|---------------------------------|------------------------------------|
| 1.1 Scope of this book          | 1.4 Judicial delay                 |
| 1.2 A statute-focussed approach | 1.5 The future                     |
| 1.3 The year 2020/21 in review  | 1.6 Thanks ...and request for help |

## 1.1 *Scope of this book*

There are three themes to this book:

- (1) Taxation of foreign domiciliaries
- (2) Taxation of non-residents on UK assets
- (3) Taxation of UK residents on foreign assets

To attempt to cover these topics comprehensively is ambitious, perhaps quixotic. This book is in danger of bursting, because one cannot address the first topic without the second and third, and these territorial issues can only be fully understood in a wider context: in taxation, as in life, everything is connected. Thus what started as a short book on foreign domiciliaries has become a work which seeks to address all territorial limits to UK taxation, and I discuss in the round other topics which often arise in this context, such as tax avoidance, and disclosure and compliance.

## 1.2 *A statute-focussed approach*

I set out statutory and other material verbatim:

... in the end we must always return to the words of the statute<sup>1</sup>

Returning to the verbatim text, it is surprising how often one finds that the words do not say what one expects.

This is not just a common law approach. Richard Hyland tells this story of his class at Université Paris II Panthéon-Assas:<sup>2</sup>

---

1 *RFC 2012 Plc v AG* [2017] UKSC 4 (the *Rangers* case) at [11]; see [App 4.7.1](#) (A judicial gloss).

2 Hyland. *Gifts: A study in comparative law*, 1<sup>st</sup> ed (1989) p.xvi.

Mme Gobert asked simply: *L'article 2 du Code civil, qu'est-ce qu'il dit?* Article 2 of the Civil Code, what does it say?

My classmates were some of the best private law students in France. This was a question to which they knew the answer. One of the explained that article 2 provides for the nonretroactivity of the law. Mme Gobert looked at the student without smiling. Then she repeated the question. *L'article 2 du Code civil, qu'est-ce qu'il dit?* A different student mentioned Paul Roubier's suggestion that a new law may be applied to *les situations juridique en cours*. Again she repeated the question. *L'article 2 du Code civil, qu'est-ce qu'il dit?* Another student tried, and then another, each new voice attempting yet a more refined statement of the concepts involved. After each comment she responded in the same way. It was my first French law class, so I did not know what to think. It seemed like a Zen-like version of the Socratic method. The French students were terrified. This was material they thought they knew, and yet they could not guess what was on her mind. Finally, one of the students had the presence of mind simply to read the code provision aloud. Mme Gobert's eyes lit up. *Mais bien sûr!* she responded *C'est ça qu'il dit!*

### 1.3 The year 2021/22 in review

OTS stated in 2017:

The UK tax code is widely cited as being the longest in the world".<sup>3</sup>

This claim had been made at least since 2010.<sup>4</sup> In recent years Parliament added:<sup>5</sup>

---

3 It is hard to empirically assess the claim that the UK has the longest tax code in the world, and OTS makes no attempt to do so. But if any readers are aware of other serious contenders for that title, I would be interested to hear.

4 For older references see the Introduction to the 2016/17 edition of this work.

5 Finance Act page counts are a rough proxy for the ever growing complexity of the UK tax system, but not an altogether bad one. A (slightly) better proxy would also consider secondary legislation and HMRC guidance; and, perhaps, case law; then the page counts would multiply the Finance Act numbers set out here tenfold. For a discussion of the multidimensional concept of tax complexity, see Tran-Nam and Evans, "Towards the Development of a Tax System Complexity Index" (2014) *Fiscal Studies* Vol 35 p.341.

OTS have published two (somewhat simplistic) discussions of tax complexity: *Length of Tax Legislation as a Measure of Complexity* (Apr 2012)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/193496/ots\\_length\\_legislation\\_paper.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/193496/ots_length_legislation_paper.pdf)

<b>Finance Act(s)</b>	<b>Pages</b>		
2012	703 (a record)	2017	813 (a new record) <sup>6</sup>
2013	648	2018	196
2014	663	2019	328
2015	562 (2 Finance Acts)	2020	186 <sup>7</sup>
2016	649	2021	374

OTS estimated HMRC guidance at 90,000 pages in 2018;<sup>8</sup> whatever the true figure, it has no doubt grown since then. This guidance was “not comprehensive” - something of an understatement; but according to the OTS “real life cannot be reduced to a neat description in a few (?) pages of writing”.<sup>9</sup>

OTS has not achieved any perceptible improvement, at least in relation to the topics covered in this book.<sup>10</sup>

---

OTS Complexity Index (2012)

[http://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/193493/ots\\_complexity\\_index\\_methodology\\_paper.pdf](http://www.gov.uk/government/uploads/system/uploads/attachment_data/file/193493/ots_complexity_index_methodology_paper.pdf)

6 This is the combined length of the two FAs 2017.

7 The unusually short length of the FA 2020 is due to the December 2019 election.

8 OTS, “Guidance for taxpayers: a vision for the future” (2018) para 1.21. These pages have assuredly not been printed or counted. Quantification raises methodological issues which deserve a short essay to itself. We have reached the stage where even the amount of HMRC guidance is impossible to quantify: the words are uncountable. Within the limits of guesswork, and assuming 500 words per page (single spacing), the figure of 90,000 pages seems to me to be on the low side. There are 150 HMRC Manuals, just for a start.

Perhaps the focus of enquiry should be whether HMRC guidance is too short, because 90,000 pages would not be sufficient to do justice to the topic. The legislation, measured by pages of the Orange & Yellow tax handbooks, can be counted and amounts to some 20,000 pages in 2020/21 (that does not include DTAs, which would be another 3,000 pages). The Tax Cases exceed 80 volumes and do not cover VAT.

9 Para 1.24.

10 See eg IFS, “OTS: Looking Back and Looking Forward” TLRC Discussion Paper No. 11 (2014) tactfully referring to “insufficient buy-in to the simplification process by HMRC, HM Treasury and government”. But this view is not held by OTS: see Sherwood, Evans and Tran-Nam “The Office of Tax Simplification - The Way Forward?” [2017] BTR 249.

[http://www.ifs.org.uk/uploads/publications/TLRC/TLRC\\_OTL\\_DP\\_11.pdf](http://www.ifs.org.uk/uploads/publications/TLRC/TLRC_OTL_DP_11.pdf)

In (I think) 2013 the government came up with the slogan “Creating a simpler, fairer tax system” under which OTS now operates; which imagines away a troubling reality in which simplicity and fairness are competing values which require hard choices.

<https://www.gov.uk/government/policies/creating-a-simpler-fairer-tax-system>

It is easier to *talk* of simplification:

Our system remains too complicated ... We will therefore simplify the tax system.<sup>11</sup>

The reader may think that satirists better identify the reality:

We will further complicate the UK tax system so that large companies can no longer find loopholes.<sup>12</sup>

The task of dealing with the effect of Brexit has begun: a decade will not suffice for this, and this area of law will continue to be a state of flux for the foreseeable future.

Scotland continues its fiscal drift from the UK, with Northern Ireland and Wales following.

FA 2022 changes relevant to this work include:

- A new code for disclosure of uncertain tax treatment by large business; I discuss here its possible impact for other taxpayers

Important cases plodding their way through the appeal system include:

- *Embiricos v HMRC* on closure notices in domicile appeals
- A clutch of ToA cases: *Fisher*, *Rialas*, *Davies*, *Hoey*

The TLRC have brought out a paper on judicial delay,<sup>13</sup> which I described in the last edition as “the most worrying development to those who care about the administration of justice”. One might, perhaps, hope to see improvements.

#### 1.4 *The future*

The Registration of Overseas Entities Act (promised for 2021, but now, who knows?) will set up a beneficial ownership register of overseas entities that own UK property.

2023 is to see a rise in CT from 19% to 25% and a return of the complexities of small profits relief.

We face an extended period of change and uncertainty, in politics,

---

11 Conservative party manifesto 2017 p.14

<https://s3.eu-west-2.amazonaws.com/manifesto2017/Manifesto2017.pdf>

Perhaps the mask has been put aside. OOTLAR 2008 had 45 references to simplification, but OOTLAR 2021 has none.

12 Official Monster Raving Loony Party Manifesto 2017

<https://www.loonyparty.com/2017-general-election-manifesto>

13 The tax tribunals: the next ten years (2021) <https://ifs.org.uk/publications/15554>

economics, public health, law and taxation, and will continue to live in fiscally exciting times.

### 1.5 *Thanks ...and request for help*

I am very grateful to my colleagues in chambers, especially Robert Venables QC, Philip Simpson QC and Rory Mullen QC, for discussions on many aspects of tax. Abhaya Ganashree as research assistant resolved many puzzles. I owe a great debt to Jane Hunt and Ruth Shaw who work committedly on this text throughout the year.

Comments from readers and professional clients continue to be of the greatest value and interest to the author.

The pleasure in writing this book consists in the interest of the questions which it raises, and the success which it may have achieved in answering them. On the basis of what is known at 30 April 2022, it seeks to state the law for 2022/23.

## OBTAINING FURTHER ADVICE - AND DISCLAIMER

### *Further advice*

If you want advice on which you are legally entitled to rely you can obtain it - but not from this work.

In particular, you may instruct the author to advise. I enjoy writing, but spend most of my time giving independent specialist professional advice in private client matters, especially areas covered in this work. For further details see <https://www.kessler.co.uk>

### *TFD Online*

TFD Online is an online version of this book and more. It can be used:

- (1) to search the text of this book or to access it online.
- (2) to see if the book has been updated
- (3) to correct or contribute to the book

TFD Online is moderated by Ross Birkbeck, a member of Tax Chambers, 15 Old Square, Lincoln's Inn.

