident is entitled to a rate of tax that is less than or equal to the rate applicable under this Convention, the resident's indirect holding of the capital of the company paying the dividends shall be treated as a direct holding; or

- 2) with respect to an item of income referred to in Article 7, 13 or 21 of this Convention, the resident is entitled to benefits under such convention that are at least as favourable as the benefits that are being sought under this Convention; and
- C) notwithstanding that a resident may satisfy the requirements of clauses A) and B) of this subdivision, where the item of income has been derived through an entity that is treated as fiscally transparent under the laws of the Contracting State of residence of the company seeking benefits, if the item of income would not be treated as the income of the resident under a provision analogous to paragraph 2 of Article 1 had the resident, and not the company seeking benefits under paragraph 4 of this Article, itself owned the entity through which the income was derived by the company, such resident shall not be considered an equivalent beneficiary with respect to the item of income;
- (ii) a resident of the same Contracting State as the company seeking benefits under paragraph 4 of this Article that is entitled to all the benefits of this Convention by reason of subparagraph a), b), c) or e) of paragraph 2 or, when the benefit being sought is with respect to interest or dividends paid by a member of the resident's multinational corporate group, the resident is entitled to benefits under paragraph 5, provided that, in the case of a resident described in paragraph 5, if the resident had received such interest or dividends directly, the resident would be entitled to a rate of tax with respect to such income that is less than or equal to the rate applicable under this Convention to the company seeking benefits under paragraph 4; or
- (iii) a resident of the Contracting State from which the benefits of this Convention are sought that is entitled to all the benefits of this Convention by reason of subparagraph a), b), c) or e) of paragraph 2, provided that all such residents' ownership of the aggregate vote and value of the shares (and any disproportionate class of shares) of the company seeking benefits under paragraph 4 does not exceed 25 per cent of the total vote and value of the shares (and any disproportionate class of shares) of the company.

Art 23(7) USA/UK DTA provides:

- (d) an equivalent beneficiary is a resident of a Member State of the

European Community or of a European Economic Area state or of a party to the North American Free Trade Agreement but only if that resident-

- (i) (a) would be entitled to all the benefits of a comprehensive convention for the avoidance of double taxation between any Member State of the European Community or a European Economic Area state or any party to the North American Free Trade Agreement and the Contracting State from which the benefits of this Convention are claimed, provided that if such convention does not contain a comprehensive limitation on benefits article, the person would be a qualified person under paragraph 2 of this Article (or for the purposes of sub-paragraph (g) of paragraph 2, under the provisions specified in clause (i) of that sub-paragraph) if such person were a resident of one of the Contracting States under Article 4 (Residence) of this Convention; and
- (b) with respect to income referred to in Article 10 (Dividends), 11 (Interest), 12 (Royalties) of this Convention, would be entitled under such convention to a rate of tax with respect to the particular class of income for which benefits are being claimed under this Convention that is at least as low as the rate applicable under this Convention; or
- (ii) is a qualified person by reason of sub-paragraphs (a), (b), clause (i) of sub-paragraph (c), clause (i) of sub-paragraph (d), or sub-paragraph (e) of paragraph 2 of this Article.

For the purposes of applying paragraph 3 of Article 10 (Dividends) in order to determine whether a person, owning shares, directly or indirectly, in the company claiming the benefits of this Convention, is an equivalent beneficiary, such person shall be deemed to hold the same voting power in the company paying the dividend as the company claiming the benefits holds in such company.

CIOT ask:

the US Limitation of Benefits tests includes tests for 'derivative benefits' and 'equivalent beneficiaries', which in some cases require investors to be located in the European Union (or EEA). We would be interested to understand what (if anything) HMRC is able to do to

ensure continuation of benefits under the treaties between the US and other EU Member States with UK investors.<sup>8</sup>

#### 105.6.7 “Disproportionate class of shares”

OECD Model provides:

- f) the term “disproportionate class of shares” means any class of shares of a company or entity resident in one of the Contracting States that entitles the shareholder to disproportionately higher participation, through dividends, redemption payments or otherwise, in the earnings generated in the other Contracting State by particular assets or activities of the company;

#### 105.6.8 “Primary place of management and control”

OECD Model provides:

- g) a company’s or entity’s “primary place of management and control” is in the Contracting State of which it is a resident only if:
  - (i) the executive officers and senior management employees of the company or entity exercise day-to-day responsibility for more of the strategic, financial and operational policy decision making for the company or entity and its direct and indirect subsidiaries, and the staff of such persons conduct more of the day-to-day activities necessary for preparing and making those decisions, in that Contracting State than in any other State; and
  - (ii) such executive officers and senior management employees exercise day-to-day responsibility for more of the strategic, financial and operational policy decision-making for the company or entity and its direct and indirect subsidiaries, and the staff of such persons conduct more of the day-to-day activities necessary for preparing and making those decisions, than the officers or employees of any other company or entity;

#### 105.6.9 “Qualifying intermediate owner”

OECD Model provides:

---

8 Letter , 4 December 2019

[https://library.croneri.co.uk/system/files/assets/tat/cch\\_uk/tat/pdf%3A05-12-19-review-of-double-taxation-treaties-2019-20-ciot-response.pdf](https://library.croneri.co.uk/system/files/assets/tat/cch_uk/tat/pdf%3A05-12-19-review-of-double-taxation-treaties-2019-20-ciot-response.pdf)

- h) the term “qualifying intermediate owner” means an intermediate owner that is either:
  - (i) a resident of a State that has in effect with the Contracting State from which a benefit under this Convention is being sought a comprehensive convention for the avoidance of double taxation; or
  - (ii) a resident of the same Contracting State as the company applying the test under subparagraph d) or f) of paragraph 2 or paragraph 4 to determine whether it is eligible for benefits under the Convention.

#### 105.6.10 “Tested group”

OECD Model provides:

- i) the term “tested group” means the resident of a Contracting State that is applying the test under subparagraph d) or f) of paragraph 2 or under paragraph 4 or 5 to determine whether it is eligible for benefits under the Convention (the “tested resident”), and any company or permanent establishment that:
  - (i) participates as a member with the tested resident in a tax consolidation, fiscal unity or similar regime that requires members of the group to share profits or losses; or
  - (ii) shares losses with the tested resident pursuant to a group relief or other loss sharing regime in the relevant taxable period.

#### 105.6.11 *Share class arrangements*

Article 23(5) USA/UK DTA provides:

Notwithstanding the preceding provisions of this Article, if a company that is a resident of a Contracting State, or a company that controls such a company, has outstanding a class of shares—

- (a) which is subject to terms or other arrangements which entitle its holders to a portion of the income, profit or gain of the company derived from the other Contracting State that is larger than the portion such holders would receive in the absence of such terms or arrangements; and
  - (b) 50% or more of the voting power and value of which is owned by persons who are not equivalent beneficiaries,
- the benefits of this Convention shall apply only to that proportion of the income which those holders would have received in the absence of

those terms or arrangements.

#### 105.6.12 *Gross income*

- j) the term “gross income” means gross receipts as determined in the person’s Contracting State of residence for the taxable period that includes the time when the benefit would be accorded, except that where a person is engaged in a business that includes the manufacture, production or sale of goods, “gross income” means such gross receipts reduced by the cost of goods sold, and where a person is engaged in a business of providing non-financial services, “gross income” means such gross receipts reduced by the direct costs of generating such receipts, provided that:
- (i) except when relevant for determining benefits under Article 10 of this Convention, gross income shall not include the portion of any dividends that are effectively exempt from tax in the person’s Contracting State of residence, whether through deductions or otherwise; and
  - (ii) except with respect to the portion of any dividend that is taxable, a tested group’s gross income shall not take into account transactions between companies within the tested group;

An Exchange of Notes provides:

With reference to Article 23 (Limitation on benefits)—  
it is understood that the term “gross income” means the total revenues derived by a resident of a Contracting State from its principal operations, less the direct costs of obtaining such revenues.

#### 105.6.13 *In connection with business*

An Exchange of Notes provides:

With reference to paragraph 4 of Article 23 (Limitation on benefits)—  
it is understood that an item of income, profit or gain is to be considered as derived “in connection” with an active trade or business in a Contracting State if the activity generating the item in the other Contracting State is a line of business which forms a part of, or is complementary to, the trade or business conducted in the first-mentioned State. The line of business in the first-mentioned State may be “upstream” to that going on in the other State (eg providing inputs to a manufacturing process that occurs in that other State),

“downstream” (eg selling the output of a manufacturer which is a resident of the other State) or “parallel” (eg selling in one Contracting State the same sorts of products that are being sold by the trade or business carried on in the other Contracting State).

#### 105.6.14 *Incidental to business*

An Exchange of Notes provides:

It is understood that an item of income, profit or gain derived from a Contracting State would be considered “incidental” to the trade or business carried on in the other Contracting State if the item is not produced by a line of business which forms a part of, or is complementary to, the trade or business conducted in that other Contracting State by the recipient of the item, but the production of such item facilitates the conduct of the trade or business in that other Contracting State. An example of such “incidental” item of income, profit or gain is interest income earned from the short-term investment of working capital of a resident of a Contracting State in securities issued by persons in the other Contracting State.

### 105.7 Channel Islands/IoM LoB

Jersey/Guernsey//IoM have non-standard LoB provisions in arts 11-13 [Interest/Royalties/Capital gains]. Article 11 Jersey/UK DTA provides:

1. Interest arising in a Territory and beneficially owned by a resident of the other Territory may be taxed in that other Territory.
2. However, interest arising in a Territory may also be taxed in that Territory according to the laws of that Territory, but if
  - [a] the beneficial owner of the interest is a resident of the other Territory and
  - [b] at least one of the conditions mentioned in paragraph 3 is met,that interest shall be taxable only in that other Territory.

#### 105.7.1 *Conditions for full relief*

So full relief is in principle available if the art 11(3) conditions are met. Article 11(3) Jersey/UK DTA provides:

The conditions mentioned in paragraph 2 are that:

- (a) the interest is beneficially owned by:
  - (i) that other Territory itself, one of its political subdivisions,

- local authorities, its Central Bank, or its statutory bodies;<sup>9</sup>
- (ii) an individual;
  - (iii) a company in whose principal class of shares there is substantial and regular trading on a recognised stock exchange;<sup>10</sup>
  - (iv) a company less than 25% of whose shares or other rights are owned, directly or indirectly, by persons who are not residents of that other Territory;
  - (v) a pension scheme;<sup>11</sup>
  - (vi) a bank or building society;
  - (vii) any other financial institution unrelated to and dealing wholly independently with the payer;<sup>12</sup> or
  - (viii) any other person provided that the competent authority of the Territory which has to grant the benefits determines that
    - [A] the establishment, acquisition or maintenance of that person, or
    - [B] the conduct of its operations,does not have as its principal purpose or one of its principal purposes to secure the benefits of this Article;

Lastly, art 11(3) Jersey/UK DTA provides:

The conditions mentioned in paragraph 2 are that ...

- (b) the interest is paid by a Territory, one of its political subdivisions, local authorities or statutory bodies.

---

9 Defined in art 11(4): “For the purposes of paragraph 3(a)(i), the term “statutory bodies” includes any institution wholly or mainly owned directly or indirectly by the Government of either Territory as may be agreed from time to time by exchange of letters between the competent authorities of the Territories.”

10 The Protocol provides a definition of this term.

11 Defined in art 3(1)(k): “the term “pension scheme” means any scheme or other arrangement which:

- (i) is generally exempt from income taxation; and
- (ii) operates to administer or provide pension or retirement benefits or to earn income for the benefit of one or more such arrangements.”

12 Defined in para (vii): the term “other financial institution” here means an enterprise substantially deriving its profits by raising debt finance in the financial markets or by taking deposits at interest and using those funds in carrying on a business of providing finance.

CHAPTER ONE HUNDRED AND SIX

**CREDIT FOR FOREIGN TAX**

106.1		106.21.3	FTCR: CGT annual exemption
106.10.1	Example: tax not in accordance with DTA	106.27.3	Tax Credit/deduction interaction
106.11.1	DTA credit: Exclusion of underlying tax		

*Cross references*

The following topics are considered elsewhere:

- 10.9.1 (Foreign tax credit relief) - gains of temporary non-resident
- 22.15.5 (Foreign tax credit relief) - Entertainers and Sportspeople
- 35.14 (Foreign tax credit: EP app 5)
- 39.2.4 (Life tenant’s foreign tax credit)
- 27.16 (DT relief: AIP income)
- 91.9 (Foreign tax credit: currency conversion date)
- 103.1 (DT reliefs: Introduction)

**106.1 Credit for foreign tax**

Foreign tax credit arises where a UK tax liability is reduced by foreign tax. This chapter considers foreign tax credit for IT/CGT/CT.<sup>1</sup>

The term sometimes used is “Foreign Tax Credit Relief” (FTCR). The credit may be:

<b>Relief (my term)</b>	<b>Statutory term</b>	<b>Given by<sup>2</sup></b>	<b>See para</b>
DTA Credit	Credit under s.18(2)	DTA	106.2
Unilateral Credit			
Generally	Credit under s.9	s.9 TIOPA	106.2
Accrued income profits	Credit under s.9 or 10	s.9,10 TIOPA	27.16.2
Foreign Tax Credits (all types)	Credit under s.18(2)	s.18(2) TIOPA	106.12

I write the terms DTA Credit/Unilateral Credit with initial capitals to

1 For IHT, see 114.1 (Credit for foreign IHT).

2 Supplemented in each case by Part 2 TIOPA

reflect the technical nature of the terms, and I use the term FTC to apply to both.

I do not consider:

- Relief for UK resident companies, subject to corporation tax
- Relief for underlying tax
- Special Withholding Tax (Interest & royalty directive)

I hope to cover these in a future edition.

### 106.1.1 *Unilateral relief arrangements*

Section 8(1) TIOPA defines this term:

In this Part [Part 2 TIOPA] “unilateral relief arrangements”, in relation to a territory outside the UK, means the rules set out in sections 9 to 17.

Unilateral relief dates from 1950.

### 106.1.2 *FTC policy background*

The Royal Commission on the Taxation of Profits and Income Final Report provides:<sup>3</sup>

The system of relief is founded on acceptance of the principle that, when double taxation tends to arise, the aim should be either—

- (1) an arrangement between the two countries as to which of them is to have the exclusive right of taxing particular kinds of income, or
- (2) if other kinds of income are agreed to be capable of being taxed by two countries, an arrangement as to how the two taxews are to be adjusted between them and which is to have priority of claim.

Under (2) the normal basis of adjustment appears to be that the taxpayer’s home country (which taxes him on the grounds of residence) should do no more than bring up the weight of the foreign tax to the home tax, treating the two virtually as one composite tax on whatever income may be in question. So far as the owner of the income is concerned the grant by his home country of credit for the foreign tax paid against the home tax prospectively payable on the same income means that the income is effectively diminished by an amount equal to, but not more than, the higher of the two taxes.

## 106.2 DTA/Unilateral Credit compared

---

<sup>3</sup> (1953) Cmd 9474.

DTA Credit depends on the wording of the DTA in point, but there is a relatively standard form. OECD Model provides two alternative forms of relief, in articles 23 A/B, described as the exemption/credit methods. UK DTAs generally adopt a credit method, but do not follow the OECD wording.

It is helpful to read side by side:

- DTA Credit (I take the USA/UK DTA as an example) and
- s.9(1)(2) TIOPA, which provide Unilateral Credit for IT/CT and CGT

**Art 24(4) USA/UK DTA      s.9(1) TIOPA: IT/CT      s.9(2) TIOPA: CGT**

Subject to the provisions of the law of the UK regarding the allowance as a credit against UK tax of tax payable in a territory outside the UK (which shall not affect the general principle hereof)—

Credit for tax— [Identical to s.9(1)]

(a) United States tax payable under the laws of the United States and in accordance with this Convention, whether directly or by deduction,

(a) paid under the law of the territory, [Identical to s.9(1)]

on profits, income or chargeable gains from sources within the United States

(b) calculated by reference to income arising, or any chargeable gain accruing, in the territory, and

(b) calculated by reference to any capital gain accruing in the territory, and

(excluding, in the case of a dividend, United States tax in respect of the profits out of which the dividend is paid)

(c) corresponding to UK tax, [Identical to s.9(1)]

shall be allowed as a credit against any UK tax computed by reference to the same profits, income or chargeable gains by reference to which the United States tax is computed;

is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.

is to be allowed against any capital gains tax calculated by reference to that gain.

The differences between DTA/Unilateral Credit do not seem significant:

**Requirement**

**Comment**

Incorporation of general TIOPA rules

In opening words of DTA; not needed for Unilateral Credit

Tax paid/payable under laws of the territory

Tax payable in accordance with DTA  
...whether directly or by deduction...

Necessarily, applies to DTA only  
Phrase not found in Unilateral Credit, but not significant

Foreign tax corresponds to UK tax

Unilateral Credit only (not needed for DTA as foreign tax is defined)

Foreign/UK tax calculated/computed by reference to same income/gain

For Unilateral Credit, ss.9(1)(2) are identical, except that one refers to IT/CT, and the other refers to CGT. I comment on on s.9(1) below but the same points will apply to s.9(2).

**106.3 DTA Credit: TIOPA rules**

DTAs vary, and I here set out for comparison the opening words of the Credit article of 2 sample

DTAs:

**USA/UK Credit article**

[*Proviso A:*] Subject to the provisions of the law of the UK regarding the allowance as a credit against UK tax of tax payable in a territory outside the UK

(which shall not affect the general principle hereof)–

**Austria/UK Credit article**

[*Proviso A:*] Subject to the provisions of the law of the UK regarding the allowance as a credit against UK tax of tax payable in a territory outside the UK

[*Proviso B*] or, as the case may be, regarding the exemption from UK tax

[i] of a dividend arising in a territory outside the UK or  
[ii] of the profits of a permanent establishment situated in a territory outside the UK

(which shall not affect the general principle hereof):

Proviso A (my terminology) authorises restrictions on FTCD under UK domestic law, such as:

s.25-s.27 TIOPA (cases where credit not allowed)

s.81-s.88 TIOPA (anti-avoidance)

The GAAR

Of course these restrictions apply equally to Unilateral Credit.

**106.4 Which foreign taxes give credit**

**Art 24(4) USA/UK DTA**

United States tax payable under the laws of the United States...shall be allowed as a credit against any UK tax

**s.9(1) TIOPA: Unilateral Credit**

Credit for tax  
(a) paid under the law of the territory,...  
(c) corresponding to UK tax, is to be allowed against any income tax or corporation tax

106.4.1 *Which taxes: DTA Credit*

The USA/UK refers to “United States tax”. The last sentence of art 24(4) USA/UK DTA incorporates the definition by reference:

For the purposes of this paragraph, the income taxes referred to  
 [i] in clause (i) of sub-paragraph (a) of paragraph 3<sup>4</sup> and  
 [ii] in paragraph 4<sup>5</sup>  
 of Article 2 (Taxes covered) of this Convention  
 shall be considered United States tax.

#### 106.4.2 *Which taxes: Unilateral Credit*

Section 9 TIOPA refers to tax “paid under the law of the territory”.  
 Section 8(2) TIOPA provides:

In sections 11 to 17, and in Chapter 2 (except section 29) in its application to relief under unilateral relief arrangements, references to tax payable or paid under the law of a territory outside the UK include only—

- (a) taxes which are charged on income and which correspond to income tax,
- (b) taxes which are charged on income or chargeable gains and which correspond to corporation tax, and
- (c) taxes which are charged on capital gains and which correspond to capital gains tax.

Since this is expressed to apply only for the specified sections, the rule has to be set out again in s.9(4)(5) TIOPA.

“Correspondence” is a matter of degree. Section 8(3) TIOPA provides that local/provincial taxes may “correspond” to IT/CGT/CT, even though the latter are (more or less) UK-wide taxes.

For the purposes of subsection (2), tax may correspond to income tax, corporation tax or capital gains tax even though it—

- (a) is payable under the law of a province, state or other part of a country, or
- (b) is levied by or on behalf of a municipality or other local body.

Since this is expressed to apply only for the specified sections, the rule has to be set out again in s.9(6) and 29(4) TIOPA.

---

4 This refers to Federal income taxes imposed by the Internal Revenue Code (excluding social security taxes).

5 This refers to identical/substantially similar taxes imposed in addition to/in place of existing taxes.

The Royal Commission on the Taxation of Profits and Income Final Report provides:<sup>6</sup>

699. Some limitation to taxes that can be said to be in some sense equivalent to United Kingdom income tax and profits must, we think, be accepted. The forms of the taxes imposed throughout the world are multifarious and defy precise classification, but a “non-corresponding” tax will frequently belong to one or other of these four types—

- (1) a tax on articles of consumption comparable to the taxation administered in this country by the Commissioners of Customs and Excise—e.g., a general turnover tax having affinities with the United Kingdom purchase tax;
- (2) a payroll tax levied on employers as a contribution to the finances of a social security scheme;
- (3) a payment in the nature of a recurrent royalty which is exacted in return for the right to exploit certain natural resources;
- (4) a levy on real property appropriated towards the expenses of local government.

Where trade is carried on in this country the trader’s expenditure may well include the payment of excise duties, employer’s national insurance contributions, mining royalties or local rates. It has never been suggested that his outlay of this sort should serve as an acquittance of the income tax and profits tax presumptively due from him. His outlay is simply a particular part of the costs he incurs for the purposes of his trade and the situation is sufficiently met by allowing him a deduction in arriving at the amount effectively charged as representing his net profit. If, however, parallel outlay in the case of trading operations that take place overseas, which is now a deduction in computing net taxable profit, were permitted instead to rank for tax credit relief the trader operating overseas would *pro tanto* receive more favourable tax treatment than that accorded when the trade is in this country. Each overseas tax ought to be tested on its own merits; and in the case of the overseas taxes under discussion we can see no way of devising a general rule to define how far, if at all, any of them ought to be regarded as a levy on the profits themselves rather than a working expense in computing them. We therefore consider that the rule requiring the overseas tax to “correspond” to United Kingdom income or profits tax should be maintained.

700. In reaching this conclusion we have not ignored the fact that there may be territories which, for administrative or other reasons, are accustomed to rely upon such taxes as import and export duties for a much larger proportion of the

---

6 (1953) Cmd 9474.

total revenue than does a country with a fully developed system of taxes on profits and income. The duties levied in such a territory can be assumed to be in substitution for the taxation of profits and income that might have been levied there had conditions been more favourable; consequently, it is said, those duties do correspond in a special sense to United Kingdom income and profits tax. Nevertheless, we think that a general provision for unilateral relief much deal with broad categories only; a limited exception to the rule of correspondence for the purpose of meeting this situation would involve insuperable difficulties of demarcation.

## 106.5 Same income rule

### Art 24(4) USA/UK DTA

United States tax ... on profits, income or chargeable gains from sources within the United States ...

shall be allowed as a credit against any UK tax computed by reference to the same profits, income or chargeable gains by reference to which the United States tax is computed

### s.9(1) TIOPA: Unilateral Credit

Credit for [foreign] tax ... (b) calculated by reference to income arising, or any chargeable gain accruing, in the territory ...

is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.

I refer to this as the “**same income rule**”.

As far as this rule is concerned, there is no difference between DTA Credit and Unilateral Credit.<sup>7</sup>

### 106.5.1 *The same: general principle*

In *Anson v HMRC*:<sup>8</sup>

The words ‘the same’ are ordinary English words. It should however be borne in mind that a degree of pragmatism in their application may be necessary in some circumstances if the object of the Convention is to be achieved.

What is “the same” raises the question of identity. Despite the apparent

---

<sup>7</sup> *Anson v HMRC* [2015] UKSC 44 concerned both types of Credit, DTA Credit for federal tax and Unilateral Credit for state tax; the SC clearly assumed that the same principles applied for both.

<sup>8</sup> [2015] UKSC 44 at [114]. See too at [53] suggesting “a less technical approach than that ordinarily adopted in UK tax law”.

rigidity, identity is a matter of degree. (Is the reader “the same person” as when they left school? Discuss.) What is required is sufficient similarity. The courts have reached - there is no other word - similar conclusions in other contexts where the question of identity arises.<sup>9</sup> The level or type of similarity required may vary from one context to another, so cases from other areas need to be viewed with caution.

For the application of the same income rule in the context of LLCs, see 86.34.4 (LLC US tax credit: Generally).

### 106.5.2 *Timing/assessment period*

The INT Manual provides:

**INTM169150. Amount of foreign tax credit relief – basis of allowance** [May 2020]

Credit may be claimed for the foreign tax paid on foreign capital gains against the UK tax due on the same gain, irrespective of the tax year in which the foreign tax is charged.

In *Anson v HMRC*:<sup>10</sup>

... differences between UK and foreign accounting and tax rules prevent a precise matching of the income by reference to which tax is computed in the two jurisdictions. It appears that some potential difficulties of this kind are in practice avoided by the Commissioners’ accepting that the profits on which foreign tax is computed and in respect of which relief can be claimed are not confined to those arising under UK tax principles in individual UK chargeable periods.

### 106.5.3 *Preceding year basis*

In *Anson v HMRC*:<sup>11</sup>

the use of the phrase “computed by reference to”, in [the FTC article], in place of the words “payable in respect of”, which had been used in the 1945 version. The modified wording was introduced following the decision of the House of Lords in *Duckering v Gollan* [1965] 1 WLR 680. The case concerned a double taxation agreement between the UK and New Zealand, which contained a provision ... allowing a credit

---

9 See 48.3.2 (Identity of income condition).

10 [2015] UKSC 44 at [114].

11 [2015] UKSC 44 at [85].

against UK tax “payable in respect of that income”. The taxpayer was liable to UK tax on his income, including income arising in New Zealand, for the year 1958-1959. The tax was computed, on a preceding year basis, by reference to his income in 1957-1958. He had not paid tax in New Zealand which had been computed by reference to that income: as a result of a change in tax law there, his New Zealand tax for 1957-1958 had been computed on a preceding year basis, by reference to his income arising in 1956-1957, and his tax for 1958-1959 had been computed on a current year basis, by reference to his income arising in 1958-1959. He successfully sought a credit against his UK tax for 1958-1959 for the tax paid in New Zealand in 1958-1959, on the basis that he had paid tax in both countries “in respect of” the same income, despite the fact that the income by reference to which his tax liability was computed in the two jurisdictions was not the same. In the light of that decision, the 1966 Protocol used the phrase “computed by reference to”.

The International Manual provides:

**INTM161140: root income basis, statutory income basis** [May 2020]

The following definitions apply for the purposes of foreign tax credit relief:

- a) ‘Credit on the root income basis’ means credit allowed for foreign tax against any UK tax computed by reference to the same income by reference to which the foreign tax is computed. For example, if interest of £100 has been taxed by the foreign country on a current year basis in 2010/11 and is taxed in the UK on the preceding year basis for 2011/12, credit should be allowed for the foreign tax charged for 2010/11 against the UK tax charged for 2011/12. Credit on the root income basis is the usual way in which credit is given.
- b) ‘Credit on the statutory income basis’ means credit allowed in accordance with the decision in *Duckering v Gollan* 42 TC 333, that is the foreign tax on the foreign income is the foreign tax payable in respect of the income from the source, for the same year as that for which the UK tax is assessed. If in the example referred to in (a) above, credit was due upon the statutory income basis, credit for the foreign tax charged for 2010/11 would be allowed against the UK tax charged on income from the same source for 2010/11. Credit against UK tax for 2011/12 would be allowed for the foreign tax paid for 2011/12. Where the foreign basis period for assessment does not coincide with the UK basis period see INTM161220. See SI1997/405 for the treatment of foreign tax paid in respect of profits or losses arising from the business

of a Lloyd's underwriter.

**INTM161160: 'Root income' basis - legal position** [May 2020]

The authority for the 'root income' basis is found in the credit Article in double taxation agreements which have been negotiated or amended since the decision in *Duckering v Gollan* referred to in INTM161140 paragraph (b). This says '... tax payable under the laws of ... and in accordance with this convention, whether directly or by deduction, on profits income or chargeable gains from sources within ... shall be allowed as a credit against any UK tax computed by reference to the same profits income or chargeable gains by reference to which the ... tax is computed'. TIOPA10/S9 (1)-(3) is the authority for unilateral relief purposes.

There are still a few agreements in force which have not been revised or amended and which provide for credit relief to be given on the statutory income basis. See, however, INTM161170 for guidance on the practice to be adopted where the statutory income basis is the strict legal basis.

**INTM161170: 'Root income' basis - practice** [May 2020]

Tax credit relief should be allowed in all cases and for all years on the root income basis. Where relief is due strictly on the statutory income basis (see INTM161160, second paragraph), relief will be allowed on the root income basis unless the taxpayer specifically asks for the statutory income basis. Where the root income basis applies and the same foreign income is assessed once to UK tax and more than once to foreign tax, the total foreign tax is available for credit against the UK tax. Where the same foreign income is assessable to Income Tax for more than one UK year of assessment see INTM165100 onwards. Where the foreign income is not assessed for any UK year of assessment, no credit relief can be given

The summaries of agreements under the respective country entries will show specifically where the statutory income basis applies. For all other countries the root income basis will apply.

The preceding year basis is now a matter of history and perhaps this does not matter now.

#### 106.5.4 *Ownership period/rebasing*

HMRC Brief 17/10 provides:

**Introduction**

The purpose of this brief is to publicise a change to the established practice of restricting the amount of Foreign Tax Credit Relief (FTCR)

that can be deducted when calculating the amount of UK tax due on a chargeable gain.

### **Background**

Where a gain is chargeable to UK Capital Gains Tax or UK Corporation Tax and the same gain has also been taxed in another country then FTCR can be claimed in respect of the foreign tax paid.

Our practice has been to restrict the amount of FTCR if different periods of ownership of the asset are considered when arriving at the gain assessable in the UK and the foreign gain, or if the amount of the UK gain is less than the foreign gain.

We have reconsidered our view and are revising our practice so that the whole of the foreign tax is allowable as FTCR up to the amount of the UK tax on the gain.

### **The current practice**

The established practice has been to restrict the amount of FTCR in the following two situations:

#### **Situation one [different ownership periods]**

The amount of gain charged to foreign tax may be calculated by reference to a longer period of ownership than the period on which the gain charged to UK tax is based. The most common instance is where assets were acquired before the 31 March 1982 and the gain chargeable in the UK is based only on the period from 31 March 1982 onwards. In such cases the established practice has been to restrict the FTCR due by the following calculation:<sup>12</sup>

$A/B \times \text{foreign tax} = \text{allowable FTCR}$  where

A = period of time assessed by UK

B = period of time assessed by foreign authority

For example:

- asset acquired on 31 March 1971
- asset rebased for UK CGT on 31 March 1982
- asset disposed of on 31 March 1993
- foreign tax of £10,000 charged

The maximum amount of FTCR would be restricted as follows:

$(\text{period 31 Mar 1982 to 31 Mar 1993} = 11 \text{ years}) \div (\text{period 31 Mar 1971 to 31 Mar 1993} = 22 \text{ years}) \times £10,000 \text{ foreign tax, equals } £5,000 \text{ tax credit.}$

#### **Situation two [foreign chargeable gain exceeds UK gain]**

Where the gain charged in the UK is less than the gain charged to foreign tax, the established practice has been to restrict the maximum

---

<sup>12</sup> I have put the wording into mathematical terms, for clarity.

amount of FTCR due by the following calculation:  
 (amount of UK assessment) ÷ (amount of foreign assessment)  
 multiplied by foreign tax = allowable FTCR

For example, where

the UK assessed a gain of £55,000,  
 the gain charged to foreign tax was £75,000 and  
 the foreign tax was £15,000

then the FTCR would be restricted as follows:

$(£55,000 \div £75,000) \times £15,000 = £11,000$

**How we intend to implement the revised practice**

... In all cases where FTCR is claimed against UK tax on chargeable gains, the whole of the foreign tax will be allowable up to the amount of the UK tax on the gain, provided that the gain charged in both countries relates to the same disposal.

In the examples above, the maximum allowable FTCR would now be the full £10,000 of foreign tax in the first case and the full £15,000 of foreign tax in the second, provided, in each case, that this amount was less than or equal to the UK tax.

This change will bring the chargeable gains practice in line with the Income Tax practice, which does not restrict the amount of FTCR allowed where the amount assessed in the UK is less than the amount of income assessed to foreign tax...

Could it be that HMRC's pre-2010 view in situation 1 (different ownership periods) was correct, and the current practice is concessionary? The difficulty is that there are so many ways of computing a gain. There may be different rules not just relating to periods of ownership, but to acquisition cost and to allowable expenditure. It is not practical to seek to identify differences and say that only the sum computed on UK principles is the same gain, albeit computed by different methods. We need that element of pragmatism referred to in *Anson*.

HMRC's pre-2010 view in situation 2 seems difficult to defend and it is considered that the present view is correct as a matter of law.

#### 106.5.5 Tax on different person/time

SP 6/88 provides:

**Double taxation relief: chargeable gains**

3 The principal requirement for the granting of credit for overseas tax against liability to capital gains tax (or corporation tax on chargeable gains) is therefore that the overseas tax should be computed by reference

to the same gain as the UK tax. There is no requirement that the respective tax liabilities should arise at the same time nor that they should be charged on the same person.

INTM169040 [May 2020] gives an example where tax is charged on a different person:

overseas tax is payable in its country of residence by a non-resident company on the disposal of an asset and in the UK the gain is charged on a UK resident individual under s.3 TCGA

See 60.40 (Foreign tax credit relief: s.3).

#### 106.5.6 *Gain treated as income*

SP 6/88 provides:

4 The Revenue's view is that the following sets of circumstances fall within the terms of the standard credit article and [Part 2 TIOPA, Unilateral Credit] and may therefore give rise to a credit for overseas tax against UK capital gains tax or corporation tax on chargeable gains.

(i) The overseas tax charges capital gains as income

This is consistent with the rule that a gain subject to income tax may qualify for DT relief under art 13(5) OECD Model.<sup>13</sup>

#### 106.5.7 *Disposal after group transfer*

SP 6/88 provides:

4 The Revenue's view is that the following sets of circumstances fall within the terms of the standard credit article and [Part 2 TIOPA, Unilateral Credit] and may therefore give rise to a credit for overseas tax against UK capital gains tax or corporation tax on chargeable gains...

(ii) [a] Overseas tax is payable on a disposal falling within TCGA 1992 s 171 (transfers within a group of companies treated as taking place on a no gain/no loss basis) and

[b] a liability to UK tax arises on a subsequent disposal.<sup>14</sup>

---

<sup>13</sup> See 53.22.2 (Gain subject to income tax).

<sup>14</sup> The former International Tax Handbook para 619 explains the point more clearly: "A similar situation could occur with transfers under Section 171 TCGA 1992 between UK group companies. If the assets involved are situated abroad and the foreign tax authority taxes the UK company making the transfer, the benefit of that tax can be taken by the transferee group company when there is a disposal outside the group

The facts envisaged are:

- (1) X transfers to Y within a group (“the first disposal”):
  - (a) The disposal is not subject to UK tax (because of CG group relief)<sup>15</sup>
  - (b) The disposal is subject to foreign tax (because the foreign tax does not allow a CG group relief)
- (2) Y disposes of the property (“the second disposal”)

The first disposal is treated for CGT as made for such amount as secures that no gain/loss accrues on the disposal, ie the historic base cost. On the second disposal, by Y, a chargeable gain accrues.<sup>16</sup> Foreign tax on the first disposal is regarded as tax on Y’s gain. If one accepts that the foreign tax is on the same gain, it does not matter that:

- (1) X pays the foreign tax at the time of the first disposal.
- (2) Y pays UK tax (subject to the tax credit) at the time of the second disposal.

### 106.5.8 Foreign tax on unrealised gain

SP 6/88 provides:

4 The Revenue’s view is that the following sets of circumstances fall within the terms of the standard credit article and [Part 2 TIOPA, Unilateral Credit] and may therefore give rise to a credit for overseas tax against UK capital gains tax or corporation tax on chargeable gains...

- (iv) [a] Overseas tax is payable by reference to increases in the value of assets although there has been no disposal.
- [b] There is a subsequent disposal of the assets on which a liability to UK tax arises.

In the UK we do not usually tax chargeable gains without a disposal; but we often tax gains accruing on a deemed disposal, which comes to the same thing. In this case UK/foreign taxes are paid at a different times, but (at least in general) the taxes are paid by the same person.

## 106.6 Domestication relief

---

generating a UK tax charge on the relevant asset.”

<sup>15</sup> See 60.25 (CG group reliefs).

<sup>16</sup> Assume the asset is sold for more than the historic base cost.

### 106.6.1 *The relief*

This is a niche topic, far from the interests of private client practitioners. But it illustrates the principles of what constitutes the same tax for the purposes of foreign tax credit. I set out only the provisions needed to understand the tax credit issue. Section 140(1) TCGA provides:

This section applies where a company resident in the UK carries on a trade outside the UK through a permanent establishment and—

- (a) that trade ...is transferred to a company not resident in the UK;
- (b) the trade ... is so transferred wholly or partly in exchange for securities consisting of shares, or of shares and loan stock, issued by the transferee company to the transferor company ...

HMRC refer to this as “domestication”. Section 140 provides a form of incorporation relief:

(2) In any case to which this section applies the transferor company may claim that this Act shall have effect in accordance with the following provisions.

- (3) ... (a) if the securities are the whole consideration for the transfer,
  - [i] the whole of that gain shall be treated as not accruing to the transferor company on the transfer but
  - [ii] an equivalent amount (“the deferred gain”) shall be brought into account in accordance with subsections (4) and (5) below ...

### 106.6.2 *The clawback charges*

A clawback charge arises if the company disposes of the securities. Section 140 TCGA provides:

(4) If at any time after the transfer the transferor company disposes of the whole or part of the securities held by it immediately before that time, there shall be deemed to accrue to the transferor company as a chargeable gain on that occasion the whole or the appropriate proportion of the deferred gain so far as not already taken into account under this subsection or subsection (5) below...

(4A) A chargeable gain which is deemed to accrue under subsection (4) is in addition to any gain or loss that actually accrues to the transferor company on the disposal of the securities.

A clawback charge also arises if the subsidiary disposes of the trade. Section 140(5) TCGA provides:

If at any time within 6 years after the transfer the transferee company disposes of the whole or part of the relevant assets held by it immediately before that time there shall be deemed to accrue to the transferor company as a chargeable gain on that occasion the whole or the appropriate proportion of the deferred gain...

SP 6/88 provides:

4 The Revenue's view is that the following sets of circumstances fall within the terms of the standard credit article and [Part 2 TIOPA, Unilateral Credit] and may therefore give rise to a credit for overseas tax against UK capital gains tax or corporation tax on chargeable gains...

(iii) [a] An overseas trade carried on through a branch or agency is domesticated (ie transferred to a local subsidiary) and relief is given under TCGA 1992 s 140.

[b] There is a subsequent disposal of the securities (or the subsidiary disposes of the assets within six years) giving rise to a liability to UK tax and overseas tax is charged in whole or in part by reference to the gain accruing at the date of domestication.<sup>17</sup>

The facts envisaged are:

- (1) X transfers a trade to Y, a subsidiary ("the first disposal"):
  - (a) The disposal is not subject to UK tax ( because of domiciliation relief )
  - (b) The disposal is subject to foreign tax (because the foreign tax does not allow a domestication relief)
- (2) A clawback charge on the disposal of the shares in the subsidiary by X, or on the disposal of the trade by Y ("the second disposal").

---

<sup>17</sup> The former International Tax Handbook para 619 explains the point more clearly: "An example of this situation is found in Section 140 TCGA 1992 which deals with the charge on capital gains where a branch or agency overseas is domesticated, that is to say transferred to a non-resident company in exchange for shares. In those circumstances a charge on the gains on branch assets transferred is deferred until either the transferor sells the shares or the transferee sells the assets (in the latter case the sale has to be within six years of the acquisition). In that latter instance where the transferee sells the asset, any foreign tax on the gains is paid by the transferee. But the UK company is charged in respect of the capital gains on those same assets and qualifies for credit relief because the gain has been taxed abroad, although the tax has actually been charged on the transferee."

The first disposal is treated for CT as made for such amount as secures that no gain/loss accrues on the disposal, ie the historic base cost. On the second disposal a chargeable gain accrues. Foreign tax on the first disposal is regarded as a tax on the gain.. This is a relatively easy case because:

- (1) On a disposal of securities by X, a different asset is disposed of, but the gain accruing is “the deferred gain” (the gain otherwise payable on the first disposal)
- (2) Likewise on a disposal of the trade by Y, the gain accrues to X.

## **106.7 Same gain: roll-over relief**

### *106.7.1 The relief*

We move on to a more familiar relief. Section 152(1) TCGA provides:

- (1) If
  - [i] the consideration which a person carrying on a trade obtains for the disposal of, or of his interest in, assets (“the old assets”) used, and used only, for the purposes of the trade throughout the period of ownership is applied by him in acquiring other assets, or an interest in other assets (“the new assets”) which on the acquisition are taken into use, and used only, for the purposes of the trade, and
  - [ii] the old assets and new assets are within the classes of assets listed in section 155,

then the person carrying on the trade shall, on making a claim as respects the consideration which has been so applied, be treated for the purposes of this Act—

- (a) as if the consideration for the disposal of, or of the interest in, the old assets were (if otherwise of a greater amount or value) of such amount as would secure that on the disposal neither a gain nor a loss accrues to him, and
- (b) as if the amount or value of the consideration for the acquisition of, or of the interest in, the new assets were reduced by the excess of the amount or value of the actual consideration for the disposal of, or of the interest in, the old assets over the amount of the consideration which he is treated as receiving under paragraph (a) above ...

### *106.7.2 Roll-over: Foreign tax credit*

SP 6/88 provides:

5 ... where roll-over relief is claimed, for example under TCGA 1992 s 152, the gain on disposal of the old asset is not subjected to UK tax. The gain on realisation of the new asset remains a gain separate from that realised on sale of the old asset and overseas tax payable as a result of the sale of the old asset is not creditable against UK tax payable on the gain realised on sale of the new asset.

The facts envisaged are:

- (1) A disposal of the old asset by X (“the first disposal”) where the disposal is:
  - (a) not subject to UK tax (because of roll-over relief)
  - (b) subject to foreign tax (because the foreign tax does not allow a roll-over relief)
- (2) A disposal of the new asset by X (the second disposal)

The first disposal is treated as made for an amount which secures that no gain/loss accrues on the disposal. On the second disposal a gain accrues. Foreign tax on the first disposal is *not* regarded as a tax on that gain.

What is the difference between (1) roll-over relief (no FTC) and (2) group/domiciliation reliefs (where Foreign Tax Credit applies)?

In a group relief case the gain arises on a disposal of the same asset. In the domestication case, there is tax on the deferred gain, ie the gain on the disposal of the first asset. But in a roll-over case there is a disposal of a different asset. In the HMRC view, the elastic of identity has snapped. The contrary is arguable, but what are the prospects of success? On one hand, the fact that HMRC’s view has been unchallenged since (at least) 1988 is suggestive. On the other hand, *Anson* calls for “a degree of pragmatism, at least “in some circumstances”.<sup>18</sup> The taxpayer has the merits; but (unlike *Anson*) the taxpayer has fall-back options of not claiming roll-over relief, or else a deduction for the tax. A topic for a student moot, perhaps? But I think HMRC have the stronger argument.

### 106.7.3 Roll-over: Deduction

SP 6/88 provides:

However, in such circumstances [s.113 TIOPA] allows the overseas tax to be claimed as a deduction in computing the gain for roll-over relief

---

18 See 106.5.1 (The same: general principle).

purposes.

See 106.27 (CGT/IT computation deduction).

## 106.8 Foreign source rule

### Art 24(4) USA/UK DTA

United States tax ... on profits, income or chargeable gains from sources within the United States ... shall be allowed as a credit against any UK tax

### s.9(1) TIOPA: Unilateral Credit

Credit for tax ... calculated by reference to income arising, or any chargeable gain accruing, in the territory... is to be allowed against any income tax or corporation tax

I refer to this as the “**foreign source rule**”. It is therefore necessary to determine where income/gains arise.

### 106.8.1 *Treaty source rules*

DTAs may provide specific rules for determining the source of income, for treaty purposes generally or for foreign tax credit specifically.<sup>19</sup>

DTAs may provide that for DTA purposes, interest, royalties and technical fees arise in the State where the payer is resident.<sup>20</sup>

Article 24(5) USA/UK DTA provides:

For the purposes of paragraph 4 of this Article, profits, income and chargeable gains

[a] owned<sup>21</sup> by a resident of the UK

[b] which may be taxed in the United States in accordance with this Convention

shall be deemed to arise from sources within the United States.

US Treasury refer to this rule as “re-sourcing”.

The USA/UK DTA Technical Explanation provides:<sup>22</sup>

Paragraph 5 provides a re-sourcing rule for gross income covered by paragraph 4 [UK FTCD]. This provision is intended to ensure that a U.K. resident can obtain a U.K. foreign tax credit for U.S. taxes paid when the Convention assigns to the United States primary taxing rights over an

19 See Avery Jones, “Tax treaty problems relating to source” [1998] BTR 222.

20 See 21.26.6 (Source of interest for DTA); 24.16.7 (Source of royalties for DTA).

21 See 14.10.2 (“Paid” and “payment”).

22 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>  
FD\_106\_Credit\_for\_Foreign\_Tax.wpd

item of gross income. Paragraph 5 provides that, if the Convention allows the United States to tax an item of gross income (as defined under U.K. law) derived by a resident of the UK, the UK will treat that item of gross income as gross income from sources within the United States for U.K. foreign tax credit purposes.

### 106.8.2 *Income from services/trading*

Section 9(3) TIOPA provides:

For the purposes of subsection (1) [Unilateral Credit], profits from, or remuneration for, personal or professional services performed in the territory are to be treated as income arising in the territory.

In *Yates v GCA International*<sup>23</sup> a UK resident company provided services (an investigation into oil fields in Venezuela). Some of the work was done in Venezuela and some in the UK. The company (being UK resident) was in principle taxable on all trading income, but subject to foreign tax credit relief for Venezuela tax on income arising in Venezuela. *Smith* principles were applied<sup>24</sup> and so (unsurprisingly) part of the profits were held to arise in Venezuela.

The INT Manual provides:

**INTM161120 UK residents with foreign income or gains: double taxation relief** [May 2020]

... Where tax credit relief is allowable under a double taxation agreement, where a UK resident carries on a trade, profession or vocation etc. chargeable to either Income or Corporation Tax and earns profits partly in the UK and partly in a foreign country, that part of the profits earned in the foreign country is regarded, for credit purposes, as having a foreign source.

Where tax credit relief is only allowable under the unilateral provisions, TIOPA10/S9(3) states that profits from, or remuneration for, personal or professional services performed in the foreign country are deemed to be income arising in that country. This is more narrowly drawn than the corresponding provision in an agreement (see above). In *Yates v GCA International Ltd* (64 TC 37), where services under a contract were performed partly in Venezuela and partly in the UK, it was held that unilateral credit relief was only allowable for the Venezuelan tax

---

23 64 TC 37.

24 See 20.13 (Services).

attributable to the fees paid for the services that were performed in Venezuela, limited to the UK tax charged on the profits to which those fees gave rise, after deduction of expenses.

### 106.8.3 Channel Islands/Isle of Man

Section 9(7) TIOPA provides:

If the territory is the Isle of Man or any of the Channel Islands, subsections (1)(b) and (2)(b) have effect with the omission of “in the territory”.

Amended as s.9(7) directs, s.9(1)(2) TIOPA provide:

**s.9(1) TIOPA: IT/CT**

Credit for tax—

(a) paid under the law of the territory,

(b) calculated by reference to income arising, or any chargeable gain accruing, ~~in the territory~~, and

(c) corresponding to UK tax,

is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.

**s.9(2) TIOPA: CGT**

[Identical to s.9(1)]

[Identical to s.9(1)]

(b) calculated by reference to any capital gain accruing ~~in the territory~~, and

[Identical to s.9(1)]

is to be allowed against any capital gains tax calculated by reference to that gain.

Since the Channel Islands and the IoM do not have CGT, it is not immediately obvious what is the role of s.9(2). Perhaps it applies where a gain is subject to IT in the Islands but subject to CGT in the UK.

The INT Manual provides:

**INTM161120 UK residents with foreign income or gains: double taxation relief [May 2020]**

**Exceptions to the source rule**

Certain exceptions to the source rule (INTM161110) are provided for by statute and under particular agreements as follows:

1. Isle of Man and Channel Islands. TIOPA10/S9(7) provides that the limitation of unilateral relief to foreign tax on income arising in the foreign country is not to apply where the country concerned is the Isle of Man or any of the Channel Islands. Company dividends and debenture interest are excluded from the scope of the agreements with the Isle of Man (DT9950+), Guernsey (DT8600+) and Jersey

(DT10750+) by the credit Articles of those agreements. Unilateral relief is therefore available for Manx and Channel Islands tax on debenture interest and on company dividends wherever such income arises, except where the recipient is a portfolio shareholder (see INTM164010 paragraph (f)). See also DT8606, DT9955 and DT10755...

This needs to be reviewed in the light of the new Channel Islands/IoM treaties.

## **106.9 Tax in accordance with DTA**

Art 24 USA/UK DTA provides credit for:

United States tax payable ... in accordance with this Convention...

The same phrase is used in art 23B OECD Model:

1. Where a resident of a Contracting State derives income ... which may be taxed in the other Contracting State in accordance with the provisions of this Convention (except to the extent that these provisions allow taxation by that other State solely because the income is also income derived by a resident of that State ...), the first-mentioned State shall allow:

a) as a deduction from the tax on the income of that resident, an amount equal to the income tax paid in that other State...

The OECD Commentary is not usually relevant for DTA Credit, but on this point the wording is the same so it is applicable:

32.1 Both Articles 23 A and 23 B require that relief be granted, through the exemption or credit method, as the case may be, where an item of income or capital may be taxed by the State of source in accordance with the provisions of the Convention. Thus, the State of residence has the obligation to apply the exemption or credit method in relation to an item of income or capital where the Convention authorises taxation of that item by the State of source.

32.2 The interpretation of the phrase “may be taxed in the other Contracting State in accordance with the provisions of this Convention”, which is used in both Articles, is particularly important when dealing with cases where the State of residence and the State of source classify the same item of income or capital differently for purposes of the provisions of the Convention.

32.3 Different situations need to be considered in that respect. Where, due to differences in the domestic law between the State of source and

the State of residence, the former applies, with respect to a particular item of income or capital, provisions of the Convention that are different from those that the State of residence would have applied to the same item of income or capital, the income is still being taxed in accordance with the provisions of the Convention, as interpreted and applied by the State of source. In such a case, therefore, the two Articles require that relief from double taxation be granted by the State of residence notwithstanding the conflict of qualification resulting from these differences in domestic law.

#### 106.10 *Example: Hybrid entity*

The OECD Commentary gives the example of a hybrid entity:

32.4 This point may be illustrated by the following example.

A business is carried on through a permanent establishment in State E by a partnership established in that State. A partner, resident in State R, alienates his interest in that partnership. State E treats the partnership as fiscally transparent whereas State R treats it as taxable entity.

State E therefore considers that the alienation of the interest in the partnership is, for the purposes of its Convention with State R, an alienation by the partner of the underlying assets of the business carried on by the partnership, which may be taxed by that State in accordance with paragraph 1 or 2 of Article 13.

State R, as it treats the partnership as a taxable entity, considers that the alienation of the interest in the partnership is akin to the alienation of a share in a company, which could not be taxed by State E by reason of paragraph 5 of Article 13.

OECD refer to this as a conflict of qualification, though this is not a transparent term. The OECD analysis is as follows:

In such a case, the conflict of qualification results exclusively from the different treatment of partnerships in the domestic laws of the two States and State E must be considered by State R to have taxed the gain from the alienation “in accordance with the provisions of the Convention” for purposes of the application of Article 23 A or Article 23 B. State R must therefore grant an exemption pursuant to Article 23 A or give a credit pursuant to Article 23 B irrespective of the fact that, under its own domestic law, it treats the alienation gain as income from the disposition of shares in a corporate entity and that, if State E's qualification of the income were consistent with that of State R, State R would not have to give relief under Article 23 A or Article 23 B. No double taxation will

therefore arise in such a case.

### 106.10.1 *Example: tax not in accordance with DTA*

The OECD Commentary provides:

32.5 Article 23 A and Article 23 B, however, do not require that the State of residence eliminate double taxation in all cases where the State of source has imposed its tax by applying to an item of income a provision of the Convention that is different from that which the State of residence considers to be applicable. For instance, in the example above, if, for purposes of applying paragraph 2 of Article 13, State E considers that the partnership carried on business through a fixed place of business but State R considers that paragraph 5 applies because the partnership did not have a fixed place of business in State E, there is actually a dispute as to whether State E has taxed the income in accordance with the provisions of the Convention.

The same may be said if State E, when applying paragraph 2 of Article 13, interprets the phrase “forming part of the business property” so as to include certain assets which would not fall within the meaning of that phrase according to the interpretation given to it by State R. Such conflicts resulting from different interpretation of facts or different interpretation of the provisions of the Convention must be distinguished from the conflicts of qualification described in the above paragraph where the divergence is based not on different interpretations of the provisions of the Convention but on different provisions of domestic law. In the former case, State R can argue that State E has not imposed its tax in accordance with the provisions of the Convention if it has applied its tax based on what State R considers to be a wrong interpretation of the facts or a wrong interpretation of the Convention. States should use the provisions of Article 25 (Mutual Agreement Procedure), and in particular paragraph 3 thereof, in order to resolve this type of conflict in cases that would otherwise result in unrelieved double taxation.

## 106.11 Tax credit: Dividends

Section 12(1) TIOPA provides:

Credit under section 9 [Unilateral Credit] for overseas tax on a dividend paid by a company (“P”) resident in the territory is allowed only if section 13, 14, 15 or 16 so provides.

Section 13 TIOPA provides:

- (1) This section applies for the purposes of section 12(1).
- (2) Credit under section 9 for overseas tax on a dividend paid by a company (“P”) resident in the territory is allowed if—
  - (a) the overseas tax is charged directly on the dividend (whether by charge to tax, deduction of tax at source or otherwise), and
  - (b) neither P nor the recipient of the dividend would have borne any of that tax if the dividend had not been paid.

Why is that needed?

Sections 12(2) and 14 - 17 TIOPA apply where the recipient of the dividend is a company, and are not discussed here.

#### 106.11.1 DTA credit: Exclusion of underlying tax

Art 24 USA/UK DTA provides credit but adds in brackets:

(excluding, in the case of a dividend, United States tax in respect of the profits out of which the dividend is paid)

Underlying tax is not discussed here. However in the USA/UK DTA, these words are otiose, and present for historical reasons: see *Anson v HMRC* [2015] UKSC 44 at [92] - [96].

### 106.12 DTA/Unilateral Credit: Priority

Section 11 TIOPA provides:

- (1) Credit for tax paid under the law of the territory is not allowed under section 9 or 10 in the case of any income or gains if any credit for that tax is allowable in respect of that income or those gains under double taxation arrangements made in relation to the territory.
- (2) If credit in respect of an amount of tax may be allowed under double taxation arrangements made in relation to the territory, credit is not allowed under section 9 or 10 in respect of that tax.

In short, DTAs have priority over Unilateral Credit. It could have been more concisely expressed, but there it is.

The INT Manual provides:

#### **INTM161030 Unilateral relief** [May 2020]

Unilateral relief may be available against UK tax to a person resident in the UK for foreign tax charged on income arising in that foreign country, if relief is not available under an agreement. The relief may be due where either

- 1 there is no agreement with the country concerned, or
- 2 the income arises in a country with which there is an agreement but the agreement does not cover the category of income or foreign tax involved. For example, the agreement with the United States of America only covers the Federal Income Taxes and particular Federal excise taxes but not the taxes levied by the individual states. Unilateral relief is available for many of these state taxes (see DT19855 for example).

### 106.13 DTA excluding tax credit

Section 11(3) TIOPA provides:

If double taxation arrangements made in relation to the territory contain express provision to the effect that relief by way of credit is not to be given under the arrangements in cases or circumstances specified or described in the arrangements, credit is not allowed under section 9 or 10 in those cases or circumstances.

In *Aozora GMAC Investment (R, oao) v HMRC*,<sup>25</sup> a UK company received US source interest from its US subsidiary. US interest received by a UK resident normally qualifies for relief from US tax under art 11 USA/UK DTA. However on this occasion US relief was not available because of the US Limitation on Benefits rule.<sup>26</sup> HMRC say that is an “express provision to the effect that relief by way of credit shall not be given”. So wherever the LoB rule applies, s.11(3) TIOPA disapplies unilateral relief. Aozora contend that art 23 is not an “express provision”. The appeal is pending.

This rule does not apply to pre-2000 DTAs. Para 13 sch 9 TIOPA provides:

Section 11(3) does not have effect in relation to arrangements made before 21 March 2000.

### 106.14 Method of providing credit

Section 18 TIOPA provides:

---

25 [2019] EWCA Civ 1643. An application for judicial review, based on a passage in the HMRC manual, was not successful.

26 See art 23 USA/UK DTA; 105.1.2 (The LoB rule); [2017] EWHC 2881 (Admin) at [12]-[13]. UK readers may find that somewhat surprising, but that is a matter of US tax law.

- (1) Subsection (2) applies if—
- (a) under double taxation arrangements, or
  - (b) under unilateral relief arrangements for a territory outside the UK,
- credit is to be allowed against any income tax, corporation tax or capital gains tax chargeable in respect of any income or chargeable gain.
- (2) The amount of those taxes chargeable in respect of the income or gain is to be reduced by the amount of the credit.

Section 18(6) TIOPA provides:

Credit against income tax is given effect at Step 6 of the calculation in section 23 of ITA 2007.

#### 106.14.1 “Credit”

Section 18 TIOPA provides:

- (3) In subsection (1) “credit”—
- (a) in relation to double taxation arrangements, means credit for tax payable under the law of the territory in relation to which the arrangements are made, and
  - (b) in relation to unilateral relief arrangements for a territory outside the UK, means credit for tax payable under the law of that territory,
- but see sections 12(3) and 63(5) (dividends: certain tax payable otherwise than under the law of a territory treated as payable under that law)<sup>27</sup>...
- (5) Credit is allowed under subsection (2) against any tax only if, under the arrangements concerned, credit is allowable against that tax.

Section 22 – 24 TIOPA deal with credits where same income is charged to income tax in more than one tax year. This is not discussed here.

### 106.15 Foreign tax credit: Claim

Section 19 TIOPA provides:

- (1) Subsections (2) and (3) apply to a claim for relief under section 18(2) [DTA/Unilateral credit].

---

<sup>27</sup> Section 12(3) and s.63 TIOPA concern dividends paid to UK resident companies, and are not discussed here.

(2) If the claim is for credit for foreign tax in respect of any income or chargeable gain charged to income tax or capital gains tax for a tax year, the claim must be made on or before—

- (a) the fourth anniversary of the end of that tax year, or
- (b) if later, the 31 January following the tax year in which the foreign tax is paid.

The standard claim procedure rules apply.<sup>28</sup> The INT Manual provides:

**INTM161070 Withdrawal of credit claims** [May 2020]

A claim to credit relief, once made, may be withdrawn at any time before the assessment giving effect to the claim becomes final and conclusive. Under self assessment, a claimant may amend the claim at any time during the 12 month period following the date on which it was made, unless the claim is under enquiry.

If it is under enquiry, the claimant will be able to amend the claim when the enquiry is complete. If the claim to credit relief is withdrawn, the foreign tax is deductible under TIOPA10/S112-S113.<sup>29</sup> See INTM162580 where there has been an adjustment to the amount of foreign tax paid.

### 106.15.1 *Claim time limits*

Section 19 TIOPA provides an extended time limit where tax is paid late:

(1) Subsections (2) and (3) apply to a claim for relief under section 18(2).

(2) If the claim is for credit for foreign tax in respect of any income or chargeable gain charged to income tax or capital gains tax for a tax year, the claim must be made on or before—

- (a) the fourth anniversary of the end of that tax year, or
- (b) if later, the 31 January following the tax year in which the foreign tax is paid.

(3) If the claim is for credit for foreign tax in respect of any income or chargeable gain charged to corporation tax for an accounting period, the claim must be made not more than—

- (a) four years after the end of that accounting period, or
- (b) if later, one year after the end of the accounting period in which the foreign tax is paid.

---

<sup>28</sup> See 117.1 (Claims).

<sup>29</sup> See 106.27 (CGT/IT computation deduction).

## 106.16 Tax sparing arrangements

Section 20 TIOPA provides:

- (1) Subsections (2) and (4) apply if the arrangements are double taxation arrangements.
- (2) For the purposes of this Chapter, any amount within subsection (3) is to be treated as having been payable.
- (3) An amount is within this subsection if it is an amount of tax that would have been payable under the law of a territory outside the UK but for a relief—
  - (a) given under the law of that territory with a view to promoting industrial, commercial, scientific, educational or other development in a territory outside the UK, and
  - (b) about which provision is made in double taxation arrangements.
- (4) References in this Chapter—
  - (a) to tax payable or chargeable, or
  - (b) to tax not chargeable directly or by deduction,
 are to be read in accordance with subsection (2).
- (5) Subsections (2) and (4) have effect subject to—
  - (a) subsection (6), and
  - (b) sections 31(4) and 32(5) (income and gains not to be increased in calculations under section 31 or 32 by amounts treated by this section as having been payable).
- (6) If section 63(5) applies because conditions A and B in section 63 are met, relief is not given in accordance with section 63(5) (relief for certain tax underlying dividends paid between related companies) because of this section unless double taxation arrangements make express provision for the relief.
- (7) Subsection (6) does not affect the operation of section 17(2) (treatment, for purposes of unilateral relief, of dividend paid by foreign company that has received dividends from a company benefiting from tax-sparing relief).

## 106.17 When credit not allowed

Sections 25-27 provide 3 cases where credit is not allowed:

### **TIOPA Topic**

- |      |                         |
|------|-------------------------|
| s.25 | Relief for foreign tax  |
| s.26 | Non-resident claimant   |
| s.27 | Election against credit |

### 106.17.1 *Relief for foreign tax*

Section 25 TIOPA provides:

- (1) Subsection (2) applies if relief may be allowed—
  - (a) under the arrangements, or
  - (b) under the law of the non-UK territory in consequence of the arrangements,
 in respect of an amount of tax that would, but for the relief, be payable under the law of that territory.
- (2) Credit under section 18(2) [DTA/Unilateral credit] is not allowed in respect of that tax, whether or not the relief has been used.

It is not common for UK tax law to allow a relief for UK tax but it does happen.<sup>30</sup> No doubt the same applies in foreign tax laws.

### 106.18 **Restriction to UK residents**

Section 26 TIOPA provides:

- (1) Credit under section 18(2) [DTA/Unilateral credit] against income tax, corporation tax or capital gains tax for a chargeable period<sup>31</sup> is not allowed unless the person in respect of whose income or chargeable gains the tax is chargeable is UK resident<sup>32</sup> for that period.
- (2) Sections 28 to 30 (credit under unilateral relief arrangements allowed to some non-UK resident persons) contain exceptions to subsection (1).

The exceptions are:

<b>Section</b>	<b>Topic</b>
28	Isle of Man/Channel Islands
29	Employment income
30	Non UK tax on non UK resident's branch/agency

I only discuss s.29.

#### 106.18.1 *FTCR: Employment income*

---

<sup>30</sup> See eg 60.21 (s.3 distribution relief); 48.1 (Overlapping ToA charges: Relief).

<sup>31</sup> Section 26(3) defines “chargeable period”: “In subsection (1) so far as it relates to capital gains tax “chargeable period” means tax year (see section 288(1ZA) of TCGA 1992).”

<sup>32</sup> Section 26(4) TIOPA defines “UK resident”: In subsection (1) so far as it relates to capital gains tax “UK resident” has the meaning given by section 989 of ITA 2007.”

Section 29 TIOPA provides an exception to the general rule that credit is restricted to a UK resident:

(1) Subsection (3) applies if the arrangements are unilateral relief arrangements for a territory outside the UK.

(3) Credit for overseas tax<sup>33</sup> may be allowed under section 18(2) [DTA/Unilateral credit] against income tax for a tax year—

(a) calculated by reference to that income, and

(b) charged on employment income,

if the person performing the duties is resident in the UK, or resident in the territory, for that year.

HMRC say:

### **Bermuda Payroll Tax**

Is Bermuda Payroll Tax an admissible income tax for UK foreign tax relief purposes? It is not covered in the HMRC Double Taxation Manual.

### **Answer**

As there is no tax treaty with Bermuda, unilateral relief will be available.<sup>34</sup>

## **106.19 Election against credit**

Section 27 TIOPA provides:

Credit under section 18(2) [DTA/Unilateral credit] against income tax, corporation tax or capital gains tax charged on any income or chargeable gains of a person is not allowed if the person elects for credit not to be allowed in respect of that income or those gains.

Why should a person elect for credit not to be allowed, rather than simply not making a claim for credit?

---

33 Defined in s.29(2) TIOPA:

In subsection (3) “overseas tax” means tax—

(a) paid under the law of the territory,

(b) charged on income and corresponding to income tax or to corporation tax, and

(c) calculated by reference to income from an office or employment the duties of which are performed wholly or mainly in the territory.

Section 29(4) TIOPA provides that local/provincial taxes may “correspond” to IT/CT, repeating the wording in s.8(3); see 106.4.2 (Which taxes: Unilateral Credit).

34 Expat Forum Q&A log (July 2019) (informally circulated).

## 106.20 Computing FTC: Income

### 106.20.1 Arising basis

Section 31 TIOPA deals with computation of income/gains on the arising basis:

- (1) Subsection (2) applies if—
  - (a) under the arrangements, credit is to be allowed for foreign tax in respect of any income or gain, and
  - (b) section 32(2) (cases where UK tax payable by reference to amount received in UK) does not apply.<sup>35</sup>
- (2) In calculating the amount of the income or gain for the purposes of income tax, corporation tax or capital gains tax—
  - (a) no deduction is to be made for foreign tax or special withholding tax, whether in respect of the same or any other income or gain...

The INT Manual provides:

#### **INTM165030 Computation – assessable amount** [May 2019]20

Where credit is claimed against UK Income Tax for foreign tax paid on income from a foreign source, the amount of that income for all UK tax purposes is:

##### ***a) Foreign income assessable on the arising basis***

No direct foreign tax is to be deducted. Where, exceptionally, the double taxation agreement provides for relief for underlying tax on a dividend (see INTM164410) the underlying tax should be added to the amount of the income...

##### *Example:*

An individual receives a dividend of 100 from which 15 foreign withholding tax was deducted. The amount of income assessable is 100...

### 106.20.2 FTC: Property income

The Property Income Manual provides:

#### **PIM4705 Rent from property outside the UK: CT** [May 2020]

##### ***Foreign tax***

If the overseas income has suffered foreign tax and a claim to tax credit relief is made, it will be necessary, for the purposes of the source by

---

35 See 106.20.3 (Remittance basis: non-dividends).

source rules (see INTM161210), to identify the amount of UK tax attributable to income from each particular property. Where, therefore, tax credit relief is claimed, separate computations of profits and losses for each property will be required.

For the purposes of calculating tax credit relief, losses should be deducted in the order most favourable to the taxpayer's claim. Normally, this will mean that losses should be allocated first against the source that has suffered the lowest rate of foreign tax. ...

### 106.20.3 Remittance basis

Section 32 TIOPA provides:

- (1) Subsection (2) applies if—
- (a) under the arrangements, credit is to be allowed for foreign tax in respect of any income or capital gain, and
  - (b) income tax or capital gains tax is payable by reference to the amount received in the UK.
- (2) For the purposes of whichever of income tax and capital gains tax is payable as mentioned in subsection (1)(b), the amount received is to be treated as increased—
- (a) by the amount of the foreign tax in respect of the income or gain,
  - (b) by the amount of any special withholding tax levied in respect of the income or gain, but see subsection (4)

The INT Manual provides:

#### **INTM165030 Computation – assessable amount** [May 2020]

Where credit is claimed against UK Income Tax for foreign tax paid on income from a foreign source, the amount of that income for all UK tax purposes is: ...

#### ***b) Foreign income assessable on the remittance basis***

Add the amount of direct foreign tax attributable to the amount of income remitted. Where, exceptionally, the agreement provides for relief for underlying tax on a dividend (see INTM164410), the underlying tax should also be added to the amount of the dividend remitted. If you have difficulty in determining the amount of foreign tax attributed to income remitted, refer to CSTD, BAI, Assets Residence & Valuation.

#### *Example*

[Gross foreign income]	£1,000
Foreign tax	£400
Net foreign income	<u>£600</u>

Remitted to UK	£300
<i>UK measure of the income</i>	
Income remitted	£300
Plus foreign tax (300/600×400)	<u>£200</u>
Therefore UK measure is	<u>£500</u>

Similarly for CGT; the INT Manual provides:

**INTM169080. Remittance basis** [Jun 2016]

An individual who is resident or ordinarily resident<sup>36</sup> but not domiciled in the UK and who makes a chargeable gain on the disposal of an asset situated outside the UK is only liable on the amount of the gain received in the UK ... When such an individual is chargeable on the gain received in the UK and claims credit for foreign tax charged on the same gain, the liability in the UK will be on the sum of the amount remitted to the UK plus the foreign tax attributable to the amount remitted.

Any difficulty in determining the correct addition for the foreign tax, should be referred to Personal Tax International (part of Charity, Assets & Residence).

## 106.21 Computing FTC: CGT

The INT Manual provides:

**INTM169100. Amount of foreign tax credit relief – general** [May 2020]

Similar principles to those set out in INTM161210 onwards for Income Tax apply to Capital Gains Tax. The amount of credit for foreign tax is not to exceed the lesser of

- the foreign tax charged on the foreign gain and
- the UK tax charged on the doubly taxed gain at the taxpayer's marginal rate.

If the foreign tax exceeds the UK tax, the excess can neither be deducted from the amount of the gain chargeable to Capital Gains Tax, nor can it be repaid.

The foreign tax should not be increased by any indexation allowance. A taxpayer's marginal rate for Capital Gains Tax is the rate at which the tax is charged for the year of assessment.

### 106.21.1 More than one gain

---

36 The reference to ordinary residence is out of date since 2013.

The INT Manual provides:

**INTM169110. Amount of foreign tax credit relief – more than one gain** [May 2020]

The amount of foreign tax credit relief must be calculated separately for each gain. An excess of foreign tax over UK tax on one gain cannot be credited against UK tax on another foreign gain or on the gain on the disposal of a UK asset.

106.21.2 *FTC: Capital losses*

The INT Manual provides:

**INTM169120. Amount of foreign tax credit relief – losses** [May 2020]

Where foreign tax credit relief is due, allowable capital losses should be utilised in such a way as to reduce the taxable amount of a gain down to a level where the UK tax due on the gain equals the foreign tax paid, and then allocate the remaining part of the loss to another gain, and so on. Where gains are subject to differing rates of UK capital gains tax, it would be in the customer's interest to offset the capital losses against those gains where, following any claim for a foreign tax credit, there remains a liability to UK capital gains tax by sorting the gains in descending order of UK tax rates applicable to those gains and applying the allowable losses firstly against those gains where the highest UK tax rate is applicable. This should secure the maximum amount of foreign tax credit relief, while at the same time ensuring that the losses reduce the amount of gains which are subject to the highest UK tax rates, thus minimising the overall tax charge.

See 61.11 (Losses used in best way).

106.21.3 *FTCR: CGT annual exemption*

The INT Manual provides:

**INTM169130. Amount of foreign tax credit relief – exemption from tax** [May 2020]

Where the total of the chargeable gains in any year of assessment exceeds the exempt amount... the exempt amount should, as far as possible, consist of gains on which no foreign tax has been charged. This will enable credit for foreign tax charged on the gains to be allowed against the UK Capital Gains Tax charged on those gains. ...

## 106.21.4 HMRC example

The INT Manual provides an example of the interaction of FTCR with loss relief and the CGT annual exemption, where the taxpayer has three gains: a UK gain, and two foreign gains taxable at different rates.

**INTM169130. Amount of foreign tax credit relief – exemption from tax** [May 2020]

... The following example demonstrates the application of this paragraph and of INTM169120

In 2009–10, an individual has the following chargeable gains:

Country	Gain	Foreign tax
UK	£10,000	-
Country X	£20,000	£2,000
Country Y	£6,000	£2,700

He has losses of £6,000 available for deduction.

The exemption limit for 2009–10 is £9,600.

The computation of his liability is as follows:

	UK Gain	Country X Gain	Country Y Gain
	£10,000	£20,000	£6,000
Less Loss	£6,000		
	<u>£4,000</u>	<u>£20,000</u>	<u>£6,000</u>
Less Exempt Amount	£4,000	£5,600	
	<u>0</u>	<u>£14,400</u>	<u>£6,000</u>
Tax at 18%	0	£2,592	£1,080
Less FTCR	<u>0</u>	<u>£2,000</u>	<u>£1,080</u>
Tax Payable	<u>Nil</u>	<u>£592</u>	<u>Nil</u>

The balance of Country Y's tax of £1,620 (2,700 less 1,080) cannot be set off against the Capital Gains Tax payable on the Country X gain and cannot be repaid.

**106.22 Minimisation of foreign tax**

Section 33 TIOPA provides:

(1) The credit under section 18(2) must not exceed the credit which would be allowed had all reasonable steps been taken—

- (a) under the law of the non-UK territory, and
- (b) under double taxation arrangements made in relation to that territory,

to minimise the amount of tax payable in that territory.

- (2) The steps mentioned in subsection (1) include—
- (a) claiming, or otherwise securing the benefit of, reliefs, deductions, reductions or allowances, and
  - (b) making elections for tax purposes.
- (3) For the purposes of subsection (1), any question as to the steps which it would have been reasonable for a person to take is to be determined on the basis of what the person might reasonably be expected to have done in the absence of relief under this Part.

### 106.23 Limit on credit relief

#### Section 36 TIOPA      s.40 TIOPA

(1) This section is about the amount of credit allowed under section 18(2) [DTA/Unilateral credit] against a person's income tax for any tax year.

(2) The amount of credit in respect of income from any particular source must not exceed the difference between—

(a) the amount of income tax to which the person would be liable for the tax year if the person were charged to income tax on  $TI - X$ , and

(b) the amount of income tax to which the person would be liable for the tax year if the person were charged to income tax on  $TI - (X + C)$

(1) This section is about the amount of credit allowed under section 18(2) [DTA/Unilateral credit] against a person's capital gains tax for any tax year.

(2) The amount of credit in respect of any particular capital gain must not exceed the difference between—

(a) the amount of capital gains tax to which the person would be liable for the tax year if the person were charged to capital gains tax on  $TG - X$ , and

(b) the amount of capital gains tax to which the person would be liable for the tax year if the person were charged to capital gains tax on  $TG - (X + C)$ .

TI stands for **T**otal **I**ncome

C stands for **C**redit

TG stands for **T**otal **G**ains

In full detail,

**s.36(4) TIOPA: IT/CT**

**s.40(4) TIOPA: CGT**

In subsection (2)—

TI is the person’s total income for the tax year,

X is the income (if any) to which subsection (2) has already been applied, and

C is the income in respect of which the credit is to be allowed.

In subsection (2)—

TG is the total amount of the chargeable gains accruing to the person in the tax year,

X is the total amount of the gains (if any) to which subsection (2) has already been applied, and

C is the amount of the gain in respect of which the credit is to be allowed.

**s.36(3)(5) TIOPA: IT/CT**

(3) If credit is allowed (whether or not under the same tax-relief arrangements<sup>37</sup>) in respect of income from more than one source, apply subsection (2) successively to the income from each source, taking the sources in the order which will result in the greatest reduction in the person’s income tax liability for the tax year...

(5) The rules for calculating an amount of income tax under subsection (2) are—

(a) the calculation is to be made in accordance with sections 31 and 32, and

(b) no credit is to be allowed for foreign tax, and

**s.40(3)(5) TIOPA: CGT**

(3) If credit is allowed (whether or not under the same tax-relief arrangements) in respect of more than one capital gain, apply subsection (2) successively to each capital gain, taking the gains in the order which will result in the greatest reduction in the person’s capital gains tax liability for the tax year.

(5) The rules for calculating an amount of capital gains tax under subsection (2) are—

[identical]

(b) no credit is to be allowed for foreign tax.

---

37 Defined in s.36(7)/40(6) TIOPA: “For the purposes of subsection (3) the following are “tax-relief arrangements”—

(a) double taxation arrangements, and

(b) unilateral relief arrangements for a territory outside the UK.”

(c) no reduction is to be made under section 26 of FA 2005 (trusts for the benefit of a vulnerable beneficiary), but

(d) any other income tax reduction under the Income Tax Acts is to be made.

In short, foreign tax credit relief must not exceed the lesser of:

- (1) the foreign tax, and
- (2) the UK tax

Sections 37, 38 TIOPA contain further rules for trading income and royalties, not discussed here.

The Royal Commission on the Taxation of Profits and Income Final Report provides:<sup>38</sup>

#### CARRY-OVER OF UNRELIEVED OVERSEAS TAX

732. The situation in which the overseas tax exceeds the United Kingdom tax so that part of it is excluded from credit attracted some attention in the evidence we received. It will, we think, be generally accepted that there could be no question of allowing the surplus overseas tax to rank for credit against the United Kingdom tax on some altogether different source of income for the same year. That course would be anomalous. To take an extreme example, it would mean that a man with an income of £1,000 from United Kingdom sources who possessed also a net overseas income of £150, being the balance remaining after a gross income of £500 had been subjected to overseas tax at an assumed rate of 70 per cent would be asked to pay *less* United Kingdom tax than another man with like personal circumstances who also possessed an income of £1,000 from United Kingdom sources but had no overseas income. If the United Kingdom were to abate its charge on income from United Kingdom sources in this way the situation would come close to being one in which the overseas country was indirectly levying tax on the United Kingdom income of United Kingdom residents.

#### 106.23.1 *Interaction with Gift Aid*

---

38 (1953) Cmd 9474.

Section 41 TIOPA provides:

(1) In subsection (2) “the total credit” means  $F + G$  where—

F is the total credit, under all tax-relief arrangements,<sup>39</sup> allowed under section 18(2) [DTA/Unilateral credit] against a person’s income tax for any tax year, and

G is the total credit, under all tax-relief arrangements, allowed under section 18(2) [DTA/Unilateral credit] against the person’s capital gains tax for that tax year.

(2) The total credit is not to be more than—  
 $I + C - A$

In short, I stands for **Income**, C stands for **CGT** and A stands for **Amount**.  
In full:

I is the total income tax payable by the person for the tax year,  
C is the total capital gains tax payable by the person for the tax year, and  
A is the total amount of the tax treated under section 414 of ITA 2007 (gift aid) as deducted from gifts made by the person in the tax year.

(3) In calculating I and C for the purposes of subsection (2), no reduction is to be made for credit under section 18(2) [DTA/Unilateral credit].

(4) Subsection (2) applies in addition to sections 36 and 40.

## 106.24 Credit for TNR CGT

This section considers the position where:

- (1) An individual who is treaty-resident in the US realises a gain. The gain is subject to US tax and not UK tax.
- (2) The individual (who is temporarily non-resident) returns to the UK and the gain is subject to UK tax under the TNR rules.<sup>40</sup>

The USA/UK DTA Technical Explanation provides:<sup>41</sup>

Although the rules allow each of the Contracting States to apply their domestic anti-abuse rules, the foreign tax credit rules provided in paragraphs 2 and 4 of Article 24 (Relief from Double Taxation) ensure

---

39 Section 41(5) TIOPA repeats the s.36 definition verbatim: see above footnotes.

40 See 10.7 (TNR gains/losses).

41 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

that the Contracting State applying an anti-abuse rule to a resident of the other Contracting State maintains only a residual right to tax. The primary right to tax remains with the country of residence. Accordingly, pursuant to subparagraph (b) of paragraph 2 of Article 24, if the gains subject to this rule are derived while the former U.K. resident was a resident of the United States, then such gains are considered to be gains from sources within the United States.<sup>42</sup>

Pursuant to paragraph 4 of Article 24, the UK will grant a foreign tax credit for U.S. tax imposed upon those gains.

Example

In year 1, U.K. resident A purchases stock in a Country X company for \$1,000.<sup>43</sup>

A moves to the United States in year 2, when the fair market value of the stock is \$2,000.<sup>44</sup>

In year 3, while A is still a U.S. resident, A sells the Country X stock. In year 4, after the sale of the Country X stock, A moves back to the UK and re-establishes residence.

Under Article 13 (6),<sup>45</sup> both the United States and the UK may tax the gain on the sale of the property in year 3.

Actually, the UK taxes the gain in the year of return, year 4. But FTCR is available so the US tax is set against UK tax:

Under Article 24, however, the gain from the sale of the Country X stock is deemed to be from sources within the United States because A was a U.S. resident when the sale occurred and gains from the stock could be taxed by the UK only pursuant to paragraph 6 of Article 13 (that is, the stock could not be taxed under paragraph 1 or 3 of Article 13). Thus the UK is required to provide a foreign tax credit for U.S. taxes paid with respect to gain on the disposition of the Country X stock.

## **106.25 UK-resident US citizen**

This section considers income/gains arising to an individual who is a US citizen, and is treaty-resident in the UK.

---

42 See 106.2 (DTA/Unilateral Credit compared).

43 This fact is stated so that TNR relief for post-departure acquisitions is not applicable.

44 The value in year 2 is not relevant for UK tax, but perhaps it is relevant for US tax.

45 See 53.23.5 (Recently departed resident).

The starting point here is that the individual is subject to UK tax (as a resident) *and* US tax (as a citizen).

#### 106.25.1 *Application of FTCD*

Article 1 USA/UK DTA (the US Savings Clause) provides (so far as relevant):

(4) Notwithstanding any provision of this Convention except paragraph 5 of this Article, a Contracting State may ... by reason of citizenship may tax its citizens, as if this Convention had not come into effect.

(5) The provisions of paragraph 4 of this Article shall not affect—

- (a) the benefits conferred by a Contracting State under ... Article 24 (Relief From Double Taxation)...<sup>46</sup>

The USA/UK DTA Technical Explanation provides:<sup>47</sup>

By virtue of subparagraph (a) of paragraph 5 of Article 1 (General Scope), Article 24 is not subject to the saving clause of paragraph 4 of Article 1. Thus, the United States will allow a credit to its citizens and residents in accordance with the Article, even if such credit were to provide a benefit not available under the Code (such as the re-sourcing provided by paragraph 2 and subparagraph 3(d)).

#### 106.25.2 *Source outside US*

Article 24(6) USA/UK DTA provides:

Where the United States taxes, in accordance with paragraph 4 of Article 1 (General scope) of this Convention, a United States citizen, or a former United States citizen or long-term resident, who is a resident of the UK—

- (a) the UK shall not be bound to give credit to such resident for United States tax on profits, income or chargeable gains from sources outside the United States as determined under the laws of the UK;

An Exchange of Notes on the date of the Convention provides:

With reference to paragraphs 1 and 4 of Article 24 (Relief from double taxation)—

---

<sup>46</sup> See 104.9.5 (US Savings Clause).

<sup>47</sup> <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

it is understood that, if a resident of a Contracting State [UK] receives a dividend that is described in sub-paragraph (b) of paragraph 1 or sub-paragraph (b) of paragraph 4 of Article 24, such dividend will be deemed to be income from sources in the other Contracting State [US], even if it may be taxed only in the first-mentioned Contracting State [UK] because of sub-paragraph (a) of paragraph 3 of Article 10 (Dividends).<sup>48</sup>

The USA/UK DTA Technical Explanation provides:<sup>49</sup>

However, paragraph 6 of this article provides special rules where a U.S. citizen resident in the UK is subject to tax in the United States by reason of his citizenship under the saving clause of paragraph 4 of Article 1 (General Scope).

According to the MOU, if a U.K. resident receives a dividend described in subparagraph (b) of paragraph 4, it will be deemed to constitute income from sources within the United States, even if the dividend may be taxed only in the UK because the zero rate of withholding applies to it.

Paragraph 6 provides special rules for the tax treatment in both States of certain types of income derived from U.S. sources by U.S. citizens who are resident in the UK. Since U.S. citizens, regardless of residence, are subject to United States tax at ordinary progressive rates on their worldwide income, the U.S. tax on the U.S. source income of a U.S. citizen resident in the UK may exceed the U.S. tax that may be imposed

---

48 Article 10(3)(a) USA/UK DTA provides:

“(3) Notwithstanding the provisions of paragraph 2 of this Article, dividends shall not be taxed in the Contracting State [US] of which the company paying the dividends is a resident if the beneficial owner of the dividends is a resident of the other Contracting State [UK] and either—

- (a) a company that has owned shares representing 80 per cent or more of the voting power of the company paying the dividends for a 12-month period ending on the date the dividend is declared, and that—
  - (i) owned shares representing, directly or indirectly, at least 80 per cent of the voting power of the company paying the dividends prior to October 1st, 1998; or
  - (ii) is a qualified person by reason of sub-paragraph (c) of paragraph 2 of Article 23 (Limitation on Benefits) of this Convention; or
  - (iii) is entitled to benefits with respect to the dividends under paragraph 3 or paragraph 6 of that Article”.

49 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

under the Convention on an item of U.S. source income derived by a resident of the UK who is not a U.S. citizen. This confirms that the UK retains primary taxing rights with respect to income derived by a resident that the United States may tax pursuant to section 877 of the Code. Subparagraph (a) of paragraph 6 carries over a rule from the prior Convention which states that the UK is not bound to provide a credit for U.S. taxes with respect to income from sources outside the United States, as determined under U.K. law.

Thus, for example, if a U.S. citizen resident in the UK derives income from sources within France, as determined under the source rules of the UK, then the UK is not required to give a credit for U.S. income tax imposed upon that income. In that case, the United States would give a credit for the tax paid to the UK, as well as any French taxes, with respect to such income. This rule ensures that, as between the State of residence and the State of citizenship, the State of residence takes priority.

### 106.25.3 *Source within US*

Article 24(6) USA/UK DTA provides:

Where the United States taxes, in accordance with paragraph 4 of Article 1 (General scope) of this Convention, a United States citizen, or a former United States citizen or long-term resident, who is a resident of the UK ...

- (b) in the case of profits, income or chargeable gains from sources within the United States, the UK shall take into account for the purposes of computing the credit to be allowed under paragraph 4 of this Article only the amount of tax, if any, that the United States may impose under the provisions of this Convention on a resident of the UK who is not a United States citizen;

The USA/UK DTA Technical Explanation provides:<sup>50</sup>

Subparagraph (b) follows the U.S. Model by providing, with respect to items of income from sources within the United States, special credit rules for the UK. These rules apply to items of U.S.-source income that would be either exempt from U.S. tax or subject to reduced rates of U.S. tax under the provisions of the Convention if they had been received by a U.K. resident who is not a U.S. citizen. The U.K. tax credit allowed

---

<sup>50</sup> <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

under paragraph 4 with respect to such items need not exceed the U.S. tax that may be imposed under the Convention, other than tax imposed solely by reason of the U.S. citizenship of the taxpayer under the provisions of the saving clause of paragraph 4 of Article 1 (General Scope).

For example, if a U.S. citizen resident in the UK receives portfolio dividends from sources within the United States, the foreign tax credit granted by the UK would be limited to 15% of the dividend – the U.S. tax that may be imposed under subparagraph (b) of paragraph 2 of Article 10 (Dividends) – even if the shareholder is subject to U.S. net income tax because of his U.S. citizenship. With respect to royalty or interest income, the UK would allow no foreign tax credit, because its residents are exempt from U.S. tax on these classes of income under the provisions of Articles 11 (Interest) and 12 (Royalties).

#### 106.25.4 *Computing US tax*

Article 24(6) USA/UK DTA provides:

Where the United States taxes, in accordance with paragraph 4 of Article 1 (General scope) of this Convention, a United States citizen, or a former United States citizen or long-term resident, who is a resident of the UK ...

- (c) [i] for the purposes of computing United States tax on the profits, income or chargeable gains referred to in sub-paragraph (b) of this paragraph, the United States shall allow as a credit against United States tax the income tax and capital gains tax paid to the UK after the credit referred to in sub-paragraph (b) of this paragraph;
- [ii] the credit so allowed shall not reduce the portion of the United States tax that is creditable against the UK tax in accordance with sub-paragraph (b) of this paragraph; and
- (d) for the exclusive purpose of relieving double taxation in the United States under sub-paragraph (c) of this paragraph, profits, income and chargeable gains referred to in sub-paragraph (b) of this paragraph shall be deemed to arise in the UK to the extent necessary to avoid double taxation of such profits, income or chargeable gains under sub-paragraph (c) of this paragraph.

The USA/UK DTA Technical Explanation provides:<sup>51</sup>

Paragraph 6(c) eliminates the potential for double taxation that can arise because subparagraph 6(b) provides that the UK need not provide full relief for the U.S. tax imposed on its citizens resident in the UK. The subparagraph provides that the United States will credit the income tax paid or accrued to the UK, after the application of subparagraph 6(b). It further provides that in allowing the credit, the United States will not reduce its tax below the amount that is taken into account in the UK in applying subparagraph 6(b).

Since the income described in paragraph 6(b) is U.S. source income, special rules are required to re-source some of the income to the UK in order for the United States to be able to credit the U.K. tax. This re-sourcing is provided for in subparagraph 6(d), which deems the items of income referred to in subparagraph 6(b) to be from foreign sources to the extent necessary to avoid double taxation under paragraph 6(c). In most cases, the income described in subparagraph 6(a) will be from sources outside the United States under U.S. rules, so it is not necessary for paragraph 6(d) to re-source the income in order to relieve double taxation.

Subparagraph 3(e) of Article 26 (Mutual Agreement Procedure) provides a mechanism by which the competent authorities can resolve any disputes regarding whether income is from sources within the United States.

#### 106.25.5 *Source within US: Examples*

The USA/UK DTA Technical Explanation provides:<sup>52</sup>

The following two examples illustrate the application of paragraph 6 in the case of a U.S.-source portfolio dividend received by a U.S. citizen resident in the UK.

In both examples, the U.S. rate of tax on residents of the UK, under subparagraph (b) of paragraph 2 of Article 10 (Dividends) of the Convention, is 15%.

In both examples, the U.S. income tax rate on the U.S. citizen is 36%.

In example 1, the U.K. income tax rate on its resident (the U.S. citizen) is 25% (below the U.S. rate), and in example 2, the U.K. rate on its

---

51 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

52 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

resident is 40% (above the U.S. rate).

<u>[Art 24(6)] sub para (b)</u>	<u>Example 1</u>	<u>Example 2</u>
U.S. dividend declared	\$100.00	\$100.00
Notional U.S. withholding tax (Art10(2)(b))	15	15
U.K. taxable income	100	100
U.K. tax before credit	25	40
U.K. foreign tax credit	15	15
Net post-credit U.K. tax	<u>10</u>	<u>25</u>
<u>[Art 24(6)] sub paras (c) and (d)</u>		
U.S. pre-tax income	\$100.00	\$100.00
U.S. pre-credit citizenship tax	36	36
Notional U.S. withholding tax	15	15
U.S. tax available for credit	<u>21</u>	<u>21</u>
Income re-sourced from U.S. to U.K. (see below)	27.77	58.33
U.S. tax on re-sourced income	10	21
U.S. credit for U.K. tax	10	21
Net post-credit U.S. tax	11	0
Total U.S. tax	26	25

In both examples, in the application of subparagraph (b), the UK credits a 15% U.S. tax against its residence tax on the U.S. citizen. In the first example, the net U.K. tax after the U.K. foreign tax credit is \$10.00; in the second example, it is \$25.00. In the application of subparagraphs (c) and (d), from the U.S. tax due before credit of \$36.00, the United States subtracts the amount of the U.S. source tax of \$15.00, against which no U.S. foreign tax credit is allowed. This subtraction ensures that the United States collects the tax that it is due under the Convention as the State of source.

In both examples, given the 36% U.S. tax rate, the maximum amount of U.S. tax against which credit for the U.K. tax may be claimed is \$21 (\$36 U.S. tax minus \$15 U.S. withholding tax). Initially, all of the income in both examples was from sources within the United States. For a U.S. foreign tax credit to be allowed for the full amount of the U.K. tax, an appropriate amount of the income must be re-sourced to the UK under subparagraph (d).

The amount that must be re-sourced depends on the amount of U.K. tax for which the U.S. citizen is claiming a U.S. foreign tax credit. In example 1, the U.K. tax was \$10. For this amount to be creditable against U.S. tax, \$27.77 (\$10 U.K. tax divided by 36% U.S. tax rate) must be re-sourced to the UK. When the U.K. tax is credited against the U.S. tax on this resourced income, there is a net U.S. tax of \$11 due after

credit (\$21 U.S. tax minus \$10 U.K. tax). Thus, in example 1, there is a total of \$26 in U.S. tax (\$15 U.S. withholding tax plus \$11 residual U.S. tax).

In example 2, the U.K. tax was \$25, but, because the United States subtracts the U.S. withholding tax of \$15 from the total U.S. tax of \$36, only \$21 of U.S. taxes may be offset by U.K. taxes. Accordingly, the amount that must be resourced to the UK is limited to the amount necessary to ensure a U.S. foreign tax credit for \$21 of U.K. tax, or \$58.33 (\$21 U.K. tax divided by 36% U.S. tax rate). When the U.K. tax is credited against the U.S. tax on this re-sourced income, there is no residual U.S. tax (\$21 U.S. tax minus \$21 U.K. tax). Thus, in example 2, there is a total of \$15 in U.S. tax (\$15 U.S. withholding tax plus \$0 residual U.S. tax). Although the U.K. tax was \$25 and the U.S. tax available for credit was \$21, there is no excess U.S. tax credit available for carryover.

## 106.26 Credit for underlying US co tax

Article 24(4)(b)-(d) USA/UK DTA relate to FTCD for corporation tax, which is outside the scope of this chapter, but I set it out here for completeness.

Article 24(4)(b) USA/UK DTA provides:

...

(b) in the case of a dividend

[i] paid by a company which is a resident of the United States

[ii] to a company<sup>53</sup> which is a resident of the UK

[iii] and which controls directly or indirectly at least 10% of the voting power in the company paying the dividend,

the credit shall take into account (in addition to any United States tax for which credit may be allowed under the provisions of subparagraph (a) of this paragraph) the United States tax payable by the company in respect of the profits out of which such dividend is paid;

Contrast s.63 TIOPA.

### 106.26.1 *Hybrids*

Article 24(4)(c) USA/UK DTA provides an anti-avoidance rule for hybrids:

---

53 Including an LLC: see 86.34.3 (Credit for LLC's US tax).

- (c) United States tax shall not be taken into account under sub-paragraph (b) of this paragraph for the purpose of allowing credit against UK tax in the case of a dividend paid by a company which is a resident of the United States if and to the extent that
- (i) the UK treats the dividend as beneficially owned by a resident of the UK; and
  - (ii) the United States treats the dividend as beneficially owned by a resident of the United States; and
  - (iii) the United States has allowed a deduction to a resident of the United States in respect of an amount determined by reference to that dividend;

The USA/UK DTA Technical Explanation provides:<sup>54</sup>

Subparagraph (c) eliminates the U.K. credit otherwise provided for in subparagraph (b) in certain circumstances. The rule is limited to certain cases where the two countries have a different view as to the ownership of dividends and, as a result, the United States has provided a tax deduction for payments that are measured by reference to the dividend. This rule is intended to apply to a particular type of financing transaction that has been widely used by U.K. resident companies to finance their U.S. operations. In this transaction, a U.S. holding company would sell stock in another U.S. company to a U.K. company. At the same time, it would enter into a repurchase agreement that would allow it to buy back the stock at a pre-determined price. The parties would structure the transactions in such a way that the sale and repurchase transactions would be treated as a loan for U.S. tax purposes. As a result, the dividends paid to the U.K. company are treated as payments of interest on the loan from the U.K. company to the U.S. company. The UK had seen a number of these transactions and was concerned about their potential impact.

U.K. law provides no mechanism by which to treat the sale and re-purchase in accordance with its economic substance. Accordingly, the UK is required by U.K. domestic law to treat the U.K. company as the owner of the dividends for purposes of its rules, and to provide a foreign tax credit for the taxes paid by the U.S. company paying the dividends. However, recent changes to U.K. foreign tax credit rules allow the UK to deny credits if a tax treaty specifically so provides. The UK asked for

---

<sup>54</sup> <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

the exception in paragraph (c) in order to conform the U.K. treatment of these transactions to the U.S. tax treatment. Because the rule applies only with respect to the indirect tax credit, it will apply only with respect to transactions involving persons who own more than 10% of the underlying company. Moreover, the rule applies only if the U.S. company receives an interest deduction that is based on the dividends paid with respect to the stock, while the deductible payments arising from standard sale-repurchase agreements would be based on a completely different measure, the current cost of funds. Accordingly, the rule should not (and is not intended to) affect most repos and similar transactions that take place in the public markets.

Article 1(2) USA/UK DTA provides:

This Convention shall not restrict in any manner any benefit now or hereafter accorded—

- (a) by the laws of either Contracting State; or
- (b) by any other agreement between the Contracting States.

Article 24(4)(d) USA/UK DTA provides:

- (d) the provisions of paragraph 2 of Article 1 (General scope) of this Convention shall not apply to sub-paragraph (c) of this paragraph.

The USA/UK DTA Technical Explanation provides:<sup>55</sup>

Subparagraph (c) would not be effective without subparagraph (d). Subparagraph (c) limits benefits that are otherwise available under domestic law and therefore would be inconsistent with the rules of paragraph 2 of Article 1 (General Scope), which provide that the tax treaty cannot limit benefits that are available under domestic law. Subparagraph (d) provides an exception from paragraph 2 of Article 1 with respect to subparagraph (c).

In *Aozora GMAC Investment (R, oao) v HMRC*:<sup>56</sup>

I did read Article 24(4)(c) several times, in a futile endeavour to understand its purpose. Some enlightenment did, however, emerge from the helpful [US Treasury Technical Explanation] (“the Note”).

It appears from the Note that Article 24(4)(c) was inserted in the Treaty

---

<sup>55</sup> <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

<sup>56</sup> [2017] EWHC 2881 (Admin) at [27]-[28].

at the behest of the UK Government, as an anti-avoidance provision to deal with what was perceived to be a very specific arbitrage device intended to generate a tax credit against UK corporation tax that was considered to be unjustified. In the relevant scenario a US corporation would sell stock in a US subsidiary to a UK resident company, with an obligation at some point to repurchase the stock (“a repo”). US revenue law looked at the commercial reality, treated the repo as a secured loan to the US corporation, any “dividend” paid to the UK company as a payment of interest by the US corporation, and, *semble*, the stock and “dividend” as beneficially owned by the debtor US corporation. For UK corporation tax, however, the “dividend” had to be treated as genuine, and the UK company would be positioned to obtain credit against UK tax in respect of an appropriate part of the profits of the US corporation, notwithstanding the fact that the US corporation had fully deducted the “dividend”/interest payment for the purposes of stating its US taxable income – a form of double tax relief successfully arbitrated through the different treatment of the transaction in the two jurisdictions.

## **106.27 CGT/IT computation deduction**

### *106.27.1 Computation deductions*

Section 112 TIOPA provides:

- (1) The amount of any income arising in any place outside the UK is reduced for the purposes of the Tax Acts—
  - (a) by any amount which has been paid in respect of non-UK tax<sup>57</sup> on that income in the place where the income arose...

Section 113 TIOPA has the equivalent rule for CGT:

- (1) Subsection (2) applies to tax if it is—
  - (a) chargeable under the law of any territory outside the UK on the disposal of an asset, and
  - (b) borne by the person making the disposal.<sup>58</sup>
- (2) The tax is allowable as a deduction in the calculation of the gain.

The INT Manual provides:

---

57 Section 112(6) TIOPA provides a commonsense definition: “In subsection (1) “non-UK tax” means tax under the law of a territory outside the UK.”

58 Section 113(4) TIOPA provides: “In subsection (1) “asset” and “disposal” have the same meaning as in TCGA 1992 (see, in particular, section 21 and the following provisions of TCGA 1992).”

**INTM169090. Deduction not credit** [May 2020]

A deduction for the foreign tax should be made in the computation of the gain or loss when there is no claim to foreign tax credit relief or when no UK tax is chargeable on a gain; for example, when the UK computation shows a loss on the disposal and consequently there is no UK tax against which credit for any foreign tax can be given. No deduction is due, however, when credit relief is claimed, for any part of the foreign tax paid on a gain which does not qualify for credit because it exceeds the UK tax chargeable on the same gain.

INT Manual provides:

**INTM161050. Deduction instead of credit** [May 2020]

... Section 112 refers to ‘any sum which has been paid in respect of non-UK tax’ on income. This means tax alone and not, for example, interest paid in the foreign country for late payment of the foreign tax. Nor may a deduction be allowed for ‘tax spared’ (INTM161270) as it is not tax which has been paid; nor for underlying tax (INTM164060 and INTM164360) as it is not paid on the dividend in question; nor for taxes similar to UK VAT (see, however, INTM161080). Refer to CSTD Business, Assets & International Base Protection Policy Team, any case where it is not clear that the tax for which a deduction is sought under Section 112 is a tax on income.

Section 112 allows a deduction for foreign tax paid on income ‘in the place where the income arose’. Refer to CSTD Business, Assets & International Base Protection Policy Team, any case where a deduction is sought for foreign tax paid on income which arises wholly or partly from work carried out in the UK....

**INTM161080 Deduction for taxes** [May 2020]

For a deduction to be given for a foreign tax, TIOPA10/S112 requires the tax to be charged on income. If a tax is not charged on income, it may be inadmissible for tax credit relief and will also not be deductible under section 112. Examples of such taxes are those charged on turnover or on the capital value of assets used in the business. A deduction for such taxes may, nevertheless, be an allowable expense in computing the income taxable in the UK. See BIM45900 onwards as regards trading income and SAIM1130 as regards savings and investment income.

### 106.27.2 *Restrictions on deductions*

Section 112 TIOPA provides:

(2A) But if X is less than Y, an amount equal to the difference between X and Y must be subtracted from the amount by which any income of a person (“the relevant income”) is reduced under subsection (1)(a).

(2B) In subsection (2A)—

X is the amount of the relevant income that the person would (disregarding this section) be required to bring into account for income tax or corporation tax purposes, less any deduction that the person would be allowed to make for the amount paid in respect of non-UK tax, and Y is the amount of the relevant income (that is to say, the amount on which the amount in respect of non-UK tax is paid).

**INTM161085 Amount Brought Into Account [May 2020]**

The FA 2010 introduced some clarifications to TIOPA10/S112. The amendments confirmed that a person may only deduct foreign tax from any foreign income where that person has not already reduced his income by reference to the foreign tax, so ensuring the foreign tax is only deducted once.

The new sections 112(2A) and (2B) determine whether the foreign tax has already been taken into account by comparing what income the person brings into account for income, capital gains or corporation tax purposes less any deduction that the person would be allowed to make for the non-UK tax (amount X) to the gross amount of income arising outside the UK (amount Y). If X is the same as Y then the person has not already reduced his income by reference to the foreign tax and so the person can use section 112 to reduce his taxable income by the amount of foreign tax. If X is less than Y by the amount of the foreign tax then the person has already deducted the foreign tax and should not have a further deduction under section 112.

For example:

**Branch profits**

If a company’s foreign branch receives 100 of foreign income and incurs 15 of tax on its profits in the branch, amount X will be 100 because the company will bring 100 into account for corporation tax purposes and cannot deduct the branch profits tax as an expense (*IRC v Dowdall O’Mahoney & Co Ltd* [1952] 33 TC 259). Amount Y will be 100 being the income arising outside the UK. As there is no difference between X and Y, the company can deduct the foreign branch tax of 15 under section 112(1)(a).

**Company with share on its balance sheet**

Scenario 1: Non-financial trader not otherwise entitled to a deduction for foreign tax.

Where a company holds a share on its balance sheet and receives a foreign dividend of 85 which has suffered 15 of withholding tax, amount X should be 100 because the company should bring the gross dividend into account and cannot deduct the foreign tax absent section 112. Amount Y will be 100, being the income arising outside the UK. As there is no difference between X and Y, the company can deduct the foreign branch tax of 15 under section 112(1)(a).

Scenario 2: Financial trader entitled to a deduction for foreign tax.

On the above facts, amount X will be 85 because the trader will initially recognise 100 as income but will also recognise an expense of 15 in respect of the foreign tax. Amount Y will be 100, being the income arising outside the UK. As X is less than Y by the amount of the foreign tax, then the trader has already reduced his income by reference to the foreign tax so no further relief is due under section 112(1)(a).

**Company with share off balance sheet**

Where a company does not hold the share on balance sheet, then it will not recognise the gross dividend (i.e. 100) in its income statement. However, it will recognise the net dividend (i.e. 85) as a component of the underlying calculation of the financing return on the transaction. As a result, amount X will be 85. Amount Y will be 100, being the income arising outside the UK. As X is less than Y by the amount of foreign tax, the company has already effectively had a deduction for the foreign tax and so cannot then use section 112 to reduce its income further.

Credit must be given for a foreign income tax repayment:

- (3) If—
  - (a) income of any person (“P”) is reduced under subsection (1) by an amount paid in respect of tax on that income in the place where the income arose, and
  - (b) a payment is made by a tax authority to P, or any person connected<sup>59</sup> with P, by reference to that tax, the amount of P’s income is increased by the amount of the payment.
- (4) Subsection (1)—
  - (a) has effect subject to section 31(2)(a) (no deduction for foreign

---

59 Defined s.112(7) TIOPA: “For the purposes of subsection (3), whether a person is connected with P is determined in accordance with section 1122 of CTA 2010.”

- tax if credit allowed and UK tax calculated otherwise than by reference to the amount received in the UK),
- (b) has effect subject to section 143(5) and (6) (no deduction for special withholding tax if UK tax calculated otherwise than by reference to the amount received in the UK),
  - (c) does not apply to income the tax on which is to be calculated by reference to the amount of income received in the UK, and
  - (d) does not require any income to be reduced by an amount of underlying tax which, under section 60(3), is to be left out of account for the purposes of section 57.

Section 113 TIOPA provides:

- (3) Subsection (2) is subject to—
  - (a) Chapters 1 and 2 so far as they apply for corporation tax purposes (see, in particular, section 31),
  - (b) Chapters 1 and 2 so far as they apply for capital gains tax purposes (see, in particular, section 31), and
  - (c) section 143 (which includes provision about taking account of special withholding tax when calculating a gain for capital gains tax purposes).

### 106.27.3 *Tax Credit/deduction interaction*

Thus DTA/Unilateral Foreign Tax Credit (if claimed) has priority over an IT/CGT computation deduction.

The IHT Manual provides:

**INTM161090 Credit or deduction** [May 2020]

Relief for the foreign tax paid on a particular item of income or gain cannot be claimed partly by way of credit relief and partly by deduction under TIOPA10/S112 or S113 (see Section 112(4)(a) & 113(3)(a) & (b), the sections can only operate where a claim has not been made for credit relief that brings TIOPA10/S31 into operation). However, credit may be claimed for the foreign tax paid on one item of income or gain against the UK tax charged on that item; and a deduction may be given for the foreign tax on a different item of income or gain, in determining the amount of that item chargeable to UK tax.

However, see INTM168110 when foreign tax paid on certain foreign loan interest exceeds the amount for which credit is allowed.

### 106.27.4 *Use of computation relief*

At first sight it is not obvious when an IT/CGT computation deduction would be better than foreign tax credit relief. One case is where foreign CGT is payable but UK CGT is not (because of a difference in valuation rules or because some UK relief applies). In such a case the computation deduction may:

- (1) increase the loss allowable for UK CGT purposes (similarly for IT) or
- (2) decrease the amount of held-over or rolled-over gain<sup>60</sup>

INT Manual provides:

**INTM161050. Deduction instead of credit** [May 2020]

It may sometimes be to the taxpayer's advantage not to make a claim to tax credit relief, for example where a business's trading profits are wholly covered by capital allowances so that there is no Income Tax or Corporation Tax payable on those profits, or where the trading results show a loss. If, for any reason, tax credit relief is not claimed, the foreign tax paid must be deducted from the income from the foreign source in computing the amount of the income for UK tax purposes (TIOPA10/S112-115). This may serve to create or increase a loss which can be dealt with under the normal provisions for losses...

106.27.5 *Accrued income scheme*

For completeness: the AIS needs a separate rule. Section 112 TIOPA provides:

- (1) The amount of any income arising in any place outside the UK is reduced for the purposes of the Tax Acts ...
  - (b) if subsection (2) applies, by the lesser amount mentioned in that subsection.
- (2) This subsection applies if credit would, were it allowable in respect of the income, be reduced under section 39 (reduction by reference to accrued income losses) to the lesser amount given by section 39(5).

---

<sup>60</sup> See 106.7 (Roll-over relief).

## CHAPTER ONE HUNDRED AND SEVEN

# NON-DISCRIMINATION

107.1

### 107.1 Non-discrimination: OECD Model

This chapter discusses:

- (1) The OECD Model non-discrimination provision
- (2) The definition of “Non-discrimination Provision” which occurs in UK tax legislation

The OECD Model non-discrimination rule has a lengthy commentary, which I hope to discuss in a future edition. But a full discussion needs a book to itself, and indeed such books have been written.

### 107.2 Nationals discrimination

Article 24 OECD Model provides:

1. Nationals of a Contracting State shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith, which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances, in particular with respect to residence, are or may be subjected.

This provision shall, notwithstanding the provisions of Article 1 [Persons covered], also apply to persons who are not residents of one or both of the Contracting States.

#### 107.2.1 “Nationals”

Article 3(g) OECD Model provides:

the term “national”, in relation to a Contracting State, means:

- (i) any individual possessing the nationality or citizenship of that Contracting State; and

- (ii) any legal person, partnership or association deriving its status as such from the laws in force in that Contracting State;

### **107.3 Stateless persons discrimination**

Article 24(2) OECD Model provides:

Stateless persons who are residents of a Contracting State shall not be subjected in either Contracting State to any taxation or any requirement connected therewith, which is other or more burdensome than the taxation and connected requirements to which nationals of the State concerned in the same circumstances, in particular with respect to residence, are or may be subjected.

This relates to the UN Convention relating to the Status of Stateless Persons (1954). There are approximately 10m stateless persons in the world, though I am not sure how often this provision will be relevant to them.

### **107.4 PE discrimination**

Article 24(3) OECD Model provides:

The taxation on a permanent establishment which an enterprise of a Contracting State has in the other Contracting State shall not be less favourably levied in that other State than the taxation levied on enterprises of that other State carrying on the same activities.

This provision shall not be construed as obliging a Contracting State to grant to residents of the other Contracting State any personal allowances, reliefs and reductions for taxation purposes on account of civil status or family responsibilities which it grants to its own residents.

### **107.5 Discrimination in tax deductions**

Article 24(4) OECD Model provides:

Except where the provisions of paragraph 1 of Article 9, paragraph 6 of Article 11, or paragraph 4 of Article 12, apply, interest, royalties and other disbursements paid by an enterprise of a Contracting State to a resident of the other Contracting State shall, for the purpose of determining the taxable profits of such enterprise, be deductible under the same conditions as if they had been paid to a resident of the first-mentioned State. Similarly, any debts of an enterprise of a Contracting State to a resident of the other Contracting State shall, for the purpose of determining the taxable capital of such enterprise, be

deductible under the same conditions as if they had been contracted to a resident of the first-mentioned State.

The 3 exceptions concern transfer pricing.

**107.6 Enterprise owned in other state**

Article 24(5) OECD Model provides:

Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of the first-mentioned State are or may be subjected.

**107.7 “Taxes”**

Article 24(6) OECD Model provides:

The provisions of this Article shall, notwithstanding the provisions of Article 2 [Taxes Covered], apply to taxes of every kind and description.

**107.8 “Non-discrimination provision”**

This expression is used in:

<b>Reference</b>	<b>Topic</b>	<b>Definition</b>	<b>See para</b>
s.173 TIOPA	Transfer pricing	Qualifying territory	24.17.1
s.931C CTA 2009		Exemption for distributions	
		Qualifying territory	-
s.608E ITTOIA	Offshore receipt from intangible prop		
	Full treaty territory		31.19.3

**s.174(4) TIOPA**

For the purposes of subsection (2)(b) a “non-discrimination provision”, in relation to any double taxation arrangements, is

a provision to the effect that nationals of a state

**s.931C(4) CTA 2009**

In subsection (1) “non-discrimination provision”, in relation to double taxation relief arrangements, means

[Identical to TIOPA]

**s.608E(2) ITTOIA**

In subsection (1) “non-discrimination provision”, in relation to double taxation arrangements, means

a provision to the effect that nationals of a state

which is a party to those arrangements (a “contracting state”) are not to be subject in any other contracting state to—

- (a) any taxation, or
- (b) any requirement connected with taxation, which is other or more burdensome than the taxation and connected requirements to which nationals of that other state in the same circumstances (in particular with respect to residence) are or may be subjected.

which is a party to those arrangements (a “contracting state”) are not to be subject in the other contracting state to—

- (a) any taxation, or
- (b) any requirement connected with taxation, which is other or more burdensome than the taxation and connected requirements to which nationals of that other contracting state in the same circumstances (in particular with respect to residence) are or may be subjected.

The small differences in wording are not significant.

**s.174(5) TIOPA**

(5) In subsection (4) “national”, in relation to a state, includes—

- (a) any individual possessing the nationality or citizenship of the state, and
- (b) any legal person, partnership or association deriving its status as such from the law in force in that state.

**s.931C(5) CTA 2009**

In subsection (4) “national”, in relation to a contracting state, includes—

- (a) an individual possessing the nationality or citizenship of the contracting state, and
- (b) a legal person, partnership or association deriving its status as such from the laws in force in that contracting state.

**s.608E(5) ITTOIA**

(3) In subsection (2) “national”, in relation to a contracting state, includes—

[Identical to CTA 2009]

Again, the small differences in wording are not significant. The wording is the same as the OECD Model, except that the definition here is inclusive; but it is difficult to see that that could make any difference.

**107.9 Channel Islands/IoM DTAs**

The Guernsey DTA is typical. It is helpful to read the Crown Dependency treaty/OECD Model side by side:

**Art 24(1) Guernsey DTA**

A legal person, partnership or association deriving its status as such from the laws in force in a Territory

shall not be subjected in the other Territory to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which a legal person, partnership or association of that other Territory in the same circumstances, in particular with respect to residence, is or may be subjected.

**Art 24(1) OECD Model**

Nationals of a Contracting State

shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith, which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances, in particular with respect to residence, are or may be subjected...

The Guernsey DTA applies to a legal person/partnership/association. It does not apply to individuals (who are natural persons, not “legal” persons). One might have thought that the reason was that citizens of the Crown Dependencies are British citizens, so a rule preventing discrimination against them is not needed.

It follows however that the DTA does not contain a “Non-discrimination” Provision in the statutory sense. The definition is a technical one, which ought to be written with scare quotation marks.

It follows that Guernsey is not a qualifying territory/full-tax territory within the statutory definitions which restrict that concept to territories with a “Non-discrimination Provision”.

HMRC take this point. ORIP draft guidance provides:

7.3...Examples of some territories with which the UK has a double taxation agreement but which do not contain a relevant non-discrimination article include the UK’s double taxation agreements with the Crown Dependencies, some British Overseas Territories, and some other territories such as Hong Kong and Saudi Arabia.

This seems an obscure way to exclude Crown Dependencies etc from the

definition and the reliefs to which the definitions relates. But there it is.  
ORIP draft guidance sets out a list of full treaty territories (though that should not be relied on without checking.)

## CHAPTER ONE HUNDRED AND EIGHT

# IHT DOUBLE TAXATION TREATIES: INTRODUCTION

108.1

### *Cross references*

The following topics are considered elsewhere:

78.18 (DTA override) (residential property)

## **108.1 IHT double taxation treaties**

This chapter considers general aspects of IHT DTAs.

The following chapters consider:

- (1) Estate Duty/IHT DTAs (India, Pakistan, Italy, France)
- (2) Netherlands IHT treaty
- (3) Switzerland IHT treaty
- (4) South Africa treaty
- (5) USA IHT treaty
- (6) Foreign IHT credit relief

The UK also has IHT DTAs with Ireland<sup>1</sup> and Sweden: I hope to discuss these in future editions.

## **108.2 Estate and inheritance taxes**

Many states (though by no means all) impose tax on the transfer of wealth on death. These taxes may be divided into two types:

- (1) The taxable person may be the deceased or their estate.

---

1 See Anketell and O'Hanlon, "Cross-Border Inheritance Tax in Ireland" Irish Tax Review, (2012) No 4, p.117; Avery Jones, "The Capital Transfer Taxes Double Taxation Convention with Ireland" [1979] BTR 1.

(2) The taxable persons may be the beneficiaries of the estate (the heirs).

In international tax terminology, type (1) is called an estate tax and type (2) is called an inheritance tax. Under this terminology IHT is more like an estate tax<sup>2</sup> and its title “inheritance tax” is a misnomer. However no confusion arises as long as one remembers that, and I use the term “inheritance taxes” to include both types.

Jurisdiction to charge inheritance tax (as for income tax) is normally based one of two criteria:

- (1) personal nexus to the state: domicile, residence or nationality or the deceased or of the beneficiary;
- (2) situs of assets (a source rule).

These criteria are the cause of double inheritance taxation:

- (1) **Residence-source conflict** when
  - (a) State A imposes tax on the deceased (estate tax) or the heir (inheritance tax) because of their personal nexus to the state (residence, domicile or nationality),
  - (b) State B imposes tax because the assets are situate in that state.
 A residence-source conflict results in double taxation of assets situate in state B.
- (2) **Residence-residence conflict** when more than one state imposes tax on the same person because of their residence, domicile or nationality. A residence-residence conflict results in double taxation on worldwide assets.
- (3) **Source-source conflict** where state A regards an asset as situate in state A and state B regards the asset as situate in state B, because they have different rules determining situs. A source-source conflict results in double taxation on the dual situate assets.

For a general discussion of these problems, see Study on Inheritance Taxes in EU Member States and Possible Mechanisms to Resolve Problems of Double Inheritance Taxation in the EU.<sup>3</sup>

---

2 IHT might be described as a hybrid tax, as the tax can be collected from transferor and transferee, but it is the position of the transferor which matters for the quantum of tax, for instance, it is the donor and not the donee who has a nil-rate band.

3 Copenhagen Economics, commissioned by the EC Directorate-General for Taxation and Customs Union, 2010.

### **108.3 OECD IHT Model**

OECD adopted an Estate and Inheritance Draft Model Convention in 1966. This was revised in 1982 (Model Double Taxation Convention on Estates and Inheritances and on Gifts). This has not been used as much as the IT/CGT convention, and it has not been updated. I refer to it as the “**OECD IHT Model**”.

Its concepts and definitions often draw on the OECD IT/CG Model, so discussion of that model can also be relevant for IHT DTAs.

The OECD IHT Model reflects the normal pattern of treaties made after the introduction of CTT, and is as follows:

- (1) Immovable property, business permanent establishments and (normally) ships/aircraft can be taxed on a situs basis.
- (2) For other property, the treaty domicile state has the primary taxing right and the other state may<sup>4</sup> have the secondary right (with credit for the tax in the treaty domicile state). Treaty-domicile is decided by each state law, with a tie-breaker in cases of dual domicile.

Switzerland and Ireland do not follow this pattern.

### **108.4 IHT DTAs: Taxes covered**

Article 2 OECD IHT Model provides:

3 The existing taxes to which the Convention shall apply are:

- (a) (in State A) .....
- (b) (in State B) .....

4 The Convention shall apply also to any identical or substantially similar taxes which are imposed after the date of signature of the Convention in addition to, or in place of, the existing taxes. At the end of each year, the competent authorities of the Contracting States shall notify each other of changes which have been made in their respective taxation laws.

---

*[https://ec.europa.eu/taxation\\_customs/sites/taxation/files/docs/body/inheritance\\_axes\\_report\\_2010\\_08\\_26\\_en.pdf](https://ec.europa.eu/taxation_customs/sites/taxation/files/docs/body/inheritance_axes_report_2010_08_26_en.pdf)*

4 For example, if the deceased had a treaty domicile within the previous 10 years (South Africa), or was a national of the other state (US), or both of these (Netherlands, Sweden).

This is (more or less) the same as the OECD IT/CG Model.<sup>5</sup>

Section 100 FA 1986 provides:

... any reference to capital transfer tax in the 1984 Act, in any other enactment passed before or in the same Session as this Act or in any document executed, made, served or issued on or before the passing of this Act or at any time thereafter shall have effect as a reference to inheritance tax.

Accordingly, IHT DTAs made between 1975 and 1986, which refer to CTT, now apply for IHT.

### **108.5 IHT DTAs: Incorporation in UK law**

International treaties (including DTAs) do not automatically become part of UK law, but must be incorporated into UK law by statute. Accordingly, s.158(1) IHTA provides:

If Her Majesty by Order in Council declares—

- (a) that arrangements specified in the Order have been made with the government of any territory outside the UK with a view to affording relief from double taxation in relation to
  - [i] capital transfer tax payable under the laws of the UK and
  - [ii] any tax imposed under the laws of that territory which is of a similar character or is chargeable on or by reference to death or gifts inter vivos, and
- (b) that it is expedient that those arrangements should have effect, the arrangements shall, notwithstanding anything in this Act, have effect
  - [i] so far as they provide for relief from capital transfer tax, or
  - [ii] for determining the place where any property is to be treated as situated for the purposes of the tax.

Under s.158(1)(b)[ii], a DTA may *increase* the scope of IHT, by providing that property which is not UK situate on general principles is to be regarded as UK situate.

Section 158 continues:

(1ZA) For the purposes of this section, arrangements made with a view to affording relief from double taxation include any arrangements which modify the effect of arrangements so made.

---

<sup>5</sup> See 103.12 (Taxes Covered).

(1ZB) Arrangements to which effect is given under this section may include provision conferring (with or without other functions) functions relating to the determination of matters arising under the arrangements on a public authority in the UK or in a territory outside the UK.

(2) Any arrangements to which effect is given under this section may include provision for relief in cases occurring before the making of the arrangements and provisions as to property which is not itself subject to double taxation.

(3) Any Order in Council under this section which revokes an earlier Order may contain such transitional provisions as appear to Her Majesty to be necessary or expedient.

(4) An Order under this section shall not be submitted to Her Majesty in Council unless a draft of it has been laid before, and approved by resolution of, the House of Commons.

(5) Where any arrangements have effect by virtue of this section, no obligation as to secrecy shall prevent the Board or an authorised officer of the Board from disclosing to any authorised officer of the government with which the arrangements are made such information as is required to be disclosed under the arrangements.

Section 158 is the IHT equivalent of s.2 TIOPA.<sup>6</sup>

## **108.6 Claims for IHT DTA reliefs**

The position depends on what type of relief is in point:

- (1) Claim for foreign IHT credit:
  - (a) DTA IHT credit
  - (b) Unilateral IHT credit
- (2) Claim for IHT DTA exemption
- (3) Claim for overpaid tax to be repaid

### *108.6.1 UK domestic law*

There is no UK domestic law provision requiring a formal claim for unilateral IHT credit relief or for IHT DT relief (unlike the position for IT and CGT where a claim is required).

A formal claim is required to recover overpaid tax. Section 241(1) IHTA provides:

---

<sup>6</sup> See 103.18 (Incorporation of DTAs in UK law).

If it is proved to the satisfaction of the Board that too much tax has been paid on the value transferred by a chargeable transfer or on so much of that value as is attributable to any property, the Board shall repay the excess unless the claim for repayment was made more than four years after the date on which the payment or last payment of the tax was made.

There is no requirement to make a formal claim for treaty IHT exemption. However if an IHT400 account is in principle required on a death,<sup>7</sup> the obligation to submit the account is not overridden by a treaty, even though it may provide that:

- (1) duty “shall not be imposed”<sup>8</sup>
- (2) property “shall not be taxable”<sup>9</sup> or “shall be taxable only” in the foreign state<sup>10</sup>
- (3) “no account shall be taken in determining the amount or rate of duty of property situate outside [the UK]”<sup>11</sup>

Similarly, for an individual who is IHT deemed domiciled, the US treaty does not override the duty to disclose a lifetime chargeable transfer or the making of a non-resident settlement.<sup>12</sup>

So in these cases, the usual returns should be made, making it clear that DT exemption applies. The form IHT400 Calculation (12/19) has a section entitled Double taxation relief. The rubric at the top of this section provides:

If you wish to claim double taxation or unilateral relief, enclose with form IHT400 a 'certificate of tax paid' from the overseas tax authority, if you already have one, showing the amount of foreign tax paid. We may ask more questions about the claim after the Grant is issued. You must also fill in schedule IHT417, 'Foreign assets' detailing the assets outside the UK.

The treaties alter the position slightly, as:

---

7 See 119.1 (Reporting on death).

8 The wording of the India, France and Pakistan DTAs.

9 The wording of the USA IHT DTA.

10 The wording of the Netherlands and the Switzerland IHT DTAs.

11 The wording of the Italy IHT DTA.

12 See 123.2 (IHT disclosure: creation of trust).

- (1) They may assume that a claim is to be made for a credit and so by implication impose a formal claim requirement with a deadline for making the claim.
- (2) They may alter the time limit for a claim to recover overpaid tax.

The Swiss IHT DTA does not refer to claims. In other cases, the wording varies between treaties.

### 108.6.2 *India and Pakistan*

Article VII India IHT DTA provides:

1. Any claim for a credit or for a refund of duty founded on the provisions of the present Agreement shall be made within six years from the date of the death of the deceased person in respect of whose estate the claim is made, or, in the case of a reversionary interest where payment of duty is deferred until the date on which the interest falls into possession, within six years from that date.
2. Any such refund shall be made without payment of interest on the amount so refunded.

Article VII Pakistan IHT DTA is the same.

### 108.6.3 *France and Italy*

Article VII France IHT DTA provides:

1. Any claim for a credit or for a refund of duty founded on the provisions of the present Convention shall be made within five years from the date of the death of the deceased person in respect of whose estate the claim is made, or, where the event causing duty to be payable occurs at some later date, within five years from that date.
2. Any such refund shall be made without payment of interest on the amount so refunded.

Article VII Italy IHT DTA is the same but lacks para 2.

### 108.6.4 *USA and Netherlands*

Article 9(5) USA IHT DTA provides:

- [a] Any claim for a credit or for a refund of tax founded on the provisions of the present Convention shall be made within six years from the date of the event giving rise to a liability to tax or, where later, within one year from the last date on which tax for which credit

is given is due.

- [b] The competent authority may, in appropriate circumstances, extend this time where the final determination of the taxes which are the subject of the claim for credit is delayed.

Article 14 of the Netherlands IHT DTA is (just about) the same, except it lacks para [b].

## 108.7 Nil-rate band and DTAs

### 108.7.1 *General NRB*

If there would be a chargeable transfer, but for IHT DT relief, does a DTA (if applicable) make the transfer non-chargeable, so the nil-rate band, and (if appropriate) the unused transferable nil-rate band<sup>13</sup> is not used up by the transfer?

IHTM para 43025 provides:

**interaction of ability to transfer unused nil rate band with double taxation agreements, double taxation relief and successive charges relief** [Sep 2018]

The extent to which an estate is chargeable to tax may be governed by a double taxation Convention [IHTM27161], or a liability to tax may be reduced to nil by double taxation relief [IHTM27181] or successive charges relief [IHTM22041].

[1] Where, under the terms of a double taxation Convention, an asset is not subject to tax, then if this means that the chargeable estate is below the nil rate band, the amount unused is available for transfer.

[2] However, where there is a liability to tax that is reduced to nil by either

- [a] double taxation relief or
- [b] successive charges relief,

the nil rate band remains fully used. We do not repay any ‘excess’ relief and ‘excess’ relief cannot be converted into unused nil rate band.

---

13 For the statutory provisions relating to the transferable general nil-rate band, see 86.5.2 (General nil-rate band). For present purposes, it is sufficient to note that the amount of the unused general nil-rate band depends on the amount of the chargeable transfer on the death of the first spouse to die. If there is no chargeable transfer, the full nil-rate band is unused and is transferable to the surviving spouse. See s. 8A(3)(4) IHTA.

Unilateral IHT credit relief takes the form of a credit against IHT. It falls within [2]. Where that relief applies there is still a chargeable transfer so that transferable NRB relief does not become available. The same applies to foreign IHT credit relief under a DTA.

The India France and Pakistan IHT DTAs provide that “duty shall not be imposed” on certain property. The USA DTA provides that certain property “shall not be taxable” in the UK. These reliefs fall within [1]. It is not obvious that this prevents there being a chargeable transfer but it might be said to follow from a commonsense reading. Treaties are not to be construed technically. HMRC read the legislation in this way, so that the transferable nil-rate band is available to the surviving spouse.

The Italy IHT DTA provides that “no account shall be taken, in determining the amount or rate of duty” on death, in relation to certain property. It is considered that the effect is the same as the other estate duty/IHT DTAs.

### 108.7.2 *Residence NRB*

Does DTA relief reduce the value of the estate for the purposes of the residence nil-rate band?<sup>14</sup> In strictness the answer is no, but DTAs are not meant to be construed strictly.

## 108.8 Deductions for DTA purposes

Article V(1) Italy IHT DTA provides:

In determining the amount on which duty is to be computed, permitted deductions shall be allowed in accordance with the law in force in the territory in which the duty is imposed.

Equivalent or comparable wording is found in some other IHT treaties:

<b>IHT DTA</b>	<b>Article</b>	<b>See para</b>	<b>Note</b>
Netherlands	10	110.11	
Pakistan	5(3)	109.9	
South Africa	11(1)	-	Subject to restriction in para 11(2)
Sweden	10	-	
USA	8(1)	113.12	

---

<sup>14</sup> In short, there is a tapered reduction of the relief if the value of the person’s estate immediately before death exceeds £2m; see 89.6 (Residence nil-rate band).

This seems unnecessary. Perhaps there were estate duty or foreign law reasons for it? I would be grateful to any reader who could explain.

There is, or at least there was, a rule of Belgian tax law which disallowed a deduction for charges on Belgium property owned by a non-resident.<sup>15</sup> Maybe the provision was intended to undo discrimination of that kind? But the wording is not quite apt for that. Or possibly the point is to note for the avoidance of doubt that allocation of debt rules now in article 8 OECD IHT Model do not apply.

There is no equivalent in other treaties but the omission does not matter. See too *Re Goetze, National Provincial Bank v Mond* [1953] Ch 96.

There is a similar rule in the OECD model non-discrimination clause.<sup>16</sup>

## 108.9 EU-law aspects

EU law does not oblige Member States to eliminate double taxation,<sup>17</sup> though DTAs must be consistent with EU law; for instance, discrimination against other MS is not permitted.<sup>18</sup> Rates could approach, or even exceed, 100%. An EC report offers a glimmer of hope for the worst cases:

... it is not necessarily the case that all double taxation is permitted under EU law. Kokott AG in *Geurts and Vogten* noted in her opinion that unlimited taxation by two states is possible but then added in a footnote that:

Whether the Court of Justice ... would actually accept this consequence, even in the case of a very high burden of inheritance tax, remains to be seen.<sup>19</sup>

The EU itself cannot tolerate expropriation if it is to comply with fundamental rights.<sup>20</sup>

## 108.10 The future

---

15 In *Eckelkamp* Case C-11/07 the rule was held to breach of EU free movement of capital.

16 See 107.5 (Discrimination in tax deductions).

17 Case C-67/08 *Block*.

18 See 102.5.1 (UK tax law and EU law); 102.20 (IHT and EU law).

19 Case C-464/05 at para 60.

20 EC, "Ways to tackle inheritance cross-border tax obstacles facing individuals within the EU" (2015) accessible <https://www.kessler.co.uk/tfd-archive>

The EC are looking at this area:

EU citizens that inherit foreign property are frequently faced with a tax bill from more than one Member State. In fact, in extreme cases the total value of a cross-border inherited asset might even have to be paid in tax, because several Member States may claim taxing rights on the same inheritance or tax foreign inheritances more heavily than local inheritances. Citizens may be forced to sell inherited assets, just to cover the taxes, and small businesses may face transfer difficulties on the death of their owners. To tackle these problems, the Commission today adopted a comprehensive package on inheritance taxation. Through a Communication, Recommendation and Working Paper, the Commission analyses the problems and presents solutions related to cross-border inheritance tax in the EU. ...

there are two main problems when it comes to cross-border inheritance tax in the EU:

The first is double or multiple taxation, where more than one Member State claims the right to tax the same inheritance. Divergent national rules, a shortage of bilateral inheritance tax conventions, and inadequate national double tax relief measures can result in citizens being taxed twice or more on the same inheritance. Member States are free to apply national inheritance rules as they see fit once they are in line with EU rules on non-discrimination and free movement. The Commission is not proposing any harmonisation of Member States' inheritance tax rules. Instead it is recommending a broader and more flexible application of national double taxation relief measures so as to provide a pragmatic, speedy and cost-effective solution to the significant tax burdens facing many citizens. The Recommendation in today's Package suggests how Member States could improve existing national measures to ensure that there is adequate double tax relief. It sets out solutions for cases in which several Member States have taxing rights. The Commission invites Member States to introduce the appropriate solutions into national legislation or administrative practices.

The second inheritance tax problem that citizens can encounter is discrimination...<sup>21</sup>

Although cross-border inheritance tax problems may seriously affect individuals, revenues from domestic and cross-border inheritances taxes account for a very small share - less than 0.5% - of total tax revenues in

---

21 See 102.20 (IHT and EU law).

Member States. Cross-border cases alone must account for far less than that figure.

**Next steps**

The Commission will launch discussions with Member States to ensure appropriate follow up to the Recommendation. ... In 3 years time, the Commission will present an evaluation report showing how the situation has evolved, and decide on this basis whether further measures are necessary at national or EU level. ...<sup>22</sup>

A consultation paper was published in 2014<sup>23</sup> and a report in 2015.<sup>24</sup>

Major changes in Europe may be anticipated in this area in a few years time, though how that will affect the UK post-Brexit is a matter of speculation.

## IHT DTAs: INDIA, PAKISTAN, ITALY, FRANCE

109.1

### *Cross references*

The following topics are considered elsewhere:

- 108.1 (IHT double taxation treaties) - Introduction
- 108.6 (Claims for IHT DTA reliefs)
- 108.7 (Nil rate band and DTAs)
- 114.7 (France/Italy IHT credit)

### **109.1 Estate duty/IHT treaties**

In recent times the UK has had three death/gift taxes:

<b>Tax</b>	<b>Dates</b>
Estate duty	1894 - 1974
Capital transfer tax	1974 - 1986
Inheritance tax	1986 -

This chapter considers the four IHT double tax treaties which were made in the estate duty era. I refer to these as the “**India/Pakistan/Italy/France IHT DTAs**”<sup>1</sup> or together the “**estate duty/IHT DTAs**”. These treaties are

---

1 For some reason DTAs do not have short titles. The full titles are:  
*India DTA*: Agreement between the Government of the United Kingdom and the Government of India for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons [SI 1956/ 998]  
*Pakistan DTA*: Agreement between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of Pakistan for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons [SI 1957/1522]  
*France DTA*: Convention between the United Kingdom of Great Britain and Northern

important to those who are deemed UK domiciled, but domiciled in India, Pakistan, Italy or France under the law of those countries.

I comment only on the UK aspects of the treaties. Foreign law advice will also be needed in any case where a treaty applies. The provisions relating to exchange of information are not discussed.

The 4 estate duty/IHT DTAs are similar but not identical, and apparently small differences can be important. This does make a coherent exposition more difficult. It is surprising that no standard model form was adopted, but there it is. It does make one appreciate the tremendous value of OECD IT/CG Model.

## 109.2 Estate duty DTAs applied to IHT

India IHT DTA Art. I provides:

The duties which are the subject of the present Agreement are

- (a) In India, the estate duty imposed under the Estate Duty Act, 1953, and
- (b) In the UK, the estate duty imposed in Great Britain.

The Pakistan, Italy and France IHT DTAs are substantially the same: see Arts. I and II of each DTA.

### 109.2.1 *Application of treaties to IHT*

The treaties refer to UK estate duty, but they apply to IHT. Section 158(6) IHTA provides:

Where arrangements with the government of any territory outside the UK are specified under any Order in Council which—

- (a) was made, or has effect as made, under
    - [i] section 54 of the Finance (No 2) Act 1945 or
    - [ii] section 2 of the Finance Act (Northern Ireland) 1946, and
  - (b) had effect immediately before the passing of this Act,
- [a] the Order shall, notwithstanding the repeal of that section by the

---

Ireland and France for the avoidance of double taxation with respect to duties on the estates of deceased persons [SI 1963/1319]

*Italy DTA*: Convention between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of the Italian Republic for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons [SI 1968/304]

Finance Act 1975 remain in force and have effect as if any provision made by those arrangements in relation to estate duty extended to capital transfer tax<sup>2</sup> chargeable by virtue of section 4 above;  
[b] but the Order may be amended or revoked by an Order in Council made under this section.

### 109.2.2 *Substantially similar taxes*

Art. 1(2) Italy IHT DTA provides:

The present Convention shall also apply to any other duties of a substantially similar character to the duties referred to in para (1) above which may be imposed in Great Britain or Italy subsequently to the date of signature of the present Convention.

This is also in the France and Pakistan IHT DTAs. But section 158(6)[a] was still needed, as:

- (1) CTT was probably not “of a substantially similar character” to estate duty (though IHT is substantially similar).
- (2) In any case, DTAs need to be expressly incorporated into UK domestic law.<sup>3</sup>

The wording is similar to the OECD model.<sup>4</sup>

There is no equivalent provision in the India IHT DTA, but it makes no difference.

### 109.2.3 *Application to Northern Ireland*

The India IHT DTA refers to estate duty imposed in Great Britain, but it also applies to estate duty (and now IHT) in Northern Ireland.<sup>5</sup>

## 109.3 Interpretation

---

2 The reference to CTT has effect as a reference to IHT: s.100 FA 1986.

3 See 103.18 (Incorporation of DTAs in UK law); 108.5 (IHT DTAs: Incorporation in UK law).

4 See 108.4 (IHT DTAs: Taxes covered).

5 India IHT DTA Art. X provides: “The present Agreement shall apply in relation to the estate duty imposed in Northern Ireland as it applies in relation to the estate duty in Great Britain, but shall be separately terminable in respect of Northern Ireland by the same procedure as is laid down in Article XII.” This was because Northern Ireland was from 1921 a separate unit for estate duty purposes.

### 109.3.1 *Treaty definitions*

Art II(1)(a)-(d) India IHT DTA provides commonsense definitions (not set out here) of “India”, “United Kingdom” “Great Britain” and “territory”. There is then a straightforward definition of “duty”:

- (e) The term “duty” means the estate duty imposed in India or the estate duty imposed in Great Britain, as the context requires.

### 109.3.2 *Undefined treaty terms*

Art II(3) India IHT DTA provides:

In the application of the provisions of the present Agreement by either Contracting Government, any term not otherwise defined shall, unless the context otherwise requires, have the meaning which it has under the law of that Contracting Government relating to duty.

This is (more or less) standard OECD Model wording: see 103.11 (Undefined treaty terms).

## 109.4 **Treaty IHT exemption**

Each IHT DTA provides an IHT exemption in slightly different terms. India IHT DTA Art. III(3) provides:

- [a] Duty shall not be imposed in Great Britain on the death of a person who
  - [i] was not domiciled at the time of his death in any part of Great Britain but
  - [ii] was domiciled in some part of India on any property situated outside Great Britain:
- [b] Provided that nothing in this paragraph shall prevent the imposition of duty in Great Britain on any property which passes under a disposition or devolution regulated by the law of some part of Great Britain.

Italy IHT DTA Art. V(2) provides:

- [a] Where duty is imposed in the territory of one Contracting Party on the death of a person who at the time of his death
  - [i] was not domiciled in any part of that territory but
  - [ii] was domiciled in some part of the territory of the other Contracting Party,

- no account shall be taken, in determining the amount or rate of such duty, of property situated outside the former territory,
- [b] provided that this paragraph shall not apply to duty imposed in the territory of a Contracting Party on property passing under a settlement governed by its law.

France IHT DTA Art. V(1) provides:

- [a] Where a person was at the time of his death domiciled in some part of France duty shall not be imposed in Great Britain on any property which neither is situated in Great Britain, nor passes under a disposition or devolution regulated by the law of some part of Great Britain;
- [b] and, in determining the amount or rate of duty payable in Great Britain, such property shall be disregarded.

I refer to this as “**treaty IHT exemption**”.

The exemption applies to duty imposed on death.<sup>6</sup> That includes the charge which applies on property in the individual’s free estate, and property in an estate IIP trust.

It is considered that the exemption also applies to property within the GWR charge on death (assuming the property is not UK situate). Such property does not “pass under a disposition or devolution regulated by the law of some part of Great Britain” since it does not “pass”; (or even if it did, it does not pass under a disposition or devolution).

Treaty exemption does not apply to property situated in Great Britain, but read literally, it does apply to property situated in Northern Ireland. It is suggested that India IHT DTA Art. X justifies a purposive construction under which references to property situated in Great Britain include property situated in Northern Ireland.

The Pakistan IHT DTA contains an amusing error. Pakistan IHT DTA Art.V(2) provides:

Where a person at the time of his death was domiciled in some part of Pakistan and was not domiciled in some part of Great Britain, duty shall not be imposed in Great Britain on any property which for the purposes of duty passes or is deemed to pass on his death unless that property—

---

<sup>6</sup> This is stated expressly in the India, Pakistan and Italy IHT DTAs. In the France IHT DTA it is not stated expressly but is clearly implied.

- (a) is situated in Pakistan [!], or
  - (b) passes under a disposition or devolution regulated by the law of some part of Great Britain;
- and, in determining the amount or rate of duty payable in Great Britain, property not falling within sub-para (a) or (b) shall be disregarded.

There is clearly a typographical error here: the word “Pakistan” in (a) should read “Great Britain”.<sup>7</sup> It is considered that the error can be corrected as a matter of construction under the slip rule. HMRC practice (understandably) adopts this view.<sup>8</sup>

#### 109.4.1 *Failed PET*

What about the charge on a lifetime PET which becomes a chargeable transfer because the transferor dies within 7 years, known as a “**failed PET**”? The treaties must be considered separately, since the wording of each treaty IHT exemption varies.

India and Italy IHT DTAs provide exemption from duty *on the death*. In the case of a failed PET, the IHT charge is on the lifetime transfer of value. Strictly, the charge is not “on the death”, even though it is only on the occasion of death that the transfer becomes chargeable. However a purposive construction is appropriate. The relief would have applied to

---

7 I am grateful to Simon McKie for drawing this point to my attention. The corresponding mistake is made in Art V(1):

“Where a person at the time of his death was domiciled in some part of Great Britain and was not domiciled in some part of Pakistan, duty shall not be imposed in Pakistan on any property which for the purposes of duty passes or is deemed to pass on his death unless that property—

- (a) is situated in Great Britain [!], or
- (b) is settled property of which the deceased was life tenant where the settlor was domiciled in some part of Pakistan at the time that the settlement took effect, or
- (c) passes under a devolution regulated by the law of some part of Pakistan and in determining the amount or rate of duty payable in Pakistan, property falling within (a), (b), or (c) shall be disregarded.

and, in determining the amount or rate of duty payable in Great Britain, property not falling within sub-para (a) or (b) shall be disregarded.”

In some published versions the error has been corrected, but I am not aware of any authority for that. The original is at:

[https://www.kessler.co.uk/wp-content/uploads/2012/05/Pakistan\\_IHT\\_DTT.pdf](https://www.kessler.co.uk/wp-content/uploads/2012/05/Pakistan_IHT_DTT.pdf)

8 HMRC correspondence.

the estate duty charge on lifetime gifts within 7 years of death. In substance the charge on failed PETs is a charge on death. This is a strong argument, for treaties are not interpreted strictly or literally. A relief for a charge “on” the death means a relief for a charge which becomes payable *at the time of the death*.<sup>9</sup>

In France, the IHT exemption does seem to apply to a failed PET since the words “on the death” are not present.

In Pakistan the case for IHT exemption seems somewhat weaker since it is a very loose construction to say that the charge on a failed PET is a charge on property which “passes or is deemed to pass” on a death (the terminology is from estate duty legislation where it had a somewhat technical meaning). Nevertheless the purposive argument is still arguable.

However there is a serious difficulty. Section 158(6) IHTA provides that the estate duty/IHT DTAs:

have effect as if any provision made by those arrangements in relation to estate duty extended to capital transfer tax chargeable by virtue of section 4 above ...

The treaties have effect in relation to IHT *chargeable by virtue of s.4 IHTA*. The IHT charge on a failed PET is not under s.4, so the treaty does not have effect in relation to that charge.<sup>10</sup> It is considered, therefore, that although the terms of the treaties of France (relatively clearly), India and Italy (reasonably clearly) and Pakistan (arguably) do provide relief for a failed PET, this does not help the taxpayer, because UK domestic law (in breach of the treaty obligations) does not do so.

Michael Firth argues against this view.<sup>11</sup> He suggests s.158(6) is doing two things:

- (1) it is keeping the Orders in Council in force;
- (2) it is extending the provisions within the orders to capital transfer tax chargeable under s.4.

---

9 Further support can be found from the area of transferable nil-rate bands. This relief increase the nil-rate band “for the purposes of the charge to tax *on the death* of the survivor”; see s.8A(3) IHTA. HMRC accept that this relief applies to the charge on a failed PET.

10 For s.4 IHTA, see 72.4 (Death: IHT charge & exemption).

11 Firth, “Failed PETs and Living Happily Ever After” [2016] PCB 1.

Keeping the Order in Council in force allows s.158(1) to act upon them since it is that subsection which provides that “the arrangements shall, notwithstanding anything in this Act, have effect so far as they provide for relief from capital transfer tax ...”.

In full, s.158(1) IHTA provides:

If Her Majesty by Order in Council declares—

- (a) that arrangements specified in the Order have been made with the government of any territory outside the UK with a view to affording relief from double taxation in relation to
  - [i] capital transfer tax payable under the laws of the UK and
  - [ii] any tax imposed under the laws of that territory which is of a similar character or is chargeable on or by reference to death or gifts inter vivos, and
- (b) that it is expedient that those arrangements should have effect, the arrangements shall, notwithstanding anything in this Act, have effect so far as they provide for relief from capital transfer tax, or for determining the place where any property is to be treated as situated for the purposes of the tax.

Firth argues that s.158(1) is the provision that incorporates the estate duty/IHT DTAs into UK law and it does so in full. The difficulty with that is that s.158(1) applies to DTAs made with a view to affording relief from double taxation in relation to *Capital Transfer Tax*. There is a rule that a reference to estate duty includes CTT, but there is no rule that a reference to CTT includes estate duty.

Let us assume for a moment that s.158(1) did incorporate the estate duty/IHT DTAs into UK law. Why does s.158(6) say that the old treaties remain in force and have full effect? Firth argues that s.158(6) simply ensures that the old DTAs (Orders in Council) remain valid. But in the absence of s.158(6), the orders could remain in force. Section 158(1) re-enacts the former estate duty provision, and s.17(2) Interpretation Act 1978 provides:

Where an Act repeals and re-enacts, with or without modification, a previous enactment then, unless the contrary intention appears,—

- (a) any reference in any other enactment to the enactment so repealed shall be construed as a reference to the provision re-enacted;
- (b) in so far as any subordinate legislation made or other thing done

under the enactment so repealed, or having effect as if so made or done, could have been made or done under the provision re-enacted, it shall have effect as if made or done under that provision.

Let us assume for a moment that s.158(6) is needed to ensure that the old DTAs remain in force. So why does it also say that the estate duty DTAs “have effect as if any provision made by those arrangements in relation to estate duty extended to capital transfer tax chargeable by virtue of s.4 IHTA”? Firth argues:

s.158(6) operates not at the level of giving effect to the Treaties (or restricting their effect), but at the level of interpreting the provisions within the Treaties. It confirms (mostly for the avoidance of doubt) that the deemed transfer of value on death is within the scope of the Treaty. They are words of extension (quite explicitly) not restriction.

But s.158(6) is not needed to extend the estate duty DTAs to capital transfer tax. Para 1 sch 6 IHTA provides:

References in any enactment, in any instrument made under any enactment, or in any document (whether executed before or after the passing of this Act) to estate duty or to death duties shall have effect, as far as may be, as if they included references to capital transfer tax chargeable under section 4 of this Act (or under section 22 of the Finance Act 1975).

The history of the legislation is important here.

The reason why s.158(6) does not refer to failed PETs is because PETs were not part of the capital transfer tax regime. In that regime, there was a full tax on all inter vivos transfers of value as well as a deemed transfer of value on death under s.4. Only the latter was substantially similar to estate duty on death and that is why the legislation refers to it.

That is correct.

However, when the IHT regime was introduced the charge on lifetime gifts took on a different character and became (once again) a means of protecting the charge on death rather than an object of charge in its own right.

The charge on lifetime gifts could be both a means of protecting the

charge on death *and* an object of charge in its own right (admittedly a rather strange one, but IHT is a strange and illogical tax).

HMRC take the view that treaty relief does not apply to a failed PET. This can be inferred from a passage in the IHT Manual:

**IHTM13024 Deemed Domicile** [Jan 2020]

... domicile does not include deemed domicile...when considering the double taxation agreements (IHTM27161) with France, Italy, India or Pakistan (though where there is a common law domicile in France, Italy, India or Pakistan, IHTA84/S267 can apply to chargeable lifetime transfers).

The better view remains that there is no treaty relief for a failed PET. This is odd, perhaps absurd. But the treaties give rise to many other anomalies. There is no relief on ten-year charges on trusts. There is no relief on a lifetime chargeable transfer which is not a PET, such as a lifetime gift to a trust.<sup>12</sup> That applies, I think, to the tax immediately payable, and the additional IHT payable within 3 years of death. The absence of treaty relief for a failed PET is consistent with that.

#### 109.4.2 *Planning*

This raises tricky choices for a person who qualifies for treaty IHT exemption. One approach is for an elderly individual *not* to make any gifts, to retain property until death. The lifetime gift may be taxable and the death estate tax free. But the risk of that approach is that by the time of the death:

- (1) The treaty may have been repealed.<sup>13</sup>
- (2) An inheritance tax in the foreign state may be re-imposed.

The lifetime gift may be better—if the donor survives seven, or at least three years.

Sometimes one spouse is and the other is not within the scope of the treaty. In that case inter-spouse gifts (or will trusts conferring an IIP on the spouse) will bring the property within the scope of treaty relief.

### 109.5 **Domicile: applicable law**

---

<sup>12</sup> It appears from an incoherent passage in IHTM para 13024 that HMRC agree.

<sup>13</sup> See 109.12 (The future).

Art II(2) India IHT DTA provides:

For the purposes of the present Agreement, the question whether a deceased person was at the time of his death domiciled in any part of the territory of one of the Contracting Governments shall be determined in accordance with the law in force in that territory.

So:

- (1) The question of whether a person is domiciled in the UK is determined according to UK legal principles.
- (2) The question whether a person is domiciled in India is determined on Indian legal principles.

Art II(2) is needed because (on general treaty interpretation principles<sup>14</sup>), in the application of the DTA in the UK, the term domicile would otherwise be given its UK law meaning.

### **109.6 Individual not UK domiciled**

One requirement for IHT exemption in the India and Pakistan DTAs is that the individual must not be domiciled in the UK (according to UK law).

#### *109.6.1 Deemed domicile disapplied*

Section 267(2) IHTA provides:

Subsection (1) above ... shall not affect the interpretation of any such provision as is mentioned in section 158(6) above.

“Such provision as is mentioned in s.158(6)” means:

- (1) the statutory provisions referred to [s.54 F (No 2) A 1945 and s. 2 FA (Northern Ireland) 1946] and
- (2) The DTAs made pursuant to those provisions, ie the estate duty/IHT DTAs

Section 267(1) contains the main deemed domicile rules: the 15-year rule, 3-year rule and formerly-domiciled resident rule. These rules are all disapplied by s.267(1).

The reason for disapplying deemed domicile is that estate duty had no

---

14 See 109.3.2 (Undefined treaty terms).

equivalent of the CTT/IHT deemed domicile rules. The subsequent application of a deemed domicile rule to the estate duty/IHT DTAs would have raised a number of difficulties.<sup>15</sup> The obvious solution was to keep the treaties free from the deemed domicile rules.

### 109.6.2 *Spouse-election domicile disapplied*

For spouse-election domicile,<sup>16</sup> s.267ZA(6) IHTA provides:

An election under this section is to be ignored—

- (a) in interpreting any such provision as is mentioned in section 158(6)

Section 267ZA(6)(a) disapplies spouse-election domicile for the estate duty/IHT DTAs. The wording is based on s.267(2).

Section 267ZA(6)(b) provides:

An election under this section is to be ignored...

- (b) in determining the effect of any qualifying double taxation relief arrangements in relation to a transfer of value by the person making the election.

“Qualifying” DTA is defined in s.267ZA(7) IHTA:

For the purposes of subsection (6)(b) a qualifying double taxation relief arrangement is an arrangement which is specified in an Order in Council made under section 158 before the coming into force of this section [17 July 2013] (other than by way of amendment by an Order made on or after the coming into force of this section).

This disapplies spouse-election domicile for all the other IHT DTAs, because they were all made before 2013.

### 109.6.3 *Domicile in Italy/France*

Exemption in the Italy IHT DTA also has the requirement that the

---

<sup>15</sup> It is an interesting question whether it would have been a breach of the treaties. Even if not a technical breach, the treaty countries could reasonably have objected. IHT deemed domiciled individuals would have suffered double taxation.

An alternative would have been to renegotiate existing treaties (introducing new rules at least for treaties which lacked a tie-breaker) but presumably that was thought to be impractical or too much trouble.

<sup>16</sup> See 4.13 (Spouse-election domicile).

individual is not domiciled in the UK. However, this treaty has a tie-breaker for an individual who is both domiciled in the UK and Italy-law domiciled in Italy. If Italy wins under the tie-breaker, it is clear that the individual is regarded as not UK domiciled. So the requirement to be non-UK domiciled adds nothing.

IHT exemption in the France IHT DTA (which also has a domicile tie-breaker) does not include the requirement that the individual is not domiciled in the UK. Since the Italy IHT DTA (1968) came well after the France IHT DTA (1963) it is strange that the Italy wording did not copy the French precedent. But there it is.

### 109.7 Foreign-law domicile

The requirement for IHT exemption in each estate duty/IHT DTA is that the individual must be domiciled in the foreign state according to the law of that state. Since that law is not the same as UK law, I refer to “**India-law domicile**”, etc.

#### 109.7.1 *India-law domicile*

The question whether an individual is domiciled in India is governed by the law of India. The law of domicile in India is governed by the [British India] Succession Act 1925.<sup>17</sup> That Act sets out statutory rules mostly based on the common law rules, and *Saini v State of Uttarakhand*<sup>18</sup> referred to Halsbury’s Laws of England, so it seems that Indian domicile law has not moved from its common law origin. India still applies the common law rule (abolished in the UK in 1973) that a married woman has the domicile of her husband as a domicile of dependency.

There appear to be differences of view as to whether:

- (1) India is a unitary state for domicile purposes, so a person is domiciled in India, not in any part of India; or

---

<sup>17</sup> See Agrawal, *Private International Law in India* (1<sup>st</sup> ed., 2010) p.67; *Dr. Pradeep Jain v Union of India* AIR 1984 SC 1420; *Kedar Pandey v Narain Bikram Shah* 1966 AIR 160, 1965 SCR (3) 793.

The Succession Act is at [http://www.liiofindia.org/in/legis/cen/num\\_act/isa1925183/](http://www.liiofindia.org/in/legis/cen/num_act/isa1925183/). The part of the Act dealing with domicile does not apply if the deceased was a Hindu, Muslim, Buddhist, Sikh or Jaina, but I understand that the Act has been taken as stating the general law of domicile.

<sup>18</sup> AIR 2010 Utr 36 <https://indiankanoon.org/doc/42616100>

- (2) India (like the UK) is a federal state for domicile purposes, so a person is strictly domiciled in one of the states which make up the Republic of India (and a reference to domicile in India strictly means domicile in any one of those states).

Perhaps one sometimes applies one rule and sometimes the other, depending on context.<sup>19</sup> In the context of the India IHT DTA, this issue will not often arise.

Section 11 [British India] Succession Act 1925 contains one provision which is not in English law:

Any person may acquire a domicile in India by making and depositing in some office in India, appointed in this behalf by the State Government, a declaration in writing under his hand of his desire to acquire such domicile; provided that he has been resident in India for one year immediately preceding the time of his making such declaration.<sup>20</sup>

But it has been said that this is dead letter law, as no offices are currently designated.<sup>21</sup>

### 109.7.2 *Pakistan-law domicile*

The Pakistan IHT DTA is differently worded but the same in substance. Pakistan IHT DTA Art. II(2) provides:

For the purposes of the present Agreement, the question whether a deceased person was at the time of his death domiciled in any part of Great Britain or in any part of Pakistan shall be determined in

---

19 See Noronha, *Private International Law in India* (2<sup>nd</sup> ed, 2013) chap 6 (Domicile). Article III India IHT DTA refers to a person being domiciled “in some part of India” so the drafter regarded India as a federal state for domicile purposes, at the time of the DTA (1956).

20 This is derived from a UK statute: s.2 Domicile Act 1861. This anticipated conventions with foreign states under which such rules could be mutually agreed. But no conventions were ever concluded, so the 1861 Act was a dead letter and finally repealed in 1971.

21 Mehta, “A tale of two domiciles” GITC Review Vol 15 (2019)  
[http://taxbar.com/wp-content/uploads/2018/03/NM\\_A-Tale-of-Two-Domiciles\\_GITCReview\\_XV\\_1.pdf](http://taxbar.com/wp-content/uploads/2018/03/NM_A-Tale-of-Two-Domiciles_GITCReview_XV_1.pdf)

If that is right, s.11 [British India] Succession Act 1925 ought to be repealed in India, just as the UK 1861 Act has been repealed in the UK.

accordance with the law in force in Great Britain and Pakistan respectively.

Thus the question whether one is domiciled in Pakistan is governed by the law of Pakistan.<sup>22</sup>

### 109.7.3 *Italy & France-law domicile*

Italy IHT DTA Art. II(2) repeats the India IHT DTA but goes on to add a tie-breaker clause:

- (a) For the purposes of the present Convention, the question whether a deceased person was domiciled at the time of his death in any part of the territory of one of the Contracting Parties shall be determined in accordance with the law in force in that territory.
- (b) Where by reason of the provisions of the preceding paragraph a deceased person is deemed to be domiciled in the territory of each of the Contracting Parties, then this case shall be solved in accordance with the following rules:
  - (i) he shall be deemed to be domiciled in the territory of the Contracting Party in which he had a permanent home available to him at the time of his death; if he had a permanent home available to him in the territory of each of the Contracting Parties he shall be deemed to be domiciled in the territory of the Contracting Party with which his personal and economic relations were closest (centre of vital interests);

It is not often necessary to look beyond this point but, for completeness, the DTA continues.

- (ii) if the Contracting Party in whose territory he had his centre of vital interests cannot be determined, or if he had not a permanent home available to him in the territory of either Contracting Party, he shall be deemed to be domiciled in the territory of the Contracting Party in which he had an habitual abode;

---

<sup>22</sup> *Dymond's Death Duties* (15th ed., 1973) at 1388 states:

“The Indian (and Pakistan) law (contained in the [British India] Succession Act 1925) is basically similar to British law but somewhat less stringent in its requirements, ie. the conception of ‘domicile’ is a little nearer to that of ‘residence’.”

I would be grateful to any reader who could supply further information about Pakistani law of domicile.

- (iii) if he had an habitual abode in the territory of each of the Contracting Parties, or in the territory of neither, he shall be deemed to be domiciled in that of which he was a national;
- (iv) if he was a national of both territories or of neither of them, the taxation authorities of the Contracting Parties shall determine the question by mutual agreement.

The tie-breaker wording follows the tie-breaker in OECD Model Convention definition of residence, Art. 4(2), and reference should be made to OECD Commentary.<sup>23</sup> A key question is what is required for a person to be domiciled in Italy under Italian law.

France is the same as Italy: France IHT DTA Art. II(3).

## 109.8 Treaty-situs

The next requirement of treaty IHT exemption is that the property must not be situate in the UK. For this purpose the DTAs contain situs rules. It is therefore necessary to distinguish between ordinary IHT situs and what I call “**treaty-situs**”. The rules are those recommended in a report on Double Taxation prepared for the League of Nations in 1923 by Professors Bruins and Seligman and our own Sir Josiah (later, Lord) Stamp; the report is worth reading as it gives the background. Some of the rules repeat the ordinary IHT situs rules and others are different.

### 109.8.1 *Treaty-situs: India/Pakistan*

India IHT DTA Art. IV(1) provides:

Subject to para (2) of this Article, where a person was at the time of his death domiciled in any part of the territory of one of the Contracting Governments ...

This is the case we are considering.

... the situs of any property *which for the purposes of duty passes or is deemed to pass on his death* shall, for the purposes

- [a] of the imposition of duty and
- [b] of the credit to be allowed under Art. VI,

be determined exclusively in accordance with the rules in Art. V of the present Agreement.

---

<sup>23</sup> See 8.11 (Tie-breaker tests: Individuals).

However there is a condition in Art. IV(2):

Para (1) of this Article shall apply if, and only if, apart from the said Art. V—

- (a) duty would be imposed on the property under the law of each of the Contracting Governments; or
- (b) duty would be imposed on the property under the law of one of the Contracting Governments and would, but for some specific exemption, also be imposed thereon under the law of the other Contracting Government.

This condition is not satisfied under the India IHT DTA, since estate duty in India was repealed in 1985. (Significantly, about the same time, the Thatcher Government was drawing the teeth of CTT, though the UK did not follow India all the way to abolition.) So the treaty-situs rules in the India IHT DTA will not apply, unless India re-imposes an estate duty. Instead the IHT/international law situs rules will apply.

Pakistan is the same: Pakistan IHT DTA Art. III. Pakistan's estate duty was abolished in 1979. One wonders why these treaties have survived, more than three decades after losing their *raison d'être*.

Italy and France are substantially the same.<sup>24</sup> They omit the phrase italicised above, but that seems to make no difference.

### 109.8.2 Treaty-situs: France/Italy

Article III France IHT DTA provides:

(1) Where a person was at the time of his death domiciled in any part of the territory of one of the Contracting Parties, the situs of any property shall for the purposes

[a] of the imposition of duty and

[b] of any credit to be allowed under Article VI<sup>25</sup>

be determined exclusively in accordance with the rules in Article IV.

(2) Paragraph (1) of this Article shall apply only if, apart from the said Article IV—

- (a) duty would be imposed on the property under the law of each Contracting Party; or

---

<sup>24</sup> Italy IHT DTA Art. III.

<sup>25</sup> See 114.7 (France/Italy IHT credit).

- (b) duty would be imposed on the property under the law of one of the Contracting Parties and would, but for some specific exemption, be imposed thereon under the law of the other Contracting Party.

France retains its duty on successions on death, so the condition in art.3(2) is satisfied, and the treaty-situs rules are relevant. I here set out the rules in art.4 France IHT DTA highlighting in italic those significantly different from IHT-situs:

The rules referred to in paragraph 1 of Article III are:

- (a) land shall be deemed to be situated at the place where it is located; rights or interests (otherwise than by way of security) which constitute immovable property shall be deemed to be situated at the place where the land to which they relate is located; the question whether rights or interests constitute immovable property shall be determined in accordance with the law of the place where the land to which they relate is located;
- (b) tangible movable property (other than such property for which specific provision is hereinafter made) and rights or interests (otherwise than by way of security) therein shall be deemed to be situated at the place where it is located at the time of the deceased person's death or, *if in transitu, at the place of destination*; and bank or currency notes or other forms of currency recognised as legal tender in the place of issue shall be treated as tangible movable property for the purpose of this subparagraph;
- (c) *debts, secured or unsecured, excluding those for which specific provision is made in this Article, but including debentures and debenture stock issued by a company, bills of exchange, promissory notes and cheques shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;
- (d) *securities issued by any government, county council, département, municipality or other public authority shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;
- (e) *shares or stock in a company (including any such property held by a nominee, whether the beneficial ownership is evidenced by scrip certificates or otherwise) shall be deemed to be situated at the place where the company was incorporated*;
- (f) *moneys payable under a policy of assurance or insurance shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;
- (g) an interest in a partnership, which term includes a société en nom collectif, a société en commandite simple and a société civile under French law, shall be deemed to be situated at the place where the business is principally carried on; *and in the case of a société civile immobilière this shall be where the land developed in accordance with the objects of the société is located*;

- (h) goodwill as a trade, business or professional asset shall be deemed to be situated at the place where the trade, business or profession to which it pertains is carried on;
- (i) ships and aircraft and shares thereof shall be deemed to be situated at the place of registration of the ship or aircraft;
- (j) *patents, trade marks, designs, copyright, and rights or licences to use any patent, trade mark, design or copyrighted material shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death;*
- (k) *rights or causes of action ex-delicto<sup>26</sup> surviving for the benefit of the estate of a deceased person shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death;*
- (l) *judgment debts shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death;*
- (m) *any other right or interest shall be deemed to be situated at the place determined by the law in force in the territory of the Contracting Party where the deceased person was not domiciled at the date of his death.*

The France IHT DTA may *increase* IHT on death, by providing that property which is not UK situate on general principles is to be regarded as UK situate.

For the position in Italy, see Saccardo, “Italian Inheritance and Gift Tax upon Non-residents” [2020] PCB 43.

## 109.9 Deductions

Article V(1) Italy IHT DTA provides:

In determining the amount on which duty is to be computed, permitted deductions shall be allowed in accordance with the law in force in the territory in which the duty is imposed.

This article is also found in Pakistan and several other IHT DTAs; for discussion, see 108.8 (Deductions for DTA purposes).

## 109.10 Certificate of tax paid

### 109.10.1 *France*

The IHT Manual provides:

**IHTM27174: certificate of tax paid: France [Oct 2016]  
Certificate of French succession duty paid**

---

<sup>26</sup> ie torts, not contractual rights.

Where the deceased had a fiscal domicile (IHTM13001) in France, the UK is required by Article V to waive its rights to tax on any of their assets that are deemed to be situated in France under the situs code at Article IV of the Double Taxation Convention. In view of the provisions of Article III (2), which restricts relief where the French tax has not been paid, it is desirable to have some confirmation of the French Revenue's position. Normally it will be sufficient to obtain a copy of the French return (Déclaration de Succession) and the French clearance certificate (Certificat d'Acquittement) to confirm that the French succession duty has been paid.

Where the deceased had a fiscal domicile (IHTM13001) in the UK and a double taxation credit is claimed from HMRC under Article VI, you may allow the amount shown in form IHT 400 provisionally. But the case must not be closed until the payment has been certified by the French authorities. The form used for the certification is form No. 50, which is available from Technical.

If you think a credit is due, send two prints of form No. 50 to the taxpayer or agent. Ask them to complete the forms and return both copies to us. You should send the completed forms to Technical, who will send them on to the French authorities.

In due course, we will receive a certified form No. 50 back from France. You should check the certified form carefully, and allow the correct amount of credit. If you are uncertain about any aspect of the certified form No. 50, or you think that the Convention may not have been correctly applied, please refer the case to Technical, with a covering memo.

- The credit given for the French duty cannot be more than the amount of the UK tax due on the asset concerned.
- The provisions of the Convention only cover UK Inheritance Tax (IHT) that is due on death. They do not cover tax due on immediately chargeable lifetime transfers.

#### **Certificate of IHT paid**

Where the deceased had a fiscal domicile (IHTM13001) in the UK, France is required by Article V to waive its right to tax on any of their assets that are deemed to be situated in the UK under the situs code at Article IV of the Double Taxation Convention. You should consult Technical about any request for a confirmation of the UK's position in support of a claim to the French taxation authorities.

Where the deceased had a fiscal domicile (IHTM13001) in France and a double taxation credit is claimed from the French Revenue under

Article VI a certificate of IHT paid is given on the French form No. 5180 once the IHT is finalised and paid.

A stock of this form is held Technical. The taxpayer must complete it in triplicate and then return it to us.

You should check the forms No. 5180. It is important that you do not mark the forms in any way. The file should be sent, with a note of any error or omission, to Technical. When the case is closed Technical will arrange for two copies to be certified and sent to the French authorities, together with a schedule of any amendments we have needed to make. We will keep the third copy of the form on our file. You should tell the taxpayer or agent that we have sent the certificate to France, and send them a copy of the schedule of amendments, if there is one.

### 109.10.2 *Italy*

The IHT Manual provides:

**IHTM27175 certificate of tax paid: Italy** [Sep 2018]

Where a double taxation credit is claimed for tax imposed in Italy or the taxpayer or agent asks for a certificate of the Inheritance Tax paid for the Italian authorities refer the file to Technical for advice.

The Double Taxation Convention between the UK and Italy only covers the Italian equivalent of Inheritance Tax (known as imposta sulla successione). This tax was abolished for all deaths after 25 October 2001 but later reintroduced for deaths on or after 3 October 2006.

You should also consider whether unilateral relief (IHTM27185) applies in respect of Italian taxes that fall outside the scope of the Double Taxation Convention. But it will only apply where the foreign tax is of a character similar to Inheritance Tax or is chargeable on or in connection with death or lifetime gifts. Italian imposta ipotecaria and imposta catastale are not of similar character to Inheritance Tax, because they are chargeable on a normal property purchase as well as on a death transfer.

The provisions of the Convention only cover UK Inheritance Tax that is due on death. They do not cover tax due on immediately chargeable lifetime transfers.

### 109.11 **Proper law**

Treaty IHT exemption in India, Pakistan and France does not apply to property which passes under a disposition or devolution regulated by the law of some part of Great Britain.

Italy is not quite the same. The restriction is that the exemption does not apply to property passing under a *settlement* with a UK law (so the exemption could apply in Italy to property passing under a UK law will, but not elsewhere).

This follows estate duty principles, where the territorial limits of the tax depended partly on domicile and situs (as IHT) but also on whether the proper law of the disposition or devolution under which the property passes was a law of the UK. The requirement is not appropriate for the IHT regime, but logic is not to be expected when estate duty treaties are left unamended to apply to IHT.

This is a complex topic, with many cases to consider. The starting point is *Philipson-Stow v IRC*<sup>27</sup> where a testator domiciled in England left a will governed by English law. The estate included land in South Africa. The land passed under a disposition regulated by the law of South Africa, both on the death of the testator and on the death of a life tenant many years later (the trust having retained the land).<sup>28</sup>

If relief is lost because an English law will governs the disposition, the problem might in principle be resolved by an IoV, though the drafting would require some care.

## 109.12 The future

In 2015 the Law Society said:

We understand the intention is for the UK to have priority taxing rights and to re-negotiate the [estate duty] treaties in the longer term.<sup>29</sup>

The lapse of time suggests the plan has been dropped. Could it be that the need to agree post-Brexit trade agreements with India and Pakistan made

---

27 [1961] AC 727.

28 For further discussion, see the scholarly Dymond's *Death Duties*, (15th ed., 1973), pp 1286–1312; Parkinson, "A disposition or devolution regulated by the law of some part of Great Britain: the Proviso to the Limitation of Taxing Rights in the IHT Treaties with France, India and Pakistan" [2011] PCB 126. See too 73.7.3 (Légitime and trust proper law).

29 Law Society, Response to HM Treasury consultation on reforms to the taxation of non-domiciles (2015)

<https://www.lawsociety.org.uk/policy-campaigns/consultation-responses/documents/hmt-reform-to-non-domiciles-november-2015/>

this plan inopportune? No doubt HMRC would be pleased to respond to enquiries from their customers.

## CHAPTER ONE HUNDRED AND TEN

# IHT DTA: NETHERLANDS

### 110.1 Netherlands IHT DTA

#### *Cross references*

The following topics are considered elsewhere:

108.1 (IHT double taxation treaties) - Introduction

108.6 (Claims for IHT DTA reliefs)

108.7 (Transferable nil rate bands and IHT DT reliefs)

### **110.1 Netherlands IHT DTA**

This chapter discusses the Netherlands IHT treaty.<sup>1</sup>

I comment only on the UK aspects of the DTA. Netherlands advice will be needed where the DTA applies.

### **110.2 Scope**

Article 1 Netherlands IHT DTA provides:

This Convention shall apply:

- (a) to estates of and gifts made by persons domiciled in one or both of the States at their death or at the time of the gift, as the case may be;
- (b) to property comprised in settlements made by persons

---

<sup>1</sup> [http://www.legislation.gov.uk/ukxi/1980/706/pdfs/ukxi\\_19800706\\_en.pdf](http://www.legislation.gov.uk/ukxi/1980/706/pdfs/ukxi_19800706_en.pdf)

For some reason DTAs do not have short titles. I use the expression “**Netherlands IHT DTA**” to refer to the DTA made 1979 and headed:

“Convention between the United Kingdom of Great Britain and Northern Ireland and the Kingdom of the Netherlands for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Estates of Deceased Persons and Inheritances and on Gifts.”

domiciled in either State at the time when the settlement was made.

### 110.3 Taxes covered

Article 2(1) Netherlands IHT DTA provides:

The taxes which are the subject of this Convention are:

- (a) in the UK, the capital transfer tax and the inheritance tax (hereinafter referred to as “UK tax”);
- (b) in the Netherlands, the succession duty (het recht van successie), the gift duty (het recht van schenking) and the transfer duty (het recht van overgang) (hereinafter referred to as “Netherlands tax”).

Article 2(2) Netherlands IHT DTA extends the DTA to substantially similar taxes. The wording follows the OECD model.<sup>2</sup>

### 110.4 Definitions

The Netherlands IHT DTA provides commonsense definitions of the following terms, which are not discussed here: The Netherlands; UK; Competent Authority; State.

Article 3(1) Netherlands IHT DTA provides:

- (e) the term “tax” means United Kingdom tax or Netherlands tax as the context requires;
- (f) the term “person” includes an individual, a company and any other body of persons;

Article 3(2) Netherlands IHT DTA gives terms not otherwise defined their domestic law meanings, following OECD Model wording as it stood at the time of the DTA. See 103.11 (Undefined treaty terms).

#### 110.4.1 *National*

Article 3(1) Netherlands IHT DTA provides:

- (d) the term “national” means:
  - (i) in relation to the UK, any British citizen or any British subject not possessing the citizenship of any other

---

<sup>2</sup> See 108.4 (IHT DTAs: Taxes covered).

Commonwealth country or territory provided he had the right of abode in the UK at the time of the death or gift or any other material time;

- (ii) in relation to the Netherlands, any individual possessing the Netherlands nationality.

#### 110.4.2 *Gift*

Article 3(1) Netherlands IHT DTA provides:

- (h) the term “gift” means in the UK a transfer of value other than one made on death and the term “donor” shall be construed accordingly.

### 110.5 Treaty-Domicile

Article 4 Netherlands IHT DTA provides:

For the purposes of this Convention, a person was domiciled:

- (a) in the UK, if he was domicile in the UK in accordance with its law or is treated as so domiciled for the purposes of a tax which is the subject of this Convention;
- (b) in the Netherlands, if he was a resident of or is treated as a resident of the Netherlands for the purposes of a tax which is the subject of this Convention;

provided that a person shall not be deemed to be domiciled in one of the States if on the death or gift that State imposes tax only by reference to property situated in that State.

#### 110.5.1 *Tie-breakers*

Article 4 Netherlands IHT DTA provides:

(2) Where by reason of the provisions of paragraph (1) of this Article an individual was domiciled in both States, then, subject to the provisions of paragraph (3) of this Article, his status shall be determined as follows:

- (a) he shall be deemed to be domiciled in the State in which he had a permanent home available to him; if he had a permanent home available to him in both States, the domicile shall be deemed to be in the State with which his personal and economic relations were closer (centre of vital interests);
- (b) if the State in which he had his centre of vital interests cannot be determined, or if he had not a permanent home available to

- him in either State, the domicile shall be deemed to be in the State in which he had an habitual abode;
- (c) if he had an habitual abode in both States or in neither of them, the domicile shall be deemed to be in the State of which he was a national;
  - (d) if he was a national of both States or of neither of them, the competent authorities of the States shall settle the question by mutual agreement.

This is standard OECD Model wording.<sup>3</sup>

(3) Notwithstanding the provisions of paragraph (2) of this Article, where by reason of the provisions of paragraph (1) of this Article an individual was at the time his domicile falls to be determined domiciled in both States and

- (a) was at that time a national of one of the States but not of the other, and
  - (b) was resident in that other State but had been so resident for less than seven years out of ten years immediately preceding that time, and
  - (c) did not intend to remain indefinitely in that other State,
- then he shall be deemed to be domiciled at that time in the State of which he was a national.

For the purposes of this paragraph

- [A] where that other State is the UK the question whether a person was resident there shall be determined as for income tax purposes, but without regard to any dwelling-house available to him in the UK for his use<sup>4</sup> and
- [B] “years” shall be taken to mean income tax years of assessment ending with the year of assessment in which death or the making of a gift occurs.

## 110.6 Immovable property

Article 5 (more or less) follows the OECD IHT Model. Article 5 Netherlands IHT DTA provides:

---

3 See 8.11 (Tie-breaker tests: Individuals).

4 This sentence is based on wording formerly in the IHT deemed domicile rule, see 4.8.2 (“Residence” for 15-year rule). It is no longer appropriate, following the introduction of the statutory residence test, but in practice the point will only rarely arise.

(1) Immovable property may be taxed in the State in which such property is situated.

Article 5(2) Netherlands IHT DTA defines “immovable property” in (more or less) OECD Model form:<sup>5</sup>

(2) The term “immovable property” shall have the meaning it has under the law of the State in which the property in question is situated. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, an interest in the proceeds of sale of land which is held on trust for sale, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships, boats, aircraft and debts secured by mortgage or otherwise shall not be regarded as immovable property.

(3) The provisions of paragraphs (1) and (2) of this Article shall also apply to immovable property of an enterprise and to immovable property used for the performance of independent personal services.

## **110.7 Business property**

Article 6 Netherlands IHT DTA provides:

(1) Except for assets referred to in Articles 5 and 7 [immovable property/ships/aircraft], assets forming part of the business property of a permanent establishment of an enterprise may be taxed in the State in which the permanent establishment is situated.

(2) For the purposes of this Convention, the term “permanent establishment” means a fixed place of business through which the business of an enterprise is wholly or partly carried on.

(3) The term “permanent establishment” includes especially:

- (a) a place of management,
- (b) a branch,
- (c) an office,
- (d) a factory,
- (e) a workshop and
- (f) a mine, an oil or gas well, a quarry, or any other place of

---

<sup>5</sup> See 23.7.1 (“Immovable property”).

extraction of natural resources.

(4) A building site or construction or installation project constitutes a permanent establishment only if it lasts for more than twelve months.

(5) Notwithstanding the preceding provisions of this Article, the term “permanent establishment” shall be deemed not to include:

- (a) the use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise;
- (b) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;
- (c) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;
- (d) the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise;
- (e) the maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character;
- (f) the maintenance of a fixed place of business solely for any combination of activities mentioned in sub-paragraphs (a) to (e) of this paragraph provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.

(6) Except for assets described in Article 5, assets pertaining to a fixed base used for the performance of independent personal services may be taxed in the State in which the fixed base is situated.

(7) The provisions of paragraphs (1) and (6) of this Article shall apply to an interest in a partnership if an enterprise is carried on, or independent professional services are performed, by the partnership.

## **110.8 Ships and aircraft**

Article 7 Netherlands IHT DTA provides:

Ships and aircraft operated in international traffic and boats engaged in inland waterways transport, and movable property pertaining to the operation of such ships, aircraft and boats, may be taxed in the State in which the place of effective management of the enterprise is situated.

## **110.9 Other property**

Article 8 Netherlands IHT DTA provides the main treaty exemption:

Subject to the provisions of Article 11 property wherever situated and not dealt with in Articles 5, 6 and 7 [immovable/business property/ships/aircraft] shall be taxable only in the State in which the deceased or the donor was domiciled at the time of the death or gift.

### **110.10 Conflict on property nature**

Article 9 Netherlands IHT DTA provides:

If,

[1] by the law of one of the States, any right or interest is regarded as property not falling within any of Articles 5, 6 and 7 [immovable/business property/ships/aircraft],

[2] but, by the law of the other State, that right or interest is regarded as property falling within those Articles,

then that right or interest shall for the purposes of this Convention be regarded as property falling within those Articles.

This is not a standard provision. I wonder if it is directed at some particular point of conflict.

### **110.11 Deductions**

Article 10 Netherlands IHT DTA provides:

In determining the amount on which tax is to be computed deductions shall be allowed in accordance with the law of the State in which the tax is imposed.

This article is found in several IHT DTAs; for discussion, see 108.8 (Deductions for DTA purposes).

### **110.12 Limitations on relief**

Article 11 Netherlands IHT DTA provides:

(1) If the deceased or the donor was

[a] domiciled in one of the States at the time of the death or gift and

[b] was at that time a national of the other State and

[c] had been domiciled in that other State at any time within the ten years immediately preceding the death or gift,

that other State may impose tax according to its domestic law.

### 110.13 Settled property

Article 11 Netherlands IHT DTA provides:

(2) The UK may impose tax by reference to property comprised in a settlement unless at the time when the settlement was made the settlor was:

- (a) domiciled in the Netherlands; and
- (b) not a national of the UK who had been domiciled in the UK at any time within the immediately preceding ten years.

### 110.14 Requirement to pay foreign tax

Article 11 Netherlands IHT DTA provides:

(3) If

- [a] under the provisions of Article 8 any property would be taxable only in the Netherlands and
- [b] the deceased or donor is either a national of the UK and not a national of the Netherlands or is treated for the purposes of Netherlands tax as a resident of the Netherlands under its unilateral 10-year rule,

the UK may also impose tax, according to its law, by reference to such property, if the competent authority of the Netherlands notifies the competent authority of the UK that the Netherlands tax chargeable with respect to such property has not been paid (otherwise than as a result of a specific exemption, deduction, credit or allowance).

The IHT Manual provides:

**HTM27171: certificate of tax paid: Netherlands** [Sep 2018]

Where the transferor was, according to the Double Taxation Convention:

- domiciled in the Netherlands, and
- had not been domiciled in the UK within the 10 years of the transfer.

the UK must waive its taxing rights on any asset the transferor held that was within Article 8, even if it was situated in the UK. You should consult Technical about any proof of taxation in the Netherlands.

When a double taxation credit is due under Article 13, you may allow the amount claimed in IHT400 provisionally. But the case should not be closed until the payment of Dutch succession duty has been certified

by the Dutch authorities. There is no special form for a certificate. You should tell the taxpayer or agent to obtain a statement from the Dutch authorities showing:

- (a) the total tax attributable to the property in question (excluding any interest and penalties)
- (b) the property and its value on which that tax was charged
- (c) the date of payment of that tax
- (d) that the tax was computed in accordance with the Convention
- (e) that the tax is final
- (f) that no application for a refund of tax is now pending or authorised and that, if a refund is made, due notice will be given to this Office.

The Dutch authorities will send the certificate in the form of a letter direct to us.

If you have any difficulty calculating the tax attributable to property, after you have received the certificate, you should ask for advice from Technical.

The credit given cannot be more than the amount of UK Inheritance tax payable on the property concerned.

#### **Certificate of IHT paid**

A certificate of IHT paid will also be a letter that we will issue if the taxpayer or agent requests one. It is prepared by Technical and sent to the Dutch authorities, with a copy to the applicant. If there is any adjustment of tax after a certificate has been issued, refer the file back to Technical to issue an amending certificate.

You should also refer the file to Technical if the taxpayer or agent asks for proof that the assets are subject to Inheritance tax in the UK in connection with Article 8.

### **110.15 Spouse exemptions**

Article 12 Netherlands IHT DTA provides:

- (1) Where
  - [a] property other than community property passes from a deceased person who was domiciled in the Netherlands to his or her spouse, and
  - [b] that property may be taxed in the UK solely by reason of Article 5, 6 or 7, and
  - [c] the spouse was not domiciled in the UK but the transfer would have been wholly exempt if the spouse had been so domiciled,

the UK shall exempt the property from tax to the extent of not less than 50 per cent of the value transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those for transfers between spouses.

(2) Where

- [a] property other than community property passes from a deceased person who was domiciled in the UK to his or her spouse and
- [b] that property may be taxed in the Netherlands solely by reason of Article 5, 6 or 7,

the Netherlands shall exempt from tax such property to the extent that 50 per cent of its value exceeds the amount of the personal exemption which under the law of the Netherlands is given to a surviving spouse. If however the deceased person was a resident of the Netherlands under its domestic law the preceding sentence shall apply only to the extent that it is shown that the tax so computed is not less than the tax which would have been imposed if the deceased person had been domiciled in the Netherlands for the purposes of this Convention.

(3) Paragraph (2) shall not apply if at the time of death the UK under its domestic law taxes property passing from a deceased person to his or her spouse, who has the same domicile as that of the deceased person, to the extent of more than 50 per cent of its value.

## **110.16 Foreign tax credit**

Article 13 Netherlands IHT DTA provides:

(1) Where one of the States imposes tax in connection with any event by reference to any property which the other State may tax in accordance with Article 5, 6 or 7, the former State shall allow against so much of its tax (as otherwise computed) as is attributable to such property a credit (not exceeding the amount of tax so attributable) equal to so much of the tax imposed in the other State in connection with the same event as is attributable to such property.

(2) Subject to paragraph (3) of this Article, where both States impose tax in connection with any event by reference to any property not being property referred to in Article 5, 6 or 7, the State which imposes tax by virtue of paragraph (1) of Article 11, shall allow against so much of its tax (as otherwise computed) as is attributable to such property a credit (not exceeding the amount of the tax so attributable) equal to so much of the tax imposed in the other State by virtue of Article 8 in connection with the same event as is attributable to such property.

(3) Where by virtue of paragraph (2) of Article 11 the UK imposes tax in connection with any event by reference to any property comprised in a settlement not being property referred to in Article 5, 6 or 7, the UK shall allow against so much of its tax (as otherwise computed) as is attributable to such property a credit (not exceeding the amount of the tax so attributable to such property a credit (not exceeding the amount of the tax so attributable) equal to so much of the tax imposed in the Netherlands in connection with the same event as is attributable to such property.

(4) For the purposes of this Article,

- (a) the tax attributable to any property imposed in one of the States is tax as reduced by the amount of any credit allowed by that State in respect of tax attributable to that property imposed in a territory other than one of the States;
- (b) where tax is imposed on the death of a person by reason of a gift made [within 7 years] preceding the death, whether in consequence of the fact that the gift is deemed to be derived from this estate or otherwise with respect to that gift, that tax shall be treated as if it were imposed in connection with that gift;
- (c) tax is imposed in one of the States if it is chargeable under the law of that State and duly paid.

## 110.17 Time limit

Article 14 Netherlands IHT DTA provides:

### Time Limit

Any claim for a credit or for a repayment of tax founded on the provisions of this Convention shall be made within six years from the date of the event giving rise to a liability to tax or, where later, within one year from the last date on which tax for which credit is given is due.

## CHAPTER ONE HUNDRED AND ELEVEN

### IHT DTA: SOUTH AFRICA

#### 111.1 Introduction

#### **111.1 Introduction**

This chapter considers the IHT Treaty with South Africa, which I call “RSA IHT DTA”.

I comment only on the UK aspects of the DTA. South African advice will be needed where the DTA applies.

John Avery Jones explains the background:<sup>1</sup>

The new South African convention relating to estate and gift taxes solves in a neat way the difficulties faced when one country taxes on the basis of domicile and the other on the basis of ordinary residence. The OECD Model singularly fails to do this in applying as the first test in the case of dual domicile, the country in which the taxpayer has a permanent home. A taxpayer from the “domicile” country acquiring a permanent home in the “ordinary residence” country will therefore under the Model shed his original domicile, while a taxpayer from the ordinary residence country is unlikely to acquire a domicile in the domicile country, and dual domicile will not therefore arise. Either way the domicile country loses.

The negotiators have solved this by applying a prior rule under which a person with UK, but not South African, nationality can be resident or ordinarily resident in South Africa for up to six out of the 10 tax years preceding the time of charge, without being considered to have a domicile in South Africa for the purposes of the convention. This

---

<sup>1</sup> See Avery Jones, “The Estate and Gifts Tax Convention with South Africa” [1979] BTR 1. It is remarkable, almost unheard of, that tax scholarship more than 40 years old remains of current significance. But such is the pace of change in the area of IHT DTAs.

provision is reciprocal in form but less likely to arise the other way round because either the visitor will not acquire a UK domicile or will not keep his South African ordinary residence. The same tests as in the OECD Model then apply only after the seven years or in the case of nationality in neither or both countries. A visitor from the UK, so long as he has UK nationality but not South African nationality, can therefore live in South Africa until he has been resident for seven tax years with immunity from South African gift and death duties, except on assets which South Africa can tax on the basis of situs.