TFD Online is accessible on <https://www.foreigndomiciliaries.co.uk>  
An authorisation code for a 3 week trial period is in the inside cover of volume 1.

### *Disclaimer*

The Professional Bodies issue the *Professional Conduct in Relation to Taxation* with a disclaimer:

While every care has been taken in the preparation of this guidance<sup>1</sup> the PCRT Bodies do not undertake a duty of care or otherwise (?) for any loss or damage occasioned by reliance on this guidance. Practical guidance cannot and should not be taken to substitute appropriate legal advice.<sup>2</sup>

---

1 PCRT is not in fact guidance: it is mandatory.

2 *Professional Conduct in Relation to Taxation* (2019), Forward.

<https://www.tax.org.uk/professional-standards/professional-rules/professional-conduct-relation-taxation>

The second sentence is an improvement on the common form that guidance on legal

When that appeared in 2011 it seemed extraordinary. But nowadays no professional body issues guidance without a disclaimer.<sup>3</sup> Similarly, and *a fortiori*, the views expressed in this book are put forward for consideration only and are not to be relied upon. Neither the author nor the publisher accept responsibility for any loss to any person arising as a result of any action or omission in reliance on this work. But could anyone have thought that a claim might arise in absence of this disclaimer?

*A note to the lay reader*

This book is not intended as a self-help guide, and is addressed to tax practitioners. In earlier editions I said: "... but it is readable for a lay person." I think that is still true, though the text is more daunting than when I first wrote those words, because the law has become much more complicated. However, initiation in these matters must often be by the taxpayer. If you wish to research this subject in depth, and so take more control of your own tax affairs, read on. But for implementation you will need to find professionals to advise you. Self-help guides extol "the benefit of bypassing expensive lawyers"; but the bypass may prove the more expensive route in the long run.

## CONTENTS AT A GLANCE

*The chapters are organised thematically as follows:*

### **Volume 1**

*Introduction and What's New*

*Obtaining further advice and disclaimer*

#### ***Non-dom policy & avoidance***

1. Foreign Domicile: Tax Policy
2. Tax Avoidance

#### ***Domicile & residence***

3. Domicile
4. Deemed Domicile
5. Residence of Individuals
6. Residence of Trustees
7. Residence of Companies
8. Treaty-Residence
9. Split Years: Arrival and Departure
10. Temporary Non-residence
11. Exit Taxes
12. UK Arrival or Departure: Tax Checklist

#### ***Income tax: Principles & remittance basis***

13. Income Categories
14. Income Recognition: Received /Entitled/Arise/Paid

### **Volume 2**

15. Source/RFI/Territorial Principles
16. The Remittance Basis
17. The Meaning of Remittance
18. Remittance Reliefs
19. Mixed Funds

#### ***Income by category***

20. Trading Income
21. Trading in Land
22. Performers
23. Property Income
24. Deduction of Interest from Property Income
25. Interest Income
26. Exempt Interest of Non-Residents
27. Accrued Income Profits

- 28. Deeply Discounted Securities
- 29. Dividend Income
- 30. Annual Payments
- 31. Intellectual Property Income

**Volume 3**

- 32. Misc Sweep-Up Income
- 33. Employment Income
- 34. Travel Expenses: Employment Income
- 35. PAYE
- 36. Employment Income: DT Relief
- 37. Pension and Annuity Income

***IT: general***

- 38. Discretionary Trusts: Income Tax
- 39. IIP Trusts: Income Tax
- 40. Rates of Income Tax: CGT
- 41. Personal Allowances
- 42. Non-Resident Income Tax Relief
- 43. National Insurance Contributions

***IT avoidance codes***

- 44. Settlor-Interested Trust Code
- 45. Transfer of Assets Abroad: Introduction
- 46. Transfer of Assets Abroad: Transferors
- 47. Transfer of Assets Abroad: Benefits
- 48. Transfer of Assets Abroad: Relief From Overlapping Charges

**Volume 4**

- 49. Transfer of Assets Abroad: Motive Defence
- 50. Profit Fragmentation
- 51. Transfer of Income Stream
- 52. Transactions in Securities

***Capital Gains Tax***

- 53. Chargeable Gains
- 54. UK Property held by Non-residents
- 55. Residential Property: CGT
- 56. Gains of Non-resident Settlor-interested Trust: s.86
- 57. Capital Payments from Non-resident Trusts: s.87
- 58. Borrowing by Non-resident Trusts: Sch 4B
- 59. Sub-funds
- 60. Gains of Non-resident Companies
- 61. Capital Losses

***Funds***

- 62. Life Policies and Contracts
- 63. Offshore Funds: Definitions

- 64. Offshore Income Gains
- 65. Income from Offshore Funds
- 66. Unit Trusts
- 67. Intermediated Securities
- 68. Investment Manager Exemptions
- 69. Investment Management Fees & Carried Interest

***Inheritance Tax***

- 70. IHT Terms and Concepts
- 71. Excluded Property: Definition
- 72. Excluded Property Exemptions

**Volume 6**

- 73. Wills and IOVs
- 74. Reservation of Benefit
- 75. Inter-trust Transfers: IHT
- 76. IHT Deduction for Debts
- 77. IHT Close-company Code
- 78. IHT Residential Property Code
- 79. Family Home and Chattels: Benefit in Kind Charges
- 80. Pe-owned Assets
- 81. Loans from Non-resident Companies

***Entities***

- 82. Partnerships
- 83. Partnership Income Attribution
- 84. Estates of Deceased Persons: CGT
- 85. Estates of Deceased Persons: Income Tax
- 86. Foreign Entities
- 87. Hybrid Entities

***Concepts & topics affecting more than one tax***

- 88. Protected Trusts
- 89. Non-dom/Non-resident Spouse
- 90. Joint Accounts
- 91. Foreign Currency Issues
- 92. Unremittable Assets
- 93. ATED and SDLT
- 94. Who is the Settlor
- 95. Multiple Settlers
- 96. Statutory Tax Indemnities
- 97. Situs of Assets for IHT
- 98. Situs of Assets for CGT
- 99. Control, Connected, Close and Related Expressions
- 100. Participation and % Interest Tests
- 101. Permanent Establishment and Branch/Agency

102. Post-Brexit EU Law

***Double Taxation Agreements: IT/CGT***

103. Double Taxation Arrangements: Introduction

104. DTA Anti-Abuse Rules

105. Limitation on Benefits

106. Credit for Foreign Tax

107. Non-discrimination

***Double Taxation Agreements: IHT***

108. IHT Double Taxation Treaties: Introduction

109. IHT DTAs: India, Pakistan, Italy, France

110. IHT DTA: Netherlands

111. IHT DTA: South Africa

112. IHT DTA: Switzerland

113. IHT DTA: USA

114. Credit for Foreign IHT

***Administration***

115. Reporting and Compliance

116. Tax Return Filing Position

117. Claims

118. Collection of Tax from UK Representatives

119. Reporting and Compliance: IHT

120. Penalties

121. Common Reporting Standard

122. Trust Registration

123. Reporting Offshore Trusts

124. International Movement of Capital: Reports

125. Money Laundering

***Appendices***

***Words & Concepts***

Appendix 1: Words of Dispute

Appendix 2: Common Legal Expressions

Appendix 3: Family Terminology

Appendix 4: Consideration, Arm's Length, Full Value

Appendix 5: Commercial/View to Profit

Appendix 6: What Do We Mean by "Real"?

Appendix 7: Deeming Provisions

***Special Taxpayers***

Appendix 8: Parliamentarians

Appendix 9: Visiting Forces

Appendix 10: Students and Teachers

***Tax reform***

Appendix 11: How to Improve Residence and Domicile Taxation

Appendix 12: Reform of Offshore Anti-avoidance Law

Appendix 13: The Wisdom of Parliament

Index

## **CHAPTER 1**

### **Foreign Domicile: Tax Policy**

Introduction . . . . .	1.1
Tax competition . . . . .	1.2
Fairness . . . . .	1.3
Domicile as fiscal test: Critique . . . . .	1.4
Non-dom tax reform . . . . .	1.5
Non-dom tax reform history . . . . .	1.6
Approach to assessment of reform . . . . .	1.7
2008 reform: Assessment . . . . .	1.8
2017 domicile reform: Assessment . . . . .	1.9
The promise of stability . . . . .	1.10
State of UK tax reform . . . . .	1.11
The future . . . . .	1.12

## **CHAPTER 2**

### **Tax Avoidance**

Tax avoidance: Introduction . . . . .	2.1
Avoidance/mitigation, evasion . . . . .	2.2
Politics of tax avoidance . . . . .	2.3
Need for analysis . . . . .	2.4
Tax avoidance and morality . . . . .	2.5
Tax gap . . . . .	2.6

Avoidance legislation 1955 critique . . . . .	2.7
The Rule of Law . . . . .	2.8
Retrospective tax legislation . . . . .	2.9
TAAR/unallowable purpose test . . . . .	2.10
“Main” purpose . . . . .	2.11
“Tax advantage”. . . . .	2.12
Naming and shaming . . . . .	2.13
EU tax haven blacklist . . . . .	2.14
Avoidance: Multinationals. . . . .	2.15

## **CHAPTER 3**

### **Domicile**

Domicile: Introduction. . . . .	3.1
Concepts of domicile . . . . .	3.2
Only one domicile . . . . .	3.3
Domicile of origin . . . . .	3.4
Domicile of choice. . . . .	3.5
Domicile-residence requirement . . . . .	3.6
Permanent/indefinite residence . . . . .	3.7
Remaining non-dom: UK resident . . . . .	3.8
Acquisition of foreign domicile. . . . .	3.9
Abandoning domicile of choice. . . . .	3.10
Dual residence and domicile . . . . .	3.11
Statements of domicile. . . . .	3.12
Domicile of choice: Illness . . . . .	3.13
Citizenship and domicile . . . . .	3.14
Refugee/illegal immigrant/temporary visa. . . . .	3.15
Married women . . . . .	3.16
Child’s domicile: England . . . . .	3.17
Child’s domicile: Scotland. . . . .	3.18
Adoption. . . . .	3.19
No mental capacity. . . . .	3.20
Domicile territory/country . . . . .	3.21
HMRC domicile ruling . . . . .	3.22
HMRC investigations. . . . .	3.23
Domicile of company. . . . .	3.24
Domicile: Adviser’s duty to client. . . . .	3.25

## **CHAPTER 4**

### **Deemed Domicile**

Deemed domicile: Introduction . . . . .	4.1
Deemed domicile: Outline . . . . .	4.2
Scope of deemed-domicile. . . . .	4.3

IT/CGT deemed-domicile . . . . .	4.4
Counting split years . . . . .	4.5
IHT 3-year rule. . . . .	4.6
Formerly-domiciled resident: IHT . . . . .	4.7
IHT 15-year rule. . . . .	4.8
Start/end date uncertainty . . . . .	4.9
Children . . . . .	4.10
Commencement . . . . .	4.11
Deemed domicile: Planning . . . . .	4.12
Spouse-election domicile . . . . .	4.13
Channel Islands/IoM Domicile . . . . .	4.14
International comparisons . . . . .	4.15

## **CHAPTER 5**

### **Residence of Individuals**

Concepts of residence . . . . .	5.1
History and guidance . . . . .	5.2
Scope of SRT . . . . .	5.3
Outline of SRT . . . . .	5.4
Automatic overseas tests . . . . .	5.5
Overseas test 1: < 16 UK days . . . . .	5.6
Overseas test 2: 3 years non-resident . . . . .	5.7
Overseas test 3: Overseas work . . . . .	5.8
“Automatic” UK tests . . . . .	5.9
UK test 1: 183 UK days . . . . .	5.10
UK test 2: UK home . . . . .	5.11
UK test 2: Examples . . . . .	5.12
UK test 3: UK work . . . . .	5.13
Sufficient ties test. . . . .	5.14
Days spent in UK . . . . .	5.15
Transit days . . . . .	5.16
Exceptional circumstances . . . . .	5.17
COVID . . . . .	5.18
Deeming rule (frequent visits) . . . . .	5.19
“Home” . . . . .	5.20
“Work” . . . . .	5.21
Where is work done . . . . .	5.22
Reference period: Non-work days . . . . .	5.23
“Significant break from work” . . . . .	5.24
Minor definitions . . . . .	5.25
UK ties . . . . .	5.26
Family tie . . . . .	5.27
Accommodation tie . . . . .	5.28

Work tie . . . . .	5.29
90-day tie . . . . .	5.30
Country tie . . . . .	5.31
Year of death . . . . .	5.32
International transport workers . . . . .	5.33
Coronavirus worker relief . . . . .	5.34
Ascertaining pre-2013 residence . . . . .	5.35
Record keeping. . . . .	5.36
Arrival/departure: Disclosure. . . . .	5.37
Ordinary residence . . . . .	5.38
SRT/pre-2013 law compared . . . . .	5.39
Tax motivated non-residence . . . . .	5.40
Resident of nowhere. . . . .	5.41
SRT: Critique. . . . .	5.42
Future of SRT. . . . .	5.43
Scottish/Welsh taxpayers. . . . .	5.44

## **CHAPTER 6**

### **Residence of Trustees**

Trustees and residence: Introduction . . . . .	6.1
Who are the trustees. . . . .	6.2
Trustees a distinct person. . . . .	6.3
Trust residence for IT/CGT . . . . .	6.4
Trustees all UK resident . . . . .	6.5
Mixed-resident trustees . . . . .	6.6
Residence condition C . . . . .	6.7
Individual trustee/split year . . . . .	6.8
Accidental residence: A trap . . . . .	6.9
Separate sub-fund trustees . . . . .	6.10
Transfer between settlements. . . . .	6.11
PE-residence rule . . . . .	6.12
When is there a UK PE . . . . .	6.13
Fixed place of business PE . . . . .	6.14
Agency PE . . . . .	6.15
Individual trustee: Branch/agency . . . . .	6.16
PE-residence rule guidelines . . . . .	6.17
Protectors and trust residence . . . . .	6.18
Trust residence for IHT . . . . .	6.19
Trust residence: Critique . . . . .	6.20

## **CHAPTER 7**

### **Residence of Companies**

Introduction . . . . .	7.1
------------------------	-----

History of corporate residence . . . . .	7.2
The incorporation rule . . . . .	7.3
Business cessation/winding up . . . . .	7.4
Pre-1988 companies . . . . .	7.5
Central management/control test . . . . .	7.6
Control: company law background . . . . .	7.7
CMC: top level control . . . . .	7.8
CMC a question of fact . . . . .	7.9
Board meetings. . . . .	7.10
Some UK directors. . . . .	7.11
Parent/subsidiary relationship . . . . .	7.12
Period of enquiry . . . . .	7.13
Covid & company residence . . . . .	7.14
CMC: Summary . . . . .	7.15
Dual residence . . . . .	7.16
HMRC practice/clearance . . . . .	7.17
CMC/trade income source compared. . . . .	7.18
DTA company residence rule . . . . .	7.19
Open-ended investment company . . . . .	7.20
Societas Europea/SCE . . . . .	7.21
1981 law reform proposal . . . . .	7.22
Company resident nowhere . . . . .	7.23
Loss importation . . . . .	7.24

## **CHAPTER 8**

### **Treaty-Residence**

Treaty-residence: Introduction. . . . .	8.1
Treaty/UK-law residence . . . . .	8.2
Residence under art. 4.1 . . . . .	8.3
Treaty-person . . . . .	8.4
“Liable to tax” . . . . .	8.5
Liable to tax: Causation requirement. . . . .	8.6
State/subdivision/local authority . . . . .	8.7
Exception where source tax only . . . . .	8.8
Residence change during year . . . . .	8.9
Tie-breaker tests. . . . .	8.10
Tie-breaker tests: Individuals. . . . .	8.11
Permanent home. . . . .	8.12
Centre of vital interests . . . . .	8.13
Habitual abode . . . . .	8.14
Nationality/mutual agreement . . . . .	8.15
Period of enquiry: Tie-breaker. . . . .	8.16
Tie-breaker: Entities. . . . .	8.17

Tie-breaker: Mutual agreement . . . . .	8.18
POEM tie-breaker . . . . .	8.19
POEM: Critique . . . . .	8.20
Treaty-residence: Trusts. . . . .	8.21
Treaty-residence: Partnerships. . . . .	8.22
Partnership: Non-OECD Model DTAs . . . . .	8.23
Treaty-residence: Pension fund . . . . .	8.24
RIC/REIT/REMIC . . . . .	8.25
USA/UK DTA . . . . .	8.26
Tax exempt organisations . . . . .	8.27
S Corporation . . . . .	8.28
Treaty-residence: Non-OECD DTA . . . . .	8.29
Proof of treaty-resident status . . . . .	8.30
Covid and treaty-residence. . . . .	8.31

## **CHAPTER 9**

### **Split Years: Arrival and Departure**

Residence throughout tax year. . . . .	9.1
Split year rules . . . . .	9.2
Split year reliefs . . . . .	9.3
Definition of “split year” . . . . .	9.4
Definitions for split-year rules. . . . .	9.5
Case 1: Start work overseas . . . . .	9.6
Case 2: Partner starts work overseas . . . . .	9.7
Case 3: Cease to have UK home . . . . .	9.8
Case 4: Start to have UK home only . . . . .	9.9
Case 5: Start work in UK. . . . .	9.10
Case 6: Stop work overseas . . . . .	9.11
Case 7: Partner stops work overseas . . . . .	9.12
Case 8: Start to have UK home . . . . .	9.13
Priority between Cases. . . . .	9.14
Split year of trustees and PRs . . . . .	9.15
Split-year rules: Critique . . . . .	9.16

## **CHAPTER 10**

### **Temporary Non-residence**

Temporary non-residence: Introduction. . . . .	10.1
Purpose of TNR rules. . . . .	10.2
Terminology. . . . .	10.3
“Temporarily non-resident” . . . . .	10.4
Examples . . . . .	10.5
Residence before 2013/14 . . . . .	10.6
TNR gain/loss . . . . .	10.7

Post-departure acquisition . . . . .	10.8
DTA override: Gains . . . . .	10.9
TNR: BAD relief claim . . . . .	10.10
TNR s.86/s.87 interaction . . . . .	10.11
TNR dividends regime . . . . .	10.12
TNR dividends: Terminology . . . . .	10.13
Foreign dividend/distribution . . . . .	10.14
TNR dividend/distribution . . . . .	10.15
Non-resident IT relief . . . . .	10.16
DTA override: UK dividend . . . . .	10.17
Post-departure trade profits . . . . .	10.18
TNR: Life policies . . . . .	10.19
TNR: Offshore funds . . . . .	10.20
Pre-departure income . . . . .	10.21
Pre-departure gains . . . . .	10.22
Planning . . . . .	10.23
TNR rules: Critique . . . . .	10.24

## **CHAPTER 11**

### **Exit Taxes**

Exit taxes: Introduction . . . . .	11.1
Hold-over clawback: Emigration of individual . . . . .	11.2
Clawback of EIS relief . . . . .	11.3
Charge on emigration of trust . . . . .	11.4
Trustees liable for exit charge . . . . .	11.5
Treaty-emigration of trust . . . . .	11.6
Payment by instalments . . . . .	11.7
Emigration of trader . . . . .	11.8
EU restriction on exit taxes . . . . .	11.9
Council Resolution on exit taxation . . . . .	11.10
Exit taxes: DTAs . . . . .	11.11