When the seven years is reached he will, assuming he retains his UK domicile, have dual domicile under internal law which is solved for the purposes of the convention by applying the OECD Model tests in order. Normally he will have a permanent home in South Africa only which gives South Africa by the primary right to tax his world property, other than that which the UK can tax on the basis of situs under the conception: immovable property, permanent establishments, ships and aircraft, shares, debentures, and unit trusts. However, so long as he had a convention domicile within the UK during the previous 10 years the UK has a secondary right to tax his world assets after giving credit for the South African tax.<sup>2</sup> ...

If the taxpayer had emigrated to South Africa and therefore in law shed his UK domicile immediately, the UK would claim deemed domicile for three years,<sup>3</sup> which, coupled with the seven out of 10 years rule, would make him remain domiciled in the UK for three years for the purposes of the convention, assuming that he had UK, but not South African, nationality. After that he would no longer have a double domicile and South Africa has taxing rights. The UK would theoretically have a secondary taxing right under the convention because of his domicile there within the 10 previous years. But there is no internal law permitting a charge, except on the basis of situs where the convention would not otherwise allow a charge, on an insurance policy for example. In relation to settlements, where the settlor had dual domicile when the settlement was made, but a convention domicile at that time in South Africa, the UK will not charge unless he had a convention domicile

- 
- 2 Footnote original: Arts. 5(1) and 12(2). This seems to be based on the proposal in para. 31 of the commentary on OECD Model Art. 10 but without using nationality as a test.
  - 3 Footnote original: Under FA 1975, s.45(1)(a). The convention prohibits the extension of this period and therefore para (b) is inapplicable: Art. 4(4).

within the UK during the 10 previous years, which again means applying the OECD Model tests over this period.<sup>4</sup> In cases where the UK can charge, that is to say where the settlor did have a UK convention domicile within the previous 10 years, or a convention domicile in the UK when the settlement was made, South Africa has a primary right to charge where the person with an interest in possession is domiciled (for the purposes of the convention) in South Africa at the date of charge, and the UK would have a secondary taxing right.<sup>5</sup> In cases where this is not applicable, either because it is a discretionary trust or the person with an interest in possession is not domiciled for the purpose of the convention in South Africa, the UK would charge under internal law.

These provisions have an interesting effect in relation to new arrivals from South Africa who might be interested in making a settlement while still domiciled in South Africa which will therefore be outside the UK charge to capital transfer tax. Assuming such a person has South African, but not UK, nationality and still remains ordinarily resident in South Africa he will have a convention in South Africa after arrival in the UK for up to seven tax years, although it is unlikely that ordinary residence in South Africa will last that long. The convention prohibits the UK from charging tax under such a settlement, assuming that there is no question of his having a UK convention domicile within the previous 10 years. It seems that settlements can be made in such a case even after arrival in the UK.

## **111.2 Scope**

Article 1 RSA IHT DTA provides:

This Convention shall apply to any person who is within the scope of a tax which is the subject of this Convention.

## **111.3 Taxes covered**

Article 2 RSA IHT DTA provides:

- (1) The taxes which are the subject of this Convention are--
  - (a) in the UK, the inheritance tax;
  - (b) in South Africa, the estate duty and the donations tax.

---

4 Footnote original: Art. 5(2).

5 Footnote original: Art. 12(3).

Article 2(2) USA IHT DTA extends the DTA to substantially similar taxes. The wording follows the OECD model.<sup>6</sup>

#### **111.4 Definitions**

The Netherlands IHT DTA provides commonsense definitions of the following terms, which are not discussed here: The Netherlands; UK; Competent Authority; Contracting State.

Article 3(2) Netherlands IHT DTA gives terms not otherwise defined their domestic law meanings, following OECD Model wording as it stood at the time of the DTA. See 103.11 (Undefined treaty terms).

Article 3 RSA IHT DTA provides:

- (1) In this Convention, unless the context otherwise requires--
  - (c) the term "nationals" means--
    - (i) in relation to the UK, any citizen of the UK and Colonies, or any British subject not possessing that citizenship or the citizenship of any other Commonwealth country or territory, provided in either case he had the right of abode in the UK at the time of the death or transfer or other material time;
    - (ii) in relation to South Africa, any citizen of South Africa;
  - (d) the term "tax" means--
    - (i) the inheritance tax imposed in the UK, or
    - (ii) the estate duty or the donations tax imposed in South Africa, or
    - (iii) any other tax imposed by a Contracting State to which this Convention applies by virtue of the provisions of paragraph (1) of Article 2, as the context requires; ...
  - (g) the term "transfer" includes, in the case of South Africa, a donation and the term "transferor" shall be construed accordingly.

#### **111.5 Treaty-domicile**

Article 4 RSA IHT DTA provides:

- (1) For the purposes of this Convention an individual was domiciled--
  - (a) in the UK if

---

<sup>6</sup> See 108.4 (IHT DTAs: Taxes covered).

- [i] he was domiciled in the UK in accordance with the law of the UK or
  - [ii] is treated as so domiciled for the purposes of a tax which is the subject of this Convention;
- (b) in South Africa if he was ordinarily resident in South Africa.

Article 4 RSA IHT DTA then sets out two tie-breakers:

(2) Subject to the provisions of paragraph (4) of this Article, where by reason of the provisions of paragraph (1) of this Article an individual was at any time domiciled in both Contracting States, and

- (a) was a national of the UK but not of South Africa, and
- (b) had not been resident or ordinarily resident in South Africa in seven or more of the ten income tax years of assessment immediately preceding that time,

then he shall be deemed to be domiciled at that time in the UK.

(3) Subject to the provisions of paragraph (4) of this Article, where by reason of the provisions of paragraph (1) of this Article an individual was at any time domiciled in both Contracting States, and

- (a) was a national of South Africa but not of the UK, and
- (b) had not been resident or ordinarily resident in the UK in seven or more of the ten income tax years of assessment ending with the year of assessment in which that time falls,

then he shall be deemed to be domiciled at that time in South Africa. For the purposes of this paragraph the question whether an individual was resident or ordinarily resident in the UK shall be determined as for the purposes of income tax, but without regard to any dwelling-house available in the UK for his use.

(4) An individual shall not, by virtue of paragraph (2) or (3) of this Article, be deemed to be domiciled at any time in a Contracting State if, under the law of that Contracting State other than its law relating to a tax which is the subject of this Convention, he had ceased to be domiciled in that Contracting State more than three years before that time.

If these tie-breakers fail to break the tie, then standard form OECD model tie-breakers apply.<sup>7</sup> Article 4 RSA IHT DTA provides:

- (5) Where by reason of the provisions of paragraph (1) of this Article,

---

<sup>7</sup> See 8.11 (Tie-breaker tests: Individuals).

an individual was domiciled in both Contracting States, then, subject to the provisions of paragraphs (2), (3) and (4) of this Article, his status shall be determined as follows--

- (a) he shall be deemed to be domiciled in the Contracting State in which he had a permanent home available to him. If he had a permanent home available to him in both Contracting States, the domicile shall be deemed to be in the Contracting State with which his personal and economic relations were closer (centre of vital interests);
- (b) if the Contracting State in which he had his centre of vital interests cannot be determined, or if he had not a permanent home available to him in either Contracting State, the domicile shall be deemed to be in the Contracting State in which he had an habitual abode;
- (c) if he had an habitual abode in both Contracting States or in neither of them, the domicile shall be deemed to be in the Contracting State of which he was a national; and
- (d) if he was a national of both Contracting States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

## **111.6 Treaty reliefs**

### *111.6.1 Non-settled property*

Article 5 RSA IHT DTA provides:

(1) Subject to the provisions of Articles 6, 7, 8 and 9 and the following paragraphs of this Article, if the deceased or the transferor was domiciled in, one of the Contracting States at the time of the death or transfer, property shall not be taxable in the other Contracting State unless he had been domiciled in the other Contracting State within the ten years immediately preceding the death or transfer.

The four exceptions referred to are:

<b>Article</b>	<b>Topic</b>	<b>See para</b>
6	Immovable property	111.8
7	Business property	111.9
8	Ships/aircraft	111.10
9	Shares/debentures/unit trusts	111.11

### *111.6.2 Settled property*

Article 5 RSA IHT DTA provides:

- (2) [a] Paragraph (1) of this Article shall not apply in the UK to property comprised in a settlement;
- [b] but, subject to the provisions of Articles 6, 7, 8 and 9, such property shall not be taxable in the UK if at the time when the settlement was made
  - [i] the settlor was domiciled in South Africa and
  - [ii] had not been domiciled in the UK within the immediately preceding ten years.

### **111.7 Requirement to pay foreign tax**

Article 5 RSA IHT DTA provides:

- (3) If by reason of paragraph (1) of this Article any property would be taxable only in one Contracting State and tax, though chargeable, is not paid (otherwise than as a result of a specific exemption, deduction, credit or allowance) in that Contracting State, tax may be imposed by reference to that property in the other Contracting State notwithstanding that paragraph.

### **111.8 Immovable property**

Article 6 (more or less) follows the OECD IHT Model. Article 6 RSA IHT DTA provides:

- (1) Immovable property may be taxed in the Contracting State in which such property is situated.

Article 6(2) RSA IHT DTA defines “immovable property” in (more or less) OECD Model form:<sup>8</sup>

- (2) The term "immovable property" shall have the meaning which it has under the law of the Contracting State in which the property in question is situated provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, usufruct of immovable property and rights to variable or fixed payments as

---

<sup>8</sup> See 23.7.1 (“Immovable property”).

consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships, boats and aircraft shall not be regarded as immovable property.

(3) The provisions of paragraphs (1) and (2) of this Article shall also apply to immovable property of an enterprise and to immovable property used for the performance of independent personal services.

## **111.9 Business property**

Article 7 RSA IHT DTA provides:

(1) Except for assets referred to in Articles 6, 8 and 9, assets forming part of the business property of a permanent establishment of an enterprise may be taxed in the Contracting State in which the permanent establishment is situated.

(2) --

- (a) For the purposes of this Convention, the term "permanent establishment" means a fixed place of business through which the business of an enterprise is wholly or partly carried on.
- (b) The term "permanent establishment" includes especially--
  - (i) a place of management;
  - (ii) a branch;
  - (iii) an office;
  - (iv) a factory;
  - (v) a workshop;
  - (vi) a mine, an oil or gas well, a quarry, or any other place of extraction of natural resources; and
  - (vii) a building site or construction or installation project which exists for more than 12 months.
- (c) Notwithstanding the preceding provisions of this paragraph, the term "permanent establishment" shall be deemed not to include--
  - (i) the use of facilities solely for the purpose of storage, display, or delivery of goods or merchandise belonging to the enterprise;
  - (ii) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;
  - (iii) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;

- (iv) the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise;
  - (v) the maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character; or
  - (vi) the maintenance of a fixed place of business solely for any combination of activities mentioned in (i) to (v) of this sub-paragraph provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.
- (d) Notwithstanding the provisions of sub-paragraphs (a) and (b), where a person--other than an agent of an independent status to whom sub-paragraph (e) applies--is acting on behalf of an enterprise and has, and habitually exercises in a Contracting State, an authority to conclude contracts in the name of the enterprise, that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in sub-paragraph (c) which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that sub-paragraph.
- (e) An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.
- (f) The fact that a company which is a resident of a Contracting State controls or is controlled by a company which is a resident of the other Contracting State, or which carries on business in that other State (whether through a permanent establishment or otherwise), shall not of itself constitute either company a permanent establishment of the other.
- (3) Except for assets described in Article 6, assets pertaining to a fixed base used for the performance of independent personal services may be taxed in the Contracting State in which the fixed base is situated.

### **111.10 Ships and aircraft**

Article 8 RSA IHT DTA provides:

Ships and aircraft operated in international traffic and movable property pertaining to the operation of such ships and aircraft may be taxed in the Contracting State in which the place of effective management of the enterprise is situated.

### **111.11 Shares/debentures/unit trusts**

Article 9 RSA IHT DTA provides:

Property consisting of--

- (a) shares, stock, debentures and debenture stock issued by companies incorporated in one of the Contracting States (including any such property falling within the provisions of Article 7 [business property]), and
  - (b) rights of unit holders in any unit trust scheme where the register of unit holders is kept in one of the Contracting States,
- may be taxed by that Contracting State.

### **111.12 Dual nature property**

Article 10 RSA IHT DTA provides:

(1) If the deceased or the transferor was domiciled in one of the Contracting States at the time of death or transfer, and

- (a) by the law of that Contracting State any right or interest is regarded as property not falling within Articles 6, 7, 8, or 9, but
- (b) by the law of the other Contracting State that right is regarded as property falling within those Articles.

then the Article of the Convention under which the property falls shall be determined by the law of the other Contracting State.

### **111.13 Dual situate property**

Article 10 RSA IHT DTA provides:

(2) If the deceased or the transferor was domiciled in neither Contracting State at the time of the death or transfer, and each Contracting State would regard any property as situated in its territory and in consequence tax would be imposed in both Contracting States, the competent authorities shall determine the situs of the property by mutual agreement.

### **111.14 Deductions/allowances/reliefs**

Article 11 RSA IHT DTA provides:

(1) In determining the amount on which tax is to be computed permitted deductions shall be allowed in accordance with the law in force in the territory in which the tax is imposed.

Article 11(1) is found in several IHT DTAs; for discussion, see 108.8 (Deductions for DTA purposes).

Article 11 RSA IHT DTA provides:

(2) Nothing contained in this Convention shall be construed as obliging either Contracting State to grant to individuals not domiciled in that Contracting State, or to the estates of such individuals, any of the personal allowances, reliefs, and reductions for tax purposes which are granted to individuals so domiciled, or to their estates.

### **111.15 Foreign tax credit**

Article 12 RSA IHT DTA provides:

(1) Where a Contracting State imposes tax in connection with any event by reference to any property which the other Contracting State may tax in accordance with Articles 6, 7, 8 or 9, the former Contracting State shall allow against so much of its tax (as otherwise computed) as is attributable to such property a credit (not exceeding the amount of tax so attributable) equal to so much of the tax imposed in the other Contracting State in connection with the same event as is attributable to such property.

(2) Subject to paragraph (3) of this Article, where a Contracting State imposes tax in connection with any event by reference to any property not referred to in paragraph (1) of this Article and the deceased or transferor was domiciled in the other Contracting State at the time of the death or transfer, the first-mentioned Contracting State shall allow against so much of its tax (as otherwise computed) as is attributable to such property a credit (not exceeding the amount of tax so attributable) equal to so much of the tax imposed in the other Contracting State in connection with same event as is attributable to such property.

(3) Where--

(a) under paragraph (2) of Article 5 the UK imposes tax in connection with any event by reference to any property which is not referred to in paragraph (1) of this Article and which is comprised in the settlement in which an interest in possession

subsists, and

- (b) at the time of the event giving rise to the liability to tax the individual entitled to that interest was domiciled in South Africa.

the UK shall allow against so much of its tax (as otherwise computed) as attributable to such property a credit (not exceeding the amount of tax so attributable) equal to so much of the tax imposed in South Africa in connection with the same event as attributable to such property.

(4) For the purposes of this Article--

- (a) the tax attributable to any property imposed in a Contracting State is tax as reduced by the amount of any credit imposed in a territory other than a Contracting State;
- (b) tax is imposed in a Contracting State if its is chargeable under the law of that Contracting State and duly paid; and
- (c) where tax is imposed on the death of a transferor by reason of a transfer made within the three years immediately preceding the death of a transfer in the transferor's estate or otherwise with respect of the transfer, that tax shall be treated as if it were imposed in connection with that transfer.

### **111.16 Time limit**

Article 13 RSA IHT DTA provides:

Any claim for a credit or for a repayment of tax founded on the provisions of this Convention shall be made within six years from the date of the event giving rise to a liability to tax or, where later, within one year from the last date on which tax for which credit is given is due. The competent authority of a Contracting State may, in appropriate circumstances, extend this time limit where the final determination or the payment of tax in the other Contracting State is delayed.

### **111.17 Non-discrimination**

Article 14 RSA IHT DTA provides:

- (1) The nationals of a Contracting State shall not be subjected in the other Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that other Contracting State in the same circumstances are or may be subjected.
- (2) The taxation on a permanent establishment which an enterprise of a Contracting State has in the other Contracting State shall not be less

favourably levied in that other Contracting State than the taxation levied on enterprises of that other Contracting State carrying on the same activities.

(3) Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of that first mentioned State are or may be subjected.

(4) Nothing contained in this Article shall be construed as restricting the provisions of paragraph (2) of Article 11.

(5) In this Article the term "taxation" means taxes covered by this Convention.

108.1 (IHT double taxation treaties) - Introduction

108.6 (Claims for IHT DTA reliefs)

108.7 (Transferable nil rate bands and IHT DT reliefs)

### 112.1 Swiss IHT treaty

This chapter considers the Swiss IHT Treaty.<sup>1</sup>

I comment only on the UK aspects of the treaty. Swiss advice will be needed in any case where the treaty applies.

The Swiss treaty does not follow the OECD IHT Model.<sup>2</sup> Avery Jones explains why:

Switzerland, or strictly the Swiss Cantons, tax worldwide assets if the deceased was resident but tax only immovable property on a situs basis if the deceased was not resident. The Swiss Cantons do not give any relief for double taxation except on foreign immovable property; the UK gives probably the most generous unilateral relief in the world. Thus in almost all cases the UK could only lose from the treaty and Switzerland could gain...

The result was that the normal [OECD Model] pattern applies only in

---

1 SI 1994/3214 <http://www.legislation.gov.uk/uksi/1994/3214/schedule/made>  
For some reason DTAs do not have short titles. I use the expression “**Swiss IHT DTA**” (or just DTA) to refer to the DTA made 1993 and headed: “The Convention between the UK of Great Britain and Northern Ireland and the Swiss Federation for the avoidance of double taxation with respect to taxes on estates and inheritances.”

2 See 108.3 (OECD IHT Model).

single domicile cases,<sup>3</sup> and a different approach is adopted in cases of dual domicile. Here it is the situs state which has primary taxation rights, and not the treaty domicile state.<sup>4</sup> The treaty domicile merely determines the extent of secondary taxing rights in the UK: in all cases if treaty domicile was in the UK but only on UK nationals domiciled in the UK within the previous five years if treaty domicile was in Switzerland.<sup>5</sup> Switzerland retains no secondary taxing rights.

The logic of the treaty seems to be that in a dual domicile case there would be unrestricted taxing rights under internal law and these should not be given up completely to the other state merely on account of the application of the tie-breaker rules. Thus the UK is giving up the minimum amount of tax in such a case. When the UK wins under the tie-breaker it gives up taxing rights only to the extent of giving credit for Swiss tax on Swiss property; when the UK loses under the tie-breaker it gives up nothing in relation to UK situs property, and in relation to other property it only retains the right to tax British nationals who have recently gone to live in Switzerland. From the point of view of Switzerland, Switzerland has no secondary taxing rights, so that it gives up all taxing rights over UK situs property if it wins under the tie-breaker, and over all non-Swiss situs property if it loses. ...

The worst feature of the treaty is the drafting ... First it deals with property situated in one of the states, with different primary taxing rights stated for single and dual domicile cases, to which there are three different UK secondary taxing rights. Next the primary taxing rights are set out for third state assets, again with a different rule for single and dual domicile cases, with a secondary taxing right for the UK, which is the same as one of the previous ones but set out again. By the end the reader is hopelessly lost. In tabular form it looks like this for property other than immovable property, business permanent establishments and ships and aircraft:

	<b>Sole domicile in UK</b>	<b>Sole domicile in Switzerland</b>
Property not covered by situs charges <sup>6</sup>	UK: sole taxing right	Switzerland: primary taxing right UK: secondary taxing right on

---

3 Footnote original: The UK has a secondary taxing right over shares in UK incorporated companies which is a reservation the UK made in the OECD Model estate tax treaty and sometimes succeeded in including in its treaties.

4 Footnote original: Art. 8(1)(a)(ii) and 8(1)(b)(ii).

5 Footnote original: Art 8(3), (4).

6 Immovable property, business establishments and ships/aircraft.

		shares in UK incorporated companies
	<b>Tie-breaker UK domicile</b>	<b>Tie-breaker Swiss domicile</b>
UK other property	UK: Sole taxing right Switzerland: none	UK Sole taxing right Switzerland: none
Swiss other property	Switzerland: primary taxing right UK: Secondary taxing right	Switzerland: primary taxing right UK: secondary taxing right if UK (only) national domiciled within the previous 5 years
Third state other property	UK: sole taxing right Switzerland: none	Switzerland: primary taxing right UK: secondary taxing right if UK (only) national domiciled within the previous 5 years <sup>7</sup>

## 112.2 Scope

Article 1 Swiss IHT DTA provides:

This Convention shall apply:

- (a) to estates and inheritances where the deceased was domiciled, at the time of his death, in one or both of the Contracting States; and
- (b) to property comprised in a settlement made by a person who was domiciled, at the time the settlement was made, in one or both of the Contracting States.

## 112.3 Taxes covered

Article 2(1) Swiss IHT DTA provides:

The existing taxes to which this Convention shall apply are:

- (a) in the UK, the inheritance tax, insofar as it applies to the estate of a deceased person (hereinafter referred to as “UK tax”);
- (b) in Switzerland, the cantonal and communal taxes imposed on estates and inheritances (hereinafter referred to as “Swiss tax”).

Thus there is no relief for IHT on lifetime gifts or for 10-year/exit charges on trusts. There is relief for trusts conferring an estate interest in

---

<sup>7</sup> Avery Jones, “The New Inheritance Double Taxation Agreement with Switzerland” [1995] BTR 1.

possession.

Article 2(2) Swiss IHT DTA extends the DTA to substantially similar taxes. The wording follows the OECD Model.<sup>8</sup>

## 112.4 Definitions

The DTA provides commonsense definitions of the following terms, which are not set out here: UK; Switzerland; Contracting State; Enterprise; Competent Authority; tax.

Article 3(2) Swiss IHT DTA gives terms not otherwise defined their domestic law meanings, following OECD Model wording, as it stood at the time of the DTA.<sup>9</sup>

### 112.4.1 “National”

Article 3(1)(g) Swiss IHT DTA provides:

- (g) the term “national” means:
  - (i) in relation to the UK, any British citizen or any British subject not possessing the citizenship of any other Commonwealth country or territory, provided he has the right of abode in the UK and any legal person, partnership, association or other entity deriving its status as such from the law in force in the UK;
  - (ii) in relation to Switzerland, any Swiss citizen and any legal person, partnership, association or other entity deriving its status as such from the law in force in Switzerland;

## 112.5 Treaty-domicile

Article 4 Swiss IHT DTA defines domicile for the purposes of the USA IHT DTA (“**treaty-domicile**”). The definition is non-standard.

### 112.5.1 UK domicile under art 4(1)

Article 4(1) Swiss IHT DTA provides:

- For the purposes of this Convention, a deceased person was domiciled:
- (a) in the UK if
    - [i] he was domiciled in the UK in accordance with the law of the UK or

---

<sup>8</sup> See 108.4 (IHT DTAs: Taxes covered).

<sup>9</sup> See 103.11 (Undefined treaty terms).

[ii] is treated as so domiciled for the purposes of a tax which is the subject of the Convention;

I refer to this as **“UK domiciled under art 4(1)”**.

This applies to a person who is:

- (1) UK-law domiciled or
- (2) Deemed domiciled under the main deemed domicile rules (the 15-year rule, 3-year rule and formerly-domiciled residents)

However spouse-election deemed domicile does not apply for this purpose.<sup>10</sup>

#### 112.5.2 Swiss domicile under art 4(1)

Article 4(1) Swiss IHT DTA provides:

For the purposes of this Convention, a deceased person was domiciled...

- (b) in Switzerland if he was domiciled or was resident in Switzerland in accordance with the law of Switzerland or if he was a Swiss national and Swiss civil law requires his succession to be ruled in Switzerland.

I refer to this as **“Swiss domiciled under art 4(1)”**.

This appears to mean that a person was domiciled in Switzerland if:

- [i] he was domiciled *in Switzerland in accordance with the law of Switzerland* or
- [ii] was resident in Switzerland in accordance with the law of Switzerland or
- [iii] if he was a Swiss national and Swiss civil law<sup>11</sup> requires his succession to be ruled in Switzerland.

That is, the phrase “and Swiss civil law requires his succession to be ruled in Switzerland” only govern [iii].

The definition of domiciled/resident in Switzerland in accordance with

<sup>10</sup> See 109.6.2 (Spouse-election domicile disappplied).

<sup>11</sup> The 1993 Protocol provides: “The reference to Swiss civil law concerns chapter 6 of the loi fédérale sur le droit international privé [Federal Code on Private International Law] of 18th December 1987.” An English translation is available on [https://www.hse.ru/data/2012/06/08/1252692468/SwissPIL%20%D0%B2%20%D1%80%D0%B5%D0%B4.%202007%20\(%D0%B0%D0%BD%D0%B3%D0%BB\).pdf](https://www.hse.ru/data/2012/06/08/1252692468/SwissPIL%20%D0%B2%20%D1%80%D0%B5%D0%B4.%202007%20(%D0%B0%D0%BD%D0%B3%D0%BB).pdf)

the law of Switzerland is crucial: this is a matter of Swiss law.<sup>12</sup>

### 112.5.3 *Taxation by situs only*

Article 4(1) Swiss IHT DTA continues:

However, a deceased person shall be deemed not to be domiciled in one of the States if that State imposes tax only by reference to property situated in that State.

This does not apply to the UK; it is relevant in Switzerland.

### 112.5.4 *Tie breaker*

Article 4(2) Swiss IHT DTA sets out a series of tie-breakers to deal with persons who under art 4(1) would be domiciled in both jurisdictions:

Where by reason of the provisions of paragraph (1) of this Article a deceased person was domiciled in both States, then, subject to the provisions of the attached Protocol, his status shall be determined as follows:

- (a) he shall be deemed to have been domiciled in the State in which he had a permanent home available to him; if he had a permanent home available to him in both States, he shall be deemed to have been domiciled in the State with which his personal and economic relations were closer (centre of vital interests);
- (b) if the State in which he had his centre of vital interests cannot be determined, or if he did not have a permanent home available to him in either State, he shall be deemed to have been domiciled in the State in which he had an habitual abode;
- (c) if he had an habitual abode in both States or in neither of them, he shall be deemed to have been domiciled in the State of which he was a national;
- (d) if he was a national of both States or of neither of them, the

---

12 See (1) Swiss Civil Code art. 22 -26 (domicile) An English translation is available on <https://www.admin.ch/opc/en/classified-compilation/19070042/index.html#a22>) (2) art.20 loi fédérale sur le droit international privé (Domicile, Residence, and Citizenship). (3) OECD “Switzerland - Information on residency for tax purposes” <https://www.oecd.org/tax/automatic-exchange/crs-implementation-and-assistance/tax-residency/Switzerland-Residency.pdf>

competent authorities of the Contracting States shall settle the question by mutual agreement.

This is standard OECD Model wording.<sup>13</sup>

### 112.5.5 *Temporary employment*

The 1993 Protocol provides:

(1) With reference to Article 4:

An individual

[i] who was a national of one of the Contracting States without being a national of the other Contracting State and

[ii] who was domiciled in the State of which he was a national immediately before coming to the other State

shall not be domiciled in the other State for the purposes of this Convention if:

(a) [i] he was temporarily present in that other State by reason only of his employment or

[ii] was a spouse or other dependent of a person temporarily in that other State for such purpose; and

(b) that individual had retained the domicile of the State of which he was a national; and

(c) that individual had no intention of becoming a permanent resident of the other Contracting State.

This could help a Swiss national who is a long term employee in the UK as it could confer better treaty relief even after they become deemed UK domiciled, but that will not often arise. It could similarly hinder a UK national who is an employee in Switzerland as it could prevent them claiming relief.

Avery Jones explains:

This is different from the equivalent provision in other treaties in that there is no time limit and it is restricted to employment. An unsatisfactory feature ... is that it is contained in a Protocol applying “with reference to article 4”, and provisions of the treaty make a distinction between a person who is domiciled solely in one or in both states by virtue of article 4(1) of the treaty.<sup>14</sup> Where this provision

<sup>13</sup> See 8.11 (Tie-breaker tests: Individuals).

<sup>14</sup> Arts. 8(1)(a), 8(1)(1)(b).

applies the person may well be domiciled in both states under that article, but it is presumed that, as the effect of this provision is to give a single domicile, on a purposive construction this is to be treated as overriding the literal effect of article 4(1).<sup>15</sup>

#### 112.5.6 *Types of domicile*

The Swiss IHT DTA distinguishes between:

- (1) “A person domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States”. I call that “**solely UK/Swiss domiciled**”.
- (2) “A person domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States”. I call that “**tie-breaker UK/Swiss domiciled**”. Someone who is tie-breaker Swiss domiciled is UK domiciled under art 4(1) but treaty-domiciled in Switzerland because of the tie-breaker clause in art 4(2).

### 112.6 **IHT exemptions**

There are special rules for immovable property and permanent establishments (articles 5 and 6 discussed below) and ships/aircraft (article 7, not discussed here).

Subject to that, Article 8 Swiss IHT DTA provides various exemptions for individuals, which depend on domicile and situs.

#### 112.6.1 *Situs rule*

The 1993 Protocol provides:

- (3) With reference to Article 8:

The situs of any property dealt with in that Article shall be determined by the law of the UK in effect at the date of entry into force of this Convention.

Avery Jones explains:

Given the importance given to situs it is surprising to find tucked away

---

15 Avery Jones, “The New Inheritance Double Taxation Agreement with Switzerland” [1995] BTR 1.

in the Protocol that this is to be determined by UK [sic ] law<sup>16</sup> in force at the date of the entry into force of the treaty. Since Swiss Cantons tax only immovable property of those resident outside the Canton presumably there is no reason for Swiss law to have any situs rules, so they had to borrow the UK's and hide their embarrassment by putting it in the Protocol. If there is a conflict over whether property falls within the property taxable on a situs basis, immovable property, business establishments and ships and aircraft, this is determined by the state of non-treaty domicile in the same way as our other treaties.<sup>17</sup> This is likely to occur in relation to the question whether partnerships, trusts and unadministered estates are transparent.<sup>18</sup>

## 112.7 Solely Swiss domicile

### 112.7.1 Swiss/UK property

Article 8 Swiss IHT DTA provides:

- (1) Subject to the following provisions of this Convention:
- (a) property
- [i] not dealt with in Articles 5, 6 and 7
  - [ii] which is situated in either Contracting State and
  - [iii] forms part of the estate of a person ... (i) domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States ... shall, subject to paragraph (2) of this Article, be taxable only in that latter Contracting State;

To this rule there are four exceptions. Firstly articles 5, 6, 7 (land, PEs, ships/ aircraft). Secondly, shares in UK incorporated companies, as art 8(2) provides:

Shares in a company incorporated in the UK which form part of the estate of a person domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in Switzerland at the time of his death may also be

---

16 Footnote original: Since English and Scots law could give a different answer, for example in relation to a specialty debt, the concept of which is unknown in Scotland, it is presumed that situs would be in practice be determined by the law of the applicable part of the UK. See 97.16.2 (Situs in Scots law).

17 Footnote original: Art. 10(1).

18 Avery Jones, "The New Inheritance Double Taxation Agreement with Switzerland" [1995] BTR 1.

taxed in the UK.

These are quite large exceptions, but this treaty exemption provides relief for:

- (1) Other UK situate property: eg UK situate loans, debentures, chattels, bank accounts
- (2) Sch A1 (de-excluded) property<sup>19</sup>

This could be particularly useful for UK situate chattels, residence-companies, and relevant (de-excluded) loans (in short, a loan to buy a UK residence).

### 112.7.2 *Non-UK/Non-Swiss property*

I refer to property outside the UK and Switzerland as “**third-country property**”.

Article 8 Swiss IHT DTA provides

- (1) Subject to the following provisions of this Convention...
  - (b) property not dealt with in Articles 5, 6 and 7 which is not situated in either Contracting State and forms part of the estate of a person:
    - (i) domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States shall be taxable only in that Contracting State;

Before 2017, art.8(1)(b)(i) is not relevant for IHT since non UK situate property of a solely Swiss domiciliary was excluded property.<sup>20</sup> But now the rule is be important for sch A1 property which is de-excluded under the IHT residential property code.

## 112.8 **Tie-breaker Swiss domicile**

### 112.8.1 *Swiss property*

Article 8(1) Swiss IHT DTA provides:

- (1) Subject to the following provisions of this Convention:
  - (a) property

---

19 See 78.2 (De-exclusion of sch A1 property) and 78.18 (DTA override).

20 Except residence-value property, see 78.2 (De-exclusion of sch A1 property) and 78.18 (DTA override).

- [i] not dealt with in Articles 5, 6 and 7
  - [ii] which is situated in either Contracting State and
  - [iii] forms part of the estate of a person ... (ii) domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States
- shall, subject to paragraph (3) of this Article, be taxable only in the Contracting State in which it is situated;

Thus in principle Swiss situate property of a tie-breaker Swiss domiciliary qualifies for treaty IHT exemption on death even though not of course excluded property (because the individual is actually UK domiciled or IHT deemed domiciled). However five wide exceptions greatly restrict the scope of the rule. The first four are the exceptions mentioned above: articles 5, 6, 7 and 8(2) (UK land, PEs, ships and aircraft, and shares in UK companies.) Lastly, article 8(3) provides:

Any property which is situated in Switzerland and which would be taxable only in Switzerland under paragraph (1)(a)(ii) of this Article may also be taxed in the UK if the deceased was:

- (a) by virtue of the provisions of paragraph (2) of Article 4 domiciled in the UK at the time of his death; or
- (b) by virtue of those provisions domiciled in Switzerland at the time of his death but:
  - (i) had been domiciled [ie treaty-domiciled] in the UK at any time within the five years preceding his death; and
  - (ii) was at that time a national of the UK without being a national of Switzerland.

Thus a person who is a UK national<sup>21</sup> cannot take advantage of this treaty IHT exemption until they have been treaty-domiciled in Switzerland for 5 years. A UK national cannot avoid IHT by becoming treaty-domiciled in Switzerland shortly before death. However a non-UK national who is actually UK domiciled or IHT deemed domiciled could in principle do so.

### 112.8.2 *Non-UK/Non-Swiss property*

I refer to property outside the UK and Switzerland as “**third-country property**”.

Article 8 Swiss IHT DTA provides

---

21 Unless also a Swiss national, ie a dual national.

- (1) Subject to the following provisions of this Convention...
  - (b) property not dealt with in Articles 5, 6 and 7 which is not situated in either Contracting State and forms part of the estate of a person ...
    - (ii) domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States shall, subject to paragraph (4) of this Article, be taxable only in the Contracting State in which, under paragraph (2) of Article 4, the deceased was domiciled at the time of his death.

In principle third-country property of a tie-breaker Swiss domiciliary qualifies for treaty IHT exemption on death even though not of course excluded property (because the individual is actually UK domiciled or deemed domiciled). However five wide exceptions greatly restrict the scope of the rule. The first four are the exceptions mentioned above: articles 5, 6, 7 and 8(2) (UK land, PEs, ships and aircraft, and shares in UK companies.) Lastly, article 8(4) Swiss IHT DTA provides a rule equivalent to article 8(3):

Any property which is not situated in either Contracting State and which would be taxable only in Switzerland under paragraph (1)(b)(ii) of this Article may also be taxed in the UK if the deceased:

- (a) had been domiciled [ie treaty-domiciled] in the UK at any time within the five years preceding his death; and
- (b) was at that time a national of the UK without being a national of Switzerland.

Thus a person who is a UK national<sup>22</sup> cannot take advantage of this treaty IHT exemption until they have been treaty-domiciled in Switzerland for 5 years. A UK national cannot avoid IHT by becoming treaty-domiciled in Switzerland shortly before death. However a non-UK national who is actually UK domiciled or deemed domiciled could in principle do so.

### **112.9 Extension of IHT spouse exemption**

Under domestic IHT law, the usual IHT spouse exemption may be restricted when the transferor is UK domiciled and the spouse is foreign

---

22 Unless also a Swiss national, ie a dual national.

domiciled.<sup>23</sup> Article 10(2) Swiss IHT DTA restricts this restriction:

Property which passes to the spouse from a deceased person who was domiciled in or a national of Switzerland and which may be taxed in the UK shall, where:

- (a) the spouse was not domiciled in the UK but the transfer would have been wholly exempt had the spouse been so domiciled, and
- (b) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention,

be exempt from tax in the UK to the extent of 50 per cent of the value transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those for transfers between spouses.

Civil partners are not mentioned (as the treaty was made before the introduction of civil partnerships). One might construe spouse widely, to include “civil partner”, particularly if Swiss tax law treats civil partners like spouses.

## 112.10 Immovable property

Article 5 (more or less) follows the OECD IHT Model.

Article 5(1) Swiss IHT DTA provides:

Immovable property which forms part of the estate of a person domiciled in a Contracting State and which is situated in the other Contracting State may be taxed in that other State.

Article 5(2) Swiss IHT DTA defines “immovable property” in (more or less) OECD Model form:<sup>24</sup>

- [a] The term “immovable property” shall have the meaning which it has under the law of the Contracting State in which the property in question is situated provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property.
- [b] The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed

---

23 See 89.2 (Restricted IHT spouse exemption).

24 See 23.7.1 (“Immovable property”).

property apply, an interest in the proceeds of sale of land which is held on trust for sale, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources;

[c] ships and aircraft shall not be regarded as immovable property.

Article 5(3) Swiss IHT DTA deals with the interaction of articles 5 (immovable property) and 6 (business property):

The provisions of paragraphs (1) and (2) of this Article shall also apply to immovable property of an enterprise and to immovable property used for the performance of professional services or other activities of an independent character.

Article 5 (more or less) follows the OECD IHT Model.

### **112.11 Business property**

Article 6(1) Swiss IHT DTA provides:

Except for assets referred to in Articles 5 and 7 and in paragraph (2) of Article 8, movable property of an enterprise which forms part of the estate of a person domiciled in a Contracting State which is the business property of a permanent establishment situated in the other Contracting State, may be taxed in that other State.

This (more or less) follows the OECD IHT Model.

I do not set out the lengthy provisions relating to permanent establishment, since this will rarely arise. They broadly follow the OECD IT/CG Model.

### **112.12 Other articles**

The following articles of the Swiss IHT DTA are standard form and not discussed here:

<b>Article</b>	<b>Topic</b>
11	Non-discrimination
12	Mutual agreement procedure
13	Exchange of information
14	Diplomatic and consular officials
15	Entry into force

16 Termination

## CHAPTER ONE HUNDRED AND THIRTEEN

# IHT DTA: USA

### 113.1 USA IHT treaty

#### *Cross references*

Issues which the USA IHT DTA has in common with other treaties are discussed elsewhere. See:

- 108.1 (IHT double taxation treaties) - Introduction
- 108.6 (Claims for IHT DTA reliefs)
- 108.7 (Transferable nil rate bands and IHT DT reliefs)
- 114.8 (USA IHT credit)

### **113.1 USA IHT treaty**

This chapter considers the USA IHT Treaty.<sup>1</sup>

I comment only on the UK aspects of the DTA. US advice will be needed where the DTA applies.

### **113.2 Scope**

Article 1 USA IHT DTA provides:

This Convention shall apply to any person who is within the scope of a tax which is the subject of this Convention.

Thus the DTA applies to trustees as well as to individuals, even if the trustees are not themselves US treaty-domiciled.

---

<sup>1</sup> [http://uniset.ca/misc/us-uk\\_esttax.html](http://uniset.ca/misc/us-uk_esttax.html)

For some reason DTAs do not have short titles. I use the expression “**USA IHT DTA**” to refer to the DTA made 1978 and headed: “the Convention between the Government of the USA and the Government of the UK for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on estates of deceased persons and on gifts”.

### 113.3 Taxes covered

Article 2(1) USA IHT DTA provides:

The existing taxes to which this Convention shall apply are:

- (a) in the US: the Federal gift tax and the Federal estate tax, including the tax on generation-skipping transfers; and
- (b) in the UK: the capital transfer tax.

Article 2(2) USA IHT DTA extends the DTA to substantially similar taxes. The wording follows the OECD model.<sup>2</sup>

#### 113.3.1 “Tax”

Article 3(1)(f) USA IHT DTA provides:

the term “tax” means:

- (i) the Federal gift tax or the Federal estate tax, including the tax on generation-skipping transfers, imposed in the US, or
- (ii) the capital transfer tax imposed in the UK, or
- (iii) any other tax imposed by a Contracting State to which this Convention applies by virtue of the provisions of para (2) of Article 2, as the context requires.

### 113.4 Definitions

The USA IHT DTA provides commonsense definitions of the following terms, which are not discussed here: US; UK; Competent Authority; Contracting State.

Article 3(2) USA IHT DTA gives terms not otherwise defined their domestic law meanings, following OECD Model wording as it stood at the time of the DTA. See 103.11 (Undefined treaty terms).

#### 113.4.1 “National”

Article 3(1)(e) USA IHT DTA provides:

the term “nationals” means:

- (i) in relation to the US, US citizens, and
- (ii) in relation to the UK any citizen of the UK and Colonies, or any British subject not possessing that citizenship or the

---

<sup>2</sup> See 108.4 (IHT DTAs: Taxes covered).

citizenship of any other Commonwealth country or territory, provided in either case he had the right of abode in the UK at the time of the death or a transfer.

#### 113.4.2 “Decedent”

The USA IHT DTA uses the term “decendent” which is an Americanism for “deceased”.

### 113.5 Treaty-domicile

Article 4 defines domicile for the purposes of the USA IHT DTA (“**treaty-domicile**”). The definition is distinctly non-standard.

#### 113.5.1 US domicile under art 4(1)

Article 4(1) USA IHT DTA provides:

For the purposes of this Convention an individual was domiciled:

(a) in the US:

[i] if he was a resident (domiciliary) thereof or

[ii] if he was a national thereof and had been a resident (domiciliary) thereof at any time during the preceding three years

I refer to this as “**US domiciled under art 4(1)**”.

The definition of “resident (domiciliary)” is crucial: this is a matter of USA law.<sup>3</sup>

#### 113.5.2 UK domicile under art 4(1)

Article 4(1) USA IHT DTA provides:

For the purposes of this Convention an individual was domiciled: ...

(b) in the UK:

[i] if he was domiciled in the UK in accordance with the law of the UK

---

3 The term “resident” for US estate tax is defined in Treasury Reg: 20.0-1(b). For gift tax see Treasury Reg: 25.2501-1(b). See <https://www.irs.gov/Individuals/International-Taxpayers/Determining-Alien-Tax-Status>

The concept of domicile varies from one US state to another, but I understand that it is broadly similar to UK law.

- [ii] or is treated as so domiciled for the purpose of a tax which is the subject of this Convention.

I refer to this as **“UK domiciled under art 4(1)”**.

This applies to a person who is:

- (1) UK-law domiciled or
- (2) Deemed domiciled under the main deemed domicile rules (from 2017/18, the 15-year rule, 3-year rule and formerly domiciled resident rule)

However spouse-election deemed domicile does not apply for this purpose.<sup>4</sup>

### 113.5.3 Tie-breakers

Next come a series of tie-breakers to deal with a person who under Art 4(1) would be both US and UK domiciled:

(2) Where by reason of the provisions of para (1) an individual was at any time domiciled in both Contracting States, and

- (a) was a national of the UK but not of the US, and
- (b) had not been resident in the US for Federal income tax purposes in seven or more of the ten taxable years ending with the year in which that time falls,

he shall be deemed to be domiciled in the UK at that time.

(3) Where by reason of the provisions of para (1) an individual was at any time domiciled in both Contracting States, and

- (a) was a national of the US but not of the UK, and
- (b) had not been resident in the UK in seven or more of the ten income tax years of assessment ending with the year in which that time falls,

he shall be deemed to be domiciled in the US at that time.

For the purposes of this paragraph, the question of whether a person was so resident shall be determined as for income tax purposes but without regard to any dwelling-house available to him in the UK for his use.<sup>5</sup>

---

<sup>4</sup> See 109.6.2 (Spouse-election domicile disapplied).

<sup>5</sup> The last sentence is based on wording formerly in the IHT deemed domicile rule, see 4.8.2 (“Residence” for 15-year rule). It is no longer appropriate, following the introduction of the statutory residence test, but in practice the point will only rarely arise.

Where these tie-breakers fail to break the tie, we turn to Art. 4(4):

Where by reason of the provisions of para (1) an individual was domiciled in both Contracting States, then, subject to the provisions of paras (2) and (3), his status shall be determined as follows:

- (a) the individual shall be deemed to be domiciled in the Contracting State in which he had a permanent home available to him. If he had a permanent home available to him in both Contracting States, or in neither Contracting State, he shall be deemed to be domiciled in the Contracting State with which his personal and economic relations were closest (centre of vital interests);
- (b) if the Contracting State in which the individual's centre of vital interests was located cannot be determined, he shall be deemed to be domiciled in the Contracting State in which he had an habitual abode;
- (c) if the individual had an habitual abode in both Contracting States or in neither of them, he shall be deemed to be domiciled in the Contracting State of which he was a national; and
- (d) if the individual was a national of both Contracting States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

This is OECD Model wording.<sup>6</sup>

#### 113.5.4 Resident of US possession

Article 4(5) USA IHT DTA relates to nationality and treaty-domicile:

An individual who was a resident (domiciliary) of a possession of the US and who became a citizen of the US solely by reason of his

- (a) being a citizen of such possession, or
- (b) birth or residence within such possession,

shall be considered as neither domiciled in nor a national of the US for the purposes of this Convention.

US Revenue Ruling 109<sup>7</sup> lists the following as possessions of the United States: American Samoa, Puerto Rico, the Northern Mariana Islands, the United States Virgin Islands, Guam, and some (more or less) uninhabited islands.<sup>8</sup>

---

<sup>6</sup> See 8.11 (Tie-breaker tests: Individuals).

<sup>7</sup> [https://www.irs.gov/irb/2003-42\\_IRB/ar06.html](https://www.irs.gov/irb/2003-42_IRB/ar06.html)

<sup>8</sup> Baker Island, Howland Island, Jarvis Island, Johnston Island, Kingman Reef, Midway Islands, Wake Islands.

### 113.6 IHT exemptions: Individuals

Article 5 USA IHT DTA provides two exemptions for individuals. Article 5(1) provides:

- (a) [i] Subject to the provisions of Articles 6 (Immovable Property (Real Property)) and 7 (Business Property of a Permanent Establishment and Assets Pertaining to a Fixed Base Used for the Performance of Independent Personal Services) and the following paragraphs of this Article,
  - [ii] if the decedent or transferor was domiciled in one of the Contracting States at the time of the death or transfer, property shall not be taxable in the other State.
- (b) Sub-para (a) shall not apply if at the time of the death or transfer the decedent or transferor was a national of that other State.

This can confer IHT exemption. To qualify for IHT exemption under Art. 5(1) the individual must be:

- (1) treaty-domiciled in the USA and
- (2) not a UK national.

In appropriate cases, UK nationals who are treaty-domiciled in the US may wish to consider renouncing UK citizenship, in order to qualify for this IHT exemption.

Article 5(2) USA IHT DTA provides:

Subject to the provisions of the said Articles 6 and 7, if at the time of the death or transfer the decedent or transferor

- [a] was domiciled in neither Contracting State and
  - [b] was a national of one Contracting State (but not of both),
- property which is taxable in the Contracting State of which he was a national shall not be taxable in the other Contracting State.

Can this confer IHT exemption? In order to need and qualify for IHT exemption under art. 5(2):

- (1) The individual must be:
  - (a) treaty-domiciled in neither state (so in particular not UK domiciled or deemed domiciled) and
  - (b) a US national and not a UK national
- (2) Property must be taxable in the UK (or no relief is needed) so it must be UK situate.

(3) The property must be taxable in the USA.

This is just possible. Condition (1) is possible because a US national is not necessarily treaty-domiciled in the USA. If such an individual held UK situate property, it would be exempt from IHT under Art. 5(2) provided it was taxable in the USA. In practice though this will be rare.

These two exemptions applies to charges on death and on lifetime gifts. The exemptions apply even to UK situate property (so long as the property is not land or a permanent establishment).

### 113.7 IHT exemptions: Trusts

Article 5(4) USA IHT DTA provides:

- [a] Paras (1) and (2) shall not apply in the UK to property comprised in a settlement;
- [b] but, subject to the provisions of the said Articles 6<sup>9</sup> and 7<sup>10</sup>, tax shall not be imposed in the UK on such property if at the time when the settlement was made the settlor was domiciled in the US and was not a national of the UK.

Article 5(4)[b] provides exemption from:

- (1) IHT 10 year and exit charges.
- (2) The charge on the death of an individual with an estate IIP.
- (3) GWR lifetime and death charges.

To qualify for IHT exemption under Art. 5(4) the settlor must at the relevant time be:

- (1) treaty-domiciled in the USA and
- (2) not a UK national.

The exemption applies even to UK situate assets (so long as the asset is not land or a permanent establishment).

It is an interesting question whether a common form grantor trust is a settlement for this purpose: it is (I think) a settlement for US purposes but not within the IHT definition.<sup>11</sup> It is also an interesting question whether or to what extent UK rules determining when a settlement is made (and

---

<sup>9</sup> See 113.10 (Immovable property).

<sup>10</sup> See 113.11 (Business property).

<sup>11</sup> See 86.5 (American revocable trusts (grantor trust)).

who is the settlor) apply for the purposes of this relief. Subject to context, UK courts should apply the UK rules. But the best interpretation is that which gives effect to the object of avoiding double taxation without giving rise to double non-taxation.

### 113.8 Requirement to pay US tax

Article 5(5) USA IHT DTA provides:

If by reason of the preceding paragraphs of this Article

- [a] any property would be taxable only in one Contracting State and
- [b] tax, though chargeable, is not paid (otherwise than as a result of a specific exemption, deduction, exclusion, credit or allowance) in that State,

tax may be imposed by reference to that property in the other Contracting State notwithstanding those paragraphs.

The IHT Manual provides:

#### **27177 Certification of disclosure and tax enforcement procedure with the USA [Sep 2018]**

Before we give up our right to tax assets under Article 5(1) of the double taxation convention (DTC) with the USA, we need the US authorities to certify that:

- the assets have been disclosed to them and
- any tax due has been paid or will be enforced.

This is because Article 5(5) of the DTC allows us to tax the property if the USA is unable to enforce its right to tax. HMRC needs to give a similar certification if Article 5(1) of the DTC requires the US authorities to give up their right to tax property.

Until we have a form 742<sup>12</sup> from the US authorities certifying that the property has been disclosed and that tax has been paid or will be enforced, you should not close any case where:

Article 5(1) operates to exclude some UK property from the charge to IHT, and

the case would be taxpaying without that exclusion.

You should explain this requirement to the taxpayer and send them two prints of Form 742. You should draw their attention to the paragraphs of the form that they must complete. Where the UK is giving up its

---

12 Author's footnote: This is not a current form, and I wonder if it is in fact a typo: I would be grateful to any reader who can comment.

taxing rights under the convention, only para 1 applies and paras 2 to 7 are not appropriate. You can close your case when you have received a form that is correctly completed and certified. Refer the case to Technical if there are any errors or any problems arise.

Where the USA gives up the right to tax property under Article 5(1), the US authorities will send two copies of US form 706 CE to us to certify.<sup>13</sup> Once you have checked the forms (you must not mark them in any way) you should send them to Technical together with the file and a note of any errors or omissions. Technical will then issue the appropriate certificate.

### 113.9 Dual-situate asset

Article 5(6) USA IHT DTA provides:

If at the time of the death or transfer

[a] the decedent or transferor was domiciled in neither Contracting State and

[b] each State would regard any property as situated in its territory and

[c] in consequence tax would be imposed in both States,  
the competent authorities of the Contracting States shall determine the situs of the property by mutual agreement.

This does not apply if the individual is treaty-domiciled in one or other contracting state, as then IHT exemption or USA tax exemption applies.

It is a different technique from dealing with the problem of dual-situate assets from that adopted in the estate duty DTAs, which set out their own treaty-situs rules (as did the former USA estate duty treaty).

### 113.10 Immovable property

Article 6 (more or less) follows the OECD IHT Model. Article 6(1) USA IHT DTA provides:

Immovable property (real property) may be taxed in the Contracting State in which such property is situated.

Article 6(2) USA IHT DTA defines “immovable property” in (more or less) OECD Model form:<sup>14</sup>

---

13 Author’s footnote: see

<https://www.irs.gov/uac/form-706-ce-certificate-of-payment-of-foreign-death-tax>

14 See 23.7.1 (“Immovable property”).

- [a] The term “immovable property” shall be defined in accordance with the law of the Contracting State in which the property in question is situated,
- [b] provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property.
- [c] The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources;
- [d] ships, boats, and aircraft shall not be regarded as immovable property.

Article 6(3) USA IHT DTA deals with the interaction of articles 6 (immovable property) and 7 (business property):

The provisions of paras (1) and (2) shall also apply

- [a] to immovable property of an enterprise and
- [b] to immovable property used for the performance of independent personal services.

### 113.11 Business property

Article 7(1) USA IHT DTA provides:

Except for assets referred to in Article 6 (Immovable Property (Real Property)) assets forming part of the business property of a permanent establishment of an enterprise<sup>15</sup> may be taxed in the Contracting State in which the permanent establishment is situated.

Article 7(2) defines “permanent establishment” in (more or less) OECD Model form; this is not set out here, since it will rarely arise.

Article 7(3) provides:

Except for assets described in Article 6 (immovable property (real property)), assets pertaining to a fixed base used for the performance of independent personal services may be taxed in the Contracting State in

---

<sup>15</sup> Article 7(1) USA IHT DTA provides the definition: “the term “enterprise” means an industrial or commercial undertaking”.

which the fixed base is situated.

## 113.12 Deductions

Article 8(1) USA IHT DTA provides:

In determining the amount on which tax is to be computed, permitted deductions shall be allowed in accordance with the law in force in the Contracting State in which tax is imposed.

This article is found in several IHT DTAs; for discussion, see 108.8 (Deductions for DTA purposes).

## 113.13 IHT spouse exemption extended

Under domestic IHT law, the usual IHT spouse exemption may be restricted when the transferor is UK domiciled and the spouse is foreign domiciled.<sup>16</sup> Article 8 restricts this restriction, ie it extends the spouse exemption. There are separate provisions for absolute transfers and for transfers to a trust under which the spouse has an IIP. There is no relief for the situation where H has an interest in possession and on H's death W acquires an interest in possession (where the IHT spouse exemption is sometimes available under s.49D IHTA).

### 113.13.1 *Absolute inter-spouse transfer*

Article 8(3) USA IHT DTA provides:

Property which passes to the spouse from a decedent or transferor who was domiciled in or a national of the US and which may be taxed in the UK shall, where

- (a) the transferor's spouse was not domiciled in the UK but the transfer would have been wholly exempt had the spouse been so domiciled, and
- (b) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention, be exempt from tax in the UK to the extent of 50 per cent of the value transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those for transfers between spouses.

---

16 See 89.2 (Restricted IHT spouse exemption).

In order for this to be needed and to apply the following conditions must be satisfied:

The transferor is:

- (a) Treaty-domiciled in the US or a US national.
- (b) UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under IHT domestic law).

The transferee (spouse) is:

- (a) not treaty-domiciled in the UK.
- (b) not UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under IHT domestic law).

This relief applies on death and on lifetime transfers.

### 113.13.2 “Spouse” in USA IHT DTA

For IHT purposes, the term “spouse” has its UK law meaning.<sup>17</sup> Strictly a civil partner is not a spouse, so this is one of the rare occasions where there is a difference between the taxation of spouses and civil partners; but the introduction of same-sex marriages reduces the significance of that.<sup>18</sup> It is arguable that the word “spouse” here should be construed loosely, to include civil partners.

### 113.13.3 Settlement with spouse IIP

Article 8(4) USA IHT DTA provides:

- (a) Property which on the death of a decedent domiciled in the UK became comprised in a settlement shall, if the personal representatives and the trustees of every settlement in which the

---

<sup>17</sup> See 103.11 (Undefined treaty terms).

A person who has entered into a same-sex marriage may be regarded as a spouse for US tax purposes, see *Obergefell v Hodges*. IRS Revenue Ruling 2013-17 states: “For Federal tax purposes, the term “marriage” does not include registered domestic partnerships, civil unions, or other similar formal relationships recognized under state law that are not denominated as a marriage under that state’s law, and the terms “spouse,” “husband and wife,” “husband,” and “wife” do not include individuals who have entered into such a formal relationship. This conclusion applies regardless of whether individuals who have entered into such relationships are of the opposite sex or the same sex.”

<sup>18</sup> See App. 3.2 (“Spouse”).

decedent had an interest in possession immediately before death so elect and subject to sub-para (b), be exempt from tax in the UK to the extent of 50 per cent of the value transferred (calculated as in para (3)) on the death of the decedent if:

- (i) under the settlement, the spouse of the decedent was entitled to an immediate interest in possession,
  - (ii) the spouse was domiciled in or a national of the US,
  - (iii) the transfer would have been wholly exempt had the spouse been domiciled in the UK, and
  - (iv) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention.
- (b) Where the spouse of the decedent becomes absolutely and indefeasibly entitled to any of the settled property at any time after the decedent's death, the election shall, as regards that property, be deemed never to have been made and tax shall be payable as if on the death such property had been given to the spouse absolutely and indefeasibly.

In order for this to be needed and to apply the following conditions must be satisfied:

The transferor is:

- (a) Treaty-domiciled in the UK.
- (b) UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under domestic law).

The transferee (spouse) is:

- (a) treaty-domiciled in the US or a national of the US.
- (b) not UK-law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under domestic law).

In addition:

- (1) An election is required.
- (2) The spouse must be entitled to an immediate IIP (this probably rules out relying on s.144 IHTA (discretionary will trusts)).
- (3) This relief only applies on the death of the transferor.

### **113.14 Non-discrimination**

Article 10(1)(a) USA IHT DTA provides:

Subject to the provisions of sub-para (b), nationals of a Contracting State shall not be subjected in the other State to any taxation or any

requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances are or may be subjected.

This broadly follows OECD IHT Model.

It would extend IHT agricultural property relief to USA agricultural property, which could be relevant to companies holding agricultural land, but the point will not often arise.

Article 10 continues:

(2) The taxation on a permanent establishment which an enterprise of a Contracting State has in the other Contracting State shall not be less favourably levied in that other State than the taxation levied on enterprises of that other State carrying on the same activities.

(3) Nothing contained in this Article shall be construed as obliging either Contracting State to grant to individuals not domiciled in that Contracting State any personal allowances, reliefs and reductions for taxation purposes which are granted to individuals so domiciled.

(4) Enterprises of a Contracting State, the capital of which is wholly or partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of the first-mentioned State are or may be subjected.

(5) The provisions of this Article shall apply to taxes which are the subject of this Convention.

### **113.15 Other articles**

The following articles of the USA IHT DTA are standard form and not discussed here:

<b>Article</b>	<b>Topic</b>
11	Mutual agreement procedure
12	Exchange of information
13	Diplomatic and consular officials
14	Entry into force
15	Termination

## CHAPTER ONE HUNDRED AND FOURTEEN

# CREDIT FOR FOREIGN IHT

### 114.1 Credit for foreign IHT

#### *Cross references*

The following topics are considered elsewhere:

- 76.16 (Deduction for foreign taxes) (as opposed to credit)
- 76.16.5 (Foreign tax on UK shares)
- 108.7 (Nil-rate band and DTAs)

### 114.1 Credit for foreign IHT

“**Foreign IHT credit relief**” arises where foreign tax is set against UK IHT. This may be:

- (1) “**DTA IHT credit**” where a DTA confers a credit or
- (2) “**Unilateral IHT credit**” where UK tax law (not a DTA) confers a credit.

In this chapter I consider unilateral IHT credit, the four estate duty/IHT DTAs and the USA IHT DTA. I hope to deal with other treaties in future editions.

### 114.2 Unilateral IHT credit

Unilateral IHT credit is important as the UK does not have many IHT DTAs.

Section 159(1) IHTA provides:

Where the Board are satisfied that in any territory outside the UK (an “overseas territory”) any amount of tax imposed by reason of any disposition or other event is attributable to the value of any property, then, if—

- (a) that tax is

- [i] of a character similar to that of capital transfer tax<sup>1</sup> or
  - [ii] is chargeable on or by reference to death or gifts inter vivos,  
and
- (b) any capital transfer tax chargeable by reference to the same disposition or other event is also attributable to the value of that property,
- they shall allow a credit in respect of that amount (“the overseas tax”) against that capital transfer tax in accordance with the following provisions.

Statute calls this “unilateral relief” but I prefer the term “**unilateral foreign IHT credit**” (or foreign IHT credit relief) which seems clearer. I refer to the foreign tax (which statute calls “the overseas tax” as “**foreign IHT**”).

Unilateral relief is based on the international understanding that the state where an asset is located has the primary right of taxation and the state whose claim to tax depends on a personal nexus (residence or, as in the UK, domicile) should provide unilateral relief from double taxation.

The IHT Manual provides:

**IHTM27185 Introduction** [May 2020]

... Under IHTA84/S159, credit can be allowed on death and also in respect of lifetime dispositions where some type of gift tax is charged in the foreign country. The basic conditions to be satisfied in connection with a lifetime or death transfer are:

- that both Inheritance Tax (IHT) and overseas tax must be chargeable by reference to the same event and attributable to the value of the same property, and
- that the foreign tax is similar in character to IHT.

In cases of doubt, you must ask for advice from Technical.

### 114.3 Requirement to pay foreign IHT

The requirement that the foreign IHT must actually be paid is slipped into the definition of “tax imposed”. Section 159(6) IHTA provides:

In this section references to tax imposed in an overseas territory are references to tax chargeable under the law of that territory and paid by the person liable to pay it.

---

<sup>1</sup> References to CTT include IHT: s.100(1)(b) FA 1986.

The IHT Manual provides:

**IHTM27185. Introduction** [May 2020]

... Before the relief can be finalised, the taxpayer or agent must produce evidence of payment of the foreign tax. This must be in the form of the assessment of foreign tax (or other document showing details of the property charged) and the official receipt.

Once you decide the amount of relief available this should be entered in the 'reliefs against tax' box in the appropriate COMPASS screen. If necessary, you must apportion the relief between the instalment and non-instalment option property assessments. (See IHTM31189)

#### 114.4 Use of foreign IHT credit

Credit is only set against “that capital transfer tax” ie IHT attributable to the same property as is subject to the foreign IHT.

The IHT Manual provides:

**IHTM27185. Introduction** [May 2020]

... the relief cannot exceed the amount of Inheritance Tax (IHT) charged with respect to the particular item of property.

For these purposes, the IHT attributable to any asset that is wholly exempt from IHT is nil. Where the item is partly exempt, any IHT charged will be attributed to the chargeable part.

Where Quick Succession Relief (IHTM22041) is allowed, the amount of IHT attributable to the property is the net amount after allowing the relief.

#### 114.5 Amount of credit

The rules determining the amount of IHT credit differ depending on

- (1) situs of property under UK law and
- (2) situs of property under the foreign law.

The IHT Manual provides:

**IHTM27185. Introduction** [May 2020]

... Because of the terms of s.159 (2), (3) and (4) IHTA 1984 you will need to consider the situs (IHTM27071) of property according to UK law and, possibly, foreign law when allowing a credit for foreign tax. You must raise any questions to establish the situs as soon as it seems likely that a s.159 IHTA credit will be claimed.

Under s.159 IHTA, credit can be allowed on death and also in respect of lifetime dispositions where some type of gift tax is charged in the foreign country. The basic conditions to be satisfied in connection with a lifetime or death transfer are:

- that both Inheritance Tax (IHT) and overseas tax must be chargeable by reference to the same event and attributable to the value of the same property, and
- that the foreign tax is similar in character to IHT.

In cases of doubt, you must ask for advice from Technical.

The amount of the credit allowed under IHTA84/S159 is the Sterling equivalent of the foreign tax paid (converted using the exchange rate on the date of payment) so far as that tax is attributable to the foreign property on which IHT has been paid. Any part of the sum paid to the foreign Revenue authorities representing interest or penalties should be excluded. So should any part of the foreign tax that is attributable to income accruing since the date of the transfer. ...Shares and Assets Valuation (Foreign) will provide the exchange rate...

**IHTM27186 Procedure with non-convention countries: which provision apply?** [May 2020]

To work out whether relief is due and which provisions it is due under you will need to consider the following questions:

Is the property situated in the UK under UK law?

- If the answer is 'yes' and the property is also situated in the foreign country under the law of that country, relief is due under IHTA84/S159(3)(b),
- If the answer is 'yes' but the property is not situated in the foreign country under their law, no relief is due.
- If the answer is 'no' but the property is situated in the foreign country under UK law, relief is due under IHTA84/S159(2).
- If the answer is 'no' and the property is not situated in the foreign country under UK law, relief is due under IHTA84/S159(3)(a).

Relief should be given under IHTA84/S159 (2) rather than S159 (3)(a) where tax is paid, under an agreement between the provinces concerned:

- in Quebec or Ontario, or Quebec and British Columbia,
- on shares which are situated in the other province, under UK law.

Any case where the taxpayer or agent disagrees with our view that UK law applies, should be referred to Technical.

#### 114.5.1 *Situs in overseas territory*

Section 159(2) IHTA provides:

Where the property is situated in the overseas territory and not in the UK, the credit shall be of an amount equal to the overseas tax.

The IHT Manual provides:

**IHTM27187. Relief under IHTA84/S159 (2)** [May 2020]

Where the property concerned is situated (under UK law) in the foreign country, relief is due under IHTA84/S159 (2) and the credit due is equal to the foreign tax paid.

In practice, the credit cannot be more than the Inheritance Tax (IHT) attributable to the property concerned.

More accurately, the *credit* (as defined) can exceed the IHT attributable to the property, but this credit is only set against the IHT attributable to the property, so the amount of the relief is the lesser of the credit and that IHT. The IHT Manual goes on to give an example:

*Example* (Bernice)

B died in September 2002, leaving an apartment in Spain valued at £50,000. B's total estate amounts to £300,000 (there were no lifetime gifts), with total IHT payable of £20,000.

The Spanish authorities charge tax equivalent to Sterling £4,000 on the apartment on B's death.

The IHT payable on the apartment is:

$$£50,000 \times (£20,000 \div £300,000) = £3,333.33$$

So, the double taxation credit due under IHTA84/S159 (2) is restricted to £3,333.33.

The effect of the credit is that the total tax paid is the higher of the UK and the foreign IHT rates.

### 114.5.2 *Situs in 3<sup>rd</sup> country/dual situate*

Section 159(3) IHTA provides:

Where the property—

(a) is situated neither in the UK nor in the overseas territory, or

(b) is situated both in the UK and in the overseas territory,

the credit shall be of an amount calculated in accordance with the following formula—

$$\frac{A}{A+B} \times C$$

where

- A is the amount of the capital transfer tax,  
 B is the overseas tax and  
 C is whichever of A and B is the smaller.

The IHT Manual provides:

**IHTM27188. Relief under IHTA84/S159 (3) and S159 (4)** [May 2020]

Relief is due under s.159(3) IHTA 1984 where both the UK and another foreign country charge tax on the same property and that property is situated:

- neither in the UK nor in the foreign country, or
- both in the UK and in the foreign country.

Where relief is due under IHTA84/S159 (3), it is given on a split credit basis and will be less than the foreign tax paid. [The Manual sets out the formula in s.159(3) and continues:]

*Example 1*

Country X and the UK both tax an item of property which is situated neither in Country X or the UK.

Country X charges tax of £40

The UK charges IHT of £60

The credit is:  $60 \div (60 + 40) \times 40 = £24$

HMRC IHT Customer Guide gives two examples of unilateral relief calculations:<sup>2</sup>

**Example 1**

Ann is domiciled in Ruritania, but is also treated as domiciled in the UK. She makes a gift of property situated in Utopia.

<i>Item</i>	<i>Amount</i>
UK inheritance tax (A)	£3,000
Ruritanian inheritance tax (B)	£1,000
C is the smaller of A and B	£1,000
Credit against UK IHT is $£3,000 / (£3,000 + £1,000) \times £1,000 = £750$	
<b>Net UK tax</b>	<b>£2,250</b>

**Example 2**

Tom is domiciled in Utopia but holds shares in a Ruritanian company, which maintains a duplicate share register in the UK. Under UK law we

<sup>2</sup> <https://www.gov.uk/inheritance-tax-double-taxation-relief#15>

regard the shares as situated in the UK,<sup>3</sup> but Ruritanian law regards them as situated in Ruritania. Tom dies (but his estate is not liable to Utopian tax).

<i>Item</i>	<i>Amount</i>
UK inheritance tax (A)	£1,000
Ruritanian inheritance tax (B)	£4,000
C is the smaller of A and B	£1,000
Credit against UK IHT is $£1,000 / (£1,000 + £4,000) \times £1,000 = £200$	
<b>Net UK tax</b>	<b>£800</b>

This will only eliminate double taxation if the foreign state has the same rules. Where an IHT DTA applies a more generous form of credit may apply.

### 114.5.3 *Property taxed in more than 1 state*

Section 159(4) IHTA provides:

Where tax is imposed in two or more overseas territories in respect of property which—

- (a) is situated neither in the UK nor in any of those territories, or
- (b) is situated both in the UK and in each of those territories, subsection (3) above shall apply as if, in the formula there set out,

B were the aggregate of the overseas tax imposed in each of those territories and

C were the aggregate of all, except the largest, of A and the overseas tax imposed in each of them. ...

The IHT Manual provides an example:

#### **IHTM27188 Relief under IHTA84/S159 (3) and S159 (4)** [May 2020]

##### *Example 2*

Each of Country X, Country Y and the UK tax an item of property which is not situated in Country X, Country Y nor the UK.

Country X charges £40

Country Y charges £20

The UK charges IHT of £60

The credit is  $60 \div (60+40+20) \times (40+20) = £30$

---

<sup>3</sup> Author's footnote: This is not a correct statement of the situs rule, but it does not matter for the purposes of the example.

#### 114.5.4 *Interaction of s.159(2)(3)*

Section 159(5) IHTA deals with the interaction of the two reliefs:

Where credit is allowed under subsection (2) above or section 158 above in respect of overseas tax imposed in one overseas territory, any credit under subsection (3) above in respect of overseas tax imposed in another shall be calculated as if the capital transfer tax were reduced by the credit allowed under subsection (2) or section 158; and where, in the case of any overseas territory mentioned in subsection (3) or (4) above, credit is allowed against the overseas tax for tax charged in a territory in which the property is situated, the overseas tax shall be treated for the purposes of those provisions as reduced by the credit.

The IHT Manual provides:

**IHTM27188 Relief under IHTA84/S159 (3) and S159 (4)** [May 2020]

... If relief is due under IHTA84/S159 (3)(a) or IHTA84/S159 (4)(a), IHTA84/S159 (5) must be considered when calculating the foreign tax paid (B in the formulas above). If the foreign country has allowed a credit against its tax for tax paid in another foreign country, please refer to Technical.

Where relief is due under IHTA84/S159 (3)(b) or IHTA84/S159 (4)(b), above, the foreign tax at B is simply the gross amount paid. You do not need to take account of any credit for tax paid in another country.

**IHTM27189. Procedure when both IHTA84/S159 (2) and S159 (3) apply** [May 2020]

It may happen that relief is due under s.159(2) IHTA 1984 (or convention relief under s.158 IHTA 1984) and also under s.159(3) IHTA 1984.

If this is the case, s.159(5) states that the credit allowed under Section 159(3) must be calculated on the basis that A in the formula (the Inheritance Tax paid) is the net amount of Inheritance Tax after allowing the credit under s.158 or s.159(2)

#### 114.5.5 *Unilateral/DTA credit: Interaction*

Section 159(7) IHTA provides:

Where relief can be given both under this section and under section 158 above [double tax treaties], relief shall be given under whichever section provides the greater relief.

The IHT Manual provides:

**IHTM27200. Procedure when both forms of relief apply** [May 2020]

Unilateral relief and relief under a double taxation convention (DTC) are **not** mutually exclusive. Where both reliefs would appear to be due on the same item of property, relief is restricted by IHTA84/S159 (7) to whichever is the greater. In practice, where the amount of credit is the same under either, the credit should be treated as convention relief.

In cases where, either;

- both reliefs are due, but the unilateral relief appears to be the greater or
- the interaction of the two reliefs is particularly difficult.

You must refer the case to Technical.

Unilateral relief may be given for a State tax as well as unilateral or convention relief in respect of tax due in the country where the State is situated.

*Example* (Giles)

G, a British citizen, dies domiciled in the UK. His estate includes an apartment in New York, stocks and shares in US Companies and a New York bank account.

The world-wide estate will be subject to UK tax, but US Federal Estate Tax will (because of the terms of the DTC) be payable only on the immovable property in the USA. The UK will give credit for the US tax under the DTC.

NY State will also charge State Estate Tax on the movable assets situated there and the UK will give unilateral relief for this tax.

But the total unilateral and convention credit cannot exceed the amount of UK IHT payable on the property concerned.

#### 114.5.6 *Concession for Canada estate duty*

The IHT Manual provides:

**IHTM27186 Procedure Chart** [May 2020]

... Relief should be given under IHTA84/S159 (2) rather than S159(3)(a) where tax is paid, under an agreement between the provinces concerned:

- in Quebec or Ontario, or Quebec and British Columbia,
- on shares which are situated in the other province, under UK law.

Any case where the taxpayer or agent disagrees with our view that UK law applies, should be referred to Technical.

Canada abolished estate duty in 1972. This passage is therefore 50 years out of date! For the current Canadian position, see 76.16.4 (Canadian income tax). However it illustrates an approach which may perhaps be applied to federal estate duties in other federal jurisdictions, if there are any.

## 114.6 Planning

The rule is in short that the relief is the lesser of (1) foreign IHT and (2) UK IHT attributable to the same property. This requires careful planning to maximise the benefit of the relief.

Suppose T owns land in country X which on T's death will bear IHT in country X. If T makes a chargeable gift of the land (eg a gift by will to T's children) then the foreign IHT credit is available. If T makes an exempt gift (eg to T's spouse or to charity) the foreign IHT credit is lost. Foreign jurisdictions do not normally allow death duty exemption on the grounds that a gift is made to a UK charity.<sup>4</sup> For instance, suppose T wishes to make a will giving foreign property to a UK charity. The gift may bear foreign death duties which are set against UK IHT so the effective IHT burden is reduced or eliminated.<sup>5</sup> It would be better:

- (1) to give the foreign property to beneficiaries who are chargeable under UK law.
- (2) to give other (perhaps UK) property to the UK charity which would otherwise bear inheritance tax at the full rate.

In some cases the matter could be put right by a deed of variation.

## 114.7 France/Italy IHT credit

Article VI of the UK/France IHT DTA provides:

Where

- [a] one Contracting Party imposes duty on the death of a person who was domiciled in its territory at the time of his death
- [b] on any property which, under the present Convention, is situated in the territory of the other Contracting Party,

---

<sup>4</sup> In some cases EU member states may allow relief.

<sup>5</sup> The position may be complicated further by foreign rules which make the rate of death duty depend on the relationship of the beneficiary to the deceased; forced heirship rules may also need to be considered.

the former Party shall allow against so much of its duty, ascertained in accordance with its law, as is attributable to that property a credit (not exceeding the amount of the duty so attributable) equal to so much of the duty imposed by the other Contracting Party as is attributable to such property.

Similarly, Art.VI of the UK/Italy IHT DTA provides:

(1) Where one Contracting Party imposes duty on any property which is not situated in its territory but is situated in the territory of the other Contracting Party, the former Party shall allow against so much of its duty (as otherwise computed) as is attributable to that property a credit (not exceeding the amount of the duty so attributable) equal to so much of the duty imposed in the territory of the other Contracting Party as is attributable to such property.

(2) For the purposes of this Article, the amount of the duty of a Contracting Party attributable to any property shall be ascertained after taking into account any credit, allowance or relief, or any remission or reduction of duty other than in respect of duty payable in the territory of the other Contracting Party

This does not add much to the unilateral IHT credit otherwise available under domestic law but it would be relevant for an asset which is UK situate under domestic IHT situs rules but not UK situate under treaty-situs rules.

India and Pakistan DTAs have similar articles but since these countries do not impose IHT, the articles have no effect.

## **114.8 USA IHT credit**

Article 9 USA IHT DTA provides the relief.

Article 9(1) USA IHT DTA (not discussed here) provides US relief where UK IHT is paid.

Article 9(2) USA IHT DTA provides UK relief for non-trust property where US tax is paid:

Where

- [i] under this Convention the UK may impose tax with respect to any property
- [ii] other than property which the UK is entitled to tax in accordance

with the said Article 6 or 7<sup>6</sup>

[iii] (that is, where the decedent or transferor was domiciled in or a national of the UK),

then, except in the cases to which para (3) applies, double taxation shall be avoided in the following manner:

- (a) Where the US imposes tax with respect to property in accordance with the said Article 6 or 7, the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.
- (b) Where
  - [i] the US imposes tax with respect to property not referred to in sub-para (a) and
  - [ii] the decedent or transferor was a national of the UK and was domiciled in the US at the time of the death or transfer,<sup>7</sup>
 the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.

Article 9(3) USA IHT DTA provides the rule for trust property:

Where both Contracting States impose tax on the same event with respect to property which

- [a] under the law of the US would be regarded as property held in a trust or trust equivalent and
- [b] under the law of the UK would be regarded as property comprised in a settlement,

double taxation shall be avoided in the following manner:

- (a) Where a Contracting State imposes tax with respect to property in accordance with the said Article 6 or 7, the other Contracting State shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the first- mentioned Contracting State with respect to that property.
- (b) Where the US imposes tax with respect to property which is not taxable in accordance with the said Article 6 or 7 then
  - (i) where the event giving rise to a liability to tax was a

---

6 Articles 6 and 7 concern immovable and business property: see 23.7.1 (Immovable property); 113.11 (Business property).

7 See 113.6 (IHT exemptions: Individual).

generation-skipping transfer and the deemed transferor was domiciled in the US at the time of that event,

- (ii) where the event giving rise to a liability to tax was the exercise or lapse of a power of appointment and the holder of the power was domiciled in the US at the time of that event, or
- (iii) where (i) or (ii) does not apply and the settlor or grantor was domiciled in the US at the time when the tax is imposed,

the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.

- (c) Where the United States imposes tax with respect to property which is not taxable in accordance with the said Article 6 or 7 and sub-paragraph (b) does not apply, the United States shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the United Kingdom with respect to that property.

Article 9(4) USA IHT DTA provides some general rules for tax credits:

- [a] The credits allowed by a Contracting State according to the provisions of paras (1), (2) and (3) shall not take into account amounts of such taxes not levied by reason of a credit otherwise allowed by the other Contracting State.
- [b] No credit shall be finally allowed under those paragraphs until the tax (reduced by any credit allowable with respect thereto) for which the credit is allowable has been paid.
- [c] Any credit allowed under those paragraphs shall not, however, exceed the part of the tax paid in a Contracting State (as computed before the credit is given but reduced by any credit for other tax) which is attributable to the property with respect to which the credit is given.<sup>8</sup>

The IHT Manual explains the procedure for obtaining a credit:

**IHTM27170. USA [May 2020]**

...Where a double taxation credit is due you may allow the amount claimed on form IHT400 provisionally but the case must not be closed until the payment has been certified by the US authorities on Form 742. If a credit seems appropriate, send the taxpayer or their agent two prints

---

<sup>8</sup> Art 9(5) deals with claims; see 108.6 (Claims for IHT DTA reliefs).

of Form 742, available from Technical. Ask them to complete the forms and to send both copies to the Washington address on the reverse Internal Revenue Service, 1111 Constitution Avenue NW:SE:LB:IN:ADCI:EOI M4-360, Washington DC 20224, United States of America.

One of these copies is certified and returned to this office and the other is retained by the US authorities. The certified form must be checked and the appropriate credit allowed. If you have any difficulty applying the Double Taxation Convention or calculating the tax attributable to the property, please seek advice from Technical..

The credit given cannot be more than the amount of tax payable in the UK on the property concerned.

*Certificate of IHT paid for the US authorities*

The US form 706 CE is forwarded to this Office in duplicate to be certified by us. The forms must be checked, but you must make sure you do not mark the forms themselves in any way. Send the forms and the file with a note of any error or omission to Technical once all the tax has been paid. If there no further enquiries and all the tax has been paid, Technical will arrange for one copy to be certified and sent with a schedule of any necessary amendments to the US authorities; the other copy is filed. The taxpayer is informed that the certificate has been sent and is provided with a copy of any amending schedule.

Where a certificate of tax paid cannot be issued on application - because the amount of tax has not been finalised and paid - you should explain this to the taxpayer or agents. You should also remind them that they can lodge a provisional claim for a credit with the US authorities (although there is a time limit – under Article 9). When the case is ready you should refer the application and the file to Technical to issue the certificate.

If there is any adjustment of tax after a certificate has been issued the file must again be referred to Technical to issue an amending certificate.

## CHAPTER ONE HUNDRED AND FIFTEEN

# REPORTING AND COMPLIANCE

### 115.1 Duty to give notice of liability

#### *Cross references*

The question how specific types of income/gains are disclosed in a tax return is considered in chapters on that type of income:

<b>Topic</b>	<b>See para</b>	<b>Topic</b>	<b>See para</b>
Unremitted income/gains	16.26	Motive/EU-law defence	49.44
Discretionary trust income	38.3.3	Chargeable event	62.22
s.624 income	44.17	Disguised IM fees	69.28
s.720 income	46.23	Chargeable gains	53.25
s.731 income	47.56	s.87 gains	57.59

### 115.1 Reporting/compliance: Introduction

I address this topic as a whole, because its offshore aspects must be considered in the context of the issues in the round, and because of its general importance: practitioners will find themselves considering every aspect of the topic. But I do not seek to be completely comprehensive: a full discussion of reporting and compliance needs a book to itself.

The layout of discussion as follows:

<b>Topic</b>	<b>See para</b>
Enquiries, assessment, carelessness/deliberate error: IT/CGT	<i>This chapter</i>
Tax return filing positions	116.1
Claims	117.1
Reporting/compliance for IHT	119.1
Reporting beneficial ownership	120.2, 121.1
Reporting non-resident trusts	123.1
International movement of capital	124.1
Requirement to correct and penalties	120.1
Proceeds of Crime Act 2002	125.1

Further disclosure duties may arise under:

- (1) DOTAS (on which books have been written)
- (2) DAC 6<sup>1</sup> which I hope to discuss in a future edition

## 115.2 Duty to notify liability

The starting point is that a taxpayer liable to IT/CGT must give a notice of liability to HMRC. Section 7(1) TMA provides:

Every person who—

- (a) is chargeable to income tax or capital gains tax for any year of assessment, and
  - (b) falls within subsection (1A) or (1B),
- shall, subject to subsection (3) below, within the notification period,<sup>2</sup> give notice to an officer of the Board that he is so chargeable.

I refer to this as a “notice of liability”.<sup>3</sup>

For consequences of failure to comply see 115.17 (20 year limit: Failure to notify); 120.5 (Failure to notify liability).

### 115.2.1 Persons required to notify

Section 7 TMA provides:

(1A) A person falls within this subsection if the person has not received a notice under section 8 requiring a return for the year of assessment of the person’s total income and chargeable gains.

(1B) A person falls within this subsection if the person—

- 
- 1 The International Tax Enforcement (Disclosable Arrangements) Regulations 2020, which implements the Directive on Administrative Co-operation (2011/16/EU) with regard to cross-border arrangements.
  - 2 Defined in s.7(1C) TMA:  
“In subsection (1) “the notification period” means—  
(a) in the case of a person who falls within subsection (1A), the period of 6 months from the end of the year of assessment, or  
(b) in the case of a person who falls within subsection (1B)—  
(i) the period of 6 months from the end of the year of assessment, or  
(ii) the period of 30 days beginning with the day after the day on which the notice under section 8 was withdrawn, whichever ends later.”
  - 3 Section 7(1) uses the word chargeable, but the heading to s.7, and s.7(7), use the word “liable”. The two words have the same sense here, and are used interchangeably.

- (a) has received a notice under section 8 requiring a return for the year of assessment of the person's total income and chargeable gains, and
- (b) has received a notice under section 8B withdrawing the notice under section 8.

The starting point is that everyone is required to notify unless they are required to put in a tax return under s.8 TMA, (in which case notification is obviously unnecessary).

### 115.2.2 *Trustees duty to notify*

Section 7(2) TMA provides:

In the case of persons who are chargeable as mentioned in subsection (1) above as the relevant trustees<sup>4</sup> of a settlement, that subsection and subsections (1A) to (1C) have effect as if references to a notice under section 8 were references to a notice under section 8A.

In *Trustees of the Paul Hogarth Life Interest Trust v HMRC*:<sup>5</sup>

[Section 7 TMA] uses the word “persons” in relation to trustees and s 7(2) assumes that the persons who are chargeable, and who therefore have the obligation to notify, are “the relevant trustees”. This is consistent with s 474 ITA.

### 115.2.3 *Simple assessments*

Section 7(2A) TMA provides:

A person who—

- (a) falls within subsection (1A) or (1B), and
- (b) is notified of a simple assessment for the year of assessment, is not required to give notice under subsection (1) for that year unless the person is chargeable to income tax or capital gains tax for the year of assessment on any income or gain that is not included in the assessment.

## 115.3 **Duty to notify: Exemption**

Section 7(3) TMA provides:

---

<sup>4</sup> See 115.4.2 (Relevant trustees).

<sup>5</sup> [2018] UKFTT 595 (TC) at [18].

A person shall not be required to give notice under subsection (1) above in respect of a year of assessment if for that year—

- (a) the person's total income consists of income from sources falling within subsections (4) to (7) below,
- (b) the person has no chargeable gains, and
- (c) the person is not liable to a high income child benefit charge.

Subsections (4) to (7) contain a set of 5 income categories which fall within this exemption.

### 115.3.1 *Payments within PAYE*

Section 7 TMA provides:

(4) A source of income falls within this subsection in relation to a year of assessment if—

- (a) all payments of, or on account of, income from it during that year, and
- (b) all income from it for that year which does not consist of payments,

have or has been taken into account in the making of deductions or repayments of tax under PAYE regulations.

(5) A source of income falls within this subsection in relation to any person and any year of assessment if all income from it for that year has been or will be taken into account—

- (a) in determining that person's liability to tax, or
- (b) in the making of deductions or repayments of tax under PAYE regulations.

### 115.3.2 *Tax deducted at source*

Section 7(6) TMA provides:

A source of income falls within this subsection in relation to any person and any year of assessment if

[A] all income from it for that year is—

- (a) income from which income tax has been deducted; or
- (b) income from or on which income tax is treated as having been deducted or paid,

[B] and that person is not for that year liable to tax at a rate other than the basic rate, the dividend nil rate, the Scottish basic rate, a Scottish rate below the Scottish basic rate, the Scottish intermediate rate, the

Welsh basic rate, the dividend ordinary rate, the savings nil rate or the starting rate for savings.

Persons within [B] would once have been called basic rate taxpayers. Is it possible to read that list without a sigh for the simpler, pre-devolution days?

### 115.3.3 *Dividends within dividend nil-rate*

Section 7(6A) TMA provides:

A source of income falls within this subsection in relation to any person and any year of assessment if for that year—

- (a) all income from the source is dividend income (see section 19 of ITA 2007),<sup>6</sup> and
- (b) the person—
  - (i) is UK-resident,<sup>7</sup>
  - (ii) is not liable to tax at the dividend ordinary rate,
  - (iii) is not liable to tax at the dividend upper rate,
  - (iv) is not liable to tax at the dividend additional rate, and
  - (v) is not charged to tax under section 832 of ITTOIA 2005 (relevant foreign income charged on remittance basis) on any dividend income.

### 115.3.4 *No tax liability*

Section 7(7) TMA provides:

A source of income falls within this subsection in relation to any person and any year of assessment if all income from it for that year is income on which he could not become liable to tax under a self-assessment made under section 9 of this Act in respect of that year.

This would apply to interest income taxable at the 0% rate.<sup>8</sup>

What about a person whose income falls within the personal allowance? The answer is that the personal allowance requires a claim,<sup>9</sup> so unless a claim is made, which is normally done in a return, notification is strictly

<sup>6</sup> See 40.4.1 (“Dividend Income”).

<sup>7</sup> If the individual is non-resident, dividend income of a basic rate taxpayer falls within s.7(6) because the non-resident has a tax credit: see 29.4 (Non-resident recipient).

<sup>8</sup> See 40.8 (Starting rate for savings); 40.9 (Savings nil rate).

<sup>9</sup> See 41.3 (IT personal allowances).

required.

### 115.3.5 HMRC practice

HMRC offer an online tool which provides:<sup>10</sup>

Use this tool to find out if you need to send a tax return for the 2020 to 2021 tax year (6 April 2020 to 5 April 2021).

Context shows that this is referring to the duty to notify liability under s.7 TMA.

The user will be told “You do not need to send a Self Assessment tax return” (more accurately, a notice of liability) if (inter alia) meet the following conditions:

- 1 Have not worked as a sole trader, a business partner or a director of a limited company.
- 2 Total income less than £50k
- 3 No income from UK property or land
- 4 Less than £10k from dividends or savings and investments<sup>11</sup>
- 5 No need to pay tax on: trust income, foreign income, £2.5k commission or cash in hand payments, a private pension, a Self-Employment Income Support Scheme grant
- 6 No need to pay CGT
- 7 Not a religious minister, Lloyd’s underwriter, examiner, exam moderator or invigilator, or share fisherman

This is strictly a concession. It would be desirable to amend s.7, or to express the concession more formally, but there it is. In practice a person who meets these criteria cannot be expected to put in a notice of liability.

### 115.3.6 Company director

It is obvious that being a company director is not by itself sufficient to require a notice of liability under s.7. HMRC have *twice* argued the contrary, on the basis of their own guidance: but the guidance was simply

---

<sup>10</sup> <https://www.gov.uk/check-if-you-need-tax-return>

<sup>11</sup> Author’s footnote: Presumably the £10k limit applies to the total of dividends and interest income.

wrong.<sup>12</sup>

## 115.4 Notice to make SA return

The rules are in s.8(1)/8A(1) TMA:

### s.8(1) TMA: Non-trustees

For the purpose of establishing [i] the amounts<sup>13</sup> in which a person is chargeable to income tax and capital gains tax for a year of assessment, and

[ii] the amount payable<sup>14</sup> by him by way of income tax for that year,

he may be required by a notice given to him by an officer of the Board-

(a) to make and deliver to the officer, a return containing such information as may reasonably be required in pursuance of the notice, and

### s.8A(1) TMA: Trustees

For the purpose of establishing [i] the amounts in which the relevant trustees of a settlement, and the settlors and beneficiaries, are chargeable to income tax and capital gains tax for a year of assessment, and

[ii] the amount payable by him by way of income tax for that year,

an officer of the Board may by a notice given to any relevant trustee require the trustee-

(a) to make and deliver to the officer, on or before the day mentioned in subsection (1A) below a return containing such information as may reasonably be required in pursuance of the notice, and

---

12 *Kadhem v HMRC* [2017] UKFTT 466 (TC). The reader may wonder how this ever came to the FTT. Yet the same point had to be made again in *Symes v HMRC* [2018] UKFTT 42 (TC).

13 Section 8(1AA)/8A(1AA) TMA provide: “For the purposes of subsection (1) above- (a) the amounts in which a person is chargeable to income tax and capital gains tax are net amounts, that is to say, amounts which take into account any relief or allowance a claim for which is included in the return”.

14 Section 8(1AA)/8A(1AA) TMA provide: “(b) the amount payable by a person by way of income tax is the difference between the amount in which he is chargeable to income tax and the aggregate amount of any income tax deducted at source. Section 8(5) TMA provides: “In this section and sections 8A, 9 and 12AA of this Act, any reference to income tax deducted at source is a reference to income tax deducted or treated as deducted from any income or treated as paid on any income.”

(b) to deliver with the return such accounts, statements and documents, relating to information contained in the return, as may reasonably be so required.

(b) [identical]

and a notice may be given to any one trustee or separate notices may be given to each trustee or to such trustees as the officer thinks fit.

Statute frequently refers to “a return under section 8 or 8A”. I gloss that as a “**SA return**”.

#### 115.4.1 *Small gains*

There is a relief for reporting small gains (within the CGT annual exemption). Section 8C TMA provides:

- (1) This section applies if—
  - (a) the amount of chargeable gains accruing to a person in a tax year does not exceed the annual exempt amount for the year applicable to the person under section 1K of the 1992 Act,
  - (b) the total amount or value of the consideration for all chargeable disposals<sup>15</sup> of assets made by the person in the year does not exceed four times that annual exempt amount,
  - (c) the person is not a remittance-basis individual for the year, and
  - (d) a notice under section 8 or 8A is given to the person requiring information for the purpose of establishing the amount in which the person is chargeable to capital gains tax for the year.
- (2) If the person makes a statement confirming the matters set out in subsection (1)(a) to (c), the statement constitutes sufficient compliance with that requirement.

---

15 Defined in s.8C(3) TMA:

- (3) For the purposes of this section every disposal is a “chargeable disposal” other than—
  - (a) a disposal on which any gain accruing is not a chargeable gain, and
  - (b) a disposal to which section 58 of the 1992 Act applies (spouses and civil partners).

### Section 8C(4) TMA defines “remittance-basis individual”:

For the purposes of this section an individual is “a remittance-basis individual” for a tax year if—

- (a) section 809B of ITA 2007 applies to the individual for the year, or
- (b) paragraph 2 of Schedule 1 to the 1992 Act applies in relation to any gains that are treated as accruing to the individual in the year as a result of paragraph 1 of that Schedule.<sup>16</sup>

This disapplies the relief for reporting small gains where the CGT annual exemption is disapplied.<sup>17</sup>

#### 115.4.2 *Relevant trustees*

The term “relevant trustees” matters for the duty to notify chargeability, to make a SA return, and for penalties.

Section 7(9) TMA provides:

For the purposes of this Act the relevant trustees of a settlement are—

- (a) in relation to income (other than gains treated as arising under Chapter 9 of Part 4 of ITTOIA 2005),
  - [i] the persons who are trustees when the income arises and
  - [ii] any persons who subsequently become trustees; and
- (aa) in relation to gains treated as arising under Chapter 9 of Part 4 of ITTOIA 2005 [chargeable-event gains],
  - [i] the persons who are trustees in the year of assessment in which the gains arise and
  - [ii] any persons who subsequently become trustees; and
- (b) in relation to chargeable gains,
  - [i] the persons who are trustees in the year of assessment in which the chargeable gains accrue and
  - [ii] any persons who subsequently become trustees.

In *Trustees of the Paul Hogarth Life Interest Trust v HMRC*:<sup>18</sup>

[1] The effect of the definition in s 7(9) is that a trustee who has ceased to act before the income or gain arises or accrues is not a relevant trustee for the purposes of notifying chargeability for the tax year in

---

<sup>16</sup> See 61.18 (Effect of loss election).

<sup>17</sup> See 41.6 (Allowances: remittance basis user).

<sup>18</sup> [2018] UKFTT 595 (TC) at [19].

which the income arises.

[2] But a trustee who is appointed after the date the income or gain arises or accrues is a relevant trustee (of course only if they are appointed before the obligation to notify has arisen).

Point [2] is not self-evident.

*Hogarth* also found that a notice to file cannot be given to the trustees of an IIP trust with all income mandated to the life tenant and with no chargeable gains; that seems surprising.

Section 8A(5) TMA provides:

The following references, namely-

- (a) references in section 9 or 28C of this Act to a person to whom a notice has been given under this section being chargeable to tax; and
- (b) references in section 29 of this Act to such a person being assessed to tax,

shall be construed as references to the relevant trustees of the settlement being so chargeable or, as the case may be, being so assessed.

#### 115.4.3 *Partnership*

Section 8 TMA provides:

(1B) In the case of a person who carries on a trade, profession, or business in partnership with one or more other persons, a return under this section shall include each amount which, in any relevant statement, is stated to be equal to his share of any income, loss, tax, credit or charge for the period in respect of which the statement is made.

(1C) In subsection (1B) above “relevant statement” means a statement which, as respects the partnership, falls to be made under section 12AB of this Act for a period which includes, or includes any part of, the year of assessment or its basis period.

#### 115.4.4 *SA return time limits*

Section 8(1D) TMA provides:

A return under this section for a year of assessment (Year 1) must be delivered-

- (a) in the case of a non-electronic return, on or before 31st October in Year 2, and

- (b) in the case of an electronic return,<sup>19</sup> on or before 31st January in Year 2.

There are minor exceptions. Section 8 TMA provides:

(1E) But subsection (1D) is subject to the following two exceptions.

(1F) Exception 1 is that if a notice in respect of Year 1 is given after 31st July in Year 2 (but on or before 31st October), a return must be delivered-

- (a) during the period of 3 months beginning with the date of the notice (for a non-electronic return), or

- (b) on or before 31st January (for an electronic return).

(1G) Exception 2 is that if a notice in respect of Year 1 is given after 31st October in Year 2, a return (whether electronic or not) must be delivered during the period of 3 months beginning with the date of the notice.

Section 8A TMA makes identical provision for trustees, but the provisions are s.8A(1D)-(1F).

#### 115.4.5 *Scope of SA return*

Section 8(3)/8A(3) TMA provide:

A notice under this section may require different information, accounts and statements for different periods or in relation to different descriptions of source of income.

Section 8(4)/8A(4) TMA provide:

<p>Notices under this section may require different information, accounts and statements in relation to different descriptions of person.</p>	<p>Notices under this section may require different information, accounts and statements in relation to different descriptions of settlement.</p>
---	---

That seems self-evident.

#### 115.4.6 *Non-resident employer*

Section 8 TMA provides:

---

19 Section 8(1H) TMA provides: “The Commissioners-

- (a) shall prescribe what constitutes an electronic return, and

- (b) may make different provision for different cases or circumstances.”

(4A) Subsection (4B) applies if a notice under this section is given to a person within section 8ZA of this Act (certain persons employed etc by person not resident in UK who perform their duties for UK clients).

(4B) The notice may require a return of the person's income to include particulars of any general earnings (see section 7(3) of ITEPA 2003) paid to the person.

Section 8ZA TMA provides:

(1) For the purposes of section 8(4A) of this Act, a person ("F") is within this section if each of conditions A to C is met.

(2) Condition A is that F performs in the UK, for a continuous period of 30 days or more, duties of an office or employment.

(3) Condition B is that the office or employment is under or with a person who-

- (a) is not resident in the UK, but
- (b) is resident outside the UK.

(4) Condition C is that the duties are performed for the benefit of a person who-

- (a) is resident in the UK, or
- (b) carries on a trade, profession or vocation in the UK.

#### 115.4.7 *Withdrawal of notice*

Section 8B TMA provides:

(1) This section applies to a person who is given a notice under section 8 or 8A.

(2) Before the end of the withdrawal period, HMRC may withdraw the notice (whether at the request of the person or otherwise).

(3) But the notice may not be withdrawn if-

- (a) the person has made a return under section 8 or 8A [SA return]<sup>20</sup> in pursuance of the notice under that section, or
- (b) the person has been served with notice of a determination under section 28C by virtue of the notice under section 8 or 8A having been given to the person.

(4) If HMRC decide to withdraw the notice under section 8 or 8A they must do so by giving the person a notice under this section.

(5) A notice under this section must specify the date on which the notice under section 8 or 8A is withdrawn.

---

<sup>20</sup> See 115.4 (Notice to make SA return).

- (6) For the purposes of subsection (2) “the withdrawal period” means—
- (a) the period of 2 years beginning with the end of the year of assessment to which the notice under section 8 or 8A relates, or
  - (b) in exceptional circumstances, such extended period as HMRC may determine<sup>2</sup>.
- (7) Withdrawal of a notice given to a person under section 8 or 8A in relation to a year of assessment does not prevent HMRC from giving the person a further notice under that section in relation to that year.
- (8) See paragraph 17A of Schedule 55 to FA 2009 as to the cancellation of liability to a penalty under any paragraph of that Schedule by including provision in a notice under this section.

I wonder how often that happens.

#### 115.4.8 *Voluntary return*

Section 12D TMA provides:

- (1) This section applies where—
- (a) a person delivers a purported return (“the relevant return”) under section 8, 8A or 12AA (“the relevant section”) for a year of assessment or other period (“the relevant period”),
  - (b) no notice under the relevant section has been given to the person in respect of the relevant period, and
  - (c) HMRC treats the relevant return as a return made and delivered in pursuance of such a notice.
- (2) For the purposes of the Taxes Acts—
- (a) treat a relevant notice as having been given to the person on the day the relevant return was delivered, and
  - (b) treat the relevant return as having been made and delivered in pursuance of that notice (and, accordingly, treat it as if it were a return under the relevant section).
- (3) “Relevant notice” means—
- (a) in relation to section 8 or 8A, a notice under that section in respect of the relevant period;
  - (b) in relation to section 12AA, a notice under section 12AA(3) requiring the person to deliver a return in respect of the relevant period, on or before the day the relevant return was delivered (or, if later, the earliest day that could be specified under section 12AA).
- (4) In subsection (1)(a) “purported return” means anything that—
- (a) is in a form, and is delivered in a way, that a corresponding

return could have been made and delivered had a relevant notice been given, and

(b) purports to be a return under the relevant section.

(5) Nothing in this section affects sections 34 to 36 or any other provisions of the Taxes Acts specifying a period for the making or delivering of any assessment (including self-assessment) to income tax or capital gains tax.

This reverses the decision in *Patel v HMRC* [2018] UKFTT 185 (TC).

There is a pragmatic transitional rule. Section 87 FA 2019 provides:

(3) The amendments made by this section are treated as always having been in force.

(4) However, those amendments do not apply in relation to a purported return delivered by a person if, before 29 October 2018—

(a) the person made an appeal under the Taxes Acts, or a claim for judicial review, and

(b) the ground (or one of the grounds) for the making of the appeal or claim was that the purported return was not a return under section 8, 8A or 12AA of TMA 1970 or paragraph 3 of Schedule 18 to FA 1998 because no relevant notice was given.

## 115.5 s.8 return: self-assessment

Section 9 TMA provides:

(1) Subject to subsections (1A) and (2), every return under section 8 or 8A of this Act shall include a self-assessment, that is to say—

(a) an assessment of the amounts in which, on the basis of the information contained in the return and taking into account any relief or allowance a claim for which is included in the return, the person making the return is chargeable to income tax and capital gains tax for the year of assessment; and

(b) an assessment of the amount payable by him by way of income tax, that is to say, the difference between the amount in which he is assessed to income tax under paragraph (a) above and the aggregate amount of any income tax deducted at source

but nothing in this subsection shall enable a self-assessment to show as repayable any income tax treated as deducted or paid by virtue of section 246D(1) of the principal Act, section 626 of ITEPA 2003 or section 399(2) or 530(1) of ITTOIA 2005.

(1A) The tax to be assessed on a person by a self-assessment shall not

include any tax which—

- (a) is chargeable on the scheme administrator of a registered pension scheme under Part 4 of the Finance Act 2004,
- (aa) is chargeable, on the scheme manager of a qualifying recognised overseas pension scheme or a former such scheme, under Part 4 of the Finance Act 2004,
- (ab) is chargeable on the sub-scheme administrator of a sub-scheme under Part 4 of the Finance Act 2004 as modified by the Registered Pensions (Splitting of Schemes) Regulations 2006, or
- (b) is chargeable on the person who is (or persons who are) the responsible person in relation to an employer-financed retirement benefits scheme under section 394(2) of ITEPA 2003.

(2) A person shall not be required to comply with subsection (1) above if he makes and delivers his return for a year of assessment—

- (a) on or before the 31st October next following the year, or
- (b) where the notice under section 8 or 8A of this Act is given after the 31st August next following the year, within the period of two months beginning with the day on which the notice is given.

(3) Where, in making and delivering a return, a person does not comply with subsection (1) above, an officer of the Board shall if subsection (2) above applies, and may in any other case—

- (a) make the assessment on his behalf on the basis of the information contained in the return, and
- (b) send him a copy of the assessment so made;

(3A) An assessment under subsection (3) above is treated for the purposes of this Act as a self-assessment and as included in the return.

## 115.6 Amending a SA return

Section 9ZA TMA provides:

(1) A person may amend his return under section 8 or 8A [SA return] of this Act by notice to an officer of the Board.

(2) An amendment may not be made more than twelve months after the filing date.

(3) In this section “the filing date”, in respect of a return for a year of assessment (Year 1), means—

- (a) 31st January of Year 2, or
- (b) if the notice under section 8 or 8A is given after 31st October of

Year 2, the last day of the period of three months beginning with the date of the notice.

In *Re Webster*<sup>21</sup> a taxpayer sought to amend his return by the equitable remedy of rectification. No-one had ever thought of that before. A High Court master held that it had no jurisdiction to rectify a tax return, and while decisions of High Court masters are not strictly precedents, that seems clearly right. Amendment is only possible under the statutory procedure.

## 115.7 Enquiries

Section 9A(1) TMA provides:

An officer of the Board may enquire into a return under section 8 or 8A of this Act [SA return]<sup>22</sup> if he gives notice of his intention to do so (“notice of enquiry”)—

- (a) to the person whose return it is (“the taxpayer”),
- (b) within the time allowed.

HMRC do not need any justifiable suspicion in order to open an enquiry. That is inconsistent with the HMRC Charter (“We’ll assume you’re telling the truth, unless we’ve good reason to think you’re not.”). But no-one takes any notice of that.

### 115.7.1 Enquiry time limit

Section 9A(2) TMA provides:

The time allowed is—

- (a) if the return was delivered on or before the filing date,<sup>23</sup> up to the end of the period of twelve months after the day on which the return was delivered;
- (b) if the return was delivered after the filing date, up to and including the quarter day<sup>24</sup> next following the first anniversary of the day on which the return was delivered;
- (c) if the return is amended under section 9ZA of this Act, up to

21 [2020] EWHC 2275 (Ch).

22 See 115.4 (Notice to make SA return).

23 Section 9A(6) TMA provides: “In this section “the filing date” means, in relation to a return, the last day for delivering it in accordance with section 8 or 8A.”

24 Section 9A(2) TMA provides: “For this purpose the quarter days are 31st January, 30th April, 31st July and 31st October.”

and including the quarter day next following the first anniversary of the day on which the amendment was made.

In short, HMRC have 12 months in which to begin an enquiry into a tax return. I refer to this as the “**one-year enquiry window**”.

### 115.7.2 *Only one enquiry*

Section 9A(3) TMA provides:

A return which has been the subject of one notice of enquiry may not be the subject of another, except one given in consequence of an amendment (or another amendment) of the return under section 9ZA of this Act.

In short, only one enquiry is allowed. But as an enquiry will normally take at least one year, this will not often arise.

### 115.7.3 *Scope of enquiry*

Section 9A TMA provides:

(4) An enquiry extends to—

- (a) anything contained in the return, or required to be contained in the return, including any claim or election included in the return,
- (b) consideration of whether to give the taxpayer a transfer pricing notice under section 168(1) of TIOPA 2010 (provision not at arm’s length: medium-sized enterprise),
- (c) consideration of whether to give the taxpayer a notice under section 81(2) of TIOPA 2010 (notice to counteract scheme or arrangement designed to increase double taxation relief),

but this is subject to the following limitation.

(5) If the notice of enquiry is given as a result of an amendment of the return under section 9ZA of this Act—

- (a) at a time when it is no longer possible to give notice of enquiry under subsection (2)(a) or (b) above,
- (b) after a final closure notice has been issued in relation to an enquiry into the return, or
- (c) after a partial closure notice has been issued in such an enquiry in relation to the matters to which the amendment relates or which are affected by the amendment,

the enquiry into the return is limited to matters to which the amendment relates or which are affected by the amendment.

## 115.8 Assessment after enquiry window

Section 29(1) TMA provides an assessment may be made after the one-year enquiry window in certain cases:

If an officer of the Board or the Board discover, as regards any person (the taxpayer) and a year of assessment—

- (a) that any income which ought to have been assessed to income tax, or chargeable gains which ought to have been assessed to capital gains tax, have not been assessed, or
  - (b) that an assessment to tax is or has become insufficient, or
  - (c) that any relief which has been given is or has become excessive,
- the officer or, as the case may be, the Board may, subject to subsections (2) and (3) below, make an assessment in the amount, or the further amount, which ought in his or their opinion to be charged in order to make good to the Crown the loss of tax.

Assessments under s.29 are known as “**discovery assessments**”, but apart from s.29, there is no further power or kind of assessment.

Statute frequently refers to:

the situation mentioned in subsection (1) above

I gloss this as the “**insufficiency in the assessment**” or just “**insufficiency**”.

Discovery assessments are subject to a number of restrictions:

<b>Restriction</b>	<b>See para</b>
IT/CGT assessment time limits	115.12
Prevailing practice defence	115.8.3
Carelessness condition	115.8.4
Full-disclosure requirement	115.9

### 115.8.1 *Discovery requirement*

The requirement that HMRC must “discover” an insufficiency is not onerous, and taxpayers have not generally succeeded on arguments that an assessment is invalid because there have been no “discovery”. In *Charlton v HMRC*.<sup>25</sup>

[37] In our judgment, no new information, of fact or law, is required for

25 [2012] UKUT 770 (TCC).

there to be a discovery. All that is required is that it has newly appeared to an officer, acting honestly and reasonably, that there is an insufficiency in an assessment. That can be for any reason, including a change of view, change of opinion, or correction of an oversight. The requirement for newness does not relate to the reason for the conclusion reached by the officer, but to the conclusion itself..

[44] ...a discovery assessment can be made merely where the original officer of HMRC changes his mind or where a different officer takes a different view.

### 115.8.2 *HMRC delay*

Delay by HMRC does not mean that there is no discovery. Efficiency and expeditiousness in tax administration would no doubt be desirable; but the legislation does not make this a requirement. In *HMRC v Tooth*:<sup>26</sup>

there is no place for the idea that a discovery which qualifies as such should cease to do so by the passage of time. That is unsustainable as a matter of ordinary language and, further, to import such a notion of staleness would conflict with the statutory scheme. That sets out a series of limitation periods for the making of assessments to tax, each of them expressed in positive terms that an assessment “may be made at any time” up to the stated time limit... it is perfectly possible, as a matter of ordinary language, to speak of someone making a discovery for himself or herself even if it is something already known to others. ... since section 29(1) is concerned, so far as is relevant, with a discovery made by an officer of the Board, the question is whether the officer of the Board who is deciding whether to make a discovery assessment under that provision has subjectively made a discovery that there has been an under-assessment of tax.

There is the possibility of judicial review in an extreme case; but the facts would have to be very unusual, and I doubt if it would ever happen.

### 115.8.3 *Prevailing practice defence*

Section 29(2) TMA provides:

Where—

- (a) the taxpayer has made and delivered a return under section 8 or

---

<sup>26</sup> [2021] UKSC 17 at [76]-[78].

8A of this Act [SA return]<sup>27</sup> in respect of the relevant year of assessment, and

- (b) the situation mentioned in subsection (1) above [the insufficiency] is attributable to an error or mistake in the return as to the basis on which his liability ought to have been computed,

the taxpayer shall not be assessed under that subsection in respect of the year of assessment there mentioned if the return was in fact made on the basis or in accordance with the practice generally prevailing at the time when it was made.

What constitutes the “practice generally prevailing” is a question of fact.<sup>28</sup> A statement in an HMRC Manual is not conclusive proof of HMRC practice, but it is strong evidence.

The issue has given rise to much litigation. *Hargreaves v HMRC* summarised the law in numbered propositions:

- (1) The practice has to be one adopted by taxpayers and HMRC alike;
- (2) The practice must be capable of being readily ascertainable by the parties ie it must have substance (in the sense of not being inchoate), and be sufficiently precise and devoid of uncertainty as to its application;
- (3) A practice would not exist if it was equivocal or dependent on the ascertainment of facts, except where the criteria for its application by reference to the facts were themselves understood with a sufficient degree of precision so as to make the practice one that can be readily applied in any given case;
- (4) The practice must have been adopted by HMRC and generally, if not universally, by the taxpayer community;
- (5) A practice will not be generally prevailing if it is not agreed, or respected, as a whole, either by HMRC failing to apply every element of the practice in every case where it should be applied, or by taxpayers adopting only those parts that are favourable to them, but disputing others that are not;
- (6) The practice must be settled which will not be the case if it is articulated or applied otherwise than in a consistent manner or if it is based on criteria which are subject to change depending on the

---

27 See 115.4 (Notice to make SA return).

28 This is self-evident, but if authority is needed, see *Boyer Allan Investment Services v HMRC* [2012] UKFTT 558 (TC); *Turners (Soham) v HMRC* [2019] UKFTT 131.

particular circumstances or the facts of a particular case;  
(7) If the facts are relevant to the application of a practice, the relevant factors must themselves be clear and unequivocal; and  
(8) Mere inactivity can in appropriate circumstances give rise to a practice. But such an omission must also be capable of articulation in the same way as a positive act. It must have both clarity and substance. Its parameters must be clearly defined so that the general acceptance amounts to the same unequivocal understanding.<sup>29</sup>

#### 115.8.4 *Carelessness condition*

Section 29 TMA provides:

(3) Where the taxpayer has made and delivered a return under section 8 or 8A of this Act [SA return]<sup>30</sup> in respect of the relevant year of assessment, he shall not be assessed under subsection (1) above—  
(a) in respect of the year of assessment mentioned in that subsection; and  
(b) in the same capacity as that in which he made and delivered the return,

unless one of the two conditions mentioned below is fulfilled.

(4) The first condition is that the situation mentioned in subsection (1) above [the insufficiency] was brought about carelessly or deliberately by the taxpayer or a person acting on his behalf.

I refer to this condition as the “**carelessness condition**”.

#### 115.9 Full-disclosure requirement

Section 29 TMA provides:

(3) Where the taxpayer has made and delivered a return under section 8 or 8A of this Act [SA return]<sup>31</sup> in respect of the relevant year of assessment, he shall not be assessed under subsection (1) above—  
(a) in respect of the year of assessment mentioned in that subsection; and  
(b) in the same capacity as that in which he made and delivered the return,

unless one of the two conditions mentioned below is fulfilled...

---

29 [2019] UKFTT 244 (TC) at [24].

30 See 115.4 (Notice to make SA return).

31 See 115.4 (Notice to make SA return).

The second condition is:

(5) The second condition is that at the time when an officer of the Board—

- (a) ceased to be entitled to give notice of his intention to enquire into the taxpayer’s return under section 8 or 8A of this Act [SA return] in respect of the relevant year of assessment;<sup>32</sup> or
- (b) in a case where a notice of enquiry into the return was given—
  - (i) issued a partial closure notice as regards a matter to which the situation mentioned in subsection (1) above [the insufficiency] relates, or
  - (ii) if no such partial closure notice was issued, issued a final closure notice,

the officer could not have been reasonably expected, on the basis of the information made available<sup>33</sup> to him before that time, to be aware of the situation mentioned in subsection (1) above [the insufficiency].

The wording is a little convoluted, but the question is essentially a short one: could HMRC be expected to be aware of the insufficiency?

In the following discussion:

The **“full disclosure<sup>34</sup> requirement”** is the condition in s.29(5)

The officer in s.29(5) is the **“hypothetical<sup>35</sup> officer”** or just “HMRC”

The advantage of full disclosure is that after the one-year enquiry window has passed, HMRC cannot raise a discovery assessment.<sup>36</sup> If a taxpayer wants security that a matter will be closed at the end of the enquiry year, therefore, it is necessary to disclose sufficient facts that HMRC should be aware of any insufficiency.

Full disclosure is a voluntary matter. Taxpayers are entitled to weigh up

32 See 115.7.1 (Enquiry time limit).

33 See 115.10.6 (Information available to HMRC).

34 “Full disclosure” is a context-sensitive term, but I use it to mean disclosure which meets the high standard which precludes a discovery assessment after the one-year enquiry window. I am not using the term literally, as obviously one cannot disclose everything.

35 Although the word hypothetical is always employed in this context, it does not add much. The hypothetical reasonable inspector is no more hypothetical than the reasonably careful taxpayer, or advisor, or anyone who is judged by an objective standard of reasonable care. But it does not matter.

36 Except on the basis of careless/deliberate error.

the advantages of full disclosure (finality after the one-year enquiry window) against the advantages of lesser disclosure (letting sleeping dogs lie), provided they do disclose so far as required by law.<sup>37</sup>

### 115.10 Full-disclosure standard

*Sanderson v HMRC* sets out the law in numbered paragraphs:<sup>38</sup>

- (1) the officer [referred to in s.29(5)] is not the actual officer who made the assessment ... but a hypothetical officer;
- (2) the officer has the characteristics of an officer of general competence, knowledge or skill which include a reasonable knowledge and understanding of the law;

The hypothetical officer is the counterpart of the reasonable taxpayer who sets a taxpayer's standard of care.

- (3) where the law is complex even adequate disclosure by the taxpayer may not make it reasonable for the officer to have discovered the insufficiency on the basis of the information disclosed at the time: see *Lansdowne* at [69];<sup>39</sup>

But in these complex cases, the taxpayer can deal with this by explaining in addition to the facts:

- (1) The law
- (2) The practice and guidance, where relevant (which it would be, if the taxpayer is not following HMRC practice or guidance)
- (4) what the hypothetical officer must have been reasonably expected to be aware of is an actual insufficiency: see *Langham v Veltema*:<sup>40</sup>
  33. [Section 29(5)] is concerned, not with what an Inspector could reasonably have been expected to do, but with what he could have been reasonably expected to be aware of. It speaks of an Inspector's objective awareness, from the information made available to him by the taxpayer, of ... an actual insufficiency in the assessment, not an objective awareness that he should do something to check whether

---

37 See 116.8 (Disclosing doubt/further information).

38 [2016] EWCA Civ 19 at [17].

39 "...even where the taxpayer has disclosed enough factual information, there may be circumstances in which an officer could not reasonably be expected to be aware of an insufficiency by reason of the complexity of the relevant law."

40 [2004] EWCA Civ 193.

there is such an insufficiency...

34. ... the subsection provides an objective test of awareness of insufficiency... It also allows, as section 29(6) expressly does, for constructive awareness of insufficiency, that is, for something less than an awareness of an insufficiency, in the form of an inference of insufficiency.<sup>41</sup>

In *Langham v Veltema* the taxpayer argued that a reasonable officer should have:

- (1) taken the view that an assessment based on a valuation needs checking (as the HMRC Manual directed);
- (2) instructed Valuation Office to check, which would have revealed the £45k shortfall.

The Court of Appeal rejected the argument. The reader might think that the decision of the High Court, which CA rejected, provided a better balance between the conflicting policy aims, that HMRC should collect tax where due, and that taxpayers should be able to obtain finality, so they can better conduct their lives; but the law is settled.

#### 115.10.1 *Full-disclosure/discovery compared*

There can be an overlap between the issues in:

- (1) The full-disclosure requirement in s.29(5) (HMRC expected to be aware of insufficiency)
- (2) The discovery requirement in s.29(1)<sup>42</sup> (HMRC discover an insufficiency)

In *Sanderson v HMRC*:<sup>43</sup>

The exercise of the s.29(1) power [to make a discovery assessment] is made by a real officer who is required to come to a conclusion about a possible insufficiency based on all the available information at the time when the discovery assessment is made.

Section 29(5) operates to place a restriction on the exercise of that power by reference to a hypothetical officer who is required to carry out an evaluation of the adequacy of the return at a fixed and different point in time on the basis of a fixed and limited class of information. The

---

41 [2016] EWCA Civ 19.

42 See 115.8.1 (Discovery requirement).

43 [2016] EWCA Civ 19 at [25].

purpose of the condition is to test the adequacy of the taxpayer's disclosure, not to prescribe the circumstances which would justify the real officer in exercising the s.29(1) power.

Although there will inevitably be points of contact between the real and the hypothetical exercises which ss.29(1) and (5) involve, the tests are not the same.

In *Hicks v HMRC*:

We know that by summer of 2014 the evidence of the real officer—relevant to subsection (1) but not subsection (5)—was that he had crossed the threshold for a discovery. While the real officer must not be confused with the hypothetical officer, it is in my opinion not unreasonable to assume that the hypothetical officer would be likely to be in a similar position by that stage in terms of his awareness of an insufficiency in the 2010-11 return. As the Court of Appeal acknowledged in *Sanderson*, at [25], "... there will inevitably be points of contact between the real and hypothetical exercises which sub-ss 29(1) and (5) involve [although] the tests are not the same."<sup>44</sup>

### 115.10.2 *Full disclosure/carelessness compared*

A discovery assessment may raise issues of carelessness and full disclosure. There may be some tension between the two lines of argument. In *Cooke v HMRC*:<sup>45</sup>

HMRC are arguing that the appellant's accountant was careless in not identifying that the claims were excessive, but at the same time an HMRC officer could not have been expected to pick the point up. The appellant argues the opposite: the accountant was not careless but an HMRC officer should have been able to spot the problem.

On the facts of that case, the taxpayer was not careless (having relied reasonably on faulty software) but the hypothetical officer should have been aware of the insufficiency.

### 115.10.3 *Disclosing valuations*

SP 1/06 provides:

Most taxpayers who use a valuation in completing their tax return and

---

<sup>44</sup> at [109].

<sup>45</sup> [2017] UKFTT 844 (TC) at [28].

state in the Additional Information space at the end of the Return that

- [1] a valuation has been used,
- [2] by whom it has been carried out, and
- [3] that it was carried out by a named independent and suitably qualified valuer if that was the case, on the appropriate basis,

will be able, for all practical purposes, to rely on protection from a later discovery assessment, provided those statements are true.

The statements do not actually meet the full-disclosure standard, as interpreted in *Veltema*, because the hypothetical officer would not know the expert valuation was wrong. So this practice is concession not law.

A post-transaction valuation offers a route to certainty; the form is CG34.<sup>46</sup>

#### 115.10.4 *Allocation to income/capital*

SP 1/06 provides:

Most taxpayers will be able to gain finality with exceptional items in accounts. An example might be a deduction in the accounts under Repairs. If an entry in the Additional Information space points out that a programme of work has been carried out that included repairs, improvements and new building work and that the total cost has been allocated to revenue and capital on a particular basis, the inspector should not enquire after the closure of the enquiry period unless he becomes aware that the statement was patently untrue or unreasonable.

This is unobjectionable as far as it goes; though in practice everything would depend on the wording of the statement in the return.

Would it suffice if the information was in a note to the accounts rather than in the white space in the return? Discuss.

#### 115.10.5 *Disagreeing with HMRC view*

SP 1/06 provides:

##### ***Taking a Different View***

18. It is open to a taxpayer properly informed or advised to adopt a different view of the law from that published as HMRC's view. To protect against a discovery assessment after the enquiry period, the return or accompanying documents would have to indicate that a

---

46 See too 93.10 (Valuation for ATED); 116.9 (When disclosure required).

different view had been adopted. This might be done by comments to the effect that the taxpayer has not followed HMRC guidance on the issue or that no adjustment has been made to take account of it. This would offer an opportunity to HMRC to take up the return for enquiry. It is not necessary to provide all the documentation that HMRC might need to quantify that insufficiency if an enquiry into the Return is made. 19. Provided the point at issue is clearly identified and the stance adopted is not wholly unreasonable, the existence of an under-assessment or insufficiency is demonstrated by the statement that a different view of the law has been followed. In these circumstances the taxpayer achieves finality if no enquiry is opened within the statutory time limit.

This applies when the HMRC view is published in a clear statement, typically in a SP or in a Manual. I think in principle if a failure to follow published guidance is not drawn to HMRC's attention they could not reasonably be expected to be aware of an insufficiency, so the full-disclosure requirement is not met.<sup>47</sup> This would not apply if the HMRC view was clearly wrong or out of date or not clearly stated.

By contrast, if there is no publically published view, there is no need to indicate that a different view has been adopted from one which may, or may not, be the HMRC view on this occasion.

In *R v HMRC ex p. Pattullo*<sup>48</sup> the taxpayer entered into a CGT avoidance scheme. He did not disclose that he had taken a different view from the CG manual.<sup>49</sup> The judge said:

The necessity to make such a declaration in order to comply with the duty to clearly alert has been held to exist in *HMRC v Household Estate Agents* where it was held as follows:

“Taxpayers who adopt a different view of the law from that published as HMRC's can protect against a discovery assessment after the enquiry period. The return and accounts would have to indicate that a different view had been adopted by entering comments to the effect that they did not follow HMRC guidance on

---

47 If the circumstances are such that a reasonable taxpayer would disclose, non-disclosure may constitute a failure to take reasonable care, see 116.9.2 (Disclosure that HMRC disagree).

48 [2010] STC 107. For other aspects of this case, see above.

49 That may be factually incorrect, the judge did not set out the relevant text of the Manual, but that does not affect the point of principle.

the issue or that no adjustment had been made to take account of it.”

This quotes a *submission* made by HMRC, which did not form part of the Commissioners decision in favour of the taxpayer.<sup>50</sup> Nevertheless it seems sound. Perhaps in a tax avoidance context, a higher standard is required to meet the full-disclosure requirement.

#### 115.10.6 Information available to HMRC

Section 29(6) TMA provides:

For the purposes of subsection (5) above, information is made available to an officer of the Board if—

- (a) [i] it is contained in the taxpayer’s return<sup>51</sup> under section 8 or 8A of this Act [SA return] in respect of the relevant year of assessment (the return), or
  - [ii] in any accounts, statements or documents accompanying the return;
- (b) [i] it is contained in any claim made as regards the relevant year of assessment by the taxpayer acting in the same capacity as that in which he made the return, or
  - [ii] in any accounts, statements or documents accompanying any such claim;
- (c) it is contained in any documents, accounts or particulars which, for the purposes of any enquiries into the return or any such claim by an officer of the Board, are produced or furnished by the taxpayer<sup>52</sup> to the officer; or
- (d) it is information the existence of which, and the relevance of which as regards the situation mentioned in subsection (1) above [the insufficiency]—
  - (i) could reasonably be expected to be inferred by an officer of the Board from information falling within paragraphs (a) to

---

50 78 TC 705 at [10]. For completeness, the Commissioners decision in *Household Estate Agents* was reversed on other grounds on appeal.

51 Section 29(7) TMA provides: “In subsection (6) above—

- (a) any reference to the taxpayer’s return under section 8 or 8A of this Act in respect of the relevant year of assessment includes—
  - (i) a reference to any return of his under that section for either of the two immediately preceding years of assessment...”

52 Section 29(7) TMA provides: “In subsection (6) above... (b) any reference in paragraphs (b) to (d) to the taxpayer includes a reference to a person acting on his behalf.”

- (c) above; or
- (ii) are notified in writing by the taxpayer to an officer of the Board.

These are the only sources of information to be taken into account for that purpose. That is, information counts as available *only* if it falls within the categories of s.29(6).<sup>53</sup>

Other information does not count as available, such as:

- (1) Information (such as a valuation) not supplied to HMRC (though they could and should have asked for it)<sup>54</sup>
- (2) Form P11D (employee benefits) provided by the employer to HMRC;<sup>55</sup> or form P14 provided by the employer to the employee<sup>56</sup>
- (3) Information obtained by HMRC as a result of its own investigation<sup>57</sup>
- (4) Material which HMRC requested in correspondence but not supplied<sup>58</sup>
- (5) Information supplied orally (unless later put in writing)<sup>59</sup>

Information which does count as “available” includes:

- (1) Information which scheme promoters supplied HMRC in form AAG1 (DOTAS notification by scheme promoter) when the taxpayer gave the DOTAS reference number in the return. This is information “available” under s.29(6)(d)(i).<sup>60</sup> Information can fall within s.29(6)(d)(i) even if it does not come from the taxpayer.
- (2) Information in taxpayer correspondence with HMRC. This is information “available” under s.29(6)(d)(ii).<sup>61</sup>

### 115.10.7 Information overload

To provide HMRC with too much information may make it harder to identify what is relevant. Where does a wise man hide a leaf?

---

<sup>53</sup> This is self-evident, but if authority is needed, see *Sanderson v HMRC* [2016] EWCA Civ 19; *Langham v Veltema* [2004] EWCA Civ 193 at [36].

<sup>54</sup> See *Langham v Veltema* [2004] EWCA Civ 193 at [51]; followed on this point in *HMRC v Household Estate Agents* 78 TC 705.

<sup>55</sup> *Veltema v HMRC*.

<sup>56</sup> HMRC would know that the form existed, but not that it held relevant information: *Blum v HMRC* [2018] UKFTT 152.

<sup>57</sup> *Sanderson v HMRC* at [40].

<sup>58</sup> *Hicks v HMRC* at [100].

<sup>59</sup> *HMRC v Landsowne Partners Ltd Partnership* [2012] STC 533 at [48].

<sup>60</sup> *Charlton v HMRC*.

<sup>61</sup> *HMRC v Landsowne Partners Ltd Partnership* [2012] STC 533 at [63].

SP 1/06 provides:

9. A taxpayer can further restrict the opportunity for discovery [assessments] by providing enough information for an HMRC officer to realise within the enquiry period that the self-assessment is insufficient. However taxpayers are encouraged to submit the minimum necessary to make disclosure of an insufficiency. The *Veltema* judgement does not require the provision of enough information to quantify the effect on the assessment. Information will not be treated as being made available where the total amount supplied is so extensive that an officer ‘could not have been reasonably expected to be aware’ of the significance of particular information and the officer’s attention has not been drawn to it by the taxpayer or taxpayer’s representative.

### 115.11 Full-disclosure: Examples

Although the decisions are “not always readily reconcilable”<sup>62</sup> there is no more disarray than usual in a large body of case law.

*Hicks v HMRC* outlines the principle:

The taxpayer is incentivised by the legislation to place HMRC in a position where he can put them to proof at the close of the enquiry window with the question “what more need I have disclosed to have placed the officer in a position to be justified in raising an assessment?”<sup>63</sup>

#### 115.11.1 Non-avoidance examples

In *Langham v Veltema*<sup>64</sup> a company transferred a property to a director, whose income tax liability therefore depended on the market value of the property. The taxpayer obtained a professional valuation which valued the land at £100k. It was in fact worth £145k.

The return provided:

Assets transferred/payments made for you: £100,000

Other benefits-in-kind: Asset placed at disposal of Employee: £100,000

This indicated that the company had transferred an asset to the taxpayer,

---

62 *Hicks v HMRC* at [76].

63 [2018] UKFTT 22 (TC) at [87].

64 [2004] EWCA Civ 193.

but did not identify the asset.<sup>65</sup>

It was said that the officer could reasonably infer that the tax return depended on a valuation (though that does not seem self-evident, if the asset transferred is not identified).

The disclosure fell short of the full-disclosure requirement:

38. On the facts of the case before the General Commissioners... there was no basis upon which they could have found that the Inspector ought reasonably to have been aware ... that information may well have led him to conclude that the assessment had been based on a valuation of £100,000, but there was nothing to suggest that the valuation was unreliable.

Once one accepts that the test is what the officer is aware of, rather than what the officer should be aware of if they made the enquiries they should, this answer is inevitable.

In *Cooke v HMRC*<sup>66</sup> the return gave the following information about foreign dividends:

<b>Country</b>	<b>Income before tax taken off</b>	<b>Foreign tax taken off/paid</b>
France	103,083	30,523
Canada	15,636	3,845

The mistake (caused by software error) was that claim for foreign tax credit relief was too large. It overlooked that the French/Canadian DTAs (following the OECD Model) reduced the French/Canadian tax on the dividend to 15% of the dividend.<sup>67</sup>

The tax return met the full-disclosure requirement:

37 ... the hypothetical officer ... could have been reasonably expected to be aware that the double tax relief claims in the appellant's return were excessive. I would expect any HMRC officer of general competence, knowledge or skill to have some understanding of double tax relief, including that there are limitations on the relief that can be claimed. 15% rate is a standard rate, and in fact generally the maximum treaty

---

65 The company's form P11D (employee benefits) identified the asset as a house, but that form was not "available" to the officer; see 115.10.6 (Information available to HMRC). In any case it would have made no difference if the asset had been identified as the house.

66 [2017] UKFTT 844 (TC).

67 See 29.9 (DT relief: Dividend income).

rate, for portfolio dividends from companies in jurisdictions with which the UK has double tax arrangements in place... The point is not a complex one, and in my view it did not require any “white space” entry or other flagging up ... A hypothetical officer with a “reasonable knowledge and understanding of the law” ... should have been able to ascertain that the claims were excessive. Although percentages are not included, it is pretty obvious from looking at the figures ... that the amounts claimed were materially in excess of 15%. The percentages claimed could readily be calculated from the figures in the return. This is well illustrated by the fact that [HMRC] did not require any additional information in order to raise the discovery assessment, or to conclude the enquiry for the subsequent year.

38. ... I do not think that a claim to double tax relief in respect of withholding tax on dividends is a matter of any real complexity or that it requires particular specialist knowledge within HMRC.

Thus the hypothetical reasonable inspector is expected to have a sound knowledge of tax; and the reader may think that is quite right, while still doubting how many inspectors actually pass that standard.

#### 115.11.2 *Tax avoidance examples*

In *R v HMRC ex p. Pattullo*<sup>68</sup> the taxpayer entered into a CGT avoidance scheme using second-hand policies. The return provided:

On [date] I settled an interest in possession trust with £6k.  
 I had borrowed on commercial terms a sum of £2.665m from Investec Bank UK Ltd and settled this amount into the trust.  
 The trustees used the funds to acquire a number of capital redemption contracts [and transferred them]<sup>69</sup> to me on [date].  
 I surrendered the capital redemption contracts on [date] and received redemption proceeds of £2.6m.  
 This has given rise to a capital loss as a consequence of s.37(1) TCGA 1992 amounting to £2.665m.

This sets out exactly what happened. However the Court of Session held that this did not reach full-disclosure requirement. An officer knowing these facts would not be aware of an insufficiency:

---

68 [2009] CSOH 137. Note incidentally that the Latin *ex parte* which has been rejected in English law usage seems to have survived in Scotland.

69 The context shows that some words like this were omitted from the law report.

[114] ...the white space does not contain the following:

1. A statement that Mr Pattullo was a participant in the CRC Mark II tax avoidance scheme.

The important point was not the name of the scheme but that it was a marketed scheme. But this is not likely to arise now, because of DOTAS (and the GAAR).

2. A statement that the petitioner and his advisers had adopted a different view of the law from that published as HMRC's...<sup>70</sup>
3. There is no explanation as to how Mr Pattullo contends that Section 37 operates in order to produce the capital loss.
4. The details other than the basics of the transactions which have been entered into are not contained within the white space.

The judge wisely does not seek to identify what details were missing.

5. There is no indication of any doubt in the disclosure that the petitioner is entitled to the loss. I accept ... that the taxpayer does not require in order to clearly alert to say there is an insufficiency as of course that is not his position. However, in circumstances such as this a reference to doubt or as I have said to the fact that it is, a position contrary to HMRC's would be necessary to comply with the duty incumbent upon him.

In the absence of information of the type as above described an inspector ... could not in my judgment have been aware of actual insufficiency. ...

The judge does not say whether it is generally necessary to indicate a doubt in order to meet the full-disclosure requirement. It is suggested that this should not be necessary except in special cases. There must always be some doubt when there is a white box disclosure, for if there is no doubt, what is the point of disclosure?

A less onerous view of the full-disclosure requirement was taken in *Charlton v HMRC*.<sup>71</sup> This was another second-hand policy scheme, so the taxpayer was no more meritorious. The disclosure was essentially as follows:

I acquired a life policy on [date] for £205k.

I made a partial surrender of the policy on [date] for £192k.

---

70 See 115.10.5 (Disagreeing with HMRC view).

71 [2012] UKFTT 770 (TCC).

I sold my residual interest in the policy on [date] for £10k.

The loss on sale is calculated as the difference between the sale proceeds and the cost of acquisition.

Proceeds from the partial surrender are excluded from the capital gains calculation as they have already been taken into account as a receipt in computing income for the purposes of income tax.

The DOTAS scheme number was disclosed on the return so the disclosure was better than *Pattullo* in that respect.<sup>72</sup>

It was not mentioned that the scheme had been held to be unsuccessful by the Special Commissioners in *Drummond v HMRC*,<sup>73</sup> the advisers having formed the bold view that *Drummond* was wrongly decided.<sup>74</sup>

This met the full-disclosure requirement:

[93] We do not accept that

[1] there is any overriding requirement that the information has to explain how the scheme works ... nor

[2] that the information must specify, if it be the case, that the view adopted by the taxpayer is different from that taken by HMRC.

It is a question of degree in all cases. ... the factors the tribunal identified as being those the hypothetical officer would have known from the information made available to him ... were of themselves sufficient so that the hypothetical officer should have been aware of the insufficiency. It is not necessary that the hypothetical officer should have been able to comprehend all the workings of the scheme, or the legal and factual arguments that might arise, or be able to form a reasoned view of those matters. Having regard to the knowledge and understanding that we consider the hypothetical officer might reasonably be expected to have, the difference between the allowable loss claimed and the income declared was enough, in our judgment, to justify an officer making the assessment.<sup>75</sup>

*Sanderson* concerned a CGT avoidance scheme known as the Castle Trust. The disclosure was:

---

<sup>72</sup> This did not happen in *Pattullo* because the transactions were carried out before DOTAS.

<sup>73</sup> 79 TC 793.

<sup>74</sup> The tribunal (perhaps surprisingly) found this to be a reasonable view, though it turned out to be wrong, as the Special Commissioner's decision was subsequently upheld.

<sup>75</sup> [2012] UKFTT 770 (TCC) at [93].

I am entitled to the loss of £1,825,663 by virtue of the provisions of TCGA 1992 s.71(2). The loss is part of a loss of £1,000,000,000, which accrued to the Trustees of the Castle Trust on 8th April 1997, on the disposal of a European Average rate Option (Trade No. 82831) relating to shares in Deutsche Telecom.

On 24th November 1998, I purchased for a fee (part of which is contingently payable) from the Trustees of the Charter Trust 2.273% of their beneficial interest in the Trust Fund of the Castle Trust. The interest determined on 25th November 1998, when I became absolutely entitled to receive from the Trustees of the Castle Trust the sum of £16.04.

This did not begin to meet the full-disclosure requirement. The return only disclosed half the steps under which the loss accrued to the trust.<sup>76</sup>

*Hicks v HMRC* concerned an IT avoidance scheme. The information available on the tax return included the following:

Occupation: trader, with trading turnover of approximately £2.7 million and trading expenses of approximately £2.5 million.

The return also shows a further deduction of £1.5 million, and a non-taxable receipt of £1.5 million.

The carried forward loss is shown as approximately £1.2 million.

The information available (via DOTAS form AAG1) was:

The arrangement is available to self employed derivative traders who work at least 10 hours per week on average in the trade. The trader acquires dividend rights but while the cost of such rights is a deductible expense of the trade the income is not taxable per section 730 TA 1988

1. An individual is a self employed trader carrying on business on a commercial basis with a view to profit.
2. The trader acquires at a discount the right to receive dividends declared but not yet paid.
3. The income is on the other hand not taxable due to section 730 TA 1988. The result is a net loss for tax purposes to the trader.
4. Those traders who meet the condition of working in their trade on average 10 hours per week may be able to offset any loss for sideways loss relief purposes

---

<sup>76</sup> In short: The scheme steps included an option and a counter-option and a migration to the UK; [2016] EWCA Civ 19.

This was sufficient to meet the full-disclosure requirement:

the hypothetical officer had sufficient information available ... at closure of the enquiry window to make it reasonable for him to have been justified in raising an assessment for the insufficiency. The central issues, relating to section 730 and trading, were not matters of such complexity that the disclosure did not achieve this result.

In *Smith v HMRC*<sup>77</sup> the disclosure was:

During the period Mr Smith acquired a non-qualifying second hand insurance bond for £532,695.

This bond was subsequently redeemed in full, on 6 March 2001 for an amount of £483,228.93.

For tax purposes the surrender proceeds fall to be taxed under both s.54 1TA 1988 (income) and s.22 TCGA 1992 (capital gains).

For income purposes a charge arises equal to the excess of surrender proceeds over premiums paid into the policy. In the case of Mr Smith the income arising is:

Proceeds received on surrender	483,228
Premiums paid into the policy	<u>(510,000)</u>
Income Charge	<u>Nil</u>

In calculating the capital gain arising on the final surrender the proceeds are again the amount received on surrender. However, s.37 TCGA 1992 provides that sale proceeds which have been taken into account for income purposes should not be taken into account for capital gains purposes. As the proceeds of £483,228.93 have been taken into account above in calculating the chargeable event gain, the proceeds for capital gains tax purposes are-

Proceeds received on surrender	483,228
Less amounts excluded under s.37 TCGA 1992	<u>(483,228)</u>
Proceeds for capital gains purposes	<u>Nil</u>

The expenditure incurred for capital gains purposes is the amount paid by Mr Smith for the bond i.e. £532,695.

The capital gains tax computation on surrender of the bond is:

Sale proceeds (as above)	0
Allowable expenditure (as above)	<u>(532,695)</u>
Capital gain/(loss)	<u>(532,695)</u>

<sup>77</sup> *Smith v HMRC* [2013] UKFTT 368 (TC).

This was not sufficient to amount meet the full-disclosure requirement:

79. The return does not specifically draw the officer's attention to the fact that Mr Smith participated in a tax avoidance scheme during the year. That was held to be a relevant factor in the Scottish case of *Pattullo* (at [115]). In our view, although it is relevant it is only one of several relevant factors (and we understand the Outer House to be saying as much at [114]) – we note that the Tribunal in *Blumenthal* took a different view (at [204 – 205]). (In *Charlton* the point did not arise – or more accurately, was a foregone conclusion – because the return included a registered tax avoidance scheme reference number.)

80. The white space entries describe the acquisition and redemption of the bond; they cross-refer between the income pages and the capital gain pages; they cite s 541 TA 1988 and ss 22 & 37 TCGA 1992; they show the (simple) calculation of nil income and a £532,695 capital loss on redemption; and they give a short description of how those results are obtained.

81. An important and relevant point arising from *Lansdowne Partners* concerns the degree of complexity of the legal position governing the matter under consideration. In that case the contentious item concerned the deductibility of payments to partners, a matter on which there was clear House of Lords authority (see [50]). Moses LJ stated:

[69] ... The legal points were not complex or difficult. As the Chancellor points out (at [56]), awareness of an insufficiency does not require resolution of any potential dispute. After all, once an amendment is made, it may turn out after complex debate in a succession of appeals as to the facts or law, that the profits stated were not insufficient. I have dwelt on this point because I wish to leave open the possibility that, even where the taxpayer has disclosed enough factual information, there may be circumstances in which an officer could not reasonably be expected to be aware of an insufficiency by reason of the complexity of the relevant law.

82. In our opinion the relevant law relating to the scheme adopted by Mr Smith was of a degree of complexity such as to make it unreasonable for the officer to be aware of an insufficiency on the basis of the information contained in Mr Smith's tax return.

We do consider that the information was sufficient to warrant the hypothetical officer opening a s 9A enquiry – but that is not the relevant

test.<sup>78</sup>

We note that a similar conclusion was reached by the Tribunal in *Blumenthal* (at [206]) on the facts in that case.

83. *Charlton* ... rejected the validity of the s 29 assessment. There were two important factual distinctions from the current case.

(1) First, in *Charlton* the taxpayers' returns included the scheme reference number that had been allocated by HMRC when the tax avoidance scheme had been registered by the scheme promoters. The relevant legislation post-dates the 2000-01 tax year in point in the current case.

(2) Secondly, in *Charlton* before the taxpayers submitted their returns the Special Commissioners had already decided in *Drummond* that the scheme failed. Further, the High Court had affirmed the decision of the Special Commissioner ... before the expiry of the relevant enquiry window on 31 January 2009. HMRC accepted that by 31 January 2009 HMRC technical specialists had formed a view as to the efficacy of the scheme. In the current case, obviously, *Drummond* was still several years away when the enquiry window closed in January 2003. ... at 31 January 2003 HMRC were ruminating ... Accordingly, the hypothetical officer, even if he could or should have accessed the minds of HMRC's technical specialists, "could not have been reasonably expected, on the basis of the information made available to him before that time, to be aware of the [insufficiency]".

## 115.12 IT/CGT assessment time limits

### 115.12.1 Summary and table

IT/CGT enquiry/assessment time limits can be summarised as follows:

Time limit	Facts	TMA s.	See para
<i>Enquiry</i>			
1 year	Enquiry period	29	115.7
<i>Assessment</i>			
4 years	Return made	34	115.13
6 years	Careless error	36(1)	115.14
12 years	Offshore Matter	36A	115.15
20 years	Deliberate error	36(1A)(a)	115.16
20 years	Failure to notify	36(1A)(b)	115.17

<sup>78</sup> This is mistaken, as no justification at all is needed to open an enquiry. But it does not matter here.

20 years      DOTAS breach      36(1A)(c)(d)      *Not discussed*

It may be useful to set out an aide memoire of IT/CGT time limits:

TAX YEAR	LAST ASSESSABLE DATE				
	Not Offshore Matter		Offshore Matter <sup>79</sup>		
	<i>Not careless</i> <sup>80</sup>	<i>Careless</i> <sup>81</sup>	<i>Not careless</i>	<i>Careless</i>	<i>Deliberate</i> <sup>82</sup> / <i>failure to notify</i>
2010/11	5/4/2015	5/4/2017			5/4/2031
2011/12	5/4/2016	5/4/2018			5/4/2032
2012/13	5/4/2017	5/4/2019			5/4/2033
2013/14	5/4/2018	5/4/2020	-	5/4/2026	5/4/2034

Where the date is **shaded**, the Requirement to Correct code extended the time limit if the RTC conditions are satisfied: the RTC deadline of 5 April 2021 applied instead of the earlier date set out shaded in the table.<sup>83</sup> But that deadline has now passed.

This chapter focuses on the current rules. The rules have changed over time, so the older versions of the rules would need to be checked for older years.

### 115.12.2 *Time limits: Policy*

In *Birmingham City Council v Abdulla*:

... issues of limitation are bedevilled by an unarticulated tendency to treat it as an unmeritorious procedural technicality. This is, I think, unjustified. Limitation in English law is ... not a technicality, nor is it necessarily unmeritorious... Limitation reflects a fundamental and all but universal legal policy that the litigation of stale claims is potentially a significant injustice. Delay impoverishes the evidence available to

<sup>79</sup> See 115.15 (12-year limit: Offshore Matter).

<sup>80</sup> See 115.13 (4 year limit).

<sup>81</sup> See 115.14 (6 year limit: Carelessness).

<sup>82</sup> See 115.16 (20 year limit).

<sup>83</sup> See 115.18 (RTC time limit: 5/4/21).

determine the claim, prolongs uncertainty, impedes the definitive settlement of the parties' mutual affairs and consumes scarce judicial resources in dealing with claims that should have been brought long ago or not at all.<sup>84</sup>

### 115.13 4 year limit

Section 34(1) TMA provides the general rule:

- [a] Subject to the following provisions of this Act, and to any other provisions of the Taxes Acts allowing a longer period in any particular class of case,
- [b] an assessment to income tax or capital gains tax may be made at any time not more than 4 years after the end of the year of assessment to which it relates.

For worked examples, see 119.12 (Assessment time limit: Table).

#### 115.13.1 *Income received after tax year*

Section 35 TMA provides:

- (1) Where income to which this section applies is received in a year of assessment subsequent to that for which it is assessable, an assessment to income tax as respects that income may be made at any time not more than 4 years after the end of the year of assessment in which it was received.
- (2) This section applies to—
  - (a) employment income,
  - (b) pension income, and
  - (c) social security income.

When will this apply?

### 115.14 6 year limit: Carelessness

Section 36(1) TMA provides:

- [a] An assessment on a person in a case involving a loss of income tax or capital gains tax brought about carelessly by the person may be made at any time not more than 6 years after the end of the year of assessment to which it relates

---

84 [2012] UKSC 47 at [41]. I am grateful to Keith Gordon for drawing this comment to my attention.

[b] (subject to subsection (1A) and any other provision of the Taxes Acts allowing a longer period).

In short, there is normally an (approximately) 4-year limit on assessments. In the case of carelessness, the time limit is 6 years. For worked examples, see 119.12 (Assessment time limit: Table).

#### 115.14.1 *Definition of “careless”*

Careless is relevant for the TMA rules discussed in this chapter, and for penalties. The term is defined twice but with the same meaning, so it is convenient to consider the definitions together:

##### **s.118(5) TMA**

For the purposes of this Act a loss of tax or a situation is brought about carelessly by a person if the person fails to take reasonable care to avoid bringing about that loss or situation.

##### **Para 3(1) sch 24 FA 07**

For the purposes of a penalty under paragraph 1, inaccuracy in a document given by P to HMRC is –  
(a) “careless” if the inaccuracy is due to failure by P to take reasonable care ...

#### 115.14.2 *Failure to correct error*

##### **s.118(6) TMA**

Where –  
(a) information is provided to Her Majesty’s Revenue and Customs,  
  
(b) the person who provided the information, or the person on whose behalf the information was provided, discovers some time later that the information was inaccurate, and  
  
(c) that person fails to take reasonable steps to inform HMRC,

##### **Para 3(2) sch 24 FA 07**

An inaccuracy in a document given by P to HMRC, which was neither careless nor deliberate on P’s part when the document was given, is to be treated as careless if P –  
  
(a) discovered the inaccuracy at some later time, and  
  
(b) did not take reasonable steps to inform HMRC.

any loss of tax or situation brought about by the inaccuracy shall be treated for the purposes of this Act as having been brought about carelessly by that person.

### 115.14.3 *Careless/negligent compared*

A note on terminology. Enquiry Manual provides:

**EM5125 Neglect, Negligence and Negligent Conduct** [Jul 2020]

The terms neglect, negligence and negligent conduct are interchangeable.

The definition of careless - “failure to take reasonable care” - is the definition of negligence. So “careless” is just a Plain English synonym of “negligent”. The change from neglect (the pre-2008 term) to carelessness (the current term) is one of terminology and not of substance.

### 115.14.4 *What is reasonable care*

In *Hanson v HMRC*:

What is reasonable care in any particular case will depend on all the circumstances. In my view this will include the nature of the matters being dealt with in the return, the identity and experience of the agent, the experience of the taxpayer and the nature of the professional relationship between the taxpayer and the agent.<sup>85</sup>

In *Alan Anderson*:

The “reasonable care” which should be taken is to be assessed by reference to what a reasonable and prudent taxpayer would do looking at an objective hypothetical standard. But what that reasonable and prudent taxpayer would do is not assessed in a vacuum but by reference to the actual circumstances of the taxpayer in question.<sup>86</sup>

The question must be decided in the light of the position as it was at the relevant time without the benefit of hindsight. The fact that a view turns out to be mistaken does not show that it was careless to form that view.

---

85 [2012] UKFTT 314 (TC) at [21].

86 at [123], approved *Hicks v HMRC* [2018] UKFTT 22 (TC) at [141].

Otherwise any judge whose decision is reversed on appeal would be guilty of carelessness and how often does that happen!

#### 115.14.5 Careless: HMRC guidance

##### **EM5125: neglect, negligence and negligent conduct** [Jul 2020]

... Baron Alderson in *Blyth v Birmingham Waterworks Co*, 1856, 11 Ex 781, p784, which was concerned with the law of tort says

Negligence is the omission to do something which a reasonable man, guided upon those considerations which ordinarily regulate the conduct of human affairs, would do, or doing something which a prudent and reasonable man would not do. The defendants might be liable for negligence, if, unintentionally, they omitted to do that which a reasonable person would have done, or did that which a person taking reasonable precautions would not have done.

*Blyth* is a classic statement of negligence, but it is not now necessary to refer to a 19<sup>th</sup> century case on a negligent waterworks company. There is plenty of authority closer to home.

The EM continues:

We can assume that a reasonable person would, amongst other things

- comply with the requirements of the law by, for example, notifying their chargeability
- make, promptly, a complete and correct return of their income and gains when required to do so under statutory authority
- keep such records as are necessary to enable them to make accurate returns or prepare accurate accounts
- read carefully the notes supplied with the return form, so far as they affect their own circumstances
- seek professional help with matters, such as the preparation of accounts, which they are unable to cope with satisfactorily alone.

The longstanding concept in general law of “negligence” can be linked to the concept of “failure to take reasonable care” for penalties under FA07/Sch24. Although it is not binding, the First Tier Tribunal (FTT) case, *David Collis v HMRC Commissioners* [2011] UKFTT 588(TC), provides a clear link between these two concepts. In this case “reasonable care” was defined as being “that of a prudent and reasonable taxpayer in the position of the taxpayer in question”. For further guidance, see CH53400.

The CH Manual provides:

**CH53400 What Is Careless Behaviour** [May 2020]

... This is not a question of whether or not the person knew about an inaccuracy in a return or document or their failure to comply with an obligation. If they did that would be deliberate, see CH53700. It is simply a question of examining what the person did or failed to do and asking whether a prudent and reasonable person taking reasonable care would have done that or failed to do that in those circumstances.

Repeated inaccuracies may form part of a pattern of behaviour which suggests a lack of care by a person in developing adequate systems for the recording of transactions or preparing tax returns. Similarly, repeated failures in relation to the relevant obligations in CH53900 to CH54100 inclusive may suggest a lack of care. It is, however, important to keep a sense of proportion. For example, repetition of the same inaccuracy would not always, of itself, indicate a failure to take reasonable care.

People do make mistakes. We do not expect perfection. We are simply seeking to establish whether the person has given the care and attention that could be expected from a reasonable person taking reasonable care in similar circumstances.

For examples of careless behaviour and its effect upon the assessing time limit, see CH53500. You will find further help in establishing behaviour in the guidance for the specific offence that has led to the under-assessment or over-repayment of tax.

115.14.6 *Carelessness of agent*

Section 36(1B) TMA provides:

In subsections (1) and (1A), references to a loss brought about by the person who is the subject of the assessment include a loss brought about by another person acting on behalf of that person.

What is the meaning of “on behalf of”? In *Hicks v HMRC*:<sup>87</sup>

the expression “person acting on... behalf” is not apt to describe a mere adviser who only provides advice to the taxpayer or to someone who is acting on the taxpayer’s behalf. In our judgment the expression connotes a person who takes steps that the taxpayer himself could take, or would

---

87 [2020] UKUT 12 (TCC) at [122]. In *Hicks* the taxpayer conceded that his accountant acted on his behalf, see at [126]; but applying this test, so far as the accountant gave (negligent) tax advice, as opposed to (say) negligently forgetting to file the the tax return, the accountant was not acting on behalf of the taxpayer..

otherwise be responsible for taking. Such steps will commonly include steps involving third parties, but will not necessarily do so. Examples would in our view include completing a return, filing a return, entering into correspondence with HMRC, providing documents and information to HMRC and seeking external advice as to the legal and tax position of the taxpayer. The person must represent, and not merely provide advice to, the taxpayer.

In *Shakoor v HMRC*:<sup>88</sup>

24. ... If a taxpayer claims that his accountant has been negligent, for example, by failing to meet a deadline for filing a return or undertaking some or other administrative task, then the negligence of the accountant will not usually provide a defence to a penalty because the accountant is simply acting as the taxpayer's agent or functionary in filing the document that needs to be filed by a particular deadline. In other words, he is acting as a mere agent or functionary for his principal; but not as an independent professional adviser.

But professional advice is different:

However, in a situation where a professional adviser is not retained simply to act as a functionary, but is retained to give professional advice based upon the best of his skill and professional ability, he is not then a functionary or agent for his principal. He is a professional person acting under a retainer to give professional advice upon identified issues. He is bound to provide that advice to the best of his professional skill and ability, whilst taking reasonable care in and about preparing and giving that advice. In other words, he is acting as a true professional, rather than as an agent or functionary.

This is perhaps a generous reading, but it leads to a sensible result:

25. In our judgement, where an accountant acts as a mere agent, administrator or functionary, he is acting as the taxpayer's agent and his default (whether negligent or not) will usually provide a taxpayer with little opportunity to claim that he is not in default of a particular obligation. However, when a professional person acts in a truly professional advisory capacity, the situation is otherwise and reliance upon properly provided professional advice, absent reason to believe that it is wrong, unreliable or hedged about with substantial caveats, will

---

<sup>88</sup> *Shakoor v HMRC* [2012] UKFTT 532 (TC) at [9].

usually lead to the conclusion that a taxpayer has not been negligent if she has taken and acted upon that advice.<sup>89</sup>

### 115.14.7 Relying on advisers

A taxpayer who is not an expert in taxation must leave technical tax issues to their professional advisers. When tax law is complicated a properly represented taxpayer cannot be expected to identify their advisers' mistakes. The Tribunal has often affirmed this:

In preparing and submitting his return, [the taxpayer] relied on [an accountant]. In all the circumstances I do not consider that he failed to take reasonable care in doing so. A taxpayer, particularly one ... who lacked any real tax expertise, is entitled to rely on his adviser, with some caveats.

Four caveats are identified:

- [1] The taxpayer should reasonably believe that the adviser is competent in the field in question, if necessary with the assistance of third parties for information, technical input or expert advice;
- [2] he should ensure that he supplies the adviser with the information the adviser needs to prepare and complete the return;
- [3] he should check the adviser's work to the extent he is able to do so, and
- [4] he should not rely blindly on the adviser's advice if it is obviously wrong or adopts a clearly untenable position.<sup>90</sup>

---

89 [2012] UKFTT 532 (TC).

90 *Hicks v HMRC* [2018] UKFTT 22 (TC) at [200]; likewise *AB v HMRC* [2007] STC (SCD) 99 at [105]; *Shakoov v HMRC* [2012] UKFTT 532 (TC) at [21]; and many examples could be given.

*Hicks* has clearly been influenced by submissions based on "Modernising Powers, Deterrents and Safeguards: Working with Tax Agents" (2009)

[http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?\\_nfpb=true&\\_pageLabel=pageVAT\\_RatesCodesTools&propertyType=document&id=HMCE\\_PROD1\\_029453](http://customs.hmrc.gov.uk/channelsPortalWebApp/channelsPortalWebApp.portal?_nfpb=true&_pageLabel=pageVAT_RatesCodesTools&propertyType=document&id=HMCE_PROD1_029453)

"A taxpayer who

- [1] goes to an ostensibly competent professional adviser,
- [2] provides a full and accurate account of the facts,
- [3] checks that advice to the limit of his or her ability and competence,
- [4] and then follows the agent's advice (or signs the return prepared on that basis) has not been negligent. He or she has taken reasonable care. If it turns out that the agent has made a careless error in giving the advice or in preparing the tax return the

A fifth caveat is if the disqualified advice rules apply.<sup>91</sup>

For an example, see 16.12.1 (7 & 12-year residence tests) where the taxpayer's accountants ticked the wrong long-term residence box.

What should the taxpayer do if two advisers disagree? A safe course (if the amounts involved make this reasonable) is to seek the advice of counsel, or more senior counsel, or a QC, but what is to be done if two QCs disagree or if the amount at stake does not justify the expense? It is suggested that the correct course is as follows:

- (1) The individual must consider whether one view or the other is obviously or glaringly wrong. However it is not to be expected that this will often provide a solution.
- (2) Subject to that, the individual can in principle follow whichever view suits them, provided that the person whose advice is adopted is suitably experienced, has seen the contrary advice and maintains their view. Then (even if the practitioner whose view is adopted turns out to be wrong) any error is non-careless and a reasonable-excuse error. Either position passes the properly-arguable standard, indeed both may pass the reasonably-arguable standard.

#### 115.14.8 *Standard of care: Practitioners*

Carelessness by tax practitioners may matter for various purposes, including:

- (1) Time limit for assessment (where the agent is acting on behalf of the taxpayer)
- (2) Negligence claim against the practitioner
- (3) Professional conduct (mere carelessness is not misconduct, but sufficiently gross carelessness can be)

The question here is what a tax practitioner should do in advising or completing a client's tax return. The standard of care is that to be expected of a reasonable practitioner.<sup>92</sup>

---

taxpayer who has taken reasonable care will not be penalised.”

This wording was somewhat overfavourable to HMRC (depending on what nuance one puts on the expressions used) and the Tribunal tones down the rigour of paragraphs [2] and [3].

<sup>91</sup> See 120.11 (Disqualified advice codes).

<sup>92</sup> The adviser's duty is not merely (merely?) to understand the law. They should explain it clearly and record it in writing; (is this so obvious that it is unnecessary to

A solicitor or accountant is entitled to rely on advice given by an appropriate expert counsel (provided it is not obviously or glaringly wrong). A person who acts in this way is not careless.<sup>93</sup> This rule applies in the completion of a tax return.

What should a practitioner do if the law is so unclear that they are unable to form a view? In many cases the only honest answer to the question of how a court would decide is “I don’t know” or “toss a coin”. This includes some basic issues, such as the source of interest. In such cases the proper course is to file the tax return on whichever view best suits the client. Both views may pass the reasonably-arguable standard.

A trickier question is where professional views differ between views A and B, the practitioner prefers view A, but view B suits the client. It is suggested the practitioner can advise the client to fill in their return on view B. Take, for example, the old chestnut problem of GWR and trusts. Some practitioners thought there is no IHT charge on the death of an individual who has a GWR in an excluded property trust even if they are IHT deemed domiciled (or indeed actually UK domiciled). Some practitioners (I think, a minority) took the view that there is a charge and for a decade or so HMRC also officially took that view.<sup>94</sup> Should they really advise their clients to file the return on that basis? I would have thought not. If that were wrong, then the best advice one could give would be to change advisers, which can hardly be right.

#### 115.14.9 *Careless: Causation*

The issue is not whether a person is careless in general or in the abstract, but whether their failure to take reasonable care brought about the

---

say? It is not: *Chandrasekaran v Deloitte & Touche Wealth Management* [2004] EWHC 1378 at [72]). They should explain risks: *Barker v Baxendale Walker* [2018] STC 310 at [59] - [73]; though the extent of the duty to explain risks is “highly fact-sensitive” and *Baxendale Walker* is likely to be an outlier.

<sup>93</sup> See Jackson & Powell, *Professional Liability* (8<sup>th</sup> ed, 2016), para 11-120; *Langsam v Beachcroft LLP* [2012] EWCA Civ 1230 at [85].

Contrast *Hicks v HMRC* at [2018] UKFTT 22 (TC) at [206] where an accountant was not negligent for relying on advice from a scheme provider, even though that was not an independent source of advice. But see 120.11 (Disqualified advice).

<sup>94</sup> This paragraph was written before HMRC issued guidance accepting the view put forward in this book, which for practical purposes resolves the problem; but I retain the text as the example neatly illustrates the issue.

insufficiency.<sup>95</sup> There must be causal carelessness. In *Marsh v HMRC*.<sup>96</sup>

Because income from property is always taxable irrespective of a person's residence status it was in our view careless of the appellant to omit it from her returns. The discovery assessment is therefore justified in relation to this income. But this small amount does not we think act as a peg, or jumping off point, to justify the much larger CGT assessment. We think that s 29(1) TMA must be considered separately in relation to each source at least as far as income and chargeable gains are concerned.

#### 115.14.10 *Carelessness: Onus of proof*

The onus of proof rests on HMRC to prove carelessness. In the 2013/14 edition of this work I said:

An allegation of carelessness is a serious one and it should not be lightly made. I stress these points because HMRC ignore them and allege neglect as a matter of course, whenever carelessness is necessary to justify out of time assessments.<sup>97</sup>

There has been Tribunal criticism:

It is ... curious that of the 134 clients that had implemented the scheme, that did not escape penalties by having died, emigrated or become insolvent, all, bar the possible exception of one, were subjected to penalties. When the test of reasonable conduct must indicate on these facts that all 134 or 133 participants uniformly had standards that fell below that of the reasonable man, the obvious question must be posed as to whether the standards of the reasonable man have been pitched too high.<sup>98</sup>

But I have not noticed any change.

See too 3.23.6 (Allegation of carelessness).

---

95 See *Hicks v HMRC* [2018] UKFTT 22 (TC) at [187].

96 [2017] UKFTT 320 (TC) at [133].

97 See eg International Manual which contains this revealing statement:

**“INTM268520 Assessing time limits** [June 2016]

If we come to the reasonable conclusion that there is a PE, or that the company is resident in the UK, there must have been careless or deliberate conduct in the failure to notify.”

98 *Herefordshire Property Company v HMRC* [2015] UKFTT 79 (TC) at [46].

## 115.15 12-year limit: Offshore Matter

Section 36A TMA provides:

(1) This section applies in a case involving a loss of income tax or capital gains tax, where—

- (a) the lost tax involves an offshore matter, or
- (b) the lost tax involves an offshore transfer which makes the lost tax significantly harder to identify.

(2) An assessment on a person (“the taxpayer”) may be made at any time not more than 12 years after the end of the year of assessment to which the lost tax relates.

This is subject to

- [a] section 36(1A) above<sup>99</sup> and
- [b] any other provision of the Taxes Acts allowing a longer period.

Section 36A(11) TMA provides:

Section 36(2) to (3A) applies for the purposes of this section (as if references to section 36(1) or (1A) were to subsection (1) of this section).

This applies rules concerning partnerships<sup>100</sup> and claim time limits<sup>101</sup>.

For the definitions of Offshore Matter/Transfer, see 120.23 (Offshore/domestic matters).

### 115.15.1 *Significantly harder to identify*

This is required for an Offshore Transfer but not for an Offshore Matter.

Where:

- (1) there is not an Offshore Matter, and
  - (2) there is an Offshore Transfer, made before the relevant date,
- it may be desired to make an appropriate disclosure in the white space of a tax return. Then lost tax (if there is any) is not “significantly harder to identify” and the 12-year assessment period will not apply. But of course in a case where there might be lost tax, disclosure may be necessary, or desirable, for other reasons.

Section 36A(6) TMA elucidates the concept of “significantly harder to

---

99 See 115.16 (20 year limit: deliberate error).

100 See 115.16.7 (Partnership default).

101 See 117.9 (Culpable taxpayer).

identify”:

Where lost tax involves an offshore transfer, the cases in which the transfer makes the lost tax significantly harder to identify include any case where, because of the transfer—

- (a) HMRC was significantly less likely to become aware of the lost tax, or
- (b) HMRC was likely to become aware of the lost tax only at a significantly later time.

That seems (more or less) self-evident.

### 115.15.2 12-year limit: Exceptions

Section 36A TMA provides:

- (7) But an assessment may not be made under subsection (2) if—
  - (a) before the time limit that would otherwise apply for making the assessment, HMRC received relevant overseas information on the basis of which HMRC could reasonably have been expected to become aware of the lost tax, and
  - (b) it was reasonable to expect the assessment to be made before that time limit.
- (8) In subsection (7)(a) “relevant overseas information” means information which is provided to HMRC by an authority in a territory outside the UK under—
  - (a) any provision of EU law relating to any tax, or
  - (b) an agreement to which the UK and that territory are parties, with or without other parties.

The House of Lords Economic Affairs Committee said:

We see no logic in applying an exclusion from the time limit to situations where information has been supplied by overseas tax authorities, but not where that same information has been supplied by the taxpayer.<sup>102</sup>

But there it is.

### 115.15.3 Transfer pricing time limit

---

102 Economic Affairs Committee, “The Powers of HMRC: Treating Taxpayers Fairly” (2018) para 42

<https://publications.parliament.uk/pa/ld201719/ldselect/ldeconaf/242/242.pdf>

Section 36A(9) TMA provides:

An assessment may also not be made under subsection (2) to the extent that liability to the lost tax arises as a result of an adjustment under Part 4 of TIOPA 2010 (transfer pricing adjustments).

#### 115.15.4 *12-year limit: Commencement*

Section 36A was introduced by s.80 FA 2019. Section 80(5) FA 2019 provides:

The amendments made by this section have effect—

- (a) in relation to assessments on a person relating to the 2013-14 year of assessment and subsequent years of assessment, where the loss of tax is brought about carelessly by that person or by a person acting on that person's behalf, and
- (b) in any other case, in relation to assessments relating to the 2015-16 year of assessment and subsequent years of assessment.

That is, the 12 year time limit applies to assessments which were in time to assess in 2019/20 (ie on 5 April 2020).

In the absence of carelessness, the years 2013/14 and 2014/15 cannot be assessed under the 12 year time limit. Those years could have been assessed up to 5/4/2021, under the RTC time limit<sup>103</sup> which does not require carelessness; but that power to assess has now lapsed.

For income/gains taxable under the remittance basis, what matters is not the date when the income/gain arose, but the date it is remitted and so assessable.

#### 115.15.5 *12 year limit: Critique*

The House of Lords Economic Affairs Committee said:

41. This proposal places burdens on all those with offshore elements to their tax affairs to retain records for long periods of time to deal with potential HMRC questions. HMRC already has a 20-year time limit to deal with fraud. We consider the extension of time limits to 12 years for offshore matters unreasonably onerous and disproportionate to the risk.

...

43. It is wrong if, rather than funding HMRC sufficiently to conduct

---

103 See 115.18 (RTC time limit: 5/4/21).

offshore enquiries in a timely manner, the Government is placing disproportionate burdens on taxpayers and eroding important taxpayer safeguards.

44. There was deep and consistent opposition from our witnesses to the proposed legislation to extend the offshore time limits for assessment. Witnesses felt this measure was unnecessary and undesirable. We recommend that it is withdrawn.

45. The Government should start a fresh dialogue with representatives of tax professionals to consider how offshore tax matters can be managed more effectively. Any revised measure should be more proportionate and targeted.<sup>104</sup>

This may be seen in the context of a longstanding struggle by the Lords for involvement in Finance Bills, which the Government have consistently resisted. The controversy - combined with a lack of a Government majority - did lead to an unusual provision requiring a government review on the topic.<sup>105</sup> The review was duly published,<sup>106</sup> but it was just a restatement of the HMRC case for the legislation. A statutory provision requiring the Government to mark its own homework, in an area of political controversy, is not likely to be productive.

## 115.16 20 year limit: deliberate error

Section 36(1A) TMA provides:

An assessment on a person in a case involving a loss of income tax or capital gains tax —

(a) brought about deliberately by the person ...  
may be made at any time not more than 20 years after the end of the year of assessment to which it relates (subject to any provision of the

104 Economic Affairs Committee, “The Powers of HMRC: Treating Taxpayers Fairly” (2018)

<https://publications.parliament.uk/pa/ld201719/ldselect/ldconaf/242/242.pdf>

105 Section 95(1) FA 2019 provided: “The Chancellor of the Exchequer must review the effects of the changes made by sections 80 and 81 to TMA 1970 and IHTA 1984, and lay a report on that review before the House of Commons not later than 30 March 2019.”

106 HM Treasury, “Section 95 of the Finance Act 2019: report on time limits and the charge on disguised remuneration loans” (2019)

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/789160/DR\\_loan\\_charge\\_review\\_web.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/789160/DR_loan_charge_review_web.pdf)

Taxes Acts allowing a longer period).<sup>107</sup>

For worked examples, see 119.12 (Assessment time limit: Table).

### 115.16.1 *Deliberate inaccuracy*

Section 118(7) TMA provides:

In this Act references to a loss of tax or a situation brought about deliberately by a person include a loss of tax or a situation that arises as a result of a deliberate inaccuracy in a document given to Her Majesty's Revenue and Customs by ...<sup>108</sup> that person.

Thus the s.36(1A) rule applies if:

- (1) There is an inaccuracy in a document
- (2) The inaccuracy is deliberate
- (3) The document is given to HMRC (typically, a tax return)
- (4) The document is given by/on behalf of the individual

### 115.16.2 *Inaccuracy*

In order to determine whether a tax return is inaccurate, one has to read the whole of it.<sup>109</sup>

### 115.16.3 “*Deliberate*” inaccuracy

*HMRC v Tooth* has explained “deliberate inaccuracy”. It means:

An inaccuracy in a document is a statement which is inaccurate. Thus the required intentionality is attached both to the making of the statement and to its being inaccurate... for there to be a deliberate inaccuracy in a document ... there will have to be demonstrated an intention to mislead the Revenue on the part of the taxpayer as to the truth of the relevant statement or, perhaps, (although it need not be decided on this appeal) recklessness as to whether it would do so.<sup>110</sup>

---

107 There are no provisions allowing a longer period: the drafter copied the words in brackets inappropriately, from s.36(1).

108 The missing words are “or on behalf of”; I consider agents separately below.

109 The reader may think that so obvious it did not need saying, and so did the Supreme Court (“This is, with respect, a very unattractive argument”). But a majority of the CA had reached the opposite conclusion.

110 [2021] UKSC 17 at [42, [47]; reversing the CA decision which this work had described as astonishing.

A deliberate error is in general also likely to be dishonest, indeed it is the paradigm of tax-dishonesty. However the two concepts are not quite the same.<sup>111</sup> It is possible to envisage a deliberate error which is not (or at least, may not be) dishonest, eg:

- (1) Where the amount involved is immaterial, and less than the cost of finding the right figure
- (2) Where everyone else, or at least most others, are doing the same
- (3) Where the taxpayer reasonably believes that such is the case

#### 115.16.4 Recklessness

Although *Tooth* left the point open, it is considered that recklessness should suffice for deliberate behaviour. This raises the question of what amounts to recklessness.

In *Clynes v HMRC*:<sup>112</sup>

... an inaccuracy may also be held to be deliberate where it is found that the person consciously or intentionally chose not to find out the correct position, in particular, where the circumstances are such that the person knew that he should do so. A person cannot simply escape liability by claiming complete ignorance where the person clearly knew that he should have taken steps to ascertain the position. We view the case where a person makes such a conscious choice not to take such steps with the result that an inaccuracy occurs, as no less of a "deliberate inaccuracy" on that person's part than making the inaccuracy with full knowledge of the inaccuracy.

In *Rodriguez-Issa v HMRC*:<sup>113</sup>

We agree that an inaccuracy may be held to be deliberate where it is found that the person consciously or intentionally chose not to find out the correct position. However, as the Tribunal indicated in *Clynes*, this will be a question of fact and degree that must be determined on a case

---

111 This is self-evident, but if authority is needed, see *Clynes v HMRC* [2016] UKFTT 369 (TC) at [80]: "cases on the meaning of "dishonesty" are not of material assistance in interpreting the provisions of schedule 24 as regards "deliberate" conduct."

112 [2016] UKFTT 369 (TC) at [86] followed in *Grangewood Enterprises v HMRC* [2021] UKFTT 323 (TC).

113 [2021] UKFTT 154 (TC) at [22].

by case basis. Care must be taken not to blur the line between careless and deliberate conduct.

#### 115.16.5 *Deliberate error of agent*

Section 36(1B) TMA provides:

In subsections (1) and (1A), references to a loss brought about by the person who is the subject of the assessment include a loss brought about by another person acting on behalf of that person.

The same agency rule applies for carelessness and for deliberate error; see 115.14.6 (Carelessness of agent).

Section 118(7) TMA provides:

In this Act references to a loss of tax or a situation brought about deliberately by a person include a loss of tax or a situation that arises as a result of a deliberate inaccuracy in a document given to Her Majesty's Revenue and Customs ... on behalf of that person.

#### 115.16.6 *Deliberate: HMRC examples*

The Compliance Handbook offers some common examples of deliberate behaviour:

##### **CH53700 What is deliberate behaviour?** [Nov 2019]

...

- knowingly failing to record all sales, especially where there is a pattern to the under-recording, such as omitting all transactions with a particular customer or at a particular time of the week, month or year
- describing transactions inaccurately or in a way likely to mislead
- giving a VAT return to HMRC that includes a figure of net VAT due that is too low because the person does not have the cash at that time to pay the full amount, and later telling HMRC the true figure when he has the funds to pay
- similarly declaring less tax due for aggregates levy, climate change levy, landfill tax or excise duty because the person does not have the funds at that time to pay the full amount
- claiming a deduction for personal expenses of such a size or frequency that the inaccuracy must have been known
- knowingly making an understatement of consideration on SDLT1 compared to Land Registry form (TR1) to reduce the SDLT payable
- knowingly making a duplicated claim for repayment of SDRT

- knowingly claiming a higher (than is just and reasonable) proportion of shared costs in a taxable field for petroleum revenue tax
- knowingly omitting or understating the value of a property for inheritance tax...

### 115.16.7 Partnership default

Section 36(2) TMA provides:

- [a] Where the person mentioned in subsection (1) or (1A) [person who commits careless/deliberate error] (“the person in default”) carried on a trade, profession or business with one or more other persons at any time in the period for which the assessment is made,
- [b] an assessment in respect of the profits or gains of the trade, profession or business in a case mentioned in subsection (1A) or (1B) [deliberate error] may be made not only on the person in default but also on his partner or any of his partners.

This seems to apply only in a s.36(1A) case, ie deliberate error/failure to notify/breach of DOTAS.

### 115.17 20 year limit: Failure to notify

Section 36(1A) TMA provides:

An assessment on a person in a case involving a loss of income tax or capital gains tax ...

- (b) attributable to a failure by the person to comply with an obligation under section 7<sup>114</sup> ...
- may be made at any time not more than 20 years after the end of the year of assessment to which it relates (subject to any provision of the Taxes Acts allowing a longer period).<sup>115</sup>

For worked examples, see 119.12 (Assessment time limit: Table).

This applies even if the person was not careless, eg if they reasonably thought that they were under no duty to notify.

### 115.18 RTC time limit: 5/4/21

Para 26 sch 18 F(no.2)A 2017 provides:

---

<sup>114</sup> See 115.2 (Duty to notify HMRC).

<sup>115</sup> There are no provisions allowing a longer period than 20 years: the drafter copied the words in brackets, inappropriately, from s.36(1).

- (1) This paragraph applies where-
  - (a) at the end of the tax year 2016-17 a person has relevant offshore tax non-compliance to correct,<sup>116</sup> and
  - (b) the last day on which it would (disregarding this paragraph) be lawful for HMRC to assess<sup>117</sup> the person to any offshore tax<sup>118</sup> falls within the period beginning with 6 April 2017 and ending with 4<sup>119</sup> April 2021.
- (2) The period in which it is lawful for HMRC to assess the person to the offshore tax is extended by virtue of this paragraph to end with 5 April 2021.

This was a stop gap, pending the introduction of the 12 year time limit for Offshore Matters, in 2019.<sup>120</sup> The rule effectively lapsed on 6 April 2021.

Normal assessing rules apply to decide whether HMRC is able to raise an assessment in the period 6/4/2017 - 4/4/2021. For worked examples, see 119.12 (Assessment time limit: Table).

An assessment under the extended RTC time limit is possible even though:

- (1) A taxpayer has a reasonable excuse, and so is not subject to a penalty under the RTC rules; and
- (2) The taxpayer has not been careless.

## 115.19 Personal representatives

### 115.19.1 Liability of PRs

The starting point is that PRs step into the shoes of the deceased. Section 74 TMA provides:

- (1) If a person chargeable to income tax dies, the executor or administrator of the person deceased shall be liable for the tax chargeable on such deceased person, and may deduct any payments

---

116 See 120.44 (Relevant offshore tax non-compliance).

117 Tax includes IHT, and “assess” includes an IHT notice of determination: see 120.49 (RTC: Interpretation).

118 Para 26(3) sch 18 F(no.2)A 2017 provides: “In this paragraph “offshore tax”, in relation to any relevant offshore tax non-compliance, means tax corresponding to the offshore PLR [potential lost revenue] in respect of the non-compliance.” See 120.31 (Offshore PLR).

119 This seems to be a slip for 5 April.

120 See 115.15 (12-year limit: Offshore Matter).

made under this section out of the assets and effects of the person deceased.

(2) On neglect or refusal of payment, any person liable under this section may be proceeded against in like manner as any other defaulter.

I cannot find an equivalent for CGT, but no-one doubts that the same principle applies.

### 115.19.2 *Time limits for assessing PRs*

Section 40(1) TMA provides a time limit for assessing PRs:

(1) For the purpose of the charge of tax<sup>121</sup> on the executors or administrators of a deceased person in respect of the income, or chargeable gains, which arose or accrued to him before his death, the time allowed by section 34, 35, 36 or 36A above shall in no case extend more than 4 years after the end of the year of assessment in which the deceased died.

Section 40(2) TMA provides:

In a case involving a loss of tax brought about carelessly or deliberately by a person who has died (or another person acting on that person's behalf before that person's death), an assessment on his personal representatives to tax for any year of assessment ending not earlier than six years before his death may be made at any time not more than 4 years after the end of the year of assessment in which he died.

By implication, HMRC cannot assess PRs for years of assessment ending earlier than 6 years before death. It may be useful to set out an aide memoire of IT/CGT time limits for PRs:

Year of death	Tax years in time to assess		Last assessment date
	<i>Not careless</i>	<i>Careless/deliberate</i>	
2018/19	2014/15	2012/13	5 April 2023
2019/20	2015/16	2013/14	5 April 2024
2020/21	2016/17	2014/15	5 April 2025
2021/22	2017/18	2015/16	5 April 2026

---

121 Section 40(3) provides:

In this section "tax" means income tax or capital gains tax.

That is unnecessary as the general definition in the TMA would have the same effect, but it does no harm.

## 115.20 Enquiry ends: Closure notice

Section 28A TMA provides:

(1A) Any matter to which the enquiry relates is completed when an officer of Revenue and Customs informs the taxpayer by notice (a “partial closure notice”) that the officer has completed his enquiries into that matter.

(1B) The enquiry is completed when an officer of Revenue and Customs informs the taxpayer by notice (a “final closure notice”)—

- (a) in a case where no partial closure notice has been given, that the officer has completed his enquiries, or
  - (b) in a case where one or more partial closure notices have been given, that the officer has completed his remaining enquiries.
- (2) A partial or final closure notice must state the officer's conclusions and—

- (a) state that in the officer's opinion no amendment of the return is required, or
- (b) make the amendments of the return required to give effect to his conclusions.

(3) A partial or final closure notice takes effect when it is issued.

### 115.20.1 *Application for closure notice*

Section 28A TMA provides:

(4) The taxpayer<sup>122</sup> may apply to the tribunal for a direction<sup>122</sup> requiring an officer of the Board to issue a partial or final closure notice within a specified period.

(5) Any such application is to be subject to the relevant provisions of Part 5 of this Act (see, in particular, section 48(2)(b)).

(6) The tribunal shall give the direction applied for unless satisfied that there are reasonable grounds for not issuing the partial or final closure notice within a specified period.

(8) In the Taxes Acts, references to a closure notice under this section are to a partial or final closure notice under this section.

## 115.21 Appeals

A discussion of tax appeals needs a book to itself, and a number of such

---

122 Section 28ZA(7) provides: “In this section “the taxpayer” means the person to whom notice of enquiry was given.”

books have been written.

### 115.21.1 *Right of appeal*

Section 31(1) TMA confers the right to appeal:

An appeal may be brought against—

- (a) any amendment of a self-assessment under section 9C of this Act (amendment by Revenue during enquiry to prevent loss of tax),
- (b) any conclusion stated or amendment made by a closure notice under section 28A or 28B of this Act (amendment by Revenue on completion of enquiry into return),
- (c) any amendment of a partnership return under section 30B(1) of this Act (amendment by Revenue where loss of tax discovered),  
or
- (d) any assessment to tax which is not a self-assessment.

The rest of s.31 provides minor supplemental rules.

(2) If an appeal under subsection (1)(a) above against an amendment of a self-assessment is made while an enquiry is in progress in relation to any matter to which the amendment relates or which is affected by the amendment none of the steps mentioned in section 49A(2)(a) to (c) may be taken in relation to the appeal until a partial closure notice is issued in relation to the matter or, if no such notice is issued, a final closure notice is issued.

(3A) In the case of a simple assessment, the right to appeal under subsection (1)(d) does not apply unless and until the person concerned has—

- (a) raised a query about the assessment under section 31AA, and
- (b) been given a final response to that query.

(4) This section has effect subject to any express provision in the Taxes Acts, including in particular any provision making one kind of assessment conclusive in an appeal against another kind of assessment.

### 115.21.2 *Determination of appeal*

Section 50 TMA provides:

(6) If, on an appeal notified to the tribunal, the tribunal decides—

- (a) that the appellant is overcharged by a self-assessment;
- (b) that any amounts contained in a partnership statement are excessive; or

(c) that the appellant is overcharged by an assessment other than a self-assessment,

the assessment or amounts shall be reduced accordingly, but otherwise the assessment or statement shall stand good.

(7) If, on an appeal notified to the tribunal, the tribunal decides—

(a) that the appellant is undercharged to tax by a self-assessment;

(b) that any amounts contained in a partnership statement are insufficient; or

(c) that the appellant is undercharged by an assessment other than a self-assessment,

the assessment or amounts shall be increased accordingly.

(7A) If, on an appeal notified to the tribunal, the tribunal decides that a claim or election which was the subject of a decision contained in a closure notice under section 28A of this Act should have been allowed or disallowed to an extent different from that specified in the notice, the claim or election shall be allowed or disallowed accordingly to the extent that the tribunal decides is appropriate, but otherwise the decision in the notice shall stand good.

(8) Where, on an appeal notified to the tribunal against an assessment (other than a self-assessment) which—

(a) assesses an amount which is chargeable to tax, and

(b) charges tax on the amount assessed,

the tribunal decides as mentioned in subsection (6) or (7) above, the tribunal may, unless the circumstances of the case otherwise require, reduce or, as the case may be, increase only the amount assessed; and where any appeal notified to the tribunal is so determined the tax charged by the assessment shall be taken to have been reduced or increased accordingly.

(9) Where any amounts contained in a partnership statement are reduced under subsection (6) above or increased under subsection (7) above, an officer of the Board shall by notice to each of the relevant partners amend—

(a) the partner's return under section 8 or 8A of this Act [SA return], or

(b) the partner's company tax return,

so as to give effect to the reductions or increases of those amounts.

### 115.21.3 *Further appeals*

Section 50 TMA provides:

(10) Where an appeal is notified to the tribunal, the decision of the

tribunal on the appeal is final and conclusive.

(11) But subsection (10) is subject to—

- (a) sections 9 to 14 of the TCEA [Tribunals, Courts and Enforcement Act] 2007,
- (b) Tribunal Procedure Rules, and
- (c) the Taxes Acts.

## 115.22 CT registration

### 115.22.1 *1<sup>st</sup> accounting period: s.55 notice*

Section 55(1) FA 2004 provides:

A company<sup>123</sup> must give notice to the Board—

- (a) of the beginning of its first accounting period,<sup>124</sup> and
- (b) of the beginning of any subsequent accounting period that does not immediately follow the end of a previous accounting period.

I refer to this as a “**s.55 notice**”.

The rules defining accounting periods are in Chapter 2 Part 2 CTA 2009. I do not consider the rules relating to companies in administration or winding up.

In short, merely holding an asset does not bring a company within the requirement to serve a s.55 notice. There must be one of the following:

- (1) profits within CT
- (2) a UK company carries on a business (even if not producing profits)
- (3) a chargeable gain/allowable loss

### 115.22.2 *Company within charge to CT*

Section 9(1) CTA 2009 provides the general rule:

An accounting period of a company begins—

- (a) when the company comes within the charge to corporation tax,  
or
- (b) immediately after the end of the previous accounting period of

---

123 Section 55(5) FA 2004 provides: “In this section ... (b) “company” means a body corporate and does not include an unincorporated association or a partnership.” This is a non-standard definition as company normally includes an unincorporated association; see 86.3 (Definition of “company”). I would be interested if readers could suggest the reason, perhaps it lies in the history of the provision. But the point will not often arise.

124 Section 55(5) FA 2004 provides: “In this section— (a) “accounting period” means an accounting period for the purposes of corporation tax”.

the company, if the company is still within the charge to corporation tax.

This applies in particular if:

- (1) An offshore company carried on a UK property business prior to the introduction of CT on its property income; the first accounting period begins 6 April 2020, so a notice was required by 6 June 2020.
- (2) A non-resident company deals in/develops UK land and realises a profit

### 115.22.3 *UK company starts business*

Section 9(2) CTA 2009 provides:

For the purposes of this section a UK resident company is treated as coming within the charge to corporation tax when it starts to carry on business, if it would not otherwise be within the charge to corporation tax.

### 115.22.4 *Chargeable gain/allowable loss*

Section 9(3) CTA 2009 provides:

If a chargeable gain or allowable loss accrues to a company at a time which is not (ignoring this subsection) within an accounting period of the company—

- (a) an accounting period of the company begins at that time, and
- (b) the gain or loss accrues in that accounting period.