## **CHAPTER 12**

### **UK Arrival or Departure: Tax Checklist**

Pre-arrival planning . . . . .	12.1
Pre-UK domicile planning . . . . .	12.2
Departure planning . . . . .	12.3

## **CHAPTER 13**

### **Income Categories**

Income categories: Introduction . . . . .	13.1
Income categories . . . . .	13.2
Categorisation overlaps . . . . .	13.3

**CHAPTER 14****Income Recognition: Received/Entitled/Arise/Paid**

Vocabulary of income recognition . . . . .	14.1
Paradigm contexts . . . . .	14.2
Recognition/attribution: Analysis . . . . .	14.3
Glosses and paraphrases . . . . .	14.4
When is interest recognised . . . . .	14.5
Receipt by nominee/trustee . . . . .	14.6
Income recognition: Breach of trust . . . . .	14.7
Income recognition: DTA terms . . . . .	14.8
Income/gains/profits. . . . .	14.9

**CHAPTER 15****Source/RFI/Territorial Principles**

Source/RFI: Introduction . . . . .	15.1
Source: IT territorial limit . . . . .	15.2
Approach to locating source . . . . .	15.3
Do sources have a location? . . . . .	15.4
Formal/substantive source rules. . . . .	15.5
Income without source: Deemed source . . . . .	15.6
Source of gains. . . . .	15.7
Non-UK cases on source . . . . .	15.8
Relevant foreign income . . . . .	15.9
RFI collection costs . . . . .	15.10
General territorial principle . . . . .	15.11
Territorial principle: Application. . . . .	15.12

**CHAPTER 16****The Remittance Basis**

Remittance basis: Introduction. . . . .	16.1
History of remittance basis . . . . .	16.2
HMRC guidance. . . . .	16.3
“Foreign income and gains”. . . . .	16.4
Income/capital in remittance basis. . . . .	16.5
Remittance basis: Who qualifies . . . . .	16.6
Remittance basis claim: s.809B . . . . .	16.7
Remittance basis claim: Procedure . . . . .	16.8
Sub-£2k taxpayer: s.809D . . . . .	16.9
Non-taxpayer: s.809E. . . . .	16.10
Time of foreign domicile . . . . .	16.11
Remittance basis claim charge. . . . .	16.12
Charge on remitted RFI . . . . .	16.13
Charge on remitted gains . . . . .	16.14

Remittance after income/gains arise . . . . .	16.15
Remittance when UK domiciled . . . . .	16.16
Arising basis taxpayer remittance . . . . .	16.17
Remittance when non-resident. . . . .	16.18
Remittance after death . . . . .	16.19
Remittance after source ceased . . . . .	16.20
RFI/gains of non-resident, remitted when resident . . . . .	16.21
RFI from Ireland. . . . .	16.22
Remittance basis for trustees: Pre-2007 transitional rules. . . . .	16.23
Forward tax agreements . . . . .	16.24
Remittance compliance/enquiry. . . . .	16.25
Tax return: Unremitted RFI/gains . . . . .	16.26
Divorce of remittance basis user . . . . .	16.27

## **CHAPTER 17**

### **The Meaning of Remittance**

ITA remittance basis: Introduction . . . . .	17.1
Relevant person: Introduction . . . . .	17.2
Relevant person: Family . . . . .	17.3
Relevant person: Companies . . . . .	17.4
Relevant person: Trusts . . . . .	17.5
Body connected with trust . . . . .	17.6
Company relevant person: Examples. . . . .	17.7
Relevant person: Partnership . . . . .	17.8
Relevant person: Pre-2008 income/gain . . . . .	17.9
Relevant person: Compliance . . . . .	17.10
Relevant person: Critique . . . . .	17.11
Remittance condition A: UK link . . . . .	17.12
Service provided in UK . . . . .	17.13
Condition B: Link to income/gain . . . . .	17.14
Property is the income or gains . . . . .	17.15
Derived property . . . . .	17.16
Bank errors . . . . .	17.17
Relevant debt rule . . . . .	17.18
Relevant debt . . . . .	17.19
Debt “related” to property (debt-related asset) . . . . .	17.20
“Use in respect of” debt . . . . .	17.21
Use as security for debt . . . . .	17.22
Becoming/ceasing to be relevant person: Conditions A & B . . . . .	17.23
Debt becomes/ceases to be relevant debt. . . . .	17.24
Role of remittance conditions C/D . . . . .	17.25
Remittance condition C (gift recipient) . . . . .	17.26
Examples of condition C . . . . .	17.27

Condition C transitional rule: Pre-2008 income/gains . . . . .	17.28
Condition D: Connected operation . . . . .	17.29
Examples of condition D . . . . .	17.30
Condition D transitional rule: Pre-2008 income/gains . . . . .	17.31
Amount remitted . . . . .	17.32
Gain on disposal at undervalue . . . . .	17.33
Purchase of family home . . . . .	17.34
School fees . . . . .	17.35
Remittance before income/gains arise . . . . .	17.36
Partnerships . . . . .	17.37
Proceeds of divorce settlement . . . . .	17.38
Debit, credit and charge cards . . . . .	17.39
Gift to charity . . . . .	17.40
Transitional: Pre-2008 property . . . . .	17.41
Transitional loan relief: Pre-2008 loans . . . . .	17.42
Remittance basis planning . . . . .	17.43
Reform . . . . .	17.44

## **CHAPTER 18**

### **Remittance Reliefs**

Remittance reliefs: Introduction . . . . .	18.1
Remittance investment relief . . . . .	18.2
Relevant event . . . . .	18.3
Remittance by virtue of relevant event . . . . .	18.4
Claims . . . . .	18.5
The relief . . . . .	18.6
Investment relief TAAR . . . . .	18.7
Investment fails to proceed . . . . .	18.8
“Qualifying investment” . . . . .	18.9
Condition A: Trading co/group . . . . .	18.10
Condition B: No benefit . . . . .	18.11
Clawback remittance charge . . . . .	18.12
Potentially chargeable event . . . . .	18.13
Extraction of value rule . . . . .	18.14
“Appropriate mitigation steps” . . . . .	18.15
“Taken offshore” or “re-invested” . . . . .	18.16
“Disposal proceeds” . . . . .	18.17
Grace period . . . . .	18.18
Effect of mitigation steps . . . . .	18.19
Pooling investments in co/group . . . . .	18.20
Investment from mixed fund . . . . .	18.21
Clearance . . . . .	18.22

Investment relief: Critique . . . . .	18.23
Relief on paying remittance charge . . . . .	18.24
Foreign services relief . . . . .	18.25
Services condn A: non-UK property . . . . .	18.26
Services condn B: Payment to foreign bank . . . . .	18.27
Services relief: s.730/s.87 benefit . . . . .	18.28
Exempt property . . . . .	18.29
Exempt property code: Definitions . . . . .	18.30
Public access rule . . . . .	18.31
Personal use rule . . . . .	18.32
Repair rule . . . . .	18.33
Repair conditions . . . . .	18.34
Repair premises . . . . .	18.35
Temporary importation rule . . . . .	18.36
Countable day . . . . .	18.37
Small remittance rule . . . . .	18.38
Exempt property clawback charge . . . . .	18.39
Sales relief . . . . .	18.40

## **CHAPTER 19**

### **Mixed Funds**

Mixed funds: Introduction . . . . .	19.1
Definition of “mixed fund” . . . . .	19.2
Ingredients of mixed fund . . . . .	19.3
Onshore transfers . . . . .	19.4
Offshore transfer . . . . .	19.5
Income/gains used to pay debt . . . . .	19.6
Fund with different types of RFI . . . . .	19.7
Mixed fund held by 3rd party . . . . .	19.8
Unremitted income given to trust . . . . .	19.9
Mixed-fund TAAR . . . . .	19.10
Cleansing mixed funds . . . . .	19.11
Para 44 cleansing relief . . . . .	19.12
Para 45 cleansing relief . . . . .	19.13
Loss in mixed fund . . . . .	19.14
Pre-2008 mixed fund . . . . .	19.15
Pre-2008 mixed fund rules . . . . .	19.16
Pre-2008 mixed funds: examples . . . . .	19.17
Nominated income/gain remitted . . . . .	19.18
Nominated income: Critique . . . . .	19.19
Mixed funds: Critique . . . . .	19.20

**CHAPTER 20****Trading Income**

Trading income: Introduction . . . . .	20.1
Charge on trading income . . . . .	20.2
Profession/vocation . . . . .	20.3
IT territorial limit: Trading . . . . .	20.4
CT territorial limit: Trading . . . . .	20.5
Where is trading income source . . . . .	20.6
Place where contract made . . . . .	20.7
Place-of-contract test rejected . . . . .	20.8
Where profits in substance arise . . . . .	20.9
Preparatory/auxiliary activities . . . . .	20.10
Buying from UK sellers . . . . .	20.11
Buying/selling to UK purchasers . . . . .	20.12
Services . . . . .	20.13
Construction/engineering work . . . . .	20.14
Manufacturing . . . . .	20.15
Use of UK commodity markets . . . . .	20.16
Hire of chattels . . . . .	20.17
Research division/shop windows . . . . .	20.18
Where is contract made? . . . . .	20.19
Trade partly in UK: Apportionment . . . . .	20.20
Post-cessation receipts . . . . .	20.21
DT relief: trading income . . . . .	20.22
Independent personal services . . . . .	20.23

**CHAPTER 21****Trading in Land**

Trading in land: Introduction . . . . .	21.1
What is trading in land . . . . .	21.2
Dealing/developing UK land . . . . .	21.3
Land-dealing TAAR . . . . .	21.4
Transactions in land: Introduction . . . . .	21.5
Direct disposal of land . . . . .	21.6
TiL person . . . . .	21.7
TiL gateway conditions . . . . .	21.8
Definitions . . . . .	21.9
Indirect disposal of land . . . . .	21.10
TiL trade . . . . .	21.11
Chargeable person/company . . . . .	21.12
Fragmentation . . . . .	21.13
Calculation of gain . . . . .	21.14
TiL TAAR . . . . .	21.15

Pre-development gain . . . . .	21.16
Private residence . . . . .	21.17
Tracing value . . . . .	21.18
Indirect arrangements . . . . .	21.19
“Another person” . . . . .	21.20
“Arrangement” . . . . .	21.21
“Disposal” . . . . .	21.22
Definitions . . . . .	21.23
Notification and assessment . . . . .	21.24

## **CHAPTER 22**

### **Performers**

Entertainers and sportspeople . . . . .	22.1
Definitions . . . . .	22.2
Charge independent of withholding tax . . . . .	22.3
Deemed UK trade . . . . .	22.4
Connected payment/transfer . . . . .	22.5
Activity otherwise taxable . . . . .	22.6
Payment to third parties . . . . .	22.7
Notional trade profits computation . . . . .	22.8
Trading loss . . . . .	22.9
Withholding tax . . . . .	22.10
Arrangements with HMRC . . . . .	22.11
Chains of payments . . . . .	22.12
Position of payor . . . . .	22.13
Administration . . . . .	22.14
DT Relief . . . . .	22.15

## **CHAPTER 23**

### **Property Income**

Property income: Introduction . . . . .	23.1
Property business terminology . . . . .	23.2
Territorial limits: Property income . . . . .	23.3
Non-resident co: Transitional rules . . . . .	23.4
Quantum of property income . . . . .	23.5
Overseas property business: Loss . . . . .	23.6
Property/trade income overlap . . . . .	23.7
DT relief: Property income . . . . .	23.8
Non-resident landlord scheme . . . . .	23.9
Non-resident landlord . . . . .	23.10
Definitions . . . . .	23.11
Prescribed persons . . . . .	23.12
Tax computation: Agent . . . . .	23.13

Tax computation: Tenant . . . . .	23.14
Returns and administration . . . . .	23.15
Gross payment of property income . . . . .	23.16
Credit for withholding tax . . . . .	23.17
Agent indemnity . . . . .	23.18

**CHAPTER 24**

**Deduction of Interest from Property Income**

Deduction of interest . . . . .	24.1
Basis for deduction . . . . .	24.2
Capital expenditure . . . . .	24.3
Wholly and exclusively . . . . .	24.4
Tax relief schemes . . . . .	24.5
Transfer pricing/thin capitalisation . . . . .	24.6
“The basic pre-condition” . . . . .	24.7
Participation condition . . . . .	24.8
The general rule . . . . .	24.9
“Provision otherwise made” . . . . .	24.10
Securities (loans) . . . . .	24.11
Definitions . . . . .	24.12
Potential advantage for UK tax . . . . .	24.13
SME exemption . . . . .	24.14
Election into transfer pricing . . . . .	24.15
Non-qualifying territory resident . . . . .	24.16
Qualifying territory . . . . .	24.17

**CHAPTER 25**

**Interest Income**

Interest: Introduction . . . . .	25.1
Definition of interest . . . . .	25.2
Discount . . . . .	25.3
Premium . . . . .	25.4
Deemed interest . . . . .	25.5
Part payment: Interest or principal . . . . .	25.6
Interest: Charge to tax . . . . .	25.7
Interest: Location of source . . . . .	25.8
The situs approach . . . . .	25.9
Rejection of situs approach . . . . .	25.10
Modern case law . . . . .	25.11
Relevant factors . . . . .	25.12
Weighing up factors . . . . .	25.13
Source of interest: Conclusion . . . . .	25.14
Building society income . . . . .	25.15

Co-operative & community benefit society income . . . . .	25.16
Non-resident's interest: Outline . . . . .	25.17
Withholding taxes: Introduction . . . . .	25.18
Interest withholding tax . . . . .	25.19
To whom is interest paid . . . . .	25.20
Usual place of abode . . . . .	25.21
Withholding tax: Exceptions . . . . .	25.22
Excepted payment . . . . .	25.23
Disguised interest . . . . .	25.24
Loan or credit transaction . . . . .	25.25
DT relief: Interest income . . . . .	25.26
Interest: Pre-1963 DTAs . . . . .	25.27
DT relief: Withholding tax . . . . .	25.28
Obtaining a DTRR notice . . . . .	25.29
DTT Passport scheme . . . . .	25.30
DTTP scheme: Guarantors . . . . .	25.31
DTTP scheme: Application process . . . . .	25.32
No notice to pay gross . . . . .	25.33
Grossing-up: Not interest . . . . .	25.34
Failure to withhold . . . . .	25.35
Claim procedure: Critique . . . . .	25.36

## **CHAPTER 26**

### **Exempt Interest of Non-Residents**

Exempt interest: Introduction . . . . .	26.1
“FOTRA securities” . . . . .	26.2
Interest withholding tax . . . . .	26.3
FOTRA exemption . . . . .	26.4
Beneficial ownership . . . . .	26.5
FOTRA securities: Trust . . . . .	26.6
FOTRA exemption and DT relief . . . . .	26.7
Exempt foreign currency securities . . . . .	26.8
International organisation: Security . . . . .	26.9

## **CHAPTER 27**

### **Accrued Income Profits**

Accrued income profits . . . . .	27.1
AIP securities . . . . .	27.2
“Transfer” . . . . .	27.3
Transfer “with accrued interest” . . . . .	27.4
Deemed interest/credit/debit . . . . .	27.5
Accrued income profits and losses . . . . .	27.6
Charge on AIP income . . . . .	27.7

Accrued income loss relief . . . . .	27.8
AIP remittance basis . . . . .	27.9
Excluded persons . . . . .	27.10
AIP arising to non-resident . . . . .	27.11
Trusts . . . . .	27.12
Settlor-interested trusts . . . . .	27.13
ToA rules/AIP income . . . . .	27.14
AIP: Protected-trust reliefs. . . . .	27.15
DT relief: AIP income . . . . .	27.16
AIP/CGT interaction . . . . .	27.17
Foreign currency securities . . . . .	27.18

**CHAPTER 28**

**Deeply Discounted Securities**

DDS code . . . . .	28.1
“Deeply discounted security”. . . . .	28.2
“Issued” . . . . .	28.3
Foreign currency security. . . . .	28.4
Excluded occasions of redemption . . . . .	28.5
Securities outside DDS code . . . . .	28.6
Excluded indexed security . . . . .	28.7
“Disposal” . . . . .	28.8
“Profit”. . . . .	28.9
Charge to tax on DDS income . . . . .	28.10
DDS remittance basis. . . . .	28.11
UK resident trust . . . . .	28.12
Non-resident individual . . . . .	28.13
Non-resident trust. . . . .	28.14
Transfer of assets abroad . . . . .	28.15
Non-resident company . . . . .	28.16
Interaction with CGT . . . . .	28.17
DDS/CGT compared . . . . .	28.18

**CHAPTER 29**

**Dividend Income**

Dividends and distributions . . . . .	29.1
UK dividend regime. . . . .	29.2
Offshore dividend regime . . . . .	29.3
Non-resident recipient . . . . .	29.4
Receipt from non-resident co: Income/capital. . . . .	29.5
Winding-up TAAR. . . . .	29.6
Distribution to non-shareholder . . . . .	29.7
DT relief: Dividend income. . . . .	29.8

Dividend nil rate/DTA interaction . . . . .	29.9
---	------

## **CHAPTER 30**

### **Annual Payments**

Annual Payments: Introduction . . . . .	30.1
Charge on income . . . . .	30.2
Annual Payment: Meaning . . . . .	30.3
Post-cessation trading receipt . . . . .	30.4
Charge on Annual Payments . . . . .	30.5
Annual Payment exemption . . . . .	30.6
Commercial Annual Payment . . . . .	30.7
Non-taxable consideration . . . . .	30.8
Foreign maintenance payments . . . . .	30.9
Annual-Payment withholding tax . . . . .	30.10
Relief for payor within WHT . . . . .	30.11
Annual Payment from RFI . . . . .	30.12
Annual Payments: Critique . . . . .	30.13

## **CHAPTER 31**

### **Intellectual Property Income**

IP income: Introduction . . . . .	31.1
IP: Terminology . . . . .	31.2
Types of IP income . . . . .	31.3
Charge on non-trade IP income . . . . .	31.4
IP income: Income/capital . . . . .	31.5
Deductible expenditure . . . . .	31.6
Source of non-trade IP income . . . . .	31.7
Trade IP income . . . . .	31.8
IP/AP WHT: Introduction . . . . .	31.9
IP WHT conditions A&B . . . . .	31.10
Application of IP WHT . . . . .	31.11
IP WHT: DT relief . . . . .	31.12
IP WHT: Treaty override . . . . .	31.13
Professional authors . . . . .	31.14
Films and sound recordings . . . . .	31.15
DT relief: Royalties . . . . .	31.16
Offshore receipts from IP . . . . .	31.17
ORIP charge . . . . .	31.18
Residence . . . . .	31.19
UK-derived amount . . . . .	31.20
Apportionment . . . . .	31.21
De minimis rule . . . . .	31.22
“Intangible property” . . . . .	31.23