The context shows that there is only a duty to put in a s.55 notice where a chargeable gain is within the scope of CT.<sup>125</sup>

What if a loss is in principle allowable but no notice is given under s.16(2A) TCGA? This is not an allowable loss so no s.55 notice is strictly needed.<sup>126</sup> HMRC guidance seems to assume that a s.55 notice is expected. But there is no clear statement to that effect: it appears HMRC have not noticed this point. However in practice the company would normally put in s.55 notice, either for the avoidance of doubt, or because the company wants to have the allowable loss, in order to set it against a future chargeable gain.

---

<sup>125</sup> The drafter has overlooked the definition of chargeable gain; see 53.4.1 (“Chargeable” gain).

<sup>126</sup> See 117.2.1 (Capital loss claims).

### 115.22.5 *When accounting period ends*

Section 10 CTA 2009 provides:

- (1) An accounting period of a company comes to an end on the first occurrence of any of the following—

There follow a list of 10 circumstances when an accounting period ends:

- (a) the ending of 12 months from the beginning of the accounting period,
- (b) an accounting date of the company,
- (c) if there is a period for which the company does not make up accounts, the end of that period,
- (d) the company starting or ceasing to trade,
- (e) if the company carries on only one trade, coming, or ceasing to be, within the charge to corporation tax in respect of that trade,
- (f) if the company carries on more than one trade, coming, or ceasing to be, within the charge to corporation tax in respect of all the trades it carries on,
- (g) the company becoming, or ceasing to be, UK resident,
- (h) the company ceasing to be within the charge to corporation tax,
- (i) the company entering administration, and
- (j) the company ceasing to be in administration.

If a company not otherwise required to register disposes of a land-rich asset:

- (1) An accounting period begins as it will in principle realise a gain or a loss.
- (2) The accounting period ends the next day, as it ceases to be within the charge to CT.<sup>127</sup>

So a notice is required each time there is a disposal of a land-rich asset.

### 115.22.6 *Content of notice*

Section 55(2) FA 2004 provides:

The notice required by this section—

- (a) must be in writing;
- (b) must state when the accounting period began;

---

<sup>127</sup> It is suggested that a company ceases to be within the charge even if it realised a loss on the disposal.

- (c) must contain such other information as may be prescribed;
- (d) may be given to any officer of the Board; and
- (e) must be given not later than three months after the beginning of the accounting period.

Reg 2 Corporation Tax (Notice of Coming within Charge - Information) Regulations 2004 provides:

- (1) For the purposes of [s.55(2)(c) FA 2004] the information specified in the following paragraphs of this regulation is prescribed.
- (2) In the case of the company's accounting period falling within either paragraph (a) or (b) of [s.55(1) FA 2004], the prescribed information is the date on which that accounting period commenced (within the meaning of [s.12(2) ICTA 1988] [now, s.9 CTA 2009]), together with the information in paragraph (3).
- (3) The information to be given in respect of any company to which the section applies is—
  - (a) the company's name and its registered number;
  - (b) the address of the company's registered office;
  - (c) the address of the company's principal place of business;
  - (d) the nature of the business being carried on by the company;
  - (e) the date to which the company intends to prepare accounts;
  - (f) the full name and home address of each of the directors of the company;
  - (g) if the company has taken over any business, including any trade, profession or vocation formerly carried on by another—
    - (i) the name and address of that former business; and
    - (ii) the name and address of the person from whom the business was acquired;
  - (h) if the company is deemed, by virtue of [s.413(3) ICTA 1988, now s.152 CTA 2010], to be a member of a group of companies for the purposes of [Chapter 4 Part 10 ICTA, now Part 5 CTA 2010], the name of the parent company and the address of its registered office; and
  - (i) in the case of a company which, at the time it gives notice under the section, has been obliged to comply with the requirements of the Income Tax (Pay as You Earn) Regulations 2003, the date on which that obligation first arose.

The CTM provides:

**COM40030: Case records: new company records: information a company must provide to HM Revenue and Customs [Nov 2019]...**

### **Companies newly coming within the charge to CT**

When a company registers at Companies House, they have the opportunity to supply the required information if it is available. However, many companies do not start to trade immediately and do not have all the necessary information at the time of registration.

COTAX issues a CT41G to newly incorporated companies when they are set up on COTAX. That form gives the company their UTR and explains that, if they were unable to supply the information needed to satisfy S55 at the time of registration, the easiest way to supply it is by using the Online Tax Registration Service (OTRS), although we do accept the information in a letter...

#### 115.22.7 HMRC practice: Registration

HMRC say:<sup>128</sup>

##### **Who should register**

Register if you dispose of UK property or land and any of the following apply:

- you're a non-resident company and not registered with UK Companies House
- you're a collective investment vehicle (CIV) deemed as a company (as long as you have not elected for transparent or exempt treatment)

Re-register if you were previously registered for UK Corporation Tax but your company has since been dormant for Corporation Tax purposes.

If you are an agent acting on behalf of a company you can still register, even if you do not have authorisation to act on your client's behalf for all Corporation Tax affairs through form 64-8.

If you're an offshore property development company dealing in or developing UK land, use the register as an overseas company guide to register for Corporation Tax. This will also tell you what to do if you do not have a base in the UK.

If you are a non-resident landlord now required to submit a Corporation Tax return you should not use this g-form but should instead contact non-resident landlords.

##### **Exemptions**

You do not have to register if any of the following apply:

- the disposal is an excluded disposal
- an exemption applies
- no chargeable gain or allowable loss arises

Examples include:

- no gain or no loss transfers
- a disposal where no gain arises because sales proceeds equal the acquisition cost

---

128 HMRC, "Register a non-resident company for Corporation Tax" (Oct 2020)  
[https://www.gov.uk/guidance/register-a-non-resident-company-for-corporation-tax?utm\\_source=a73aec15-b95d-42af-89b6-8514062d83aa&utm\\_medium=email&utm\\_campaign=govuk-notifications&utm\\_content=immediate#who-should-register](https://www.gov.uk/guidance/register-a-non-resident-company-for-corporation-tax?utm_source=a73aec15-b95d-42af-89b6-8514062d83aa&utm_medium=email&utm_campaign=govuk-notifications&utm_content=immediate#who-should-register)

- the substantial shareholding exemption applies to a disposal
- the disposal is a grant of a lease for no premium
- the disposal has an appropriate connection to a CIV and relief is provided under the terms of the relevant Double Taxation Treaty (HMRC is applying a concessionary treatment to these disposals which is subject to review - 'appropriate connection' is defined at CG73996J)

You can still register and submit returns in such cases if you want to disclose your disposals and the applicable exemptions.

There's no need to register unless there's a disposal of an interest in UK land or property. So holding an asset does not bring a non-resident company within the charge to Corporation Tax.

### **When to register**

You must register within 3 months of the date you become chargeable to UK Corporation Tax.

You become chargeable when you sell, give or transfer ownership of UK property or land. This date cannot be before 6 April 2019 or after the date you register.

### **What you'll need**

If you're registering for the first time or re-registering a company you'll need the:

- company name, registered address and contact details (HMRC will use the registered office address for initial contact)
- previous company name (if there was one)
- incorporation date and country of incorporation (or for a CIV the date of establishment)
- company registration or incorporation number (if it has one)
- director's name, address and contact details (or for a CIV, somebody authorised to act on behalf of the CIV)
- date of the disposal of interests in UK property or land
- Income Tax Self Assessment Unique Taxpayer Reference (UTR), if you have received UK rental income not subject to tax deducted at source

If you're re-registering, you'll also need the Corporation Tax UTR from any previous correspondence with HMRC.

### **How to register**

#### **If you already have a Government Gateway user ID and password**

You'll need the Government Gateway user ID and password you used in previous registration for Corporation Tax. If you have recently registered for online services it can take 2 to 8 weeks to receive your codes. They will arrive at the overseas registered office.

#### **If you do not have a Government Gateway user ID and password**

Register online if you do not have a Government Gateway user ID and password.

#### **After you've registered**

After you've registered HMRC will:

- set up a HMRC record for the company
- send you a Corporation Tax UTR
- send you more information by post about what you need to do next

HMRC aim to deal with your registration within 15 working days. This information will arrive at the overseas registered office. It can take up to 2 to 8 weeks to arrive.

When you receive your UTR you can then register for HMRC online services so that you

can file a Corporation Tax Return and pay any tax due. You cannot register for HMRC online services and file your return before you receive your UTR.

Your online services activation codes will arrive at the overseas registered office. It can take 2 to 8 weeks to receive them.

### 115.22.8 *Reasonable excuse defence*

Section 55(4) FA 2004 provides:

A company that has a reasonable excuse for failing to give notice as required by this section—

- (a) is not to be regarded as having failed to comply with this section until the excuse ceases, and
- (b) after the excuse ceases is not to be regarded as having failed to comply with this section if the required notice is given without unreasonable delay after the excuse ceases.

See 120.10 (Reasonable excuse).

HMRC say:

#### **Chapter 4: Obligations of Non-UK resident Company Landlords**

... HMRC would regard as a reasonable excuse for not notifying HMRC within this three month time period the need for any true-up of the amount withheld on account of tax under the Non-residents Landlord Scheme at the end of the annual period, and its comparison with the calculation of non-UK resident company landlord's Corporation Tax liability for the accounting period which relates to the annual period in order to establish any shortfall.

However, HMRC would consider that this reasonable excuse is one which is capable of being resolved with twelve months from the end of the company's accounting period. This means that HMRC would expect a company that has a shortfall of Corporation Tax after taking into account the amount on account of tax withheld to give notice of its chargeability within twelve months from the end of its accounting period.

### 115.22.9 *Notice of chargeability*

Para 2 sch 18 FA 1998 provides:

- (1) A company which—
  - (a) is chargeable to tax for an accounting period, and
  - (b) has not received a notice requiring a company tax return,must give notice to an officer of Revenue and Customs that it is so chargeable.
- (2) The notice must be given within twelve months from the end of the accounting period.

This is the equivalent of the IT/CGT duty to notify liability to tax.<sup>129</sup>

In practice, once registered for CT, HMRC will send a notice to file a Company Tax Return for subsequent accounting periods.

#### 115.22.10 *HMRC practice: Returns*

HMRC say:<sup>130</sup>

##### **Returns**

If you have no other business in the UK, file a single return for the date of the disposal. If you have another disposal at a later date, you'll need to send a new return for each disposal.

If you are a non-resident company landlord and have previously been exempted from notifying chargeability to Corporation Tax because your tax liability was fully offset by tax deducted under the non-resident landlord scheme, the exemption will cease to apply if you make a disposal in an accounting period ending on or after 6 April 2020.

From that point you will be sent a notice requiring you to report your property income annually via a Corporation Tax return until the property business ceases, even if you continue receiving your rents with tax deducted under the non-resident landlord scheme. You may be liable to financial penalties if you do not file a Corporation Tax return when we ask you to do so.

Contact Non-UK resident landlords team in writing if you believe that you would continue to qualify for the exemption going forward in later accounting periods. You must notify HMRC if you cease to qualify for the exemption.

You must submit the return online and it must include:

- CT600 return form
- iXBRL tagged computations

You do not need to submit iXBRL tagged accounts for a one day accounting period.

If you're a CIV or a company that has or expects to have 4 or more disposals in a financial year, by concession, there will be a 12 month accounting period. You will need to submit:

- a CT600 return form
- iXBRL tagged accounts and computations

So that HMRC does not have to contact you for additional information in relation to the disposal, your computation should include details of how you have utilised any losses, exemptions and reliefs.

It should give a clear breakdown of how you have calculated the gain or loss on the disposal.

129 See 115.2 (Duty to notify HMRC).

130 HMRC, "Register a non-resident company for Corporation Tax" (Oct 2020)  
[https://www.gov.uk/guidance/register-a-non-resident-company-for-corporation-tax?utm\\_source=a73aec15-b95d-42af-89b6-8514062d83aa&utm\\_medium=email&utm\\_campaign=govuk-notifications&utm\\_content=immediate#who-should-register](https://www.gov.uk/guidance/register-a-non-resident-company-for-corporation-tax?utm_source=a73aec15-b95d-42af-89b6-8514062d83aa&utm_medium=email&utm_campaign=govuk-notifications&utm_content=immediate#who-should-register)

Additionally, the type of asset should be identified from one of the following along with the address of the property:

- residential property or land
- non-residential property or land
- mixed use (the property or land was partly residential during ownership)
- indirect disposal of UK land

Alternatively, this information can be provided in a covering letter accompanying your CT600.

Accounts forming part of an online return must be in XBRL format.

You do not need to tag the accounts in XBRL if the following apply:

- there's no appropriate taxonomy for the accounting standard the accounts have been prepared
- the HMRC online service does not accept the taxonomy.

If you use an unsupported standard, then submit your accounts in PDF format.

#### **After you've re-registered**

If you're re-registering for Corporation Tax we'll use the information provided to update our records. You'll then be able to use HMRC online services to file returns and make payments.

#### **Paying Corporation Tax**

When you pay Corporation Tax will depend on your taxable profits and length of your accounting period.

If you hold no other chargeable interests in UK property or land after the disposal, you'll stop being chargeable to UK Corporation Tax. You'll also have a one day accounting period.

The rules for paying in instalments mean your tax may be due on the date of the disposal. HMRC will apply concessionary treatment in these cases. Payment of Corporation Tax will be due 3 months and 14 days after the end of your one day accounting period.

Non-resident landlord scheme guidance provides:<sup>131</sup>

#### **4.3 Exception to duty to give notice**

A non-UK resident company landlord will not be required to give notice of its coming within the charge to Corporation Tax or to notify its chargeability to Corporation Tax if:

- it has not been given a notice to file a tax return,
- it has borne (or it will bear) Income Tax by deduction on all the income on which it is chargeable to Corporation Tax for the accounting period,
- its liability to Corporation Tax for the accounting period will be fully offset, for instance by the amounts withheld under the Non-residents Landlord Scheme, and
- it has no chargeable gains for that period.

#### **4.4 Example**

---

131 HMRC, "The Non-resident Landlords Scheme: Guidance notes for letting agents and tenants" (2016)

<https://www.gov.uk/government/publications/non-resident-landlord-guidance-notes-for-letting-agents-and-tenants-non-resident-landlords-scheme-guidance-notes>

In the example at Chapter 3, ABC Ltd has the following items to consider when determining its liability to Corporation Tax for the accounting period which includes the four quarters to 31 March 2021:

Rental income	£7,500
Deductible expenses other than financing costs	£1,200
Financing costs	<u>£1,700</u>
[Net income	<u>£4,600]</u>
[Corporation tax £4,600 @19%	£874]
Income Tax deducted at source [£4,600 @ 20%]	£920

If the annual period straddles two of ABC Ltd's accounting periods because the date to which it makes up its financial statements ends on a date other than 31 March, the amounts should be apportioned between the accounting periods on a just and reasonable basis.

The amount of financing costs that can be included in determining the Corporation Tax liability of ABC Ltd for an accounting period depends on the application of the TIOPA Corporate Interest Restriction rules according to the specific circumstances of the company.

If ABC Ltd is a singleton company, the amount of financing costs would be below the de minimis exemption available under the Corporate Interest Restriction rules and none of the financing costs would be capped.

In these circumstances it is likely that the amounts withheld at source under the Non-residents Landlord Scheme has met ABC Ltd's Corporation Tax liability (assuming it has no further chargeable income and it has no chargeable gains).

In this situation, if ABC Ltd has not already registered for Corporation Tax, it is not required to notify HMRC that it has come within the charge for Corporation Tax for an accounting period provided that it has no chargeable gains in that period and has not already received a notice to file a tax return.

If ABC Ltd considers that its Corporation Tax liability for the relevant accounting period is less than the Income Tax deducted at source under the Non-residents Landlord Scheme, it can choose to register and file a Company Tax Return in order to claim a repayment of the difference.

IT deducted at source will generally exceed CT, as the IT rate is higher. But this will cease to apply when the CT rate increases above the IT basic rate, in 2023.

If ABC Ltd considers that its Corporation Tax liability for the relevant accounting period is more than the Income Tax deducted at source under the Non-residents Landlord Scheme, it must register and file a Company Tax Return in order to pay the balance due. It must do this within twelve months from the end of the relevant accounting period.

Once registered for Corporation Tax, HMRC will send ABC Ltd a notice to file a Company Tax Return for each subsequent accounting period.

### 115.22.11 *Company law requirements*

An overseas company which opens a “UK establishment” (as defined) also needs to register under reg 4 Overseas Companies Regulations 2009.

## TAX RETURN FILING POSITION

116.1

116.8 Disclosing doubt/further information

116.10 Disclosure for good HMRC relations

### 116.1 Codes of conduct

There are many codes of conduct and a full discussion requires a book to each one. I discuss the following:<sup>1</sup>

(1) *Professional Conduct in Relation to Taxation* (“PCRT”).<sup>2</sup> This is framed in terms of Fundamental Principles and Standards, supplemented by non-binding guidance in:

(a) Helpsheets A-E:<sup>3</sup>

A: Submission of tax information and Tax filings

B: Tax Advice

C: Dealing with errors

D: Request for data by HMRC

E: Members’ Personal Tax Affairs

(b) Helpsheets 1-4:<sup>4</sup>

---

1 Further consideration may be needed for those governed by Scots/Northern Ireland or other codes of conduct.

2 <https://www.tax.org.uk/professional-standards/professional-rules/professional-conduct-relation-taxation> This is effective from 1 March 2019. For PCRT on tax avoidance, see 2.5.7 (Codes of practice/regulators). For an introduction to PCRT, see *Hannah (R, oao) v CIOT* [2021] EWHC 1069 (Admin).

3 PCRT says “Help Sheet” A-E, not Helpsheet; but I think the latter is the standard usage so I write it here as one word, not two.

4 These Helpsheets (which PCRT spells as one word) are undated. They are found on <https://www.tax.org.uk/professional-standards/professional-standards-%E2%80%9393-full-listing/professional-conduct-relation-1>

- 1: Tax evasion
  - 2: Tax returns
  - 3: Voluntary disclosures under disclosure facilities<sup>5</sup>
  - 4: The GAAR
- (c) 2 sets of Q&As, entitled: PCRT member QAs, and FAQs
- (2) *Bar Code of Conduct*, part of the BSB Handbook (“Bar Code”). This is framed in terms of Core Duties, Rules and Guidance.
  - (3) *SRA Code of Conduct for Solicitors* (“SRA Code”)<sup>6</sup>
  - (4) *ICAEW Code of Ethics* (“ICAEW Code”)

All the codes have a technical vocabulary of their own (beginning with idiosyncratic use of the cuddly words Handbook and Helpsheet); it is not practical to discuss them without using this terminology. I use initial capitals, to reflect the technical nature of the words.

CIOT formerly published “Standards for the Provision of Taxation Services”, a series which included SPTS no.2 (Tax Return Filing Positions).<sup>7</sup> SPTSs were withdrawn in 2011 because the topics were thought to be covered by PCRT. But PCRT does not have the same level of detail. I think SPTS2 still offers good guidance; it is the most detailed guidance available on tax return filing positions.

### 116.1.1 Status of PCRT

PCRT applies to members of CIOT, STEP, and accountancy bodies.<sup>8</sup>

---

(where the last digit is 1, 2, 3 or 4).

5 See 116.12 (Professional conduct: back duty cases).

6 Nov 2019, replacing the Code of Conduct 2011.

7 <http://old.tax.org.uk/attach.pl/1824/1300/Tax%20Return%20Filing%20Positions.pdf>  
The same or similar issues arise in foreign jurisdictions, and there is some interaction or influence between jurisdictions.

SPTS2 is influenced by US practice: AICPA, “Statement on Standards for Tax Services No. 1, Tax Return Positions” is substantially the same as SPTS2, at some points using the same wording; though it uses the expression “reasonable basis” where SPTS has “tenable” and does not offer examples.

<https://www.aicpa.org/content/dam/aicpa/interestareas/tax/resources/standardsethics/statementsonstandardsfortaxservices/downloadabledocuments/ssts-interpretations-no-1-tax-return-positions.pdf>

An international survey would be an informative exercise.

8 Namely: Association of Accounting Technicians, Association of Chartered Certified Accountants, Association of Taxation Technicians, ICAEW, and Institute of

It is not binding on solicitors or barristers unless they are members of CIOT/STEP (which for private client practitioners is often the case). In the event of conflict, the Bar/SRA Codes prevail over PCRT:

... nothing in PCRT shall override a member's professional duties or be interpreted so as to give rise to any conflict under general law, statutory regulation, or professional regulation of solicitors or barristers, and in the event of any conflict general law, statutory regulation or such professional regulation shall prevail.<sup>9</sup>

SRA say:

Tax practitioners should ... be familiar with the PCRT and adhere to its standards.<sup>10</sup>

This statement is not binding<sup>11</sup> but it confirms that PCRT is relevant at least as a general indication of good practice for solicitors.

PCRT is not recognised by the Bar, though it might be taken as a general indication of good practice.

#### 116.1.2 *HMRC standard for agents*

HMRC issue a further code of conduct: *HMRC: the standard for agents* ("HMRC Standard").<sup>12</sup> Since HMRC do not regulate tax practitioners, the question arises as to what is the sanction if the Standard is breached. The HMRC Standard provides:

##### **4.2 What happens when the standard is breached**

HMRC has several powers to address poor agent practice:

- we can disclose cases of suspected agent misconduct to professional

Chartered Accountants of Scotland.

9 Para 1.6 PCRT.

10 <https://www.sra.org.uk/solicitors/code-of-conduct/guidance/warning-notice/Tax-avoidance---your-duties--Warning-notice.page>

11 See Blackwell, "Conduct unbecoming: Solicitors, the SRA and Tax Avoidance" [2019] BTR 31 at p.34, 35; for tax avoidance aspects of PCRT, see 2.5.7 (Codes of practice/regulators).

12 <https://www.gov.uk/government/publications/hmrc-the-standard-for-agents/hmrc-the-standard-for-agents> (Jan 2018). See too HMRC, "Raising standards in the tax advice market: call for evidence" (Mar 2020) <https://www.gov.uk/government/consultations/call-for-evidence-raising-standards-in-the-tax-advice-market>

bodies for them to investigate further and consider disciplinary action

- we can refuse to deal with a tax agent, pursue criminal cases, apply civil penalties where tax agents are found to have been dishonest, or suspend access to certain online services for tax agents

But there is nothing in the HMRC Standard which is not in PCRT:

5.1 If agents meet the PCRT standard, HMRC does not envisage that our, much briefer, summary of certain important principles will place further requirements on them.

I suspect that the HMRC Standard is addressed to tax agents who are not members of a professional body, and so not subject to any other code of conduct; it should have no relevance to those who are governed by any of the professional codes of conduct. I do not discuss it further here.

## 116.2 Adviser's duties

### 116.2.1 *Advocate for client*

SPTS2 provided:

4. When recommending a filing position, a member has both the right and responsibility to be an advocate for the taxpayer with respect to any position satisfying the aforementioned guidance. ...

Similarly Bar Code of Conduct:

**CD2** You must act in the best interests of each client<sup>13</sup>

**gC6** You are obliged by CD2 to promote and to protect your client's interests so far as that is consistent with the law and with your overriding duty to the court under CD1.

There is no resounding equivalent expressed in PCRT or the ICAEW code. On the contrary, the ICAEW code expresses itself in terms which could be taken as rather different in its emphasis:

A distinguishing mark of the accountancy profession is its acceptance of the responsibility to act in the public interest.<sup>14</sup>

---

<sup>13</sup> Likewise SRA Principle 7.

<sup>14</sup> para 100.1.

But I would have thought that the duty of care which an accountant owes to their client when acting as their tax agent (as opposed to auditing work) comes to the same effect as the duty (in the words of the Bar code) to promote and protect the client's interest, so far as consistent with the law. Though curiously, or perhaps significantly, the accountancy profession does not proclaim it so openly.

### 116.2.2 *Reliance on client*

PCRT provides:

A member must act honestly in all their dealings with their clients, all tax authorities and other interested parties, and do nothing knowingly or carelessly that might mislead either by commission or omission.<sup>15</sup>

PCRT provides:

Where acting as a tax agent, a member is not required to audit the figures in the books and records provided or verify information provided by a client or by a third party. However, a member should take care not to be associated with the presentation of facts they know or believe to be incorrect or misleading ...<sup>16</sup>

Likewise ICAEW Code:

110.2 A professional accountant shall not knowingly be associated with reports, returns, communications or other information where the professional accountant believes that the information:

- (a) Contains a materially false or misleading statement;
- (b) Contains statements or information furnished recklessly; or
- (c) Omits or obscures information required to be included where such omission or obscurity would be misleading.

When a professional accountant becomes aware that the accountant has been associated with such information, the accountant shall take steps to be disassociated from that information.

This contrasts with the Bar Code of Conduct:

**rC6** Your duty not to mislead the court will include the following obligations:

---

15 Para 2.4 PCRT.

16 Para 13 PCRT Helpsheets A.

- .1 you must not:
  - .a make submissions, representations or any other statement; or
  - .b ask questions which suggest facts to witnesses, which you know, or are instructed, are untrue or misleading.
- .2 you must not call witnesses to give evidence or put affidavits or witness statements to the court which you know, or are instructed, are untrue or misleading, unless you make clear to the court the true position as known by or instructed to you.

### **Guidance**

**gC6** ... Your duty to the court does not prevent you from putting forward your client's case simply because you do not believe that the facts are as your client states them to be (or as you, on your client's behalf, state them to be), as long as any positive case you put forward accords with your instructions and you do not mislead the court. Your role when acting as an advocate or conducting litigation is to present your client's case, and it is not for you to decide whether your client's case is to be believed.

**gC7** For example, you are entitled and it may often be appropriate to draw to the witness's attention other evidence which appears to conflict with what the witness is saying and you are entitled to indicate that a court may find a particular piece of evidence difficult to accept. But if the witness maintains that the evidence is true, it should be recorded in the witness statement and you will not be misleading the court if you call the witness to confirm their witness statement.<sup>17</sup>

On this point PCRT and the Bar/SRA Codes conflict and (for solicitors and barristers) the Bar/SRA Code prevails.<sup>18</sup> This is an aspect of a broader distinction of outlook:

It is easy for a lawyer to adopt an undivided loyalty to a client; for better or for worse, that is his professional tradition and obligation. The accountant's tradition is quite the opposite: he is proud of his "independent" status as a certifier of statements. In the exercise of this function, he is the adversary of his client, and his liability is to the creditors who rely upon him. Of course, he is paid by the client, and his certification is ultimately in the client's interest, but he trusts his client

---

<sup>17</sup> Para gC6, gC7 <http://handbook.barstandardsboard.org.uk/handbook/>The SRA Code of Conduct is, I think, the same on this point, though it is not so clearly expressed.

<sup>18</sup> See 116.1.1 (Status of PCRT).

as his own peril. In this respect, the accountant is more policeman than counselor. The accountant's advisory function, which for a long time was quite secondary, blossomed into a major activity with the growth of the income tax. In some instances, this conversion has been very marked: the accountant is often the client's confidant as the lawyer is not. But even in these cases the relics of the past may intrude. Will the accountant always prepare a tax return in the client's best interest, if he knows that he must certify a statement of the tax liability which has a substantial possibility of being an understatement?<sup>19</sup>

Lawyers are more sensitive to the need for legal representation, which is at heart a requirement of the Rule of Law.<sup>20</sup> But perhaps the issue does not often arise.<sup>21</sup> Accountants are not mind-readers, and, particularly when the tax issue is one which turns on the client's intention, they are entitled to believe their clients unless it is clear that the client is lying.<sup>22</sup> There must be an objective element in the test of belief, or a jaded and cynical practitioner could not practice.

### 116.2.3 *No duty of consistency*

The 2011 version of PCRT provided:

*2.7 In principle it is possible to put forward different tenable positions for different clients with different circumstances.*

That is omitted from subsequent editions, but it must be right. It follows from the duty to act in the best interest of the client. If it were not right, the firm could not properly act for both clients, which would be surprising.

---

19 Johnson, "Does the Tax Practitioner Owe a Dual Responsibility to his Client and to the Government?", in Bitker (ed), *Professional Responsibility in Federal Tax Practice* (1970), Chapter 9, p.170. See too Moraine, "Loyalty Divided: Duties to Clients and Duties to Others—the Civil Liability of Tax Attorneys Made Possible by the Acceptance of a Duty to the System" *The Tax Lawyer* Vol. 63, No. 1 (2009).

20 See 2.8 (The Rule of Law).

21 Brandeis, "The Opportunity in the Law" (1914): "As a practical matter, the lawyer is not often harassed by this problem; partly because he is apt to believe, at the time, in most of the cases that he actually tries; and partly because he either abandons or settles a large number of those he does not believe in."

22 Indeed, even HMRC say that "We'll assume you're telling the truth, unless we've good reason to think you're not." Though no-one takes any notice of that; see 5.37 (Residence: Burden of proof).

On the other hand, HMRC ought to be consistent. While they may change their minds, they should not put forward different positions for different taxpayers, even if both positions are tenable.<sup>23</sup>

### 116.3 Tax return filing position

Section 8(2) TMA provides:

Every return under this section<sup>24</sup> shall include a declaration by the person making the return to the effect that the return is to the best of his knowledge correct and complete.

There is no difference of principle between completing a tax return and other HMRC correspondence; but the issues arise most pressing in a tax return, which presents a series of questions which the taxpayer has to answer.<sup>25</sup>

In short:

There are two levels, or standards of confidence, in a tax position:

- (1) Properly-arguable (or sustainable or tenable)
- (2) More than 50% (or realistic possibility)<sup>26</sup>

A position which does not pass the first standard should not be taken at all.

A position which passes the first but not the second standard may be taken, but should be accompanied by disclosure of relevant facts. CIOT agree:

Under the self-assessment system the taxpayer reaches its own view of the correct tax that should be assessed and, in doing so, may take the benefit of any doubt. Indeed, if there is a doubt on a matter, a taxpayer is bound to take the benefit of it in filing a self-assessment, as the alternative is that it volunteers tax that may not actually be due. When it does so, it will obviously need to consider what additional ‘white space’ disclosure it should make to minimise the risk of penalties for an

---

23 HMRC Litigation and Settlement Strategy (2017) provides: “HMRC ... must apply the law fairly and consistently.”

<https://www.gov.uk/government/publications/litigation-and-settlement-strategy-lss>

24 See 115.4 (Notice to make return). As this only applies to s.8, it has to be repeated verbatim for trust returns in s.8A(2) TMA.

25 See s.8(1)(a) TMA set out in 115.4 (Notice to make return).

26 For this standard, see 116.9.1 (Disclosure of weak position).

incorrect or careless return.<sup>27</sup>

A position which passes the second standard may be taken without disclosure of doubts, or facts which may raise doubts; (full disclosure may be advantageous but is not compulsory).

#### 116.4 Properly-arguable standard

PCRT provides:

a member should take care not to ... assert tax positions in a tax filing which they consider to have no sustainable basis.<sup>28</sup>

The Bar Code provides:

rC9 ...

.2 you must not draft any statement of case, witness statement, affidavit or other document containing:

.a any statement of fact or contention which is not supported by your client or by your instructions;

.b any contention which you do not consider to be properly arguable;

...

.d (in the case of a witness statement or affidavit) any statement of fact other than the evidence which you reasonably believe the witness would give if the witness were giving evidence orally;

.3 you must not encourage a witness to give evidence which is misleading or untruthful;

Similarly the SRA Code:

2.4 You only make assertions or put forward statements, representations or submissions to the court or others which are properly arguable.

Although the Bar/SRA Codes are concerned with a lawyer's submissions to a court, the same applies for a professional's submission to HMRC. In *Altus Group v Baker Tilly*:

... a professional would be expected to adopt any filing position that

---

27 CIOT, "Notification of uncertain tax treatment: CIOT response" (August 2020)

<https://www.tax.org.uk/sites/default/files/200826%20Notification%20of%20uncertain%20tax%20treatment%20by%20large%20businesses%20-%20CIOT%20response.pdf>

28 Para 13 PCRT Helpsheet A.

was *properly arguable* and was in the client’s best interests, while at the same time making full disclosure of any matter that would be necessary for HMRC to understand and appraise the filing position.<sup>29</sup>

*Sustainable* (PCRT), *properly arguable* (Bar/SRA Codes, *Altus Group*), and *tenable* (SPTS2) are all vague and evaluative words. It seems to me that they are different ways of expressing the same test, a standard below which it would not be proper to raise an argument, or file a return, even if accompanied by a full disclosure. I refer to this as the “**properly-arguable**” standard.

This is a low standard:

Applicants with weak cases are entitled to seek to advance their case and have it adjudicated upon; that is a fundamental aspect of having a right of access to a court.<sup>30</sup>

The distinction is between a weak case and one bound to fail. An example of an argument which falls short of the properly-arguable standard would be that of Mr Trull, who said he was exempt from the community charge/poll-tax by virtue of letters patent issued by Henry VII in 1508.<sup>31</sup>

The test in the Codes of Conduct is a subjective one: the question in each Code is whether the adviser *considers* the argument to be properly arguable.

#### 116.4.1 HMRC’s compliance duties

Does the same rule apply to HMRC? Or are HMRC subject to stricter principles, as a public body?

*Ad Hoc Property Management v HMRC*<sup>32</sup> suggests the same principles apply. In this case, leading counsel advised HMRC that they were likely to lose a tax appeal. HMRC defended the appeal regardless, and backed down much later in the day. An application for costs on an indemnity

29 [2015] EWHC 12 (Ch) at [64].

30 *Sathivel (R, oao) v Secretary of State for the Home Department* [2018] EWHC 913 (Admin) at [16].

31 See Baker, “The Curious Case of Mr Trull” in Harris & Cogan (ed) *Studies in the History of Tax Law* vol 8. Similar pseudolegal arguments echo through social media, propounded by movements such as “Freemen on the land”, who contend that they are not bound by law to which they do not consent (!); though they have not yet troubled the FTT.

32 [2019] UKFTT 315 (TC).

basis was not successful. The point was that Counsel had not gone so far as to advise that the case was hopeless.

Perhaps without realising the disturbing implications, the Tribunal held that “this was not conduct outside the norm”. The reader may wonder whether HMRC’s main object, in pursuing appeals it knows it is likely to lose, as far as the door of the Court but no further, is to test whether the taxpayer had the gumption to proceed with the appeal; especially in circumstances where HMRC’s resources outweigh those of the taxpayer.

Would the result have been different if the Tribunal had been referred to the HMRC Litigation and Settlement Strategy, which states that where HMRC believes that it is unlikely to succeed in litigation it will concede the issue?<sup>33</sup> Discuss.

Of course in practice the taxpayer is not likely to know exactly what advice HMRC have received, as HMRC will not waive legal privilege.

*BPP Holdings v HMRC*<sup>34</sup> discussed this question in circumstances where HMRC failed to comply with an “unless” order and were debarred from defending an appeal:

[Counsel for HMRC] argued that the Judge should have ... taken into account, the fact that the debarring order in this case prevents HMRC from discharging its public duty and could lead to the public interest being harmed in that VAT which should be paid may not be recovered. I consider that it would set a dangerous precedent if that point were accepted, as it would discourage public bodies from living up to the standards expected of individuals and private bodies in the conduct of litigation. It seems to me that there is at least as strong an argument for saying that the courts should expect higher standards from public bodies than from private bodies or individuals.

The question whether HMRC are bound by the same standards as individuals, or lower or higher, is too general to admit an answer. It depends on the context. But the starting point should be that the same

---

33 HMRC, “Litigation and Settlement Strategy” para 18. (This is subject to exceptions in special circumstances which do not seem to be applicable here.) See [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/655344/HMRC\\_Resolving\\_tax\\_disputes.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/655344/HMRC_Resolving_tax_disputes.pdf)

Less charitably, the HMRC tactic might be called bluffing if not oppressive; see 116.10.1 (HMRC/taxpayer relationship).

34 [2017] UKSC 55 at [30].

standards are to be expected.

## 116.5 SPTS examples

It may be helpful to summarise the SPTS examples in a table:

<i>Example</i>	<i>Legislation</i>	<i>Enactment history</i>	<i>Pro-taxpayer filing position</i>
1	unfavourable	neutral	untenable
2	unfavourable	favourable	realistic possibility
3	unfavourable	arguably some support	tenable
	<b><i>Legislation</i></b>	<b><i>HMRC guidance</i></b>	
4	unfavourable	favourable	tenable
5	unfavourable	“technical correction” proposed	tenable
6	unfavourable	favourable statement withdrawn	untenable
	<b><i>Case law</i></b>	<b><i>HMRC guidance</i></b>	
10	inconsistent	unfavourable	tenable
	<b><i>Reason for non-compliance</i></b>		
7	HMRC may not notice		untenable
8	Compliance cost exceeds tax		untenable
9	Estimate in good faith		tenable

The examples are helpful, as far as they go, though in practice matters may be very fact sensitive.

### 116.5.1 Examples: Enactment history

In the first set of illustrations, enactment history is (or may be) more favourable to the taxpayer than the statutory law. SPTS2 provides:

#### 15. Illustration 1.

A taxpayer has engaged in a transaction that is adversely affected by a new statutory provision. Prior law supports a position favourable to the taxpayer. The taxpayer believes, and the member concurs, that the new statute is constitutional, clearly drafted, and unambiguous. The legislative history (as recorded in Hansard) discussing the new statute contains general comments that do not specifically address the taxpayer’s situation.

#### Conclusion

The member should recommend the filing position supported by the new statute. A position contrary to a constitutional, clear, and unambiguous statute would not be considered to be a tenable position.

Illustration 1 is straightforward; its purpose is to set the scene for the more interesting set of illustrations where legislative history (including Hansard but not limited to that) is (or may be) more favourable to the taxpayer than

the statutory law:

**16. Illustration 2**

The facts are the same as in illustration 1 except that the legislative history discussing the new statute specifically addresses the taxpayer's situation and supports a position favourable to the taxpayer.

**Conclusion**

In a case where the statute is clearly unambiguously against the taxpayer's position but a contrary position exists based on legislative history specifically addressing the taxpayer's situation, a filing position based either on the statutory language or on the legislative history satisfies the realistic possibility standard.

**17. Illustration 3**

The facts are the same as in illustration 1 except that the legislative history can be interpreted to provide some evidence or authority in support of the taxpayer's position; however, the legislative history does not specifically address the situation.

**Conclusion**

In a case where the statute is clear and unambiguous, a contrary position based on an interpretation of the legislative history that does not explicitly address the taxpayer's situation does not meet the realistic possibility standard. However, because the legislative history provides some support or evidence for the taxpayer's position, such a filing position is not untenable. A member may recommend the position to the taxpayer if the member also recommends appropriate disclosure.

### 116.5.2 *Examples: HMRC guidance*

In the next set of illustrations, HMRC guidance is (or may be) more favourable to the taxpayer than the statutory law. SPTS2 provides:

**18. Illustration 4**

A taxpayer is faced with an issue involving the interpretation of a new statute. Following its passage, the statute was widely recognised to contain a drafting error, and a technical correction proposal has been introduced. The tax authority issues a pronouncement indicating how it will administer the provision. The pronouncement interprets the statute in accordance with the proposed technical correction.

**Conclusion**

Filing positions based on either the existing statutory language or the Inland Revenue pronouncement satisfy the tenable view.

**19. Illustration 5**

The facts are the same as in illustration 4 except that no Inland Revenue

pronouncement has been issued.

**Conclusion**

In the absence of Inland Revenue pronouncement interpreting the statute in accordance with the technical correction, only a return position based on the existing statutory language will meet the realistic possibility standard. A filing position based on the proposed technical correction may be recommended if it is appropriately disclosed, since it is a tenable view.

**20. Illustration 6**

A tax form published by the Inland Revenue is incorrect, but completion of the form as published provides a benefit to the taxpayer. The member knows that the Inland Revenue has published an announcement acknowledging the error.

**Conclusion**

In these circumstances, a return position in accordance with the published form is not a tenable argument.

This can be contrasted with a case where HMRC guidance is (or may be) less favourable than the strict law:

**24. Illustration 10**

On a given issue, a member has located and weighed two authorities concerning the treatment of a particular expenditure. The Inland Revenue has issued an administrative ruling that required the expenditure to be capitalised and amortised over several years.

On the other hand, a court opinion permitted the current deduction of the expenditure.

The member has concluded that these are the relevant authorities, considered the source of both authorities, and concluded that both are persuasive and relevant.

**Conclusion**

The tenable view standard is met by either position.

**116.6 Low detection risk**

Para 3.2 PCRT provides:

Tax advice must not rely for its effectiveness on HMRC having less than the relevant facts. Any disclosure must fairly represent all relevant facts.

SPTS 2 provides:

3. A member should not recommend a filing position or prepare a return

reflecting a position that the member knows:-

- a) Takes advantage of the enquiry selection process of the Inland Revenue, or other tax authority where relevant.
- b) Serves as a mere arguing position advanced solely to obtain leverage in the bargaining process of settlement negotiation with a taxing authority.

The next set of examples discuss these excuses for incorrect returns. The examples are mundane, but I set them out for completeness. SPTS2 provides:

**21. Illustration 7**

A taxpayer wants to take a position that a member has concluded is not tenable. The taxpayer maintains that even if the Inland Revenue examines the return, the issue will not be raised.

**Conclusion**

The member should not consider the likelihood of an enquiry when determining whether the realistic possibility standard has been met. The member should not prepare a return that contains an untenable position even if it is fully disclosed.

Similarly for accounting purposes. IFRIC 23 provides:

An entity is to assume that a taxation authority with the right to examine any amounts reported to it will examine those amounts and will have full knowledge of all relevant information when doing so.

**116.7 Cost and estimates**

SPTS 2 provides:

**22. Illustration 8**

A statute is passed requiring capitalisation of certain expenditure. The taxpayer believes, and the member concurs, that to comply fully, the taxpayer will need to acquire new computer hardware and software and implement a number of new accounting procedures.

The taxpayer and member agree that the costs of full compliance will be significantly greater than the resulting increase in tax due under the new provision. Because of these cost considerations, the taxpayer makes no effort to comply. The taxpayer wants the member to prepare a return on which the new requirement is simply ignored.

**Conclusion**

The return position proposed by the taxpayer is not tenable, and the member should not prepare the return.

**23. Illustration 9**

The facts are the same as in illustration 8 except that the taxpayer has made a good-faith effort to comply with the law by calculating an estimate of expenditure to be capitalised under the new provision.

**Conclusion**

In this situation, the tenable view standard has been met.<sup>35</sup>

**116.8 Disclosing doubt/further information**

I distinguish between three types of disclosure:

<b>Disclosure</b>	<b>Required by law</b>	<b>Sanction</b>
Voluntary	No	No, but disclosure may have advantages
Necessary	Yes	Yes: penalties/disciplinary proceedings
Precautionary	Position unclear	Risk, but disclosure avoids the risk

**116.8.1 No general duty of disclosure**

Everyone responsible for completing tax returns has to ask themselves questions and decide on the answers. If an answer is reached, with sufficient confidence, there is in general no obligation to disclose to HMRC the reasons, or doubts, or facts which are not considered to affect the conclusion. Failure to disclose these things does not in principle render answers in the return to be deliberate or careless errors (even if they turn out to be wrong).

In particular, the fact that there is a possibility that the courts might disagree with an adviser's view does not in itself require any disclosure.

This applies to both sides. When HMRC assess tax to the best of their judgement, they must specify what tax they honestly and reasonably consider due, but are under no obligation to disclose doubts or information which might support a different tax treatment.

PCRT used to say that clearly:

*In the preparation of a tax return, there is no duty to provide more information to the tax authorities than the return requires simply because some pieces of information known to the member might support a different tax treatment from that which the member, after due consideration of all the information available to him, honestly*

---

<sup>35</sup> SA100 (2019) box 20 allows for this. The rubric provides: "If this tax return contains provisional figures, put "X" in the box".

*considers to be the tax treatment.*<sup>36</sup>

That continues to be the law, but the current version of PCRT no longer has the confidence to express it in such clear and uncompromising terms. However one can infer that the authors' view has not changed, as PCRT refers to "the minimum information required by law".<sup>37</sup>

In the 2019/20 edition of this work I said:

The law could not sensibly be otherwise, as that possibility almost always exists, even if the law seems clear.<sup>38</sup>

Perhaps this had an element of rhetorical hyperbole. But there will often be doubt about whether a matter is one of doubt. Or to be more precise, whether the matter is of sufficient doubt to require disclosure, as "doubt" is a matter of degree which cannot easily be resolved into a binary question.

#### 116.8.2 *Disclosure required/advisable*

Notwithstanding the general principle, there are situations where fuller disclosure is required, and situations where disclosure is voluntary but advisable.

SPTS2 expressly distinguished between 2 standards:

- (1) *Realistic possibility* standard: a position which has a realistic possibility of being sustained
- (2) *Tenable* (properly-arguable) standard: a position which is merely tenable/properly arguable

The point of the distinction is that a filing which depends on a merely tenable argument should be supplemented by further disclosure. A filing

---

36 PCRT 2004 version, para 3.10.

The Keith Committee recommended that taxpayers should be required to disclose doubts to HMRC but the recommendation was rightly rejected as impractical: see Committee on Enforcement Powers of Revenue Departments (1983) Cmnd 8822 para 7.3.6 and HMRC consultation papers "The Inland Revenue and the Taxpayer" and "Keith: Further Proposals" (1988).

37 Para 19 PCRT Helpsheet A: "If a client is unwilling to include in a tax filing the minimum information required by law, the member should follow the guidance in Helpsheet C: Dealing with Errors."

38 The text continued: Readers will easily bring to mind examples of mistaken or improbable decisions, some corrected on appeal and others not, to illustrate the uncertainties – or (which comes to the same thing) the lottery element in litigation.

which reaches the higher standard does not or may not require to be supplemented by further disclosure.

A distinction of this kind makes sense, but the SPTS terminology is imprecise and perhaps not the ideal.

Disclosure may be required (not merely voluntary) in circumstances where a reasonable taxpayer would disclose.<sup>39</sup>

Voluntary disclosure (in the words of PCRT, “fuller disclosure than is strictly necessary”) may be desirable, or even essential, for the following reasons:

- (1) It may prevent a discovery assessment after the one-year enquiry window<sup>40</sup>
- (2) It may facilitate good relations with HMRC
- (3) It may help avoid allegations of misconduct

### **116.9 When disclosure required**

There are some circumstances where a reasonable taxpayer would make some disclosure beyond giving short answers in a tax return or making a claim.

The duty may be based on:

- (1) The principle that one need not disclose matters of doubt does not apply where silence may be said to mislead.
- (2) The duty to act as a reasonable taxpayer: if a reasonable taxpayer would disclose, a failure to do so would be regarded as careless, and if the weak argument turns out to fail, penalties would be due accordingly.

Perhaps those are two different ways of making the same point.

Disclosure in these circumstances is not voluntary.

In this respect I suspect that the law has evolved in recent years; but reasonable conduct is a flexible standard which may change over time.

The questions then are:

- (1) In what circumstances is disclosure required
- (2) What must be disclosed.

PCRT provides:

---

<sup>39</sup> See 116.9.2 (When disclosure required).

<sup>40</sup> See 115.9 (Full-disclosure requirement).

21. It may be advisable to consider fuller disclosure than is strictly necessary. Reference to ‘The Standards for Tax Planning’ in PCRT may be relevant.<sup>41</sup> The factors involved in making this decision include:

- A filing relies on a valuation;
- The terms of the applicable law;
- The view taken by the member;
- The extent of any doubt that exists;
- The manner in which disclosure is to be made; and
- The size and gravity of the item in question.<sup>42</sup>

A list of factors is not exactly guidance, but it is perhaps a start. But the opening words “advisable to consider *fuller disclosure than is strictly necessary*” suggest that we are not dealing with a *duty* of disclosure.

An example of this category is where a taxpayer wishes to resile from an agreed post-transaction valuation.<sup>43</sup> The CG Manual provides:

**CG16612: post transaction valuation checks: action on receipt of return** [May 2020]

... Agreement to a valuation by the use of this service will normally lead to the use of that valuation in the Return. But agreement does not bind the customer to using that valuation. In rare cases they may discover that a relevant fact has been overlooked or feel on reflection that agreement was inappropriate. If an agreed valuation is not followed in making a Return we would expect a note drawing our attention to the change of view.

Likewise if a taxpayer disagrees with a non-statutory clearance:

If you disagree with HMRC’s advice you may complete your return in

41 This refers to para 3.8 PRCT which provides:

- [a] Disclosure should be made whenever required by law and
- [b] fuller disclosure must be recommended to clients wherever it is appropriate given a wider relationship or dialogue with HMRC relevant to that client.
- [c] What is actually to be disclosed will inevitably reflect a professional judgement taking into account all relevant facts and law specific to the case in question and what the client consents should be disclosed.

But para [a] is obvious, and para [b] gives no guidance as to when disclosure is “appropriate”.

42 Para 21 PCRT Helpsheet A.

43 It would be more sensible if a post-transaction valuation were binding on the taxpayer, but that would require legislation, and perhaps in practice the issue will rarely if ever arise.

line with your own view of the proper tax treatment, but you should draw HMRC's attention to the particular entry in your return and explain what you've done.<sup>44</sup>

These are cases where silence may be said to mislead, as HMRC would reasonably expect an agreed valuation to be adopted.

### 116.9.1 *Disclosure of weak position*

I think a filing position which passes the properly-arguable test may still be so weak that a reasonable taxpayer would disclose the relevant facts so HMRC can fairly form their own view. In *Altus Group v Baker Tilly*:

a professional would be expected to adopt any filing position that was properly arguable and was in the client's best interests, *while at the same time making full disclosure of any matter that would be necessary for HMRC to understand and appraise the filing position.*<sup>45</sup>

The sanction for failing to disclose when a reasonable taxpayer would do so would be penalties on the basis of carelessness, (assuming tax was held to be due).

What constitutes a weak position, in the sense that a disclosure is required? I think it is in principle one which reaches the merely tenable standard, so it may be properly taken; but its prospects of success are judged at less than 50%.<sup>46</sup> This may be what SPTS2 means in referring to the "realistic possibility" standard. But one may also have regard to the other factors, in particular the amount at stake. If the amounts are larger, the reasonable taxpayer should take more care, and vice versa.

If the position is judged sufficiently weak, the relevant facts should be disclosed. I see no general duty to disclose that an argument/filing position is judged a weak one, or to set out the argument in detail, if a reasonably competent officer can work it out for themselves.

Precautionary disclosure arises for a position which the adviser does not consider to be a weak one, but there is a risk that others may think it so.

---

44 HMRC, Non-Statutory Clearance Service

<https://www.gov.uk/guidance/non-statutory-clearance-service-guidance> (accessed May 2021)

45 [2015] EWHC 12 (Ch) at [64].

46 Clarke broadly agrees, suggesting that the taxpayer should disclose unless he considers the prospects of success are better than 50:50: *Offshore Tax Planning* (2020/21) para 72.45 (Reporting approach).

In particular if the adviser is following a view in the profession which is very much a minority view, even if the adviser does share that view.<sup>47</sup>

This view is consistent with accountancy principles. IFRIC 23 provides:

An entity has to consider whether it is probable that the relevant authority will accept each tax treatment, or group of tax treatments, that it used or plans to use in its income tax filing.

If the entity concludes that it is probable that a particular tax treatment is accepted, the entity has to determine taxable profit (tax loss), tax bases, unused tax losses, unused tax credits or tax rates consistently with the tax treatment included in its income tax filings. If the entity concludes that it is not probable that a particular tax treatment is accepted, the entity has to use the most likely amount or the expected value of the tax treatment when determining taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates. The decision should be based on which method provides better predictions of the resolution of the uncertainty.

HMRC note that IFRIC only applies to income taxes (hence the reference to income tax filing); but logically it should apply to all tax risks.

### 116.9.2 *Disclosure that HMRC disagree*

Suppose a taxpayer takes a position which is not regarded as weak, but which is contrary to a HMRC view which has been formally published in a SP. I think a reasonable taxpayer will generally disclose the fact that the position adopted is contrary to an SP unless the SP is clearly wrong.

The same applies if the HMRC view is clearly and cogently expressed in less formal sources:

- (1) RI or Business Briefs, or correspondence formally published by the professional bodies
- (2) Private correspondence addressed to the taxpayer (but not if addressed to others)

unless the HMRC view expressed is thought likely (on the balance of probabilities) to be wrong.

The same applies if the HMRC view is clearly and explicitly expressed in the HMRC Manuals, but it should be borne in mind that the Manuals are a vast ocean, of mixed quality, frequently out of date, and are said to

---

<sup>47</sup> But this assumes that there is a “view in the profession”; which is by no means necessarily true, or easy to ascertain.

be intended for internal HMRC use rather than for use by taxpayers.<sup>48</sup> So it is easier to disregard this than formal statements of HMRC views.

*Hyman v HMRC* contains a more sceptical view of the quality of HMRC guidance, SPs as well as Manuals:<sup>49</sup>

The guidance [in Statements of Practice and the HMRC Manual] was non-statutory guidance. Such guidance can in some cases be persuasive when a court or tribunal is asked to construe legislation. However, it does not differ from a statement by an academic author in a text book or an article and it does not enjoy any particular legal status; there is no presumption that the guidance is correct... It is by no means unprecedented for the court or tribunal to say that the guidance is simply wrong.

Full disclosure is obviously required if it is desired to make full disclosure to prevent HMRC making a discovery which would authorise an assessment after the enquiry period.<sup>50</sup> But that is a different question from whether non-disclosure could be regarded as careless or in any way improper.

### 116.9.3 Large business disclosure

The FA 2022 will require large businesses to disclose “uncertain tax treatment”.<sup>51</sup> This is defined (in short) to mean:

---

48 See *Aozora GMAC Investment, R (oao) v HMRC* [2019] EWCA Civ 1643 at [23]. But while in origin the Manuals were only for internal use, they are now sometimes (I would say, generally) used as a platform to set out HMRC guidance for its customers. There seems to be a trend for guidance published separately to be moved to the Manuals, (eg RDR3, DIMF guidance).

49 [2021] UKUT 68 (TCC) at [42]. The position may be compared to the OECD Commentary to the Model Convention, which has been said to have only “such persuasive force as aids to interpretation as the cogency of their reasoning deserves”; see 103.10.2 (Changes to OECD Commentary).

50 See 115.10.5 (Disagreeing with HMRC view).

51 This text is written on the basis of draft legislation and needs to be reviewed when the FA is final.

The background can be traced in a series of HMRC consultation & response papers: “Notification of uncertain tax treatment by large businesses” (Mar 2020)

Ditto: Summary of responses (Mar 2021)

Ditto: Second consultation (Mar 2021)

Ditto: Summary of responses (Jul 2021)

<https://www.gov.uk/government/publications/large-businesses-notification-of-unc>

- (1) accounts reflect that it is probable (more likely than not) that a different tax treatment applies;<sup>52</sup> or
- (2) the taxpayer knows that HMRC disagree; or
- (3) a substantial possibility<sup>53</sup> that a court would disagree

I refer to this as the “**large business disclosure code**”.

The code may have limited initial impact, because:

- (1) Only very large businesses are affected, in short, turnover over £200m or balance sheet over £2 billion,<sup>54</sup> and the amount of tax at stake must exceed £5m
- (2) Penalty for breach is nominal: £5k, or £50k for 3<sup>rd</sup> & later breaches<sup>55</sup>

I do not discuss the rules in detail here: that would need a long chapter to itself. But the question arises as to what impact this new code has on the duties of other taxpayers to disclose uncertain tax treatment.

One might have hoped that a consultation paper proposing new law to summarise the existing law: that is, to consider to what extent the current law requires the taxpayer to disclose matters of doubt. But that is not mentioned. Presumably it was just too obscure.

One might have thought that since large business is expressly subject to the new code, no duty to disclose these three matters rests on:

- (1) taxpayers who are not large businesses; or
- (2) large businesses, for returns submitted before the new code takes effect (1/4/2022).

But that is an argument from redundancy, and it is considered that no inference should be drawn as to the general law of disclosure.<sup>56</sup> Perhaps the code is hoped to have, and perhaps it will have, exhortatory effects which reach beyond the large businesses to which it applies.

---

*ertain-tax-treatment*

These are now of historic interest only.

52 IFRIC 23; see 116.9.1 (Disclosure of weak position).

53 HMRC guidance shows this is intended to include cases where it is more likely than not that the taxpayer’s view is correct. Beyond that point HMRC offer no real guidance on what is substantial; guidance is impossible as the phrase is inescapably vague.

54 Following the model of Senior Accounting Officer regime (Sch 46 FA 2009) and Publication of Tax Strategies regime (Sch 19 FA 2016).

55 Though there is also a possible reputational cost.

56 See [App 2.1.2](#) (Argument from redundancy).

A cynical reader may anticipate that once enacted, the scope of the code will be extended, and penalties increased; as we have seen with DOTAS. An extended assessment time limit for breach of the duty, for a start. Time will tell.

There is one precedent: The Code of Practice on Taxation for Banks requires that banks disclose fully “significant uncertainties in relation to tax matters”. This will be superceded by the large business disclosure code (except for banks which are not large businesses, as defined).

### 116.10 Disclosure for good HMRC relations

PCRT formerly provided:

*It may be in the client’s best interest to furnish more information than he is strictly required to do because this is likely to lead to a more reasonable approach by the tax authorities, thereby saving money and time in the long run ...*

PCRT was tentative (note the *may*) and the validity of the point is not easy to assess: it may vary from client to client, from time to time, and from department to department. Disclosure in these circumstances is voluntary.

In the 2010/11 edition of this work I commented:

It seems to me that the only tangible incentive for above-minimum disclosure is to curtail the enquiry period, and obtaining “a more reasonable approach by the tax authorities” is uncertain, unquantifiable, unenforceable and ultimately chimerical. But readers who deal directly with HMRC on a daily basis will be in a better position to form a view on this issue, and this is (understandably) an attitude that HMRC wish to encourage.<sup>57</sup>

The authors of PCRT may agree, since in 2011 they watered down this passage; it now reads:

*In general, it is likely to be in a client’s own interests to ensure that factors relevant to their tax liability are adequately disclosed to HMRC because:*

---

57 See comments on the “enhanced relationship” in OECD, Study into the Role of Tax Intermediaries, 2008, <http://www.oecd.org/dataoecd/28/34/39882938.pdf> and OECD “Engaging with High Net Worth Individuals on Tax Compliance” (May 2009); [http://www.keepeek.com/Digital-Asset-Management/oecd/taxation/engaging-with-high-net-worth-individuals-on-tax-compliance\\_9789264068872-en](http://www.keepeek.com/Digital-Asset-Management/oecd/taxation/engaging-with-high-net-worth-individuals-on-tax-compliance_9789264068872-en)

- Their relationship with HMRC is more likely to be on a satisfactory footing if they can demonstrate good faith in their dealings with them.<sup>58</sup>

If it is anticipated that questions will be asked, it is sensible to anticipate them by providing details in a tax return or elsewhere.

### 116.10.1 HMRC/taxpayer relationship

The debate about disclosure should be seen in the context of a broader controversy concerning the relationship between HMRC and the taxpayer. The traditional view has been that:

- (1) The relationship is adversarial: the interests of HMRC and taxpayer are distinct and each acts in their own interest.
- (2) The relationship should be characterised by adherence to legal rules (substantive tax rules determining the amount of tax due, and the requirement of honesty) supplemented by procedural rules of conduct (such as courtesy and efficiency).

A rival (and more recent<sup>59</sup>) view is the opposite:

- (1) The relationship should be a collaborative one, taxpayer and HMRC working together in harmony towards a common goal, to ascertain the right amount of tax.
- (2) The right amount of tax<sup>60</sup> is defined only partly in legal rules but also discernable from a more insubstantial spirit of the rules.<sup>61</sup> (Perhaps

58 Para 20 PCRT Helpsheets A.

59 It is difficult to identify a specific date when this school of thought emerged, but I think it reflects a change of administration around the beginning of the second term of the Labour Government (2001). Contrast the use of the term “compliant” and “customer”; see [App 1.3](#) (“Compliant”), [App.1.4](#) (“Customers” of HMRC).

60 Also called “the proper amount of tax”.

61 An example is the Code of Practice on Taxation for Banks, (introduced 2009, current version 2013, with commentary periodically updated). This provides:

“Relationships with HMRC should be transparent and constructive, based on mutual trust” [adding with jarring realism: “wherever possible”].

“The features of this relationship should include disclosing fully the significant uncertainties in relation to tax matters... engaging in a co-operative, supportive and professional manner in all interactions ... working collaboratively...”

<https://www.gov.uk/government/publications/code-practice-taxation-banks/code-of-practice-on-taxation-for-banks>

Similarly, “A European Taxpayers Code” (2016): Tax administrations should “aim

HMRC consider themselves the arbiter of this spirit, or perhaps no arbiter is needed: so far as the point is not governed by law, the question can be fudged.)<sup>62</sup>

I refer to the traditional view as the “**adversarial approach**”, and the rival view as the “**collaborative approach**”. A range of positions are possible between the two extremes.

The controversy raises various questions:

- (1) Empirical questions: do HMRC and taxpayers actually regard the collaborative approach as the model of their relationship, or to what extent do they do so,<sup>63</sup> or pretend to do so
- (2) Political and moral questions: should they do so, or to what extent should they do so
- (3) Legal questions: do the courts enforce a collaborative approach, or to what extent do they do so

The short answer to the legal question seems to be that the courts will not enforce a collaborative approach. It rests outside the law.<sup>64</sup>

Thus in one case, HMRC noticed that a company had failed to put in a loss election, but did not inform the company until the deadline for the election had passed. The court held that there was nothing wrong in that.<sup>65</sup>

In another case, an unrepresented taxpayer owed tax of £1,010 and £800 penalties for late payment of previous tax. He paid HMRC £1,010 but

---

to engage full-heartedly and in a spirit of cooperation with taxpayers to resolve tax issues”.

[https://ec.europa.eu/taxation\\_customs/sites/taxation/files/guidelines\\_for\\_a\\_model\\_for\\_a\\_european\\_taxpayers\\_code\\_en.pdf](https://ec.europa.eu/taxation_customs/sites/taxation/files/guidelines_for_a_model_for_a_european_taxpayers_code_en.pdf)

62 HMRC say: “Any disagreements arising under the Code will be dealt with using existing processes.” See “A Code of Practice on Taxation for Banks - Consultation Response Document” (2009).

63 HMRC Solicitors Office, for instance, in the author’s experience, adopt an uncompromisingly adversarial approach in the conduct of tax litigation.

Different considerations apply to a charity: see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20) para 46.2 (Charity/HMRC relationship).

64 HMRC rightly say (under the heading “The Rule of Law”): The Code is not law.

See “A Code of Practice on Taxation for Banks - Consultation Response Document” (2009).

65 *Bampton Property Group (R, oao) v King* [2014] STC 56.

failed to direct whether it should be used in payment of the penalties or the tax. This was said to give HMRC a discretion, and HMRC allocated the payment in the way most detrimental to the taxpayer and most advantageous to HMRC: towards the penalties. Thus £810 tax liability remained outstanding and attracted further penalties for late payment. The Tribunal saw nothing wrong in that.<sup>66</sup>

*Veltema* held that HMRC had no obligation to begin an enquiry within the one-year enquiry window (even though the Manual required this); so an assessment after the enquiry window was upheld on the basis of inadequate disclosure.<sup>67</sup>

HMRC Settlement and Litigation Strategy states that HMRC will handle disputes by working collaboratively with its customers, and that a collaborative approach requires the parties to be open and transparent.<sup>68</sup> But this document did not shed much light on how the Tribunal should exercise its discretion to direct disclosure.<sup>69</sup>

There are at least two reasons to regard the collaborative approach with suspicion:

- (1) It has resource implications for HMRC.
- (2) It may lead away from the view that tax should be governed by law.

For a restatement of the traditional view, see the speech of Anthony Thomas, then CIOT president:

We need to return to the “healthy tension” between HMRC and the tax profession that existed 10 to 20 years ago: no special relationships, no cosy conferences; no favours, deals and understandings; no inside tracks

---

<sup>66</sup> *Kriticos v HMRC* [2019] UKFTT 0677 (TC).

<sup>67</sup> In *Thakoral Tailor v HMRC* [2017] UKFTT 845 (TC) the taxpayer was elderly, unrepresented, in difficult financial circumstances, and with cognitive impairment. Even in those circumstances, HMRC acted adversarially. The Tribunal urged HMRC to consider the “unfairness which should have been apparent” (the taxpayer had fallen into the *Lobler* trap, yet again); but was otherwise impotent.

<sup>68</sup> But openness and transparency do not extend very far in practice. In particular, HMRC are not open or transparent when it comes to documents which qualify for legal professional privilege. See HMRC, “Litigation and Settlement Strategy” (Oct 2017)

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/655344/HMRC\\_Resolving\\_tax\\_disputes.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/655344/HMRC_Resolving_tax_disputes.pdf)

<sup>69</sup> *McCabe v HMRC* [2020] UKUT 266 (TCC) at [56]; for this case see 8.18 (Tie-breaker: Mutual agreement); see too 116.4.1 (HMRC’s compliance issues).

and private access. ... Senior tax officials did not subject directors, businesses and the professions to the kind of lectures one would expect from a politician. The job of civil servants is, and always has been, to apply the rule of law in an even handed manner.<sup>70</sup>

That was said in 2011. I am not sure how far this view prevails today.

A full discussion lies beyond the scope of this book, but the issues are deep, and will not go away.

## 116.11 Certificate of tax position

CIOT say:

### **Background**

Over the past couple of years, HMRC have been sending out letters to UK individuals who they have identified as having received income, gains or assets from overseas accounts or investments. These have been prompted by information HMRC have been receiving from overseas tax authorities under Automatic Exchange of Information (AEOI) agreements about UK residents with financial accounts and investments overseas.<sup>71</sup> As noted, the letters are targeted at individuals whom the data identifies as having received income, gains or assets from overseas accounts or investments, and HMRC also undertake some additional risk assessment before sending the letters...

### **What's in the letters?**

HMRC's letters use standard wording and start by informing the individual that HMRC have information which shows that they have an interest in overseas property or ay have received overseas income or gains which may be taxable in the UK.

Some of the letters the CIOT is aware of are:

March 2017: based on information from the US IRS under the IGA to improve international tax compliance and implement FATCA

February 2018: based on information from AEOI with the Crown Dependencies and Overseas Territories

February 2019: based on information from tax information exchange agreements with other countries, including as a result of the CRS.

February 2020: based on information from tax information exchange agreements with other countries, including as a result of the CRS (with some changes in the wording of the letter and Certificate of Tax position compared to the February 2019 version).

The most recent letters have come from HMRC's "Risk and Intelligence Service, Offshore". Some of them include a "Certificate of Tax Position" form which HMRC ask the individual to complete and return whether they have additional tax liabilities to disclose or not. We understand that one reason why HMRC use the "Certificate of Tax Position" is because it helps them minimise the number of "no response" cases they would otherwise need to follow up.

---

70 "We Need Trust", Taxation Magazine (2 June 2011) p.7.

71 See 120.2, 121.1 (CRS & other information sources).

On the certificate, the individual is asked to sign and make a declaration to the effect that:

- a) The information they provide on the certificate will be “correct and complete to the best of their knowledge and belief”- [this is identical to the declaration on the self-assessment tax return Box 22 of SA100] and
- b) They understand that choosing to make a false statement or complete a false certificate is a criminal offence that can result in investigation and prosecution - [this is similar, but not identical, to the declaration on the SA100 which is "I understand that I may have to pay financial penalties and face prosecution if I give false information].

They are also asked to tick that either:

- a) Their tax affairs need to be brought up to date and they will make a disclosure of irregularities through the Worldwide Disclosure Facility (WDF); or
- b) Their tax affairs do not need updating and they do not have additional tax to pay. There is then a further declaration: “I have declared all of my offshore income, assets and gains”. Previous versions of the letter included the words “which are taxable in the UK” at the end of the sentence.

### **What you should do if a client receives one of these letters from HMRC**

#### 1. Check the position.

It should be noted that HMRC are saying in the letter that they are aware the person has overseas income, not that their tax return is necessarily wrong. However, HMRC do carry out some risk assessment before sending a letter, so it will clearly be essential to check whether the individual’s tax affairs are correct and complete to the best of their knowledge and belief before responding to the letter.

We are also aware that discrepancies in the data may exist due to it often relating to a calendar year, thereby crossing over two UK tax years, and because it does not come into HMRC in a standard format. This is expected to affect mainly the early years of data exchange and should become less of an issue as we move into future tax years and HMRC’s systems become more sophisticated at analysing the data they receive.

#### 2. Respond to HMRC’s letter, whether or not there is anything to disclose.

- a. If a disclosure needs to be made, use the WDF (or another appropriate method).

If a disclosure is required, the letter advises that this must be made via the WDF. However, HMRC cannot compel a taxpayer to use any specific method for their disclosure and using the WDF may not necessarily be the most appropriate method. Depending on the individual circumstances of the taxpayer, other approaches may be better e.g. COP9 (Contractual Disclosure Facility). Agents should therefore consider their client’s specific circumstances and advise on the most appropriate method for a disclosure. As noted, this may not always be the WDF.

A CIOT member must comply with the fundamental principle of professional competence and due care as set out in PCRT. This means that they should not undertake professional work which they are not competent to perform unless they obtain appropriate assistance from a suitably qualified specialist. Advice from another adviser specialising in tax disputes may therefore be needed if the agent does not have the necessary expertise to handle a disclosure themselves.

It is also important to note that there is no de minimis level below which mistakes

do not need to be disclosed.

- b. If no disclosure is needed, the person should consider sending HMRC an explanation by letter.

HMRC will accept a response by letter should an individual choose not to complete the “Certificate of tax position” (see 3. below).

Where no response is received, HMRC will follow up so not responding at all will attract more attention from HMRC. Follow up is likely to be by a further letter in the first instance. If no response is forthcoming after the second letter, HMRC will consider the most appropriate action to take next following further risk assessment. This could range from contacting the person by telephone to opening an enquiry or investigation.

Responding to the initial letter will therefore mitigate the risks of further action being taken by HMRC.

If possible, try to respond within the 30 days provided by HMRC. However, if it is not possible or practical to respond fully to the letter within this timescale consider contacting HMRC either by telephone or letter to agree a more realistic timescale with them.

3. In view of the serious consequences of making a false declaration, consider very carefully whether to sign and return the “Certificate of tax position”.

Although the declarations in the “Certificate of tax position” are similar, if not completely identical, to those on the self-assessment tax return, there are two important differences.

Unlike the tax return:

- There is no legal obligation on the individual to complete the “Certificate of tax position” and return it to HMRC; and
- The period covered by the “Certificate of tax position” - and therefore the declarations - is not restricted to a particular tax year. It applies to all years.

The certificate does not have a *de minimis* level.

The individual should consider very carefully whether to sign and return the certificate, regardless of whether they have irregularities to disclose or not. When advising a client who has received one of these letters, it will clearly be important that these consequences are made clear to them.

In discussions between the CIOT and HMRC, HMRC have agreed that there is no legal obligation for the individual to complete and return the certificate to them. They have told us that they will accept a response by letter as an alternative should an individual choose not to complete the declaration.

As mentioned, in view of the serious consequences of making a false declaration, it may therefore be preferable to respond by letter to HMRC, particularly if, after reviewing their tax affairs, the individual believes that their affairs are correct and up to date and they do not need to make a disclosure. The wide wording of the declaration (which, as mentioned above, no longer limits it to offshore income, assets and gains taxable in the UK), also indicates that a response by letter would be preferable since responding by letter enables an explanation to be included, which could pre-empt further queries by HMRC. For example, in the case of a non-UK domiciled individual, to confirm that no funds were remitted to the UK and that all the funds deposited into the account came from funds on which UK tax was paid as

appropriate in past years (i.e. that there may have been offshore income, gains or assets which have legitimately not been disclosed). As mentioned, HMRC's letter does require a response, in one form or another. If the individual needs to make a disclosure but chooses not to complete the "Certificate of tax position", it would be good practice to respond to HMRC's letter in writing and advise HMRC that a disclosure via the WDF (or other method) is being made.

With data from overseas now being constantly received under AEOI agreements, HMRC are adopting an approach of sending out batches of letters at regular intervals. Members should be aware that this approach will continue for the foreseeable future.<sup>72</sup>

## 116.12 Professional conduct: Back duty

PCRT Helpsheet 3 (Voluntary disclosures under disclosure facilities) provides:<sup>73</sup>

This helpsheet provides further guidance on the application of the Fundamental Principles and Standards when making use of voluntary disclosure facilities.

It is in the public interest that taxpayers who wish to regularise their tax affairs should receive competent and ethical support from a suitably experienced tax adviser. However, there are risks to the member and the profession in accepting such engagements which should be carefully managed as set out below.

The use of disclosure facilities is a specialised area and often involves tax liabilities on income arising or assets kept offshore. A member should not undertake this type of activity unless they have the relevant experience and knowledge or obtains specialist support.

Before accepting a prospective client for a voluntary disclosure, a member should consider carefully the following factors:

- The member must seek to reassure themselves that the client will make a full and frank disclosure to the member and regularise their affairs in all respects.
- The member should make enquiries as to the source of any undeclared funds. If there are suspicions that the funds may result from wider criminal activities unrelated to tax, the member will need to consider carefully whether to accept the client or not.
- The member should be alert to the possibility that criminals may use regularisation of their tax affairs as a method to bring illegally

---

72 <https://www.tax.org.uk/policy-technical/technical-news/hmrc-letters-and-%E2%80%9Ccertificates-tax-position%E2%80%9D-individuals-offshore>

73 <https://www.tax.org.uk/professional-standards/professional-standards-%E2%80%9393-full-listing/professional-conduct-relation-3>

acquired funds back into the regular economy.<sup>74</sup>

The member is strongly recommended to meet the prospective client face to face as part of assessing these matters.

The member should make it clear to the prospective client that they will only accept the engagement on the basis of full disclosure and regularisation of all aspects of the prospective client's tax affairs. If in any doubt as the case progresses, the member should refer to the provisions in the guidance in *Dealing with irregularities*.

The member must at all stages of their interaction with any prospective client comply with their obligations under anti-money laundering legislation. The profile of such an engagement suggests that these clients are at higher risk than usual of being involved in money laundering, so extra Customer Due Diligence checks may be needed.

In deciding whether a suspicious activity report should be made to NCA, the member (or the member's MLRO) should take into account the various requirements of the legislation and any reporting exemption which may apply. It is also possible that the member may need to apply for consent to proceed at some point during the engagement. See the CCAB guidance.

If the member becomes concerned about the client's conduct and circumstances at any stage during the engagement, the member should reassess their anti-money laundering obligations and, subject to their anti-money laundering obligations against 'tipping off' (see CCAB guidance), consider resigning from acting for the client.

## CHAPTER ONE HUNDRED AND SEVENTEEN

# CLAIMS

### 117.1 Claims

#### 117.1 Claims

This chapter discusses procedures for making claims and their time limits.

#### 117.2 Standard claim procedure rules

Statutory terminology refers to claims, elections and notices.

Section 42(1) TMA 1970 provides:

Where any provision of the Taxes Acts provides for relief to be given, or any other thing to be done, on the making of a claim, this section shall, unless otherwise provided, have effect in relation to the claim.

In short, s.42 sets out default rules for “claims”. I refer to this (along with the s.43 time limits) as “**standard claim procedure rules**”.

Where the statutory rule does not use the word “claim”, but some other term such as election or notice, these rules would not apply, but sometimes they are incorporated by reference. I set out the examples relevant to this book in this section.

##### 117.2.1 *Capital loss claims*

Section 16(2A) TCGA provides:

[i] A loss accruing to a person in a year of assessment shall not be an allowable loss for the purposes of this Act unless, in relation to that year, he gives a notice to an officer of the Board quantifying the amount of that loss;

[ii] and sections 42 and 43 of the Management Act shall apply in relation to such a notice as if it were a claim for relief.

This notice is not a claim, or at least, not described as a claim, but the

standard claim procedure rules apply as if it were. It would have been easier to say that an allowable loss requires a “claim”; or is there some difference which follows from using the word “notice” and incorporating s.42/43 expressly?

Similarly for loss elections by remittance basis taxpayers. Section 16ZA(4) TCGA provides:

Sections 42 and 43 of the Management Act (procedure and time limit for making claims), except section 42(1A) of that Act,<sup>1</sup> apply in relation to an election under this section as they apply in relation to a claim for relief.

### 117.2.2 *Remittance basis claims*

Section 809B(3) ITA applies the standard claim procedure rules to remittance basis claims but with one exception:

Sections 42 and 43 of TMA 1970 (procedure and time limit for making claims), except s.42(1A) of that Act, apply in relation to a claim under this section as they apply in relation to a claim for relief.

The relevant section actually refers to a “claim” for the remittance basis, so the standard claim procedure rules would apply to a remittance basis claim in any event.<sup>2</sup> Presumably the point of s.809B(3) is to disapply s.42(1A).<sup>3</sup> It seems a slightly roundabout way to achieve that, but the drafter has probably adopted precedents found elsewhere which were not entirely apt. However that may be, a remittance basis claim does not need to be quantified, that is, it is not necessary to specify the amount of unremitted income/gains.

### 117.2.3 *2017 rebasing election*

For these elections, see 53.14.13 (Election out of 2017 rebasing).

Para 43(2) sch 8 F(no.2)A 2017 provides:

Sections 42 and 43 of TMA 1970 (procedure and time limit for claims), except section 42(1A) of that Act, apply in relation to an election under this paragraph as they apply in relation to a claim for relief.

---

1 See 117.3 (Quantification of claim).

2 Even if the claim is not a “claim for relief”, it is a claim for a “thing to be done”.

3 See 117.3 (Quantification of claim).

This follows the wording of loss election claims.

### 117.3 Quantification of claim

Section 42(1A) TMA provides:

Subject to subsection (3) below,<sup>4</sup> a claim for a relief, an allowance or a repayment of tax shall be for an amount which is quantified at the time when the claim is made.

Quantification may be estimated: In *Claimants Listed in Class 8 of the Group Register of the CFC and Dividend GLO v HMRC*:

... that provision makes no reference to the amount being accurate, only to it being quantified. And one can quite see why quantification is necessary in a self-assessment system, where paragraph 7 of schedule 18 provides for taxpayers to make a self-assessment tax return “of the amount of tax which is payable by the company for that period ... (a) on the basis of the information contained in the return, and (b) taking into account any relief ... for which a claim is included in the return”. Moreover, paragraph 56 allows for a supplementary claim to be made to correct an original claim.

100. In these circumstances, it is, in my view, clear that the taxpayer could have had an effective remedy for the available reliefs by claiming under section 790 for any quantified amount, even if it did not know at the time of claiming whether the correct claim was for the foreign tax actually paid on the dividends or the tax that would have been paid at the foreign nominal rate.<sup>5</sup>

### 117.4 Types of claim

There are two ways a claim may be made:

- (1) In a tax return (“**tax return claims**”)
- (2) Outside a tax return (“**free-standing claims**”)

The practical difference is that tax return claims are governed by the procedures for enquiry and appeals which apply to tax returns. Freestanding claims are governed by sch 1A TMA.

---

4 Subsection (3) deals with PAYE and is not discussed here.

5 [2019] EWHC 338 (Ch) at [99]-[100].

## 117.5 Tax return claims

Section 42(2) TMA 1970 provides (so far as relevant):

- [a] Subject to subsections (3) to (3ZC) below,<sup>6</sup>
- [b] where notice has been given under
  - [i] section 8 [personal return]<sup>7</sup>
  - [ii] 8A [trustee return] or
  - [iii] 12AA of this Act [partnership return]
- [c] a claim shall not at any time be made otherwise than by being included in a return<sup>8</sup> under that section if it could, at that or any subsequent time, be made by being so included.

Thus the starting point is that a claim should be made in a tax return, not as a free-standing claim.

### 117.5.1 *Amendment window*

A taxpayer may amend a return.<sup>9</sup> If a tax return is submitted without a remittance basis or other claim, the claim can be made by amending the return; similarly, if a tax return is submitted with a claim, the claim can be withdrawn by amending the return.

HMRC agree. The RDR Manual provides:

**32020 Claiming the remittance basis: Making a claim** [Jan 2019]  
 ... If the return is subsequently amended, the claim may be included then or a previously made claim may be amended or deleted (s.42(5) TMA 1970).

However the time limit for amending a tax return is quite short, one year from the filing date. I refer to this period as the “**amendment window**”.

---

6 The exceptions referred to in para [a] are specialist cases where a tax return is not expected to be made:

<b>Subsection</b>	<b>Topic</b>
3	PAYE claim
3ZA./3ZB	Charity tax relief/tax repayment claim
3ZC	GAAR claim

7 See 115.4 (Notice to make return).

8 Section 42(5) TMA provides: “The references in this section to a claim being included in a return include references to a claim being so included by virtue of an amendment of the return.”

9 See 106.4 (Amending a return).

The RDR Manual provides:

**32020 Claiming the remittance basis: Making a claim** [Jan 2019]  
 ... when the time period for making an amendment has passed, the claim may not be withdrawn even if the making of the claim turns out to have been an error. This is because error or mistake relief does not apply to claims made to use the remittance basis under s.809B ITA 2007 (s.33(2A)(c) TMA 1970).

Section 33(2A)(c) TMA formerly provided that no relief was given under s.33 for an error or mistake consisting of the making of a remittance basis claim. The reference in the Manual is out of date as the legislation was rewritten in 2009. The provisions are now in sch 1AB TMA, which does not refer expressly to remittance basis claims, but the new provisions only apply where tax has been paid, or assessed, which is not due. That is not the case where making a remittance basis claim was a mistake in the sense that it was not beneficial. So the position remains as before. That is, after amendment window has closed, it is only possible to withdraw a remittance basis or other claim in the circumstances below.

**117.6 Claim time limit**

Section 43(1) TMA provides:

Subject to any provision of the Taxes Acts prescribing a longer or shorter period, no claim for relief in respect of income tax or capital gains tax may be made more than 4 years after the end of the year of assessment to which it relates.

The wording is based on s.34(1) TMA which provides the same 4 year time limit for assessments.

It may be useful to set out an aide memoire of the claim time limits:

<b>Tax Year</b>	<b>Last date for claim</b>	<b>Tax Year</b>	<b>Last date for claim</b>
2015/16	5/4/2020	2019/20	5/4/2024
2016/17	5/4/2021	2020/21	5/4/2025
2017/18	5/4/2022	2021/22	5/4/2026
2018/19	5/4/2023		

**117.7 Free-standing claims**

A free-standing claim is made if:

- (1) HMRC do not give notice to complete a tax return<sup>10</sup>
- (2) It is too late to make or amend a return

A free-standing claim could be made informally, eg by letter.

Where a free-standing claim is needed because there was no notice to submit a tax return, I suspect it is common practice to voluntarily submit a return (despite the absence of a notice requiring one) and make the claim in that return.<sup>11</sup>

Once the return is made, and the deadline for amending the return has passed, the claim cannot subsequently be included in the return; and that opens up the possibility of making the claim outside the return, subject to the 4 year time limit.

HMRC agree. A consultation paper in 2015 summarised the position for remittance basis claims:

- the [remittance basis] claim will continue to be made on the self-assessment tax return, which has a deadline for filing at the end of January of the following year. For example, the return for 2013-14 is due by 31 January 2015. This means individuals will have a good understanding of their income and gains for up to 21 months of the 36 months covered by the claim
- individuals will continue to be able to amend their self-assessment tax returns within 12 months of the statutory n, so individuals will be able to change a decision on a claim within that time limit if they choose to do so
- individuals who pay tax on the arising basis [because they did not make a remittance basis claim] will continue to have four years after the end of the tax year in which to claim the remittance basis, which also allows individuals to make a final decision based on a full understanding of their worldwide income and gains in those circumstances if they choose to do so<sup>12</sup>

---

10 Form SA316. In practice it may not often happen that a person who wishes to make a remittance basis or other claim does not receive a notice to complete a tax return.

11 A claim in an unsolicited tax return is an effective claim: if authority is needed, see *Weerasinghe v HMRC* [2013] UKFTT 144 (TC).

12 HMRC “Non-UK domiciled individuals: consultation on a minimum claim period for the remittance basis charge” (2015)

<https://www.gov.uk/government/consultations/non-uk-domiciled-individuals-consultation-on-a-minimum-claim-period-for-the-remittance-basis-charge>

The RDR Manual provides:

**RDRM32030 Claims - Time Limits** [Jan 2019]

The time limits for making claims are set out in Section 43 TMA 1970. The general time limit as set out in TMA70/s43(1) for making a claim also applies to making a claim for the remittance basis.

The Manual adds:

If there is a likelihood that the claim might not be made within the general time limit for making the claim, then the individual must tell HMRC of the intention to make the claim. This must stipulate:

- the nature of the claim, and
- the year for which it is to be made

But I think what the Manual describes as “telling HMRC of the intention to make the claim” actually amounts to making a claim.

## 117.8 Claim made late

In the following discussion, a claim is “**made late**” if it is made after the 4 year time limit for making a claim.

Section 43(2) TMA allows a late claim following the making of an assessment:

A claim (including a supplementary claim) which could not have been allowed but for the making of an assessment to income tax or capital gains tax after the year of assessment to which the claim relates may be made at any time before the end of the year of assessment following that in which the assessment was made.

Section 43C(2) TMA provides the same rule following the amendment of a return:

Where-

- (a) a return is amended under section 28A(2)(b) [amendment on closure of enquiry]... and
- (b) the amendment is not made for the purpose mentioned in subsection (1)(b) above [ie not for “the purpose of making good to

---

The proposal in this consultation paper was abandoned, presumably because it was overtaken by the more far-reaching deemed domicile rules, but that does not affect the points made here.

the Crown any loss of tax brought about carelessly or deliberately by the taxpayer or a person acting on his behalf”]  
sections 43(2), 43A and 43B apply in relation to the amendment as they apply in relation to any assessment under section 29.

Amended as s.43C directs, s.43(2) TMA provides:

A claim (including a supplementary claim) which could not have been allowed but for the making of an [*amended return*] after the year of assessment to which the claim relates may be made at any time before the end of the year of assessment following that in which the [*return*] was [*amended*].

So if:

- (1) HMRC raise a late assessment, and
- (2) there is no carelessness/deliberate error

it is possible to make a late remittance basis claim if the claim is one “which could not have been allowed but for the making of an amended return”. That would be the case if there is no income returned against which the claim could be allowed.

Section 43A TMA provides:

- (1) This section applies where—
  - (a) by virtue of section 29 of this Act an assessment to income tax or capital gains tax is made on any person for a year of assessment, and
  - (b) the assessment is not made for the purpose of making good to the Crown any loss of tax brought about carelessly or deliberately by that person or by someone acting on behalf of that person.
- (2) Without prejudice to section 43(2) above but subject to section 43B below, where this section applies—
  - (a) any relevant<sup>13</sup> claim, election, application or notice which could

---

13 Section 42A TMA provides:

“(2B) For the purposes of this section and section 43B below, a claim under Schedule 1AB is relevant in relation to an assessment for a year of assessment if it relates to that year of assessment.

(3) For the purposes of this section and section 43B below, any other claim, election, application or notice is relevant in relation to an assessment for a year of assessment if—

- (a) it relates to that year of assessment or is made or given by reference to an event occurring in that year of assessment, and

have been made or given within the time allowed by the Taxes Acts may be made or given at any time within one year from the end of the year of assessment in which the assessment is made, and

### 117.8.1 *Revoking claim late*

In the following discussion, a claim is “**revoked late**” if it is revoked after the 1 year time limit for amending a return.

Section 43A TMA provides:

- (1) This section applies where—
    - (a) by virtue of section 29 of this Act an assessment to income tax or capital gains tax is made on any person for a year of assessment, and
    - (b) the assessment is not made for the purpose of making good to the Crown any loss of tax brought about carelessly or deliberately by that person or by someone acting on behalf of that person.
  - (2) Without prejudice to section 43(2) above but subject to section 43B below, where this section applies—
    - (b) any relevant<sup>14</sup> claim, election, application or notice previously made or given may at any such time be revoked or varied—
      - (i) in the same manner as it was made or given, and
      - (ii) by or with the consent of the same person or persons who made, gave or consented to it (or, in the case of any such person who has died, by or with the consent of his personal representatives),
- except where by virtue of any enactment it is irrevocable.

### 117.8.2 *Cap on late claim/amendment*

- 
- (b) it or, as the case may be, its revocation or variation has or could have the effect of reducing any of the liabilities mentioned in subsection (4) below.
  - (4) The liabilities referred to in subsection (3) above are—
    - (a) the increased liability to tax resulting from the assessment,
    - (b) any other liability to tax of the person concerned for—
      - (i) the year of assessment to which the assessment relates, or
      - (ii) any year of assessment which follows that year of assessment and ends not later than one year after the end of the year of assessment in which the assessment is made.”

14 See above footnote. **Need to check in future that its 42A(2B), etc above**

Section 43B TMA provides a cap on the relief given by a late claim or revocation:

- (3) In any case where—
- (a) one or more relevant claims, elections, applications or notices are made, given, revoked or varied by virtue of the application of section 43A above in the case of an assessment, and
  - (b) the total of the reductions in liability to tax which, apart from this subsection, would result from the action mentioned in paragraph (a) above would exceed the additional liability to tax resulting from the assessment,
- the excess shall not be available to reduce any liability to tax.
- (4) Where subsection (3) above has the effect of limiting either the reduction in a person's liability to tax for more than one period or the reduction in the liability to tax of more than one person, the limited amount shall be apportioned between the periods or persons concerned—
- (a) except where paragraph (b) below applies, in such manner as may be specified by the inspector by notice in writing to the person or persons concerned, or
  - (b) where the person concerned gives (or the persons concerned jointly give) notice in writing to the inspector within the relevant period, in such manner as may be specified in the notice given by the person or persons concerned.
- (5) For the purposes of paragraph (b) of subsection (4) above the relevant period is the period of 30 days beginning with the day on which notice under paragraph (a) of that subsection is given to the person concerned or, where more than one person is concerned, the latest date on which such notice is given to any of them.

A typical case is if no remittance basis claim was made as a taxpayer reasonably considered that some relief applied. Likewise a late claim for DT relief may be made if a taxpayer reasonably considered that some other relief was available.

HMRC agree. The Self Assessment Claims Manual provides:

**SACM9015. Non-Culpable Additions** [Feb 2019]

Where you

- amend a return in an SA enquiry closure notice, or
- make a discovery assessment for reasons other than careless or deliberate behaviour

the taxpayer can make a relevant out-of-time claim, election, application or notice within one year from the end of the year of assessment in which the notice is issued. S.43A and s.43C(2).

In s.43A for a claim, election, application or notice to be relevant to an amendment or assessment it must

- relate to the same year of assessment, or
- be made or given by reference to an event in that year, see s.43A(3) TMA 1970).

The taxpayer can also

- revoke a claim, election, application or notice already made, or
- amend a claim, election, application or notice, except where it is irrevocable in law.

The effect of the taxpayer making, revoking or amending a claim, election, application or notice is limited to the additional liability to tax resulting from the assessment or your amendment.

So if an ITSA enquiry increases a taxpayer's self assessment by £1,500 tax, the effect of any out-of-time claims or elections is limited to £1,500, see s.43B(3) TMA 1970. Any "excess" tax effect of the claim or election "shall not be available to reduce any liability to tax".

### 117.8.3 *Late claim for tax repayment*

ESC B41 provides:

Under the Taxes Management Act, unless a longer or shorter period is prescribed, no statutory claim for relief is allowed unless it is made within four years from the end of the tax year to which it relates.

However, repayments of tax will be made in respect of claims made outside the statutory time limit where an over-payment of tax has arisen because of an error by the Inland Revenue or another government department, and where there is no dispute or doubt as to the facts.

The SAC Manual provides:

#### **SACM10040 Late Claims** [Jan 2019]

... For example, you might accept a late claim under ESC B41 where, before the time limit for making the claim, an HMRC officer

- told a person that they could make a claim or election later than the statutory time limit, or
- wrongly advised them that a claim or election was not possible, where the officer ought to have known, from the information given to them, that this advice was incorrect.

If an error like this comes to a person's attention, they must notify HMRC as soon as they reasonably can that they will want to make a late claim.

### 117.9 Culpable taxpayer

In cases of carelessness, or deliberate error, late claims may still be permitted under s.36(3) TMA:

If the person on whom the assessment is made so requires, in determining the amount of the tax to be charged for any chargeable period in any assessment made in a case mentioned in subsection (1) or (1A) above, [extended assessment period due to carelessness, deliberate error, breach of DOTAS]<sup>15</sup> effect shall be given to any relief or allowance to which he would have been entitled for that chargeable period on a claim or application made within the time allowed by the Taxes Acts.

Section 43C TMA provides:

(1) Where—

- (a) a return is amended under section 28A(2)(b) ... and
- (b) the amendment is made for the purpose of making good to the Crown any loss of tax brought about carelessly or deliberately by the taxpayer or a person acting on his behalf,

sections 36(3) and 43(2) apply in relation to the amendment as they apply in relation to any assessment under section 29.

(2) Where—

- (a) a return is amended under section 28A(2)(b) ... and
- (b) the amendment is not made for the purpose mentioned in subsection (1)(b) above,

sections 43(2), 43A and 43B apply in relation to the amendment as they apply in relation to any assessment under section 29.

(3) References to an assessment in sections 36(3), 43(2), 43A and 43B, as they apply by virtue of subsection (1) or (2) above, shall accordingly be read as references to the amendment of the return.

---

15 See 115.12 (IT/CGT assessment time limits).

## COLLECTION OF TAX FROM UK REPRESENTATIVES

### 118.1 Tax collected from non-resident

#### 118.1 Tax collected from non-resident

The former International Tax Handbook provided:

##### **903. Machinery of assessment: direct charge on non-residents**

It always was and still is possible to assess a non-resident directly if, in the words of the Courts, he can be reached. A simple example of such a situation arose in the case of *Tischler v Apthorpe* [2 TC 89]. Mr Tischler was not resident. He was a partner in a French wine firm who spent four months or so a year in England. He lived then in a London hotel and sold wine to English customers. His firm also employed London agents and the question was whether the English profits could be assessed directly on Mr Tischler or whether such assessments should, Mr Tischler being non-resident, be made only on the English agents. The High Court held that an assessment made directly on the firm was good and that Mr Tischler was obliged to make a return served on him. In the words of Mathew J

‘If the principal can be got at there is no need to have recourse to Section 41’ (of the 1842 Act which was consolidated in Section 78 TMA 1970).

An individual, clearly, can be physically present in this country without being resident here and we used to have to rely on the principle established by the *Tischler* case in reaching the profits made by overseas sportsmen and women and artistes who come to this country for quite brief engagements. The modern view certainly, is that a non-resident company which trades here equally is here and that it may similarly be reached. If the company has a branch presence here with all the physical trappings of its trade it is visibly here and will have a registered place of business, an address at which it may be found and at which legal notices may be served.

The principle of direct assessment is not confined to non-residents who actually come here. There is no bar on direct assessment of non-residents who are not here whether or not they have agents in the UK. This was made clear in the case of *Werle v Colquhoun* [2 TC 402]. The difficulty with direct assessment on a person who is not here lies in recovering the tax, although now that the Supreme Court rules allow service of writs abroad this may be a little easier provided

there are assets in the UK. But it is still true to say that if a non-resident company acting through an agent has no such physical presence here and has nothing here the Revenue cannot, in practice, impose its charge effectively without more adequate machinery including that for the service of notices and returns as well as for the actual gathering of the tax. It was in such situations – where the non-resident had only an agent here – that the original form of Part VIII was intended to come to the Revenue’s aid. In practice Part VIII is normally used today even in those cases where the taxpayer can be reached directly ...

This was written before the 1995 changes and before the mutual collection of tax agreements but the point is still valid.

## **118.2 Tax collected from UK representative**

The rules are set out three times:

- (1) For IT the rules are in Chapters 2B and 2C Part 14 ITA. This does not apply to companies<sup>1</sup> so effectively this applies to non-resident individuals and trusts.
- (2) For CGT the rules are in Part 7A TCGA.
- (3) For CT the rules are in Chapter 6 Part 22 CTA 2010.

This does make a coherent discussion somewhat harder. In this chapter I set out the IT rules in full, and (in the absence of material differences) give CGT and CT references in a footnote only.

Section 835U(1) ITA provides the basic rule:

The obligations and liabilities of a non-UK resident are to be treated, for the purposes of the enactments to which this Chapter applies,<sup>2</sup> as if they were also the obligations and liabilities of the UK representative of the non-UK resident.

This is a collection provision (the metaphor often used is “machinery

---

1 Section 835D ITA provides:

“This Chapter does not apply in relation to income tax chargeable on income of a company otherwise than as a trustee.”

2 This relates back to s.835T ITA which provides:

(1) This Chapter applies to the enactments relating to income tax so far as they make provision for or in connection with the assessment, collection and recovery of tax, or of interest on tax.

(2) Those enactments have effect in accordance with section 835U in relation to amounts in respect of which a branch or agency is to be treated as the UK representative of a non-UK resident under Chapter 2B.

provision<sup>33</sup>) and not a charging provision: the UK representative is only subject to tax if there is a charge to tax on usual principles on the non-resident principal. The INT Manual provides:

**268010 Introduction - What are the machinery provisions for assessment and collection?** [May 2019]

... The machinery provisions alone cannot create or extend a tax liability on the non-resident. There has to be a charge to tax in respect of the non-resident under the domestic provisions in the first place. The provisions work by treating the tax obligations and liabilities of the non-resident as though they were additionally the obligations and liabilities of the UK representative. This provides a practical assessment and collection mechanism for non-residents. Once either the non-resident or the UK representative has paid the liabilities both parties are treated as having met their liabilities. ...

Section 835U goes on to deal with the discharge of obligations:

- (2) Subsection (3) applies if—
  - (a) the UK representative of a non-UK resident discharges an obligation or liability imposed by this section that corresponds to one to which the non-UK resident is subject, or
  - (b) a non-UK resident discharges an obligation or liability that corresponds to one to which the non-UK resident's UK representative is subject by virtue of this section.
- (3) The corresponding obligation or liability—
  - (a) of the non-UK resident (in a case within subsection (2)(a)), or
  - (b) of the UK representative (in a case within subsection (2)(b)), is discharged.
- (4) A non-UK resident is bound, as if they were the non-UK resident's own, by acts or omissions of the non-UK resident's UK representative in the discharge of the obligations and liabilities imposed on the representative by this section. ...

## 118.3 UK representative

### 118.3.1 *Why UK representatives matter*

A UK representative is important for two reasons:

- (1) A UK representative is liable for tax due from the non-resident principal, the topic of this chapter.

---

<sup>33</sup> See App.1.6 (Machinery/mechanism metaphor).

- (2) Income in relation to which a non-UK resident has a UK representative falls outside non-resident IT relief.<sup>4</sup>

### 118.3.2 *Definition of “UK representative”*

Section 835E ITA gives the basic definition for IT:

(1) This section applies if a non-UK resident carries on (alone or in partnership) any trade, profession or vocation through a branch or agency in the UK.

(2) The branch or agency is the UK representative of the non-UK resident in relation to—

- (a) the amount of any income from the trade, profession or vocation that arises (directly or indirectly) through or from the branch or agency, and
- (b) the amount of any income from property or rights which are used by, or held by or for, the branch or agency.

Thus for IT and CGT a UK representative is in short a branch or agency.

For CT, the term PE is used instead of branch/agency. Section 969(3) CTA 2010 provides:

For the purposes of this Chapter, the following rules apply to a permanent establishment in the UK through which a non-UK resident company carries on a trade.

#### *Rule 1*

The permanent establishment is the UK representative of the non-UK resident company in relation to chargeable profits of the company attributable to that establishment.

In the following discussion the “**non-resident principal**” is the person for whom the UK representative is a representative (which the statute calls “the non-UK resident”).

The question whether the non-resident principal is trading is crucial for the UK representative rules, because these rules only apply if the non-resident principal is carrying on a trade, profession or vocation.<sup>5</sup>

The INT Manual provides:

#### **268030 Extent of UK representative’s liability** [Jun 2018]

A person can only be the UK representative in respect of the permanent establishment/branch or agency with which they are linked. Where a

---

<sup>4</sup> See 42.5 (Disregarded income).

<sup>5</sup> See 68.14 (What is a financial trade?).

non-resident has more than one UK permanent establishment/branch or agency, then it is possible that each will have a different UK representative. In those circumstances, each UK representative would only be responsible in respect of the part of their non-resident's liabilities and obligations arising from their own permanent establishment/branch or agency [*Neilsen Andersen v Collins*, and *Tarn v Scanlan* 13 TC 91].

The former International Tax Handbook explained “directly or indirectly” in s.835E(2)(a):

#### **914. General**

Section 79 [TMA 1970] is another 1915 amendment. It provides that a non-resident shall be chargeable on profits or gains arising directly or indirectly through any branch, agency etc here. The sort of thing that was happening, before this provision was introduced, was that an agent for a non-resident would negotiate a contract here and at the end of the oral negotiations the agent and the third party would agree to sign the formal documents abroad. The view the Revenue took, and defensibly so, was that in substance all had been done here apart from signing a piece of paper and that it was wrong for liability so to be avoided. Problems of that sort are really problems of fact and proof as was mentioned in chapter 8 (ITH822). If the Revenue could have proved that there was an unwritten agreement made in London, it would have succeeded in a claim that the non-resident was trading here, and that is what we would argue today. Millions of pounds worth of business are done in the City of London every day on the basis of spoken agreements which are later confirmed in writing and nobody wishes to deny that the word is the contract. But, when the parties to the contract do not wish to act openly, proof is difficult to come by. What these words were meant to do was to enable the Revenue to say – “we must accept that this contract was made abroad because we cannot prove otherwise but a lot of negotiation took place in London and we want to look at the substance of the matter and the words ‘directly or indirectly’ will enable us to do that”.

### 118.3.3 *Representative ceasing to act*

Rule 1 s.835E(3) ITA provides for the UK representative ceasing to act:

#### *Rule 1*

The UK representative continues to be the UK representative of the non-UK resident in relation to the amount even after ceasing to be a branch or agency through which the non-UK resident carries on the

trade, profession or vocation concerned.

The INT Manual provides:

**268040 What assessments should be raised and how is that done?**  
[May 2019]

... Where the trading activities in the UK have ceased, the UK permanent establishment / branch or agency retains the obligations and liabilities as the UK representative even after the cessation. This provision is at ITA07/S835E Rule1 and ITTOIA05/Sch6 Para 3 (old FA95/S126 (3)) for income tax and at CTA10/S969(3) Rule 3 (old FA03/S150(2)(c)) for corporation tax. So assessments can still be raised on the UK representative subject to the usual assessing time limits. Where however the trading was conducted through a branch or fixed place of business and that presence has discontinued there may be difficulties identifying any person as the UK representative or any assets within the UK upon which recovery may rely. It is therefore recommended that assessments for such UK branches are raised and tax brought into charge at as early a stage as possible.

Additionally, by EU Directive member states of the European Union are able to seek the assistance of another member state in the recovery of direct and indirect taxes (see the guidance at DMBM560010).

#### 118.3.4 *Separate personality*

Rule 2 s.835E(3) ITA provides for deemed separate personality:

*Rule 2*

The UK representative is treated in relation to the amount as a distinct and separate person from the non-UK resident (if the representative would not otherwise be so treated).

The SALF Manual provides:

**704 UK representatives of non-residents chargeable under Case I and II Schedule D** [Jan 2019]

*UK representative is treated as a separate person*

The UK representative and the non-resident are treated as separate persons. This allows, for example, service of notices and collection to take place at the branch or agency/permanent establishment.

#### 118.4 **Partnership: UK representative**

Rule 3 s.835E(3) ITA provides:

*Rule 3*

If the branch or agency is carried on by persons in partnership, the partnership, as such, is treated in relation to the amount as the UK representative of the non-UK resident.

Section 835F ITA provides:

- (1) Subsection (2) applies if a trade or profession carried on by a non-UK resident through a branch or agency in the UK is carried on by the non-UK resident in partnership.
- (2) The trade or profession carried on through the branch or agency is, for the purposes of section 835E and Chapter 2C, to be treated as including the notional trade or profession.
- (3) Subsection (4) applies (in addition to subsection (2) if that subsection also applies) if—
  - (a) a trade or profession carried on by a non-UK resident in the UK is carried on by the non-UK resident in partnership, and
  - (b) any member of the partnership is resident in the UK.
- (4) The notional trade or profession is, for the purposes of section 835E and Chapter 2C, to be treated as being a trade carried on in the UK through the partnership as such.
- (5) In this section “the notional trade or profession” means the notional trade from which the non-UK resident’s share in the partnership’s profits or losses is treated for the purposes of section 852 of ITTOIA 2005 as deriving.

The INT Manual provides:

**268020 Who can be the non-resident’s UK representative?** [Jun 2018]

***Partnerships can be the UK representative of a non-resident***

A partner in a partnership can be the UK representative of a non-resident. This will occur, for example, where a non-resident trades in the UK through the agency of a UK partnership (of which he or she is not a member). In such circumstances, the partners in the UK partnership will be jointly liable, as UK representative, for the tax payable by the non-resident. This provision is at ITA07/S835E and TIOPA10/S835E for income tax and is implicit in CTA10/S969 for corporation tax.

Where a business that is carried on by a partnership that includes non-resident partners is carried on in the UK through a permanent establishment / branch or agency, the permanent establishment / branch or agency is the UK representative of each non-resident partner. This provision is at ITA07/S835F and TIOPA10/S835F for income tax and is implicit in CTA10/S969 for corporation tax.

Where a business is carried on in the UK by a partnership that includes both resident and non-resident partners, the partnership is treated as the UK representative of each non-resident partner. The partners are thus jointly liable for the tax payable by the non-resident partners on their shares of the partnership profit. This provision is at ITA07/S835F and TIOPA10/S835F for income tax and is implicit in CTA10/S969 for corporation tax.

The SALF Manual provides:

**704 UK representatives of non-residents chargeable under Case I and II Schedule D** [Jan 2019]

*A partnership can be the UK representative of a non-resident*

A partner in a partnership can be the UK representative of a non-resident. This will occur, for example, where a non-resident trades in the UK through the agency of a UK partnership (of which he or she is not a member). In such circumstances, the partners in the UK partnership will be jointly liable, as UK representative, for the tax payable by the non-resident.

*Partnership, which includes non-resident partners, trading in the UK through a branch or agency/permanent establishment: the branch or agency/permanent establishment is treated as the UK representative of non-resident partners*

Where a business that is carried on by a partnership that includes non-resident partners is carried on in the UK through a branch or agency/permanent establishment, the branch or agency/permanent establishment is treated as the UK representative of each non-resident partner.

*Partnership trading in the UK which includes resident and non-resident members is treated as UK representative of non-resident partners*

Where a business is carried on in the UK by a partnership which includes both resident and non-resident partners, the partnership is treated as the UK representative of each non-resident partner. The partners are thus jointly liable for the tax payable by the non-resident partners on their shares of the partnership profit.

## **118.5 UK representatives: Exemptions**

Sections 835G-K set out 5 exemptions:

<b>Section</b>	<b>Topic</b>
835G	Agents
835H	Brokers
835I	Investment managers

- 835J Alternative finance arrangements (Sharia-compliant arrangements)
- 835K Lloyds agents

I consider the first three of these here; the last two are of specialist interest.

### 118.5.1 *Casual agent*

Section 835G ITA provides:

- (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an agent in the UK.
- (2) The agent is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) arising to the non-UK resident from—
  - (a) so much of the non-UK resident’s business as relates to disregarded transactions, or
  - (b) property or rights which, as a result of disregarded transactions, are used by, or held by or for, the agent on behalf of the non-UK resident.
- (3) “Disregarded transactions” are transactions—
  - (a) carried out through the agent in the UK, and
  - (b) in respect of which the agent does not act in the course of carrying on a regular agency for the non-UK resident.

I call this the “**casual agent exemption**”.

The INT Manual provides:

**268020 Who can be the non-resident’s UK representative?** [Jun 2018]

Schedule 6 paragraphs 5-9 TIOPA 2010 and Subsections 835G-835K ITA 2007 ... lists the persons who cannot be the UK representative for income tax and capital gains tax:

- 1) Agents who are not regular agents. In general if a non-resident is trading in the UK through an agent that agent should be regarded as a regular agent. This was considered in the cases of *Neilsen Andersen v Collins* and *Tarn v Scanlan* (13 TC 91 at p.121–2) when Scrutton LJ considered “the contrast intended to be drawn is between casual employment, temporary employment, for a transaction or few transactions, and regular appointment of a permanent agent who is there as representing the foreigner”. ...

The former International Tax Handbook provided:

**942. NRs: accepting TMA 70 s.82 exemption: regular agency**

... casual agents are protected from assessment. As a general rule if there is UK source income and there is an agent we would want to assess the agent. A non-resident trading here through an agent will usually clearly do so through a regular agency.

It may be less clear whether an agent is a regular agent when he acts for his principal in only one transaction. This was the issue in the case of *Willson v Hooker* 67 TC 585. Acting for an Isle of Man company, Mr Willson instructed a firm of surveyors to bid for some land in the UK and instructed solicitors concerning the purchase and sale of the land. The Court said that a regular agency is any agency that is not a casual or occasional agency and that it was impossible to regard Mr Willson as a casual or occasional agent. He was the person through whom all the transactions of the company in the UK were carried out in the relevant period and so did not enjoy protection.

CT does not need the same exemption, as a casual agent is not a PE.

### 118.5.2 *Broker/Investment manager*

The exemptions are in s.835H and s.835I ITA. They are easier to follow if set side by side:

#### **Section 835H (Brokers)**

- (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through a broker in the UK.
- (2) The broker is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
  - (a) the amount is transaction income in relation to a transaction carried out through the broker in the UK on behalf of the non-UK resident, and
  - (b) the independent broker conditions are met in relation to the transaction (see section 835L).

#### **Section 835I (Investment Managers)**

- (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an investment manager in the UK.
- (2) The investment manager is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
  - (a) the amount is transaction income in relation to an investment transaction carried out through the investment manager in the UK on behalf of the non-UK resident, and
  - (b) the independent investment manager conditions are met in relation to the investment transaction (see section 835M).

(3) In subsection (2) “transaction income”, in relation to a transaction carried out through a broker in the UK on behalf of a non-UK resident, has the same meaning as in Chapter 1 (see section 814(5)).

(3) In subsection (2) “transaction income”, in relation to a transaction carried out through an investment manager in the UK on behalf of a non-UK resident, has the same meaning as in Chapter 1 (see section 814(5)).

## 118.6 Subsidiary points

### 118.6.1 HMRC procedures

The INT Manual provides:

**268040 What assessments should be raised and how is that done?** [May 2019]

As already explained above (INTM268030)) both the non-resident and their UK representative have a personal responsibility for the tax obligations and liabilities arising from the UK permanent establishment/branch or agency. Either party is able to discharge those obligations and liabilities. So we can assess either or both parties if necessary. Once one party has paid, the personal responsibility on the other party lapses for that self assessment period. Obviously in cases where self assessments are returned by or for a non-resident taxpayer and tax payments are made at the appropriate times no further action would be needed. This guidance concerns the practicalities of how to handle cases where obligations and liabilities are not met.

Because the UK representative is personally responsible for the non-residents tax obligations and liabilities, a unique tax reference should be allocated to the UK representative in that capacity. Where the UK representative is an agent (rather than a branch or fixed place of business permanent establishment) that unique tax reference should be a distinct and different reference to the one allocated to the agent for their own business. Non-resident companies intending to set up places of business in the UK are obliged to notify Companies House (see **Self assessment** at INTM261000). The consequential process in place automatically generates tax references and allocates them to the office responsible for the UK registered office address. Where that process has not happened, or for non-corporates, a taxpayer record with unique tax reference will need to be created on notification or discovery of liability.

The High Court held in the case of *Tischler v Aphorpe* [2 TC 89] that a non-resident could be assessed directly “wherever he could be reached” including the UK branch address. The decision in that case was that an assessment raised directly on the non-resident at the UK branch address was valid, even though there was also a UK representative who could have been assessed under the machinery provisions (for the TMA 1970 version see INTM268010). It is probably unusual for a non-resident to have both a physical UK branch and an appointed UK agent but the reasoning in that case supports

the equal validity of assessments made on the non-resident either directly at their UK branch or at the overseas address. In that case, of course, the UK agent could not be responsible for the tax assessed as he had not been notified.

So, on a practical level, assessments should be addressed in the manner most suited to the facts of the case and with the object of informing the relevant persons of the liability and securing the necessary payment of tax. Depending upon how near to expiry the assessing time limits are this could include any but possibly all of the following:

*Assessment for a branch or fixed place of business in the UK*

- Assess in the name of the non-resident individual or company at the UK business address.
- Send a copy also, for information, to the non-resident's address abroad if known.
- Assess any person who clearly has the capacity of "UK representative" e.g. the manager of the UK operations, as "Mr X as UK representative of XYZ".

*Assessment for UK trade carried out through an agent*

- Assess in the form "Mr X as agent for XYZ" sent to the agent's address.
- Send a copy of the assessment on the agent, for information, to the non-resident at their address abroad if known.
- Assess the non-resident individual or company at their address abroad if known.

*Partners and partnerships*

Where the UK representative is a UK partnership the partnership itself is the UK representative. In such circumstances the partners in the UK partnership will be jointly liable for the tax payable by the non-resident. It follows that any assessment that is required should be made on the partnership as agent for the non-resident. Where a non-resident is a partner in a partnership which trades in the UK directly, typically through a UK branch or fixed place of business, the form of assessment depends on whether there is a partner resident in the UK. If there is a UK resident partner the assessment should be made on the partnership as a whole but the UK resident partner will be jointly liable for the tax payable by the entire partnership. Where there is no UK resident partner then assessments on the branch profits of the non-resident partners should be made on the UK branch of the partnership.

The SALF Manual provides:

**704 UK representatives of non-residents chargeable under Case I and II Schedule D [Jan 2019]**

*General rule for the obligations and liabilities of UK representatives*

The general rule is that UK representatives are jointly responsible with the non-resident for all the tax obligations and liabilities in relation to the trade, profession or vocation carried on through the branch or agency/permanent establishment.

This joint responsibility extends to all matters relating to the assessment of tax and to the collection and recovery of tax. For example, it extends

to all the mechanisms of self assessment, including notification of chargeability, the obligation to make a tax return and self assessment, liability to make interim and final payments of tax, and liability to surcharges, interest and penalties in connection with those obligations and liabilities.

Either party is able to discharge the obligations and liabilities arising, but equally any acts or omissions of the non-resident are treated as acts or omissions of the UK representative (but see also the first two paragraphs under Offences below in relation to tax offences).

Where the trigger for an obligation or liability is the receipt of formal notification, then the obligation or liability only falls on the UK representative once they have received the relevant notification (or a copy).

### 118.6.2 *Notices and information*

Section 835V ITA provides:

(1) An obligation or liability attaching to a non-UK resident (“X”) by reason of a notice or other document having been given or served on X does not also attach to the UK representative of X by virtue of section 835U unless the notice or other document (or a copy of it) has been given to or served on the representative.

(2) An obligation or liability attaching to X by reason of a request or demand having been received by X does not also attach to the UK representative of X by virtue of section 835U unless the representative has been notified of the request or demand.

(3) Subsection (4) applies to obligations relating to the provision of information that are imposed on the UK representative of X by section 835U in a case where the representative is X’s independent agent.

(4) The obligations do not require the UK representative to do anything except so far as it is practicable for the representative to do so.

(5) For this purpose, the representative must act to the best of the representative’s knowledge and belief after taking all reasonable steps to obtain the necessary information.

(6) An obligation of X to provide information is not discharged by virtue of section 835U in a case where the UK representative of X has discharged the obligation only so far as required by subsection (4) of this section.

(7) X is not bound by virtue of section 835U by mistakes in information provided by the UK representative of X in discharging, so far as required under subsection (4) of this section, an obligation imposed on the representative by section 835U unless—

- (a) the mistake is the result of an act or omission of X, or
- (b) the mistake is one to which X consented or in which X connived.

(8) In this section “information” includes anything contained in a return, self-assessment, account, statement or report required to be provided to the Commissioners for Her Majesty’s Revenue and Customs or to any officer of Revenue and Customs.

### 118.6.3 *Criminal offences/penalties*

Section 835W ITA provides:

- (1) A person is not by virtue of section 835U liable to be proceeded against for a criminal offence unless the person—
  - (a) committed the offence, or
  - (b) consented to or connived in its commission.
- (2) An independent agent of a non-UK resident is not by virtue of section 835U liable to any civil penalty or surcharge in respect of an act or omission if conditions A and B are met.
- (3) Condition A is that the act or omission is not—
  - (a) an act or omission of the independent agent, or
  - (b) an act or omission to which the agent consented or in which the agent connived.
- (4) Condition B is that the independent agent is able to show that the amount of the penalty or surcharge will not be recoverable out of the sums mentioned in section 835X(3) (after being indemnified for any other liabilities under section 835X).

The SALF Manual provides:

#### **704 UK representatives of non-residents chargeable under Case I and II Schedule D [Jan 2019]**

##### *Offences*

The criminal and civil liabilities of a UK representative in respect of the non-resident’s tax affairs are limited in certain circumstances.

UK representatives cannot be guilty of a criminal offence under these rules as a result of something done by the non-resident unless:

- they committed the offence
- consented to its commission, or
- connived in its commission.

The same applies for the non-resident in relation to the acts of the UK representative.

UK representatives who are independent agents are not liable to civil penalties and surcharges unless:

- they committed an act or omission or consented to, or connived in, its commission, or
- they will be able to recover the penalty out of monies of the non-resident.

#### 118.6.4 *Indemnities*

Section 835X ITA provides:

- (1) An independent agent of a non-UK resident is entitled to be indemnified for the amount of any liability of the non-UK resident which the agent has discharged by virtue of section 835U.
- (2) An independent agent of a non-UK resident is entitled to retain, from the sums mentioned in subsection (3), amounts sufficient to meet any liabilities which by virtue of section 835U the agent has discharged or to which the agent is subject.
- (3) The sums are those which—
  - (a) (ignoring subsection (2)) are due from the independent agent to the non-UK resident, or
  - (b) are received by the independent agent on behalf of the non-UK resident.

#### **118.7 Agents/investment managers**

An “independent agent” has three advantages:

- (1) Lower information requirements; see 118.6.2 (Notices and information)
- (2) Lower liabilities for penalties: see 118.6.3 (Criminal offences/penalties)
- (3) A right to an indemnity: see 118.6.4 (Indemnities)

Section 835Y ITA provides the definition:

- (1) In this Chapter “independent agent”, in relation to a non-UK resident (“X”), means a person who is the UK representative of X in respect of any agency in which the person is acting on behalf of X in an independent capacity.
- (2) For this purpose a person does not act in an independent capacity on behalf of X unless the relationship between them, having regard to its characteristics, is a relationship between persons carrying on independent businesses dealing with each other at arm’s length.

This is based on the definition in the IME rules.<sup>6</sup>

Investment managers and brokers may qualify for the IME exemptions.<sup>7</sup>

The SALF Manual provides:

**704 UK representatives of non-residents chargeable under Case I and II Schedule D** [Jan 2019]

*Obligations and liabilities are limited where the UK representative is independent of the non-resident*

Where the UK representative is an independent agent of the non-resident acting in the ordinary course of business, its obligations to provide information are limited to ones within its competence to act for the non-resident.

‘Independent agent’ is defined at Paragraph 7 Schedule 23 FA 1995. The definition is based on that used in OECD Model Tax Convention and UK double taxation agreements. Broadly, to be an ‘independent agent’, the agent must be both legally and economically independent of the non-resident. As an independent agent is not within the definition of permanent establishment for corporation tax purposes such an agent could not become the UK representative of a non-resident company.

The rules recognise that, where the UK representative is an independent agent, the agent may not be able to provide complete information about the affairs of the non-resident. The agent is therefore required to provide any information requested, for example a return, to the best of its knowledge and belief after taking all reasonable steps to obtain the information. The non-resident remains responsible for completing or correcting the information where necessary.

However, the non-resident can correct any error or omission made by the UK representative provided the non-resident did not know about it or participate in it.

---

6 See 68.8 (Cond. C: Independent relationship) and 101.14 (Independent agent exemption).

7 See 68.1 (Investment manager exemptions).

## REPORTING AND COMPLIANCE: IHT

119.1

### *Cross references*

*The following topics are considered elsewhere:*

118.6.3 (*Criminal offences/penalties*)

108.6 (Claims for IHT DTA reliefs)

### **119.1 IHT compliance: Introduction**

This chapter considers the following topics:

- (1) Who is liable for IHT
- (2) Reporting duties
- (3) IHT recovery time limits
- (4) The Inland Revenue charge

The discussion focuses on the themes of this book, but it is necessary to review the topic generally to see the rules in the round, so this chapter contains a general discussion of these topics.

### **119.2 Meaning of “PRs” for IHT**

The definition of “personal representatives” matters for all these topics. Section 272 IHTA provides:

In this Act, except where the context otherwise requires ...

“personal representatives” includes<sup>1</sup>

- [a] any person by whom or on whose behalf an application
- [i] for a grant of administration or

---

<sup>1</sup> The definition is inclusory but it is difficult to think of a person who is a PR in the general sense but who is not within s.272.

[ii] for the resealing of a grant made outside the UK is made, and

[b] any such person as mentioned in section 199(4)(a) above;

Para [b] takes us to s.199(4)(a) IHTA which refers to:

(a) [i] any person who takes possession of or intermeddles with, or otherwise acts in relation to, property so as to become liable as executor or trustee<sup>2</sup>

[ii] (or, in Scotland, any person who intromits with property or has become liable as a vitious intromitter) ...

I refer to this as “de facto executor”; the traditional English succession law term is executor *de son tort* but it is not necessary, or desirable, to use antique Law French.<sup>3</sup>

The only reported case in a CTT/IHT context is *IRC v Stype Investments*<sup>4</sup> where a Jersey nominee held land in England subject to a contract for sale. That was a UK situate asset. The beneficial owner died and the Jersey nominee directed the sale proceeds to be paid outside the UK. That act made it a de facto executor, and so a PR for IHT purposes.<sup>5</sup>

A person who applies for a foreign grant which is not resealed in the UK is not a PR within the IHT definition; otherwise para [a][ii] would be unnecessary.

The IHM Manual provides:

**IHTM30031 Personal Representatives [Sep 2018]**

... In Scottish law ‘personal representatives’ has no precise meaning. It should be regarded as comprising in Scotland those persons who would answer the description in English law (including the extension by IHTA84/S272). Any question of whether a Judicial Factor is included in the term should be referred to Technical in Edinburgh.

2 This wording derives from s.55 Administration of Estates Act 1925 (“... any person who takes possession of or intermeddles with the property of a deceased person without the authority of the personal representatives or the court...”).

3 The same applies to the expression trustee *de son tort*; see 6.2 (Who are the trustees).

4 [1982] STC 625.

5 The taxpayer was unmeritorious (perhaps dishonest) and this is a case (as happened with more than one Templeman decision) where the Court decided the answer first and the reasoning second.

The IHT definition of PRs is different from the IT/CGT definition.<sup>6</sup>

### 119.3 Liability for IHT

In outline, the rules are as follows:

<b>IHT charge</b>	<b>IHTA</b>	<b>Primary liability</b>	<b>See para</b>
Lifetime transfer			
– lifetime IHT	s.199(1)	Transferor	119.3.1
– IHT on death	s.199(2)	PRs	119.3.2
Transfer on death	s.200	PRs	119.3.1
Trust IHT	s.201	Trustees	119.3.4
Close co transfer of value	s.202	Company	77.10

The primary liability is where one might expect. But the picture is a complex one, because:

- (1) The full list of persons liable for IHT is wider and includes (in short) donees, nominees, life tenants and beneficiaries.
- (2) There are many distinct charges to IHT, which require separate rules for liability.

I do not consider rules relating to Scotland or the power to collect IHT from a spouse (s.203 IHTA).

#### 119.3.1 *Lifetime transfer/transfer on death*

It is helpful to read s.199/s.200 (lifetime/death transfer) side by side because they have some wording in common:

##### **Lifetime transfer: s.199(1)**

The persons liable for the tax on the value transferred by a chargeable transfer made by a disposition<sup>7</sup> (including any omission treated as a disposition under section 3(3) above)<sup>8</sup> of the transferor are—

##### **Transfer on death: s.200(1)**

The persons liable for the tax on the value transferred by a chargeable transfer made (under section 4 above)<sup>9</sup> on the death of any person are —

6 See 84.3 (PRs: meaning for CGT/IT/CT).

7 See 72.2 (Lifetime IHT charge).

8 See 70.5 (Omission: Deemed disposition).

9 See 72.4 (Death: IHT charge & exemption).

- |   |  |
|---|--|
| (a) the transferor;   | (a) so far as the tax is attributable to the value of property which either—<br>(i) was not immediately before the death comprised in a settlement, or<br>(ii) was so comprised and consists of land in the UK which devolves upon or vests in the deceased’s personal representatives, the deceased’s personal representatives; |
| (b) any person the value of whose estate is increased by the transfer;  | (b) so far as the tax is attributable to the value of property which, immediately before the death, was comprised in a settlement, the trustees of the settlement;   |
| (c) so far as the tax is attributable to the value of any property,<br><br>[i] any person in whom the property <sup>10</sup> is vested <sup>11</sup> (whether beneficially or otherwise) at any time after the transfer,<br><br>[ii] or who at any such time is beneficially entitled to an interest in possession in the property; | (c) [same]<br><br>[i] any person in whom the property is vested (whether beneficially or otherwise) at any time after the death,<br><br>[ii] or who at any such time is beneficially entitled to an interest in possession in the property; <sup>12</sup>  |

10 Section 199(5) IHTA provides (perhaps unnecessarily, but it does not matter):  
“References in this section to any property include references to any property directly or indirectly representing it.”

See App.2.11 (‘Representing’ assets). The same rule applies for s.200: see s.200(5) IHTA.

11 Section 199(4) IHTA provides an extended definition of “vested”:

“For the purposes of this section—

(a) any person who takes possession of or intermeddles with, or otherwise acts in relation to, property so as to become liable as executor or trustee (or, in Scotland, any person who intromits with property or has become liable as a vitious intromitter), and

(b) any person to whom the management of property is entrusted on behalf of a person not of full legal capacity,

shall be treated as a person in whom the property is vested.”

The wording is discussed elsewhere: see 119.2 (Meaning of “PRs” for IHT).

Section 199(4) also applies for s.200: see s.200(5) IHTA.

12 Section 200(3) IHTA provides:

“For the purposes of subsection (1) above a person entitled to part only of the

(d) where by the chargeable transfer any property becomes comprised in a settlement,

any person for whose benefit any of the property or income from it is applied.

(d) so far as the tax is attributable to the value of any property which, immediately before the death, was comprised in a settlement,

any person for whose benefit any of the property or income from it is applied after the death.

### 119.3.2 Nature of PRs liability

In *IRC v Stannard*, PRs were liable for IHT. The question was whether liability was:

- (1) personal liability of the PRs
- (2) representative liability, ie enforceable only against the assets of the estate:

It is plain, in my view, from [s.200] that the liability in respect of capital transfer tax for which a personal representative becomes liable is not and could never have been a liability of the deceased. It is necessarily an original liability which is in terms imposed on the personal representative. There is nothing in the statutory scheme which in express terms limits the liability of the personal representative to assets of the estate except in so far as such limitation is found in [s.204] of the Act. There is... nothing in [s.200] which justifies limiting the liability of a personal representative to liability in a representative capacity only. The relevant limitation is that limitation which is provided by [s.204] and which goes to the extent of the liability, not its character. There is no basis, as it seems to me, for distinguishing between the liability of personal representatives imposed under para (a) and the liability of trustees imposed under para (b). Both incur original liability, both are plainly designated as persons liable, and in respect of neither is there any indication apt to render liability anything other than personal liability.

... “Thus, if an administrator dies intestate while duty payable by him is outstanding, his administrator, although not in the chain of representation to the first intestate, is liable for the unpaid duty. So also is the executor or administrator of one of several trustees,

---

income of any property shall, notwithstanding anything in section 50 above, be deemed to be entitled to an interest in the whole of the property.”

This does not apply for s.199.

notwithstanding that other trustees survive.”

In my judgment, the same is true in respect of capital transfer tax.

Accordingly, in my judgment, the appropriate order where the Crown establishes liability to capital transfer tax against a personal representative is an order in the *de bonis propriis* [personal liability] form.

An order in the *de bonis testatoris* [representative liability] form seems to me only to be justified where the liability of the executor which is being reflected in the order is a liability transmitted from the deceased whose liability it originally was. This can never be true of capital transfer tax except in the case where the deceased was liable for the tax.<sup>13</sup>

The point will not often matter

### 119.3.3 *Additional IHT on death: PRs*

On death:

- (1) IHT may become due on a failed PET
- (2) Additional tax may fall due on a chargeable transfer within 5 years of death

Section 199(2) IHTA provides:

Subsection (1)(a) above shall apply in relation to—

- (a) the tax on the value transferred by a potentially exempt transfer; and
- (b) so much of the tax on the value transferred by any other chargeable transfer made within seven years of the transferor’s death as exceeds what it would have been had the transferor died more than seven years after the transfer,

with the substitution for the reference to the transferor of a reference to his personal representatives.

### 119.3.4 *Liability for trust IHT*

Section 201 IHTA provides:

- (1) The persons liable for the tax on the value transferred by a chargeable transfer made under Part III of this Act are—

---

<sup>13</sup> [1984] STC 245.

- (a) the trustees of the settlement;<sup>14</sup>
  - (b) any person entitled (whether beneficially or not) to an interest in possession in the settled property;
  - (c) any person for whose benefit any of the settled property or income from it is applied at or after the time of the transfer;
  - (d) where the transfer is made during the life of the settlor and the trustees are not for the time being resident in the UK, the settlor.
- (2) Where the chargeable transfer
- [a] is made within seven years of the transferor's death
  - [b] but is not a potentially exempt transfer,
- subsection (1)(d) above shall not apply in relation to so much of the tax as exceeds what it would have been had the transferor died more than seven years after the transfer.<sup>15</sup>

### 119.3.5 *Liability for GWR*

Section 204(9) IHTA deals with GWR:

Where by virtue of subsection (3) of section 102 of the Finance Act 1986 the estate of a deceased person is treated as including property which would not apart from that subsection form part of his estate, a person shall be liable under section 200(1)(a) above as personal representative<sup>16</sup> for tax attributable to the value of that property only if the tax remains unpaid twelve months after the end of the month in which the death occurs and, subject to that, only to the extent of the assets mentioned in subsection (1) above.

### 119.3.6 *Liability: Asset cap*

Section 204 IHTA caps liability for PRs and trustees, by reference to the

<sup>14</sup> See 6.2 (Who are the trustees).

<sup>15</sup> For completeness: there follow two transitional provisions now of limited interest:

(3) Subsection (1)(d) above shall not apply in relation to a settlement made before 11th December 1974 if the trustees were resident in the UK when the settlement was made, but have not been resident there at any time during the period between 10th December 1974 and the time of the transfer.

(3A) Subsection (1)(d) above shall not apply in relation to the tax chargeable on the value transferred by a potentially exempt transfer which proves to be a chargeable transfer in a case where the settlement was made before 17th March 1987 if the trustees were resident in the UK when the settlement was made, but have not been resident there at any time between 16th March 1987 and the death of the transferor.

<sup>16</sup> See 119.3.1 (Lifetime transfer/transfer on death).

value of their assets. The rules are conveniently read side by side:

**s.204(1): PRs**

A person shall not be liable under section 200(1)(a) above for any tax as a personal representative of a deceased person, except to the extent of the following assets, namely—

(a) so far as the tax is attributable to the value of any property other than such as is mentioned in paragraph (b) below,

the assets (other than property so mentioned) which he has received as personal representative or might have so received but for his own neglect or default; and

(b) so far as the tax is attributable to property which, immediately before the death, was comprised in a settlement and consists of land in the UK,

so much of that property as is at any time available in his hands for the payment of the tax, or might have been so available but for his own neglect or default.

**s.204(2): trustees**

A person shall not be liable for tax as trustee in relation to any property, except to the extent of—

(a) so much of the property as he has actually received or disposed of or as he has become liable to account for to the persons beneficially entitled thereto, and

(b) so much of any other property as is for the time being available in his hands as trustee for the payment of the tax or might have been so available but for his own neglect or default.

Section 204(3) IHTA provides similar relief for a nominee/life tenant:

A person not liable as mentioned in subsection (1) or (2) above but [a] liable for tax as a person in whom property is vested or [b] liable for tax as a person entitled to a beneficial interest in possession in any property shall not be liable for the tax except to the extent of that property.

Section 204(5) IHTA provides similar relief for beneficiaries:

- [a] A person liable for tax as a person for whose benefit any settled property, or income from any settled property, is applied, shall not be liable for the tax except to the extent of the amount of the property or income
- [b] (reduced in the case of income by
  - [i] the amount of any income tax borne by him in respect of it, and
  - [ii] in the case of other property in respect of which he has borne income tax by virtue of Chapter 2 of Part 13 of the Income Tax Act 2007 [Transfer of Assets Abroad] by the amount of that tax).

#### **119.4 Priority of persons liable**

Section 205 IHTA provides:

Except as otherwise provided, where under this Act two or more persons are liable for the same tax, each of them shall be liable for the whole of it.

Nevertheless, there are rules for priority.

##### *119.4.1 Transferor/PRs/trustees primarily liable*

Section 204(6) IHTA makes transferor/PRs/trustees primarily liable over other categories:

Where a person is liable for any tax—

- (a) under section 199 above [lifetime disposition by transferor] otherwise than as transferor or personal representative of the transferor, or
  - (b) under section 201 [trusts] above otherwise than as trustee of the settlement,
- [A] he shall be liable only if the tax remains unpaid after it ought to have been paid and,
- [B] in a case where any part of the value transferred is attributable to the tax on it, shall be liable to no greater extent than he would have been had the value transferred been reduced by the tax remaining unpaid.

##### *119.4.2 When PRs not primarily liable*

Section 204(7) IHTA disapplies this rule for failed PETs/additional tax on death:

Where the tax exceeds what it would have been had the transferor died more than seven years after the transfer, subsection (6) above shall not apply in relation to the excess.

Instead, s.204(8) provides the opposite rule:

A person liable by virtue of section 199(2) above for any tax as personal representative of the transferor shall be liable only to the extent that either—

- (a) in consequence of subsections (2), (3) and (5) above, no person falling within paragraphs (b) to (d) of section 199(1) above is liable for the tax, or
  - (b) the tax remains unpaid twelve months after the end of the month in which the death of the transferor occurs,
- and, subject to that, shall be liable only to the extent of the assets mentioned in subsection (1) above.

IHTM provides:

**IHTM30044: PETs: practice relating to PRs [Sep 2018]**

The liability of the transferor's personal representatives (IHTM05012) is a sensitive area of the legislation. You must alert the personal representatives at an early stage where recourse to them might occur. In cases where the transferee (IHTM30051) is not resident in the UK we are likely to be aware of that fact from the replies on the schedule IHT403, but nevertheless we should still warn the personal representatives of their potential liability, if the transferee and any other persons who may be liable under IHTA84/S199 (1) do not pay.

Similarly Shares and Assets Valuation (SAV) should be alert to any valuation in which it is evident that the value of the assets transferred is far less than the value transferred and where tax will be payable on the gift. SAV should give a warning to this effect as soon as possible to whoever issued the valuation request and it will then be their responsibility to decide what further action to take.

You must remember that the facility to have recourse to the transferor's personal representatives is not to be regarded as a soft option. We are to make all the attempts at recovering from the persons liable under IHTA84/S199(1) that we would presently contemplate in a similar situation against any liable person. But having warned the personal representatives that we may look to them to discharge the tax liability, we must ensure firstly that they are kept fully in the picture and secondly that a decision actually to collect from them is not delayed for

years...

Note that tax collected from personal representatives of the transferor under IHTA84/S199 (2) was never a liability of the transferor. Accordingly IHTA84/S5 (4) cannot apply and

- the tax so collected is not deductible against the transferor's taxable estate and
- there is no question of grossing up (IHTM14593) the lifetime transfer

### 119.5 Reporting: Standard estate

The stringent reporting duties are slightly relaxed by 3 regulations, which together I call the “**Excepted Disclosure regulations**”. Their full names are too long to use, so I abbreviate as follows:

<b>My terminology</b>	<b>Full name</b>
Excepted Estates Regs	IHT (Delivery of Accounts) (Excepted Estates) Regs 2004
Excepted Settlements Regs	IHT (Delivery of Accounts) (Excepted Settlements) Regs 2008
Excepted Transfers Regs	IHT (Delivery of Accounts) (Excepted Transfers & Excepted Terminations) Regulations 2008

I discuss the first of these here, but hope to consider the others in a future edition.

Section 216(1) IHTA provides the reporting rules which apply unless one of the Excepted Disclosure regs apply:

<b>Section 216(1)</b>	<b>Type of charge</b>	<b>See para</b>
Except as otherwise provided by this section or by regulations under section 256 below, <sup>17</sup>		
the personal representatives of a deceased person <sup>18</sup> and every person who—	IHT on death	119.3.3
(a) is liable as transferor for tax on the value transferred by a chargeable transfer, or would be so liable if tax were chargeable on that value, or	Lifetime chargeable transfer by individual	119.3.1

<sup>17</sup> See 119.6 (Excepted estates).

<sup>18</sup> Note that PRs (unlike other persons in the list) are required to submit an IHT Account even though there is no liability to IHT.

(b) is liable as trustee of a settlement for tax on the value transferred by a transfer of value, or would be so liable if tax were chargeable on that value, or	Trust IHT charge	119.3.1
(bb) is liable under section 199(1)(b) above for tax on the value transferred by a potentially exempt transfer which proves to be a chargeable transfer, or would be so liable if tax were chargeable on that value, or	Failed PET	119.3.1
(bc) is liable under section 200(1)(c) above for tax on the value transferred by a chargeable transfer made on death, so far as the tax is attributable to the value of property which, apart from section 102(3) of the Finance Act 1986 would not form part of the deceased's estate, or would be so liable if tax were chargeable on the value transferred on the death, or	GWR	119.3.5
(bd) is liable under section 201(1)(b), (c) or (d) above for tax on the value transferred by a potentially exempt transfer which is made under section 52 above and which proves to be a chargeable transfer, or would be so liable if tax were chargeable on that value, or	Trust IHT	119.4
(c) is liable as trustee of a settlement for tax on an occasion on which tax is chargeable under Chapter III of Part III of this Act (apart from section 79), or would be so liable if tax were chargeable on the occasion,  shall deliver to the Board an account specifying to the best of his knowledge and belief all appropriate property and the value of that property.	Trust IHT	119.4

The word “account” is an archaic term for a tax return. The drafter has

copied the wording from the old estate duty provision;<sup>19</sup> but it does not much matter. I refer to it as an “**IHT Account**” (with initial capitals to reflect the technical nature of the expression); or more specifically: “**IHT 400 Account**” (the form on death is IHT400) or “**IHT 100 Account**” (the form on a lifetime transfer is IHT100)

### 119.5.1 “*Appropriate property*”

There are two definitions of “appropriate property”, for PRs and for non-PRs.

For PRs, s.216(3) IHTA provides (so far as relevant):

Subject to subsections (3A) and (3B) below,<sup>20</sup> where an account is to be delivered by personal representatives (but not where it is to be delivered by a person who is an executor of the deceased only in respect of settled land in England and Wales), the appropriate property is—

- (a) [i] all property which formed part of the deceased’s estate immediately before his death
- [ii] other than property which would not, apart from section 102(3) of the FA 1986, form part of his estate [GWR property]; and
- (b) all property to which was attributable the value transferred by any chargeable transfers made by the deceased within seven years of his death.

Excluded property is not appropriate property, as it does not form part of a person’s estate immediate before death. A lifetime gift of excluded property is not a chargeable transfer and so does not fall within (b).

For persons other than PRs, s.216(4) IHTA provides:

Where subsection (3) above does not apply the appropriate property is any property to the value of which the tax is or would be attributable

The term “appropriate property” is not the most transparent of labels, but it is easier to adopt the statutory terminology.

### 119.5.2 *No appropriate property*

There is no obligation to deliver an IHT400 Account if there is no appropriate property, ie if:

---

<sup>19</sup> Section 6(4) FA 1894.

<sup>20</sup> Subsections (3A) and (3B) are not relevant here.

- (1) the deceased had no chargeable (non-excluded) property at the time of death, and
- (2) has made no chargeable transfers within 7 years of death.

There is no de minimis exemption, apart from the rules for excepted estates, discussed below. An IHT400 Account may be required for a standard estate even though no IHT is payable on the death (eg because the chargeable property falls within the nil rate band). But in practice one would expect PRs to disregard trivial UK situate assets, if there is no need for a grant of probate in the UK.

### 119.5.3 *Estate has appropriate property*

In other cases (eg if the deceased had some UK property, even if of little value) there is an obligation to deliver an IHT400 Account, giving details of the appropriate property.

Question 6 IHT400 (2018) provides:

**Where was the deceased domiciled at the date of death? ...**

- England and Wales
- Scotland
- Northern Ireland
- other country specify country below

IHT400 Notes (2018) comments on this box:

If ... the deceased is treated for Inheritance Tax purposes as being domiciled in the UK, you should still enter the name of the foreign country in the box, but fill in the rest of the form as if the deceased was domiciled in the UK. Write in the 'Additional information' boxes on form IHT400 page 16 that the deceased was treated as domiciled (or 'deemed domiciled') in the UK for Inheritance Tax purposes.

If the special rules [deemed domicile] do not apply and the deceased was domiciled outside the UK, you should fill in Schedule IHT401, 'Domicile outside the United Kingdom' to give us details. Fill in the IHT400 with details of assets in the UK only.

There is no statutory obligation to disclose excluded property. However Question 22 in form IHT401 (2020) (Domicile outside the United Kingdom) asks:

Did the deceased leave any assets outside the UK? No/Yes – Give approximate value.

There is no legal duty to supply this information.<sup>21</sup> But refusal to answer the question may give rise to further enquiries.

There is no statutory duty to disclose details of gifts of excluded property which the deceased made before death. However form IHT400 (09/2020) Question 30 asks:

**Gifts and other Transfers of Value:** Did the deceased make any lifetime gifts or other transfers of value on or after 18 March 1986?

It is considered that the reference in the question to “gifts” means gifts which are transfers of value so that if the deceased made gifts of excluded property it is correct to answer “no”. The guidance in IHT400 Notes (2020) is consistent with this:

**Gifts and other transfers of value**

You can tick ‘No’ and do not need to fill in Schedule IHT403 if the only gifts made by the deceased were in the following categories:

- to their spouse or civil partner and Spouse or Civil Partner Exemption applies
- outright gifts to any individual which do not exceed £250 in any one year (these will be covered by the Small Gifts Exemption)
- outright gifts to any individual of money or listed stocks and shares that are wholly covered by the Annual Exemption
- outright gifts made regularly from income where the total gifts did not exceed £3,000 in each year...

If the deceased had made any other gifts or ‘transfers of value’ since 18 March 1986, including transfers into trust, payment of insurance premiums for the benefit of another person, advances out of a trust fund or any assets that were taken out of a trust before death, you must fill in Schedule IHT403, ‘Gifts and other transfers of value’. In general, a ‘transfer of value’ is any transaction where the deceased did not receive full value in exchange.

Question 45 IHT400 (2020) provides:

---

21 The former HMRC form D2 (Notes, 12/05) tacitly recognised this:

*“If the deceased was domiciled outside the UK when they died, any assets they owned abroad will not be liable to inheritance tax. Even so, you can help us to deal with this estate more quickly if you can give us a rough idea of the value of all of the deceased’s estate outside the UK.”*

I have not found a similar comment in the current forms.

**Assets held in trust:** Did the deceased have any right to benefit from any assets held in trust (including the right to receive assets held in a trust at some future date)? No/Yes – Use Schedule IHT418.

The word “right” only includes fixed interests, it is not apt to describe discretionary trusts. But it appears that “right to benefit” here is used (confusingly) to mean a right to an estate IIP. IHT400 Notes (2020) provides:

***Schedule IHT418 Assets held in trust***

You must complete Schedule IHT418 if the deceased had an interest in possession and the trust is one of the following:

- a trust that was set up before 22 March 2006 from which the deceased was entitled to benefit
- an immediate post-death interest
- a disabled person’s interest
- a transitional serial interest

This would include an excluded property trust where the deceased had an estate IIP. In such a case the answer to Question 45 is, “yes”. However only limited information needs to be disclosed in form IHT418. IHT400 Notes (2020) provides:

**Foreign trusts** If the deceased had a right to benefit from settled property where the assets are overseas, and the person who set up the trust was domiciled outside the UK when the trust was created, please answer questions 2 to 5 only.

#### 119.5.4 *Return time limits*

Section 216(6) IHTA provides:

An account under the preceding provisions of this section shall be delivered—<sup>22</sup>

**Case**

**Time limit**

---

<sup>22</sup> I set out the words of the statute in tabular form for clarity.

- (a) in the case of an account to be delivered by personal representatives,
  - [i] before the expiration of the period of twelve months from the end of the month in which the death occurs,
  - [ii] or, if it expires later, the period of three months beginning with the date on which the personal representatives first act as such;
  
- (aa) in the case of an account to be delivered by a person within subsection (1)(bb) or (bd) above
  - before the expiration of the period of twelve months from the end of the month in which the death of the transferor occurs;
  
- (ad) in the case of an account to be delivered by a person within subsection (1)(c) above,
  - before the expiration of the period of six months from the end of the month in which the occasion concerned occurs;
  
- (b) in the case of an account to be delivered by a person within subsection (2) above,
  - before the expiration of the period of three months from the time when he first has reason to believe that he is required to deliver an account under that subsection;
  
- (c) in the case of an account to be delivered by any other person,
  - [i] before the expiration of the period of twelve months from the end of the month in which the transfer is made
  - [ii] or, if it expires later, the period of three months beginning with the date on which he first becomes liable for tax.<sup>23</sup>
  
- (7) A person liable for tax under section 32, 32A, 79 or 126 above or under Schedule 5 to this Act shall deliver an account under this section
  - before the expiration of the period of six months from the end of the month in which the event by reason of which the tax is chargeable occurs.

---

23 Different rules apply where there is a s.267ZA spouse election; see 4.13.10 (IHT payment/return dates).

## 119.6 Reporting: Excepted estate

The law is in the IHT (Delivery of Accounts) (Excepted Estates) Regulations 2004, which I call the “**Excepted Estates Regulations**”.

The legislation distinguishes between:

- (1) “**Excepted estates**” and
- (2) “**Standard estates**” (I use this term to describe an estate which is not an excepted estate)

### 119.6.1 “*Excepted estate*”

Regulation 4(1) Excepted Estates Regulations provides:

An excepted estate means the estate of a person immediately before his death in the circumstances prescribed by paras (2), (3) or (5).

There are three categories of excepted estate:

Para	Requirements (in short)	See para
4(2)	Low value estate	119.6.4
4(3)	IHT spouse /charity exemption	119.6.5
4(5)	Non-domiciled deceased	119.6.7

Before considering these, it is helpful to deal with some definitions.

### 119.6.2 “*Specified transfer*”

Regulation 4(6) Excepted Estates Regulations provides the definition:

For the purposes of paragraphs (2) and (3)—  
“specified transfers”, subject to paragraph (7A), means chargeable transfers made by a person during the period of seven years ending with that person’s death where the value transferred is attributable to—

- (a) cash;
- (b) personal chattels or corporeal moveable property;
- (c) quoted shares or securities; or
- (d) an interest in or over land, save to the extent that
  - [i] sections 102 and 102A(2) of the Finance Act 1986 apply to that transfer or
  - [ii] the land became settled property on that transfer

### 119.6.3 “*Specified exempt transfer*”

Regulation 4(6) Excepted Estates Regulations provides the definition:

“specified exempt transfers” means transfers of value made by a person during the period of seven years ending with that person’s death which are exempt transfers only by reason of—

- (a) section 18 (transfers between spouses or civil partners),
- (b) section 23 (gifts to charities),
- (c) section 24 (gifts to political parties),
- (d) section 24A (gifts to housing associations),
- (e) section 27 (maintenance funds for historic buildings, etc), or
- (f) section 28 (employee trusts) of the 1984 Act.

#### 119.6.4 *Low value estate*

Regulation 4(2) Excepted Estates Regulations provides:

The circumstances prescribed by this paragraph are that—

- (a) the person died on or after 6th April 2004, domiciled in the UK;
- (b) the value of that person’s estate is attributable wholly to property passing—
  - (i) under his will or intestacy,
  - (ii) under a nomination of an asset taking effect on death,
  - (iii) under a single settlement in which he was entitled to an interest in possession in settled property, or
  - (iv) by survivorship in a beneficial joint tenancy or, in Scotland, by survivorship in a special destination;

If the estate includes GWR property, it will not meet condition (b).

- (c) of that property —
  - (i) not more than £150,000 represented value attributable to property which, immediately before that person’s death, was settled property; and
  - (ii) not more than £100,000 represented value attributable to property which, immediately before that person’s death, was situated outside the UK;
- (ca) that person was not a person by reason of whose death one of the alternatively secured pension fund provisions applies;
- (d) subject to paragraph (7A), that person died without having made any chargeable transfers during the period of seven years ending with his death other than specified transfers where, subject to paragraph (7), the aggregate value transferred did not exceed £150,000; and
- (e) the aggregate of—
  - (i) the gross value of that person’s estate,

- (ii) subject to paragraph (7), the value transferred by any specified transfers<sup>24</sup> made by that person, and
- (iii) the value transferred by any specified exempt transfers made by that person, did not exceed the IHT threshold.<sup>25</sup>

For this purpose BPR/APR is disregarded, so an IHT Account is in principle needed on the death of a person holding UK business property, even though it qualifies for 100% relief.<sup>26</sup>

### 119.6.5 IHT spouse/charity exemption

Regulation 4(3) Excepted Estates Regulations provides:

The circumstances prescribed by this paragraph are that—

[Paras (a)(b) are the same as reg 42(a)(b) and need not be set out again]

(c) of that property—

- (i) subject to paragraph (8),<sup>27</sup> not more than £150,000 represented value attributable to property which, immediately before that person's death, was settled property; and
- (ii) not more than £100,000 represented value attributable to property which, immediately before that person's death, was situated outside the UK;

(ca) that person was not a person by reason of whose death one of the alternatively secured pension fund provisions applies;

(d) subject to paragraph (7A), that person died without having made any chargeable transfers during the period of seven years ending with his death other than specified transfers<sup>28</sup> where, subject to paragraph (7), the aggregate value transferred did not exceed £150,000;

(e) the aggregate of—

- (i) the gross value of that person's estate,

24 See 119.6.2 ("Specified transfer").

25 "IHT threshold" is elaborately defined in reg 5A Excepted Estates Regulations.

26 See 119.6.8 (Interaction with reliefs).

27 Regulation 4(8) Excepted Estates Regulations provides: "Paragraph (3)(c)(i) does not apply to property which immediately before the person's death was settled property, to the extent that the property is transferred on that person's death by a spouse, civil partner or charity transfer."

28 See 119.6.2 ("Specified transfer").

- (ii) subject to paragraph (7), the value transferred by any specified transfers made by that person, and
- (iii) the value transferred by any specified exempt transfers made by that person, did not exceed £1,000,000;
- (ea) the total value transferred on that person's death by a spouse, civil partner or charity transfer is greater than nil; and
- (f) the aggregate of  $A - (B + C)$  does not exceed the IHT threshold, where—
  - A is the aggregate of the values in sub-paragraph (e),
  - B, subject to paragraph (4), is the total value transferred on that person's death by a spouse, civil partner or charity transfer, and
  - C subject to paragraph (7B) is the total liabilities of the estate.<sup>29</sup>

#### 119.6.6 *Deceased deemed UK-dom*

HMRC say that an individual who is deemed UK domiciled cannot qualify under the first two categories:

##### **IHTM06023 What is not an excepted estate** [Sep 2018]

There are instances when an estate cannot qualify as an excepted estate, regardless of the value. These are:

- [1] where the deceased held an interest in possession (IHTM16060) in more than one item of settled property (IHTM16041)
- [2] for deaths on or after 1 September 2006 where a charge arises under IHTA1984 s.151A-C (IHT charge on an alternatively secured pension fund),
- [3] where, on or after 18 March 1986, the deceased made a gift with reservation of benefit and either:
  - the reservation still subsists at the death (IHTM04072), or
  - the property ceased to be subject to the reservation within the seven years before the death - (unless this constituted a specified transfer (IHTM06018),
- [4] where the deceased has elected that property should be treated as part of their estate for IHT rather than pay a pre-owned asset charge,
- [5] where the deceased is regarded as deemed domiciled (IHTM13024) in the UK under the provisions of IHTA1984 S.267.

I am not sure about point [5], but it does not much matter.

---

<sup>29</sup> This expression is defined in reg 4(7B).

### 119.6.7 *Deceased non-dom*

Regulation 4(5) Excepted Estates Regulations provides:

The circumstances prescribed by this paragraph are that—

- (a) the person died on or after 6 April 2004;
- (b) that person was never
  - [i] domiciled in the UK or
  - [ii] treated as domiciled in the UK by section 267 [IHTA]

It is considered that a person treated as UK domiciled by a spouse election may qualify.

- (ba) that person was not a person by reason of whose death one of the alternatively secured pension fund provisions<sup>30</sup> applies; and
- (c) the value of that person's estate situated in the UK is wholly attributable to
  - [i] cash<sup>31</sup> or
  - [ii] quoted shares or
  - [iii] securities
 passing under his will or intestacy or by survivorship in a beneficial joint tenancy or, in Scotland, by survivorship in a special destination, the gross value of which does not exceed £150,000.

### 119.6.8 *Interaction with reliefs*

Regulation 4(7) Excepted Estates Regulations provides:

For the purpose of paragraphs (2)(d) and (e) and (3)(d) and (e), sections 104 (business property relief) and 116 (agricultural property relief) of the 1984 Act shall not apply in determining the value transferred by a chargeable transfer.

Thus an IHT account is needed for an estate even if it qualifies for 100%

30 Reg 4(9) provides:

“In this regulation ‘the alternatively secured pension fund provisions’ means the following sections of the 1984 Act—

- (a) section 151A (person dying with alternatively secured pension fund);
- (b) section 151B (relevant dependant with pension fund inherited from member over 75); and
- (c) section 151C (dependant dying with other pension fund).”

31 IHT Manual 6018 shows that HMRC sensibly construe “cash” widely, so as to include a bank account.

business/agricultural property relief.

Regulation 4(7A) Excepted Estates Regulations provides:

For the purpose of paragraphs (2)(d) and (e), (3)(d) and (e) and (6) any transfers of value made by that person in any period from 6th April in any year until and including the following 5th April which—

- (i) are exempt transfers by virtue of section 21 (normal expenditure out of income) of the 1984 Act,
  - (ii) are made less than seven years prior to the death of that person, and
  - (iii) are in total more than £3,000,
- shall be treated as chargeable transfers.

### 119.7 Reporting: Excepted estate

Regulation 3(1) Excepted Estates Regulations provides:

No person is required to deliver an account under section 216 of the 1984 Act of the property comprised in an excepted estate.

Regulation 6(1) Excepted Estates Regulations provides:

Subject to paragraphs (3) and (4), a person who by virtue of these Regulations is not required to deliver to the Board an account under section 216 of the 1984 Act of the property comprised in an excepted estate, must produce

- [a] the information specified in paragraph (2)
  - [b] and, where the criteria specified in regulation 5A(3) and (4) are met, paragraph (2A),
- to the Board in such form as the Board may prescribe.

Thus the term “excepted estate” is not apt, because the estate is not excepted from all reporting requirements. An excepted estate is not required to deliver an IHT400 Account, but it is required to produce a great deal of information in what I call the “**IHT205 Account**” from the name of the relevant form. (The label made sense under the 2002 excepted estates regulations,<sup>32</sup> under which no IHT Account was generally required for an excepted estate.) The IHT205 Account is however shorter and simpler than the IHT400.

I adopt the statutory term “excepted estate”, as a paraphrase is even more

---

32 Reg.4, IHT (Delivery of Accounts) (Excepted Estates) Regulations 2002.

confusing, but quotation marks would be justified.

The main requirement is the list in reg 6(2):

The information specified for the purpose of para (1) is—

- (a) the following details in relation to the deceased—
  - (i) full name;
  - (ii) date of death;
  - (iii) marital or civil partnership status;
  - (iv) occupation;
  - (v) any surviving spouse or civil partner, parent, brother or sister;
  - (vi) the number of surviving children, step-children, adopted children or grandchildren;
  - (vii) national insurance number, tax district and tax reference;
  - (viii) if the deceased was not domiciled in the UK at his date of death, his domicile and address;
- (b) details of all property to which the deceased was beneficially entitled and the value of that property;
- (c) details of any specified transfers, specified exempt transfers and the value of those transfers;
- (d) the liabilities of the estate; and
- (e) any spouse, civil partner or charity transfers and the value of those transfers.

It is considered that there is no obligation to give information about excluded property. This is perhaps a purposive construction, because, strictly, excluded property is “property to which the deceased was beneficially entitled” even though it does not form part of their estate for IHT purposes immediately before death. However, it is absurd to say that there is an obligation on excepted estates to disclose excluded property, when there is no such obligation on standard estates. In practice form IHT205 does not ask about non-UK property.

### **119.8 Disclosure: Territorial limitation**

The IHT provisions do not provide much of a territorial limitation on the duty to submit an IHT Account. They merely provide two regimes of disclosure, for excepted/standard estates.

The Courts may devise further territorial limitation, as they have on

occasion done elsewhere.<sup>33</sup> It may be argued that no duty applies to foreign personal representatives, in the absence of any IHT liability. But disclosure in one form or another will be required in all cases where the PRs need a UK grant of probate.

### 119.8.1 *Conclusion*

There is no de minimis exemption. An IHT 205 Account may be required for an excepted estate even though no IHT is payable on the death (eg because the chargeable property falls within the nil rate band). But in practice one would expect PRs of an excepted estate to disregard trivial UK situate assets, if there is no need for a grant of probate in the UK.

If a foreign domiciled individual wishes to ensure that their personal representatives are under no duty to put in any IHT Account on death, they should not have any UK situate property at the time of their death (and consider appointing foreign executors.) Then there is no duty to put in an IHT Account.

## 119.9 **Correcting error in Account**

Section 217 IHTA provides:

If a person who has delivered an account under section 216 above discovers at any time that the account is defective in a material respect by reason of anything contained in or omitted from it he shall, within six months of that time, deliver to the Board a further account containing such information as may be necessary to remedy the defect.

Six months is a leisurely, long-stop time limit. There is a separate duty to take “reasonable steps” to inform HMRC of errors in an Account, with a sanction of penalties,<sup>34</sup> and reasonable steps will generally require a swifter response.

## 119.10 **Payment time limits**

I do not consider the rules for payment of tax by instalments.

Unlike IT/CGT, there is no specific penalty for late payment, though interest is payable.

---

<sup>33</sup> See 15.12 (General territorial principle).

<sup>34</sup> See 120.9.2 (Careless: Definition).

### 119.10.1 *Payment by PRs*

Section 226(1) IHTA provides:

Except as otherwise provided by the following provisions of this Part of this Act, the tax on the value transferred by a chargeable transfer shall be due

[a] six months after the end of the month in which the chargeable transfer is made

[b] or, in the case of a transfer made after 5th April and before 1st October in any year otherwise than on death, at the end of April in the next year.<sup>35</sup>

IHT is due before the IHT Account is due: a curious state of affairs. And why should the payment period be longer for deaths in the period April-September? But there it is.

Section 226 IHTA provides:

(2) Personal representatives shall, on delivery of their account, pay all the tax for which they are liable and may, on delivery of that account, also pay any part of the tax chargeable on the death for which they are not liable, if the persons liable for it request them to make the payment...

(5) The Board may in the first instance, and without prejudice to the recovery of the remainder of the tax, accept or demand payment of an amount by reference to the value stated in an account delivered to the Board under section 216 or 217 above.

### 119.10.2 *Tax on failed PET*

Section 226 IHTA provides:

(3) So much of the tax chargeable on the value transferred by a chargeable transfer made within seven years of the death of the transferor as—

(a) exceeds what it would have been had the transferor died more than seven years after the transfer, shall be due six months after the end of the month in which the death occurs.

(3A) Without prejudice to subsection (3) above, the tax chargeable on

---

<sup>35</sup> Different rules apply where there is a s.267ZA spouse election; see 4.13.10 (IHT payment/return dates).

the value transferred by a potentially exempt transfer which proves to be a chargeable transfer shall be due six months after the end of the month in which the transferor's death occurs.

### 119.10.3 *Trust tax*

Section 226 IHTA provides:

(3B) So much (if any) of the tax chargeable on the value transferred by a chargeable transfer made under Chapter III of Part III of this Act within the period of seven years ending with the settlor's death as exceeds what it would have been had the settlor died more than seven years after the date of the transfer shall be due six months after the end of the month in which the death occurs.

(3C) Tax chargeable under Chapter 3 of Part 3 of this Act on the value transferred by a chargeable transfer, other than any for which the due date is given by subsection (3B) above, is due six months after the end of the month in which the chargeable transfer is made.

## **119.11 Notice of determination**

Section 221 IHTA provides:

(1) Where it appears to the Board that a transfer of value<sup>36</sup> has been made or where a claim under this Act is made to the Board in connection with a transfer of value, the Board may give notice in writing to any person who appears to the Board to be the transferor or the claimant or to be liable for any of the tax chargeable on the value transferred, stating that they have determined the matters specified in the notice.

(2) The matters that may be specified in a notice under this section in relation to any transfer of value are all or any of the following—

- (a) the date of the transfer;
- (b) the value transferred and the value of any property to which the value transferred is wholly or partly attributable;
- (c) the transferor;
- (d) the tax chargeable (if any) and the persons who are liable for the whole or part of it;
- (e) the amount of any payment made in excess of the tax for which a person is liable and the date from which and the rate at which

---

<sup>36</sup> See 70.3.1 (Transfer of value: Extended definition).

- tax or any repayment of tax overpaid carries interest; and
- (f) any other matter that appears to the Board to be relevant for the purposes of this Act.
- (3) A determination for the purposes of a notice under this section of any fact relating to a transfer of value—
- (a) shall, if that fact has been stated in an account or return under this Part of this Act and the Board are satisfied that the account or return is correct, be made by the Board in accordance with that account or return, but
- (b) may, in any other case, be made by the Board to the best of their judgment.
- (4) A notice under this section shall state the time within which and the manner in which an appeal against any determination in it may be made.
- (5) Subject to any variation by agreement in writing or on appeal, a determination in a notice under this section shall be conclusive for the purposes of this Act against the person on whom the notice is served; and if the notice is served on the transferor and specifies a determination of the value transferred by the transfer of value or previous transfers of value, the determination, so far as relevant to the tax chargeable in respect of later transfers of value (whether or not made by the transferor) shall be conclusive also against any other person, subject however to any adjustment under section 240 or 241 below.

“Notice of determination” is an old-fashioned expression for what would nowadays be called an assessment. It does not much matter.

## 119.12 IHT recovery time limits

### 119.12.1 IHT time limits: outline

IHT recovery time limits and the IT/CGT time limits are best regarded as distinct codes, though they share some rules and terminology.

Time limits for the recovery of IHT can be summarised as follows:

<b>Time limit</b>	<b>Facts</b>	<b>IHTA</b>	<b>See para</b>
n/a	Certificate of discharge <i>IHT Account made and:</i>	s.239	119.15
4 years	- No culpable error	s.240(2)	119.12.2
6 years	- Careless error	s.240(4)	119.12.3
12 years	- Offshore matter	s.240B	119.13

20 years	- Deliberate error	s.240(5)	119.12.3
20 years	- DOTAS breach	s.240(5A)	119.12.4
<i>No IHT Account made and:</i>			
20 years	- No deliberate error	s.240(6)(7)	119.12.4
No limit	- Deliberate error	s.240(1)	119.14

Section 240(1) IHTA provides the starting point:

- [a] Where too little tax has been paid in respect of a chargeable transfer
- [b] the tax underpaid shall be payable
- [c] with interest under section 233 above,
- [d] whether or not the amount that has been paid was that stated as payable in a notice under section 221 above [notice of determination];
- [e] but subject
  - [i] to section 239 above<sup>37</sup> and
  - [ii] to the following provisions of this section.

So the default rule is that unless one of the express time limits discussed below applies, there is no time limit for the recovery of IHT. Fortunately the default rule only rarely applies.

#### 119.12.2 *Tax paid: 4-year limit*

Section 240(2) IHTA provides:

Where

[A] tax attributable to the value of any property is paid in accordance with an account duly delivered to the Board under this Part of this Act and

[B] the payment is made and accepted in full satisfaction of the tax so attributable,

no proceedings shall be brought for the recovery of any additional tax so attributable after the end of the period of four years beginning with the later of—

- (a) the date on which the payment (or in the case of tax paid by instalments the last payment) was made and accepted, and
  - (b) the date on which the tax or the last instalment became due;
- and at the end of that period any liability for the additional tax and any Inland Revenue charge for that tax shall be extinguished.

---

<sup>37</sup> See 119.15 (IHT certificate of discharge).

I refer to this as the “**s.240(2) tax-paid rule**”.

Section 240(3) IHTA signposts exceptions to the s.242(2) tax-paid rule:

Subsection (2) has effect subject to subsections (4) to (5A).

### 119.12.3 *Carelessness/deliberate error*

Section 240(4)/(5) IHTA extend the time limit of the s.240(2) tax-paid rule in cases of carelessness/deliberate misconduct. The rules are easier to follow if set out side by side:

Proceedings in a case involving a loss of tax brought about carelessly by

[a] a person liable for the tax<sup>38</sup>

[b] (or a person acting on behalf of such a person)<sup>39</sup>

may be brought at any time not more than 6 years after the later of the dates in subsection (2)(a) and (b).<sup>40</sup>

Proceedings in a case involving a loss of tax brought about deliberately by

[a] [identical]

[b] [identical]

may be brought at any time not more than 20 years after the later of the dates in subsection (2)(a) and (b).

Section 240A(2)/(4) IHTA define carelessly/deliberately in the same way as the TMA does for IT/CGT.<sup>41</sup>

### 119.12.4 *Breach of DOTAS*

Section 240(5A) IHTA extends the time limit of the s.240(2) tax-paid rule in cases of breach of DOTAS:

Proceedings in a case involving a loss of tax attributable to arrangements which were expected to give rise to a tax advantage in

38 This includes the settlor: see 119.12.6 (Culpable settlor).

39 See 115.14.6 (Carelessness of agent).

40 The dates are:

(a) the date on which the payment (or in the case of tax paid by instalments the last payment) was made and accepted, and

(b) the date on which the tax or the last instalment became due.

See 119.12.2 (Four year limit).

41 See 115.14.4 (What is reasonable care); 115.16.1 (Deliberate inaccuracy).

respect of which a person liable for the tax was under an obligation to make a report under section 253 of the Finance Act 2014 (duty to notify Commissioners of promoter reference number) but failed to do so, may be brought at any time not more than 20 years after the later of the dates in subsection (2)(a) and (b).

#### 119.12.5 *No IHT Account delivered*

Section 240 IHTA then deals with cases where the s.240(2) tax-paid rule does not apply, ie (in short) where no IHT Account is delivered to HMRC.

- (6) Subsection (7) applies to any case
  - [a] not falling within subsection (2)<sup>42</sup>
  - [b] where too little tax has been paid in respect of a chargeable transfer,
  - [c] provided that the case does not involve a loss of tax brought about deliberately by
    - [i] a person liable for the tax<sup>43</sup>
    - [ii] (or a person acting on behalf of such a person).<sup>44</sup>
- (7) Where this subsection applies—
  - (a) no proceedings are to be brought for the recovery of the tax after the end of the period of 20 years beginning with the date on which the chargeable transfer was made, and
  - (b) at the end of that period
    - [i] any liability for the tax and
    - [ii] any Inland Revenue charge for that tax<sup>45</sup> is extinguished.

#### 119.12.6 *Culpable settlor*

Section 240(8) IHTA provides:

In relation to cases of tax chargeable under Chapter 3 of Part 3 of this Act (apart from section 79), the references in subsections (4) to (6) to a person liable for the tax are to be treated as including references to a person who is the settlor in relation to the settlement.

Thus carelessness/deliberate error of the settlor counts for time limits,

---

42 See 119.12.2 (Four year limit).

43 This includes the settlor: see 119.12.6 (Culpable settlor).

44 See 115.14.6 (Carelessness of agent).

45 See 119.16 (Inland Revenue charge).

even though in general the settlor is not actually liable for trust IHT.

### 119.12.7 RTC time limit

Where the requirement to correct rules apply, in short, where IHT involving offshore matters is undeclared on 5/4/2017, the time limit was extended to 5 April 2021, so IHT occasions of charge from 5 April 1997 remain recoverable until then; but this time limit has now passed.<sup>46</sup>

## 119.13 12 year limit: Offshore matter

Section 240B IHTA provides:

- (1) This section applies in a case within section 240(2) which involves a loss of tax in relation to a chargeable transfer, where—
  - (a) the lost tax involves an offshore matter, or
  - (b) the lost tax involves an offshore transfer which makes the lost tax significantly harder to identify.
- (2) Proceedings for the recovery of the lost tax may be brought at any time not more than 12 years after the later of the dates in section 240(2)(a) and (b).

### 119.13.1 Involves an offshore matter

Section 240B IHTA provides:

- (3) Lost tax “involves an offshore matter” if it is charged on or by reference to property which is situated or held in a territory outside the UK at, or immediately after, the time of the chargeable transfer.
- (4) Lost tax “involves an offshore transfer” if—
  - (a) it does not involve an offshore matter, and
  - (b) the property is transferred to a territory outside the UK at a relevant time.<sup>47</sup>

The drafting is derived from the requirement to correct rules: see 119.13.1 (Involves an offshore matter).

Section 240B(6) IHTA provides:

---

<sup>46</sup> See 115.18 (RTC time limit: 5/4/21).

<sup>47</sup> Section 240B(5) IHTA provides: “In subsection (4)(b) “relevant time” means a time after the chargeable transfer but before—

(a) the date on which an account under section 216 is delivered to HMRC in relation to the chargeable transfer, or

(b) any later date on which an account under section 217 is so delivered.”

Where lost tax involves an offshore transfer, the cases in which the transfer makes the lost tax significantly harder to identify include any case where, because of the transfer—

- (a) HMRC was significantly less likely to become aware of the lost tax, or
- (b) HMRC was likely to become aware of the lost tax only at a significantly later time.

Section 240B(7)(8) provides an exception where HMRC should have acted sooner. This is the same rule as for IT, discussed above; see 115.15.2 (12-year limit: Exceptions).

(9) This section is subject to any provision of this Act which allows for a longer period for the bringing of proceedings.

#### 119.13.2 12-year rule: Commencement

Section 240B IHTA was introduced by s.81 FA 2019. Section 81(4) FA 2019 provides:

- (4) The amendments made by this section have effect—
  - (a) in a case involving loss of tax brought about carelessly by a person liable for the tax (or a person acting on behalf of such a person),<sup>48</sup> in relation to chargeable transfers taking place on or after 1 April 2013, and
  - (b) in any other case, in relation to chargeable transfers taking place on or after 1 April 2015.

#### 119.14 No time limit

None of the express time limits apply if (in short):

- (1) the s.240(2) tax-paid rule does not apply (in short, no IHT Account is delivered) and
- (2) the taxpayer has acted deliberately.

Then the default rule applies, so there is no time limit for collection of tax.

This is contrary to the principle of finality, and out of line with other taxes. It is suggested that there should be some cut off. 20 years seems enough, and in line with other taxes; though any figure is better than none.

---

<sup>48</sup> Section 90(5) FA 2019 provides: “Section 240(8) of IHTA 1984 applies to the reference to “person liable for the tax” in subsection (4)(a).”

But after 20 years, there may be no or insufficient evidence of deliberate misconduct, as opposed to mere carelessness or innocent error. The onus of proof becomes important here.

## 119.15 IHT certificate of discharge

The IHT rules, drafted in an earlier era, are more concise than the IT/CGT rules, and have a number of gaps, but the standard of disclosure is similar.

### 119.15.1 *Certificate of IHT paid*

Section 239(1) IHTA provides:

Where application is made to the Board by a person liable for any tax on the value transferred by a chargeable transfer which is attributable to the value of property specified in the application, the Board, on being satisfied that the tax so attributable has been or will be paid, may give a certificate to that effect, and shall do so if the chargeable transfer is one made on death or the transferor has died.

Section 239(3) IHTA explains its effect:

Subject to subsection (4) below,—

- (a) a certificate under subsection (1) above shall discharge the property shown in it from the Inland Revenue charge on its acquisition by a purchaser<sup>49</sup>

This is of little importance, and I think references to certificates of discharge are generally to the next type of certificate, under s.239(2) IHTA.

### 119.15.2 *Certificate IHT due/not due*

Section 239(2) IHTA provides:

Where tax is or may be chargeable on the value transferred by a transfer of value<sup>50</sup> and—

- (a) application is made to the Board after the expiration of two years from the transfer (or, if the Board think fit to entertain the application, at an earlier time) by a person who is or might be liable for the whole or part of the tax, and

---

<sup>49</sup> See 119.16 (Inland Revenue charge).

<sup>50</sup> See 70.3.1 (Transfer of value: Extended definition).

- (b) the applicant delivers to the Board,
  - [i] if the transfer is one made on death, a full statement to the best of his knowledge and belief of all property included in the estate of the deceased immediately before his death
  - [ii] and, in any other case, a full and proper account under this Part of this Act,

If these conditions (“certificate application conditions”) are met, we move on to the relief available:

- [A] the Board may, as the case requires, determine the amount of the tax or determine that no tax is chargeable;
- [B] and subject to the payment of any tax so determined to be chargeable the Board may give a certificate of their determination, and shall do so if the transfer of value is one made on death or the transferor has died.

I refer to this as an “**IHT certificate of discharge**”.

The application form is IHT30 (Inheritance Tax: application for a clearance certificate).

An application can only be made if there is a transfer of value. The IHT Manual provides:

**IHTM40040: is a certificate appropriate?** [May 2020]

You can issue a certificate where

- tax would be payable if the minimum taxable threshold were exceeded
- a relief covers the tax otherwise chargeable.

You can also issue a certificate where no tax is payable because of exempt gifts

- to spouses or civil partners
- to charities
- to political parties
- for national purposes
- for public benefit, and where
- the estate includes government securities in foreign ownership which are exempt under IHTA84/S6 (2) [FOTRA securities].

You cannot issue a certificate where the property is not chargeable to tax at all (IHTM04141), for example because of the surviving spouse exemption available under IHTA84/Sch6Para2 [Estate duty transitional rule]...

A certificate can be obtained on a death where the estate includes

chargeable and excluded property (whether FOTRA securities, which are mentioned in this list, or non-UK situated property, which is not mentioned).

Where an estate consists *only* of excluded property, the certificate application conditions are not strictly satisfied, but in practice HMRC will give a domicile ruling on a death.<sup>51</sup>

### 119.15.3 *Certificate for lifetime chargeable transfer*

The IHT Manual provides:

**HTM40011: who can apply for clearance certificates?** [May 2020]

You may receive a request for clearance in respect of a lifetime transfer that was chargeable when made (IHTM04067). You should normally tell the applicants that we do not give clearance in these circumstances. It is considered that the normal process of assessment and payment of tax are sufficient evidence that the liability has been satisfied.

We do not issue clearance as the subsequent death of the transferor may bring failed potentially exempt transfers (IHTM14511) into cumulation. Clearance can be given if the transferor has subsequently died and you are satisfied that no further liabilities can arise in respect of the transfer.

It may happen that a person makes a gift of foreign property to a trust, but there are doubts as to their domicile. If foreign domiciled the property is excluded property and there is no transfer of value. If UK domiciled, there is a lifetime chargeable transfer. In neither case is a formal certificate available, but HMRC will, no doubt, give a ruling as to domicile if asked.

### 119.15.4 *Clearance certificate for PETs*

Section 239(2A) IHTA deals with PETs:

An application under subsection (1) or (2) above with respect to tax which is or may become chargeable on the value transferred by a potentially exempt transfer may not be made before the expiration of two years from the death of the transferor (except where the Board think fit to entertain the application at an earlier time after the death).

### 119.15.5 *Certificate protection*

Section 239(3) IHTA explains the effect of a s.239(2) certificate:

---

<sup>51</sup> See 3.22 (HMRC domicile ruling).

Subject to subsection (4) below ...

- (b) a certificate under subsection (2) above shall discharge all persons from any further claim for the tax on the value transferred by the chargeable transfer concerned and extinguish any Inland Revenue charge for that tax.

Section 239(4) IHTA provides a set of limits to certificate protection:

A certificate under this section

- [i] shall not discharge any person from tax in case of fraud or failure to disclose material facts and  
 [ii] shall not affect any further tax—  
 (a) that may afterwards be shown to be payable by virtue of section 93, 142, 143, 144 or 145 above

The exceptions at [ii] concern provisions which may retrospectively increase an IHT liability:

Section	Provision	See para
s.93	Disclaimer	94.18
s.142	Instrument of variation	
s.143	Compliance with testator's request	
s.144	Discretionary will trust	
s.145	<i>Repealed (the need to delete the reference was overlooked)</i>	

Section 239(4) IHTA provides:

A certificate under this section ... shall not affect any further tax ...

- (aa) that may afterwards be shown to be payable by reason of too great an increase having been made under section 8A(3) above

This relates to the transferable nil-rate band.

Section 239(4) IHTA provides:

A certificate under this section ... shall not affect any further tax ...

- (b) that may be payable if any further property is afterwards shown to have been included in the estate of a deceased person immediately before his death;

These limits to certificate protection do reduce the value of the certificate, though the onus of proof does shift to HMRC.

#### 119.15.6 Certificate protection: PRs

HMRC practice provides a further relief for PRs who have an IHT

certificate of discharge. IHTM provides:

**IHTM30044: PETs: practice relating to PRs** [Sep 2018]

... The Law Societies of England and Scotland have expressed concern about the liability of personal representatives under IHTA84/S199 (2). In response HMRC have indicated that we ‘will not actually pursue for inheritance tax personal representatives who

- after making the fullest enquiries that are reasonably practicable in the circumstances to discover lifetime transfers, and so
- having done all in their power to make full disclosure of them to the Board of HMRC

have obtained a certificate of discharge and distributed the estate before a chargeable lifetime transfer comes to light.

This statement of the Board’s position is made without prejudice to the application in an appropriate case of IHTA84/S199 (2) Inheritance Tax Act 1984.’

The quotation is from letters sent to the two Law Societies on 6 February 1991. It was published in the Law Society’s Gazette dated 13 March 1991, page 17.

Although the heading refers to failed PETs, the same ought to apply to a lifetime chargeable transfer so far as additional tax is payable on death under s.199(2).

#### 119.15.7 *Protection for purchaser*

A purchaser’s protection under a certificate of discharge is unrestricted. Section 239(4) IHTA provides

but in so far as the certificate shows any tax to be attributable to the value of any property it shall remain valid in favour of a purchaser of that property without notice of any fact invalidating the certificate.

#### 119.15.8 *Discharge: Excepted estate*

Para 8 IHT (Delivery of Accounts) (Excepted Estates) Regulations 2004, which I call the “**Excepted Estates Regulations**”, provides a separate rule for excepted estates:<sup>52</sup>

(1) Subject to paragraph (2) and regulation 9, if the information specified in regulation 6 has been produced in accordance with these

---

<sup>52</sup> See 119.6 (Excepted estates).

Regulations, all persons shall on the expiration of the prescribed period<sup>53</sup> be discharged from any claim for tax on the value transferred by the chargeable transfer made on the deceased's death and attributable to the value of the property comprised in an excepted estate and any Inland Revenue charge for that tax shall then be extinguished. (2) Paragraph (1) shall not apply if within the prescribed period the Board issue a notice to—

- (a) the person or persons who would apart from these Regulations be required to deliver an account under section 216 of the 1984 Act, or
- (b) the solicitor or agent of that person or those persons who produced the specified information pursuant to regulation 6, requiring additional information or documents to be produced in relation to the specified information produced pursuant to regulation 6.

The difference between this and the IHT certificate of discharge is that discharge for an excepted estate comes automatically on the expiry of the prescribed period, unless HMRC issue a notice to require additional information. There is no need to apply for a certificate.

Unfortunately, reg. 9 Excepted Estates Regulations (more or less) undoes the benefit of the automatic discharge under reg.8:

Regulation 8

- [1] shall not discharge any person from tax in the case of fraud or failure to disclose material facts and
- [2] shall not affect any tax that may be payable if further property is later shown to form part of the estate and, in consequence of that property, the estate is not an excepted estate.

This echoes s.239(4) IHTA.

### 119.15.9 *Excepted settlements regulations*

#### Inheritance Tax (Delivery of Accounts) (Excepted Settlements)

---

53 Defined reg.1 Excepted Estates Regulations: “‘the prescribed period’ in relation to any person is the period beginning with that person’s death and ending—

- (a) in England, Wales and Northern Ireland, 35 days after the making of the first grant of representation in respect of that person (not being a grant limited in duration, in respect of property or to any special purpose); or
- (b) in Scotland, 60 days after the date on which confirmation to that person’s estate was first issued”.

Regulations 2008, not discussed here, provides similar exemption from submitting IHT Accounts on 10-year anniversaries, and exit charges, for small settlements.

#### 119.15.10 *Informal IHT clearance*

The IHTM provides:

##### **IHTM40001: Clearance certificates: summary [May 2020]**

##### **...Non-statutory assurance**

You should treat the non-statutory assurance (IHTM40151) given by standard letter SL135 in all respects as if the taxpayer had applied for and you had issued formal clearance on form IHT30. You should therefore consider the instructions in this section before you issue a non-statutory assurance.

Once you have issued a non-statutory assurance you should treat any further developments on the case in accordance with the instructions in this section and on the basis that clearance has been given. This paragraph does not apply to Estate Duty cases.

As the non-statutory assurance letter has the same effect as a formal clearance certificate there is no need for the taxpayer to request a certificate once it has been issued. However, if they choose to submit a form IHT30 you should still issue it if they have paid all the Inheritance Tax that is due.

There are two possible advantages in seeking a formal statutory clearance.

- (1) This may extend the period of administration of the estate<sup>54</sup>
- (2) If HMRC seek to resile from the clearance, the dispute is decided by the FTT and not by way of judicial review.

#### 119.16 **Inland Revenue charge**

Section 237(1) IHTA provides:

Except as otherwise provided, where any tax charged on the value transferred by a chargeable transfer, or any interest on it, is for the time being unpaid a charge for the amount unpaid (to be known as an Inland Revenue charge) is by virtue of this section imposed in favour of the Board on—

- (a) any property to the value of which the value transferred is wholly or partly attributable, and

---

<sup>54</sup> See 84.2 (Period of administration).

- (b) where the chargeable transfer
  - [i] is made by the making of a settlement or
  - [ii] is made under Part III of this Act [settlements],any property comprised in the settlement.

One might refer to this as the “HMRC charge”; but it is better to use the statutory term.

Section 237(2) IHTA provides:

References in subsection (1) above to any property include references to any property directly or indirectly representing it.

If there is an Inland Revenue charge on shares of a company, that does not extend to a charge on assets of the company, as the assets do not represent the shares.<sup>55</sup>

#### 119.16.1 *IHT residential property code*

Section 237(2A) IHTA provides:

Where tax is charged by virtue of Schedule A1 on the value transferred by a chargeable transfer, the reference in subsection (1)(a) to property to the value of which the value transferred is wholly or partly attributable includes the UK residential property interest (within the meaning of that Schedule) to which the charge to tax relates.

In short, the Inland Revenue charge applies to:

- (1) Sch A1 property
- (2) The UK residential property interest to which the charge relates
- (3) Property representing (1) and (2)

The drafter no doubt had in mind cases where:

- (1) T (individual or trust) holds a company which holds a UK residence.
- (2) T holds a relevant (de-excluded) loan.

What if T holds residence-securities? Sch A1 Q&As provide:

##### *Example 13*

A mother resident<sup>56</sup> in Hong Kong guarantees a loan from the bank to her son which is made in order to enable the son to buy a property in the UK. The mother gives security to the bank over non-UK

---

<sup>55</sup> See App 2.11.5 (Do shares represent co assets).

<sup>56</sup> Author’s footnote: It is assumed the mother is domiciled in Hong Kong.

investment assets and then dies.

The investment assets (security) are chargeable (de-excluded property) up to the value of the loan.

On the death of the mother can HMRC impose a charge over the property owned by the son as security for the payment of IHT on the collateral even though the parent has no interest in the property and is not owed any money by the son and the son may not even inherit anything from his mother?

*Suggested answer:* Correct

HMRC agree.

My own suggested answer is that the charge to tax does not relate to the land, so there is no Inland Revenue charge.

#### 119.16.2 *Charge on deceased's estate*

Section 237(3) IHTA provides:

Where the chargeable transfer is made on death, personal or movable property situated in the UK which was beneficially owned by the deceased immediately before his death and vests in his personal representatives is not subject to the Inland Revenue charge;

A Residence-company is not usually UK situate so this exemption will not apply. But it might apply in the case of a UK situate relevant loan.

#### 119.16.3 *PETs*

Section 237(3A) IHTA provides:

In the case of a potentially exempt transfer which proves to be a chargeable transfer—

- (a) property concerned,<sup>57</sup> or an interest in property concerned, which has been disposed of to a purchaser before the transferor's death is not subject to the Inland Revenue charge, but
- (b) property concerned which has been otherwise disposed of before the death and property which at the death represents any

---

<sup>57</sup> Subsection 3A provides a definition: "... in this subsection "property concerned" means property to the value of which the value transferred by the transfer is wholly or partly attributable."

property or interest falling within paragraph (a) above shall be subject to the charge...

#### 119.16.4 *Priority of charge*

Section 237(5) IHTA provides:

The Inland Revenue charge imposed on any property shall take effect subject to any incumbrance on it which is allowable as a deduction in valuing that property for the purposes of the tax.

There are, at least in theory, problems for mortgagees where the debt is not deductible for IHT purposes, but perhaps in practice the issue will not arise.

#### 119.16.5 *Purchase of charged property*

Section 237(6) IHTA provides:

Except as provided by section 238 below [purchase of charged property], a disposition of property subject to an Inland Revenue charge shall take effect subject to that charge.

Section 238(1) IHTA provides:

Where property subject to an Inland Revenue charge, or an interest in such property, is disposed of to a purchaser, then if at the time of the disposition<sup>58</sup>—

- (a) in the case of land in England and Wales, the charge was not registered as a land charge or, in the case of registered land, was not protected by notice on the register, or
- (b) [i] in the case of land in Northern Ireland the title to which is registered under the Land Registration Act (Northern Ireland) 1970, the charge
  - [A] was not entered as a burden on the appropriate register maintained under that Act or
  - [B] was not protected by a caution or inhibition under that Act or,

---

58 In this section “the time of the disposition” means—

(a) in relation to registered land—

(i) if the disposition is required to be completed by registration, the time of registration, and

(ii) otherwise, the time of completion, and

(b) in relation to other property, the time of completion.”

- [ii] in the case of other land in Northern Ireland, the purchaser had no notice of the facts giving rise to the charge, or
- (c) in the case of
  - [i] personal property situated in the UK other than such property as is mentioned in paragraph (a) or (b) above,<sup>59</sup>
  - [ii] and of any property situated outside the UK, the purchaser had no notice of the facts giving rise to the charge, or
- (d) in the case of any property,
  - [i] a certificate of discharge had been given by the Board under section 239 below and
  - [ii] the purchaser had no notice of any fact invalidating the certificate,
 the property or interest shall then cease to be subject to the charge but the property for the time being representing it shall be subject to it.

#### 119.16.6 *Time limit for purchasers*

Section 238(2) IHTA provides:

Where property subject to an Inland Revenue charge, or an interest in such property, is disposed of to a purchaser in circumstances where it does not then cease to be subject to the charge, it shall cease to be subject to it at the end of the period of six years beginning with the later of—

- (a) the date on which the tax became due, and
- (b) the date on which a full and proper account of the property was first delivered to the Board in connection with the chargeable transfer concerned.

The IHT Manual provides:

**IHTM30125 Liability: Liability In Special Cases: Liability Of Purchaser [May 2020]**

... The term ‘notice’ in IHTA/S238(1)(c) is considered to have a wide meaning and it is not limited to cases where, for example, an actual notice was given to purchaser. It will include cases where a purchaser acquires business property where they are aware that the property was

---

<sup>59</sup> The reference to personal property “other than such property as is mentioned in paragraph (a) or (b) above” is strange, as the property mentioned in (a) and (b) is land, not personal property; but it does not matter.

given away less than 7 years prior to their purchase. In such cases the statutory charge created by IHTA84/S237 will apply to the business property in the hands of the purchaser if the tax remains unpaid by either the transferee or personal representatives.