Exemptions . . . . .	31.24
UK sales below £10m . . . . .	31.25
Company in specified territory . . . . .	31.26
Business undertaken within territory of residence . . . . .	31.27
Foreign tax at least half of UK tax . . . . .	31.28
Opaque partnership taxable in full treaty territory . . . . .	31.29
Body corporate transparent in full treaty territory . . . . .	31.30
Double taxation on control group . . . . .	31.31
Collection from control group . . . . .	31.32
Offshore IP receipts: TAAR . . . . .	31.33
Interaction with other provisions . . . . .	31.34
ORIP appeals . . . . .	31.35
Definitions . . . . .	31.36

## **CHAPTER 32**

### **Mis Sweep-up Income**

Misc Sweep-up Income . . . . .	32.1
Types of Misc Sweep-up Income . . . . .	32.2
General principles . . . . .	32.3
Disposal of asset . . . . .	32.4
Services . . . . .	32.5
Income from finance . . . . .	32.6
Futures and options . . . . .	32.7
Swaps . . . . .	32.8
Income from assets . . . . .	32.9
Restraint of trade . . . . .	32.10
US economic impact payments . . . . .	32.11
Sweep-up income: Computation . . . . .	32.12
Sweep-up income: Remittance basis . . . . .	32.13
Misc Sweep-up Income: Source . . . . .	32.14
DT relief: "Other Income" . . . . .	32.15

## **CHAPTER 33**

### **Employment Income**

Employment income: Introduction . . . . .	33.1
Employment income Parts . . . . .	33.2
Employment/employer/employee . . . . .	33.3
Employment income/earnings . . . . .	33.4
Charge on employment income . . . . .	33.5
Amount charged to tax . . . . .	33.6
"Taxable earnings" . . . . .	33.7
Earnings for year/from employment/received . . . . .	33.8
Earnings "for" tax year . . . . .	33.9

Pre/post-employment earnings . . . . .	33.10
UK resident/dom employee . . . . .	33.11
COE remittance basis . . . . .	33.12
Chargeable overseas earnings . . . . .	33.13
Foreign employer . . . . .	33.14
Incidental duties in UK . . . . .	33.15
Dual contract arrangements . . . . .	33.16
Dual-contract rule . . . . .	33.17
Dual contract outside s.24A rule . . . . .	33.18
Dual-contract apportionment . . . . .	33.19
Split year . . . . .	33.20
Overseas workday relief . . . . .	33.21
OWR mixed funds . . . . .	33.22
OWR: Qualifying account . . . . .	33.23
OWR mixed fund rule . . . . .	33.24
Two or more employments . . . . .	33.25
Salary paid into 2 accounts . . . . .	33.26
The deposit rule . . . . .	33.27
Non-resident employee . . . . .	33.28
Where are duties performed . . . . .	33.29
Earnings “in respect of” UK duties . . . . .	33.30
Remitting after year earnings are for . . . . .	33.31
Remittance after employment . . . . .	33.32
Earnings “for” year employee is non-resident . . . . .	33.33
Remittance when non-resident . . . . .	33.34
Receipt/remittance after death . . . . .	33.35
Earnings from Ireland . . . . .	33.36
Termination payments . . . . .	33.37
Relocation expenses . . . . .	33.38
Overseas Crown employment . . . . .	33.39
Seafarers . . . . .	33.40
Lower-paid employee exemption . . . . .	33.41
Tax equalisation . . . . .	33.42
Accountancy services benefit . . . . .	33.43

## **CHAPTER 34**

### **Travel Expenses: Employment Income**

Introduction . . . . .	34.1
“Workplace” . . . . .	34.2
“Permanent” workplace . . . . .	34.3
“Temporary” workplace . . . . .	34.4
Period of continuous work . . . . .	34.5
Minor workplace changes . . . . .	34.6

Workplace a base . . . . .	34.7
Deduction rule . . . . .	34.8
Ordinary commuting . . . . .	34.9
Private travel . . . . .	34.10
What is the journey? . . . . .	34.11
Workplace an area . . . . .	34.12
Remittance basis taxpayer . . . . .	34.13
Travel in performance of duties . . . . .	34.14
Wholly and exclusively . . . . .	34.15
Conferences and seminars . . . . .	34.16

## **CHAPTER 35**

### **PAYE**

PAYE: Introduction . . . . .	35.1
Relevant payment. . . . .	35.2
Employment/employer/employee . . . . .	35.3
Duty to deduct PAYE. . . . .	35.4
Employee works for non-employer . . . . .	35.5
PAYE clearance: s.690 direction . . . . .	35.6
Leaving UK: PAYE . . . . .	35.7
PAYE if no personal allowance. . . . .	35.8
PAYE repayment not remittance . . . . .	35.9
International employee schemes . . . . .	35.10
DTA relief: PAYE NT code. . . . .	35.11
PAYE 60-day rule: EP App 8 . . . . .	35.12
PAYE exemption: EP App 4 . . . . .	35.13
Foreign tax credit: EP App 5 . . . . .	35.14
Tax equalisation: EP App 6 . . . . .	35.15
NIC arrangements . . . . .	35.16

## **CHAPTER 36**

### **Employment Income: DT Relief**

DT employment reliefs . . . . .	36.1
Employment income DT relief. . . . .	36.2
Salary/wages/remuneration . . . . .	36.3
Pay for work when employed. . . . .	36.4
Where is employment exercised . . . . .	36.5
Short-term Business Visitors . . . . .	36.6
STBV payment condition (b). . . . .	36.7
Who pays remuneration . . . . .	36.8
Labour-hire arrangement . . . . .	36.9
DTA 60-day rule . . . . .	36.10
Labour-hire: Avoidance motive . . . . .	36.11

STBV payment condition (c): PE . . . . .	36.12
STBV condition a: 183-day rule . . . . .	36.13
Employer foreign PE of UK co . . . . .	36.14
Employer a partnership . . . . .	36.15
Deemed employment/non-employment . . . . .	36.16
Share options . . . . .	36.17
DT claims & procedure . . . . .	36.18
DT relief: Directors . . . . .	36.19
DT relief: Government service . . . . .	36.20

## **CHAPTER 37**

### **Pension and Annuity Income**

Pensions & annuities: Introduction . . . . .	37.1
Pension income of split year . . . . .	37.2
Types of pension scheme . . . . .	37.3
s.569 UK pension . . . . .	37.4
Foreign pension . . . . .	37.5
Employment-related pension . . . . .	37.6
Commonwealth pension . . . . .	37.7
DT relief: Pension income . . . . .	37.8
Australia/UK DTA . . . . .	37.9
USA/UK DTA: Pension income . . . . .	37.10
Income of pension fund . . . . .	37.11
Transfer between schemes . . . . .	37.12
Relief for pension contribution . . . . .	37.13
Cross border contribution relief . . . . .	37.14
Canadian RRSP and RRIF . . . . .	37.15
Annuity income: Introduction . . . . .	37.16
Annuity terminology . . . . .	37.17
Purchased life annuity: Charge . . . . .	37.18

## **CHAPTER 38**

### **Discretionary Trusts: Income Tax**

Discretionary trusts: Introduction . . . . .	38.1
Tier 1: Trustees: trust income charge . . . . .	38.2
Tier 3: Discretionary payment charge . . . . .	38.3
Beneficiaries tax credit . . . . .	38.4
Tier 2: Trust withholding tax . . . . .	38.5
Trustees tax pool credit . . . . .	38.6
Examples . . . . .	38.7
Trust payment: Income/capital . . . . .	38.8
Discretionary trust transparency: Beneficiary reliefs . . . . .	38.9
ESC B18: Non-resident trust . . . . .	38.10

s.629 income: Settlor's child . . . . .	38.11
UK trust, non-resident beneficiary: DT relief . . . . .	38.12
Dual-resident trustees. . . . .	38.13

## **CHAPTER 39**

### **IIP Trusts: Income Tax**

Introduction and terminology. . . . .	39.1
Taxation of IIP trustees . . . . .	39.2
Taxation of life tenant . . . . .	39.3
Beneficiary's credit for trustees tax . . . . .	39.4
Trustees expenses. . . . .	39.5
Scots IT rates . . . . .	39.6
DT relief. . . . .	39.7
Baker or Garland trust jurisdiction? . . . . .	39.8

## **CHAPTER 40**

### **Rates of Income Tax: CGT**

IT Rates: Outline . . . . .	40.1
Dividend/Savings Income . . . . .	40.2
Income tax rates . . . . .	40.3
Application of different rates. . . . .	40.4
Application of savings rates. . . . .	40.5
Application of dividend rates. . . . .	40.6
Settlor-interested trust tax rate. . . . .	40.7
s.720: transferor tax rate . . . . .	40.8
CGT rates: Introduction . . . . .	40.9
CGT rates: Individuals . . . . .	40.10
CGT rates: PRs. . . . .	40.11
CGT rates: Trusts. . . . .	40.12
CGT rates: Critique . . . . .	40.13
Inflation/fiscal drag . . . . .	40.14
Corporation tax rates . . . . .	40.15

## **CHAPTER 41**

### **Personal Allowances**

Personal allowances: Introduction . . . . .	41.1
CGT annual exemption . . . . .	41.2
IT personal allowances. . . . .	41.3
Allowance in year of birth/death . . . . .	41.4
IT allowances: high earners . . . . .	41.5
Allowances: remittance basis user . . . . .	41.6
Entitlement to IT personal allowances. . . . .	41.7
Personal allowances under DTAs . . . . .	41.8
Non-residents allowances: Reform . . . . .	41.9