However, this extension of liability to a purchaser only applies where the lifetime transfer was a chargeable transfer when made (IHTM04067) – most commonly this will be where relevant business property has been transferred to the trustees of a relevant property trust. The extension does not apply to a purchaser where the lifetime transfer was a potentially exempt transfer (PET) (IHTM04057) which later falls into charge by reason of death within seven years. This is because IHTA84/S237(3A)(a) excludes a PET, where the transferee has subsequently sold the gifted property, from the charge. Instead, the charge applies to the proceeds of the sale, or any other property representing the gifted property. But the charge does apply to the property given away by a PET where the transferee has disposed of the property otherwise than by a sale.

It should only be in exceptional circumstances that you should need to consider recovering the tax from a purchaser or other subsequent owner of gifted property. You should make every effort to recover the tax from the transferee, or person in whom the gifted property was vested and follow the instruction at IHTM30044 if there is any prospect that you may need to have recourse to the personal representatives. In the very rare case where it appears that there may be difficulty in recovering the tax from both the transferee and the personal representatives, you should warn the purchaser of their potential liability as soon as it is apparent that it may be necessary to have to recourse to them.

## CHAPTER ONE HUNDRED AND TWENTY

# PENALTIES

120.1

### 120.1 Penalties: Introduction

This chapter discusses a set of seven penalties:

Topic	Provision <sup>1</sup>	See para
<i>Error-based penalties ("sch 24 rules")</i>	<i>Sch 24 FA 07</i>	
Error in writing	Para 1	120.2
Error due to 3 <sup>rd</sup> party	Para 1A	120.3
Uncorrected assessment	Para 2	120.4
<i>Failure by omission</i>	-	
Failure to notify liability	Para 1 sch 41 FA 08	120.5
Failure to make return	Para 1 sch 55 FA 09	120.6
Asset-based penalties	Para 1 sch 22 FA 16	120.7
Requirement to correct (RTC) <sup>2</sup>	Para 1 sch 18 F2A 17	120.8

I also discuss a related topic, publication of defaulters.

Penalties are scattered across about a dozen statutes and statutory instruments, with repetition and near-repetition making a statute-focused discussion more difficult, though no less necessary.

I use the term **“penalty template wording”** to describe provisions (often, definitions) which are the same or substantially the same across the different penalty codes, and where possible I set out such wording once only.

A consolidation might assist - if the current law was judged to be stable. Another feature of the law has been frequent amendment, and statutory

---

1 For the sake of brevity, I abbreviate statutory references as indicated in this table.

2 This penalty is also called Failure to Correct (FTC).

amendments as far back as FA 2015 have yet come into force - if they ever will.

This chapter is a sketch of the “top 7” penalties. Penalties are, I think, more litigated than any other topic. Presumably HMRC’s customers object to paying them. So there is a substantial case law. A full discussion needs a book to itself.

HMRC guidance is in the Compliance Handbook; I do not discuss that here. I do consider some RTC guidance, which I call:

- “**HMRC RTC guidance**”<sup>3</sup>
- “**CIOT RTC guidance**”<sup>4</sup>

## 120.2 Error in taxpayer document

This is the most important of the three sch 24 penalties.

Para 1(1) sch 24 FA 07 provides:

A penalty is payable by a person (P) where—

- (a) P gives HMRC a document of a kind listed in the Table below, and
- (b) Conditions 1 and 2 are satisfied.

When statute refers to “a penalty under para 1”, I gloss that as an “**error in writing**”, though that is not a completely accurate label.

The conditions are:

Condition	Requirement
1	Inaccuracy requirement
2	Culpability requirement

Para 1 sch 24 FA 07 provides:

(2) Condition 1 is that the document contains an inaccuracy which amounts to, or leads to—

- (a) an understatement of a liability to tax,
- (b) a false or inflated statement of a loss, or
- (c) a false or inflated claim to repayment of tax.

<sup>3</sup> <https://www.gov.uk/guidance/requirement-to-correct-tax-due-on-offshore-assets>

<sup>4</sup> CIOT, “Requirement to Correct Offshore Tax Non-Compliance - Practical Notes for CIOT and ATT members” (2018)

<https://www.tax.org.uk/policy-technical/technical-news/requirement-correct-%E2%80%93-practical-notes-ciot-and-att-members>

(3) Condition 2 is that the inaccuracy was careless (within the meaning of paragraph 3) or deliberate on P's part.

### 120.2.1 *Sch 24 Table*

There about 50 items in the Table<sup>5</sup> (“the sch 24 Table”), including IT/CGT/CT returns, IHT Accounts, and concluding with:

Any document which is likely to be relied upon by HMRC to determine, without further inquiry, P's liability to tax...

So most documents provided to HMRC will fall within the sch 24 Table. Para 12(1) sch 24 FA 07 provides one exception:

The final entry in the Table in paragraph 1 excludes a document in respect of which a penalty is payable under section 98 of TMA 1970 (special returns).

I hope to deal with s.98 in a future edition.

### 120.2.2 *Multiple inaccuracies*

Para 1(4) sch 24 FA 07 provides:

Where a document contains more than one inaccuracy, a penalty is payable for each inaccuracy.

## 120.3 Error due to 3<sup>rd</sup> party

Para 1A sch 24 FA 07 provides:

- (1) A penalty is payable by a person (T) where –
- (a) another person (P) gives HMRC a document of a kind listed in the Table in paragraph 1 [the sch 24 Table<sup>6</sup>],
  - (b) the document contains a relevant inaccuracy, and
  - (c) the inaccuracy was attributable
    - [i] to T deliberately supplying false information to P (whether directly or indirectly), or
    - [ii] to T deliberately withholding information from P, with the intention of the document containing the inaccuracy.

---

<sup>5</sup> I follow the statute which generally writes Table with an initial capital (though lower case *t* is used in sch 22 FA 16).

<sup>6</sup> See 120.2.1 (Sch 24 Table).

This penalty only arises if the 3<sup>rd</sup> party (T) acts deliberately: carelessness is not enough.

“Deliberate” is not defined.

Clearly, T acts deliberately if:

- (1) T supplies information which T knows is false; or
- (2) T withholds information which T knows is needed, ie T knows that the consequence of withholding is that P will submit an inaccurate return.

It is considered that recklessness would suffice.<sup>7</sup> T acts deliberately if:

- (1) (a) T supplies information which T knows may be false; or  
(b) T withholds information which T knows may be needed; and
- (2) The risk is an unjustifiable one

The risk is in principle unjustifiable if T intentionally chose not to investigate the position. T does not act deliberately if T takes reasonable care to ensure that information supplied is true/information withheld is not needed; even if T knows it is possible that may be wrong.

In addition, T must have the intention of the document containing the inaccuracy; but if T acts deliberately, that is likely to be the case.

### 120.3.1 *Relevant inaccuracy*

Para 1A(2) sch 24 FA 07 provides a commonsense definition:

A “relevant inaccuracy” is an inaccuracy which amounts to, or leads to –

- (a) an understatement of a liability to tax,
- (b) a false or inflated statement of a loss, or
- (c) a false or inflated claim to repayment of tax.

That is the equivalent to the inaccuracy requirement in para 1 condition 1.

### 120.3.2 *Interaction of para 1/1A*

Para 1A(3) sch 24 FA 07 provides:

A penalty is payable under this paragraph in respect of an inaccuracy whether or not P is liable to a penalty under paragraph 1 in respect of

---

<sup>7</sup> See 115.16.4 (Recklessness).

the same inaccuracy.

For the para 1A penalty, it does not matter that the taxpayer (P) is acting with reasonable care (so that P is not subject to a penalty). Indeed, that will normally be the case, because it is envisaged the third party (T) has supplied false information to P (or T has failed to provide information to P). But it is possible that both T and P are at fault. It may be that P should have noticed that information was wrong, or lacking.

Para 12 sch 24 FA 07 provides:

(4) Where penalties are imposed under paragraphs 1 and 1A in respect of the same inaccuracy, the aggregate of the amounts of the penalties must not exceed the relevant percentage of the potential lost revenue.

(5) The relevant percentage is—

- (za) if the penalty imposed under paragraph 1 is for an inaccuracy in category 0, 100%,<sup>8</sup>
- (a) if the penalty imposed under paragraph 1 is for an inaccuracy in category 1, 125%,
- (b) if the penalty imposed under paragraph 1 is for an inaccuracy in category 2, 150%, and
- (c) if the penalty imposed under paragraph 1 is for an inaccuracy in category 3, 200%.

In tabular format (ignoring category 0, which is supposed to be forthcoming):

Category	Penalty cap
1	125%
2	150%
3	200%

## 120.4 Uncorrected assessment

Para 2(1) sch 24 FA 07 provides:

A penalty is payable by a person (P) where –

- (a) an assessment<sup>9</sup> issued to P by HMRC understates P's liability

<sup>8</sup> There is at present no category 0.

<sup>9</sup> Para 2(4) provides: “In this paragraph (and in Part 2 of this Schedule so far as relating to this paragraph) –  
(a) “assessment” includes determination, and

- to a relevant tax<sup>10</sup> and
- (b) P has failed to take reasonable steps to notify HMRC, within the period of 30 days beginning with the date of the assessment, that it is an under-assessment.

If the taxpayer has made a careless mistake, penalties arise under para 1. So this penalty primarily arises where HMRC have made a mistake: the taxpayer is under a duty to assist HMRC by pointing this out.

What is reasonable cannot sensibly be defined, but the drafter has a go. Para 2(2) sch 24 FA 07 provides:

In deciding what steps (if any) were reasonable HMRC must consider—

- (a) whether P knew, or should have known, about the under-assessment, and
- (b) what steps would have been reasonable to take to notify HMRC.

### 120.5 Failure to notify liability

Para 1 sch 41 FA 08 provides:

A penalty is payable by a person (P) where P fails to comply with an obligation specified in the Table below (a “relevant obligation”).

This Table (“the sch 41 Table”) has 9 items. The items relevant to this work concern the duty to notify liability to IT/CGT/CT:

<b>Tax</b>	<b>Obligation</b>	<b>See para</b>
IT/CGT	s.7 TMA	115.2
CT	Para 2 sch 18 FA 1998	115.22.9

Failure to notify would not fall within para 1 sch 24 (written error), because the taxpayer does not give any document to HMRC.

### 120.6 Failure to make return

Para 1(1) sch 55 FA 09 provides:

A penalty is payable by a person (“P”) where P fails to make or deliver

---

(b) accordingly, references to an under-assessment include an under-determination.”

<sup>10</sup> Para 2(3) provides: In sub-paragraph (1) “relevant tax” means any tax mentioned in the Table in paragraph 1.

a return,<sup>11</sup> or to deliver any other document, specified in the Table below on or before the filing date.<sup>12</sup>

### 120.6.1 *Sch 55 Table*

This Table (“the sch 55 Table”) has 20 items, numbered non-numerically from 1 to 29. The items most relevant to this work are:<sup>13</sup>

No.	Tax	Requirement	Provision	See para
1(a)	IT/CGT	Return	s.8(1)(a) TMA 1970	115.4
(b)		Documents	s.8(1)(b) TMA 1970	115.4
2(a)	IT/CGT	Return	s.8A(1)(a) TMA 1970	115.4
(b)		Documents	s.8A(1)(b) TMA 1970	115.4
2A	CGT	Return	Sch 2 FA 2019 (except para 9, 15)	
3(a)	IT/CT	Return	s.12AA(2)(a), (3)(a) TMA	
(b)		Documents	s.12AA(2)(b), (3)(b) TMA	
4	IT	Return	Reg 67B, 67D PAYE Reg	
7	CT	Return	Para 3 sch 18 FA 1998	
8	IHT	Account	s.216, 217 IHTA	119.5, 119.9

### 120.6.2 *Trustees: Who is P?*

In *Trustees of the Paul Hogarth Life Interest Trust v HMRC*:<sup>14</sup>

Section 8A(1) TMA allows HMRC to issue a notice to any relevant trustee to complete a tax return, and HMRC may issue a notice to each trustee (if more than one) or to any one or more trustees, but only if they are relevant trustees, and the pool of relevant trustees are those people described in s 7(9) who are relevant trustees in relation to the tax year for which the return is required. It follows that the trustee or trustees to whom the notice to file is in fact issued is or are P.

11 Para 1(4) provides commonsense definitions: “(5) In the provisions of this Schedule which follow the Table-

(a) any reference to a return includes a reference to any other document specified in the Table, and

(b) any reference to making a return includes a reference to delivering a return or to delivering any such document.”

12 Para 1(4) provides a commonsense definition: “In this Schedule “filing date” , in relation to a return or other document, means the date by which it is required to be made or delivered to HMRC”.

13 For brevity I have slightly abbreviated the wording of the statute.

14 [2018] UKFTT 595 (TC) at [21].

## 120.7 Asset-based penalty

Para 1(1) Sch 22 FA 16 provides:

An asset-based penalty is payable by a person (P) where—

- (a) one or more standard offshore tax penalties have been imposed on P in relation to a tax year (see paragraphs 2 and 3), and
- (b) the potential lost revenue threshold is met in relation to that tax year (see paragraph 4).

### 120.7.1 “Standard offshore tax penalty”

Para 2(1) Sch 22 FA 16 provides:

A standard offshore tax penalty is a penalty that falls within sub-paragraph (2), (3) (4) or (4A).

Thus there are four categories standard offshore tax penalty:

<b>Category</b>	<b>Para 2 sub-para</b>
Error in writing	(2)
Failure to notify chargeability	(3)
Failure to make return	(4)
RTC	(4A)

It is helpful to read these side by side:

(2) A penalty falls within this sub-paragraph if-	(3) A penalty falls within this sub-paragraph if-	(4) A penalty falls within this sub-paragraph if-	(4A) A penalty falls within this paragraph if-
(a) it is imposed under paragraph 1 of Schedule 24 to FA 07 (inaccuracy in taxpayer's document),	(a) it is imposed under paragraph 1 of Schedule 41 to FA 08 (penalty for failure to notify),	(a) it is imposed under paragraph 6 of Schedule 55 to FA 09 (penalty for failure to make return more than 12 months after filing date),	(a) it is imposed on a person under paragraph 1 of Schedule 18 to F(no.2)A <sup>15</sup> 2017 (requirement to correct relevant offshore tax non-compliance),

---

15 Sch 22 FA 2016 consistently refers to “FA 2017” but the reference should be Finance (no.2) Act 2017, so for clarity I correct this to F(no.2)A 2017.

(b) the inaccuracy for which the penalty is imposed involves an offshore matter or an offshore transfer,	(b) the failure for which the penalty is imposed involves an offshore matter or an offshore transfer,	(b) it is imposed for the withholding of information involving an offshore matter or an offshore transfer,	
(c) it is imposed for deliberate action (whether concealed or not), and	(c) it is imposed for a deliberate failure (whether concealed or not), and	(c) it is imposed for a deliberate withholding of information (whether concealed or not), and	(b) the person was aware at any time during the RTC period that at the end of the 2016-17 tax year P had relevant offshore tax non-compliance to correct, and
(d) the tax at stake is (or includes) capital gains tax, inheritance tax or asset-based income tax.	(d) the tax at stake is (or includes) capital gains tax or asset-based income tax.	(d) the tax at stake is (or includes) capital gains tax, inheritance tax or asset-based income tax.	(c) the tax at stake is (or includes) capital gains tax, inheritance tax or asset-based income tax.

Para 2 sch 22 FA 16 then deals with apportionment:

(5) In a case where the inaccuracy, failure or withholding of information for which a penalty is imposed involves both an offshore matter or an offshore transfer and a domestic matter, the standard offshore tax penalty is only that part of the penalty that involves the offshore matter or offshore transfer.

(5A) Sub-paragraph (5) does not apply to a penalty imposed under paragraph 1 of Schedule 18 to F(no.2)A 2017.

(6) In a case where the tax at stake in relation to a penalty includes a tax other than capital gains tax, inheritance tax or asset-based income tax, the standard offshore tax penalty is only that part of the penalty which relates to capital gains tax, inheritance tax or asset-based income tax.

### 120.7.2 *Asset-based IT*

Para 2(7) sch 22 FA 16 provides:

“Asset-based income tax” means income tax that is charged under any of the provisions mentioned in column 1 of the table in paragraph 13(2).

This Table (“the sch 22 Table”) has 10 items:<sup>16</sup>

<b>ITTOIA Provision: Topic</b>	<b>Asset</b>
<i>Part 3 ITTOIA Chap</i>	
3,7,10: Property business	The estate, interest or right in or over the land that generates the income for the business (see ss 264 to 266 ITTOIA )
8: s.12(4) concern	The estate, interest or right in or over the land that generates the rent receivable in connection with a UK s.12(4) concern (see ss 335, 336 ITTOIA )
<i>Part 4 ITTOIA Chap</i>	
2/2A: Interest	The asset that generates the interest
3 - 5: Dividends etc	The shares or other securities in relation to which the dividend or distribution is paid
7: Purchased life annuity	The annuity that gives rise to the payments
8: Deeply discounted security	The deeply discounted securities that are disposed of (see ss 427 - 430 ITTOIA)
9: Life policies, etc	The policy or contract from which the gain is treated as arising
11: Transaction in deposits	The deposit right which is disposed of (see ss 551, 552 ITTOIA )
<i>Part 5 ITTOIA Chap</i>	
2: Intellectual property	The intellectual property, knowhow or patent rights which generate the income (see ss 579, 583, 587 ITTOIA )
4:Telecommunications	The relevant telecommunication right from which the income derives (see s.614 ITTOIA )
5: Settlor-interested trust	The settlement which gives rise to the income or capital sums treated as income of a settlor

### 120.7.3 Tax year relating to penalty

Para 3 Sch 22 FA 16 provides:

---

16 For clarity I set this out in tabular form and in the first two columns use my own terminology, rather than a precise quote of the statute.

- (1) Where a standard offshore tax penalty is imposed under paragraph 1 of Schedule 24 to FA 07, the tax year to which that penalty relates is-
  - (a) if the tax at stake as a result of the inaccuracy is income tax or capital gains tax, the tax year to which the document containing the inaccuracy relates;
  - (b) if the tax at stake as a result of the inaccuracy is inheritance tax, the year, beginning on 6 April and ending on the following 5 April, in which the liability to tax first arose.
- (2) Where a standard offshore tax penalty is imposed under paragraph 1 of Schedule 41 to FA 08 for a failure to comply with an obligation specified in the table in that paragraph, the tax year to which that penalty relates is the tax year to which the obligation relates.
- (3) Where a standard offshore tax penalty is imposed under paragraph 6 of Schedule 55 to FA 09 for a failure to make a return or deliver a document specified in the table of paragraph 1 of that Schedule, the tax year to which that penalty relates is-
  - (a) if the tax at stake is income tax or capital gains tax, the tax year to which the return or document relates;
  - (b) if the tax at stake is inheritance tax, the year, beginning on 6 April and ending on the following 5 April, in which the liability to tax first arose.
- (4) Where a standard offshore penalty is imposed under paragraph 1 of Schedule 18 to F(no.2)A 2017, the tax year to which that penalty relates is-
  - (a) if the tax at stake in relation to the uncorrected relevant offshore tax non-compliance is income tax or capital gains tax, the tax year or years to which the failure or inaccuracy constituting the relevant offshore tax non-compliance in question relates;
  - (b) if the tax at stake in relation to the uncorrected relevant offshore tax non-compliance is inheritance tax, the year, beginning on 6 April and ending on the following 5 April, in which the liability to tax first arose.
- (5) In sub-paragraph (4) references to uncorrected relevant offshore tax non-compliance are to the relevant offshore tax non-compliance in respect of which the standard offshore penalty is imposed.

#### 120.7.4 *PLR threshold*

Para 4(1) Sch 22 FA 16 provides:

The potential lost revenue threshold is reached where the offshore PLR in relation to a tax year exceeds £25,000.

### 120.7.5 *Multiple asset-based penalties*

Para 6 sch 22 FA 16 provides:

- (1) Sub-paragraphs (2) and (3) apply where-
  - (a) a standard offshore tax penalty (other than one imposed under paragraph 1 of Schedule 18 to F2A 2017) has been imposed on P, and
  - (b) the potential lost revenue threshold is met, in relation to more than one tax year falling within the same investigation period.
- (2) Only one asset-based penalty is payable by P in the investigation period in relation to any given asset.
- (3) The asset-based penalty is to be charged by reference to the tax year in the investigation period with the highest offshore PLR.
- (4) An “investigation period” is-
  - (a) the period starting with the day on which this Schedule comes into force and ending with the last day of the last tax year before P was notified of an asset-based penalty in respect of an asset, and
  - (b) subsequent periods beginning with the day after the previous period ended and ending with the last day of the last tax year before P is notified of a subsequent asset-based penalty in respect of the asset,and different investigation periods may apply in relation to different assets.

### 120.8 RTC penalty

Para 1 sch 18 F2A 17 provides:

- A penalty is payable by a person who-
- (a) has any relevant offshore tax non-compliance to correct at the end of the tax year 2016-17, and
  - (b) fails to correct the relevant offshore tax non-compliance within the period beginning with 6 April 2017 and ending with 30 September 2018 (referred to in this Schedule as “the RTC period”).

The RTC code applies for years up to 2015/16. It does not apply to the

year 2016/17 because at the end of that year (ie at 5 April 2016) there could not yet be anything to correct.

I consider the terms “relevant offshore tax non-compliance” and “failure to correct” separately, later in this chapter.<sup>17</sup>

The RTC code also provided an extended time limit (up to 5 April 2021) for assessments.<sup>18</sup>

While the RTC code is strictly of historical interest only, RTC penalties will continue to occupy practitioners for some years, as non-compliance comes home to roost, so the topic is considered in detail here.

### 120.8.1 2018 reporting deadline

HMRC RTC guidance provides:

30 September 2018 was chosen as the final date for corrections as this is the date by which more than 100 countries will exchange data on financial accounts under the Common Reporting Standard.

HMRC RTC guidance provided a minor extension:

You will not be liable to penalties for failing to correct by 30 September 2018 in the following limited circumstances where information is provided later:

- if by midnight on 30 September 2018 you notify your intention to make a disclosure via HMRC’s Worldwide Disclosure Facility (WDF) ...
- or before 30 September 2018 you email a completed form CDF1 to HMRC ... and inform HMRC that you wish to make a disclosure of deliberate behaviour involving offshore tax non-compliance ...
- HMRC is already undertaking any enquiry or intervention<sup>19</sup> into your affairs and on or before 30 September 2018 you inform the person conducting the enquiry that you wish to make a disclosure of offshore tax non-compliance...<sup>20</sup>

Although the 2018 deadline has passed, and the extended deadline for

---

17 See 120.39 (RTC Definitions).

18 See 115.18 (RTC time limit: 5/4/21).

19 CIOT RTC guidance states this includes COP8 (fraud) investigations.

20 I set out this statement in full in the 2019/20 edition of this work, but abbreviate it here as these details are now becoming less important.

assessment expires on 5 April 2021, penalties will continue to be imposed as pre-2018 omissions come to light, so the law will continue to be important.

## 120.9 Culpability definitions

### 120.9.1 *Significance of culpability*

Culpability is relevant to whether a penalty is due, and to the amount of a penalty if one is due. There are broadly four levels of culpability. In summary:

	Careless	Reasonable excuse	Deliberate not concealed	Deliberate & concealed
Error in document	x		x	x
3 <sup>rd</sup> party error			x	x
Uncorrected assessment	Reasonable steps			
Failure to notify			x	x
Failure to make return		x	x	x
Asset-based penalty			x	
RTC		x		

### 120.9.2 *Careless: Definition*

For the definition of careless, see 115.14 (6 year limit: Carelessness).

Certain inaccuracies are deemed to be careless where the person is subject to a special measures notice.<sup>21</sup> This topic is not discussed here.

### 120.9.3 *Deliberate/concealed: Definition*

The definitions are effectively the same, with minor differences of

---

<sup>21</sup> Para 47 sch 19 FA 16.

wording and clause order:

**Para 3 sch 24 FA 07**

(1) For the purposes of a penalty under paragraph 1, inaccuracy in a document given by P to HMRC is ...

(b) “deliberate but not concealed” if the inaccuracy is deliberate on P’s part but P does not make arrangements to conceal it

(c) “deliberate and concealed” if the inaccuracy is deliberate on P’s part and P makes arrangements to conceal it (for example, by submitting false evidence in support of an inaccurate figure)

**Para 5 sch 41FA 08**

(1) A failure by P to comply with a relevant obligation is- ...

(b) “deliberate but not concealed” if the failure is deliberate but P does not make arrangements to conceal the situation giving rise to the obligation.

(a) “deliberate and concealed” if the failure is deliberate and P makes arrangements to conceal the situation giving rise to the obligation

**Para 27 Sch 55 FA 09**

(2) The withholding of information by P is—...

(b) “deliberate but not concealed” if P deliberately withholds the information but does not make arrangements to conceal the fact that the information has been withheld.

(a) “deliberate and concealed” if P deliberately withholds the information and makes arrangements to conceal the fact that the information has been withheld

See 115.16.3 (“Deliberate” inaccuracy).

## 120.10 Reasonable excuse

### 120.10.1 *Reasonable excuse: Significance*

**Para 23(1) sch 55 FA 09**

**Para 23(1) sch 18 F2A 17**

Liability to a penalty under any paragraph of this Schedule does not arise in relation to a failure to make a return if P satisfies HMRC or (on appeal) the First-tier Tribunal or Upper Tribunal that there is a reasonable excuse for the failure.

Liability to a penalty under paragraph 1 [RTC penalty] does not arise in relation to a particular failure to correct any relevant offshore tax non-compliance within the RTC period if the person concerned (P) satisfies HMRC or the relevant tribunal (as the case may be) that there is a reasonable excuse for the failure.

For RTC, the date of the failure to correct is 30 September 2018, so that is the date on which there must be a reasonable excuse for the failure.

### 120.10.2 *Reasonable excuse: Definition*

Apart from the statutory provisions, there is no difference between reasonable excuse and carelessness, which is also a reasonableness test. Perhaps the term “reasonable excuse” is preferred because it seems wrong to put the onus of proof on the individual to show that they were not careless?

There is no general definition, but certain matters are deemed not to be a reasonable excuse. The exclusions mostly concern matters which would probably not be reasonable excuses in any event, ie they are only for the avoidance of doubt. So they set a standard of reasonableness which can be regarded as a fair one.

### 120.10.3 *Insufficiency of funds*

Para 23(1)(a) sch 55 FA 09/Para 23(2) sch 18 F2A 17 provides:

an insufficiency of funds is not a reasonable excuse, unless attributable to events outside P’s control

### 120.10.4 *Unreasonable reliance*

Para 23(1)(b) sch 55 FA 09/Para 23(2) sch 18 F2A 17 provides:

where P relied on any other person to do anything, that cannot be a reasonable excuse unless P took reasonable care to avoid the failure

That seems obvious and otiose, but it does no harm.

### 120.10.5 Excuse ceases

Para 23(1)(c) sch 55 FA 09/Para 23(2) sch 18 F2A 17 provides:

where P had a reasonable excuse but the excuse has ceased, P is to be treated as continuing to have the excuse if the failure is remedied without unreasonable delay after the excuse ceased

Contrast 115.14.2 (Failure to correct non-careless error).

### 120.11 Disqualified advice codes

The expression “disqualified advice” is relevant to two penalties. I coin the following terminology:

Code (my terminology)	Penalty	Provision
Sch 24 disqualified advice code	Written error	Para 3A, 3B sch 24 FA 07
Sch 18 disqualified advice code	RTC	Para 23(2)(d) sch 18 F2A 17

There are differences in the scope of the rules, and they are best considered as two distinct codes, albeit with substantial overlap. The most important difference is that para 3A sch 24 FA 07 begins:

(1) This paragraph applies where a document of a kind listed in the Table in paragraph 1 is given to HMRC by a person (“P”) and the document contains an inaccuracy which –

- (a) falls within paragraph 1(2) [causes a loss of tax]<sup>22</sup>, and
- (b) arises because the document is submitted on the basis that particular avoidance arrangements (within the meaning of paragraph 3B) had an effect which in fact they did not have.

So:

- (1) The sch 24 disqualified advice code only applies when there are (unsuccessful) Avoidance Arrangements.
- (2) The sch 18 code does not have the equivalent provision. As will be seen, *parts* of the sch 18 disqualified advice code apply only in the case of Avoidance Arrangements; but other parts apply even in the absence of Avoidance Arrangements. Of course, the sch 18 code only

---

<sup>22</sup> See 120.2 (Error in taxpayer document). Disqualified advice is not relevant in relation to the penalties in para 1A and 2 (3<sup>rd</sup> party errors and uncorrected assessments).

applies if there is offshore tax non-compliance, but that need not involve Avoidance Arrangements.

### 120.11.1 *Avoidance Arrangements*

The definitions are essentially the same in both codes:

#### **Para 3B sch 24 FA 07**

(1) In paragraph 3A “avoidance arrangements” means, subject to sub-paragraph (3), arrangements which fall within sub-paragraph (2).

(2) Arrangements<sup>23</sup> fall within this sub-paragraph if, having regard to all the circumstances, it would be reasonable to conclude that the obtaining of a tax advantage was the main purpose, or one of the main purposes, of the arrangements.

#### **Para 23(6) sch 18 F2A 17**

In this paragraph “avoidance arrangements” means arrangements as respects which, in all the circumstances, it would be reasonable to conclude that their main purpose, or one of their main purposes, is the obtaining of a tax advantage.

Para 3B(10) sch 24 FA 07/Para 23(9) sch 18 F2A 17 provide something close to the GAAR definition of tax advantage.<sup>24</sup>

The terminology (“avoidance arrangements”) is tendentious because the arrangements need not constitute avoidance in the normal sense of the word. I write Avoidance Arrangements with initial capitals to reflect the technical nature of the expression. But the concept is a familiar one.<sup>25</sup>

### 120.11.2 *Established practice*

#### **Para 3B(3) sch 24 FA 07**

#### **Para 23(7) sch 18 F2A 17**

---

23 Para 3A(9) sch 24 FA 07/Para 23(9) sch 18 F2A 17 provide the standard (unnecessary) IT definition: see [App 2.2.3](#) (Definitions of “arrangement”).

24 See 2.12.1 (Tax advantage: Definitions). For completeness, the term is extended to include:

(g) in relation to VAT, anything which is a tax advantage for the purposes of Schedule 18 to FA 16 under paragraph 5 of that Schedule.

VAT is not discussed here.

25 See 2.12 (“Tax advantage”).

Arrangements are not avoidance arrangements for the purposes of paragraph 3A if (although they fall within sub-paragraph (2))—

But arrangements are not avoidance arrangements for the purposes of this paragraph if (although they fall within sub-paragraph (6))-

(a) they are arrangements which accord with established practice, and

[Identical]

(b) HMRC had, at the time the arrangements were entered into, indicated its acceptance of that practice.

[Identical]

I refer to this as the “**established practice defence**”.

HMRC RTC guidance provides:

There will be cases where HMRC have agreed the correct treatment for an issue (for example during the course of an enquiry, via a ruling or through discussion with a CRM).

Provided there has been no material change to the relevant facts or legislation and that all relevant information requested at the time was provided, HMRC will accept that any returns subsequently submitted in line with the agreed treatment were made in accordance with established practice and the arrangements concerned will not be considered avoidance arrangements for the purposes of the RTC. This is in line with the acceptance of established practice in relation to advice from an interested person.

### 120.11.3 *Avoidance arrangements: Significance*

The rule is in para 3A(2) but it needs to be read with para (1) to follow the sense:

(1) This paragraph applies where a document of a kind listed in the Table in paragraph 1 is given to HMRC by a person (“P”) and the document contains an inaccuracy which –

- (a) falls within paragraph 1(2) [causes a loss of tax]<sup>26</sup>, and
- (b) arises because the document is submitted on the basis that particular avoidance arrangements (within the meaning of

---

<sup>26</sup> See 120.2 (Error in taxpayer document). Disqualified advice is not relevant in relation to the penalties in para 1A and 2 (3<sup>rd</sup> party errors and uncorrected assessments).

- paragraph 3B) had an effect which in fact they did not have.
- (2) It is to be presumed that the inaccuracy was careless, within the meaning of paragraph 3, unless –
- (a) the inaccuracy was deliberate on P’s part, or
  - (b) P satisfies HMRC or (on an appeal notified to the tribunal<sup>27</sup>) the tribunal that P took reasonable care to avoid inaccuracy.

One consequence of Avoidance Arrangements for the sch 24 code is that the onus of proof on carelessness/reasonable care is on P. This is distinct from the disqualified advice rules considered separately below: this rule applies even if there is no disqualified advice.

There is no equivalent rule in the sch 18 code, as the onus of proof is already on the taxpayer.

## 120.12 Disqualified advice

### 120.12.1 *Why disqualified advice matters*

#### **Para 3A(3) sch 24 FA 07**

In considering whether P took reasonable care to avoid inaccuracy, HMRC and (on an appeal notified to the tribunal) the tribunal must take no account of any evidence of any reliance by P on advice where the advice is disqualified.

#### **Para 23(2)(d) sch 18 F2A 17**

reliance on advice is to be taken automatically not to be a reasonable excuse if it is disqualified under sub-paragraph (3).

The rules appear to be the same: In short, disqualified advice is ignored in determining carelessness/reasonable excuse, so a taxpayer who in fact took reasonable care (relying on advisers) will be deemed careless/not have a reasonable excuse. But as noted above, the sch 24 rule only applies where there are Avoidance Arrangements.

I refer to advice that is not disqualified as “**independent advice**”.

Advisers need to consider whether their advice is disqualified, within the scope of these rules, and if it is, they should advise the client to take independent advice.

### 120.12.2 *Disqualified advice: Definition*

---

<sup>27</sup> “The tribunal” has the same meaning as in paragraph 17 (see paragraph 17(5A)).

**Para 3A(4) sch 24 FA 07**

Advice is “disqualified” if any of the following applies ... but this is subject to sub-paragraphs (5) and (7).

**Para 23(3) sch 18 F2A 17**

Advice is disqualified (subject to sub-paragraph (4)) if-

There are five categories of disqualified advice.

**120.13 Interested person**

Para 3A(3)(a) sch 24 FA 07/Para 23(3)(a) sch 18 F2A 17 provides advice is disqualified if:

- (a) the advice was given to P by an interested person

It is necessary to identify the person who gives the advice. HMRC RTC guidance provides:

HMRC’s view is that when considering who the interested person is, person includes a body of persons both corporate or unincorporate. It therefore follows that the interested person might be an individual, or an organisation such as a limited company, firm of accountants or a limited liability partnership.

In fact a firm (ie a partnership) is not a person, but para (a) and (b) are wide enough that the point is not likely to arise.

**120.13.1 “Interested person”**

“Interested person” matters because their advice is disqualified. The basic definitions are effectively identical:

**Para 3A(6) sch 24 FA 07**

In sub-paragraph (4) “an interested person” means –

**Para 23(5) sch 18 F2A 17**

In sub-paragraph (3) “an interested person” means, in relation to any relevant offshore tax non-compliance-

(a) a person, other than P, who participated in the avoidance arrangements or any transaction forming part of them, or  
 (b) a person who for any consideration (whether or not in money) facilitated P's entering into the avoidance arrangements.

(a) a person (other than P) who participated in relevant avoidance arrangements<sup>28</sup> or any transaction forming part of them, or  
 (b) a person who for any consideration (whether or not in money) facilitated P's entering into relevant avoidance arrangements.

The object is to prevent an adviser marking their own homework; and what amounts to "facilitating" should be understood in that context.

Para 3A(7) sch 24 FA 07 provides an exception:

Where (but for this sub-paragraph) advice would be disqualified under paragraph (a) of sub-paragraph (4) [advice by disqualified person] because it was given by a person within sub-paragraph (6)(b) [a person who facilitates the arrangements], the advice is not disqualified under that paragraph if –

- (a) the person giving the advice had appropriate expertise for giving it,
- (b) the advice took account of P's individual circumstances, and
- (c) at the time when the question whether the advice is disqualified arises–
  - (i) Condition E in paragraph 3B(5) is met in relation to the avoidance arrangements [avoidance related rule], but
  - (ii) none of Conditions A to D in paragraph 3B(5) is or has at any time been met in relation to them.

I find this rather strange. Perhaps HMRC thought so too, because it has no RTC counterpart.

### 120.13.2 *Scope of disqualification*

Advice by an interested person which does not relate to Avoidance Arrangements is not disqualified.

---

28 Para 23(8) sch 18 F2A 17 provides: "Where any relevant offshore tax non-compliance arose originally because information was submitted to HMRC on the basis that particular avoidance arrangements had an effect which they did not have, those avoidance arrangements are "relevant avoidance arrangements" in relation to that tax non-compliance."

CIOT RTC guidance provides:

The adviser is only disqualified as respects the advice they gave on the tax avoidance. But their advice can be relied on in relation to other matters, e.g. whether the taxpayer's behaviour was deliberate or careless, e.g. if the adviser helps the person disclose and that disclosure is on the basis that 4 years' tax was due (reasonable care) then this is not disqualified advice if it later turns out that the person was careless, so 6 years' tax is due.

HMRC RTC guidance provides an example relating to domicile advice:

**Example 9: advice not related to avoidance arrangements (not disqualified) (Ian ("N"))**

N was unsure as to his correct domicile status and sought advice from a large firm of accountants. The firm thoroughly reviewed his circumstances and advised that in their view he was not domiciled in the UK for tax purposes.

The firm then advised N on how to structure his affairs to pay less tax on his foreign income. N did not make a correction under the RTC because he believed, based on the advice he had received, that he had no correction to make.

Some years later HMRC challenged N's domicile status and after a lengthy enquiry established that he was actually domiciled in the UK. Because of this N owed tax in relation to his offshore income for tax years 2013 to 2014, 2014 to 2015 and 2015 to 2016. N should have made a correction under the RTC.

N claimed that he had a reasonable excuse because he had taken and followed appropriate advice and claimed that the incorrect advice is not disqualified. The incorrect advice related to his domicile status.

The advice was given by someone with the appropriate expertise, took account of all of his relevant circumstances and did not relate to avoidance arrangements. The advice was not therefore disqualified and N did have a reasonable excuse.

It is important that the inaccurate advice related to N's domicile status but that the domicile status did not involve avoidance arrangements facilitated by the advisor. N did not take any steps to alter his domicile status based on the advice.

In these circumstances his domicile status does not fall within the definition of avoidance arrangements. Although the subsequent steps do fall within the definition of avoidance arrangements, the advice

relating to the avoidance arrangements was correct.

CIOT RTC guidance provides:

Example 9 in the updated RTC guidance is correct only if the taxpayer gave the adviser all correct and complete relevant information to use when providing the advice on his domicile status. If this did not happen then there is no reasonable excuse

Bearing in mind that there is no limit to evidence which may be relevant to domicile, this requirement is impossible to satisfy, if it is applied strictly. Though there is always the defence in 120.18 (Advice not thought disqualified).

### **120.14 Arrangement with interested person**

Para 3A(3)(b) sch 24 FA 07/Para 23(3)(b) sch 18 F2A 17 provides advice is disqualified if:

- (b) the advice was given to P as a result of arrangements made between an interested person and the person who gave the advice

HMRC RTC guidance provides:

- [1] HMRC accepts that if a person gives all of the advice after all of the avoidance arrangements have taken place that advice cannot relate to the facilitation of those avoidance arrangements and will not be disqualified on the grounds of it being from an interested person (as long as the adviser did not participate in the relevant avoidance arrangements).
- [2] HMRC will also not seek to argue that the new advice is disqualified because it is as a result of arrangements made between an interested person and the person who gave the advice.

Point [1] is self-evident, but point [2] is important.

### **120.15 Appropriate expertise**

Para 3A(3)(c) sch 24 FA 07/Para 23(3)(c) sch 18 F2A 17 provides advice is disqualified if:

- (c) the person who gave the advice did not have appropriate expertise for giving the advice,

HMRC RTC guidance provides:

Whether a person has the appropriate expertise to give advice will vary depending on the precise circumstances involved.

HMRC will accept that anyone who is a member of a UK-recognised legal, accountancy or tax advisory body will have the appropriate expertise to give advice on UK tax matters.

This seems generous, as CIOT note in the CIOT RTC guidance:

However, if it questionable whether the member genuinely has the appropriate expertise on the area of tax concerned or if the client knows he lacks the expertise, HMRC's guidance may not offer protection.

But the individual may reasonably expect a competent and qualified adviser to know whether he has the expertise, and to refuse to act if not; and so the individual should in principle be protected; see 120.18 (Advice not thought disqualified).

## 120.16 All relevant circumstances

Advice is disqualified if:

### Para 3A sch 24 FA 07

(d) the advice took no account of P's individual circumstances;

### Para 23 sch 18 F2A 17

(d) the advice failed to take account of all P's individual circumstances (so far as relevant to the matters to which the advice relates)

The RTC wording seems to have a more stringent nuance, but it comes to the same thing.

RTC advice continues:

Advice needs to take account of all of the taxpayer's relevant circumstances

You can only claim that you have a reasonable excuse for not making a correction because you relied on advice if the advice that you are relying on takes account of all your relevant individual circumstances. This means that the adviser must have been given full and accurate details of all matters that are relevant to the issue.

Care should be taken if you have relied on advice that was given before

the transactions took place. Such advice runs the risk of failing to take account of all of your relevant circumstances.

If you rely on advice that was given before the transactions took place and the transactions then took place in a slightly different way and that slight difference means tax is due, it will be HMRC's position that the advice failed to take account of all of your relevant circumstances. This will particularly be the case if you have failed to correctly follow the advice.

Whether advice takes account of all your relevant individual circumstances is a continuing requirement. For example, if advice that takes account of all your circumstances was taken in 2011, it is reasonable for you to be able to rely on that advice when completing your next tax return.

However, as time passes it is increasingly likely that your circumstances, or the legislation that the advice is based on, will have changed and the advice may no longer be correct.

If you rely on advice that, whilst originally accurate, becomes wrong because of a change in your circumstances or a change in the legislation you cannot claim to have a reasonable excuse based on the advice that has become out of date.

For this reason, if you are relying on old advice, you should check your position carefully before deciding whether or not a correction is needed.

CIOT RTC guidance provides:

Even one unknown or ignored fact therefore may disqualify the advice or otherwise mean that the taxpayer will not be deemed to have a reasonable excuse for failing to correct (unless the taxpayer provided all the information/documentation that the adviser requested and did not know that the other piece of information was needed/relevant)

CIOT RTC guidance provides:

Fresh advice is difficult to rely on in any case where there is a risk that facts could come to light later of which account should have been taken.

This means that nil liability disclosures will normally need to be used as a route to providing certainty for taxpayers.

### 120.16.1 *Old advice*

HMRC RTC guidance provides:

**Example 13: disqualified advice: failure to take account of all circumstances (Larry)**

L is not domiciled in the UK and took advice from an accountant in 2006 about what tax he should pay on his foreign income. He was correctly advised on how to structure his affairs and what income to declare if he did this.

L followed this advice and completed his return for tax year 2006 to 2007 and subsequent years accordingly but never took any further advice.

Because of changes to the rules on tax payable by people who are not domiciled in the UK, all of L's returns since tax year 2008 to 2009 have been incorrect. L was unaware of the changes, and did not make a correction under the RTC.

In 2019 HMRC opened an enquiry and established the correct position. L has not acted deliberately but cannot be said to have taken reasonable care in relation to his returns submitted some years after the advice was taken.

His failure to take further advice means he has been careless and should have corrected his non-compliance for the tax years 2011 to 2012 through to 2016 to 2017. L cannot claim to have a reasonable excuse as the advice that he relied on failed to take account of all of his relevant circumstances.

L should not have completed his own returns. He should have instructed accountants to do this for him. The experience of Belloc's Lord Finchley comes to mind. But perhaps this does not often happen.

CIOT RTC guidance provides:

Historic advice may be difficult to rely on as a reasonable excuse because

- (1) Risk facts may come to light which are relevant circumstances of which account was not taken
- (2) Uncertainty over whether what the advice related to does or does not fall within the definition of avoidance
- (3) Law may have changed as a result of subsequent decided cases

HMRC consider that a change in law or practice since the advice was given is a relevant circumstance and thus invalidates the advice or the reasonable excuse

### 120.16.2 *Second opinion*

HMRC give some advice on how to obtain advice:

If the advice you intend to rely on is disqualified as it was given by an interested person, or someone who has made arrangements with the interested person, you should consider either disclosing the matter to HMRC so it has been corrected and no FTC [failure to correct] penalty could be due, or taking further advice from a person who did not participate in, and was not involved in facilitating, the avoidance arrangements.

In particular, taxpayers with more complex structures including those where the purported tax advantages are reliant on commerciality or the interpretation of complicated anti avoidance provisions are encouraged to consider seeking specialist tax advice from someone not involved in the original arrangements. This will enable them to identify the potential risks associated with a structure to identify whether there is an obligation to correct. By taking these steps, a taxpayer may well assist any future reasonable excuse claim should a challenge by HMRC be forthcoming.

#### *Further advice from the same adviser*

The legislation makes it clear that advice given to the taxpayer as a result of arrangements made between an interested person and the person who gave the advice is disqualified.

You should therefore take care when seeking further advice to ensure it is not disqualified on this basis.

### 120.17 **Receiver of advice**

Para 3A sch 24 FA 07/Para 23 sch 18 F2A 17 provides advice is disqualified if:

- (e) the advice was addressed to, or was given to, a person other than P.

I do not think there is any meaningful difference between addressed to and given to; in the discussion below I refer to “given” and leave “addressed” to be understood.

It is necessary to identify the person to whom advice is given. In formal written advice this should be stated expressly.

CIOT RTC advice notes:

Trustees cannot therefore rely on advice given to the settlor or beneficiaries.

And vice versa. But an adviser can advise both trustees and settlor/beneficiaries at the same time.

## 120.18 Advice not known disqualified

### Para 3A(5) FA 07

Where (but for this sub-paragraph) advice would be disqualified under any of paragraphs (a) to (c) of sub-paragraph (4), the advice is not disqualified under that paragraph if at the relevant time<sup>29</sup> P –

(a) has taken reasonable steps to find out whether or not the advice falls within that paragraph, and  
(b) reasonably believes that it does not.

### Para 23(5) sch 18 F2A 17

Where advice would otherwise be disqualified under any of paragraphs (a) to (d) of sub-paragraph (3) the advice is not disqualified if at the end of the RTC period P-

[Identical]

This defence does not apply:

- (1) for the sch 24 code only: to disqualification (d) (advice took no account of P's individual circumstances)
- (2) to disqualification (e) (advice addressed to P).

I wonder if that is just a drafting error.

## 120.19 Disqualified advice: PRs

Para 3A(8) sch 24 FA 07 provides:

If the document mentioned in sub-paragraph (1) is given to HMRC by P as a personal representative of a deceased person ("D")–

(a) sub-paragraph (4) is to be read as if–

---

<sup>29</sup> Para 3A(9) provides: In this paragraph ... "the relevant time" means the time when the document mentioned in sub-paragraph (1) is given to HMRC".

- (i) the references in paragraphs (a) and (b) to P were to P or D;
- (ii) the reference in paragraph (d) to P were to D, and
- (iii) the reference in paragraph (e) to a person other than P were to a person who is neither P nor D,
- (b) sub-paragraph (6) is to be read as if–
  - (i) the reference in paragraph (a) to P were a reference to the person to whom the advice was given, and
  - (ii) the reference in paragraph (b) to P were to D (or, where P also participated in the avoidance arrangements, P or D), and
- (c) sub-paragraph (7) is to be read as if the reference in paragraph (b) to P were to D.

Amended as para 3A(8) directs, para 3A sch 24(4)(6)(7) FA 07 provide:

- (4) Advice is “disqualified” if any of the following applies –
- (a) the advice was given to P or D by an interested person;
  - (b) the advice was given to P or D as a result of arrangements made between an interested person and the person who gave the advice;
  - (c) the person who gave the advice did not have appropriate expertise for giving the advice;
  - (d) the advice took no account of P’s individual circumstances;
  - (e) the advice was addressed to, or given to, a person ~~other than P~~ who is neither P nor D;

but this is subject to sub-paragraphs (5) and (7).

...

- (6) In sub-paragraph (4) “an interested person” means –
- (a) a person, other than ~~P~~ the person to whom the advice was given, who participated in the avoidance arrangements or any transaction forming part of them, or
  - (b) a person who for any consideration (whether or not in money) facilitated ~~P’s~~ D’s (or, where P also participated in the avoidance arrangements, P’s or D’s) entering into the avoidance arrangements.
- (7) Where (but for this sub-paragraph) advice would be disqualified under paragraph (a) of sub-paragraph (4) [advice by disqualified person] because it was given by a person within sub-paragraph (6)(b) [a person who facilitates the arrangements], the advice is not disqualified under that paragraph if –
- (a) the person giving the advice had appropriate expertise for giving it,
  - (b) the advice took account of ~~P’s~~ D’s individual circumstances, and
  - (c) at the time when the question whether the advice is disqualified arises–
    - (i) Condition E in paragraph 3B(5) is met in relation to the avoidance arrangements [avoidance related rule], but

- (ii) none of Conditions A to D in paragraph 3B(5) is or has at any time been met in relation to them.

## 120.20 Egregious arrangements

Para 3B sch 24 FA 07 provides:

- (4) If, at any time, any of Conditions A to E is met in relation to particular arrangements—

I refer to this as “**egregious arrangements**”. In such cases:

- (a) for the purposes of this Schedule the arrangements are to be taken to fall within (and always to have fallen within) sub-paragraph (2)

That is, egregious arrangements are taken to be Avoidance Arrangements.

- (b) in relation to the arrangements, sub-paragraph (3) (and the reference to it in sub-paragraph (1)) are to be treated as omitted.

That is, the established practice defence does not apply. Para 3B(4) concludes:

This does not prevent arrangements from falling within sub-paragraph (2) other than by reason of one or more of Conditions A to E being met.

### 120.20.1 *Cond. A: DOTAS applies*

Para 3B sch 24 FA 07 provides:

- (5) Conditions A to E are as follows—
  - (a) Condition A is that the arrangements are DOTAS arrangements within the meaning given by section 219(5) and (6) of FA 2014;

That takes us to s.219 FA 2014:

- (5) “DOTAS arrangements” means—
  - (a) notifiable arrangements to which HMRC has allocated a reference number under section 311 of FA 2004,
  - (b) notifiable arrangements implementing a notifiable proposal where HMRC has allocated a reference number under that section to the proposed notifiable arrangements, or
  - (c) arrangements in respect of which the promoter must provide prescribed information under section 312(2) of that Act by

reason of the arrangements being substantially the same as notifiable arrangements within paragraph (a) or (b).

(6) But the notifiable arrangements within subsection (5) do not include arrangements in relation to which HMRC has given notice under section 312(6) of FA 2004 (notice that promoters not under duty imposed to notify client of reference number).

Condition B relates to VAT and indirect tax, and is not discussed here.

### 120.20.2 Condition C: GAAR applies

Para 3B(5) sch 24 FA 07 provides:

- (c) Condition C is that both of the following apply—
  - (i) P has been given a notice under a provision mentioned in sub-paragraph (6) stating that a tax advantage arising from the arrangements is to be counteracted, and
  - (ii) that tax advantage has been counteracted under section 209 of FA 2013;
- (6) The provisions referred to in sub-paragraph (5)(c)(i) are—
  - (a) paragraph 12 of Schedule 43 to FA 2013 (general anti-abuse rule: notice of final decision);
  - (b) paragraph 8 or 9 of Schedule 43A to that Act (pooled or bound arrangements: notice of final decision);
  - (c) paragraph 8 of Schedule 43B to that Act (generic referrals: notice of final decision).

### 120.20.3 Cond D: Follower notice

Para 3B(5) sch 24 FA 07 provides:

- (d) Condition D is that a follower notice<sup>30</sup> under section 204 of FA 2014 has been given to P by reference to the arrangements (and not withdrawn) and—

---

30 Para 3B(7) provides: “In sub-paragraph (5)(d) the reference to giving a follower notice to P includes giving a partnership follower notice in respect of a partnership return in relation to which P is a relevant partner; and for the purposes of this sub-paragraph—

- (a) “relevant partner” has the meaning given by paragraph 2(5) of Schedule 31 to FA 2014;
- (b) a partnership follower notice is given “in respect of” the partnership return mentioned in paragraph 2(2)(a) or (b) of that Schedule.”

- (i) the necessary corrective action for the purposes of section 208 of FA 2014 has been taken in respect of the denied advantage, or
- (ii) the denied advantage has been counteracted otherwise than as mentioned in sub-paragraph (i);

Para 3B sch 24 FA 07 provides:

(8) For the purposes of sub-paragraph (5)(d) it does not matter whether the denied advantage has been dealt with—

- (a) wholly as mentioned in one or other of sub-paragraphs (i) and (ii) of sub-paragraph (5)(d), or
- (b) partly as mentioned in one of those sub-paragraphs and partly as mentioned in the other;

and “the denied advantage” has the same meaning as in Chapter 2 of Part 4 of FA 2014 (see section 208(3) of and paragraph 4(3) of Schedule 31 to that Act).

#### 120.20.4 *Cond. E: Avoidance-related rule*

Para 3B(5) sch 24 FA 07 provides:

- (e) Condition E is that a tax advantage asserted<sup>31</sup> by reference to the arrangements has been counteracted (by an assessment, an amendment of a return or claim, or otherwise) on the basis that an avoidance-related rule applies in relation to P’s affairs.

Para 3B(10) sch 24 FA 07 provides:

In this paragraph—

“avoidance-related rule” has the same meaning as in Part 4 of Schedule 18 to FA 16 (see paragraph 25 of that Schedule)

So we turn to para 25 sch 18 FA 16:

- (1) In this Part of this Schedule “avoidance-related rule” means a rule in Category 1 or 2.
- (2) A rule is in Category 1 if it refers (in whatever terms)—
  - (a) to the purpose or main purpose or purposes of a transaction, arrangements or any other action or matter, and

---

31 Para 3B(9) provides: “For the purposes of sub-paragraph (5)(e) a has been “asserted by reference to” the arrangements if a return, claim or appeal has been made by P on the basis that the results from the arrangements.”

- (b) to whether or not the purpose in question is or involves the avoidance of tax or the obtaining of any advantage in relation to tax (however described).
- (3) A rule is also in Category 1 if it refers (in whatever terms) to—
  - (a) expectations as to what are, or may be, the expected benefits of a transaction, arrangements or any other action or matter, and
  - (b) whether or not the avoidance of tax or the obtaining of any advantage in relation to tax (however described) is such a benefit.

For the purposes of paragraph (b) it does not matter whether the reference is (for instance) to the “sole or main benefit” or “one of the main benefits” or any other reference to a benefit.

(4) A rule falls within Category 2 if as a result of the rule a person may be treated differently for tax purposes depending on whether or not purposes referred to in the rule (for instance the purposes of an actual or contemplated action or enterprise) are (or are shown to be) commercial purposes.

(5) For example, a rule in the following form would fall within Category 1 and within Category 2—

**“Example rule**

Section X does not apply to a company in respect of a transaction if the company shows that the transaction meets Condition A or B. Condition A is that the transaction is effected—

- (a) for genuine commercial reasons, or
- (b) in the ordinary course of managing investments.”

**120.21 Amount of penalty**

120.21.1 *Navigation*

<b>Type of penalty</b>	<b>Amount specified in</b>	<b>See para.</b>
<i>Error-based penalties</i>	<i>Sch 24 FA 07</i>	
Error in writing	Para 4	120.21.2
Error due to 3 <sup>rd</sup> party	Para 4B	120.21.3
Uncorrected assessment	Para 4C	120.21.3
<i>Failures of omission</i>		
Failure to notify chargeability	Para 6(1) sch 41 FA 08	120.21.4
Failure to make return	Paras 3-6 sch 55 FA 09	120.21.5
Asset-based penalties	Para 7 sch 22 FA 16	120.21.10
Requirement to correct	Para 14(1) sch 18 F2A 17	120.21.11

120.21.2 *Amount: Error in writing*

Para 4 sch 24 FA 07 provides:

(1) This paragraph sets out the penalty payable under paragraph 1 [error in writing].

(2) If the inaccuracy is in category 1, the penalty is—

(a) for careless action, 30% of the potential lost revenue,

(b) for deliberate but not concealed action, 70% of the potential lost revenue, and

(c) for deliberate and concealed action, 100% of the potential lost revenue.

(3) If the inaccuracy is in category 2, the penalty is—

(a) for careless action, 45% of the potential lost revenue,

(b) for deliberate but not concealed action, 105% of the potential lost revenue, and

(c) for deliberate and concealed action, 150% of the potential lost revenue.

(4) If the inaccuracy is in category 3, the penalty is—

(a) for careless action, 60% of the potential lost revenue,

(b) for deliberate but not concealed action, 140% of the potential lost revenue, and

(c) for deliberate and concealed action, 200% of the potential lost revenue.

In tabular form:

Category	Careless	Deliberate not concealed	Deliberate & concealed
1	30%	70%	100%
2	45%	105%	150%
3	60%	140%	200%

### 120.21.3 *3<sup>rd</sup> party error/uncorrected assessment*

Sch 24 FA 07 provides:

4B The penalty payable under paragraph 1A [error due to 3<sup>rd</sup> party] is 100% of the potential lost revenue.

4C The penalty payable under paragraph 2 [uncorrected assessment] is 30% of the potential lost revenue.

### 120.21.4 *Amount: Failure to notify*

Para 6(1) sch 41 FA 08 provides:

This paragraph sets out the penalty payable under paragraph 1 [failure to notify chargeability].

**Para 6(2): category 1    Para 6(3): category 2    Para 6(4): category 4**

- |  |   |   |
|--|---|---|
| <p>(2) If the failure is in category 1, the penalty is-</p> <p>(a) for a deliberate and concealed failure, 100% of the potential lost revenue,</p> <p>(b) for a deliberate but not concealed failure, 70% of the potential lost revenue, and</p> <p>(c) for any other case, 30% of the potential lost revenue.</p> | <p>(3) If the failure is in category 2, the penalty is-</p> <p>(a) for a deliberate and concealed failure, 150% of the potential lost revenue,</p> <p>(b) for a deliberate but not concealed failure, 105% of the potential lost revenue, and</p> <p>(c) for any other case, 45% of the potential lost revenue.</p> | <p>(4) If the failure is in category 3, the penalty is-</p> <p>(a) for a deliberate and concealed failure, 200% of the potential lost revenue,</p> <p>(b) for a deliberate but not concealed failure, 140% of the potential lost revenue, and</p> <p>(c) for any other case, 60% of the potential lost revenue.</p> |
|--|---|---|

This is the same as error-based penalties, though (for no obvious reason) set out in a different order. In tabular form:

<b>Category</b>	<b>Careless</b>	<b>Deliberate not concealed</b>	<b>Deliberate &amp; concealed</b>
1	30%	70%	100%
2	45%	105%	150%
3	60%	140%	200%

120.21.5 *Amount: Failure to make return*

For IT/CGT/CT it makes sense that the penalties are less, because the taxpayer is by definition on the HMRC radar: a duty to make a return arises when HMRC have given the necessary notice. So the failure, unless very extended, is only administrative and the purpose is mainly to chivy compliance. But for failure to deliver an IHT Account, that is not the case and the rule is perhaps slightly generous.

Para 1 sch 55 FA 09 provides:

- (3) If P's failure falls within more than one paragraph of this Schedule, P is liable to a penalty under each of those paragraphs (but this is subject to paragraph 17(3)).

Sch 55 FA 09 provides:

- 2 Paragraphs 3 to 6 apply in the case of a return falling within any of items 1 to 3, 5 and 7 to 13 in the Table.

That list includes the IT/CT/IHT returns which concern the main themes of this book.<sup>32</sup>

#### 120.21.6 *Delay up to 3 months*

Para 3 sch 55 FA 09 provides:

3 P is liable to a penalty under this paragraph of £100.

#### 120.21.7 *Delay after 3 months*

Para 4 sch 55 FA 09 provides:

- 4 (1) P is liable to a penalty under this paragraph if (and only if)-
- (a) P's failure continues after the end of the period of 3 months beginning with the penalty date,
  - (b) HMRC decide that such a penalty should be payable, and
  - (c) HMRC give notice to P specifying the date from which the penalty is payable.
- (2) The penalty under this paragraph is £10 for each day that the failure continues during the period of 90 days beginning with the date specified in the notice given under sub-paragraph (1)(c).
- (3) The date specified in the notice under sub-paragraph (1)(c)-
- (a) may be earlier than the date on which the notice is given, but
  - (b) may not be earlier than the end of the period mentioned in sub-paragraph (1)(a).

#### 120.21.8 *Delay after 6 months*

Now we are getting more serious. Para 5 sch 55 FA 09 provides:

- 5 (1) P is liable to a penalty under this paragraph if (and only if) P's failure continues after the end of the period of 6 months beginning with the penalty date.
- (2) The penalty under this paragraph is the greater of-
- (a) 5% of any liability to tax which would have been shown in the return in question, and
  - (b) £300.

#### 120.21.9 *Delay after 12 months*

Para 6 sch 55 FA 09 provides:

---

<sup>32</sup> See 120.6.1 (Sch 55 Table).

(1) P is liable to a penalty under this paragraph if (and only if) P's failure continues after the end of the period of 12 months beginning with the penalty date.

(2) Where, by failing to make the return, P deliberately withholds information which would enable or assist HMRC to assess P's liability to tax, the penalty under this paragraph is determined in accordance with sub-paragraphs (3) and (4).

(3) If the withholding of the information is deliberate and concealed, the penalty is the greater of-

- (a) the relevant percentage of any liability to tax which would have been shown in the return in question, and
- (b) £300.

(3A) For the purposes of sub-paragraph (3)(a), the relevant percentage is-

- (a) for the withholding of category 1 information, 100%,
- (b) for the withholding of category 2 information, 150%, and
- (c) for the withholding of category 3 information, 200%.

(4) If the withholding of the information is deliberate but not concealed, the penalty is the greater of-

- (a) the relevant percentage of any liability to tax which would have been shown in the return in question, and
- (b) £300.

(4A) For the purposes of sub-paragraph (4)(a), the relevant percentage is-

- (a) for the withholding of category 1 information, 70%,
- (b) for the withholding of category 2 information, 105%, and
- (c) for the withholding of category 3 information, 140%.

(5) In any case not falling within sub-paragraph (2), the penalty under this paragraph is the greater of-

- (a) 5% of any liability to tax which would have been shown in the return in question, and
- (b) £300.

In summary tabular form:

Category	Not deliberate	Deliberate not concealed	Deliberate & concealed
1	5%	70%	100%
2	5%	105%	150%
3	5%	140%	200%

120.21.10 Amount: Asset-based penalty

Para 7 sch 22 FA 16 provides:

- (1) The standard amount of the asset-based penalty is the lower of-
- (a) 10% of the value of the asset, and
  - (b) offshore PLR  $\times$  10.

I do not discuss the rules for valuation and identification of assets, in part 10-14 sch 22 FA 16, though I hope to do so in a future edition.

#### 120.21.11 *Amount: RTC penalty*

Para 14(1) sch 18 F2A 17 provides:

The penalty payable under paragraph 1 [RTC penalty] is 200% of the offshore PLR attributable to the uncorrected offshore tax non-compliance (subject to any reduction under a provision of this Part of this Schedule).

This is more than the normal penalties. Para 14(2) sch 18 F2A 17 provides:

In this Part of this Schedule “the uncorrected offshore tax non-compliance” means-

- (a) the relevant offshore tax non-compliance, in a case where none of it is corrected within the RTC period, or
- (b) so much of the relevant offshore tax non-compliance as has not been corrected within the RTC period, in a case where part of it is corrected within that period.

## 120.22 **Categories of information/inaccuracy/failure**

### 120.22.1 *Navigation*

Category	Provision	See para.
Information	Para 6A sch 55 FA 09	120.22.2
Inaccuracy	Para 4A sch 24 FA 07	120.22.3
Failure	Para 6A sch 41 FA 2008	120.22.4

### 120.22.2 *Categories of information*

This is relevant to the penalty for failure to make a return.

Para 6A sch 55 FA 09 provides:

Category 1	Category 2	Category 3
(1) Information is category 1 information if-	(2) Information is category 2 information if-	(3) Information is category 3 information if-

(a) it involves a domestic matter, or

(b) it involves an offshore matter and—

(i) the territory in question is a category 1 territory, or

(ii) it is information which would enable or assist HMRC to assess P's liability to a tax other than income tax or capital gains tax.

(a) it involves an offshore matter or an offshore transfer,

(b) the territory in question is a category 2 territory, and

(c) it is information which would enable or assist HMRC to assess P's liability to income tax, capital gains tax or inheritance tax

(a) it involves an offshore matter or an offshore transfer,

(b) the territory in question is a category 3 territory, and

(c) it is information which would enable or assist HMRC to assess P's liability to income tax, capital gains tax or inheritance tax.

### 120.22.3 *Categories of inaccuracy*

Para 4A sch 24 FA 07 provides:

#### **Category 1**

(1) An inaccuracy is in category 1 if—

(a) it involves a domestic matter, or

(b) it involves an offshore matter and—

(i) the territory in question is a category 1 territory, or

(ii) the tax at stake is a tax other than income tax or capital gains tax.

#### **Category 2**

(2) An inaccuracy is in category 2 if—

(a) it involves an offshore matter or an offshore transfer,

(b) the territory in question is a category 2 territory, and

(c) the tax at stake is income tax, capital gains tax or inheritance tax.

#### **Category 3**

(3) An inaccuracy is in category 3 if—

(a) it involves an offshore matter or an offshore transfer,

(b) the territory in question is a category 3 territory, and

(c) the tax at stake is income tax, capital gains tax or inheritance tax.

### 120.22.4 *Categories of failure*

Para 6A sch 41 FA 2008 provides:

**Para 6A(1): Category 1    Para 6A(2): Category 2    Para 6A(3): Category 3**

<p>A failure is in category 1 if—</p> <p>(a) it involves a domestic matter, or</p> <p>(b) it involves an offshore matter and—</p> <p>(i) the territory in question is a category 1 territory, or</p> <p>(ii) the tax at stake is a tax other than income tax or capital gains tax.</p>	<p>A failure is in category 2 if—</p> <p>(a) it involves an offshore matter or an offshore transfer,</p> <p>(b) the territory in question is a category 2 territory, and</p> <p>(c) the tax at stake is income tax or capital gains tax.</p>	<p>A failure is in category 3 if—</p> <p>(a) it involves an offshore matter or an offshore transfer,</p> <p>(b) the territory in question is a category 3 territory, and</p> <p>(c) the tax at stake is income tax or capital gains tax.</p>
--	--	--

120.22.5 *Inaccuracy/failure categories compared*

The definitions are almost the same, substituting failure for inaccuracy, except that the categories of failure lack the references to IHT.

See too 120.23.7 (Multiple categories).

**120.23 Offshore/Domestic Matters**

120.23.1 *Navigation*

The expressions “involving an Offshore Matter/Transfer” are labels for complex sets of rules. I write these expressions with initial capitals to reflect their technical nature. There are about 20 definitions altogether, located as follows:

<b>Term</b>	<b>sch 24 FA 07</b>	<b>sch 41 FA 08</b>	<b>sch 55 FA 09</b>	<b>sch 18 F2A 17</b>	<b>s.36A TMA<sup>33</sup></b>	<b>See para</b>
<b>Inaccuracy</b>						
involves Offshore Matter	4A(4)					120.23.2
involves Offshore Transfer		4A(4B)				120.23.3
Applicable condition	4AA					120.23.4
Involves domestic matter	4A(5)					120.23.6
<b>Failure</b>						
involves Offshore Matter		6A(4)				120.23.2
involves Offshore Transfer			6A(4B)			120.23.3
Applicable condition		6AA				120.23.4
Involves domestic matter		6A(5)				120.23.6

---

33 See 115.15 (12-year limit: Offshore Matter).

Information			
involves Offshore Matter	6A(4)		120.23.2
involves Offshore Transfer		6A4(B)	120.23.3
Applicable condition	6AA		120.23.4
Involves domestic matter	6A(5)		120.23.6
<i>Tax non-compliance:</i>			
failure to comply			
involves Offshore Matter		9(2)	120.24.1
involves Offshore Transfer		9(3)	120.24.2
Applicable condition		9(4)(5)	120.24.2
failure to make return			
involves Offshore Matter		10(2)	120.24.1
involves Offshore Transfer		10(4)	120.24.2
Applicable condition		10(5)-(7)	120.24.2
inaccurate return			
involves Offshore Matter		10(2)	120.24.1
involves Offshore Transfer		10(4)	120.24.2
Applicable condition		10(5)-(7)	120.24.2
Lost IT/CGT			
involves Offshore Matter		36A(3)	120.23.2
involves Offshore Transfer		36A(4)	120.23.3

I consider 4 of the 5 sets of definitions here, and RTC separately in the following section. Unfortunately an ordinary page is not wide enough to set them all out side by side, for easy comparison.

120.23.2 “*Involves an Offshore Matter*”

<b>Para 4A(4) sch 24</b>	<b>Para 6A(4) Sch 41</b>	<b>Para 6A(4) sch 55</b>	<b>s.36A(3) TMA</b>
An inaccuracy “involves an offshore matter” if it results in a potential loss of revenue that is charged on or by reference to—	A failure “involves an offshore matter” if it results in a potential loss of revenue that is charged on or by reference to-	Information “involves an offshore matter” if the liability to tax which would have been shown in the return includes a liability to tax charged on or by reference to-	Lost income tax or capital gains tax “involves an offshore matter” if it is charged on or by reference to—

(a) income arising from a source in a territory outside the UK,	[Identical]	[Identical]	[Identical]
(b) assets situated or held in a territory outside the UK, <sup>34</sup>	[Identical]	[Identical]	[Identical]
(c) activities carried on wholly or mainly in a territory outside the UK, or	[Identical]	[Identical]	[Identical]
(d) anything having effect as if it were income, assets or activities of a kind described above.	[Identical]	[Identical]	[Identical]

In para (c) the words make sense but their purpose is a puzzle. Presumably it relates to trading income. If the trade is carried on wholly outside the UK, the income is foreign source income within para (a). If it is carried on mainly outside the UK, it is UK source income and it is not obvious, to say the least, why it should be within RTC; but there it is.

I do not think that the words in para (d) has any meaningful content. It suggests, perhaps, that the drafter was concerned that the terms of para (a)-(c) might be too narrow, but did not know what to do about it.<sup>35</sup>

### 120.23.3 “Involves an Offshore Transfer”

<b>Para 4A(4B) sch 24</b>	<b>Para 6A(4A) Sch 41</b>	<b>Para 6A(4B) sch 55</b>	<b>s.36A(4) TMA</b>
An inaccuracy “involves an offshore transfer” if—	A failure “involves an offshore transfer” if—	Information “involves an offshore transfer” if—	Lost income tax or capital gains tax “involves an offshore transfer” if—

34 This would apply if a UK situate asset is held by a non-resident nominee.

Para 4A sch 24 FA 07 provides: “(4A) Where the tax at stake is inheritance tax, assets are treated for the purposes of sub-paragraph (4) as situated or held in a territory outside the UK if they are so situated or held immediately after the transfer of value by reason of which inheritance tax becomes chargeable.”

35 See too 46.11.1 (Substance); App.6.4 (Real nature of transaction); 120.23.8 (Definition of source/situs etc).

(a) it does not involve an offshore matter,	[Identical]	[Identical]	[Identical]
(b) it is deliberate (whether or not concealed) and results in a potential loss of revenue,	[identical to sch 24]	(b) it is information which would enable or assist HMRC to assess P's liability to income tax, capital gains tax or inheritance tax,	(c) by failing to make the return, P deliberately withholds the information (whether or not the withholding of the information is also concealed), and
(c) the tax at stake is income tax, capital gains tax or inheritance tax, and	(c) the tax at stake is income tax or capital gains tax, and		
(d) the applicable condition in paragraph 4AA is satisfied.	(d) the applicable condition in paragraph 6AA is satisfied.	(d) the applicable condition in paragraph 6AA is satisfied.	(b) the income or the proceeds of the disposal on or by reference to which it is charged, or any part of the income or proceeds, is transferred to a territory outside the UK before the relevant date.

120.23.4 *Applicable condition*

This term is a key part of the definition of “involves an Offshore Transfer”.

**Para 4AA sch 24**

(1) This paragraph makes provision in relation to offshore transfers.

**Para 6AA sch 41**

[Identical]

**Para 6AA sch 55**

[Identical]

(2) Where the tax at stake is income tax,	[Identical to sch 24]	(2) Where the liability to tax which would have been shown in the return is a liability to income tax,
the applicable condition is satisfied if the income on or by reference to which the tax is charged, or any part of the income—	[Identical]	[Identical]
(a) is received in a territory outside the UK, or		
(b) is transferred before the filing date to a territory outside the UK.	(b) is transferred before the calculation date to a territory outside the UK.	(b) is transferred before the relevant date to a territory outside the UK.
(3) Where the tax at stake is capital gains tax,	[Identical to sch 24]	(3) Where the liability to tax which would have been shown in the return is a liability to capital gains tax,
the applicable condition is satisfied if the proceeds of the disposal on or by reference to which the tax is charged, or any part of the proceeds—	[Identical to sch 24]	[Identical]
(a) are received in a territory outside the UK, or		
(b) are transferred before the filing date to a territory outside the UK.	(b) are transferred before the calculation date to a territory outside the UK.	(b) are transferred before the relevant date to a territory outside the UK.

(4) Where the tax at stake is inheritance tax, the applicable condition is satisfied if—

(a) the disposition that gives rise to the transfer of value by reason of which the tax becomes chargeable involves a transfer of assets, and

(b) after that disposition but before the filing date the assets, or any part of the assets, are transferred to a territory outside the UK.

(4) Where the liability to tax which would have been shown in the return is a liability to inheritance tax,

[Identical]

(b) after that disposition but before the relevant date the assets, or any part of the assets, are transferred to a territory outside the UK.

The filing/calculation/relevant dates are as follows:

<b>Para 4AA(7) sch 24 Filing date</b>	<b>Para 6AA(6) sch 41 Calculation date</b>	<b>Para 6AA(7) sch 55 Relevant date</b>	<b>s.36A(5) TMA Relevant date</b>
“Filing date” means the date when the document containing the inaccuracy is given to HMRC.	In this paragraph “calculation date” means the date by reference to which the potential lost revenue is to be calculated (see paragraph 7).	“Relevant date” means the date on which P becomes liable to a penalty under paragraph 6.	In subsection (4) “relevant date” means— (a) in a case where the taxpayer (or a person acting on the taxpayer's behalf) delivered a return under the Taxes Acts to HMRC for the year of assessment to which the lost tax relates and in which information relating to the lost tax was required to be provided, the date on which the return was delivered, and (b) in any other case, 31 January in the year of assessment after that to which the lost tax relates;

### 120.23.5 *Assets representing assets*

Penalty template wording provides a definition:

In the case of a transfer falling within sub-paragraph (2)(b), (3)(b) or (4)(b), references to the income, proceeds or assets transferred are to be read as including references to any assets derived from or representing<sup>36</sup> the income, proceeds or assets.

All the penalties discussed here include the same or a substantially similar provision.<sup>37</sup>

### 120.23.6 *“Involves a domestic matter”*

**Para 4A(5) sch 24  
FA 07**

An inaccuracy “involves a domestic matter” if it results in a potential loss of revenue and does not involve either an offshore matter or an offshore transfer.

**Para 6A(5) sch 41  
FA 08**      **Para 6A sch 55  
FA09**

[identical to sch 24]

Information “involves a domestic matter” if it does not involve an offshore matter or an offshore transfer.

### 120.23.7 *Multiple categories*

**Para 4A(6) sch 24  
FA 07**

If a single inaccuracy is in more than one category (each referred to as a “relevant category”)—

(a) it is to be treated for the purposes of this Schedule as if it were separate inaccuracies, one in each relevant category according to the matters or transfers that it involves, and

**Para 6A(6) sch 41  
FA 08**

If a single failure is in more than one category (each referred to as a “relevant category”)—

(a) it is to be treated for the purposes of this Schedule as if it were separate failures, one in each relevant category according to the matters or transfers that it involves, and

**Para 6A(6) sch 55  
FA09**

If the information which P withholds falls into more than one category—

(a) P's failure to make the return is to be treated for the purposes of this Schedule as if it were separate failures, one for each category of information according to the matters or transfers which the information involves, and

<sup>36</sup> See App.2.11.2 (Derive from/represent compared).

<sup>37</sup> Para 4B(5) sch 24 FA 07; para 6A sch 55 FA 09; 36A(5) TMA.

(b) the potential lost revenue is to be calculated separately in respect of each separate inaccuracy.

(b) the potential lost revenue in respect of each separate failure is taken to be such share of the potential lost revenue in respect of the single failure (see paragraphs 7 and 11) as is just and reasonable.

(b) for each separate failure, the liability to tax which would have been shown in the return in question is taken to be such share of the liability to tax which would have been shown in the return mentioned in paragraph (a) as is just and reasonable.

### 120.23.8 *Definition of source/situs etc*

CGT definitions of situs apply for CGT, and IHT/common law definitions apply for IHT/IT.

For completeness: Para 21B FA 07 provides:

- (1) The Treasury may by regulations make provision for determining for the purposes of paragraph 4A where-
  - (a) a source of income is located,
  - (b) an asset is situated or held, or
  - (c) activities are wholly or mainly carried on.
- (1A) The Treasury may by regulations make provision for determining for the purposes of paragraph 4AA where-
  - (a) income is received or transferred,
  - (b) the proceeds of a disposal are received or transferred, or
  - (c) assets are transferred.

Although para 21B is expressed to apply for the purposes of para 4A/4AA, the provision is repeated or incorporated by reference elsewhere.

It is difficult to see why this is needed. Perhaps the drafter had some inchoate concern which, when they subsequently tried, they found they were unable to express in words. *Wovon man nicht sprechen kann, darüber muss man schweigen*. For that or some other reason, no regulations have been made: Para 21B should be repealed.

### 120.24 **Offshore Matter/Transfer: RTC**

In the RTC code, the expressions “involving an Offshore Matter/Transfer” are each defined 3 times. In outline:

**Failure**

**Para**

Failure to notify IT/CGT	9
Failure to deliver return	10
Inaccurate return	11

**Para 9(1) sch 18 F2A 17**

This paragraph applies to

any tax non-compliance consisting of a failure to comply with an obligation under section 7<sup>38</sup> of TMA 1970 to notify chargeability to income tax or capital gains tax.

**Para 10(1)**

This paragraph applies where-

(a) any tax non-compliance by a person consists of a failure to comply with an obligation to deliver a return or other document, and

(b) a complete and accurate return or other document would have included information that would have enabled or assisted HMRC to assess the person's liability to tax.

**Para 11(1)**

This paragraph applies to any tax non-compliance by a person if—

(a) the tax non-compliance consists of delivering or giving HMRC a return or other document which contains an inaccuracy, and

(b) the inaccuracy relates to information that would have enabled or assisted HMRC to assess the person's liability to tax.

**120.24.1 Involves Offshore Matter**

I set out the wording in this section, but the wording is based on the provisions set out in the last section, so see above for discussion.

Sch 18 F2A 17 provides:

*Para 9(2): Failure to notify*

The tax non-compliance “involves an offshore matter” if

*Para 10(2): No return*

same as para 9

*Para 11(2): Incorrect return*

The tax non-compliance to which this paragraph applies “involves an offshore matter” if the information that should have been given in the tax document relates to—

---

38 See 115.2 (Duty to notify HMRC).

the potential loss of revenue is charged on or by reference to-

the liability to tax that would have been shown in the return or other document is or includes a liability to tax charged on or by reference to-

- (a) income arising from a source in a territory outside the UK,
- (b) assets situated or held in a territory outside the UK,
- (c) activities carried on wholly or mainly in a territory outside the UK, or
- (d) anything having effect as if it were income, assets or activities of a kind described above.

same

same

(3) Where the tax at stake is inheritance tax, assets are treated for the purposes of sub-paragraph (2) as situated or held in a territory outside the UK if they are so situated or held immediately after the transfer of value by reason of which inheritance tax becomes chargeable.

(3) same as para 10

### 120.24.2 *Involves Offshore Transfer*

Sch 18 F2A 17 provides:

**Para 9(3): Failure to notify**

The tax non-compliance “involves an offshore transfer” if-

**Para 10(4): No return**

same as para 9

**Para 11(4): Incorrect return**

Tax non-compliance to which this paragraph applies “involves an offshore transfer” if—

(a) it does not involve an offshore matter, and	same	same
(b) the applicable condition is satisfied (see sub-paragraphs (4) and (5)).	(b) the applicable condition is satisfied in respect of the liability to tax that would have been shown by the return or other document (see sub-paragraphs (5) to (7)).	(b) the applicable condition is satisfied in respect of the liability to tax that would have been shown by the return or other document (see sub-paragraphs (5) to (7)).

So we turn to the definition(s) of “applicable condition”. There are three sets of definitions, for the separate taxes:

<b>Tax</b>	<b>Definition of “applicable condition” in para:</b>
IT	9(4), 10(5), 11(5)
CGT	9(5), 10(6), 11(6)
IHT	9(6), 10(7), 11(7)

For IT, the same definition is repeated 3 times, so it need only be set out once. Para 9(4)/10(5)/11(5) sch 18 F2A 17 provide:

Where the tax at stake is income tax the applicable condition is satisfied if the income on or by reference to which tax is charged, or any part of the income-

- (a) was received in a territory outside the UK, or
- (b) was transferred on or before 5 April 2017 to a territory outside the UK.

For the CGT/IHT, the definitions differ, and need to be set out side by side:

(5) Where the tax at stake is capital gains tax, the applicable condition is satisfied if	(6) [identical]	[identical]
		(a) the information that should have been given in the tax document relates to the proceeds of the disposal on or by reference to which the tax is charged, and

the proceeds of the disposal on or by reference to which the tax is charged, or any part of the proceeds-	[identical]	(b) the proceeds, or any part of the proceeds—
(a) were received in a territory outside the UK, or	(a) was received in a territory outside the UK, or	(i) were received in a territory outside the UK, or
(b) were transferred on or before 5 April 2017 to a territory outside the UK.	was transferred on or before 5 April 2017 to a territory outside the UK.	(ii) were transferred on or before 5 April 2017 to a territory outside the UK.
	(7) Where the liability to tax which would have been shown in the document is a liability to inheritance tax, the applicable condition is satisfied if—	(7) Where the tax at stake is inheritance tax, the applicable condition is satisfied if—
	(a) the disposition that gives rise to the transfer of value by reason of which the tax becomes chargeable involves a transfer of assets, and (b) after that disposition but on or before 5 April 2017 the assets, or any part of the assets, are transferred to a territory outside the UK.	(a) the information that should have been given in the tax document relates to the disposition that gives rise to the transfer of value by reason of which the tax becomes payable relates to a transfer of assets, and (b) after that disposition but on or before 5 April 2017 the assets or any part of the assets are transferred to a territory outside the UK.

## 120.25 Categories of territory

Para 21A sch 24 FA 07 provides:

- (1) A category 1 territory is a territory designated as a category 1 territory by order made by the Treasury.
- (2) A category 2 territory is a territory that is neither—
  - (a) a category 1 territory, nor

(b) a category 3 territory.

(3) A category 3 territory is a territory designated as a category 3 territory by order made by the Treasury.<sup>39</sup>

This takes us to the schedule of Penalties, Offshore Income etc (Designation of Territories) Order 2011 which provides:

<b>Category 1 territories</b>	Greece	New Zealand (not including Tokelau)
Anguilla	Guernsey	Norway
Aruba	Hungary	Poland
Australia	Ireland	Portugal
Belgium	Isle of Man	Romania
Bulgaria	Italy	Slovakia
Canada	Japan	Slovenia
Cayman Islands	Korea,	Spain
Cyprus	Latvia	Sweden
Czech Republic	Liechtenstein	Switzerland
Denmark (not including Faroe Islands & Greenland)	Lithuania	United States of America (not including overseas territories & possessions)
Estonia	Malta	
Finland	Montserrat	
France	Netherlands (not including Bonaire, Sint Eustatius & Saba)	
Germany		
<b>Category 3 territories</b>	Bonaire, Sint Eustatius and Saba	Colombia
Albania	Brazil	Congo, Republic of
Algeria	Cape Verde	Cook Islands
Andorra		Costa Rica

39 For completeness: para 21A(4) sch 24 FA 07 explains the principles of categorisation: “(4) In considering how to classify a territory for the purposes of this paragraph, the Treasury must have regard to—

(a) the existence of any arrangements between the UK and that territory for the exchange of information for tax enforcement purposes,

(b) the quality of any such arrangements (in particular, whether they provide for information to be exchanged automatically or on request), (c) the benefit that the UK would be likely to obtain from receiving information from that territory, were such arrangements to exist with it,

(d) the existence of any other arrangements between the UK and that territory for co-operation in the area of taxation, and

(e) the quality of any such other arrangements (in particular, the extent to which the co-operation provided for in them assists or is likely to assist in the protection of revenue raised from taxation in the UK).”

Curaçao	Jamaica	Panama
Cuba	Kyrgyzstan	Paraguay
Democratic People's Republic of Korea	Lebanon	Peru
Dominican Republic	Macau	Seychelles
South Ecuador	Marshall Islands	Sint Maarten
El Salvador	Micronesia, Federated States of	Suriname
Gabon	Monaco	Syria
Guatemala	Nauru	Tokelau
Honduras	Nicaragua	Tonga
Iran	Niue	Trinidad and Tobago
Iraq	Palau	United Arab Emirates
		Uruguay

Everywhere else is category 2.

Penalty template wording incorporates these rules elsewhere if needed.<sup>40</sup>

For the purposes of this Schedule-

- (a) paragraph 21A of Schedule 24 to FA 07 (classification of territories) has effect, but
- (b) an order under that paragraph does not apply to a failure if the filing date is before the date on which the order comes into force.

### 120.25.1 *More than 1 category in point*

There may be more than one “territory in question”.

**Para 4AA(6)  
sch 24 FA 07**

In relation to an offshore transfer, the territory in question for the purposes of paragraph 4A is the highest category of territory by virtue of which the inaccuracy involves an offshore transfer.

**Para 6AA(5)  
sch 41 FA 08**

In relation to an offshore transfer, the territory in question for the purposes of paragraph 6A is the highest category of territory by virtue of which the failure involves an offshore transfer.

**Para 6AA(6)  
Sch 55 FA 09**

[identical to sch 41 provision]

## 120.26 Potential lost revenue

---

<sup>40</sup> Para 6A(7) sch 55 FA 09 (quoted); para 6A(7) sch 41 FA 2008 (minor variations).

Potential lost revenue (“PLR”) matters because for most of the penalties the amount of penalty is a percentage of PLR or offshore PLR. For asset-based penalties, one requirement is a minimum offshore PLR threshold of £25k.

The definitions are located as follows:

Term	sch 24 FA 07	sch 41 FA 08	sch 22 FA 16	sch 18 F2A 17	See para.
Potential lost revenue	5-8				120.27
		7-10			120.28
Offshore PLR			5		120.30
				15	120.31

## 120.27 PLR: Error-based penalties

### 120.27.1 PLR: Normal rule

Para 5 sch 24 FA 07 provides:

- (1) “The potential lost revenue” in respect of an inaccuracy in a document or a failure to notify an under-assessment is the additional amount due or payable in respect of tax<sup>41</sup> as a result of correcting the inaccuracy or assessment.
- (2) The reference in sub-paragraph (1) to the additional amount due or payable includes a reference to—
  - (a) an amount payable to HMRC having been erroneously paid by way of repayment of tax, and
  - (b) an amount which would have been repayable by HMRC had the inaccuracy or assessment not been corrected.

### 120.27.2 Disregarded reliefs

Para 5 sch 24 FA 07 provides:

- (4) The following shall be ignored in calculating potential lost revenue under this paragraph—
  - (a) group relief, and
  - (b) section 419(4) of ICTA (close company: relief for loans);
 (but this sub-paragraph does not prevent a penalty being charged in

---

41 Defined para 5(3) sch 24 FA 07: In sub-paragraph (1) “tax” includes national insurance contributions.”

respect of an inaccurate claim for relief).

Another unfair rule.

### 120.27.3 *Multiple errors*

Para 6 sch 24 FA 07 provides:

(1) Where P is liable to a penalty in respect of more than one inaccuracy, and the calculation of potential lost revenue under paragraph 5 in respect of each inaccuracy depends on the order in which they are corrected—

(a) careless inaccuracies shall be taken to be corrected before deliberate inaccuracies, and

(b) deliberate but not concealed inaccuracies shall be taken to be corrected before deliberate and concealed inaccuracies.

(2) In calculating potential lost revenue where P is liable to a penalty in respect of one or more understatements in one or more documents relating to a tax period, account shall be taken of any overstatement in any document given by P which relates to the same tax period.

(3) In sub-paragraph (2)—

(a) “understatement” means an inaccuracy that satisfies Condition 1 of paragraph 1, and

(b) “overstatement” means an inaccuracy that does not satisfy that condition.

(4) For the purposes of sub-paragraph (2) overstatements shall be set against understatements in the following order—

(a) understatements in respect of which P is not liable to a penalty,

(b) careless understatements,

(c) deliberate but not concealed understatements, and

(d) deliberate and concealed understatements.

### 120.27.4 *PLR: Losses*

Para 7 sch 24 FA 07 provides:

(1) Where an inaccuracy has the result that a loss is wrongly recorded for purposes of direct tax and the loss has been wholly used to reduce the amount due or payable in respect of tax, the potential lost revenue is calculated in accordance with paragraph 5.

(2) Where an inaccuracy has the result that a loss is wrongly recorded for purposes of direct tax and the loss has not been wholly used to

reduce the amount due or payable in respect of tax, the potential lost revenue is—

- (a) the potential lost revenue calculated in accordance with paragraph 5 in respect of any part of the loss that has been used to reduce the amount due or payable in respect of tax, plus
  - (b) 10% of any part that has not.
- (3) Sub-paragraphs (1) and (2) apply both—
- (a) to a case where no loss would have been recorded but for the inaccuracy, and
  - (b) to a case where a loss of a different amount would have been recorded (but in that case sub-paragraphs (1) and (2) apply only to the difference between the amount recorded and the true amount).
- (4) Where an inaccuracy has the effect of creating or increasing an aggregate loss recorded for a group of companies—
- (a) the potential lost revenue shall be calculated in accordance with this paragraph, and
  - (b) in applying paragraph 5 in accordance with sub-paragraphs (1) and (2) above, group relief may be taken into account (despite paragraph 5(4)(a)).
- (5) The potential lost revenue in respect of a loss is nil where, because of the nature of the loss or P's circumstances, there is no reasonable prospect of the loss being used to support a claim to reduce a tax liability (of any person).

#### 120.27.5 *PLR: Delayed tax*

Para 8 sch 24 FA 07 provides:

- (1) Where an inaccuracy resulted in an amount of tax being declared later than it should have been (“the delayed tax”), the potential lost revenue is—
  - (a) 5% of the delayed tax for each year of the delay, or
  - (b) a percentage of the delayed tax, for each separate period of delay of less than a year, equating to 5% per year.
- (2) This paragraph does not apply to a case to which paragraph 7 applies.

#### 120.28 **PLR: Failure to notify chargeability**

Para 7(1) sch 41 FA 08 provides:

“The potential lost revenue” in respect of a failure to comply with a relevant obligation is as follows.

### 120.28.1 *No notice requiring return*

We will normally be considering para 7(2)(3) sch 41 FA 08 which provide:

#### **para 7(2): IT/CGT**

In the case of a relevant obligation relating to income tax or capital gains tax and a tax year (not falling within subparagraph (1A)), the potential lost revenue is so much of any income tax or capital gains tax to which P is liable in respect of the tax year as by reason of the failure is unpaid on 31 January following the tax year.

#### **para 7(3): CT**

In the case of a relevant obligation relating to corporation tax and an accounting period, the potential lost revenue is (subject to sub-paragraph (4)) so much of any corporation tax to which P is liable in respect of the accounting period as by reason of the failure is unpaid 12 months after the end of the accounting period.

Para 7(4) sch 41 FA 08 provides for one disregarded relief for CT

In computing the amount of that tax no account shall be taken of any relief under section 458 of CTA 2010 (relief in respect of repayment etc of loan) which is deferred under subsection (5) of that section.

“By reason of” is a causation test; see *Fuller v HMRC* [2020] UKFTT 189 (TC).

### 120.28.2 *Notice requiring tax return withdrawn*

Para 7 sch 41 FA 08 deals with what is (I think) an usual case:

(1A) In the case of an obligation under section 7<sup>42</sup> of TMA 1970 which arises by virtue of subsection (1B) of that section, the potential lost revenue is so much of any income tax or capital gains tax to which P is liable in respect of the tax year in question as is, by reason of the failure to comply with the obligation-

- (a) where the period specified in subsection (1C)(b)(ii) of that section applies and ends after the relevant date, unpaid at the end of that period, or

---

42 See 115.2 (Duty to notify HMRC).

- (b) in any other case, unpaid on the relevant date.
- (1B) For the purposes of sub-paragraph (1A) the relevant date is-
  - (a) 31 January following the tax year, or
  - (b) if, after that date, HMRC refund a payment on account in respect of the tax year to P, the day after the refund is issued.

### 120.28.3 *Other cases*

Para 7(10) sch 41 FA 08 provides:

In the case of a failure to comply with a relevant obligation relating to any other tax, the potential lost revenue is the amount of any tax which is unpaid by reason of the failure

## 120.29 **Matching overpayment**

### **Para 6 sch 24 FA 07**

(5) In calculating potential lost revenue in respect of a document given by or on behalf of P no account shall be taken of the fact that a potential loss of revenue from P is or may be balanced by a potential over-payment by another person (except to the extent that an enactment requires or permits a person's tax liability to be adjusted by reference to P's).

### **Para 7 sch 41 FA 08**

(1) In calculating potential lost revenue in respect of a relevant act or failure<sup>43</sup> on the part of P no account is to be taken of the fact that a potential loss of revenue from P is or may be balanced by a potential over-payment by another person (except to the extent that an enactment requires or permits a person's tax liability to be adjusted by reference to P's).

## 120.30 **Offshore PLR: Asset-based penalty**

Para 5 sch 33 FA 16 provides:

- (1) The offshore PLR, in relation to a tax year, is the total of—
  - (a) the potential lost revenue (in the case of a standard offshore tax penalty imposed under Schedule 24 to FA 2007 or Schedule 41 to FA 2008 or Schedule 18 to FA 2017), and
  - (b) the liability to tax (in the case of a standard offshore tax penalty imposed under Schedule 55 to FA 2009),

---

43 Defined Para 7 (2) sch 41 FA 08 “In this Schedule “a relevant act or failure” means (a) a failure to comply with a relevant obligation ...”

by reference to which all of the standard offshore tax penalties imposed on P in relation to the tax year are assessed.

(2) Sub-paragraphs (3) to (5) apply where—

- (a) a penalty is imposed on P under paragraph 1 of Schedule 24 to FA 2007, paragraph 1 of Schedule 41 to FA 2008 or paragraph 6 of Schedule 55 to FA 2009, and
- (b) the potential lost revenue or liability to tax by reference to which the penalty is assessed relates to a standard offshore tax penalty and one or more other penalties.

In this paragraph, such a penalty is referred to as a “combined penalty”.

(3) Only the potential lost revenue or liability to tax relating to the standard offshore tax penalty is to be taken into account in calculating the offshore PLR.

(4) Where the calculation of the potential lost revenue or liability to tax by reference to which a combined penalty is assessed depends on the order in which income or gains are treated as having been taxed, for the purposes of calculating the offshore PLR—

- (a) income and gains relating to domestic matters are to be taken to have been taxed before income and gains relating to offshore matters and offshore transfers;
- (b) income and gains relating to taxes that are not capital gains tax, inheritance tax or asset-based income tax are to be taken to have been taxed before income and gains relating to capital gains tax, inheritance tax and asset-based income tax.

(5) In a case where it cannot be determined—

- (a) whether income or gains relate to an offshore matter or offshore transfer or to a domestic matter, or
- (b) whether income or gains relate to capital gains tax, asset-based income tax or inheritance tax or not,

for the purposes of calculating the offshore PLR, the potential lost revenue or liability to tax relating to the standard offshore tax penalty is to be taken to be such share of the total potential lost revenue or liability to tax by reference to which the combined penalty was calculated as is just and reasonable.

(6) Sub-paragraph (7) applies where—

- (a) a standard offshore tax penalty or a combined penalty is imposed on P, and
- (b) there are two or more taxes at stake, including capital gains tax and asset-based income tax.

(7) Where the calculation of the potential lost revenue or liability to tax

by reference to which the penalty is assessed depends on the order in which income or gains are treated as having been taxed, for the purposes of calculating the offshore PLR, income and gains relating to asset-based income tax are to be taken to have been taxed before income and gains relating to capital gains tax.

**120.31 Offshore PLR: RTC**

PLR is **P**otential **L**ost **R**evenue.

Offshore PLR matters for:

- (1) RTC condition C
- (2) the quantum of the RTC penalty
- (3) the RTC assessment time limit

Para 15(1) sch 18 F2A 17 provides:

In this Schedule “offshore PLR”, in relation to any offshore tax non-compliance means the potential loss of revenue attributable to that non-compliance, to be determined as follows.

The PLR depends on the nature of the non-compliance.

Para 15 Sch 18 F2A 17 provides:

(2) The potential lost revenue attributable to any offshore tax non-compliance is (subject to sub-paragraphs (5) and (6))-

(a) if the non-compliance is a failure to notify chargeability,

(b) if the non-compliance is a failure to deliver a return or other document,

(c) if the non-compliance is delivering a return or other document containing an inaccuracy,

[i] the potential lost revenue under the applicable provisions of paragraph 7 of Schedule 41 to FA 08

[i] the amount of the liability to tax under the applicable provisions of paragraph 24 of Schedule 55 to FA 09

[i] the potential lost revenue under the applicable provisions of paragraphs 5 to 8 of Schedule 24 to FA 07

[ii] (or, where the original offshore tax non-compliance took place before 1 April 2010, the amount referred to in section 7(8) of TMA 1970)

[ii] (or, where the original offshore tax non-compliance took place before 1 April 2011, the amount of liability to tax that would have been shown in the return as defined in section 93(9) of TMA 1970),

[ii] (or, where the original offshore tax non-compliance took place before 1 April 2008, the difference described in section 95(2) of TMA 1970).

Para 15 sch 18 F2A 17 provides:

(3) In its application for the purposes of sub-paragraph (2)(c) above, paragraph 6 of Schedule 24 to FA 07 has effect as if-

(a) for sub-paragraph (1) there were substituted-

“(1) Where-

(a) P is liable to a penalty in respect of two or more inaccuracies (each being an inaccuracy in a return or other document listed in paragraph 8(3) or (4) of Schedule 18) to F(No 2)A 2017) in relation to a tax year or, in the case of inheritance tax, a single transfer of value,

(b) in relation to any one (or more than one) of those inaccuracies, the delivery of the return or other document containing it constitutes offshore tax non-compliance, and

(c) the calculation of potential lost revenue attributable to each of those inaccuracies depends on the order in which they are corrected,

the potential lost revenue attributable to any offshore tax non-compliance constituted by any one of those inaccuracies is to be taken to be such amount as is just and reasonable.

(1A) In sub-paragraph (1) “offshore tax non-compliance” has the same meaning as in Schedule 18 to F(No2)A 2017.”; and

(b) in sub-paragraph (4), for paragraphs (b) to (d) there were substituted-

“(b) other understatements.”

- (4) In sub-paragraphs (5) and (6) “combined tax non-compliance” is tax non-compliance that-
- (a) involves an offshore matter or an offshore transfer, but
  - (b) also involves an onshore matter.

I discuss PLR above. The amendments relate to the rules for multiple errors. Amended as para 15 sch 18 F2A 17 requires, para 6 sch 24 FA 07 provides:

### **6 Potential lost revenue: multiple errors**

~~(1) Where P is liable to a penalty under paragraph 1 in respect of more than one inaccuracy, and the calculation of potential lost revenue under paragraph 5 in respect of each inaccuracy depends on the order in which they are corrected—~~

- ~~(a) careless inaccuracies shall be taken to be corrected before deliberate inaccuracies, and~~
- ~~(b) deliberate but not concealed inaccuracies shall be taken to be corrected before deliberate and concealed inaccuracies.~~

(1) Where-

- (a) P is liable to a penalty in respect of two or more inaccuracies (each being an inaccuracy in a return or other document listed in paragraph 8(3) or (4) of Schedule 18) to F(No 2)A 2017 in relation to a tax year or, in the case of inheritance tax, a single transfer of value,
- (b) in relation to any one (or more than one) of those inaccuracies, the delivery of the return or other document containing it constitutes offshore tax non-compliance, and
- (c) the calculation of potential lost revenue attributable to each of those inaccuracies depends on the order in which they are corrected,

the potential lost revenue attributable to any offshore tax non-compliance constituted by any one of those inaccuracies is to be taken to be such amount as is just and reasonable.

(1A) In sub-paragraph (1) “offshore tax non-compliance” has the same meaning as in Schedule 18 to F(No2)A 2017.

(2) In calculating potential lost revenue where P is liable to a penalty under paragraph 1 [RTC penalty] in respect of one or more understatements in one or more documents relating to a tax period, account shall be taken of any overstatement in any document given by P which relates to the same tax period.

(3) In sub-paragraph (2)—

- (a) “understatement” means an inaccuracy that satisfies Condition 1 of paragraph 1, and
- (b) “overstatement” means an inaccuracy that does not satisfy that condition.

(4) For the purposes of sub-paragraph (2) overstatements shall be set against understatements in the following order—

- (a) understatements in respect of which P is not liable to a penalty,
- ~~(b) careless understatements,~~
- ~~(c) deliberate but not concealed understatements, and~~
- ~~(d) deliberate and concealed understatements.~~

(b) other understatements.

(5) In calculating for the purposes of a penalty under paragraph 1 [RTC penalty] potential lost revenue in respect of a document given by or on behalf of P no account shall be taken of the fact that a potential loss of revenue from P is or may be balanced by a potential over-payment by another person (except to the extent that an enactment requires or permits a person’s tax liability to be adjusted by reference to P’s).

### 120.31.1 *Combined tax non-compliance*

Para 15 sch 18 F2A 17 provides:

(5) Any combined tax non-compliance is to be treated for the purposes of this Schedule as if it were two separate acts of tax non-compliance, namely-

- (a) the combined tax non-compliance so far as it involves an offshore matter or an offshore transfer (which is then offshore tax non-compliance within the meaning of this Schedule), and
- (b) the combined tax non-compliance so far as it involves an onshore matter.

(6) The potential lost revenue attributable to the offshore tax non-compliance referred to in sub-paragraph (5)(a) is to be taken to be such share of the potential lost revenue attributable to the combined tax non-compliance as is just and reasonable.

## 120.32 **Reductions for disclosure: Which para?**

### 120.33 *Summary*

The penalty provisions adopt a verbose template, and it is helpful to summarise the position in a table:

<b>Penalty</b>	<b>Matter</b>	<b>Governed by</b>	<b>Reduction under</b>
<i>Sch 24</i>			
Para 1: error in taxpayer doc	Domestic	Para 9(A1)	Para 10(1)
Para 1A: error due to 3 <sup>rd</sup> party			Para 10(1A)
Para 2: uncorrected assessment			Para 10(2)
Para 1: error in taxpayer doc	Offshore	Para 9(A2)	Para 10A
<i>Sch 41</i>			
Para 1: failure to notify	Domestic	Para 12(1)(a)	Para 13(1)
<i>ditto</i>	Offshore	Para 12(1A)	Para 13A
<i>Sch 55</i>			
failure to make return	Domestic	Para 14(1)	Para 15
<i>ditto</i>	Offshore	Para 14 (1A)	Para 15A
<i>Sch 18: RTC</i>			Para 16

The provisions in full detail are as follows:

### 120.33.1 *Error based penalties*

Para 9 sch 24 FA 07 provides:

(A1) Paragraph 10 provides for reductions in penalties—

- (a) under paragraph 1 [Error in writing] where a person discloses an inaccuracy that involves a domestic matter,
- (b) under paragraph 1A [Error due to 3<sup>rd</sup> party] where a person discloses a supply of false information or withholding of information, and
- (c) under paragraph 2 [uncorrected assessment] where a person discloses a failure to disclose an under-assessment.

(A2) Paragraph 10A provides for reductions in penalties under paragraph 1 [Error in writing] where a person discloses an inaccuracy that involves an offshore matter or an offshore transfer.

### 120.33.2 *Failure to notify chargeability*

Para 12 sch 41 FA 08 provides:

(1) Paragraph 13 provides for reductions in penalties—

- (a) under paragraph 1 where P discloses a relevant failure that involves a domestic matter, and
- (b) under paragraphs 2 to 4 where P discloses a relevant act or failure.<sup>44</sup>

---

44 Defined Para 7 (2) sch 41 FA 08 “In this Schedule “a relevant act or failure” means  
(a) a failure to comply with a relevant obligation ...”

(1A) Paragraph 13A provides for reductions in penalties under paragraph 1 where P discloses a relevant failure that involves an offshore matter or an offshore transfer.

(1B) Sub-paragraph (2) applies where P discloses—

- (a) a relevant failure that involves a domestic matter,
- (b) a non-deliberate relevant failure that involves an offshore matter, or
- (c) a relevant act or failure giving rise to a penalty under any of paragraphs 2 to 4.

### 120.33.3 *Failure to make return*

Para 14 sch 55 FA 09 provides:

(1) Paragraph 15 provides for reductions in the penalty under paragraph 6(3) or (4) where P discloses relevant information that involves a domestic matter or 11(3) or (4) where P discloses relevant information.

(1A) Paragraph 15A provides for reductions in the penalty under paragraph 6(3) or (4) where P discloses relevant information that involves an offshore matter or an offshore transfer.

### 120.33.4 *RTC*

Para 16 sch 18 F2A 17 provides:

(1) This paragraph provides for a reduction in a penalty under paragraph 1 [RTC penalty] for any uncorrected relevant offshore tax non-compliance if the person (“P”) who is liable to the penalty discloses any matter mentioned in sub-paragraph (2) that is relevant to the non-compliance or its correction or to the assessment or enforcement of the offshore tax attributable to it.

(2) The matters are-

- (a) chargeability to income tax or capital gains tax (where the tax non-compliance is a failure to notify chargeability),
- (b) a missing tax return,
- (c) an inaccuracy in a document,
- (d) a supply of false information or a withholding of information, or
- (e) a failure to disclose an under-assessment.

## 120.34 **What disclosure requires**

### 120.34.1 *Disclosure: Error-based penalty*

Para 9 sch 24 FA 07 provides two definitions of what is required:

(A3) Sub-paragraph (1) applies where a person discloses—

(a) an inaccuracy that involves a domestic matter,

(b) a careless inaccuracy that involves an offshore matter,

(c) a supply of false information or withholding of information, or

(d) a failure to disclose an under-assessment.

(1) A person discloses an inaccuracy, a supply of false information or withholding of information, or a failure to disclose an under-assessment by—

(a) telling HMRC about it,

(b) giving HMRC reasonable help in quantifying the inaccuracy, the inaccuracy attributable to the supply of false information or withholding of information, or the under-assessment, and

(c) allowing HMRC access to records for the purpose of ensuring that the inaccuracy, the inaccuracy attributable to the supply of false information or withholding of information, or the under-assessment is fully corrected.

(1A) Sub-paragraph (1B) applies where a person discloses—

(a) a deliberate inaccuracy (whether concealed or not) that involves an offshore matter, or

(b) an inaccuracy that involves an offshore transfer.

(1B) A person discloses the inaccuracy by—

[identical]

(b) giving HMRC reasonable help in quantifying the inaccuracy,

(c) allowing HMRC access to records for the purpose of ensuring that the inaccuracy is fully corrected, and

(d) providing HMRC with additional information.

120.34.2 Disclosure: Failure to notify

Para 12 sch 41 FA 08 provides two definitions of what is required:

<p>(1B) Sub-paragraph (2) applies where P discloses-</p> <p>(a) a relevant failure that involves a domestic matter,</p> <p>(b) a non-deliberate relevant failure that involves an offshore matter, or</p> <p>(c) a relevant act or failure giving rise to a penalty under any of paragraphs 2 to 4. [These paras not discussed here]</p> <p>(2) P discloses the relevant act or failure by-</p> <p>(a) telling HMRC about it,</p> <p>(b) giving HMRC reasonable help in quantifying the tax unpaid by reason of it, and</p> <p>(c) allowing HMRC access to records for the purpose of checking how much tax is so unpaid.</p>	<p>(2A) Sub-paragraph (2B) applies where P discloses-</p> <p>(a) a deliberate relevant failure (whether concealed or not) that involves an offshore matter, or</p> <p>(b) a relevant failure that involves an offshore transfer.</p> <p>(2B) P discloses the failure by-</p> <p>[identical]</p> <p>[identical]</p> <p>[identical]</p> <p>(d) providing HMRC with additional information.</p>
---	--

120.34.3 *Disclosure: Failure to make return*

Para 14 sch 55 FA 09 provides two definitions of what is required:

<p>(1B) Sub-paragraph (2) applies where-</p> <p>(a) P is liable to a penalty under paragraph 6(3) or (4) and P discloses relevant information that involves a domestic matter, or</p>	<p>(2A) Sub-paragraph (2B) applies where P is liable to a penalty under paragraph 6(3) or (4) and P discloses relevant information that involves an offshore matter or an offshore transfer.</p>
---	--

(b) P is liable to a penalty under any of the other provisions mentioned in sub-paragraph (1) and P discloses relevant information.

(2) P discloses relevant information by- (2B) P discloses relevant information by-

(a) telling HMRC about it, [identical]

(b) giving HMRC reasonable help in quantifying any tax unpaid by reason of its having been withheld, and [identical]

(c) allowing HMRC access to records for the purpose of checking how much tax is so unpaid. [identical]

(d) providing HMRC with additional information.

#### 120.34.4 *Disclosure required: RTC*

Para 16(3) sch 18 F2A 17 provides only one definition:

A person discloses a matter for the purposes of this paragraph only by–

- (a) telling HMRC about it,
- (b) giving HMRC reasonable help in relation to the matter (for example by quantifying an inaccuracy in a document),
- (c) informing HMRC of any person who acted as an enabler<sup>45</sup> of the relevant offshore tax non-compliance or the failure to correct it, and
- (d) allowing HMRC access to records-
  - (i) for any reasonable purpose connected with resolving the matter (for example for the purpose of ensuring that an inaccuracy in a document is fully corrected), and
  - (ii) for the purpose of ensuring that HMRC can identify all

---

<sup>45</sup> Para 16(7) sch 18 F(no2)A 2017 provides a definition: “For the purposes of sub-paragraph (3) a person “acted as an enabler” of relevant offshore tax non-compliance by another if the person encouraged, assisted or otherwise facilitated the conduct by the other person that constituted the offshore tax non-compliance. or otherwise facilitated the conduct by the other person that constituted the offshore tax non-compliance.”

persons who may have acted as an enabler of the relevant offshore tax non-compliance or the failure to correct it.

#### 120.34.5 *Reduction for asset-based penalties*

Para 8)1=h 22 FA 16 provides:

HMRC must reduce the standard amount of the asset-based penalty where P does all of the following things

- (a) makes a disclosure of the inaccuracy or failure relating to the standard offshore tax penalty;
- (b) provides HMRC with a reasonable valuation of the asset;
- (c) provides HMRC with information or access to records that HMRC requires from P for the purposes of valuing the asset.

#### 120.34.6 *Prompted/unprompted*

A commonsense penalties template definition provides:

Disclosure—

- (a) is “unprompted” if made at a time when the person making it has no reason to believe that HMRC have discovered or are about to discover the inaccuracy, the supply of false information or withholding of information, or the under-assessment, and
- (b) otherwise, is “prompted”.<sup>46</sup>

For asset based penalties, para 8 sch 22 FA 16 provides:

- (5) A case involves only unprompted disclosures where
  - (a) in a case where the asset-based penalty relates to only one standard offshore tax penalty, that standard offshore tax penalty was reduced on the basis of an unprompted disclosure, or
  - (b) in a case where the asset-based penalty relates to more than one standard offshore tax penalty, all of those standard offshore tax penalties were reduced on the basis of unprompted disclosures.
- (6) A case involves prompted disclosures where any of the standard

---

<sup>46</sup> Para 9(2) sch 24 FA 07/Para 12(3) sch 41 FA 08; Para 14(3) sch 55 FA 09 is effectively the same.

offshore tax penalties to which the asset-based penalty relates was reduced on the basis of a prompted disclosure.

The Compliance Handbook provides:

**CH82421 Determining unprompted or prompted disclosure** [Apr 2018]

You must check the date from which these rules apply for the tax or duty you are dealing with. See CH81011 for full details.

Whether a disclosure is unprompted or prompted is an objective test. The particular facts and circumstances of the disclosure are the basis of the test, not the belief that it was either unprompted or prompted.

A national campaign highlighting an area of the trading community on which HMRC will be concentrating would not stop a disclosure from being unprompted. However a disclosure would be prompted if a person made the disclosure after

- we contacted them to tell them we wished to make a compliance check of their return
- we arranged to visit their premises to explore the risks we had identified, or
- we told them that we had asked the Valuation Office Agency to consider the value of a property included in an inheritance tax account, or
- HMRC has been supplied with information, under an automatic exchange of information agreement that would, when reviewed, lead to the discovery of the issue being disclosed. This would not apply where the person had no reason to believe that the information had been supplied to HMRC

It will be exceptional for a disclosure to be unprompted if a compliance check is in progress. The disclosure will be unprompted only if it is about something the compliance officer has not discovered or is not about to discover.

A disclosure may be made during the course of a compliance check. If it is related to the subject matter being reviewed then it will be considered to be a related disclosure and therefore prompted.

Some companies will be in continuous dialogue to share a Risk Profile with HMRC. A disclosure can be unprompted if it relates to an

- an area of risk identified by the company, or
- an area identified as part of risk profile discussions that is not yet the subject of a specific enquiry. ...

A person is only able to disclose something they know is wrong. They

may be genuinely unaware that they have done anything wrong. However, a disclosure made after we challenge a particular issue cannot be unprompted.

An unprompted disclosure can be made for both inaccuracies and under-assessments.

### **CH82422 Examples of unprompted or prompted disclosure [Apr 2018]**

...

#### **Example 1**

Jemima returned a capital gain which is the subject of a compliance check. There is no intention to expand the scope of the compliance check during the review. She discloses that she has not declared her car benefit. This is an unprompted disclosure.

#### **Example 2**

During a VAT assurance visit considering the credibility of Alphonse's sales records, he discloses that his sales have also been understated for income tax. This would be related to the subject under review and so is a prompted disclosure.

#### **Example 3**

During an Employer Compliance review the employer makes a disclosure that the basis of the transfer pricing calculation for Corporation Tax is wrong. This is unrelated to the subject under review and so there is an unprompted disclosure.

#### **Example 4**

During an enquiry into an inheritance tax account, we referred the value of the deceased's house to the Valuation Office Agency and tell the personal representatives that we have done so. The personal representatives subsequently correct the value upwards saying that they sold the property for the higher value shortly before submitting the account. This is a prompted disclosure.

#### **Example 5**

During an audit of a winery, the manager discloses to the officer that the duty declared on the previous return was actually incorrect. He admits that this had been incorrectly calculated on the strength of wine at 13% abv instead of 16% abv. The manager had made no previous attempt to inform HMRC about this inaccuracy before the stock records were checked. This is a prompted disclosure.

#### **Example 6**

On 17 May 2010 a central assessment is raised because Banner Ltd's VAT return for the quarter end 31 March 2010 has not been received.

On 1 August 2010 a compliance check is arranged with the company and a visit takes place on 15 August. During the visit the directors produce the completed VAT return for the period to 31 March 2010 showing a liability in excess of the central assessment. The assessment based on the completed return replaced the assessment raised on 17 May 2010. The production of the return is a prompted disclosure of an under-assessment.

Note that if a disclosure of an under-assessment is made within 30 days of the date the assessment is issued there will be no penalty in respect of the under-assessment, see CH81170.

**Example 7**

Darren, a Trustee of a Settlement, included a capital gain in the SA Trust return. The gain is the subject of a compliance check. During the check, Darren discloses that he has used the wrong acquisition value as there was a held-over gain on the transfer of the asset to the Settlement. This is related to the subject under review and so is a prompted disclosure.

**Example 8**

David holds funds received from consultancy income earned abroad in a bank account in a CRS (Common Reporting Standard) reporting country. The overseas bank wrote to David to tell him that details of his account were being exchanged under CRS. His disclosure includes the undeclared income, interest received and income from other offshore structures. Details of these offshore bank accounts have been given to HMRC under CRS and there has been significant activity promoting this exchange. HMRC expect most people who are affected will be well aware of these changes and David was explicitly told by his bank that they were reporting his account under CRS. We will treat this as a prompted disclosure as David knew the information had been supplied to HMRC and he therefore had reason to believe HMRC were about to find out about the undeclared income.

**Example 9**

Sarah had a bank account in a CRS reporting country and has not declared the interest she receives in that account. The account was closed in 2015 and because of this HMRC will not receive information about it under the Common Reporting Standard (CRS). Sarah becomes aware of the CRS and although her account will not be reported she decides to make a disclosure to HMRC. Because Sarah made her disclosure at a time when she had no reason to believe her undisclosed income was about to be discovered her disclosure will be treated as

unprompted.

Disclosure following an HMRC “nudge letter” is prompted.

### 120.34.7 “Quality”

Penalty template wording provides:<sup>47</sup>

In relation to disclosure “quality” includes timing, nature and extent.

## 120.35 Additional information

The additional information is set out in regulations<sup>48</sup> whose full name is too long to be used: Penalties Relating to Offshore Matters and Offshore Transfers (Additional Information) Regulations 2017. I refer to the “Additional Information Regs”.

Reg 3 Additional Information Regs provides:

The additional information required for the purposes of

- [1] paragraph 9(1B)(d) of Schedule 24 to the Finance Act 2007,
  - [2] paragraph 12(2B)(d) of Schedule 41 to the Finance Act 2008 and
  - [3] paragraph 14(2B)(d) of Schedule 55 to the Finance Act 2009,
- is that a person (“P”) must

- (a) tell HMRC whether or not regulations 4 or 5 (or both) apply to P; and
- (b) provide HMRC with the information specified in relation to those regulations set out in regulations 6 and 7 (as appropriate).

This concerns:

- (1) Enablers
- (2) Property holders

### 120.35.1 Enablers

Reg 4 Additional Information Regs provides:

4 This regulation applies to P if there is a person (“the enabler”) who

<sup>47</sup> Para 9(3) sch 24 FA 07/para 12(4) sch 41 FA 08/ para 14(4) sch 55 FA 09. Para 15(6) sch 18 F2A 17 is substantially the same: “In relation to disclosure or assistance, “quality” includes timing, nature and extent.”

<sup>48</sup> Authorised by Para 9(1C) sch 24 FA 07; para 12(2C) sch 41 FA 08; Para 14(2C) sch 55 FA 09

encouraged, assisted or otherwise facilitated the conduct by P giving rise to the penalty in question.

If so, reg 6 sets out the information required:

The additional information to be provided to HMRC where regulation 4 applies to P is

- (a) the name and address of the enabler;
- (b) a description of the enablers conduct that encouraged, assisted or otherwise facilitated the conduct by P giving rise to the penalty in question;
- (c) a description of how the first contact between P and the enabler was made and how the contact was maintained during the times when the enablers conduct encouraged, assisted or otherwise facilitated the conduct by P giving rise to the penalty in question; and
- (d) a description of all documents held by P relating to the enablers conduct that encouraged, assisted or otherwise facilitated the conduct by P giving rise to the penalty in question.

### 120.35.2 *Property holders*

Reg 5 Additional Information Regs provides:

This regulation applies to P if

- (a) P is the sole or a joint beneficial owner of an asset (“the asset”) situated or held in a territory outside the United Kingdom; and
- (b) the person holding the asset (“the asset holder”) is not P.

If so, reg 7 sets out the information required:

The additional information to be provided to HMRC where regulation 5 applies to P is

- (a) the name and address of any other joint beneficial owner of the asset; (b) the extent of Ps share of the beneficial ownership of the asset;
- (c) a description of all documents of title or other documents indicating Ps beneficial ownership of the asset;
- (d) details of where the asset is situated or held;
- (e) details of when and how P became a beneficial owner of the asset (including a description of all documents held by P

- relating to the acquisition of Ps beneficial ownership of the asset);
- (f) a description of all changes in the arrangements for the ownership of the asset since P became a beneficial owner of it (including the date of any change in the arrangements and a description of all documents held by P relating to such changes);
  - (g) the names and last known addresses of all persons who have been asset holders of the asset during Ps beneficial ownership of it; and
  - (h) in relation to an asset holder who is not an individual, the name and business address (if known) of any director, senior manager, employee or agent of the asset holder who has advised or assisted P in relation to Ps beneficial ownership of the asset.

### 120.35.3 *Misc provisions*

Reg 2 Additional Information Regs provides:

In these Regulations

“asset” has the meaning given in section 21(1) of the Taxation of Capital Gains Act 1992, but also includes sterling;

“document” includes part of a document.

Reg 8 Additional Information Regs provides:

8 (1) A description of a document provided in accordance with regulations 6 or 7 must (as far as it is reasonably practicable to do so) state in relation to the document

- (a) the latest of the date when the document was made, prepared or, if appropriate, signed or executed;
  - (b) the person who made or prepared it (and the person on whose behalf it was made or prepared if different);
  - (c) the person who signed or executed the document (if appropriate);
  - (d) the person to whom the document was given or sent (if appropriate);
  - (e) a summary of its contents or the information recorded in the document;
  - (f) the location of the document or where it may be inspected.
- (2) The requirement to provide a description of a document in

accordance with regulations 6 or 7 may be met by the provision of the document in question to HMRC or a suitable copy of it.

(3) The provision of a document (or a copy of it) to HMRC as described in paragraph (2) is without prejudice to any requirement to produce the document in question to HMRC or power of HMRC to require the production of the document.

## 120.36 Amount of reduction for disclosure

### 120.36.1 *Benefit of disclosure: General*

Penalty template wording provides:<sup>49</sup>

(1) If a person who would otherwise be liable to a penalty of a percentage shown in column 1 of the Table (a “standard percentage”) has made a disclosure, HMRC must reduce the standard percentage to one that reflects the quality of the disclosure.

(2) But the standard percentage may not be reduced to a percentage that is below the minimum shown for it—

- (a) in the case of a prompted disclosure, in column 2 of the Table, and
- (b) in the case of an unprompted disclosure, in column 3 of the Table.

Thus in each case we have two Tables. It would have been easier to have just one, but there it is.

Para 13(3) and 13A(3) sch 41 FA 08 provide:

(3) Where the Table shows a different minimum for case A and case B-

- (a) the case A minimum applies if-
  - (i) the penalty is one under paragraph 1, and
  - (ii) HMRC become aware of the failure less than 12 months after the time when the tax first becomes unpaid by reason of the failure, and
- (b) otherwise, the case B minimum applies.

For asset-based penalties, para 8 sch 22 FA 16 provides:

(2) A reduction under sub-paragraph (1) must reflect the quality of the

---

<sup>49</sup> This wording (with trivial variants) is found 6 times: Para 10, 10A sch 24 FA 07; Para 13, 13A sch 41 FA 08; Para 15, 15A sch 55 FA 09.

disclosure, valuation and information provided (and for these purposes “quality” includes timing, nature and extent).

### 120.36.2 *Error-based penalty reduction*

The para 10 sch 24 FA 07 table provides:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
30%	15%	0%
70%	35%	20%
100%	50%	30%

The para 10A sch 24 FA 07 table provides:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
30%	15%	0%
37.5%	18.75%	0%
45%	22.5%	0%
60%	30%	0%
70%	45%	30%
87.5%	53.75%	35%
100%	60%	40%
105%	62.5%	40%
125%	72.5%	50%
140%	80%	50%
150%	85%	55%
200%	110%	70%

### 120.36.3 *Failure to notify reduction*

The para 13 sch 41 table is as follows:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
30%	case A: 10% case B: 20%	case A: 0% case B: 10%
70%	35%	20%
100%	50%	30%

The para 13A sch 41 table is as follows:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
30%	case A: 10% case B: 20%	case A: 0% case B: 10%
37.5%	case A: 12.5%	case A: 0%

	case B: 25%	case B: 12.5%
45%	case A: 15%	case A: 0%
	case B: 30%	case B: 15%
60%	case A: 20%	case A: 0%
	case B: 40%	case B: 20%
70%	45%	30%
87.5%	53.75%	35%
100%	60%	40%
105%	62.5%	40%
125%	72.5%	50%
140%	80%	50%
150%	85%	55%
200%	110%	70%

#### 120.36.4 Failure to make return reduction

The para 15 sch 55 table is as follows:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
70%	35%	20%
100%	50%	30%

Para 15(3) sch 55 FA 09 provides a minimum penalty:

But HMRC must not under this paragraph reduce a penalty below £300.

Subject to the £300 cap, the para 15A table is:

Standard %	Minimum % prompted disclosure	Minimum % unprompted
70%	45%	30%
87.5%	53.75%	35%
100%	60%	40%
105%	62.5%	40%
125%	72.5%	50%
140%	80%	50%
150%	85%	55%
200%	110%	70%

#### 120.36.5 Asset-based penalty reduction

Asset-based penalties do not follow the template of the others, so I deal with this separately, though the outcome is not so different.

Reg 2 Asset-based Penalty for Offshore Inaccuracies and Failures (Reductions for Disclosure and Co-operation) Regulations:

The maximum amount by which the standard amount of the asset-based penalty determined in accordance with paragraph 7 of Schedule 22 to the Finance Act 2016 (standard amount of asset-based penalty) may be reduced as required by paragraph 8 of that Schedule (reductions for disclosure and co-operation) is—

- (a) 50% of the standard amount in a case involving only unprompted disclosures, and
- (b) 20% of the standard amount in a case involving prompted disclosures.

### 120.36.6 RTC reduction amount

RTC does not need a table. Para 16 sch 18 F2A 2018 provides:

(4) Where a person liable to a penalty under paragraph 1 [RTC penalty] discloses a matter HMRC must reduce the penalty to one that reflects the quality of the disclosure.

(5) But the penalty may not be reduced below 100% of the offshore PLR.

### 120.37 Reduction: Special circumstances

#### Para 11(1) sch 24 FA 07

If they think it right because of special circumstances, HMRC may reduce a penalty<sup>50</sup> under paragraph 1, 1A or 2 [Error-based penalties].

#### Para 17 sch 18 F2A 17

(1) If they think it right because of special circumstances, HMRC may reduce a penalty under paragraph 1 [RTC penalty].

Para 11(2) sch 24 FA 07/para 17(2) sch 18 F2A 17 provide two exceptions:

In sub-paragraph (1) “special circumstances” does not include—

- (a) ability to pay, or
- (b) the fact that a potential loss of revenue from one taxpayer is balanced by a potential over-payment by another.

Does this apply if the over-payment is actual and not potential?

An example of special circumstances is HMRC delay: *Fuller v HMRC*

<sup>50</sup> Para 11(3) sch 24 FA 07/para 17(3) sch 18 F2A 17 provide a definition:

“In sub-paragraph (1) the reference to reducing a penalty includes a reference to—

- (a) staying a penalty, and
- (b) agreeing a compromise in relation to proceedings for a penalty.”

[2020] UKFTT 189 (TC).

## **120.38 Interaction of penalties**

### *120.38.1 Interaction of error-based and other penalties*

Para 12 sch 24 FA 07 provides:

(2) The amount of a penalty for which P is liable under paragraph 1 or 2 in respect of a document relating to a tax period shall be reduced by

[a] the amount of any other penalty incurred by P, or

[b] any surcharge for late payment of tax imposed on P,

if the amount of the penalty or surcharge is determined by reference to the same tax liability.

(2A) In sub-paragraph (2) “any other penalty” does not include a penalty under Part 4 of FA 2014 (penalty where corrective action not taken after follower notice etc) or Schedule 22 to FA 16 (asset-based penalty)

(3) In the application of section 97A of TMA 1970 (multiple penalties) no account shall be taken of a penalty under paragraph 1 or 2.

### *120.38.2 Interaction of asset-based penalty/RTC*

Para 6A sch 22 FA 16 provides:

Where-

(a) a penalty has been imposed on a person under paragraph 1 of Schedule 18 to FA 2017, and

(b) the potential loss of revenue threshold has been met,

only one asset-based penalty is payable by the person in relation to any given asset.

### *120.38.3 RTC/other penalties interaction*

Para 24 sch 18 F2A 17 provides:

(1) Where by reason of any conduct<sup>51</sup> a person-

(a) has been convicted of an offence, or

(b) is liable to a penalty otherwise than under paragraph 1 [RTC penalty] for which the person has been assessed (and the assessment has not been successfully appealed against or

---

51 Para 24(4) provides: “In sub-paragraph (1) “conduct” includes a failure to act.”

withdrawn),  
that conduct does not give rise to liability to a penalty under paragraph 1.

This relief is narrowed by a limited definition of penalties to which it applies:

- (2) In sub-paragraph (1) the reference to a penalty otherwise than under paragraph 1—
- (a) includes a penalty under paragraph 6 of Schedule 55 to FA 2009, but does not include penalties under any other provision of that Schedule, and
  - (b) includes a penalty under subsection (5) of section 93 of TMA 1970 but, does not include penalties under any other provision of that section.

Para 24 sch 18 F2A 17 provides another cap:

- (3) But the aggregate of-
- (a) the amount of a penalty under paragraph 1, and
  - (b) the amount of a penalty under paragraph 5 of Schedule 55 which is determined by reference to a liability to tax, must not exceed 200% of that liability to tax.

### 120.39 RTC Definitions

Para 2 sch 18 F2A 17 provides:

Paragraphs 3 to 13 have effect for the purposes of this Schedule.

The heavy lifting is in these definitions. The key term is “relevant offshore tax non-compliance” but that is reached by a cascade of definitions. I deal with these in their logical order (rather than the statutory order):

<b>Term</b>	<b>Defined</b>	<b>See para</b>
Tax	Para 12	120.40
Tax non-compliance	Para 8	120.41
Offshore tax non-compliance	Para 7	120.42
Involves Offshore Matter	Para 9-11	120.24
Original offshore tax non-compliance	Para 3	120.43
Relevant offshore tax non-compliance	Para 3	120.44

### 120.40 RTC: “Tax”

Para 12(1) sch 18 F2A 17 provides:

References to “tax” are (unless in the context the reference is more specific) to income tax, capital gains tax or inheritance tax.

CIOT RTC guidance provides:

Tax payable by the employee (e.g. on benefits in kind) is within RTC. PAYE is included if the employer no longer exists e.g. because it is liquidated. Otherwise PAYE is not within RTC.

NICs are outside RTC.

CT is also outside RTC, and para 12(2) sch 18 F2A 17 extends this to the former NRCGT (which was payable by companies but classified as CGT, not CT):

References to “capital gains tax” do not include capital gains tax payable by companies<sup>52</sup> in respect of chargeable gains accruing to them to the extent that those gains are NRCGT gains in respect of which the companies are chargeable to capital gains tax under section 14D or 188D of TCGA 1992 (see section 1(2A)(b) of that Act).

#### **120.41 RTC: “Tax non-compliance”**

Para 8(1) sch 18 F2A 17 provides:

“Tax non-compliance” means any of the following-

- (a) a failure to comply on or before the filing date<sup>53</sup> with an obligation under section 7 of TMA 1970<sup>54</sup> to give notice of chargeability to income tax or capital gains tax,
- (b) a failure to comply on or before the filing date with an obligation to deliver to HMRC a return or other document which is listed in sub-paragraph (3), or
- (c) delivering to HMRC a return or other document which [A] is listed in sub-paragraph (3) or (4) and

---

52 Para 12(3) sch 18 F2A 17 provides: “In sub-paragraph (2) “company” has the same meaning as in TCGA 1992.”

53 Para 8(2) sch 18 F2A 17 provides: “In sub-paragraph (1) -  
(a) “filing date”, in relation to a notice of chargeability or a return or other document, means the date by which it is required to be given, made or delivered to HMRC”.

54 See 115.2 (Duty to notify HMRC).

- [B] contains an inaccuracy which amounts to, or leads to-
- (i) an understatement of a liability to tax,
  - (ii) a false or inflated statement of a loss,<sup>55</sup> or
  - (iii) a false or inflated claim to repayment of tax.<sup>56</sup>

#### 120.41.1 *Para (3) list*

Failure to deliver a document in this list, or delivering an inaccurate document, counts as tax non-compliance. Para 8(3) sch 18 F2A 17 provides:

The documents relevant for the purposes of both of paragraphs (b) and (c) of sub-paragraph (1) are (so far as they relate to the tax or taxes shown in the first column)-<sup>57</sup>

<b>Tax</b>	<b>Document</b>	<b>Provision</b>	<b>See para</b>
IT/CGT	personal return	s.8(1) TMA	115.4
IT/CGT	trust return	s.8A(1) TMA	115.4
IT	partnership return	s.12AA(2)(3) TMA	
IT	pension scheme return	s.254 FA 2004	
IT	pension scheme information	reg 12 Retirement Benefits Schemes (Information Powers) Regs 1995	
CGT	NRCGT return	s.12ZB TMA [now abolished]	
IHT	IHT Account	s.216, 217 IHTA	119.5, 119.9

#### 120.41.2 *Para (4) list*

Delivering an inaccurate document in the para (4) list counts as tax non-compliance. Para 8(4) sch 18 F2A 17 provides:

The documents relevant for the purposes only of paragraph (c) of sub-paragraph (1) are (so far as they relate to the tax or taxes shown in the first column)-

<b>Tax</b>	<b>Document</b> <sup>58</sup>
------------	-------------------------------

55 Para 8(2) sch 18 F2A 17 provides: "In sub-paragraph (1)...

(b) "loss" includes a charge, expense, deficit and any other amount which may be available for, or relied on to claim, a deduction or relief".

56 Para 8(2) sch 18 F2A 17 provides: "In sub-paragraph (1) ...

(c) "repayment of tax" includes a reference to allowing a credit against tax."

57 I have slightly tweaked the layout and wording of this list, for clarity.

58 I have slightly tweaked the layout and wording of this list, for clarity.

IT/CGT	Return statement or declaration in connection with a claim for an allowance, deduction or relief
IT/CGT	Accounts in connection with ascertaining liability to tax
IT/CGT	Statement or declaration in connection with a partnership return
IT/CGT	Accounts in connection with a partnership return
IHT	Information/document under regulations under s.256 IHTA 1984
IHT	Statement or declaration in connection with a deduction exemption or relief.
IT/CGT/IHT	Any other document given to HMRC by a person (“P”) which is likely to be relied on by HMRC to determine, without further inquiry, a question about–
	(a) P’s liability to tax;
	(b) payments by P by way of or in connection with tax;
	(c) any other payment by P (including penalties);
	(d) repayments or any other kind of payment or credit to P.

The list is wide, as one would expect, but it does not cover everything.

## 120.42 “Offshore” non-compliance

Para 7 sch 18 F2A 17 provides:

(1) “Offshore tax non-compliance” means tax non-compliance which involves

[a] an offshore matter or

[b] an offshore transfer,

whether or not it also involves an onshore matter.

(2) Tax non-compliance “involves an onshore matter” if and to the extent that it does not involve an offshore matter or an offshore transfer.

See 120.24 (Offshore Matter/Transfer: RTC).

## 120.43 Original tax non-compliance

This term is defined in passing in para 3(1)(a) sch 18 F2A 17:

At the end of the 2016-17 tax year a person has “relevant offshore tax non-compliance” to correct if-

- (a) Conditions A and B<sup>59</sup> are satisfied in respect of any offshore tax non-compliance committed by that person on or before 5 April 2017 (“the original offshore tax non-compliance”)

---

<sup>59</sup> See 120.20.1 (Cond. A: Uncorrected error); 120.44.2 (Condition B: PLR).

## 120.44 Relevant tax non-compliance

Armed with these definitions, we can turn to the definition of “relevant offshore tax non-compliance”. Para 3(1) sch 18 F2A 17 provides:

At the end of the 2016-17 tax year a person has “relevant offshore tax non-compliance” to correct if-

- (a) Conditions A and B are satisfied in respect of any offshore tax non-compliance committed by that person on or before 5 April 2017 (“the original offshore tax non-compliance”), and
- (b) Condition C will be satisfied on the relevant date (see paragraph 6).

### 120.44.1 *Cond. A: Uncorrected error*

Para 4 sch 18 F2A 17 provides:

Condition A is that the original offshore tax non-compliance has not been fully corrected before the end of the tax year 2016-17 (see paragraph 13).

### 120.44.2 *Condition B: PLR*

Para 5 sch 18 F2A 17 provides:

Condition B is that-

- (a) the original offshore tax non-compliance involved a potential loss of revenue when it was committed, and
- (b) if the original offshore tax non-compliance has been corrected in part by the end of the tax year 2016-17, the uncorrected part at that time involved a potential loss of revenue.

### 120.44.3 *Correction in part*

Para 3(2) sch 18 F2A 17 provides:

Where the original offshore tax non-compliance committed by a person has been corrected in part by the end of the tax year 2016-17, the person’s “relevant offshore tax non-compliance” is the uncorrected part of the original offshore tax non-compliance.

## 120.45 **Cond. C: Assessable in 2017**

Para 6 sch 18 F2A 17 provides:

- (1) Condition C is that
  - [i] on the relevant date
  - [ii] it is lawful, on the assumptions set out in sub-paragraph (2),
  - [iii] for HMRC to assess the person concerned to any tax
  - [iv] the liability to which would have been disclosed to or discovered by HMRC if on that date-
    - (a) where none of the original offshore tax non-compliance was corrected before the end of the 2016-17 tax year, HMRC were aware of the information missing as a result of the failure to correct that tax non-compliance, or
    - (b) where the original offshore tax non-compliance was corrected in part before that time, HMRC were aware of the information missing as a result of the failure to correct the rest of that tax non-compliance.

This brings in time limits.

Para 6 sch 18 F2A 17 provides:

- (2) The assumptions are-
  - (a) that paragraph 26 [extended time limit]<sup>60</sup> is to be disregarded, and
  - (b) where the tax at stake is inheritance tax, that the relevant offshore tax non-compliance is not corrected before the relevant date

What is the point of para (b)?

#### 120.45.1 *The relevant date*

Para 6 sch 18 F2A 17 provides:

- (3) In this paragraph “the relevant date” is-
  - (a) where the tax at stake is income tax or capital gains tax, 6 April 2017, and
  - (b) where the tax at stake is inheritance tax, the day after the day on which this Act is passed.<sup>61</sup>

2016–17 is not within the scope of RTC, as non-compliance did not exist on 5 April 2017. Errors in this year are governed by the normal penalty

---

<sup>60</sup> See 115.18 (RTC time limit: 5/4/21).

<sup>61</sup> The Act was passed on 16 Nov 2017 so the relevant date for IHT is 17 Nov 2017.

provisions.

**120.46 Correcting non-compliance**

Para 13 sch 18 F2A 17 provides:

- (1) This paragraph sets out how offshore tax non-compliance may be corrected.
- (2) References to the correction of offshore tax non-compliance of any description are to the taking of any action specified in this paragraph as a means of correcting offshore tax non-compliance of that description.

The concept of “correcting” offshore tax non-compliance is defined 3 times:

<b>Failure</b>	<b>Para</b>
Notify IT/CGT	13(3)(4)
Deliver return	13(5)(6)
Inaccurate return	13(7)(8)

The legislation may be easier to follow if these sub-paragraphs are set out side by side.

<i>Para 13(3): Failure to notify</i>	<i>Para 13(5): No return</i>	<i>Para 13(7): Incorrect return</i>
Offshore tax non-compliance consisting of a failure to notify chargeability may be corrected by-	Offshore tax non-compliance consisting of a failure to make or deliver a return or other document may be corrected by giving HMRC the relevant information by-	Offshore tax non-compliance consisting of making and delivering a return or other document containing an inaccuracy may be corrected by giving HMRC the relevant information by-

(a) [i] giving the requisite notice to HMRC (unless before doing so the person has received a notice requiring the person to make and deliver a tax return) and

[ii] giving HMRC the relevant information by any means mentioned in paragraph (b),

(b) giving HMRC the relevant information-

(i) by making and delivering a tax return,

(a) making or delivering the requisite return or document,

(a) in the case of an inaccurate tax document, amending the document or delivering a new document,

(ii) using the digital disclosure service or any other service provided by HMRC as a means of correcting tax non-compliance,

(b) using the digital disclosure service or any other service provided by HMRC as a means of correcting tax non-compliance,

(b) using the digital disclosure service or any other service provided by HMRC as a means of correcting tax non-compliance,

(iii) communicating it to an officer of Revenue and Customs in the course of an enquiry into the person’s tax affairs, or

(c) communicating it to an officer of Revenue and Customs in the course of an enquiry into the person’s tax affairs, or

(c) communicating it to an officer of Revenue and Customs in the course of an enquiry into the person’s tax affairs, or

(iv) using a method agreed with an officer of Revenue and Customs.

(d) using a method agreed with an officer of Revenue and Customs.

(d) using a method agreed with an officer of Revenue and Customs.

“Relevant information” is also defined three times:

*Para 13(4): Failure to notify*

In sub-paragraph (3) “relevant information” means information relating to offshore tax that-

*Para 13(6): No return*

(6) In subsection (5) “relevant information” means information relating to offshore tax that-

*Para 13(8): Incorrect return*

(8) In sub-paragraph (7) “relevant information” means information relating to offshore tax that-

(a) had the requisite notice been given in time and the person given a notice to make and deliver a tax return, would have been required to be included in the tax return, and

(a) should have been included in the return or other document, and

(a) should have been included in the return but was not (whether due to an omission or the giving of inaccurate information), and

(b) would have enabled or assisted HMRC to calculate the offshore tax due.

(b) would have enabled or assisted HMRC to calculate the offshore tax due.

(b) would have enabled or assisted HMRC to calculate the offshore tax due.

While this is not completely clear, it is suggested that relevant information means information in para (a) or (b) (it does not have to be both (a) and (b)).

CIOT RTC guidance provides:

If an estimated liability is provided in the absence of accurate information (e.g. because the taxpayer could not obtain the information or because another figure was used rather than getting a professional asset valuation) then this should be explained. The figure provided should be correct to the best of the taxpayer's knowledge and belief. If the eventual tax liabilities are materially higher, then HMRC may revisit FTC [failure to correct] penalties as this might indicate the taxpayer was not compliant with RTC. HMRC recommend erring on the side of caution when stating the amounts of tax owed

Para 13(9) sch 18 F2A 17 provides:

In this paragraph "offshore tax", in relation to any offshore tax non-compliance, means tax corresponding to the offshore PLR in respect of the non-compliance.

#### 120.46.1 *Multiple parties*

CIOT RTC guidance provides:

In the case of a single report being prepared for multiple parties (for example trustee, underlying companies and beneficiaries) it will still be necessary for each party to register separately for the WDF and for the report to be submitted for each party

### 120.46.2 *Trustees*

CIOT RTC guidance provides:

In the case of a change of trustees but where the trust remains the same settlement, the new trustees can and should make the correction even if the non-compliance occurred during the trusteeship of a previous trustee. The liability is that of the trust and anyone authorised to act on behalf of the trust, including new trustees, can make the correction.

More analytically, new trustees can and should correct non-compliance of old trustees because trustees are treated as a single and continuing body.

### 120.46.3 *Deceased taxpayer*

CIOT RTC guidance provides:

Personal representatives (PRs) do not inherit the deceased's "relevant offshore tax non-compliance" so they have nothing to correct

If a taxpayer dies after the end of the RTC period without having corrected "relevant offshore tax non-compliance", in line with their normal practice, HMRC will not charge FTC penalties on the deceased's estate

There may be occasions where other parties (not the PRs) may have a requirement to correct – such as trustees – and this should always be considered

## **120.47 RTC: Nil liability disclosure**

HMRC RTC guidance provides:

If the advice you have received is that no further tax is due, but the matter is not clear cut, you can use the internet to provide HMRC with the relevant information without accepting that you have unpaid liabilities.

To do this you should register to make an offshore disclosure via HMRC's digital disclosure service. Once you have done this you will be sent a Disclosure Reference Number (DRN).

The DRN will consist of the letters 'WDF' followed by a series of numbers. When you receive your DRN you should then complete the disclosure process on the digital disclosure service showing that you owe no tax.

At the same time as you submit your disclosure via the digital disclosure

service you should send a report that contains all of the relevant information to [ocu.hmrc@hmrc.gsi.gov.uk](mailto:ocu.hmrc@hmrc.gsi.gov.uk).

Your email must include your DRN and the words 'Requirement to Correct' in the subject heading.

Provided you give HMRC all the relevant information about the matter you will have made a correction under the RTC even if you do not agree that additional tax is due. As you have made a correction no FTC [failure to correct] penalty can be due.

HMRC will then consider the information you have provided to decide whether or not they agree that no tax is due....

**Information you must supply when making a disclosure that no tax is due**

HMRC can see no reason for you to make a disclosure that no tax is due except where you have doubt about whether tax is correctly due.

When making such a disclosure you should therefore

- [1] set out a full explanation of why you have doubt about whether tax is due and
- [2] set out all of the relevant facts that you took into account in deciding that no tax is due.

You should also provide an indication of the amount of income, gains and similar that you think are not liable to tax as a result of your decision.

If you do this, provided the information you supply is accurate, the penalties for a Failure to Correct will not be due if it later transpires that additional tax is due as a result of the issue you have told us about (other existing penalties may apply).

HMRC will acknowledge the information has been supplied but the offer to pay no tax will not be formally accepted. HMRC will only contact you for further information if they are concerned that your conclusion is incorrect.

CIOT RTC guidance provides:

This process is a concession provided in the guidance that allows taxpayers, in limited circumstances, to provide less information than might strictly be required by the legislation and is designed to facilitate nil liability disclosures

HMRC will look at all nil disclosures and may query/investigate them  
HMRC will not seek a FTC penalty if all relevant facts are disclosed as in effect the taxpayer will be treated as having made a correction

This route is only for taxpayers not under enquiry and should not be

used where the taxpayer is under enquiry. Here the case officer should be contacted with a view to agreeing what should be supplied before 30 September

## 120.48 Application of TMA rules

Para 25 sch 18 F2A 17 provides:

Subject to the provisions of this Part of this Schedule, the following provisions of TMA 1970 apply for the purposes of this Part of this Schedule as they apply for the purposes of the Taxes Acts-

- (a) section 108 (responsibility of company officers),
- (b) section 114 (want of form), and
- (c) section 115 (delivery and service of documents).

## 120.49 RTC: Interpretation

Para 32 sch 18 F2A 17 provides minor definitions:

(1) In this Schedule (apart from the amendments made by Part 3)-  
“tax period” means a tax year or other period in respect of which tax is charged (or in the case of in-heritance tax, the year beginning with 6 April and ending on the following 5 April in which the liability to tax first arose);

“tax year”, in relation to inheritance tax, means a period of 12 months beginning on 6 April and ending on the following 5 April;

“United Kingdom” means the UK, including its territorial sea.

(2) A reference to making a return or doing anything in relation to a return includes a reference to amending a return or doing anything in relation to an amended return.

(3) References to delivery (of a document) include giving, sending and any other similar expressions.

(4) A reference to delivering a document to HMRC includes-

- (a) a reference to communicating information to HMRC in any form and by any method (whether by post, fax, email, telephone or otherwise, and

- (b) a reference to making a statement or declaration in a document.

(5) References to an assessment to tax, in relation to inheritance tax, are to a determination.

(6) An expression used in relation to income tax has the same meaning as in the Income Tax Acts.

(7) An expression used in relation to capital gains tax has the same meaning as in the enactments relating to that tax.

(8) An expression used in relation to inheritance tax has the same meaning as in IHTA 1984.

## 120.50 Assessment of penalties

Para 18 sch 55 FA 2009 provides:

(1) Where P is liable for a penalty under any paragraph of this Schedule HMRC must—

(a) assess the penalty,

(b) notify P, and

(c) state in the notice the period in respect of which the penalty is assessed.

...

(3) An assessment of a penalty under any paragraph of this Schedule—

(a) is to be treated for procedural purposes in the same way as an assessment to tax (except in respect of a matter expressly provided for by this Schedule),

(b) may be enforced as if it were an assessment to tax, and

(c) may be combined with an assessment to tax.

The rules for assessing a penalty are not the same as for assessing tax. In *Trustees of the Paul Hogarth Life Interest Trust v HMRC*.<sup>62</sup>

Paragraph 18(1) says it is P who must be assessed. Not only is that an express provision, it is a mandatory one, unlike it seems s 30AA TMA. Thus it is the relevant trustee or trustees who were given the s 8A(1) TMA notice who are to be assessed. This is also consistent with the requirements in s 8A(5) to read relevant references in other parts of TMA (notably s 29) by reference to the identity of the s 8A(1) notice recipient.

## 120.51 EU-law compliance

Rory Mullen QC comments:

92. ... it is surprising that the government would consider it suitable to enact legislation specifically aimed at those who carry on activities overseas.

93. It may be that the view has been taken that since the provisions operate historically they cannot have restricted rights of establishment

---

62 [2018] UKFTT 595 (TC) at [26].

or rights to free movement of capital. If that was the view it ignores the case law to the effect that the provisions on freedom of establishment and free movement of capital give specific expression to the prohibition on discrimination (see e.g. Case C-385/12 *Hervis Sport* at para 25).

94. It accordingly follows provision which discriminates against those who have exercised treaty rights in the past cannot be compatible with those treaty rights. This provision would appear to do so as it imposes additional obligations and penalties on such persons which would not apply if they had not paid their tax onshore.

95. It is of course possible that the difference in treatment which the provisions effect can be justified on the grounds of ensuring effective fiscal supervision. Indeed, the CJEU accepted in *X v Staatssecretaris van Financiën*<sup>63</sup> that extended periods of recovery could be justified when dealing with overseas tax liabilities. It is, however, difficult to see in the light of the CJEU's reasoning that this justification extends to the imposition of significant penalties simply because of the offshore element (see in particular paras 74, 75 and 83).<sup>64</sup>

A forthcoming case may shed further light on the issue. The EC say:

The Commission decided today to refer Spain to the Court of Justice of the EU for imposing disproportionate penalties on Spanish taxpayers for the failure to report assets held in other EU and EEA States (“Modelo 720”).

Currently, Spain requires resident taxpayers to submit information on the assets they hold abroad. This includes properties, bank accounts and financial assets. The failure to submit this information on time and in full is subject to sanctions that are higher than those for similar infringements in a purely domestic situation, and which may even exceed the value of assets held abroad.

The Commission considers that such sanctions for incorrect or belated compliance with this legitimate information obligation are disproportionate and discriminatory. They may deter businesses and private individuals from investing or moving across borders in the Single Market.

Such provisions are consequently in conflict with the fundamental

64 <https://www.taxchambers.com/wp-content/uploads/2018/05/Requirement-to-correct-tax-due-on-offshore-assets-3-May-2018-amended-9-May-2018.pdf>  
Rory Mullen QC is a member of Old Square Tax Chambers.

freedoms in the EU, such as the free movement of persons, the free movement of workers, the freedom of establishment, the freedom to provide services and the free movement of capital.<sup>65</sup>

## 120.52 RTC: Disguised remuneration

CIOT RTC guidance provides:

HMRC are updating both the RTC Guidance and the DR Settlement Terms Guidance to explain what will happen where a taxpayer has not finished the correction process on a DR settlement by 30 September 2018; indeed, the aim is for people to settle by 31 March 2019 in advance of the 5 April 2019 loan charge. The updated guidance will be published soon. It seems likely that HMRC's position will be that the DR Settlement Terms will fall to be treated as "any other service provided by HMRC as a means of correcting tax non-compliance" (para 13 (3)(b)(ii)) but this will not be confirmed until the updated guidance is published.

Some DR settlements must include liabilities by way of "voluntary restitution". HMRC's view is that any amounts that fall within "voluntary restitution" are not liabilities in need of correction at April 2017 (para 3(1)(b)). Consequently, they are outside the scope of RTC and no FTC [failure to correct] sanctions can arise in relation to them.

## 120.53 Public list of defaulters

In 1905, the Departmental Committee on Income Tax reported:

Besides the pecuniary penalties, publicity would be the most effectual and appropriate penalty for fraud. We recommend that the Board of Inland Revenue or the General Commissioners should be empowered to publish names and details in cases of gross fraud, whenever and in so far as they consider that course desirable.<sup>66</sup>

Statutory "naming and shaming" was introduced a century later. Section 94 FA 2009 provides:

- (1) The Commissioners may publish information about any person if—  
 (a) in consequence of an investigation conducted by the

---

65 EC Press Release IP/19/2774 (June 2019)

[http://europa.eu/rapid/press-release\\_IP-19-2774\\_en.htm](http://europa.eu/rapid/press-release_IP-19-2774_en.htm)

66 Report para 37.

- Commissioners, one or more relevant tax penalties<sup>67</sup> is found to have been incurred by the person, and
- (b) the potential lost revenue<sup>68</sup> in relation to the penalty (or the aggregate of the potential lost revenue in relation to each of the penalties) exceeds £25,000.
- (4) The information that may be published is—
- (a) the person’s name (including any trading name, previous name or pseudonym),
  - (b) the person’s address (or registered office),
  - (c) the nature of any business carried on by the person,
  - (d) the amount of the penalty or penalties and the potential lost revenue in relation to the penalty (or the aggregate of the potential lost revenue in relation to each of the penalties),
  - (e) the periods or times to which the inaccuracy, failure or action giving rise to the penalty (or any of the penalties) relates, and
  - (f) any such other information as the Commissioners consider it appropriate to publish in order to make clear the person’s identity.

The list is online, for readers who are curious, with about 300 names.<sup>69</sup>

### 120.53.1 *Trustees/controlling persons*

Section 94 FA 2009 provides:

---

67 Defined s.94(2) FA 2009: “A “relevant tax penalty” is—

- (a) a penalty under paragraph 1 of Schedule 24 to FA 07 (inaccuracy in taxpayer’s document) in respect of a deliberate inaccuracy on the part of the person,
- (b) a penalty under paragraph 1A of that Schedule (inaccuracy in taxpayer’s document attributable to deliberate supply of false information or deliberate withholding of information by person),
- (c) a penalty under paragraph 1 of Schedule 41 to FA 08 (failure to notify) in respect of a deliberate failure on the part of the person, or
- (d) a penalty under paragraph 2 (unauthorised VAT invoice), 3 (putting product to use attracting higher duty etc) or 4 (handling goods subject to unpaid excise duty) of that Schedule in respect of deliberate action by the person.”

68 Defined s.94(3) FA 2009: ““Potential lost revenue”, in relation to a penalty, has the meaning given by—

- (a) paragraphs 5 to 8 of Schedule 24 to FA 07, or
  - (b) paragraphs 7 to 11 of Schedule 41 to FA 08,
- in relation to the inaccuracy, failure or action to which the penalty relates.”

69 <https://www.gov.uk/government/publications/publishing-details-of-deliberate-tax-defaulters-pddd/current-list-of-deliberate-tax-defaulters>

(4A) Subsection (4B) applies where a person who is a body corporate or a partnership has incurred—

- (a) a penalty under paragraph 1 of Schedule 24 to FA 2007 in respect of a deliberate inaccuracy which involves an offshore matter or an offshore transfer (within the meaning of paragraph 4A of that Schedule), or
- (b) a penalty under paragraph 1 of Schedule 41 to FA 2008 in respect of a deliberate failure which involves an offshore matter or an offshore transfer (within the meaning of paragraph 6A of that Schedule).

(4B) The Commissioners may publish the information mentioned in subsection (4) in respect of any individual who—

- (a) controls the body corporate or the partnership (within the meaning of section 1124 of CTA 2010) [strict-sense control], and
- (b) has obtained a tax advantage<sup>70</sup> as a result of the inaccuracy or failure.

(4C) Subsection (4D) applies where one or more trustees of a settlement have incurred—

- (a) a penalty under paragraph 1 of Schedule 24 to FA 2007 in respect of a deliberate inaccuracy which involves an offshore matter or an offshore transfer (within the meaning of paragraph 4A of that Schedule), or
- (b) a penalty under paragraph 1 of Schedule 41 to FA 2008 in respect of a deliberate failure which involves an offshore matter or an offshore transfer (within the meaning of paragraph 6A of that Schedule).

(4D) The Commissioners may publish the information mentioned in subsection (4) in respect of any trustee who is an individual and who has obtained a tax advantage as a result of the inaccuracy or failure....

### 120.53.2 *Process*

Section 94 FA 2009 provides:

- (6) Before publishing any information about a person under subsection

---

<sup>70</sup> Section 94(16) FA 2009 Para 6(2) incorporates the GAAR definition of tax advantage by reference: “In this section ... “tax advantage” has the meaning given by section 208 of FA 2013.”

- (1) the Commissioners—
- (a) must inform the person that they are considering doing so, and
  - (b) afford the person reasonable opportunity to make representations about whether it should be published.
- (6A) Before publishing any information about an individual under subsection (4B) or (4D), the Commissioners—
- (a) must inform the individual that they are considering doing so, and
  - (b) afford the individual reasonable opportunity to make representations about whether it should be published.
- (7) No information may be published before the day when the penalty becomes final (or the latest day when any of the penalties becomes final).
- (8) No information may be published for the first time after the end of the period of one year beginning with that day (or that latest day).
- (9) No information may be published (or continue to be published) after the end of the period of one year beginning with the day on which it is first published.
- (10) No information may be published if the amount of the penalty is reduced under—<sup>71</sup>

<b>Provision</b>	<b>See para</b>
Para 10 sch 24 FA 2007	120.36.2
Para 10A sch 24 FA 2007	120.36.2
to the full extent permitted following an unprompted disclosure	
Para 13 sch 41 FA 2008, to the full extent permitted, or	120.36.3
para 13A sch 41 FA 2008	120.36.3
to the full extent permitted following an unprompted disclosure.	

### 120.53.3 *Publication rule: Critique*

We have seen the usual mission creep, together with an erosion of the minimum limit by inflation. The House of Lords Economic Affairs Committee say:

Naming and shaming provisions have subsequently been introduced to allow HMRC to publish the names of large corporations whose behaviour is consistently uncooperative and of promoters and participants in failed avoidance schemes.

---

<sup>71</sup> For clarity I have set this out in tabular form rather than the layout of the statute.

114. The extension of the naming sanction to taxpayers and promoters whose behaviour is legal, but of which HMRC disapproves, blurs an important boundary between those who break the law and those who do not.

115. We recommend that naming and shaming provisions should be restricted to those who have broken the law.<sup>72</sup>

But no-one has taken any notice of that.

#### 120.54 Public attitude(s) to compliance

One wonders what the public think of all this. In *Ruddigore*, Sir Ruthven Murgatroyd (Robin) is examined to see if he has complied with an ancestral obligation to commit a crime every day:

**Sir Roderic.** It is our duty to see that our successors commit their daily crimes in a conscientious and workmanlike fashion. It is our duty to remind you that you are evading the conditions under which you are permitted to exist.

**Robin.** Really, I don't know what you'd have. I've only been a bad baronet a week, and I've committed a crime punctually every day.

**Sir Roderic.** Let us inquire into this. Monday?

**Robin.** Monday was a Bank Holiday.

**Sir Roderic.** True. Tuesday?

**Robin.** On Tuesday I made a false income-tax return.

**All.** Ha! ha!

**Sir Rupert.** That's nothing.

**Sir Jasper.** Nothing at all.

**Sir Conrad.** Everybody does that.

**Sir Gilbert.** It's expected of you.

That was 1887. Since 2007 we have seen new penalty regimes culminating in 2017 with RTC and the attempt to change corporate culture by the criminal offence of failing to prevent tax evasion.<sup>73</sup> Has the joke had its day? Discuss.

---

73 See 120A.1 (Failure to prevent evasion).

## COMMON REPORTING STANDARD

121.1

### 121.1 CRS & other information sources

HMRC obtain information about Beneficial Ownership/Controlling Persons from:

- (1) Automatic Exchange of Information (AEOI) agreements:
  - (a) Common Reporting Standard (CRS)<sup>1</sup>
  - (b) Council Directive 2011/16/EU (Administrative co-operation in the field of taxation); this provides for exchange of information between member states (it applies CRS throughout the EU)
  - (c) US Foreign Account Tax Compliance Act (FATCA); this requires financial institutions outside the USA to provide information about US persons to the IRS. Under the USA/UK Intergovernmental Agreement (IGA), the US provides the UK with data on US accounts of UK residents.
  - (d) Agreements with Gibraltar/Jersey/Guernsey/Isle of Man. Under these agreements, each government makes annual automatic exchange of information relating to financial accounts of financial institutions in their territory which belong to residents of the other territory.
- (2) MLR 2017, which provides for trust registration, known as TRS
- (3) Beneficial Ownership registers:
  - (a) UK companies/LLPs: Persons with Significant Control register<sup>2</sup>

---

1 Standard for Automatic Exchange of Financial Account Information  
<http://www.oecd.org/tax/automatic-exchange/common-reporting-standard/>

2 Part 21A (s.790A-790ZG) Companies Act 2006.

- (b) Equivalents in foreign jurisdictions<sup>3</sup>
- (c) Overseas entities owning UK land (forthcoming)<sup>4</sup>

This chapter considers CRS and the next chapter considers MLR; I hope to consider others in a future edition. But a full discussion would need several volumes.

CRS and MLR also address the topic of AML/KYC (anti-money laundering/know your client), also known as due diligence, but the topic of this chapter is the reporting of Beneficial Ownership/Controlling Persons.

## 121.2 Common Reporting Standard

CRS has vocabulary and concepts of its own, and it is not possible to discuss it without using its terminology. CRS helpfully capitalises the initial letter of defined terms and I adopt that here.

In outline: Financial Institutions report to their local tax authority (the Competent Authority) on Reportable Accounts held by Reportable Persons resident in Reportable Jurisdictions. Competent Authorities exchange this information between themselves.

### 121.2.1 Guidance on CRS

CRS has attracted what readers may regard as a surfeit of guidance.

OECD provide:

- A commentary (“CRS commentary”)
- CRS Implementation Handbook 2<sup>nd</sup> edition April 2018
- OECD CRS FAQ<sup>5</sup>

---

3 British Overseas Territories will be required to establish public registers of company beneficial owners in 2023; s.51 Sanctions and Anti-Money Laundering Act 2018.

4 See draft Registration of Overseas Entities Bill:  
<https://www.gov.uk/government/consultations/draft-registration-of-overseas-entities-bill>

Joint Committee Report on the Bill (2019):

<https://publications.parliament.uk/pa/jt201719/jtselect/jtovensent/358/358.pdf>

Government response (2019):

<https://www.gov.uk/government/publications/draft-registration-of-overseas-entities-bill-government-response-to-joint-committee-report>

5 The full title is: CRS-related Frequently Asked Questions

<http://www.oecd.org/tax/automatic-exchange/common-reporting-standard/>

- Model disclosure rules concerning CRS avoidance<sup>6</sup>

HMRC guidance is in the International Exchange of Information Manual.

STEP have issued two guidance notes which I call:

- STEP CRS guidance<sup>7</sup>
- STEP CRS guidance (2016)<sup>8</sup>

For a general discussion, see Ryan, “A crash course in the CRS”.<sup>9</sup> For the background, see Cusi *et al.*, “A Call to Action: From Evolution to Revolution on the CRS” [2019] BTR 166.

### 121.2.2 FATF recommendations

CRS refers at times to the FATF recommendations on money laundering (“FATF Recommendations”). This was issued in 1990 and revised in 1996, 2003 and 2012, so the 2012 edition is the current one, though that has been subsequently revised.<sup>10</sup>

### 121.3 Implementation in UK law

CRS is implemented in international law by a treaty, CRS Multilateral Competent Authority Agreement (MCAA) for the automatic exchange of information between tax authorities.

CRS is implemented in UK law by by s.222 FA 2013 and International Tax Compliance Regulations 2015 (ITCR).

Of course a foreign entity is concerned with the law and practice in the jurisdiction where it is located, rather than UK law. But I wonder how much the different jurisdictions actually vary. The major jurisdiction which has not implemented CRS is, needless to say, USA.

## 121.4 CRS navigation

### 121.4.1 Index of provisions

The provisions of CRS are laid out as follows:

**Section Topic**

- I Reporting Requirements
- II - VII Due Diligence Requirements
- VIII Definitions
- IX Implementation

Section VIII (definitions) is subdivided as follows:

<i>Definition</i>	<i>See para</i>		
		8 Cash Value	
<b>A. Reporting Financial Institution</b>		9 Pre-existing Account	121.33.6
1 Reporting Financial Institution	121.32	10 New Account	
2 Participating Jurisdiction FI	121.14	11 Pre-existing Individual Account	
3 Financial Institution	121.9	12 New Individual Account	
4 Custodial Institution	121.10	13 Pre-existing Entity Account	
5 Depository Institution	121.10	14 Lower Value Account	
6 Investment Entity	121.11	15 High Value Account	
7 Financial Asset	121.16	16 New Entity Account	
8 Specified Insurance Company		17 Excluded Account	
<b>B. Non-Reporting Financial Institution</b>		<b>D Reportable Account</b>	
1 Non-Reporting FI	121.32.1	1 Reportable Account	121.19
2 Governmental Entity	121.8.3	2 Reportable Person	121.20
3 International Organisation	121.8.3	3 Reportable Jurisdict'n Person	121.22
4 Central Bank		4 Reportable Jurisdiction	121.21.1
5 Broad Participation Retirement Fund		5 Participating Jurisdiction	121.21.2
6 Narrow Participation Retirement Fund		6 Controlling Persons	121.23
7 Governmental Pension Fund, etc ?		7 NFE	121.7
8 Qualified Credit Card Issue	121.34	8 Passive NFE	121.9
9 Exempt Collective Investment Vehicle		9 Active NFE	121.8
<b>C. Financial Account</b>		<b>E. Miscellaneous</b>	
1 Financial Account	121.17	1 Account Holder	121.17.6
2 Depository Account	121.17.1	2 ML/KYC Procedures	
3 Custodial Account	121.17.2	3 Entity	121.5
4 Equity Interest	121.17.3	4 Related Entity	121.5.1
5 Insurance Contract		5 TIN	
6 Annuity Contract		6 Documentary Evidence	
7 Cash Value Insurance Contract			

Terms which are undefined, or only defined indirectly, include:

Beneficiary 121.18

Distribution 121.18.1

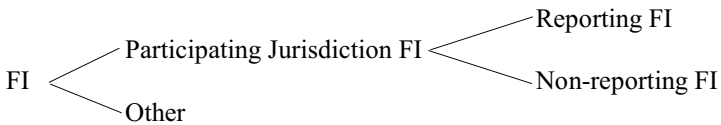

Income 121.6

### 121.4.2 Types of Entity: Summary

Types of Entity may be summarised by this table:

Financial Institutions may also be categorised as follows:

## 121.5 Entity

Section VIII (E)(3) CRS provides a commonsense definition:

- 3. The term “**Entity**” means a legal person or a legal arrangement, such as a corporation, partnership, trust, or foundation.

### 121.5.1 Related Entity

Section VIII (E)(4) CRS provides:

An Entity is a “**Related Entity**” of another Entity if either Entity controls the other Entity, or the two Entities are under common control. For this purpose control includes direct or indirect ownership of more than 50% of the vote and value in an Entity.

## 121.6 “Income”

Income is relevant in determining the type of Entity.

Income is not defined but should be ascertained by accountancy principles.

Ryan suggests that income includes repaying debt to a shareholder, but that would not normally be regarded as income.

### 121.6.1 *Passive income*

Income may be passive or non-passive/active. The distinction matters for determining whether a NFE is passive or active.

Commentary on Section VIII CRS provides:

126. In determining what is meant by “passive income”, reference must be made to each jurisdiction’s particular rules. Passive income would generally be considered to include the portion of gross income that consists of:

- a) dividends;
- b) interest;
- c) income equivalent to interest;
- d) rents and royalties, other than rents and royalties derived in the active conduct of a business conducted, at least in part, by employees of the NFE;
- e) annuities;
- f) the excess of gains over losses from the sale or exchange of Financial Assets that gives rise to the passive income described previously;
- g) the excess of gains over losses from transactions (including futures, forwards, options, and similar transactions) in any Financial Assets;
- h) the excess of foreign currency gains over foreign currency losses;
- i) net income from swaps; or
- j) amounts received under Cash Value Insurance Contracts.

Notwithstanding the foregoing, passive income will not include, in the case of a NFE that regularly acts as a dealer in Financial Assets, any income from any transaction entered into in the ordinary course of such dealer’s business as such a dealer.

The “passive income” is not used (or at least not much used) in domestic UK tax law, but it is used in international tax law.<sup>11</sup>

### 121.7 **Non-financial Entity (NFE)**

Section VIII (D)(7) CRS provides:

---

11 See for instance Katz Commission 5th Report “Basing the South African Income Tax System on the Source Or Residence Principle - Options and Recommendations” Chapter 4 - Definition of Active and Passive Income  
<http://www.treasury.gov.za/publications/other/katz/5.pdf>

7. The term “**NFE**” means any Entity that is not a Financial Institution.

NFEs may be active or passive.

## **121.8 Active NFE**

Section VIII (D)(9)(a) CRS provides:

9. The term “**Active NFE**” means any NFE that meets any of the following criteria:

There follow 8 categories of active NFE.

### *121.8.1 Mainly active income*

Section VIII (D)(9)(a) CRS provides:

9. The term “**Active NFE**” means any NFE that meets any of the following criteria:

- a) [i] less than 50% of the NFE’s gross income for the preceding calendar year or other appropriate reporting period is passive income<sup>12</sup> and
- [ii] less than 50% of the assets held by the NFE during the preceding calendar year or other appropriate reporting period are assets that produce or are held for the production of passive income;

For the purposes of this book, this is the most important category.

### *121.8.2 Listed NFE*

Section VIII (D)(9)(b) CRS provides:

9. The term “**Active NFE**” means any NFE that meets any of the following criteria ...

- b) the stock of the NFE is regularly traded on an established securities market or the NFE is a Related Entity of an Entity the stock of which is regularly traded on an established securities market;

### *121.8.3 Government/international Entity*

Section VIII (D)(9)(c) CRS provides:

---

<sup>12</sup> See 121.6.1 (Passive income).

9. The term “**Active NFE**” means any NFE that meets any of the following criteria ...

- c) the NFE is a Governmental Entity, an International Organisation, a Central Bank, or an Entity wholly owned by one or more of the foregoing;

#### 121.8.4 *Holding/services to NFE*

Section VIII (D)(9)(d) CRS provides:

9. The term “**Active NFE**” means any NFE that meets any of the following criteria ...

- d) [i] substantially all of the activities of the NFE consist of holding (in whole or in part) the outstanding stock of, or providing financing and services to, one or more subsidiaries that engage in trades or businesses other than the business of a Financial Institution,
- [ii] except that an Entity does not qualify for this status if the Entity functions (or holds itself out) as an investment fund, such as a private equity fund, venture capital fund, leveraged buyout fund, or any investment vehicle whose purpose is to acquire or fund companies and then hold interests in those companies as capital assets for investment purposes;

Section VIII (D)(9)(e) CRS provides:

9. The term “**Active NFE**” means any NFE that meets any of the following criteria ...

- e) the NFE is not yet operating a business and has no prior operating history, but is investing capital into assets with the intent to operate a business other than that of a Financial Institution, provided that the NFE does not qualify for this exception after the date that is 24 months after the date of the initial organisation of the NFE;

#### 121.8.5 *Non-FI in liquidation*

Section VIII (D)(9)(f) CRS provides:

9. The term “**Active NFE**” means any NFE that meets any of the following criteria ...

- f) [i] the NFE was not a Financial Institution [in the past five years, and
- [ii] is in the process of liquidating its assets or is reorganising with

the intent to continue or recommence operations in a business other than that of a Financial Institution;

#### 121.8.6 *Group treasury company*

Section VIII (D)(9)(g) CRS provides:

9. The term “**Active NFE**” means any NFE that meets any of the following criteria ...

- g) the NFE primarily engages in financing and hedging transactions with, or for, Related Entities that are not Financial Institutions, and does not provide financing or hedging services to any Entity that is not a Related Entity, provided that the group of any such Related Entities is primarily engaged in a business other than that of a Financial Institution; or

#### 121.8.7 *Non-profit organisation*

Section VIII (D)(9)(h) CRS provides:

9. The term “**Active NFE**” means any NFE that meets any of the following criteria ...

- h) the NFE meets all of the following requirements:
  - i) it is established and operated in its jurisdiction of residence exclusively for religious, charitable, scientific, artistic, cultural, athletic, or educational purposes; or it is established and operated in its jurisdiction of residence and it is a professional organisation, business league, chamber of commerce, labour organisation, agricultural or horticultural organisation, civic league or an organisation operated exclusively for the promotion of social welfare;
  - ii) it is exempt from income tax in its jurisdiction of residence;
  - iii) it has no shareholders or members who have a proprietary or beneficial interest in its income or assets;
- iv) the applicable laws of the NFE’s jurisdiction of residence or the NFE’s formation documents do not permit any income or assets of the NFE to be distributed to, or applied for the benefit of, a private person or noncharitable Entity other than pursuant to the conduct of the NFE’s charitable activities, or as payment of reasonable compensation for services rendered, or as payment representing the fair market value of property which the NFE has purchased; and
- v) the applicable laws of the NFE’s jurisdiction of residence or the NFE’s formation documents require that, upon the NFE’s

liquidation or dissolution, all of its assets be distributed to a Governmental Entity or other non-profit organisation, or escheat to the government of the NFE's jurisdiction of residence or any political subdivision thereof.

### 121.9 Passive NFE

“Passive NFE” matters because its accounts may be Reportable Accounts.<sup>13</sup>

Section VIII (D)(8) CRS provides:

8. The term “**Passive NFE**” means any:
- (i) NFE that is not an Active NFE; or
  - (ii) an Investment Entity described in subparagraph A(6)(b) [fund-managed IE] that is not a Participating Jurisdiction Financial Institution.

A trust that is not a FI is likely to be a Passive NFE.

### 121.10 Financial Institution

“Financial Institution” matters, as a Reporting Financial Institution has reporting duties.

Section VIII (A)(3) CRS provides:

3. The term “**Financial Institution**” means
- [a] a Custodial Institution,
  - [b] a Depository Institution,
  - [c] an Investment Entity, or
  - [d] a Specified Insurance Company.

Custodial Institutions are (in short) security and brokerage firms.<sup>14</sup>

---

<sup>13</sup> See 121.19 (Reportable Account).

<sup>14</sup> Section VIII (A)(4) CRS provides:

- “4.[a] The term "Custodial Institution" means any Entity that holds, as a substantial portion of its business, Financial Assets for the account of others.
- [b] An Entity holds Financial Assets for the account of others as a substantial portion of its business if the Entity's gross income attributable to the holding of Financial Assets and related financial services equals or exceeds 20% of the Entity's gross income during the shorter of:
- (i) the three-year period that ends on 31 December (or the final day of a non-calendar year accounting period) prior to the year in which the determination is being made; or

Depository Institutions are banks.<sup>15</sup> The important category for this work is Investment Entity (IE).

### 121.11 Investment Entity

“Investment Entity” matters as an IE is a Financial Institution and not a NFE.

There are two categories of Investment Entity. I coin the following terminology:

CRS term	My Term	See para
Investment Entity described in subpara A(6)(a) of Section VIII	Fund-manager IE	121.12
Investment Entity described in subpara A(6)(b) of Section VIII	Fund-managed IE	121.13

#### 121.11.1 Exclusions

Section VIII (A)(6) CRS provides a rule which applies for both types of IE:

... The term “Investment Entity” does not include an Entity that is an Active NFE because it meets any of the criteria in [section VIII] subparagraphs D(9)(d) through (g).

That excludes:

- companies holding/providing services to NFEs
- Non-NFEs in liquidation
- group treasury companies

See 121.8 (Active NFE).

#### 121.11.2 FATF Recommendations

Section VIII (A)(6) CRS provides:

... This paragraph [Section VIII (A)(6) CRS, definition of IE] shall be interpreted in a manner consistent with similar language set forth in the definition of “financial institution” in the Financial Action Task Force Recommendations.<sup>16</sup>

### 121.12 Fund-manager IE

---

(ii) the period during which the Entity has been in existence.

<sup>15</sup> Section VIII (A)(5) CRS provides: “The term “Depository Institution” means any Entity that accepts deposits in the ordinary course of a banking or similar business.”

<sup>16</sup> See 121.2.2 (FATF recommendations).

These are two requirements:

- (1) A fund-manager requirement
- (2) An income requirement

### 121.12.1 *Fund-manager requirement*

Section VIII (A)(6)(a) CRS provides:

The term “**Investment Entity**” means any Entity:

- a) that primarily conducts as a business one or more of the following activities or operations for or on behalf of a customer:
  - i) trading in money market instruments (cheques, bills, certificates of deposit, derivatives, etc.); foreign exchange; exchange, interest rate and index instruments; transferable securities; or commodity futures trading;
  - ii) individual and collective portfolio management; or
  - iii) otherwise investing, administering, or managing Financial Assets or money on behalf of other persons;

I refer to activities within para (a)(i)-(iii) as “**Investment Activities**”.

### 121.12.2 *Income requirement*

Section VIII (A)(6) CRS provides:

An Entity is treated as primarily conducting as a business one or more of the activities described in subparagraph A(6)(a) [Investment Activities]...

if the Entity’s gross income attributable to the relevant activities equals or exceeds 50% of the Entity’s gross income during the shorter of:

- (i) the three-year period ending on 31 December of the year preceding the year in which the determination is made; or
- (ii) the period during which the Entity has been in existence.

What if there is no income? The Entity is not likely to be carrying on a business.

### 121.12.3 *Professional trust co*

A professional trust company carries on a business. It is typically a Fund-manager IE, on the basis that:

- (1) it has customers
- (2) it manages Financial Assets on behalf of customers
- (3) its income is attributable to Investment Activities

It is conceivable that a professional trust company is not a Fund-manager IE, eg, if the company is managing trusts (or mainly managing trusts) whose assets are not Financial Assets.

### 121.13 Fund-managed IE

Section VIII (A)(6)(b) CRS provides:

The term “**Investment Entity**” means any Entity...

- b)[A] the gross income of which is primarily attributable to investing, reinvesting, or trading in Financial Assets,
- [B] if the Entity is managed by another Entity that is
  - [i] a Depository Institution,
  - [ii] a Custodial Institution,
  - [iii] a Specified Insurance Company, or
  - [iv] an Investment Entity described in subparagraph A(6)(a) [Fund-manager IE]

There are two requirements here:

- (1) A managed-funds requirement
- (2) An income requirement

#### 121.13.1 *Managed-funds requirement*

The relevant part of the definition of Fund-managed IE requires:

the Entity is managed by another Entity that is

- [i] a Depository Institution,
- [ii] a Custodial Institution,
- [iii] a Specified Insurance Company, or
- [iv] an Investment Entity described in subparagraph A(6)(a) [Fund-manager IE]

#### 121.13.2 “*Managed by*”

OECD Commentary on Section VIII (A)(6)(b) provides:

17. ...

- [a] An Entity is “managed by” another Entity if the managing Entity performs, either directly or through another service provider, any of the activities or operations described in subparagraph A(6)(a) [Investment Activities] on behalf of the managed Entity.
- [b] However, an Entity does not manage another Entity if it does not have discretionary authority to manage the Entity’s assets (in

whole or part).

An Entity may be managed by more than one person. OECD Commentary addresses this:

17. ... Where an Entity is managed by a mix of Financial Institutions, NFEs or individuals, the Entity is considered to be managed by another Entity that is a Depository Institution, a Custodial Institution, a Specified Insurance Company, or an Investment Entity described in subparagraph A(6)(a) [Fund-manager IE], if any of the managing Entities is such another Entity.

STEP CRS guidance provides:

In a typical trust example, the PTC or the holding company (owned by the trust) enters into a contract with a corporate service provider to provide services that include ‘investing, administering, or managing Financial Assets or money’ on behalf of the trust or underlying holding company. As part of the services provided, the corporate service provider will provide a director (either an individual or corporate director) who will be directly responsible (with the other directors) for the investment of the underlying assets of the trust or holding company.

The corporate service provider will charge a fee for such services. The corporate service provider will, in many circumstances, provide services to other third parties. On occasion, the corporate service provider may provide such services only to the trust, holding company and other related entities.

10.3 The guidance in some IGA jurisdictions in relation to US FATCA confirmed that a trust can be treated as an FI if it receives services from a Trust and Corporate Service Provider (TCSP) that is itself an FI.

10.4 The guidance also considers the provision of directors to a company. While noting that the provision of individual employees or partners of a company services provider to serve as directors of an entity will not usually (on its own) cause the company to fall within the ‘managed by’ test, the guidance notes that a company with individual or corporate directors provided by a corporate services provider may, should it wish to do so, elect to be treated as being managed by such corporate service provider and so be an investment entity itself.

HMRC take the view that the provision of individual employees or partners of a company services provider (or similar) to serve as directors of an entity in the circumstances outlined above will cause the company to fall within the ‘managed by’ test.

### 121.13.3 *Income requirement*

The relevant part of the definition of Fund-managed IE requires:

- b) [A] the gross income of [the Entity] is primarily attributable to investing, reinvesting, or trading in Financial Assets,

Section VIII (A)(6)(b) CRS provides:

- [c] ... [ii] an Entity's gross income is primarily attributable to investing, reinvesting, or trading in Financial Assets for purposes of subparagraph A(6)(b),  
if the Entity's gross income attributable to the relevant activities equals or exceeds 50% of the Entity's gross income during the shorter of:
  - (i) the three-year period ending on 31 December of the year preceding the year in which the determination is made; or
  - (ii) the period during which the Entity has been in existence.

### 121.13.4 *Trusts*

A trust is typically a Fund-managed IE on the basis that:

- (1) It holds Financial Assets; and
- (2) It is managed by a Fund-manager IE.

But not all trusts meet the requirements. If not, then the trust is a NFE.

### 121.13.5 *Trusts: Underlying company*

An underlying company held by a trust is typically a Fund-managed IE, on the basis that:

- (1) The company holds Financial Assets and
- (2) It is managed by a Fund-manager IE.

But not all underlying companies meet the requirements. If not, then the underlying company is a NFE.

## 121.14 **Participating Jurisdiction FI**

Section VIII (A)(2) CRS provides:

- 2. The term “**Participating Jurisdiction Financial Institution**” means
  - (i) [A] any Financial Institution that is resident in a Participating Jurisdiction,  
[B] but excludes any branch of that Financial Institution that is located outside such Participating Jurisdiction, and
  - (ii) any branch of a Financial Institution that is not resident in a

Participating Jurisdiction, if that branch is located in such Participating Jurisdiction.

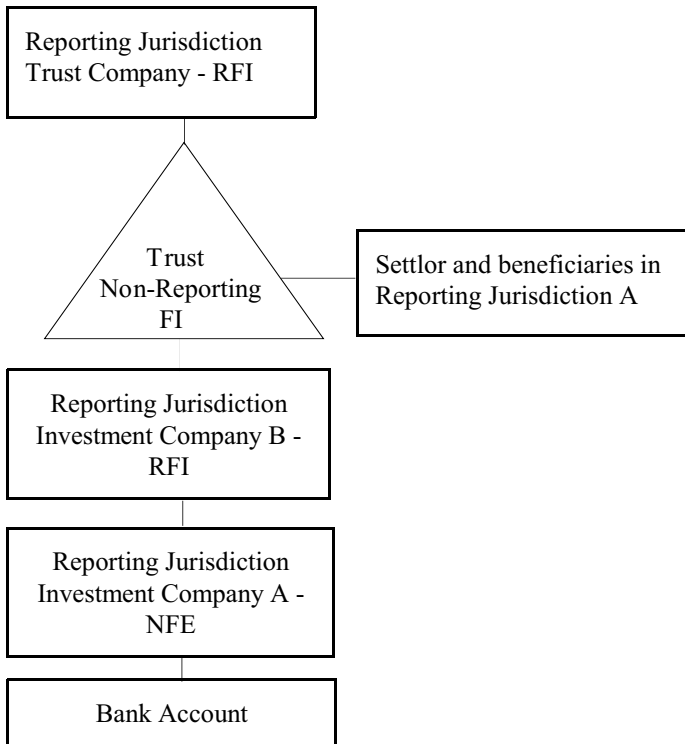

121.14.1 *Branch*

OECD Commentary on para VIII (A)(2) CRS provides:

6. A “branch” is a unit, business, or office of a Financial Institution that is treated as a branch under the regulatory regime of a jurisdiction or that is otherwise regulated under the laws of a jurisdiction as separate from other offices, units, or branches of the Financial Institution. A branch includes a unit, business, or office of a Financial Institution located in a jurisdiction in which the Financial Institution is resident, and a unit, business, or office of a Financial Institution located in the jurisdiction in which the Financial Institution is created or organised. All units, businesses, or offices of a Reporting Financial Institution in a single jurisdiction shall be treated as a single branch.

**121.15 Passive NFE held by a trust**

STEP CRS guidance provides:

11.1 In the above example, the Bank will obtain AML information about Company A.

Company A is an NFE in a jurisdiction that has implemented the CRS. Company A is owned by Company B. Company B is an RFI in a jurisdiction that has implemented the CRS. Company B is owned by a trust of which a corporate RFI is trustee.

- (a) The Bank will want to identify Controlling Persons for Company A. Under current guidance, it is unclear who the Controlling Persons of Company A are.
- (b) As a threshold matter, because Company A is owned by a Reporting FI in a Participating Jurisdiction, it is not entirely clear whether Company A should (as a policy matter) be required to identify its Controlling Persons, because Company B and the trust will have to identify their Account Holders and report them, if they are reportable.
- (c) Assuming that Company A is required to identify its Controlling Persons, it is unclear whether any individual would hold a controlling interest by ownership. Arguably, each Controlling Person of the trust may be treated as a Controlling Person of Company A. Alternatively, the senior managing official of Company A might be seen as the Controlling Person.

11.2 Company B will need to identify its Account Holders. In this example, its Account Holder is the trust, which is not a Reportable Person because it is an RFI.

Company B therefore has nothing to report.

11.3 The trustee will identify the Account Holders of the trust. This will include in the example in Figure 1: the settlor, any mandatory beneficiaries, and any discretionary beneficiaries who have received distributions. The trustee will report the full value of the trust assets in relation to the settlor and any mandatory beneficiaries, and the amounts distributed to any mandatory and discretionary beneficiaries.

11.4 Note: As pointed out above, there is no advantage in the Bank having to look through Company A, Company B, and the trust to the Controlling Persons of the trust. If the Bank is required to look through the trust, the Bank would disclose the value of the account by reference to the settlor and all of the beneficiaries, whether or not they have received a distribution. It should be noted that, under the US FATCA regulations, it is not necessary to look through Financial Institutions (such as the trust in this example). We understand that the OECD is still considering further guidance on the reporting of Controlling Persons in an ownership chain of entities.

## 121.16 Financial Asset

The term “Financial Asset” is used in many places, in particular, the definitions of:

- (1) Investment Entity
- (2) Custodial Institution
- (3) Custodial Account
- (4) Excluded Account

### 121.16.1 Categories of Financial Asset

Section VIII (A)(7) CRS identifies 7 categories of Financial Asset. The first 6 are:

7. The term “**Financial Asset**” includes

- [a] a security (for example,
  - [i] a share of stock in a corporation;
  - [ii] partnership or beneficial ownership interest in a widely held or publicly traded partnership or trust;
  - [iii] note, bond, debenture, or other evidence of indebtedness),
- [b] partnership interest,
- [c] commodity,
- [d] swap (for example,
  - [i] interest rate swaps,
  - [ii] currency swaps,
  - [iii] basis swaps,
  - [iv] interest rate caps,
  - [v] interest rate floors,
  - [vi] commodity swaps,
  - [vii] equity swaps,
  - [viii] equity index swaps,
  - [ix] and similar agreements),
- [e] Insurance Contract or
- [f] Annuity Contract

The last category is an interest in any of the above. Section VIII (A)(7) CRS provides:

7. The term “**Financial Asset**” includes ...

- [g] any interest (including a futures or forward contract or option) in
  - [i] a security,
  - [ii] partnership interest,

- [iii] commodity,
- [iv] swap,
- [v] Insurance Contract, or
- [vi] Annuity Contract.

This is an inclusive definition so other Financial Assets may be included. OECD Commentary on Section VIII CRS provides:

- 23. ...While [“Financial Asset”] does not refer to assets of every kind, it intends to encompass any assets that may be held in an account maintained by a Financial Institution with the exception of a non-debt, direct interest in real property.
- 24. ... the term “Financial Asset” does not include a non-debt, direct interest in real property; or a commodity that is a physical good, such as wheat.
- 25. Negotiable debt instruments that are traded on a regulated market or over-the-counter market and distributed and held through Financial Institutions, and shares or units in a real estate investment trust, would generally be considered Financial Assets.

#### 121.16.2 *Land not Financial Asset*

Section VIII (A)(7) CRS provides:

The term “Financial Asset” does not include a non-debt, direct interest in real property.

An underlying company is not transparent, so it may convert a non-Financial Asset (eg, land) into a Financial Asset (shares). OECD FAQ provides:

- [1] An Entity the gross income of which is primarily attributable to investing, reinvesting, or trading real property is not an Investment Entity (irrespective of whether it is professionally managed) because real property is not a Financial Asset...
- [2] If, instead, an Entity is holding an interest in another Entity that directly holds real property, the interest held by the first-mentioned Entity is a Financial Asset, and the gross income derived from that interest is to be taken into account to determine whether the Entity will meet the definition of Investment Entity under Section VIII, subparagraph (A)(6)(a)(iii) [Fund-manager IE] or paragraph (A)(6)(b) [Fund-managed IE].

#### 121.17 **Financial Account**

Section VIII (C)(1) CRS provides the definition. There are six or so categories of Financial Account:

1. The term “**Financial Account**” means an account maintained by a Financial Institution, and includes a Depository Account, a Custodial Account and:

- a) [i] in the case of an Investment Entity other than an Investment Entity that is a Financial Institution solely because it manages an Investment Entity described in subparagraph A(6)(b) [Fund-managed IE],
  - [ii] any equity or debt interest in the Financial Institution;
- b) [i] in the case of a Financial Institution not described in subparagraph C(1)(a),
  - [ii] any equity or debt interest in the Financial Institution, if the class of interests was established with a purpose of avoiding reporting in accordance with Section I; and
- c) any Cash Value Insurance Contract and any Annuity Contract issued or maintained by a Financial Institution, other than a noninvestment-linked, non-transferable immediate life annuity that is issued to an individual and monetizes a pension or disability benefit provided under an account that is an Excluded Account.

The term “Financial Account” does not include any account that is an Excluded Account.

#### 121.17.1 *Depository Account*

A Depository Account is a Financial Account.

Section VIII (C)(2) CRS provides:

2. The term “**Depository Account**” includes any commercial, checking, savings, time, or thrift account, or an account that is evidenced by a certificate of deposit, thrift certificate, investment certificate, certificate of indebtedness, or other similar instrument maintained by a Financial Institution in the ordinary course of a banking or similar business. A Depository Account also includes an amount held by an insurance company pursuant to a guaranteed investment contract or similar agreement to pay or credit interest thereon.

#### 121.17.2 *Custodial Account*

A Custodial Account is a Financial Account.

Section VIII (C)(3) CRS provides:

3. The term “**Custodial Account**” means an account (other than an Insurance Contract or Annuity Contract) for the benefit of another person that holds one or more Financial Assets.

#### 121.17.3 *Equity Interest: Partnership*

Section VIII (C)(4) CRS provides:

4. The term “**Equity Interest**” means,  
[a] in the case of a partnership that is a Financial Institution, either a capital or profits interest in the partnership.

#### 121.17.4 *Equity Interest: Trust*

Section VIII (C)(4) CRS provides:

4. The term “**Equity Interest**” means ...  
[b] In the case of a trust that is a Financial Institution, an Equity Interest is considered to be held by  
[i] any person treated as a settlor or beneficiary of all or a portion of the trust, or  
[ii] any other natural person exercising ultimate effective control over the trust.

This is an artificial definition, as even a settlor who is excluded has an Equity Interest.

It is considered that “any person *treated as* a settlor” just means any person who is a settlor.<sup>17</sup> In other words, the words “treated as” do not add much (if anything) to the meaning, but they do indicate that the word settlor is not to be understood strictly, ie it includes an economic settlor as well as a nominal settlor.

STEP CRS guidance provides:

#### **1.8 settlors who cannot be beneficiaries of trust**

There are many cases in which settlors will have established trusts from which they are formally and completely excluded as beneficiaries at inception (or subsequently). HMRC are of the view that in these circumstances the settlor’s equity interest (if the trust is a Reporting Financial Institution) should be reported as the full value of the trust assets and cannot be regarded as having a zero value. STEP has pointed out it will be helpful in future to be able to add information that the

---

17 See **App** 7.6 (Deemed/treated misused).  
FD\_121\_Common\_Reporting\_Standard.wpd

individual has been permanently excluded in order to avoid unnecessary enquiries by the settlor's home tax authority.

#### 121.17.5 *Pre-existing account*

Section VIII (C)(9) CRS provides a commonsense definition:

9. The term “Pre-existing Account” means a Financial Account maintained by a Reporting Financial Institution as of [xx/xx/ xxxx].

#### 121.17.6 “*Account Holder*”

Section VIII (E)(1) CRS provides

1. [a] The term “Account Holder” means the person listed or identified as the holder of a Financial Account by the Financial Institution that maintains the account.
- [b] A person, other than a Financial Institution, holding a Financial Account for the benefit or account of another person as agent, custodian, nominee, signatory, investment advisor, or intermediary, is not treated as holding the account for purposes of the Common Reporting Standard, and such other person is treated as holding the account.
- [c] In the case of a Cash Value Insurance Contract or an Annuity Contract, the Account Holder is any person entitled to access the Cash Value or change the beneficiary of the contract. If no person can access the Cash Value or change the beneficiary, the Account Holder is any person named as the owner in the contract and any person with a vested entitlement to payment under the terms of the contract. Upon the maturity of a Cash Value Insurance Contract or an Annuity Contract, each person entitled to receive a payment under the contract is treated as an Account Holder.

#### 121.18 “**Beneficiary**”

Section VIII (C)(4) CRS provides a commonsense definition:

4. ... A Reportable Person will be treated as being a beneficiary of a trust if such Reportable Person
  - [a] has the right to receive directly or indirectly (for example, through a nominee) a mandatory distribution or
  - [b] may receive, directly or indirectly, a discretionary distribution from the trust.

OECD CRS commentary provides:

For these purposes, a beneficiary who may receive a discretionary distribution from the trust only will be treated as a beneficiary of a trust if such person receives a distribution in the calendar year or other appropriate reporting period (i.e. either the distribution has been paid or made payable).<sup>18</sup>

STEP CRS guidance refers to this and continues:<sup>19</sup>

Note that this limitation is contained in the Commentary and not the Standard itself, which has a wider definition of beneficiary. Although jurisdictions implementing the Standard are encouraged to follow the Commentary when applying and interpreting the relevant domestic law provisions, jurisdictions may not do so, so the local law must always be considered.

#### 121.18.1 “Distribution”

This term is used in the definition of “beneficiary”. It is not defined. STEP CRS guidance provides:

12.1 There is guidance in the context of the UK IGAs (in the Jersey notes) that states that a payment to a beneficiary by way of loan is not a distribution in the year the loan is made, but only when it is written off...<sup>20</sup>

---

18 p.178 para 70.

[https://www.step.org/sites/default/files/Policy/Guidance\\_Note\\_CRS.pdf](https://www.step.org/sites/default/files/Policy/Guidance_Note_CRS.pdf)

20 The reference is to Taxation (International Tax Compliance) (Jersey) Regulations 2014 Guidance Notes (2016) p.58

<https://www.gov.je/SiteCollectionDocuments/Tax%20and%20your%20money/ID%20IGA%20Guidance%20Notes%2020160520%20jc3.pdf>

The relevant passage provides:

“Where a loan has been made to a settlor or beneficiary, the outstanding loan is considered a debt due to the trustees for the benefit of the trust.

The debt due is an asset of the trust, and no distribution arises. If and when the loan is written off, then there is a distribution of that amount (written off) to the debtor, which should be reported.

For example:

- Trustee A (as Trustee of The 1 Trust) makes a loan to Mr B (who is a beneficiary of The 1 Trust) of £500,000 on 1 January 2016
- The terms of the loan are that the sum of £500,000 is repayable to Trustee A

12.2 A loan that is on commercial terms (i.e. a loan that is not on beneficial terms) should not be treated as a distribution.

12.3 HMRC have been asked to consider whether an interest-free loan or a loan made on other than commercial terms (e.g. in circumstances where a beneficiary, if UK resident, would be treated as receiving a capital benefit from the trust for the purposes of Section 87 TCGA 1992) would be disclosable as a distribution in the year it is made or the year it is written off (but not the years when the loan remains outstanding).

### 121.18.2 *Arrangement similar to trust*

OECD CRS commentary continues:

The same is applicable with respect to the treatment of a Reportable Person as a beneficiary of a legal arrangement that is equivalent or similar to a trust, or foundation.<sup>21</sup>

STEP CRS guidance (2006) provides:

In paragraph 196 there is reference to ‘other similar legal arrangements’. It would be helpful to understand what is meant by this. It is not uncommon to set up partnerships as a vehicle for holding family wealth. For example: a grandfather contributes to a partnership for the primary benefit of his grandchildren. His son is appointed as general partner and controls the allocation of income and capital among the limited partners. The grandfather is not a controlling person, but if this were a trust (which is not the case) he would be. Is there any intention to treat a family partnership such as this ‘legal arrangement’ similar to a trust? The OECD Secretariat confirmed that in the example given the partnership would be treated as a partnership and not a ‘legal arrangement’ similar to a trust.

### 121.19 Reportable Account

“Reportable Account” matters, because, as its name suggests, it will be

---

on demand

- Mr B does repay £100,000 of the loan during the calendar year 2017
- On 30 June 2018 Trustee A decides that the balance of the loan (£400,000) will be written off
- For the purposes of reporting under the IGAs, Trustee A will make a report, relating to the calendar year 2018, detailing the distribution to Mr B of £400,000 during the calendar year 2018.”

<sup>21</sup> p.178 para 70.

reported.

Section VIII (D)(1) CRS provides:

1. The term “**Reportable Account**” means an account held by
  - [a] one or more Reportable Persons or
  - [b] [i] by a Passive NFE with one or more Controlling Persons that is a Reportable Person,
  - [ii] provided it has been identified as such pursuant to the due diligence procedures described in Sections II through VII.

## **121.20 Reportable Person**

“Reportable Person” matters because, as the name suggests, their details will be reported.

Section VIII (D)(2) CRS provides:

2. The term “Reportable Person” means a Reportable Jurisdiction Person other than:

There follow a list of 6 exceptions:

- (i) a corporation the stock of which is regularly traded on one or more established securities markets;
- (ii) any corporation that is a Related Entity of a corporation described in clause (i);
- (iii) a Governmental Entity;
- (iv) an International Organisation;
- (v) a Central Bank; or
- (vi) a Financial Institution.

## **121.21 Types of Jurisdiction**

### *121.21.1 Reportable Jurisdiction*

Section VIII (D)(4) CRS provides:

4. The term “Reportable Jurisdiction” means a jurisdiction
  - (i) with which an agreement is in place pursuant to which there is an obligation in place to provide the information specified in Section I, and
  - (ii) which is identified in a published list.

### *121.21.2 Participating Jurisdiction*

Section VIII (D)(5) CRS provides:

5. The term “Participating Jurisdiction” means a jurisdiction
  - (i) with which an agreement is in place pursuant to which it will provide the information specified in Section I, and
  - (ii) which is identified in a published list.

The current list of participating jurisdictions for automatic exchange under both the CRS and the DAC can be found at IEIM400090.

## 121.22 Reportable Jurisdiction Person

Section VIII (D)(3) CRS provides:

3. The term “Reportable Jurisdiction Person” means
  - [a] an individual or Entity that is resident in a Reportable Jurisdiction under the tax laws of such jurisdiction, or
  - [b] an estate of a decedent that was a resident of a Reportable Jurisdiction.

Para (3) goes on to define residence of partnerships:

For this purpose, an Entity such as a partnership, limited liability partnership or similar legal arrangement that has no residence for tax purposes shall be treated as resident in the jurisdiction in which its place of effective management is situated.

STEP CRS guidance (2016) discusses dual resident trusts:

We note the guidance about trusts being resident where the trustee is resident. We note that, in the case of corporate trustees (including both PTCs and regulated trust companies), the corporate trustee might well be incorporated and licensed in Jurisdiction A, but effectively managed and tax resident in Jurisdiction B. If one refers to Paragraph 97 in the context of guidance on the tax residence of entities, we consider that it would be correct to treat the trusts in these cases as essentially resident in both jurisdictions A and B with the necessary dual reporting. Is it possible in these circumstances for the trustee to rely on Paragraph 211 and only report in one of Jurisdictions A and B assuming both are Reporting Jurisdictions?

We note that this is permitted, for example, under the IGA between the Cayman Islands and the United Kingdom.

The OECD Secretariat confirmed that reporting would be required in both jurisdictions. The accommodation provided in paragraph 211 would only apply where the trust itself is treated as a separate tax resident person in a jurisdiction, and undertakes the required reporting. This is

likely to be of limited application. However the option to allow the use of service providers may provide similar relief.

### 121.23 Controlling person

Section VIII (D)(6) CRS begins with a commonsense definition:

- [a] The term “Controlling Persons” means the natural persons who exercise control over an Entity.

CRS then extends this so it becomes an artificial definition:

- [b] In the case of a trust, such term means<sup>22</sup>
  - [i] the settlor,
  - [ii] the trustees,
  - [iii] the protector (if any),
  - [iv] the beneficiaries or class of beneficiaries, and
  - [v] any other natural person exercising ultimate effective control over the trust, and
- [c] in the case of a legal arrangement other than a trust, such term means persons in equivalent or similar positions.

It follows that “Controlling Person” is not a wholly apt label for this concept. But one should not carp. It is a better term than “beneficial owner”.<sup>23</sup>

OECD CRS commentary provides:

In addition, any other natural person(s) exercising ultimate effective control over the trust (including through a chain of control or ownership) must also be treated as a Controlling Person of the trust.

With a view to establishing the source of funds in the account(s) held by the trust, where the settlor(s) of a trust is an Entity, Reporting Financial Institutions must also identify the Controlling Person(s) of the settlor(s) and report them as Controlling Person(s) of the trust.

#### 121.23.1 FATF Recommendations

---

22 The word “includes” would be more apt. OECD CRS commentary provides: “The settlor(s), the trustee(s), the protector(s) (if any), and the beneficiary(ies) or class(es) of beneficiaries, must always be treated as Controlling Persons of a trust, regardless of whether or not any of them exercises control over the trust. It is for this reason that the second sentence of subparagraph D(6) supplements the first sentence of such subparagraph.”

23 See 122.12 (Beneficial Owner: MLR meaning).

Section VIII (D)(6) CRS provides:

- [d] The term “Controlling Persons” must be interpreted in a manner consistent with the Financial Action Task Force Recommendations.

OECD CRS commentary provides:

132. Subparagraph D(6) sets forth the definition of the term “Controlling Persons”. This term corresponds to the term “beneficial owner” as described in Recommendation 10 and the Interpretative Note on Recommendation 10 of the [FATF Recommendations]<sup>24</sup> and must be interpreted in a manner consistent with such Recommendations, with the aim of protecting the international financial system from misuse including with respect to tax crimes.

### 121.23.2 *Settlor*

FATF Recommendations, which, as noted above, is relevant to CRS, provides a definition in its General Glossary:

*Settlers* are natural or legal persons who transfer ownership of their assets to trustees by means of a trust deed or similar arrangement.

For nominal settlors, see 94.5 (Nominal settlor).

### 121.23.3 *Joint settlors*

STEP CRS guidance provides:<sup>25</sup>

... an alternative scenario where (C) and (D) are joint settlors. For example, it may not be uncommon for a husband and wife to make a transfer of assets to a trust for their children and wider family. If, in these circumstances, C and D contribute assets to the trust from assets that they hold jointly, then it would be fair to regard both parties as ‘joint’ settlors for CRS purposes.<sup>26</sup>

HMRC confirmed that in this case they consider that both C and D would be disclosed as settlors and that the full value of the trust assets should be reported with respect to both C and D, notwithstanding the fact that each

---

24 See 121.2.2 (FATF recommendations).

25 CRS and Trusts (2017) para 1.4

[https://www.step.org/system/files/media/files/2020-03/Guidance\\_note\\_CRS\\_and\\_trusts.pdf](https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf)

26 But see 90.4 (Trust from joint account: Who is settlor).

had added only a proportion of the trust assets.

In circumstances where an entity is jointly owned by two or more persons it is necessary to identify all of the relevant Controlling Persons as settlors or as ‘any other natural person exercising effective ultimate control’ for CRS purposes.

#### 121.23.4 *Co settlor: change of owner*

STEP CRS guidance provides:<sup>27</sup>

##### **1.5 Example 4: settlors who are entities**

We note the guidance set out at paragraph 134 of the Commentary in the context of settlors who are entities.<sup>28</sup> In most cases, the ownership of an entity that acts as a settlor will remain with the same individual. It is however possible that during the lifetime of that individual, ownership of the entity that served as the settlor could change. In these circumstances, it is necessary to consider the Controlling Person of the entity at the time it contributes assets to the trust in order to determine who should be regarded as the settlor for CRS purposes. HMRC are of the view that it is also necessary to identify the Controlling Persons of the entity during each relevant year with respect to which the report is made. This is viewed as important on the basis that the entity may still have some continuing role with respect to the trust, e.g. powers of the trust assets or a power of revocation. In this case, however, the Controlling Persons with respect to the entity could be disclosed within the category of ‘any other natural person exercising effective ultimate control’.

#### 121.23.5 *Sub-funds*

STEP CRS guidance provides:<sup>29</sup>

##### 2.1 Example 8:

A establishes a trust for the benefit of A’s three children X, Y and Z on

---

<sup>27</sup> CRS and Trusts (2017) 1.4

[https://www.step.org/system/files/media/files/2020-03/Guidance\\_note\\_CRS\\_and\\_trusts.pdf](https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf)

<sup>28</sup> This passage provides: “With a view to establishing the source of funds in the account(s) held by the trust, where the settlor(s) of a trust is an Entity, Reporting Financial Institutions must also identify the Controlling Person(s) of the settlor(s) and report them as Controlling Person(s) of the trust.”

<sup>29</sup> CRS and Trusts (2017) 2.1, 2.2

[https://www.step.org/system/files/media/files/2020-03/Guidance\\_note\\_CRS\\_and\\_trusts.pdf](https://www.step.org/system/files/media/files/2020-03/Guidance_note_CRS_and_trusts.pdf)

discretionary trust. The trust is irrevocable and A is excluded from benefit. At the time of creation of the trust, X, Y and Z are teenage children and the trust is administered for them in undivided shares.

Some years later, X, Y and Z are now adults and the trustees take a decision to appoint specific assets to separate subfunds (i) one for the benefit of X and his children; (ii) one for the benefit of Y and his children; (iii) one for the benefit of Z and his children; and (iv) the remaining fund being held for the benefit of all of X, Y and Z and their children.

In these circumstances, for CRS purposes there could be one composite trust or there could be four, depending on the facts and circumstances as to how the trusts are administered.

- (a) If the trustee (or trustees) administers the sub-funds as one trust, any CRS reporting should be on the basis that it is one composite trust, notwithstanding the fact that separate sub-funds have been set up.
- (b) If the trustee (or trustees) administers some or all of the sub-funds as separate trusts, any CRS reporting should be on the basis that those subfunds are separate trusts.

2.2 Trustees could be regarded as treating the sub-funds as separate trusts where, for example (and this is not an exhaustive list),

- [a] a replacement or additional trustee is appointed in relation one sub-fund but not all;
- [b] different protectors are appointed in relation to each sub-fund;
- [c] there is no cross-over of beneficiaries in each sub-fund;
- [d] the trustees treat the sub-funds as separate trusts for tax purposes [ie the trustees make a sub-fund election].

HMRC's position is that the identification of sub-funds as one trust or separate trusts should follow the facts in each case and should be reported as separate trusts only where the facts demonstrate that separate trusts have been created.

I would have thought that the normal sub-fund/separate trust rules should apply.<sup>30</sup> That is perhaps what HMRC mean by the gnostic comment in the last paragraph.

### 121.23.6 *Beneficiaries*

OECD CRS commentary provides:

---

30 For the distinction between (1) separate trusts and (2) sub-funds of one trust, see 94.22.2 (Variation or resettlement?).

For beneficiary(ies) of trusts that are designated by characteristics or by class, Reporting Financial Institutions should obtain sufficient information concerning the beneficiary(ies) to satisfy the Reporting Financial Institution that it will be able to establish the identity of the beneficiary(ies) at the time of the pay-out or when the beneficiary(ies) intends to exercise vested rights. Therefore, that occasion will constitute a change in circumstances and will trigger the relevant procedures.

When implementing the Common Reporting Standard, a jurisdiction may allow Reporting Financial Institutions to align the scope of the beneficiary(ies) of a trust treated as Controlling Person(s) of the trust with the scope of the beneficiary(ies) of a trust treated as Reportable Persons of a trust that is a Financial Institution (see paragraphs 69-70 above).<sup>31</sup>

OECD CRS FAQ provides:

**6. Intermittent distributions to discretionary beneficiaries of a trust that is a Reporting Financial Institution**

In the case of a trust that is a Financial Institution, an Equity Interest is considered to be held by any person treated as the settlor or beneficiary of all or a portion of the trust. For these purposes, a beneficiary who may receive a discretionary distribution from the trust only will be treated as a beneficiary of the trust if such person receives a distribution in the calendar year or other appropriate reporting period (see Section VIII (C)(4) and related commentary). If a discretionary beneficiary of a trust that is a Financial Institution receives a distribution from the trust in a given year, but not in a following year, should the absence of a distribution in such following year be treated as an account closure? No, the absence of a distribution does not constitute an account closure, as long as the beneficiary is not permanently excluded from receiving future distributions from the trust.

STEP CRS guidance provides:

There is no need to report the death of a discretionary beneficiary as an ‘account closed’ matter as distinct from circumstances in which the beneficiary is formally excluded as a beneficiary during lifetime.

Further, in circumstances where a trust is wound up because all of the assets are appointed for the benefit of one of the discretionary beneficiaries, it is not then expected that all beneficiaries who have

---

31 Commentary on Section VIII, para 134.

previously received distributions in prior years (who can no longer benefit from the trust assets) would be referenced in the year of the distribution of the trust fund to another beneficiary.

#### **4.2 Identifying the class of discretionary beneficiaries for the purposes of reporting**

There are a number of cases where it is necessary under CRS to identify discretionary beneficiaries who may not have received a distribution in a particular accounting year. This is specifically the case in circumstances where the trust is a passive NFE where the relevant jurisdiction has not permitted the option of allowing FIs to identify discretionary beneficiaries as Controlling Persons only when they receive a distribution. In order to make the reporting of discretionary beneficiaries sensible and manageable, it would seem sensible that a discretionary beneficiary should only be treated as a Controlling Person where the discretionary beneficiary concerned is eligible to receive a distribution in the year concerned. We set out below some common scenarios below. In many cases these contingent or default beneficiaries may be totally unaware of the fact that they are named as beneficiaries in such a trust. HMRC's view is that where a trust is a passive NFE, it is a requirement of the EU Directive that all beneficiaries be identified as Controlling Persons, including named discretionary beneficiaries, regardless of any contingencies under which they might receive a benefit. In STEP's view, consideration should be given to the specific terms of the trust to determine whether any named individual can be regarded as a beneficiary of the trust in the relevant year.

#### **Beneficiaries include individuals X and Y and their children and remoter issue.**

The children and remoter issue are identified by reference to a class and not named individually and no distributions are made to them during the year. In this case it is only necessary to identify X and Y. Current, contingent or default beneficiaries who are only described by reference to a class and are not named and have not received distributions do not need to be identified as Controlling Persons.

#### **5. Beneficiaries receiving mandatory distributions**

5.1 This category of beneficiary may, if the income interest has been provided for the duration of their lifetime, be known as having a 'life interest' or 'fixed interest' in the trust income. It will be necessary to consider carefully the terms of the trust instrument to form a judgement as to whether an unqualified right to receive trust income does exist as opposed to one that is dependent upon the exercise of a trustee's discretion.

5.2 The Implementation Handbook makes reference to values being reported by a Reporting Financial Institution in the context of mandatory beneficiaries.

5.3 The Implementation Handbook states (at paragraph 220) in relation to trusts that are RFIs: ‘The account balance is the value calculated by the Reporting Financial Institution (the trust) for the purpose that requires the most frequent determination of value. For...mandatory beneficiaries, for example, this may be the value that is used for reporting to the Account Holder on the investment results for a given period. If the Financial Institution has not otherwise recalculated the balance or value for other reasons, the account balance for...mandatory beneficiaries may be the value of the interest upon acquisition or the total value of all trust property’.

5.4 For trusts that are passive NFEs, the Implementation Handbook states (at paragraph 236) that ‘The financial information to be reported will be the account balance or value of the account held by the trust and payments made or credited to such account. Each Controlling Person is attributed the entire value of the account, as well as the entire amounts paid or credited to the account, as shown below in Table 8.’

5.5 It is understood that if there is a class of one or more beneficiaries who are:

- (a) entitled to part of the income of a common trust fund; or
- (b) entitled to all the income of a separate sub-fund

then any reporting that needs to be made by reference to the mandatory beneficiary should be based on the relevant sub-fund or proportion of common fund that the beneficiary has an income interest in. HMRC’s position is that the identification of sub-funds as one trust or separate trusts should follow the facts in each case and should be reported as separate sub-funds only where the facts demonstrate that separate sub-funds have been created.

**5.6 Beneficiary A has a right to receive all the income from Trust A.** In this case A is reported as having a mandatory interest in the whole of Trust A.

**5.7 Beneficiary A has a right to receive X% of the income from the trust and B has the right to receive Y% of the income from the trust and the trustee reports to them on this basis.**

- (a) If the trust is an RFI, A is reported as having a mandatory interest in X% of the value of the trust assets and B is reported as having a mandatory interest in Y% of the value of the trust assets.
- (b) If the trust is a passive NFE, the full value of the trust assets are reported with respect to both A and B.

**5.8 A is treated as the grantor of Trust X for US tax purposes.**

A has a power of revocation (or equivalent) over the assets of Trust X. The income of Trust X is payable to, or on the order or direction of, A. A may direct the trustees to distribute the income to him or to other persons. No distributions are made to A or any other person. In this case, A is not reported as having a mandatory interest in the assets of Trust X as there is no mandatory obligation to distribute income to him (although he will be reported as the settlor and may be reportable as a person who has the power to exercise effective control over the trust).

**121.23.7 Protector**

“Protector” matters as a protector is a Controlling Person.

STEP CRS guidance provides:

6.3 In the drafting of the CRS framework surrounding trusts, protectors are dealt with very differently if one compares the situation of a trustee who acts as an RFI compared with a situation where the trustee is a passive NFE.

6.4 In the former case, the CRS framework provides for reporting in the context of trustees who are RFIs to be made of persons who are treated as having an ‘equity interest’ in the trust fund. In this context, Section VIII.C.4 of the Standard states that an equity interest is held ‘by any person treated as a settlor or a beneficiary of all or a portion of the trust or any other natural person exercising ultimate effective control over the trust’.

6.5 By contrast, in relation to a trust that is a passive NFE, it is necessary to identify Controlling Persons in relation to the trust. In the Standard, Section VIII D(6) defines ‘Controlling Person’ on the basis that the expression is intended to correspond to the term ‘beneficial owner’ as described in Recommendation 10 and the interpretative note on Recommendation 10 of [FATF Recommendations]<sup>32</sup>. In the case of a trust, Controlling Persons means ‘settlor, the trustees, the protector (if any) 1 the beneficiary or class of beneficiaries and any other natural person exercising ultimate effective control over the trust’.

6.6 We note that in its FAQ issued in June 2016, OECD takes the position that where a trust is a Reporting Financial Institution, a protector ‘must be treated as an account holder irrespective of whether it has effective control over the trust’. This response does not address the clear distinction in the Standard itself between the holders of equity interests

---

32 See 121.2.2 (FATF recommendations).

in a trust that is an RFI (see paragraph 6.4 above – which only includes protectors if they actually exercise ultimate effective control), when contrasted with the Controlling Persons definition of a trust that is a passive NFE (see paragraph 6.5 above which includes protectors regardless of the powers they hold). In this context, we note that the OECD's guidance does not constitute a legally binding interpretation of the Standard and that the RFIs should seek their own legal counsel before determining their formal reporting position, given that the legal basis for the position taken by OECD is unclear to us. We note that the OECD Secretariat has confirmed that it is the intention that protectors of trusts that are RFIs should be reported and the FAQ was discussed and approved in the relevant Working Party of the OECD. Until the legal basis for this is made clear in the CRS treaty, it is considered that there is a reasonable basis for forming the opposite conclusion.

STEP CRS guidance (2016) provides:

a. In some cases, there will be corporate protectors appointed with respect to a trust where an RFI is the trustee. If these corporate protectors have sufficiently wide powers, such that they would be potentially be regarded as Reportable Persons with respect to the trust if they were individuals (see comments in section 8 above on NPEECs), will it then be necessary to identify the distinct Controlling Persons of the corporate protector?

b. It is not uncommon for corporate protectors to be appointed who are regulated trustee service providers in their 'home' jurisdiction. Is it going to be necessary to perform an analysis on the Controlling Persons of such Entities (which is meaningless in tax reporting terms<sup>1</sup>), or would they not be regarded as Reportable Persons either because they are in effect Reporting Financial Institutions by analogy to the classification set out at paragraph 99 of the Handbook or because they are active NFEs?

In the OECD Secretariat's view it would be necessary to identify Controlling Persons in these circumstances. There was a discussion about certain types of structure where this could give rise to a problem, e.g. a corporate protector administered by a law firm which is owned by discretionary trusts established by the partners of that law firm. Following OECD Secretariat guidance would mean that Controlling Persons in relation to those discretionary trusts would also need to be disclosed even though they have no beneficial interest or control in the underlying trust of which the corporate protector acts as trustee. However, as noted in question 4, where the Reporting Financial Institution has information on the type of Controlling Person (such as being a protector), this must be included in the report. Doing so will

enable the tax administration receiving the information to<sup>33</sup> make appropriate use of the information in tax compliance actions.

## **121.24 Change of controlling persons**

### **121.24.1 Discretionary beneficiaries**

STEP TRS guidance provides:

#### **4.1 Excluding discretionary beneficiaries from a trust**

The answer to FAQ 6 in Section 1 of the June 2016 publication addresses the question of intermittent distributions to discretionary beneficiaries of a trust that is an RFI. It notes in particular that if discretionary beneficiary receives a distribution in a particular year but not in subsequent years, the absence of a distribution should not be treated in effect as an account closure ‘as long as the beneficiary is not permanently excluded from receiving future distributions from the trust’.

There is no need to report the death of a discretionary beneficiary as an ‘account closed’ matter as distinct from circumstances in which the beneficiary is formally excluded as a beneficiary during lifetime.

Further, in circumstances where a trust is wound up because all of the assets are appointed for the benefit of one of the discretionary beneficiaries, it is not then expected that all beneficiaries who have previously received distributions in prior years (who can no longer benefit from the trust assets) would be referenced in the year of the distribution of the trust fund to another beneficiary.

#### **4.2 Identifying the class of discretionary beneficiaries for the purposes of reporting**

There are a number of cases where it is necessary under CRS to identify discretionary beneficiaries who may not have received a distribution in a particular accounting year. This is specifically the case in circumstances where the trust is a passive NFE where the relevant jurisdiction has not permitted the option of allowing FIs to identify discretionary beneficiaries as Controlling Persons only when they receive a distribution. In order to make the reporting of discretionary beneficiaries

---

33 [Footnote original] To give an example, we are aware of a corporate protector controlled by the partners of a Bermuda law firm which is owned by trusts set up for the benefit of their families. If it is necessary to provide information about the Controlling Persons relating to the Protector it may be necessary to provide information about Controlling Persons in relation to these trusts. This information is totally meaningless in tax terms for determining who has a financial interest in the Trust of which the corporate protector acts as protector.

sensible and manageable, it would seem sensible that a discretionary beneficiary should only be treated as a Controlling Person where the discretionary beneficiary concerned is eligible to receive a distribution in the year concerned. We set out below some common scenarios below. In many cases these contingent or default beneficiaries may be totally unaware of the fact that they are named as beneficiaries in such a trust. HMRC's view is that where a trust is a passive NFE, it is a requirement of the EU Directive that all beneficiaries be identified as Controlling Persons, including named discretionary beneficiaries, regardless of any contingencies under which they might receive a benefit. In STEP's view, consideration should be given to the specific terms of the trust to determine whether any named individual can be regarded as a beneficiary of the trust in the relevant year.

- (a) **Example 9:** Beneficiaries include individuals X and Y and their children and remoter issue. The children and remoter issue are identified by reference to a class and not named individually and no distributions are made to them during the year. In this case it is only necessary to identify X and Y. Current, contingent or default beneficiaries who are only described by reference to a class and are not named and have not received distributions do not need to be identified as Controlling Persons.

#### 121.24.2 *Deceased settlor*

STEP CRS guidance provides:

**Example 5: dead settlors** – there is no express guidance on the position where a person regarded as the settlor of a trust for CRS is deceased. We understand if one considers both paragraph 222 and table 7 in the Implementation Handbook and one of the responses to the FAQs issued in June 2016 (at page 2 on reporting requirements in year of closure of a trust account), that one should reference the 'fact of closure'. We consider it is correct to say by analogy that in the year in which a settlor dies, his equity interest in relation to the trust will be regarded as having 'closed'. Logically, in subsequent years, a dead settlor will have no equity interest that is capable of being reported and equally cannot be a Controlling Person of a trust. This position is understood to be accepted by HMRC.

STEP CRS guidance provides:

13.1 Table 7 in the Handbook implies that if the equity interest comes to an end in a CRS Reporting Year, no information needs to be given by the

trustee about the prior payments to a beneficiary. This could arise because

- (a) a beneficiary is excluded (see FAQs on discretionary beneficiary);
- (b) a settlor dies;
- (c) a protector resigns (if the protector is reportable);
- (d) a trustee retires; or
- (e) the trust is wound up completely.

13.2 In this event, HMRC confirmed that they consider it is necessary also to report all other relevant activity during the calendar year.

### **121.25 Inter-trust transfer**

STEP CRS guidance provides:

14.1 Normally a transfer from one trust to another is not reportable because there is no distribution to a beneficiary of the trust where the trustee is exercising an express power or overriding power of appointment to make a trust to trust transfer.

14.2 The same considerations should apply where the recipient trust is a charitable trust.

14.3 However, HMRC note that a distribution to an entity recipient will result in the recipient entity being regarded as a beneficiary of the trust, so due diligence should be carried out by an RFI to identify whether the entity is a reportable person.

14.4 Whether a recipient is an entity or a natural person will be relevant where the recipient is a beneficiary of a trust that is a passive NFE and the RFI is identifying Controlling Persons. The entity is still identified and due diligence carried out on the entity, but additionally the RFI must establish and carry out due diligence on the Controlling Persons of that entity. The only difference would come where the beneficiary is a charity, because the charity would usually be an active NFE, where not an RFI in its own right.

### **121.26 Controlling person: Non-trusts**

CRS guidance provides:

133. For an Entity that is a legal person, the term “Controlling Persons” means the natural person(s) who exercises control over the Entity. “Control” over an Entity is generally exercised by the natural person(s) who ultimately has a controlling ownership interest in the Entity. A “control ownership interest” depends on the ownership structure of the legal person and is usually identified on the basis of a threshold applying a risk-based approach (e.g. any person(s) owning more than a certain percentage of the legal person, such as 25%). Where no natural person(s)

exercises control through ownership interests, the Controlling Person(s) of the Entity will be the natural person(s) who exercises control of the Entity through other means. Where no natural person(s) is identified as exercising control of the Entity, the Controlling Person(s) of the Entity will be the natural person(s) who holds the position of senior managing official.

### **121.27 Controlling person: Foundation**

CRS guidance provides:

136. In relation to legal persons that are functionally similar to trusts (e.g. foundations), Reporting Financial Institutions should identify Controlling Persons through similar customer due diligence procedures as those required for trusts, with a view to achieving appropriate levels of reporting.

137. Where a Reporting Financial Institution relies on information collected and maintained pursuant to AML/KYC Procedures for purposes of determining the Controlling Persons of an Account Holder of a New Entity Account (see subparagraph A(2)(b) of Section VI), such AML/KYC Procedures must be consistent with Recommendations 10 and 25 of the FATF Recommendations,<sup>34</sup> including always treating the settlor(s) of a trust as a Controlling Person of the trust and the founder(s) of a foundation as a Controlling Person of the foundation. For purposes of determining the Controlling Persons of an Account Holder of a Pre-existing Entity Account (see subparagraph D(2)(b) of Section V), a Reporting Financial Institution may rely on information collected and maintained pursuant to the Reporting Financial Institution's AML/KYC Procedures.

### **121.28 Control of controlling person**

STEP CRS guidance provides:

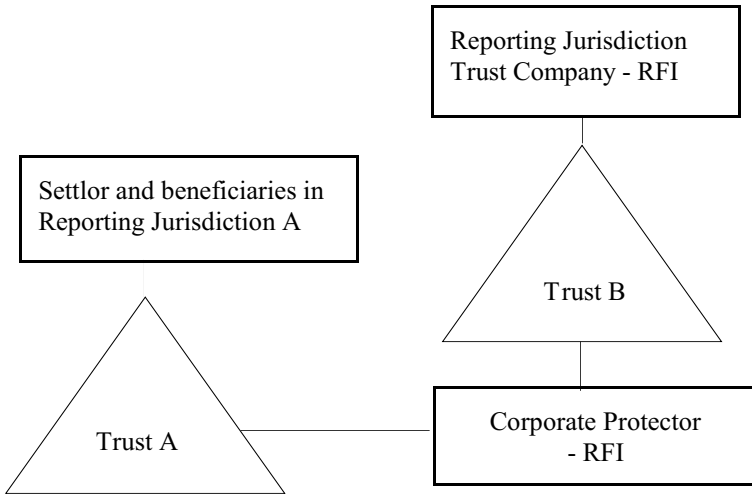

Paragraphs 214 and 230 of the Implementation Handbook confirm it is necessary to look through any entity that is a settlor, trustee, protector, etc to identify those holding an equity interest or being regarded as a Controlling Person of the trust.

7.1 Example 12: Trust A has a corporate trustee (RFI) and a corporate protector (RFI). Under the guidance it appears to be necessary to identify the Controlling Persons in relation to both the trustee and the protector,

---

<sup>34</sup> See 121.2.2 (FATF recommendations).

regardless of whether the trust is an RFI or a Passive NFE. In the example below (Figure 2), the corporate protector of Trust A is a professional protector administered by a law firm in a jurisdiction that has implemented the CRS. The corporate protector is owned by Trust B for the benefit of the partners of the law firm. The trustees of Trust B are the individual partners of the law firm. The Implementation Handbook suggests that it would be necessary to treat the individual trustees of Trust B as Controlling Persons of Trust A and disclose the full value of Trust A’s assets in relation to such persons, even though they have no interest in nor any control over such assets. The OECD are considering the extent to which it is necessary to identify Controlling Persons in a chain of entities. One way to mitigate the burden in this situation would be to provide guidance that it is not necessary to look through an RFI in these circumstances (assuming that, in this case, the corporate protector is an RFI because it conducts one of the enumerated activities as a business on behalf of customers). If that guidance were provided, the due diligence and reporting obligations would fall on (and only on) the RFI that is closest to the individuals to be reported.

7.2 Example 13: There are also a number of professional trust and protector companies where a controlling interest is held by an independent private equity fund. For example, an interest in a global fiduciary service provider corporate and fund services group has been acquired by a private equity house. The acquired company is a multi-jurisdictional business that provides trust and corporate services to a wide range of clients across the globe, administering over 10,000

structures for almost 6,000 clients from nine locations. The business has three core service lines: Corporate Administration, Trust Administration and Fund Services. This investment was made by a buyout fund. If you follow the above analysis, it would be necessary to identify and provide information about the Controlling Persons of the private equity fund as ultimate owners of the trust company, which include the investors in the buyout fund and private equity fund personnel. None of these people have any connection with the underlying trusts managed by the trust company that holds the relevant financial account. As the trust company, in this case, is an RFI (which is likely to be the case, save in relation to US service providers) and it was not necessary to look through the RFI, this information would not need to be disclosed.

7.3 We suggest that the solution to this issue is to conclude that in circumstances where a Controlling Person in relation to a trust is itself a regulated service provider that offers professional trustee services, as a practical matter there should be no need to identify the natural persons who own that regulated service provider but only the directors (or similar) who control that regulated service provider. We understand that the OECD is still considering the reporting of Controlling Persons in an ownership chain of entities.

### **121.29 Charities**

A charity is typically an Active NFE,<sup>35</sup> but it may be a FI.

STEP CRS guidance provides:

#### **8. Charitable trusts**

... many charities fall within the definition of FIs because they hold endowment funds that are professionally managed. It appears that under the CRS, these charities would be treated as RFIs. FATCA treats such charities as non-reporting. In HMRC's view, there are sound policy reasons for treating certain charities as RFIs. For further guidance on this point, see HMRC's charity guidance.<sup>36</sup>

### **121.30 Private trust companies**

STEP CRS guidance provides:

9.1 The only existing commentary that exists in OECD materials with

---

<sup>35</sup> See 121.8.7 (Non-profit organisation).

<sup>36</sup> <https://www.gov.uk/guidance/automatic-exchange-of-information-guidance-for-charities>

regard to private trust companies is in the Implementation Handbook on page 113. This comments on the role of a private trust company in the context of a ‘managed by’ test for the purposes of when an entity will be managed by another entity. This ignores the fact that many families use PTCs to act as trustee of trusts in a manner where the PTC conducts activity in its trustee capacity that is synonymous with that undertaken by professional trustee companies, i.e. the PTC would oversee in its trustee capacity the investment activity being undertaken by the trust, which would be regarded as an investment entity for this purpose.

9.2 It should be noted that, typically, the administration of the PTC will be required to be carried on by a trust and corporate service provider (TCSP) who is generally a person regulated in that capacity in many jurisdictions. Many of the offshore jurisdictions in their guidance on US FATCA make it clear that PTCs could, on the basis set out above, elect to be treated as FIs if, in similar circumstances, a professional trust company would be an FI.

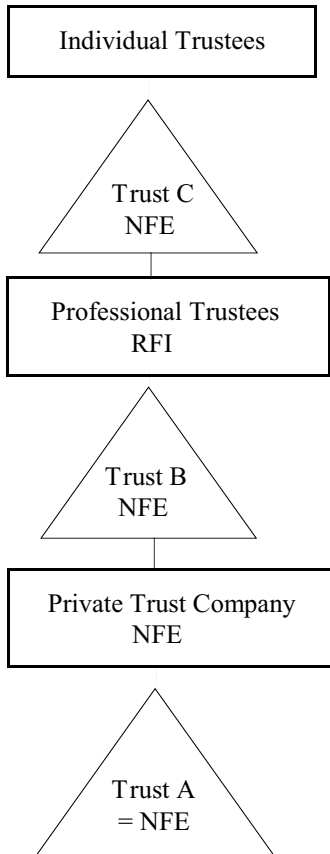

9.3 There are many ownership structures associated with a PTC. A typical holding structure is where the shares in the PTC are owned by a purpose trust, the trustee of which is an independent professional trustee. In this case, the professional trustee has the power to change the directors of the PTC but otherwise has no control, influence over or interest in the trusts of which the PTC acts as trustee.

9.4 **Example 21:** A private trust company acts as trustee of Trust A. The directors of the PTC are Z, X and Y and they alone exercise control over PTC. The shares in the PTC are owned by Professional Trustee as trustee of Purpose Trust B. Professional Trustee is one of the services provided by a law firm in offshore jurisdiction. Professional Trustee is owned by Trust C for the benefit of the partners of that law firm. The partners of the law firm are trustees of Trust C.

If you follow through the guidance, it would be necessary to identify as Controlling Persons of Trust A, Trust B, Professional Trustee, Trust C and Individual Trustees. None of these persons exercises control over Trust A or has any financial interest in Trust A.

**Conclusion:** In this scenario it would be helpful to have guidance that only individuals or entities who actually exercise effective control over PTC should be identified – in this case the directors of PTC X, Y and Z but not the shareholders.

It should be noted that the OECD is still considering the reporting of Controlling Persons in an ownership chain of entities.

### 121.31 Residence

OECD commentary on Section VIII (A)(2) CRS provides:

4. [a] For this purpose, a Financial Institution is “resident” in a Participating Jurisdiction if it is subject to the jurisdiction of such Participating Jurisdiction (i.e. the Participating Jurisdiction is able to enforce reporting by the Financial Institution).
- [b] In general, where a Financial Institution is resident for tax purposes in a Participating Jurisdiction, it is subject to the jurisdiction of such Participating Jurisdiction and it is, thus, a Participating Jurisdiction Financial Institution.

#### 121.31.1 Residence of trust

OECD Commentary on Section VIII (A)(2) CRS provides:

- [1] In the case of a trust that is a Financial Institution (irrespective of whether it is resident for tax purposes in a Participating Jurisdiction), the trust is considered to be subject to the jurisdiction of a Participating Jurisdiction if one or more of its trustees are resident in such Participating Jurisdiction
- [2] except if the trust reports all the information required to be reported pursuant to the CRS with respect to Reportable Accounts maintained by the trust to another Participating Jurisdiction because it is resident for tax purposes in such other Participating Jurisdiction.

Para [2] deals with cases of dual residence.

What about a trust with two trustees resident in two different places neither of which are in the UK? In principle it is a dual resident trust and so within [2].

What about a trust with two trustees resident in two different places one of which is the UK? If one applies standard IT/CGT trust residence rules, the trustees may be deemed non-resident. Does that apply for CRS purposes? Perhaps the answer does not matter, as if it is a dual resident trust it falls within [2] anyway.

#### 121.31.2 *FI without residence*

OECD Commentary on Section VIII (A)(2) CRS provides:

However, where a Financial Institution (other than a trust) does not have a residence for tax purposes (e.g. because it is treated as fiscally transparent, or it is located in a jurisdiction that does not have an income tax), it is considered to be subject to the jurisdiction of a Participating Jurisdiction and it is, thus, a Participating Jurisdiction Financial Institution if:

- a) it is incorporated under the laws of the Participating Jurisdiction;
- b) it has its place of management (including effective management) in the Participating Jurisdiction; or
- c) it is subject to financial supervision in the Participating Jurisdiction.

In this context, the term “Participating Jurisdiction” refers to a jurisdiction that has implemented the Common Reporting Standard..

#### 121.31.3 *Dual residence*

OECD Commentary on Section VIII(5) CRS provides:

5. Where a Financial Institution (other than a trust) is resident in two or more Participating Jurisdictions, such Financial Institution will be subject

to the reporting and due diligence obligations of the Participating Jurisdiction in which it maintains the Financial Account(s).

### **121.32 Reporting Financial Institution**

“Reporting Financial Institution” matters because, as its name suggests, it must make reports.

Section VIII (A)(1) CRS provides a negative definition:

1. The term “Reporting Financial Institution” means any Participating Jurisdiction Financial Institution that is not a Non- Reporting Financial Institution.

#### *121.32.1 Non-reporting FI*

Section VIII (B) CRS provides:

1. The term “Non-Reporting Financial Institution” means any Financial Institution that is:

- a) a Governmental Entity, International Organisation or Central Bank, other than with respect to a payment that is derived from an obligation held in connection with a commercial financial activity of a type engaged in by a Specified Insurance Company, Custodial Institution, or Depository Institution;
- b) a Broad Participation Retirement Fund; a Narrow Participation Retirement Fund; a Pension Fund of a Governmental Entity, International Organisation or Central Bank; or a Qualified Credit Card Issuer;
- c) any other Entity that presents a low risk of being used to evade tax, has substantially similar characteristics to any of the Entities described in subparagraphs B(1)(a) and (b), and is defined in domestic law as a Non-Reporting Financial Institution, provided that the status of such Entity as a Non-Reporting Financial Institution does not frustrate the purposes of the Common Reporting Standard;
- d) an Exempt Collective Investment Vehicle; or
- e) a trust to the extent that the trustee of the trust is a Reporting Financial Institution and reports all information required to be reported pursuant to Section I with respect to all Reportable Accounts of the trust.

### **121.33 Reporting requirement**

Armed with these definitions, we can turn to the reporting rules.

Section I (A)(1) CRS provides:

- A. Subject to paragraphs C through F, each Reporting Financial Institution must report the following information with respect to each Reportable Account of such Reporting Financial Institution:

#### 121.33.1 *Account Holder*

Section I (A)(1) CRS provides:

- A. Subject to paragraphs C through F, each Reporting Financial Institution must report the following information with respect to each Reportable Account of such Reporting Financial Institution:
1. [a] the name, address, jurisdiction(s) of residence, TIN(s)<sup>37</sup> and date and place of birth (in the case of an individual) of each Reportable Person that is an Account Holder of the account and,
    - [b] in the case of any Entity
      - [i] that is an Account Holder and
      - [ii] that, after application of the due diligence procedures consistent with Sections V, VI and VII, is identified as having one or more Controlling Persons that is a Reportable Person,

the name, address, jurisdiction(s) of residence and TIN(s) of the Entity and the name, address, jurisdiction(s) of residence, TIN(s) and date and place of birth of each Reportable Person;

#### 121.33.2 *Account details*

Section I (A)(2)-(4) CRS provides:

- A. Subject to paragraphs C through F, each Reporting Financial Institution must report the following information with respect to each Reportable Account of such Reporting Financial Institution ...
2. the account number (or functional equivalent in the absence of an account number);
  3. the name and identifying number (if any) of the Reporting Financial Institution;
  4. [a] the account balance or value
    - [b] (including, in the case of a Cash Value Insurance Contract or Annuity Contract, the Cash Value or surrender value)

as of

    - [i] the end of the relevant calendar year or other appropriate

---

<sup>37</sup> Taxpayer Identification Number(s).

- reporting period
- [ii] or, if the account was closed during such year or period, the closure of the account;

STEP CRS guidance (2016) comments on account value:

a. We note the reference to the ‘value calculated by the RFI for the purpose that requires the most frequent determination of value’ is to be used for reporting the account value. There is no unified standard for the preparation of trust accounts and it is rare that trust accounts are subject to an audit. In many cases, the directly held trust assets may be shares in a holding company that is an Investment Entity and therefore a Financial Institution. It is also not unusual for the trust assets to be shown in trust accounts at historic cost, and there is no general requirement to ‘mark to market’ the trust assets annually. In such cases, can the trustee, as RFI, use the value of assets on acquisition either

- i. where the trust accounts show trust assets at historic cost; or
- ii. where the directly held trust asset are shares in one or more holding companies that are carried at historic cost.

b. It is also not clear, where the trustee is an RFI, whether the obligation to report the value of the trust requires them to report the full value of all trust assets or just the value of financial assets. This would not be the case for a trust that is an NFE, where the RFI in relation to the relevant accounts would only report the value of the financial assets held by that trust. We assume that the intention is that a trustee that is an RFI is only required to provide financial information about the financial assets and not the non-financial assets. If this is correct, it would be helpful if this could be made clear.

The OECD Secretariat advised that it would be necessary to disclose the full value of all assets in the trust, both financial and non-financial assets.

121.33.3 *Reporting: Exceptions*

Section I (D)-(E) CRS provides minor exceptions for TINs and dates of birth:

D. Notwithstanding subparagraph A(1), the TIN is not required to be reported if

- (i) a TIN is not issued by the relevant Reportable Jurisdiction or
- (ii) the domestic law of the relevant Reportable Jurisdiction does not require the collection of the TIN issued by such Reportable Jurisdiction.

E. Notwithstanding subparagraph A(1), the place of birth is not required to be reported unless the Reporting Financial Institution is otherwise required to obtain and report it under domestic law and it is available in the electronically searchable data maintained by the Reporting Financial Institution.

#### 121.33.4 *Custodial/Depository A/c*

Section I (A)(5)-(6) CRS provides:

A. Subject to paragraphs C through F, each Reporting Financial Institution must report the following information with respect to each Reportable Account of such Reporting Financial Institution:

5. in the case of any Custodial Account:

- a) [i] the total gross amount of interest, the total gross amount of dividends, and the total gross amount of other income generated with respect to the assets held in the account,
- [ii] in each case paid or credited to the account (or with respect to the account) during the calendar year or other appropriate reporting period; and
- b) [i] the total gross proceeds from the sale or redemption of Financial Assets paid or credited to the account during the calendar year or other appropriate reporting period
- [ii] with respect to which the Reporting Financial Institution acted as a custodian, broker, nominee, or otherwise as an agent for the Account Holder;

6. in the case of any Depository Account, the total gross amount of interest paid or credited to the account during the calendar year or other appropriate reporting period;

#### 121.33.5 *Reporting: Other account*

Section I (A)(7) CRS provides:

- 7. [i] in the case of any account not described in subparagraph A(5) or (6), [ie not a Custodial/Depository Account]
- [ii] the total gross amount paid or credited to the Account Holder with respect to the account during the calendar year or other appropriate reporting period
- [iii] with respect to which the Reporting Financial Institution is the obligor or debtor,
- [iv] including the aggregate amount of any redemption payments made to the Account Holder during the calendar year or other appropriate reporting period.

Section I (F) CRS provides:

- F. Notwithstanding paragraph A, the information to be reported with respect to [xxxx] is the information described in such paragraph, except for gross proceeds described in subparagraph A(5)(b).

#### 121.33.6 *Pre-existing account*

Section I (C) CRS provides a minor transitional relief:

- C. Notwithstanding subparagraph A(1), with respect to each Reportable Account that is a Pre-existing Account, the TIN(s) or date of birth is not required to be reported if such TIN(s) or date of birth is not in the records of the Reporting Financial Institution and is not otherwise required to be collected by such Reporting Financial Institution under domestic law. However, a Reporting Financial Institution is required to use reasonable efforts to obtain the TIN(s) and date of birth with respect to Pre-existing Accounts by the end of the second calendar year following the year in which such Accounts were identified as Reportable Accounts.

#### 121.33.7 *Currency*

Section I (B) CRS provides:

- B. The information reported must identify the currency in which each amount is denominated.

### **121.34 CRS TAAR**

Section IX(A)(1) CRS provides:

- A. A jurisdiction must have rules and administrative procedures in place to ensure effective implementation of, and compliance with, the reporting and due diligence procedures set out above including:
  - 1. rules to prevent any Financial Institutions, persons or intermediaries from adopting practices intended to circumvent the reporting and due diligence procedures;

Regulation 23 ITCR 2015 provides:

If--

- (a) a person enters into any arrangements, and
- (b) the main purpose, or one of the main purposes, of the person in entering into the arrangements is to avoid any obligation under these Regulations,

these Regulations are to have effect as if the arrangements had not been entered into.

This wording is authorised by CRS, so is not *ultra vires*.<sup>38</sup>

OECD Commentary on Section IX(4) CRS provides:

5. The following are examples of situations where it is expected that an anti-avoidance rule would apply:

*Example 1 (Shift Maintenance of an Account):*

A Reporting Financial Institution advises a customer to maintain an account with a Related Entity in a non-Participating Jurisdiction that enables the Reporting Financial Institution to avoid reporting while offering to provide services and retain customer relations as if the account was maintained by the Reporting Financial Institution itself. In such a case, the Reporting Financial Institution should be considered to maintain the account and have the resulting reporting and due diligence requirements.

*Example 2 (Year-end amounts):*

Financial Institutions, individuals, Entities or intermediaries manipulate year-end amounts, such as account balances, to avoid reporting or being reported upon.

*Example 3 (Park Money with Qualified Credit Card Issuers):*

Individuals or Entities park balances from other Reportable Accounts with Qualified Credit Card Issuers for a short period at the end of the year to avoid reporting.

*Example 4 (Electronic records and computerised systems):*

A Reporting Financial Institution deliberately does not create any electronic records (such that an electronic record search would not yield any results) or maintains computerised systems artificially dissociated (to avoid the account aggregation rules).

---

38 Unlike the equivalent rule in the Country by Country reporting regulations: see 2.8.2 (Rule of law v. other values).

## CHAPTER ONE HUNDRED AND TWENTY TWO

# TRUST REGISTRATION

122.1

### *Cross references*

For charitable trusts, see Kessler, Wong & Birkbeck *Taxation of Charities and Nonprofit Organisations*<sup>1</sup>

For unit trusts, see 46.4 (Registration under TRS)

### **122.1 MLR 2017: Introduction**

This chapter discusses Part 5 (reg 42-45ZB) Money Laundering, Terrorist Financing and Transfer of Funds (Information on the Payer) Regulations 2017. This title is too long to use even as an abbreviation (“MLTFTFIPR”); I refer to it as “MLR”.

Part 5 sets out rules which relate to:

- (1) Record keeping
- (2) Providing information on request (mainly for others to comply with their AML/KYC obligations)
- (3) Trust registration

I focus on trust registration, but it is helpful to look at Part 5 as a whole. The trust registration rules changed in 2020, and I refer to:

“**pre-2020 rules**” which applied before the changes (and still apply)

“**post-2020 rules**” which will require (almost all) trusts to register in March 2021 if they were not required to register under the pre-2020 rules.

It is dispiriting to see both the extent and the complexity of the obligations introduced under a government which claims to be determined

---

<sup>1</sup> Online edition <https://taxationofcharities.co.uk> para 46.3.2 (Trust registration service).

to cut red tape.<sup>2</sup> But there it is.

### 122.1.1 TRS: Guidance

HMRC have published the Trust Registration Service Manual.

There is also basic guidance in a document entitled “Register a trust as an agent” (“TRS entry-level guidance”).<sup>3</sup>

See Morton & Doukova, “The Trust Registration Service: the next iteration of the regime” [2021] BTR 142.

## 122.2 MLR: EU law background

Chapter 3 of the 4<sup>th</sup> money laundering directive<sup>4</sup> deals with companies in art 30 and trusts in art 31. It is easier to follow if the two are set out side by side:

*Article 30 (companies)*

*Article 31 (trusts)*

---

2 *The Times* records on 7 January 2021: “Boris Johnson has declared the “time is now” to deregulate Britain’s economy as he invited business leaders to propose areas where his government can cut red tape.”

3 <https://www.gov.uk/guidance/register-your-clients-trust>

4 The full title is: Directive (EU) 2015/849 of the European Parliament and of the Council of 20 May 2015 on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing, amending Regulation (EU) No 648/2012 of the European Parliament and of the Council, and repealing Directive 2005/60/EC of the European Parliament and of the Council and Commission Directive 2006/70/EC See

<https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=celex%3A32015L0849>

The 4<sup>th</sup> directive was amended by the 5<sup>th</sup> money laundering directive, which took effect on 10 January 2020. Its full title is Directive (EU) 2018/843 of the European Parliament and of the Council of 30 May 2018 amending Directive (EU) 2015/849 on the prevention of the use of the financial system for the purposes of money laundering or terrorist financing, and amending Directives 2009/138/EC and 2013/36/EU

<https://eur-lex.europa.eu/eli/dir/2018/843/oj>

The 2021/22 edition of this work para 122.2 set out a track change version identifying the changes of the 5<sup>th</sup> directive, but this is now of historical interest only.

	<p>1. Member States shall ensure that this Article applies to trusts and other types of legal arrangements, such as, inter alia, fiducie, certain types of Treuhand or fideicomiso, where such arrangements have a structure or functions similar to trusts. Member States shall identify the characteristics to determine where legal arrangements have a structure or functions similar to trusts with regard to such legal arrangements governed under their law.</p>
<p>1. Member States shall ensure that corporate and other legal entities incorporated within their territory are required to obtain and hold adequate, accurate and current information on their beneficial ownership, including the details of the beneficial interests held.</p>	<p>Each Member State shall require that trustees of any express trust administered in that Member State obtain and hold adequate, accurate and up-to-date information on beneficial ownership regarding the trust. That information shall include the identity of:</p> <ul style="list-style-type: none"><li>(a) the settlor(s);</li><li>(b) the trustee(s);</li><li>(c) the protector(s) (if any);</li><li>(d) the beneficiaries or class of beneficiaries;</li><li>(e) any other natural person exercising effective control of the trust.</li></ul>
<p>Member States shall ensure that breaches of this Article are subject to effective, proportionate and dissuasive measures or sanctions.</p>	<p>Member States shall ensure that breaches of this Article are subject to effective, proportionate and dissuasive measures or sanctions.</p>

<p>Member States shall ensure that those entities are required to provide, in addition to information about their legal owner, information on the beneficial owner to obliged entities when the obliged entities are taking customer due diligence measures in accordance with Chapter II.</p> <p>Member States shall require that the beneficial owners of corporate or other legal entities, including through shares, voting rights, ownership interest, bearer shareholdings or control via other means, provide those entities with all the information necessary for the corporate or other legal entity to comply with the requirements in the first subparagraph.</p>	
	<p>2. Member States shall ensure that trustees or persons holding equivalent positions in similar legal arrangements as referred to in paragraph 1 of this Article, disclose their status and provide the information referred to in paragraph 1 of this Article to obliged entities in a timely manner, where, as a trustee or as person holding an equivalent position in a similar legal arrangement, they form a business relationship or carry out an occasional transaction above the thresholds set out in points (b), (c) and (d) of Article 11.</p>
<p>2. Member States shall require that the information referred to in paragraph 1 can be accessed in a timely manner by competent authorities and FIUs.</p>	<p>3. Member States shall require that the information referred to in paragraph 1 can be accessed in a timely manner by competent authorities and FIUs.</p>

3. Member States shall ensure that the information referred to in paragraph 1 is held in a central register in each Member State, for example a commercial register, companies register as referred to in Article 3 of Directive 2009/101/EC of the European Parliament and of the Council ( 16 ), or a public register. Member States shall notify to the Commission the characteristics of those national mechanisms. The information on beneficial ownership contained in that database may be collected in accordance with national systems.

3a. Member States shall require that the beneficial ownership information of express trusts and similar legal arrangements as referred to in paragraph 1 shall be held in a central beneficial ownership register set up by the Member State where the trustee of the trust or person holding an equivalent position in a similar legal arrangement is established or resides.

Where the place of establishment or residence of the trustee of the trust or person holding an equivalent position in similar legal arrangement is outside the Union, the information referred to in paragraph 1 shall be held in a central register set up by the Member State where the trustee of the trust or person holding an equivalent position in a similar legal arrangement enters into a business relationship or acquires real estate in the name of the trust or similar legal arrangement.

Where the trustees of a trust or persons holding equivalent positions in a similar legal arrangement are established or reside in different Member States, or where the trustee of the trust or person holding an equivalent position in a similar legal arrangement enters into multiple business relationships in the name of the trust or similar legal arrangement in different Member States, a certificate of proof of registration or an excerpt of the beneficial ownership information held in a register by one Member State may be considered as sufficient to consider the registration obligation fulfilled.

<p>4. Member States shall require that the information held in the central register referred to in paragraph 3 is adequate, accurate and current, and shall put in place mechanisms to this effect. Such mechanisms shall include requiring obliged entities and, if appropriate and to the extent that this requirement does not interfere unnecessarily with their functions, competent authorities to report any discrepancies they find between the beneficial ownership information available in the central registers and the beneficial ownership information available to them. In the case of reported discrepancies, Member States shall ensure that appropriate actions be taken to resolve the discrepancies in a timely manner and, if appropriate, a specific mention be included in the central register in the meantime.</p>	<p>5. Member States shall require that the information held in the central register referred to in paragraph 3a is adequate, accurate and current, and shall put in place mechanisms to this effect. Such mechanisms shall include requiring obliged entities and, if appropriate and to the extent that this requirement does not interfere unnecessarily with their functions, competent authorities to report any discrepancies they find between the beneficial ownership information available in the central registers and the beneficial ownership information available to them. In the case of reported discrepancies Member States shall ensure that appropriate actions be taken to resolve the discrepancies in a timely manner and, if appropriate, a specific mention be included in the central register in the meantime.</p>
<p>5. Member States shall ensure that the information on the beneficial ownership is accessible in all cases to:</p> <ul style="list-style-type: none"> <li>(a) competent authorities and FIUs, without any restriction;</li> <li>(b) obliged entities, within the framework of customer due diligence in accordance with Chapter II;</li> <li>(c) any member of the general public.</li> </ul>	<p>4. Member States shall ensure that the information on the beneficial ownership of a trust or a similar legal arrangement is accessible in all cases to:</p> <ul style="list-style-type: none"> <li>(a) competent authorities and FIUs, without any restriction;</li> <li>(b) obliged entities, within the framework of customer due diligence in accordance with Chapter II;</li> <li>(c) any natural or legal person that can demonstrate a legitimate interest;</li> <li>(d) any natural or legal person that files a written request in relation to a trust or similar legal arrangement which holds or owns a controlling interest in any corporate or other legal entity other than those referred to in Article 30(1), through direct or indirect ownership, including through bearer shareholdings, or through control via other means.</li> </ul>

<p>The persons referred to in point (c) shall be permitted to access at least the name, the month and year of birth and the country of residence and nationality of the beneficial owner as well as the nature and extent of the beneficial interest held.</p> <p>Member States may, under conditions to be determined in national law, provide for access to additional information enabling the identification of the beneficial owner. That additional information shall include at least the date of birth or contact details in accordance with data protection rules.</p>	<p>The information accessible to natural or legal persons referred to in points (c) and (d) of the first subparagraph shall consist of the name, the month and year of birth and the country of residence and nationality of the beneficial owner, as well as nature and extent of beneficial interest held.</p> <p>Member States may, under conditions to be determined in national law, provide for access of additional information enabling the identification of the beneficial owner. That additional information shall include at least the date of birth or contact details, in accordance with data protection rules.</p> <p>Member States may allow for wider access to the information held in the register in accordance with their national law.</p> <p>Competent authorities granted access to the central register referred to in paragraph 3a shall be public authorities with designated responsibilities for combating money laundering or terrorist financing, as well as tax authorities, supervisors of obliged entities and authorities that have the function of investigating or prosecuting money laundering, associated predicate offences and terrorist financing, tracing, and seizing or freezing and confiscating criminal assets.</p>
<p>5a. Member States may choose to make the information held in their national registers referred to in paragraph 3 available on the condition of online registration and the payment of a fee, which shall not exceed the administrative costs of making the information available, including costs of maintenance and developments of the register.</p>	<p>4a. Member States may choose to make the information held in their national registers referred to in paragraph 3a available on the condition of online registration and the payment of a fee, which shall not exceed the administrative costs of making the information available, including costs of maintenance and developments of the register.</p>

<p>6. Member States shall ensure that competent authorities and FIUs have timely and unrestricted access to all information held in the central register referred to in paragraph 3 without alerting the entity concerned. Member States shall also allow timely access by obliged entities when taking customer due diligence measures in accordance with Chapter II.</p> <p>Competent authorities granted access to the central register referred to in paragraph 3 shall be those public authorities with designated responsibilities for combating money laundering or terrorist financing, as well as tax authorities, supervisors of obliged entities and authorities that have the function of investigating or prosecuting money laundering, associated predicate offences and terrorist financing, tracing and seizing or freezing and confiscating criminal assets.</p>	
<p>7. Member States shall ensure that competent authorities and FIUs are able to provide the information referred to in paragraphs 1 and 3 to the competent authorities and to the FIUs of other Member States in a timely manner and free of charge.</p>	<p>7. Member States shall ensure that competent authorities and FIUs are able to provide the information referred to in paragraphs 1 and 3 to the competent authorities and to the FIUs of other Member States in a timely manner and free of charge.</p>
<p>8. Member States shall require that obliged entities do not rely exclusively on the central register referred to in paragraph 3 to fulfil their customer due diligence requirements in accordance with Chapter II. Those requirements shall be fulfilled by using a risk-based approach.</p>	<p>6. Member States shall ensure that obliged entities do not rely exclusively on the central register referred to in paragraph 4 to fulfil their customer due diligence requirements as laid down in Chapter II. Those requirements shall be fulfilled by using a risk-based approach.</p>

<p>9. In exceptional circumstances to be laid down in national law, where the access referred to in points (b) and (c) of the first subparagraph of paragraph 5 would expose the beneficial owner to disproportionate risk, risk of fraud, kidnapping, blackmail, extortion, harassment, violence or intimidation, or where the beneficial owner is a minor or otherwise legally incapable, Member States may provide for an exemption from such access to all or part of the information on the beneficial ownership on a case-by-case basis. Member States shall ensure that these exemptions are granted upon a detailed evaluation of the exceptional nature of the circumstances. Rights to an administrative review of the exemption decision and to an effective judicial remedy shall be guaranteed. A Member State that has granted exemptions shall publish annual statistical data on the number of exemptions granted and reasons stated and report the data to the Commission.</p>	<p>7a. In exceptional circumstances to be laid down in national law, where the access referred to in points (b), (c) and (d) of the first subparagraph of paragraph 4 would expose the beneficial owner to disproportionate risk, risk of fraud, kidnapping, blackmail, extortion, harassment, violence or intimidation, or where the beneficial owner is a minor or otherwise legally incapable, Member States may provide for an exemption from such access to all or part of the information on the beneficial ownership on a case-by-case basis. Member States shall ensure that these exemptions are granted upon a detailed evaluation of the exceptional nature of the circumstances. Rights to an administrative review of the exemption decision and to an effective judicial remedy shall be guaranteed. A Member State that has granted exemptions shall publish annual statistical data on the number of exemptions granted and reasons stated and report the data to the Commission.</p> <p>Where a Member State decides to establish an exemption in accordance with the first subparagraph, it shall not restrict access to information by competent authorities and FIUs.</p>
<p>Exemptions granted pursuant to the first subparagraph of this paragraph shall not apply to credit institutions and financial institutions, or to the obliged entities referred to in point (3)(b) of Article 2(1) that are public officials.</p>	<p>Exemptions granted pursuant to the first subparagraph shall not apply to the credit institutions and financial institutions, and to obliged entities referred to in point (3)(b) of Article 2(1) that are public officials.</p>

<p>10. Member States shall ensure that the central registers referred to in paragraph 3 of this Article are interconnected via the European Central Platform established by Article 22(1) of Directive (EU) 2017/1132 of the European Parliament and of the Council ( 17 ). The connection of the Member States’ central registers to the platform shall be set up in accordance with the technical specifications and procedures established by implementing acts adopted by the Commission in accordance with Article 24 of Directive (EU) 2017/1132 and with Article 31a of this Directive.</p>	<p>9. Member States shall ensure that the central registers referred to in paragraph 3a of this Article are interconnected via the European Central Platform established by Article 22(1) of Directive (EU) 2017/1132. The connection of the Member States’ central registers to the platform shall be set up in accordance with the technical specifications and procedures established by implementing acts adopted by the Commission in accordance with Article 24 of Directive (EU) 2017/1132 and with Article 31a of this Directive.</p>
<p>Member States shall ensure that the information referred to in paragraph 1 of this Article is available through the system of interconnection of registers established by Article 22(1) of Directive (EU) 2017/1132, in accordance with Member States’ national laws implementing paragraphs 5, 5a and 6 of this Article.</p>	<p>Member States shall ensure that the information referred to in paragraph 1 of this Article is available through the system of interconnection of registers established by Article 22(2) of Directive (EU) 2017/1132, in accordance with Member States’ national laws implementing paragraphs 4 and 5 of this Article.</p>
<p></p>	<p>Member States shall take adequate measures to ensure that only the information referred to in paragraph 1 that is up to date and corresponds to the actual beneficial ownership is made available through their national registers and through the system of interconnection of registers, and the access to that information shall be in accordance with data protection rules.</p>
<p>The information referred to in paragraph 1 shall be available through the national registers and through the system of interconnection of registers for at least five years and no more than 10 years after the corporate or other legal entity has been struck off from the register. Member States shall cooperate among themselves and with the Commission in order to implement the different types of access in accordance with this Article.</p>	<p>The information referred to in paragraph 1 shall be available through the national registers and through the system of interconnection of registers for at least five years and no more than 10 years after the grounds for registering the beneficial ownership information as referred to in paragraph 3a have ceased to exist. Member States shall cooperate with the Commission in order to implement the different types of access in accordance with paragraphs 4 and 4a.</p>

Third country entity	Reg 42(6)	122.3.9
Entity: Controlling interest	Reg 42(6)	122.3.10

### 122.3.2 *Business relationship*

This term is used throughout MLR.

Reg 4(1) MLR provides:

For the purpose of these Regulations, “business relationship” means a business, professional or commercial relationship between a relevant person and a customer, which—

- (a) arises out of the business of the relevant person, and
- (b) is expected by the relevant person, at the time when contact is established, to have an element of duration.

A single transaction does not make a relationship. There are special rules for company formation and estate agents:

Reg 4MLR provides:

(2) A relationship where the relevant person is asked to form a company for its customer is to be treated as a business relationship for the purpose of these Regulations, whether or not the formation of the company is the only transaction carried out for that customer.

(3) For the purposes of these Regulations, an estate agent is to be treated as entering into a business relationship with a purchaser (as well as with a seller), at the point when the purchaser’s offer is accepted by the seller.

### 122.3.3 *Residence for MLR*

Reg 42(3) MLR provides:

A trustee or settlor is resident in the UK—

- (a) in the case of a body corporate, if it is a UK body corporate;
- (b) in the case of an individual, if the individual is resident in the UK for the purposes of one or more of the taxes referred to in regulation 45(14).<sup>7</sup>

---

<sup>7</sup> For this list of taxes, see 122.10 (Taxable relevant trust).

This is not the same as UK tax residence, but it will normally come to the same thing.

#### 122.3.4 EEA registered trust

Reg 42(4) MLA 2007 provides:

For the purposes of this Part, an “EEA registered trust” is a trust established in a country or territory other than the UK where national legislation applies having a broadly equivalent effect to the requirements laid down in the fourth money laundering directive.

#### 122.3.5 Interest in UK land

Reg 42(5) MLA 2007 restricts this term to major interests:

For the purposes of this Part, the trustees acquire an interest in land in the UK where at least one of the trustees becomes registered—<sup>8</sup>

<b>England</b>	<b>Scotland</b>	<b>Northern Ireland</b>
(a) in the register of title kept under the Land Registration Act 2002	(b) in the Land Register of Scotland	(c) in the register kept under the Land Registration Act (Northern Ireland) 1970
as the proprietor of— (i) a freehold estate in land; or (ii) a leasehold estate in land granted for a term of more than 7 years from the date of the grant;	as the proprietor or as the tenant under a lease (“lease” and “proprietor” having the meanings given by section 113(1) of the Land Registration etc (Scotland) Act 2012); or	as the owner of— (i) a freehold estate in land; or (ii) a leasehold estate in land granted for a term of more than 21 years from the date of the grant.

#### 122.3.6 Body corporate

Reg 3(1) MLR provides:

In these Regulations ...

“body corporate”—

(a) includes—

(i) a body corporate incorporated under the laws of the UK or any part of the UK, and

<sup>8</sup> For clarity I have set this out in a tabular format.

- (ii) a body corporate constituted under the law of a country or territory outside the UK;
- (b) but does not include—
  - (i) a corporation sole, or
  - (ii) a partnership that, whether or not a legal person, is not regarded as a body corporate under the law by which it is governed;

Leaving aside the specialist topic of a corporation sole, this means that a body corporate includes a body corporate, but does not include something which is not a body corporate. The definition is based on wording in s.1173 Companies Act 2006.

### 122.3.7 *UK body corporate*

Reg 42(2)(a) MLR provides:

- (2) For the purposes of this Part—
  - (a) a “UK body corporate” is
    - [i] a body corporate which is incorporated under the law of the UK or any part of the UK,
    - [ii] and includes an eligible Scottish partnership;

### 122.3.8 *Eligible Scottish partnership*

This term matters as an eligible Scottish partnership counts as a UK body corporate.

Reg 3(1) MLR provides:

In these Regulations ...  
 “eligible Scottish partnership” has the meaning given in regulation 3 of the Scottish Partnerships (Register of People with Significant Control) Regulations 2017 (key terms)

That takes us to reg 3(2) of the 2017 Regulations (“SLR 2017”), which provides:

- An “eligible Scottish partnership” is—
  - (a) a limited partnership registered in Scotland (a “Scottish limited partnership”), or
  - (b) a general partnership constituted under the law of Scotland, during any period in which it is a qualifying partnership (a “Scottish qualifying partnership”).

Reg 2 SLR 2017 provides:

“qualifying partnership” has the meaning given in regulation 3 of the Partnerships<sup>9</sup> (Accounts) Regulations 2008

So we turn to reg 3(1) Partnerships (Accounts) Regulations 2008 which provides:

A “qualifying partnership” is a partnership formed under the law of any part of the UK each of whose members or, in the case of a limited partnership, each of whose general partners is—

- (a) a limited company;
- (b) an unlimited company each of whose members is a limited company;
- (c) a Scottish partnership which is not a limited partnership, each of whose members is a limited company; or
- (d) a Scottish partnership which is a limited partnership, each of whose general partners is a limited company.

The regulation then sets out statutory foreign-entity definitions but that is of limited significance.<sup>10</sup>

### 122.3.9 *Third country entity*

Reg 42(6)(b) MLR provides:

“third country entity” means a body corporate, partnership or other entity that is governed by the law of a country or territory outside the EEA and (in each case) is a legal person under that law.

<sup>9</sup> The original erroneously reads: partnership.

<sup>10</sup> Reg 3 Partnerships (Accounts) Regulations 2008 provides:

“(2) Each reference in paragraph (1) to a limited company includes a reference to any comparable undertaking incorporated in a country or territory outside the UK.

(3) The reference in paragraph (1)(b) to an unlimited company includes a reference to any comparable undertaking incorporated in a country or territory outside the UK.

(4) The reference in paragraph (1)(c) to a Scottish partnership which is not a limited partnership includes a reference to any undertaking comparable to such a Scottish partnership incorporated in or formed under the law of a country or territory outside the UK.

(5) The reference in paragraph (1)(d) to a Scottish partnership which is a limited partnership includes a reference to any undertaking comparable to such a Scottish partnership incorporated in or formed under the law of a country or territory outside the UK; and in relation to such an undertaking the reference in that paragraph to the general partners is to be construed as a reference to the members of the undertaking comparable to general partners.” See 86.1.1 (Statutory foreign-entity definitions).

122.3.10 *Entity: Controlling interest*

Reg 42(6) MLR provides:

For the purposes of this Part—

- (a) the trustees have a controlling interest in a third country entity if they meet any of the specified conditions in paragraphs 2 to 5 of Schedule 1A to the Companies Act 2006<sup>11</sup> (people with significant control over a company) where that Schedule is read with the following modifications—
  - (i) references to X having or holding a share in or a right in relation to, or exercising significant influence or control over, company Y are to be read as references to the trustees (in their capacity as such) having or holding a share in or a right in relation to, or exercising significant influence or control over, the third country entity;
  - (ii) for “25%” wherever it occurs in each of paragraphs 2 (ownership of shares), 3 (voting rights), 13 (calculating shareholdings), and 14 (voting rights), read “50%”;

## 122.4 Relevant Trust

“Relevant trust” matters because:

- (1) All relevant trusts are within the scope of record keeping and disclosure rules.
- (2) *Taxable* relevant trusts are within the scope of the pre-2020 registration rules.

Reg 42(2)(b) MLR provides:

- (b) a “relevant trust” is—

The regulation then sets out three categories of relevant trust:

- (i) a UK trust which is an express trust;
- (ii) a non-UK trust which is an express trust; and
  - (aa) receives income from a source in the UK; or
  - (bb) has assets in the UK, on which it is liable to pay one or more of the taxes referred to in regulation 45(14); or
- (iii) any other non-UK trust which

---

<sup>11</sup> See 122.14.1 (Significant control).  
FD\_122\_Trust\_Registration.wpd

- [A] is an express trust,
- [B] is not a trust listed in Schedule 3A (excluded trusts)
- [C] and whose trustees (in their capacity as such)—
  - (aa) acquire an interest in land in the UK; or
  - (bb) enter into a business relationship with a relevant person, where at least one of those trustees is resident in the UK and the trust is not an EEA registered trust;

I refer to these as “**relevant trust categories (i) -(iii)**”. In short:

Category	Description	See para
(i)	UK trust	122.6
(ii)	Non-UK trust, taxable in UK	122.7
(iii)	Non-UK trust with UK land	122.8

### 122.5 Non-express trusts

A non-express trust is outside the scope of the MLR:

- (1) It is not a relevant trust
- (2) It is not a type A/B/C trust

The term is not defined.

### 122.6 Relevant trust (i): UK trust

Reg 42(2)(b) MLR provides:

- (b) a “relevant trust” is—
  - (i) a UK trust which is an express trust ...

Reg 42(2) MLR provides:

- (c) a trust is a “UK trust” if—
  - (i) all the trustees are resident in the UK; or
  - (ii) sub-paragraph (d) applies;
- (d) this sub-paragraph applies if—
  - (i) at least one trustee is resident in the UK, and
  - (ii) the settlor was resident and domiciled in the UK at the time when—
    - (aa) the trust was set up, or
    - (bb) the settlor added funds to the trust;

UK trust (as defined) is not quite the same as a UK resident trust under the standard IT/CGT definition of trust residence, but it will usually come to the same thing.

Reg 42(2)(e) MLR provides:

(e) a trust is a “non-UK trust” if it is not a UK trust.

### 122.7 Cat. (ii): Taxable trust

Reg 42(2)(b) MLR provides:

(b) a “relevant trust” is ...

(ii) a non-UK trust which is an express trust; and

(aa) receives income from a source in the UK; or

(bb) has assets in the UK,

on which it is liable to pay one or more of the taxes referred to in regulation 45(14)<sup>12</sup>

The final phrase (“on which it is liable to pay one or more of the taxes referred to in reg 45(14)”) appears to govern para (bb) only, and does not govern para (aa). But the question will not often arise, as if income has a UK source, then UK tax will normally follow.

#### 122.7.1 *IHT residence-property code*

STEP have written to HMRC as follows:

A non-UK trust is only a “relevant trust” if it has assets in the UK on which it is liable to pay (in this case) inheritance tax (regulation 42(2)(b)(ii)). In this case, the trust owns shares in a non-UK company. It does not have a UK asset. The company owns the UK asset.

We accept that, on a purposive reading, it might just about be possible to treat a trust in these circumstances as if it “has” a UK asset but frankly we think that is straining the wording of the legislation. The position would, for example, be much less clear if the trust owned 10% of a company which in turn owned a number of assets including a UK residential property. The trustees would still be liable for UK inheritance tax at the ten year charge date but it is much more difficult to say that the trustee “has” a UK asset. Even assuming it could be said that the trust has a UK asset (which we do not think is the correct interpretation), it is quite clear that the trust is not liable to pay inheritance tax on that asset.

As you have identified, the way schedule A1 IHTA works is that inheritance tax is paid on the shares in the non-UK company to the

---

12 For this list of taxes, see 122.10 (Taxable relevant trust).

extent that the value of those shares is attributable to the value of the UK residential property. The inheritance tax is therefore being paid on a non-UK asset (which is prevented by schedule A1 IHTA from being “excluded property” for inheritance tax purposes) and not on a UK asset. We accept that (as stated in the FAQs) where the ownership of the asset is treated as a look-through (i.e. the company is acting as nominee) the trust would be liable to be registered but this is not the position in the situation we have described.

We do understand that the purpose of the inheritance tax changes is to put taxpayers who own UK residential property through an overseas structure in broadly the same position as if they had owned it direct but the fact is that parliament chose to do that by charging tax on the shares in the overseas company and not on the UK residential property itself. Obligations cannot be imposed on trustees based on what the regulations might have said had the draftsman thought about this point. Instead, the regulations should be applied based on what they actually say...

In reply, HMRC did not seek to maintain their argument:

... we also accept the view that you and other stakeholders have set out in your various submissions that an IHT charge incurred under Schedule A1 does not trigger a requirement to register on TRS. This is on the basis that the IHT is paid in relation to a foreign asset and not a UK asset.

As you may know, non-UK companies that own UK residential property are already obliged to register with the Department for Business, Energy and Industrial Strategy, and as part of the transposition into UK law of the EU Fifth Money Laundering Directive we will consider the registration of offshore trusts that own UK real estate. In light of this we accept the legal arguments you have set out in your letter and require non UK trusts that incur IHT as a result of schedule A1 not to register on TRS on the basis that no other UK tax is due by the trustees in relation to trust assets or income. ..<sup>13</sup>

It is understood that HMRC later confirmed that the reference to an obligation to register with BEIS was also incorrect, as the proposed Registration of Overseas Entities Bill has not been enacted, though it is proposed to take effect in 2021 (this timetable may slide).<sup>14</sup>

---

13 [https://www.step.org/sites/default/files/Policy/UK\\_residential\\_property\\_and\\_TRS.pdf](https://www.step.org/sites/default/files/Policy/UK_residential_property_and_TRS.pdf)

14 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/727901/2\\_FINAL\\_Overview\\_document\\_\\_1\\_\\_1\\_.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/727901/2_FINAL_Overview_document__1__1_.pdf)

## 122.8 Cat. (iii): Trust holding land

Reg 42(2)(b) MLR provides:

- (b) a “relevant trust” is ...
- (iii) any other non-UK trust which
  - [A] is an express trust,
  - [B] is not a trust listed in Schedule 3A (excluded trusts)
  - [C] and whose trustees (in their capacity as such)—
    - (aa) acquire an interest in land in the UK; or
    - (bb) enter into a business relationship with a relevant person, where
      - [I] at least one of those trustees is resident in the UK and
      - [II] the trust is not an EEA registered trust;

Thus there are two types of relevant trust in this category. But type (bb) requires a non-resident trust with one UK resident trustee, which will be rare.

## 122.9 Excluded trusts

MLR refers to trusts “listed in Schedule 3A”. I gloss this as “excluded trust”.

Excluded trusts fall outside relevant trust category (iii), though they may fall within category (i) and (ii).

Sch 3A MLR provides 23 categories of excluded trust.

### **Legislative Trusts**

1 A trust imposed or required by an enactment.

### **Trusts imposed by court order**

2 A trust created by, or in order to satisfy the terms of, an order of a court or tribunal.

### **Pension scheme trusts**

3 A trust holding sums or assets of a pension scheme which is a registered pension scheme for the purposes of Part 4 of the Finance Act 2004....

### **Charitable trusts**

5 A trust for charitable purposes which—

- (a) in Scotland or Northern Ireland, is registered as a charity; or
- (b) in England and Wales, is registered as a charity or not required to register by virtue of section 30(2)(a) to (d) of the Charities Act 2011.

### **Pilot trusts**

6 A trust which—

- (a) holds property with a value not exceeding £100, and
- (b) was created before the date on which regulation 42(2)(iii) of these Regulations comes into force.

**Trusts having effect on death**

7 (1) A trust effected by will where—

- (a) the trust is holding only the property comprised in a person's estate on death, and
- (b) less than two years has passed since that person's death.

(2) In this paragraph, a person's “estate” means the aggregate of all the property to which that person is beneficially entitled...

**Co-ownership**

9 A trust of jointly held property where the trustees and the beneficiaries are the same persons.

**Financial markets infrastructure**

10 (1) A trust—

- (a) created under, or for the purpose of, the default arrangements of a designated system or of the default rules of a recognised body, or for the purpose of any action or proceedings taken by or for such a system or body under such arrangements or rules;
- (b) relating to the creation of a beneficial interest in securities belonging to a person whose name and address are maintained on a register of securities (within the meaning of regulation 3(1) of the Uncertificated Securities Regulations 2001); or
- (c) created by or for a segregating entity—

(i) for the purpose of protecting sums or assets belonging to the segregating entity's clients; or

(ii) for the purpose of complying with a legal obligation to safeguard and segregate sums or assets belonging to the segregating entity's clients or to keep separate client records and accounts.

[Para (2) sets out definitions for para 10(1) which are not considered here].

**Professional services**

11 A trust created for the purpose of enabling or facilitating the holding of sums, assets or (in the case of sub-paragraph (c)), documents, belonging to a person other than the trustee, in connection with which sums, assets or documents the trustee is—

(a) carrying on by way of business the activity specified in article 40 (safeguarding and administering investments) of the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001;

(b) acting by way of business as the trustee of an authorised unit trust scheme (and for this purpose “trustee” and “authorised unit trust scheme” have the meanings given in section 237 of FSMA); or

(c) acting by way of business as an agent holding sums, assets or documents in escrow until the performance of a contractual condition agreed between two or more other persons, including the person for whom the sums, assets or documents are being held.

**Client money etc**

12 A trust created by a relevant supervised person<sup>15</sup> for the purpose of holding client

---

15 This term is used in para 12 and 13, and is defined in para 24: “In this Schedule, “relevant supervised person” means—

(a) a relevant person; or

(b) a person who is subject to requirements in national legislation having an equivalent effect to those laid down in the fourth money laundering directive on an

money, securities or other assets, where that trust is incidental to the carrying on of business by the relevant supervised person.

### **Capital markets etc**

13 A trust created for the purpose of enabling or facilitating an activity listed in points 2, 3, 6, 7 or 8 of Annex 1 to the capital requirements directive as set out in Schedule 2, or for protecting or enforcing rights relating to that activity, where—

- (a) one or more of the participants in that activity is a relevant supervised person, and
- (b) the use of the trust is incidental to the principal purpose of that activity.

### **Commercial transactions**

14 A trust created for the purpose of—

- (a) enabling or facilitating a transaction effected for genuine commercial reasons; or
- (b) protecting or enforcing rights relating to such a transaction,

where the use of the trust is incidental to the principal purpose of the transaction.

### **Registration of assets**

15 A trust created on the transfer or disposal of an asset where the purpose of the trust is to hold the legal title to the asset on trust for the person to whom the transfer or disposal is being made until the time when the procedure required by law to effect the transfer or disposal of legal title is completed.

### **Trusts meeting legislative requirements**

16 A trust holding property to which section 71A or 71D of the Inheritance Tax Act 1984 applies.

17 A trust of property in respect of which a direction under paragraph 1 of Schedule 4 to the Inheritance Tax Act 1984 has effect.

18 A trust of funds derived from a payment—

- (a) made for the benefit of a person in consequence of a personal injury to that person, and
- (b) disregarded from capital under regulation 46(2) of, and paragraph 12 of Schedule 10 to, the Income Support (General) Regulations 1987.

19 A trust holding tenants' contributions for the purposes of section 42 of the Landlord and Tenant Act 1987.

20 The plan trust of a share incentive plan which meets the requirements of Part 9 of Schedule 2 to the Income Tax (Earnings and Pensions) Act 2003.

21 A trust created under a share option scheme that meets the requirements of Parts 2 to 7 of Schedule 3 to the Income Tax (Earnings and Pensions) Act 2003.

22 A trust holding property for a beneficiary who is a disabled person within the meaning given by Schedule 1A to the Finance Act 2005.

### **Public authorities**

23 A trust created for the purposes of enabling or assisting—

- (a) a public authority, within the meaning of section 3(1) of the Freedom of Information Act 2000, or a body specified in section 80(2) of that Act;
- (b) a Scottish public authority, within the meaning of section 3(1) of the Freedom of

---

obliged entity (within the meaning of that directive) and supervised for compliance with those requirements in a manner equivalent to section 2 of Chapter VI of the fourth money laundering directive.

- Information (Scotland) Act 2002;
- (c) the Security Service, the Secret Intelligence Service, the Government Communications Headquarters or the National Crime Agency; or
  - (d) the Welsh Assembly Government,
- to carry out its functions, including any functions as a court or tribunal and, in the case of the Bank of England, any of its functions as a monetary authority within the meaning of section 244(2)(c) of the Banking Act 2009.

### 122.9.1 *Trusts holding policies*

Sch 3A MLR provides two categories relevant here:

#### **Trusts of insurance policies**

4 A trust of a life policy or retirement policy paying out only—

- (a) on the death, terminal or critical illness or permanent disablement of the person assured; or
- (b) to meet the cost of healthcare services provided to the person assured...

8 A trust where—

- (a) the trust is holding only benefits received on the death of the person assured under a policy within paragraph 4, and
- (b) less than two years has passed since that person's death.

STEP report:

HMRC has been consulting the industry on the interpretation of Sch3A(4) and Sch3A(8) [MLA] in relation to the Trust Registration Service. HMRC has now confirmed that Sch3A(4) can be properly interpreted as including trusts holding policies that have surrender values, and that those trusts would remain excluded until such time as the policy is actually surrendered. It follows from this that pay-outs received from such policies on death would continue to benefit from the exclusion at Sch3A(8).<sup>16</sup>

### **122.10 Taxable relevant trust**

Reg 45(14) MLR provides:

For the purposes of this regulation, a taxable relevant trust is a relevant trust<sup>17</sup> in any year in which its trustees are liable to pay any of the following taxes in the UK in relation to assets or income of the trust—

---

<sup>16</sup> STEP, 3 June 2021.

<sup>17</sup> See 122.4 (Relevant trust).

There are 7 taxes in this list:<sup>18</sup>

- (1) income tax
- (2) capital gains tax
- (3) inheritance tax
- (4) Stamp taxes:
  - (a) stamp duty land tax
  - (b) land and buildings transaction tax (Scotland)
  - (c) land transaction tax (Wales)
  - (d) stamp duty reserve tax

Corporation tax is not included as a trust will not be liable to CT.

Section 1(3) amounts (trust gains) and foreign income within s.624/720 do not count, as non-resident trustees are not taxable on that.

### **122.11 Relevant person**

A relevant person is subject to AML/KYC duties, and entitled to information required for that purpose.

Reg 3(1) MLR provides:

In these Regulations ... “relevant person” means a person to whom, in accordance with regulation 8, Parts 1 to 6 and 8 to 11 of these Regulations apply;

So we turn to reg 8:

- (1) Parts 1 to 6 and 8 to 11 apply to the persons (“relevant persons”) acting in the course of business carried on by them in the UK, who—
  - (a) are listed in paragraph (2); and
  - (b) do not come within the exclusions set out in regulation 15.

#### *122.11.1 Listed persons*

Reg 8(2) MLR provides:

The persons listed in this paragraph are—

- (a) credit institutions;
- (b) financial institutions;
- (c) auditors, insolvency practitioners, external accountants and tax advisers;

---

<sup>18</sup> For clarity I have set this out in tabular form and with my own wording, rather than that in the statute.

- (d) independent legal professionals;
- (e) trust or company service providers;
- (f) estate agents;
- (g) high value dealers;
- (h) casinos

These terms are defined. For the purposes of this book, the most important categories are tax advisers and lawyers. I only consider the definition of tax adviser here.

### 122.11.2 *Tax adviser*

Reg 11(d) MLR provides:

“tax adviser” means a firm or sole practitioner who

- [a] by way of business
- [b] provides material aid, or assistance or advice,
- [c] in connection with the tax affairs of other persons,
- [d] whether provided directly or through a third party,
- [e] when providing such services.

SRA guidance provides:

The definition of ‘tax adviser’ is broad, extends beyond providing advice and includes providing assistance and material aid. Activities known informally by other terms, such as ‘estate planning’, ‘tax planning’ and ‘tax mitigation’ are likely (?) to be in scope of the regulations through this definition.

#### **Definitions used in this guidance**

... The definition of ‘tax adviser’ is very broad, and any firm providing a service that addresses or might impact the tax affairs of a client should carefully consider whether their services fall within it.

With regards the ‘advice’ component, when contrasting this with providing information, a useful way to think about it is whether information you are providing has been tailored in any way to the tax-relevant circumstances of the client. If the information you are providing is only relevant due to the client’s particular circumstances (eg a specific transaction they are involved in or issue you are otherwise advising them on), it will be more likely to fall within the definition.

For example, sending an internet link to something like a HMRC web page about income tax is unlikely to meet this threshold as it is unlikely to contain any tailored advice.

The reason that this is not assistance is difficult to perceive, but perhaps

the underlying intuition is some sort of de minimis test.<sup>19</sup>

However, sending someone a link to a HMRC website about something very specific (eg a tax credit they may receive for having invested in a venture capital trust), alongside some commentary or explanation as to its relevance for the client, is much more likely to be tax advice in scope of the regulations.

‘Assistance’ includes non-advisory services, such as drawing up documents on behalf of your clients eg tax covenants between entities.

‘Material aid’ is likely (?) to include, for example, administering tax filings and payments on behalf of your client.

‘Through a third party’ is also a very wide definition and may include scenarios such as:

- a tax specialist, such as a sole practitioner, freelancer or an accountant, being instructed by a firm on the client’s behalf
- a firm that is in common ownership with a wealth management firm, providing tax advice to the wealth management firm’s client.

This means that it does not matter if the contractual relationship is between your firm and the underlying client. When you are providing tax adviser services, the person to whom the tax affairs being advised on relate to is your client for the purposes of the regulations.<sup>20</sup>

For the meaning of “tax adviser” see *Online Tax Rebate Ltd v HMRC*.<sup>21</sup>

### 122.11.3 Relevant person exclusions

There are 8 exceptions, or sets of exceptions, to the definition of relevant person but these are all of specialist interest. I set them out for completeness. Reg 15 MLR provides:

(1) Parts 1 to 4, 6 and 8 to 11 do not apply to the following persons when carrying on any

---

19 An information/advice distinction does not work: *BPE Solicitors v Hughes-Holland* [2017] UKSC 21 at [39]: “Turning to the distinction between advice and information, this has given rise to confusion largely because of the descriptive inadequacy of these labels. On the face of it they are neither distinct nor mutually exclusive categories. Information given by a professional man to his client is usually a specific form of advice, and most advice will involve conveying information”. This was followed in *Khan v Meadows* [2021] UKSC 21 at [41].

20 SRA, “Tax Adviser guidance” (Nov 2020)

<https://www.sra.org.uk/solicitors/resources/money-laundering/money-laundering/tax-adviser-guidance/>

21 [2019] UKUT 167 (TCC).

of the following activities—

- (a) a registered society within the meaning of section 1 of the Co-operative and Community Benefit Societies Act 2014 (meaning of “registered society”), when it—
  - (i) issues withdrawable share capital within the limit set by section 24 of that Act (maximum shareholding in society); or
  - (ii) accepts deposits from the public within the limit set by section 67(2) of that Act (carrying on of banking by societies);
- (b) a society registered under the Industrial and Provident Societies Act (Northern Ireland) 1969, when it—
  - (i) issues withdrawable share capital within the limit set by section 6 of that Act (maximum shareholding in society); or
  - (ii) accepts deposits from the public within the limit set by section 7(3) of that Act (carrying on of banking by societies);
- (c) a person who is (or falls within a class of persons) specified in any of paragraphs 2 to 23, 26 to 38 or 40 to 49 of the Schedule to the Financial Services and Markets Act 2000 (Exemption) Order 2001, when carrying out any activity in respect of which that person is exempt;
- (d) a local authority within the meaning given in article 3(1) of the Financial Services and Markets Act 2000 (Regulated Activities) Order 2001, when carrying on an activity which would be a regulated activity for the purposes of FSMA but for article 72G of that Order;
- (e) a person who was an exempted person for the purposes of section 45 of the Financial Services Act 1986 (miscellaneous exemptions) immediately before its repeal, when exercising the functions specified in that section;
- (f) a person whose main activity is that of a high value dealer, when engaging in financial activity on an occasional or very limited basis as set out in paragraph (3); or
- (g) a person preparing a home report, which for these purposes means the documents prescribed for the purposes of section 98, 99(1) or 101(2) of the Housing (Scotland) Act 2006 (duties: information and others).

#### 122.11.4 *De minimis exceptions*

Reg 15(2) MLR provides:

These Regulations do not apply to a person who falls within regulation 8 solely as a result of that person engaging in financial activity on an occasional or very limited basis as set out in paragraph (3).

Reg 15(3) MLR provides:

For the purposes of paragraphs (1)(f) and (2), a person is to be considered as engaging in financial activity on an occasional or very limited basis if all the following conditions are met—

- (a) the person’s total annual turnover in respect of the financial activity does not exceed £100,000;

- (b) the financial activity is limited in relation to any customer to no more than one transaction exceeding 1,000 euros, whether the transaction is carried out in a single operation, or a series of operations which appear to be linked;
- (c) the financial activity does not exceed 5% of the person's total annual turnover;
- (d) the financial activity is ancillary and directly related to the person's main activity;
- (e) the financial activity is not the transmission or remittance of money (or any representation of monetary value) by any means;
- (f) the person's main activity is not that of a person falling within regulation 8(2)(a) to (f) or (h);
- (g) the financial activity is provided only to customers of the main activity of the person and is not offered to the public.

### 122.11.5 *Exceptions for government*

Reg 15(4) MLR provides:

Chapters 2 and 3 of Part 2, and Parts 3 to 9, do not apply to—

- (a) the Auditor General for Scotland;
- (b) the Auditor General for Wales;
- (c) the Bank of England;
- (d) the Comptroller and Auditor General;
- (e) the Comptroller and Auditor General for Northern Ireland;
- (f) the Official Solicitor to the Supreme Court, when acting as trustee in his or her official capacity;
- (g) the Treasury Solicitor.

### 122.12 **Beneficial Owner: MLR meaning**

Beneficial Owner is elaborately defined. To an English practitioner, the label seems inapt, as the MLR definition does not correspond to the English property/trust law meaning, or indeed to the natural meaning, if there is such a thing.<sup>22</sup> But in the context of moneylaundering the wide usage of this phrase is long established.<sup>23</sup> I write the term with initial capitals, to reflect the technical nature of the expression.

---

22 See App 2.3 (Beneficial ownership: Meanings). CRS uses the more apt term “Controlling Persons”; see 121.23 (Controlling person).

23 I give references in the 2018/19 edition of this work para 67.14.1 (Beneficial ownership: Meanings) but omit that material here as it is of historical interest only.

### 122.13 Beneficial Owner: Company

Reg 5(1) MLR provides:

In these Regulations, “beneficial owner”, in relation to a body corporate which is not a company whose securities are listed on a regulated market, means—

- (a) any individual who exercises ultimate control over the management of the body corporate;
- (b) any individual who ultimately owns or controls (in each case whether directly or indirectly), including through bearer share holdings or by other means, more than 25% of the shares or voting rights in the body corporate; or
- (c) an individual who controls the body corporate.

### 122.14 Control of company

“Control” matters because a person who controls a company is a Beneficial Owner. Needless to say, “control” is widely defined. There are two categories of control, which I call:

- (1) Significant control
- (2) Subsidiary undertaking

#### 122.14.1 *Significant control*

Reg 5(2) MLR provides:

For the purposes of paragraph (1)(c), an individual controls a body corporate if—

- (a) the body corporate is
  - [i] a company or
  - [ii] a limited liability partnershipand that individual satisfies one or more of the conditions set out in Part 1 of Schedule 1A to the Companies Act 2006 (people with significant control over a company)

This takes us to sch 1A CA 2006, which provides:

#### **1 Introduction**

This Part of this Schedule specifies the conditions at least one of which must be met by an individual (“X”) in relation to a company (“company Y”) in order for the individual to be a person with “significant control” over the company.

#### **2 Ownership of shares**

The first condition is that X holds, directly or indirectly, more than 25% of the shares in company Y.

### **3 Ownership of voting rights**

The second condition is that X holds, directly or indirectly, more than 25% of the voting rights in company Y.

### **4 Ownership of right to appoint or remove directors**

The third condition is that X holds the right, directly or indirectly, to appoint or remove a majority of the board of directors of company Y.

### **5 Significant influence or control**

The fourth condition is that X has the right to exercise, or actually exercises, significant influence or control over company Y.

### **6 Trusts, partnerships etc**

The fifth condition is that—

- (a) the trustees of a trust or the members of a firm that, under the law by which it is governed, is not a legal person meet any of the other specified conditions (in their capacity as such) in relation to company Y, or would do so if they were individuals, and
- (b) X has the right to exercise, or actually exercises, significant influence or control over the activities of that trust or firm.

DBEIS have issued 19 pages of guidance on this.<sup>24</sup>

#### 122.14.2 *Subsidiary undertaking*

Reg 5 MLR provides:

- (2) For the purposes of paragraph (1)(c), an individual controls a body corporate if ...
  - (b) the body corporate would be a subsidiary undertaking of the individual (if the individual was an undertaking) under section 1162 (parent and subsidiary undertakings) of the Companies Act 2006 read with Schedule 7 to that Act.

Section 1162 Companies Act 2006 provides:

- (1) This section (together with Schedule 7) defines “parent undertaking” and “subsidiary undertaking” for the purposes of the Companies Acts.

---

24 “Statutory Guidance on the Meaning of ‘Significant Influence or Control’ over Companies in the Context of the Register of People with Significant Control” (2017) [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/675104/psc-statutory-guidance-companies.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/675104/psc-statutory-guidance-companies.pdf)

- (2) An undertaking is a parent undertaking in relation to another undertaking, a subsidiary undertaking, if—
- (a) it holds a majority of the voting rights in the undertaking, or
  - (b) it is a member of the undertaking<sup>25</sup> and has the right to appoint or remove a majority of its board of directors, or
  - (c) it has the right to exercise a dominant influence over the undertaking—
    - (i) by virtue of provisions contained in the undertaking's articles, or
    - (ii) by virtue of a control contract, or
  - (d) it is a member of the undertaking and controls alone, pursuant to an agreement with other shareholders or members, a majority of the voting rights in the undertaking.
- (4) An undertaking is also a parent undertaking in relation to another undertaking, a subsidiary undertaking, if—
- (a) it has the power to exercise, or actually exercises, dominant influence or control over it, or
  - (b) it and the subsidiary undertaking are managed on a unified basis.
- (5) A parent undertaking shall be treated as the parent undertaking of undertakings in relation to which any of its subsidiary undertakings are, or are to be treated as, parent undertakings; and references to its subsidiary undertakings shall be construed accordingly.

Schedule 7 CA 2006 provides:

### **1 Introduction**

The provisions of this Schedule explain expressions used in section 1162 (parent and subsidiary undertakings) and otherwise supplement that section.

### **2 Voting rights in an undertaking**

(1) In section 1162(2)(a) and (d) the references to the voting rights in an undertaking are

---

25 Section 1162 CA 2006 provides the following definitions:

- (3) For the purposes of subsection (2) an undertaking shall be treated as a member of another undertaking—
  - (a) if any of its subsidiary undertakings is a member of that undertaking, or
  - (b) if any shares in that other undertaking are held by a person acting on behalf of the undertaking or any of its subsidiary undertakings...
- (6) Schedule 7 contains provisions explaining expressions used in this section and otherwise supplementing this section.
- (7) In this section and that Schedule references to shares, in relation to an undertaking, are to allotted shares.

to the rights conferred on shareholders in respect of their shares or, in the case of an undertaking not having a share capital, on members, to vote at general meetings of the undertaking on all, or substantially all, matters.

(2) In relation to an undertaking which does not have general meetings at which matters are decided by the exercise of voting rights the references to holding a majority of the voting rights in the undertaking shall be construed as references to having the right under the constitution of the undertaking to direct the overall policy of the undertaking or to alter the terms of its constitution.

### **3 Right to appoint or remove a majority of the directors**

(1) In section 1162(2)(b) the reference to the right to appoint or remove a majority of the board of directors is to the right to appoint or remove directors holding a majority of the voting rights at meetings of the board on all, or substantially all, matters.

(2) An undertaking shall be treated as having the right to appoint to a directorship if—

(a) a person's appointment to it follows necessarily from his appointment as director of the undertaking, or

(b) the directorship is held by the undertaking itself.

(3) A right to appoint or remove which is exercisable only with the consent or concurrence of another person shall be left out of account unless no other person has a right to appoint or, as the case may be, remove in relation to that directorship.

### **Right to exercise dominant influence**

(1) For the purposes of section 1162(2)(c) an undertaking shall not be regarded as having the right to exercise a dominant influence over another undertaking unless it has a right to give directions with respect to the operating and financial policies of that other undertaking which its directors are obliged to comply with whether or not they are for the benefit of that other undertaking.

(2) A "control contract" means a contract in writing conferring such a right which—

(a) is of a kind authorised by the articles of the undertaking in relation to which the right is exercisable, and

(b) is permitted by the law under which that undertaking is established.

(3) This paragraph shall not be read as affecting the construction of section 1162(4)(a).

### **5 Rights exercisable only in certain circumstances or temporarily incapable of exercise**

(1) Rights which are exercisable only in certain circumstances shall be taken into account only—

(a) when the circumstances have arisen, and for so long as they continue to obtain, or

(b) when the circumstances are within the control of the person having the rights.

(2) Rights which are normally exercisable but are temporarily incapable of exercise shall continue to be taken into account.

### **Rights held by one person on behalf of another**

6 Rights held by a person in a fiduciary capacity shall be treated as not held by him.

7(1) Rights held by a person as nominee for another shall be treated as held by the other.

(2) Rights shall be regarded as held as nominee for another if they are exercisable only on his instructions or with his consent or concurrence.

### **8 Rights attached to shares held by way of security**

Rights attached to shares held by way of security shall be treated as held by the person

providing the security—

- (a) where apart from the right to exercise them for the purpose of preserving the value of the security, or of realising it, the rights are exercisable only in accordance with his instructions, and
- (b) where the shares are held in connection with the granting of loans as part of normal business activities and apart from the right to exercise them for the purpose of preserving the value of the security, or of realising it, the rights are exercisable only in his interests.

### **9 Rights attributed to parent undertaking**

(1) Rights shall be treated as held by a parent undertaking if they are held by any of its subsidiary undertakings.

(2) Nothing in paragraph 7 or 8 shall be construed as requiring rights held by a parent undertaking to be treated as held by any of its subsidiary undertakings.

(3) For the purposes of paragraph 8 rights shall be treated as being exercisable in accordance with the instructions or in the interests of an undertaking if they are exercisable in accordance with the instructions of or, as the case may be, in the interests of any group undertaking.

### **10 Disregard of certain rights**

The voting rights in an undertaking shall be reduced by any rights held by the undertaking itself.

### **11 Supplementary**

References in any provision of paragraphs 6 to 10 to rights held by a person include rights falling to be treated as held by him by virtue of any other provision of those paragraphs but not rights which by virtue of any such provision are to be treated as not held by him.

## **122.15 Beneficial Owner: Partnership**

Reg 5(3) MLR provides:

In these Regulations, “beneficial owner”, in relation to a partnership (other than a limited liability partnership<sup>26</sup>), means any individual who—

- (a) ultimately is entitled to or controls (in each case whether directly or indirectly) more than 25% share of the capital or profits of the partnership or more than 25% of the voting rights in the partnership;
- (b) satisfies one or more the conditions set out in Part 1 of Schedule 1 to the Scottish Partnerships (Register of People with Significant Control) Regulations 2017 (references to people

---

26 LLPs are governed by the rules for bodies corporate.

Reg 5(4) MLR provides: “In this regulation “limited liability partnership” has the meaning given by the Limited Liability Partnerships Act 2000.” But this is otiose: see 82.20.1 (Definition and nature of LLP).

- with significant control over an eligible Scottish partnership); or
- (c) otherwise exercises ultimate control over the management of the partnership.

## 122.16 Beneficial Owner: Trust

Reg 6(1) MLR provides:

In these Regulations, “beneficial owner”, in relation to a trust, means each of the following—

- (a) the settlor;
- (b) the trustees;
- (c) the beneficiaries;
- (d) where the individuals (or some of the individuals) benefiting from the trust have not been determined, the class of persons in whose main interest the trust is set up, or operates;
- (e) any individual who has control over the trust.

We have moved a long way from beneficial ownership in the natural sense. “In some way connected with” would be more apt.

### 122.16.1 *Individual controlling trust*

Reg 6(1) MLR provides:

In these Regulations, “beneficial owner”, in relation to a trust, means...

(e) any individual who has control over the trust.

Reg 6(2) MLR provides:

In paragraph (1)(e), “control” means a power (whether exercisable alone, jointly with another person or with the consent of another person) under the trust instrument or by law to—

- (a) dispose of, advance, lend, invest, pay or apply trust property;
- (b) vary or terminate the trust;
- (c) add or remove a person as a beneficiary or to or from a class of beneficiaries;
- (d) appoint or remove trustees or give another individual control over the trust;
- (e) direct, withhold consent to or veto the exercise of a power mentioned in sub-paragraphs (a) to (d).

### 122.16.2 *Control of beneficiary/settlor*

Reg 6(4) MLR provides:

For the purposes of paragraph (1)—

- (a) where an individual is the beneficial owner of a body corporate
  - [i] which is entitled to a specified interest<sup>27</sup> in the capital of the trust property or
  - [ii] which has control over the trust,
 the individual is to be regarded as entitled to the interest or having control over the trust;

### 122.16.3 *Control: limited powers*

Reg 6(4) MLR provides:

For the purposes of paragraph (1) ...

- (b) an individual (“P”) does not have control solely as a result of—
  - (i) P’s consent being required in accordance with section 32(1)(c) (power of advancement) of the Trustee Act 1925;
  - (ii) any discretion delegated to P under section 34 (power of investment and delegation) of the Pensions Act 1995;
  - (iii) the power to give a direction conferred on P by section 19(2) (appointment and retirement of trustee at instance of beneficiaries) of the Trusts of Land and Appointment of Trustees Act 1996; or
  - (iv) the power exercisable collectively at common law to vary or extinguish a trust where the beneficiaries under the trust are of full age and capacity and (taken together)
    - [A] absolutely entitled to the property subject to the trust
    - [B] (or, in Scotland, have a full and unqualified right to the fee).

### 122.16.4 *Foundation/trust equivalent*

Reg 6(3) MLR provides:

In these Regulations, “beneficial owner”, in relation to a foundation or other legal arrangement similar to a trust, means those individuals who hold equivalent or similar positions to those set out in paragraph (1).

## 122.17 Beneficial Owner: Estate

---

<sup>27</sup> Regulation 6(5) MLR provides: “For the purposes of paragraph (4), “specified interest” means a vested interest which is—

- (a) in possession or in remainder or reversion (or in Scotland, in fee); and
- (b) defeasible or indefeasible.”

Reg 6(6) MLR provides:

In these Regulations, “beneficial owner”, in relation to an estate of a deceased person in the course of administration, means—

- (a) in England and Wales and Northern Ireland, the executor, original or by representation, or administrator for the time being of a deceased person;
- (b) in Scotland, the executor for the purposes of the Executors (Scotland) Act 1900).

A beneficiary is not the Beneficial Owner of an estate. That seems surprising, but it does not much matter.

## 122.18 Beneficial Owner: Other entities

Reg 6(7) MLR provides:

In these Regulations, “beneficial owner”, in relation to a legal entity or legal arrangement which does not fall within regulation 5 [body corporate] or paragraphs (1) [trust], (3) [entity similar to trust] or (6) [estate] of this regulation, means—

- (a) any individual who benefits from the property of the entity or arrangement;
- (b) where the individuals who benefit from the entity or arrangement have yet to be determined, the class of persons in whose main interest the entity or arrangement is set up or operates;
- (c) any individual who exercises control over the property of the entity or arrangement.

(8) For the purposes of paragraph (7), where an individual is the beneficial owner of a body corporate which benefits from or exercises control over the property of the entity or arrangement, the individual is to be regarded as benefiting from or exercising control over the property of the entity or arrangement.

### 122.18.1 *Other cases*

Reg 6(9) MLR provides:

In these Regulations, “beneficial owner”, in any other case, means the individual who ultimately owns or controls the entity or arrangement or on whose behalf a transaction is being conducted.

When could this apply?

## 122.19 Application of MLR

With the above 40 pages of definitions in mind, we can at last turn to consider the content of the MLR.

Reg 42(1) MLR provides:

This Part [Part 5, Beneficial Ownership Information] applies to  
 [a] UK bodies corporate and  
 [b] relevant trusts.

## 122.20 Record keeping & disclosure

Similar rules apply to companies (reg 43) and trusts (reg 44) so it is helpful to see them side by side.

### 122.20.1 *Trust records*

Reg 44(1) MLR provides:

The trustees of a relevant trust<sup>28</sup> must maintain accurate and up-to-date records in writing  
 [a] of all the beneficial owners of the trust, and  
 [b] of any potential beneficiaries referred to in paragraph (5)(b),<sup>29</sup> containing the information required by regulation 45(2)(b) to (d) and (5)(f) and (g).<sup>30</sup>

The equivalent rule for companies is in CA 2006, not in the MLR.

### 122.20.2 *Disclosure to relevant person*

#### **Reg 43(1): Body corporate**

(1) When a UK body corporate which is not listed on a regulated market  
 [i] enters into a relevant transaction with a relevant person, or  
 [ii] forms a business relationship with a relevant person,  
 the body corporate must

#### **Reg 44(2): Trust**

When a trustee of a relevant trust, acting as trustee,  
 [i] enters into a relevant transaction with a relevant person, or  
 [ii] forms a business relationship with a relevant person,  
 the trustee must—

28 See ? (“Relevant trust”).

29 See 122.20.4 (Disclosure to authority).

30 See 122.22 (TR trust: Registration).

<p>on request from the relevant person provide the relevant person with—</p> <p>(a) information identifying—</p> <p>(i) its name, registered number, registered office and principal place of business;</p> <p>(ii) its board of directors, or if there is no board, the members of the equivalent management body;</p> <p>(iii) the senior persons responsible for its operations;</p> <p>(iv) the law to which it is subject;</p> <p>(v) its legal owners;</p> <p>(vi) its beneficial owners; and</p> <p>(b) its articles of association or other governing documents.</p>	<p>(a) inform the relevant person that it is acting as trustee; and</p> <p>(b) on request from the relevant person, provide the relevant person with information identifying all the beneficial owners of the trust (which, in the case of a class of beneficiaries, may be done by describing the class of persons who are beneficiaries or potential beneficiaries under the trust).</p>
<p>(2) For the purposes of paragraph (1)(a)(v) and (vi), references to the legal owners and beneficial owners of a UK body corporate include a reference to the legal owners and beneficial owners of any body corporate or trust which is directly or indirectly a legal owner or beneficial owner of that body corporate.</p>	
<p>(3) Paragraph (1)(a)(vi) does not apply if no person qualifies as a beneficial owner (within the meaning of regulation 5(1)) of—</p> <p>(a) the UK body corporate; or</p> <p>(b) any body corporate which is directly or indirectly the owner of that UK body corporate.</p>	

This links with the MLR duties on the relevant person, not discussed here.

122.20.3 *Changes*

**Reg 43(4): Body corporate**

**Reg 44(3): Trust**

<p>If, during the course of a business relationship, there is any change in the identity of the individuals or information falling within paragraph (1), the UK body corporate referred to in paragraph (1) must notify the relevant person of the change and the date on which it occurred within fourteen days from the date on which the body corporate becomes aware of the change.</p>	<p>If, during the course of a business relationship, there is any change in the information provided under paragraph (2), the trustees must notify the relevant person of the change and the date on which it occurred within fourteen days from the date on which any one of the trustees became aware of the change.</p>
---	--

#### 122.20.4 *Disclosure to authority*

##### **Reg 43(5): Body corporate**

The UK body corporate must on request provide all or part of the information referred to in paragraph (1) to a law enforcement authority.

##### **Reg 44(5): Trust**

The trustees of a relevant trust must on request provide information to any law enforcement authority—

- (a) about the beneficial owners of the trust; and
- (b) about any other individual referred to as a potential beneficiary in a document from the settlor relating to the trust such as a letter of wishes.

Reg 43(6)/44(6) provide:

Information requested under paragraph (5), must be provided before the end of such reasonable period as may be specified by the law enforcement authority.

#### 122.20.5 *Disclosure immunity*

Reg 43/44 MLR provide:

(7) The provision of information in accordance with this regulation is not to be taken to breach any restriction, however imposed, on the disclosure of information.

(8) Where a disclosure is made in good faith in accordance with this

regulation no civil liability arises in respect of the disclosure on the part of the UK body corporate.

See 125.8 (POCA disclosure immunity).

#### 122.20.6 “*Relevant transaction*”

Reg 43(9)/44(4) MLR provide:

For the purposes of this regulation, a “relevant transaction” means a transaction in relation to which the relevant person is required to apply customer due diligence measures under regulation 27.

#### 122.20.7 *Retention of records*

Reg 44(9) MLR provides:

If the trustees of a relevant trust are relevant persons who are being paid to act as trustees of that trust, they must—

- (a) retain the records referred to in paragraph (1) for a period of five years after the date on which the final distribution is made under the trust;
- (b) make arrangements for those records to be deleted at the end of that period, unless—
  - (i) the trustees are required to retain them by or under any enactment or for the purpose of court proceedings;
  - (ii) any person to whom information in a record relates consents to the retention of that information; or
  - (iii) the trustees have reasonable grounds for believing that records containing the personal data need to be retained for the purpose of legal proceedings.

#### 122.20.8 *Law enforcement authority*

This term is used in reg 43(5)/44(5).

Reg 44(10) MLR provides:

For the purposes of this regulation, any of the following authorities is a law enforcement authority—

- (a) the Commissioners;
- (b) the FCA;
- (c) the NCA;
- (d) police forces maintained under section 2 of the Police Act 1996;
- (e) the Police of the Metropolis;
- (f) the Police for the City of London;
- (g) the Police Service of Scotland;

- (h) the Police Service of Northern Ireland;
- (i) the Serious Fraud Office.

## 122.21 Trust register

### 122.21.1 HMRC to keep register

Reg 45 MLR provides:

- (1) The Commissioners must maintain a register (“the register”) of—
- (a) beneficial owners of taxable relevant trusts<sup>31</sup>; and
  - (b) potential beneficiaries (referred to in regulation 44(5)(b)) of taxable relevant trusts....

### 122.21.2 Information in register

Reg 45(10) MLR provides:

The register must contain the information referred to in—<sup>32</sup>

<b>Information in reg</b>	<b>Applies to</b>
44(2)(b) <sup>33</sup> , (5)(b)	taxable relevant trusts
44(2)(b), (5)(b), (10E) -(10G)	taxable relevant trust within para (10A)-(10C)
45ZA(3)(4)	trust within reg 45ZA(1)

## 122.22 TR trust: Registration

Reg 45(2) MLR provides:

The trustees of a taxable relevant trust<sup>34</sup> must within the time specified in paragraph (3) provide the Commissioners with—

- (a) the information specified in paragraph (5) in relation to the trust;
- (b) the information specified in paragraph (6) in relation to each of the individuals referred to in regulation 44(2)(b) and (5)(b) (but if sub-paragraph (d) applies, this information does not need to be provided in relation to the beneficiaries of the trust);
- (c) the information specified in paragraph (7) in relation to each of the legal entities referred to in regulation 44(2)(b);
- (d) the information specified in paragraph (8), where the beneficial owners include a class of beneficiaries, not all of whom have been determined.

31 See 122.10 (Taxable relevant trust).

32 For clarity I have set this out in tabular form and not a precise quote of the statute.

33 See 122.22 (Duty to register).

34 See 122.10 (Taxable relevant trust).

### 122.22.1 *Registration deadline*

Reg 45(3) MLR provides:

The information required under paragraph (2)<sup>35</sup> must, apart from any information already provided to the Commissioners under regulation 45ZA (at a time when the trust was not a taxable relevant trust), be provided—

- (a) on or before 31st January after the tax year in which the trustees were first liable to pay any of the taxes referred to in paragraph (14) (“UK taxes”),<sup>36</sup> in the case of a trust which is set up before 6th April 2021;
- (b) on or before 10th March 2022, in the case of a trust which is set up after 5th April 2021 where the trustees become liable to pay UK taxes before 9th February 2022;
- (c) within 30 days of the trustees becoming liable to pay UK taxes, in any other case.

### 122.22.2 *Information: The trust*

Reg 45 MLR identifies 3 categories which are similar to the 3 categories of taxable relevant trust. Regulation 45 MLR provides:

- (4) The information required under paragraphs (2) and (9)<sup>37</sup> must be provided in such form as the Commissioners reasonably require.
- (5) The information specified in this paragraph is—
  - (a) the full name of the trust;
  - (b) the date on which the trust was set up;
  - (c) a statement of accounts for the trust,
    - [i] describing the trust assets and
    - [ii] identifying the value of each category of the trust assets at the date on which the information is first provided to the Commissioners (including the address of any property held by the trust);
  - (d) the country where the trust is considered to be resident for tax purposes;
  - (e) the place where the trust is administered;
  - (f) a contact address for the trustees;

---

<sup>35</sup> See 122.22 (Duty to register).

<sup>36</sup> For this list of taxes, see 122.10 (Taxable relevant trust).

<sup>37</sup> See 122.22 (Duty to register).

- (g) the full name of any advisers who are being paid to provide legal, financial or tax advice to the trustees in relation to the trust.

### 122.22.3 *Information: Individuals*

Reg 45(6) MLR provides:

The information specified in this paragraph is—

- (a) the individual's full name;
- (b) the individual's national insurance number or unique taxpayer reference, if any;
- (c) if the individual does not have a national insurance number or unique taxpayer reference, the individual's usual residential address;
- (d) if the address provided under sub-paragraph (c) is not in the UK—
  - (i) the individual's passport number or identification card number, with the country of issue and the expiry date of the passport or identification card; or
  - (ii) if the individual does not have a passport or identification card, the number, country of issue and expiry date of any equivalent form of identification;
- (e) the individual's date of birth;
- (f) the nature of the individual's role in relation to the trust.

### 122.22.4 *Information: Companies*

Reg 45(7) MLR provides:

The information specified in this paragraph is—

- (a) the legal entity's corporate or firm name;
- (b) the legal entity's unique taxpayer reference, if any;
- (c) the registered or principal office of the legal entity;
- (d) the legal form of the legal entity and the law by which it is governed;
- (e) if applicable, the name of the register of companies in which the legal entity is entered (including details of the EEA state or third country in which it is registered), and its registration number in that register;
- (f) the nature of the entity's role in relation to the trust.

### 122.22.5 *Information: Beneficiaries*

Reg 45(8) MLR provides:

The information specified in this paragraph is a description of the class of persons who are beneficiaries or potential beneficiaries under the trust.

### 122.22.6 *Changes*

Reg 45(9) MLR provides:

The trustees of a taxable relevant trust must—

- (a) if a trustee becomes aware that any of the information provided to the Commissioners under paragraph (2) (other than information provided in relation to the value of the trust assets under paragraph (5)(c)) has changed, notify the Commissioners of the change and the date on which it occurred on or before 31st January—
  - (i) after the tax year in which the change occurred; or
  - (ii) if the trustees are not liable to pay any UK taxes in that year, after the tax year in which the trustees are liable to pay any UK taxes; or
- (b) if the trustees are not aware of any change to any of the information provided under paragraph (2), confirm that fact to the Commissioners on or before 31st January after the tax year in which the trustees are liable to pay any UK taxes.

### 122.23 **Information: UK taxable trust**

Reg 45 provides:

<b>UK trusts</b>	<b>Non-UK trust</b>
------------------	---------------------

<p>(10A) The trustees of a taxable relevant trust which</p> <p>[i] is a UK trust, and</p> <p>[ii] is not an EEA registered trust or a trust listed in Schedule 3A,</p>	<p>(10B) This paragraph applies to the trustees of a taxable relevant trust which</p> <p>[i] is a non-UK trust,</p> <p>[ii] has at least one trustee resident in the UK and</p> <p>[iii] is not an EEA registered trust or a trust falling within Schedule 3A, where the trustees of that trust, in their capacity as such—</p> <p>(a) enter into a business relationship with a relevant person; or</p> <p>(b) acquire an interest in land in the UK.</p>	<p>(10C) This paragraph applies to the trustees of a taxable relevant trust which</p> <p>[i] is a non-UK trust and</p> <p>[ii] is not a trust listed in Schedule 3A,</p> <p>[iii] where</p> <p>[A] none of the trustees are resident in the UK and</p> <p>[B] those trustees, in their capacity as such, acquire an interest in land in the UK.</p>
<p>must provide the Commissioners</p>	<p>(10D) Where paragraph (10B) or (10C) applies, the trustees must provide the Commissioners</p>	
<p>with the information specified in paragraph (10E), apart from any information already provided to the Commissioners under regulation 45ZA (at a time when the trust was not a taxable relevant trust)—</p>	<p>[identical]</p>	
<p>(a) on or before 10th March 2022, where the trustees become liable to pay UK taxes before 9th February 2022;</p>	<p>[identical]</p>	
<p>(b) within 30 days of the trustees becoming liable to pay UK taxes, in any other case.</p>	<p>(b) otherwise, within 30 days of the trustees acquiring the land or (where paragraph (10B)(a) applies) entering into the business relationship.</p>	

### 122.23.1 Basic information: para (10E)

Reg 45 MLR provides:

(10E) The trustees must provide the Commissioners with the following information in relation to each of the beneficial owners of the trust who is an individual, and in relation to any other individual referred to as a potential beneficiary in a document from the settlor relating to the trust such as a letter of wishes—

- (a) the individual's country of residence;
- (b) the individual's nationality;
- (c) the nature and extent of the individual's beneficial interest, but if paragraph (10F) applies, this information does not need to be provided in relation to the beneficiaries of the trust.

(10F) Where the beneficial owners include a class of beneficiaries, not all of whom have been determined, the information to be provided under paragraph (10E) is a description of the class of persons who are beneficiaries or potential beneficiaries under the trust.

### 122.23.2 *Third country entities*

Reg 45 MLR provides:

(10G) The trustees of a trust to which paragraph (10A) or (10B) applies must—

- (a) if they have a controlling interest in a third country entity, provide the Commissioners with the following information, apart from any information already provided under regulation 45ZA(4), at the same time as providing the information under paragraph (10E)—
  - (i) the third country entity's corporate or firm name;
  - (ii) the country or territory by whose law the third country entity is governed;
  - (iii) the registered or principal office of the third country entity;
- (b) if they acquire an interest in a third country entity after providing the information under paragraph (10E), provide the Commissioners with the information specified in this paragraph within 30 days of the date on which they acquired that interest.

### 122.23.3 *Changes*

Reg 45 MLR provides:

(10H) The trustees of a taxable relevant trust to which paragraph (10A), (10B) or (10C) applies must, if the trustee becomes aware that any of

the information provided to the Commissioners under paragraphs (10E) to (10G) has changed, notify the Commissioners of the change and the date on which it occurred within 30 days of the trustee becoming aware of the change.

#### 122.23.4 *Misc*

Reg 45 MLR provides:

(10I) The information required under paragraphs (10E) to (10H) must be provided in such form as the Commissioners reasonably require.

(10J) The Commissioners must keep the information referred to in paragraph (10) on the register for at least five years, and no more than 10 years, after the trust to which it relates has ceased to exist or has ceased to be a type of trust referred to in paragraph (10).

### 122.24 Non TR trust: Registration

We turn to the post-2020 rules. Reg 45ZA MLR provides:

(1) In relation to trusts which are—

- (a) type A trusts, other than taxable relevant trusts;
- (b) type B trusts, other than taxable relevant trusts;
- (c) type C trusts, other than taxable relevant trusts,

the information to be contained in the register maintained under this Part is the information referred to in paragraphs (3) and (4), and in this paragraph, “taxable relevant trust” has the meaning given in regulation 45.

#### 122.24.1 *Types A-C*

Reg 45ZA MLR identifies the 3 types of trusts, which are similar to relevant trust categories (i)-(iii):

(2) For the purposes of this regulation—

(a) a “type A trust” is a UK trust which	(b) a “type B trust” is a non-UK trust which	(c) a “type C trust” is a non-UK trust which
	has at least one trustee resident in the UK,	
is an express trust and	is an express trust and	is an express trust and

is not an EEA registered trust or a trust listed in Schedule 3A;	is not an EEA registered trust or a trust listed in Schedule 3A,	is not a trust listed in Schedule 3A,
	where the trustees of that trust, in their capacity as such— (i) enter into a business relationship with a relevant person; or (ii) acquire an interest in land in the UK;	where none of the trustees are resident in the UK and those trustees, in their capacity as such, acquire an interest in land in the UK.

122.24.2 *Information required*

Reg 45ZA MLR provides:

(3) The trustees of a trust to which paragraph (1) applies must, within the time specified in paragraph (5), provide the Commissioners with the following information, apart from any information already provided to the Commissioners under regulation 45 (at a time when the trust was a taxable relevant trust within the meaning of that regulation)—

- (a) the information specified in paragraphs (i) to (v) in relation to each of the beneficial owners of the trust who is an individual, and in relation to any other individual referred to as a potential beneficiary in a document from the settlor relating to the trust such as a letter of wishes—
  - (i) the individual's full name;
  - (ii) the individual's month and year of birth;
  - (iii) the individual's country of residence;
  - (iv) the individual's nationality;
  - (v) the nature and extent of the individual's beneficial interest, but if sub-paragraph (b) applies, this information does not need to be provided in relation to the beneficiaries of the trust;
- (b) where the beneficial owners include a class of beneficiaries, not all of whom have been determined, a description of the class of persons who are beneficiaries or potential beneficiaries under the trust;
- (c) the information specified in paragraphs (i) to (iii) in relation to each of the beneficial owners of the trust who is a legal entity—
  - (i) the legal entity's corporate or firm name;
  - (ii) the registered or principal office of the legal entity;
  - (iii) the nature of the entity's role in relation to the trust.

### 122.24.3 *Further information: Type A/B*

Reg 45ZA MLR provides:

- (4) The trustees of a trust to which paragraph (1)(a) or (b) applies must—
- (a) if they have a controlling interest in a third country entity, provide the Commissioners with the following information, apart from any information already provided under regulation 45(10G), at the same time as providing the information under paragraph (3)—
    - (i) the third country entity's corporate or firm name;
    - (ii) the country or territory by whose law the third country entity is governed;
    - (iii) the registered or principal office of the third country entity;
  - (b) if they acquire an interest in a third country entity after providing the information under paragraph (3), provide the Commissioners with the information specified in this paragraph within 30 days of the date on which they acquired that interest.

### 122.24.4 *Time limit*

Reg 45ZA MLR provides:

- (5) The information required under paragraph (3) must be provided—
- (a) on or before 10th March 2022, in the case of a trust which first falls within paragraph (1)(a), (b) or (c) before 9th February 2022;
  - (b) in any other case, within 30 days of the trust being set up, or, if later, within 30 days of the trust first falling within paragraph (1)(a), (b) or (c).

### 122.24.5 *Changes/Information format*

Reg 45ZA MLR provides:

- (6) If a trustee becomes aware that any of the information provided to the Commissioners under paragraph (3) or (4) has changed, the trustee must notify the Commissioners of the change within 30 days of the trustee becoming aware of the change.
- (7) The information required under paragraphs (3), (4) and (6) must be provided in such form as the Commissioners reasonably require.

## **122.25 Access to information on the register**

Reg 45ZB MLR provides:

- (1) The Commissioners must make the accessible information available to a person who demonstrates to the Commissioners a legitimate interest in the beneficial ownership of a trust, where that person so requests.
- (2) The Commissioners must make available to a trustee, on a request by that trustee, such information as the trustee reasonably requires in order to enable a relevant person to meet the relevant person's obligations under Part 3, where that relevant person proposes to—
  - (a) form a business relationship with the trust; or
  - (b) enter into a transaction with the trust in relation to which the relevant person is required to apply customer due diligence measures under regulation 27.
- (3) The Commissioners must make the accessible information available to a person who makes a written request about a type A trust or a type B trust (within the meaning given in regulation 45ZA(2)), where the trustees of that trust have a controlling interest in a third country entity.
- (4) The Commissioners may—
  - (a) charge a fee to any person making a request for accessible information under paragraph (1) or (3), which must not exceed such amount as the Commissioners consider will enable them to meet any expenses reasonably incurred by them in dealing with such requests, including expenses incurred in maintaining the register;
  - (b) require the person to submit the request in such a manner as the Commissioners may reasonably require, including by requiring the person to register in a manner specified by the Commissioners; and
  - (c) require the person to provide such information to support the request as the Commissioners may specify.
- (5) Paragraphs (1) and (3) do not apply to the accessible information in a case where, and to the extent that, the Commissioners consider that the information should be exempt because—
  - (a) the Commissioners consider that making the information available would expose the beneficial owner to a disproportionate risk of fraud, kidnapping, blackmail, extortion, harassment, violence or intimidation;
  - (b) the beneficial owner is under the age of 18; or
  - (c) the beneficial owner—
    - (i) lacks capacity within the meaning of section 2 of the Mental Capacity Act 2005;

- (ii) is incapable within the meaning of section 1 of the Adults with Incapacity (Scotland) Act 2000; or
- (iii) is incapable by reason of mental disorder within the meaning of Article 3(1) of the Mental Health (Northern Ireland) Order 1986,

and in this paragraph, references to the beneficial owner include references to any other individual referred to as a potential beneficiary in a document from the settlor relating to the trust such as a letter of wishes.

(6) Where the Commissioners decide to exempt any of the accessible information in accordance with paragraph (5), the Commissioners must inform the person requesting the information of the decision, explain that the person is entitled to seek a review, and specify the period in which the person must inform the Commissioners that the person wishes to seek a review (which must not be less than 30 days beginning with the day on which the person is informed of the decision).

- (7) If the person seeks a review, the Commissioners may decide to—
- (a) uphold the decision to exempt the information;
  - (b) make the information available; or
  - (c) exempt less of the requested information and make more of the requested information available,

and must inform the person who made the request of their decision.

(8) For the purposes of this regulation, the “accessible information” means the details specified in paragraph (9) or (10) which are held on the register in relation to a beneficial owner of a type A trust or a type B trust (within the meaning given in regulation 45ZA(2)), or in relation to an individual referred to as a potential beneficiary in a document from the settlor relating to the trust such as a letter of wishes.

- (9) The details are, in relation to an individual—
- (a) the individual's full name;
  - (b) the individual's month and year of birth;
  - (c) the individual's country of residence;
  - (d) the individual's nationality;
  - (e) the nature and extent of the individual's beneficial interest.

- (10) The details are, in relation to a legal entity—
- (a) the legal entity's corporate or firm name;
  - (b) the registered or principal office of the legal entity;
  - (c) the nature of the entity's role in relation to the trust.

### **122.25.1 Legitimate interest**

Reg 45ZB MLR provides:

(11) For the purposes of this regulation, the Commissioners must take account of the following when determining whether a person has a legitimate interest in the beneficial ownership of a trust—

- (a) whether the person is involved in an investigation into money laundering or terrorist financing;
- (b) whether the person is making the request for accessible information in order to further an investigation into a specified suspected instance of money laundering or terrorist financing;
- (c) whether the disclosure of the information to that person would be likely to prejudice—
  - (i) any criminal investigation or criminal proceedings;
  - (ii) any other investigation mentioned in section 342(1) of the Proceeds of Crime Act 2002 (offences of prejudicing investigation); or
  - (iii) any investigation by an appropriate officer (within the meaning given in regulation 87(10)) into a potential contravention of a relevant requirement, which is or are being, or is or are about to be, conducted;
- (d) whether, having regard to the information produced by the person making the request, it is reasonable for that person to suspect that the trust is being used for money laundering or terrorist financing.

## 122.26 Estates

Estates do not have to register under MLR as they are not trusts. However “complex” estates need to register with HMRC in order to obtain a UTR and submit a return and this is done via the TRS.<sup>38</sup>

## 122.27 Collective investment scheme

### 122.27.1 *Collective investment scheme: Trustees*

Reg 44(11) MLR provides:

For the purposes of this regulation, in the case of a relevant trust which is a collective investment scheme, a reference to the trustees of a relevant trust includes a reference to the manager or operator of the collective investment scheme.

This applies only for the purposes of reg 44, so it is repeated verbatim in

---

<sup>38</sup> See 85.21 (Tax returns & registration).

reg. 45(15) MLR.

### 122.27.2 *CIS: Definition*

Reg 42(2)(f) MLR provides:

a “collective investment scheme” has the meaning given in regulation 12H of the International Tax Compliance Regulations 2015.

That takes us to reg 12H(3) International Tax Compliance Regulations 2015, which provides:

In this regulation “collective investment scheme” means—

- (a) an investment trust within the meaning of the Corporation Tax Acts,
- (b) a venture capital trust within the meaning of Part 6 of ITA 2007,  
or
- (c) any arrangements that are a “collective investment scheme” within the meaning of the Financial Services and Markets Act 2000.

## REPORTING OFFSHORE TRUSTS

### 123.1 Reporting offshore trusts: Introduction

#### **123.1 Reporting offshore trusts: Introduction**

This chapter considers:

- (1) IHT reporting rules on creation of an offshore trust
- (2) CGT reporting rules relating to offshore trusts

The significance of this has been overtaken by CRS and MLR 2017, discussed in the previous chapter, and the rules ought to be repealed. Until that happens, they should strictly be observed, but I wonder how much that happens in practice.

#### **123.2 IHT: Reporting creation of trust**

Section 218(1) IHTA provides:

Where any person, in the course of a trade or profession carried on by him, other than the profession of a barrister,<sup>1</sup> has been concerned with the making of a settlement and knows or has reason to believe—

- (a) that the settlor was domiciled in the UK, and
- (b) that the trustees of the settlement are not or will not be resident in the UK,

he shall, within three months of the making of the settlement, make a return to the Board stating the names and addresses of the settlor and of the trustees of the settlement.

The duty to report rests on a person (“the practitioner”) acting in the

---

<sup>1</sup> Section 272 IHTA provides: “barrister” includes a member of the Faculty of Advocates.

course of their trade or profession. The duty rests on the firm or company acting and not directly on its employees.

Barristers are exempt. The reason is that they will usually be instructed by others who are subject to the duty.<sup>2</sup>

The practitioner must be concerned with the making of a settlement. This would include not only solicitors who might draft the settlement but other advisers who advise in relation to the creation of a settlement, even if the actual execution of the settlement were delegated to foreign advisers.

The practitioner might advise on the matter generally, leaving the client to take whatever action they wish in light of the advice, perhaps in conjunction with the trustees; in such circumstances they are probably not “concerned with the making of a settlement”; this presupposes the settlement had been established. What if the client had decided against a non-resident settlement after all or wanted to think about it? The practitioner may not know what the client eventually decided to do. The obligation under s.218 must be restricted to those who are able to provide the relevant information.

The practitioner must know or have reason to believe that the settlor is domiciled in the UK. A settlement may have more than one settlor.<sup>3</sup> Suppose one settlor is domiciled in the UK but the other is not. Does the reporting requirement arise? On a literal construction one could not say “the settlor” is UK domiciled and the reporting requirement would not arise. A purposive construction suggests that the duty does arise. That is the better view at least if the foreign domiciled settlor only provides a nominal amount. A practitioner should err on the side of caution.

A question also arises about the time when the settlor’s domicile is relevant. Section 218 merely says that it applies if the settlor *was* domiciled in the UK. Does this mean domiciled in the UK at the time the settlement was made? Or does it mean that the settlor had at any time been domiciled in the UK? Context and common sense dictate that the

- 
- 2 A consultation paper was published in 2009 but the proposed reforms were dropped. See HMRC Consultation Document “Modernising Powers, Deterrents and Safeguards: Tackling Offshore Tax Evasion” (2009); HMRC Consultation Response Document “Tackling Offshore Tax Evasion” (2010).
  - 3 “Settlor” for this purpose has the usual IHT meaning; see 94.1 (Why settlors matter). The separate settlements fiction does not apply for this purpose: see 75.5 (Separate settlement fiction).

provision is referring to the domicile of the settlor at the time the settlement was made because that is the date that matters for IHT.

IHT Manual para 42993 formerly provided:<sup>4</sup>

**42993 Section 218 notices** [April 2010]

***Where settlor is a company***

... s.218 refers to settlors domiciled in the UK

- ‘settlor’ in relation to a settlement includes any person by whom the settlement was made (s.44 IHTA)
- In terms of the Interpretation Act 1889 Rule 19 ‘the expression person shall, unless the contrary appears, include any body of persons corporate or unincorporate’<sup>5</sup>
- In general a company is domiciled where it is registered – *Gasque v IRC* [1940] 2 KB 80.

So where a non-UK resident [Employee Benefit Trust] is established by a company registered in the UK a s.218 notice is mandatory.

The person must know or have reason to believe that the trustees of the settlement are not or will not be resident in the UK.

In marginal cases the practitioner may be placed in difficulty. It may be necessary in some cases to report the creation of the settlement to HMRC out of caution.

There is no requirement under s.218 to notify the amount or nature of the settled property. However, HMRC have wide powers to obtain information and would know from the notification to whom further enquiries could be directed.

For the position where IHT DT relief applies see 108.6 (Claims for IHT DTA reliefs).

### 123.2.1 *Non-resident practitioner*

It is suggested that no duty will arise on foreign practitioners who have no UK connection; the usual territorial limitation must apply.<sup>6</sup> At first sight the requirement that the settlor is domiciled in the UK is sufficient to meet

---

4 Since April 2011 the Manual reads ‘our guidance on Employee Benefit Trusts is currently being rewritten’.

5 The text is 30 years out of date; the reference should now be to the Interpretation Act 1978, but the point is still valid.

6 *Clark v Oceanic* 56 TC 183.

the territorial requirement so that no further territorial limitations should be implied. But the domicile connection may be a faint one. Suppose an individual leaves the UK in 2000 and settles in the USA, and in 2003 he makes a settlement. The individual may still be IHT deemed domiciled, but it is not realistic to expect the US practitioner to file a s.218 return (particularly having regard to the fact that the USA IHT DTA provides some IHT exemption).

### 123.2.2 *Failure to report: Penalty*

Failure to make the return gives rise only to a nominal penalty.<sup>7</sup> More seriously, the practitioner faces criminal liability for fraud on HMRC, or professional disciplinary sanctions, if:

- (1) the practitioner dishonestly fails to report in breach of the duty to do so; or
- (2) any person dishonestly agreed with another practitioner or a client that there shall be no report, in breach of the duty to do so.

## 123.3 Reporting addition to pre-1998 trust

Para 2 sch 5A TCGA provides:

- (1) This paragraph applies if—
  - (a) a settlement was created before 17th March 1998,
  - (b) on or after the commencement day a person transfers property to the trustees otherwise than under a transaction entered into at arm's length and otherwise than in pursuance of a liability incurred by any person before that day,
  - (c) the trustees are not resident in the UK at the time the property is transferred, and
  - (d) the transferor knows, or has reason to believe, that the trustees are not so resident.
- (2) Before the expiry of the period of twelve months beginning with the relevant day, the transferor shall deliver to the Board a return which—
  - (a) identifies the settlement, and
  - (b) specifies the property transferred, the day on which the transfer was made, and the consideration (if any) for the transfer.
- (3) For the purposes of sub-paragraph (2) above the relevant day is the

---

<sup>7</sup> Section 245A(1) IHTA 1984.

day on which the transfer is made.

## 123.4 CGT: Reporting creation of trust

Para 3 sch 5A TCGA provides:

(1) This paragraph applies if a settlement is created on or after the commencement day, and at the time it is created—

- (a) the trustees are not resident in the UK, or
- (b) the trustees are resident in the UK but fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.

(2) Any person who—

- (a) is a settlor in relation to the settlement at the time it is created, and
- (b) at that time fulfils the condition mentioned in sub-paragraph (3) below,

shall, before the expiry of the period of three months beginning with the relevant day, deliver to the Board a return specifying the particulars mentioned in sub-paragraph (4) below.

(3) The condition is that the person concerned is domiciled in the UK and is resident in the UK.

(3A) Section 835BA of ITA 2007 (deemed domicile) applies for the purposes of sub-paragraph (3).

(4) The particulars are—

- (a) the day on which the settlement was created;
- (b) the name and address of the person delivering the return;
- (c) the names and addresses of the persons who are the trustees immediately before the delivery of the return.

(5) For the purposes of sub-paragraph (2) above the relevant day is the day on which the settlement is created.

### 123.4.1 *Deemed-domiciled settlor*

Para 9 sch 12 FA 2017 provides:

(1) In Schedule 5A (settlements with foreign element: information), in paragraph 3, after sub-paragraph (3) insert—

“(3A) Section 835BA of ITA 2007 (deemed domicile) applies for the purposes of sub-paragraph (3).”

(2) The amendment made by this paragraph has effect in relation to settlements created on or after 6 April 2017.

Thus for settlors who are deemed domiciled for IT/CGT, the obligation to report the creation of a trust only applies for a post-2017 trust. But a person cannot be deemed domiciled before 6/4/2017, so the issue does not arise for pre-2017 trusts.

More importantly, perhaps, deemed domicile does not apply elsewhere in sch 5A,<sup>8</sup> so there is no duty to report under other paragraphs of sch 5A.

### **123.5 Reporting: Settlor becomes UK-dom**

Para 4 sch 5A TCGA provides:

(1) This paragraph applies if a settlement is created on or after 19th March 1991, and at the time it is created—

- (a) the trustees are not resident in the UK, or
- (b) the trustees are resident in the UK but fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.

(2) Any person who—

- (a) is a settlor in relation to the settlement at the time it is created,
- (b) at that time does not fulfil the condition mentioned in sub-paragraph (3) below, and
- (c) first fulfils that condition at a time falling on or after the commencement day,

shall, before the expiry of the period of twelve months beginning with the relevant day, deliver to the Board a return specifying the particulars mentioned in sub-paragraph (4) below.

(3) The condition is that the person concerned is domiciled in the UK and is resident in the UK.

(4) The particulars are—

- (a) the day on which the settlement was created;
- (b) the name and address of the person delivering the return;
- (c) the names and addresses of the persons who are the trustees immediately before the delivery of the return.

(5) For the purposes of sub-paragraph (2) above the relevant day is the day on which the person first fulfils the condition as mentioned in paragraph (c) of that sub-paragraph.

### **123.6 CGT: Reporting trust emigration**

---

<sup>8</sup> The deemed domicile rules do not apply: see 4.3.1 (Scope of IT/CGT deemed-dom).

Para 5 sch 5A TCGA provides:

- (1) This paragraph applies if—
  - (a) the trustees of a settlement cease at any time (the relevant time) on or after the commencement day<sup>9</sup> to be resident in the UK, or
  - (b) the trustees of a settlement, while continuing to be resident in the UK, become at any time (the relevant time) on or after the commencement day trustees who fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.
- (2) Any person who was a trustee of the settlement immediately before the relevant time shall, before the expiry of the period of twelve months beginning with the relevant day, deliver to the Board a return specifying—
  - (a) the day on which the settlement was created,
  - (b) the name and address of each person who is a settlor in relation to the settlement immediately before the delivery of the return, and
  - (c) the names and addresses of the persons who are the trustees immediately before the delivery of the return.
- (3) For the purposes of sub-paragraph (2) above the relevant day is the day when the relevant time falls.

See 11.4 (Charge on emigration of trust).

### 123.7 Exceptions to CGT reporting

There are minor exceptions in para 6 sch 5A TCGA:

- (1) Nothing in paragraph 2, 3, 4 or 5 above shall require information to be contained in the return concerned to the extent that—
  - (a) before the expiry of the period concerned the information has been provided to the Board by any person in pursuance of the paragraph concerned or of any other provision, or
  - (b) after the expiry of the period concerned the information falls to be provided to the Board by any person in pursuance of any provision other than the paragraph concerned.
- (2) Nothing in paragraph 2, 3, 4 or 5 above shall require a return to be delivered if—

---

<sup>9</sup> Defined para 1 sch 5A TCGA: “In this Schedule “the commencement day” means the day on which the FA 1994 was passed.”

- (a) before the expiry of the period concerned all the information concerned has been provided to the Board by any person in pursuance of the paragraph concerned or of any other provision, or
- (b) after the expiry of the period concerned all the information concerned falls to be provided to the Board by any person in pursuance of any provision other than the paragraph concerned.

### **123.8 IHT/CGT reporting compared**

Sch 5A TCGA imposes overlapping reporting requirements. But s.218 IHTA is wider in some respects. It applies to IHT-settlements which are not necessarily non-resident, and not necessarily trusts, under the CGT definitions.<sup>10</sup> The main differences are:

<b>Rule</b>	<b>IHT</b>	<b>CGT</b>
Duty on	professional adviser	settlor/trustees
Applies on	creation of trust	creation/addition/migration/settlor becomes UK domiciled

---

<sup>10</sup> For IHT Trust residence, see 6.19 (Trust residence for IHT).

This is quite different from the IT/CGT definition.

## CHAPTER ONE HUNDRED AND TWENTY FOUR

# INTERNATIONAL MOVEMENT OF CAPITAL: REPORTS

### 124.1 IMOC: Introduction

#### 124.1 IMOC: Introduction

The legislation is in sch 17 FA 2009 and the International Movement of Capital (Required Information) Regulations 2009 (“**IMOCR**”).

#### 124.2 Duty to report

Para 4(1) sch 17 FA 2009 provides:

If a UK corporate parent is a reporting body at the time a reportable event takes place or a reportable transaction is carried out, it must, within 6 months of that time, make a report to an officer of Revenue and Customs.

The INT Manual provides:

**INTM700310: International movements of capital: Reporting requirement: where should reports be sent?** [May 2020]

The recommendation is that businesses should address the reports directly to the customer compliance manager ('CCM') dealing with their affairs. In cases where a business does not have a CCM appointed the reports should be sent to the office to which corporation tax returns are made.

##### 124.2.1 “UK corporate parent”

Para 7 sch 17 FA 2009 provides the definition:

In this Schedule “UK corporate parent” means a body corporate that-

- (a) is resident in the UK,
- (b) controls one or more bodies corporate that are not resident in

- the UK, and
- (c) s not controlled by-
    - (i) a body corporate that is resident in the UK, or
    - (ii) two or more bodies corporate taken together each of which is resident in the UK.

### 124.2.2 *Contents of report*

Para 4 sch 17 FA 2009 provides:

- (2) The report must contain such information relating to the event or transaction, or persons connected with the event or transaction, as is specified in regulations made by the Commissioners.
- (3) The purpose of the report is to enable the Commissioners to consider whether the event or transaction results, directly or indirectly, in an advantage for any person in respect of corporation tax or any other tax or duty.

The INT Manual provides:

**INTM700800: International movements of capital: What information should the report include?** [May 2020]

The report must include such information relating to the event or transactions as is specified in the regulations made by HMRC. The purpose of the report is to enable HMRC to consider whether or not the event or transaction gives rise to an advantage in relation to UK taxation.

Regulation 3 deals with the information which a reporting body is required to provide. It provides that the information required as it relates to a foreign subsidiary is its name and the territory from which it derives its status as a body corporate. The report should also contain a full description of the steps taken in the course of a transaction including in particular the date, the names of the parties, the reasons for it, and an estimate of its effect on liability to UK tax.

It can be seen from these provisions that the new reporting requirement takes a different approach to that under S.I. 1990 / No. 1671 which set out in some detail what was to be supplied under ICTA88/S765A (see INTM700110). When compiling a report under Schedule 17 businesses should bear in mind the purpose of that report when viewed from HMRC's perspective.

The legislation states that the reports are intended to enable HMRC to consider whether or not the event or transaction gives rise to an advantage in relation to UK taxation. This is a fundamental element of

the department's work in assessing UK tax risks. The reports are therefore intended to play a part in the ongoing risk assessments carried out on all major groups. With this in mind a business needing to make a report ought to ensure that it is sufficiently detailed to make the consequences of the transaction clear. There is no advantage for either HMRC or businesses if additional information has to be sought (whether under formal information powers or not) because the report is insufficient.

To this end, for example, the inclusion of key documents relating to a particular transaction is to be encouraged. A particular agreement is likely to contain a great deal of factual information about the parties involved and the steps taken. Similarly, in multi-stage transactions a diagrammatic approach setting out what has happened will in most cases provide a more effective report than one that relies solely on description, although a narrative element will usually be required.

The extent to which the tax effect of a particular transaction can be estimated will vary from case to case. A distinction might be drawn between transactions planned and intended to generate a UK tax advantage and those which might well have such an effect but not in a precisely quantifiable manner. An estimate may therefore not necessarily be expressed in terms of a certain sum of money each year but as a narrative of the likely consequences. HMRC recognises that a reasonable estimate of the tax effect of some transactions may not be possible. In such cases it would be appropriate to include a brief description of the reasons for this.

### **124.3 Definitions of “Reporting body”**

There are two definitions of reporting body, one in sch 17 and one in IMOCR. It is bad drafting to use the same term differently in what is in effect one single code of rules; but there it is.

#### *124.3.1 Reporting body: Sch 17 definition*

Para 5(1) sch 17 FA 2009 provides:

For the purposes of this Schedule a body corporate (“body A”) is a reporting body at any time if, at that time-

- (a) it is a UK corporate parent, and
- (b) condition A, B, C or D is met.

#### *124.3.2 Condition A: no foreign control*

Para 5(2) sch 17 FA 2009 provides:

Condition A is that body A is not controlled by a body corporate resident outside the UK.

### 124.3.3 *Condition B: one UK parent*

Para 5(3) sch 17 FA 2009 provides:

Condition B is that-

- (a) body A is controlled by a body corporate resident outside the UK (“the foreign parent”), and
- (b) no other relevant UK body corporate is controlled by the foreign parent.

### 124.3.4 *Condition C/D: > 1 UK parent*

Conditions C and D concern nomination arrangements, and are conveniently read side by side:

#### **Para 5(4): Condition C**

(4) Condition C is that-

- (a) body A is controlled by a body corporate resident outside the UK (“the foreign parent”),
- (b) one or more other UK corporate parents are controlled by the foreign parent, and
- (c) body A is not a party to an arrangement under paragraph 6.

#### **Para 5(5): Condition D**

(5) Condition D is that-

- [Identical]
- [identical]
- (c) body A is a party to an arrangement under paragraph 6 and is the nominated reporting body under that arrangement.

### 124.3.5 *Nomination of reporting body*

The INT Manual provides:

#### **INTM700400: International movements of capital: Who should make reports?** [May 2020]

... If a group is structured as, for example, two or more parallel sub-groups controlled by a foreign parent then the UK resident parents of each sub-group will be reporting bodies in respect of their

subsidiaries unless between them they nominate a single reporting body (see INTM700410).

Para 6 sch 17 FA 2009 provides:

- (1) Sub-paragraph (2) applies where-
  - (a) a UK corporate parent is controlled by a body corporate resident outside the UK (“the foreign parent”), and
  - (b) one or more other UK corporate parents are controlled by the foreign parent.
- (2) Two or more of the UK corporate parents controlled by the foreign parent may enter into an arrangement under which one of their number (“the nominated reporting body”) is nominated to exercise, on behalf of all of them, the functions conferred under this Schedule on a reporting body.
- (3) A party to an arrangement under this paragraph may withdraw from the arrangement.
- (4) The Commissioners may by regulations make provision about entering into and withdrawing from an arrangement under this paragraph.
- (5) Regulations under sub-paragraph (4) may, in particular, include provision-
  - (a) as to the form and manner in which bodies may enter into, or a body may withdraw from, an arrangement,
  - (b) requiring a person to give information to HMRC in connection with entering into or withdrawing from an arrangement, and
  - (c) as to circumstances in which a body is to be treated as having withdrawn from an arrangement.

#### 124.3.6 *Nomination procedure*

Article 6 IMOCR provides:

- (1) This regulation contains provision about an arrangement under paragraph 6 of Schedule 17.
- (2) The parties to an arrangement must give notice to an officer of Revenue and Customs within 28 days of entering into it.
- (3) The notice must be in writing and signed by all the parties to the arrangement.
- (4) The notice must state-
  - (a) the name of each party,
  - (b) the tax reference of each party, and
  - (c) which party is the nominated reporting body.

(5) The parties to an arrangement are treated as having withdrawn from it if they fail to give notice in accordance with paragraphs (2) to (4).

(6) A party to an arrangement is treated as having withdrawn from it if that party ceases to be controlled by the foreign parent.

(7) A party which withdraws from or is treated as having withdrawn from an arrangement must give notice in writing of that fact to an officer of Revenue and Customs and to any other party to the arrangement within 28 days of the date of withdrawal or, as the case may be, the date on which it ceases to be controlled by the foreign parent.

#### 124.3.7 *Reporting body: IMOCR definition*

Article 2(3) IMOCR provides:

In these Regulations, references to a reporting body include a body corporate which would be a reporting body if it had not entered into an arrangement under paragraph 6 of Schedule 17.

### **124.4 Reportable event/transaction**

Para 8(1) sch 17 FA 2009 provides:

For the purposes of this Schedule an event or transaction is “reportable”, in relation to a reporting body, if-

- (a) it is of a value exceeding £100 million,
- (b) it is within sub-paragraph (2), and
- (c) it is not an excluded transaction (see paragraph 9).

#### 124.4.1 *Valuation of event/transaction*

£100m is a substantial amount; but it has not been increased for inflation, so gradually more corporate groups are coming within the scope of IMOC.

Article 4 IMOCR provides:

(1) The value of an event or transaction is to be determined for the purposes of paragraph 8 of Schedule 17 in accordance with this regulation.

(2) The value of an issue or transfer of shares or debentures is the market value of the shares or debentures.

(3) The value of an event or transaction which results in a foreign subsidiary becoming, or ceasing to be, a controlling partner in a partnership is the market value of the share of the subsidiary in the assets of the partnership immediately after it becomes a controlling

partner or, as the case may be, immediately before it ceases to be a controlling partner.

(4) For the purposes of paragraphs (2) and (3), the value of an event or transaction that is one of a series is the aggregate of the value of all the events and transactions in the series.

## **124.5 Reportable transactions**

Para 8 sch 17 FA 2009 provides:

(2) An event or transaction is within this sub-paragraph if-

A set of 5 categories of reportable transaction then follow.

### *124.5.1 Issue of shares/debentures*

Para 8 sch 17 FA 2009 provides:

(2) An event or transaction is within this sub-paragraph if-

(a) it is an issue of shares or debentures by a foreign subsidiary,

### *124.5.2 Transfer of shares/debentures*

Para 8 sch 17 FA 2009 provides:

(2) An event or transaction is within this sub-paragraph if ...

(b) it is a transfer by the reporting body, or a transfer caused or permitted by the reporting body, of shares or debentures of a foreign subsidiary in which the reporting body has an interest,

(c) where the reporting body is a party to an arrangement under paragraph 6, it is a transfer by another party to the arrangement, or a transfer caused or permitted by such a party, of shares or debentures of a foreign subsidiary in which that party has an interest,

### *124.5.3 Change of partnership control*

Para 8 sch 17 FA 2009 provides:

(2) An event or transaction is within this sub-paragraph if ...

(d) it results in a foreign subsidiary becoming, or ceasing to be, a controlling partner in a partnership.

Para 8(3) sch 17 FA 2009 provides:

For the purposes of sub-paragraph (2)(d) a foreign subsidiary is a

“controlling partner” in a partnership if, whether alone or taken together with one or more other partners that are subsidiaries, it controls the partnership.

Para 12(3) sch 17 FA 2009 provides:

For the purposes of this Schedule “control” in relation to a partnership, means the right to a share of more than 50% of the assets, or of more than 50% of the income, of the partnership.

This is the standard definition.<sup>1</sup>

Para 12(4) sch 17 FA 2009 provides an (unnecessary) foreign-entity definition of partnership:<sup>2</sup>

In this Schedule-  
“partnership” includes an entity established under the law of a country or territory outside the UK of a similar character to a partnership, and  
“partner” is to be read accordingly;

#### 124.5.4 *Regulations*

Para 8 sch 17 FA 2009 provides:

- (2) An event or transaction is within this sub-paragraph if ...
  - (e) it is of a description specified in regulations made by the Commissioners.

No further events/transactions have been specified.

### 124.6 **Excluded transactions**

Excluded transactions are not reportable.

Para 9 sch 17 FA 2009 provides:

- (1) For the purposes of this Schedule a transaction is “excluded” if-

A set of five excluded transactions then follow:

#### 124.6.1 *Ordinary course of trade*

Para 9 sch 17 FA 2009 provides:

---

1 See 103.11 (Control of partnership).

2 See 102.1.1 (Foreign-entity definitions).

- (1) For the purposes of this Schedule a transaction is “excluded” if-
  - (a) it is carried out in the ordinary course of a trade,

#### 124.6.2 *All parties resident in same territory*

Para 9 sch 17 FA 2009 provides:

- (1) For the purposes of this Schedule a transaction is “excluded” if ...
  - (b) all the parties to the transaction are, at the time the transaction is carried out, resident in the same territory,

#### 124.6.3 *Security*

Para 9 sch 17 FA 2009 provides:

- (1) For the purposes of this Schedule a transaction is “excluded” if ...
  - (c) it consists in giving to the bankers of a foreign subsidiary any security for the payment of any sum due or to become due from it to them by reason of any transaction entered into with it by them in the ordinary course of their business as bankers,
  - (d) it consists in a foreign subsidiary giving to an insurance company any security for the payment of any sum due or to become due from that subsidiary to that company by reason of any transaction entered into with that subsidiary by that company in the ordinary course of that company's business by way of investment of its funds, or

#### 124.6.4 *Cash pooling arrangement*

Para 9 sch 17 FA 2009 provides:

- (1) For the purposes of this Schedule a transaction is “excluded” if ...
  - (e) it is of a description specified in regulations made by the Commissioners.

Article 5 IMOCR and the schedule specify the other excluded transactions. Article 5 IMOCR provides:

- (1) A transaction is excluded for the purposes of Schedule 17 if-
  - (a) it is a transaction within paragraph 8(2)(a) to (c) of Schedule 17 that is entered into pursuant to cash pooling arrangements in respect of which the conditions specified in paragraph (2) have been met ...
- (2) The conditions mentioned in paragraph (1)(a) are that before the transaction takes place-

- (a) the parties to the cash pooling arrangements notify an officer of Revenue and Customs in writing of the terms of the arrangements;
- (b) an officer of Revenue and Customs gives notice in writing to the parties that transactions entered into pursuant to the cash pooling arrangements after the date of the notice will be excluded transactions for the purposes of Schedule 17.

The INT Manual provides:

**INTM700710: International movements of capital: Exclusions: cash pooling arrangements [May 2020]**

**Cash Pooling Arrangements**

The legislation does not define ‘cash pooling arrangements’. Broadly they are arrangements which enable companies to minimise expenditure in connection with banking facilities. Entities within a group may transfer their surplus cash to a single account overnight and, in return, draw on that account for their cash flow needs. The central account is usually held by a group treasury company.

The detail of such arrangements will vary enormously but in general the result is a frequently changing network of very short term intra-group loans reflecting the needs of operating companies. Where such transactions are not otherwise excluded from the scope of the reporting requirement regulation 5(1)(a) may be of value. Due to the £100 Million limit (see INTM700600) it is not expected that many groups will need to consider this exclusion.

**Notifying HMRC**

Where a group wishes to take advantage of the exclusion for cash pooling arrangements it should in the first place approach its CCM or the office to which its corporation tax returns are made.

The business should supply sufficient information concerning the terms on which group cash is pooled to enable HMRC to consider the risks attached to excluding the related transactions from the reporting requirement. The process will involve description and discussion of a group’s procedures and it is very likely that the provision internally prepared documentation describing those processes will be of value.

**Changes to arrangements**

Where changes are made to cash pooling arrangements subsequent transactions will not be excluded from the scope of the reporting requirement. Groups will therefore need to notify HMRC of such changes. However, this should only be necessary where such changes

have a material impact on the arrangements.

For example, the variation of an interest rate should not be regarded as a change if the previously notified arrangements provide for a floating rate and the variation reflects an underlying movement in LIBOR. It would be a change to move interest rates from a floating to a fixed basis where such a change was not a provision of the original arrangements.

Article 5 IMOCR provides:

- (1) A transaction is excluded for the purposes of Schedule 17 if ...
- (b) it is described in one of the paragraphs in the Schedule (excluded transactions) to these Regulations and meets such conditions (if any) as are specified there.

We journey on to sch IMOCR:

- 1 The following transactions are excluded transactions mentioned in regulation 5(1)(b).

It seems strange drafting not to define all the excluded transactions in one place; but there it is.

#### 124.6.5 *Issue of shares inter-group*

Para 2 sch IMOCR provides:

- (1) The first transaction is the issue of shares by the foreign subsidiary to the reporting body or to a group company.
- (2) The conditions are that the issue-
  - (a) is of shares that are not redeemable; and
  - (b) is either-
    - (i) at market value and for consideration paid in cash to the foreign subsidiary, or
    - (ii) in or towards payment for any business undertaking or property acquired by the foreign subsidiary at market value.

#### 124.6.6 *Issue of shares to unconnected person*

Para 3 sch IMOCR provides:

- (1) The second transaction is the issue of shares by the foreign subsidiary to a person not connected with the reporting body.
- (2) The conditions are-
  - (a) that the issue-
    - (i) is at market value and for consideration paid to the foreign

- subsidiary, and
- (ii) is not to a nominee or trustee for a person who is connected with the reporting body;
- (b) that no arrangements exist as a consequence of which the reporting body or a person connected with the reporting body, or a nominee or trustee for that person or the reporting body, is or may become entitled to the shares so issued or to any of them or to any interest in them or in any of them.

#### 124.6.7 *Rights issue*

Para 4 sch IMOCR provides:

- (1) The third transaction is the issue of shares by the foreign subsidiary to all persons who are its shareholders at the time of the issue.
- (2) The conditions are that the issue-
  - (a) is in respect of and in proportion to the shares held by the shareholders in the foreign subsidiary at the time of the issue; and
  - (b) either-
    - (i) is of shares that are not redeemable, or
    - (ii) where no shares are issued to a company which is resident in the UK or to a nominee or trustee for such a company, is at market value for consideration paid in cash to the foreign subsidiary.

#### 124.6.8 *Debenture issue intra-group*

Para 5 sch IMOCR provides:

- (1) The fourth transaction is the issue of debentures by the foreign subsidiary to the reporting body or to a group company.
- (2) The condition is that the circumstances specified in sub-paragraph (3) are not associated with or present in connection with the issue of the debentures.
- (3) The circumstances are that a loan, whether or not of the same amount as that secured by the debentures, is made by a company which is not resident in the UK to a company which is resident in the UK.

#### 124.6.9 *Debenture issue to unconnected person*

Para 6 sch IMOCR provides:

- (1) The fifth transaction is the issue of debentures by the foreign

subsidiary to persons not connected with the reporting body.

(2) The conditions are-

(a) that the issue-

(i) is at market value and for consideration paid to the foreign subsidiary, and

(ii) is not to a nominee or trustee for a person who is connected with the reporting body;

(b) that no arrangements exist as a consequence of which the reporting body or a person connected with the reporting body, or a nominee or trustee for that person or the reporting body, is or may become entitled to the debentures so issued or to any of them or to any interest in them or in any of them.

#### 124.6.10 *Transfer of securities to unconnected person*

Para 7 sch IMOCR provides:

(1) The sixth transaction is the transfer by the reporting body or a company (whether or not it is resident in the UK) of shares or debentures of the foreign subsidiary to a person not connected with the reporting body.

(2) The conditions are-

(a) that the transfer-

(i) is at market value for consideration paid to the transferor company, and

(ii) is not to a nominee or trustee for a person who is connected with the reporting body;

(b) that no arrangements exist as a consequence of which-

(i) the reporting body, or

(ii) a nominee or trustee for the reporting body, or

(iii) a person connected with the reporting body, or

(iv) a nominee or trustee for a person connected with the reporting body,

is or may become entitled to the shares or debentures transferred or to any of them or to any interest in them or in any of them.

#### 124.6.11 *Inter-group transfer of securities*

Para 8 sch IMOCR provides:

The seventh transaction is a transfer by the reporting body of shares or debentures of the foreign subsidiary to a group company.

Para 9 sch IMOCR provides:

- (1) The eighth transaction is a transfer within sub-paragraph (2) to the reporting body or a group company.
- (2) A transfer is within this sub-paragraph if it-
  - (a) is not by the reporting body,
  - (b) is of shares or debentures of a foreign subsidiary in which the reporting body has an interest, and
  - (c) is permitted or caused by the reporting body.

#### 124.6.12 *Security over shares*

Para 10 sch IMOCR provides:

The ninth transaction consists in the reporting body or a group company giving security over the shares of a foreign subsidiary in connection with borrowing money from a lender who is unconnected to the reporting body or the group company.

### **124.7 Information in report**

Article 3 IMOCR provides:

- (1) Paragraphs (2) and (3) specify the information (in this regulation referred to as “the required information”) to be contained in the report which is required to be made to an officer of Revenue and Customs under paragraph 4(1) of Schedule 17.
- (2) The required information as it relates to a foreign subsidiary connected with the event or transaction is-
  - (a) its name, and
  - (b) the territory from the laws of which it derives its status as a body corporate.
- (3) The required information as it relates to an event or transaction is a full description of the event or transaction (and, in the case of a transaction, a full description of all the steps taken in the course of the transaction) and includes in particular-
  - (a) the date on which the event took place or the transaction was carried out,
  - (b) for a transaction, the name of each party to it,
  - (c) the reason for the event or transaction, and
  - (d) an estimate of the effect of the event or transaction on the liability to tax in the UK of the reporting body and of any group

company

## **124.8 Penalties**

Penalties arise under s.98 TMA 1970 (special returns etc). The amounts are nominal: presumably company groups in excess of £100m are not thought to need the sanction of substantial penalties.

## **124.9 Definitions**

### 124.9.1 *Control*

Para 12(1) sch 17 FA 2009 provides:

For the purposes of this Schedule “control”, in relation to a body corporate, means the power of a person to secure-

- (a) by means of the holding of shares or the possession of voting power in or in relation to the body or any other body corporate, or
- (b) by virtue of any powers conferred by the articles of association or other document regulating the body or any other body corporate,

that the affairs of the body are conducted in accordance with that person's wishes.

This is strict-sense control.<sup>3</sup>

Para 12(2) sch 17 FA 2009 provides:

Where two or more persons, taken together, have the power mentioned in sub-paragraph (1), they are taken for the purposes of this Schedule to control the body corporate.

### 124.9.2 “*Connected*”

Article 2(2) IMOCR cuts down the standard definition of connected person:

- [a] For the purposes of these Regulations, whether a person is connected with another shall be determined
- [b] as it would in accordance with the provisions of subsections (2) to (8) of section 839 (connected persons) of ICTA [now s.1122 CTA 2010]

---

3 See 104.9 (Control: Strict sense).

[c] if the words “paragraph 12 of Schedule 17 to the Finance Act 2009” were substituted for the words “section 416” in the definition of “control” in subsection (8).

The effect of [c] is now to substitute the words “paragraph 12 of Schedule 17 to the Finance Act 2009” for the words “sections 450 and 451” in s.1123(1) CTA 2010.

### 124.9.3 *Other definitions*

Para 12 sch 17 FA 2009 provides:

- (4) In this Schedule-  
 “foreign” means resident outside the UK;  
 “subsidiary”, in relation to a reporting body, means a body corporate that is controlled by-
- (a) the reporting body, or
  - (b) where the reporting body is a party to an arrangement under paragraph 6, any party to the arrangement.
- (5) Section 150 of TIOPA 2010 (meaning of “transaction” and “series of transactions”) applies for the purposes of this Schedule.<sup>4</sup>

Article 2 IMOCR provides:

- (1) In these Regulations-  
 “group company” means any company which is resident in the UK and which would be deemed to be a member of the group of companies which includes the reporting body for the purposes of Chapter IV of Part X of the Income and Corporation Taxes Act 1988 if in section 413(3) of that Act the words “51 per cent” were substituted for the words “75 per cent”;  
 ...  
 “redeemable”, in relation to shares, means that the shares satisfy one or both of the following conditions-
- (a) that, by virtue of the terms of their issue or the exercise of a right by any person or the existence of any arrangements, they are liable to be redeemed, cancelled or repaid, in whole or in part;
  - (b) that, by virtue of any material arrangements, the holder has a right to require another person to acquire the shares or is

---

<sup>4</sup> See 20.7.1 (Transaction/series).

obliged in any circumstances to dispose of them or another person has a right or is in any circumstances obliged to acquire them;

and arrangements are material arrangements if the company which issued the shares or a company connected with that company is a party to the arrangements;

# MONEY LAUNDERING

125.1

## 125.1 Money laundering: Introduction

In this chapter I consider four criminal offences relating to money laundering, which are found in Part 7 Proceeds of Crime Act 2002 (“POCA”).<sup>1</sup>

Conviction of these offences is punishable by up to 14 years imprisonment and an unlimited fine.

Guidance can be found from various sources, and I draw on:

Issued by	My term	Full Title
LSAB	LSAB guidance	AML Guidance for the Legal Sector <sup>2</sup>
CCAB	CCAB accountants guidance	AML & Counter-Terrorist Financing Guidance for the Accountancy Sector <sup>3</sup>
CCAB	CCAB tax guidance	Supplementary AML Guidance for Tax Practitioners <sup>4</sup>

A full discussion needs a long chapter. I focus on the issues relevant to tax advisors. I do not consider:

- (1) customer due diligence requirements in MLA 2017

- (2) the NCA's general Revenue functions.<sup>5</sup>

## 125.2 “Money laundering”

In the normal sense of the expression, money laundering is the process by which proceeds of crime are disguised, so funds appear to come from a legitimate source.

POCA defines the expression more widely. It includes:

- (1) Handling or possessing Criminal Property, including possessing the proceeds of one's own crime
- (2) Assisting in handling/possessing of Criminal Property

Section 340 POCA provides:

- (1) This section applies for the purposes of this Part....

- (11) Money laundering is an act which—

- (a) constitutes an offence under<sup>6</sup>

<b>Section</b>	<b>Topic</b>	<b>See para</b>
327	Conceal/transfer criminal property	125.5
328	Assisting money laundering	125.6
329	Possession of criminal property	125.7

- (b) constitutes an attempt, conspiracy or incitement to commit an offence specified in paragraph (a),
- (c) constitutes aiding, abetting, counselling or procuring the commission of an offence specified in paragraph (a), or
- (d) would constitute an offence specified in paragraph (a), (b) or (c) if done in the UK.

## 125.3 Criminal Property

Section 340 POCA provides:

- (1) This section applies for the purposes of this Part.

- (3) Property<sup>7</sup> is criminal property if—

- (a) [i] it constitutes a person's benefit from criminal conduct<sup>8</sup> or
- [ii] it represents such a benefit (in whole or part and whether

<sup>5</sup> s.317 POCA 2007.

<sup>6</sup> For clarity I have set this out in tabular form and with my own wording, rather than as in the statute.

<sup>7</sup> Defined widely in s.340(9)(10) POCA.

<sup>8</sup> Section 340 POCA provides: “Criminal conduct is conduct which—

(a) constitutes an offence in any part of the UK, or

(b) would constitute an offence in any part of the UK if it occurred there.”

- directly or indirectly), and
- (b) the alleged offender knows or suspects<sup>9</sup> that it constitutes or represents such a benefit.

I write this term with initial capitals, to reflect the technical nature of the expression.

Section 340(4) POCA continues with provisions which widen the scope of Criminal Property:

It is immaterial—

- (a) who carried out the conduct;
- (b) who benefited from it;
- (c) whether the conduct occurred before or after the passing of this Act.

### 125.3.1 *Benefit from conduct*

Section 340 POCA provides:

- (5) A person benefits from conduct if he obtains property as a result of or in connection with the conduct.
- (6) If a person obtains a pecuniary advantage as a result of or in connection with conduct, he is to be taken to obtain as a result of or in connection with the conduct a sum of money equal to the value of the pecuniary advantage.
- (7) References to property or a pecuniary advantage obtained in connection with conduct include references to property or a pecuniary advantage obtained in both that connection and some other.
- (8) If a person benefits from conduct his benefit is the property obtained as a result of or in connection with the conduct.

### 125.3.2 *Criminal Property: Tax offences*

Dishonest non-payment of tax on income/gains is criminal conduct. But it is not obvious that the income/gains represent the benefit and so constitutes Criminal Property of the offender. The unpaid tax might have been paid from other property of the taxpayer.<sup>10</sup> But in *R v K*:

To take a simplified paradigm case, let us suppose that over a two year period D fraudulently under-declares the takings of his business by

---

<sup>9</sup> See 125.4 (Knows or suspects).

<sup>10</sup> Assume that there was other property. It would be different for fraudulent tax reclaims, and for IHT (because of the Revenue charge).

£250,000 per annum with the result that he deprives the revenue of £100,000 in income tax and £25,000 in VAT in each of the two years. In each year, D has obtained a pecuniary advantage of £125,000 as a result of his cheating the revenue. That is a benefit within the meaning of section 340(3)(a) of POCA. The undeclared takings of £500,000 represent that benefit in part within the meaning of section 340(3)(a) in the sense that the undeclared takings of £500,000 should have borne tax and a sum representing or equivalent to part of that figure should have been paid in tax.<sup>11</sup>

Moreover, in *R v William*:<sup>12</sup>

The reference to “in whole or in part” [in s.340(3)(a)[i]] is important because it shows that the whole property is treated as criminal property, even where only part of it represents benefit from criminal conduct... In cases where the turnover is falsely represented, the benefit is the tax due on the undeclared turnover. However, the criminal property as defined by s 340 is the entirety of the undeclared turnover and not merely the tax due because the benefit is represented in part by that sum.

The reasoning was purposive. If the profit was not Criminal Property as defined, the result would mean that the money laundering provisions could never apply to tax evasion offences. This is perhaps a stretch, but “represent” is a flexible concept.

The capital from which the income arose is not Criminal Property, but in practice there is likely to be a mixed fund.

By analogy, income of a person abroad within s.720 is Criminal Property if the transferor dishonestly fails to declare it.

In the case of a taxpayer who dishonestly fails to pay tax on a benefit due under s.731 or s.87, it is suggested that the Criminal Property is both the benefit, and the relevant income/trust gains.

LSAB guidance provides:

#### 18.5.5 Tax issues

If the purchase price is recorded incorrectly, this may be in an attempt to evade stamp duty (the saving would represent the proceeds of crime.)

It is suggested that the property represents the proceeds of crime, even though that would not normally have been used to pay the SDLT.

---

12 [2013] EWCA Crim 1262 at [27].

## 125.4 Knows or suspects

“Knows or suspects” is used in many places in POCA, in particular:

Context	POCA	See para
Assisting money laundering	s.328	125.6
Adequate consideration	s.329(3)	125.7
Duty to disclose money laundering	s.330(2), (5A)	125.9
Definition of Criminal Property	s.340(3)	125.3

Suspicion must be based on some evidence, even if that evidence is tentative. General assumptions do not amount to suspicion of particular individuals, eg a belief that:

- (1) Underdeclaring cash takings is endemic
- (2) Behind every great fortune is a great crime<sup>13</sup>

In *R v Da Silva*:

... the essential element in the word “suspect” and its affiliates, in this context, is that the defendant must think that there is a possibility, which is more than fanciful, that the relevant facts exist. A vague feeling of unease would not suffice. But the statute does not require the suspicion to be “clear” or “firmly grounded and targeted on specific facts”, or based upon “reasonable grounds”

... the suspicion must be of a settled nature; a case might, for example, arise in which a defendant did entertain a suspicion in the above sense but, on further thought, honestly dismissed it from his or her mind as being unworthy or as contrary to such evidence as existed or as being outweighed by other considerations.<sup>14</sup>

## 125.5 Conceal/transfer Criminal Property

Section 327(1) POCA provides:

A person commits an offence if he—

- (a) conceals<sup>15</sup> criminal property;
- (b) disguises criminal property;
- (c) converts criminal property;

<sup>13</sup> The thought derives from Balzac, *Le Père Goriot*: “Le secret des grandes fortunes sans cause apparente est un crime oublié, parce qu’il a été proprement fait.”

<sup>14</sup> [2006] EWCA Crim 1654 at [16]-[17].

<sup>15</sup> Defined in subsection (3): “Concealing or disguising criminal property includes concealing or disguising its nature, source, location, disposition, movement or ownership or any rights with respect to it.”

- (d) transfers criminal property;
- (e) removes criminal property from England and Wales or from Scotland or from Northern Ireland.

This would include transferring Criminal Property from a Swiss account to a trust or other entity.

A professional adviser is not likely to commit this offence but if the client has done so, or may do so, that has consequences for the professional's responsibilities for assisting/disclosing.

## 125.6 Assisting money laundering

Section 328(1) POCA provides:

A person commits an offence if he enters into or becomes concerned in an arrangement which he knows or suspects<sup>16</sup> facilitates (by whatever means) the acquisition, retention, use or control of criminal property by or on behalf of another person.

LSAB guidance provides:

### 16.3.6 What is not an arrangement?

*Bowman v Fels* (2005) EWCA Civ 226 held that s328 does not cover or affect the ordinary conduct of litigation by legal professionals, including any step taken in litigation from the issue of proceedings and the securing of injunctive relief or a freezing order up to its final disposal by judgment.

Dividing assets in accordance with a judgment, including the handling of the assets which are criminal property, is not an arrangement. Settlements, negotiations, out of court settlements, alternative dispute resolution and tribunal representation are also not arrangements. However, the property will generally still remain criminal property and you may need to consider referring your client for specialist advice regarding possible offences they may commit once they come into possession of the property after completion of the settlement.

## 125.7 Possession of Criminal Property

Section 329(1) POCA provides:

- A person commits an offence if he—
- (a) acquires criminal property;
  - (b) uses criminal property;

---

16 See 125.4 (Knows or suspects).

- (c) has possession of criminal property.

A professional adviser is not likely to commit this offence but if the client has done so, or may do so, that has consequences for the professional's responsibilities for assisting/disclosing.

Section 329(1) POCA provides:

- (2) But a person does not commit such an offence if ...
  - (c) he acquired or used or had possession of the property for adequate consideration ...
- (3) For the purposes of this section-
  - (a) a person acquires property for inadequate consideration if the value of the consideration is significantly less than the value of the property;
  - (b) a person uses or has possession of property for inadequate consideration if the value of the consideration is significantly less than the value of the use or possession;
  - (c) the provision by a person of goods or services which he knows or suspects may help another to carry out criminal conduct is not consideration.

## 125.8 POCA disclosure immunity

### 125.8.1 *Authorised disclosure*

Section 338 POCA provides:

- (1) For the purposes of this Part a disclosure is authorised if—
  - (a) it is a disclosure to a constable, a customs officer or a nominated officer<sup>17</sup> by the alleged offender that property is criminal property, and<sup>18</sup>
  - (c) the first, second or third condition set out below is satisfied.
- (2) The first condition is that the disclosure is made before the alleged offender does the prohibited act.
- (2A) The second condition is that—
  - (a) the disclosure is made while the alleged offender is doing the

---

17 Section 338(5) POCA provides: “disclosure to a nominated officer is a disclosure which—

(a) is made to a person nominated by the alleged offender's employer to receive authorised disclosures, and

(b) is made in the course of the alleged offender's employment...”

18 There is no para (b).

- prohibited act,<sup>19</sup>
- (b) he began to do the act at a time when, because he did not then know or suspect that the property constituted or represented a person's benefit from criminal conduct, the act was not a prohibited act, and
  - (c) the disclosure is made on his own initiative and as soon as is practicable after he first knows or suspects<sup>20</sup> that the property constitutes or represents a person's benefit from criminal conduct.
- (3) The third condition is that—
- (a) the disclosure is made after the alleged offender does the prohibited act,
  - (b) he has a reasonable excuse for his failure to make the disclosure before he did the act, and
  - (c) the disclosure is made on his own initiative and as soon as it is practicable for him to make it.

### 125.8.2 *Indemnity for authorised disclosure*

Section 338 POCA provides:

- (4) An authorised disclosure is not to be taken to breach any restriction on the disclosure of information (however imposed).
- (4A) Where an authorised disclosure is made in good faith, no civil liability arises in respect of the disclosure on the part of the person by or on whose behalf it is made.

## 125.9 Duty to disclose money laundering

Section 330(1) POCA provides:

A person commits an offence if the conditions in subsections (2) to (4) are satisfied.

I refer to these conditions as “**POCA disclosure conditions**”.

### 125.9.1 *Condition 1: Knowledge*

Section 330(2) POCA provides:

The first condition is that he—

---

<sup>19</sup> Section 338(6) POCA provides: “References to the prohibited act are to an act mentioned in section 327(1), 328(1) or 329(1) (as the case may be).”

<sup>20</sup> See 125.4 (Knows or suspects).

- (a) knows or suspects<sup>21</sup>, or
- (b) has reasonable grounds for knowing or suspecting, that another person is engaged in money laundering.

### 125.9.2 *Condition 2: Professional*

Section 330(3) POCA provides:

The second condition is that the information or other matter—

- (a) on which his knowledge or suspicion is based, or
  - (b) which gives reasonable grounds for such knowledge or suspicion,
- came to him in the course of a business in the regulated sector.

Under sch 9 POCA, the regulated sector includes:

the provision of advice about the tax affairs of other persons by a firm or sole practitioner who by way of business provides advice about the tax affairs of other persons;

Thus tax practitioners are in the regulated sector.