**CHAPTER 42****Non-Resident Income Tax Relief**

Non-residents IT relief: Introduction . . . . .	42.1
Non-resident individual/trustee relief . . . . .	42.2
Amount A: Tax deducted at source . . . . .	42.3
Amount B: Non-disregarded income/reliefs . . . . .	42.4
Trusts: UK beneficiary rule . . . . .	42.5
Disregarded income . . . . .	42.6
Disregarded savings & investment income . . . . .	42.7
Disregarded Annual Payments . . . . .	42.8
Disregarded pension/social security income . . . . .	42.9
Non-resident company IT relief . . . . .	42.10
Critique . . . . .	42.11

**CHAPTER 43****National Insurance Contributions**

NICs: Introduction . . . . .	43.1
Employment/employed/self employed . . . . .	43.2
“Secondary contributor” . . . . .	43.3
Territorial limitation: Outline . . . . .	43.4
Bilateral social security agreements . . . . .	43.5
ROW: Employed in GB . . . . .	43.6
ROW: Residence requirements . . . . .	43.7
Class 1 NIC: HMRC examples . . . . .	43.8
ROW: Class 2 NIC . . . . .	43.9
ROW: Class 3 NIC . . . . .	43.10
Place of business in UK . . . . .	43.11
Residence and ordinary residence . . . . .	43.12
EU/EEA/Switzerland . . . . .	43.13
Definitions . . . . .	43.14
Persons covered . . . . .	43.15
General rules . . . . .	43.16
Detached workers . . . . .	43.17
Forms . . . . .	43.18
Activity in 2 states: tie-breaker . . . . .	43.19
Class 4 contributions . . . . .	43.20
Partnerships . . . . .	43.21

**CHAPTER 44****Settlor-Interested Trust Code**

Settlor-interested trust code . . . . .	44.1
“Income arising under a settlement” . . . . .	44.2
Underlying company income . . . . .	44.3

Settlor-interested trust . . . . .	44.4
Settlor-interested trust: Reliefs . . . . .	44.5
Meanings of “settlor-interested” . . . . .	44.6
s.624 remittance basis . . . . .	44.7
Non-resident settlor . . . . .	44.8
Beneficiary of settlor-interested trust . . . . .	44.9
Trustees of settlor-interested trust . . . . .	44.10
Interaction of s.624/CGT . . . . .	44.11
s.624/s.720 compared. . . . .	44.12
Settlor receives capital sum . . . . .	44.13
Payment to settlor’s child. . . . .	44.14
Corporate settlor. . . . .	44.15
Tax return: s.624 income . . . . .	44.16
DT relief: s.624 income . . . . .	44.17
s.643A charge: Outline . . . . .	44.18
s.643A application conditions . . . . .	44.19
Untaxed Benefits Total . . . . .	44.20
Available Protected Income. . . . .	44.21
s.643A income charge . . . . .	44.22
s.643A remittance basis . . . . .	44.23
s.643A income matching rule . . . . .	44.24
s.643A commencement . . . . .	44.25
s.643A settlor-attribution rule: Outline . . . . .	44.26
s.643A attribution conditions. . . . .	44.27
s.643A settlor-attribution rule . . . . .	44.28
s.643A onward-gift rule . . . . .	44.29
s.643A onward-gift conditions. . . . .	44.30
s.643A misc rules. . . . .	44.31
s.643A onward-gift donee charge . . . . .	44.32
Donee not taxable: s.643A onward-giftable amount . . . . .	44.33
s.643A Onward-gift settlor-attribution rule. . . . .	44.34
Indirect gift to settlor/close family. . . . .	44.35
s.643A onward-gift remit. basis. . . . .	44.36

**CHAPTER 45**

**Transfer of Assets Abroad: Introduction**

ToA: Introduction . . . . .	45.1
Construction of ToA provisions. . . . .	45.2
“Relevant transfer”. . . . .	45.3
“Transfer” of “assets” . . . . .	45.4
“Person abroad” . . . . .	45.5
“Resident outside the UK” . . . . .	45.6
Income “payable” to person abroad . . . . .	45.7

Situs of asset transferred . . . . .	45.8
Transfer for full consideration . . . . .	45.9
Income of person abroad: Causation . . . . .	45.10
Associated operation: Definition . . . . .	45.11
Why associated operations matter . . . . .	45.12
Income received as indirect consequence of transfer . . . . .	45.13
Income of person abroad . . . . .	45.14
Capital receipts deemed income . . . . .	45.15
Income of person: Quantum. . . . .	45.16
EU-law ToA defences . . . . .	45.17
Statutory EU-law defence . . . . .	45.18
Case law EU-law defence . . . . .	45.19
Spouse of transferor . . . . .	45.20

## **CHAPTER 46**

### **Transfer of Assets Abroad: Transferors**

Transferor charge: Introduction . . . . .	46.1
Charge on transferor . . . . .	46.2
Who is the transferor . . . . .	46.3
Shareholders procure transfer . . . . .	46.4
Must transferor (intend to) avoid IT . . . . .	46.5
Condition A: Power to enjoy . . . . .	46.6
“Power to enjoy” . . . . .	46.7
Power to enjoy: Causation . . . . .	46.8
s.721 income chargeable to IT . . . . .	46.9
s.721 Cond. C: Transferor UK resident . . . . .	46.10
Amount of s.720 charge . . . . .	46.11
Transferor receives capital sum . . . . .	46.12
Capital receipt conditions . . . . .	46.13
Time extent of s.727 charge . . . . .	46.14
s.720 remittance basis . . . . .	46.15
s.720/s.624 interaction . . . . .	46.16
No indemnity for transferor . . . . .	46.17
Tax return: s.720 income . . . . .	46.18
DT relief: s.720 income . . . . .	46.19

## **CHAPTER 47**

### **Transfer of Assets Abroad: Benefits**

s.731 charge: Introduction . . . . .	47.1
s.731 charge/s.731 income . . . . .	47.2
s.731 application conditions . . . . .	47.3
Relevant transfer condition . . . . .	47.4
Benefit . . . . .	47.5

Who receives the benefit? . . . . .	47.6
Benefit in course of divorce . . . . .	47.7
Valuation of benefits . . . . .	47.8
Statutory valuation rules . . . . .	47.9
Benefit of loan . . . . .	47.10
Use of chattel . . . . .	47.11
Use of land . . . . .	47.12
Benefit causation condition . . . . .	47.13
Benefit causation: 2 transfers . . . . .	47.14
Taxable-transferor defence . . . . .	47.15
s.731 capital condition . . . . .	47.16
s.731/s.87 interaction . . . . .	47.17
Computation of s.731 income . . . . .	47.18
Deduction for s.87 charge . . . . .	47.19
“Relevant income”: Definition . . . . .	47.20
Deemed income of person abroad . . . . .	47.21
Life tenant: Relevant income . . . . .	47.22
Settlor-interested trust: Relevant income . . . . .	47.23
s.720 income: Relevant income . . . . .	47.24
Income “can” be used to benefit . . . . .	47.25
When does one ask: Timing issue . . . . .	47.26
Relevant income spent . . . . .	47.27
Income distributed as it arises . . . . .	47.28
Income distributed after it arises . . . . .	47.29
Accumulated income . . . . .	47.30
Company income distributed to trust . . . . .	47.31
Distributed income: HMRC view . . . . .	47.32
Income reinvested: Tracing . . . . .	47.33
Relevant income in mixed fund . . . . .	47.34
Income of co held by trust . . . . .	47.35
Non-beneficiary when income arises . . . . .	47.36
Avoid relevant income: Planning . . . . .	47.37
Tax of person abroad . . . . .	47.38
Section 731 remittance basis . . . . .	47.39
s.731 matching rules . . . . .	47.40
s.720/731 remittance basis compared . . . . .	47.41
“Protected Income” . . . . .	47.42
Non-resident beneficiary . . . . .	47.43
s.731 settlor-attribution: Outline . . . . .	47.44
s.731 attribution conditions . . . . .	47.45
s.731 settlor-attribution rule . . . . .	47.46
s.731 settlor-attribution remittance-basis . . . . .	47.47

s.731 onward-gifts . . . . .	47.48
s.731 onward-gift conditions . . . . .	47.49
s.731 misc rules . . . . .	47.50
s.731 onward-gift donee charge . . . . .	47.51
Donee not taxed . . . . .	47.52
s.731 onward-gift settlor-attribution rule . . . . .	47.53
Responses to s.731: Summary . . . . .	47.54
Record keeping . . . . .	47.55
Tax return: s.731 income . . . . .	47.56
DT relief: s.731 income . . . . .	47.57

**CHAPTER 48**

**Transfer of Assets Abroad: Relief From Overlapping Charges**

Overlapping ToA charges: Relief . . . . .	48.1
UK income retained in co . . . . .	48.2
Distribution relief . . . . .	48.3
Double-counting relief . . . . .	48.4
s.720 trust/co structure . . . . .	48.5
s.731 charge & income distribution . . . . .	48.6
s.720/s.731 overlap . . . . .	48.7
Benefits exceed relevant income . . . . .	48.8
Co-transferors within s.720 . . . . .	48.9
Life policies . . . . .	48.10

**CHAPTER 49**

**Transfer of Assets Abroad: Motive Defence**

Motive defence: Introduction . . . . .	49.1
Motive defence condition A . . . . .	49.2
Motive defence condition B . . . . .	49.3
Enactment history . . . . .	49.4
“Commercial”: Undefined sense . . . . .	49.5
“Commercial” in New Condition B . . . . .	49.6
Meaning of “avoidance” . . . . .	49.7
Meaning of “taxation” . . . . .	49.8
Identify and classify purpose . . . . .	49.9
Mixed tax/non-tax purposes . . . . .	49.10
Foresight/purpose distinction . . . . .	49.11
Consequence/purpose distinction . . . . .	49.12
Purpose: Adviser/agent . . . . .	49.13
Avoidance/mitigation distinction . . . . .	49.14
Failed indicia of avoidance . . . . .	49.15
Intention: parliament\government . . . . .	49.16
Finding intention of parliament . . . . .	49.17