### 125.9.3 *Condition 3: Knowledge of identity*

Section 330(3A) POCA provides:

The third condition is—

- (a) that he can identify the other person mentioned in subsection (2) or the whereabouts of any of the laundered property,<sup>22</sup> or
- (b) that he believes, or it is reasonable to expect him to believe, that the information or other matter mentioned in subsection (3) will or may assist in identifying that other person or the whereabouts of any of the laundered property.

Disclosure conditions 1 to 3 will be met by a non-compliant UK resident and domiciled individual with an undisclosed Swiss bank account.

### 125.9.4 *Condition 4: Disclosure*

Disclosure is one option. Section 330(4) POCA provides:

---

<sup>21</sup> See 125.4 (Knows or suspects).

<sup>22</sup> This has a commonsense definition in subsection (5A) “The laundered property is the property forming the subject-matter of the money laundering that he knows or suspects, or has reasonable grounds for knowing or suspecting, that other person to be engaged in.”

The fourth condition is that he does not make the required disclosure<sup>23</sup> to—

- (a) a nominated officer, or
- (b) a person authorised for the purposes of this Part by the Director General of the National Crime Agency,

as soon as is practicable after the information or other matter mentioned in subsection (3) comes to him.

Thus in the absence of some other defence, s.330 effectively imposes a duty to disclose the client.

Section 330(5) POCA provides:

The required disclosure is a disclosure of—

- (a) the identity of the other person mentioned in subsection (2), if he knows it,
- (b) the whereabouts of the laundered property,<sup>24</sup> so far as he knows it, and
- (c) the information or other matter mentioned in subsection (3).

## 125.10 Professional privilege

### 125.10.1 *Professional advisers*

Section 330(6) POCA provides:

But he does not commit an offence under this section if...

- (b) he is a professional legal adviser or relevant professional adviser and—
  - (i) if he knows either of the things mentioned in subsection (5)(a) and (b),<sup>25</sup> he knows the thing because of information or other matter that came to him in privileged circumstances, or
  - (ii) the information or other matter mentioned in subsection (3) came to him in privileged circumstances

---

23 Defined subsection (5) “The required disclosure is a disclosure of—

- (a) the identity of the other person mentioned in subsection (2), if he knows it,
- (b) the whereabouts of the laundered property, so far as he knows it, and
- (c) the information or other matter mentioned in subsection (3).”

24 Defined ss(5A): “The laundered property is the property forming the subject-matter of the money laundering that he knows or suspects, or has reasonable grounds for knowing or suspecting, that other person to be engaged in.”

25 See 125.9.4 (Condition 4: Disclosure).

### 125.10.2 *Partners/employees*

Section 330(6) POCA provides:

- (6) But he does not commit an offence under this section if...
  - (c) subsection (7)<sup>26</sup> or (7B) applies to him...

Section 330(7B) POCA provides protection for employees and partners:

This subsection applies to a person if—

- (a) he is employed by, or is in partnership with, a professional legal adviser or a relevant professional adviser to provide the adviser with assistance or support,
- (b) the information or other matter mentioned in subsection (3) comes to the person in connection with the provision of such assistance or support, and
- (c) the information or other matter came to the adviser in privileged circumstances.

### 125.10.3 *“Privileged circumstances”*

Section 330(10) POCA provides:

Information or other matter comes to a professional legal adviser or relevant professional adviser in privileged circumstances if it is communicated or given to him—

- (a) by (or by a representative of) a client of his in connection with the giving by the adviser of legal advice to the client,
- (b) by (or by a representative of) a person seeking legal advice from the adviser, or
- (c) by a person in connection with legal proceedings or contemplated legal proceedings.

This is similar to legal professional privilege.

CCAB tax guidance provides:

7.6 In this context ‘legal advice’ (as referred to in the statute) given by a tax practitioner other than a lawyer includes tax advice.

### 125.10.4 *Crime/fraud exception*

Section 330(11) POCA provides:

But subsection (10) does not apply to information or other matter which

---

26 Subsection (7) relates to untrained employees.

is communicated or given with the intention of furthering a criminal purpose.

CCAB accountancy guidance provides:

6.5.31 Communications that would otherwise qualify for the privilege reporting exemption are excluded from it when they are intended to facilitate or guide someone in committing or advancing some crime or fraud. This is usually the client but could be a third party. An example of such a situation could be where a person seeks tax advice ostensibly to regularise their tax affairs but in reality, to help them evade tax by improving their understanding of the issues.

6.5.32 Someone worried that they may be guilty of tax evasion can still seek legal advice from a tax adviser without fear of the exception being invoked. This remains true even when, having received the advice, the person declines a business relationship and the business never knows if the irregularities were rectified. However, if that person's behaviour leads the business to suspect the advice has been used to further evasion, then a SAR could be required.

#### 125.10.5 *Relevant professional adviser*

This term is defined in s.330(14) POCA:

A relevant professional adviser is an accountant, auditor or tax adviser who is a member of a professional body which is established for accountants, auditors or tax advisers (as the case may be) and which makes provision for—

- (a) testing the competence of those seeking admission to membership of such a body as a condition for such admission; and
- (b) imposing and maintaining professional and ethical standards for its members, as well as imposing sanctions for non-compliance with those standards.

CCAB tax guidance provides:

7.5 The legislation does not list the professional bodies which meet the criteria but the CCAB bodies, the Chartered Institute of Taxation and the Association of Taxation Technicians meet the criteria and hence their members may be considered to be 'relevant professional advisers'.

#### 125.10.6 *Privileged circumstances: CCAB examples*

CCAB tax guidance provides:

**Privileged circumstances**

You are approached by a long-standing client seeking advice on what to do about an undisclosed Swiss bank account, where the original money came from undeclared income. They are concerned about the arrangement agreed between the Swiss banks and HMRC. You explain their options and advise that they make a declaration to HMRC. Clearly you now know that they have been evading tax; as such, they have committed a money laundering offence. However, the client approached you seeking advice on making an unprompted disclosure under the tax legislation of their undeclared income. It does not appear that this information was disclosed to you with the intention of furthering a criminal offence so it is covered by the privilege exemption. In such circumstances, tax practitioners should also consider whether they should continue to act if they have concerns that the client has not fully disclosed and so that they do not become complicit in further money laundering offences. You must not report them to NCA. Having advised them to make a declaration, and explained the consequences, your advice remains privileged even if they subsequently decide not to follow your recommendation.

**Not-privileged circumstances**

Now contrast that with the situation whereby, during the preparation of the client's tax return, a member of staff encounters a bank statement from the Swiss bank account among the papers supplied by the client. You ask your client about this bank account; they then admit to the tax evasion. You have the same information as before, but received in a different way.

In this situation you must report.

**Applying the crime/fraud exemption**

Consider the situation where you act for a wife in an acrimonious divorce that is heading for the courts. The wife is claiming 50% of her husband's assets. In preparation for the hearing she notifies you of her husband's undisclosed Swiss bank account, providing you with full details. She wishes to claim 50% of that as well!

While this appears to be covered by litigation privilege, her intention in providing the information is to acquire criminal property (i.e. half the money in the Swiss bank account). It would fall under the crime/fraud exemption, so would not be privileged. You would therefore need to report.

**125.11 Overseas conduct****125.11.1 Territorial limitation**

All the money laundering offences have a territorial limitation. This is set out three times in the same words.<sup>27</sup> Section 327(2A) POCA provides:

Nor does a person commit an offence under subsection (1) if—

- (a) he knows, or believes on reasonable grounds, that the relevant criminal conduct<sup>28</sup> occurred in a particular country or territory

---

<sup>27</sup> See s.328(3), 330(7A) POCA.

<sup>28</sup> Defined in subsection (2B): "In subsection (2A) "the relevant criminal conduct" is the criminal conduct by reference to which the property concerned is criminal property."

- outside the UK, and
- (b) the relevant criminal conduct—
    - (i) was not, at the time it occurred, unlawful under the criminal law then applying in that country or territory, and
    - (ii) is not of a description prescribed by an order made by the Secretary of State.

The territorial limitation only applies if both conditions in (b) are satisfied. Para 2 Proceeds of Crime Act 2002 (Money Laundering: Exceptions to Overseas Conduct Defence) Order 2006 provides the latter:

- (1) Relevant criminal conduct of a description falling within paragraph (2) is prescribed for the purposes of sections 327(2A)(b)(ii), 328(3)(b)(ii) and 329(2A)(b)(ii) of the Proceeds of Crime Act 2002 (exceptions to defence where overseas conduct is legal under local law).
- (2) Such relevant criminal conduct is conduct which would constitute an offence punishable by imprisonment for a maximum term in excess of 12 months in any part of the UK if it occurred there other than—
  - (a) an offence under the Gaming Act 1968;
  - (b) an offence under the Lotteries and Amusements Act 1976, or
  - (c) an offence under section 23 or 25 of the Financial Services and Markets Act 2000.

So the overseas conduct exemption does not amount to much. In particular, it does not exclude tax offences (the penalty for which exceeds 12 months).

### 125.11.2 *Foreign tax evasion*

CCAB tax guidance provides:

8.1.4 If the suspected evasion is of taxes outside the UK, in circumstances which would be a criminal offence if the conduct occurred in the UK, this should also be reported immediately

The guidance continues:

unless

- [a] it is known to be lawful under the criminal law applying in that country and
- [b] that conduct, if carried out in the UK, would attract a maximum sentence in the UK of less than twelve months, except as prescribed by Order.

But that will never be the case for tax evasion crimes.

The guidance continues:

As in other cases, this is unless the privilege reporting exemption applies. There are other very limited exceptions regarding the reporting of overseas criminal conduct; see para 2.2.2 of AMLGAS.

## **125.12 General defences**

Section 327(2)/338(2) POCA provide 3 defences:

But a person does not commit such an offence if-

- (a) he makes an authorised disclosure under section 338 and (if the disclosure is made before he does the act mentioned in subsection (1)) he has the appropriate consent;
- (b) he intended to make such a disclosure but had a reasonable excuse for not doing so;
- (c) the act he does is done in carrying out a function he has relating to the enforcement of any provision of this Act or of any other enactment relating to criminal conduct or benefit from criminal conduct.

The same defences are found in s.329(2) POCA.

Section 330(6) provides a wider reasonable excuse defence:

But he does not commit an offence under this section if-

- (a) he has a reasonable excuse for not making the required disclosure,

## APPENDIX ONE

# WORDS OF DISPUTE

App. 1.1

metaphor

App. 1.6 Machinery/mechanism

### App. 1.1 Words of dispute: Introduction

This appendix considers some non-legal terms which are used in taxation in contested or rhetorical ways, and which are so common that they are more conveniently considered as discrete topics, rather than in any particular context in which they are found.

### App. 1.2 Clarify/modernise/reform

The word “clarify” is a convenient cloak. To describe a reform as a clarification is a way to stifle debate. Who could object to clarification? Often, perhaps more often than not, it is used tendentiously to disguise substantive changes.<sup>1</sup>

Similar points apply to the word “modernise”, a favourite of the Blair administration. Likewise “reform”.

Of course this usage is not limited to tax:

Reform means to change things with a view to securing an improvement. Law reform sadly means changing things so as to impede access to justice and to cut funding to unsustainable levels.<sup>2</sup>

### App. 1.3 “Compliant”

The word “compliant” has become an essentially contested concept, that is, it admits of two distinct conceptions that are a battleground for

---

1 See eg 71.15 (Adding property: 2020 changes).

2 Professor Dominic Regan, *New Law Journal*, 21 Feb 2020; 17.32.5 (Security for debt: Amount remitted)..

profound substantive disagreements. HMRC use the term to mean those who comply with the legal rules of taxation and do not engage in tax avoidance (whatever that is).<sup>3</sup> I think practitioners would generally regard “compliant” as apt to describe those who seek to comply with the legal requirements of taxation.

#### **App. 1.4 “Customers” of HMRC**

In the 2010/11 edition of this work I summarised the tax competition argument thus:

Where there is tax competition, the term “customer”, which HMRC have (controversially) applied to taxpayers since 2001<sup>4</sup> is slightly less inapt. UK resident foreign domiciliaries are in principle more free than other taxpayers to take their “custom” elsewhere.

As far as I am aware, no other Revenue department in the world calls its taxpayers “customers” and it is interesting to consider what the word implies for the taxpayer/HMRC relationship.

It appears to suggest that the relationship should be based on the market, but what does that entail? A person who regards himself as a customer (as opposed, say, to a “citizen”) has no disposition to put public good ahead of private interest, and no moral relationship with their supplier. Customers control producers of commodities only by buying or not buying as they like.

Rowan Williams (Archbishop of Canterbury, 2003-2012) observes how the language of the market has expanded beyond a market context:

The language of customer and provider has wormed its way into practically all areas of our social life, even education and healthcare, and we forget that it is a metaphor when we call a student, a patient or a

---

3 Two examples will suffice to illustrate the point: the title of the HMRC paper (Mar 2019): “Tackling tax avoidance, evasion, and other forms of noncompliance”; likewise: “This measure has no impact on compliant businesses.... It is likely to affect ... non-compliant businesses ... which are currently involved in tax avoidance arrangements”; see 50.23 (PFA impact).

Contrast the two views of the taxpayer/HMRC relationship; see 116.10.1 (HMRC/taxpayer relationship),

4 A press release at the time provided: (14/06/01) “M and C Saatchi, a leading advertising agency, has been appointed by the IR to rebrand the department. Branding and design consultants, Corporate Edge, will also be working with the IR and M and C Saatchi to ‘create a customer driven department’.”

traveller a “customer”. The implication is that the most basic relation between one human being and another or one group and another is that of the carefully calibrated exchange of material resources; the most basic kind of assessment we can make about the actions of another, from the trader to the nurse to the politician, is the evaluation of how much they can increase my liberty to negotiate favourable deals and maximize my resources.<sup>5</sup>

But this is not of course the inference which HMRC intend. Sir Nicholas Montagu (Chair of the Board of Inland Revenue, 1997-2004) said that the reason for the change was to remind Revenue staff that the needs of the consumer of public services should be considered first.<sup>6</sup>

The usage has not caught on outside HMRC. A sensitivity to language (some readers may think, a sense of the ridiculous) prevents the parliamentary drafter from using the expression: for instance the SRT only uses the term “taxpayer”.

In 2013, the Tribunal commented:

I note in passing that all the reports mentioned below refer to HMRC’s ‘customers’. While this is a regrettable misuse of language by HMRC as it implies people have a choice whether to interact with HMRC and that therefore the payment of taxes is voluntary, nevertheless it is clear that references to ‘customers’ are meant to be references to taxpayers. Needless to say the payment of taxes is not voluntary despite the misnomer ....<sup>7</sup>

---

5 Williams, “Knowing our Limits” in Williams and Elliott (eds), *Crisis and Recovery: Ethics, Economics and Justice* (2010), p.20. But is “customer” a metaphor? Robert Bellah takes it literally: “... all the primary relationships in our society, those between employers and employees, between lawyers and clients, between doctors and patients, between universities and students are being stripped of any moral understanding other than that of market exchange. Business has no obligation to its employees, the communities where it operates, or the larger society. The same forces that are uprooting decades-long practices in industry are to be found at work in medicine, education, and even in the church and the family. To put it in Pierre Bourdieu’s terms, we could say that the economic field is encroaching even more than ever on the autonomy of the other fields.... Instead of medicine we have the health care industry; instead of the university we have the education industry. These are not metaphors but the direct imposition of the logic of the economic field on the other fields.” Bellah, “Class Wars and Culture Wars in the University Today” (1997).

6 See “The Customer is always right” Tax Adviser, (February 2003).

7 *LH Bishop Electric Co v HMRC* [2013] UKFTT 522 (TC) at [234].

In the 2017/18 edition of this work, I said:

The terminology will not cease to give rise to derision as long as the current generation of tax practitioners remain in practice<sup>8</sup>... It is conceivable that the terminology will last until a future generation sees nothing to laugh at in expressions such as “*penalties designed to change customer behaviour*”<sup>9</sup> but I think that unlikely. Perhaps at some point it will be dropped.

In 2017 the HMRC view was unchanged, even defiant:

Mr Troup [HMRC chair] defended HMRC’s sometimes controversial description of taxpayers as ‘customers’ saying that he genuinely believes the tax authority is a customer-centric business.<sup>10</sup>

But in 2018 the debate still rumbles on.<sup>11</sup>

Looking back after two decades, the reader’s irritation may have faded over time to weary cynicism. It seems at present that HMRC will continue to use it, taxpayers will not adopt it, and we must leave it there.

Underlying the controversy over terminology, and perhaps concealed by it, are deeper issues, linguistic, normative and factual:

- What (if anything) do HMRC mean by “customer-centric”?<sup>12</sup>

---

8 See Cameron, “Customer Service?” *Taxation Magazine*, 10 Apr 2008, p.361: “It never ceases to amaze me that HMRC have adopted the word ‘customer’ to describe the taxpaying public. A customer is someone who chooses to patronise a business.” Andy Wells agrees: “I will never be a ‘customer’ of HMRC. This disregard for the English language irks just about every tax professional I come across...” *Taxation Magazine*, 4 June 2009, p.549. Similarly Anthony Thomas (then president of CIOT): “HMRC now refer to taxpayers as customers, but they do not treat them as customers”; “We need Trust”, *Taxation Magazine*, 2 June 2011, p.7; Truman, “Still Not a Customer” *Taxation Magazine*, 14 June 2012, p.8.

9 [http://webarchive.nationalarchives.gov.uk/+/http://www.hmrc.gov.uk/e-learning/New\\_Penalties\\_Awareness/Inaccuracy\\_Pen\\_ext/HTML/Inaccuracy\\_Pen\\_ext\\_106.html](http://webarchive.nationalarchives.gov.uk/+/http://www.hmrc.gov.uk/e-learning/New_Penalties_Awareness/Inaccuracy_Pen_ext/HTML/Inaccuracy_Pen_ext_106.html)

10 <https://www.tax.org.uk/media-centre/blog/other-areas/departing-thoughts-hmrc-chair-edward-troup> (2017).

11 HLEconomic Affairs Committee in its critical report “The Powers of HMRC: Treating Taxpayers Fairly” (2018) para 135: “HMRC describes taxpayers as ‘customers’ ... In this report we refer to individuals as taxpayers.” <https://publications.parliament.uk/pa/ld201719/ldselect/ldeconaf/242/242.pdf>

12 “Customer-centric” is a well established marketing term. I do not know when it first arose, but books with “CustomerCentric” in the title date at least back to 2003. One  
FD\_A1\_Words\_of\_Dispute.wpd 03/11/21

- Should HMRC seek to be “customer-centric”?<sup>13</sup>
- To what extent are HMRC actually “customer-centric”?

On the third, factual, question: One might think it is not a customer-centric policy to insist on using a term which the majority of taxpayers/customers find objectionable. The change of terminology from taxpayer to “customer” came at a time which saw a substantial increase in HMRC’s enthusiasm for civil and criminal penalties<sup>14</sup> a trend which has intensified over the last few years. Whether that is right or wrong, it is certainly not customer-centric.<sup>15</sup>

Probably the terminology is (more or less) meaningless spin, with no substance or reality beyond vague aspiration. That is not necessarily a criticism: presentation, perception and aspiration are important aspects of tax administration. But they should be recognised for what they are.

If that is right, the discussion above is somewhat over-intellectualised. But it is good to know what we are talking about.

## App. 1.5 Principles-based drafting

---

definition is: “Customer centric is a way of doing business with your customer in a way that provides a positive customer experience before and after the sale in order to drive repeat business, customer loyalty and profits.” In the context of HMRC’s “business” the usage, as Rowan Williams says, is best regarded as a vivid metaphor, such metaphors often hinder clarity of thought.

13 Section 1 TMA 1970 provides that HMRC are “responsible for the collection and management” of IT/CT/CGT; which one might think a different matter. See too 116.10.1 (HMRC/taxpayer relationship).

14 “The Department expects the new [civil] penalty regime to result in higher penalties as the minimum penalty for deliberate evasion and concealment is 50%. The Department should track the level of penalties imposed to ensure that it is applying the new regime rigorously.” House of Commons Committee of Public Accounts, “HM Revenue & Customs: Managing civil tax investigations” (2011) <https://publications.parliament.uk/pa/cm201011/cmselect/cmpubacc/765/76506.htm> “We have recruited an additional 200 criminal investigators to increase the number of people prosecuted for tax evasion from 165 in 2010 to 2011, to 565 in 2012 to 2013, and to 1,165 in 2014 to 2015.”

<https://www.gov.uk/government/policies/reducing-tax-evasion-and-avoidance>

The wisdom (and cost/benefit) of the vast increase in prosecutions has never been the subject of public debate.

15 House of Commons Treasury Committee, “Administration and effectiveness of HMRC” Sixteenth Report of Session 2010–12 at 143: “we question whether a strategy focused around shifting customers’ behaviour can truly be described as customer-centric.”

The Income Streams code and the disguised interest rules claim the high ground of “principles-based drafting”. Who could object to principles? But the rhetoric fails when it moves from theory to practice. In the Income Streams code, the principle is not easy to grasp,<sup>16</sup> and in the disguised interest code is just a form-over-substance rule, with all the difficulties that brings. The reader may conclude that the use of the term here is inapt if not tendentious.

It is a sad truth that if tax has principles, which might be debated, they are at such a high level of generality that they cannot be used for drafting. Is the aspiration is to be commended or criticised as naive? Discuss.

### App. 1.6 Machinery/mechanism metaphor

The metaphor of “machinery”<sup>17</sup> has been used:

- (1) To describe tax collection (as opposed to tax charging) provisions, the point being that a tax collection provision only applies if there is a charge<sup>18</sup>
- (2) To describe an author’s contract for royalties, the point being that the source of the income is the author’s profession, the contract being machinery lacking “independent vitality”<sup>19</sup>

*Memec v IRC* applies the metaphor in the context of whether a foreign entity is transparent, but with an important note of caution:<sup>20</sup>

Metaphorical language is not a substitute for analysis, but it may help to explain the conclusion: adopting Lord Asquith’s phrases,<sup>21</sup> I conclude that [the “silent partner’s”] rights under the [“silent partnership” agreement] did have independent vitality and were not mere incidental machinery.

“Mere machinery” is always an expression of a conclusion; it is not an argument or basis for reaching a conclusion, or at least not an adequate one.

---

16 See 51.5 (Transfer of income, not asset).

17 The word “mechanism” is used in the same way.

18 See 118.2 (Tax collected from UK representative).

19 See 30.4.3 (Post-cessation Annual Payments).

20 71 TC 77 at p.114.

21 See 30.4.3 (Post-cessation Annual Payments).

## App. 1.7 Technical

The word “technical”, used to describe an argument, or a distinction, is generally pejorative; the point might be emphasised by the collocation “narrow technical argument”.

Any argument (other than purposive construction) can be castigated as technical, whether based on statutory words or common law principle. For example, *Pepper v Hart*, rejecting prohibition of referring to Hansard, described the rule as “a technical rule of construction”.<sup>22</sup> In a later case (qualifying if not rejecting the *Pepper v Hart* approach) the same rule was “a cardinal constitutional principle”!<sup>23</sup>

“Technical” (in this sense) is not a technical term. It is merely a term of abuse. If not completely meaningless, it is difficult to pin down what the meaning is. It is an expression of rhetoric rather than sober analysis. Like the term “legal nicety”, it may be regarded as expressing a conclusion rather than a reason for reaching a conclusion. If one substituted for “technical argument” the words “unconvincing argument”, or for “technical distinction” the words “irrelevant distinction” the gap in the reasoning becomes clear. The unanswered and perhaps unasked question is: *why* is the point unconvincing or irrelevant?

Alternatively, “technical” connotes *unmeritorious*. In one case HMRC sent the notice of enquiry to the wrong address. The taxpayer was not prejudiced because a copy was sent to his accountants, and indeed no-one noticed until 9 years later. His objection was a technical point.<sup>24</sup> But had the taxpayer been prejudiced, the rule requiring notices to be sent to the right address would not, presumably, have been described as technical.

A variant of “technical” is the term *legalistic*. It is strange that lawyers should use *legalistic* as a pejorative term, but they do.<sup>25</sup>

---

22 [1993] AC 593 at p.616.

23 *Wilson v Secretary of State* [2003] UKHL 40 at [67] also reported under the name *Wilson v First Country Trust (no.2)*. For another example of (mis)describing an otherwise unanswerable argument as “technical”, in order to summarily reject it, see *Marshall v Kerr* 67 TC 56 at p.85: “Your Lordships were invited to accept a narrow and technical argument ... This is an invitation which is not difficult to resist...”

24 *Tinkler v HMRC* [2021] UKSC 39 at [85].

25 Eg *HMRC v Parry* [2020] UKSC 35 at [94] (“narrow and legalistic approach ... which does not seem to me to be appropriate”). Note how “narrow” is again thrown in for additional rhetorical impact.

**App. 1.8 Technical Notes**

HMRC say:

HMRC do not own gov.uk and so must conform to their rules. Gov.uk aim for a reading age of 11 and they are not keen on long FAQs and examples.<sup>26</sup>

This explains some striking developments of recent years:

- The informal, chatty style in HMRC manuals and other guidance, eg employing informal contractions such as “isn’t” for “is not”.<sup>27</sup>
- The style of HMRC manual examples, which I describe elsewhere as childish; that may seem unkind, but is in fact an objective description of the author’s intention.
- The publication of documents called “technical notes” which do not contain material which a practitioner would call “technical”. A document with a reading age of 12 or above should now be described as “technical”.

The policy aim of making guidance easily readable is commendable; but policy is one thing and implementation is another. Thus the term “technical note” has, perhaps ironically, become a technical expression.

**App. 1.9 Loophole/tax break**

“Loophole” is an irresistible pejorative term. It suggests unintended and self-evidently inappropriate rules, which facilitate tax avoidance; but may be applied to any rule which the author wishes to deprecate.

The Labour Manifesto 2019 offers an example:

We will close the tax loopholes enjoyed by elite private schools and use that money to improve the lives of all children.

The tabloid slang “tax break” similarly hinders clarity of thought. It has no place in any serious or impartial discussion of tax policy: it is a good rule of thumb to presume slack thinking and partiality whenever we encounter it.

26 Joint Expatriate Forum on Tax and NICs (Minutes, Feb 2018)

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/710618/Joint\\_Expatriate\\_Forum\\_on\\_tax\\_and\\_NICs\\_minutes\\_28\\_February\\_2018.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/710618/Joint_Expatriate_Forum_on_tax_and_NICs_minutes_28_February_2018.pdf)

27 I think this began in about 2015.

## APPENDIX TWO

# COMMON LEGAL EXPRESSIONS

App. 2.1

### App. 2.1 Introduction

This and the following appendices consider some legal terms, concepts and expressions which are so common in taxation that they are more conveniently considered as discrete topics, rather than in any particular context in which they arise. The layout is as follows:

#### Appendix Topic

- 2 Misc terminology (see index above)
- 3 Family terminology: spouse, child, etc
- 4 Consideration/full consideration, arm's length, and related concepts
- 5 Commercial/view to profit
- 6 Real/reality/realistic/ and form v substance

These terms are used frequently in tax and non-tax law. Their meaning is mostly a question of general (non-tax) law; except for “real”, whose meaning, if any, is in the realm of philosophy.

#### App. 2.1.1 Context

The Income Tax Codification Committee say:<sup>1</sup>

One of the chief causes of difficulty in interpreting the existing Acts is that the same word is used in different senses in different places, sometimes even in the same sentence. This has often been the subject of adverse comment in the Courts. In *Kensington Income Tax*

---

1 (1936) Cmd 5131 at [31], cited in *Lawrence v HMRC* 23 TC 333 at p.344.

*Commissioners v Aramayo*<sup>2</sup> Lord Wrenbury said:

My Lords, this case affords a striking illustration of the involved and almost unintelligible expression of the law contained in the Statutes relating to income tax. ... The same word is used here in one sense and there in another. ... No reliance can be placed upon an assumption of accuracy in the use of language in these Acts.

I think there is an element of hyperbole in the last sentence, or perhaps the standard of drafting has improved a little since Lord Wrenbury wrote those words in 1915. But the reader will not need to be reminded that meaning is subject to context: any word may be used inaccurately, one word may be used inconsistently ie with two different meanings, and two different words may be used with the same meaning.

### App. 2.1.2 *Argument from redundancy*

In *Walker v Centaur Clothes*:<sup>3</sup>

I seldom think that an argument from redundancy carries great weight even in a Finance Act. It is not unusual for Parliament to say expressly what the courts would have inferred anyway.

That was before the tax law rewrite. Nowadays, I would say “... *especially* in a Finance Act”.

## App. 2.2 Arrangement

### App. 2.2.1 ‘Arrangement’ undefined

In *Newton v FCT*:<sup>4</sup>

the word ‘arrangement’ is apt to describe something less than a binding contract or agreement, something in the nature of an understanding between two or more persons - a plan arranged between them which may not be enforceable at law.

In *Farnborough Airport v HMRC*:<sup>5</sup>

---

2 6 TC 613.

3 [2000] STC 324 at p.330. If further authority is needed, which I doubt, see *DMWSHNZ Ltd v HMRC* [2015] EWCA Civ 1036 at [38].

4 [1958] AC 450 at p.465. The same point is made in *Scottish and Universal Newspapers v Fisher* [1996] STC (SCD) 311 at [16]: ‘arrangements’ is a wide expression which will often mean something less than a legally binding contract.’

5 [2019] EWCA Civ 118 at [74].

The concept of ‘arrangements’ ... involves an element of deliberate planning or co-ordination to bring about a particular state of affairs.

Basically, anything with an element of volition is an arrangement. I do not think there is a single case where a taxpayer has succeeded in arguing that an act, or transaction, or indeed anything at all, is not an arrangement. ‘Arrangement’ is a word of wide meaning.

It is possible for context to show that arrangement is to be understood more narrowly, or that at least certain matters are not intended to constitute ‘arrangements’ in the relevant sense. But arguments along those lines have not in practice been successful.<sup>6</sup>

The word is usually used in the plural (arrangements) but occasionally in the singular (arrangement). I do not think there is any difference in the meaning.<sup>7</sup>

#### App. 2.2.2 *Scheme or arrangement*

‘Scheme’ and ‘arrangement’ are (more or less) synonymous:

The term ‘scheme’ has a normal dictionary meaning: ‘a plan, a design; a project, an enterprise; a programme of work or action to attain an objective, a plan for regular contributions towards a pension etc’ ... I accept [counsel’s] definition of ‘arrangement’ (‘structure or combination of thing for a purpose’). So it is inherently unlikely that a combination of circumstances which amount to a ‘scheme’ will not also be an ‘arrangement’ (and vice versa).<sup>8</sup>

---

6 For instance *Farnborough Airport Properties v HMRC* [2019] EWCA Civ 118 at [76]: “It is only by a process of circular wishful thinking ... that the concept of ‘arrangements’, which is of course a staple feature of much anti-avoidance legislation, could be confined in its scope by reference to an unstated statutory purpose.”

But it is sometimes hard to see the difference between purposive construction and wishful thinking.

7 This is self-evident, but if authority is needed, see *Pilkington Bros v IRC* [1982] STC 103 at p.112-113 rejecting an argument the use of the plural shed light on what constituted the arrangements; one might also mention the Interpretation Act rule that the singular includes the plural and vice versa.

8 *HMRC v Barclays Bank* [2005] UKSPC SPC00520 at [73] (not questioned in the subsequent appeals); likewise *Snell v HMRC* [2006] EWHC 3350 (Ch) at [28]. For completeness: “arrangement” is discussed in an old Restrictive Trade Practices case, but *Farnborough Airport Properties v HMRC* did not find that very helpful, see [2016] UKFTT 431 (TC) at [50]:

“Scheme or arrangement” is a doublet; it does not refer to two distinct things.

Scheme is (sensibly) not usually defined; when there is a definition it adds nothing to the meaning.<sup>9</sup>

### App. 2.2.3 Definitions of ‘arrangement’

There are two standard definitions of ‘arrangements’ in tax legislation:

<b>standard IT/CGT definition</b>	<b>standard IHT definition</b>
‘arrangements’ includes any agreement, understanding, scheme, transaction or series of transactions (whether or not legally enforceable).	‘arrangements’ includes any scheme, transaction or series of transactions, agreement or understanding, whether or not legally enforceable, and any associated operations

The standard IT/CGT definition (my terminology) was first used in 2005<sup>10</sup> and it must have found its way into an (unpublished) OPC Finance Bill drafting handbook, as it has now been repeated in Finance Acts on about 100 occasions but is not found elsewhere.

The standard IHT definition (my terminology) was first introduced in 2013,<sup>11</sup> and again must have found its way into the drafter’s IHT handbook, as it has been used subsequently.<sup>12</sup> This definition reshuffles the words, and adds associated operations; but I do not think there is any identifiable difference in meaning between the definitions.

Neither definition adds anything to the normal meaning of the word, which has been used without definition in tax legislation since at least

---

Nor do I regard the discussion of the meaning of ‘arrangements’ in *In re British Basic Slag Ltd* as helpful, since the discussions in that case ... are predicated on the definition of ‘agreement’ in section 6 of the Restrictive Trade Practices Act 1956, which makes express reference to ‘acceptance by two or more parties’, and hence connotes an element of mutuality or meeting of minds. The CTA 2010 contains no such qualification.

The point was taken, and *British Basic Slag* has hardly been cited since then.

9 Eg in the definition of “employer-financed employee benefit scheme”; see 1.5 (EFURBS).

10 Section 144ZD(8) TCGA, introduced by F(No.2) Act 2005.

11 Section 162A IHTA.

12 Para 6 sch 1A IHTA.

1922.

Why then do we have a definition? Perhaps some lobbyist objected to the vagueness of the word, and the drafter provided the definition in response, without realising (or, cynically, realising) that it did not provide any clarification. Once it was there, of course it had to be followed later. Thus on one occasion HMRC said, I think without conscious irony:

The government will amend the draft legislation so that ... 'arrangements' is clearly defined.<sup>13</sup>

Why we have more than one definition is harder to explain. They do not do much harm.

#### App. 2.2.4 *Identifying the arrangement*

It is necessary to distinguish two distinct questions:

- (1) Is there an arrangement?
- (2) If so, what steps are included in, or constitute, the arrangement?

Question (1) is usually easy. But question (2) is often imponderable, and the answer is context-dependent: what solution fits the provisions?

It may be necessary to identify what is the arrangement for the following purposes:

- (1) In the settlor-interested trusts code, in order to decide:
  - (a) Who is the settlor
  - (b) What is the income arising under/property comprised in the settlement
  - (c) Is the settlement an outright gift
- (2) In a TAAR, in order to decide what are the main purposes of the arrangement<sup>14</sup>

#### App. 2.2.5 *Sufficient unity test*

Arrangements may develop or take place over a period of time, but may still constitute one settlement-arrangement.

---

13 HMRC 'Company distributions: Summary of Responses' (2016) para 2.51  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/510263/Company\\_distributions\\_-\\_summary\\_of\\_responses.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/510263/Company_distributions_-_summary_of_responses.pdf)

In due course the standard definition was supplied.

14 See 2.11 ("Main" purpose).

In *Crossland v Hawkins* the facts were as follows<sup>15</sup>

*Step 1: setup of company with services contract (Dec 1954)*

- (a) On 3 December 1954 the actor Jack Hawkins caused a company (to be formed; two shares were issued).<sup>16</sup>
- (b) On 10 December 1954 he agreed with the company to make his services available as the company should direct, for a salary (£50 per week).<sup>17</sup>

*Step 2: settlement of company (Mar 1955)*

On 3 March 1955 the actor's father-in-law settled £100 on trust for the actor's minor children, and the trustees used this money to subscribe for 98 shares in the company.

*Step 3: operation of company - filming and distribution of profit (1956)*

In 1956 the company was paid £25,000 for the actor's services in a film, and paid a dividend of £500 on to the trustees, most of which they distributed to the children.

The arrangement consisted of:

- (1) step 1: the formation of the company and the service agreement, in December 1954; and
- (2) step 2: the settlement and issue of the company's shares to the trust, in March 1955

At the time of step 1, when the actor agreed to supply his services to the company, the second step (the creation of the children's trust) was allegedly not in contemplation.<sup>18</sup> That did not prevent the two steps from forming one arrangement:

I do not think that ... the whole of the eventual arrangement must be in contemplation from the very outset...I think there is sufficient unity about the whole matter to justify it being called an arrangement for this purpose, because, as I have said, the ultimate object is to secure for somebody money free from what would otherwise be the burden or the full burden of surtax. Merely because the final step to secure this

<sup>15</sup> 39 TC 493.

<sup>16</sup> For completeness; these two shares were issued to Hawkins' solicitors, and belonged beneficially to him.

<sup>17</sup> This was not a nominal salary in absolute terms. In 1954 the average UK weekly wage was £9 / 9 for men and £5 for women. But it was nominal compared to the market value of the services provided.

<sup>18</sup> That seems implausible, but it does not matter.

objective is left unresolved at the outset, and decided on later, does not seem to me to rob the scheme of the necessary unity to justify it being called an ‘arrangement’.<sup>19</sup>

The test is evaluative: “sufficient” unity.

Incidentally, even if step 1 was not part of the settlement-arrangement (eg if the company had been set up many years before) a Court nowadays would find that actor was *still* have been a settlor, providing property indirectly by allowing the trustees to subscribe for shares in his valuable company for a nominal £100.<sup>20</sup> So it would not matter what the settlement was.

#### App. 2.2.6 *Post-arrangement steps*

Arrangements may envisage post-arrangement steps which do not constitute part of the arrangement. In *Hawkins*, step 3 - Jack Hawkins’ performance in ‘Fortune is a Woman’, the payment of his fee to the company and the payment of the dividend by the company (which occurred in 1956) - was not part of the settlement-arrangement. This was the arrangement being put to its intended use:

Normally (there may be exceptions) the arrangement is to be identified by the constituent parts or components of the legal structure designed for a purpose, and not by what is done (sometimes months or even years later) in using the structure for its intended purpose.<sup>21</sup>

That seems an arbitrary cut-off, but it has the desirable consequence of supporting the argument that the income arising under the settlement is the dividend income, not the company’s trading income.

The same point is made in *Jones v Garnett* which I discuss elsewhere.<sup>22</sup>

#### App. 2.2.7 *Pre-arrangement steps*

---

19 39 TC 493 at p.505 (emphasis added).

20 On the facts of *Hawkins* the service contract with the company had a 3 year term. If the actor had power to revoke the contract with the company, or if the contract had a short term, then the company would not be valuable, but the actor would provide funds by working for the company at an undervalue.

21 See *Jones v Garnett* [2007] UKHL 35 at [51], [53].

22 See 85A.6.4 (Applying bounty test to arrangement).

*Dunsby v HMRC*<sup>23</sup> was a hare-brained marketed avoidance scheme intended to allow shareholders to extract profits from a company free of income tax. An individual (the “company owner”) held all the shares in the company. The steps were quite simple:

*Step 1:* The company created a new class of worthless<sup>24</sup> “S” shares, and issued an S share to a non-resident individual (“G”).

*Step 2:* G gave that share to a classic trust under which the company owner was the principal beneficiary, but G was also a beneficiary.

*Step 3:* The company declared a dividend on the S share. Needless to say, under the trust, the company owner received (almost) all the dividend.

The taxpayer’s analysis was:

- (1) The settlement-arrangement is step 2 alone, the classic trust, not steps 1 and 2, (or 1, 2 and 3).
- (2) The settlor was G, not the company owner.
- (3) Under s.624 the dividend was treated as accruing to G. So Mr Dunsby was not taxed! (G was not taxed as she was non-resident.)

The s.624 issues were: What was the settlement-arrangement? Who was the settlor? If there were two settlors, what then?

There was clearly a settlement-arrangement, but which steps did the arrangement consist of? The taxpayer argued that the settlement-arrangement consisted only of step 2: the gift to the classic trust by G.<sup>25</sup> But no, the arrangement consisted of steps 1 *and* 2:<sup>26</sup>

[1] the creation of the S share and its allotment to [G], and

[2] the creation of the Trust and the transfer of the S share to the trustee by [G]

---

23 [2020] UKFTT 271 (TC). This concerned the year 2012/13, ie (just) before the GAAR took effect.

24 The S share was (more or less) worthless because its dividends depended on the decision of the ordinary shareholders.

25 But the scheme in *Dunsby* would have failed even if the settlement-arrangement consisted only of step 2, the creation of the classic trust. For the company owner was at the very least a joint settlor of the classic trust.

26 On the other hand, step 3 was a post-arrangement step which was not part of the settlement-arrangement, see [109]: “I have not treated the payment of the dividend on the S share as part of the “arrangement”. The S share became subject to the Trust. It was the property comprised in the settlement. The dividend on the S share was the income, which arose under the settlement, rather than one of the steps in its creation.”

are all part of an arrangement that meets the requirements to be treated as a “settlement” within [the settlement-arrangement definition].

All of these steps were planned and implemented as a coherent whole. If they are viewed realistically, all of those steps were part of an arrangement under which potentially valuable property - the S share - was made subject to the Trust. Against that background, it is not appropriate to distinguish between,

[1] on the one hand, the steps in which the S share is created and allotted to [G] and,

[2] on the other, the Trust is established and the S share is transferred to it,

on the basis that the former are merely preparatory to the creation of the settlement. To use the words of Donovan LJ in *Crossland*, the steps had sufficient unity to bring them within the term of an “arrangement” for the purposes of the settlements legislation.<sup>27</sup>

For completeness: The reader may have puzzled over the old case of *Chamberlain v IRC*.<sup>28</sup> Here the steps were:

*Step 1 creation of company structure:* The taxpayer:

- (a) formed a company (Staffa Investment co, “the holding co”) and
- (b) transferred shares in another company (the “underlying co”) to the holding co, in consideration of cash<sup>29</sup> and an issue of shares by the holding co

*Step 2 creation of trust structure*

- (a) The taxpayer established a number of classic family trusts.
- (b) The trustees used cash given to those trusts to acquire shares in the holding company.

There was clearly a settlement-arrangement, but which steps did the arrangement consist of? Was step 1 part of the settlement-arrangement? Or was that a pre-arrangement step, so step 2, in short the classic trusts, were the only settlement-arrangements?

Lord Macmillan supports the latter view:

It is, I think, fallacious to confuse the steps taken by the Appellant with a view to effecting a settlement or arrangement with the settlement or arrangement itself. When the Appellant created the [holding co], and

---

27 [2020] UKFTT 271 (TC) at [106], [107].

28 25 TC 317.

29 Nowadays the transactions in securities rules would come into effect at this point.

sold to it his 470 shares in [the underlying co], he made no settlement or arrangement such as the Statute contemplates... It was not until he granted the trust deeds that he entered the legal stage of the settlement. All that he did previously was preparatory to making settlements.

One needs to read all the speeches, and Macmillan was the only judge who took this view. The majority preferred the view (surely more natural) that the arrangement consisted of steps 1 *and* 2.<sup>30</sup> So I do not think much weight should be given to this passage. It does illustrate that identifying what steps constitute an arrangement is a context-dependent enquiry, on which views may differ.

#### App. 2.2.8 *When arrangements begin*

SP 3/93 discusses this issue in the context of group relief:

##### **SP 3/93 Groups of companies—arrangements**

2 This statement gives general guidance on how HMRC interpret ‘arrangements’ in the following provisions of TA 1988—

– s410(1), (2) [now s.154-155 CTA 2010]—group and consortium reliefs and

– ‘option arrangements’ in sch 18 para 5B(1) [now s.173(2) CTA 2010] and

– group and consortium reliefs.<sup>31</sup>

4 This statement of practice gives general guidance ... . Comprehensive guidance cannot be given about what constitutes ‘arrangements’ or ‘option arrangements’, nor about precisely when they come into existence. Particular cases depend on the particular relevant facts.

5 As regards ‘option arrangements’ the Commissioners for HMRC view is that if an agreement provides for the creation of specified option rights exercisable at some future time ‘option arrangements’ come into existence when the agreement was entered into.

##### **Disposal of shares or securities in a company**

6 Where a holder of shares or securities in a company is preparing to dispose of them, straightforward negotiations for the disposal will not give rise to the existence of ‘arrangements’ before the point at which an

30 But it did not matter, as the “property comprised in the settlement” was the trust property only; see 44.3 (Arising under a settlement).

31 The SP also refers to two reliefs now abolished: s240(11)(a) and s247(1A)(b) ICTA 1988, concerning surrender of ACT to a subsidiary and consortium group income elections.

offer is accepted subject to contract or on a similar conditional basis. Equally, unless there are exceptional features, an offer made to the public at large of shares or a business will not at that stage bring ‘arrangements’ into existence.

7 If a disposal requires the approval of shareholders, operations leading towards disposal will not give rise to the existence of ‘arrangements’ before that approval is given or until the directors become aware that it will be given.

8 If following negotiations with potential purchasers a holder of shares or securities concentrates on a particular potential purchaser this will not of itself be regarded as bringing ‘arrangements’ into existence. But ‘arrangements’ might exist if there were an understanding between the parties in the character of an option. For example, an offer, whether formally made or not, might be allowed to remain open for an appreciable period so that the potential purchaser was allowed to choose the moment to create a bargain.

**Company reconstructions**

9 The approval of shareholders for a company reconstruction may be required under company law or to comply with the rules of a stock exchange. ‘Arrangements’ will not come into existence before approval is given or until the directors become aware that it will be given...

Fortunately, the question of exactly when arrangements begin does not arise in relation to the private client topics discussed in this book.

**App. 2.3 Beneficial ownership: Meanings**

The expression “beneficial ownership” has (at least) three distinct meanings. I coin the following terminology:

My Term	Context	See para
English-law beneficial ownership <sup>32</sup>	Property/trust/general law <sup>33</sup>	71.6
DTA beneficial ownership	DTAs	104.11
Money-laundering ben. ownership	Money laundering	122.12

Discussion of meaning in one context has (more or less) no relevance in other contexts. In particular, meanings (2) and (3) are international law concepts, shared by civil lawyers, to whom meaning (1), a common law concept, is unfamiliar.<sup>34</sup>

It would have been better to have three distinct expressions, but the usage is too well established to alter that, and context will show which meaning is intended.

#### App. 2.4 Chargeable/liable to tax

The expressions chargeable to tax/liable to tax are common in tax legislation. The meaning is context dependent,<sup>35</sup> but some general observations may be made.

In their general sense there is (more or less) no difference between the words chargeable/liable; they are sometimes used interchangeably.<sup>36</sup>

32 One might use the term “common-law beneficial ownership”.

33 This is not of course to say that “beneficial ownership” (undefined) in a tax statute, or other English statute, always means English-law beneficial ownership: context may require a different sense. The CG Manual offers an example of a case where ‘beneficial’ was used in a tax statute with a wider, DTA-style meaning. The former s.210(2) TCGA provided an exemption for life policies, unless (in short) the person making the disposal was ‘not the original beneficial owner’. But trustees qualified for the exemption as they were the ‘beneficial owner’ for this purpose. The CG Manual formerly provided:

**CG69055 Exemption for second hand policies: Disposals before 9 April 2003**  
[Feb 2010]

... Where trustees took out a life insurance policy ... it could be accepted that they were the beneficial owners of the policy within the old s.210(2) TCGA.

34 This point is made in the OECD model commentary (para 10.4 of the commentary on art 11; see 104.11.4 (DTA meaning: General).

35 This is (more or less) self-evident, but if authority is needed, see *Barnes v HMRC* [2014] EWCA Civ 31 at [38]: “words similar to “chargeable to tax” have no fixed meaning and ... their meaning in a particular section needs to be determined from their immediate context...”.

36 See 115.2 (Duty to give notice of liability); 115.22.9 (Notice of chargeability).

Here is a list of places in this book where the expressions are used and discussed:

<b>Context: expression used</b>	<b>See para</b>
<b><i>Charged/chargeable to tax</i></b>	
<b><i>ITTOIA</i></b>	
s.318A, 683, 687,685A: charged to IT	13.3.1; 44.10.1
s.624: chargeable to tax if remitted	44.8
s.624: not chargeable because non-resident	44.9
s.648: chargeable/would be if received by UK resident	44.2
s.830: chargeable/would be if s.832 did not apply (RFI definition)	15.10.2
<b><i>ITA</i></b>	
s.809AZA: charged to income tax as income of transferor	51.4
<b><i>TCGA</i></b>	
s.37: charged to IT as income	53.3.4
s.87: payment chargeable to IT (capital payment definition)	57.7.4
<b><i>Liable to tax</i></b>	
s.643: benefit liable to IT	44.21.5
s.731: benefit liable to IT	47.16
OECD Model: liable to tax	8.5
<b><i>Taken/brought into account</i></b>	
s.37 TCGA: taken into account in computing income	44.12
s.743 ITA: taken into account in charging IT under ToA rules	48.3; 48.4
s.809AZA ITA: brought into account in calculating profits for IT	51.4
s.259BC TIOPA: brought into account in calculating profits	87.14; 87.17.3
<b><i>Similar expressions</i></b>	
s.633/727: sum payable as income (capital sum definition)	46.18.2
s.87: payment received as income (capital payment definition)	57.7.4
s.809VH ITA: income for IT/CT or would be if liable to tax	18.14
Non-OECD model DTA: Subject to tax	104.14

#### App. 2.4.1 *Unremitted RFI “chargeable”*

Everyone would agree that remitted RFI of a remittance basis taxpayer is chargeable to IT.<sup>37</sup>

Although less obvious, unremitted RFI is also chargeable to tax. The scheme of ITTOIA is that for every category of income there is:

(1) a charging provision; and

---

<sup>37</sup> See 16.13 (Charge on remitted RFI).

(2) a provision specifying the *amount on which* tax is charged.

For instance, in relation to dividends from non-resident companies, s.402 ITTOIA provides:

**402 Charge to tax on dividends from non-UK resident companies**

(1) Income tax is charged on dividends of a non-UK resident company.

...

**403 Income charged**

(1) Tax is charged under this Chapter on the...amount of the dividends arising in the tax year.

(2) Subsection (1) is subject to ... Part 8 (foreign income: special rules).

The (perhaps subtle) point is that IT is *charged* on dividends under s.402 ITTOIA. Section 403 ITTOIA does not impose a charge. It merely quantifies the *amount on which* income tax is charged. Likewise s.832(2) ITTOIA does not impose a charge, it merely quantifies the *amount on which* income tax is charged.<sup>38</sup>

So references to income chargeable to income tax in principle include unremitted income (un)taxed on the remittance basis.<sup>39</sup> Of course context may show that the word “chargeable” is used in a narrower sense so as not to include unremitted income (un)taxed on the remittance basis.

The same applies to the expression “liable” to tax. That is consistent with the well established rule that pension schemes and charities are “liable” to tax for the purposes of DTAs even though they qualify for pension or charity exemptions.<sup>40</sup>

## App. 2.5 Bear tax by deduction or otherwise

The Income Tax Codification Committee propose a distinction between *charge* to tax and *bearing* tax:<sup>41</sup>

The word “charge” is used in relation both to the amount of the tax payable in consequence of an assessment, and to the process of imposing upon a taxpayer liability to pay tax. In this connection, the word

38 Hence the legislation states that tax is charged “in accordance with” s.832 not *under* s.832. See eg ss.13, 14, 16 ITA.

39 See 47.17.3 (Benefit remittance-basis exempt); 57.7.4 (Chargeable to IT).

40 See 7.5.2 (Narrow exemption). *Stonor v IRC* [2001] STC (SCD) 199 might be cited against this view but a Special Commissioners decision on other provisions, arguably obiter, and not fully argued, does not count for much.

41 (1936) Cmd 5131 at [38].

“charge” has, so far as practicable, been confined to a direct charge, and does not cover tax borne by deduction. In the latter case the recipient of a payment from which tax has been deducted is said to “bear” tax, not to be “charged with” tax.

On the other hand, the expression “bear tax” is used to cover the suffering of tax whether by direct charge or by deduction or otherwise...

Similarly, a permanent establishment (not being a legal person) does not directly *pay* remuneration, but is said to *bear* remuneration.<sup>42</sup>

However the distinction proposed between charge (or chargeable) to tax (a direct charge), and “bear” tax (a wider term, including a direct or indirect charge, by deduction or otherwise), is not observed in contemporary tax legislation. For instance:

- s.648 ITTOIA refers to income “chargeable to income tax by deduction or otherwise”.<sup>43</sup>
- s.13 TIOPA refers to “tax charged directly on the dividend (whether by charge to tax, deduction of tax at source or otherwise)”.<sup>44</sup>

In the same passage, the Committee comment on the expression “by deduction or otherwise”. In the expression “pay or bear tax by deduction or otherwise” do the words “or otherwise” add anything? Could one “bear” tax, without a direct charge, but otherwise than by deduction? I do not think the point is likely to matter, today, but for completeness, the Committee thought the answer was, yes, and offer this subtle example:

... the expression “bear tax” is used to cover the suffering of tax whether by direct charge or by deduction or otherwise, the expression “or otherwise” being intended to cover such cases as those where trustees pay or bear tax and distribute the net sum amongst the beneficiaries without specific deduction of tax as such.<sup>45</sup>

## App. 2.6 In connection with/respect of/relating to

42 See 36.7 (STBV payment condition (b)).

43 See 44.2 (“Income” arising under a settlement).

44 See 106.11 (Tax credit: Dividends).

45 The point is perhaps that the beneficiaries could be said to bear tax, but not by deduction. This would not apply to UK trusts after 1973, but it does apply in the case of non-resident trusts who receive UK source income and distribute it to non-residents. The non-resident beneficiaries are not charged to UK tax, and do not bear tax by deduction, but they do bear tax otherwise than by way of deduction.

There is a cluster of similar (I think, more or less, identical) phrases which require a nexus of some kind between A and B: This includes

- in respect of
- in connection with
- relating to

Exactly what that nexus requires is left to the Court to sort out from the context, but these are wide phrases. They are wider than terms of causation, such as:

- as a result of
- by virtue of
- in consequence of

That is perhaps self-evident, but some reference to case law may be helpful.

#### App. 2.6.1 *In respect of*

In *Albon v Naza Motor Trading*:

The words ‘in respect of’ are difficult of definition, but they have the widest possible meaning of any expression intended to convey some connection or relation between the two subject-matters to which the words refer.<sup>46</sup>

#### App. 2.6.2 *In connection with*

In *Coventry Waste Ltd v Russell*:<sup>47</sup>

It may be that in some contexts the substitution of the words "having to do with" will solve the entire problem which is created by the use of the words "in connection with." But I am not ... satisfied that it does so in this case ... the phrase is a protean one which tends to draw its meaning from the words which surround it.

*HMRC v Barclays Bank*<sup>48</sup> considered whether a payment was made “in connection with past service” in the context of the charge on benefits from

---

46 [2007] 2 All ER 719 at [27]. In *Cunard’s Trustees v IRC* 27 TC 122 at p.135 Lord Greene described the phrase *in respect of* as ‘colourless words’ meaning, I think, that they were vague words, which might be understood more or less widely, and the colour (meaning) is determined by the context.

47 [1999] 1 WLR 2093 at p.2103.

48 [2007] EWCA Civ 442 at [18].

an employer-financed retirement benefit scheme. The Court cited that comment and continued:

Accordingly, the other parts of the definition of "relevant benefits" and the surrounding provisions of the legislative scheme, will inform the court as to the extent of the link required by any particular provision. Thus the court must examine the function or purpose of the definition of "relevant benefits". Here, the purpose of the definition is to identify the chargeable payments under a retirement benefits scheme. At the very least, Parliament is unlikely to have intended to limit connections to direct connections. That would have left the possibility that taxpayers could easily circumvent the charging provisions. Furthermore, it must have been foreseen that, over the life of the scheme, changes might be made to benefits. The changes would not simply involve a straight exchange or substitution of one benefit for another, but, on occasion, the loss of a benefit and the rendering of some monetary recompense. The charging provisions could only fairly apply if they applied to the giving of the new benefits, or recompense, as much as to the giving of the benefit originally provided by the scheme. It is also significant that Parliament did not limit itself to payments in consideration for services. Thus I conclude that a connection may be indirect for the purpose of the definition of relevant benefits.<sup>49</sup>

In *Project Blue v HMRC* the first-tier tribunal summarised the point:

Usually, courts have tended to construe the phrase 'in connection with' widely, but noting that the meaning of this expression will depend upon the context in which the expression is used.

Examples where the expression is found include:

<b>Context</b>	<b>See para</b>
ToA code	46.19.3
TiS code	52.6, 52.7

### App. 2.6.3 *Relating to*

---

49 Similarly *Derby Teaching Hospitals NHS Foundation Trust v Derby City Council* [2019] EWHC 3436 (Ch) at [74]: "The concept of 'connection' [in the phrase 'the provision of services provided to individuals for or in connection with the prevention, diagnosis or treatment of illness'] is not confined to activities which are subservient to or ancillary to or incidental to the purpose of the prevention, diagnosis or treatment of illness nor confined to being a means to that end."

In *Derby Teaching Hospitals NHS Foundation Trust v Derby City Council*:<sup>50</sup>

... the decision of the High Court of Australia in *Tooheys Ltd v Commissioner of Stamp Duties (NSW)* (1960-1961) 105 CLR 602. The issue in that case concerned the interpretation of an exemption in a statute dealing with stamp duty. The exemption referred to ‘instruments relating to the services of apprentices, clerks and servants’. The High Court was divided, with three judges holding that the exemption did not apply and two judges holding that it did. Kitto J, in the minority, reviewed a number of earlier English authorities. His judgment makes it clear that when one considers the ambit of the words ‘relating to’ or ‘related to’, one must consider the context and the object of the provision being construed. Taylor J, in the majority, said at page 620:

‘There can be no doubt that the expression ‘relating to’ is extremely wide but it is also vague and indefinite. Clearly enough it predicates the existence of some kind of relationship but it leaves unspecified the plane upon which the relationship is to be sought and identified. That being so all that a court can do is to endeavour to seek some precision in the context in which the expression is used. With this in mind it may be said with some certainty that an examination of the language of the exempting provision shows that it does not admit of its application to an instrument merely because it makes a reference to the existence of a relationship of master and servant between the parties to it, or still less, because it refers to the existence of a master and servant relationship between persons who are not parties to it. It is, I think, not open to argument that ‘relating to’, in the context in which it appears, is equivalent to ‘referring to’ and the ‘relationship’ must be based upon some more substantial ground.’

In *Tooheys Ltd*, Windeyer J at page 624 referred to ‘the elastic character’ of the phrase ‘relating to’.

The phrase ‘related to’ is used in section 43(2) of the 2006 Act to describe the degree of connection between ‘any purposes’ and the purposes of the prevention, diagnosis or treatment of illness of the purpose of the promotion and protection of public health. The phrase shows that there must be a connection but does not tell one very much about how close that connection must be. The closeness of the connection, or the relationship, which is required depends upon the

---

50 [2019] EWHC 3436 (Ch) at [53].

perceived purpose of the statutory provision.

## App. 2.7 Loan

### App. 2.7.1 Meaning of 'loan'

'Loan' is a technical legal term. It means a loan of money. It does not include the right to an unpaid purchase price, even if:

- (1) the purchase price is left outstanding<sup>51</sup> or
- (2) the purchase price is satisfied by the issue of a promissory note.<sup>52</sup>

Interest accrued and due on a loan is a debt, but is not itself a loan.

However, in practice the strict legal meaning of loan may not matter, because:

- (1) The term 'loan' is often given a wider definition, to include any form of credit; or
- (2) The drafter reaches the same destination by framing a rule which applies both to loans and to other debts (eg the definition of loan creditor, referring to a debt for money borrowed *or capital assets acquired* by a company).

For discussion of the related concepts of debt/liability, see 76.1 (IHT deduction for debts: Introduction).

### App. 2.7.2 Loan or outright payment?

The loan/outright payment distinction is a matter of general (contract/property) law and not tax law. If A transfers money to B, the transaction may be a loan or an outright transfer. That depends on the intention of the parties. There is a loan if A and B intend that B should be obliged to repay A. There is an outright transfer if they do not intend repayment.<sup>53</sup>

The issue arose neatly in *Sofer v Swissindependent Trustees*<sup>54</sup> where

---

51 *Ramsden v IRC* 37 TC 619 at p.625; *Chitty on Contracts* (33<sup>rd</sup> ed., 2018), para 39-258 (Definition of loan).

52 *Lee v IRC* 24 TC 207. This is so even if the promissory notes are called 'loan notes' (which I think is nowadays the more usual label; though in a case where s.727 may be relevant, it might be thought better to use the more accurate expression 'promissory notes'). HMRC accept this; see 46.18.2 ('Capital sum').

53 Further consideration may be needed if the applicable law is not English law, or if A or B do not have legal power to enter into transactions of loan or transfer.

54 [2020] EWCA Civ 699.

trustees had power to lend to the settlor but no power to make outright distributions. The trustees made payments documented as interest-free unsecured loans.<sup>55</sup> The trustees made no enquiry as to the ability of the settlor to repay the “loans”. It was said that the intention of the parties was that the “borrower” should not have to repay if he did not wish to.

Needless to say, repayment was not forthcoming. The Court dealt with the position very briefly:<sup>56</sup>

whether a payment is made by way of gift<sup>57</sup> or by way of loan is primarily a question of fact as to the intentions of the parties.

That does not take us very far. There are various issues here.

- (1) Sham: It is possible that the parties may not intend repayment, but pretend that they do, in which case the document, not reflecting the parties’ intention, may be invalid as a sham. In what circumstances can a party to a formal deed ignore it on the basis that it was not the intention of the parties? Does sham operate inter partes?
- (2) If so, how does one ascertain intention here?

The second issue turns on one’s understanding of “intention”, which is not the simple concept it may appear to be. In philosophical terms, this raises Kavka’s toxin puzzle: can a person intend to do something which they know they will later decide not to do? or more simply, can a person intend to do something which they know they will not do?

If the case goes all the way to trial, the judgement may shed light on these issues - or it may skate past them. Time will tell.

### App. 2.7.3 *Loan unlikely to be repaid*

ToA draft guidance provides:

**INTM601620 Examples of the amount or value of a loan**

... The above assumes that monies made available to the individual were in fact by way of loan and, in appropriate cases, evidence of a loan having been made, should be obtained. If, on enquiry, it transpires that

<sup>55</sup> The proper law of the loans was not discussed, but English law principles would be assumed to apply unless the contrary is proven.

<sup>56</sup> [2020] EWCA Civ 699 at [42].

<sup>57</sup> CA used the term “gift” loosely, to mean “outright distribution”. Strictly speaking, “Gift” is not apt to describe a distribution by trustees, as trustees have no gratuitous intent; but nothing turns on that.

- [1] the payment was not a loan, or
- [2] if a loan there is little likelihood of a demand for repayment (*Williams v CIR* 54 TC 257),  
then the payment should be treated as [an outright] cash payment...

But the proposition that a transaction is not a loan just because there is ‘little likelihood’ of repayment is not correct, and does not obtain any support from *Williams*.<sup>58</sup>

Similarly, in *Wildbirds Food v HMRC*:

39. What [HMRC’s] argument essentially boils down to is this: given that, at the time each relevant payment was advanced, BFL could not have repaid it (or the interest on it) and had no plausible plan for doing so, it cannot properly be said that the resultant debt ‘arises from a transaction for the lending of money’ ....

40. I disagree. The modern business world has many famous examples of companies, especially in the technology sector, with no cash and no immediate prospect of generating a profit which go on to be very successful. Clearly the appellant considers BFL potentially to be such a company and is therefore prepared to subsidise its running costs by way of loan for the time being in the hope of obtaining repayment of some or all of its loans in due course, possibly with a gain on its share investment as well.

41. ... there is no requirement that for a loan relationship to exist, interest must be charged; were it otherwise, many perfectly normal intra-group loans would fall foul of that requirement ... Nor is there any requirement that, for a loan relationship to exist, the lender must have any degree of certainty that the debt will be repaid – normal commercial loans are inherently hedged about with uncertainty about whether repayment will be made and save in degree, the present situation is no different. Lack of a fixed repayment date for a loan is perfectly commonplace. ... The loans have been advanced as a matter of arm’s length negotiation between the two parties, there is an obligation to repay (as recognised by both companies in their respective audited accounts and confirmed in evidence), and the fact that the appellant may well not recover some or all of its money is neither here nor there.<sup>59</sup>

An argument that a long term interest-free company loan to a shareholder should be characterised as a company distribution was rejected in *CT*

---

58 For a discussion of *Williams* see 52.3.2 (Is loan a transaction in securities).

59 [2018] UKFTT 341 (TC).

*Audit v Cigarette Company of Jamaica.*<sup>60</sup>App. 2.7.4 *Who is the borrower?*

*Bayonet Ventures LLP v HMRC* concerned a loan agreement between A and B; the sum borrowed was paid to a 3<sup>rd</sup> party, C.<sup>61</sup> But the 3<sup>rd</sup> party was not the borrower to whom the lender made the loan:

the mere fact that funds flow from person A to person C, notwithstanding that the loan agreement is between person A and person B is certainly not unusual, for example, where the funds are paid to the borrower's agent or solicitor to be used or deployed on behalf of the borrower...

[The borrower] was at liberty to cause or permit that money to be paid to [C]... The mere fact that the monies actually passed from [the lender] to [C] does not mean that the loan was made to [the member] ... The identity of the parties to a loan is a matter of law; albeit informed by the factual matrix within which the loan is made and documented.<sup>62</sup>

App. 2.7.5 *Loans: Non-tax aspects*

A loan should be documented by a written agreement made at or before the time of the loan.

If a party to a loan is a trust or company, the loan should be recorded in the trust/company accounts.

If a party to a loan is a trust, or a company held by a trust, the trustees need to consider whether they can properly enter into the loan, or permit the company to do so.

If a company lends to directors/connected persons, company law restrictions on loans may need to be considered. This will depend on the applicable company law.

The position following the death of an individual borrower/lender may need thought, preferably at the time the loan is made, not after the death.

Consider whether any party to the loan needs independent legal advice.

Take care the loan does not accidentally become time-barred: diarise the

---

60 [2012] UKPC 9 at [24]. The loan was recorded in the company accounts. The loan was not even "artificial"; see 49.15.2 ('Artificial'/ 'devices').

See too 49.40.2 (Methods of distribution).

61 The recipient was a member of the LLP borrower, but nothing turned on that.

62 [2018] UKFTT 262 (TC) at [17], [26].

limitation period.<sup>63</sup>

These may seem basic points, but it is remarkable how often they are overlooked.

## App. 2.8 OEIC

I discuss the definition in App **5A.1** 1.1 (Offshore fund/CIS/OEIC definitions).

## App. 2.9 Person/legal personality

### App. 2.9.1 *Legal person: English law*

The starting point is that ‘person’ has a legal sense, distinct from the ordinary meaning (if there is such a thing). A person is:

any being whom the law regards as capable of rights and duties. Any being that is so capable is a person, whether a human being or not.<sup>64</sup>

When the word “person” is used in this legal sense, it sometimes assists clarity to use the expression ‘legal person’ (ie something that the law regards as a person); this avoids confusion with the ordinary sense of the word.<sup>65</sup>

There are express definitions of ‘person’; the most important for this book are:

(1) Interpretation Act definition, which (in short) applies for Acts of Parliament, and so for UK tax legislation<sup>66</sup>

63 See 76.7 (Time-barred debt).

64 Salmond, *Jurisprudence* (12th ed, 1966), p. 299. I think the word “entity” (or even “thing”) would be more appropriate than “being”: a company is a legal person, but not normally called a “being”.

65 It has occasionally been suggested that the law distinguishes between person and legal person; eg an English partnership may be said to be a person but not a legal person. But this is, I think, based on a conceptual muddle. “Legal person” is just a way to clarify that one is using the word person in its legal sense. Legal person and person are not two different things, unless, exceptionally, context shows that person is being used in some sense which is not the standard legal meaning.

For instance an unincorporated association is not a person, not a legal person and does not have legal personality, as a matter of general law. These are three different ways of saying the same thing. But an unincorporated association is a company, for tax purposes, and so one might say that it is a person (for tax law) but not a legal person (for general law). But this only goes to show the need to define one’s terms.

66 See 82.13.1 (Partnership: a person?).

(2) OECD Model definition<sup>67</sup>

But these definitions do not take us far.

This section discusses the concept of legal personality; the question whether specific entities constitute legal persons is discussed in the context of the entity concerned.

Similarly ‘legal personality’ is the characteristic of being a legal person. Legal personality in short entails the ability to hold property and be subject to liabilities: legal capacity.

The concept of legal personality is distinct from the concept of transparency/opacity.<sup>68</sup>

App. 2.9.2 *Person: Terminology*

The most helpful discussion I know is Twining, *General Jurisprudence*.<sup>69</sup> We begin as usual with terminology:

Bearers of legal rights, duties and other relations have been variously known in jurisprudence as ‘legal units’, ‘legal subjects’, ‘legal entities’, and ‘legal persons’.<sup>70</sup> Not much turns on the choice between these terms, except that the idea of ‘person’ has associations with philosophical issues concerning human identity, individuality, moral personality, gender, and character that have muddied the waters of the extensive theoretical debates about the nature of legal personality.

... So much of modern law is expressed in terms of legal personhood, legal persons, and legal personality that it is difficult to avoid these terms altogether. However, I shall here follow the German tradition of using the word ‘subject’ as a more useful analytical concept.

But Garner defends the use of the word ‘person’,<sup>71</sup> and when discussing the OECD Model, or statutes, which do use the word ‘person’, it is best

---

67 See 8.4 (Treaty-person).

68 See 86.2 (‘Transparent’ and ‘opaque’).

69 (2009) para 15.2, [http://www.cambridge.org/download\\_file/167999](http://www.cambridge.org/download_file/167999) I omit the footnotes.

70 Author’s footnote: or ‘juristic person’ but that is less common and I suspect mainly used in translation of the German *juristische Person*.

71 Garner, *Dictionary of Legal Usage* (3<sup>rd</sup> ed., 2011), entry under *Person*: ‘Lon Fuller, among others, has questioned whether *person* is the most desirable word for the concept. What term might be better? Fuller suggests *legal subject* or *right-and-duty bearing unit*. On second thought, perhaps *person* is not quite so bad.’ (original footnotes omitted).

to stick to the treaty or statutory terminology; so ‘person’ is the term used in this work.

### App. 2.9.3 *Legal personality: UK law*

Turning to the concept itself: what does legal personality entail, and how does one decide whether an entity possesses it? There is no general principle to use to answer this. Twining says:

Who or what counts as a legal subject is itself governed by law and can vary considerably between legal orders. ...

... English<sup>72</sup> law does not have a general theory of legal personality and is better off without one. Rather it ... treats ... legal persons as juridical extensions of individual human personality (corporate body, will, property), and approaches practical problems arising from this extension in a pragmatic, largely case-by-case fashion without guidance from or regard to any general theory. ... In fact, in the United States the old debates had been declared dead by 1930 ... partly because legal personality was one of the indeterminate abstract concepts that had been subject to effective critique by Legal Realists.

Of course, practical legal issues surrounding corporations and other nonhuman entities continued to trouble specialists in company law, criminal law, labour law, public corporations and latterly in public international law and human rights ...

I would add tax law to this list.

... but typically without much assistance from legal theory, and without much communication with each other.

So ‘person’ does not have a single fixed meaning. Its meaning as always is subject to context. An entity may have some rights and duties and not others; and it may be regarded as a person for some purposes and not for others.

### App. 2.9.4 *Legal person: Foreign law*

Avery Jones says:<sup>73</sup>

---

72 Author’s footnote: The general concept of legal personality in Scots law is the same as England, though Scots law differs in classifying a Scots partnership as a legal person.

73 ‘Characterisation of Other States’ Partnerships for Income Tax’ [2002] BTR 375. Some footnotes are omitted or abbreviated.

Legal person - like partnership - is a concept that each country understands within its own legal system, and one tends to assume, wrongly, that it means much the same everywhere.

As legal person refers to the legal attributes of a person, in some countries bodies may have varying degrees of legal personality, for example a body may validly enter into an employment contract with an employee but not hold real property.

In some countries, bodies which other countries would say had all the attributes of a legal person do not, in the country in which they are created, qualify as a legal person because in the country concerned a legal person has different requirements or attributes. We can illustrate these differences by reference to a body which is identical in all European countries (except for whether it is a legal person), the European Economic Interest Grouping.<sup>74</sup>...

Avery Jones refers to art 1 EEIG Regulation:<sup>75</sup>

(2) A grouping shall ... have the capacity, in its own name, to have rights and obligations of all kinds, to make contracts or accomplish other legal acts, and to sue and be sued.

(3) The Member States shall determine whether or not groupings registered at their registries ... have legal personality.

In general, European states have decided that it has legal personality, but in Germany and Italy it does not. What is a legal person can be illustrated by comparing the approach of various European countries to deciding this question. The reason why Germany and Italy have not made an EEIG a legal person is that in the German legal tradition, which in this respect also applies in Italy, the state recognises as legal persons entities which continue in being despite changes in their members. This results in a strict separation between the assets of the legal person and its members, with the result that the members of a legal entity cannot be liable for the entity's liabilities. Since the members of an EEIG are so liable it does not conform to the German and Italian domestic concept of a legal person, and so those countries do not categorise an EEIG as a legal person in spite of its capacity.

In contrast, in some other countries, the liability of the members is not a factor of any relevance to this question.<sup>76</sup> In the French and Scandinavian legal

---

74 See 96.20 (European Economic Interest Grouping).

75 Council Regulation (EEC) No. 2137/85 of July 25, 1985.

76 In common law countries, corporations whose members had unlimited liability existed long before the introduction of limited liability and so the connection between the limited liability and the legal personality is less strong; in Australia and the UK

traditions, as in England, being a legal person and having legal capacity go together. So in these traditions the EEIG's capacities are such that it is naturally categorised as a legal entity. In England, there is no intermediate category of reduced legal personality into which an EEIG can be put so it is a legal person; there are, with few exceptions, no degrees of legal capacity.<sup>77</sup> Thus, an EEIG which is identical in all European countries in respect of its legal capacity, the liability of its members and all other attributes, may, therefore, be a legal person or not according to each country's concept of legal person.

... These differences are merely differences in what is meant by a legal person in different countries. It is not clear that asking the question whether another state's partnership is a legal person and obtaining the answer based on the other state's meaning of the term will result in a meaningful answer.<sup>78</sup>

One should not ask whether a foreign entity has legal personality in the abstract. The question should be whether it has legal personality  
 - *in the English law sense (that it can hold property, sue and be sued)*  
 or if appropriate  
 - *in the (say) German law sense (that it has perpetual succession, ie will not come to an end on the death or winding up of a member)*

#### App. 2.9.5 *Legal personality: a fiction?*

Whether an entity is a legal person is a question of law and somewhat

---

unlimited companies exist today. The EEIG is unique in the UK because it is a legal person whose members are liable in the first instance for the EEIG's liabilities in the same way as partners in England...

77 It is possible in the UK that a registered trade union (which has the power to contract in its own name, be sued in its name and a judgment against the name could be enforced only against property held for its benefit, but not the power to hold property in its name), and friendly societies, are legal persons, although not corporations, see Salmond on Jurisprudence (12<sup>th</sup> ed., 1966), p.306 quoted in *Bumper Development Corporation v Comr of Police* [1991] 1 WLR 1362. A registered trade union is sufficiently a separate person to enable a member to sue it without its being said that he is suing himself and others on the ground that any wrong was done by an agent for himself, as would be the case with a common law partnership see *Bonsor v Musicians Union* [1956] AC 104 in which Lord Porter described the trade union as 'a thing created by statute, call it what you will, an entity, a near-corporation, which by statute has in certain respects an existence apart from its members' (p.131)...

78 As was said in a Belgian tax case concerning a Michigan (US) partnership (Court of Appeals Brussels, April 30, 1998, discussed in 1998 European Taxation 249) 'with respect to the issue whether the plaintiff possessed a permanent establishment in the US, [the Michigan partnership] does not have legal personality under the standards of the USA, nor under the standards of Belgium.'

arbitrary:

The fact of the matter surely is that the law's *non-personification* of certain types of social collectivity is far more a matter of fiction than its conferment of personality is in the case of others. The fiction is not that the Royal Bank of Scotland has corporate identity, but that the National Union of Bank Employees lacks it. Indeed, clubs, trade unions and other unincorporated associations often have (as F W Maitland noted<sup>79</sup>) much more reality than some such legally incorporated bodies as the one-man company in the celebrated case of *Salomon v Salomon and Co Ltd*. In the common law systems, there are various devices by way of manipulation of the law of trusts, of agency, and of contract, whereby to accommodate the social realities of unrecognised corporateness. The artificiality of these devices seems rather more obvious than the supposed artificiality of legal corporate personality.<sup>80</sup>

Avery Jones makes the same point:

A proposal has been made to make an English partnership a legal person in line with a Scots partnership with no suggestion that whether it is a legal person or not is fundamental to its nature.<sup>81</sup> In practice, from the commercial, as opposed to the strictly legal, point of view, a common law partnership has many characteristics of a legal person: it will normally have a name, a bank account in that name, it can issue invoices and receive cheques in that name, receive and deliver goods and services in that name, partnership accounts are drawn up in form similar to company accounts showing partners as debtors and creditors to the partnership, partners appear to act as agents for the firm, and appear liable in practice only to the extent that the partnership assets are insufficient to meet its liabilities because a creditor will normally proceed against the partnership (or, more accurately, the partners jointly) first. In this way, the appearance, rather than the legal position, is closer to a civil law formal partnership.

81 Law Commission *Partnership Law* (2003) para. 4.17. [But this recommendation was rejected.]

I do not think it is helpful to use the word “fiction” in this area.<sup>82</sup>

### App. 2.10 Individual

Everyone knows that “individual” is used in tax to mean human beings, and exclude trustees and companies, but perhaps one authority should be cited to nail the point home. In *Jasmine Trustees v Wells & Hind*:<sup>83</sup>

... in a legal context the more natural meaning of the word “individual” is that it equates to a natural person, and would therefore exclude corporations. In everyday parlance that is a more natural meaning. I would not consider it natural for even a lawyer to refer to a company as an individual.

Of course that is subject to context.<sup>84</sup> But I am not aware of any tax statute where “individual” includes a company. The distinction is so ingrained and so fundamental to taxation that the drafter is unlikely to overlook it.

### App. 2.11 ‘Representing’ assets

Statute frequently refers to property/assets *directly or indirectly representing* other property/assets.

There is some variety in the wording used, and of course the meaning of the phrase may depend on the context, but it is useful to consider the concept of assets representing assets (“representation of assets”) as a topic in itself.

The general idea is that of a continuing fund, not merely the specific assets at any moment, but with an identity of its own.

Of course, context may show that references to property should be read as referring to a continuing fund even without a reference to assets representing other assets.<sup>85</sup> This is how any trust fund is regarded in trust law.<sup>86</sup>

---

82 Contrast 97.2.1 (Is situs fictional?).

83 [2007] EWHC 38 (Ch) at 22].

84 The passage cited continues: “Having said that, the word when used in legislation takes its colour from its surroundings, and each side produced authority on the word “individual” when used in a various differing contexts... All those cases show is that the word is capable of including a corporation if the context requires it.”

85 For an example, see 75.10 (Same-settlement fiction: s.81).

86 Maitland, “Trust and Corporation” put the point poetically:

“The Court of Chancery ... converted the “trust fund” into an incorporeal thing,

App. 2.11.1 *Directly or indirectly*

Sometimes the words *directly or indirectly* are missing, but they do not add much, for indirect representation is still a kind of representation.

The paradigm case of one asset representing another asset is:

- (1) T sells an asset ('asset 1') for cash ('asset 2').
- (2) T uses the cash to purchase a new asset ('asset 3').
- (3) And so on for assets 4, 5, etc.

One might say that asset 2 (the cash) directly represents asset 1 and assets 3, 4, etc indirectly represent asset 1.<sup>87</sup> But if the words *directly or indirectly* are missing, one would still say that assets 3, 4 etc represent asset 1.

If substitute property (asset 2) represents the original property (asset 1) it would usually follow that asset 1 no longer represents the property.<sup>88</sup>

App. 2.11.2 *Derive from/represent compared*

If asset A represents asset B, it may also be said to derive from asset B. In the paradigm case above, one would say that assets 2, 3, etc are *derived from* asset 1 as well as *representing* asset 1. Derivation and representation are (more or less) the same.

Occasionally statute refers to property/assets *derived from or representing* other property/assets. The earliest instance dates from 2007 and the wording has been used sporadically since.<sup>89</sup> What the drafter is trying to say by this expression is perhaps that the concept of derivation/representation is not to be narrowly understood. But the phrase is

---

capable of being invested in different ways. ... the "trust fund" can change its dress, but maintain its identity. To-day it appears as a piece of land; tomorrow it may be some gold coins in a purse; then it will be a sum of Consols; then it will be shares in a Railway Company, and then Peruvian Bonds."

This now seems self-evident, though perhaps that was not the case when Maitland wrote, in 1904. For the essay see

[https://oll-resources.s3.us-east-2.amazonaws.com/oll3/store/titles/873/Maitland\\_0242-03\\_EBk\\_v6.0.pdf](https://oll-resources.s3.us-east-2.amazonaws.com/oll3/store/titles/873/Maitland_0242-03_EBk_v6.0.pdf)

87 This is self-evident, but if authority is needed, see *IRC v Stype Investments (Jersey) Ltd* discussed at 2.11.5 (Do shares represent co assets).

88 See 17.16.6 (T sells asset to R).

89 Section 439 ITA 2007; examples relevant to this book include:

- Penalty template wording, see 120.23.5 (Assets representing assets)
- Onward gift template wording, see 57.31.6 (Cond. (d): Gift from capital payment)

essentially a relapse to the old style of legal drafting which heaped on synonyms without much thought as to their meaning.<sup>90</sup>

The expression ‘derived property’ may be used as a defined term when it is convenient to have a short label for:

- (1) property derived from other property; or
- (2) property representing other property<sup>91</sup>

As derive from/represent are (more or less) the same, this label seems apt in both cases.

The issue of derivation arises in the context of remittances, where the wording is: *derives wholly or in part, and directly or indirectly from*. There is a discussion at para 17.16 (Derived property), which is also relevant where the word used is *representing*.

In the context of pre-owned assets, the legislation refers to property which *derives its value* from other property;<sup>92</sup> that is a rather different matter. It is more closely comparable to rules which apply when the value of certain property is attributable to other property.<sup>93</sup>

### App. 2.11.3 *Income from assets*

Where income arises from an asset the income does not represent the asset. Where the drafter refers to property representing property, and wishes to include the income from the property, this is stated expressly.<sup>94</sup> In the absence of such a provision, that would not be the case.

Although income (eg, a dividend) does not represent the asset from which it arises (eg, shares), the income may be said to *derive from* the asset.<sup>95</sup> This is the only point I can think of where *represent* and *derive*

90 In the disguised trade receipts code we have “‘represents, or has arisen or derives from, or is otherwise connected with...’”. We can infer that the drafter felt particularly strongly. But the reader may hope that such language does not become standard.

91 For statutory examples, see s.77(8) TCGA, discussed below; para 9(1) sch 4ZA TCGA discussed at 59.7 (Cond. 4: Distinct beneficiaries).

92 See 80.16 (Derived property).

93 For an example, see 78.3.1 (Attribution condition).

94 For an example, see 98.6.6 (Settlor: CGT s.86 definition): “references to property representing other property include references to property representing accumulated income from that other property”. For two more examples, see 70.10.2 (ToA/IHT assoc ops compared), in short, referring to: “property which represents ... [a] that property, or [b] income arising from that property, or [c] any property representing accumulations of any such income”.

95 Subject of course to context: see 17.16.15 (Income from income/gains).

*from* may differ.

#### App. 2.11.4 *Borrowing charged on asset*

Suppose T borrows and charges the debt on an asset. Does the borrowed money represent the asset?

In *West v Trennery* trustees borrowed money on the security of shares in the trust fund. One question was whether the borrowed money was derived property for the purposes of s.77 TCGA (now repealed). So far as relevant, s.77(8) TCGA at that time provided:<sup>96</sup>

‘derived property’, in relation to any property, means ... any ... property directly or indirectly representing proceeds of ... that property ...

So the question was whether the borrowed money directly or indirectly represented ‘proceeds’ of the mortgaged shares. The court said:

16. The final question is whether the Revenue are correct in contending that the [borrowed] moneys ... constituted derived property within the meaning of s 77(8) in relation to the Einkorn shares. There can be only one answer to this: of course they do. The [borrowed] moneys ... directly represented the proceeds of a mortgage of the Einkorn shares ... It will be observed that I have equated the proceeds of a mortgage of property with the proceeds of the property itself. But the subsection does not refer to ‘the proceeds of a sale of that property’, but to ‘the proceeds of that property’; and this covers any proceeds, whether sale or mortgage or otherwise howsoever, by which value is extracted from one property and transferred to another.<sup>97</sup>

The wording here was non-standard (not *property representing property* but *property representing proceeds of property*. Did that make a difference? Did the avoidance context determine the outcome? Discuss.

#### App. 2.11.5 *Do shares represent co assets*

Do shares in a company represent the assets of the company?

The answer in strictness must be no. On first principles, the *value* of the shares is attributable to the *value* of assets of the company (less the value

---

<sup>96</sup> In 2006 the provision was amended with retrospective effect, only to be repealed in 2008.

<sup>97</sup> 76 TC 713. Likewise Lord Walker at [42]: ‘In my opinion the [borrowed money] started off as derived property...’

of debts); but it does not follow that the shares *represent* the assets: the whole basis of company law is that company shares and company assets are distinct, and one does not lightly pierce the corporate veil.

This view is to an extent supported by the inclusive definition of ‘representing’ in s.717(b) ITA:

references to assets representing any assets ... include references to ... shares in or obligations of any company to which the assets... are or have been transferred

The point arose in *IRC v Stype Investments (Jersey) Ltd.*<sup>98</sup> The case discusses the Inland Revenue charge.<sup>99</sup> So far as relevant, s.237 IHTA provides that where IHT is unpaid:

- (1) ... a charge for the amount unpaid ... is by virtue of this section imposed in favour of the Board on ... any property to the value of which the value transferred is wholly or partly attributable...
- (2) References in subsection (1) above to any property include references to any property directly or indirectly representing it.

The article provides:

The Inland Revenue had a charge under s 237(1) on the company’s shares ... [The Revenue] argued that s 237(2) must be read as extending the charge to the underlying assets of the company.

This argument met with no success:

Vinelott J was not persuaded that this was a tenable construction. In his judgment subs (2) was not intended and was not apt to create a double charge [ie a charge on the company shares, and a charge on the company assets] in such circumstances.

The word ‘indirectly’ was used in subs (2) to make it clear that the charge extends not only to the proceeds of sale of property purchased with those proceeds (which may be said to represent that property ‘directly’) but also to any property into which the property subject to the charge or the proceeds of sale can be traced.<sup>100</sup>

---

98 This case was decided 15 November 1983. It is unreported but discussed in Capital Taxes News and Reports, March 1987 Vol 7, No.17;

see <https://www.kessler.co.uk/case-law-archive>

99 See 119.16 (Inland Revenue charge).

100 This is not self-evidently right, but the decision has stood for so long now it should not be challenged. It is also assumed to be right in s.237(2A) IHTA; see 119.16.1

The point also arose in *Coombes v HMRC*.<sup>101</sup> The question was whether someone who provided property to a company held by a trust ('the underlying company') was a settlor within the s.86 TCGA definition. The relevant definition is non-standard:

a person is a settlor in relation to a settlement if the settled property consists of or includes property originating from him.

References ... to property originating from a person are references to—

- (a) property provided by that person;
- (b) property representing property falling within paragraph (a) above ...

The judge said:

[24] ... the appellant could only properly be treated as a settlor in relation to the ... Settlement if it can be said that part of the property held on the trust of the ... Settlement was provided by him, or represented property provided by him. The appellant argues that he could not be treated as a settlor in relation to the settlement, because no part of the settled property, held on the trust of the settlement, was provided by him or represents property provided by him. The only relevant property provided by him was the £700,000 provided by him to enable [the underlying company] to purchase the farm. The land disposed of by [the underlying company] ... admittedly represented the £700,000 provided by the appellant, but (submits the appellant) that land was not held on any trust arising under the ... Settlement. It was the absolute beneficial property of [the underlying company].

[25] HMRC seeks to counter this submission by pointing to the fact that, by providing [the underlying company] with the means of acquiring the land, the appellant increased the value of the shares in [the underlying company], which clearly are settled property subject to the trust of the settlement. So, the value of those shares (submits the Revenue) was provided by the appellant...

[28] HMRC points out that the appellant's argument emasculates the anti-tax avoidance effect of s 86 ... That may be,<sup>102</sup> but that fact does not,

---

(IHT residential property code).

101 [2007] EWHC 3160 (Ch).

102 At first sight one might think that there is considerable scope for tax avoidance, avoiding s.86 by providing funds to a company held by a trust, rather than providing funds to the trust. But a gift to a company held by a trust is in principle a chargeable transfer for IHT purposes. That would have been the case in *Coombes* itself, if

of course, (!) enable me to do violence to the actual provisions of ... the 1992 Act.

[29] I accept the appellant's submission that the land disposed of by [the underlying company] was not settled property originating from the appellant as settlor, because it was not at any stage held on the trust of the ... Settlement and did not represent property ever held on those trusts.

In the s.86 context, that decision binds the first-tier tribunal, and should be followed in the Upper Tribunal and above, given that the decision has not been questioned. But the reasoning at [28] is (to say the least) not the contemporary approach to construction of tax legislation, so its approach is not likely to be followed in other contexts where to do so would 'emasculate the anti-tax avoidance effect'. In other words, the context may show that company shares do indirectly represent the company assets.

Suppose a company is sold or wound up. The proceeds of sale or liquidation represent the shares. Do they also represent the assets of the company? It is suggested that the answer may be yes or no, depending on what makes better sense in the context of the provision. Perhaps in the absence of context the better answer is that they do represent the assets, but that does give rise to anomalies.

#### App. 2.11.6 *Apportionment*

Occasionally one sees the form:

so much of any property representing both [derived property] and other property as, on a just apportionment, can be taken to represent [the derived property].<sup>103</sup>

But apportionment must be possible in all cases, so this adds nothing.

#### App. 2.11.7 *Withdrawal from mixed fund*

Suppose a person holds a mixed fund which includes or derives from:

- (1) asset A (or a set of assets, fund A); and
- (2) asset B (or a set of assets, fund B).

---

anyone noticed. An interest-free loan to a company avoids a chargeable transfer, but the company's gains may be attributed to the lender under s.3 TCGA; see 60.9 (Overlapping participators: Loan creditors).

103 For example, para 8 sch 5 TCGA, set out in 94.2.9 (CGT s.86 definition of settlor).

If the person withdraws some asset out of the mixed fund, it may be necessary to know whether the withdrawn property is represented by (1) asset A, or (2) asset B, or (3) a mixture of the two. Likewise the property remaining in the mixed fund.

In theory, one might apply:

- (1) FIFO (first in first out)
- (2) LIFO (last in first out)
- (3) A proportional approach
- (4) A power of election: The person withdrawing the property may elect what the withdrawn property represents

In the context of remittances, the statutory mixed fund rules usually govern this question. In other contexts, it is considered that the rule in *Clayton's case* should be applied:

... this is the case of a banking account, where all the sums paid in form one blended fund, the parts of which have no longer any distinct existence.<sup>104</sup>

In modern terminology, a mixed fund.

In such a case, there is no room for any other appropriation than that which arises from the order in which the receipts and payments take place, and are carried into the account. Presumably, it is the sum first paid in, that is first drawn out. It is the first item on the debit side of the account, that is discharged, or reduced, by the first item on the credit side. The appropriation is made by the very act of setting the two items against each other. Upon that principle, all accounts current are settled, and particularly cash accounts...

If the usual course of dealing was, for any reason, to be inverted, it was surely incumbent on the creditor to signify that such was his intention. He should either have said to the bankers,—“Leave this balance altogether out of the running account between us,”—or,—“Always enter your payments as made on the credit of your latest receipts, so as that the oldest balance may be the last paid.”<sup>105</sup>

The rule is therefore that:

- (1) The withdrawn assets are taken from that part of a mixed fund as the person making the transfer may direct.

---

104 (1816) 1 Mer 529 at p.608.

105 at p.608, 609.

(2) Subject to that, a FIFO basis applies.

It appears that HMRC accept this.

## App. 2.12 Security

The word ‘security’ is often used in tax and in company/commercial law. I consider its meaning in the following contexts:

Context	See para
s.132 TCGA definition	App.2.12.1
Debt on a security: s.251 TCGA	App.2.12.2
Company/commercial law	App.2.13
Deeply discounted securities	App.2.14
s.1117 CTA 2010: distributions	App.2.15
Transactions in securities code	52.3.1
CGT situs	98.2.3

### App. 2.12.1 s.132 TCGA definition

Section 132(3) TCGA provides:

For the purposes of this section and section 133...

(b) ‘security’ includes any loan stock or similar security

[i] whether

[A] of the Government of the UK or

[B] of any other government, or

[C] of any public or local authority in the UK or elsewhere, or

[D] of any company,

[ii] and whether secured or unsecured.

I refer to this as the ‘**s.132 definition**’. It is said to apply for the purposes of s.132, 133, but is incorporated by reference in other contexts.

A CCAB statement provides:

[1] The definition of ‘security’ in [s.132(3)(b) TCGA] ... is regarded as exhaustive

[2] so that the debt must be a loan stock or a similar security of a government, public or local authority or company.

[3] The view is also taken that the reference to loan ‘stock’ implies in general a class of debt the holdings in which are transferable by purchase

and sale...<sup>106</sup>

Points [3] is not contentious.

It seems reasonably arguable from the statutory definition that point [2] is correct; that is, only securities issued by companies or state entities within s.132(3)(b)[i] are within the s.132 definition; securities issued by individuals, trusts, and other non-state non-company entities are not within the s.132 definition. If that is right, it is difficult to think of a security which is not within the s.132 definition, which may therefore be regarded as exhaustive.

### App. 2.12.2 *Debt on a security*

Section 251(1) TCGA confers CGT exemption for debts - except in the case of a 'debt on a security (as defined in s.132)'.<sup>107</sup>

'Debt on a security' has been described as 'particularly obscure',<sup>108</sup> 'baffling', 'a strange phrase' and 'the expression... is not one which is familiar to either lawyers or, I think, business men.'<sup>109</sup> But perhaps expectations of clarity in tax legislation have fallen since these observations were made in 1980. Although the phrase was a neologism when first used in the CGT legislation in 1965, it seems straightforward enough to me: it means a debt which is a security; as opposed to:

- (1) a simple debt (a debt which is not a security) or
- (2) a share (which is a security but not a debt).

The key term is 'security'.

In *Taylor Clark International v Lewis* the Judge said that 'securities' was 'an imprecise term which takes its colour from its setting'.<sup>110</sup> It is however frequently used in law and in investment business. It clearly means something more than a simple debt, but what is the something

106 The statement was made in 1969. LexisNexis states 'Confirmed as current in 1989, but in the light of case law (*Ramsay v IRC* 54 TC 101) the Revenue take a less restrictive view than they did in 1969.' No reference is given for this. *Ramsay* (1981) does not give reason to cast doubt on the CCAB statement; I think HMRC were right to confirm it in 1989.

107 See 53.21 (CGT debt exemption).

108 *Aberdeen Construction Group v IRC* [1978] AC 885, at p.902

109 *Ramsay v IRC* 54 TC 101 at p.329, p.333. Similarly *Savva v HMRC* [2015] UKUT at [35]: an 'enigmatic phrase'.

110 [1997] STC 499 at p.519. The related concept of 'debenture' is similarly imprecise: see 98.2.4 ('Debenture').

more?

### App. 2.12.3 *Legal charge irrelevant*

The CCAB statement provided in 1969 that:

the words [in the s.132 definition] ‘whether secured or unsecured’ in the definition made the existence of a charge immaterial.

The CG Manual refers to the s.132 definition and continues:

**CG53421 definition of debt on a security** [Jul 2019]

This definition is of limited use because there is no statutory guidance on the meaning of ‘loan stock or similar security.’ However, the final words make it clear that the debt does not have to be secured to be the debt on a security. Therefore ‘debt on a security’ is not the same as ‘secured debt.’

That view was upheld in *Taylor Clark International v Lewis*<sup>111</sup> in which a debt repayable on demand was held not to be a debt on a security, even though the debt was charged (secured) on assets.

The same applies even without the express s.132 definition.

It is unfortunate that (for historical reasons) the word ‘security’ is used in two different senses:

- (1) A mortgage, charge, pledge or lien, giving priority over unsecured creditors. *Taylor Clark* coined the term ‘proprietary security’ for this; there is also merit in the American English term ‘collateral’.
- (2) A share or debt-security

But it is not too confusing as long as one bears the two meanings in mind. Once it is realised that the word ‘security’ is being used in two different senses, there is nothing inconsistent, or even incongruous, in saying that:

- an unsecured debt may be a security, and
- a secured debt may not be a security.

### App. 2.12.4 *Marketability*

The CG Manual provides:

**CG53423 Debt on a security: *Ramsay v CIR* 54 TC 101** [Jul 2019]

The *Ramsay* case involved a company which had incurred an agreed gain on the sale of a farm. It then entered into an avoidance scheme designed

---

111 71 TC 226.

to produce an allowable loss to set off against the gain. The scheme removed value from a chargeable asset (shares) to produce an allowable loss on their disposal. The value passed into a loan, known as L2. This loan was also disposed of. If L2 was not a debt on a security, it would not be a chargeable asset. Therefore the gain on the disposal of the loan would not have been chargeable. However, the House of Lords held that the loan L2 did amount to a debt on a security. The gain on the disposal of L2 was thus a chargeable gain and the scheme failed.

**CG53424 House of Lords decision: marketability** [Jul 2019]

In *Ramsay* the House of Lords considered the underlying purpose of the distinction between debts and debts on a security in TCGA92/S251 (1). Both Lord Fraser and Lord Wilberforce suggested the essential feature of the debt on a security is that it should be marketable.

At page 194 Lord Fraser says

‘the distinction ... is, I think, between a simple unsecured debt and a debt of the nature of an investment, which can be dealt in and purchased with a view to being held as an investment.’

Later having analysed the essential features of the loan he says ‘it possessed the characteristic of marketability.’

At page 189 Lord Wilberforce says

‘it can be seen, however, in my opinion, that the Legislature is endeavouring to distinguish between mere debts, which normally (though there are exceptions), do not increase but may decrease in value, and debts with added characteristics such as may enable them to be realised, or dealt with at a profit.’

### App. 2.12.5 *Investment/profitability*

The CG Manual provides:

**CG53425 Debt on a security: essential characteristics of** [Jul 2019]

Both speeches in the House of Lords emphasised that for a debt to be the debt on a security it should be capable of being

- held as an investment; and
- realised at a profit.

These conditions are, to some extent, interrelated, but it is important that both should be satisfied. For example, a debt may be regarded as a good investment. But if it cannot be realised at a profit it cannot be a debt on a security. These points are discussed in the following paragraphs.

**CG53426 held as an investment** [Jul 2019]

For a debt to be held as an investment it should either

- carry a commercial rate of interest; or
- carry a premium on repayment, equivalent to the interest which would

have been paid; or

- be issued at a discount, so that repayment at face value again reflects the interest which would have been paid on the debt.

Where these criteria are not met and the return on the investment is clearly uncommercial, debt on a security status should not be accepted.

**CG53427 sold at a profit** [Jul 2019]

Whether a debt can be realised at a profit will depend, in part, on the premium, or rate of interest which the debt carries. But even if a debt carries an attractive rate of interest, it may not be regarded as a worthwhile investment by a potential purchaser. For example, the terms of the loan may enable the borrower to repay the debt early. A potential purchaser would need to consider whether the loan would last long enough to cover the costs of acquisition, and obtain a worthwhile return on the investment.

This overlaps with the structure of permanence requirement below.

The CG Manual provides:

**CG53433 Debt on security: exchange gains** [Jul 2019]

If a debt is denominated in a foreign currency, exchange gains (or losses) can arise if the currency fluctuates against the pound. You should consider whether any such debt is the debt on a security purely in terms of the currency in which the debt is denominated. Neither realised, nor potential, exchange gains or losses should be taken into account in deciding whether a debt is the debt on a security.

### App. 2.12.6 *Structure of permanence*

The CG Manual provides:

**CG53428 structure of permanence** [Jul 2019]

This point was made by Lord Wilberforce, in *Ramsay*, where he commented (at page 190) that the relevant loan had ‘a structure of permanence such as fitted it to be dealt in ....’ In fact, the loan in that case was repaid early. But it had been issued on terms which meant that a large penalty would be payable in the event of early repayment. It is not possible to set any precise limits for the ‘life’ of a debt, which would enable it to be regarded as a debt on a security. The attractiveness of any particular debt will depend upon the other terms of the loan, and on the type of market in which the debt would normally be traded. You can accept that any loan which could not be terminated by the borrower within a year from the date of commencement will have the required ‘structure of permanence’. But a debt will not have a ‘structure of permanence’ merely because the borrower is not in a position to repay

the debt in the foreseeable future.

**CG53429 repayment at short notice** [Jul 2019]

You cannot say that a debt is not a debt on a security simply because it can be repaid at short notice. But it is reasonable to suggest that in such cases there should be some compensation for the creditor to counterbalance the uncertainty as to the term of the loan. For example, a penalty can turn an otherwise uncertain, and therefore inherently unattractive, loan into a worthwhile investment. If a loan can be repaid at short notice, but there is no compensating benefit for the creditor, this would count against accepting the loan as a debts on a security.

**CG53430 events of default** [Jul 2019]

Some agreements include standard clauses requiring the debt to be repaid immediately if certain events happen. For example, if the borrower defaults on repayment, or goes into liquidation. These standard clauses should not be taken as displacing any stated terms for repayment for the debt set out in the agreement.

### App. 2.12.7 *Documentation*

The CG Manual provides:

**CG53434 Debt on security: documentation** [Jul 2019]

The existence of a formal document constituting or evidencing the debt is not an essential feature of the debt on a security. At page 194 in *Ramsay* Lord Fraser says ‘Further consideration has satisfied me that the existence of a document or certificate cannot be the distinguishing feature between the two classes of debt’. However, cases where debt on a security status is claimed for debts where no documentation exists need to be examined carefully to check whether or not the required features are present. Equally you should resist any suggestion that a debt **MUST** be a debt on a security if it is acknowledged by a document described as loan stock. This would be inconsistent with the approach taken in *Ramsay*, that the marketability test will be appropriate in deciding in ANY case whether a debt amounts to the debt on a security.

### App. 2.12.8 *Loan stock/similar security*

The CG Manual provides:

**CG53435 Debt on security: loan stock or similar security** [Jul 2019]

In *Ramsay* Lord Wilberforce did not regard it as necessary to decide whether the loan L2 was, in fact, within the meaning of ‘loan stock’. He observed that TCGA92/S132 (3)(b) ‘includes within ‘security’ any ‘similar security’ to loan stock: in my opinion these words cover the

facts. This was a contractual loan, with a structure of permanence such as fitted it to be dealt in ...' (page 190). Lord Fraser took a similarly broad approach in his judgment (page 194).

App. 2.12.9 *Inter-group loan*

The CG Manual provides:

**CG53436 Debt on security: loan accounts** [Jul 2019]

Debt on loan account, for example between associated companies, may well not amount to the debt on a security. ...

Informal inter-company loan is not likely to take the form of a debt on a security. The loans are likely to be repayable on demand. In the case of UK companies, of course, the loan relationship rules would need consideration, and the debt on a security issue would not arise.

App. 2.12.10 *Date to test security*

Market conditions change over time. The CG Manual provides:

**CG53431 Debt on security: when conditions satisfied** [Jul 2019]

You should consider whether any debt amounts to the debt on a security by reference to the circumstances prevailing at the time the debt was created. For example, you should consider whether a rate of interest is commercial by reference to the market conditions at the time the debt was created. Thus, you may take into account any market opinion, at the time the debt was created, as to the likely future changes in the market rate of interest. Changes in the rate of interest which were not anticipated at the time the debt was created cannot be taken into account.

The terms of a debt may change over time, for instance on a specified date a debt may become payable. Clearly the debt does not cease for that reason to be a debt on security (though it ceases to have any structure of permanence).

The terms of a debt may change by agreement between the parties:

- (1) If the change constitutes a novation, (a disposal of the old loan and the creation of a new loan)<sup>112</sup> then the position is self-evident: the question of whether the debt is a debt on a security is decided at the date of the creation of the new debt.
- (2) If the change is a variation of the existing loan, but not a novation, it

---

112 See 62.18.1 (Novation/variation distinction).

is considered that the change should not alter the question of whether the debt is a debt on a security; this question is to be decided at the time the debt came into existence.<sup>113</sup>

The CG Manual skims over deep waters, but it suggests that HMRC agree:

**CG53432 changes in terms** [Jul 2019]

You should not accept that a debt can be regarded as the debt on a security because the terms of the loan could have been amended to make the debt marketable. If the terms of the debt have changed this cannot affect the status and tax treatment of the debt prior to the changes. You may, however, need to consider whether or not the changes had the effect of bringing to an end the original debt, and creating a new one, to which a different tax treatment may apply.

On contract law aspects of changes to the terms of a debt, see Chitty on Contracts (33<sup>rd</sup> ed., 2018), para 22-028 (Substituted contract).

### App. 2.13 ‘Security’ in company law

Of course meaning depends on context, but the s.132 definition is not very different from the normal commercial meaning of ‘security’.

Benjamin, *Interests in Securities* states:<sup>114</sup>

Securities are a type of transferable financial asset. The meaning of the term ‘securities’ has varied over time.<sup>115</sup> Originally the term was used to denote security interests (such as mortgages and charges) supporting the payment of a debt or other obligation. In the early modern period, companies and government agencies began to raise capital from the public by issuing transferable debt obligations, the repayment of these debt obligations was secured on the assets of the issuer.<sup>116</sup> By a process of elision, these secured debt obligations came to be known as ‘securities’.<sup>117</sup> Since late medieval times, commercial companies have raised funds by issuing participations or shares. In the Victorian era the transferability of these shares under the general principles of company

---

113 Further thought would be needed if changes to the terms of the loan were in contemplation at the time the loan was originally made.

114 1<sup>st</sup> ed., 2000, para 1.03, 1.10.

115 Benjamin refers to *Re Rayner* [1904] 1 Ch 176 at p.185: ‘The word [securities] is not a term of art, but only a word of description. It is a commercial word which will vary with the history of commerce.’

116 Footnote original: Such secured corporate debt obligations are called debentures.

117 Footnote original: See *Re Smithers* [1939] Ch 1015 at p.1017-1020.

law was put beyond doubt. As shares became more readily transferable, their functional likeness to debt securities became clearer, and both forms of investment became known as ‘securities’. More recently, the term ‘securities’ has been extended to include units in investment funds and other forms of readily transferable investment....<sup>118</sup>

Transferability is an essential characteristic of securities.<sup>119</sup>

Gore-Browne on Companies states:<sup>120</sup>

In the words of one judge, ‘there can be no dispute that ... the word ‘securities’ has a flexible meaning’.<sup>121</sup> Depending on the context, it can mean security interests (such as mortgages and charges), guarantees<sup>122</sup> or transferable financial investments.<sup>123</sup> Originally, investments were referred to as ‘securities’ only if they were supported by security interests or were otherwise ‘secure’ (eg because they were obligations of the government), but over time the usage of the term has developed to include all types of transferable investments, whether secured or unsecured.<sup>124</sup> Determining which meaning is applicable is merely a matter of construing the context, with no presumption one way or the

---

118 Footnote original: ... See also *Re Douglas’ Will Trusts* [1959] WLR 744 at p.749: ‘I am prepared to make a declaration that ‘securities’ includes any stocks or shares or bonds by way of investment’. See the discussion of the meaning of the term in *Re Rayner* [1904] 1 Ch 176 at p.189, 191.

119 Footnote original: Indeed, the repackaging of relatively illiquid assets into readily transferable assets is known as ‘securitisation’.

120 Looseleaf, para 27(5), p. 27-14.

121 Footnote original: *Re Scorer* [1924] All ER Rep 330 at 333 per PO Lawrence J. On the meaning of the term ‘securities’, see further Benjamin, *Interests in Securities* (2000), p 4 and *Financial Law* (2007), pp 177 - 179; Wood, *Regulation of International Finance* (2nd edn, 2019), pp 141-148; Micheler in Gullifer and Payne (eds), *Intermediated Securities* (2010).

122 Footnote original: Referred to as personal security.

123 Footnote original: See, eg *Re Rayner* [1904] 1 Ch 176 at 189 per Romer LJ (‘The word ... is widely used as a synonym for ‘investments’); *Re Douglas’ Will Trusts* [1959] 1 WLR 744 at 749 per Vaisey J (‘I think that ‘securities’ means investments’). See also *Fons HF v Corporal Limited* [2014] EWCA Civ304, [2015] 1 BCLC 320 at [41] per Patten LJ (‘the word ‘security’ has at least two principal meanings: the first is a debt or claim the payment of which is secured by a charge or guarantee; the second is as a more general term for describing investments’).

124 Footnote original: On the development of usage of the term ‘securities’, see Fuller, *The Law and Practice of International Capital Markets* (3<sup>rd</sup> edn, 2012), pp 5-6.

other.<sup>125</sup>

## App. 2.14 ‘Security’ in DDS code

SAI Manual states:

### 3010 Introduction [Dec 2019]

... The term ‘security’ is not defined in the [deeply discounted securities] legislation. It may be taken to have a broad meaning comparable to the definition in s.132(3)(b) TCGA (CG53420) ...

If I am right, that the s.132 definition broadly reflects the normal meaning of the word, this is right and unsurprising. In the DDS case of *Savva v HMRC*<sup>126</sup> the Tribunal referred to *Taylor Clark International* (a debt on a security case) for guidance on the meaning of ‘security’ in the DDS code.

### App. 2.14.1 *Security of non-company*

A security is normally debt owed by a company, but debt owed by a non-company (individual or trust) may be a security. The word ‘issued’ may be more usual for a corporate issuer, but a non-company may ‘issue’ a security.<sup>127</sup>

A security issued by an individual or trust is not a security within the s.132 definition, if the CCAB statement is right to say that the s.132 definition is an exclusive definition; but it is still a security in the general sense, and a security for the purposes of the DDS code. The SAI Manual passage set out above states that the meaning of ‘security’ in the DDS code is ‘comparable’ to the s.132 definition which admits the possibility

---

125 Footnote original: See, eg *Taylor Clark International Ltd v Lewis* [1997] STC 499 at 517-518 per Robert Walker J (‘security’... is an imprecise term which takes its colour from its setting. The setting [here] ... is that of investments’). In that case, Robert Walker J (at 519-520) described the indicia of a ‘debt on a security’ as (i) assignability, (ii) a right to interest or a premium on repayment, and (iii) a ‘structure of permanence’ (ie not merely short term). See also *Bristol Airport plc v Powdrill* [1990] Ch 744; *Tarmac Roadstone Holdings Ltd v Williams* [1996] STC (SCD) 409; *Taylor Clark International Ltd v Lewis (Inspector of Taxes)* [1997] STC 499; *Re Douglas Will Trusts* [1959] 1 WLR 744 at 749; *Brown, Shipley & Co v IRC* [1895] 2 QB 598; *Re Rayner* [1904] 1 Ch 176; *Re Gent and Eason’s Contract* [1905] 1 Ch 386; *Re United Law Clerks Society* [1947] Ch 150 at 152 to 153; *IRC v Henry Ansbacher & Co Ltd* [1963] AC 191 at 207.

126 *Savva v HMRC* [2015] UKUT 141 (TCC).

127 The drafter took this view in para 2(1)(c) sch 4B TCGA (issue of security by trustees); see 58.4.4 (Issue of security).

that there can be a security for the DDS code which is not a security within the s.132 definition. In Hansard it was stated that the DDS provisions apply to *corporate* debt, but the passage does not bear any weight.<sup>128</sup>

### App. 2.15 ‘Security’ in distribution code

Section 1117(1) CTA 2010 provides:

In this Part [Part 23 Company Distributions], except where the context otherwise requires—  
‘security’ includes securities not creating or evidencing a charge on assets

The definition is incorporated by reference in some other contexts.

Since the word security in its general sense does not require a charge on assets, this definition does not in fact add anything to the general meaning. Perhaps the point was less clear in 1965 when the definition was first used.

### App. 2.16 ‘UK’ and related expressions

#### App. 2.16.1 *United Kingdom*

Interpretation Act 1978 sch 1 provides:

‘United Kingdom’ means Great Britain and Northern Ireland.

#### App. 2.16.2 *British Isles/Crown dependencies*

Interpretation Act 1978 sch 1 provides:

‘British Islands’<sup>129</sup> means the United Kingdom, the Channel Islands and the Isle of Man.

So the Isle of Man and the Channel Islands do not form part of the UK.

In *Barclay (R, oao) v Lord Chancellor*.<sup>130</sup>

The Channel Islands consist of two Bailiwicks, Jersey and Guernsey. The Channel Islands are Crown dependencies but they are not part of the

---

128 Hansard 26/4/1996 col 1360 (Lord Mackay, then Lord Chancellor: ‘Clauses 80 to 105 cover the measures in this Bill which relate to the taxation of corporate debt.’) <http://hansard.millbanksystems.com/lords/1996/apr/26/finance-bill>

129 The terms British Isles/Islands are synonymous. ‘British Islands’ is mostly found in very formal legal writing.

130 [2009] UKSC 9 at [8].

United Kingdom nor are they colonies. When King Philippe Auguste retook possession of continental Normandy in 1204, King John retained the Channel Islands. His right as Duke of Normandy lapsed and a separate title grew up by force of occupation, which attached to him as King of England. This was confirmed by the Treaty of Brétigny<sup>131</sup> in 1360.

See too 3.21.2 (Bailiwick of Guernsey).

### App. 2.16.3 *Great Britain*

‘Great Britain’ means England, Wales and Scotland: s.1 Union with Scotland Act 1706 provides:

That the two Kingdoms of England and Scotland shall upon the First day of May which shall be in the year 1707 and forever after be united into one Kingdom by the name of Great Britain ...

### App. 2.16.4 *England*

The definition of ‘England’ is not usually an issue for tax. However, for completeness, para 5(a) sch 2 Interpretation Act 1978 provides:

in any Act passed before 1st April 1974, a reference to England includes Berwick upon Tweed and Monmouthshire and, in the case of an Act passed before the Welsh Language Act 1967, Wales.

### App. 2.16.5 *Territorial sea*

‘Territorial sea’ extends 12 nautical miles from shore.<sup>132</sup>

Section 1013 ITA provides:

The territorial sea of the UK is treated for the purposes of the Income Tax Acts as part of the UK.

The same applies for CGT, CT and NIC.<sup>133</sup>

There is no equivalent provision in the IHT legislation so territorial sea is not part of the UK for IHT purposes. This is perhaps a consequence of

131 The treaty was signed at Brétigny, and later ratified as the Treaty of Calais on 24 October 1360. It marked the end of the first phase of the Hundred Years’ War (1337–1453) – as well as the height of English power on the Continent.

132 It is more precisely defined in the United Nations Convention on the Law of the Sea.

133 See s.276 TCGA, s.1170 CTA 2010; s.172 SSCBA.

art 26(1) United Nations Convention on the Law of the Sea:

No charge may be levied upon foreign ships by reason only of their passage through the territorial sea.

In the Dover Strait, the southerly shipping lane is territorial sea, and so counts as part of the UK, but this may not matter, given the exemption for property in transit.<sup>134</sup>

## App. 2.17 Land

The Interpretation Act 1978 provides (for Acts after 1 Jan 1979):

‘Land’ includes

- [a] buildings and other structures,
- [b] land covered with water, and
- [c] any estate, interest, easement, servitude or right in or over land.

This provision seems to have been forgotten, as it is repeated in recent statutory provisions (with insignificant variations of wording); see for instance, s.6B(3) ITTOIA; s.717S(1) ITA; s.1C(6) TCGA; para 4(7) sch 4B TCGA. These do no harm, but the point of the Interpretation Act is to prevent repetition in statutory drafting.

## App. 2.18 Interest in land/chargeable interest

This section considers the following definitions:

Term	Definition	Relevant for <sup>135</sup>
Interest in UK land	s.1C TCGA	CGT/CT charge on non-residents <i>also</i> : IHT residence-property code
Interest in land	Para 4 sch 1B TCGA	Definition of Residential Property Gain
Chargeable interest	s.48 FA 2003	SDLT
Chargeable interest	s.107 FA 2013	ATED

The definitions are very similar so they are conveniently considered together.

### App. 2.18.1 *Scope of definitions*

Section 1C(1) TCGA provides:

<sup>134</sup> See 17.12.6 (Property in transit).

<sup>135</sup> This list is not comprehensive.

For the purposes of section 1A(3)(b) an ‘interest in UK land’ means ...

This definition is said to apply for the purposes of s.1A(3)(b) but it is applied elsewhere when needed for CGT,<sup>136</sup> and is also incorporated by reference for the IHT residential-property code.<sup>137</sup>

Para 4(1) sch 1B TCGA provides:

For the purposes of this schedule an ‘interest in land’ means ...

This definition applies for schedule 1B.

For ATED, s.107(1) FA 2013 provides:

In this Part [Part 3 FA 2013, ATED] ‘chargeable interest’ means—

The definition applies for ATED.

Similarly for SDLT, s.48(1) FA 2003 provides:

In this Part [part 4 FA 2003, SDLT] ‘chargeable interest’ means—

The definition applies for SDLT.

### App. 2.18.2 *Interest in land: Definitions*

#### **s.1C(1) TCGA**

For the purposes of section 1A(3)(b) an ‘interest in UK land’ means

(a) an estate, interest, right or power in or over land<sup>138</sup> in the UK, or

#### **Para 4(1) sch 1B TCGA**

For the purposes of this Schedule an ‘interest in land’ means—

(a) an estate, interest, right or power in or over land, or

136 Para 7 sch 1A TCGA provides: ‘For the purposes of this Part of this schedule [Part 2, land-rich asset test] ‘interest in UK land’ has the meaning given by section 1C.’ Para 47 sch 5AAA TCGA (UK property-rich collective investment vehicles): ‘‘interest in UK land’ is to be read in accordance with section 1C’; similarly s.25ZA(7) TCGA; s.80A TCGA; s.159A TCGA; s.168A TCGA; s.187B TCGA. The definition also applies for CT: s.2B(5) TCGA provides: ‘Section 1C applies for the purposes of subsection (4)(a) as it applies for the purposes of section 1A(3)(b) (disposing of interests in UK land).’

137 See 78.19 (‘Residential property interest’).

138 Section 1C(6) TCGA and para 4(7) sch 4B TCGA (more or less) duplicate the Interpretation Act 1978 definition of land, so they add nothing; see App.2.17 (Land).

(b) the benefit of an obligation, restriction or condition affecting the value of an estate, interest, right or power in or over land in the UK, other than an excluded interest.

(b) the benefit of an obligation, restriction or condition affecting the value of an estate, interest, right or power in or over land other than an excluded interest.

The sch 1B and s.1C definitions are the same, except the sch 1B definition extends to non-UK land; so references to the UK are deleted, and para 4(6) sch 1B TCGA is added. This provides:

In applying the domestic concepts of law mentioned in this paragraph to land outside the UK, this paragraph is to be read so as to produce the result most closely corresponding with that produced in relation to land in the UK.<sup>139</sup>

The SDLT/ATED provisions are more or less the same:

**s.48(1) FA 2003: SDLT**

(1) In this Part ‘chargeable interest’ means—

(a) an estate, interest, right or power in or over land in England or Northern Ireland, or

(b) the benefit of an obligation, restriction or condition affecting the value of any such estate, interest, right or power,

other than an exempt interest.

**s.107 FA 2013: ATED**

(1) In this Part ‘chargeable interest’ means—

(a) an estate, interest, right or power in or over land in the UK, or

(b) the benefit of an obligation, restriction or condition affecting the value of any such estate, interest, right or power.

(3) An exempt interest is not a chargeable interest for the purposes of this Part.

The definitions are the same as the CGT definitions set out above, except that the SDLT definition is restricted to land in England/Northern Ireland, and the term “exempt interest” is used instead of “excluded interest”. (It is a pity that the terminology is not aligned; I refer where appropriate to an

<sup>139</sup> Para 4(6) has no particular effect, see 86.1.1 (Foreign-entity definitions); but presumably the point is to prevent an inference that ‘land’ in the sch 1B definition might be restricted to UK land.

exempt/excluded interest).

### App. 2.18.3 *Exempt/excluded interest*

Section 1C(2) TCGA provides:

The following interests are ‘excluded interests’-

- (a) any interest or right held for securing the payment of money or the performance of any other obligation,
- (b) a licence to use or occupy land,
- (c) in England and Wales or Northern Ireland,
  - [i] a tenancy at will or
  - [ii] an advowson, franchise<sup>140</sup> or manor, and
- (d) such other descriptions of interest or right in relation to land in the UK as may be specified in regulations made by the Treasury.<sup>141</sup>

A tenancy at will can have no value, and the items in (c)[ii] are of very specialist interest.

For completeness, s.1C(3) TCGA provides:

An interest or right is not within subsection (2)(a) if it is-

- (a) a rentcharge, or
- (b) in Scotland, a feu duty or a payment mentioned in section 56(1) of the Abolition of Feudal Tenure etc (Scotland) Act 2000.<sup>142</sup>

Rentcharges cannot be created after 1977,<sup>143</sup> and feu duty (a Scots law concept) was abolished in 2004,<sup>144</sup> so this provision is (more or less) obsolete; I expect the drafter was following old precedents without giving much thought to the matter.

The SDLT/ATED provisions are effectively identical.

**s.48(2) FA 2003: SDLT**

**s.107(4) FA 2013: ATED**

140 Section 1C(6) TCGA provides: ‘In this section- ‘franchise’ means a grant from the Crown such as the right to hold a market or fair, or the right to take tolls’.

Para 4(7) sch 1B TCGA is identical.

141 Para 4(2) sch 1B TCGA is identical.

142 Para 4(3) sch 1B TCGA is identical.

143 Rentcharges Act 1977. Any remaining pre-1977 rentcharges will be extinguished in 2037.

144 Abolition of Feudal Tenure etc. (Scotland) Act 2000.

- |                                       |  |
|---------------------------------------|--|
| The following are exempt interests–   | The following are exempt interests–        |
| (a) any security interest;            | [Identical]                                |
| (b) a licence to use or occupy land;  | [Identical]                                |
| (i) a tenancy at will;                | in England and Wales or Northern           |
| (ii) an advowson, franchise or manor. | Ireland, a tenancy at will. <sup>145</sup> |

Section 107(5) FA 2013 provides the definition:

In subsection (4) ‘security interest’ means an interest or right (other than a rentcharge<sup>146</sup>) held for the purpose of securing the payment of money or the performance of any other obligation.

If A lends to B unsecured, A has an asset (the debt) but the asset is not an interest in land/chargeable interest. If the loan is secured on land, the asset is an interest in land, as a matter of general (land) law; but it is an exempt/excluded interest and so it does not count as an interest in land/chargeable interest, as defined.

**App. 2.19 Dwelling/residential property**

This section considers the following definitions:

---

145 The rule that an advowson, franchise or manor is an exempt interest is not needed for ATED, as these are not dwelling-interests.

146 Section 107(6) FA 2013 makes provision for Scotland which did not use the term ‘rentcharge’. But as noted above, the reference is obsolete.

<b>Defined term</b>	<b>Provision</b>	<b>My term: Relevant for</b>
Dwelling	sch 1B TCGA	<b>TCGA definition, relevant for:</b> UK land rebasing Definition of “residential property gain” IHT residence-property code
Residential Property Dwelling	s.116 FA 2003 s.112 FA 2013	<b>SDLT definition:</b> SDLT <b>ATED definition:</b> ATED

The definitions are (mostly) the same, so they are conveniently considered together. I focus on the TCGA and SDLT definitions.

The TCGA definition is expressed to be for the purposes of sch 1B TCGA, but it is incorporated elsewhere when needed.<sup>147</sup> It is also incorporated by reference in the IHT residence-property code.<sup>148</sup>

The terms dwelling/residential property are elaborately defined.

**TCGA definition: para 5(1) sch 1B TCGA**    **SDLT definition: s.116(1) FA 2003**

For the purposes of this Schedule a building<sup>149</sup> is a dwelling at any time when—

(a) it is used, or suitable for use, as a dwelling, or

(b) it is in the process of being constructed or adapted for use as a dwelling,

[For equivalents to para (c), see App.2.18.2 (Interest in land: Definitions); 78.19.1 (Easement/restrictive covenant).]

In this Part [Part 4, SDLT] “residential property” means—

(a) a building that is used or suitable for use as a dwelling,

or is in the process of being constructed or adapted for such use, and

(b) [garden & grounds, see below] and

(c) an interest in or right over land that subsists for the benefit of a building within paragraph (a) or of land within paragraph (b);

147 Para 21(3) sch 4AA TCGA provides: ‘For the purposes of this Schedule, whether a building is a dwelling is determined in accordance with Schedule 1B.’

148 See 78.19 (‘Residential property interest’).

149 Para 8(3) sch 1B TCGA provides: In this Schedule ‘building’ includes a part of a building.

and, in each case, it is not an institutional building.	and “non-residential property” means any property that is not residential property.
	This is subject to the rule in subsection (7) in the case of a transaction involving six or more dwellings.

Whether a building is used/suitable for use as a dwelling is a question of fact, depending on the facts at the time of the charge; for an example, see *P N Bewley Ltd v HMRC*:<sup>150</sup>

No doubt a passing tramp or group of squatters could have lived in the bungalow as it was on the date of purchase. But taking into account the state of the building ... with radiators and pipework removed and with the presence of asbestos preventing any repairs or alterations that would not pose a risk to those carrying them out, we have no hesitation in saying that in this case the bungalow was not suitable for use as a dwelling.

### App. 2.19.1 *Garden or grounds*

#### **Para 5(2) sch 1B TCGA**

Land that at any time is, or is intended to be, occupied or enjoyed with a dwelling as a garden or grounds (including any building or structure) is taken to be part of the dwelling at that time.

#### **s.116(1) FA 2003**

In this Part [Part 4, SDLT] “residential property” means ...  
 (b) land that is or forms part of the garden or grounds of a building within paragraph (a) (including any building or structure on such land) ...

The wording of the definitions has drifted apart slightly. It is theoretically possible that garden or grounds could be included under the SDLT definition (because it is garden and grounds) and not TCGA definition (because it is not intended to be enjoyed as such). But that will rarely if ever happen. I wonder if that is deliberate?

What is important is the concept of garden and grounds, which is the same in both definitions.

The wording is derived from CGT private residence relief, and HMRC

---

<sup>150</sup> [2019] UKFTT 65 (TC) at [53].

PRR guidance<sup>151</sup> is relevant here. There is also SDLT guidance.

In the context of PRR, taxpayers will wish to argue that land *is* garden or grounds, in order to qualify for the relief, and HMRC will argue that it is not. In other contexts, such as IHT and SDLT, the position is reversed: taxpayers will wish to argue that land is *not* garden or grounds, and HMRC will argue that it is.

Whether land is garden/grounds is a question of fact. There have been a flurry of recent cases, in some of which estate agent particulars described the land as garden or grounds, and SDLT was paid at that basis; but a repayment claim was subsequently made on the basis that some part of the land which was not garden/grounds. (SDLT residential property rates are payable only if the land consists *entirely* of residential property. This “cliff-edge” rule would seem suitable for review but I do not pursue that here).

*Hyman v HMRC* makes some general comments:<sup>152</sup>

37. The SDLT legislation does not define the expression “garden or grounds” so I must give it its ordinary meaning. It is common ground, if I may use that word, that the hedged-in cultivated garden and the additional fenced and mown area are “garden or grounds”. “Grounds” must be something different from, and additional to, “gardens”.

38. The Oxford English Dictionary defines “grounds” as “An area of enclosed land surrounding a large house or other building”. The Cambridge Dictionary’s definition is “land that surrounds a building”.

But dictionary definitions of ordinary English words almost never help.

62. In my view “grounds” has, and is intended to have, a wide meaning. It is an ordinary word and its ordinary meaning is land attached to or surrounding a house which is occupied with the house and is available to the owners of the house for them to use. I use the expression “occupied with the house” to mean that the land is available to the owners to use as they wish. It does not imply a requirement for active use. “Grounds” is clearly a term which is more extensive than “garden” which connotes some degree of cultivation. It is not a necessary feature of grounds that they are used for ornamental or recreational purposes. Grounds need not be used for any particular purpose and can, as in this case, be allowed to grow wild. I do not consider it relevant that the

---

151 See 60.2.3 (Garden or grounds).

152 FTT’s comments cited and approved on appeal: [2021] UKUT 68 (TCC) at [14].  
FD\_A2\_Common\_Legal\_Expressions.wpd 03/11/21

grounds and gardens are separated from each other by hedges or fences. This may simply be ornamental, or may serve the purpose of delineating different areas of land as being for different uses. Nor is it fatal that other people have rights over the land. The fact that there is a right of way over grounds might impinge on the owners' enjoyment of the grounds and even impose burdensome obligations on them, but such rights do not make the grounds any the less the grounds of that person's residence. Land would not constitute grounds to the extent that it is used for a separate, eg commercial purpose. It would not then be occupied with the residence, but would be the premises on which a business is conducted.

In *Myles-Till v HMRC*<sup>153</sup>

What indicates that a piece of adjoining land has become part of the "grounds" of a dwelling building? Technically, fact that a dwelling building is sold together with adjoining land, as a single chargeable transaction for SDLT purposes, does not make that adjoining land, necessarily, part of the grounds of the dwelling building: s55 clearly envisages the possibility that the subject matter of a single chargeable transaction will include both residential and non-residential land. Common ownership is a necessary condition for the adjacent land to become part of the grounds of the dwelling building - but not, in my view, a sufficient one. To that extent I cannot accept HMRC's submission that it is sufficient that the adjacent land is available to the owners to use as they wish. One must, in addition, look at the use or function of the adjoining land to decide if its character answers to the statutory wording in s116(1) - in particular, is the land grounds "of" a building whose defining characteristic is its "use" as a dwelling? The emphasised words indicate that the use or function of adjoining land itself must support the use of the building concerned as a dwelling. For the commonly owned adjoining land to be "grounds", it must be, functionally, an appendage to the dwelling, rather than having a self-standing function... Quite how the commonly held adjoining land "supports" the dwelling building (in my formulation) will be a matter of fact and degree - ranging from pure ornamentation (simply improving the view from the house) to on-site leisure activities (a horse-riding paddock and stables for use by the house-dwellers).

In *Hyman*, a barn, meadow and bridleway were held to be grounds of the

---

153 [2020] UKFTT 127 (TC) at [44] -[45].  
FD\_A2\_Common\_Legal\_Expressions.wpd

dwelling building (or buildings on those grounds). In *Goodfellow*, paddocks and stables used for recreational activity were held to be grounds.<sup>154</sup> In *Myles-Till*, a paddock formed part of the grounds.

There is no requirement that the garden must be needed for reasonable enjoyment of the dwelling.<sup>155</sup>

#### App. 2.19.2 *Institutional building*

An institutional building does not count as a dwelling within the TCGA definition.

Para 5 sch 1B TCGA provides the definition. There are 10 categories of institutional building:

- (3) A building is an institutional building if—
- (a) it is used as residential accommodation for school pupils,
  - (b) it is used as residential accommodation for members of the armed forces,
  - (c) it is used as a home or other institution providing residential accommodation for children,
  - (d) it is used as a home or other institution providing residential accommodation with personal care for persons in need of personal care because of old age, disability, past or present dependence on alcohol or drugs or past or present mental disorder,
  - (e) it is used as a hospital or hospice,
  - (f) it is used as a prison or similar establishment,
  - (g) it is used as a hotel or inn or similar establishment,
  - (h) it is otherwise used, or suitable for use, as an institution that is the sole or main residence of its residents...

#### App. 2.19.3 *Student accommodation*

Para 5 sch 1B TCGA provides:

- (3) A building is an institutional building if ...
- (i) it falls within—
    - (i) paragraph 4 of Schedule 14 to the Housing Act

---

154 *Goodfellow v HMRC* [2019] UKFTT 750 (TC); and see Sheldon, “A stable proposition” Tax Adviser, April 2020. The position will need to be reviewed when this case is final.

155 This is self-evident, but if authority is needed, see *Hyman v HMRC* [2021] UKUT 68 (TCC).

- 2004 (buildings in England or Wales occupied by students and managed or controlled by educational establishment etc), or
- (ii) any provision having effect in Scotland or Northern Ireland that is designated by regulations made by the Treasury as provision corresponding to paragraph 4 of that Schedule, or
  - (j) it qualifies in accordance with the next sub-paragraph as student accommodation.
- (4) A building qualifies as student accommodation in accordance with this sub-paragraph at any time if the time falls in a tax year in which—
- (a) the accommodation provided by the building includes at least 15 bedrooms,
  - (b) the accommodation is purpose-built, or is converted, for occupation by students, and
  - (c) the accommodation is occupied by students on at least 165 days.
- (5) Accommodation is to be regarded as occupied by persons as students if they occupy it wholly or mainly for undertaking a course of education (otherwise than as school pupils).

#### App. 2.19.4 *Temporarily unsuitable*

Para 6(1) sch 1B TCGA provides:

A building is treated for the purposes of paragraph 5 as continuing to be suitable for use as a dwelling at any time when it has become temporarily unsuitable for use as a dwelling.

#### App. 2.19.5 *Accidental damage*

Para 6 sch 1B TCGA provides:

- (2) There is an exception to this rule if—
  - (a) the temporary unsuitability resulted from accidental damage to the building, and
  - (b) the damage resulted in the building becoming unsuitable for use as a dwelling for a period of at least 90 consecutive days ('the 90 day period').
- (3) This exception does not apply if the damage occurred in the course of work that—
  - (a) was being done for the purpose of altering the building, and
  - (b) itself involved, or could be expected to involve, making the building unsuitable for use as a dwelling for at least 30

consecutive days.

(4) If the exception applies, work done in the 90 day period to restore the building to suitability for use as a dwelling is not to count for the purposes of paragraph 5 as constructing or adapting the building for use as a dwelling.

(5) For the purposes of this paragraph—

- (a) references to accidental damage include damage otherwise caused by events beyond the control of the person disposing of the interest in land,
- (b) references to alteration of a building include its partial demolition, and
- (c) the 90 day period does not include the day of the disposal (or later days).

This level of detail seems absurd; but there it is.

#### App. 2.19.6 *Work on building*

Para 6(6) sch 1B TCGA provides:

For the purposes of this paragraph a building's unsuitability for use as a dwelling is not regarded as temporary if paragraph 7 applies (disposal of a building that has undergone works).

Para 7 sch 1B TCGA provides:

(1) If—

- (a) a person disposes of an interest in land on which a building has been suitable for use as a dwelling, and
- (b) as a result of qualifying works, the building has, at or before the time of completion<sup>156</sup> of the disposal, ceased to exist<sup>157</sup> or become unsuitable for use as a dwelling,

---

156 Para 8(2) sch 1B TCGA provides: 'For the purposes of this Schedule the completion of the disposal of an interest in land is regarded as occurring—

- (a) at the time of the disposal, or
- (b) if the disposal is under a contract which is completed by a conveyance, transfer or other instrument, at the time when the instrument takes effect.'

157 Para 8(1) Sch 1B TCGA provides: 'For the purposes of this Schedule a building is regarded as ceasing to exist from the time when either—

- (a) it has been demolished completely to ground level, or
- (b) it has been demolished to ground level except for a single facade (or a double facade if it is on a corner site) the retention of which is a condition or requirement of planning permission or development consent.'

the building is to be regarded for the purposes of paragraph 5 as unsuitable for use as a dwelling throughout the works period.

- (2) For the purposes of this paragraph works are ‘qualifying’ works if—
- (a) any planning permission<sup>158</sup> or development consent required for the works, or for any change of use with which they are associated, has been granted (whether before or after completion), and
  - (b) the works have been carried out in accordance with the permission or consent.
- (3) In this paragraph ‘the works period’ means—
- (a) the period when the works were in progress, and
  - (b) such period (if any) ending immediately before the start of the works throughout which the building was, for reasons connected with the works, not used as dwelling.
- (4) If at any time when qualifying works are in progress—
- (a) the building was undergoing any other work, or put to any other use, in relation to which planning permission or development consent<sup>159</sup> was required but has not (at any time) been granted, or
  - (b) anything else was being done in contravention of a condition or requirement attached to a planning permission or development consent relating to the building,

the works period does not include that time.

(5) If sub-paragraph (1) would have applied but for the fact that, at the completion of the disposal, the works are not qualifying works, the works are regarded as not affecting the building’s suitability for use as

---

158 Para 8(3) sch 1B TCGA provides: ‘In this Schedule ... ‘planning permission’—

- (a) in the case of land in England or Wales, has the meaning given by section 336(1) of the Town and Country Planning Act 1990,
- (b) in the case of land in Scotland, has the meaning given by section 227(1) of the Town and Country Planning (Scotland) Act 1997,
- (c) in the case of land in Northern Ireland, has the meaning given by Article 2(2) of the Planning (Northern Ireland) Order 1991, and
- (d) in the case of land outside the UK, means permission corresponding to any planning permission in relation to land anywhere in the UK.’

159 Para 8(3) sch 1B TCGA provides: ‘In this Schedule ... ‘development consent’ means—

- (a) in the case of land in the UK, development consent under the Planning Act 2008, and
- (b) in the case of land outside the UK, consent corresponding to development consent under that Act’.

a dwelling at any time before the disposal.

## App. 2.20 Trade

### App. 2.20.1 Introduction

A full discussion on what is a trade needs a book to itself. But I am not sure how easy that would be to write, or how satisfying to read. ‘Trade’ is a varied and vague concept. The case law began in the first volume of Tax Cases,<sup>160</sup> and has continued ever since. No tax issue has generated more litigation, except, perhaps, the income/capital distinction, to which it is related, where case law is ‘thick as autumn leaves’.<sup>161</sup> Almost any proposition asserted in one case may be contradicted, or appear to be contradicted, in other cases.

The law has never succeeded in establishing precise rules which can be applied to all situations to distinguish between trading stock and capital assets.<sup>162</sup>

This section contains general comments. But the topic is context-sensitive, so the question of whether specific types of activity constitute a trade is best discussed separately, in the context in which it may arise:<sup>163</sup>

Topic	See para
Chattel hire trading	20.17.1
Trading in land	21.2
Rent or trading income	13.3.2
Trading royalties	31.3.1
Financial trade	68.14
Gambling	68.14.4

160 *Erichsen v Last* (1881) 1 TC 351 and 4 TC 422.

161 *London & Thames Haven Oil Wharves Ltd v Attwooll* 43 TC 491 at p.513; the reference is to Paradise Lost.

162 *Waylee Investment v IRC* [1990] STC 780 at p.784g. Nothing has changed since 1881; in *Erichsen v Last* 4 TC 422: “I do not think there is any principle of law which lays down what carrying on of trade is. There are a multitude of incidents which together make the carrying on of trade, but I know of no one distinguishing incident which makes a practice a carrying on of trade, and another practice not a carrying on of trade. If I may use the expression, it is a compound fact made up of a variety of incidents.”

163 For trading by charities, see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations*, 2019/20 ed, para 8.2 (What is a trade).

Online version <https://www.taxationofcharities.co.uk>

See *Taxation of Charities and Nonprofit Organisations*<sup>164</sup> for discussion of:

- Trading by charities and clubs
- Mutual trading

*Hopscotch v HMRC* provides a case law reading list:<sup>165</sup>

23... So far as principles that have been found, they remain best expressed in the decision of the House of Lords in *Ransom v Higgs* and the decision of the High Court in *Marson v Morton*.

24. That was confirmed as much by the Court of Appeal in *Degorce v HMRC* where reference was made to the earlier decisions of the Court of Appeal in *Eclipse Film Partners (No 35) LLP v HMRC* and *Samarkand Film Partnership No 3 v HMRC* as providing “an authoritative and recent re-statement of the principles which should be applied in deciding whether activities undertaken by a taxpayer constitute a trade for tax purpose.”

#### App. 2.20.2 *Fact or law*

As usual, trade involves a mixture of both. In *Ransom v Higgs*:

Sometimes the question whether an activity is to be found to be a trade becomes a matter of degree, of frequency, of organisation, even of intention, and in such cases it is for the fact-finding body to decide on the evidence whether a line is passed. The present is not such a case: it involves the question as one of recognition whether the characteristics of trade are sufficiently present. I do not think that we need here to get enmeshed in the intricacies - I am tempted to say sophistries - of primary or secondary facts or inferences. We are clearly in the realm of principle and of law.

#### App. 2.20.3 *Concept of trade*

Modern law on this topic starts with *Ransom v Higgs*:<sup>166</sup>

... the legal concept of ‘trade’ ... may be called a concept of common law. Trade has for centuries been, and still is, part of the national way of life: everyone is supposed to know what ‘trade’ means: so Parliament, which

---

164 Use the online edition until the 2021/2 edition is published

<https://www.taxationofcharities.co.uk>

165 [2020] UKUT 294 (TCC).

166 50 TC 1 at p.88.

wrote it into the law of income tax in 1799, has wisely abstained from defining it and has left it to the Courts to say what it does or does not include. Trade is infinitely varied; so we often find applied to it the cliché that its categories are not closed. Of course they are not: but this does not mean that the concept of trade is without limits, so that any activity which yields an advantage, however indirect, can be brought within the net of tax. ...

That does not take us far, but it sets the scene.

#### App. 2.20.4 *One-off transactions*

Although there is no general statutory definition of trade, s.989 ITA/s.1119 CTA 2010 provide:

trade includes any venture in the nature of trade<sup>167</sup>

This is taken to mean that a one-off transaction may constitute a trade, if it is in the nature of trade; but that does not take one very far.

In *CIR v Livingston*:<sup>168</sup>

I think the test, which must be used to determine whether a venture such as we are now considering is, or is not, ‘in the nature of trade,’ is whether the operations involved in it are of the same kind, and carried on in the same way, as those which are characteristic of ordinary trading in the line of business in which the venture was made, If they are, I do not see why the venture should not be regarded as ‘in the nature of trade,’ merely because it was a single venture which took only three months to complete.

#### App. 2.20.5 *Novel trade*

In *Ransom v Higgs*:

I attach no importance to the fact that, if there was trade, there is a difficulty in knowing what to call it. Christening normally follows some time after birth, and if Mr. Higgs’s activities were found to be trading activities, a description would soon be found.

#### App. 2.20.6 *Trade needs customers*

---

167 Section 288(1) TCGA incorporates this definition by reference: ‘Trade’ has the same meaning as in the Income Tax Acts.

168 11 TC 538 at p.542.

In *Ransom v Higgs*:

Trade involves, normally, the exchange of goods or of services for reward - not of all services, since some qualify as a profession or employment or vocation, but there must be something which the trade offers to provide by way of business. Trade, moreover, presupposes a customer (to this too there may be exceptions, but such is the norm), or, as it may be expressed, trade must be bilateral - you must trade with someone...

There is some vagueness here, not only because of the possibility of exceptions, but because the concept of “customers” is imprecise.<sup>169</sup>

App. 2.20.7 *Trade: Commerciality*

In *British Legion, Peterhead Branch, Remembrance and Welcome Home Fund v IRC*:<sup>170</sup>

... a person cannot be said to be engaged in carrying on a trade or a concern in the nature of trade within the meaning of the Income Tax Acts unless, in a reasonable sense, he is conducting business on commercial principles.

*Wannell v Rothwell* concluded that it had to be possible for a non-commercial activity to be a trade, because (what is now) s.66 ITA would otherwise be redundant.<sup>171</sup> But an argument from redundancy carries little weight,<sup>172</sup> the relevant cases were not cited, and the point did not arise for decision. So the issue remains open to argue, and the authorities still support the view that a non-commercial activity is not a trade.

However, it seems to me that the question whether a trade has to be commercial is not well framed unless one clarifies what is meant by the somewhat vague concept of commercial. Suppose for instance:

- (1) For charitable or eccentric reasons a person charges low fees when they could charge high fees.
- (2) The activity is profitable but not as profitable as it could be.

No doubt that can constitute trading. Is the activity commercial? It is not wholly commercial, but one might regard commerciality as a matter of

169 See App.1.4 (“Customers” of HMRC).

170 35 TC 508 at p.514.

171 68 TC 719 at p.732; see 5.1.1 (Trade/commercial/profit compared).

172 See App.2.1.2 (Argument from redundancy).

degree.<sup>173</sup> If one regards the activity as non-commercial, then that is an example of a non-commercial trade.

HMRC pay due respect to the decision:

**BIM85705 uncommercial trades – not on a commercial basis** [Jan 2019]

... following the High Court decision in *Wannell v Rothwell* [1996] 68 TC 719 we now accept that in very unusual cases the activities may constitute a trade even though they are uncommercial...

It is at least clear that an activity which cannot objectively make a profit, and not intended subjectively to make a profit, is not a trade or business.

### App. 2.20.8 *The badges of trade*

The charming term ‘badges of trade’ comes from the Royal Commission on the Taxation of Profits and Income,<sup>174</sup> which identified six badges (ie, indicia) of trade. Nowadays one would call it a multifactorial test.

*Marson v Morton* 59 TC 381 is the leading case and identifies 9 badges, in the context of trading in land;<sup>175</sup> no doubt one can devise more. The traditional badges are focussed on activities involving the sale of assets, rather than activities involving the provision of services, which are equally if not more important.

## App. 2.21 Reasonable-to-assume

### App. 2.21.1 *Reasonable-to-assume wording*

As far as I know, the forms of words discussed here first appeared in the 2005<sup>176</sup> rewrite of the ToA motive defence<sup>177</sup>:

**Old condition A (pre-2005)      New condition A (post-2005)**

---

173 Some ambiguity is recognised in the quote set out above, which refers to commercial principles ‘in a reasonable sense’.

174 Final Report (1955) (Cmd. 9474), para. 116.

175 See 21.2 (What is trading in land); and see BIM20200 onwards.

176 The provisions were published in draft in 2005, and took effect then, but were enacted in FA 2006.

177 See 49.2 (Motive defence condition A); 49.3 (Motive defence condition B).

the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected. *it would not be reasonable to draw the conclusion, from all the circumstances of the case, that the purpose of avoiding liability to taxation was the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.*<sup>178</sup>

This wording, or equivalent, migrated from there to:

- a selection of TAARs
- the GAAR
- In DTAs, the PPT (which is just a TAAR with a more accurate name)<sup>179</sup>

In these provisions the issue is not whether an arrangement has a tax avoidance/advantage purpose, but is said to be whether it is *reasonable to assume* such a purpose.<sup>180</sup>

It is found in other provisions, primarily but not exclusively anti-avoidance, where the issue is not whether specified circumstances exist, but is said to be whether it is reasonable to assume that they do. For instance:

Topic	Text (in short)	Date	See para
Disguised remuneration	Reasonable to suppose arrangement a means of providing remuneration <sup>181</sup>	2011	-
Tainted donations	Reasonable to assume donation & arrangement not entered into independently <sup>182</sup>	2011	-

178 The wording is repeated in Motive Defence condition B:

**Old condition B (pre-2005)**

**New condition B (post-2005)**

<p>the transfer and any associated operations... (b) were not designed for the purpose of avoiding liability to taxation.</p>	<p><i>it would not be reasonable to draw the conclusion, from all the circumstances of the case, that any one or more of those transactions was more than incidentally designed for the purpose of avoiding liability to taxation.</i></p>
---	--

179 See 104.8 (Principal purpose test).

180 For the GAAR, see s.207 FA 2013. For a list of TAARs with reasonable-to-assume wording in TAARs, see 2.10.3 (Types of TAAR).

181 Section 554A ITEPA.

182 Section 809ZJ ITA; see Kessler, Wong & Birkbeck, Taxation of Charities and Nonprofit Organisations (12th ed, 2019/20), para 7.8 (Donation-dependent arrangement).

Mixed partnerships	Reasonable to suppose: - A's deferred profit included in B's profit share - B's profit share attributable to A's power to enjoy - A's profit share lower than in absence of A's power to enjoy Amount as is reasonable to suppose attributable	2014	83.5
Hybrid entities	Reasonable to suppose a hybrid payee mismatch <sup>183</sup>		<del>80.16</del>
Onward gifts	Reasonable to expect onward gift to UK resident	2018	57.31.2
Profit fragmentation	Reasonable to conclude value transferred relates to something done by an individual	2019	50.8.1
UK land of non-resident <sup>184</sup>	Reasonable to conclude UK land used for trading	2019	54.8
	Reasonable to conclude trade will continue		54.8
Loss reliefs <sup>185</sup>	Profits reasonably expected/trade carried on with reasonable expectation of profit		App.5.4

There are variations of wording. We have reasonable to assume/ suppose/ conclude/draw the conclusion; but the meaning must be the same.

The ToA provision added *from all the circumstances of the case*; but that cannot add anything to the meaning. Presumably the OPC agreed, as this phrase was not used subsequently, until it resurfaced in the PPT.<sup>186</sup>

The drafter of DOTAS Description 9 (Financial products) tried harder:

it would be reasonable *to expect an informed observer (having studied the arrangements and having regard to all relevant circumstances) to conclude...*<sup>187</sup>

But again, the additional words add nothing to the meaning. Let us hope, in the interests of brevity, that this verbiage does not become standard.

I refer to these forms as **“reasonable-to-assume wording”**.

### App. 2.21.2 *Effect of wording*

---

Online version <https://www.taxationofcharities.co.uk>

183 Reasonable to suppose/ expect is used in further places in the hybrid mismatch code not listed here.

184 This is the first time I am aware that the expression "reasonable to conclude" has ventured from its usual (anti-avoidance) context; let us hope it will not happen often.

185 Loss relief is perhaps slightly from other items in this list, in that it is considering a future prediction (future profit) not a present state of affairs (such as present intention); but it is not necessary to pursue that.

186 The PPT reverted (I would say, regressed) to the old wording; we have: “reasonable to conclude, *having regard to all relevant facts and circumstances...*”. Perhaps this was not drafted by the OPC.

187 Reg 19 Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regulations 2006 (inserted 2016); again, probably not drafted by the OPC.

What (if anything) does this wording mean? Is there a difference between the propositions *X is the case* and *it is reasonable to assume that X is the case?*; and if so, what is it?

Perhaps we should look first to see what HMRC said they intended to achieve when the wording was first used:

59. The new section 741A ICTA [New Conditions A and B] aims to ensure that all relevant factors are taken into account in deciding whether exemption is due. That is the normal way of applying any purpose test, but in relation to section 741 [Old Conditions A and B] the view is sometimes expressed by tax practitioners that the present test should be interpreted more narrowly. They contend that

[1] it is only necessary to look at the subjective intentions of the individual, and

[2] that no account need be taken of any other circumstances, even if they included for example the fact that a particular transaction might have been structured in such a way that it directly resulted in a significant tax reduction that was not on the face of it intended by Parliament.

There are two distinct contentions here:

- (1) It is only necessary to ascertain the subjective intentions of the individual. That is correct.
- (2) In ascertaining that attention, no account need be taken of any other circumstances, such as that the transaction resulted in the avoidance of tax. That is not correct. It cannot even be taken seriously.<sup>188</sup>

60. HMRC has consistently taken the view that such a narrow interpretation of section 741 is not a correct reading of the law. If such an interpretation is accepted, the purpose of the transfer of assets abroad legislation to prevent individuals avoiding income tax ... could not be properly achieved. The new test makes it the condition for exemption that the individual must broadly show that it would not be reasonable to conclude from all the circumstances of the case that any of the transactions had a tax avoidance purpose. The wording of the test is intended to put it beyond doubt that exemption will not be due *solely* on the basis of an assertion by individuals that tax avoidance was not their subjective intention. Evidence of individuals' subjective intention will be one factor to take into account. However, all other relevant

---

188 See 49.9.1 (Identify purpose: stage 1).

circumstances of the particular case must also be considered, including the actual objective outcome of the transactions.<sup>189</sup>

I think this is making the point made at 49.9.1 (Identify purpose: stage 1). All relevant circumstances must be taken into account in order to identify an individual's purpose. A particularly significant fact is whether the transaction resulted in a significant tax reduction, that is, the effect of the transactions.

ToA draft guidance makes my point:

**INTM602960 Avoidance purpose exemption: Purposes**

...Over the years there has been long debate about exactly how a test of purpose should be construed, in particular whether the test is an objective or a subjective one. ...

HMRC take the view that the proper way to apply a purpose test is to consider all of the facts in an objective manner, but that is not the same as saying the test is 'objective'. It is clearly wrong to assert that it is only necessary to look at the purpose individuals ascribe to their actions in deciding whether exemption is due; but it is equally wrong to say that only the outcome is relevant. It is essential to consider both. Thus, purpose or intention is essentially a subjective concept, but in practice the objective facts must be examined to draw an inference: see Pennycuik J in *Lloyd's Bank v Marcan*:

The word 'intent' denotes a state of mind. A man's intention is a question of fact. Actual intent may unquestionably be proved by direct evidence or may be inferred from surrounding circumstances. Intent may also be imputed on the basis that a man must be presumed to intend the natural consequences of his own act.<sup>190</sup>

This approach is borne out by the construction of the new exemption test, referring as it does to all the circumstances of the case in considering purposes including the intentions and purposes of any person who designs, effects, or provides advice in relation to the relevant transactions or any of them.

Although the words within the current provisions may be new, 'purposes' is not new. And, as was said when the newly worded purpose

---

189 EN Draft Clauses (2005). The point is made more briefly in EN FB 2006 para 66.

190 [1973] 2 All ER 359 at p.367-8 citing *Freeman v Pope* (1870) 5 Ch App 538. I set out here the precise words of the quoted text (the drafter of the 2009 guidance changed "man" to "person").

test was introduced, its aim was to ‘clarify’ the law. In other words the new language aimed to better reflect or make clearer the existing understanding and approach to the test.

At the time that the reasonable-to-assume wording was devised, in 1995, HMRC were arguing that “purpose of a transaction”, in the motive defence, was an objective concept, meaning the effect of the transaction. (Subsequently, HMRC wisely abandoned this argument, but that came later.<sup>191</sup>) I think what happened here is that parliamentary counsel misunderstood what this objective/subjective argument was actually about, and used the statutory wording to defeat a rather different, and completely ridiculous, argument. It is of course possible that some taxpayer did try to raise just the argument to which the EN refers. If so, the correct response would have been to laugh, not to legislate.

I originally wondered whether the drafter’s aim here is something different: to replace the subjective purpose test (which applies to the Old Conditions) with an objective results test. However this is inconsistent with what the EN actually said. If it were the intention to replace the subjective purpose test with an objective results test, then “evidence of individuals’ subjective intention” should cease to be “one factor to take into account”. It will be irrelevant. However, the EN is unclear. It is wrong to construe a muddled explanatory note in order to understand a statutory provision. We do not wish to move to the position, sometimes said to apply in the USA, that “if the legislative history is unclear, you read the words of the statute”.

Turning, as we must, to the legislation itself, we find that the ToA motive defence still depends on the purpose of the transactions. It is reasonably clear that:

- (1) this means the purpose of those who carried out the transactions, and
- (2) purpose means subjective purpose.

What the reasonable-to-assume wording stresses (one might say, charitably, for the avoidance of doubt) is that all the circumstances of the case must be taken into account in order to ascertain the subjective purpose. It allows for the possibility of rejecting the transferor’s claimed purpose in cases of deception, (including, perhaps, self-deception in exceptional cases).

---

<sup>191</sup> See 49.10.2 (A subjective test).

The same view is taken in CTM comments on comparable wording in the winding-up TAAR<sup>192</sup>:

**CTM36340: company winding up TAAR: condition D** [Sep 2018]

The purpose test is subjective but the purpose may be inferred from objective characteristics having regard to all the circumstances surrounding the winding-up to which the test is being applied, much as Lord Brightman was able to draw an inference in a different context. In *Mallalieu v Drummond* (1983) 57 TC 330 he was able to distinguish between the motive the barrister asserted of maintaining a wardrobe of a certain type and standard, and the object or purpose of the purchase of it.

It is significant that *Mallalieu v Drummond* managed to reach its conclusion in the absence of any reasonable-to-assume wording.

The Partnerships Manual attempts to explain reasonable-to-assume wording in the context of the mixed partnerships code:<sup>193</sup>

**PM218000 - Condition X** [Jul 2019]

Condition X applies where it is reasonable to suppose that amounts representing the individual member's deferred profit are included in the non-individual member's profit share.

- [1] Reasonable to suppose means that you take a realistic view of the facts and use a balanced common sense approach.
- [2] Reasonable to suppose does not mean that it has to be certain.
- [3] Reasonable to suppose means you should ignore an improbable or extreme outcome.

While points [1] to [3] are no doubt correct, would anyone say that the position would be different in the absence of the reasonable-to-assume wording?

In the context of the DTA principal purpose test, OECD Commentary on art 29 provides:

179. A person cannot avoid the application of this paragraph by merely asserting that the arrangement or transaction was not undertaken or arranged to obtain the benefits of the Convention. All of the evidence must be weighed to determine whether it is reasonable to conclude that an arrangement or transaction was undertaken or arranged for such

---

192 See 29.8 (Winding-up TAAR).

193 See 83.5 (Condition X: Deferred profit).

purpose. The determination requires reasonableness, suggesting that the possibility of different interpretations of the events must be objectively considered.

This is self-evident. It echos HMRC guidance on the ToA motive defence.

### App. 2.21.3 *Reasonable-to-assume: Critique*

Reasonable-to-assume wording is discussed in HMRC Unallowable Purpose Tests Draft Guidance:

An alternative test to a “main purpose” test would be to assess whether “it is reasonable to assume that the main, or one of the main purposes is unallowable”. In this way, purpose can be assessed objectively and the test can potentially penetrate purported subjective purposes which do not stand up to objective scrutiny. The potential impact of such drafting is currently being examined. In the future, such an approach may be recommended if the outcome of internal consideration and external comment is positive.<sup>194</sup>

The response to the consultation was not positive, and the response document provided:

There was widespread opposition to any use of a ‘reasonable to believe’ test in respect of any purpose threshold.

The proposed framework will therefore recommend that policy owners do not use a ‘reasonable to believe’ test.<sup>195</sup>

But this recommendation has been forgotten, or rejected, in many subsequent anti-avoidance provisions.

The conclusion of the discussion is that reasonable-to-assume wording is otiose; and an uncharitable commentator would call it verbiage. It may reflect an awareness that the provision in point is imponderable, or disputable; but adding “reasonable to assume” does not help.

Perhaps it does not matter, as tax statutes often contain material which is redundant.<sup>196</sup> But it is good to know what we are talking about.

### App. 2.21.4 *“It is shown that”*

---

<sup>194</sup> p.18.

<sup>195</sup> HMRC Discussion Response Document “Simplifying Unallowable Purpose Tests (2009), p.7.

<sup>196</sup> See App.2.1.2 (Argument from redundancy).

Occasionally statutes provide rules which apply where *it is shown that X* is the case (not just that *X is the case*). Examples include:

Provision	Topic	See para
3A(1) TCGA	s.3 motive defence	60.17
48(4) IHTA	FOTRA securities exempt	71.11.2
3(3) IHTA	Omissions/transfers of value	70.5
103 FA 1986	Debts for IHT	76.11.6, 76.11.10
s.10 IHTA	Arm's length transaction	70.12

As the onus of proof is already on the taxpayer, the words are clearly otiose.<sup>197</sup> And as the drafter uses this form, albeit rarely and perhaps sometimes for historical reasons, it is easier to conclude that reasonable-to-assume wording is likewise redundant.

A similar wording (from the ToA motive defence) is if a person *satisfies HMRC that ...*<sup>198</sup>

## App. 2.22 Highest part of income

Section 1012 ITA provides:

- (1) This section makes provision about the relationship between rules requiring particular income to be treated as the highest part of a person's total income.
- (2) It has effect for the purposes of the Income Tax Acts except sections 535 to 537 of ITTOIA 2005 (gains from contracts for life insurance etc: top slicing relief).
- (3) If more than one of the provisions listed in subsection (4) applies in relation to a person, a provision mentioned earlier in the list has priority over a provision mentioned later in the list.
- (4) The provisions are—<sup>199</sup>

Section	Topic	See para
s.465A ITTOIA	Chargeable events	-
s.685A(5A) ITTOIA	Settlor-interested trusts	44.10.2
s.404A ITEPA	Termination of employment	-
s.16 ITA	Savings/Dividend Income	40.4.3

Section 1012(5) ITA provides:

197 See 5.34.5 (Residence: Burden of proof).

198 See 38.45.1 ("Satisfies an officer").

199 For the sake of clarity, I set this out in table format with my own topic descriptions.

The provisions listed in subsection (4) have priority over<sup>200</sup>

<b>Section</b>	<b>Topic</b>	<b>See para</b>
s.619A(2) ITTOIA	Settlor-interested trusts	96.2.2
s.768(6)(7) ITA <sup>201</sup>	Pre-2016 transactions in land	21.5
786(6)(7) ITA	Sale of Occupation Income	-

any other provisions of the Income Tax Acts requiring income of any description to be treated as the highest part of a person’s total income.

Section 1012(6) ITA provides:

The effect of one provision having priority over another is that the second provision has effect subject to the first.

See too 60.21.1 (Amount of distribution tax: s.3 TCGA distribution relief).

200 For the sake of clarity, I set this out in table format with my own topic descriptions.

201 This provision was deleted when rewriting the TiL provisions, now in Part 9A ITA; the need to delete the reference here was overlooked.

## APPENDIX THREE

# FAMILY TERMINOLOGY

App. 3.1		App. 3.4.4	Living together: unmarried couple
App. 3.3.2	Pre-2000 foreign civil partnership	App. 3.4.10	Reasons against living together
App. 3.4.2	Rules excluding separated spouse		

### App. 3.1 Family terms: Introduction

This chapter considers the meaning of terminology relating to the family (spouse, civil partner, etc).

These terms are used frequently in tax and non-tax legislation, and their meaning is a matter of general (non-tax) law; though of course meaning is always subject to context.

### App. 3.2 “Spouse”

The IHT Manual provides:

#### **IHTM11032. Definition of spouse and civil partner** [Jan 2020]

The IHT legislation does not define ‘spouse’ or ‘civil partner’ so the definitions come from general law...

Spouses include

- people who are legally married but separated
- parties to a valid polygamous marriage. The marriage confers the IHTA84/S18 exemption on all transfers to all the spouses of the transferor or deceased who qualify under IHTA84/S18. Where the IHTA84/S18 (2) limit applies because of foreign domicile of those spouses (IHTM11033), the total exemption (including any similar lifetime exemptions) may not exceed the IHTA84/S18 (2) limit of £55,000 when the date of transfer was before 6 April 2013, and the applicable nil-rate band when the date of transfer was on or after this

date.

The following are not spouses

- people who are living together but not lawfully married, however long the relationship may have lasted (in England, Wales and Northern Ireland)
- In Scotland the one form of irregular marriage that has been recognised by Scots law is that by cohabitation with habit and repute. This arises where a man and woman cohabit together as husband and wife and behave towards each other as such for a considerable length of time, so it is generally believed by the society and neighbourhood in which they live, and among their friends and relatives that they are married. They are then presumed to be married, although it is impossible to state precisely the place and a time when they exchanged the consent which is essential for marriage. Marriage by cohabitation with habit and repute was abolished by The Family Law (Scotland) Act 2006. It will remain an issue for the Courts for some time to come, however, since claims can still be admitted if based on a period of cohabitation that occurred before the commencement of the Act. If it is claimed that this common law style of marriage entitles the parties to the exemption under IHTA84/S18 (1) in either a death or lifetime situation you should refer the file to Technical.
- parties to a bigamous marriage
- people who were formerly lawfully married but divorced before the date of death/transfer

Likewise the CG Manual provides:

**CG22070 Transfer Of Assets Between Husband And Wife: Definitions** [Jul 2019]

... A polygamous marriage may be recognised as valid in UK law if it was valid in the country in which the ceremony occurred and, broadly, it was contracted by persons domiciled in that country. In these circumstances the spouses will be connected with each other under s.286(2). A transfer between spouses living together will be within s.58 TCGA and so will be at no gain/no loss.

The courts have decided that discrimination between married and unmarried couples is human-rights compliant, though only just.<sup>1</sup>

---

<sup>1</sup> *Holland v IRC* [2003] STC (SCD) 43; *Burden v UK* [2007] STC 252; *Smith v Lancashire Teaching Hospitals NHS Trust* [2016] EWHC 2208 (QB).

### App. 3.2.1 *Same-sex marriage*

The Marriage (Same Sex Couples) Act 2013 (“**M(SSC)A**”) provides separate rules for:

- (1) existing legislation<sup>2</sup> and
- (2) new legislation<sup>3</sup>

I refer to “**pre- and post- 2013 legislation**”.

For pre-2013 legislation, para 1 sch 3 M(SSC)A provides:

- (1) In existing England and Wales legislation—
  - (a) a reference to marriage is to be read as including a reference to marriage of a same sex couple;
  - (b) a reference to a married couple is to be read as including a reference to a married same sex couple; and
  - (c) a reference to a person who is married is to be read as including a reference to a person who is married to a person of the same sex.
- (2) Where sub-paragraph (1) requires a reference to be read in a particular way, any related reference (such as a reference to a marriage that has ended, or a reference to a person whose marriage has ended) is to be read accordingly.
- (3) For the purposes of sub-paragraphs (1) and (2) it does not matter how a reference is expressed.

For post-2013 legislation, para 5(1) sch 3 M(SSC)A provides:

- 
- 2 Section 11(7) M(SSC)A provides a definition: “In schedules 3 and 4 “existing England and Wales legislation” means—
    - (a) in the case of England and Wales legislation that is primary legislation, legislation passed before the end of the Session in which this Act is passed (excluding this Act) [17 July 2013] or
    - (b) in the case of England and Wales legislation that is subordinate legislation, legislation made on or before the day on which this Act is passed (excluding legislation made under this Act)” [17 July 2013] .
  - 3 Section 11(7) M(SSC)A provides a definition: “In schedules 3 and 4 ... “new England and Wales legislation” means—
    - (a) in the case of England and Wales legislation that is primary legislation, legislation passed after the end of the Session in which this Act is passed, or
    - (b) in the case of England and Wales legislation that is subordinate legislation, legislation made after the day on which this Act is passed.”

- (1) This paragraph applies to provision made by—
- (a) this Act and any subordinate legislation made under it, or
  - (b) new England and Wales legislation,
- including any such provision which amends existing England and Wales legislation.

Three sets of definitions follow. The first concerns the ubiquitous terms husband/wife/widow/widower:

- (2) The following expressions have the meanings given—
- (a) “husband” includes a man who is married to another man;
  - (b) “wife” includes a woman who is married to another woman;
  - (c) “widower” includes a man whose marriage to another man ended with the other man’s death;
  - (d) “widow” includes a woman whose marriage to another woman ended with the other woman’s death;
- and related expressions are to be construed accordingly.

The other definitions concern expressions found only after the M(SSC)A:

- (3) A reference to marriage of same sex couples is a reference to—
- (a) marriage between two men, and
  - (b) marriage between two women.
- (4) A reference to a marriage of a same sex couple is a reference to—
- (a) a marriage between two men, or
  - (b) a marriage between two women.

I do not know why a distinction is drawn between pre- and post-2013 legislation. The Act’s explanatory notes discuss the provisions without answering this question.<sup>4</sup> For instance, the definition of “relevant person”

---

4 103. Part 1 sets out details of how particular terms used in existing legislation in England and Wales are to be read once marriage of same couples becomes possible. The particular terms mentioned in paragraph 1 are references to a marriage, a married couple or married person in existing legislation in England and Wales; these are to be read as also referring to a marriage of a same sex couple, married same sex couples or to a person married to someone of the same sex.

104. Under paragraph 1(2), such references are also to be read across to, for example, cases where a marriage has ended. A reference to a person as a widow would be read as including a reference to a woman whose marriage to another woman ended with the other woman’s death, for example.

105. Paragraph 1(3) ensures that existing England and Wales legislation will be

interpreted in accordance with paragraphs 1(1) and (2) no matter what language it uses in making reference to any of the relevant concepts.

106. Paragraph 2 particularly deals with references to couples living together as if married; these are to be read as also referring to a person who is living with someone of the same sex as if they are married.

107. Paragraph 3 deals with legislation where there is existing provision which deals differently with a man and a woman living together as if married, and a same sex couple living together as if civil partners. The effect of this paragraph is to preserve the current effect for same sex couples despite the introduction of marriage of same sex couples. In other words, the current distinction is maintained by which an unmarried opposite sex couple are treated as if married, while an unmarried same sex couple not in a civil partnership are treated as if in a civil partnership.

108. Paragraph 4 ensures that the terms specified in Part 1 of Schedule 3 are not the only terms whose meaning will change once marriage of same sex couples becomes possible.

#### *Examples*

- Section 105(1) of the Children Act 1989, as amended, defines the meaning of “child of the family” for the purposes of that Act:

*““child of the family”, in relation to parties to a marriage, or to two people who are civil partners of each other, means –*

*(a) a child of both of them, and*

*(b) any other child ... who has been treated by both of them as a child of their family;”.*

The effect of paragraph 1(1)(a) of Schedule 3 means that the reference to “parties to a marriage” is to be interpreted now as including a reference to a marriage of a same sex couple.

- Section 144(4) of the Adoption and Children Act 2002 defines the meaning of “a couple” for the purposes of that Act:

*“In this Act, a couple means –*

*(a) a married couple, or*

*(aa) two people who are civil partners of each other, or*

*(b) two people (whether of different sexes or the same sex) living as partners in an enduring family relationship.”.*

Paragraph 1(1)(b) allows for the reference here to a married couple now to include a married same sex couple.

- Section 2(1) of the Offices, Shops and Railway Premises Act 1963 as amended states that: “This Act shall not apply to any premises to which it would, apart from this subsection, apply, if none of the persons employed to work in the premises is other than the husband, wife, civil partner .....of the person by whom they are so employed.” The terms “husband” and “wife” here refer to a person who is married for the purposes of paragraph 1(1)(c) of Schedule 3. This means that “husband” here will be read as including a man or a woman in a marriage of a same sex couple, as well as a man married to a woman. In a similar way, “wife” will be read as including a

in the ITA remittance basis includes “the individual’s husband or wife.”<sup>5</sup> In new legislation that wording would include parties to a same-sex marriage. By normal rules of construction, that should not apply to pre-2013 legislation! That would be a strange result. It is suggested that the courts should apply a commonsense approach, that (where the context requires, as it normally will) references in pre-2013 legislation to husbands and wives should include same sex spouses, even though that essentially requires one to ignore the words of schedule 3. This is consistent with s.11 M(SSC)A:

- (1) In the law of England and Wales, marriage has the same effect in relation to same sex couples as it has in relation to opposite sex couples.
- (2) The law of England and Wales (including all England and Wales legislation whenever passed or made) has effect in accordance with subsection (1).

In Northern Ireland, a same-sex marriage has the status of a civil partnership,<sup>6</sup> which for tax (as generally) has the same consequences as marriage. In Scotland the position is governed by the Marriage and Civil Partnership (Scotland) Act 2014.

---

woman married to another woman or a man married to a man. The result is that this section is to be read as including both male and female spouses in marriages of same sex couples.

Part 2 – New England and Wales legislation

109. Part 2 governs how new legislation made after the passing of this Act is to be interpreted. It sets out the meanings of specific words relating to marriage (such as “husband” and “wife”). It reflects the main principle of the Act, which is to put marriage of same sex couples on an equal footing with marriage of opposite sex couples. This will ensure that gender-specific terms such as “husband” keep their gender-specific effect.

110. It should be noted that in Part 7 of Schedule 4, paragraph 27 provides a power for the Secretary of State to modify or disapply the provisions of Schedule 3 in specified circumstances.

*Example*

- The term “husband” will in future legislation include a man who is married to another man (but not a woman married to another woman); and “wife” will include a woman who is married to another woman (but not a man married to another man) unless specific alternative provision is made.

<sup>5</sup> See 17.3 (Relevant person: Family).

<sup>6</sup> Schedule 2 M(SSC)A 2013.

### App. 3.2.2 "Spouse" in special contexts

For the definition of "spouse" in special contexts, see:

44.6.3 ("Spouse" in settlor-interested trust code)

113.13.2 ("Spouse" in USA IHT DTA)

### App. 3.2.3 "Spouse" in general speech

UK legislation distinguishes between a civil partner and a spouse in its terminology and, strictly, the word "spouse" does not (in the absence of special context) include a civil partner. However for (almost<sup>7</sup>) all legal purposes the two are in the same position. In loose language they are elided because it is tiresome to constantly refer to spouse/civil partner.

So in this book "spouse" is generally used to mean either a spouse or a civil partner. The Law Commission has done the same.<sup>8</sup>

In the 2018/19 edition of this work I said:

I expect this is standard usage outside the formal context of statutes and legal documentation such as trusts and wills.

Popular usage might change following the extension of civil partnerships to mixed sex couples in 2019. Those who chose civil partnership rather than marriage presumably do so specifically because they do not like the institution or vocabulary of marriage/husband/wife/spouse, and its perceived connotations. Conversely, some will champion marriage over civil partnership.<sup>9</sup> There is nothing in the legislation which determines the social meaning of civil partnerships, except, perhaps, the prohibition of religious ceremony. But I expect "spouse" will continue to be used to include civil partners, at least for as long as there is no convenient word

---

7 Under foreign law, a civil partner may not be regarded as married, even though a same sex marriage may be recognised: see 113.13.2 ("Spouse" in US/UK IHT DTA).

8 Law Commission, *Intestacy & Family Provision Claims on Death* (2011), para 1.38: "The legal treatment of husbands, wives and civil partners is identical in the law of intestacy and family provision claims, and for brevity we use the term "spouse" in this Report to refer to all three..."

9 For instance, "Civil Partnerships – for same sex and opposite sex couples. A pastoral statement from the House of Bishops of the Church of England" (2019) <https://www.churchofengland.org/sites/default/files/2020-01/Civil%20Partnerships%20-%20Pastoral%20Guidance%202019%20%282%29.pdf>

which refers to both.

### App. 3.3 “Civil partner”

Schedule 1 Interpretation Act 1978 provides:

“Civil partnership” means a civil partnership which exists under or by virtue of the Civil Partnership Act 2004 (and any reference to a civil partner is to be read accordingly).

This takes us to s.1(1) Civil Partnership Act 2004 which provides:

A civil partnership is a relationship between two people<sup>10</sup> (“civil partners”)—

- (a) which is formed when they register as civil partners of each other—
  - (i) in England or Wales (under Part 2),
  - (ii) in Scotland (under Part 3),
  - (iii) in Northern Ireland (under Part 4), or
  - (iv) outside the UK under an Order in Council made under Chapter 1 of Part 5 (registration at British consulates etc. or by armed forces personnel), or
- (b) which they are treated under Chapter 2 of Part 5 as having formed (at the time determined under that Chapter) by virtue of having registered an overseas relationship. ...

Thus there are two types of civil partnership:

- (1) those made under UK law, and
- (2) overseas relationships.

#### App. 3.3.1 *Foreign civil partnership*

Section 212(1) CPA 2004 provides:

For the purposes of this Act an overseas relationship is a relationship which—

- (a) is either
  - [i] a specified relationship or

---

<sup>10</sup> The present position in Scotland still defines civil partnership as “a relationship between two people of the same sex”. The Civil Partnership (Scotland) Bill (introduced in the Scottish Parliament on 30 September 2019) will bring the Scottish definition in line with England.

- [ii] a relationship which meets the general conditions, and
- (b) is registered (whether before or after the passing of this Act) with a responsible authority in a country or territory outside the UK ...

Thus there are two types of overseas relationships:

- (1) specified ones, and
- (2) those not specified which meet the general conditions.

Section 213 and schedule 20 CPA 2004 defines “specified relationships”. It has been amended in 2019 to include same sex relationships.

Section 214 CPA 2004 explains the “general conditions”:

The general conditions are that, under the relevant law—

- (a) the relationship may not be entered into if either of the parties is already a party to a relationship of that kind or lawfully married,
- (b) the relationship is of indeterminate duration, and
- (c) the effect of entering into it is that the parties are—
  - (i) treated as a couple either generally or for specified purposes, or
  - (ii) treated as married.

Section 214 CPA 2004 in Scotland is slightly different:

The general conditions are that, under the relevant law—

- (a) the relationship may not be entered into if either of the parties is already a party to a relationship of that kind or lawfully married,
- (b) the relationship is of indeterminate duration, and
- (ba) **the relationship is not one of marriage,**
- (c) the effect of entering into it is that the parties are—
  - (i) treated as a couple either generally or for specified purposes, **but are not treated as married.**

### App. 3.3.2 *Pre-2000 foreign civil partnership*

Section 215 CPA 2004 provides:

#### **215 Overseas relationships treated as civil partnerships: the general rule**

- (1) Two people are to be treated as having formed a civil partnership as a result of having registered an overseas relationship if, under the

relevant law, they—

- (a) had capacity to enter into the relationship, and
- (b) met all requirements necessary to ensure the formal validity of the relationship.

(2) Subject to subsection (3) and (5B),<sup>11</sup> the time when they are to be treated as having formed the civil partnership is the time when the overseas relationship is registered (under the relevant law) as having been entered into.

(3) If the overseas relationship is registered (under the relevant law) as having been entered into before this section comes into force, the time when they are to be treated as having formed a civil partnership is the time when this section comes into force.

Persons with existing overseas relationships became civil partners in England law without doing anything more.

The IHT Manual provides:

**IHTM11032 definition of spouse and civil partner** [Jan 2020]

Civil partners are same-sex couples who have entered into a contractual partnership formally recognised by law under the Civil Partnership Act 2004, which came into effect on 5 December 2005. In addition to civil partnerships formed in the UK, the Act recognises some overseas relationships, in particular the specified relationships listed in its own Schedule 20. It should be remembered that under Section 216 of the Civil Partnership Act 2004 it is essential that both the partners were of the same sex when the partnership was formed. A relationship such as the French *pacte civil de solidarité* is open to partners of opposite sexes as well as partners of the same sex – in practice it has come to be seen by opposite-sex couples as an optional prelude to marriage – but the exemption available for transfers between civil partners is available only where the overseas civil partnership is formed by a same-sex couple. The same applies to the exemption for gifts on the registration of a civil partnership (IHTM14191).

The term ‘civil partners’ will not apply to those individuals whose civil partnership had been dissolved by a court order before the date of death/transfer.

---

11 Subsection (5B) regarding the commencement date is numbered as (5F) in Northern Ireland; in Scotland, the Civil Partnership (Scotland) Bill (introduced 2019) will insert a subsection (3A) pertaining mainly to subordinate legislation to be made by Scottish Ministers.

### App. 3.3.3 *The future*

Civil partnership formations declined by 85% since 2013 as a result of the introduction of same-sex marriage in 2014,<sup>12</sup> so the practical importance of the institution is currently limited. The decline was sharp in Scotland where there were only 64 civil partnerships in 2015 and only 83 in 2019.<sup>13</sup> However, there were 994 same-sex civil partnerships formed in England and Wales in 2019. This marked an increase of 4.0% from 956 in 2018 and an increase of 9.5% from 908 in 2017. The extension of civil partnership to opposite sex couples in 2019 also proved to be a success as there were 167 opposite sex civil partnerships on the first day of the extension.<sup>14</sup> With same sex marriage has now been legalised in Northern Ireland it will be interesting to note how this affects civil partnerships in the future.

## App. 3.4 **Living together as husband/wife**

### App. 3.4.1 *Cohabitee treated as spouse*

As noted above, the term “spouse” does not include those living together but not married. Contemporary anti-avoidance provisions referring to spouses generally extend the provision to apply to cohabitees, ie a cohabitee is treated in the same way as a spouse.

For instance, s.809M(3) ITA provides:

For that purpose—

- (a) a man and woman living together as husband and wife are treated as if they were husband and wife;
- (b) two people of the same sex<sup>15</sup> living together as if they were civil

---

12 <https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/marriagecohabitationandcivilpartnerships/bulletins/civilpartnershipsinenglandandwales/2015>

13 <https://www.nrscotland.gov.uk/statistics-and-data/statistics/statistics-by-theme/vital-events/marriages-and-civil-partnerships/marriages-and-civil-partnership-time-series-data>

14 <https://www.ons.gov.uk/peoplepopulationandcommunity/birthsdeathsandmarriages/marriagecohabitationandcivilpartnerships/bulletins/civilpartnershipsinenglandandwales/2019>

15 The words “of the same sex” are not appropriate following the introduction of mixed sex civil partnerships, but no doubt we shall muddle through.

partners of each other are treated as if they were civil partners of each other.

This provision treats cohabittees as married persons and so relevant persons. In 2008 this was a relatively new development in tax; but it has become standard, reflecting contemporary social practice and attitudes to cohabitation.

At first sight the reference to civil partners seems otiose after 2013, now that we have same-sex marriages; but it is appropriate for cohabittees in jurisdictions where civil partnership is recognised but same-sex marriage is not (which included Northern Ireland in the period 2015 - 2020).

#### App. 3.4.2 *Rules excluding separated spouse*

Conversely, statute occasionally provides rules which only apply to spouses who are living together. Examples are:

- (1) CGT spouse exemption
- (2) Only one residence of spouses living together can qualify for private residence relief

The definition of relevant relationship in the SRT illustrates both rules: it excludes spouses who are separated, but includes cohabittees. The expression “living together”<sup>16</sup> is therefore important for tax, both for married and unmarried couples.

#### App. 3.4.3 *Living together: Married couple*

For married couples, s.1011 ITA provides:

Individuals who are married to, or are civil partners of, each other are treated for the purposes of the Income Tax Acts as living together unless—

- (a) they are separated under an order of a court of competent jurisdiction,
- (b) they are separated by deed of separation, or
- (c) they are in fact separated in circumstances in which the separation is likely to be permanent.

Section 288(3) TCGA incorporates this definition for CGT.

---

<sup>16</sup> See App 3.4.3 (Living together: married couple).

Section 1116 CTA 2010 repeats the definition verbatim for the purpose of Part 23 CTA 2010 (company distributions). Perhaps the expression is not found elsewhere in the CT legislation. Elsewhere the definition is incorporated by reference.

For the position where one spouse is non-resident, see 89.12.2 (Non-resident spouse).

#### App. 3.4.4 *Living together: unmarried couple*

The Law Commission consultation paper “Intestacy and Family Provision” (2009) is a convenient starting point:

2.70 The requirement that the applicant should have been living “as” the spouse or civil partner of the deceased has been the subject of analysis by the courts. In *Re Watson*, it was said that the test is:

whether, in the opinion of a reasonable person with normal perceptions, it could be said that the two people in question were living together as husband and wife; but, when considering that question, one should not ignore the multifarious nature of marital relationships.<sup>17</sup>

2.71 Accordingly, it was not determinative in that case that Mr Watson and Miss Griffiths had not continued a sexual relationship during the period when they were living together, nor that they had informally agreed to share outgoings, nor that Miss Griffiths had rejected Mr Watson’s marriage proposal. On the whole of the evidence the judge reached the conclusion that Miss Griffiths had been living “as the wife” of Mr Watson.

2.72 The couple must have been living in the same household, which means that it does not matter if the parties each have a separate home, provided that they have formed one joint household. It has been said that this seems:

To have elements of permanence, to involve a consideration of the frequency and intimacy of contact, to contain an element of mutual support, to require some consideration of the degree of voluntary restraint upon personal freedom which each party undertakes, and to involve an element of community of resources.<sup>18</sup>

The Claimant Compliance Manual provides:

**CCM15040 Couples who are Unmarried and Not Civil Partners** [Oct 2017]

... The legislation does not say what conditions must exist before we will conclude that a couple are LTAHAW [living together as husband and wife].<sup>19</sup> We have therefore adopted the approach used by the DWP. Using the same approach for same-sex couples means they are not treated any more or less favourably.

Since 1977 the Department for Work and Pensions (DWP - formerly the Benefits Agency) has followed a standard approach to the question of whether a man and woman are living together based on a list of criteria to be considered both individually and as a whole. Working Families' Tax Credit (WFTC) adopted the same criteria and this has continued for WTC and CTC. This approach ensures unmarried couples are not treated any more or less favourably than married couples.

Living together as husband and wife (LTAHAW) has its normal meaning in every day language, but the Courts and administrative practice have developed a number of criteria to help apply that meaning to every day situations. They are:-

- living in the same household - CCM15070-CCM15075
- stability of relationship - CCM15080
- financial support - CCM15090
- dependent children - CCM15100
- public acknowledgement - CCM15110

Remember that these are only indicators to help you form a sustainable view of whether a couple are living together for the purposes of the tax credit claim. They are not intended as a crude checklist and you should not apply a blanket "four out of five ticked" type test. The weight and worth of each indicator will vary from relationship to relationship and you should arrive at your conclusions on the balance of evidence, based on the facts (see CCM15060). However, you need to be aware of the changing nature of relationships - see CCM15045.

**15045 Modern-Day Relationships** [August 2016]

Since the LTAHAW criteria was devised in the 1970's, the UK has undergone major social and economic changes. These have had an impact on the nature of

1(3)(b) of the Fatal Accidents Act 1976, where the Court of Appeal held at [59] that it was correct to distinguish between "wanting and intending to live in the same household, planning to do so, and actually doing so".

<sup>19</sup> The latest figures published by the Office of National Statistics (in January 2015) estimate that the number of married couple families in the UK increased by 266,000 between 2004 and 2014, to 12.5 million and that there were nearly 3 million opposite sex cohabiting couple families and 84,000 same sex cohabiting couple families in 2014. See [http://www.ons.gov.uk/ons/dcp171778\\_393133.pdf](http://www.ons.gov.uk/ons/dcp171778_393133.pdf)

personal relationships.

In the 1970's a typical couple might not have lived together before marriage and, after marrying, they might have pooled the whole of their income with the man as the main breadwinner and the woman possibly working part-time and responsible for childcare and running the household.

By 2004, 70% of first domestic partnerships involved unmarried couples and it is now common for each party in a couple to work full-time, keep their own incomes and bank accounts and perhaps only pay money into a joint account for items of joint responsibility. Often because of demands on time both parties share childcare and domestic tasks.

It may therefore be more difficult to identify the criteria shown at CCM15040 but you should still explore all of these items.

**15060 Balance of Evidence** [August 2016]

It is not possible to lay down hard and fast rules about the weight and worth of the various criteria in establishing that a couple are living together. You will need to decide every case on its merits and on the balance of evidence. Sometimes the conclusion will be obvious, and at other times it will be a very fine judgement. Although you must consider each of the five criteria listed at CCM15040 you might not be able to gather evidence for each of them. For example the customer might say they have no idea what others think of their relationship.

If you are having difficulties in making up your mind about what the evidence means, you may find it helpful to list the evidence on both sides of the argument. This should help you identify where the balance of evidence lies – though you should not base your decision on a crude numerical assessment, as some elements of the evidence may be far more critical than others.

...

### App. 3.4.5 *Living in the household*

The Claimant Compliance Manual provides:

**CCM15070 Living in the Same Household** [Oct 2017]

The customer may admit they live in the same household as the suspected partner but that does not automatically mean they are Living Together as Husband and Wife (LTAHAW), Living Together as Civil Partners (LTACP) or Living Together as a Same Sex Couple (LTAASSC).

There may be any number of reasons why a man and woman share accommodation. They include:

- a couple with disabilities or ill health may care for and support each other
- one of them may require care/support to live a normal life
- the customer may provide accommodation for a friend, or relative or tenant
- the customer may have been provided with accommodation by a friend, relative or landlord in that person's own home.
- a formerly married or unmarried couple may still live in the same house until they reach a financial agreement. During periods when property prices or rents

are high, the property market is sluggish, or negative equity is common, former couples may be compelled by economic necessity to share the same premises for some time after the relationship has ended- see CCM15395

The relevant factors to consider when determining whether a couple are living in the same household may be:-

- how/why the couple came together
- is rent received or paid? If so the income will (unless it is exempt under the rent a room scheme) be treated as income in the hands of the recipient.
- what kind of accommodation they share
- if there is no formal rent agreement how are costs shared? How would exceptional expenditure be met? For example, if major unexpected repairs had to be carried out or home improvements made.
- any absences from the household - why and how often - see CCM15073
- any other reasons for them living in the same household.

Even if you establish a couple are living in the same house this does not necessarily mean they are LTAHAW, LTACP or LTAASSC. Before you can amend the award you must therefore consider the other criteria detailed at CCM15080-CCM15110.

### **15073 Absences From The Home** [Oct 2017]

Absences from the home, whether occasional or regular, do not necessarily mean that a couple is not LTAHAW, LTACP or LTAASSC. For instance, the absence could be due to:-

- work (eg. oil rig worker or long distance lorry driver)
- hospital in-patient
- holiday
- visit to relatives
- higher education
- custody of less than 52 weeks
- armed forces

This list is not exhaustive, but gives some suggestions to the types of absence. The common feature of all of these reasons for absence is their temporary nature. There is no specific period of time after which an absence ceases to be temporary and you will need to draw conclusions based on the particular facts of each case. Factors to be considered include:

- the length of the absence
- how much longer it is expected to last
- to what extent the couple have maintained contact
- their future intentions

One situation you might encounter is where the partner works away for a few days at a time and either lives with friends or in hotels/bed and breakfast accommodation. They only return to the customer's home for a couple of days at a time, the suggestion is this is purely to see the children and they stay at the customer's home as they have nowhere else to stay in the area. As well as exploring the other criteria described in CCM15080-CCM15110 you will need to establish

- the reason why they have this arrangement
- how long has the arrangement lasted
- how much longer is it likely to last?
- what would happen if the partner lost their job?

**15075 Undisclosed Partner has No Other Address** [Oct 2017]

A customer may accept that the suspected partner uses their address for mailing purposes. This could be for:

- tax and benefit purposes
- financial purposes (bank account, credit card, loan)
- for motor vehicle purposes (insurance, vehicle registration)

The customer might suggest this is because the suspected partner has no fixed abode and simply drifts around a series of friends or because their mail is not secure at their own home.

You are entitled to ask for evidence of the suspected partner's other accommodation address and often an appeal tribunal will ask for this sort of information. However, you cannot demand that they provide such information nor can you say that if they do not provide evidence of an alternative address you will treat them as LTAHAW or LTACP and terminate their award.

The absence of such evidence is not conclusive proof that the customer is living with the suspected partner. Where the customer cannot provide such evidence you must still look at all of the other criteria and decide their various strengths and weaknesses. In addition, you should consider whether it is reasonable for the suspected partner to be using the customer's address.

### App. 3.4.6 *Stability of relationship*

The Claimant Compliance Manual provides:

**CCM15080.Stability of Relationship** [Oct 2017]

The length of time a couple have been together does not necessarily indicate how stable the relationship is. At one end of the scale you may come across couples who have known each other only a few weeks or days, but who have moved in together with the firm intention of staying together.<sup>20</sup> At the other end of the scale may be couples who have divorced after say 25 years of marriage and who are still both occupying the formal marital home until they can afford to live apart. Some couples may also have a history of repeated temporary splits and reconciliations.

Relevant factors may be:-

- on what basis they split household chores and responsibilities, such as cooking,

---

20 The RDR Manual makes the same point:

**RDRM33030. Relevant person - definition** [Jan 2019]

... There is a no minimum period for cohabitation; it is a question of fact as to whether two individuals are living together as spouses or civil partners.

- cleaning and paying bills
- whether they are both involved in caring for any children who live in the household
- whether they tend to spend their leisure time together or separately
- whether they normally take joint holidays
- whether they plan any future activities or responsibilities jointly or separately
- whether they intend to get engaged or married
- whether the relationship has a volatile history ie. the couple is known to have had several splits and reconciliations.

An established pattern of domestic or financial activity will usually indicate an established relationship.

**CCM15090 Financial Support** [Oct 2017]

How a couple organise their finances will vary from couple to couple. Relevant factors may be:

- the existence of joint accounts or investments. If the customer claims that the joint account is being maintained because one of them is credit blacklisted, does the pattern of transactions suggest that the other person is withdrawing his/her wages for their own use? Or are there indications that the wages are available to meet general household expenditure?
- the extent to which money and other financial resources are pooled.
- who pays the household expenses?
- whether the suspected partner makes regular payments to the customer, and if so, what they are for.
- whether the suspected partner would provide financial support if the customer's income ceased.
- whether the customer would support the suspected partner if their income ceased.
- whether a set amount of maintenance to be paid by the absent parent following a decision by the CSA or a binding agreement between the parties.

At any meeting you should attempt to establish the customer's incomings and outgoings so that you can see whether they could exist on their own income. If you have already seen bank statements and household bills you should be ready to challenge suspect items. For example deposits into the bank account, direct debits, patterns of withdrawal or any expenses for which you would have expected to see bills but none have been produced.

### App. 3.4.7 *Dependent children*

The Claimant Compliance Manual provides:

**CCM15100 Dependent Children** [Oct 2017]

Joint responsibility for a child or children (who may belong to either or both of the couple) may be an indication that the couple is LTAHAW or LTACP, but it is not conclusive proof. Relevant factors may be:

- parentage of the child or children.
- whether, and how, the couple exercises joint responsibility, for example:

- who visits the school or delivers/collects to and from the school
- who would the school contact in an emergency
- who arranges and takes the children to and from medical and dental appointments
- who exercises control of or offers guidance to the children
- who the Child Benefit Office has as the alternative payee
- who provides financial support/pocket money/pays for treats
- who buys the clothes and or toys.

An intention to adopt by the non-birth partner could be a particularly telling indication of the couple's long term view of the family unit. You should not, because of its sensitivity, seek out the information; but if it is spontaneously offered you should give it proper weight in arriving at your conclusions. Be wary of drawing conclusions about the current relationship based on say the fact that the children continue to be known by the surname of the ex-husband or ex-partner as this is common practice and is not evidence of a continuing relationship between the parents. Nor does the presence of photographs of the child's father or mother indicate the customer is living with that person.

#### App. 3.4.8 *Public acknowledgement*

The Claimant Compliance Manual provides:

##### **CCM15110 Public Acknowledgement** [Oct 2017]

An important consideration is how the outside world (including family, friends, neighbours, social workers, employers, schools, childcare providers, etc.), perceive the couple. Relevant factors may be:

- Whether both members use the same surname
- Whether schools/child care providers/employers/others regard them as a couple
- Whether they engage in social activities together
- Whether they are joint members of clubs/leisure centres/societies
- Whether they plan and organise their lives jointly.

CCM5500 lists the third parties you can legally approach for information during the course of your examination. You cannot obtain information from family members, friends, neighbours, social workers or schools, unless they also fall into one of the categories listed at CCM5500.

For example – A family member may also be an employer, or a neighbour may also provide registered child care. But it is perfectly acceptable for you to ask the customer what their family/neighbours etc. would say if they were asked whether they regarded him/her as being a member of a couple.

#### App. 3.4.9 *Sexual relationship*

The Claimant Compliance Manual provides:

##### **CCM15120 Sexual Relationship** [Oct 2017]

DWP used to consider the couple's sexual relationship as one of the criteria for

determining LTAHAW but this is no longer the case. The couple's sexual relationship is of little help in deciding whether they are living together as husband and wife or living together as civil partners. There may be no sexual relations in a marriage or civil partnership and sexual relationships of a casual nature, where neither partner has any lasting commitment to the other, are a common feature of contemporary life.

You must not ask any questions about a couple's sexual relationship. If the customer introduces the subject, you should take note of any information volunteered but should bear in mind (and explain to the customer) that it is unlikely to have any relevance to the question of whether they are living together as husband and wife.

Appeal tribunals sometimes ask customers about their sexual relationships, however, it remains our policy that you must not ask such questions. If a tribunal asks you why you have not established the position you should say that our internal policy, in common with that in DWP, is not to ask about this side of the relationship.

In one particular appeal case the Social Security Commissioner said that where there has never been a sexual relationship between the parties, strong alternative grounds are needed to reach the conclusion that the relationship is akin to husband and wife. However, absence of a sexual relationship at anytime where there has been one in the past is not itself indicative that the couple are not LTAHAW.

Where the customer's sole objection to your conclusion is that they have no sexual relationship with the suspected partner or they appeal against a decision on these grounds you should seek further advice via your TALLO from Technical Advice Line.

### App. 3.4.10 *Reasons against living together*

The Claimant Compliance Manual provides:

#### **CCM15150 Reasons for Failure To Report A Partner** [Oct 2017]

Customers may offer a range of reasons or excuses for their failure to report the existence of a partner. These may include:

- S/he does not stay here all of the time - see CCM15073.
- S/he lives at another address but uses my address as a post box - see CCM15075.
- I thought s/he could stay 3 nights a week without it affecting my entitlement.
- S/he does not give me any money, or payments are not regular - see CCM15090.
- S/he is not the mother/father of my child (ren).
- S/he is a lodger - see CCM15070.
- S/he is just a friend.
- It is hard being a single parent.
- The Government does not pay people like me enough.
- The rules on income are not fair.

- We do not have a sexual relationship - see CCM15120.

The 3 nights rule is a popular misconception. No such legal loophole exists. If a suspected partner spends 3 nights with the customers on a regular basis, s/he may be a member of an established couple. Also, the children's parentage is not, in isolation, reliable evidence.

You will need to explain to the customers the criteria which we use to determine whether they are living together as husband and wife, living together as civil partners or living together as a same sex couple, see CCM15040. You will then need to establish the facts by considering all the evidence from all legally available sources, including the customer. Note: The Marriage (same sex couples) Act 2013 extended marriage to same sex couples. See TCTM06100 for the definition of a couple.

#### App. 3.4.11 *Privacy*

The Claimant Compliance Manual provides:

##### **CCM15160 Respecting Customer's Privacy** [Oct 2017]

In all your contacts with customers you must always be aware of Human Rights issues, and of the need to respect the customer's privacy. It is particularly important that you adopt this approach in any discussions which may touch on their private life.

You should avoid any impression that you are examining the customer's home or household for signs of any such relationship. You must not ask about the customer's sleeping arrangements in an attempt to find out whether s/he shares a bedroom with another adult.

Customers may however volunteer information of this kind when, for example, confirming the number of children who live there; describing how friends or relatives sometimes stay to help out with childcare or explaining that their ex-partners stays in the spare room whenever they come to visit the children. If the customer simply says their partner stays overnight when they come to visit or care for the children you must not ask where they sleep.

You should not normally ask customers about the number of bedrooms in their house but if the customer has suggested that an adult who lives in the house is a paying lodger, it is reasonable to expect the lodger would have his/her room rather than sleeping on a sofa or floor.

In the circumstances it will be appropriate to ask how many bedrooms there are and what room(s) the lodger occupies, and to test the answer in the light of other information/evidence. The number of bedrooms and the ages/sexes of the other occupants of the house will be relevant. For example the customer may live in a 3 bedroom house with 2 children, a boy of 12 and a girl of 16, and it will be reasonable to ask what arrangements have been made so that the lodger can occupy his/her own room.

It is important that any questions you need to ask should be directed at establishing the room the lodger occupies and their relationship with the customer and not at establishing who the customer sleeps with.

**15170 (This text has been withheld because of exemptions in the Freedom of Information Act 2000) [Oct 2017]**

**15180 (This text has been withheld because of exemptions in the Freedom of Information Act 2000) [Oct 2017]**

**15190 Customer Has Been Involved in Different Relationships [Oct 2017]**

Where the customer has been involved in relationships with different partners at different times during the year, you should treat the ending of one and beginning of another as a CoC on each occasion. However, where the customer has split up and reconciled with the same partner, you should normally ignore the splits and treat the customer and partner as a couple throughout the period.

If the customer objects to this approach you should consider whether in spite of the temporary break in the relationship, the customer and partner would still be considered a couple in accordance with other relevant criteria eg. nature of any financial support. If you cannot establish that the couple were effectively living together throughout the period, you should apply the CoC provisions to each break in the relationship.

#### App. 3.4.12 *Date relationship begins*

The Claimant Compliance Manual provides:

**CCM15195 Date on which Customers Became A Couple [Oct 2017]**

The question of whether the customer was in reality a member of a couple is not just relevant to the date at which the claim commenced. Becoming or ceasing to be a member of a couple is a notifiable change of circumstances so it is also relevant at all other times during the year.

You will sometimes have evidence that places the suspected partner at the customer's address at one or more dates during the year for example a series of letters signed by the partner to his/her employer or tax office. However, you may not be able to point to anything which strongly indicates their presence at the beginning of the year or claim period.

When challenged about the existence of a partner, customers may be reluctant to admit to their failure to declare the partner on the claim, claiming instead that s/he only moved in some time later.

You will need to use your judgement in these cases. As a general rule if you are confident the evidence you have is reasonable proof that the customer was a member of a couple from the date the claim commenced, you should put that date forward to the customer. If you feel there is some doubt around that date, or you would have difficulty in substantiating it, but you are convinced that the customer was a member of a couple at some point during the year, you should propose to the customer an appropriate date from which they should be treated as a member of a couple. You should be prepared to negotiate the date with the customer bearing in mind the important factor of getting the claim on the right basis for the future. However, you must remember that your decision may have to be defended before an appeal tribunal so you must have evidence to support the proposal.

## App. 3.4.13 Sources of information

The Claimant Compliance Manual provides:

**CCM15200 Information held by HMRC** [Oct 2017]

A case identified for enquiry on the grounds of a suspected undisclosed partner will usually have been selected because information held by us indicates another adult living at the customer's address. The CCRO will have checked HMRC and other databases and other available information sources, before passing the case to you. You will therefore already have most of the evidence you will want to discuss with the customer before you open the case.

The information is likely to include some or all of the following sources.

<b>Type</b>	<b>Identifies</b>
Voter's List	Suspected partner listed?
HMRC address database	What address does the HMRC hold for suspected partner?
Telephone Directory	What address/phone number is listed for suspected partner?
Yellow Pages/Other SA	Ditto for self employed suspected partner.
TRP Data Mart	Ditto for self employed suspected partner.
COP/CODA	Any joint bank accounts etc, listed?
Child Benefit	Any additional allowances?
Previous Claims	Partner shown on original claim/as alternative payee?
Equifax/Experian	Was partner shown on earlier WFTC/DPTC/WTC/CTC claims?
DWP	Is suspected partner shown at customer's address?
CSA	Intelligence suggesting a live-in partner?
Housing or Council Tax Benefit	Maintenance paid? Reference to partner in interview notes.
Letters on File	Details of occupants. CT reduction for single adult being received?
	Any indication (particularly recent) of suspected partner living at customer's address?

**CCM15210. Information from Customer** [Oct 2017]

Despite the information that will have been given to you by the CCRO there will also be information you can only obtain from the customer or with the customer's agreement, for example:

- Bank statements - are they joint? If not, do they contain evidence of joint incomings/outgoings/spending?
- Utilities and other bills - who are these sent to?
- Council tax bills - a single occupier is entitled to a reduction, which will be identified on the statement.
- Mortgage claims/statement - whose name appears on any documentation?
- Rent book - whose name appears in the book as landlord and tenant?
- Hire purchase agreements - whose name is on the documents?

- Services and rentals eg. TV, satellite, telephone agreements - whose name are they in?
- Marriage certificate - does it show a recent marriage to the suspected partner? (This content has been withheld because of exemptions in the Freedom of Information Act 2000)

#### App. 3.4.14 *Length of relationship*

The Claimant Compliance Manual provides:

**CCM15220 Short Term Relationships** [Oct 2017]

In some cases the customer might admit they had a partner during the period under review but says they are no longer a couple. You will need to review the facts to establish whether they are in fact still a couple.

Where the customer admits to a short term relationship which you accept has now ended you will need to decide whether the relationship amounted to them living together as husband and wife (LTAHAW), living together as civil partners (LTACP) or living together as a same sex couple (LTAASSC). You will need to explore the criteria at CCM15040.

There are no hard and fast rules as to the length of time a couple are together before we consider it to be LTAHAW, LTACP or LTAASSC. If they are LTAHAW, LTACP or LTAASSC then we will treat them as a couple for tax credit purposes even if they are only together a short time. However, in reality a short term relationship (less than 3 months) is unlikely to meet the criteria at CCM15040. They may satisfy one of the criteria but not the others. In such cases you will have to use your judgement and you should consult your manager if necessary. Remember your decision may have to be defended before an appeal tribunal so you must have evidence to support the proposal.<sup>21</sup>

#### App. 3.4.15 *Multiple cohabittees*

The Law Commission consider the salacious possibility that an individual may have more than one cohabitee:

4.108 ... where the deceased was a party to more than one cohabiting relationship at the date of death, it may be more difficult to determine whether the deceased “was sufficiently involved in either household for one or both to amount to cohabitation at all”.<sup>22</sup> However, cases may arise

---

21 Earlier versions of this guidance are (1) The Independent Taxation Manual (paragraphs now withdrawn) and (2) the ACG–WFTC/DPTC Applicant Compliance Guide para 9010 (not set out here as it adds nothing to the Claimant Compliance Manual). The text is in the 9<sup>th</sup> ed of this work.

22 Footnote original: Cohabitation: the Financial Consequences of Relationship Breakdown (2007) Law Com No 307, para 3.68.

in which it can be shown that both partners are cohabitants within the definition adopted, for example where there are religious marriages which do not qualify as legal marriages.<sup>23</sup>

#### App. 3.4.16 *Prohibited relationships*

The Claimant Compliance Manual provides:

**CCM15025 Prohibited Relationships** [Oct 2017]

The law prohibits certain relationships by relatives. For example a woman cannot marry or form a civil partnership with her grandfather or her uncle and a man cannot marry or form a civil partnership with his daughter or sister. A full list of prohibited relationships is contained at CCM15030.

Where you establish that a customer is living as a couple with a relative who appears on the list of prohibited relationships we do not consider this to be an LTAHAW or LTACP situation. The reason for this is that the couple cannot marry or become civil partners in law so we cannot say they are living together as husband and wife as they could never be husband and wife or living together as civil partners as they could never be civil partners. The customer will therefore be treated as a single customer.

**CCM15030 List of Prohibited Relationships - Marriage** [Oct 2017]

Throughout the UK and Guernsey, Jersey and the Isle of Man, the law prohibits certain blood relatives, step relatives and relatives-in-law from getting married.

A man cannot marry his:

- mother
- adopted mother/ former adoptive mother
- daughter
- adoptive daughter/ former adoptive daughter
- grandmother
- granddaughter
- sister
- aunt
- niece

A woman cannot marry her:

- father
- adopted father/ former adoptive father
- son
- adoptive son/ former adoptive son

---

23 Footnote original: *Churchill v Roach* [2002] EWHC 3230. See also *Kotke v Saffarini* [2005] EWCA Civ 221, [2005] 2 FLR 517, a case on similar wording in section 1(3)(b) of the Fatal Accidents Act 1976, where the Court of Appeal held at [59] that it was correct to distinguish between “wanting and intending to live in the same household, planning to do so, and actually doing so”.

- grandfather
- grandson
- brother
- uncle
- nephew

Additionally, people cannot marry if:

- either of them is aged less than 16, or
- in a 'step' relationship, the younger person had, before reaching age 18:
  - lived in the same household as the older person, and/or
  - been treated as a child of the older person's family, or
- in an 'in-law' relationship:
  - either person involved is aged less than 21, and/or
  - any person originally involved in creating the 'in-law' relationship' is still alive, for example we do not consider LTAHAW if a man lives in the same household as his daughter-in-law and the man's son or wife is still alive.

If you are unsure whether the customer is in a prohibited relationship you should seek further advice via your TALLO from Technical Advice Line .

**CCM15032. List of Prohibited Relationships - Civil Partners** [Oct 2017]

The law in the UK prohibits certain blood relatives, step relatives and relatives by civil partnership from forming a civil partnership. The legislation in Scotland is slightly different from the legislation that applies in England, Wales and Northern Ireland.

In England, Wales and Northern Ireland someone cannot form a civil partnership with their:

- parent
- adopted parent/ former adoptive parent
- child
- adoptive child/ former adoptive child
- grandparent
- grandchild
- brother, sister, half-brother or half-sister
- parent's brother, sister, half-brother or half-sister
- niece or nephew

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of grandparent
- Former civil partner of parent
- Former spouse of grandparent
- Former spouse of parent
- Grandchild of former civil partner
- Grandchild of former spouse

If:

- either of them is aged less than 21, or

- the younger person had, before reaching age 18:
- lived in the same household as the older person, and/or
- been treated as a child of the older person's family, or

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of parent
- Former spouse of parent

If:

- either person involved is aged less than 21, and/or
- any person originally involved in creating the relationship is still alive, for example we do not consider LTACP if a woman lives in the same household as her daughter-in-law and the woman's son or husband is still alive.

In Scotland someone cannot form a civil partnership with their:

- parent
- adopted parent/ former adoptive parent
- child
- adoptive child/ former adoptive child
- grandparent
- grandchild
- brother, sister, half-brother or half-sister
- parent's brother, sister, half-brother or half-sister
- niece or nephew

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of grandparent
- Former civil partner of parent
- Former spouse of grandparent
- Former spouse of parent
- Grandchild of former civil partner
- Grandchild of former spouse

#### App. 3.4.17 *Same-sex cohabiters*

The M(SSC)A again provides separate rules for existing and for new legislation.

Para 2 sch 3 M(SSC)A provides:

- (1) In existing England and Wales legislation—
  - (a) a reference to persons who are not married but are living together as a married couple is to be read as including a reference to a same sex couple who are not married but are

- living together as a married couple;
- (b) a reference to a person who is living with another person as if they were married is to be read as including a reference to a person who is living with another person of the same sex as if they were married.
- (2) Where sub-paragraph (1) requires a reference to be read in a particular way, any related reference (such as a reference to persons formerly living together as a married couple) is to be read accordingly.
- (3) For the purposes of sub-paragraphs (1) and (2) it does not matter how a reference is expressed.
- 3 (1) This paragraph applies to existing England and Wales legislation which deals differently with—
- (a) a man and a woman living together as if married, and
- (b) two men, or two women, living together as if civil partners.
- (2) If two men, or two women, are living together as if married, that legislation applies to them in the way that it would apply to them if they were living together as civil partners.

For new legislation, para 5 M(SSC)A provides:

- (1) This paragraph applies to provision made by—
- (a) this Act and any subordinate legislation made under it, or
- (b) new England and Wales legislation, including any such provision which amends existing England and Wales legislation.
- ...
- (5) A reference to a same sex couple who are not married but are living together as a married couple is a reference to—
- (a) two men who are not married but are living together as a married couple, or
- (b) two women who are not married but are living together as a married couple.

Fortunately it will rarely if ever be necessary to distinguish between living together as civil partners or as a married couple.

### App. 3.5 “Child”

In the absence of a specific definition, the position is correctly explained in RDR3:

**C15** A child can be either an individual’s own natural child or a child they have adopted. It does not include step-children, unless the

individual has adopted them.

In modern legislation the term child is often defined to include step-children.<sup>24</sup>

### App. 3.6 Brother/Sister

Similarly, brother/sister does not include step-siblings. Thus the CT Manual comments on the rule that brothers and sisters are “associates”<sup>25</sup>:

**CTM60150 Tests: Associates** [Nov 2019]

Other relatives ... should be regarded as associated only if there is a blood relationship, for example, half-brothers are associated but stepbrothers are not...

---

24 For the meaning of “step-children” see Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 5.22 (Stepchildren).

25 See 99.6.2 (Associates: Relatives).

## APPENDIX FOUR

# CONSIDERATION, ARM'S LENGTH, FULL VALUE

App. 4.1

### App. 4.1 Introduction

This appendix considers a cluster of related expressions and concepts:

- consideration
- market value/full consideration
- arm's length
- intention to confer gratuitous benefit
- fair bargain

There may be differences in nuance, but in practice these cover the same ground. So I consider them together here, together with the related topic of market value adjustment clauses.

The concept of bounty is related to the above, but I discuss that elsewhere.<sup>1</sup>

### App. 4.2 Consideration

“Consideration” is a common term in tax and other statutes. The word is not usually defined. Its meaning is discussed in the cases.

#### App. 4.2.1 *Reciprocity required*

In *C&E v Apple and Pear Development Council*:<sup>2</sup>

[1] The word “consideration” is a term of art in English law, and I think

---

1 See 85A.6 (Bounty requirement).

2 *C&E v Apple and Pear Development Council* [1985] STC 383 at p.388.

that, used in an English<sup>3</sup> statute, it must be assumed to bear its ordinary meaning in the law, save in so far as the provisions of the statute indicate some other meaning.

[2] In its usage in English law the central feature of consideration is reciprocity ... . Something is given in return for something else. It may, for example, be a promise in return for a promise or a payment in return for a promise. It can be a detriment to the promisee or a benefit to the promisor. But whatever its form, I think that reciprocity is involved. It is essentially mutual.

Another example from a non-tax case:

In our view the meaning of the word “consideration” must be the legal meaning of it and not any common or garden meaning; that really goes without saying. ... In our judgment the word “consideration” connotes the existence of something in the shape of a contract or a bargain between the parties. ... Consideration deals with the situation where there is a contract or a bargain<sup>4</sup> and something moving the other way.<sup>5</sup>

Reciprocity is a matter of degree.<sup>6</sup> In *Vaughan-Jones v Vaughan-Jones*:

- (1) H died leaving property to his children.
- (2) The children entered into a deed of variation giving the property to W (so the estate qualified for the IHT spouse exemption).
- (3) A contemporary note recorded the parties intentions: “In effect, the [children] are losing out on a short-term basis, but the plan is to pay as little IHT as possible at this stage and for [W] to transfer as much as she can and survive seven years.”

W’s intention to give “as much as she can” to the children did not constitute consideration for the gift from the children to the mother. The level of reciprocity was insufficient, or too imprecise:

... the expression “any consideration in money or money’s worth” [in

---

3 The reference to an *English* statute is questionable, as the case was concerned with the word (consideration) in a tax statute which also applies in Scotland. But reciprocity is inherent in the general sense of the word consideration. It is not a specifically English law concept; so the point does not matter.

4 The reference to a contract *or a bargain* anticipates the point made below that consideration does necessarily require a contract.

5 *R v Braithwaite* [1983] 1 WLR 385 at p.391.

6 A similar point arises in the definition of settlor; see 94.4 (Reciprocal arrangements).

s.142(3) IHTA]<sup>7</sup> is a technical expression which requires a bargain which is sufficiently definite. ... it does not include a generalised intention to give sums of an indefinite amount at an indefinite time in the future, which gives rise to no legally enforceable obligation, and where [W] could, without adverse consequences to herself, change her mind at any time.<sup>8</sup>

Context may of course show that “consideration” is used in a special sense.<sup>9</sup> But the above is the starting point.

#### App. 4.2.2 *Contract not required*

A valid contract in English law requires consideration. But consideration does not require a contract:

[The reference to consideration in what is now s.5(2)(a) VATA 1984] is not necessarily contemplating the existence of a contract. A barrister, for example, receives consideration for his services from a solicitor, but there is no contract.<sup>10</sup>

And again:

I reject the contention that the parenthetical words in section 1(3) [Inheritance (Provision for Family and Dependents) Act 1975] “otherwise than for full valuable consideration” apply only to full valuable consideration under a contract ... they apply whenever full valuable consideration is given, whether under contract or otherwise... ... the phrase “for full valuable consideration” is not to be construed as being limited to benefits provided under a contract...<sup>11</sup>

7 See 73.6.3 (Variation for consideration).

8 [2015] EWHC 1086 (Ch) at [50], [51].

9 For instance, in the context of VAT, an EU-law concept of “consideration” is adopted in preference to the UK law meaning; though the EU-law concept is also founded on reciprocity, so it is not fundamentally different.

10 *C&E Commissioners v Apple & Pear Development Council* [1985] STC 383 at p.389. Nowadays there normally is a contract between solicitor and barrister, but that does not affect the point being made here.

11 *Jelley v Iliffe* [1981] Fam 128 at p.136.

Similarly in some tripartite cases the courts have been prepared to regard benefits received as consideration, in the absence of a contractual relationship between the parties, eg *Unilever v IRC* 76 TC 300 in the High Court at [46] reversing the Special Commissioners (but without any substantial discussion of the issue). The Court of Appeal did not consider the point.

App. 4.2.3 *Contract stating consideration*

Subject to certain ill-defined limits, the parties to a contract may identify what is the consideration.

In *Stanton v Drayton Investments* the purchaser bought a portfolio of securities in consideration of the issue of its own shares. The agreement was not complicated:

- The vendor will sell and the purchaser will purchase ... the said portfolio
- [1] at the price of [c.£4m]
  - [2] to be satisfied by the allotment by [the purchaser] to the vendor of [c.2.5m] ordinary shares of 25p each in [the purchaser], the issue price of each such share for the purpose of satisfying the consideration being 160p.

The first question was: what was the consideration given by the purchaser for the acquisition of the portfolio? This was held to be the shares issued (not the cash sum, or notional cash sum, of £4m). That is what the parties identified as the consideration.

In *Spectos v Madden*:<sup>12</sup>

What is the relevant consideration may depend upon the terms and form of the transaction adopted by the parties. The parties to a proposed transaction frequently can achieve the same practical and economic result by different methods.

Take for example the position of the owners of the entire issued capital of a company with gross assets of £2m and net assets (after discharging a debt of £1m owed to the owner or someone else) of £1m. The shares are worth £1m, but would be increased to £2m if the owner at his own cost and for the benefit of the company released or discharged the debt. In this situation, the owner may agree to sell his shares

- [1] for £1m
- [2] or, on condition that he first releases or discharges the debt, for £2m.

The law respects the freedom of the parties to a transaction to frame and formulate their agreement as they wish and to suit their own legitimate interests (taxation and otherwise) and, so long as the form adopted is genuine, and not a sham, honest, and not a fraud on someone else, and does not contravene some established principle of public policy, the

---

<sup>12</sup> 70 TC 349 at p.374.

Court will give effect to the method adopted.

The qualifications of genuine/honest, etc, allow some wriggle room.

What is sauce for the goose is sauce for the gander:

But as a corollary to this freedom, where the parties have chosen one method, it is not open to them to invite the Court to treat as adopted some other method because it is more advantageous to them, because it leads to the same practical and economic result and because it is the more obvious and sensible method to have adopted.<sup>13</sup>

The issue may then become one of construction of the contract, and the usual principles of construction apply:

If the question is raised what method has been adopted and the transaction is in writing, the answer must be found in the true construction of the document or documents read in the light of all the relevant circumstances. If the terms of the documents are clear, that is the end of the question. If however there is any doubt or ambiguity upon the language used read in its proper context, it may be possible to resolve that doubt or ambiguity by reference to the inherent probabilities of businessmen entering into the transaction in one form rather than another.<sup>14</sup>

In *Hannah v HMRC*<sup>15</sup> a contract of sale specified the purchase price as £765k. The purchaser was entitled (apart from a deposit) “to satisfy the purchase price” by issuing an annuity. The wording was the same as *Drayton Investments*, and if the seller had retained the annuity, that should have been the consideration. But when the seller received the annuity, they promptly surrendered it for a cash sum equal to the purchase price.

---

13 *Spectros* cites *Booth v Bucknell* 53 TC 425 at p.431: “where parties to a composite transaction have, as a result of negotiations between themselves, provided that part of the consideration is to be paid for one part of the transaction and part for another, they cannot subsequently seek to re-allocate the consideration for tax purposes. They have chosen to carry through the transaction in a particular manner, and the taxation consequences flow from the manner adopted.”

If further authority is needed, see *HMRC v Vermilion Holdings* [2020] UKUT 162 (TCC) at [84]: “we require to proceed on the documentation that the parties chose to enter into, not alternative documentation which they could have been entered into but chose not to.”

14 70 TC 349 at p.375.

15 [2021] UKUT 22 (TCC).

Blink and you missed it. The consideration was the £765k, not the annuity. The result could be explained as a “realistic view of facts” or by *Ramsay*; or is there no difference between the two?<sup>16</sup>

#### App. 4.2.4 *Covenant incidental to sale*

In *Fielder v Vedlynn*<sup>17</sup> the essential facts<sup>18</sup> were:

- (1) V sold 8 companies (“target companies”) to P for market value (£19k).
- (2) The target companies held subsidiaries which owed a contingent liability to V. P covenanted to procure that these liabilities would be met. The parent of P in turn guaranteed performance of P’s guarantee.

HMRC argued that the covenants were valuable consideration in addition to the purchase price.

The Court rejected this for two reasons. First:

the guarantees are no more than a term of the agreements for sale of the [target] companies. They do not fall to be separated out from the other terms and conditions upon which the shares were sold or to be invested with an overwhelming importance. I would regard them [as] comparable with the warranties and covenants given by [V].<sup>19</sup>

The High Court agreed:

the Special Commissioner was entirely entitled to reach the conclusion that there was no basis on which a separate and additional monetary value could be placed upon the guarantees as part of the consideration

<sup>16</sup> See [App 6.6](#) (Realistic view of facts).

<sup>17</sup> 65 TC 145.

<sup>18</sup> Some background facts:

- (1) The purpose of the sale was that P should acquire the capital losses of the companies it acquired. (The sale of capital loss companies was held to work for CT purposes in *Shepherd v Lyntress* 62 TC 495, but sch 7A TCGA now prevents this). The contingent liability owed from the target companies to V was to pay a sum equal to 7.5% of losses (if any) agreed by HMRC.
- (2) The arrangements also included a pre-sale dividend to reduce the value of the target companies.

These facts do not affect the technical points decided in *Vedlynn*, but they may explain why HMRC tried to pursue the consideration issue.

<sup>19</sup> 65 TC 145 at p.160.

to be added to the undoubted monetary price paid which was the true open market price of the shares.<sup>20</sup>

It is not clear whether the basis of the decision is that:

- (1) The guarantee was not consideration. If so, the question of its value, if any, did not matter. Or:
- (2) The guarantee was of nil value. Something of nil value perhaps cannot be consideration, but this does not matter here.

The better view is that both are correct: the guarantee was held to have nil value and not to constitute consideration.

At first sight, it seems odd to say that the guarantee had *nil* value. It must have been worth *something* though it was difficult (in fact, impossible) to value.<sup>21</sup> But I think it is right to say that the consideration had nil value in this case, because the parties put a nil value on it, and the parties' valuation of consideration in good faith is binding on HMRC.<sup>22</sup>

There is also a good case for saying the guarantee was not for consideration, at least for the purposes of computing the chargeable gain, because the parties likewise have freedom to determine what is the consideration for a transaction.<sup>23</sup>

The issue may arise outside the context of taxation. In *Muat v Betts Motors*,<sup>24</sup> V sold a car (then in short supply, in New Zealand) to P, for £1,207. The sale included a covenant that P was not to resell within 2 years unless he first offered to sell the car back to V. P argued, ingeniously but unmeritoriously, that the covenant was void, because:

- (1) the price of the car was £1,207 *and* the value of the covenant, and
- (2) added together, this exceeded the maximum allowed under price control legislation.

The answer was that the covenant was not part of the price:

Their Lordships are of opinion that, under the statutory definition,<sup>25</sup> the

<sup>21</sup> See App.4.3.3 (Consideration can't be valued).

<sup>22</sup> See App.4.3.2 (Contract may identify value).

<sup>23</sup> See App.4.2.3 (Contract stating consideration).

<sup>24</sup> [1959] AC 71.

<sup>25</sup> Section 2(1) [New Zealand] Control of Prices Act 1947 provided:

'Price', in relation to the sale of any goods ... includes every valuable consideration whatsoever, whether direct or indirect; and includes any consideration which in

only kind of valuable consideration which comes within the “price” is a valuable consideration “which in effect relates to the sale.” The special covenant in this case was, in a sense, valuable consideration - just as any collateral contract is consideration for the making of a main contract - but it did not relate to the sale. It is of the essence of a sale that the property in the goods should be transferred from the seller to the buyer: and a valuable consideration only relates to the sale if it is given as the inducement - or one of the inducements - for the transfer of the property. In this case the sole and entire inducement for the transfer was the cash sum of £1,207. The special covenant was not given for the property but for something different. It was given for the privilege of being allowed to buy a new car. It was not expected to yield any benefit to the seller. Its purpose was to stop the purchaser taking advantage of his privileged position contrary to the interests of the trade and the public. It was a prerequisite to the transfer of the property and not part of the consideration for it. In these circumstances their Lordships think it cannot properly be said to form part of the “price” within the statutory definition.

The same principles apply in Scotland. In *HMRC v Vermilion Holdings*<sup>26</sup> an agreement provided:

- (1) an existing option was cancelled
- (2) a new option was granted for “no consideration”

The UT said at [21]:

Clause 2.2 states in clear and unambiguous terms that no consideration is payable for the grant of the option. If the parties intention was that there was consideration and that the consideration was the cancellation of the 2006 Option they could easily have said so. We find as a matter of law that no consideration was payable for the grant of the 2007 Option.

It is significant that the existing option was said to be worthless because the company was about to go bust. Rather than worthless, one might describe it as difficult to value, but that should make no difference.

#### App. 4.2.5 *Transfer on liquidation*

---

effect relates to the sale of any goods ... although ostensibly relating to any other matter or thing.

<sup>26</sup> [2020] UKUT 162 (TCC). This point was not discussed in the subsequent appeal.

The transfer of property to shareholders from a company in the course of liquidation is not for consideration. There is no bargain between the shareholders and the company. The liquidator is under a duty to make the transfer by virtue of the liquidation. The liquidation may require a special majority vote; but apart from that, once that is done, the winding up commences, the transfer does not depend on the wishes of any shareholder.<sup>27</sup>

HMRC agree. The SDLT Manual provides:

**SDLTM04042 SDLT on de-enveloping transactions** [Feb 2020]

Companies may look to 'de-envelope' a property for a number of reasons, including taking themselves and the persons to whom they distribute the property outside the scope of the Annual Tax on Enveloped Dwellings. Such de-enveloping may occur by a capital distribution to the shareholders following the liquidation of the company. The [SDLT] consequences of de-enveloping will depend on whether there is any consideration given by the shareholders for the transfer of the property.

There will be two situations where HMRC will not consider there to be any consideration given.

The first is where the company is debt free: its only asset is the property and there are no liabilities (other than issued share capital). In such a situation the shareholders have given no consideration directly or indirectly for the property and therefore there is no SDLT liability.<sup>28</sup>

The same reasoning applies to:

- (1) A transfer by way of dividend or other company distribution
- (2) A transfer from a trust

This is recognised by provisions which for CGT purposes deem all these transfers to be made for consideration.<sup>29</sup>

#### App. 4.2.6 *Transfer on divorce*

The starting point is to understand the family law background.

A transfer in connection with divorce may be made:

---

27 See *Wigan Coal and Iron Co v IRC* [1945] 1 All ER 392; this is also assumed in s.53, 54 FA 2003.

28 The material now in SDLTM04042 and SDLTM04043 was previously published as a statement on <https://www.gov.uk/business-tax/stamp-taxes> (2013).

29 See App.4.4 (Deemed MV consideration).

- (1) Pursuant to a court order
  - (a) following a contested hearing; or
  - (b) approving a settlement agreed by the parties.
- (2) Without a court order but under an agreement between the parties (the transferee agreeing to seek no (or a reduced) court order in return for the transfer).

Assume (as will normally be the case on divorce) that the transfer is made at arm's length and with no gratuitous intent. Are transfers of these kinds made for consideration?

One might have thought that the answer was no. The word consideration is wide enough to apply in the absence of a contract, but in the case of a court order, there is no bargain of any kind. The reciprocity which is the essence of consideration is lacking.

Accordingly in *G v G*<sup>30</sup> the High Court held that a transfer pursuant to a court order at a contested hearing was not made for consideration, so that CGT hold-over relief was available.<sup>31</sup>

However in *Hill v Haines*<sup>32</sup> the Court of Appeal held that a transfer pursuant to a court order at a contested hearing (type (1)) was made for consideration, for the purposes of s.339 Insolvency Act 1986.

Where does this leave *G v G* and CGT hold-over relief? Either it is overruled or else there are (at least) two concepts of consideration, in which case a transfer might be for consideration in one sense but not for consideration in the CGT sense.

Each view has some support in *Hill v Haines* (though they cannot both be right). Morritt C said:

[30] ... the fact that a transfer ordered by the court does not give rise to a payment of consideration so as to reduce the value of hold-over relief for capital gains tax [does not entail] a conclusion that a property adjustment order must be regarded as made for no consideration.

In other words, "consideration" in the CGT code has a different meaning.

---

30 *G v G* [2002] EWHC 1339 [2003] Fam Law 14 [2002] 2 FLR 1143 at [43]  
<https://www.kessler.co.uk/wp-content/uploads/2012/04/GvG.pdf>

31 See 54.32.5 (Actual consideration).

32 [2007] EWCA Civ 1284.

But Rix LJ preferred the view that *G v G* was wrong.<sup>33</sup> Since Rix also agreed with Morritt, it is clear that he did not give a great deal of attention to this point (which did not need to be decided and which would not have been fully argued). A legal realist would say that each decision was result led, the court first deciding what is the just result and then holding that there was/was not consideration in order to reach that result. But it is considered that the two decisions can be reconciled and the view of Morritt is to be preferred. Rights under the Matrimonial Causes Act are not assets for CGT purposes: no gain arises when a spouse is awarded a capital sum. Accordingly, there is no “consideration” for CGT purposes. However that is a special case and a transfer on divorce is made for consideration in the general sense of the expression. The word “consideration”, like all words, must take its meaning from its context. The CG Manual provides:<sup>34</sup>

**CG67192. Hold-over relief: Consideration** [Jul 2019]

The disposal of an asset from one spouse or civil partner to the other in the circumstances described in CG67191 [that is, a disposal in a year after separation, which does not qualify for the CGT spouse exemption] is, where there is no recourse to the courts, usually made in exchange for a surrender by the donee of rights which they would otherwise be able to exercise to obtain alternative financial provision. In such cases we take the view that the value of the rights surrendered represents actual consideration of an amount which would reduce the gain potentially eligible for hold-over relief to nil. “Consideration” is not limited to money or money’s worth.

After considering the case where there is gratuitous intent, which is so rare that it need not be considered here, the Manual continues:

---

33 At [81] “... As for *G v G*, the view expressed by Coleridge J at para 43 regarding potential consequences for the purposes of capital gains tax can hardly be regarded as authoritative in the absence of the revenue. As Coleridge J stated, his view that the wife gave no consideration for the shares transferred to her because ‘neither party has any ‘rights’... cannot, of course, ultimately bind the Inland Revenue’: he merely proceeded “on the footing” that business hold-over relief would be available to the husband. In doing so, he appears to have drawn an unnecessary inference from the decision of this court in the *Xydhias* case.”

34 The passage has not been revised after *Hill v Haines*, but as several years have elapsed since that decision, it may be taken as a statement of the HMRC current view.

However, in cases where there is recourse to the courts and a court makes an order

- for ancillary relief under the Matrimonial Causes Act 1973 which results in a transfer of assets from one spouse to another, or
- for property adjustment under the Civil Partnership Act 2004, or
- formally ratifying an agreement reached by the divorcing parties or by the civil partners of a dissolved civil partnership dealing with the transfer of assets,

we take the view that the spouse or civil partner to whom the assets are transferred does not give actual consideration, in the form of surrendered rights, for their transfer. A Court Order, made in these circumstances, reflects the exercise by the court of its independent statutory jurisdiction and is not the consequence of any party to the proceedings agreeing to surrender alternative rights in return for assets. This approach represents a change in the Revenue's prevailing practice, following consideration of judicial observations made in the case of *G v G* [2002] EWHC 1339 and applies with effect from 31 July 2002. Therefore, where assets are transferred between divorcing parties or between civil partners of a dissolved civil partnership by reason of a Court Order as described above and a claim for gift hold-over relief is made, or remains unsettled, on or after that date, the relief should not be restricted in accordance with TCGA92/165(7) on the grounds that actual consideration has been given by the donee.

Thus in the HMRC view:

- (1) A transfer made pursuant to a court order, including a consent or *Tomlin* order, is not made for consideration.
- (2) A transfer not made pursuant to a court order is made for consideration.

It is considered that the position is in both cases the same:

- (1) The transfer is made for consideration in the general sense of the word;
- (2) The transfer is not made for consideration for CGT purposes.

#### App. 4.2.7 *Sale and leaseback*

This section considers whether a sale and leaseback transaction is for consideration. I refer to the parties to the transaction as “purchaser/landlord” and “vendor/tenant”.

The conveyancing can be done in (at least) two ways:

- (1) *Transfer requiring purchaser/landlord to grant lease:*
  - (a) Vendor/tenant transfers freehold to purchaser/landlord
  - (b) Purchaser/landlord grants lease to vendor/tenant
- (2) *Transfer subject to an existing lease:*
  - (a) Vendor/tenant grants lease to nominee, and
  - (b) Vendor/tenant transfers freehold subject to the lease to purchaser/landlord<sup>35</sup>

At first sight, the analysis should depend on the conveyancing:

- (1) Route (1) involves a grant of a lease for consideration (the transfer of the freehold).
- (2) Route (2) does not involve a grant of a lease for consideration.

But both conveyancing methods lead to the same result, so it is tempting to say that the same tax analysis should apply, regardless of the conveyancing. In that case one might apply either analysis, ie the lease may or may not be regarded as granted for consideration, depending on which makes better sense in the particular context.

The former CTO Advanced Instruction Manual seemed to adopt this approach:

#### **E.15. Introduction**

A lease for life etc is treated as a settlement under s43(3) IHTA unless the lease was granted for full consideration in money or money's worth. We do not consider that this provision applies to the common case in which an occupying owner transfers the property to another person reserving such a lease for himself.

Nor do we apply it where the transfer is made on condition that the transferee grants him such a lease at less than a rack rent. Where this is done it is the transferee who grants the lease and for this the transfer is at least full consideration.

The same point was made in former SP E10:

You were concerned that a vendor of property who wished to retain a lease for his life might be barred from the relief afforded by the exception for leases granted for full consideration if the creation of the lease was by way of a reservation out of the interest conveyed rather

---

<sup>35</sup> There could be a transfer of a leasehold interest and a sub-lease back; but for simplicity I refer to a freehold and lease. Further consideration is needed if the land is not in England or Wales.

than by a separate grant of the leasehold interest. I can confirm that we would not seek to exclude relief solely on these grounds. Whether or not full consideration is given is a matter which depends upon the facts of the individual case, but for this purpose we would take into account a reduction in the price obtained by the vendor because of the reservation of the leasehold interest.

The Manual passage is not in the current IHT Manual. The SP is now described as “obsolete and for information only.”<sup>36</sup> There has been no announcement that HMRC practice has changed. It seems unrealistic to expect an established HMRC practice on the grant of a lease for life, as it would not arise very often.

#### App. 4.2.8 “Money or money’s worth”

Statute frequently refers to consideration “in money or money’s worth”. In *Secretan v Hart*:

The expression “consideration in money’s worth” is of course one which is very familiar to lawyers, as being a way of expressing the price or consideration given for property where property is acquired in return for something other than money, such as services or other property. where the price or consideration which the acquirer gives for the property has got to be turned into money before it can be expressed in terms of money.<sup>37</sup>

The expression *money or money’s worth* excludes consideration of marriage.<sup>38</sup> However, consideration of marriage is not nowadays an important concept.

The expression also excludes consideration of “natural love and affection” and similar emotional benefits,<sup>39</sup> but that is not consideration in the true sense at all.<sup>40</sup>

---

36 HMRC, “Obsolete statements relating to Inheritance Tax” (2014)

<https://www.gov.uk/government/publications/obsolete-statements-relating-to-inheritance-tax-also-applicable-where-tax-charged-is-capital-transfer-tax>

37 45 TC 701 at p.705.

38 Marriage was formerly regarded as a contract, and agreeing to marry was consideration for the contract. However, marriage consideration is not “money or money’s worth”.

39 Contrast 47.5.8 (Moral/sentimental/hard to value benefit).

40 The phrase seems rather inapt: it is a traditional conveyancer’s phrase which probably antedates the modern sense of “consideration”.

So there is no practical difference between “consideration” and consideration “in money or money’s worth”. The words “in money or money’s worth” do not add anything.

For completeness: In the 2017 penalty and RTC provisions we have the novel wording “consideration (whether or not in money)”.<sup>41</sup> I guess the drafter thought that was a Plain English equivalent of “consideration in money or money’s worth”. It would have been better to just say consideration, or else use the established phrase. I hope that does not catch on. But it does not matter.

### App. 4.3 Value of consideration

#### App. 4.3.1 “Amount or value”

Statute frequently refers to “amount or value” of consideration (or of a benefit), for instance, in s.38(1) TCGA:

... the sums allowable as a deduction from the consideration in the computation of the gain accruing to a person on the disposal of an asset shall be restricted to—

- (a) the amount or value of the consideration ... wholly and exclusively for the acquisition of the asset ...

This means: the amount of the consideration, if it is money; or the value of the consideration, if it is not money.<sup>42</sup>

Issues arising include:

- (1) Identifying the consideration
- (2) Once identified:
  - (a) valuing the consideration or
  - (a) whether the consideration cannot be valued

#### App. 4.3.2 Contract stating value

Just as a contract may identify what is the consideration,<sup>43</sup> it may identify its value (subject to certain ill-defined limits).

In *Stanton v Drayton Investments*<sup>44</sup> the question was: what was the value

---

41 See 120.13 (Interested person).

42 This is self-evident, but if authority is needed, see *Stanton v Drayton Investments* 55 TC 286 at p.314.

43 See App.4.2.3 (Contract stating consideration).

44 For the facts of this case, see App.4.2.3 (Contract stating consideration).

of the consideration (shares). It was held that this did not mean market value, but the value agreed by the parties:

... as a pure matter of construction of [s.38(1)(a) TCGA], I see no indication that value is used as meaning market value. ... in the ordinary case under s.38(1)(a) TCGA [as opposed to the special case of non-arm's length transactions deemed to be at market value] such a value is available—namely the price agreed between the parties. Consequently there is not need to look to the market value, and no need to read in the word ‘market’ before ‘value’ where Parliament has not seen fit to use it.<sup>45</sup>

In short:

provided the agreed value has been honestly reached by a bargain at arm's length, it must, in my opinion, be final and it is not open to attack by the Inland Revenue.<sup>46</sup>

The reader may find that analysis surprising. One might have thought:

- (1) Value means market value, not the price agreed between the parties, if different.
- (2) But the fact that arm's length parties have agreed a price is (more or less) conclusive evidence that the agreed price falls within the market value range.
- (3) Assuming the price agreed fell within the market value range, it should be conclusively taken as “the” market value.

But the end result is the same. In any event, the decision is binding. Of course, the qualifications “honestly” and “at arm's length” provide some wriggle room.

The decision in *Stanton v Drayton* is expressed in rather abstruse reasoning about the meaning of the word “value” in s.38, in the context of the TCGA, and the method of ascertaining the value. But an important practical consideration lies beneath:

Once it is accepted ... that market value could not necessarily be ascertained almost instantly by reference to the Stock Exchange price list, but might have to be proved by the evidence of accountants and other financial experts, the practical inconvenience of leaving

---

45 55 TC 286 at p.317.

46 55 TC 286 at p.317.

agreements liable to be reopened to such inquiry becomes clear. I do not believe that Parliament can have intended to permit that inconvenience in cases where bargains have been made at arm's length.<sup>47</sup>

One can collect from *Stanton v Drayton* a strong inclination not to reopen a valuation agreed between parties acting at arm's length.

#### App. 4.3.3 *Consideration can't be valued*

Consideration which cannot be valued matters, because it brings into effect the CGT market value consideration rule.<sup>48</sup>

This issue arise in *Fielder v Vedlynn*. The case concerned a sale whose terms included a guarantee which was held not to be consideration, or perhaps, consideration of nil value.<sup>49</sup> The Special Commissioner went on to say:<sup>50</sup>

If I am wrong in coming to this conclusion, the question arises what is the value of the guarantees. ... It seems to me to be quite impossible to place a rational value on the guarantees. ... How do you value the guarantees in monetary terms? I do not think you can. No evidence was led to suggest that you can. So if the guarantees are part of the consideration given by [P] for the [target] companies, that part of the consideration, in my opinion, "cannot be valued".

The consequence is that the disposal was deemed to be at market value. The High Court upheld that conclusion.

#### App. 4.4 **Deemed MV consideration**

Section 17(1) TCGA provides:

Subject to the provisions of this Act, a person's acquisition or disposal of an asset shall for the purposes of this Act be deemed to be for a consideration equal to the market value of the asset—

I refer to rules of this kind as "**deemed market value rules**".

One might identify two deemings here:

- (1) If a transfer is not for consideration, it is deemed to be for market value consideration.

---

47 55 TC 286 at p.317.

48 See App.4.4 (Deemed MV consideration).

49 See App.4.2.4 (Covenant incidental to sale).

50 65 TC 145 at p.161.

- (2) If a transfer is for consideration but not for market value, the consideration is deemed to be market value.

Section 17(1) then identifies 7 circumstances where deemed MV applies:

- (a) where he acquires or, as the case may be, disposes of the asset otherwise than by way of a bargain made at arm's length, and in particular where he acquires or disposes of it
  - [i] by way of gift or
  - [ii] on a transfer into settlement by a settlor or
  - [iii] by way of distribution from a company in respect of shares in the company, or
- (b) where he acquires or, as the case may be, disposes of the asset
  - [i] wholly or partly for a consideration that cannot be valued,
  - [ii] or in connection with his own or another's loss of office or employment or diminution of emoluments,
  - [iii] or otherwise in consideration for or recognition of his or another's services or past services in any office or employment or of any other service rendered or to be rendered by him or another.

In addition to s.17, there are many CGT provisions which deem a disposal to be made for market value consideration. It is not practical to give a full list, but the most important are:

- (1) Section 122 TCGA deems a capital distribution (such as is made on a liquidation) to be consideration for CGT purposes.
- (2) Section 71 TCGA deems a trust distribution to be made for MV consideration for CGT purposes.<sup>51</sup>

See too 115.10.3 (Disclosing valuations).

#### App. 4.4.1 *Acquisition without corresponding disposal*

For completeness: s.17(2) TCGA provides an exception to the s.17(1) rule:

- Subsection (1) shall not apply to the acquisition of an asset if—
- (a) there is no corresponding disposal of it, and
  - (b) [i] there is no consideration in money or money's worth or
  - [ii] the consideration is of an amount or value lower than the market value of the asset.

---

<sup>51</sup> See 53.20.5 (Disposal on trust termination).

Fortunately this does not often apply. Examples of acquisitions without corresponding disposals are:

- Acquisition of a right to compensation or damages<sup>52</sup>
- Acquisition of shares on a share issue
- Acquisition of a trust interest on a gift to trust or trustee appointment

**App. 4.5 Market value/full consideration**

*App. 4.5.1 MV/full consideration compared*

The expressions market value (MV) and full consideration are ubiquitous in tax and non-tax legislation.

Market value comes up regularly in the context of deemed disposals at market value for CGT purposes.

References to full consideration relevant to the themes of this book include:

<b>Topic</b>	<b>See para</b>
Gift with Reservation (GWR)	74.7
Remittance conditions C and D	17.26.2
Pre-owned assets	80.21

Section 272(1) TCGA provides a commonsense definition of market value:

In this Act “market value” in relation to any assets means the price which those assets might reasonably be expected to fetch on a sale in the open market.

Full consideration is never defined. Despite the lack of a definition I think there is little if any difference between the two terms. Comment on one is relevant to the other, and so I discuss them together in this section.

To ascertain market value, one must assume that there is an open market even if none exists; but the same is true in ascertaining full consideration.

This section makes general comments. For market value of specific types of benefit see:

<b>Benefit</b>	<b>See para</b>
Benefits generally	47.8
Beneficial loan	47.10.6

---

52 *Zim Properties v Procter* 58 TC 371; see 13.16.2 (s.22 TCGA case law).

Use of chattel	47.11.2
Use of land	47.12.2

Where there are statutory valuation rules, it is necessary to distinguish between market value and statutory value; statutory valuation rules are not discussed here.

#### App. 4.5.2 *MV/arm's length bargain compared*

If a transaction has attributes of a bargain at arm's length,<sup>53</sup> the consideration is more likely to be market value. Thus the two concepts overlap in practice even though they are conceptually distinct.

In a letter published 18 May 1987, the Revenue say:

...Whether an arrangement is for full consideration will of course depend on the precise facts. But among the attributes of an acceptable arrangement would be the existence of a bargain

[1] negotiated at arm's length

[2] by parties who were independently advised

[3] and which followed the normal commercial criteria in force at the time it was negotiated...

You referred to potential difficulties in determining what amounts to "full consideration" for the donor's continued enjoyment of gifted chattels, particularly pictures and paintings... These may not be insuperable, as appears from the recent case of *IRC v Macpherson*,<sup>54</sup> and in any event it would be difficult to overturn an arm's length, commercial arrangement entered into by parties who were independently advised.<sup>55</sup>

#### App. 4.5.3 *Full consideration: separate advice*

A characteristic of a transaction at arm's length is that the parties are separately advised. Parties seeking to ensure full consideration may take

53 See App.4.6 (Arm's length).

54 In *Macpherson*, trustees agreed that a beneficiary should have use of valuable paintings for 14 years, at a rent of £60 p/a, the beneficiary undertaking their care and insurance. The Revenue conceded this was a transaction which might have been made by unconnected parties, and not intended to confer gratuitous benefit. See [1985] STC 471. The dispute in *Macpherson* concerned associated operations; see 70.13 (Relevant operation).

55 Christie's Bulletin (Autumn 1995). The article states: "The Capital Taxes Office have seen this article in draft and have no objection to it."

advantage of this by instructing separate valuers. Edward Manisty explains HMRC practice on what constitutes full consideration for the use of chattels, in circumstances where:

- (1) A donor gave chattels to a donee
- (2) The donor enjoyed use of the chattels
- (3) The donor paid (what was intended to be) full consideration for the use, to avoid what would otherwise be a reservation of benefit.<sup>56</sup>

Although the Revenue was unable provide any definitive comment, the following has emerged from correspondence:-

(1) *The need for separate advice*

(a) In reviewing the adequacy of consideration paid by the donor for the benefits enjoyed by him the Revenue attach great importance to the parties, and in particular the donee, having the benefit of entirely independent advice from agents familiar with relevant sectors of the art market, with market fluctuations in relation to relevant chattels, and with current trends relating to the letting or loan of such chattels.

(b) The Capital Taxes Office accept there can be no absolute requirement that the donor must take separate advice. However, they regard it as crucial that the parties are able to demonstrate that the arrangements were made and maintained on an “arm’s length” basis. They observe that the chances of the Revenue’s requirements being met in this respect will be very much stronger if both sides are so separately advised.

(c) The Capital Taxes Office have confirmed the importance they attribute to the agents instructed receiving proper instructions. This will normally involve the agents having before them a recent valuation of the open market value of the chattels concerned prepared by a valuer experienced in evaluating chattels of the kind in question on that basis with a first draft of the proposed lease/licence. The importance of preserving such instructions and other material relating to the valuation exercise is self evident.

The GWR full consideration exemption is a cliff-edge rule: GWR operates if the payment made is anything less than full consideration. Accordingly the costs of instructing two valuers may be worthwhile. That is not to say that two valuers are appropriate in every case where market value/full consideration is an issue. An alternative may be to instruct one joint valuer.

The instructions to the valuer(s) are as important as the valuation itself,

---

56 See para 6 sch 20 FA 1986, discussed at 74.7 (Full consideration exemption).

and will be disclosed to HMRC, in the event of a dispute, together with the valuation.

#### App. 4.5.4 *Amount in full consideration range*

The cliff-edge nature of the GWR full consideration exemption is mitigated by allowing a range of values which may constitute full consideration. RI 55 provides:

... we do recognise that there is no single value at which consideration can be fixed as “full”. Rather, we accept that what constitutes full consideration in any case lies within a range of values reflecting normal valuation tolerances, and that any amount within that range can be accepted as satisfying the para 6(1)(a) [sch 20 FA 1986, GWR] test.

References to “the” market value might suggest there is a single price which assets may be expected to fetch. In practice, as HMRC recognise in the context of full consideration, there is a range of values; and anything within the range may be said to be market value. Thus there is no real difference between MV/full consideration.

### App. 4.6 **Arm's length**

#### App. 4.6.1 *Why “arm's length” matters*

Tax legislation uses various phrases:

Phrase	Topic	See para
<i>Disposal:</i>		
by way of a bargain made at arm's length	Deemed MV	App.4.4
under a bargain at arm's length	Hold-over relief	54.32
<i>Transaction:</i>		
entered into at arm's length	Capital payment: s.87	57.7.4
entered into on arm's length terms	Tainting protected trust	88.5.1
at arm's length	IHT arm's length transaction relief	70.12

These are not exactly the same, but they share the concept of “arm's length”.<sup>57</sup>

#### App. 4.6.2 *Meaning of arm's length*

<sup>57</sup> Not “arms' length”: one arm is all that is required. Note that this table is not comprehensive.

The CG Manual provides:

**CG14541 Market Value Rule: At Arm's Length** [Jul 2019]

A bargain made at arm's length is a normal commercial transaction between two or more persons. All of the parties involved will be trying to obtain the best deal for themselves in their particular circumstances.

In *Mansworth v Jelley*:<sup>58</sup>

the phrase "bargain at arm's length" ... connotes a transaction between two parties with separate and distinct interests who have each agreed terms (actually or inferentially) with a mind solely to his own respective interests.

In the textbook *Capital Gains Tax*:

it can perhaps be suggested that the following matters would be taken into account (though the list may not be exhaustive):

1. the presence or absence of bona fide negotiation between the parties as to the terms of the transaction (including particularly the consideration);
2. the degree to which the terms of the transaction compare with those found in similar commercial transactions;
3. whether the parties have separate legal or other professional representation;
4. the relationship between the parties independently of the transaction in question; and
5. the character of any comparable prior dealings between the parties.<sup>59</sup>

This is cited in *Nader v HMRC* which continues:

whether a transaction is a transaction at arm's length is largely a question of fact and the factors listed in *Spencer-Nairn*<sup>60</sup> and the observations made by Lightman J in *Mansworth v Jelley* are not rules of law but simply helpful factors and guidance to be taken into account. Ultimately the question is an evaluative exercise taking account of all the relevant facts and circumstances of the particular case.<sup>61</sup>

**CG14545 Market Value Rule: Objective Indicators** [Jul 2019]

---

58 [2002] STC 1013 at [13].

59 Whiteman & Sherry, *Capital Gains Tax* (looseleaf) para 9.32.

60 *IRC v Spencer-Nairn* [1991] STC 60 at p.75.

61 [2018] UKFTT 294 (TC) at [180].

The test which must be satisfied is subjective: the test is whether there was an intention to confer a gratuitous benefit or 'give bounty'. There are objective pointers which may indicate the underlying intention. The following list (which is not exhaustive) suggests information which you may need to consider:

[The manual paraphrases the five factors set out above and continues:]  
It is important to consider all of the available evidence.

#### App. 4.6.3 *Bad/fair bargain*

The CG Manual continues:

**CG14541: Consideration for disposal: market value rule: at arm's length** [July 2019]

This does not mean that a bad bargain cannot be a bargain made at arm's length.

For example Mr A may wish to sell his property quickly so that he can go and live in Malta. Mr B knows that Mr A wants to sell his property quickly so he offers him a low price for a quick sale. No-one else makes an offer. Mr A accepts the price Mr B has offered. This may not have been the best possible price which Mr A could have achieved if he had left the property on the market for longer but he was still trying to achieve the best deal possible for himself. It was a bargain made at arm's length.

Another example where a bad bargain could nonetheless be a bargain made at arm's length is where one party to the transaction has better information about the asset than another. For example Mrs S may sell a picture from her attic to Mr T for £500. Mr T, who is an art dealer, knows that the picture is worth £5,000. There has been a bargain with both people trying to get the best deal for themselves. Again, this is a bargain made at arm's length even if the price paid is not the 'market value' of the asset.<sup>62</sup>

The concept of bad bargain may be contrasted with "fair bargain" (which is not a benefit); see 79.35.3 ("Benefit").

#### App. 4.6.4 *Gratuitous benefit*

The CG Manual provides:

**CG14542 Market Value Rule: Subjective Intention Test** [Jul 2019]

---

62 See 79.35.5 (Unintendedly bad bargain).

A transaction is 'otherwise than by way of a bargain made at arm's length' when one of the persons involved in the transaction does not intend to get the best deal for themselves from THAT PARTICULAR TRANSACTION. That person enters into the transaction with the subjective intention of giving some gratuitous benefit to the other person.

Where one of the parties to a transaction has the intention of conferring a gratuitous benefit on another party to the transaction then the transaction is otherwise than by way of a bargain made at arm's length and the market value rule applies.

This test can apply to a wide range of circumstances. The examples given only cover a small number of the possible circumstances.

[HMRC give straightforward examples of (1) a gift and (2) a sale for £1 of an asset worth £100.]

#### App. 4.6.5 *Linked transactions*

The CG Manual provides:

##### **CG14543 Market Value Rule: Apply To Each Transaction [Jul 2019]**

The subjective intention test has to be applied to each individual transaction. If the terms of a transaction have been influenced by any other transaction or arrangement between the persons entering into the transaction then the parties may not be trying to reach the best possible deal from THAT PARTICULAR TRANSACTION. In these circumstances it is likely that one of the parties will have intended to confer a gratuitous benefit on the other as a result of that particular transaction, even if the larger, overall deal is not intended to do this. That particular transaction will be 'otherwise than by way of a bargain made at arm's length'. The other transactions within the wider deal would also have to be examined to see whether they passed the subjective intention test.

##### **EXAMPLE**

Mr B owns a house with a walled garden and five adjacent fields. A developer wishes to buy all the property, demolish the house and build a sports centre and mini golf course. The market value of the house and garden is £100,000 and of the fields is £50,000.

Mr B agrees to sell the fields for £10,000 on condition the developer buys the house for £140,000 (Mr B will qualify for private residence relief). There are two separate transactions, the sale of the house and the sale of the fields.

Mr B gives a gratuitous benefit to the developer when he sells the fields for £10,000 because he knows they are worth more than this. Accordingly the transaction is 'otherwise than by way of a bargain made at arm's length' and the market value should be substituted.

The developer gives a gratuitous benefit to Mr B when he buys the house for £140,000 because it is not worth this much. Accordingly this transaction is 'otherwise than by way of a bargain made at arm's length' and the market value of the house should be substituted.

More analytically, these are not separate transactions. If they are separate contracts, the consideration for entering into the favourable contract is the promise to enter into the unfavourable contract. If there is a single contract, for the sale of two assets, the parties apportionment of the total consideration between the two assets is not in good faith and does not bind HMRC. But the end result is the same.

The CG Manual provides:

**CG14544 Market Value: Gratuitous Benefit Conferred** [Jul 2019]

The gratuitous benefit conferred on the other party to the transaction need not be a price difference. It could consist of other favourable terms of a contract, for example a very long time to pay the consideration. However, unless the price paid differs from market value, the application of the market value rule will have no direct effect [ie for CGT on the disposal].

App. 4.6.6 *Shareholder/co transaction*

The CG Manual provides:

**CG14547 Market Value Rule: Control** [Jul 2019]

Where one of the parties to a transaction is controlled by another person the controlled party may confer a gratuitous benefit on the other party to the transaction on the directions of the controlling person. The controlling person need not be a party to the particular transaction. But if they have exercised control so that the intention of the controlled person is to confer a gratuitous benefit by the transaction then it will have been carried out otherwise than by way of a bargain made at arm's length. For example the parent company of a group may have negotiated an overall deal to sell part of the group's business to an unconnected third party. As part of the deal one of the subsidiary companies sells two brand names at undervalue to the third party. In that particular transaction the intention of the subsidiary company was to confer a gratuitous benefit on the third party, because it was directed to do so by

its parent company.

Transactions between a company and its controlling shareholders may or may not be bargains made at arm's length. Where there is both an acquisition and a disposal the connected persons rules apply. Otherwise the subjective intention test must be applied.

**CG14548 Market Value Rule: Share Subscriptions** [Jul 2019]

Transactions between a company and its controlling shareholders may also be otherwise than by way of a bargain made at arm's length when the gratuitous benefit of the transaction is in the company's favour.

**EXAMPLE**

Company A is controlled by two people X and Y who each own 40 per cent of the issued share capital. Company A has not been trading profitably and has borrowed £100,000 from X and £50,000 from Y. Company T makes an offer to buy Company A for £3,000 on condition that it does not have any outstanding borrowings.

Company A then issues 150 shares, 100 to X for £100,000 and 50 to Y for £50,000. Company A uses the money it receives for the shares to pay back its debts.

The shareholders then sell all their shares to Company T and X and Y each claim a loss on the disposal of their shares.

The HMRC analysis is as follows:

The purchases<sup>63</sup> of the 150 shares in Company A were otherwise than by way of bargains made at arm's length as X and Y purchased the shares for 150,000 knowing that they were not worth that much. They conferred a gratuitous benefit on Company A by purchasing its shares at overvalue.

X and Y must each use the market value of their new shares at the date of issue as their acquisition cost.

Is that right? On the facts given, the bargain was at arm's length, since X and Y procured the repayment of their debt which was otherwise (more or less) worthless. Discuss.<sup>64</sup>

App. 4.6.7 *Deemed non-arm's length*

Section 18 TCGA provides:

---

63 Author's footnote: The correct term in company law is acquisition, or issue, not purchase; but it does not matter.

64 See too s.128(2) TCGA.

- (1) This section shall apply where a person acquires an asset and the person making the disposal is connected with him.
- (2) Without prejudice to the generality of section 17(1) the person acquiring the asset and the person making the disposal shall be treated as parties to a transaction otherwise than by way of a bargain made at arm's length.

This only applies for CGT purposes. It switches on s.17 TCGA.<sup>65</sup>

#### **App. 4.7 Market value adjustment clause**

If values are uncertain, the parties may be in a quandary. Consider, say, a sale to a trust:

- (1) If the trust pays too little:
  - (a) The vendor (if not the settlor) may become a settlor.
  - (b) If the vendor is the settlor, the sale may taint the trust.
  - (c) The vendor may make a transfer of value.
  - (d) Assuming a sale between connected persons, CGT on the sale is computed by reference to market value, not the agreed price.<sup>66</sup>
- (2) If the trust pays too much, there may be a benefit/capital payment to the vendor.

If the underpayment is unintended and accidental, the tax risks are only slight:

- (1) A bona fide sale, even between connected persons, is itself evidence (not conclusive, of course) of market value.
- (2) The tax charges in (1)(a)(b)(c) above do not arise.<sup>67</sup>

But there may be a concern that HMRC may argue that there is an element of gratuitous intent.

A market value adjustment clause is often proposed as a way to avoid or at least to reduce these risks.<sup>68</sup> SP 5/92 provides:

13 Solely for the purposes of TCGA 1992 sch 5 para 9(3)(a) [tainting], a provision in the document governing the transaction for an appropriate adjustment to the consideration where

<sup>65</sup> See App.4.4 (Deemed MV consideration).

<sup>66</sup> See App.4.6.7 (Deemed non-arm's length).

<sup>67</sup> See (a) 94.29 (Transaction on favourable terms); (b) 88.5.1 (Gratuitous intent: Disregards (a)(b)); (c) 70.12 (Arm's length transaction).

<sup>68</sup> A price adjustment clause would not avoid the CGT issue at (1)(d).

[a] the value agreed by the Revenue<sup>69</sup> differs from

[b] the original consideration arrived at by an independent valuer and specified in the sale document

is, in general, regarded as falling within the terms of the above definition of an arm's length transaction.

The arm's length value of the transaction is to be determined in accordance with the principles set out in para 12 above.<sup>70</sup> This will usually correspond to the value for CGT purposes except, for example, where TCGA 1992 s 19 would apply [assets disposed of in a series of transactions].

14 It would also be necessary for the terms of the contract to provide for compensating interest at a commercial rate to be paid in either direction once the arm's length value is determined. For this purpose, the official rate of interest for [employment-related loan] purposes<sup>71</sup> will usually be regarded as equivalent to a commercial rate of interest, although a different rate may be accepted as so equivalent if the circumstances of a particular case warrant this treatment.

15 This practice is, however, subject to the consideration passing on sale being realistically based, ie on a third party valuation by a qualified valuer, all the other terms of the transaction being at arm's length and the compensating interest being timeously paid. The position in a particular case depends on all the facts and circumstances.

Tax Bulletin 16 adds:

“One-way” adjuster clauses are satisfactory, provided that the parties

---

69 The passive voice may conceal ambiguity because the actor may not be identified. By whom must the value be agreed? In addition to the Revenue, there will be at least two persons interested (vendor and purchaser), and there may be others (settlor, beneficiaries). In some cases HMRC may not agree a value, or there may be no appeal against a Revenue view. These issues would need to be considered when drafting a market value adjustment clause. (Contrast 5.21.3 (Para 26(2) employment-income test) where a similar point arises in connection with the phrase “if value were received”.)

70 Para 12 contains generalities which do not take us very far: “Each case depends on its own facts and circumstances but a transaction is, in general, regarded as being at arm's length where all the facts and circumstances of the transaction are such as might have been expected if the parties to the transaction had been independent persons dealing at arm's length ie dealing with each other in a normal commercial manner unaffected by any special relationship between them.”

71 See 81.5 (Official rate of interest).

are not concerned that they might face a claim that a “capital payment” had been made by the trustees if more passed out of the trust than was received in return.

Although the SP is said to be “solely for the purposes of para 9(3)(a) sch 5 TCGA”, the same practice ought to apply for other purposes.

There must be doubts about the merits of a market value adjustment clause:

- (1) The clause may be taken to suggest that the parties are uncertain as to value, and so might encourage HMRC investigation and challenge.
- (2) The clause brings in uncertainty over the rights of the parties to the agreement. The uncertainty will last for the period, lengthy, and potentially indefinite,<sup>72</sup> during which HMRC may raise the valuation issue. It is true that in the absence of the clause there might be a different uncertainty as to the tax position. But an adjustment clause does not provide certainty, it merely moves it from one sphere (taxation) to another (private rights of the parties).
- (3) If trustees enter into a contract with such a clause, their potential liability may complicate trust administration.
- (4) An agreement with a market value adjustment clause is unlikely to constitute a bargain at arm's length, as arm's length parties would not be expected to allow HMRC to determine or reopen a valuation.<sup>73</sup>

None of these objections are overwhelming, but do the advantages of the clause outweigh these disadvantages?

If used, the drafting of a market value adjustment clause would require some thought. It may be necessary to consider foreign Revenue authorities as well as HMRC.

I am inclined to think that in a bona fide transaction a market value adjustment clause is rarely needed, or wise; and in practice if it is used I suspect it is quickly forgotten, and neither good nor harm ensues.<sup>74</sup>

---

72 Because “who is the settlor” questions could arise at any time in the future. ((One might perhaps put a time limit on claims under the MV adjustment clause, but that would reduce some of the hoped-for tax efficacy of the clause.)

73 However in practice it may not often matter whether the agreement is a bargain at arm's length.

74 Assuming the sale is on the basis set out in SP 5/92 para 15, ie the price is ascertained by a qualified valuer.

A clause of this kind was discussed in *Iny v HMRC*<sup>75</sup> where a company (Castlegold) worth £2m was sold to a friendly trust for a token price of £20k:

58. The agreement included a price adjustment clause, which was to come into effect only if the Inland Revenue should question the price of £20,000. In that eventuality, Castlegold's auditors were to value the shares as at the date of the agreement, the valuation to be made within the six months following the first indication by the Inland Revenue of its concern. The valuation so made was to be binding on the parties and, should the value so ascertained differ from £20,000, a payment, with interest, was to be made immediately in the appropriate direction. The Commissioners argue that the inclusion in the agreement of this clause is itself an indication that the bargain was not one at arm's length. [Counsel for the taxpayer] argued that the clause was explicable as a means of achieving fairness between the seller and purchaser of an asset whose value was difficult to determine.

In the absence of any UK authority on the point he referred us to a similar United States case, *King v USA* 545 F 2d 700. ... The agreements for sale included provision for upwards adjustment of the price should the Internal Revenue Service contend, as it did, that the true value of the shares was greater—in the event, \$16. The Tenth Circuit Court of appeals said:

“25. The district court [found] that the parties intended that the trusts pay a full and adequate consideration for the stock and that the clause was a proper means of overcoming the uncertainty in ascertaining the fair market value of the stock. The court concluded that there was an intention to cause the trusts to pay full and fair consideration for the stock and to make an actual adjustment of the price paid upon the event of a determination by the IRS. We agree. It is important to observe that the IRS does not dispute the contention that it was difficult, if not impossible, to accurately value the stock at the time of its transfer in 1969 and that the parties inserted the specific valuation paragraph in the agreement because the transaction was intended as a sale and not as a gift...”

59. We are not persuaded that that case offers much useful guidance here. The determination of the true value, in *King v USA*, was to be made by the IRS. Here, if there should be a challenge by the Inland Revenue, it was Castlegold's auditors who were to make the valuation.

---

75 [2010] UKFTT 457 (TC).

It is difficult, if not impossible, to understand why, if the auditors might be required to make a valuation, possibly several years later, in the event of a challenge, they were not asked to make one shortly before the agreement for sale was concluded. As we have said, Mr Iny told us that he believed his family had taken advice on the value of his shares; if so, it is odd that he was unable to produce the advice and, if the advice was obtained from someone competent to give it, that it was thought necessary to provide for later adjustment of the price.<sup>76</sup> It is also odd, though perhaps no more, that the auditors' valuation was to be binding on the parties to the agreement, whether or not the Inland Revenue accepted it and whether or not it was upheld in an appeal such as the appeal before us.

60. In our view the conclusion to be drawn is not that the adjustment was designed to achieve a fair balance between the vendor and the purchaser, but that its purpose was to give the impression that a genuine attempt had been made to arrive at a fair price.

---

76 At [79] the FTT found the £20k price was a token payment, there was no valuation, and no negotiation.

## APPENDIX FIVE

# COMMERCIAL/VIEW TO PROFIT

### App. 5.1 Commercial basis/view to

#### **App. 5.1 Commercial basis/view to profit**

This appendix considers the terms “commercial” and “view to profit”.

Statute frequently refers to a trade or business carried on (1) on a commercial basis and (2) with a view to profit: the two expressions are used in tandem. This is so common that I do not attempt to provide a list: a short list would be of little value, and a full list is impossible.

TAARs often refer to a transaction or arrangement made (1) for commercial reasons as well as (2) not for tax avoidance/advantage.<sup>1</sup> There is (more or less) no difference between “for commercial reasons” and “on a commercial basis” except that the former is more apt to describe a single transaction, and the latter for a continuing business activity.

The word “commercial” is also identified as an ingredient or characteristic of other fundamental tax concepts, such as arm’s length, trade, and “bounty”.

Partnership law refers to carrying on business with a view to profit (without expressly referring to commerciality).<sup>2</sup>

Of course there are differences of wording and of context. But there are common underlying concepts so that commerciality/profitability are best addressed together, rather than in any particular context in which they may arise.

---

1 For a list, see 2.9.2 (Types of TAAR).

2 If the PA 1890 were drafted today, a commerciality test might have been included; but as will be seen, it makes little difference.

This topic has been a fruitful source of litigation.<sup>3</sup>

#### App. 5.1.1 Trade/commercial/profit compared

For illustration, consider s.66 ITA which provides:

- (1) Trade loss relief against general income for a loss made in a trade in a tax year is not available unless the trade is commercial.
- (2) The trade is commercial if it is carried on throughout the basis period for the tax year—
  - (a) on a commercial basis, and
  - (b) with a view to the realisation of profits of the trade.

The questions which arise here are:

- (1) Is there a trade (the “**trading test**”)
- (2) Is the trade carried on on a commercial basis (the “**commerciality test**”)
- (3) Is the trade carried on with a view to the realisation of profits (the “**profitability test**”)

The questions are conceptually distinct, but there is such a large degree of overlap that they seem like three ways of asking the same question.

Section 66 ITA (restriction on loss relief) assumes that an activity could be a trade even if it is not carried on on a commercial basis or with a view to profit. That seems far-fetched; but it depends on what is meant by commercial.<sup>4</sup>

If there is no view to profit, the trade is not likely to be conducted on a commercial basis; and vice versa. But one can devise instances where one test is satisfied and not the other.

Examples of a business with a view to profit but not commercial are:

- (1) A person invests 100 with a view to receiving 101 in 10 year’s time.
- (2) A person provides their services at an undervalue, perhaps for philanthropic reasons.

A possible example of a business which might be commercial without a view to profit, if it has some other commercial benefit, a loss-leader

---

3 There have many first instance cases, turning on their own facts, and of limited or no general interest; but in addition to the cases cited in this appendix, see: *Beacon Estates (Chepstow) Ltd v HMRC* [2014] UKFTT 686 (TC); *Rowbottom v HMRC* [2016] UKFTT 9 (TC); *Scambler v HMRC* [2017] UKUT 1 (TCC).

4 See App.2.20.7 (Trade: Commerciality).

perhaps, or generating a tax advantage (if that is commercial).

In the event of a dispute, HMRC are right in principle to argue on all 3 issues, as if they concede on trade, say, they have gone some way towards conceding on commerciality/profitability.

App. 5.1.2 *Loss relief: Policy background*

The Royal Commission Report on the Taxation of Profits and Income provides:

489. Criticism of the practical results of the right of set-off [of losses] concentrates mainly on the case of the “hobby-farmer”, the man who, enjoying a substantial income from other sources, engages in farming as a part-time activity. It is said that he readily incurs farming losses because they are carried at the marginal rate of tax on his other income. As to the balance that comes out of his own pocket, various reasons are suggested why he may be indifferent to that: the supply of agricultural produce for his home consumption, the prospect of ultimately realising a capital profit on the sale of his farm, the value of which he has improved by liberal expenditure, the amusement that he derives from indulgence in his hobby, the attraction of a “hedge” against inflation.

490. No doubt there is something in all this. Even if farming is not the only part-time business activity which may have an element of hobby about it, it is the one that has attracted most attention. It is possible to imagine heavy expenditure on income account ripening into an appreciable gain on capital account. Though the Revenue requires farm produced consumed to be credited at cost for tax purposes, it is possible to imagine that the figures taken for cost cover some element of personal benefit, apart from the mere right of access to the supply. ...

494. In the result we have come to the conclusion that the complaints against the losses of the hobby-farmer are probably exaggerated and that nothing more is required than a small amendment of the existing tax code which will have the effect of making it more difficult for any abuses to be maintained or to step in. The step that we recommend is that the term “husbandry” in the statutory definition of “farm land” and “farming” in Section 526(1) Income Tax Act, 1952, should be strengthened by defining it as husbandry “carried on on a commercial basis and with a view to the realisation of profits”, and that the term “market garden land” in the same section should be amended correspondingly by inserting after the words “for the sale of produce” the words “on a commercial basis and with a view to the realisation of profits”.

495. The additional words which we suggest are already familiar to the income tax code. They appear in Section 125(1) of the Income Tax Act, 1952, in aid of the definition of a person in occupation of woodlands who has the right to claim to be assessed under Schedule D instead of under Schedule B; and in Section 124(2) of the same Act for a similar purpose to define that occupation of land which, though not being farming or market gardening, is nevertheless assessable as a trade under Case I of Schedule D. Our proposal would therefore bring the definitions of farming and market gardening themselves into conformity with the other definitions.

496. It will appear from what we have said above that we should not expect our recommendation to bring about any considerable change in the present position, or markedly to reduce the volume of loss claims in respect of out of court claims in respect of farming activities which can be seen clearly to lack commercial inspiration and to be nothing more than hobbies or private amenities.

497. Other activities than farming—for instance, spare-time or hobby shops or businesses—are capable of raising similar problems, though they are likely to offer less practical consolations for loss incurred. If at any time loss claims in respect of them were found to raise a serious problem, a remedy on the same lines as that which we have recommended in the case of farming ought to be considered.

Heathcoat-Amory, then Chancellor of the Exchequer, stated in Parliament:

This Clause<sup>5</sup> is not designed to catch any undertaking which is run as a serious business, even if it is not very successfully managed. We are after the extreme cases which do not justify the term “farming undertaking”, in which expenditure very greatly exceeds income or any possible income which can ever be made and in which, however long the period, no degree of profitability can ever be reached. ... no genuine farming enterprise, in which the aim is to run as efficiently and productively as possible, with the long-term purpose of earning a profit, can possibly be endangered by the Clause.<sup>6</sup>

A provision originally aimed at hobby farming losses has been used in the HMRC attack on film schemes designed to generate allowable losses.

## App. 5.2 Commercial

<sup>5</sup> Section 20 FA 1960, which is the predecessor of s.66 ITA.

<sup>6</sup> <http://hansard.millbanksystems.com/commons/1960/may/24/clause-18-restriction-of-relief-for>

### App. 5.2.1 *A multi-factorial test*

“Commercial” is an imprecise word. Readers who struggle to comprehend it may take comfort from the comment of Viscount Dilhorne:

What exactly is comprehended in the phrase ... ‘a bona fide commercial transaction’, I do not know.<sup>7</sup>

The epithet “genuine” (a plain English equivalent for bona fide) does not help.<sup>8</sup>

It is considered that there is no single factor which determines what is “commercial” but a number of factors may indicate one way or the other. In other words, there is a multi-factorial test.

For an interesting empirical study of how the word commercial is understood, see Creative Commons, *Defining “Noncommercial” A Study of How the Online Population Understands “Noncommercial Use”*.<sup>9</sup>

Some more specialist issues are discussed in the context of the ToA motive defence; see 38.5.1 (Making/managing investments); 58.5.2 (Commercial: Whose viewpoint?).

### App. 5.2.2 *Bounty (gratuitous intent)*

A transaction made with bounty (gratuitous intent) is not commercial.<sup>10</sup>

---

<sup>7</sup> *IRC v Plummer* 54 TC 1 at p.48. Cf *IRC v Goodwin* 50 TC 583 at p.598.

<sup>8</sup> See 49.15.3 (“Genuine”).

<sup>9</sup> [http://mirrors.creativecommons.org/defining-noncommercial/Defining\\_Noncommercial\\_fullreport.pdf](http://mirrors.creativecommons.org/defining-noncommercial/Defining_Noncommercial_fullreport.pdf) (2009)

<sup>10</sup> *Bulmer v IRC* [1967] Ch 145, citing *IRC v Goodwin* 50 TC 583 at p.607. HMRC adopt this approach in *Venture Capital Schemes Manual*, in the context of the requirement in s.165 ITA that “The relevant shares must be subscribed for by the investor for genuine commercial reasons...”:

**11040. EIS: income tax relief: the investor: no tax avoidance** [Sep 2017]

**Commerciality**

This requirement rules out any subscription which is motivated by considerations of benevolence. This could be the case if, for example, the company were the proprietor of an unsuccessful professional football club and a supporter of the club paid a large premium for shares in the company; that may well [interestingly, the text formerly said *would clearly*] not be a commercial subscription. Similarly, if the company is owned by a person whom the investor wishes to benefit, and the investor pays a large premium for the shares with the object of increasing the value of the other person’s shares, that too would not be a commercial subscription. Deathbed investments are unlikely to be made for genuine commercial reasons.”

By contrast, a transfer intended to make money is commercial: see below.

For instance, a gift to a trust for the benefit of the settlor's family is not a commercial transaction. The same applies even if the settlor is the principal beneficiary, and the trust is revocable. By contrast, a transfer of assets to a company wholly-owned by the transferor may be a commercial transaction even if the transfer is for less than full (or nil) consideration, and a transfer to an employee trust may be commercial.<sup>11</sup>

### App. 5.2.3 *Business transaction*

In *Carvill v IRC*:

There was not much difference between the parties about what constituted a bona fide commercial transaction. [Counsel for the taxpayer] contended that this was any genuine transaction which implements or facilitates a business end; [counsel for HMRC] contended that the transaction must be in furtherance of commerce, ie a trade or business. I shall follow these two meanings.<sup>12</sup>

This seems a fair paraphrase though one should always beware of a paraphrase. At first sight it does not seem to take us very far because the word "business" is notoriously wide and slippery. Nevertheless, one can suggest examples of transactions which should not be classified as commercial because they are not in furtherance of a business:

- (1) A transfer to a trust to avoid the hazards of war.<sup>13</sup>
- (2) A transfer to avoid claims by non-business creditors, eg a claim on divorce or forced heirship.

These transfers involve an element of bounty (and may be classified as non-commercial for that reason) but in any event they should be classified as non-commercial transactions because they are not in furtherance of a business purpose.

### App. 5.2.4 *Amateur/dilettante trade*

---

<sup>11</sup> This is supported by *Wannell v Rothwell* 68 TC 719 at p.733B; see too *IRC v Levy* 56 TC 68 at p.87, a case on the meaning of settlement-arrangement. The definition of settlement-arrangement does not include the word "commercial" but the case law requirement of bounty (gratuitous intent) overlaps with the concept of "commercial".

<sup>12</sup> [2000] STC (SCD) 143 at p.166.

<sup>13</sup> See 49.4 (Enactment history).

In *Wannell v Rothwell*:<sup>14</sup>

I was not shown any authority in which the Court has considered the expression “on a commercial basis”, but it was suggested that the best guide is to view “commercial” as the antithesis of “uncommercial”, and I do find that a useful approach.

I think the passage which follows is more useful:

A trade may be conducted in an uncommercial way either because the terms of the trade are uncommercial (for instance, the hobby market-gardening enterprise where the prices of fruit and vegetables do not realistically reflect the overheads and variable cost of the enterprise) or because the way in which the trade is conducted is uncommercial in other respects (for instance, the hobby Art Gallery or Antique Shop where the opening hours are unpredictable and depend simply on the owner’s convenience). The distinction is between a serious trader who, whatever his shortcomings in skill, experience or capital, is seriously interested in profit, and the amateur or dilettante. There may well be many borderline cases for the Commissioners to decide, and such borderline cases could as well occur in Bond Street as at a car boot sale.

The BI Manual provides:

**BIM85705 uncommercial trades – not on a commercial basis** [Jan 2019]

... ‘Commercial’ is not the same as ‘profitable’. We take it to mean, conducted in the way that we would expect a business of the same type to be carried on. A distinction may also be drawn between individual transactions and the trade itself; individual transactions may have the character of commerciality but overall the way in which the trade is conducted may lack commerciality. Indeed, even where the trader is serious about what he does but does not act in the way someone in that type of trade would act, we take the view that the trade is not being conducted on a commercial basis. ... One important question to be addressed is whether there are any non-commercial reasons for becoming involved in a particular business, for example, has the trader a general interest in sailing which might explain the venture into yacht chartering.

App. 5.2.5 *Commercial: Profit motive*

---

<sup>14</sup> 68 TC 719 at p.733.

In *Samarkand Film Partnership No 3 v HMRC*:<sup>15</sup>

“Commercial” and “with a view to profit” are two different tests but that does not mean that profit is irrelevant when considering whether a trade is being carried on on a commercial basis. ... the serious interest in a profit is at the root of commerciality.<sup>16</sup>

The Court of Appeal agreed:<sup>17</sup>

... considerations of profitability cannot be divorced from an assessment of the commerciality of a business. In my judgment it is wrong to regard the profitability and commerciality tests in the legislation as mutually exclusive, and they necessarily overlap to an extent which will vary from case to case.

Again, in *Seven Individuals v HMRC*:<sup>18</sup>

40. ...As a matter of ordinary language to run a trade or business “on a commercial basis” suggests running the trade or business in a way that is at any rate designed to succeed as a commercial venture, that is one which is worth doing from a financial point of view. It is true that this means that there is an inevitable overlap between the commercial limb and profits limb, but the alternative would be to empty the commerciality limb of any connection with profit or profitability, when that is a central part of what would normally be understood by a reference to acting commercially...

46. ... I agree that a trader can fail the commerciality limb either because of a lack of commercial organisation ...or because of a lack of any interest in making money ... . But I do not think it follows that as long as the trade is sufficiently organised and the trader hopes to make a profit ... that is always enough. Let us assume that a trade is well organised. The question whether such a trade is being carried on on commercial lines is not to my mind answered simply by pointing to a

---

15 [2015] UKUT 211 (TCC) at [96]; the point was not discussed on appeal.

16 Ambrose Bierce makes the same point in *The Devil’s Dictionary* (1911) in his definition of “Merchant”: “A commercial pursuit is one in which the thing pursued is the dollar.”

Likewise *C&E v Morrison’s Academy* [1978] STC 1: “I am not at all quite clear what is meant by a ‘commercial element’ if it is something different from the pursuit of profit...”.

17 [2017] EWCA Civ 77 at [90].

18 [2017] UKUT 132 (TCC).

hope by the trader to make profits. A trade run on commercial lines seems to me to be a trade run in the way that commercially-minded people run trades. Commercially-minded people are those with a serious interest in profits, or to put it another way, those with a serious interest in making a commercial success of the trade. If therefore a trade is run in a way in which no-one seriously interested in profits (or seriously interested in making a commercial success of the trade) would run it, that trade is not being run on commercial lines.

In *Seven Individuals v HMRC*:<sup>19</sup>

A trade which lays out 100 in year 1 and recovers 101 in year 10 is a trade which makes a profit in the simple sense that its income exceeds its expenditure, yet it is unlikely that anyone with a serious interest in making a commercial success of the trade would regard that as a satisfactory return, even if it were virtually certain to happen.

#### App. 5.2.6 *Profit: Commerciality test*

In *Samarkand Film Partnership No 3 v HMRC*:<sup>20</sup>

[96] ...[The FTT] were correct in regarding “profit” in the context of commerciality as a real, commercial profit, taking account of the value of money over time, and not simply an excess of income over receipts. [97] The FTT were, in our view, right to conclude that a trade that involved transactions that were intended to produce a loss in net present value terms, with no compensating collateral benefits, was not conducted on a commercial basis. No one who was seriously interested in running a business or trade on commercial lines would pay £10 for an income stream with a net present value of £7 unless there were some good reason to do so. Of course in this case the reason why the partnerships were willing to do this was because they believed that tax relief would be available to the partners.

#### App. 5.2.7 *Commercial: avoidance motive*

HMRC Unallowable Purpose Tests Draft Guidance states at para 10110:

Often, a business will take the view that tax is a commercial cost and minimising it is a commercial aim. ... However, in deciding whether a “purpose test” is triggered, minimising tax is not regarded as a business

---

19 [2017] UKUT 132 (TCC) at [54].

20 [2015] UKUT 211 (TCC). The point was not discussed on appeal.

FD\_A5\_Commercial\_View\_to\_Profit\_2021.wpd

or commercial purpose.

On the contrary, I would have thought that the only thing that matters, in business and indeed outside it, is post-tax profit. The fact that TAARs impose a commercial *and* a tax avoidance/advantage test also suggests that tax avoidance is or can be commercial matter, in the general sense of the word. But context can of course suggest that “commercial” reasons exclude tax advantages.

### App. 5.3 A view to profit

This wording originated in the definition of partnership<sup>21</sup> and (subject as always to context) the meaning should be the same in tax provisions.

The definition of partnership uses the expression “with a view *of* profit” whereas modern legislation uses the more contemporary phrase “with a view *to* profit”. But nothing turns on the preposition; the two phrases have the same meaning.<sup>22</sup>

The BI Manual provides:

The expression ‘with a view of profit’ distinguishes partnerships

- [1] from clubs and societies which do not have a profit seeking motive, and also
- [2] from arrangements only to share expenditure, where each person keeps their own income, for example some dentists or medical practitioners with joint surgeries, or some crop-sharing agreements.<sup>23</sup>

I would have thought that case [2] (expense sharing) is not a partnership because the persons are not carrying on business *in common*. But the end result is the same.

If there is no view of profit, there is no partnership. This issue may arise where a partnership is set up for tax rather than for commercial reasons.

#### App. 5.3.1 *With a view: Subjective test*

*Macdonald v Dextra Accessories* considered the meaning of “with a view to” in the context of s 43 FA 1989 (“amounts ... held ... with a view to

---

21 See 82.5.2 (“View of profit”); 82.21.1 (LLP treated as partnership).

22 I think this is self-evident, but if authority is needed, see *Ingenious Games LLP v HMRC* [2019] STC 1851 at [301].

23 Author’s footnote: this would include barristers chambers.

their becoming relevant emoluments”):

the expression “with a view to” ... is a less specific expression than “for the sole purpose of...” or “with the principal or dominant intention of...”; and ... it suggests a degree of flexibility of meaning and application. That said, the word “view” plainly connotes some element (albeit undefined) of purpose, intention or contemplation.<sup>24</sup>

The UT have decided that the test is a purely subjective one (reversing earlier decisions).<sup>25</sup>

### App. 5.3.2 *View of partnership or of partners?*

In *Ingenious Games LLP v HMRC* [2019] STC 1851, a case on s.863 ITTOIA

[338] The test is also to be applied at the level of the LLP. An LLP is a body corporate, and therefore a separate legal entity from its members. For the purposes of s 863 ITTOIA 2005 it is necessary to focus on the LLP, its business and the individuals who conduct that business on its behalf, rather than on the position of the LLP’s members. This is in contrast with the position under s 2(1)(a) LIPA 2000, where the focus is on what view the members held at the point of incorporation

What matters is the controlling minds of the LLP (not the same as the members of the LLP).

The same applies to ordinary partnership (not a LLP). In *Samarkand Film Partnership No 3 and others v HMRC*:

The availability of loss relief to the individual partners in their personal capacities cannot in my view be a relevant factor in assessing the commerciality of the partnership’s business.<sup>26</sup>

This point should not apply to a sole trader (a non-partnership).

### App. 5.3.3 *Mixed motives*

In *Ingenious Games LLP v HMRC*.<sup>27</sup>

---

24 77 TC 146 at [64] (CA) approved at [18] (SC). This approach was applied in *Ingenious Games LLP v HMRC* [2019] STC 1851.

25 *Ingenious Games LLP v HMRC* [2019] STC 1851 at [333].

26 [2017] EWCA Civ 77 at [91].

27 [2019] STC 1851 at [310].

it will be sufficient for a taxpayer to show that there was an ancillary profit-making purpose,

And again:

There is no need for profit to be the predominant aim. ... difficult questions can arise when any profit-making aim is subsidiary to other purposes. In those circumstances, it is necessary to consider at what point the line is crossed and there is in fact no view to profit. Some sort of ‘reality check’ is needed. It is necessary to identify whether there is a ‘real’ intention rather than something that was not, in fact or reality, aimed for. ... Furthermore, an indifference to whether a profit is realised is not sufficient to meet the test.<sup>28</sup>

So:

The question is whether there is a real and serious intention to make a profit. As noted at [344] and [345] below, the [objective] likelihood of profit may be an element of relevant evidence, but no more.<sup>29</sup>

#### App. 5.3.4 *What is profit*

In *Ingenious Games LLP v HMRC*:<sup>30</sup>

‘profit’ means an excess of (actual) income over expenses, that is the net amount remaining after paying out of the receipts of the business all the expenses incurred in obtaining those receipts, and that it is not determined by reference to particular methods of accounting computation.

But profit can only be determined by reference to some method of accounting. Profit is a commercial concept, and I would have thought that it should be determined in accordance with accountancy principles, ie UK GAAP or any other acceptable GAAP. A business operates with a view of profit if it expects to make a profits on accountancy principles, even though it expects to make a loss on tax principles, due say to capital allowances.

HMRC agree. The BI Manual provides:

---

28 at [333].

29 at [340].

30 [2019] STC 1851 at [303].

**BIM85710: not with a view to the realisation of profit** [Aug 2016]  
‘Profit’ in this context is the commercial profit in the accounts, not the tax adjusted profit; that is, the profit before capital allowances but after depreciation and interest.

In *Ingenious Games LLP v HMRC*:<sup>31</sup>

the amount of the profits intended to be realised by the venture does not matter unless it is, on a true analysis, *de minimis*.

... in determining whether there is a view to profit the court should not adopt or employ a purely quantitative analysis. The amount of the expected profit is only one of several factors to consider.

#### App. 5.3.5 *A view to profit*

The BI Manual provides:

**BIM85710: not with a view to the realisation of profit** [Aug 2016]

...

There are two possible ways to displace the trader’s assertion of expectation of profits: either it is not a reasonable expectation, or there is another reason for carrying on the trade.

**It is not a reasonable expectation**

You may be able to show that there is no possibility of profit ever regardless of however long the trade is carried on, so the expectation of profit is unfounded, by closely examining any business plan, profits projection or whatever is provided as the basis for the trader’s expectations of profit. You are justified in pointing to past results when considering whether the trader’s expectation of profit is reasonable...

**There is another reason for carrying on the trade**

A trader who makes losses with no realistic possibility of making a profit may have some other reason for carrying on the trade. For example, it may be that the trade is a hobby (which in itself may fall foul of the commercial basis part of the test see BIM85705) or gives the trader personal enjoyment. It may also be the case that the trader is simply seeking to offset personal expenditure or to increase the value of a capital asset.

In the Special Commissioners’ case of *Delian Enterprises v Ellis* [1999] SpC186 the Revenue was unable to prove that the trader was carrying on a hobby. This was specifically mentioned by the Special Commissioner as a factor in his decision. In another Special

---

31 [2019] STC 1851 at [304], [310].

Commissioners' case *Brown v Richardson* [1997] SpC129 and TB31F the expressed intentions of the trader were not found to be conclusive. In this case the Special Commissioner found that the income generated was intended to offset expenditure rather than with a view to the realisation of profits.

#### App. 5.3.6 *Period of enquiry*

In *Ingenious Games LLP v HMRC*:<sup>32</sup>

the law of partnership does not require a net gain over a determined period in order to establish that an activity is with a view to profit, noting that a partnership may, for example, incur initial losses during the start-up phase of its enterprise. It is sufficient that the enterprise is carried on with a view to profit in the future.

BI Manual provides:

**BIM85710: not with a view to the realisation of profit** [Aug 2016]  
The criterion of the expectation of profit does not specify any period within which the trade must be expected to realise a profit and it is sufficient there is some realistic possibility of profit being earned at some future date, however distant. The fact that it is distant is not a ground for refusing relief. ...

### App. 5.4 Reasonable expectation of profit

View to profit is a subjective test.

Statute occasionally refers to reasonable expectation of profit, which brings in an objective test, or an objective element. There is a variety of wording. It is helpful to set three sample provisions side by side as an illustration:

**s.66 ITA**  
**Trade loss relief**

(1) Trade loss relief against general income for a loss made in a trade in a tax year is not available unless the trade is commercial.

**s.74 ITA**  
**Early trade losses relief**

(1) Early trade losses relief for a loss made by an individual in a trade in a tax year is not available unless the trade is commercial.

**s.1(1) PA 1890**  
**Definition of partnership**

Partnership is the relation which subsists between persons carrying on a business in common

---

32 [2019] STC 1851 at [310].

- (2) The trade is [identical] commercial if it is carried on throughout the basis period for the tax year—
- (a) on a commercial [identical] basis, and
- (b) with a view to the realisation of profits of the trade. (b) in such a way that profits of the trade could reasonably be expected to be made in the basis period or within a reasonable time afterwards.<sup>33</sup> with a view of profit.
- (3) If at any time a trade is carried on so as to afford a reasonable expectation of profit, it is treated as carried on at that time with a view to the realisation of profits.

There are (at least<sup>34</sup>) four possibilities, with different outcomes depending on whether one applies

- the partnership test (view to profit)
- the s.74 test (reasonable expectation of profit)
- the s.66 test (view to profit + s.66(3)), which falls between the two

Case	View to profit	Reasonable expect'n of profit	s.66 relief	s.74 relief	Partnership
1	Yes	Yes	Yes	Yes	Yes
2	Yes	No	Yes	No	Yes
3	No	Yes	Yes	Yes	No
4	No	No	No	No	No

Section 74(1)(b) imposes an objective test. Whether the trader has a view to profit is not relevant. This would matter if a person carried on trade on a commercial basis, with a reasonable expectation of profit, but not with

33 The definition of “excluded company” in s.151 ITA is another example of this wording.

34 To avoid too many permutations, assume that there is a trade or business carried on.  
 FD\_A5\_Commercial\_View\_to\_Profit\_2021.wpd 03/11/21

a view to profit; which seems highly unlikely even if logically possible.

It is possible that a trade which does not have a reasonable/objective expectation of profit is nevertheless carried on with a view to the realisation of profit: s.66(3) does not affect that.<sup>35</sup>

Case 2 arises if a person carried on a trade on a commercial basis but that profits could not reasonably be expected; it seems almost impossible, though perhaps not logically impossible.

#### App. 5.4.1 *Does objective/subjective matter*

I have some impatience with the whole objective/subjective distinction, which diverts lawyers in many contexts. The rival approaches of objective/subjective, or some combination of the two, so rarely produce a different result. That is especially so in the present context where the subjective test of view to profit is only part of a wider set of requirements which include objective requirements (trade/business, commerciality).

*Ingenious Games* poses the example of a person who carries on a business to manufacture saddles for unicorns: even if he had deluded himself into having a subjective intention to make a profit, there would be no realistic or objective possibility of profit. Or so the Tribunal thought, perhaps unimaginatively. But does that actually happen? And if it did, would the saddler's trade be carried on on a commercial basis?

However that may be, adoption of a uniform test for all loss reliefs - and indeed in other tax contexts where similar language is used - would be a useful simplification.

#### App. 5.5 **Commercial/view to profit: Tax motive**

Tax motives may arise in the context of the commerciality test and the profitability test, but it is suggested that the principles are the same.

In *Newstead v Frost* a non-resident partnership was set up in order to convert (what would otherwise have been) UK source trading income into foreign source trading income taxed on the remittance basis. The Revenue contended:

- (1) The business was carried on with a view to avoiding tax.
- (2) Accordingly it was not carried on with a view to profit.

This was a hopeless argument: the premise was correct but the conclusion

---

<sup>35</sup> If authority is needed, see *Seven Individuals v HMRC* at [35].

did not follow. HL dealt with it briefly:

While it is clear that the partnership was formed with that object [tax avoidance], it must also have been formed with a view of profit. It was intended that profits should be made for if they were not made as a result of the taxpayer's activities, there would have been no tax to be avoided.<sup>36</sup>

That was a straightforward case of a partnership set up for mixed purposes. One of the purposes was to make a profit.

Again, in *Backman v R*:

The question ... is whether the taxpayer can establish an intention to make a profit, whether or not he was motivated by tax considerations.<sup>37</sup>

On the other hand, if the *sole* reason for an activity is to give a tax advantage, and there is *no* contemplation in the parties' minds that a profit would arise from carrying on the activity, then the activity could not be said to be carried on with a view of profit (and it might not be said to be a business).<sup>38</sup>

This difficulty arises if, as in *Ingenious Games*, the only serious driver for profit is to meet a tax requirement (in that case, s.863 ITTOIA) so there was no pressure from the members of the LLP to make a profit. In other words, this was not a normal business motivated by the desire for profit. The LLP's sales memorandum was prepared on a 'bottom up' basis, starting with a modest profit and working backwards, rather than starting with expected revenues. These facts do not preclude a view to profit, but they make it harder to attain.

HMRC Unallowable Purpose Tests Draft Guidance states at para 10110:

Often, a business will take the view that tax is a commercial cost and minimising it is a commercial aim. ... However, in deciding whether a "purpose test" is triggered, minimising tax is not regarded as a business or commercial purpose.

On the contrary, I would have thought that the only thing that matters, in business and indeed outside it, is post-tax profit. The fact that TAARs impose a commercial *and* a tax avoidance/advantage test also suggests

---

36 [1980] STC 123 at p.128.

37 [2001] 3 ITLR 647 at [22].

38 This is self-evident; but if authority is needed, see *Backman v R* 3 ITLR 647 at [23].

that tax avoidance is or can be commercial matter, in the general sense of the word. But context can of course suggest that “commercial” reasons exclude tax advantages.

#### App. 5.5.1 *Intention to get loss relief*

An intention to obtain loss relief is a special case. In *Samarkand*, a film scheme case, a partnership activity was uncommercial and not profitable if one ignored loss relief; but if one could take loss relief into account, it was profitable for the partners and no doubt commercial. But loss relief was not allowed as relevant consideration in assessing commerciality:

In order to obtain loss relief, the partners have to show that the trade is commercial; but they can only do this if they assume their entitlement to obtain such relief, which is the very issue under consideration. In other words, the argument is circular and proves nothing. The question of commerciality must therefore be addressed without reference to the availability or not of loss relief to the individual partners.<sup>39</sup>

The reasoning is invalid as:

- (1) The taxpayer’s argument was not circular.<sup>40</sup>
- (2) The loss was a tax loss, not a commercial loss.

But the point is settled at all levels below the Supreme Court.

Similarly, loss relief would not be allowed as a relevant factor in deciding whether there was a view to profit.

---

39 [2017] EWCA Civ 77 at [91].

40 In order to show that the trade was commercial; the partners did not have to assume their entitlement to loss relief. They only had to show that they expected or hoped to obtain that relief.

## APPENDIX SIX

# WHAT DO WE MEAN BY “REAL”

App. 6.1 What do we mean by real

### App. 6.1 What do we mean by real

The word “real” is one of a cluster of words (including “genuine”<sup>1</sup> and “bona fide” and “in truth”) which are casually used, by lawyers and others, but merit careful thought. In this appendix I set out comments from the context of philosophy (JL Austin); literary criticism (Christopher Ricks); and some case law on “real” and form v substance distinctions.

The question whether *legal concepts or rules* should be described as fictions or legal fictions is a distinct question, because no-one doubts the validity of such rules even if they are called legal fictions.<sup>2</sup> Whereas if one identifies, say, a “realistic” view of *facts*, or a “real transaction”, it is implied that rival views are unrealistic/unreal and ought to be disregarded.

### App. 6.2 Reality: JL Austin

JL Austin, *Sense and Sensibilia*<sup>3</sup> has a profound discussion which I set out here. If it was required reading before anyone wrote the word “real”, a great deal of confusion might be avoided.

I want to take a closer look at this little word ‘real’. I propose, if you like, to discuss the Nature of Reality a genuinely important topic, though in general I

---

1 See 49.15.3 (“Genuine”).

2 See 97.2.1 (Is situs fictional?); App. 2.9.5 (Legal personality: a fiction?).

3 Chapter 7, set out here with kind permission of OUP. Footnotes are original.

The text of the entire book is available on:

<http://selfpace.uconn.edu/class/percep/AustinChs1-6.pdf>

<http://selfpace.uconn.edu/class/percep/AustinChs7-11.pdf>

don't much like making this claim.

There are two things, first of all, which it is immensely important to understand here.

1. 'Real' is an absolutely *normal* word, with nothing new-fangled or technical or highly specialized about it. It is, that is to say, already firmly established in, and very frequently used in, the ordinary language we all use every day. Thus *in this sense* it is a word which has a fixed meaning, and so can't, any more than can any other word which is firmly established, be fooled around with *ad lib*. Philosophers often seem to think that they can just 'assign' any meaning whatever to any word; and so no doubt, in an absolutely trivial sense, they can (like Humpty-Dumpty). There are some expressions, of course, 'material thing' for example, which only philosophers use, and in such cases they can, within reason, please themselves; but most words are *in fact* used in a particular way already, and this fact can't be just disregarded. (For example, some meanings that have been assigned to 'know' and 'certain' have made it seem outrageous that we should use these terms as we actually do; but what this shows is that the meanings assigned by some philosophers are *wrong*.) Certainly, when we have discovered how a word is in fact used, that may not be the end of the matter; there is certainly no reason why, in general, things should be left exactly as we find them; we may wish to tidy the situation up a bit, revise the map here and there, draw the boundaries and distinctions rather differently. But still, it is advisable always to bear in mind (*a*) that the distinctions embodied in our vast and, for the most part, relatively ancient stock of ordinary words are neither few nor always very obvious, and almost never just arbitrary; (*b*) that in any case, before indulging in any tampering on our own account, we need to find out what it is that we have to deal with; and (*c*) that tampering with words in what we take to be one little corner of the field is always liable to have unforeseen repercussions in the adjoining territory. Tampering, in fact, is not so easy as is often supposed, is not justified or needed so often as is often supposed, and is often thought to be necessary just because what we've got already has been misrepresented. And we must always be particularly wary of the philosophical habit of dismissing some (if not all) the ordinary uses of a word as 'unimportant', a habit which makes distortion practically unavoidable. For instance, if we are going to talk about 'real', we must not dismiss as beneath contempt such humble but familiar expressions as 'not real cream'; this may save us from saying, for example, or seeming to say that what is not real cream must be a fleeting product of our cerebral processes.

2. The other immensely important point to grasp is that 'real' is *not* a normal word at all, but highly exceptional; exceptional in this respect that, unlike 'yellow' or 'horse' or 'walk', it does not have one single, specifiable, always-the-same *meaning*. (Even Aristotle saw through this idea.) *Nor* does it have a

large number of different meanings - it is not *ambiguous*, even 'systematically'. Now words of this sort have been responsible for a great deal of perplexity. Consider the expressions 'cricket ball', 'cricket bat', 'cricket pavilion', 'cricket weather'. If someone did not know about cricket and were obsessed with the use of such 'normal' words as 'yellow', he might gaze at the ball, the bat, the building, the weather, trying to detect the 'common quality' which (he assumes) is attributed to these things by the prefix 'cricket'. But no such quality meets his eye; and so perhaps he concludes that 'cricket' must designate a *non-natural* quality, a quality to be detected not in any ordinary way but by *intuition*. If this story strikes you as too absurd, remember what philosophers have said about the word 'good'; and reflect that many philosophers failing to detect any ordinary quality common to real ducks, real cream, and real progress, have decided that Reality must be an *a priori* concept apprehended by reason alone.

Let us begin, then, with a preliminary, no doubt rather haphazard, survey of some of the complexities in the use of 'real'. Consider, for instance, a case which at first sight one might think was pretty straightforward - the case of a 'real colour'. What is meant by the 'real' colour of a thing? Well, one may say with some confidence, that's easy enough: the *real* colour of the thing is the colour that it looks to a normal observer in conditions of normal or standard illumination; and to find out what a thing's real colour is, we just need to be normal and to observe it in those conditions.

But suppose (a) that I remark to you of a third party, 'That isn't the real colour of her hair'. Do I mean by this that, if you were to observe her in conditions of standard illumination, you would find that her hair did not look that colour? Plainly not - the conditions of illumination may be standard already. I mean of course, that her hair has been *dyed*, and normal illumination just doesn't come into it at all. Or suppose that you are looking at a ball of wool in a shop, and I say, 'That's not its real colour.' Here I *may* mean that it won't look that colour in ordinary daylight; but I *may* mean that wool isn't that colour before it's dyed. As so often, you can't tell what I mean just from the words that I use; it makes a difference, for instance, whether the thing under discussion is or is not of a type which is *customarily* dyed.

Suppose (b) that there is a species of fish which looks vividly multi-coloured, slightly glowing perhaps, at a depth of a thousand feet. I ask you what its real colour is. So you catch a specimen and lay it out on deck, making sure the condition of the light is just about normal, and you find that it looks a muddy sort of greyish white. Well, is *that* its real colour? It's clear enough at any rate that we don't have to say so. In fact, is there any right answer in such a case?

Compare: 'What is the real taste of saccharine?' We dissolve a tablet in a cup of tea and we find that it makes the tea taste sweet; we then take a tablet neat, and we find that it tastes bitter. Is it *really* bitter, or *really* sweet?

(c) What is the real colour of the sky? Of the sun? Of the moon? Of a chameleon? We say that the sun in the evening sometimes looks red - well, what colour is it *really*? (What are the 'conditions of standard illumination' for the sun?)

(d) Consider a *pointilliste* painting of a meadow, say; if the general effect is of green, the painting may be composed of predominantly blue and yellow dots. What is the real colour of the painting?

(e) What is the real colour of an after-image? The trouble with this one is that we have no idea what an alternative to its 'real colour' might be. Its apparent colour, the colour that it looks, the colour that it appears to be? - but these phrases have no application here. (You might ask me, 'What colour is it really?' if you suspected that I had lied in telling you its colour. But 'What colour is it really?' is not quite the same as 'What is its real colour?').

Or consider 'real shape' for a moment. This notion cropped up, you may remember, seeming quite unproblematic, when we were considering the coin which was said to 'look elliptical' from some points of view; it had a real shape, we insisted, which remained unchanged. But coins in fact are rather special cases. For one thing their outlines are well defined and very highly stable, and for another they have a *known* and *nameable* shape. But there are plenty of things of which this is not true. What is the real shape of a cloud? And if it be objected, as I dare say it could be, that a cloud is not a 'material thing' and so not the kind of thing which has to have a real shape, consider this case: what is the real shape of a cat? Does its real shape change whenever it moves? If not, in what posture *is* its real shape on display? Furthermore, is its real shape such as to be fairly smooth-outlined, or must it be finely enough serrated to take account of each hair. It is pretty obvious that there is *no* answer to these questions - no rules according to which, no procedure by which, answers are to be determined. Of course, there are plenty of shapes which the cat definitely is not - cylindrical, for instance. But only a desperate man would toy with the idea of ascertaining the cat's real shape 'by elimination'.

Contrast this with cases in which we *do* know how to proceed: 'Are those real diamonds?', 'Is that a real duck?' Items of jewellery that more or less closely resemble diamonds may not be real diamonds because they are paste or glass; that may not be a real duck because it is a decoy, or a toy duck, or a species of goose closely resembling a duck, or because I am having a hallucination. These are all of course quite difference cases. And notice in particular (a) that, in most of them 'observation by a normal observer in standard conditions' is completely irrelevant; (b) that something which is not a real duck is not a *non-existent* duck, or indeed a non-existent anything; and (c) that something existent, e.g. a toy,

may perfectly well not be real, e.g. not a real duck.<sup>4</sup>

Perhaps by now we have said enough to establish that there is more in the use of 'real' than meets the cursory eye; it has many and diverse uses in many diverse contexts. We must next, then, try to tidy things up a little; and I shall now mention under four headings what might be called the salient features of the use of 'real' - though not *all* these features are equally conspicuous in all its uses.

1. First, 'real' is a word that we may call *substantive-hungry*. Consider:

'These diamonds are real';  
'These are real diamonds'.

This pair of sentences looks like, in an obvious grammatical respect, this other pair:

'These diamonds are pink';  
'These are pink diamonds'.

But whereas we can *just* say of something 'This is pink', we can't *just* say of something 'This is real'. And it is not very difficult to see why. We can perfectly well say of something that it is pink without knowing, without any reference to, what it *is*. But not so with 'real'. For one and the same object may be both a real *x* and not a real *y*; an object looking rather like a duck may be a real decoy duck (not just a toy) but not a real duck. When it isn't a real duck but a hallucination, it may still be a real hallucination - as opposed, for instance, to a passing quirk of a vivid imagination. That is, we must have an answer to the question 'A real *what?*', if the question 'Real or not?' is to have a definite sense, to get any foothold. And perhaps we should also mention here another point - that the question 'Real or not?' does not always come up, can't be raised. We *do* raise this question only when, to speak rather roughly, suspicion assails us - in some way or other things may not be what they seem; and we *can* raise this question only if there *is* a way, or ways, in which things may be not what they seem. What alternative is there to being a 'real' after-image?

'Real' is not, of course, the only word we have that is substantive-hungry. Other examples, perhaps better known ones, are 'the same' and 'one'. The same *team* may not be the same *collection of players*; a body of troops may be one

---

4 'Exist', of course, is itself extremely tricky. The word is a verb, but it does not describe something that things do all the time, like breathing, only quieter - ticking over, as it were, in a metaphysical sort of way. It is only too easy to start wondering what, then, existing *is*. The Greeks were worse off than we are in this region of discourse - for our different expressions 'to be', 'to exist' and 'real' they made do with the single word .... We have not their excuse for getting confused on this admittedly confusing topic.

*company* and also three *platoons*. Then what about ‘good’? We have here a variety of gaps crying out for substantives - ‘A good *what?*’, Good *at* what? - a good book, perhaps, but not a good novel; good at pruning roses, but not good at mending cars.<sup>5</sup>

2. Next, ‘real’ is what we may call a *trouser-word*. It is usually thought, and I dare say usually rightly thought, that what one might call the affirmative use of a term is basic - that, to understand ‘*x*’, we need to know what it is to be *x*, or to be an *x*, and that knowing this apprises us of what it is *not* to be *x*, not to be an *x*. But with ‘real’ (as we briefly noted earlier) it is the *negative* use that wears the trousers. That is, a definite sense attaches to the assertion that something is real, a real such-and-such, only in the light of a specific way in which it might be, or might have been, *not* real. ‘A real duck’ differs from the simple ‘a duck’ only in that it is used to exclude various ways of being not a real duck - but a dummy, a toy, a picture, a decoy, &c.; and moreover I don’t know *just* how to take the assertion that it’s a real duck unless I know *just* what, on that particular occasion, the speaker has it in mind to exclude. This, of course, is why the attempt to find a characteristic common to all things that are or could be called ‘real’ is doomed to failure; the function of ‘real’ is not to contribute positively to the characterisation of anything, but to exclude possible ways of being *not* real - and these ways are both numerous for particular kinds of things, and liable to be quite different for things of different kinds. It is identify of general function combined with immense diversity in specific applications which gives to the word ‘real’ the, at first sight, baffling feature of having neither one single ‘meaning’, nor yet ambiguity, a number of different meanings.

3. Thirdly, ‘real’ is (like ‘good’) a *dimension-word*. I mean by this that it is the most general and comprehensive term in a whole group of terms of the same kind, terms that fulfil the same function. Other members of this group, on the affirmative side, are, for example, ‘proper’, ‘genuine’, ‘live’, ‘true’, ‘authentic’, ‘natural’; and on the negative side, ‘artificial’, ‘fake’, ‘false’, ‘bogus’, ‘makeshift’, ‘dummy’, ‘synthetic’, ‘toy’ - and such nouns as ‘dream’, ‘illusion’, ‘mirage’, ‘hallucination’ belong here as well.<sup>6</sup> It is worth noticing here that, naturally enough, the *less* general terms on the affirmative side have the merit, in many cases, of suggesting more or less definitely what it is that is being

---

5 In Greek the case of σοφος [wise] is of some importance; Aristotle seems to get into difficulties by trying to use σοφια [wisdom] ‘absolutely’, so to speak, without specification of the field in which σοφια is exercised and shown. Compare on δεινοτης [cunning] too.

6 Of course, not all the uses of all these words are of the kind we are here considering - though it would be wise not to assume, either, that any of their uses are *completely* different, *completely* unconnected.

excluded; they tend to pair off, that is, with particular terms on the negative side and thus, so to speak, to narrow the range of possibilities. If I say that I wish the university had a proper theatre, this suggest that it has at present a *makeshift* theatre; pictures are genuine as opposed to *fake*, silk is natural as opposed to *artificial*, ammunition is live as opposed to *dummy*, and so on. In practice, of course, we often get a clue to what it is that is in question from the substantive in the case, since we frequently have a well-founded antecedent idea in what respects the kind of thing mentioned could (and could not) be ‘not real’. For instance, if you ask me ‘Is this real silk?’ I shall tend to supply ‘as opposed to artificial’, since I already know that silk is the kind of thing which can be very closely simulated by an artificial product. The notion of its being *toy* silk, for instance, will not occur to me.<sup>7</sup>

A large number of questions arises here - which I shall not go into - concerning both the composition of these families of ‘reality’ words and ‘unreality’ words, and also the distinctions to be drawn between their individual members. Why, for instance, is being a *proper* carving knife one way of being a real carving knife, whereas being *pure* cream seems not to be one way of being *real* cream? Nor to put it differently: how does the distinction between real cream and synthetic cream differ from the distinction between pure cream and adulterated cream? Is it just that adulterated cream still is, after all, *cream*? And why are false teeth called ‘false’ rather than, say, ‘artificial’? Why are artificial limbs so-called, in *preference* to ‘false’? Is it that false teeth, beside doing much the same job as real teeth, look, and are meant to look, *deceptively* like real teeth? Whereas an artificial limb, perhaps, is meant to do the same job, but is neither intended, nor likely, to be *passed off* as a real limb.

Another philosophically notorious dimension-word which has already been mentioned in another connection as closely comparable with ‘real’, is ‘good’. ‘Good’ is the most general of a very large and diverse list of more specific words, which share with it the general function of expressing commendation, but differ among themselves in their aptness to, and implications in, particular contexts. It is a curious point, of which Idealist philosophers used to make much at one time, that ‘real’ itself, in certain uses, may belong to this family. ‘Now this is a *real* carving knife!’ may be one way of saying that this is a good carving

---

7 Why not? Because silk can’t be a ‘toy’. Yes, but why not? Is it that a toy is, strictly speaking, something quite small, and specially made or designed to be manipulated in play? The water in toy beer-bottles is not toy beer, but *pretend* beer. Could a toy watch actually have clockwork inside and show the time correctly? Or would that be just a *miniature* watch?

knife.<sup>8</sup> And it is sometimes said of a bad poem, for instance, that it isn't really a poem at all; a certain standard must be reached, as it were, even to *qualify*.

4. Lastly, 'real' also belongs to a large and important family of words that we may call *adjuster-words* - words, that is, by the use of which other words are adjusted to meet the innumerable and unforeseeable demands of the world upon language. The position, considerably over-simplified no doubt, is that at a given time our language contains words that enable us (more or less) to say what we want to say in most situations that (we think) are liable to turn up. But vocabularies are finite; and the variety of possible situations that may confront us is neither finite nor precisely foreseeable. So situations are practically bound to crop up sometimes with which our vocabulary is not already fitted to cope in any tidy, straightforward style. We have the word 'pig', for instance, and a pretty clear idea which animals, among those that we fairly commonly encounter, are and are not to be so called. But one day we come across a new kind of animal, which looks and behaves very much as pigs do, but not *quite* as pigs do; it is somehow different. Well, we might just keep silent, not knowing what to say; we don't want to say positively that it *is* a pig, or that it is *not*. Or we might, if for instance we expected to want to refer to these new creatures pretty often, invent a quite new word for them. But what we could do, and probably would do first of all, is to say, 'It's *like* a pig'. ('Like' is *the* great adjuster-word, or, alternatively put, the main flexibility-device to whose aid, in spite of the limited scope of our vocabulary, we can always avoid being left completely speechless.) And then, having said of this animal that it's *like* a pig, we may proceed with the remark, 'But it isn't a *real* pig'. If we think of words as being shot like arrows at the world, the function of these adjuster-words is to free us from the disability of being able to shoot only straight ahead; by their use on occasion, such words as 'pig' can be, so to speak, brought into connexion with targets lying slightly off the simple, straightforward line on which they are ordinarily aimed. and in this way we gain, besides flexibility, precision; for if I can say, 'Not a real pig, but like a pig', I don't have to tamper with the meaning of 'pig' itself.

But, one might ask, do we *have* to have 'like' to serve this purpose? We have, after all, other flexibility-devices. For instance, I might say that animals of this new species are 'piggish'; I might perhaps call them 'quasi pigs', or describe them (in the style of vendors of peculiar wines) as 'pig-type' creatures. But these devices, excellent no doubt in their way, can't be regarded as substitutes for 'like', for this reason: they equip us simply with new expressions on the same level as, functioning in the same way as, the word 'pig' itself; and thus, though

---

8 Colloquially at least, the converse is also found: 'I gave him a good hiding' - 'a real hiding' - 'a proper hiding'.

they may perhaps help us out of our immediate difficulty, they themselves may land us in exactly the same *kind* of difficulty at any time. We have this kind of wine, not real port, but a tolerably close approximation of port, and we call it ‘port type’. But then someone produces a new kind of wine, not port exactly, but also not quite the same as what we now call ‘port type’. So what are we to say? It is port-type type? It would be tedious to have to say so, and besides there would clearly be no future in it. But as it is we can say that it is *like* port-type wine (and for that matter rather like port, too); and in saying this we don’t saddle ourselves with a *new word*, whose application may itself prove problematic if the vintners spring yet another surprise on us. The word ‘like’ equips us *generally* to handle the unforeseen, in a way in which new words invented *ad hoc* don’t, and can’t.

(Why then do we need ‘real’ as an adjuster-word as well as ‘like’? Why exactly do we want to say, sometimes ‘It is like a pig’, sometimes ‘It is not a real pig? To answer these questions properly would be to go a long way towards making really clear the use, the ‘meaning’, of ‘real’.)<sup>9</sup>

It should be quite clear, then, that there are no criteria to be laid down *in general* for distinguishing the real from the not real. How this is to be done must depend on *what* it is with respect to which the problem arises in particular cases. Furthermore, even for particular kinds of things, there may be many different ways in which the distinction may be made (there is not just *one* way of being ‘not a real pig’)—this depends on the number and variety of the surprises and dilemmas nature and our fellow men may spring on us, and on the purposes and dilemmas we have been faced with hitherto. And of course, if there is *never* any dilemma or surprise, the question simply doesn’t come up; if we had simply never had occasion to distinguish anything as being in any way like a pig but not a *real* pig, the words ‘real pig’ themselves would have no application—as perhaps the words ‘real after-image’ have no application.

Again, the criteria we employ at a given time can’t be taken as *final*, not liable to change. Suppose that one day a creature of the kind we now call a cat takes to talking. Well, we say to begin with, I suppose, ‘This cat can talk.’ But then other cats, not all, take to talking as well; we now have to say that some cats talk, we distinguish between talking and non-talking cats. But again we may, if talking becomes prevalent and the distinction between talking and not talking seems to us to be really important, come to insist that a *real* cat to be a creature that can talk. And this will give us a new case of being ‘not a real cat’, i.e. being

---

9 Incidentally, nothing is gained at all by saying that ‘real’ is a *normative* word and leaving it at that, for ‘normative’ itself is much too general and vague. Just how, in what way, is ‘real’ normative? Not, presumably, in just the same way as ‘good’ is. And it’s differences that matter.

a creature just like a cat except for not talking.

Of course—this may seem perhaps hardly worth saying, but in philosophy it seems it does need to be said—we make a distinction between ‘a real *x*’ and ‘not a real *x*’ only if there is a way of telling the difference between what is a real *x* and what is not. A distinction which we are not in fact able to draw is—to put it politely—not worth making.

### App. 6.3 Real: literary criticism

Here is Christopher Ricks in *The Force of Poetry*:<sup>10</sup>

The *O-Scz* Supplement (1982) to the *Oxford English Dictionary* is a revelation as to the changes that have taken place for this word. One of the most important is the belated acknowledgement of usages which were perfectly available to the original compilers of the *OED* but were strikingly unrecognized. Thus the *OED* itself did not acknowledge one-hard-headed economic sense of *real*: ‘Reckoned by purchasing power rather than monetary or nominal value’, although this sense is (we now learn) as old as Dr. Johnson and Adam Smith. ‘In real terms ...’: oh yes, those terms are now understood to be all too real. And to this old but unacknowledged economic sense, the Supplement to the *OED* is able to add our characteristic extensions: *real money*, in American English (at first) as ‘a large sum of money’; and *real money*, in British English, as ‘the coinage or currency in which one habitually reckons, frequently as opposed to foreign currency’.

Another of the important usages with the *OED* declined to notice is *real life*, though this is as old as Thomas Jefferson and Maria Edgeworth. We should not be surprised that the Supplement’s earliest citation is Jefferson’s American English (if that term is altogether right for the year 1771): ‘Considering history as a moral exercise, her lessons would be too infrequent if confined to real life’. ‘Real life’, like its brother ‘the real world’, has been suspected of being both soft-headed and hard-nosed. Those who believe that the bourgeoisie, or whoever, will oppressively claim that particular social arrangements are ineluctable reality are quick to put sneering quotation-marks around the word *real* (‘real’). Those who, often from the opposite flank, object to the implications that factories are real whereas universities aren’t, are quick to find unreal this use of ‘real’, especially when a university man is guilty of this *trahison des clercs*:

The Vice-Chancellor of Lancaster University strongly believes “that the university must keep contact with the real world outside.” May I take this opportunity to ask ...: (a) what is real about the real world? (b) why is it always outside?

---

10 (1984), p.438; good holiday reading. Some references omitted here.

But then there are all those applications of *real* which were subsequent to the *OED* and which are pointers to the way we live now, the relation of our times to time. ‘Real time’: ‘the actual time during which a process or event occurs, especially one analyzed by a computer, in contrast to time subsequent to it when computer processing may be done, a recording replayed, or the like’. (‘It’s rapidly rerun all the time’; ‘I replay the past’.) More grimly, there is the newly-felt need for the sense of *real* which is at work in real coffee’ (‘coffee made, directly from ground coffee beans, as opposed to “instant” coffee’ – *opposed* is good). This dates from 1964; and from 1972 there is the Campaign for Real Ale (‘a name sometimes applied to draught beer that has been brewed and stored in the traditional way’)...

Our world has become increasingly suspicious of both the real and the unreal. Hence the gingerly way in which the word *real* gets handled, as if the very thought of it were unreal. ‘The real thing’ (‘True love, as distinct from infatuation, flirtation, etc. [a great *et cetera*]’) goes back as far as 1857, we now learn from the Supplement (the *OED* did not acknowledge it); but as the years went by, ‘the real thing’ became suspected of the very unreality it was challenging. People felt that it was being capitalized upon, and the only way to protect us against this was to capitalize it back: the Real Thing. Mary McCarthy (1941): ‘All that conjugal tenderness had been a brightly packaged substitute for the Real Thing’ – where the capitals on the Real Thing make it look as if it too is a bit of bright packaging.

*Real* as meaning ‘“genuine”, free from nonsense, affection, or pretence’ is likewise much older than one would have thought (it is in Tennyson); but it has lately been having its work cut out, stemming the tide of inauthenticity and insincerity, of illusions of feeling. Hence the escalation into the comparative form, ‘realler’ (not something you can usually do with the word ‘real’, after all).

He [Seymour Krim] ... finds that criticism gets in the way of his ‘truer, realer, imaginative bounce.’ (1961)

This was a realler America than I had known in the past, hitching on this or that bandwagon or presidential campaign. (1966)

*Time* Magazine gives a more wistful tone to its escalation: ‘Billy is very sweet and very gentle and very real’ (1977).

Then there has been the proliferation of reality-hyphenations (or -hypes, for short). Reality-content, reality-control, reality-based, reality-centred, reality-principle, reality-testing, reality-value, and reality-therapy; the stock-piling of these being enough to make reality seem, yet again, unreal. The very devices which seek to emphasise the real then have the effect of scepticizing it. Leslie Fiedler, in his fiery emphasis, goes for the double ‘really’, with the second one underlined: ‘what the self-appointed censors have always objected to ... is not

really, *really* the act that they are violent ...’ Czeslaw Milosz defines poetry as ‘a passionate pursuit of the Real’, whereupon Henry Gifford was drily though sincerely solicitous: ‘The capital letter may increase rather than disarm the scepticism of many readers’. The 3<sup>rd</sup> edition of the *Oxford Dictionary of Quotations* (1979) no longer has room for Longfellow’s ‘Life is real! Life is earnest!’. I suspect that it was censored.

Which leads – finally – to a notable American invention to cope with some aspects of this, an invention which is itself then tinged with evanescence: ‘for real’. *Real* no longer feeling real, American English calls into existence a demarcated variant. As meaning ‘genuine, (in) earnest, true, sincere’, the earliest citation in the *O-Sz Supplement to the OED* is Billie Holiday in 1956 (‘The only joints fancy enough to have a victrola and for real enough to pick up on the best records’). If in 1984 John Glenn had one thing to offer – other than the obvious one – which none of the other Democratic Presidential hopefuls could claim, it was his having furnished the earliest *OED Supplement* citation for a sub-section of a word: under ‘for real’: ‘adv. Really, truly, actually; in reality: 1962 J. Glen, *Into Orbit*: Everyone seemed to sense that we were going for real this time’. Senator Glenn, as he then wasn’t, may claim to have put the adverbial usage into orbit. But it was John Berryman who made the most of ‘for real’, making real – realizing – the fact that it too is hastening towards unreality. *The Dream Songs*: 7 long for the old (young) freshness which time has undone:

‘THE PRISONER OF SHARK ISLAND’  
WITH PAUL MUNI

Henry is old, old: for Henry remembers  
Mr Deeds’ tuba, & the Cameo,  
& the race in *Ben Hur*, – *The Lost World*, with sound,  
& *The Man from Blankley’s*, which he did not dig,  
nor did he understand one caption of,  
bewildered Henry, while the Big Ones laughed.

Now Henry is unmistakably a Big One,  
Fúnnee, he don’t féel so.  
He just stuck around.  
The German & the Russian films into  
Italian & Japanese films turned, while many  
were prevented from making it.

He wishing he could squirm again where Hoot  
is just ahead of rustlers, where William S  
forgoes some deep advantage, & moves on,  
where Hashknife Hartley having the matter taped

the rats are flying. For the rats  
have moved in, mostly, and this is for real.

What Berryman does is combine the conviction that the reality is now known to be very ugly and is no play-acting, dummy-run or film fantasy (‘For the rats / have moved in, mostly, and this is for real’), with the conviction – the instant obsolescence of a phrase like ‘for real’ – that these days no apprehension of the real can last for long. Even happy apprehensions of nemesis, as when Dylan sings, in ‘When The Ship Comes In’:

Oh the foes will rise  
With the sleep still in their eyes  
And they’ll jerk from their beds an think they’re dreamin’.  
But they’ll pinch themselves and squeal  
And know that it’s for real,  
The hour when the ship comes in.

#### **App. 6.4 Real nature of transaction**

*Sothorn-Smith v Clancy* discusses this expression in the context of the income/capital distinction:<sup>11</sup>

... whether it is in truth an income or a capital payment ... Questions of this kind are notoriously difficult and give rise to distinctions of a highly artificial character. ...

It is no doubt true to say that in order to answer the question the real nature of the transaction must be ascertained. The proposition has an engaging appearance of simplicity but it is not so simple as it sounds. For the expression ‘the real nature of the transaction’ is ambiguous. It may mean the ‘real nature’ of the legal relationship of the parties which results from the transaction—a matter which may not be in doubt. Or it may include as well the ‘real nature’ of the transaction from a financial point of view, a matter which at once raises a number of difficulties.

If the transaction be one under which A, being or becoming indebted to B for a sum of £1,000, agrees with B to repay this sum by ten yearly instalments, or if A being the purchaser of property from B for £1,000 agrees to pay the purchase price by ten yearly instalments, the ‘real nature’ of the transaction from the legal point of view is that A is contracting to pay by instalments in the one case a debt and in the other a purchase price. In such cases the very nature of the legal relationship

---

<sup>11</sup> 24 TC 1, at p.6.

constituted by the contract prevents the annual payments from being anything but payments of capital.

## App. 6.5 Economic reality etc

### App. 6.5.1 *Economic terms with antonym*

The adjective “economic” can make up useful labels, for instance:

Label	Antonym	See para
Economic double taxation	Juridical double taxation	48.3.2; 103.3
Economic settlor	Nominal settlor	102.15.5
Economic employer	Formal employer	36.9.1

What grounds these expressions, and gives them reasonable precision, is that:

- (1) they have an antonym, and
- (2) the distinction between expression and antonym is capable of explanation and elaboration<sup>12</sup>

This relates to Austin’s insight that the word “real” is correctly used when we have in mind some specific way in which something can fail to be “real”.

### App. 6.5.2 *Economic reality/consequences*

The expression “economic reality” lacks the anchor of a clear antonym. So it is vague, evaluative, subjective and often debatable. The same applies where “economic” is in other collocations such as “economic consequences” and “economic activities”.<sup>13</sup>

“Economic consequences/reality”, I suggest, is more often than not a form/substance distinction under a more appealing name. This is a classification and not a criticism. There is nothing necessarily wrong with a form/substance distinction, but (1) it should be recognised for what it is; and (2) it does not offer a satisfactory basis for taxation unless kept firmly in place. In *Russell Baker v HMRC*:<sup>14</sup>

---

12 I would add to this list the term “economic equivalent to interest”, which though it has no short antonym, is defined with reasonable precision: see 25.24.1 (Economic equivalent to interest).

13 See 49.14.5 (Economic consequences); 102.15.5 (Genuine economic activities).

14 [2013] UKFTT 394 (TC) at [60]; and see App.6.5 (Real nature of transaction).

FD\_A6\_What\_Do\_We\_Mean\_by\_Real\_2021 (1).wpd

We discount entirely any suggestion that the Appellant should be taxed on the basis of the “economic reality”<sup>15</sup> of what has taken place. Such a submission has a degree of unreality about it, bearing in mind the approach taken by HMRC in the sad appeals from defrauded investors in complicated life insurance bonds who have lost most or all of their investment but are still being taxed by HMRC on entirely fictitious gains arising under the life policy “chargeable events” rules.<sup>16</sup>

Incidentally, one wonders what economists would think of the terms economic consequences/purposes/reality. Lawyers are not economists, and there is some risk in what John Kay derides as “DIY economics”.<sup>17</sup> It is said that the human sciences envy the precision of natural sciences (“physics envy”). But is there any reason for lawyers to envy economists?

### App. 6.6 Realistic view of facts

In *Collector of Stamp Revenue v Arrowtown Assets*:<sup>18</sup>

The driving principle in the *Ramsay* line of cases continues to involve a general rule of statutory construction and an unblinkered approach to the analysis of the facts. The ultimate question is whether the relevant statutory provisions, construed purposively, were intended to apply to the transaction, viewed realistically.

In this much quoted comment, does “realistically” mean anything? - and if so, what does it mean? Is it, perhaps, another euphemism for a form/substance distinction of some kind? Is there any difference between this and the *Ramsay* principle? Discuss.

### App. 6.7 The real world

Ricks in the passage cited above notes battles to occupy the high ground of “the real world”. In *Ramsay v IRC*:<sup>19</sup>

The capital gains tax was created to operate in the real world, not that of make-belief. As I said in *Aberdeen Construction Group v IRC*,<sup>20</sup> it

---

15 Author’s footnote: The scare quotation marks are in the original.

16 Is this referring to reported case law or just HMRC practise?

is a tax on gains (or I might have added gains less losses), it is not a tax on arithmetical differences.

From the humdrum point of view of legal analysis, this is best regarded as a rhetorical flourish. It would be a mistake to analyse it as if it were a legal argument or principle. It announces a conclusion, rather than a reason for reaching a conclusion. So while, naturally, this elevated prose is often cited in argument, it has never made a difference to the outcome.

### **App. 6.8 Form v substance: Cardinal principle**

In *Ramsay v IRC*:

Given that a document or transaction is genuine [not a sham], the court cannot go behind it to some supposed underlying substance. This is the well-known principle of *IRC v Duke of Westminster*.<sup>21</sup> This is a cardinal principle ...

### **App. 6.9 Cardinal principle qualified**

This well-known, cardinal principle is qualified or, some might say, heavily qualified:

... but it must not be overstated or overextended. While obliging the court to accept documents or transactions, found to be genuine, as such, it does not compel the court to look at a document or a transaction in blinkers, isolated from any context to which it properly belongs. If it can be seen that a document or transaction was intended to have effect as part of a nexus or series of transactions, or as an ingredient of a wider transaction intended as a whole, there is nothing in the doctrine to prevent it being so regarded: to do so is not to prefer form to substance, or substance to form. It is the task of the court to ascertain the legal nature of any transaction to which it is sought to attach a tax or a tax consequence and if that emerges from a series or combination of transactions, intended to operate as such, it is that series or combination which may be regarded.

... For the Commissioners considering a particular case it is wrong, and an unnecessary self-limitation, to regard themselves as precluded by their own finding that documents or transactions are not "shams", from considering what, as evidenced by the documents themselves or by the manifested intentions of the parties, the relevant transaction is. They

---

21 19 TC 490.

are not, under the *Westminster* doctrine or any other authority, bound to consider individually each separate step in a composite transaction intended to be carried through as a whole. This is particularly the case where (as in *Rawling*) it is proved that there was an accepted obligation once a scheme is set in motion, to carry it through its successive steps. It may be so where (as in *Ramsay* or in *Black Nominees Ltd. v Nicol*<sup>22</sup>) there is an expectation that it will be so carried through, and no likelihood in practice that it will not.

### App. 6.10 Cardinal principle reaffirmed

How we draw the line between the cardinal principal and the qualification, how the line has shifted in the four decades since the *Ramsay* decision, whether the Courts have succeeded in articulating that line, and whether any line can be drawn, - these questions are not pursued here. But the principle itself continues.

*Khan v HMRC*<sup>23</sup> concerned a company purchase. It was originally proposed that:

- (1) The company should buy in its own shares for £1.95m
- (2) The purchaser should purchase (what was left of) the company for £18k.

The sellers were concerned they may be liable to income tax on the purchase of own shares. So the proposal was altered and the sale carried out with an added step which might fairly be described as artificial and self-cancelling:

- (1) The purchaser borrowed £1.95m from the company.
- (2) The purchaser purchased the company for the sum of £1.968m and used the borrowed money to pay the purchase price.<sup>24</sup>
- (3) Immediately on completion of the purchase:
  - (a) The company bought in 99% of its own shares, for the sum of £1.95m.
  - (b) That sum was used to repay the loan.

The company’s purchase of its own shares at step 3(a) was of course a

---

22 50 TC 229.

23 [2021] EWCA Civ 624.

24 Was this compliant with company law?

distribution.<sup>25</sup> So at the end of these steps, the hapless Mr Khan had received an income-taxable distribution of £1.95m but had no money to show for it, as he used it to repay the loan.<sup>26</sup> The taxpayer argued that the Court should:<sup>27</sup>

consider the sale and buyback of the shares as a single composite transaction and consider its overall effect rather than concentrating on the machinery by which it was effected (i.e. the legal steps in the chain). In substance and in truth, Mr Khan was no more than a conduit for the selling shareholders to effect the buyback of the 98 shares themselves and his intermediate role in that aspect of the transaction should be ignored. As a matter of practical<sup>28</sup> reality, the 98 shares were never Mr Khan's to do with as he pleased, nor were the buyback proceeds. He never had the benefit of nor control over the £1.95 million and it was "absurd" to tax him on that sum, all the more so if the selling shareholders were liable to pay CGT on that sum (less their cost of acquiring the shares)...

the overall economic outcome was precisely the same as it would have been had the deal been structured in the manner originally envisaged and most of the shares had been the subject of a direct buyback by the Company from the vendor shareholders

More analytically, the question was whether Mr Khan received/was entitled to the distribution.<sup>29</sup>

Note how substance, truth and reality are all thrown into the submission pot. But the Court followed the approach of *Henriksen v Grafton Hotel*:<sup>30</sup>

An attempt was made to rescue this argument from shipwreck by saying that if the lessor had undertaken to bear these payments and had consequently exacted a higher rent, the full rent could have been deducted as an expense. This argument has a familiar ring. The answer

---

25 Section 1033 CTA 2010.

26 This arrangement - foolish does not begin to do it justice - was designed so that the sellers were subject to CGT on the sale proceeds. Of course, Mr Khan may have had a claim against his advisers.

27 at [39], [75].

28 An analytically minded reader might ask: Is there any other type of reality? But the question would be misconceived, because the expression is the language of rhetoric, not reason, and so not susceptible to a logical analysis.

29 See 14.6 (When are dividends recognised).

30 24 TC 453 at p.460.

to it is that this was not the contract which the parties chose to make.

It frequently happens in income tax cases that the same result in a business sense can be secured by two different legal transactions, one of which may attract tax and the other not. This is no justification for saying that a taxpayer who has adopted the method which attracts tax is to be treated as though he had chosen the method which does not or vice versa.

One might also have cited *Spectros International v Madden*<sup>31</sup> and *IRC v Wesleyan and General Assurance Society*.<sup>32</sup> With these questions of high generality is there is too much authority to cite it all. Did the point need repeating? The reader may think that *Khan* should not have been given permission to appeal, even for the first of its two appeals. For if Mr Khan was not entitled to the distribution, who was? It could not be the sellers. There could not be a distribution to which no-one is entitled. And there clearly was a distribution, because £1.95m was extracted from the company. On the facts of *Khan*, a substance approach just does not work.

### App. 6.11 Reality and avoidance purpose

In *Khan v HMRC*:<sup>33</sup>

It is unusual for a taxpayer to rely upon the *Ramsay* approach, which is generally invoked by HMRC when seeking to challenge artificial tax-avoidance schemes (which this undoubtedly was not). However,

---

31 See App. 4.2.3 (Contract stating consideration).

32 30 TC 11 at p.16: “In dealing with Income Tax questions it frequently happens that there are two methods at least of achieving a particular financial result. If one of those methods is adopted, tax will be payable. If the other method is adopted, tax will not be payable. It is sufficient to refer to the quite common case where property is sold for a lump sum payable by instalments. If a piece of property is sold for £1,000 and the purchase price is to be paid in ten instalments of £100 each, no tax is payable. If, on the other hand, the property is sold in consideration of an annuity of £100 a year for ten years. tax is payable. The net result from the financial point of view is precisely the same in each case. but one method of achieving it attracts tax and the other method does not.

There have been cases in the past where what has been called the substance of the transaction has been thought to enable the Court to construe a document in such a way as to attract tax. That particular doctrine of substance as distinct from form was, I hope, finally exploded by the decision of the House of Lords in the case of *Duke of Westminster v IRC*, 19 TC 490...”

33 [2021] EWCA Civ 624 at [81].

the principles in *Ramsay* are of general application,

In fact, there was an avoidance motive in *Khan*, though those who (successfully) avoided income tax were the sellers and not the purchaser. But putting that to one side, as a matter of case law, is it really true to say that the Courts have applied the same principles in avoidance and non-avoidance cases? And as a matter of tax policy, would it not be sensible to apply different principles? Discuss.

### App. 6.12 Real used as intensifier

Applied to words which are matters of degree, “real” may also be used as an intensifier (a term applied to crude expletives, as well as words such as *very*). For instance, *influence* is a matter of degree - one might have little or much. Thus *real influence* means substantial influence, or at least, more than a tiny/de minimis amounts of influence; but how much more is not indicated.

The parliamentary drafter does not use this term, the reader may think, quite rightly.

### App. 6.13 Essence

“Essence” is used in the following provisions discussed in this book:

Disguised trading income:

Arrangement in essence a means of providing benefits; see xxx.

In essence some connection between payment and provision of goods/services; see xxx

In the second case, one might think that “some connection” is vague enough without adding a reference to essences. But there it is.

Section 23A(7)/23C(6) ITTOIA add:

For the purposes of subsection (3)/(5) in particular, all relevant circumstances are to be taken into account in order to get to the essence of the matter.

This is obviously unnecessary, and while it does no harm, some readers may think the verbiage regrettable. But there it is. Perhaps the author felt some exasperation, and this is how he expressed it. The task of the

parliamentary drafter is not an easy one.

## APPENDIX SEVEN

# DEEMING PROVISIONS

App. 7.1

### App. 7.1 Construction of deeming provisions

The interpretation (or construction) of statutes needs a book to itself, and many such books have been written. However most of the principles of interpretation can only be expressed at a high level of generality which makes their application doubtful and their usefulness to the practitioner is limited.<sup>1</sup> In short, language is difficult to put into words.<sup>2</sup>

This appendix concerns a narrower topic, the construction of deeming provisions. Deeming provisions are common in tax statutes, and the topic arises at various points in this book.<sup>3</sup> It is therefore convenient to consider it as a discrete topic.

### App. 7.2 “Deeming provision”

A “**deeming provision**” in the strict sense is one which assumes something to be a fact which is not (or may not be) the case: it creates a legal fiction.

The paradigm cases involve the word “deem”. An example is the rule that the income of a married woman living with her husband was:

deemed for income tax purposes to be his income and not to be her

---

1 If authority is needed, which I doubt, see *Re Stratton’s Disclaimer* [1958] Ch 42 at p.59 deprecating “sweeping generalities”.

2 This aphorism has been attributed to Voltaire, but seems to have no known source.

3 See for example 18.29 (Exempt property); 57.60 (DT relief: s.87 gain); 4.10.1 (Domicile of child of IHT deemed domiciled parent); 74.19 (GWR on death: Spouse exemption); 89.8 (Divorce settlement); 84.9.4 (Legatee on transfer of shares).

income.<sup>4</sup>

The word “deem” is almost as old fashioned as joint taxation of husband and wife. OPC Drafting Guidance formerly provided:

**deemed to be:** Treated as or perhaps regarded as, or even taken to be, might be more familiar.<sup>5</sup>

All three of the alternative expressions are found, though “treated as” is now the more common:

Income which arises under a settlement	living accommodation provided ... by the employer	where property is provided by a ... company controlled by one person ...
is <i>treated</i> for income tax purposes as the income of the settlor and of the settlor alone. <sup>6</sup>	is to be <i>regarded</i> as provided by reason of the employment <sup>7</sup>	that person shall be <i>taken to provide it</i> <sup>8</sup>

There is no difference in meaning between these expressions.

### App. 7.3 Statutory hypothesis

Section 3G(3) TCGA defines the amount of s.3 gains thus:

... the amount of a gain or loss accruing to a company is calculated *as if* the company were a company resident in the UK chargeable to corporation tax on the gain.<sup>9</sup>

Another example: s.87(4) TCGA, defining a s.1(3) amount (trust gain):

4 Section 279 ICTA 1988 (repealed). The rule survived in Jersey until 2021.

5 (2014 edition)

[http://data.parliament.uk/DepositedPapers/Files/DEP2014-0422/guidancebook\\_20\\_March.pdf](http://data.parliament.uk/DepositedPapers/Files/DEP2014-0422/guidancebook_20_March.pdf) Para 2.1.24. This passage is not in the current OPC Drafting Guidance (2020) <https://www.gov.uk/government/publications/drafting-bills-for-parliament>

6 See 44.5 (Settlor-interested trust). But “treated as” is not a modern innovation: that was the wording in the original provisions, s.21 FA 1936; s.38 FA 1938.

7 See 79.10 (Employer-provision test).

8 See 94.40.1 (Co settlor: s.86 definition). This wording goes back to 1991.

9 See 60.4 (Computing gains: CT rules).

the amount upon which the trustees of the settlement would be chargeable to tax under s.1(3) ... *if they were resident in the UK.*<sup>10</sup>

I would not call this a deeming provision, in the strict sense. The non-resident company is not treated as chargeable. The non-resident trustees are not treated as chargeable. But there is a fictional statutory hypothesis, which amounts to a deeming, and similar principles of construction apply. So it does no harm to call this style of drafting a deeming provision too, though perhaps in a looser sense of the expression.

### App. 7.4 Deeming provisions: Construction

The story is the usual arc from literal to purposive construction.

The general rule of construction which applies to deeming provisions is this:

If you are bidden to treat an imaginary state of affairs as real, you must surely, unless prohibited from doing so, also imagine as real the consequences and incidents which, if the putative state of affairs had in fact existed, must inevitably have flowed from or accompanied it.<sup>11</sup>

... because one must treat as real that which is only deemed to be so, one must treat as real the consequences and incidents inevitably flowing from or accompanying that deemed state of affairs ...<sup>12</sup>

The question is how far the general rule should be applied (or in other words, when should it not be applied). The answer in the 1950s was: all the way:

The statute says that you must imagine a certain state of affairs; it does not say that having done so, you must cause or permit your imagination to boggle when it comes to the inevitable corollaries of that state of affairs.<sup>13</sup>

Experience shows that parliament often fails to foresee the “inevitable

---

10 The CFC code (pre-rewrite version) offered another example with slightly different words. It required a computation of “the amount which, *on the assumptions in Schedule 24*, would be the amount of the total profits of the company ... on which ... corporation tax would be chargeable.” See 57.60 (DT relief: s.87 gain).

11 *East End Dwellings v Finsbury Borough Council* [1952] AC 109 at p.132.

12 *Marshall v Kerr* 67 TC 56 at p.79A.

13 *East End Dwellings v Finsbury Borough Council* [1952] AC 109 at p.132.

corollaries” of its deeming, and nowadays the courts apply deeming provisions in a purposive and context-sensitive manner.<sup>14</sup> This is reaffirmed in *Bricom v IRC*<sup>15</sup> where the Court of Appeal referred to the dictum:

The hypothetical must not be allowed to oust the real further than obedience to the statute compels.

The Court of Appeal said:

... I do not read this as intending to lay down a special rule which requires a statutory hypothesis to be narrowly and literally construed. The scope of a deeming provision is a question of construction and is not subject to any special rule. As on any other question of statutory construction, the Court must attempt to ascertain the intention of Parliament from the words used in the light of the legislative purpose. A statutory hypothesis, no doubt, must not be carried further than the legislative purpose requires, but the extent to which it must be carried depends upon ascertaining what that purpose is.

And again:

It appears to me that the observations of Peter Gibson J, approved by Lord Browne-Wilkinson, in *Marshall* indicate that, when considering the extent to which one can ‘do some violence to the words’ and whether one can ‘discard the ordinary meaning’, one can, indeed one should, take into account the fact that one is construing a deeming provision. This is not to say that normal principles of construction somehow cease to apply when one is concerned with interpreting a deeming provision; there is no basis in principle or authority for such a proposition. It is more that, by its very nature, a deeming provision involves artificial assumptions. It will frequently be difficult or unrealistic to expect the legislature to be able satisfactorily to prescribe the precise limit to the circumstances in which, or the extent to which,

---

14 The turning point was *Murphy v Ingram* [1973] Ch 363. At first instance, at p.446 Megarry J said:

“A research student in search of a suitable topic for a thesis might do worse than to choose as his subject “the Dangers of Deeming”.”

But the Court of Appeal adopted the modern approach which reduces these dangers.

For another example, see *De Rothschild v Lawrenson* 67 TC 300 at p.316.

15 *Bricom v IRC* 70 TC 272.

the artificial assumptions are to be made.<sup>16</sup>

And again, though perhaps slightly more tentatively:

For my part I take the correct approach in construing a deeming provision to be to give the words used their ordinary and natural meaning, consistent so far as possible with the policy of the Act and the purposes of the provisions so far as such policy and purposes can be ascertained; but if such construction would lead to injustice or absurdity, the application of the statutory fiction should be limited to the extent needed to avoid such injustice or absurdity, unless such application would clearly be within the purposes of the fiction. I further bear in mind that because one must treat as real that which is only deemed to be so, one must treat as real the consequences and incidents inevitably flowing from or accompanying that deemed state of affairs, unless prohibited from doing so.

In *Barclays Wealth Trustees v HMRC*:

This statement of principle has been cited with approval in many subsequent cases<sup>17</sup> ... the fact that deeming provisions are involved “does not displace the ordinary principles of statutory interpretation”.<sup>18</sup>

We have come a long way from 1950’s approach of not permitting the imagination to boggle.

The discussion above cites tax cases. But the interpretation of deeming provisions is the same in non-tax cases:

The intention of a deeming provision, in laying down a hypothesis, is that the hypothesis shall be carried as far as necessary to achieve the legislative purpose, but no further.<sup>19</sup>

## **App. 7.5 Deeming/artificial definition compared**

A definition is “artificial” if a word is given a meaning far from its natural meaning. The use of artificial definitions has been castigated,<sup>20</sup> but it is

---

<sup>16</sup> *Jenks v Dickinson* [1997] STC 853.

<sup>17</sup> citing *DV3 RS Ltd Partnership v HMRC* [2013] EWCA Civ 907 at [13] and [14].

<sup>18</sup> [2017] EWCA Civ 1512 at [47].

<sup>19</sup> *Szoma v Secretary of State* [2006] 1 AC 564 at [25].

<sup>20</sup> Eg OPC Drafting Guidance (2020) para 4.4.1: “Avoid labels that are misleading.” The guidance gives this example (to avoid) “*In this Act, “child” means a young person in care*”.

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/892409/OPC\\_drafting\\_guidance\\_June\\_2020-1.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/892409/OPC_drafting_guidance_June_2020-1.pdf)

very common in taxation. For instance, employment may be defined to include a trade or profession.<sup>21</sup> No-one calls that a deeming provision, but there is no difference (or at least no obvious difference) between that form and saying that a trade is deemed to be an employment, which *is* classified as a deeming provision. Which form is used is a matter of chance or of style.

The rule for construction of definitions is simply that they take effect subject to context. It is considered that the position is no different for deeming provisions. If that is right, the rather lengthy analysis in the cases set out above of the “principles of deeming provisions” is misconceived. There should be no special rule for deeming provisions, for the rule to apply the deeming contextually is not a special rule. We have here something akin to the error of reification: just because there is a name for something does not mean that it exists, or (here) that it requires a distinct principle of construction.

## App. 7.6 Deemed/treated misused

### App. 7.6.1 *Deemed as definition*

“Deemed” (and its synonyms) are sometimes used to make definitions, or at least, amount to definitions. A ToA example:

... an individual is treated as having power to enjoy income of a person abroad if any of the enjoyment conditions are met.<sup>22</sup>

The meaning is simply that an individual *has* “power to enjoy” (in the defined sense) if the enjoyment conditions are satisfied. This is equivalent to a definition of the expression “power to enjoy”.

Definitions in the normal form have the helpful rule that *means* is used for an exclusive (comprehensive) definition and *includes* is used for an inclusive definition. The wording *treated as* used in a definition tends to suggest an inclusive definition: ie an individual might have power to enjoy in the general sense of the expression even if the enjoyment conditions are not met. But the context may show that there is an exclusive definition, ie the individual has power to enjoy if and only if the enjoyment conditions are met.

---

<sup>21</sup> See 43.2.1 (Employment/employed).

<sup>22</sup> See 46.7 (“Power to enjoy”).

It would be clearer not to use deeming terminology when a simple definition could be used; but it happens.

App. 7.6.2 “*Deemed*” meaningless

“Deemed” (and its synonyms) are sometimes employed as a verbose or legalese equivalent of the simple present tense. Thus s.10 Limited Partnerships Act 1907 provides that certain transactions shall “be deemed to be of no effect”. The meaning would be the same without the word deemed: the meaning is that the transactions *are* of no effect.

An example from CRS:

an Equity Interest is considered to be held by ...any person treated as a settlor<sup>23</sup>

“Treated as settlor” just means “settlor”.

It would be better drafting not to use deeming language in this way; but it is not uncommon. One should not strive to construe such wording as a deeming provision when the context shows that there is no deeming in the strict sense.

---

23 See 121.17.4 (Equity Interest: Trust).

## APPENDIX EIGHT

# PARLIAMENTARIANS

### App. 8 .1 Houses of parliament

#### **App. 8.1 Houses of parliament**

Section 41 Constitutional Reform and Governance Act 2010 (“CRGA”) provides special rules for residence and domicile of MPs and members of the House of Lords (“MLs”):

- (1) Subsection (2) applies if a person is for any part of a tax year<sup>1</sup>—
  - (a) a member of the House of Commons, or
  - (b) a member of the House of Lords.<sup>2</sup>
- (2) The person is to be treated for the purposes of the taxes listed in subsection (3) as resident and domiciled in the UK for the whole of that tax year.
- (3) The taxes are—
  - (a) income tax,
  - (b) capital gains tax, and
  - (c) inheritance tax.

---

1 IHT does not use the concept of tax years, so s.41(9) CRGA provides:

“In this section, in relation to inheritance tax—

- (a) ‘tax year’ means a year beginning on 6 April and ending on the following 5 April, and
- (b) ‘the tax year 2010-11’ means the tax year beginning on 6 April 2010.”

2 Section 41(5)(10) CRGA defines ML:

For the purposes of this section and section 42 a person is a member of the House of Lords if the person is entitled to receive writs of summons to attend that House....

(10) In determining for the purposes of this section and section 42 whether a person is entitled to receive writs of summons to attend the House of Lords, ignore—

- (a) section 2 of the Forfeiture Act 1870;
- (b) sections 426A and 427 of the Insolvency Act 1986.

In practice this means MPs and MLs are deemed UK resident and domiciled for almost all tax purposes, though minor taxes such as NICs slip through the net. But following the introduction of 15-year deemed domicile rule in 2017, this is not likely to have any practical effect.

EN CRGA provides:

269. The section provides that MPs and peers are deemed ROD [resident ordinarily resident and domiciled] for the whole of each tax year in which they are a member of either House (including those tax years in which they are a member for only part of the year). This means that they will be deemed ROD from the start of the tax year in which they become a member of that House and to the end of the tax year in which they cease to be a member.

DT relief may apply where a treaty has a tie-breaker in OECD Model form.

Section 41(4) CRGA defines when a person becomes or ceases to be a MP or a ML:

For the purposes of this section a person—

- (a) becomes a member of the House of Commons when (having been elected to that House) the person makes and subscribes the oath required by the Parliamentary Oaths Act 1866 (or the corresponding affirmation), and
- (b) ceases to be a member of that House when—
  - (i) the Parliament to which the person was elected is dissolved,
  - or
  - (ii) the person's seat is otherwise vacated.

Since a person will know the exact date when they become an MP or ML, they have an opportunity for pre-appointment planning and there may even be some scope for further planning when deemed UK domiciled (eg in relation to the IHT spouse exemption if the spouse is UK domiciled).<sup>3</sup> Note that when a person ceases to be a ML or MP, they will continue to be deemed IHT domiciled for another three or four years.

Sinn Féin MPs do not take their seats at Westminster so happily escape deemed UK residence and domicile.

---

<sup>3</sup> See Slevin “Not Quite the Same”, Taxation (19 May 2011).

Section 41(6) CRGA excludes judges<sup>4</sup> and bishops (the section is after all only a *political* exercise). This level of micro-detail cannot sensibly be covered even in this book which aims to be comprehensive: it would be surprising if there are more than one or two individuals concerned (if indeed there are any at all).

### App. 8.1.1 *Taxation of MPs/MLs: Critique*

Stephen Timms (then Financial Secretary to the Treasury) said:

This is how the vast majority of the UK population is taxed, so it seems right to me ... that MPs and Members of the House of Lords should be taxed on that basis and should not have access to the remittance basis. It is helpful that there is now clear, albeit rather belated, cross-party support for action, following the Conservative's change of position to supporting the principle that MPs and Members of the House of Lords should be required to pay tax in full on their overseas income, gains and assets.<sup>5</sup>

A great deal more could be said about the policy issues relating to these provisions. The CRGA provisions were not debated in parliament: they were a late amendment to the CRGA, which was enacted in a breathless ping pong procedure just before the dissolution of parliament. But the context of the rules is wholly political - the scrabble for public approval and to knock the opposition - so it would be unrealistic to expect cool and considered reflection. The debate is long-standing.<sup>6</sup>

## App. 8.2 **European Parliament**

The deemed UK residence/domicile rule does not apply to MEPs. EN CRGA para 275 discusses the position of a MEP who is also a member of the House of Lords:

---

4 This makes sense, as a ML who holds a disqualifying judicial office is disqualified from sitting or voting in the House of Lords: s.137(7) Constitutional Reform Act 2005.

5 Hansard, 5 Jan 2010, Column 52WH.

6 There was a comparable debate in relation to Lord Vestey who (though resident and domiciled when ennobled in 1922) had shortly before been a tax exile: see "Vestey: Royal Commission debate"

[https://www.kessler.co.uk/wp-content/uploads/2017/11/Vestey\\_Royal\\_Commission\\_debate.pdf](https://www.kessler.co.uk/wp-content/uploads/2017/11/Vestey_Royal_Commission_debate.pdf)

A peer is not entitled to receive a writ of summons if they are a Member of the European Parliament, but they do receive writs of summons once they step down from the European Parliament. Therefore, a peer who is an MEP would not be deemed ROD under section 41, but once entitled to receive writs again they would be deemed ROD. Section 42(10) allows such MEPs to avoid being deemed ROD in these circumstances by making the transitional provision available to such MEPs in the same way as to those peers currently entitled to receive writs of summons.

### **App. 8.3 Scottish/Welsh parliamentarian**

This section considers whether parliamentarians are Scottish/Welsh taxpayers.<sup>7</sup> The Scottish/Welsh provisions are best read side by side:

#### **s.80D Scotland Act 1998**

- (1) For any tax year, a Scottish taxpayer is an individual (T)—
- (a) who is resident in the UK for income tax purposes for that year (see Schedule 45 to the FA 2013), and
  - (b) who, for that year, meets condition A, B or C....
- (4) T meets condition C if, for the whole or any part of the year, T is—
- (a) a member of Parliament for a constituency in Scotland,
  - (b) a member of the European Parliament for Scotland, or
  - (c) a member of the Scottish Parliament.

(5) Subsection (1) does not apply if T is a Scottish parliamentarian for the whole or any part of the year (see section 116F).

#### **s.113E Government of Wales Act 2006**

- (1) For any tax year, a Welsh taxpayer is an individual (T)—
- (a) who is resident in the UK for income tax purposes for that year (see Schedule 45 to the Finance Act 2013), and
  - (b) who, for that year, meets condition A, B or C....
- (4) T meets condition C if, for the whole or any part of the year, T is—
- (a) a member of Parliament for a constituency in Wales,
  - (b) a member of the European Parliament for Wales, or
  - (c) an Assembly member.

(4A) Subsection (1) does not apply if T is a Welsh parliamentarian for the whole or any part of the year (see section 80DA).

---

<sup>7</sup> See 5.45 (Scottish/Welsh taxpayers).  
FD\_A8\_Parliamentarians\_2021.wpd

(6) For the purposes of subsection (5) and section 116F, T is a Scottish parliamentarian if T is a member as described in any of paragraphs (a) to (c) of section 80D(4) of the Scotland Act 1998 (definition of a Scottish taxpayer).

(4B) For the purposes of subsection (4A) and section 80DA, T is a Welsh parliamentarian if T is a member as described in any of paragraphs (a) to (c) of section 116E(4) of the Government of Wales Act 2006 (definition of a Welsh taxpayer).

### App. 8.3.1 *Parliamentarian in part of year*

There are rules dealing with the rare possibility that Scottish taxpayer is a member of the Welsh assembly for part of a year (and vice versa). We are approaching a level of micro detail here such that one wonders why it was necessary to make a provision for this case. It will rarely if ever happen, and the rules make next to no difference if it does. But here it is:

#### **s.80DA Scotland Act 1998**

- (1) An individual (T) who is a Welsh parliamentarian for the whole or any part of a tax year is a Scottish taxpayer for that tax year if—
- (a) T is resident in the UK for income tax purposes for that year (see Schedule 45 to the FA 2013),
  - (b) T meets condition C in section 80D for that year, and
  - (c) T meets either of the following conditions for that year.
- (2) T meets the first condition if—
- (a) the number of days in that year on which T is a member as described in any of paragraphs (a) to (c) of section 80D(4), exceeds
  - (b) the number of days in that year on which T is a Welsh parliamentarian.

#### **s.116F Government of Wales Act 2006**

- (1) An individual (T) who is a Scottish parliamentarian for the whole or any part of a tax year is a Welsh taxpayer for that tax year if—
- (a) T is resident in the UK for income tax purposes for that year (see Schedule 45 to the Finance Act 2013),
  - (b) T meets condition C in section 116E for that year, and
  - (c) T meets either of the following conditions for that year.
- (2) T meets the first condition if—
- (a) the number of days in that year on which T is a member as described in any of paragraphs (a) to (c) of section 116E(4),
  - (b) the number of days in that year on which T is a Scottish parliamentarian.

- (3) T meets the second condition if—
- (a) the number of days in that year mentioned in paragraphs (a) and (b) of subsection (2) are the same, and
- (b) T meets condition A or B in section 80D for that year.

- (3) T meets the second condition if—
- (a) the number of days in that year mentioned in paragraphs (a) and (b) of subsection (2) are the same, and
- (b) T meets condition A or B in section 116E for that year.

## APPENDIX NINE

# VISITING FORCES

### App. 9.1 Treaty background

#### **App. 9.1 Treaty background**

The taxation of visiting forces is based on two treaties:

- (1) NATO Status of Forces Agreement 1951 (“NATO SOFA”).<sup>1</sup>
- (2) Partnership for Peace Status of Forces Agreement 1995 (“PfP SOFA”).<sup>2</sup>

A third treaty, EU Status of Forces Agreement 2003<sup>3</sup>, despite its date, has

---

1 The full title is: Agreement Between the Parties to the North Atlantic Treaty Regarding the Status of Their Forces 19 June 1951.

Accessible [http://www.nato.int/cps/en/natolive/official\\_texts\\_17265.htm](http://www.nato.int/cps/en/natolive/official_texts_17265.htm)

2 The full title is: Agreement among the States Parties to the North Atlantic Treaty and the other States participating in the Partnership for Peace regarding the Status of their Forces, 19 June 1995.

Accessible [http://www.nato.int/cps/en/natolive/official\\_texts\\_24742.htm](http://www.nato.int/cps/en/natolive/official_texts_24742.htm)

3 The full title is: Agreement between the member states of the European Union concerning the status of military and civilian staff seconded to the institutions of the European Union, of the headquarters and forces which may be made available to the European Union in the context of the preparation and execution of the tasks referred to in article 17(2) of the treaty on European Union including exercises, and of the military and civilian staff of the member states put at the disposal of the European Union to act in this context.

<http://www.official-documents.gov.uk/document/cm75/7572/7572.pdf>

Secondary legislation which will implement EU SOFA has likewise not yet come into force: The Visiting Forces and International Military Headquarters (EU SOFA) (Tax Designation) Order 2012.

not yet come into force.<sup>4</sup> Its taxation provisions are similar to the existing treaties.

The PfP SOFA incorporates the 1951 treaty by reference.

A House of Commons library note explains the background:

In order to regulate the extent to which foreign military personnel have exemption from local jurisdiction, it has become the practice, particularly since the Second World War, to regulate these issues through Status of Forces Agreements (SOFAs), which are negotiated between the sending and host state.

Status of Forces Agreements allow a sending State's military forces to operate within, and at the consent of, the host state. They also provide for the status of military headquarters established in other countries. They may be bilateral or multilateral and there are no formal requirements as to the form, content, length, or title that a SOFA should take.

In their most basic form they establish the legal jurisdiction over military personnel and related civilians; define the exemptions of such personnel from passport and visa regulations and customs and excise duties; set out the legal right for military personnel to patrol bases, transit the host state, wear uniform and bear arms in the host nation and set out the cost arrangements for establishing and maintaining military facilities.

In 1951 NATO agreed a Status of Forces Agreement to govern hosting arrangements between the Alliance's member states. From the UK's perspective, it applies equally to visiting forces in the UK and to British forces based in NATO countries, for example in Germany.

The Visiting Forces Act 1952 incorporates the NATO SOFA into UK law.<sup>5</sup> Together, they provide the overarching framework for the stationing of US forces in the UK.

The provisions of the VFA were extended to NATO military headquarters in the UK by the International Headquarters and Defence Organisations Act 1964.

The Visiting Forces Agreement was extended in 1995 by the Partnership for Peace Status of Forces Agreement to cover the forces

---

4 See Sari, "Normative Power Europe: Status of Forces Agreements in the Field of European Security and Defence Cooperation" (2012)

<http://www.aurelsari.co.uk/2011/12/eu-status-of-forces-agreements/>

5 Author's footnote: However the tax provisions of the treaties are incorporated into UK law by the tax legislation set out below.

of states who not members of NATO but had agreed to participate in NATO's Partnership for Peace plan.

The Armed Forces Act 1996 extended the Visiting Forces Act to third countries (i.e. neither members of NATO nor members of the Partnership for Peace plan) by Order in Council. It might also be applied to Service personnel from other countries undertaking training at UK military establishments. Algeria, for example, was added to the list of countries by Visiting Forces (Designation) Order 2010 (SI 2010/2970). The EU Status of Forces Agreement applies in circumstances in which forces are not regulated by either the NATO or the Partnership for Peace Status of Forces agreement.<sup>6</sup>

## **App. 9.2 Residence for IT and CGT**

### *App. 9.2.1 Who qualifies for relief*

Article 1 NATO SOFA provides:

In this Agreement the expression

'force' means the personnel belonging to the land, sea or air armed services of one Contracting Party when in the territory of another Contracting Party in the North Atlantic Treaty area in connexion with their official duties, provided that the two Contracting Parties concerned may agree that certain individuals, units or formations shall not be regarded as constituting or included in a 'force' for the purpose of the present Agreement;

'civilian component' means the civilian personnel accompanying a force of a Contracting Party who are in the employ of an armed service of that Contracting Party, and who are not stateless persons, nor nationals of any State which is not a Party to the North Atlantic Treaty, nor nationals of, nor ordinarily resident in, the State in which the force is located.

Section 833 ITA provides:

- (1) This section applies to an individual who—
  - (a) is a member of a visiting force of a designated country or of a civilian component of such a force,
  - (b) is in the UK, but only because of being a member of the force or

---

<sup>6</sup> SN06808 (2015) (footnotes omitted)

<http://researchbriefings.files.parliament.uk/documents/SN06808/SN06808.pdf>

See Parry & Grant, *Encyclopaedic Dictionary of International Law* (3 ed, 2009)

- the civilian component, and
- (c) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
- (2) For the purposes of subsection (1)—
- (a) members of the armed forces of a designated country who are attached to a designated international military headquarters<sup>7</sup> are treated as a visiting force of that country, and
- (b) whether an individual is a member of a civilian component of such a force is to be determined accordingly.
- (2A) This section also applies to an individual within subsection (3) or (3A).
- (3) An individual is within this subsection if the individual—
- (a) is of a category for the time being agreed between Her Majesty’s Government in the UK and the other members of the North Atlantic Council,
- (b) is employed by a designated allied headquarters,
- (c) is in the UK, but only because of being employed by the designated allied headquarters, and
- (d) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen
- (3A) An individual is within this subsection if the individual—
- (a) belongs to the EU civilian staff,<sup>8</sup>
- (b) is in the UK, but only because of serving as part of that staff, and
- (c) is not a British citizen, a British overseas territories citizen, a

---

7 Defined in s.833(7) ITA: In this section—

“allied headquarters” means an international military headquarters established under the North Atlantic Treaty, and

“designated” means designated for the purpose in question by or under an Order in Council made for giving effect to an international agreement.”

8 Defined in s.833(7) ITA: “the EU civilian staff means—

- (a) civilian personnel seconded by a member State to an EU institution for the purposes of activities (including exercises) relating to the preparation for, and execution of, tasks mentioned in Article 43(1) of the Treaty on European Union (tasks relating to a common security and defence policy), as amended from time to time, and
- (b) civilian personnel (other than locally hired personnel)—
- (i) made available to the EU by a member State to work with designated international military headquarters or a force of a designated country, or
- (ii) otherwise made available to the EU by a member State for the purposes of activities of the kind referred to in paragraph (a).”

British National (Overseas) or a British Overseas citizen.....

- (6) Subsections (1) to (3) are to be interpreted as if—
- (a) they were in Part 1 of the Visiting Forces Act 1952,<sup>9</sup> and
  - (b) references in that Act to a country to which a provision of that Act applies were references to a designated country.

HMRC say:

**Eligibility for SOFA status (Status of Forces Agreement)**

My query relates to a client that needs to source a UK role at short notice. The role will be covered by/eligible for SOFA status.

They have identified 2 individuals that are right for the role. One of them is a current US national/US resident who would be brought to the UK for the project.

The second individual is someone who is another US national, but he is already present in the UK. He is someone who is here on an assignment, and is currently regarded as a tax resident in the UK (having been here for a few years).

The question they have is that will SOFA status apply, as normal, to the individual that is already here in the UK? In other words will this individual be regarded as not UK resident under the SOFA status from the date of the SOFA stamp/the date at which he commences the project role until the date this ends or he returns to the US at the conclusion of the project.

**Answer**

The tax treatment of this individual is determined by the Agreement regarding the Status of Forces of Parties to the North Atlantic Treaty (“NATOSOFA”) (Treaty Series No.3, 1955).

---

9 This incorporates, in particular, the definitions in s.17 Visiting Forces Act 1952: “(1) In this Act, unless the context otherwise requires, the expression “forces”, in relation to a country, means any of the naval, military or air forces of that country, the expression “United Kingdom court” means a court exercising jurisdiction in the United Kingdom under United Kingdom law otherwise than by virtue of section two of this Act, and the expression “United Kingdom law” means the law of the United Kingdom or of any part thereof. (2) For the purposes of this Act a member of a force of any country which (by whatever name called) is in the nature of a reserve or auxiliary force shall be deemed to be a member of that country's forces so long as, but only so long as, he is called into actual service (by whatever expression described) or is called out for training; and any reference in this Act to a person's becoming a member of a country's forces shall be construed accordingly.”

Article I(a) defines a Visiting Force as the personnel of land, sea or air armed services of one Contracting Party while in the other Contracting Party in connection with their official duties.

Article I(b) defines a Civilian Component as the civilian personnel accompanying a Visiting Force who are in the employ of the armed service and who are not stateless persons, nor nationals of any state which is not a party to the North Atlantic Treaty, nor nationals of, nor ordinarily resident in, the State in which the force is located.

If the individual is a member of the armed forces then they are within Art 1(a) since they would be “in the Contracting Party in connection with their official duties.” If they are a Civilian Component, they would not be in I(b) if they were ordinarily resident in the UK. Ordinary residence for NATSOFA purposes does not have the same meaning as the tax meaning, so in this instance we take it that the individual is ordinarily resident in the UK, since they are already in the UK “on an assignment, and is currently regarded as a tax resident in the UK (having been here for a few years).”

The exemption from taxation of salary under Art X(1) will not apply because they continue to be resident in the UK because they are not here solely by being a member of the force or civilian component. They were here already.

An individual employed by a private company contracted to work on a defence contract (known sometimes as a “tech-rep”) is not a member of the “civilian component” for the purposes of NATSOFA. The emoluments paid to him by the company which employs him for duties performed in the UK are liable to UK tax in accordance with the normal rules, as modified by the terms of the UK/US double taxation convention.

If the individual is a civilian who does not possess UK nationality but who is ordinarily resident in the UK (and are not therefore members of the civilian component), they may nevertheless qualify for exemption in respect of their earnings if they qualify as an “official agent of a foreign government” under Section 301 ITEPA 2003. Sub-section 5 defines this as a person who is not a consul, but is employed on the staff or a consulate or an official department or agency of a foreign state. It does not apply to a department or agency which carries on a trade, business or other undertaking for the purposes of profit.<sup>10</sup>

- (4) Commander Submarines Allied Naval Forces North (COMSUBNORTH)
- (5) NATO Airborne Early Warning and Control Force (NAEW&CF)
- (6) NATO Joint Electronic Warfare Core Staff (NATO JEWCS)
- (7) Headquarters UK–Netherlands Amphibious Force (UKNLAF)
- (8) Headquarters UK–Netherlands landing Force (UKNLLF)
- (9) The European Air Group (EAG)
- (10) The Intelligence Fusion Centre (IFC)
- (11) Headquarters Allied Rapid Reaction Corps (HQ ARRC)<sup>13</sup>

---

13 The Visiting Forces and International Military Headquarters (NATO and PfP) (Tax Designation) Order 2012 No. 3071, schedule 4.

The former TDSI Guidance Notes provided:

**Civilian component of visiting armed forces**

... A person is a member of a civilian component of a visiting force if his or her passport contains

- an uncancelled entry made by or on behalf of the sending country stating that the bearer is a member of a civilian component of a visiting force of that country, and
- an uncancelled recognition stamp of the UK Home Office.

Employees of foreign contractors hired in the UK are not members of the civilian component of a visiting force. Their residence status is determined according to the normal rules ...<sup>14</sup>

App. 9.2.3 *Residence/domicile relief*

Article X NATO SOFA provides:

1. [a] Where the legal incidence of any form of taxation in the receiving State depends upon residence or domicile, periods during which a member of a force or civilian component is in the territory of that State by reason solely of his being a member of such force or civilian component shall not be considered as periods of residence therein, or as creating a change of residence or domicile, for the purposes of such taxation...

A period of presence would not normally create a change of actual domicile, but it could create deemed domicile, and the drafter may have had in mind a civil law concept of domicile which is more like habitual residence.

Section 833(4) ITA provides the statutory relief:

If this section applies to an individual throughout a period, the period is not treated for income tax purposes as—

- (a) a period of residence in the UK, or
- (b) creating a change of the individual’s residence or domicile.

---

14 HMRC, “Tax Deduction Scheme for Interest: Guidance Notes for Financial Institutions (2012) para 4.50.

<https://www.gov.uk/government/publications/guidance-notes-for-financial-institutions>

TDSI was abolished from 2016/17, and the Guidance Notes withdrawn. But the general point made here remains relevant.

Section 271ZA TCGA extends the relief to CGT:

- (1) This section applies for the purposes of capital gains tax if section 833 of ITA 2007 (visiting forces and staff of designated allied headquarters) applies to an individual throughout a period.
- (2) The period is not a period of residence in the UK.
- (3) The period does not create a change of the individual's residence or domicile.

See too 25.21.5 (Usual place of residence) discussing US Forces on tour of duty in England.

There are two circumstances where it is advantageous to be UK resident, and these rules are disapplied: personal allowances and CGT private residence relief.

#### App. 9.2.4 *Visiting forces: Personal allowances*

Section 833(5) ITA provides:

Subsection (4) does not affect the operation of section 56 or 460 of this Act (residence etc of claimants) in relation to an individual for any tax year.

EN ITA explains:

2498. Subsection (5) ensures that an individual to whom this section applies has the benefit of the personal reliefs to which the individual would be entitled if resident in the UK. Such reliefs will, accordingly, be available in calculating the individual's liability to UK income tax on such income as, for example, UK bank interest, dividends from UK resident companies and UK-based earnings which are not exempt under section 303 of ITEPA.

#### App. 9.2.5 *Visiting forces: Private residence*

Section 222 B(10) TCGA provides:

Section 271ZA(2) (visiting forces etc) is to be disregarded in determining for the purposes of this section whether or not an individual is resident in the UK.

This overrides the usual disallowance of CGT private residence relief in relation to non-residents.<sup>15</sup>

---

<sup>15</sup> See 55.3 (Disapplication of private residence relief).

## **App. 9.3 Employment income**

### **App. 9.3.1 Treaty background**

Article X.1 NATO SOFA provides:

... Members of a force or civilian component shall be exempt from taxation in the receiving State on the salary and emoluments paid to them as such members by the sending State or on any tangible movable property the presence of which in the receiving State is due solely to their temporary presence there.

### **App. 9.3.2 The relief**

Section 303 ITEPA provides:

- (1) No liability to income tax arises in respect of earnings if—
  - (a) they are paid by the government of a designated country to a member of a visiting force of that country or of a civilian component of such a force, and
  - (b) that person is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
- (2) [*This is a definition provision identical to s.833(2) set out above*]
- (3) No liability to income tax arises in respect of earnings if they are paid by a designated international military headquarters to an employee of a category for the time being agreed between Her Majesty's government in the UK and the other members of the North Atlantic Council.
- (4) But where the employee is a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen, subsection (3) only applies if it is necessary for it to do so to give effect to an agreement between parties to the North Atlantic Treaty.
- (4A) No liability to income tax arises in respect of earnings if—
  - (a) they are paid by the government of a designated country to a person belonging to the EU civilian staff, and
  - (b) that person is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
- (5) & (6) [*These are definition provisions identical to s.833(6)(7) set out above*].

## **App. 9.4 IHT reliefs**

### App. 9.4.1 *Excluded property*

Section 155(1) IHTA provides:

Section 6(4) above applies to—

- (a) the emoluments paid by the Government of any designated country to a member of a visiting force of that country, not being a British citizen, a British Dependent Territories citizen, a British National (Overseas) or a British Overseas citizen, and
- (b) any tangible movable property the presence of which in the UK is due solely to the presence in the UK of such a person while serving as a member of the force.

This takes us to s.6(4) IHTA:

Property to which this subsection applies by virtue of section 155(1) or (5A) below is excluded property.

In short, emoluments and tangible movable property of visiting forces qualify as excluded property for IHT purposes.

### App. 9.4.2 *IHT deemed domicile*

Section 155(2) IHTA provides:

A period during which any such member of a visiting force as is referred to in subsection (1) above is in the UK by reason solely of his being such a member shall not be treated for the purposes of this Act as a period of residence in the UK or as creating a change of his residence or domicile.

This is not needed,<sup>16</sup> but it does not harm.

Thus (in short) visiting forces do not become IHT deemed domiciled even if they reside 15 or more years in the UK (but in practice I expect that hardly ever happens). It is considered that this relief does not apply to members of visiting forces who are British citizens (etc) even though on a literal reading one might say that such persons are “referred to” in s.155(1).

### App. 9.4.3 *“Visiting force” and definitions*

Section 155 IHTA provides

---

<sup>16</sup> See 4.8.2 (“Residence” for 15-year rule).  
FD\_A9\_Visiting\_Forces\_2021.wpd

(3) References in subsections (1) and (2) above to a visiting force shall apply to a civilian component of a visiting force as they apply to the force itself, and those subsections shall be construed as one with Part I of the Visiting Forces Act 1952 but so that for the purposes of this section references to a designated country shall be substituted in that Act for references to a country to which a provision of that Act applies.

(4) For the purpose of conferring on persons attached to any designated allied international military headquarters the like benefits as are conferred by subsections (1) and (2) above on members of a visiting force or civilian component, any members of the armed forces of a designated country shall, while attached to any such headquarters, be deemed to constitute a visiting force of that country, and there shall be a corresponding extension of the class of persons who may be treated as members of a civilian component of such a visiting force.

(5A) Section 6(4) also applies to—

- (a) the emoluments paid by the Government of any designated country to a person belonging to the EU civilian staff, not being a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen, and
- (b) any tangible movable property the presence of which in the UK is due solely to the presence in the UK of such a person serving as part of that staff.

(5B) A period during which any such person belonging to the EU civilian staff as is referred to in subsection (5A) is in the UK by reason solely of that person belonging to that staff is not to be treated for the purposes of this Act as a period of residence in the UK or as creating a change of that person's residence or domicile.

Section 155 IHTA provides:

(6) For the purposes of this section—

“allied headquarters” means any international military headquarters established under the North Atlantic Council;

“designated” means [definition identical to IT definition]

“the EU civilian staff” means [definition identical to IT definition]

(7) Any Order in Council made under section 73 of the Finance Act 1960 which is in force immediately before the passing of this Act shall have effect for the purposes of this section as if had also been made under this section, and may be varied or revoked accordingly.

The exemption is not available to spouses of visiting forces.

## App. 9.5 SDLT

Section 74A FA 1960 provides an exemption for land acquired as barracks or for training; this is too specialist a topic to be discussed here.

## **App. 10.1 Scholarship income**

Section 776 ITTOIA provides:

(1) No liability to income tax arises in respect of income from a scholarship<sup>1</sup> held by an individual in full-time education at a university, college, school or other educational establishment.

(2A) No liability to income tax arises in respect of income from a payment made

[a] under section 23C(5A) of the Children Act 1989 (duty to make payments to former relevant children who pursue higher education) or

[b] under sections 110(6) or 112(2) of the Social Services and Well-being (Wales) Act 2014 (duty to make payments to certain young people who pursue higher education).

Scholarships from charities would not be taxable under general principles,<sup>2</sup> but this exemption would be needed if a private (non-

---

1 Scholarship is widely defined in s.776(3) ITTOIA: "In this section "scholarship" includes a bursary, exhibition or other similar educational endowment."

2 See Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12th ed, 2019/20), para 12.5 (Charity beneficiaries)  
Online version <https://www.taxationofcharities.co.uk>

charitable) trust awarded a bursary to a beneficiary.

SP 4/86 provides:

**Payments made by employers to employees when in full-time attendance at universities and technical colleges**

Scholarships, exhibitions, bursaries etc held by a person receiving full-time instruction at university, technical college or similar educational establishment are exempted from income tax by Section 776 ITTOIA 2005.

This Statement of Practice sets out the circumstances when payments made by an employer to an employee for periods of attendance on a full-time course (including sandwich courses) can be exempted from income tax. The following conditions and exclusion apply.

**Conditions**

The employer requires that the employee must be enrolled at the educational establishment for at least one academic year and must attend the course for at least twenty weeks in that academic year. Or if the course is longer the employee must attend for at least twenty weeks on average, in an academic year over the period of the course.

The educational establishments must be recognised universities, technical colleges or similar educational establishments, which are open to members of the public generally and offer more than one course of practical or academic instruction. For example an employer's internal training school or one run by an employer's trade organisation will not satisfy the educational establishment condition for the Statement of **Practice**.

For courses commencing on or after 1 September 2007, the payments, including lodging, subsistence and travelling allowances, but excluding any tuition fees payable by the employee to the university etc, do not exceed £15,480 for the academic year.

**Exclusion**

This exemption does not apply to payments of earnings made for any periods spent working for the employer during vacations or otherwise. If the rate exceeds £15,480 HMRC may look at the arrangements in detail. This is because the level of payment exceeds what might reasonably be described as a scholarship or training allowance. However, an increase in the rate of payment over the qualifying limit, part way through a course, will not affect the exemption applying to any payments for the earlier part of the course.

The figure of £15,480 has not been revised since 2007.

App. 10.1.1 *Payment from employer of relative*

Section 776(2) ITTOIA provides:

This exemption is subject to section 215 of ITEPA 2003 (under which only the scholarship holder is entitled to the exemption if the scholarship is provided by reason of another person's employment).

That takes us to s.215 ITEPA which provides:

If an employment-related benefit consists in the provision of a scholarship, section 776(1) of ITTOIA 2005 (exemption for scholarship income) applies only in relation to the holder of the scholarship.

**App. 10.2 Student grant: DT relief**

Article 20 OECD Model Convention provides:

Payments which a student or business apprentice

[1] who is or was immediately<sup>3</sup> before visiting a Contracting State a resident of the other Contracting State and

[2] who is present in the first-mentioned State solely for the purpose of his education or training

receives for the purpose of his maintenance, education or training shall not be taxed in that State, provided that such payments arise from sources outside that State.

This is not restricted to trust income, but in practice trust income may be the most common case where this DT relief applies.

The OECD commentary provides:

3. The Article covers only payments received for the purpose of the recipient's maintenance, education or training. It does not, therefore, apply to a payment, or any part thereof, that is remuneration for services rendered by the recipient and which is covered by Article 15 (or by Article 7 in the case of independent services). Where the recipient's training involves work experience, however, there is a need to distinguish between a payment for services and a payment for the recipient's maintenance, education or training. The fact that the amount

---

3 The OECD commentary provides: "2. The word "immediately" was inserted in the 1977 Model Convention in order to make clear that the Article does not cover a person who has once been a resident of a Contracting State but has subsequently moved his residence to a third State before visiting the other Contracting State."

paid is similar to that paid to persons who provide similar services and are not students or business apprentices would generally indicate that the payment is a remuneration for services. Also, payments for maintenance, education or training should not exceed the level of expenses that are likely to be incurred to ensure the recipient's maintenance, education or training.

4. The Article only applies to payments arising from sources outside the State where the student or business apprentice is present solely for the purposes of education or training. Payments arising from sources within that State are covered by other Articles of the Convention: for instance, if, during his presence in the first-mentioned State, the student or business apprentice remains a resident of the other State according to Article 4, payments such as grants or scholarships that are not covered by other provisions of the Convention (such as Article 15) will be taxable only in his State of residence under paragraph 1 of Article 21. For the purpose of the Article, payments that are made by or on behalf of a resident of a Contracting State or that are borne by a permanent establishment which a person has in that State are not considered to arise from sources outside that State.

DTR Manual provides:

**DT1930: Non-residents: UK income: Visiting students and apprentices** [Nov 2019]

Some agreements also provide that certain remuneration which a student or business apprentice receives from employment in this country shall be exempt from United Kingdom tax. Various limitations are imposed in particular agreements, often relating to monetary limits, the student's need to supplement grant income, or the type of employment. In every case when an agreement provides an exemption of this type, details of any limitations are given in Part IV of this volume.

Claims for exemption under a students' Article are dealt with in the District which, but for the agreement, would have dealt with any tax on such payments or remuneration. In examining claims, refer to the relevant double taxation agreement to ensure that the conditions for exemption are fulfilled. The following notes give some guidance on matters to be taken into account in considering whether exemption is due

1. The exemption does not extend to income or capital gains derived by a student or business apprentice from his own investments or from trust income to which he is absolutely entitled.
2. Whether payments or remuneration are for the student's etc. maintenance, education or training, or for supplementing his

resources, or are reasonably necessary, is a question of fact and the onus is on the claimant to provide the evidence. The figures quoted in Statement of Practice SP4/86 (see SE1314)<sup>4</sup> can be used as a guide. Where the payments or remuneration seem to be unreasonably high, refer the case to Personal Tax Division (Schedule E), Sapphire House, Solihull.

3. If the payments or remuneration exceed the amount needed for the student's etc. maintenance, education or training, the whole amount is taxable and not merely the excess.
4. Where the Article provides that remuneration is to be exempted up to a certain monetary limit and the student or business apprentice is resident in the United Kingdom under United Kingdom domestic law, that amount is additional to the personal allowances available under United Kingdom law. For example, if the monetary limit in the agreement is 1,000 and the claimant is entitled to a personal allowance in the relevant year of 3,445, earnings of 4,445 or less will be exempt.

#### App. 10.2.1 *Students: non-OECD Model*

Some DTAs do not follow the OECD Model. For instance, art 19 Bangladesh/UK DTA provides a wider relief:

(1) An individual who is a resident of one of the Contracting States at the time he becomes temporarily present in the other Contracting State and who is temporarily present in the other Contracting State for the purpose of:

- (a) studying in the other Contracting State at a university or other recognised educational institution; or
- (b) securing training at a recognised educational institution required to qualify him to practise a profession; or
- (c) studying or carrying out research as a recipient of a grant, allowance or award from a governmental, religious, charitable, scientific, literary or educational organisation;

shall be exempt from tax in that other Contracting State on:

- (i) remittances from abroad for the purpose of his maintenance, education, study, research or training;
- (ii) the grant, allowance or award; and
- (iii) income from personal services rendered in the other Contracting State (other than any rendered by an article clerk

---

<sup>4</sup> See App 11B.1 (Scholarship income).  
FD\_A10\_Students\_and\_Teachers.wpd

or other individual undergoing professional training to the person or partnership to whom he is articulated or who is providing the training) provided that the income constitutes earnings reasonably necessary for his maintenance and education.

(2) In no event shall an individual have the benefit of the provisions of this Article for more than five years.

### **App. 10.3 DT relief: Teachers**

There is no specific relief for teachers in either the OECD Model or the UN Model, though of course art 15 (employees) will sometimes apply. But the UN Model discusses the possibility,<sup>5</sup> and some DTAs do contain a relief for teachers, such as art 20 Bangladesh/UK DTA:

(1) An individual who visits one of the Contracting States for a period not exceeding two years for the purpose of teaching or engaging in research at a university, college or other recognised educational institution in that Contracting State, and who was immediately before that visit a resident of the other Contracting State, shall be exempted from tax by the first-mentioned Contracting State on any remuneration for such teaching or research for a period not exceeding two years from the date he first visits that State for such purpose.

(2) This Article shall not apply to income from research unless such research is undertaken by the individual in the public interest and not primarily for the benefit of some other private person or persons.

## APPENDIX ELEVEN

# HOW TO IMPROVE RESIDENCE AND DOMICILE TAXATION

### App. 11.1 Procedural changes

#### App. 11.1 Procedural changes

The two most significant improvements to UK tax reform would be procedural:

- (1) Less change<sup>1</sup>
- (2) Changes comply with the Tax Consultation Framework<sup>2</sup>

#### App. 11.2 Technical changes

The following is a list of short technical improvements, with no significant tax cost, no significant winners or losers, and not politically contentious. It represents some cheap and (relatively) easy improvements to residence and domicile tax which no-one should find objectionable or difficult: the “low lying fruit” of tax reform.

#### Proposal

Repeal s.721(3) ITEPA.

English/Northern Ireland law definition of domicile should adopt the amendments made in Scotland. (This involves a general law reform, not just tax law.)

Repeal s.267ZA(8) IHTA

#### Reference

See 3.2 (Concepts of domicile)

See 3.4 (Domicile of origin);  
3.18 (Child's domicile: Scotland)

See 4.13.12 (Critique)

---

1 See 1.11 (The promise of stability).

2 See 1.12.1 (Tax Consultation Framework).

Repeal s.763(3) ITA which is otiose.	See 6.3 (Trustees a distinct person)
IT/CGT definition of trustee residence should apply for IHT.	See 6.19.1 (IHT trust residence: Critique)
Repeal s.82 and s.65(3) TCGA (collection of exit charge from trustees).	See 11.5.2 (Critique)
TNR rules: exemption if foreign tax paid and annual exemptions.	See 10.24 (TNR rules: Critique)
Define RFI to mean all foreign source income; repeal s.830(3) ITTOIA.	See 15.10.4 (RFI definition: Critique); 92.8 (Clawback of unremittable assets relief)
Repeal s.838 ITTOIA (relief for expense of collecting RFI).	See 15.11 (RFI collection costs).
“Relevant persons” for remittance purposes should just be the taxpayer, spouse, cohabitee and minor children; investment relief can be abolished as unnecessary.	See 17.7.1 (Corporate relevant persons: Critique) 17.11 (Relevant person rules: Critique); 17.40.2 (Gifts to charity: Reform); 18.23 (Investment relief: Critique)
Payment into UK account of non-relevant person should not (for that reason alone) be a remittance.	See 17.12.7 (Gift to non-relevant person); 17.40.2 (Gift to charity: Reform)
Repeal s.809P(13) ITA	See 17.32.8 (Sets)
Foreign services relief: delete condition B and repeal s.809W(5) ITA.	See 18.27.1 (Services relief condition B: Critique); 18.28 (Exceptions: s.730 & s.87 benefits)
A person remitting from a mixed fund can determine what constituent of the fund the remittance consists of.	See: 19.20 (Mixed fund rules: Critique)
Align taxation of trades and professions/vocations so the same rules apply to all.	See 20.3.1 (Profession/vocation: Critique)

Source of interest should be as specified in OECD Model.	The current test is uncertain. See 25.14.1 (Source of interest: Critique)
Define “ordinary place of abode” in line with residence.	See 25.21.7 (Place of abode: Critique)
The DTA self-certificate system for royalties should apply to interest.	See 25.36 (Claim procedure: Critique)
Repeal relief for exempt foreign currency securities.	See 26.8 (Exempt foreign currency securities)
Delete requirement that “foreign employers” must be resident outside the UK.	See 33.15 (Foreign employer)
Repeal the remittance basis for Chargeable Overseas	See 33.16 (Incidental duties in UK).
Align treatment of Baker & Garland trusts, ie extend s.464 ITA to all trusts.	See 39.3.5 (Critique)
Repeal s.623 ITTOIA which has no effect.	See 44.4 (Settlor deductions/reliefs)
Collect tax on income of settlor-interested trust from the settlor.	See 44.11 (Trustees of settlor-interested trust)
Split year rule should apply for s.643A/720/731/87	See 44.24 (s.643A remittance basis); 46.20.1 (Remittance in split year); 47.39.9 (Remittance in split year); 57.18 s.87 gains of split year
Abolish statutory EU-law ToA defence	See 45.19.1 (EU-law defence: Critique)
Restore motive defence old condition B.	See 47.18.10 (s.733 computation: Critique)
Section 731 remittance basis should apply only if benefit is remitted (like the s.87 remittance basis).	See 47.40.9 (s.731: Critique)

The statutory definition of “commercial” in s.738 ITA should be repealed.	See 49.6.4 (“Commercial”: Critique)
Clarify that offshore income gains can qualify as protected income.	See 64.12.2 (OIG: Protected s.720 income?)
Abolish Accrued Income remittance basis (make gains subject to CGT).	See 27.9.7 (Critique)
Define “trade” to include “profession” and align the taxation of trades and professions	See 82.17 (“Trade”)
Transactions in financial assets should in principle be deemed non-trading. The IME, AIF and OFTR exemptions can be repealed.	See 42.11 (Critique)
Repeal s.56(3)(a)-(f) - an odd list of entitlements to IT personal allowances.	See 41.7.5 (IT allowances: Misc)
Spouses should be treated as separate persons for CGT private residence reliefs.	See 55.8 (Spouses)
Repeal relief for pre-1991 protected trusts: there are probably none left in existence.	See 56.8.5 (Pre-1991 trusts: Critique)
Align definition of “spouse” for CGT and IT settlor-interested trust rules, ie apply s.625(4) ITTOIA for CGT.	See 56.5.2 (Civil partner/same-sex spouse)
Repeal s.87 interest surcharge.	See 57.17.1 (Interest surcharge: Critique)
Capital payment when non-resident not matched to gain when resident.	See 57.25 (Non-resident disregard: Critique)
Schedule 4B & 4C TCGA should only apply where there is a purpose specifically to avoid s.87 or s.86; or (better) repeal and replace with GAAR guidance.	See 58.33 (Critique)

Abolish the sub-fund regime	See 59.11 (Sub-funds: Critique)
Repeal s.262(3) [losses on sale of chattels under £6k should not be allowable].	See 61.10.2 (Loss on disposal of chattel)
Repeal carry-back of losses on death.	See 61.12.1 (Loss accruing before death)
Personal CGT losses should be deductible against s.87 gains.	See 61.14.1 (Personal loss & s.87: Critique)
The taxation of foreign currency should be the same as foreign currency bank accounts.	See 91.11.2 (Critique)
Yearly exchange rate averaging; Currency conversion date for income remittance is date of receipt, not date of remittance.	See 91.13 (Foreign currency issues: Critique)
Replace remaining pre-1963 DTAs with OECD Model treaties	See 103.24 (Pre-1963 DTAs)
Repeal s.80 IHTA. The cure is worse than the disease.	See 71.13.10 (s.80 fictions: Critique)
The IHT spouse exemption should be restricted to spouses living together.	See 72.5.1 (Spouse exemption: Introduction)
UK bank accounts should qualify as excluded property as non-UK accounts.	See 72.13.4 (Foreign currency: Critique)
Inter-trust transfers should be ignored for IHT.	See 75.4 (Inter-trust transfer: IHT effect).
Repeal s.166[2][b] IHTA so time-barred debts are treated as of no value.	See 76.7.5 (Time-barred debts: Critique)
Repeal s.173 IHTA	See 76.45 (Foreign administration expenses)
Abolish the non-PET traps	See 77.3.3 (Non-PET trap); 77.5.1 (Alteration deemed)

	disposition)
Repeal s.731(6) ITEPA (illegitimacy taken into account).	See 79.4.1 (“Family”)
Abolish the s.105 ITEPA charge and extend s.106 to cover all the acquisition cost.	See 79.28.6 (Critique)
Shadow directors should be taken out of the benefit in kind charge.	See 79.33 (Home BiK: Critique)
Abolish ATED regime.	See 93.39.5 (The way forward)
Replace POA rules with focussed anti-avoidance rules.	See 80.39.3 (Assessment)
Abolish CGT spouse exemption; replace with CGT exemption on divorce.	See 84.5.5 (Rebasing on death: Planning)
PRs should be deemed to be a single and continuing body distinct from the persons who are the PRs.	See 85.2 (Meaning of “PRs” for IT)
A single definition of “settlor” which applies for all taxes.	See 94.2.13 (Definitions of “settlor”: Critique); 94.12.3 (Appointment rules: Critique); 94.24 (Property provided to co in trust)
Repeal s.473 ITA (& CGT equivalent); dead letter law.	See 94.38.6 (Settlor of IoV: Critique)
Repeal para 21B sch 24 FA 2007 which has never been used.	See 120.23.5 (Assets representing assets)
Treat all assets other than UK land and securities as non-UK situate for the purposes of IHT & CGT.	See 97.36 (Reform of IHT/CGT situs rules)

Failing that, a second best: All securities situate for CGT in the place of incorporation of the company. s.275(1)(c) should be replaced by a rule that a debt is situate where the debtor is resident (applying the UK tax definition of residence). Repeal s.s.275(1)(k) TCGA (situs of judgement debt).	See 98.8.4 (Critique); 98.13.5 (Critique) 98.11 (Debt rules: Critique)
Provision that usufruct is not an IHT-settlement.	See 86.16.6 (Usufructs: Critique)
Define PE by reference to OECD Model definition.	See 101.23 (Definitions of PE: Critique)
Replace branch/agency with PE.	See 101.26 (Branch/agency: Critique)
A 20 year time limit for collection of IHT.	See 119.14 (No time limit)
Repeal the remittance basis for Chargeable Overseas	See 33.16 (Incidental duties in UK).

### Reforms involving tax avoidance provisions

Proposal	Reference
Repeal POA rules; replace with IHT charge on death in case of <i>Eversden</i> , <i>Ingram</i> and Home Loan schemes; repeal s.102(5A)-(5C) FA 1986.	See 80.39 (Critique); 74.10.2 (Spouse exemption restricted)
Repeal corporate residential property regime; or allow election for transparency	See 93.39.5 (The way forward)
Reform of offshore anti-avoidance code	See 10.1 (Reform of anti-avoidance rules: Introduction)

### App. 11.3 Section numbering system

The reader will have noticed that the system of numbering sections in the Taxes Acts is idiosyncratic.

OPC drafting guidance provides:

The following applies when inserting whole provisions between existing provisions.

- New provisions inserted between 1 and 2 are 1A, 1B, 1C etc.
- New provisions inserted between 1A and 1B are 1AA, 1AB, 1AC etc.
- New provisions inserted between 1 and 1A are 1ZA, 1ZB, 1ZC etc. (and not 1AA etc.)
- New provisions inserted between 1A and 1AA are 1AZA, 1AZB, 1AZC etc<sup>3</sup>

This is sensible if inserting individual sections. However it does not work well when inserting Chapters, particularly if inserting a Chapter adjoining an existing insertion.

For instance, the 3 Chapters dealing with income streaming: section numbering begins with 809, followed by the Chapter letters, ie one of 809A/809AA/809D. The sections are then numbered ZA, ZB, etc. Hence:

- the 1<sup>st</sup> section of Chapter 5A is s.809AZA and the last is s.809AZG
- the 1<sup>st</sup> section of Chapter 5AA is s.809AAZA and the last is s.809AAZB

These chapters should not have been slotted into Part 13 ITA. The only benefit of putting all the provisions into Part 13 ITA is that all tax avoidance provisions are in a single Part where perhaps they logically belong. The benefit (if it is a benefit) is far outweighed by the clumsy statutory numbering that had to result. They should have been set out elsewhere, where they could be numbered arithmetically, if nowhere else was suitable, in the Finance Act where they were enacted.

At present there are provisions with *five* letters used in this way, eg s.12ABZAA TMA. In the fullness of time, if we carry on as we have, provisions with a number and six or even more letters must follow.

For provisions which have now been enacted, only consolidation will remove the problem; a desperate remedy. But it would at least be desirable to avoid adding to section numbers of this kind, not (or not just) because they are ridiculous, though they are; but because it is hard to find and to cross refer to them. A section number is a label, and these are poor labels.

---

3 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/727629/drafting\\_guidance\\_July\\_2018.2..pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/727629/drafting_guidance_July_2018.2..pdf)

Is there any other country in the world which uses numbering like this?  
Discuss.

APPENDIX TWELVE

**REFORM OF OFFSHORE ANTI-AVOIDANCE LAW**

App. 12.1 Reform of anti-avoidance rules

**App. 12.1 Reform of anti-avoidance rules**

This appendix notes some proposals towards simplification/rationalisation of the IT/CGT anti-avoidance rules which apply to non-resident trusts and companies.

The rules discussed in this appendix may be classified in 3 ways:

<i>Classification</i>	<i>Main provisions</i>	<i>Applies to</i>
<b>IT rules</b>	s.720/s.731 ITA, s.624 ITTOIA	IT
<b>CGT rules</b>	s.3/s.86/s. 87 TCGA	CGT

Alternatively:

<b>Settlor rules</b>	s.624/s.720/ s.86	settlers/transferees
<b>Benefit rules</b>	s.731/s.87/s.643A	receipt of benefits

Alternatively:

<i>Basis of assessment</i>	<i>Applies to:</i>
Arising basis	UK domiciled taxpayers
Remittance basis	Remittance basis taxpayers
Protected trust basis	Non-dom settlors/transferees

Proposals discussed in particular are:

**2012 reform paper:** CIOT proposals entitled “Reform of two anti-avoidance provisions”.<sup>1</sup>

---

1 [http://www.tax.org.uk/system/files\\_force/file\\_uploads/131011%20Transfer%20of%20assets%20-%20further%20consultation%20-%20CIOT%20comments.pdf?download=1](http://www.tax.org.uk/system/files_force/file_uploads/131011%20Transfer%20of%20assets%20-%20further%20consultation%20-%20CIOT%20comments.pdf?download=1) (2012)

**2015 reform paper:** proposals from the professional bodies in 2015.<sup>2</sup>

Since then we have had the introduction of the protected trust regime in 2017 and 2018, the full implications of which have yet to be worked out, though it clearly represents an enormous setback to the cause of simplicity in trust taxation.

### **App. 12.2 Outline of reforms discussed**

The main reforms discussed here are as follows:

- (1) To reduce the overlap of IT rules so only one IT rule applies at any one time. At present the IT rules overlap: s.624, s.720 and s.731 rules can all operate at the same time. (CGT rules overlap rather less.)
- (2) To align IT/CGT benefit rules
- (3) To align IT/CGT settlor rules

Alignment is possible if and so far as the IT/CGT rules aim to achieve the same result, namely (in short) to tax income/gains arising to non resident entities in the following ways:

- (a) *The individual responsible for funding the entity* (settlor/transferor) may be taxed on the entity's income/gains, on an arising or remittance basis, subject to protected trust relief
- (b) *Individuals who receive benefits from the entity* are taxed on the benefits (on a receipts basis or a remittance basis) so far as matched to the income/gains

The topic even more in need of reform is inheritance taxation of trusts; but that is not discussed here as it is too far from the themes of this book.<sup>3</sup>

### **App. 12.3 Need for reform**

The burden of operating the many sets of rules has increased over the years

---

2 Taxrep 59/15 (ICAEW Representation 152/15)  
<http://www.icaew.com/~media/corporate/files/technical/tax/tax%20faculty/taxrep/2015/taxrep%2059-15%20reforms%20to%20the%20taxation%20of%20non%20domiciles.ashx>

3 See Kessler, "The Quest for Fair Inheritance Taxation of Trusts" [2013] *Trusts & Trustees* p.364  
<https://www.kessler.co.uk/wp-content/uploads/2012/10/JK4393-Lecture-Trust-tax-reform-5.pdf>

as

- (1) The application of the rules has become much wider (significant extensions of scope, for instance, in 1998, 2005, 2008, 2017<sup>4</sup>).
- (2) The content of the rules has become much more complicated (significant complications, for instance, in 2008, 2017 and 2018<sup>5</sup>).

Growth in complexity can be (very roughly)<sup>6</sup> measured by the number of pages discussing the topics in succeeding editions of this book. The figures are shocking, indeed frightening, as a glance at the ever increasing size of this book will indicate.<sup>7</sup>

No reader who studies this book will doubt the need for reform.

Discussion is theoretical in that there seems to be little current prospect of serious reform. But it may be worthwhile attempting to think the matter out in anticipation of a future change of political climate.

#### **App. 12.4 How to assess reforms**

Assessment of proposed reforms raises two sets of issues.

The first is that propounded by the Brown administration in the 2008 domicile reforms: does the reform produce a system which is fairer, simpler, and/or easier to operate;<sup>8</sup> not in absolute terms, but measured from the starting point of the present system.

---

4 1998: Extending the s.87 regime to foreign domiciled settlors; 2005: applying the ToA motive test to associated operations; 2008: the ITA remittance basis; 2017: deemed domicile. But that only lists some highlights.

5 2008: ITA remittance basis; 2017 and 2018: protected property regime. But that only lists some highlights.

6 Page count is a rough proxy for the ever growing complexity of the law, but not an altogether bad one. Some page growth is due to better coverage of existing law, and does not reflect increasing complexity. However I think it would be correct to say that 90% of the growth is due to increased complexity. Any major change leads to growth over several succeeding years, as the implications and HMRC guidance gradually emerge.

7 A historical note: The emergence of distinct IT/CGT benefit rules at the same time in the FA 1981 is puzzling. The 2012 reform paper uses stronger language: “bizarre ... inexplicable”. The explanation is no doubt that those responsible for one did not liaise with those responsible for the other. There was no public consultation. But the burden of separate codes was, perhaps, acceptable (if sub-optimal) when they first emerged.

8 See 1.7 (Approach to assessment of reforms).

The second set of issues is whether there are winners and losers, and if so who they are:

- (1) If there are none, or few, the reforms may be described as “**technical**” and should not be politically controversial.
- (2) If reform produces a balance of winners and losers, the Treasury should not be affected.

Winners and losers need to be identified if the results are to be defensible. Even the simplest reforms tend to produce both intended and unintended (or targeted and untargeted) winners or losers, in complex patterns.<sup>9</sup>

If the reform produces losers, transitional issues become more important. Losers generally object more loudly than winners. As the numbers become larger the reforms become more political.<sup>10</sup>

My emphasis here is on more technical reforms, but little if any worthwhile reform can be achieved without some winners or losers. Tax simplification cannot be achieved by technical reform alone. That is why it has not happened.

## **App. 12.5 Critique of present rules**

### *App. 12.5.1 Critique of s.87 regime*

The Jersey Court commented on the s.87 regime, in a variation of trusts case, and was not flattering:

In essence, as we understand it, as a result of the changes introduced in the 1998 Finance Act of the United Kingdom, [which extended the s.87 regime to trusts with foreign domiciled settlors] UK resident beneficiaries are liable to be assessed for capital gains tax on the uplift in capital value in the underlying settlement assets between the date of the Settlement and the date of any appointment to them. ... such liability might be very significant and indeed account for a major proportion of the Trust assets ever appointed to them. It appears that this particular tax regime disregards the fact that the beneficiaries were not the owners of the assets during which time the gains were made, had no control over what gains were made or how the assets were invested or whether income or capital

---

<sup>9</sup> For an example, see 57.9 (Non-residents allowances: reform).

<sup>10</sup> Though politics depends on salience as well as significance measured by the tax at stake; the lively debate on the Budget 2012 “Pasty tax” is an illustration.

was appointed or retained. It is not as if the underlying settlement assets were UK beneficially owned assets either or naturally fell within the UK tax net during the period of the Settlements... this is the clearest possible case where the artificial and unduly harsh nature of the basis of taxation would indeed prompt the exercise of discretion [to vary the trusts].<sup>11</sup>

The essence of the criticism is that the s.87 charge in its post-1998 form is excessively wide; even more so in its post-2008 form. Before 2018 I said “it operates a very rough justice”.<sup>12</sup> But after the introduction of the non-resident disregard, “rough justice” is too generous an assessment.

#### App. 12.5.2 *Critique of ToA regime*

The first-tier tribunal has described the ToA legislation as “some of the most complex in the Taxes Acts”.<sup>13</sup> That is really saying something.

The 2012 reform paper concludes:

Essentially the current rules [the transfer of assets code] are not fit for purpose.

I think all readers who study the topic will agree with the professional bodies, the Jersey Court and the first-tier tribunal, that at present neither the IT rules nor the CGT rules can be defended as satisfactory. But to criticise is easy. The hard part is to say how to do better. This appendix does not have the solution, if indeed a solution is possible, but contains some notes towards that end.

#### **App. 12.6 Abolish matching trust income/gains?**

Much of the difficulty of the benefit rules is the need to match benefits to trust income/gains. But if IT/CGT are taxes on income/gains, then that is unavoidable.

A HMRC consultation paper “Reforms to the taxation of non-domiciles” produced a startling proposal:

---

11 *Re DDD Settlement* [2011] JRC 243 at [25] <http://www.jerseylaw.je> The court approved a variation - adding the settlor as a beneficiary - whose purpose was to facilitate arrangements to avoid the s.87 charge.

12 See the 2017/18 edition of this work app 9.5.

13 *Williams v HMRC* TC/2011/02663, 23 January 2012 (unreported). The ToA provisions now are much more complicated than they were when that comment was made, so I think the comment remains valid.

The government intends to base the new rules on the taxable value of benefits received by the deemed domiciled individual **without reference to the income and gains arising in the offshore structure**. This ... means that there will be no need for trustees to have to recreate the history of the income and gains in the trust for tax purposes once an individual becomes deemed-UK domiciled.<sup>14</sup>

This proposal was not fair and indeed not rational, unless the rationale was to tax trusts penally so that they cease to be accessible to deemed domiciled UK residents.<sup>15</sup>

While it is disconcerting that this proposal could pass from brainstorming session to consultation paper, it does suggest a recognition of the difficulty of matching trust income/gains to benefits, at least in a situation where one could not expect UK tax records to have been prepared.<sup>16</sup>

We move on to consider some more promising approaches to reform.

### **App. 12.7 Aligning benefit rules**

Alignment of the IT/CGT benefit rules raises the question whether to take the CGT rules or the IT rules as the starting point for an aligned system. Is one better than the other, and if so, which? It matters less which set of rules one starts with, if one goes on to tinker with them. It is suggested that an aligned regime should combine features of both.

The 2012 reform paper proposed to apply the CGT benefit rules to IT (but adding a motive defence). The 2012 reform paper provides:

Income arising to [non-settlor-interested] trusts could... be covered by adapting TCGA 1992 section 87-97 to income, albeit preserving a motive defence.

Income arising to companies could be covered by adapting TCGA 1992 section [3]...

As indicated above, the adaptation of TCGA 1992 sections 87-97 to income would have to have a motive defence built into it. The reason is

---

<sup>14</sup> <https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles/reforms-to-the-taxation-of-non-domiciles> (September 2015).

<sup>15</sup> This is (more or less) the case for UK domiciled settlors.

<sup>16</sup> Some readers may speculate whether the proposal was put forward with a view to withdrawing it in consultation as a sop to the consultation process; but that seems far-fetched.

that many trusts, at the time of creation, have no UK connection. It would be wrong to tax a beneficiary who comes to the UK by reference to income arising before he immigrated. A motive defence would be a blunt way of doing this.

### **App. 12.8 IT settlor/ToA rules overlap**

The 2012 reform paper provides:

The key point is that the ToA code is only required if the income arises to a non resident entity which is for income tax purposes opaque. If the entity is not opaque, anti avoidance legislation is not needed at all, as then the income is taxed on general principles as that of the underlying owner or owners....

In particular, a settlor-interested trust within s.624 is transparent.

It is already the case that s.720 does not apply where s.624 does apply.<sup>17</sup> The 2012 reform paper proposes that s.624 should exclude the ToA rules altogether, ie the s.731 benefits charge does not apply so that:

- (1) income of a trust within s.624 is not relevant income.
- (2) benefits conferred by a trust within s.624 do not count for the purposes of s.731.

Thus only one anti-avoidance rule applies at a time.

For this purpose a trust is within s.624 when the settlor is UK resident (whether or not a remittance basis taxpayer).

When the settlor is non-resident, the better course would be to amend s.624 so it does not apply, leaving s.731 to apply.

### **App. 12.9 CGT settlor/benefit rules overlap**

The overlap of s.86 and s87 can be avoided by providing that a trust is not within the scope of s.87 if it is within the scope of s.86.

### **App. 12.10 IT/CGT settlor rules alignment**

Residence of individuals is a sensible connecting factor for UK taxation: everyone will accept that an individual who is UK resident should be subject to UK tax on an arising or remittance basis. Residence of *trustees* is a matter which is chosen by the appointment of trustees, and makes very

---

<sup>17</sup> See 44.13 (s.624/s.720 compared).

little sense as a connecting factor in the taxation of trusts.<sup>18</sup>

This is recognised in some contexts, where trust residence is (more or less) irrelevant for UK tax purposes:

- (1) IT settlor rules: s.624
- (2) Chargeable-event gains
- (3) Inheritance taxation of trusts

In these cases the main connecting factor for UK taxation is the residence or domicile of the settlor: trust residence is (more or less) irrelevant.

#### App. 12.10.1 *IT/CGT settlor rules compared*

The differences between the IT and CGT settlor rules (s.624 and s.86) are striking. The most important are:

- (1) Definition of “settlor-interested”: CGT definition much wider
- (2) Foreign domiciled settlor: within s.624 but not within s.86
- (3) Non-resident settlor: partly within s.624 (UK source income) but not within s.86.
- (4) Definition of “settlement”: Non-classic settlements within s.624 but not within s.86; non-bounteous settlements within s.86 but not s.624.

These distinctions due to contingent historical development; none are attributable to policy deliberation. There is no good policy reason why the rules should be different for the two taxes. A simpler and more rational system would apply the same rules.

#### App. 12.10.2 *Definitions of settlor-interested*

The rich variety of UK trust tax rules offers four possible starting points:

- (1) A trust is within the scope of UK tax if:
  - (a) the settlor (or close family) is a beneficiary.
  - (b) the settlor/spouse is UK resident and  
This is (in short) the IT model under the IT settlor rules.
- (2) Ditto but relax (a) so it suffices if the settlor’s wider family is a beneficiary. This is (in short) the CGT model under the CGT settlor rules.

---

18 It might be said that UK resident trustees enjoy the benefit of the UK legal system; but it would be more accurate to say that the UK economy enjoys the benefit of work opportunities for UK resident trusts.

- (3) Ditto but delete (a): the beneficiaries do not matter. This is the chargeable event model for life policies
- (4) Ditto but relax (b): a trust is within the scope of UK tax if the settlor is UK domiciled at the time the settlement is made. It does not matter who the beneficiaries are. This is (in short) the IHT model.

### App. 12.10.3 *Aligning settlor rules*

Once one opens up the debate as to which is better, intractable problems appear. Changes in this area would be substantive and not merely technical, and in particular:

- (1) Reform will produce losers.
- (2) The other proposals made in this appendix are technical reforms on which, I think, there ought to be fairly widespread agreement among those who understand the tax system. But here there will be no general agreement, so there will be less support for any reform. If one sets out all the options, not one of them would command a majority support.

There are fundamental decisions to make, and no logical principles on which to make them; contemplation leaves one feeling giddy. The basic question is the purpose of settlor rules. In origin the purpose of the rule was to tax the settlor on benefits expected to accrue to the settlor. Hence the IT settlor rule is restricted to settlor-interested trusts. But if more widely extended, as in CGT, the purpose is rather to tax the trust. If that is the purpose, then the logic leads to the conclusion that the rule should not be restricted to *settlor-interested* trusts, as is the case for chargeable-event gains and IHT.

### App. 12.10.4 *A proposal*

Tax reform, as politics, is the art of the possible. Perhaps the most realistic course is to leave the current settlor rules unaligned. Certainly that would be better if a more ambitious reform programme threatened the less controversial and badly needed technical reforms set out above. The 2012 reform paper wisely did not enter this arena.

If one were sufficiently radical, bold, or foolhardy, to enter into this arena, however, the author's solution would be as follows.

- (1) Adopt the CGT definition of a settlor-interested trust.
- (2) Extend the CGT rules to settlor-interested trusts.

A remittance basis settlor would qualify for the remittance basis/protected

trust relief.

Conversely, trusts should be exempt from CGT and IT on foreign income in relation to property provided (or wholly provided) by foreign domiciled non-resident settlors. At that point one falls back on the s.731/s.87 regime.

This is (I think) the basis of trust taxation in Canada, New Zealand and, I suspect, most other common law jurisdictions. HMRC made a proposal of this kind in 1972, though nothing came of it.<sup>19</sup>

DT relief would apply where the trustees are treaty-resident in a foreign state.

Of course, domicile and residence of the settlor are not perfect connecting factors. Such a thing does not exist. International families can sometimes break the link by:

- (1) transfers to individuals who are not connected to the UK, and
- (2) the individual settles or resettles the property.

However this is easier to say than to do.<sup>20</sup>

## APPENDIX THIRTEEN

# THE WISDOM OF PARLIAMENT

App. 13.1 Nature of parliamentary debate

App. 13.2 History of non-dom taxation

App. 13.3 Inheritance Tax

App. 13.4 Remittance investment relief

### **App. 13.1 Nature of parliamentary debate**

The House of Lords decided in *Pepper v Hart* that the Courts should in some circumstances have regard to Parliamentary debate, recorded in Hansard, in order to understand statutes. The number of tax cases where Hansard has actually made a difference is limited.<sup>1</sup>

Hansard is unlikely to be on the reading list of many tax practitioners, and for good reason: the debates tend to be ill-tempered, ill-informed, and sometimes puerile.

This appendix provides a few highlights. Further contributions from readers would be welcome.

### **App. 13.2 History of non-dom taxation**

Peter Dowd (Labour, Shadow Chief Secretary to the Treasury) misstates the early history of the remittance basis:

Non-dom tax status was introduced in 1799 (!) to allow British colonialists with foreign property to shelter it from wartime taxes.<sup>2</sup>

The remittance basis goes back the Duties on Income Act 1799, but the remittance basis was available to all taxpayers until 1914, which restricted

---

1 Are there in fact any tax cases other than *Pepper v Hart* itself?

2 <https://hansard.parliament.uk/commons/2017-10-31/debates/DC20529E-FB3B-4348-BB33-ED2AD0395E91/FinanceBill>

the remittance basis, in part, to foreign domiciliaries.<sup>3</sup> Does it matter? Discuss.

Charlie Elphicke (Conservative) believes that the 2008 reforms were due to the Conservative opposition:

in their first 12 years in power, the last Labour Government did nothing whatsoever about non-domiciled individuals, and then reacted reluctantly only when they were humiliated and forced to take action by the then Conservative Opposition.<sup>4</sup>

### **App. 13.3 Inheritance Tax**

Peter Dowd thinks non-resident trusts give IHT advantages:

The use of offshore trusts is not restricted only to inheritance tax.<sup>5</sup>

### **App. 13.4 Remittance investment relief**

I thought it strange that there was no remittance investment relief, when the ITA remittance basis was introduced in 2008. Bambos Charalambous (Labour) explains there is no link between taxation and investment:

A good business investment is a good business investment whether it gets tax relief or not, and let us not kid ourselves that the sweetener of business interest relief is anything more than a sugar-coated inducement for non-doms who have already made their money.<sup>6</sup>

So it was left to the Conservatives to introduce remittance investment relief in 2012.

---

## APPENDIX FOURTEEN

# PURPOSE IN TAX STATUTES

### App. 14.1 Purpose of a statute

When interpreting a statute, it is common to ask what is its purpose or policy (the words are here synonymous). This appendix considers:

- What is meant by purpose of a statutory provision
- How does one ascertain the purpose
- How far does a purposive approach override the apparent meaning of a provision

These are deep questions! They are best addressed as a specific topic rather than in any particular context where they may arise.

A difficulty of this enquiry is that it has to be selective - there is too much data - and a dip in the data may give the impression of greater coherence than actually exists. In practice judges take different approaches, and a legal realist would say that they take the approach which justifies the conclusion which they wish to reach for other reasons. But we might at least ascertain the direction of the prevailing wind.

### App. 14.2 Construction of tax/non-tax statutes compared

I start by noting a common misapprehension. In *IRC v McGuckian*:<sup>1</sup>

During the last 30 years there has been a shift away from literalist to purposive methods of construction. Where there is no obvious meaning of a statutory provision the modern emphasis is on a contextual approach

---

<sup>1</sup> 69 TC 1 at p.5.

designed to identify the purpose of a statute and to give effect to it.

That is true as far as it goes, though the purposive approach is not limited to cases “where there is no obvious meaning”.

But under the influence of the narrow *Duke of Westminster* doctrine, tax law remained remarkably resistant to the new non-formalist methods of interpretation. It was said that the taxpayer was entitled to stand on a literal construction of the words used regardless of the purpose of the statute. Tax law was by and large left behind as some island of literal interpretation.

This Whig interpretation of tax history is often cited. But it is a fable, as even a cursory examination of tax case law in the 30 years to 1997 would reveal.<sup>2</sup> Does this matter? I leave the reader to consider that, and move on:

On both fronts the intellectual breakthrough came in 1981 in the *Ramsay* case, and notably in Lord Wilberforce's seminal<sup>3</sup> speech ... Lord Wilberforce restated the principle of statutory construction that a subject is only to be taxed upon clear words. To the question 'What are “clear words”?' he gave the answer that the court is not confined to a literal interpretation. He added

'There may, indeed should, be considered the context and scheme of the relevant Act as a whole, and its purpose may, indeed should, be regarded'.<sup>4</sup>

---

2 Lord Steyn cited 3 cases in support of his comment. One was a 19<sup>th</sup> century case. The second an early 20<sup>th</sup> century case *Cape Brandy Syndicate v IRC* (1921) 12 TC 358 at p.366 (“no equity about a tax”). A literalist approach, no doubt, but not different from that adopted for non-tax law at the time. The only case cited which actually fell in the 30 year period referred to was *IRC v Plummer* (1979) 54 TC 1. But this was an outlier, a 3:2 decision, reversed in 1993: *Moodie v IRC* (1993) 65 TC 610.

Incidentally, Lord Wilberforce, notwithstanding his “seminal” speech in *Ramsay* was one of the maligned literalists who decided the outcome in *Plummer*.

3 The hyperbolic language, which seems to put *Ramsay* on a level with the theory of evolution or of relativity, is characteristic of judicial rhetoric.

4 The quote is not unfair, but the passage read as a whole is more nuanced, see 54 TC 101 at 185:

“I think it opportune to restate some familiar principles and some of the leading decisions so as to show the position we are now in.

1. A subject is only to be taxed upon clear words, not upon "intendment" or upon the "equity" of an Act. ... What are "clear words" is to be ascertained upon normal

This sentence was critical. It marked the rejection by the House of pure literalism in the interpretation of tax statutes.

I don't think anyone has ever said that the fundamental principles of construction are different for tax and non-tax statutes; but the difference of context makes the same rules work in different ways, and that continues to be the case.

It might be that the Courts, or at least some judges, currently apply purposive construction more enthusiastically in tax cases than in non-tax cases. That would not be easy to prove or disprove, and no-one would admit to it consciously. But I do not think that non-tax cases have an equivalent of the constantly repeated exhortation in tax cases to construe purposively and ascertain facts realistically.<sup>5</sup>

### App. 14.3 How to ascertain tax policy

The courts ascertain the policy by using the ordinary methods of statutory construction, ie just by reading the statute, with supplemental material such as Hansard when admissible, and reflecting on it. That approach will not necessarily give a profound understanding of policy issues; what would one think of an essay on tax policy which restricted itself to these limited sources? But a Court is not equipped to do more.

---

principles: these do not confine the courts to literal interpretation. There may, indeed should, be considered the context and scheme of the relevant Act as a whole, and its purpose may, indeed should, be regarded...

2. A subject is entitled to arrange his affairs so as to reduce his liability to tax. The fact that the motive for a transaction may be to avoid tax does not invalidate it unless a particular enactment so provides...

4. Given that a document or transaction is genuine, the court cannot go behind it to some supposed underlying substance. This is the well-known principle of *IRC v Duke of Westminster* [1936] AC 1. This is a cardinal principle but it must not be overstated or overextended. While obliging the court to accept documents or transactions, found to be genuine, as such, it does not compel the court to look at a document or a transaction in blinkers, isolated from any context to which it properly belongs. If it can be seen that a document or transaction was intended to have effect as part of a nexus or series of transactions, or as an ingredient of a wider transaction intended as a whole, there is nothing in the doctrine to prevent it being so regarded... the Commissioners ... are not ... bound to consider individually each separate step in a composite transaction intended to be carried through as a whole..."

5 See App 6.6 (Realistic view of facts).

This makes sense if one bears in mind that the legal concept of tax policy is like the legal concept of the intention of parliament; it is a construct. Just as the legal concept of the intention of parliament may differ from what was actually the intention of those involved,<sup>6</sup> so too the legal concept of tax policy.

#### App. 14.4 Difficulty of ascertaining tax policy

It is often difficult to ascertain what is the policy. For instance, in gifts with reservation, two wildly different policies were plausibly arguable:

- (1) That the policy was to prevent *Ingram* style planning (tendentiously described as “to have one’s cake and eat it”).
- (2) That the policy was to require donors to identify precisely the interests they give away and those (if any) they keep.<sup>7</sup>

In this respect, GWR is not unusual. It is often difficult (perhaps more often than not) to ascertain the policy of tax provisions and sometimes it is impossible:

In reaching these conclusions I have not attempted any purposive construction of the detailed provisions of the Act, since I am not sure what their purpose is.<sup>8</sup>

And again:

it is only too often that the purposes of a fiscal provision are not apparent.<sup>9</sup>

This should not be a surprise. There are several powerful factors which lead to this result:

- (1) The difficulty of formulating a coherent tax policy: It often happens that irreconcilable policy considerations yield no satisfactory solution,

---

6 This is well established jurisprudence, but if authority is needed, see *R v Secretary of State ex p. Spath Holme* [2001] 2 AC 349: “The phrase is a shorthand reference to the intention which the court reasonably imputes to Parliament in respect of the language used. It is not the subjective intention of the minister or other persons who promoted the legislation. Nor is it the subjective intention of the draftsman, or of individual members or even of a majority of individual members of either House.”

7 See 79.2 (Purpose of GWR).

8 *BP Oil Development. v IRC* 64 TC 498, at p.532B.

9 *Marshall v Kerr* (CA) [1993] STC 360. Dividend taxation is a good example; see 29.1.1 (Dividend taxation: Critique).

or at least, no consensus on what the solution should be.

- (2) The inadequate way in which tax policy and drafting has been, and continues to be, formulated in the UK.<sup>10</sup>
- (3) The shortage of informed discussion of tax policy at journalistic level, and, with notable exceptions, at academic level (I think the quality of academic discussion may be higher in the US).
- (4) The total bulk of the material, and the speed of change, make detailed examination difficult and comprehensive examination impossible.

Two factors prevent statements of this kind being made much more often. The first is a judicial desire for comity with parliament, and the second is that the courts do not consider the policy behind tax provisions in much detail.

Since there are strongly differing views on what the tax policy should be, there are inevitable differing views as to what the policy actually is. The wish may be father to the thought. In *Marshall v Kerr*:<sup>11</sup>

there is a real danger that if a court in every case feels bound to commence its construction of a statutory provision by finding their purpose, it will make a self-fulfilling assumption of what the purpose is.

For all these reasons, debates about tax policy will rarely be settled. Authoritative decisions of the courts ought to resolve the question for practical purposes, on the rare occasions when they exist; but even then, the losing side may seek to chip away at the issue.

### App. 14.5 Fowler: a case study

I take as a case study the Supreme Court decision in *Fowler v HMRC*. This raised the issue of the purpose of the strange rule that North Sea divers are deemed to be carrying on a trade.<sup>12</sup>

---

<sup>10</sup> See 1.12 (State of UK tax reform).

In some cases the policy is founded on basic misconception; eg the false premise of ATED was that taxpayers used enveloping to avoid SDLT; see 93.39.3 (ATED purpose at outset). In some cases the purpose was to prevent avoidance arrangements which the HMRC (and the drafter) are unable to articulate, or refuse to identify; eg, see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12<sup>th</sup> ed, 2019/20), Chapter 7 (Tainted Donation Rules). In some cases the reasons given do not bear serious scrutiny; see eg 76.41.1 (s.175A disallowance: purpose).

<sup>11</sup> 67 TC 56 at p.78.

<sup>12</sup> See 36.16.1 (Deemed non-employment).

App. 14.5.1 *The purpose in fact*

John Avery Jones records:

The deeming arose in 1978 because, whilst divers had been treated as self-employed in the past, the Revenue had made a ruling that they should be taxed as employees.

The ruling was naturally unpopular and there were newspaper reports of a threatened strike. This would have been serious because ... divers were a highly skilled, highly mobile work force in extremely short supply. Deeming them to be self-employed was odd tax policy ... but presumably the change was considered preferable to North Sea oil production being disrupted, and ministers reluctantly agreed to it. Parliament was told at the time that the reason was that the standard way of classifying someone as employed or self-employed did not meet the rules of the industry, which does not seem to be particularly convincing.<sup>13</sup>

App. 14.5.2 *The purpose as published*

In Hansard:

Mr Robert Sheldon [then Financial Secretary to the Treasury] ... these divers fall to be treated as employees under the existing law. Nevertheless, after careful examination of their particular circumstances, I recognise that there are certain distinctive features about their work, such as the danger which it entails, their vulnerability to long-term health hazards, the exceptional travelling difficulties involved and the shortness of their working life. Taking into account these and other factors, my right hon. Friend is now prepared to introduce legislation in the coming Finance Bill which will provide that earnings from diving operations in connection with exploration or exploitation activities in the UK Continental Shelf will, with effect from 1978 – 79, be assessable under Schedule D [trading income] rather than Schedule E [employment income].<sup>14</sup>

Office of Tax Simplification:<sup>15</sup>

---

13 Avery Jones and Hattingh, “*Fowler v HMRC: divers and the dangers of deeming*” [2016] BTR p.417.

14 HC Deb 3 February 1978 vol 943 c359 W.

15 OTS, *Review of tax reliefs* (March 2011)

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/198570/ots\\_review\\_tax\\_reliefs\\_final\\_report.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/198570/ots_review_tax_reliefs_final_report.pdf)

B.108 The regime was introduced in 1978 to ensure fairness amongst divers of all nationality and employment status when engaged on the UK continental shelf. This is because at that time, the divers had to pay their costs themselves, and therefore being taxed as self employed ensured they were able to obtain relief for these expenses.

B.109 However since then, we understand that many employers have made agreements with the trade unions that they will cover these costs. It would therefore appear that there is no ongoing rationale for this regime to be retained.<sup>16</sup>

### App. 14.5.3 Purpose according to Courts

In the FTT:

It is hard to see how dangers, vulnerability to long-term health hazards and shortness of working life, for example, are relevant to the question whether the individual should be taxed on an employment or a self-employed basis. The real purpose of section 15 ITTOIA, in my judgment, is to be found in the more relaxed rules (when compared with those for employment income) for deductibility of expenses in the calculation of trading income (and, possibly, from the timing advantage conferred by the absence of PAYE).<sup>17</sup>

In the Supreme Court:<sup>18</sup>

the FtT found that [the reason for the rule] was because ... this class of divers commonly incurred their own costs, and therefore deserved the more generous expenses regime afforded to the self-employed, by comparison with employees. The FtT relied on an opinion to that effect published by the Office of Tax Simplification in March 2011, in preference to broader but less persuasive observations by the Financial Secretary to the Treasury in February 1978 ... There is no good reason to doubt that essentially factual finding (!)<sup>19</sup> by the FtT. It is clear (!) that it was not a purpose of the deeming provision ... to resolve some legal or factual uncertainty about whether such divers were genuinely employed or self-employed. On the contrary, section 15 applies only to

---

16 OTS recommended that the rule should be repealed, but no-one took any notice of that.

17 *Fowler v HMRC* [2016] UKFTT 234 (TC) at [94].

18 *Fowler v HMRC* [2020] UKSC 22 at [25].

19 The view that finding the purpose of a statute is “essentially factual” cannot be defended, and the less said about it the better.

employed divers...

#### App. 14.5.4 *Purpose of DTA*

The Supreme Court also considered the purpose of the relevant DTA:

15. If one asks, as is required, for what purposes and between whom is the fiction created, it is plainly (!) not for the purpose of rendering a qualifying diver immune from tax in the UK, nor adjudicating between the UK and South Africa as the potential recipient of tax. It is for the purpose of adjusting the basis of a continuing UK income tax liability which arises from the receipt of employment income. Therefore to apply the deeming provision in [s.15(2) ITEPA] so as to alter the meaning of terms in the Treaty with the result of rendering a qualifying diver immune from UK taxation would be contrary to its purpose

34. Nor should article 3(2) of the Treaty<sup>20</sup> be construed so as to bring a qualifying diver within article 7 [business profits] rather than article 14 [employment income]. To do so would be contrary to the purposes of the Treaty... the Treaty is not concerned with the manner in which taxes falling within the scope of the Treaty are levied. Section 15 ... charges income tax on the employment income of an employed diver, but in a particular manner which includes the fiction that the diver is carrying on a trade.

The distinction between deemed trade and taxing employment income in the manner of a trade is, to say the least, a fine one.

#### App. 14.5.5 *Purpose: conclusion*

What I think emerges from this case study is that the search for purpose if carried out seriously can be unedifying. Laws are indeed like sausages: it is better not to see how they are made.<sup>21</sup> The best that can be done is for the Courts to skate over these problems - as they do.

Perhaps the purposive pendulum will swing back a little. We are at risk of reaching the position, said to pertain in America, that when legislative purpose is not clear from the enactment history, one resorts to reading the statute.

---

20 See 103.11.1 (Domestic-law meaning).

search purposes only.**

## OFFSHORE TAX OFFENCES & PENALTIES

????

### 1.1 Offshore tax offences

#### 1.1.1 *Non-fraudulent offences*

The legislation is in s.106B-106H TMA, introduced by FA 2016, supplemented by the Taxes Management Act 1970 (Specified Threshold Amount) Regulations 2017. The offences are:

<b>Section</b>	<b>Offence</b>
106B	Failing to give notice of being chargeable to tax
106C	Failing to deliver return
106D	Making inaccurate return

I do not refer to these offences as “evasion” as they do not require dishonesty/fraudulent intent, and I would reserve the word “evasion” for the offences which do.<sup>1</sup> The word “evasion” has a complicated history, but from about the 1970s it has generally been used to mean only fraudulent evasion.<sup>2</sup>

It would be possible to use the word “evasion” broadly, to include a negligent failure to pay tax, even if there is no deliberate concealment or other dishonesty. There is indeed some historical precedent for that usage.<sup>3</sup> But greater precision of terminology would aid precision of thought. There is an important difference between those who are dishonest/fraudulent, and those who make innocent (non-fraudulent)

---

1 For those offences, see 120A120A.8 (Fraudulent evasion offences).

2 See 2.2.2 (Avoidance/evasion distinction)

3 See above footnote.

mistakes.

It is not just a semantic point which is being made here. Evasion is now an essentially contested concept. HMRC would like to stigmatise as tax evaders those who make innocent (non-fraudulent but perhaps negligent) errors. But this expansion of the concept of evasion erodes its value. If the word “evasion” is used, it would be appropriate to put it in scare quotation marks.

I refer to the three offences as “**offshore tax offences**”.

### 1.1.2 *No notice of chargeability*

Section 106B(1) TMA provides:

A person

- [i] who is required by section 7 to give notice of being chargeable to income tax or capital gains tax (or both) for a year of assessment and
- [ii] who has not given that notice by the end of the notification period<sup>4</sup> commits an offence if—
  - (a) the tax in question is chargeable (wholly or in part) on or by reference to offshore income, assets or activities, and
  - (b) the total amount of income tax and capital gains tax that is chargeable for the year of assessment on or by reference to offshore income, assets or activities exceeds the threshold amount.

### 1.1.3 *Failing to make return*

Section 106C(1) TMA provides:

A person who is required by a notice under section 8 to make and deliver a return for a year of assessment commits an offence if-

- (a) the return is not delivered by the end of the withdrawal period,<sup>5</sup>
- (b) an accurate return would have disclosed liability to income tax or capital gains tax (or both) that is chargeable for the year of assessment on or by reference to offshore income, assets or activities, and

---

4 Defined by reference in s.106B (3) TMA: “In this section “the notification period” has the same meaning as in section 7 (see subsection (1C) of that section). See xxx.

5 Defined by reference in s.106C(3): “In this section “the withdrawal period” has the same meaning as in section 8B (see subsection (6) of that section).”

- (c) the total amount of income tax and capital gains tax that is chargeable for the year of assessment on or by reference to offshore income, assets or activities exceeds the threshold amount.

1.1.4 *Inaccurate return*

Section 106D(1) TMA provides:

A person who is required by a notice under section 8 to make and deliver a return for a year of assessment commits an offence if, at the end of the amendment period<sup>6</sup>-

- (a) the return contains an inaccuracy the correction of which would result in an increase in the amount of income tax or capital gains tax (or both) that is chargeable for the year of assessment on or by reference to offshore income, assets or activities, and
- (b) the amount of that increase exceeds the threshold amount.

1.1.5 *Reasonable excuse defences*

<b>s.106B(2) TMA</b>	<b>s.106C(2)TMA</b>	<b>s.106D(2) TMA</b>
It is a defence for a person accused of an offence under this section to prove that the person had a reasonable excuse for failing to give the notice required by section 7.	It is a defence for a person accused of an offence under this section to prove that the person had a reasonable excuse for failing to deliver the return	It is a defence for a person accused of an offence under this section to prove that the person took reasonable care to ensure that the return was accurate.

The reader may think it is astonishing that in a civil case the onus of proving carelessness is on HMRC; but in a *criminal* case the onus is on the defendant to prove that they were not careless.

See 120.10 (Reasonable excuse).

1.1.6 *Exemption for trustees/executors*

Section 106E(1) TMA provides:

---

<sup>6</sup> Defined by reference in s.106D (3) “In this section "the amendment period" means the period for amending the return under section 9ZA.”

A person is not guilty of an offence under section 106B, 106C or 106D if the capacity in which the person is required to give the notice or make and deliver the return is-

- (a) as a relevant trustee of a settlement, or
- (b) as the executor or administrator of a deceased person.

1.1.7 *Time extension*

Section 106F(1) TMA provides:

Where a period of time is extended under subsection (2) of section 118 by HMRC, the tribunal or an officer (but not where a period is otherwise extended under that subsection), any reference in section 106B, 106C or 106D to the end of the period is to be read as a reference to the end of the period as so extended.

1.2 **“Offshore income/assets/activities”**

This term is used in all three offshore tax offences:

<b>s.106B(1) TMA</b>	<b>s.106C(1)TMA</b>	<b>s.106D(1) TMA</b>
(a) the tax in question is chargeable (wholly or in part) on or by reference to offshore income, assets or activities	(b) an accurate return would have disclosed liability to income tax or capital gains tax (or both) that is chargeable for the year of assessment on or by reference to offshore income, assets or activities,	(a) the return contains an inaccuracy the correction of which would result in an increase in the amount of income tax or capital gains tax (or both) that is chargeable for the year of assessment on or by reference to offshore income, assets or activities,

Section 106F(4) TMA provides:

In sections 106B to 106D and this section “offshore income, assets or activities” means-

- (a) income arising from a source in a territory outside the UK,

- (b) assets<sup>7</sup> situated or held in a territory outside the UK, or
- (c) activities carried on wholly or mainly in a territory outside the UK.

Can this really be EU-law compliant? See 120.51 (EU-law compliance).

### 1.3 Offshore tax offences penalties

Section 106G TMA provides:

- (1) A person guilty of an offence under section 106B, 106C or 106D is liable on summary conviction-
  - (a) in England and Wales, to a fine or to imprisonment for a term not exceeding 51 weeks or to both, and
  - (b) in Scotland or Northern Ireland, to a fine not exceeding level 5 on the standard scale or to imprisonment for a term not exceeding 6 months or to both.
- (2) In relation to an offence committed before the coming into force of section 281(5) of the Criminal Justice Act 2003, the reference in subsection (1)(a) to 51 weeks is to be read as a reference to 6 months.

#### 1.3.1 Offshore offences: Critique

In the absence of dishonesty, which has hitherto been regarded as central to tax offences, one wonders what is the point of the provisions or of a prosecution. Presumably they are intended to operate *in terrorem*. Perhaps there will never be a prosecution?

### 1.4 Enablers of offshore tax offences

The legislation is in sch 20 FA 2016.

### 1.5 Liability for penalty

Para 1 sch 20 FA 2016 provides:

- (1) A penalty is payable by a person (P) who has enabled another person (Q) to carry out offshore tax evasion or non-compliance, where conditions A and B are met.

---

<sup>7</sup> Defined s.106F(4): “(5) In subsection (4), “assets” has the meaning given in section 21(1) of the 1992 Act, but also includes sterling.”

### 1.5.1 *Offshore evasion/non compliance*

Para 1 sch 20 FA 2016 provides:

(2) For the purposes of this Schedule-

(a) Q carries out “offshore tax evasion or non-compliance” by-

(i) committing a relevant offence, or

(ii) engaging in conduct that makes Q liable (if the applicable conditions are met) to a relevant civil penalty,

where the tax at stake is income tax, capital gains tax or inheritance tax, and

### 1.5.2 *Enabling*

Para 1(2)(b) sch 20 FA 2016 provides:

(b) P “has enabled” Q to carry out offshore tax evasion or non-compliance if P has encouraged, assisted or otherwise facilitated conduct by Q that constitutes offshore tax evasion or non-compliance.

### 1.5.3 *Relevant offences*

Para 1 sch 20 FA 2016 provides:

(3) The relevant offences are-

(a) an offence of cheating the public revenue involving offshore activity, or

(b) an offence under section 106A of TMA 1970 (fraudulent evasion of income tax) involving offshore activity,

(c) an offence under section 106B, 106C or 106D of TMA 1970 (offences relating to certain failures to comply with section 7 or 8 by a taxpayer chargeable to income tax or capital gains tax on or by reference to offshore income, assets or liabilities).

Para 1 sch 20 FA 2016 provides:

(4) The relevant civil penalties are-

(a) a penalty under paragraph 1 of Schedule 24 to FA 2007 (errors in taxpayer's document) involving an offshore matter or an offshore transfer (within the meaning of that Schedule),

(b) a penalty under paragraph 1 of Schedule 41 to FA 2008 (failure to notify etc) in relation to a failure to comply with section 7(1) of TMA 1970 involving offshore activity,

- (c) a penalty under paragraph 6 of Schedule 55 to FA 2009 (failure to make return for 12 months) involving offshore activity,
- (d) a penalty under paragraph 1 of Schedule 21 to FA 2015 (penalties in connection with relevant offshore asset moves),

#### 1.5.4 *Condition A*

Para 1 sch 20 FA 2016 provides:

(5) Condition A is that P knew when P's actions were carried out that they enabled, or were likely to enable, Q to carry out offshore tax evasion or non-compliance.

#### 1.5.5 *Condition B*

Para 1 sch 20 FA 2016 provides:

- (6) Condition B is that-
  - (a) in the case of offshore tax evasion or non-compliance consisting of the commission of a relevant offence, Q has been convicted of the offence and the conviction is final, or
  - (b) in the case of offshore tax evasion or non-compliance consisting of conduct that makes Q liable to a relevant penalty-
    - (i) Q has been found to be liable to such a penalty, assessed and notified, and the penalty is final, or
    - (ii) a contract has been made between the Commissioners for Her Majesty's Revenue and Customs and Q under which the Commissioners undertake not to assess the penalty or (if it has been assessed) not to take proceedings to recover it.
- (7) For the purposes of sub-paragraph (6)(a)-
  - (a) "convicted of the offence" means convicted of the full offence (and not for example of an attempt), and
  - (b) a conviction becomes final when the time allowed for bringing an appeal against it expires or, if later, when any appeal against conviction has been determined.
- (8) For the purposes of sub-paragraph (6)(b)(i) a penalty becomes final when the time allowed for any appeal or further appeal relating to it expires or, if later, any appeal or final appeal relating to it is determined.
- (9) It is immaterial for the purposes of condition B that-
  - (a) any offence of which Q was convicted, or
  - (b) any penalty for which Q was found to be liable,

relates also to other tax evasion or non-compliance by Q.

(10) In this Schedule “other tax evasion or non-compliance by Q” means conduct by Q that-

- (a) constitutes an offence of cheating the public revenue or an offence of fraudulent evasion of tax, or
- (b) makes Q liable to a penalty under any provision of the Taxes Acts,

but does not constitute offshore tax evasion or non-compliance.

(11) Nothing in condition B affects the law of evidence as to the relevance if any of a conviction, assessment of a penalty or contract mentioned in sub-paragraph (6) for the purpose of proving that condition A is met in relation to P.

(12) In this Schedule “conduct” includes a failure to act.

## **1.6 “Involving offshore activity” and related expressions**

Para 2 sch 20 FA 2016 provides:

(1) This paragraph has effect for the purposes of this Schedule.

(2) Conduct involves offshore activity if it involves-

- (a) an offshore matter,
- (b) an offshore transfer, or
- (c) a relevant offshore asset move.

(3) Conduct involves an offshore matter if it results in a potential loss of revenue that is charged on or by reference to-

- (a) income arising from a source in a territory outside the United Kingdom,
- (b) assets situated or held in a territory outside the United Kingdom,
- (c) activities carried on wholly or mainly in a territory outside the United Kingdom, or
- (d) anything having effect as if it were income, assets or activities of the kind described above.

(4) Where the tax at stake is inheritance tax, assets are treated for the purposes of sub-paragraph (3) as situated or held in a territory outside the United Kingdom if they are so held or situated immediately after the transfer of value by reason of which inheritance tax becomes chargeable.

(5) Conduct involves an offshore transfer if-

- (a) it does not involve an offshore matter,
- (b) it is deliberate (whether or not concealed) and results in a potential loss of revenue,

- (c) the condition set out in paragraph 4AA of Schedule 24 to FA 2007 is satisfied.
- (6) Conduct involves a relevant offshore asset move if at a time when Q is the beneficial owner of an asset (“the qualifying time”)-
  - (a) the asset ceases to be situated or held in a specified territory and becomes situated or held in a non-specified territory,
  - (b) the person who holds the asset ceases to be resident in a specified territory and becomes resident in a non-specified territory, or
  - (c) there is a change in the arrangements for the ownership of the asset,and Q remains the beneficial owner of the asset, or any part of it, immediately after the qualifying time.
- (7) Paragraphs 4(2) to (4) of Schedule 21 to FA 2015 apply for the purposes of sub-paragraph (6) above as they apply for purposes of paragraph 4 of that Schedule.
- (8) In sub-paragraph (6) above, “specified territory” has the same meaning as in paragraph 4(5) of Schedule 21 to FA 2015.

## **1.7 Amount of penalty**

Para 3 sch 20 FA 2016 provides:

- (1) The penalty payable under paragraph 1 is (except in a case mentioned in sub-paragraph (2)) the higher of-
  - (a) 100% of the potential lost revenue, or
  - (b) £3,000.
- (2) In a case where P has enabled Q to engage in conduct which makes Q liable to a penalty under paragraph 1 of Schedule 21 to FA 2015, the penalty payable under paragraph 1 is the higher of-
  - (a) 50% of the potential lost revenue in respect of the original tax non-compliance, and
  - (b) £3,000.
- (3) In sub-paragraph (2)(a) “the original tax non-compliance” means the conduct that incurred the original penalty and “the potential lost revenue” (in respect of that non-compliance) is-
  - (a) the potential lost revenue under Schedule 24 to FA 2007,
  - (b) the potential lost revenue under Schedule 41 to FA 2008, or
  - (c) the liability to tax which would have been shown on the return (within the meaning of Schedule 55 to FA 2009),according to whether the original penalty was incurred under paragraph 1 of Schedule 24, paragraph 1 of Schedule 41 or paragraph 6 of

Schedule 55.

## **1.8 PLR: enabling Q to commit offence**

Para 4 sch 20 FA 2016 provides:

(1) The potential lost revenue in a case where P is liable to a penalty under paragraph 1 for enabling Q to commit a relevant offence is the same amount as the potential lost revenue applicable for the purposes of the corresponding relevant civil penalty (determined in accordance with the relevant sub-paragraph of paragraph 5).

(2) Where Q's offending conduct is-

- (a) an offence of cheating the public revenue involving offshore activity, or
- (b) an offence under section 106A of TMA 1970 involving offshore activity,

the corresponding relevant civil penalty is the penalty which Q is liable for as a result of that offending conduct.

(3) Where Q's offending conduct is an offence under section 106B, 106C or 106D of TMA 1970, the corresponding relevant civil penalty is-

- (a) for an offence under section 106B of TMA 1970, a penalty under paragraph 1 of Schedule 41 to FA 2008,
- (b) for an offence under section 106C of TMA 1970, a penalty under paragraph 6 of Schedule 55 to FA 2009, and
- (c) for an offence under section 106D of TMA 1970, a penalty under paragraph 1 of Schedule 24 to FA 2007.

(4) In determining any amount of potential lost revenue for the purposes of this paragraph, the fact Q has been prosecuted for the offending conduct is to be disregarded.

## **1.9 PLR: enabling Q to engage in conduct incurring relevant civil penalty**

Para 5 sch 20 FA 2016 provides:

(1) The potential lost revenue in a case where P is liable to a penalty under paragraph 1 for enabling Q to engage in conduct that makes Q liable (if the applicable conditions are met) to a relevant civil penalty is to be determined as follows.

(2) In the case of a penalty under paragraph 1 of Schedule 24 to FA 2007 involving an offshore matter or an offshore transfer, the potential lost revenue is the amount that under that Schedule is the potential lost revenue in respect of Q's conduct.

(3) In the case of a penalty under paragraph 1 of Schedule 41 to FA 2008 in relation to a failure to comply with section 7(1) of TMA 1970 involving offshore activity, the potential lost revenue is the amount that under that Schedule is the potential lost revenue in respect of Q's conduct.

(4) In the case of a penalty under paragraph 6 of Schedule 55 to FA 2009 involving offshore activity, the potential lost revenue is the liability to tax which would have been shown in the return in question (within the meaning of that Schedule).

### **1.10 PLR attributable to offshore & onshore tax evasion/non-compliance**

Para 6 sch 20 FA 2016 provides:

(1) This paragraph applies where any amount of potential lost revenue in a case falling within paragraph 4 or 5 is attributable not only to Q's offshore tax evasion or non-compliance but also to any other tax evasion or non-compliance by Q.

(2) In that case the potential lost revenue in respect of Q's offshore tax evasion or non-compliance is to be taken for the purposes of assessing the penalty to which P is liable as being or (as the case may be) including such share as is just and reasonable of the amount mentioned in sub-paragraph (1).

### **1.11 Reduction of penalty for disclosure etc by P**

Para 7 sch 20 FA 2016 provides:

(1) If P (who would otherwise be liable to a penalty under paragraph 1)-

(a) makes a disclosure to HMRC of-

(i) a matter relating to an inaccuracy in a document, a supply of false information or a failure to disclose an under-assessment,

(ii) P's enabling of actions by Q that constituted (or might constitute) a relevant offence or that made (or might make) Q liable to a relevant penalty, or

(iii) any other matter HMRC regard as assisting them in relation to the assessment of P's liability to a penalty under paragraph 1, or

(b) assists HMRC in any investigation leading to Q being charged with a relevant offence or found liable to a relevant penalty, HMRC must reduce the penalty to one that reflects the quality of the disclosure or assistance.

- (2) But the penalty may not be reduced-
- (a) in the case of unprompted disclosure or assistance, below whichever is the higher of-
    - (i) 10% of the potential lost revenue, or
    - (ii) £1,000, or
  - (b) in the case of prompted disclosure or assistance, below whichever is the higher of-
    - (i) 30% of the potential lost revenue, or
    - (ii) £3,000.

Para 8 2 sch 20 FA 2016 provides:

- (1) This paragraph applies for the purposes of paragraph 7.
- (2) P discloses a matter by-
  - (a) telling HMRC about it,
  - (b) giving HMRC reasonable help in relation to the matter (for example by quantifying an inaccuracy in a document, an inaccuracy attributable to the supply of false information or withholding of information or an under-assessment), and
  - (c) allowing HMRC access to records for any reasonable purpose connected with resolving the matter (for example for the purpose of ensuring that an inaccuracy in a document, an inaccuracy attributable to the supply of false information or withholding of information or an under-assessment is fully corrected).
- (3) P assists HMRC in relation to an investigation leading to Q being charged with a relevant offence or found liable to a relevant penalty by-
  - (a) assisting or encouraging Q to disclose all relevant facts to HMRC,
  - (b) allowing HMRC access to records, or
  - (c) any other conduct which HMRC considers assisted them in investigating or assessing Q's liability to such a penalty.
- (4) Disclosure or assistance by P-
  - (a) is “unprompted” if made at a time when P has no reason to believe that HMRC have discovered or are about to discover Q's offshore tax evasion or non-compliance (including any inaccuracy in a document, supply of false information or withholding of information, or under-assessment), and
  - (b) otherwise is “prompted”.
- (5) In relation to disclosure or assistance, “quality” includes timing, nature and extent.

## **1.12 Special circumstances**

Para 9 sch 20 FA 2016 provides:

- (1) If they think it right because of special circumstances, HMRC may reduce a penalty under paragraph 1.
- (2) In sub-paragraph 1 “special circumstances” does not include-
  - (a) ability to pay, or
  - (b) the fact that a potential loss of revenue from one taxpayer is balanced by a potential overpayment by another.
- (3) In sub-paragraph (1) the reference to reducing a penalty includes a reference to-
  - (a) staying a penalty, or
  - (b) agreeing a compromise in relation to proceedings for a penalty.

## **1.13 Procedure for assessing penalty, etc**

Para 10 sch 20 FA 2016 provides:

- (1) Where a person is found liable for a penalty under paragraph 1 HMRC must-
  - (a) assess the penalty,
  - (b) notify the person, and
  - (c) state in the notice the period in respect of which the penalty is assessed.
- (2) A penalty must be paid before the end of the period of 30 days beginning with the day on which notification of the penalty is issued.
- (3) An assessment of a penalty-
  - (a) is to be treated for procedural purposes in the same way as an assessment to tax (except in respect of a matter expressly provided for by this Schedule), and
  - (b) may be enforced as if it were an assessment to tax.
- (4) A supplementary assessment may be made in respect of a penalty if an earlier assessment operated by reference to an underestimate of the liability to tax that would have been shown in a return.
- (5) Sub-paragraph (6) applies if-
  - (a) an assessment in respect of a penalty is based on a liability to tax that would have been shown on a return, and
  - (b) that liability is found by HMRC to have been excessive.
- (6) HMRC may amend the assessment so that it is based upon the correct amount.
- (7) But an amendment under sub-paragraph (6)-

- (a) does not affect when the penalty must be paid, and
- (b) may be made after the last day on which the assessment in question could have been made under paragraph 11.

## **1.14 Time limits**

Para 11sch 20 FA 2016 provides:

An assessment of a person as liable to a penalty under paragraph 1 may not take place more than 2 years after the fulfilment of the conditions mentioned in paragraph 1(1) (in relation to that person) first came to the attention of an officer of Revenue and Customs.

## **1.15 Appeals**

Para 12 sch 20 FA 2016 provides:

A person may appeal against-

- (a) a decision of HMRC that a penalty under paragraph 1 is payable by that person, or
- (b) a decision of HMRC as to the amount of a penalty under paragraph 1 payable by the person.

Para 13 sch 20 FA 2016 provides:

(1) An appeal under paragraph 12 is to be treated in the same way as an appeal against an assessment to the tax at stake (including by the application of any provision about bringing the appeal by notice to HMRC, about HMRC review of the decision or about determination of the appeal by the First-tier Tribunal or Upper Tribunal).

(2) Sub-paragraph (1) does not apply-

- (a) so as to require the person bringing the appeal to pay a penalty before an appeal against the assessment of the penalty is determined,
- (b) in respect of any other matter expressly provided for by this Schedule.

Para 14 sch 20 FA 2016 provides:

(1) On an appeal under paragraph 12(a) that is notified to the tribunal, the tribunal may affirm or cancel HMRC's decision.

(2) On an appeal under paragraph 12(b) that is notified to the tribunal, the tribunal may-

- (a) affirm HMRC's decision, or

- (b) substitute for that decision another decision that HMRC had power to make.
- (3) If the tribunal substitutes its own decision for HMRC's, the tribunal may rely on paragraph 7 or 9 (or both)-
  - (a) to the same extent as HMRC (which may mean applying the same percentage reduction as HMRC to a different starting point),
  - (b) to a different extent, but only if the tribunal thinks that HMRC's decision in respect of the application of that paragraph was flawed.
- (4) In sub-paragraph (3)(b) “flawed” means flawed when considered in the light of the principles applicable in proceedings for judicial review.
- (5) In this paragraph “tribunal” means the First-tier Tribunal or Upper Tribunal (as appropriate by virtue of paragraph 13(1)).

### **1.16 Double jeopardy**

Para 15 sch 20 FA 2016 provides:

- A person is not liable to a penalty under paragraph 1 in respect of conduct for which the person-
- (a) has been convicted of an offence, or
  - (b) has been assessed to a penalty under any provision other than paragraph 1.

### **1.17 Application of provisions of TMA 1970**

Para 16 sch 20 FA 2016 provides:

- Subject to the provisions of this Part of this Schedule, the following provisions of TMA 1970 apply for the purposes of this Part of this Schedule as they apply for the purposes of the Taxes Acts-
- (a) section 108 (responsibility of company officers),
  - (b) section 114 (want of form), and
  - (c) section 115 (delivery and service of documents).

### **1.18 Interpretation of Part 1**

Para 17 sch 20 FA 2016 provides:

- (1) This paragraph applies for the purposes of this Schedule.
- (2) References to an assessment to tax, in relation to inheritance tax, are to a determination.

## 1.19 Naming and shaming

Para 22 sch 20 FA 2016 provides:

- (1) The Commissioners for Her Majesty's Revenue and Customs (“the Commissioners”) may publish information about a person if-
  - (a) in consequence of an investigation the person has been found to have incurred one or more penalties under paragraph 1 (and has been assessed or is the subject of a contract settlement), and
  - (b) the potential lost revenue in relation to the penalty (or the aggregate of the potential lost revenue in relation to each of the penalties) exceeds £25,000.
- (2) The Commissioners may also publish information about a person if the person has been found to have incurred 5 or more penalties under paragraph 1 in any 5 year period.
- (3) The information that may be published is-
  - (a) the person's name (including any trading name, previous name or pseudonym),
  - (b) the person's address (or registered office),
  - (c) the nature of any business carried on by the person,
  - (d) the amount of the penalty or penalties in question,
  - (e) the periods or times to which the actions giving rise to the penalty or penalties relate,
  - (f) any other information that the Commissioners consider it appropriate to publish in order to make clear the person's identity.
- (4) The information may be published in any manner that the Commissioners consider appropriate.
- (5) Before publishing any information the Commissioners must-
  - (a) inform the person that they are considering doing so, and
  - (b) afford the person the opportunity to make representations about whether it should be published.
- (6) No information may be published before the day on which the penalty becomes final or, where more than one penalty is involved, the latest day on which any of the penalties becomes final.
- (7) No information may be published for the first time after the end of the period of one year beginning with that day.
- (8) No information may be published if the amount of the penalty-
  - (a) is reduced under paragraph 7 to-
    - (i) 10% of the potential lost revenue (in a case of unprompted disclosure or assistance), or

- (ii) 30% of potential lost revenue (in a case of prompted disclosure or assistance),
  - (b) would have been reduced to 10% or 30% of potential lost revenue but for the imposition of the minimum penalty,
  - (c) is reduced under paragraph 9 to nil or stayed.
- (9) For the purposes of this paragraph a penalty becomes final-
- (a) if it has been assessed, when the time for any appeal or further appeal relating to it expires or, if later, any appeal or final appeal relating to it is finally determined, and
  - (b) if a contract settlement has been made, at the time when the contract is made.
- (10) In this paragraph “contract settlement”, in relation to a penalty, means a contract between the Commissioners and the person under which the Commissioners undertake not to assess the penalty or (if it has been assessed) not to take proceedings to recover it.

## CGT LINKED TRANSACTIONS

.1

*Cross references*

### 1.1 Introduction

Section 19(1) TCGA provides:

For the purposes of this Act, in any case where—

- (a) [i] by way of 2 or more material transactions which are linked (a series of linked transactions),
  - [ii] one person disposes of assets
    - [A] to another person with whom he is connected or
    - [B] to 2 or more other persons with each of whom he is connected, and
- (b) the original market value of the assets disposed of by any of the transactions in the series, as determined under section 20, is less than the appropriate portion of the aggregate market value of the assets disposed of by all the transactions in the series, as so determined,

Assuming conditions (a) and (b) are met, we move on to the rule:

then, subject to subsection (2) below, the disposal effected by any linked transaction in the series in respect of which the condition in paragraph (b) above is fulfilled shall be deemed to be for a consideration equal to the appropriate portion referred to in that paragraph.

#### 1.1.1 *Inter-spouse transfer*

Section 19(2) TCGA provides:

Where the disposal effected by a material transaction is one to which section 58 applies, nothing in subsection (1) above shall affect the amount which, for the purposes of this Act, is the consideration for that disposal.

The CGT spouse exemption has priority over the linked transactions rule.

### 1.1.2 *Material transaction*

Section 19(3) TCGA provides:

Subject to subsection (5) below, any reference in this section to a material transaction is a reference to a transaction by way of gift or otherwise;

All transactions are material.

### 1.1.3 *Linked transaction*

Section 19 TCGA provides:

(3) ... for the purposes of this section, 2 or more material transactions are linked if they occur within the period of 6 years ending on the date of the last of them.

### 1.1.4 *Recomputation*

Section 19 TCGA provides:

(4) This section shall apply or, as the case may be, shall again apply—  
(a) when a second material transaction causes a series of linked transactions to come into being; and  
(b) whenever, on the occurrence of a further material transaction, an existing series is extended by the inclusion of that transaction (whether or not an earlier transaction ceases to form part of the series);  
and all such assessments and adjustments of assessments shall be made as may be necessary to give effect to this section on each such occasion.

### 1.1.5 *Inter group transactions*

Section 19 TCGA provides:

(5) Where a member of a group of companies disposes of an asset to another member of the group in circumstances such that, by virtue of section 171, both companies are treated, so far as relates to corporation tax on chargeable gains, as if the consideration for the disposal were of such an amount as would secure that neither a gain nor a loss would accrue, the transaction by which that disposal is effected is not a material transaction; and a disposal in these circumstances is in this section referred to as an “inter-group transfer”.

(6) In any case where—

(a) a company (“company A”) disposes of an asset by way of a material transaction, and

(b) company A acquired the asset after 19th March 1985 by way of an inter-group transfer, and

(c) the disposal by company A is to a person who is connected with another company (“company B”) which at some time after 19th March 1985 disposed of the asset by way of an inter-group transfer, and

(d) either the disposal by way of inter-group transfer which is referred to in paragraph (c) above was the occasion of the acquisition referred to in paragraph (b) above or, between that disposal and that acquisition, there has been no disposal of the asset which was not an inter-group transfer,

then, for the purpose of determining whether subsection (1) above applies in relation to a series of linked transactions, the disposal by company A shall be treated as having been made by company B; but any increase in the consideration for that disposal resulting from the application of subsection (1) above shall have effect with respect to company A.

## 1.2 Original/aggregate MV

Section 20 TCGA provides:

(1) This section has effect for determining the original market value of assets and the aggregate market value of assets as mentioned in subsection (1)(b) of section 19.

(2) Expressions used in this section have the same meaning as in that

section.

### 1.2.1 *Original MV*

Section 20(3) TCGA provides:

Where there is a series of linked transactions, the original market value of the assets disposed of by each transaction in the series shall be determined as follows—

(a) if at the time in question the transaction is the most recent in the series, the original market value of the assets disposed of by that transaction is the market value which, apart from section 19, would be deemed to be the consideration for that transaction for the purposes of this Act; and

(b) in the case of any other transaction in the series, the original market value of the assets disposed of by that transaction is the value which, prior to the occurrence of the most recent transaction in the series, was or would have been deemed for the purposes of this Act to be the consideration for the transaction concerned (whether by virtue of the previous operation of section 19, or by virtue of any other provision of this Act).

### 1.2.2 *Aggregate MV*

Section 20(4) TCGA provides:

Subject to subsections (6) to (9) below, in relation to any transaction in a series of linked transactions—

(a) any reference in this section or section 19 to the aggregate market value of the assets disposed of by all the transactions in the series is a reference to what would have been the market value of all those assets for the purposes of this Act if, considering all the assets together, they had been disposed of by one disposal occurring at the time of the transaction concerned;

### 1.2.3 *Appropriate proportion*

Section 20 TCGA provides:

(4) Subject to subsections (6) to (9) below, in relation to any transaction in a series of linked transactions...

(b) any reference in section 19 to the appropriate portion of the aggregate market value of the assets disposed of by all the transactions in the series is a reference to that portion of the market value determined in accordance with paragraph (a) above which it is reasonable to apportion to those of the assets which were actually disposed of by the transaction concerned.

#### 1.2.4 *Misc*

Section 20 TCGA provides:

(5) The reference in subsection (4)(a) above to considering all the assets together includes a reference not only to considering them as a group or holding or collection of assets retaining their separate identities but also (if it gives a higher market value) to considering them as brought together, physically or in law, so as to constitute either a single asset or a number of assets which are distinct from those which were comprised in each of the transactions concerned.

(6) If any of the assets disposed of by all the transactions in a series of linked transactions were acquired after the time of the first of those transactions, then, in the application of subsections (4) and (5) above in relation to each of the transactions in the series—

(a) no account shall be taken of any assets which were acquired after the time of that transaction unless they were acquired by way of an inter-group transfer; and

(b) subject to subsection (7) below, the number of assets of which account is to be taken shall be limited to the maximum number which were held by the person making the disposal at any time in the period beginning immediately before the first of the transactions in the series and ending immediately before the last.

(7) If, before the first of the transactions referred to in paragraph (b) of subsection (6) above, the person concerned (being a company) disposed of any assets by way of an inter-group transfer, the maximum number of assets referred to in that paragraph shall be determined as if the intergroup transfer had occurred after that first transaction.

#### 1.2.5 *Share matching rules*

Section 20 TCGA provides:

(8) In the application of subsection (6) above in a case where the assets disposed of are securities, the assets disposed of by any of the transactions in a series of linked transactions shall be identified with assets acquired on an earlier date rather than with assets acquired on a later date.

(9) In subsection (8) above “securities” includes any assets which are of a nature to be dealt in without identifying the particular assets disposed of or acquired.

## CHAPTER XXX

# FISCAL TRANSPARENCY IN USA

49.11

*Cross references*

### 49.1 US rule for income received by entities

The law is in 26 CFR, ie Title 26, Code of Federal Regulations, headed Internal Revenue.<sup>1</sup>

26 CFR 1.894-1 provides:

**(1) In general.**

[a] The tax imposed by sections 871(a), 881(a), 1443, 1461, and 4948(a) on an item of income received by an entity, wherever organized, that is fiscally transparent under the laws of the United States and/or any other jurisdiction with respect to an item of income shall be eligible for reduction under the terms of an income tax treaty to which the United States is a party only if the item of income is derived by a resident of the applicable treaty jurisdiction.

[b] [i] For this purpose, an item of income may be derived by either the entity receiving the item of income or by the interest holders in the entity or, in certain circumstances, both.

The next two sentences are best read side by side:

---

<sup>1</sup> <https://www.ecfr.gov>

An item of income paid to an entity shall be considered to be derived by the entity only

if the entity is not fiscally transparent under the laws of the entity's jurisdiction, as defined in paragraph (d)(3)(ii) of this section, with respect to the item of income.

An item of income paid to an entity shall be considered to be derived by the interest holder in the entity only

if the interest holder is not fiscally transparent in its jurisdiction with respect to the item of income and

if the entity is considered to be fiscally transparent under the laws of the interest holder's jurisdiction with respect to the item of income, as defined in paragraph (d)(3)(iii) of this section.

The last sentence of 26 CFR 1.894-1 provides:

Notwithstanding the preceding two sentences, an item of income paid directly to a type of entity specifically identified in a treaty as a resident of a treaty jurisdiction shall be treated as derived by a resident of that treaty jurisdiction.

This applies to tax exempt pension schemes, employee benefit trusts, charities and governmental entities.<sup>2</sup>

## 49.2 Domestic reverse hybrid entity

26 CFR § 1.894-1

**(i) In general.** An income tax treaty may not apply to reduce the amount of federal income tax on U.S. source payments received by a domestic reverse hybrid entity.

Further, notwithstanding paragraph (d)(1) of this section, the foreign interest holders of a domestic reverse hybrid entity are not entitled to the benefits of a reduction of U.S. income tax under an income tax

---

<sup>2</sup> See 7.26 (Tax exempt organisations).

treaty on items of income received from U.S. sources by such entity.

#### 49.2.1 “Domestic reverse hybrid entity”

26 CFR § 1.894-1

A domestic reverse hybrid entity is a domestic entity that is treated as  
[a] not fiscally transparent for U.S. tax purposes and  
[b] as fiscally transparent under the laws of the interest holder's  
jurisdiction,  
with respect to the item of income received by the domestic entity.

#### 49.2.2 Payment from domestic reverse hybrid entity to interest holder

26 CFR § 1.894-1

##### **(A) General rule.**

[1] Except as otherwise provided in paragraph (d)(2)(ii)(B) of this section, an item of income paid by a domestic reverse hybrid entity to an interest holder in such entity

[a] shall have the character of such item of income under U.S. law and

[b] shall be considered to be derived by the interest holder, provided the interest holder is not fiscally transparent in its jurisdiction, as defined in paragraph (d)(3)(iii) of this section, with respect to the item of income.

[2] In determining whether the interest holder is fiscally transparent with respect to the item of income under this paragraph (d)(2)(ii)(A), the determination under paragraph (d)(3)(ii) of this section shall be made based on the treatment that would have resulted had the item of income been paid by an entity that is not fiscally transparent under the laws of the interest holder's jurisdiction with respect to any item of income.

#### 49.3 Payment to related foreign interest holder: deemed distribution

*omit???*

26 CFR § 1.894-1

**(1) General rule.**

If -

- (i) [A] A domestic entity makes a payment to a related domestic reverse hybrid entity that is treated as a dividend under either the laws of the United States or the laws of the jurisdiction of a related foreign interest holder in the domestic reverse hybrid entity, and
- [B] under the laws of the jurisdiction of the related foreign interest holder in the domestic reverse hybrid entity, the related foreign interest holder is treated as deriving its proportionate share of the payment under the principles of paragraph (d)(1) of this section; and
- (ii) The domestic reverse hybrid entity
- [A] makes a payment of a type that is deductible for U.S. tax purposes to the related foreign interest holder or to a person, wherever organized, the income and losses of which are available, under the laws of the jurisdiction of the related foreign interest holder, to offset the income and losses of the related foreign interest holder, [B] and for which a reduction in U.S. withholding tax would be allowed under an applicable income tax treaty; then
- (iii) To the extent the amount of the payment described in paragraph (d)(2)(ii)(B)(1)(ii) of this section does not exceed the sum of the portion of the payment described in paragraph (d)(2)(ii)(B)(1)(i) of this section treated as derived by the related foreign interest holder and the portion of any other prior payments described in paragraph (d)(2)(ii)(B)(1)(i) of this section treated as derived by the related foreign interest holder,
- [A] the amount of the payment described in (d)(2)(ii)(B)(1)(ii) of this section will be treated for all purposes of the Internal Revenue Code and any applicable income tax treaty as a distribution within the meaning of section 301(a) of the Internal Revenue Code, and
- [B] the tax to be withheld from the payment described in paragraph (d)(2)(ii)(B)(1)(ii) of this section (assuming the payment is a dividend under section 301(c)(1) of the Internal Revenue Code) shall be determined based on the appropriate rate of withholding that would be applicable to dividends paid from the domestic reverse hybrid entity to the related foreign interest holder in accordance with the principles of paragraph (d)(2)(ii)(A) of this section.

**(2) Determining amount to be recharacterized under paragraph (d)(2)(ii)(B)(1)(iii).** For purposes of determining the amount to be recharacterized under paragraph (d)(2)(ii)(B)(1)(iii) of this section, the portion of the payment described in paragraph (d)(2)(ii)(B)(1)(i) of this section treated as derived by the related foreign interest holder shall be increased by the portion of the payment derived by any other person described in paragraph (d)(2)(ii)(B)(1)(ii), and shall be reduced by the amount of any prior section 301(c) distributions made by the domestic reverse hybrid entity to the related foreign interest holder or any other person described in paragraph (d)(2)(ii)(B)(1)(ii) and by the amount of any payments from the domestic reverse hybrid entity previously recharacterized under paragraph (d)(2)(ii)(B)(1)(iii) of this section.

**(3) Tiered entities.** The principles of this paragraph (d)(2)(ii)(B) also shall apply to payments referred to in this paragraph (d)(2)(ii)(B) made among related entities when there is more than one domestic reverse hybrid entity or other fiscally transparent entity involved.

#### 49.3.1 “Related”

**(4) Definition of related.** For purposes of this section, a person shall be treated as related to a domestic reverse hybrid entity if it is related by reason of the ownership requirements of section 267(b) or 707(b)(1), except that the language “at least 80 percent” applies instead of “more than 50 percent,” where applicable. For purposes of determining whether a person is related by reason of the ownership requirements of section 267(b) or 707(b)(1), the constructive ownership rules of section 318 shall apply, and the attribution rules of section 267(c) also shall apply to the extent they attribute ownership to persons to whom section 318 does not attribute ownership.

**(C) Payments to persons not described in paragraph (d)(2)(ii)(B)(1)(ii) - (1) Related persons.** The Commissioner may treat a payment by a domestic reverse hybrid entity to a related person (who is neither the related foreign interest holder nor otherwise described in paragraph (d)(2)(ii)(B)(1)(ii) of this section), in whole or in part, as being made to a related foreign interest holder for purposes of applying paragraph

(d)(2)(ii)(B) of this section, if -

(i) The payment to the related person is of a type that is deductible by the domestic reverse hybrid entity; and

(ii) The payment is made in connection with one or more transactions the effect of which is to avoid the application of paragraph (d)(2)(ii)(B) of this section.

**(2) Unrelated persons.** The Commissioner may treat a payment by a domestic reverse hybrid entity to an unrelated person, in whole or in part, as being made to a related foreign interest holder for purposes of applying paragraph (d)(2)(ii)(B) of this section, if -

(i) The payment to the unrelated person is of a type that is deductible by the domestic reverse hybrid entity;

(ii) The unrelated person (or other person (whether related or not) which receives a payment in a series of transactions that includes a transaction involving such unrelated person) makes a payment to the related foreign interest holder (or other person described in paragraph (d)(2)(ii)(B)(1)(ii));

(iii) The foregoing payments are made in connection with a series of transactions which constitute a financing arrangement, as defined in § 1.881-3(a)(2)(i); and

(iv) The transactions have the effect of avoiding the application of paragraph (d)(2)(ii)(B) of this section.

#### 49.4 Statutory examples

(iii) Examples. The rules of this paragraph (d)(2) are illustrated by the following examples:

Example 1. Dividend paid by unrelated entity to domestic reverse hybrid entity.

(i) Facts. Entity A is a domestic reverse hybrid entity, as defined in

paragraph (d)(2)(i) of this section, with respect to the U.S. source dividends it receives from B, a domestic corporation to which A is not related within the meaning of paragraph (d)(2)(ii)(B)(4) of this section. A's 85-percent shareholder, FC, is a corporation organized under the laws of Country X, which has an income tax treaty in effect with the United States. A's remaining 15-percent shareholder is an unrelated domestic corporation. Under Country X law, FC is not fiscally transparent with respect to the dividend, as defined in paragraph (d)(3)(ii) of this section. In year 1, A receives \$100 of dividend income from B. Under Country X law, FC is treated as deriving \$85 of the \$100 dividend payment received by A. The applicable rate of tax on dividends under the U.S.-Country X income tax treaty is 5 percent with respect to a 10-percent or more corporate shareholder.

(ii) Analysis. Under paragraph (d)(2)(i) of this section, the U.S.-Country X income tax treaty does not apply to the dividend income received by A because the payment is made by B, a domestic corporation, to A, another domestic corporation. A remains fully taxable under the U.S. tax laws as a domestic corporation with regard to that item of income. Further, pursuant to paragraph (d)(2)(i) of this section, notwithstanding the fact that A is treated as fiscally transparent with respect to the dividend income under the laws of Country X, FC may not claim a reduced rate of taxation on its share of the U.S. source dividend income received by A.

Example 2. Interest paid by domestic reverse hybrid entity to related foreign interest holder where dividend is paid by unrelated entity.

(i) Facts. The facts are the same as in Example 1. Both the United States and Country X characterize the payment by B in year 1 as a dividend. In addition, in year 2, A makes a payment of \$25 to FC that is characterized under the Internal Revenue Code as interest on a loan from FC to A. Under the U.S.-Country X income tax treaty, the rate of tax on interest is zero. Under Country X laws, had the interest been paid by an entity that is not fiscally transparent under Country X's laws with respect to any item of income, FC would not be fiscally transparent as defined in paragraph (d)(2)(ii) of this section with respect to the interest.

(ii) Analysis. The analysis is the same as in Example 1 with respect to the \$100 payment from B to A. With respect to the \$25 payment from A to FC, paragraph (d)(2)(ii)(B) of this section will not apply because, although

FC is a related foreign interest holder in A, A is not related to B, the payor of the dividend income it received. Under paragraph (d)(2)(ii)(A) of this section, the \$25 of interest paid by A to FC in year 2 is characterized under U.S. law as interest. Accordingly, in year 2, A is entitled to an interest deduction with respect to the \$25 interest payment from A to FC, and FC is entitled to the reduced rate of withholding applicable to interest under the U.S.-Country X income tax treaty, assuming all other requirements for claiming treaty benefits are met.

Example 3. Interest paid by domestic reverse hybrid entity to related foreign interest holder where dividend is paid by a related entity.

(i) Facts. The facts are the same as in Example 2, except the \$100 dividend income received by A in year 1 is from A's wholly-owned subsidiary, S.

(ii) Analysis. The analysis is the same as in Example 1 with respect to the \$100 dividend payment from S to A. However, the \$25 interest payment in year 2 by A to FC will be treated as a dividend for all purposes of the Internal Revenue Code and the U.S.-Country X income tax treaty because \$25 does not exceed FC's share of the \$100 dividend payment made by S to A (\$85). Since FC is not fiscally transparent with respect to the payment as determined under paragraph (d)(2)(ii)(A) of this section, FC is entitled to the reduced rate applicable to dividends under the U.S.-Country X income tax treaty with respect to the \$25 payment. Because the \$25 payment in year 2 is recharacterized as a dividend for all purposes of the Internal Revenue Code and the U.S.-Country X income tax treaty, A is not entitled to an interest deduction with respect to that payment and FC is not entitled to claim the reduced rate of withholding applicable to interest.

Example 4. Definition of related foreign interest holder.

(i) Facts. The facts are the same as in Example 3, except that A has two 50-percent shareholders, FC1 and FC2. In year 2, A makes an interest payment of \$25 to both FC1 and FC2. FC1 is a corporation organized under the laws of Country X, which has an income tax treaty in effect with the United States. FC2 is a corporation organized under the laws of Country Y, which also has an income tax treaty in effect with the United States. FP owns 100-percent of both FC1 and FC2, and is organized under the laws of Country X. Under Country X law, FC1 is not fiscally

transparent with respect to the dividend, as defined in paragraph (d)(3)(ii) of this section. Under Country X law, FC1 is treated as deriving \$50 of the \$100 dividend payment received by A because A is fiscally transparent under the laws of Country X, as determined under paragraph (d)(3)(iii) of this section. The applicable rate of tax on dividends under the U.S.-Country X income tax treaty is 5-percent with respect to a 10-percent or more corporate shareholder. Under Country Y law, FC2 is not treated as deriving any of the \$100 dividend payment received by A because, under the laws of Country Y, A is not a fiscally transparent entity.

(ii) Analysis. The analysis is the same as in Example 1 with respect to the \$100 dividend payment from S to A. With respect to the \$25 payment in year 2 by A to FC1, the payment will be treated as a dividend for all purposes of the Internal Revenue Code and the U.S.-Country X income tax treaty because FC1 is a related foreign interest holder as determined under paragraph (d)(2)(ii)(B)(4) of this section, and because \$25 does not exceed FC1's share of the dividend payment made by S to A (\$50). FC1 is a related foreign interest holder because FC1 is treated as owning the stock of A owned by FC2 under section 267(b)(3). Since FC1 is not fiscally transparent with respect to the payment as determined under paragraph (d)(2)(ii)(A) of this section, FC1 is entitled to the 5-percent reduced rate applicable to dividends under the U.S.-Country X income tax treaty with respect to the \$25 payment. Because the \$25 payment in year 2 is recharacterized as a dividend for all purposes of the Internal Revenue Code and the U.S.-Country X income tax treaty, A is not entitled to an interest deduction with respect to that payment. Even though FC2 is also a related foreign interest holder, the \$25 interest payment by A to FC2 in year 2 is not recharacterized because A is not fiscally transparent under the laws of Country Y, and FC2 is not treated as deriving any of the \$100 dividend payment received by A. Thus, the U.S.-Country Y income tax treaty is not implicated.

Example 5. Higher treaty withholding rate on dividends.

(i) Facts. The facts are the same as in Example 3, except that under the U.S.-Country X income tax treaty, the rate of tax on interest is 10-percent and the rate of tax on dividends is 5-percent.

(ii) Analysis. The analysis is the same as in Example 1 with respect to the \$100 dividend payment from S to A. The analysis is the same as in

Example 3 with respect to the \$25 interest payment in year 2 from A to FC.

Example 6. Foreign sister corporation the income and losses of which may offset the income and losses of related foreign interest holder.

(i) Facts. The facts are the same as Example 3, except that in year 2, A makes the interest payment of \$25 to FS, a subsidiary of FC also organized in Country X. Under the laws of Country X, FS is not fiscally transparent with respect to the interest payment, and the income and losses of FS may be used to offset the income and losses of FC.

(ii) Analysis. The analysis is the same as in Example 1 with respect to the \$100 dividend payment from S to A. With respect to the \$25 interest payment from A to FS in year 2, FS is a person described in paragraph (d)(2)(ii)(B)(1)(ii) of this section because the income and losses of FS may be used under the laws of Country X to offset the income and losses of FC, the related foreign interest holder that derived its proportionate share of the payment from S to A. Therefore, paragraph (d)(2)(ii)(B) of this section applies, and the \$25 interest payment in year 2 by A to FS is treated as a dividend for all purposes of the Internal Revenue Code and the U.S.-Country X income tax treaty because the \$25 payment does not exceed FC's share of the \$100 dividend payment made by S to A (\$85). Since FS is not fiscally transparent with respect to the payment as determined under paragraph (d)(2)(ii)(A) of this section, FS is entitled to obtain the rate applicable to dividends under the U.S.-Country X income tax treaty with respect to the \$25 payment. Because the \$25 payment in year 2 is recharacterized as a dividend for all purposes of the Internal Revenue Code and the U.S.-Country X income tax treaty, A is not entitled to an interest deduction with respect to the payment and FS is not entitled to claim the reduced rate of withholding applicable to interest under the U.S.-Country X income tax treaty.

Example 7. Interest paid by domestic reverse hybrid entity to unrelated foreign bank.

(i) Facts. The facts are the same as in Example 3, except that in year 2, A makes the interest payment of \$25 to FB, a Country Y unrelated foreign bank, on a loan from FB to A.

(ii) Analysis. The analysis is the same as in Example 1 with respect to the

\$100 dividend payment from S to A. With respect to the payment from A to FB, paragraph (d)(2)(ii)(B) of this section will not apply because, although A is related to S, the payor of the dividend income it received, A is not related to FB under paragraph (d)(2)(ii)(B)(4) of this section. Under paragraph (d)(2)(ii)(A) of this section, the \$25 interest payment made from A to FB in year 2 is characterized as interest under the Internal Revenue Code.

Example 8. Interest paid by domestic reverse hybrid to an unrelated entity pursuant to a financing arrangement.

(i) Facts. The facts are the same as in Example 7, except that in year 3, FB makes an interest payment of \$25 to FC on a deposit made by FC with FB.

(ii) Analysis. The analysis is the same as in Example 1 with respect to the \$100 dividend payment from S to A. With respect to the \$25 payment from A to FB in year 2, because the payment is made in connection with a transaction that constitutes a financing arrangement within the meaning of paragraph (d)(2)(ii)(C)(2) of this section, the payment may be treated by the Commissioner as being made directly to FC. If the Commissioner disregards FB, then the analysis is the same as in Example 3 with respect to the \$25 interest payment in year 2 from A to FC.

Example 9. Royalty paid by related entity to domestic reverse hybrid entity.

(i) Facts. The facts are the same as in Example 3, except the \$100 income received by A from S in year 1 is a royalty payment under both the laws of the United States and the laws of Country X. The royalty rate under the treaty is 10 percent and the interest rate is 0 percent.

(ii) Analysis. The analysis as to the royalty payment from S to A is the same as in Example 1 with respect to the \$100 dividend payment from S to A. With respect to the \$25 payment from A to FC, paragraph (d)(2)(ii)(B) of this section will not apply because the payment from S to A is not treated as a dividend under the Internal Revenue Code or the laws of Country X. Under paragraph (d)(2)(ii)(A) of this section, the \$25 of interest paid by A to FC in year 2 is characterized as interest under the Internal Revenue Code. Accordingly, in year 2, FC may obtain the reduced rate of withholding applicable to interest under the U.S.-Country X income tax treaty, assuming all other requirements for claiming treaty

benefits are met.

### 49.5 “Entity”

26 CFR § 1.894-1

(i) Entity. For purposes of this paragraph (d), the term entity shall mean any person that is treated by the United States or the applicable treaty jurisdiction as other than an individual. The term entity includes disregarded entities, including single member disregarded entities with individual owners.

### 49.6 Transparency: US definition

US regulation 26 CFR § 1.894-1 provides two definitions of fiscally transparent:

<b>under law of the entity jurisdiction</b>	<b>under law of interest holder jurisdiction</b>
(A) <b>General rule.</b> For purposes of this paragraph (d), an entity is fiscally transparent under the laws of the entity's jurisdiction with respect to an item of income to the extent that	(A) <b>General rule.</b> For purposes of this paragraph (d), an entity is treated as fiscally transparent under the law of an interest holder's jurisdiction with respect to an item of income to the extent that
the laws of that jurisdiction require the interest holder in the entity, wherever resident,	the laws of the interest holder's jurisdiction require the interest holder resident in that jurisdiction

<p>to separately take into account on a current basis<sup>3</sup> the interest holder's respective share of the item of income paid to the entity, whether or not distributed to the interest holder, and</p>	<p>[identical]</p>
<p>the character and source of the item in the hands of the interest holder are determined as if such item were realized directly from the source from which realized by the entity.</p>	<p>[identical]</p>

<p>However, the entity will be fiscally transparent with respect to the item of income even if the item of income is not separately taken into account by the interest holder,</p>	<p>However, an entity will be fiscally transparent with respect to the item of income even if the item of income is not separately taken into account by the interest holder,</p>
<p>provided the item of income, if separately taken into account by the interest holder, would not result in an income tax liability for that interest holder different from that which would result if the interest holder did not take the item into account separately, and</p>	<p>[identical]</p>
<p>provided the interest holder is required to take into account on a current basis the interest holder's share of all such nonseparately stated items of income paid to the entity, whether or not distributed to the interest holder.</p>	<p>[identical]</p>

3 Para B of this provision provides:

“An interest holder will be treated as taking into account that person's share of income paid to an entity on a current basis even if such amount is taken into account by the interest holder in a taxable year other than the taxable year of the entity if the difference is due solely to differing taxable years.”

	<p>An entity will not be treated as fiscally transparent with respect to an item of income under the laws of the interest holder's jurisdiction, however, if, under the laws of the interest holder's jurisdiction, the interest holder in the entity is required to include in gross income a share of all or a part of the entity's income on a current basis year under any type of anti-deferral or comparable mechanism.</p>
<p>In determining whether an entity is fiscally transparent with respect to an item of income in the entity's jurisdiction, it is irrelevant [1] that, under the laws of the entity's jurisdiction, the entity is permitted to exclude such item from gross income or [2] that the entity is required to include such item in gross income but is entitled to a deduction for distributions to its interest holders.</p>	<p>In determining whether an entity is fiscally transparent with respect to an item of income under the laws of an interest holder's jurisdiction, it is irrelevant how the entity is treated under the laws of the entity's jurisdiction.</p>

entity's jurisdiction	interest holder's jurisdiction
<p><b>(B) Special definitions.</b> For purposes of this paragraph (d)(3)(ii), an entity's jurisdiction is the jurisdiction where the entity is organized or incorporated or may otherwise be considered a resident under the laws of that jurisdiction.</p>	<p><b>(B) Special definitions.</b> For purposes of this paragraph (d)(3)(iii), an interest holder's jurisdiction is the jurisdiction where the interest holder is organized or incorporated or may otherwise be considered a resident under the laws of that jurisdiction.</p>

### 49.7 Statutory examples

Reg xxx gives 12 examples which I consider in the following order:

**Example Facts**

- 1 Partnership, not a hybrid entity
- 2 Partnership, a hybrid entity in part
- 3 Partnership a hybrid entity
- 6 As example 2, effect of CFC rules
- 4 Grantor trust, not a hybrid entity
- 5 Hybrid trust
- 7 Common Fund not treaty-resident
- 8 Common Fund treaty-resident
- 9 Investment company
- 10 Item by item determination
- 11 Charity
- 12 Pension fund

#### 49.7.1 Partnerships

The following diagram covers examples 1-3 *Ruth pl take in diagram 1*

**Example 1. Entity treated as partnership by U.S. and country of organization.**

**(i) Facts.** Entity A is a business organization formed under the laws of Country X that has an income tax treaty in effect with the United States. A is treated as a partnership for U.S. federal income tax purposes. A is also treated as a partnership under the laws of Country X, and therefore

- [A] Country X requires the interest holders in A to separately take into account on a current basis their respective shares of the items of income paid to A, whether or not distributed to the interest holders, and
- [B] the character and source of the items in the hands of the interest holders are determined as if such items were realized directly from the source from which realized by A.

A receives royalty income from U.S. sources that is not effectively connected with the conduct of a trade or business in the United States.

**(ii) Analysis.** A is fiscally transparent in its jurisdiction within the meaning of paragraph (d)(3)(ii) of this section with respect to the U.S. source royalty income in Country X and, thus, A does not derive such income for purposes of the U.S.-X income tax treaty.

That is straightforward. The partnership is not a hybrid entity.

**Example 2. Treatment of interest holders in entity treated as partnership by U.S. and country of organization.**

**(i) Facts.** The facts are the same as under Example 1. A's partners are M, a corporation organized under the laws of Country Y that has an income tax treaty in effect with the United States, and T, a corporation organized under the laws of Country Z that has an income tax treaty in effect with the United States. M and T are not fiscally transparent under the laws of their respective countries of incorporation.

Country Y

- [A] requires M to separately take into account on a current basis M's respective share of the items of income paid to A, whether or not distributed to M, and
- [B] the character and source of the items of income in M's hands are determined as if such items were realized directly from the source from which realized by A.

Country Z treats A as a corporation and does not require T to take its share of A's income into account on a current basis whether or not distributed.

**(ii) Analysis.** M is treated as deriving its share of the U.S. source royalty income for purposes of the U.S.-Y income tax treaty because A is fiscally transparent under paragraph (d)(3)(iii) with respect to that income under the laws of Country Y.

Under Country Z law, however, because T is not required to take into account its share of the U.S. source royalty income received by A on a

current basis whether or not distributed, A is not treated as fiscally transparent. Accordingly, T is not treated as deriving its share of the U.S. source royalty income for purposes of the U.S.-Z income tax treaty.

**Example 3. Dual benefits to entity and interest holder.**

(i) **Facts.** The facts are the same as under Example 2, except that A is taxable as a corporation under the laws of Country X. Article 12 of the U.S.-X income tax treaty provides for a source country reduced rate of taxation on royalties of 5%. Article 12 of the U.S.-Y income tax treaty provides that royalty income may only be taxed by the beneficial owner's country of residence.

(ii) **Analysis.** A is treated as deriving the U.S. source royalty income for purposes of the U.S.-X income tax treaty because it is not fiscally transparent with respect to the item of income within the meaning of paragraph (d)(3)(ii) of this section in Country X, its country of organization. M is also treated as deriving its share of the U.S. source royalty income for purposes of the U.S.-Y income tax treaty because A is fiscally transparent under paragraph (d)(3)(iii) of this section with respect to that income under the laws of Country Y.

T is not treated as deriving the U.S. source royalty income for purposes of the U.S.-Z income tax treaty because under Country Z law A is not fiscally transparent.

Assuming all other requirements for eligibility for treaty benefits have been satisfied, A is entitled to the 5% treaty reduced rate on royalties under the U.S.-X income tax treaty with respect to the entire royalty payment. Assuming all other requirements for treaty benefits have been satisfied, M is also entitled to a zero rate under the U.S.-Y income tax treaty with respect to its share of the royalty income.

**Example 6. Treatment of interest holders required to include passive income under anti-deferral regime.**

(i) **Facts.** The facts are the same as under Example 2. However, Country Z does require T, who is treated as owning 60-percent of the stock of A, to take into account its respective share of the royalty income of A under an anti-deferral regime applicable to certain passive income of controlled foreign corporations.

(ii) **Analysis.** T is still not eligible to claim treaty benefits with respect to

the royalty income. T is not treated as deriving the U.S. source royalty income for purposes of the U.S.-Z income tax treaty under paragraph (d)(3)(iii) of this section because T is only required to take into account its pro rata share of the U.S. source royalty income by reason of Country Z's anti-deferral regime.

## 49.7.2 Trusts

### **Example 4. Treatment of grantor trust.**

**(i) Facts.** Entity A is a trust organized under the laws of Country X, which does not have an income tax treaty in effect with the United States. M, the grantor and owner of A for U.S. income tax purposes, is a resident of Country Y, which has an income tax treaty in effect with the United States. M is also treated as the grantor and owner of the trust under the laws of Country Y. Thus, Country Y

[A] requires M to take into account all items of A's income in the taxable year, whether or not distributed to M, and

[B] determines the character of each item in M's hands as if such item was realized directly from the source from which realized by A. Country X does not treat M as the owner of A and does not require M to account for A's income on a current basis whether or not distributed to M.

A receives interest income from U.S. sources that is neither portfolio interest nor effectively connected with the conduct of a trade or business in the United States.

**(ii) Analysis.** A is not fiscally transparent under the laws of Country X within the meaning of paragraph (d)(3)(ii) of this section with respect to the U.S. source interest income, but A may not claim treaty benefits because there is no U.S.-X income tax treaty. M, however, does derive the income for purposes of the U.S.-Y income tax treaty because under the laws of Country Y, A is fiscally transparent.

### **Example 5. Treatment of complex<sup>4</sup> trust.**

**(i) Facts.** The facts are the same as in Example 4 except that M is treated as the owner of the trust only under U.S. tax law, after

---

4 “Complex trust” is a term of US tax law, approximating in UK terms to a discretionary trust

application of section 672(f), but not under the law of Country Y. Although the trust document governing A does not require that A distribute any of its income on a current basis, some distributions are made currently to M.

[A] There is no requirement under Country Y law that M take into account A's income on a current basis whether or not distributed to him in that year.

[B] Under the laws of Country Y,<sup>5</sup> with respect to current distributions, the character of the item of income in the hands of the interest holder is determined as if such item were realized directly from the source from which realized by A. Accordingly, upon a current distribution of interest income to M, the interest income retains its source as U.S. source income.

**(ii) Analysis.** M does not derive the U.S. source interest income because A is not fiscally transparent under paragraph (d)(3)(ii) of this section with respect to the U.S. source interest income under the laws of Country Y. Although the character of the interest in the hands of M is determined as if realized directly from the source from which realized by A, under the laws of Country Y, M is not required to take into account his share of A's interest income on a current basis whether or not distributed. Accordingly, neither A nor M is entitled to claim treaty benefits, since A is a resident of a non-treaty jurisdiction and M does not derive the U.S. source interest income for purposes of the U.S.-Y income tax treaty.

### 49.7.3 *Collective investment fund*

#### **Example 7. Treatment of contractual arrangements operating as collective investment vehicles.**

**(i) Facts.** A is a contractual arrangement without legal personality for all purposes under the laws of Country X providing for joint ownership of securities. Country X has an income tax treaty in effect with the United States. A is a collective investment fund which is of a type known as a Common Fund under Country X law. Because of the absence of legal personality in Country X of the arrangement, A is not liable to tax as a person at the entity level in Country X and is thus not a resident within the meaning of the Residence Article of the U.S.-X income tax treaty. A is

---

<sup>5</sup> This is not the UK law position, at least from 1973; see xxx.

treated as a partnership for U.S. income tax purposes and receives U.S. source dividend income. Under the laws of Country X, however, investors in A only take into account their respective share of A's income upon distribution from the Common Fund. Some of A's interest holders are residents of Country X and some of Country Y. Country Y has no income tax treaty in effect with the United States.

**(ii) Analysis.** A is not fiscally transparent under paragraph (d)(3)(ii) of this section with respect to the U.S. source dividend income because the interest holders in A are not required to take into account their respective shares of such income in the taxable year whether or not distributed. Because A is an arrangement without a legal personality that is not considered a person in Country X and thus not a resident of Country X under the Residence Article of the U.S.-X income tax treaty, however, A does not derive the income as a resident of Country X for purposes of the U.S.-X income tax treaty. Further, because A is not fiscally transparent under paragraph (d)(3)(iii) of this section with respect to the U.S. source dividend income, A's interest holders that are residents of Country X do not derive the income as residents of Country X for purposes of the U.S.-X income tax treaty.

**Example 8. Treatment of person specifically listed as resident in applicable treaty.**

**(i) Facts.** The facts are the same as in Example 7 except that A (the Common Fund) is organized in Country Z and the Residence Article of the U.S.-Z income tax treaty provides that “the term 'resident of a Contracting State' includes, in the case of Country Z, Common Funds.\* \* \*”

**(ii) Analysis.** A is treated, for purposes of the U.S.-Z income tax treaty as deriving the dividend income as a resident of Country Z under paragraph (d)(1) of this section because the item of income is paid directly to A, A is a Common Fund under the laws of Country Z, and Common Funds are specifically identified as residents of Country Z in the U.S.-Z treaty. There is no need to determine whether A meets the definition of fiscally transparent under paragraph (d)(3)(ii) of this section.

**Example 9. Treatment of investment company when entity receives distribution deductions, and all distributions sourced by residence of entity.**

**(i) Facts.** Entity A is a business organization formed under the laws of Country X, which has an income tax treaty in effect with the United States. A is treated as a partnership for U.S. income tax purposes. Under the laws of Country X, A is an investment company taxable at the entity level and a resident of Country X. It is also entitled to a distribution deduction for amounts distributed to its interest holders on a current basis. A distributes all its net income on a current basis to its interest holders and, thus, in fact, has no income tax liability to Country X. A receives U.S. source dividend income. Under Country X law, all amounts distributed to interest holders of this type of business entity are treated as dividends from sources within Country X and Country X imposes a withholding tax on all payments by A to foreign persons. Under Country X laws, the interest holders in A do not have to separately take into account their respective shares of A's income on a current basis if such income is not, in fact, distributed.

**(ii) Analysis.** A is not fiscally transparent under paragraph (d)(3)(ii) of this section with respect to the U.S. source dividends because the interest holders in A do not have to take into account their respective share of the U.S. source dividends on a current basis whether or not distributed. A is also not fiscally transparent under paragraph (d)(3)(ii) of this section because there is a change in source of the income received by A when A distributes the income to its interest holders and, thus, the character and source of the income in the hands of A's interest holder are not determined as if such income were realized directly from the source from which realized by A. Accordingly, A is treated as deriving the U.S. source dividends for purposes of the U.S.-Country X treaty.

#### **Example 10. Item by item determination of fiscal transparency.**

**(i) Facts.** Entity A is a business organization formed under the laws of Country X, which has an income tax treaty in effect with the United States. A is treated as a partnership for U.S. income tax purposes. Under the laws of Country X, A is an investment company taxable at the entity level and a resident of Country X. It is also entitled to a distribution deduction for amounts distributed to its interest holders on a current basis. A receives both U.S. source dividend income and interest income from U.S. sources that is neither portfolio interest nor effectively connected with the conduct of a trade or business in the United States. Country X law

sources all distributions attributable to dividend income based on the residence of the investment company. In contrast, Country X law sources all distributions attributable to interest income based on the residence of the payor of the interest. No withholding applies with respect to distributions attributable to U.S. source interest and the character of the distributions attributable to the interest income remains the same in the hands of A's interest holders as if such items were realized directly from the source from which realized by A. However, under Country X law the interest holders in A do not have to take into account their respective share of the interest income received by A on a current basis whether or not distributed.

**(ii) Analysis.** An item by item analysis is required under paragraph (d) of this section. The analysis is the same as Example 9 with respect to the dividend income. A is also not fiscally transparent under paragraph (d)(3)(ii) of this section with respect to the interest income because, although the character of the distributions attributable to the interest income in the hands of A's interest holders is determined as if realized directly from the source from which realized by A, under Country X law the interest holders in A do not have to take into account their respective share of the interest income received by A on a current basis whether or not distributed. Accordingly, A derives the U.S. source interest income for purpose of the U.S.-X treaty.

#### 49.7.4 *Charity/pension fund*

##### **Example 11. Treatment of charitable organizations.**

**(i) Facts.** Entity A is a corporation organized under the laws of Country X that has an income tax treaty in effect with the United States. Entity A is established and operated exclusively for religious, charitable, scientific, artistic, cultural, or educational purposes. Entity A receives U.S. source dividend income from U.S. sources. A provision of Country X law generally exempts Entity A's income from Country X tax due to the fact that Entity A is established and operated exclusively for religious, charitable, scientific, artistic, cultural, or educational purposes. But for such provision, Entity A's income would be taxed by Country X.

**(ii) Analysis.** Entity A is not fiscally transparent under paragraph (d)(3)(ii) of this section with respect to the U.S. source dividend income because,

under Country X law, the dividend income is treated as an item of income of A and no other persons are required to take into account their respective share of the item of income on a current basis, whether or not distributed. Accordingly, Entity A is treated as deriving the U.S. source dividend income.

That seems straightforward.

**Example 12. Treatment of pension trusts.**

**(i) Facts.** Entity A is a trust established and operated in Country X exclusively to provide pension or other similar benefits to employees pursuant to a plan. Entity A receives U.S. source dividend income. A provision of Country X law generally exempts Entity A's income from Country X tax due to the fact that Entity A is established and operated exclusively to provide pension or other similar benefits to employees pursuant to a plan. Under the laws of Country X, the beneficiaries of the trust are not required to take into account their respective share of A's income on a current basis, whether or not distributed and the character and source of the income in the hands of A's interest holders are not determined as if realized directly from the source from which realized by A.

**(ii) Analysis.** A is not fiscally transparent under paragraph (d)(3)(ii) of this section with respect to the U.S. source dividend income because under the laws of Country X, the beneficiaries of A are not required to take into account their respective share of A's income on a current basis, whether or not distributed. A is also not fiscally transparent under paragraph (d)(3)(ii) of this section with respect to the U.S. source dividend income because under the laws of Country X, the character and source of the income in the hands of A's interest holders are not determined as if realized directly from the source from which realized by A. Accordingly, A derives the U.S. source dividend income for purposes of the U.S.-X income tax treaty.

## Diverted Profits Tax

### 50.1 ==Disguised remuneration – Introduction==

#### 50.2 Diverted profits tax

The provisions are in s.77 - 116 FA 2015. The drafter thankfully did not slot this into an existing statute with numbering beginning with A and concluding Z14. Was that because of a sense of the ridiculous, or because the topic fell between CTA and TIOPA, so there is nowhere logical to slot it in?

HMRC have issued 111 pages of guidance (“DPT guidance”)(December 2018).<sup>1</sup>

Needless to say a full discussion requires a book to itself.

Section 77 FA 2015 provides:

- (1) A tax (to be known as "diverted profits tax") is charged in accordance with this Part on taxable diverted profits arising to a company in an accounting period.
- (2) Taxable diverted profits arise to a company in an accounting period only if one or more of sections 80, 81 and 86 applies or apply in relation to the company for that period.

Thus there are 3 situations where DPT may apply.

FD\_CHAP\_new\_Diverted\_Profits\_tax.wpd 03/11/21

### 50.3 Entities or transactions lacking economic substance

Section 80 FA 2015 provides:

(1) This section applies in relation to a company ("C") for an accounting period if-

A set of 7 conditions then follow:

- (a) C is UK resident in that period,
- (b) provision has been made or imposed as between C and another person ("P") (whether or not P is UK resident) by means of a transaction or series of transactions ("the material provision"),
- (c) the participation condition is met in relation to C and P (see section 106),
- (d) the material provision results in an effective tax mismatch outcome, for the accounting period, as between C and P (see sections 107 and 108),
- (e) the effective tax mismatch outcome is not an excepted loan relationship outcome (see section 109),
- (f) the insufficient economic substance condition is met (see section 110), and
- (g) C and P are not both small or medium-sized enterprises for that period.

(2) For the purposes of subsection (1)(b) provision made or imposed as between a partnership of which C is a member and another person is to be regarded as provision made or imposed as between C and that person.

### 50.4 UK PE

Section 80 applies to a UK company. Section 81 FA 2015 extends this to a non-resident company with a UK PE:

- (1) This section applies in relation to a company ("the foreign company") for an accounting period if-
- (a) it is non-UK resident in that period,
  - (b) by reason of the foreign company carrying on a trade in the United Kingdom through a permanent establishment in the United Kingdom

("UKPE"), Chapter 4 of Part 2 of CTA 2009 (non-UK resident companies: chargeable profits) applies to determine the chargeable profits of the foreign company for that period, and

(c) section 80 would apply to UKPE for that period were it treated for the purposes of section 80 and sections 106 to 110-

(i) as a distinct and separate person from the foreign company (whether or not it would otherwise be so treated),

(ii) as a UK resident company under the same control as the foreign company, and

(iii) as having entered into any transaction or series of transactions entered into by the foreign company to the extent that the transaction or series is relevant to UKPE.

(2) For the purposes of subsection (1)(c)(iii) a transaction or series of transactions is "relevant" to UKPE only if, and to the extent that, it is relevant, for corporation tax purposes, when determining the chargeable profits of the foreign company attributable (in accordance with sections 20 to 32 of CTA 2009) to UKPE.

(3) [UK sector of the continental shelf - not discussed here]

(4) In this section "control" is to be construed in accordance with section 1124 of CTA 2010.

## 50.5 Non-UK company avoiding a UK taxable presence

Section 86 FA 2015 provides:

(1) This section applies in relation to a company ("the foreign company") for an accounting period if-

There follows a set of 7 conditions or sets of conditions:

### 50.5.1 *Non-resident trading company*

Section 86 FA 2015 provides:

(1) This section applies in relation to a company ("the foreign company") for an accounting period if-

(a) the company is non-UK resident in that period,

(b) it carries on a trade during that period (or part of it),

#### 50.5.2 Avoided PE

Section 86 FA 2015 provides:

(1) This section applies in relation to a company ("the foreign company") for an accounting period if ...

(c) a person ("the avoided PE"), whether or not UK resident, is carrying on activity in the United Kingdom in that period in connection with supplies of services, goods or other property made by the foreign company in the course of that trade,

#### 50.5.3 Limited UK-related sales or expenses

Section 86 FA 2015 provides:

(1) This section applies in relation to a company ("the foreign company") for an accounting period if ...

(d) section 87 (exception for companies with limited UK-related sales or expenses) does not operate to prevent this section applying in relation to the foreign company for the accounting period,

#### 50.5.4 Purpose to avoid UK trading

Section 86 FA 2015 provides:

(1) This section applies in relation to a company ("the foreign company") for an accounting period if ...

(e) it is reasonable to assume that any of the activity of the avoided PE or the foreign company (or both) is designed so as to ensure that the foreign company does not, as a result of the avoided PE's activity, carry on that trade in the United Kingdom for the purposes of corporation tax (whether or not it is also designed to secure any commercial or other objective),

(4) In subsection (1)(e) the reference to activity of the avoided PE or the foreign company includes any limitation which has been imposed or agreed in respect of that activity.

#### 50.5.5 Excepted avoided PE

Section 86 FA 2015 provides:

(1) This section applies in relation to a company ("the foreign company") for an accounting period if ...

(g) the avoided PE is not excepted by subsection (5), and

(5) The avoided PE is "excepted" if-

(a) activity of the avoided PE is such that, as a result of section 1142 or 1144 of CTA 2010, the foreign company would not be treated as carrying on a trade in the United Kingdom in the accounting period through a permanent establishment in the United Kingdom by reason of that activity, and

(b) in a case where-

(i) section 1142(1) of that Act applies, but

(ii) the avoided PE is not regarded for the purposes of section 1142(1) of that Act as an agent of independent status by virtue of section 1145, 1146 or 1151 of that Act,

the foreign company and the avoided PE are not connected at any time in the accounting period.

#### 50.5.6 SME/MSEs

Section 86 FA 2015 provides:

(1) This section applies in relation to a company ("the foreign company") for an accounting period if ...

(h) the avoided PE and the foreign company are not both small or medium-sized enterprises for that period.

## 50.6 Mismatch condition

Section 86 FA 2015 provides:

- (1) This section applies in relation to a company ("the foreign company") for an accounting period if ...
- (f) the mismatch condition (see subsection (2)) or the tax avoidance condition (see subsection (3)) is met or both those conditions are met,

"The mismatch condition" is in fact a set of conditions.

Section 86 FA 2015 provides:

- (2) "The mismatch condition" is that-
- (a) in connection with the supplies of services, goods or other property mentioned in subsection (1)(c) (or in connection with those supplies and other supplies), arrangements<sup>2</sup> are in place as a result of which provision is made or imposed as between the foreign company and another person ("A") by means of a transaction or series of transactions ("the material provision"),
- (b) the participation condition is met in relation to the foreign company and A (see section 106),
- (c) the material provision results in an effective tax mismatch outcome, for the accounting period, as between the foreign company and A (see sections 107 and 108),
- (d) the effective tax mismatch outcome is not an excepted loan relationship outcome (see section 109),
- (e) the insufficient economic substance condition is met (see section 110), and
- (f) the foreign company and A are not both small or medium-sized enterprises for the accounting period.

## 50.7 Tax avoidance condition

Section 86 FA 2015 provides:

---

<sup>2</sup> s.86(7) provides the standard (unnecessary) definition of "arrangements".

(1) This section applies in relation to a company ("the foreign company") for an accounting period if ...

(f) the mismatch condition (see subsection (2)) or the tax avoidance condition (see subsection (3)) is met or both those conditions are met,

(3) "The tax avoidance condition" is that, in connection with the supplies of services, goods or other property mentioned in subsection (1)(c) (or in connection with those supplies and other supplies), arrangements are in place the main purpose or one of the main purposes of which is to avoid or reduce a charge to corporation tax.

### 50.8 Foreign company a partnership

(6) Where the foreign company is a member of a partnership-

(a) for the purposes of subsection (1)-

(i) a trade carried on by the partnership is to be regarded as a trade carried on by the foreign company, and

(ii) supplies made by the partnership in the course of that trade are to be regarded as supplies made by the foreign company in the course of that trade, and

(b) for the purposes of subsection (2)(a) provision made or imposed as between the partnership and another person is to be regarded as made between the foreign company and that person.

## CHAPTER NEW

# LOAN RELATIONSHIPS

1.1

### 1.1 Overview of Part

Section 292 CTA 2009 provides:

- (1) This Part [Part 5, Loan Relationships] sets out how profits and deficits arising to a company from its loan relationships are brought into account for corporation tax purposes.
- (2) For the meaning of “loan relationship” see section 302 and Part 6 (relationships treated as loan relationships etc).
- (3) For how such profits and deficits are calculated and brought into account, see-
  - (a) section 296 (profits and deficits to be calculated using credits and debits given by this Part),
  - (b) section 297 (trading credits and debits to be brought into account under Part 3),
  - (c) section 299 (charge to tax on non-trading profits),
  - (d) section 300 (method of bringing non-trading deficits into account),
  - (e) section 301 (calculation of non-trading profits and deficits from loan relationships: non-trading credits and debits), and
  - (f) Chapter 16 (non-trading deficits).
- (4) For the priority of this Part for corporation tax purposes, see Chapter 17.
- (5) This Part [Part 5, Loan Relationships] also contains the following Chapters (which mainly relate to the amounts to be brought into account for the purposes of this Part)-
  - (a) Chapter 3 (the credits and debits to be brought into account: general),

- (b) Chapter 4 (continuity of treatment on transfers within groups or on reorganisations),
  - (c) Chapter 5 (connected companies relationships: introduction and general),
  - (d) Chapter 6 (connected companies relationships: impairment losses and releases of debts),
  - (e) Chapter 7 (group relief claims involving impaired or released consortium debts),
  - (f) Chapter 8 (connected parties relationships: late interest),
  - (g) Chapter 9 (partnerships involving companies),
  - (h) Chapter 10 (insurance companies),
  - (i) Chapter 11 (other special kinds of company),
  - (j) Chapter 12 (special rules for particular kinds of securities),
  - (k) Chapter 13 (European cross-border transfers of business),
  - (l) Chapter 14 (European cross-border mergers),
  - (m) Chapter 15 (tax avoidance),
  - (n) Chapter 18 (general and supplementary provisions).
- (6) This Part [Part 5, Loan Relationships] needs to be read with Part 19 (general exemptions).

## **1.2 “Profits or losses from loan relationships”**

Section 293 CTA 2009 provides:

- (1) In this Part [Part 5, Loan Relationships] references to profits or losses from loan relationships include references to profits or losses from related transactions.
- (2) For the meaning of “related transaction” see section 304.
- (3) Except where the context indicates otherwise, In this Part [Part 5, Loan Relationships] references to profits or losses from loan relationships include references to profits or losses of a capital nature.

## **1.3 Matters treated as loan relationships**

Section 294 CTA 2009 provides:

- (1) Part 6 deals with matters treated for some or all purposes as loan relationships or rights, payments or profits under loan relationships.
- (2) Except where the context indicates otherwise, references to this Part in this Act and elsewhere in the Tax Acts include references to Part 6.

## **1.4 Loan relationship profits chargeable as income**

Section 295 CTA 2009 provides

- (1) The general rule for corporation tax purposes is that all profits arising to a company from its loan relationships are chargeable to tax as income in accordance with this Part.
- (2) But see section 465 (exclusion of distributions except in tax avoidance cases).

## **1.5 Computation of profits/deficits**

Section 296 CTA 2009 provides:

Profits and deficits arising to a company from its loan relationships are to be calculated using the credits and debits given by this Part.

## **1.6 Trading credits/debits**

Section 297 CTA 2009 provides:

- (1) This section applies so far as in any accounting period a company is a party to a loan relationship for the purposes of a trade it carries on.
- (2) The credits in respect of the relationship for the period are treated as receipts of the trade which are to be brought into account in calculating its profits for that period.
- (3) The debits in respect of the relationship for the period are treated as expenses of the trade which are deductible in calculating those profits.
- (4) So far as subsection (3) provides for any amount to be deductible, it has effect despite anything in-
  - (a) section 53 (capital expenditure),
  - (b) section 54 (expenses not wholly and exclusively for trade and unconnected losses), or
  - (c) section 59 (patent royalties).
- (5) This section is subject to-
  - (a) section 330 (debts in respect of pre-trading expenditure),
  - (b) section 482(1) (under which credits or debits to be brought into account under Chapter 2 of Part 6 (relevant non-lending relationships) are treated as non-trading credits or debits), and
  - (c) sections 286(5) and 287(5) of CTA 2010 (under which some

credits and debits affecting ring-fence profits from petroleum extraction activities are treated as non-trading credits and debits).

## 1.7 Purposes of trade

Section 298 CTA 2009 provides:

(1) For the purposes of this Part a company is taken to be a party to a creditor relationship for the purposes of a trade it carries on only if it is a party to the relationship in the course of activities forming an integral part of the trade.

(2) For the meaning of “creditor relationship”, see section 302(5).

### 1.7.1 Mutual trade

Section 298 CTA 2009 provides:

(3) For the purposes of this Part activities carried on by a company in the course of-

(a) any mutual trading, or

(b) any mutual insurance or other mutual business which is not life assurance business,

are treated as not constituting the whole or any part of a trade.

(4) Subsection (3) applies for the purposes of any other relevant enactment as it applies for the purposes of this Part.

(5) In subsection (4) “relevant enactment” means so much of any enactment as contains provision by reference to which amounts are to be brought into account for the purposes of this Part.

## 1.8 Charge to tax on non-trading profits

Section 299 CTA 2009 provides:

(1) The charge to corporation tax on income applies to any non-trading profits which a company has in respect of its loan relationships.

(2) For the meaning of a company having such profits and how they are calculated, see section 301.

## 1.9 Method of bringing non-trading deficits into account

Section 300 CTA 2009 provides:

- (1) Any non-trading deficit which a company has from its loan relationships must be brought into account in accordance with Chapter 16 (non-trading deficits).
- (2) For the meaning of a company having such a deficit and how it is calculated, see section 301.
- (3) This section and Chapter 16 apply even if none of the company's loan relationships is regarded as a source of income as a result of this Part.

## **1.10 Calculation of non-trading profits/deficits**

Section 301 CTA 2009 provides:

- (1) Whether a company has non-trading profits or a non-trading deficit from its loan relationships for an accounting period is determined in accordance with subsections (4) to (7), using the non-trading credits and non-trading debits given by this Part for the accounting period.

### *1.10.1 Non-trading profits/deficits*

Section 301 CTA 2009 provides:

- (2) In this Part [Part 5, Loan Relationships]-
  - (a) "non-trading credits" means credits for any accounting period in respect of a company's loan relationships that are not brought into account under section 297(2), and
  - (b) "non-trading debits" means debits for any accounting period in respect of a company's loan relationships that are not brought into account under section 297(3).
- (3) But see also-
  - (a) section 330 (debts in respect of pre-trading expenditure), and
  - (b) section 482(1) (under which credits or debits to be brought into account under Chapter 2 of Part 6 (relevant non-lending relationships) are treated as non-trading credits or debits).

### *1.10.2 Computation of non-trading profit/deficit*

Section 301 CTA 2009 provides:

- (4) A company has non-trading profits for an accounting period from its loan relationships if the non-trading credits for the period exceed the non-trading debits for the period or there are no such debits.
- (5) The non-trading profits are equal to those credits, less any such debits.
- (6) A company has a non-trading deficit for an accounting period from its loan relationships if the non-trading debits for the period exceed the non-trading credits for the period or there are no such credits.
- (7) The non-trading deficit is equal to those debits, less any such credits.

### 1.10.3 *Non-resident company*

Section 301 CTA 2009 provides:

- (1A) But in the case of a non-UK resident company the only non-trading credits and non-trading debits to be used are those in respect of loan relationships that the company is a party to for a purpose mentioned in section 5(3A)(b) or (3B)(b).

## **1.11 Loan/creditor/debtor relationship**

### 1.11.1 *Loan relationship*

Section 302 CTA 2009 provides:

- (1) For the purposes of the Corporation Tax Acts a company has a loan relationship if-
  - (a) the company stands in the position of a creditor or debtor as respects any money debt (whether by reference to a security or otherwise), and
  - (b) the debt arises from a transaction for the lending of money.
- (2) References to a loan relationship and to a company being a party to a loan relationship are to be read accordingly.
- (3) For cases where this Part applies as if a relationship were a loan relationship despite the money debt not arising from a transaction for the lending of money see Chapter 2 of Part 6 (relevant non-lending relationships).
- (4) See also the following provisions of Part 6 (under which other matters are treated as loan relationships or rights, payments or profits

under loan relationships)-

- (a) Chapter 3 (OEICs, unit trusts and offshore funds),
- (b) Chapter 4 (building societies),
- (c) Chapter 5 (registered societies) ),
- (d) Chapter 6 (alternative finance arrangements),
- (e) Chapter 7 (shares with guaranteed returns etc),
- (f) Chapter 8 (returns from partnerships),
- (g) Chapter 9 (manufactured interest etc),
- (h) Chapter 10 (repos), and
- (i) Chapter 11 (investment life insurance contracts).

### 1.11.2 *Creditor/debtor relationship*

Section 302 CTA 2009 provides:

(5) In this Part [Part 5, Loan Relationships] “creditor relationship”, in relation to a company, means any loan relationship of the company where it stands in the position of a creditor as respects the debt in question.

(6) In this Part [Part 5, Loan Relationships] “debtor relationship”, in relation to a company, means any loan relationship of the company where it stands in the position of a debtor as respects the debt in question.

## 1.12 “Money debt”

Section 303 CTA 2009 provides a wide definition:

- (1) For the purposes of this Part a money debt is a debt which-
- (a) falls to be settled-
    - (i) by the payment of money,
    - (ii) by the transfer of a right to settlement under a debt which is itself a money debt, or
    - (iii) by the issue or transfer of any share in any company,
  - (b) has at any time fallen to be so settled, or
  - (c) may at the option of the debtor or the creditor fall to be so settled.

Section 303 CTA 2009 provides

(2) For the purposes of subsection (1) any option exercisable by either party to settle the debt in any other way than is mentioned in subsection (1)(a) is ignored.

Why is this needed, given 303(1)(c)?

Section 303 also has some signposting:

(5) But see the following provisions (as a result of which some such rights are within this Chapter)-

(a) Chapter 3 of Part 6 (OEICs, unit trusts and offshore funds),

(b) Chapter 7 of that Part (shares with guaranteed returns etc).

(6) For the meaning of “share” see section 476(1).

### 1.12.1 *Debt arising from transaction for the lending of money*

Section 303 CTA 2009 provides:

(3) A money debt is a debt arising from a transaction for the lending of money for the purposes of this Part if an instrument is issued by any person for the purpose of representing-

(a) security for the debt, or

(b) the rights of a creditor in respect of the debt.

(4) A debt does not arise from a transaction for the lending of money for the purposes of this Part so far as it arises from rights conferred by shares in a company.

When is this needed?

## 1.13 “Related transaction”

Section 304 CTA 2009 provides:

(1) In this Part [Part 5, Loan Relationships] “related transaction”, in relation to a loan relationship, means any disposal or acquisition (in whole or in part) of rights or liabilities under the relationship.

(2) For this purpose the cases where there is taken to be such a disposal and acquisition include those where rights or liabilities under the loan relationship are transferred or extinguished by any sale, gift, exchange, surrender, redemption or release.

## **1.14 Payments, interest, rights and liabilities under a loan relationship**

### *1.14.1 Payment/interest under a loan relationship*

Section 305 CTA 2009 provides:

(1) For the purposes of this Part references to payments or interest under a loan relationship are references to payments or interest paid or payable in pursuance of any of the rights or liabilities under that relationship.

### *1.14.2 Rights/liabilities under a loan relationship*

Section 305 CTA 2009 provides:

(2) For the purposes of this Part references to rights or liabilities under a loan relationship are references to any of the rights or liabilities under the arrangements as a result of which that relationship subsists.

(3) For the purposes of this Part rights or liabilities under a loan relationship are taken to include the rights or liabilities attached to any security that is issued in relation to the money debt in question (and so is a security representing that relationship).

(4) But for the treatment of funding bonds see-

- (a) section 413 (issue of funding bonds), and
- (b) section 414 (redemption of funding bonds).

## **1.15 Credits/debits brought into account**

Section 306 CTA 2009 provides an overview:

(1) This Chapter [Chapter 3, Credits/Debits brought into charge] contains rules of general application about the credits and debits to be brought into account for the purposes of this Part.

(2) In particular, it-

(za) makes provision about the matters in respect of which amounts are to be brought into account (see section 306A)

(a) provides for the application of generally accepted accounting practice in determining the amounts to be brought into account as credits and debits and makes provision where accounts do not comply with that practice (see sections 307 to 312),

(b) makes provision about bases of accounting (see sections 313 and 314),

- (c) provides for adjustments on changes of accounting basis]2 (see sections 315 to 319),
  - (d) sets out some general rules that differ from generally accepted accounting practice (see sections 320 to 327),
  - (e) provides for exchange gains and losses to be included in the profits and losses of a company from loan relationships (see section 328),
  - (f) makes provision about debits for pre-loan relationship, abortive or pretrading expenses (see sections 329 and 330),
  - (g) makes provision about cases where amounts are recognised even though companies are not, or have ceased to be, parties to loan relationships (see section 330A), and
  - (h) provides for deemed assignments where a company's residence or operations move abroad (see sections 333 and 334).
- (3) For further rules about the credits and debits to be brought into account in particular situations and cases, see-
- (a) Chapter 4 (continuity of treatment on transfers within groups or on reorganisations),
  - (b) Chapter 5 (connected companies relationships: introduction and general),
  - (c) Chapter 6 (connected companies relationships: impairment losses and releases of debts),
  - (d) Chapter 7 (group relief claims involving impaired or released consortium debts),
  - (e) Chapter 8 (connected parties relationships: late interest),
  - (f) Chapter 9 (partnerships involving companies),
  - (g) Chapter 10 (insurance companies),
  - (h) Chapter 11 (other special kinds of company),
  - (i) Chapter 12 (special rules for particular kinds of securities),
  - (j) Chapter 13 (European cross-border transfers of business),
  - (k) Chapter 14 (European cross-border mergers), and
  - (l) Chapter 15 (tax avoidance).

## 1.16 Matters in respect of which amounts brought into account

Section 306A CTA 2009 provides:

- (1) The matters in respect of which amounts are to be brought into account for the purposes of this Part in respect of a company's loan relationships are-
- (a) profits and losses of the company that arise to it from its loan

- relationships and related transactions (excluding interest or expenses),
- (b) interest under those relationships,

### 1.16.1 *Expenses*

Section 306A CTA 2009 provides:

- (1) The matters in respect of which amounts are to be brought into account for the purposes of this Part in respect of a company's loan relationships are ...
  - (c) expenses incurred by the company under or for the purposes of those relationships and transactions.

Section 306A CTA 2009 provides:

- (2) Expenses are only treated as incurred as mentioned in subsection (1)(c) if they are incurred directly-
  - (a) in bringing any of the loan relationships into existence,
  - (b) in entering into or giving effect to any of the related transactions,
  - (c) in making payments under any of those relationships or as a result of any of those transactions, or
  - (d) in taking steps to ensure the receipt of payments under any of those relationships or in accordance with any of those transactions.
- (3) For the treatment of pre-loan relationship and abortive expenses, see section 329.

## **1.17 Bringing into account credits and debits: General principles**

### 1.17.1 *GAAP principles*

Section 307 CTA 2009 provides:

- (1) This Part [Part 5, Loan Relationships] operates by reference to the accounts of companies and amounts recognised for accounting purposes.
- (2) The general rule is that the amounts to be brought into account by a company as credits and debits for any period for the purposes of this Part in respect of the matters mentioned in section 306A(1) are those that are

recognised in determining the company's profit or loss for the period in accordance with generally accepted accounting practice.

### 1.17.2 *Accounting periods*

(2A) Subsections (2B) and (2C) apply if an accounting period of a company does not coincide with one or more of its periods of account.

(2B) The amounts referred to in subsection (2) are to be determined by apportionment in accordance with section 1172 of CTA 2010 (time basis).

(2C) But if it appears that apportionment in accordance with that section would work unreasonably or unjustly for an accounting period, subsection (2) is to be read as referring to amounts that would have been recognised in determining the company's profit or loss for that period in accordance with generally accepted accounting practice if accounts had been drawn up for that period.]

(6) This section is subject to the following provisions of this Part.]

## 1.18 **Amounts recognised in determining profit/loss**

Section 308 CTA 2009 provides:

(1) References In this Part [Part 5, Loan Relationships] to an amount recognised in determining a company's profit or loss for a period are references to an amount that is recognised in the company's accounts for the period as an item of profit or loss.

(1A) The reference in subsection (1) to an amount recognised in the company's accounts for the period as an item of profit or loss includes a reference to an amount that-

- (a) was previously recognised as an item of other comprehensive income, and
- (b) is transferred to become an item of profit or loss in determining the company's profit or loss for the period.

(1B) In subsections (1) and (1A) "item of profit or loss" and "item of other comprehensive income" each has the meaning that it has for accounting purposes.

### 1.18.1 *Company without GAAP-compliant accounts*

Section 309 CTA 2009 provides:

- (1) If a company-
  - (a) draws up accounts which are not GAAP-compliant accounts, or
  - (b) does not draw up accounts at all,this Part [Part 5, Loan Relationships] applies as if GAAP-compliant accounts had been drawn up.
- (2) Accordingly, references in this Part [Part 5, Loan Relationships] to amounts recognised for accounting purposes are references to the amounts that would have been recognised if GAAP-compliant accounts had been drawn up for the period of account in question and any relevant earlier period.
- (3) For this purpose a period of account is relevant to a later period if the accounts for the later period rely to any extent on amounts derived from the earlier period.
- (4) In this section “GAAP-compliant accounts” means accounts drawn up in accordance with generally accepted accounting practice.

## **1.19 Power to make regulations about recognised amounts**

Section 310 CTA 2009 provides:

- (1) The Treasury may by regulations-
  - (a) make provision excluding from section 308(1) amounts of a specified description, and
  - (b) make provision for or in connection with bringing into account in specified circumstances amounts in relation to which section 308(1) does not have effect as a result of regulations under paragraph (a).
- (2) The regulations may provide that section 308(1) does not apply to specified amounts in a period of account so far as they derive from or otherwise relate to amounts brought into account in a specified way in a previous period of account.
- (3) The regulations may-
  - (a) make different provision for different cases, and
  - (b) make provision subject to an election or to other specified conditions.
- (4) The regulations may apply to periods of account beginning before they are made, but not earlier than the beginning of the calendar year in which they are made.

## **1.20 TAAR: Amounts not fully recognised**

Section 311 CTA2009 provides:

(1) Section 312 applies for the purpose of determining the credits and debits which a company is to bring into account for a period for the purposes of this Part in the following case.

(2) The case is where-

- (a) the company is, or is treated as, a party to a creditor relationship in the period, and
- (b) as a result of tax avoidance arrangements to which the company is at any time a party, an amount is (in accordance with generally accepted accounting practice) not fully recognised for the period in respect of the creditor relationship.

#### 1.20.1 *Not fully recognised*

(6) For the purposes of this section and section 312]6 an amount is not fully recognised for a period in respect of a relationship of a company if-

- (a) no amount in respect of the relationship is recognised in determining its profit or loss for the period, or
- (b) an amount is so recognised in respect of only part of the relationship .

#### 1.20.2 *Tax avoidance arrangements*

(7) For the purposes of this section arrangements are “tax avoidance arrangements” if the main purpose, or one of the main purposes, of any party to the arrangements, in entering into them, is to obtain a tax advantage.

(8) In subsection (7) “arrangements” includes any arrangements, scheme or understanding of any kind, whether or not legally enforceable, involving a single transaction or two or more transactions.

#### 1.20.3 *Disposal of loan relationship ignored*

(9) For the purposes of this section a company is to be treated as a party to a creditor relationship even though it has disposed of its rights under the relationship to another person-

- (a) under a repo or stock lending arrangement, or
- (b) under a transaction which is treated as not involving any

disposal as a result of section 26 of TCGA 1992 (mortgages and charges not to be treated as disposals).]

#### 1.20.4 *Computation of credits/debits where amounts not fully recognised*

Section 312 CTA 2009 provides:

(1) In determining the credits and debits which a company is to bring into account for the period referred to in section 311(1) for the purposes of this Part in respect of-

- (a) the creditor relationship mentioned in section 311(2) the assumption in subsection (2) is to be made.

(1A) Subsection (1B) applies in a case where-

- (a) pursuant to the arrangements mentioned in section 311(2)(b), the company becomes, or is treated as becoming, a party to a debtor relationship, and
- (b) an amount is (in accordance with generally accepted accounting practice) not fully recognised for any period in respect of the debtor relationship.]

(1B) In determining the debits and credits which a company is to bring into account for any period for the purposes of this Part in respect of the debtor relationship ...], the assumption in subsection (2) is to be made.]

(2) The assumption is that an amount in respect of the whole of the relationship in question is recognised in determining the company's profit or loss for the period.

(3) But-]

- (a) no debits are, as a result of this section, to be brought into account by the company in respect of the creditor relationship mentioned in section 311(2), and
- (b) the amount of any debits to be brought into account by the company for a period as a result of this section applying in respect of its debtor relationships must not exceed the amount of any credits to be brought into account by it for the period as a result of this section applying in respect of its creditor relationships.]

(4) Subsection (5) applies in any case where-

- (a) apart from this section any credits or debits are brought into account for a period for the purposes of this Part by the company in respect of a loan relationship, and
- (b) the relationship is a creditor relationship within subsection (1)] or a debtor relationship within subsection (1B)].

(5) The credits and debits which are to be so brought into account as a result of this section are to be determined on the same basis of accounting as that on which the credits or debits mentioned in subsection (4)(a) are determined.

(6) In any other case, the credits and debits which are to be so brought into account as a result of this section are to be determined on an amortised cost basis of accounting.

## 1.21 Basis of accounting: “amortised cost basis”, “fair value accounting” and “fair value”

Section 313 CTA 2009 provides:

(1) The general rule is that the amounts to be brought into account by a company as credits and debits for any period of account for the purposes of this Part [Part 5, Loan Relationships] may be determined on any basis of accounting that is in accordance with generally accepted accounting practice.

### 1.21.1 *When specified accounting basis required*

Section 313 CTA 2009 provides:

(2) But subsection (1) is subject to the following provisions (which require a particular accounting basis to be used)<sup>1</sup>

<b>Section</b>	<b>Topic</b>
s.312(5)(6)	TAAR: credits and debits where amounts not fully recognised for accounting purposes
s.349(2)	amortised cost basis for connected companies relationships
s.382(2)	company partners using fair value accounting
s.399(2)	index-linked gilt-edged securities: fair value accounting
s.482(2)	amortised cost basis to discounts arising from a money debt under a relevant non-lending relationship
s.490(3)	OEICs, unit trusts and offshore funds: fair value accounting

### 1.21.2 *Amortised cost basis*

(4) In this Part [Part 5, Loan Relationships] “amortised cost basis of

---

<sup>1</sup> tabular

accounting”, in relation to a company’s loan relationship, means a basis of accounting under which an asset or liability representing the loan relationship is measured in the company’s balance sheet at its amortised cost using the effective interest method, but with that amortised cost being adjusted as necessary where the loan relationship is the hedged item under a designated fair value hedge.

(4A) In subsection (4) each of the following expressions has the meaning that it has for accounting purposes-

“amortised cost”, in relation to assets or liabilities;

“the effective interest method”, in relation to the measurement of assets or liabilities.

### 1.21.3 *Fair value accounting*

(5) In this Part [Part 5, Loan Relationships] “fair value accounting” means a basis of accounting under which-

(a) assets and liabilities are measured in the company’s balance sheet at their fair value, and

(b) changes in the fair value of assets and liabilities are recognised as items of profit or loss.

(6) For the meaning of “fair value”, see section 476(1).

(7) In this Part [Part 5, Loan Relationships] each of the following has the meaning that it has for accounting purposes-

“designated fair value hedge”;

“hedged item”.

## 1.22 **Power to make regulations about changes from amortised cost basis**

Section 314 CTA 2009 provides:

(1) This section applies if the credits or debits to be brought into account for the purposes of this Part in respect of assets or liabilities of a company-

(a) are required in accordance with generally accepted accounting practice to be dealt with for accounting purposes using fair value accounting, and

(b) were previously dealt with for those purposes on an amortised cost basis.

(2) The Treasury may by regulations provide that the credits or debits must continue to be determined on an amortised cost basis of accounting.

- (3) The regulations may-
  - (a) make different provision for different cases,
  - (b) make incidental, supplemental, consequential and transitional provision and savings, and
  - (c) make provision subject to an election or to other specified conditions.

### **1.23 Connected companies**

Section 353 CTA 2009 provides an overview:

- (1) This Chapter [Chapter 6, Connected companies] contains rules about impairment losses and releases of debts in the case of companies connected with other companies.
- (2) In particular, see-
  - (a) sections 354 to 357 (which prevent debits in respect of impairment losses and release debits from being brought into account in the case of connected companies relationships, subject to some exceptions),
  - (b) sections 358 to 360 (which exclude credits in respect of the release of debts or the reversal of impairments from being brought into account in that case, subject to some exceptions), and
  - (c) sections 361 to 363 (which treat debt releases as occurring when impaired debts become held by companies which might otherwise benefit from the exclusion under section 358).
- (4) Section 466 (companies connected for an accounting period) applies for the purposes of sections 354 to 360.
- (5) For the circumstances in which companies are connected for sections 361 and 362, see section 363.
- (6) For the meaning of “impairment loss” and “release debit” see section 476(1).

### **1.24 “Connected”**

Section 466 CTA 2009 provides:

Jane pl Take in 466-474

### **1.25 Exclusion of debit for impaired/released connected company debt**

Section 354 CTA2009 provides:

- (1) The general rule is that no impairment loss or release debit in respect of a company's creditor relationship is to be brought into account for the purposes of this Part for an accounting period if section 349 (application of amortised cost basis to connected companies relationship) applies to the relationship for the period.
- (2) That rule is subject to-
  - (a) section 356 (swapping debt for equity), and
  - (b) section 357 (insolvent creditors).
- (2A) Where the carrying value of an asset representing the creditor relationship has at any time been adjusted as a result of the asset being the hedged item under a designated fair value hedge, the rule in subsection (1) does not prevent a credit or debit being brought into account for the purposes of this Part in respect of any reversal of that adjustment.
- (3) Nothing in this section affects the debits to be brought into account for the purposes of this Part in respect of exchange gains or losses arising from a debt.

## **1.26 Cessation of connection**

Section 355 CTA 2009 provides:

- (1) This section applies if, in the case of a creditor relationship of a company-
  - (a) an impairment loss or release debit is excluded by section 354 from being brought into account for any accounting period, and
  - (b) there is a later accounting period for which the creditor relationship in respect of the debt is not a connected companies relationship.
- (2) So far as any amount represents the impairment loss or release debit, no debit may be brought into account in respect of it-
  - (a) for the first accounting period within subsection (1)(b), or
  - (b) for any subsequent such accounting period.

## **1.27 Exception to section 354: swapping debt for equity**

Section 356 CTA 2009 provides:

- (1) An impairment loss or release debit in relation to a liability to pay any amount to a company (“the creditor company”) under its creditor relationship is not prevented from being brought into account by section 354 if conditions A, B and C are met.
- (2) Condition A is that the creditor company treats the liability as discharged.
- (3) Condition B is that it does so in consideration of-
  - (a) any shares forming part of the ordinary share capital of the company on which the liability would otherwise have fallen, or
  - (b) any entitlement to such shares.
- (4) Condition C is that there would be no connection between the two companies for the accounting period in which the consideration is given if the question whether there is such a connection were determined by reference only to times before the creditor company-
  - (a) acquired possession of the shares, or
  - (b) acquired any entitlement to them.

## 1.28 Exception to section 354: insolvent creditors

Section 357 CTA 2009 provides:

- (1) An impairment loss or release debit is not prevented from being brought into account by section 354 in relation to an amount accruing to a company (“the creditor”) if-
  - (a) condition A, B, C, D or E is met in relation to the creditor, and
  - (b) the amount accrues to the creditor at a time which is the relevant time for the condition in question.
- (2) Condition A is that the creditor is in insolvent liquidation, and for this condition the relevant time is any time in the course of the winding up.
- (3) Condition B is that the creditor is in insolvent administration, and for this condition the relevant time is any time in the course of the administration.
- (4) Condition C is that the creditor is in insolvent administrative receivership, and for this condition the relevant time is any time when the appointment of the administrative receiver is in force.
- (5) Condition D is that an appointment of a provisional liquidator is in force in relation to the creditor under section 135 of the Insolvency Act 1986 (c. 45) or Article 115 of the Insolvency (Northern Ireland) Order 1989 (S.I. 1989/2405 (N.I. 19)), and for this condition the relevant time is any time when the appointment is in force.

(6) Condition E is that under the law of a country or territory outside the United Kingdom, circumstances exist corresponding to those described in condition A, B, C or D, and for this condition the relevant time is any time corresponding to that described in the case of the condition in question.

(7) Section 323 applies for interpreting this section as it applies for interpreting section 322(6).

## **1.29 Exclusion of credits on release of connected companies debts: general**

Section 358 CTA 2009 provides:

- (1) This section applies if-
  - (a) a liability to pay an amount under a debtor relationship of a company (“D”) is released, and,
  - (b) the release takes place in an accounting period for which-
    - (i) an amortised cost basis of accounting is used in respect of the relationship, and
    - (ii) the relationship is a connected companies relationship.
- (2) D2 is only required to bring a credit into account in respect of the release for the purposes of this Part if -
  - (a) it is a deemed release, or
  - (b) it is a release of relevant rights.
- (3) In subsection (2) “deemed release” means a release which is deemed to occur because of-
  - (a) section 361 (acquisition of creditor rights by connected company at undervalue), or
  - (b) section 362 (parties becoming connected where creditor’s rights subject to impairment adjustment).
- (4) For the purposes of this section “relevant rights” means rights of a company (“C”) that-
  - (a) were acquired by C, before the day on which F(No2)A 2015 was passed, in circumstances that, but for the application of the old corporate rescue exception or the old debt-for-debt exception, would have resulted in a deemed release under section 361(3), or
  - (b) were acquired by another company before that day in such circumstances and transferred to C by way of an assignment or assignments.
- (4A) In subsection (4)(a)-

- (a) “the old corporate rescue exception” means the exception in section 361A (as it had effect before F(No2)A 2015);
  - (b) “the old debt-for-debt exception” means the exception in section 361B (as it had effect before that Act).
- (5) The amount of the credit that D is required to bring into account in respect of a release of relevant rights is-
- (a) the amount of the discount received on the acquisition, less
  - (b) the sum of any credits brought into account in respect of that amount (whether in the accounting period in which the release takes place or in a previous accounting period) by C or, in a case within subsection (4)(b), by the company that acquired the rights or any company to which the rights were subsequently assigned.
- (6) A reference in subsection (5) to the amount of the discount received on the acquisition is to the amount that would have been treated as released under section 361(4) on the acquisition, but for the application of the corporate rescue exception or the debt-for-debt exception.
- (7) Where the carrying value of a liability representing the debtor relationship has at any time been adjusted as a result of the liability being the hedged item under a designated fair value hedge, this section does not prevent a credit or debit being brought into account for the purposes of this Part in respect of any reversal of that adjustment.
- (8) Nothing in this section affects the credits or debits to be brought into account for the purposes of this Part in respect of exchange gains or losses arising from a debt.

### **1.30 Exclusion of credits on release of connected companies debts during creditor’s insolvency**

Section 359 CTA 2009 provides:

- (1) This section applies if-
  - (a) a liability to pay an amount under a company’s debtor relationship is released,
  - (b) the release takes place in an accounting period for which an amortised cost basis of accounting is used in respect of that relationship,
  - (c) condition A, B, C, D or E in section 357 is met in relation to the company releasing the amount,
  - (d) immediately before the time when any of those conditions was first met the relationship was a connected companies

relationship, and

(e) immediately after that time it was not such a relationship.

(2) The company is not required to bring into account a credit in respect of the release for the purposes of this Part.

(3) Where the carrying value of a liability representing the debtor relationship has at any time been adjusted as a result of the liability being the hedged item under a designated fair value hedge, this section does not prevent a credit being brought into account for the purposes of this Part in respect of any reversal of that adjustment.

### **1.31 Exclusion of credits on reversal of impairments of connected companies debts**

Section 360 CTA 2009 provides:

(1) If an impairment loss is prevented from being brought into account by section 354, no credit in respect of any reversal of the impairment may be brought into account for the purposes of this Part.

(2) Nothing in this section affects the credits to be brought into account for the purposes of this Part in respect of exchange gains or losses arising from a debt.

### **1.32 Connected companies: late interest**

Section 372 CTA 2009 provides:

(1) This Chapter [Chapter 8, Late interest] makes provision about the debits to be brought into account for the purposes of this Part in cases where certain conditions relating to interest that is not paid or is paid late are met and there is a connection between the parties to the loan relationship.

(2) For those conditions and the rule that applies in those cases, see section 373 (late interest treated as not accruing until paid in some cases).

(3) For the kinds of connections where the rule applies, see-...

(b) section 375 (loans to close companies by participators etc), and

(d) section 378 (loans by trustees of occupational pension schemes).

(4) For the meaning of “standing in the position of a creditor” in this Chapter, see section 379(1) (persons indirectly standing in the position of creditor).

### 1.32.1 *Late interest not accruing until paid*

Section 373 CTA 2009 provides:

- (1) Debits relating to interest payable under a company's debtor relationship are to be brought into account for the purposes of this Part on the assumption that the interest does not accrue until it is paid if-
- (a) conditions A and B are met, and
  - (b) the case is within section 375 or 378.

### 1.32.2 *Late payment condition A*

Section 373 CTA 2009 provides:

- (2) Condition A is that the interest is not paid within the period of 12 months following the end of the accounting period in which it would be treated as accruing apart from subsection (1).

### 1.32.3 *Late payment condition B*

Section 373 CTA 2009 provides:

- (3) Condition B is that credits representing the full amount of the interest are not brought into account for the purposes of this Part in respect of the corresponding creditor relationship for any accounting period.
- (4) For the meaning of "corresponding creditor relationship" in cases where persons indirectly stand in the position of creditor, see section 379(2).

### 1.32.4 *"the actual accrual period"*

Section 373 CTA 2009 provides:

- (5) References in this Chapter to "the actual accrual period" are references to the accounting period in which the interest would be treated as accruing apart from subsection (1).

## **1.33 Loans to close company by participator**

Section 375 CTA 2009 provides:

- (1) The case to which this section applies is where-
  - (a) there is a time in the actual accrual period when the close company conditions are met, and
  - (b) neither the CIS-based close company conditions nor the CIS limited partnership conditions are met ,  
and, where subsection (4A) applies, the non-qualifying territory condition is met.

1.33.1 *Close company conditions*

- (2) The close company conditions are that-
  - (a) the company which has the debtor relationship (“D”) is a close company, and
  - (b) a person (“C”) standing in the position of creditor as respects the loan relationship is-
    - (i) a participator in D,
    - (ii) the associate of a person who is participator in D,
    - (iii) a company of which a participator in D has control,
    - (iv) a company in which a participator in D has a major interest,
    - (v) a person who controls a company which is a participator in D,
    - (vi) the associate of a person within sub-paragraph (v), or
    - (vii) a company controlled by a person within sub-paragraph (v).

1.33.2 *Collective investments schemes*

- (3) The CIS-based close company conditions are that-
  - (a) D is a CIS-based close company at all times when the close company conditions are met,
  - (b) C is not resident for tax purposes in a non-qualifying territory at any such time, and
  - (c) D is a small or medium-sized enterprise for the actual accrual period.
- (4) The CIS limited partnership conditions are that-
  - (a) the debt is one which is owed to, or to persons acting for, a CIS limited partnership,
  - (b) no member of that partnership is resident for tax purposes in

- a non-qualifying territory at any time in the actual accrual period,
- (c) D has received written notice from the partnership containing information from which it appears that the condition in paragraph (b) is met, and
  - (d) D is a small or medium-sized enterprise for the actual accrual period.

Section 376 CTA 2009 provides:

(5) In section 375-

“CIS-based close company” means a company which would not be a close company apart from the rights and powers of one or more partners in a CIS limited partnership being attributed to another of the partners under section 451(4) to (6) of CTA 2010 because of section 448(1)(a) of that Act,

“CIS limited partnership” means a limited partnership-

- (a) which is a collective investment scheme, or
- (b) which would be a collective investment scheme if it were not a body corporate,

### 1.33.3 *Non-qualifying territory condition*

(4A) This subsection applies if C is a company; and the non-qualifying territory condition is that C is-

- (a) resident for tax purposes in a non-qualifying territory at any time in the actual accrual period, or
- (b) effectively managed in a non-taxing non-qualifying territory at any such time.

(5) Section 376 applies for the interpretation of this section.

Section 376(5) CTA 2009 provides:

“non-qualifying territory” has the meaning given by section 173 of TIOPA 2010,<sup>2</sup>

“resident for tax purposes” means liable, under the law of the non-qualifying territory, to tax there by reason of domicile, residence or

---

<sup>2</sup> xref

place of management,

Section 376(6) CTA 2009 provides:

(6) For the purposes of section 375, a non-qualifying territory is “nontaxing” if companies are not under its law liable to tax by reason of domicile, residence or place of management.

#### 1.33.4 *Interpretation of section 375*

Section 376 CTA 2009 provides:

(1) For the purposes of section 375 and this section, Chapter 2 of Part 10 of CTA 2010 (meaning of “close company”) applies with the omission of section 442(a) (exclusion of non-resident companies).

(2) A person who is a participator in a company which controls another company is treated for the purposes of section 375 and this section as being a participator in that other company also.

(3) Subject to that, in section 375 and this section “participator”, in relation to a company, means a person who is a participator in the company within the meaning given by section 454 of CTA 2010, but not a person who is such a participator]3 just because of being a loan creditor of the company.

(4) Section 472 (meaning of “control”) applies for the purposes of section 375 and this section.

(5) In section 375-

...

“small or medium-sized enterprise” has the meaning given by section 172 of TIOPA 2010.

### **1.34 Loans by trustees of occupational pension schemes**

Section 378 CTA 2009 provides:

(1) The case to which this section applies is where-

- (a) the loan is one made by trustees of an occupational pension scheme, and
- (b) condition A, B or C is met.

- (2) Condition A is that there is a time in the actual accrual period when the company which has the debtor relationship (“D”) is the employer of employees to whom the scheme relates.
- (3) Condition B is that there is a connection between D and such an employer for the actual accrual period.
- (4) Condition C is that a company is such an employer and there is a time in the actual accrual period when-
- (a) D has a major interest in that company, or
  - (b) that company has a major interest in D.
- (5) In this section “occupational pension scheme” has the meaning given in section 150(5) of FA 2004.
- (6) Section 466 (companies connected for an accounting period) applies for the purposes of this section.

### **1.35 Indirectly standing in the position of creditor**

Section 379 CTA 2009 provides:

- (1) For the purposes of this Chapter a person is treated as standing in the position of a creditor as respects a loan relationship if the person indirectly stands in that position by reference to a series of loan relationships or relevant money debts.
- (2) If-
- (a) a person (“C”) indirectly stands in the position of creditor as respects a loan relationship by reference to such a series of relationships or debts, and
  - (b) section 373 (late interest treated as not accruing until paid in some cases) applies in relation to the debtor relationship because of subsection (1),
- the reference in section 373(3) to the corresponding creditor relationship is a reference to C’s creditor relationship.
- (3) In subsection (1) “relevant money debt” means a money debt which would be a loan relationship if a company directly stood in the position of creditor or debtor.

### **1.36 Transactions not at arm’s length: general**

Section 444 CTA 2009 provides:

- (1) If-
- (a) credits or debits in respect of a loan relationship of a company

- are to be brought into account for the purposes of this Part in respect of a related transaction, and
- (b) that transaction is not a transaction at arm's length, those credits or debits are to be determined for the purposes of this Part in accordance with the independent terms assumption.
- (2) The independent terms assumption is that the transaction was entered into on the terms on which it would have been entered into between knowledgeable and willing parties dealing at arm's length.
- (3) This section is subject to section 445 (disapplication of this section where Part 4 of TIOPA 2010 applies).
- (4) Subsection (1) does not apply to debits arising from the acquisition of rights under a loan relationship if those rights are acquired for less than market value.
- (5) In a case where the related transaction is a transaction within section 336(2) or part of a series of transactions within 336(3) (group transactions), subsection (1) does not apply if-
- (a) section 340 (group transfers and transfers of insurance business: transfer at notional carrying value) applies as a result of that transaction or, as the case may be, that series of transactions, or
  - (b) section 340 would so apply apart from section 341 (transferor using fair value accounting).
- (6) Subsection (1) does not apply to exchange gains or losses (but see sections 447 to 452).

### 1.36.1 *Disapplication of s.444 where Part 4 TIOPA 2010 applies*

Section 445 CTA 2009 provides:

- (1) Section 444 does not apply, and Part 4 of TIOPA 2010 (provision not at arm's length) applies instead, to credits or debits in respect of amounts which-
- (a) fall to be adjusted for tax purposes under that Part, or
  - (b) are within that Part without falling to be so adjusted (see subsection (3)).
- (2) Subsection (1) applies despite section 464 (amounts brought into account under this Part excluded from being otherwise brought into account), but is subject to-
- (a) section 340(7) (disapplication of Part 4 of TIOPA 2010 where group member replaces another as party to loan), and
  - (b) section 447(5) (disapplication of that Part for exchange gains and losses).

- (3) For the purposes of subsection (1), an amount is within Part 4 of TIOPA 2010<sup>6</sup> without falling to be adjusted under it in a case where-
- (a) the condition in section 147(1)(a) of TIOPA 2010 is met,
  - (aa) the participation condition is met (see subsection (3A)), and
  - (b) the actual provision does not differ from the arm's length provision.
- (3A) Section 148 of TIOPA 2010 (when the participation condition is met) applies for the purposes of subsection (3)(aa) as it applies for the purposes of section 147(1)(b) of TIOPA 2010.
- (4) For the way in which this Part applies where adjustments are made under Part 4 of TIOPA 2010, see section 446.
- (5) In this section "the actual provision" and "the arm's length provision" have the same meaning as in Part 4 of TIOPA 2010 (see sections 149 and 151 of that Act).

### **1.37 Bringing into account adjustments made under Part 4 of TIOPA 2010**

Section 446 CTA 2009 provides:

- (1) This section deals with the credits and debits which are to be brought into account for the purposes of this Part as a result of Part 4 of TIOPA 2010 (provision not at arm's length) applying in relation to a company's loan relationships or related transactions.
- (2) Subsection (3) applies if under Part 4 of TIOPA 2010 an amount ("the imputed amount") is treated as an amount of profits or losses arising to a company from any of its loan relationships or related transactions.
- (3) Credits or debits relating to the imputed amount are to be brought into account for the purposes of this Part to the same extent as they would be in the case of an actual amount of such profits or losses.
- (4) Subsection (5) applies if under Part 4 of TIOPA 2010 an amount is treated as interest payable under any of a company's loan relationships.
- (5) Credits or debits relating to that amount are to be brought into account for the purposes of this Part to the same extent as they would be in the case of an actual amount of such interest.
- (6) Subsection (7) applies if under Part 4 of TIOPA 2010 an amount is treated as expenses incurred by a company under or for the purposes of any of its loan relationships or related transactions.
- (7) Debits relating to the amount are to be brought into account for the purposes of this Part to the same extent as they would be in the case of

an actual amount of such expenses.

(8) No credit is to be brought into account for the purposes of this Part to the extent that it corresponds to an amount which, as a result of the preceding provisions of this section, has not previously been brought into account as a debit.

### **1.38 Non-market loans**

Section 446A CTA 2009 provides:

- (1) This section applies as respects any accounting period if-
  - (a) a company has a debtor relationship in the period,
  - (b) the amount recognised in the company's accounts in respect of the debt at the time the company became party to the debtor relationship was less than the transaction price,
  - (c) credits in respect of the whole or part of the discount were not brought into account for the purposes of this Part, and
  - (d) in a case where the creditor is a company, the non-qualifying territory condition is met.
- (2) The debits which are to be brought into account for the accounting period for the purposes of this Part by the debtor company in respect of the loan relationship are not to include debits relating to the relevant discount amount, to the extent that that amount is referable to the accounting period.
- (3) In this section "relevant discount amount" means-
  - (a) in a case where credits in respect of the whole of the discount were not brought into account for the purposes of this Part, an amount equal to the whole discount, and
  - (b) in a case where credits in respect of part of the discount were not brought into account for the purposes of this Part, an amount equal to that part of the discount.
- (4) The non-qualifying territory condition referred to in subsection (1)(d) is that the creditor company is-
  - (a) resident for tax purposes in a non-qualifying territory at any time in the accounting period, or
  - (b) effectively managed in a non-taxing non-qualifying territory at any such time.
- (5) In this section-

"discount" means the difference between the two amounts referred to in subsection (1)(b);

"non-qualifying territory" has the meaning given in section 173 of

TIOPA 2010;

“non-taxing non-qualifying territory” means a non-qualifying territory under whose law companies are not liable to tax by reason of domicile, residence or place of management;

“resident for tax purposes” means liable, under the law of the non-qualifying territory, to tax there by reason of domicile, residence or place of management.

### **1.39 Companies connected for an accounting period**

Section 466 CTA 2009 provides:

(1) This section and sections 467 to 471 have effect for the purposes of any provisions of this Part which apply this section (but this does not affect the application of section 1316(1) (meaning of “connected” persons) for other purposes of this Part).

(2) There is a connection between a company (“A”) and another company (“B”) for an accounting period if there is a time in the period when-

- (a) A controls B,
- (b) B controls A, or
- (c) A and B are both controlled by the same person.

(3) But A and B are not taken to be controlled by the same person just because they have been under the control of-

- (a) the Crown,
- (b) a Minister of the Crown,
- (c) a government department,
- (d) a Northern Ireland department,
- (e) a foreign sovereign power, or
- (f) an international organisation.

(4) Subsection (2) is subject to section 468 (connection between companies to be ignored in some circumstances).

(5) For a case where companies are treated as if one controlled the other, see section 383(5) (inter-partnership lending between connected company partners etc).

(6) Section 472 (meaning of “control”) applies for the purposes of this section.

### **1.40 Connections where partnerships are involved**

Section 467 CTA 2009 provides:

- (1) This section applies for the purposes of the provisions which apply section 466 (“the relevant provisions”) if-
  - (a) a trade or business is carried on by a firm, and
  - (b) the firm stands in the position of a creditor or debtor as respects a money debt.
- (2) The questions about connections specified in subsection (3) must be determined as if each of the partners in the firm separately (rather than the firm), stood in that position as respects the debt to the extent of that partner’s appropriate share.
- (3) The questions are-
  - (a) whether for the purposes of this Part there is a connection for the purposes of the relevant provisions between any two companies for an accounting period in the case of a loan relationship, and
  - (b) how far any amount is treated under this Part in any particular way as a result of there being, or not being, such a connection.
- (4) For the purposes of subsection (2), a partner’s “appropriate share” is the same share as the share in which any profit or loss for the accounting period in question would be apportioned to the partner in accordance with the firm’s profit-sharing arrangements.
- (5) The references in subsections (2) to (4) to partners do not include references to the general partner of a limited partnership which is a collective investment scheme.

## 1.41 Connection between companies to be ignored in some circumstances

Section 468 CTA 2009 provides:

- (1) In the case of a company (“the creditor”) which has a creditor relationship, any connection for an accounting period between the creditor and another company which stands in the position of a debtor as respects the debt is ignored for the purposes of the relevant provisions if the creditor is a party to the relationship in circumstances where-
  - (a) conditions A to E in section 469 (creditors who are financial traders) are met, or
  - (b) conditions A, B and C in section 471 (creditors who are insurance companies carrying on basic life assurance and general annuity business) are met.
- (2) In subsection (1) “the relevant provisions” means any provisions of this Part which apply section 466.
- (3) Subsection (4) applies if for any accounting period subsection (1) has

effect in the case of a creditor relationship of a company.

(4) Subsection (1) does not apply for determining whether there is a connection between the two companies for the purposes of so much of any of the relevant provisions or of section 467 as relates to the corresponding debtor relationship.

(5) For the purposes of this section and section 469, a company is treated as standing in the position of a debtor if it indirectly stands in that position by reference to a series of loan relationships or relevant money debts.

(6) In subsection (5) “relevant money debt” means a money debt which would be a loan relationship if a company directly stood in the position of creditor or debtor.

## **1.42 Creditors who are financial traders**

Section 469 CTA 2009 provides:

(1) This section sets out the conditions referred to in section 468(1)(a).

(2) Condition A is that the creditor disposes of or acquires assets representing creditor relationships in the course of carrying on any activities forming an integral part of a trade carried on by it in the accounting period.

(3) Condition B is that the asset representing the creditor relationship was acquired in the course of those activities.

(4) Condition C is that that asset-

(a) is listed on a recognised stock exchange at the end of that period, or

(b) is a security the redemption of which must occur within 12 months of its issue.

(5) Condition D is that there is a time in that period when assets of the same kind as the asset representing the creditor relationship are beneficially owned by persons other than the creditor.

(6) Condition E is that in that period there is not more than 3 months in total during which the equivalent of at least 30% of the assets of that kind is beneficially owned by connected companies.

(7) Section 470 supplements this section.

## **1.43 Section 469: supplementary provisions**

Section 470 CTA 2009 provides:

- (1) For the purposes of conditions D and E in section 469 assets are taken to be of the same kind if they-
  - (a) are treated as being of the same kind by the practice of any recognised stock exchange, or
  - (b) would be so treated if dealt with on such an exchange.
- (2) For the purposes of condition E in section 469 an asset is beneficially owned by a connected company if there is a connection between-
  - (a) the company which beneficially owns it, and
  - (b) a company which stands in the position of a debtor as respects the money debt by reference to which any loan relationship represented by that asset exists.
- (3) Whether there is a connection for the purposes of subsection (2) at any time in an accounting period (“the relevant time”) is determined in accordance with section 466(2), (3), (5) and (6)-
  - (a) applying the conditions in section 466(2) only at the relevant time, and
  - (b) ignoring section 468.

#### **1.44 Creditors who are insurance companies carrying on BLAGAB**

section 471 CTA 2009 provides:

- (1) This section sets out the conditions referred to section 468(1)(b)).
- (2) Condition A is that the creditor is an insurance company carrying on basic life assurance and general annuity business in the accounting period.
- (3) Condition B is that the asset representing the creditor relationship is matched for that period to a BLAGAB liability.
- (4) Condition C is that conditions C, D and E in section 469 are met in relation to that asset.

#### **1.45 Meaning of “control”**

Section 472 CTA 2009 provides:

- (1) This section has effect for the purposes of any provisions of this Part which apply this section (but this does not affect the application of section 1316(2) (meaning of “control”) for other purposes of this Part).
- (2) For those purposes “control”, in relation to a company, means the power of a person to secure that the affairs of the company are conducted in accordance with the person’s wishes-

- (a) by means of the holding of shares or the possession of voting power in or in relation to the company or any other company, or
  - (b) as a result of any powers conferred by the articles of association or other document regulating the company or any other company.
- (3) Trading shares held by a company and any voting power or other powers arising from such shares are ignored for the purposes of this section.
- (4) For the purposes of subsection (3) shares held by a company are trading shares if-
- (a) a profit on a sale of the shares would be treated as a trading receipt of a trade carried on by the company, and
  - (b) the shares are not assets held by an insurance company for the purposes of its long-term business.
- (5) Subsection (6) applies in the case of any firm to which section 1259 (calculation of firm's profits and losses) applies.
- (6) For any accounting period of the firm, property, rights or powers held or exercisable for its purposes are treated for the purposes of this section as if-
- (a) the property, rights or powers had been apportioned between, and were held or exercisable by, the partners severally, and
  - (b) the apportionment had been in the same shares as those in which the profit or loss of the period would be apportioned between the partners in accordance with the firm's profit-sharing arrangements.
- (7) In subsection (6) the references to partners do not include references to the general partner of a limited partnership which is a collective investment scheme.

## 1.46 Meaning of “major interest”

Section 473 CTA 2009 provides:

- (1) In this Part [Part 5, Loan Relationships] references to a company (“A”) having a major interest in another company (“B”) are to be read as follows.
- (2) A has a major interest in B at any time if at that time-
  - (a) A and one other person (“C”), taken together, have control of B, and
  - (b) A and C each have interests, rights and powers representing at least 40% of the holdings, rights and powers as a result of which

- A and C are taken to have control of B.
- (3) The reference in subsection (2)(b) to interests, rights and powers does not include interests, rights or powers arising from shares held by a company if-
- (a) a profit on a sale of the shares would be treated as a trading receipt of a trade carried on by the company, and
  - (b) the shares are not assets held by an insurance company for the purposes of its long-term business.
- (4) Section 474 makes provision about how this section operates where connected companies or partnerships are involved.
- (5) For the purposes of this section and section 474, a company (“D”) is connected with another company (“E”) if-
- (a) D controls E,
  - (b) E controls D, or
  - (c) D and E are both controlled by the same company.
- (6) Section 472 (meaning of “control”) applies for the purposes of this section and section 474.
- (7) If two or more persons taken together have the power mentioned in section 472(2) (as read with the other provisions of section 472) as respects the affairs of a company (“B”), they are taken for the purposes of subsection (2)(a) to have control of B.

## 1.47 Treatment of connected companies and partnerships for section 473

Section 474 CTA 2009 provides:

- (1) For the purposes of section 473(2), all the interests, rights and powers of any company connected with another company are attributed to the other company before determining any question-
- (a) whether two persons taken together have control of a company at any time, or
  - (b) whether a person has at any time interests, rights and powers representing at least 40% of the holdings, rights and powers in respect of a company.
- (2) If section 1259 (calculation of firm’s profits and losses) applies, any property, rights or powers held or exercisable for the purposes of the firm are treated for the purposes of section 473, as respects any time in an accounting period of the firm, on the basis of the assumptions in subsection (3).
- (3) The assumptions are that-
- (a) the property, rights or powers had been apportioned between,

- and were held or exercisable by, the partners in the firm severally, and
- (b) the apportionment was in the same shares as those in which the profit or loss of the accounting period would be apportioned between the partners under the firm's profit-sharing arrangements.
- (4) Subsection (5) applies if-
- (a) a trade or business is carried on by a firm, and
- (b) the firm stands in the position of a creditor or debtor as respects a money debt.
- (5) The questions in subsection (6) are to be determined as if each of the partners in the firm separately, instead of the firm, stood in the position of a creditor or, as the case may be, a debtor as respects the money debt to the extent of that partner's appropriate share (see subsection (8)).
- (6) The questions are-
- (a) whether a company has a major interest in another company for an accounting period in the case of a loan relationship, or
- (b) how far any amount is treated under this Part in any particular way as a result of a company having or, as the case may be, not having such a major interest.
- (7) The references to partners in subsections (3) and (5) do not include a reference to the general partner of a limited partnership which is a collective investment scheme.
- (8) For the purposes of subsection (5), a partner's "appropriate share" is the same share as the partner's share under the firm's profit-sharing arrangements of any profit or loss calculated in accordance with section 1259 for the accounting period in question.

## 1.48 Meaning of expressions relating to exchange gains and losses

Section 475 CTA 2009 provides:

- (1) References In this Part [Part 5, Loan Relationships] to exchange gains or exchange losses, in relation to a company, are references respectively to-
- (a) profits or gains which arise as a result of comparing at different times the expression in one currency of the whole or some part of the valuation put by the company in another currency on an asset or liability of the company, or
- (b) losses which so arise.
- (2) If the result of such a comparison is that neither an exchange gain

nor an exchange loss arises, for the purposes of this Part an exchange gain of nil is taken to arise in the case of that comparison.

(3) The Treasury may make provision by regulations as to the way in which exchange gains or losses are to be calculated for the purposes of this section ...].

(4) The regulations may be made so as to apply to periods of account beginning before the regulations are made, but not earlier than the beginning of the calendar year in which they are made.

(5) Any reference In this Part [Part 5, Loan Relationships] to an exchange gain or loss from a loan relationship of a company is a reference to an exchange gain or loss arising to a company in relation to an asset or liability representing a loan relationship of the company.