Reduction/deferral/failed avoidance . . . . .	49.18
Practical examples: Introduction . . . . .	49.19
Trust transfer: Settlor excluded . . . . .	49.20
Foreign settlor; UK/non-UK beneficiaries. . . . .	49.21
Foreign settlor; UK beneficiaries. . . . .	49.22

2015 rebasing conditions . . . . .	54.21
2015 rebasing relief . . . . .	54.22
Elections out of 2015 rebasing. . . . .	54.23
2015/2019 rebasing conditions . . . . .	54.24
2015/2019 rebasing: the relief . . . . .	54.25
Election out of 2015/2019 rebasing . . . . .	54.26
Rebasing: Company onshoring . . . . .	54.27
Company/trust leaves UK . . . . .	54.28
Rebasing: Wasting asset. . . . .	54.29
Rebasing election procedure . . . . .	54.30
Interaction with anti-avoidance . . . . .	54.31
Hold-over relief . . . . .	54.32
Hold-over relief: Standard version. . . . .	54.33
Land-asset hold-over relief . . . . .	54.34
Land-asset: Resident transferee . . . . .	54.35
Non-resident transferee . . . . .	54.36
Unascertainable consideration. . . . .	54.37
Residential property gain . . . . .	54.38
Residential property . . . . .	54.39
Commencement . . . . .	54.40
Non-residents CG/CT: History . . . . .	54.41
Non-residents CGT/IT: Critique . . . . .	54.42

## CHAPTER 55

### Residential Property: CGT

Private residence relief. . . . .	55.1
“Residence” . . . . .	55.2
Non-residents PRR disallowance. . . . .	55.3
Residence in territory of house . . . . .	55.4

Day count test . . . . .	55.5
MPR notice . . . . .	55.6
Which is main residence . . . . .	55.7
Spouses . . . . .	55.8
MPR notice on marriage . . . . .	55.9
Periods of absence relief . . . . .	55.10
2015 transitional rules . . . . .	55.11
Residence held by trust or PRRs . . . . .	55.12
Commencement of PRR rules . . . . .	55.13

**CHAPTER 56**

**Gains of Non-resident Settlor-interested Trust: s.86**

CGT on non-resident trusts . . . . .	56.1
Section 86 charge . . . . .	56.2
Fundamental s.86 conditions . . . . .	56.3
Minor definitions . . . . .	56.4
Settlor-interested condition . . . . .	56.5
Pre-1998 protected trusts . . . . .	56.6
Qualifying settlement . . . . .	56.7
Pre-1991 protected trusts . . . . .	56.8
Trust residence condition . . . . .	56.9
Settlor residence/domicile conditions . . . . .	56.10
Section 86 trust gains condition . . . . .	56.11
Death of settlor . . . . .	56.12
Death/divorce of beneficiaries . . . . .	56.13
Attribution of s.86 gains to settlor . . . . .	56.14
Interaction of s.86 and s.3 TCGA . . . . .	56.15
Corporate settlor . . . . .	56.16
s.86/87 & BAD relief interaction . . . . .	56.17
Section 86: EU-law compliance . . . . .	56.18
Tax return: s.86 gains/non-dom status . . . . .	56.19
DT relief: s.86 gains . . . . .	56.20
Restriction on DTR for s.86 gains . . . . .	56.21

**CHAPTER 57**

**Capital Payments from Non-resident Trusts: s.87**

s.87 regime: Introduction . . . . .	57.1
“Settlement”/”settled property” . . . . .	57.2
Non-classic trust . . . . .	57.3
Non-resident trust condition . . . . .	57.4
The s.87 charge . . . . .	57.5
Section 1(3) amount . . . . .	57.6
Capital payment . . . . .	57.7

Receipt from trustees . . . . .	57.8
Capital payment to/from company . . . . .	57.9
Payment from close co: s.96(1) rule . . . . .	57.10
Payment to close co: s.96(2) rule . . . . .	57.11
Payment to non-beneficiary . . . . .	57.12
Matching . . . . .	57.13
Planning by matching . . . . .	57.14
Interest surcharge . . . . .	57.15
s.87 gains of split year . . . . .	57.16
s.87 remittance basis . . . . .	57.17
Non-resident disregards: Outline . . . . .	57.18
Non-resident disregard . . . . .	57.19
Payment to temporary non-resident . . . . .	57.20
Migrant disregard . . . . .	57.21
Final trust year . . . . .	57.22
Non-resident disregard: Critique . . . . .	57.23
Settlor-attribution: Introduction . . . . .	57.24
“Close-family” . . . . .	57.25
Settlor-attribution indemnity . . . . .	57.26
s.87 settlor-attribution rule . . . . .	57.27
Onward-gifts: Introduction . . . . .	57.28
s.87 onward-gift conditions . . . . .	57.29
s.87 onward-gift definitions . . . . .	57.30
s.87 onward-gift rule . . . . .	57.31
Onward-gift to close-family: s.87 settlor-attribution rule . . . . .	57.32
Donee remittance basis user . . . . .	57.33
Series of gifts: A to B to C . . . . .	57.34
Migrant settlement . . . . .	57.35
Dual-resident trust: s.88 TCGA . . . . .	57.36
Transfer between trusts . . . . .	57.37
Pre-1981 gain/capital payment . . . . .	57.38
Pre-1998 gain/capital payment . . . . .	57.39
s.1(3) amount at 5/4/2008 . . . . .	57.40
Pre-2008 capital payments . . . . .	57.41
Pre-2008 capital payment/trust gain, matched post 2008 . . . . .	57.42
Pre-2008 inter-trust transfer . . . . .	57.43
Pre-2008 trust immigration . . . . .	57.44
2008 rebasing election . . . . .	57.45
2008 Rebasing: The relief . . . . .	57.46
Rebasing: HMRC examples . . . . .	57.47
Rebasing: Minor rules . . . . .	57.48
Rebasing: OIG amounts . . . . .	57.49

Rebasing: Transfer between trusts . . . . .	57.50
Formerly-domiciled resident . . . . .	57.51
Non-resident trusts: CGT planning . . . . .	57.52
Trust holding company . . . . .	57.53
Basic planning for s.87. . . . .	57.54
GAAR guidance . . . . .	57.55
Record keeping. . . . .	57.56
Tax return: s.87 gain . . . . .	57.57
DT relief: s.87 gain . . . . .	57.58

**CHAPTER 58**

**Borrowing by Non-resident Trusts: Sch 4B**

Borrowing by non-resident trust . . . . .	58.1
Flip-flop schemes . . . . .	58.2
The key conditions . . . . .	58.3
Sch4B-transfer . . . . .	58.4
Settlement within section 86/87. . . . .	58.5
Trustee borrowing . . . . .	58.6
Sch4B-transfer linked with borrowing. . . . .	58.7
Normal trust purposes . . . . .	58.8
Payment for ordinary trust asset. . . . .	58.9
Repayment of loan . . . . .	58.10
Payment of expenses . . . . .	58.11
Sch4B-disposal. . . . .	58.12
Gain/loss on Sch4B-disposal . . . . .	58.13
Schedule 4C: Introduction . . . . .	58.14
Sch4C pool. . . . .	58.15
Sch4B trust gains . . . . .	58.16
Restriction on losses . . . . .	58.17
Second Sch4B-disposal . . . . .	58.18
Sch4C s.87 regime . . . . .	58.19
“Relevant settlement” . . . . .	58.20
Capital payment disregards . . . . .	58.21
Remittance basis . . . . .	58.22
Temporary non-resident. . . . .	58.23
Interest surcharge . . . . .	58.24
Residence of trustees . . . . .	58.25
Trust ends after Sch4B-disposal . . . . .	58.26
OIG sch 4C. . . . .	58.27
Definitions . . . . .	58.28
Schedule 4B/4C: Examples . . . . .	58.29
Transitional rules . . . . .	58.30
Pre-2008 sch 4C pool . . . . .	58.31

HMRC example: pre-2008 Sch 4C pool . . . . .	58.32
Critique. . . . .	58.33

## **CHAPTER 59**

### **Sub-funds**

Position outside sub-fund regime. . . . .	59.1
Sub-fund regime. . . . .	59.2
Requirements of sub-fund election . . . . .	59.3
Condition 1: No sub-subfund. . . . .	59.4
Condition 2: At least 2 sub-funds . . . . .	59.5
Condition 3: No co-ownership. . . . .	59.6
Cond. 4: Distinct beneficiaries. . . . .	59.7
Procedure for election . . . . .	59.8
Effect of sub-fund election. . . . .	59.9
Planning . . . . .	59.10
Sub-funds: Critique . . . . .	59.11

## **CHAPTER 60**

### **Gains of Non-resident Companies**

Section 3 TCGA: Introduction. . . . .	60.1
Non-resident close company . . . . .	60.2
s.3 gain attributed to participant . . . . .	60.3
Computing gains: CT rules . . . . .	60.4
Loan relationships . . . . .	60.5
Amount attributed to participant. . . . .	60.6
Identifying participants. . . . .	60.7
Overlapping participants: Trustees/beneficiaries . . . . .	60.8
Overlapping participants: Loan creditors . . . . .	60.9
HMRC examples: Shareholder/loan creditors . . . . .	60.10
Co chain: Indirect participant . . . . .	60.11
Co chain not wholly-owned . . . . .	60.12
s.3 gains of split year . . . . .	60.13
EU-law compliance . . . . .	60.14
25% minimum condition . . . . .	60.15
Loss accruing to non-resident co . . . . .	60.16
Negligible value claim . . . . .	60.17
s.3 motive defence . . . . .	60.18
Foreign trade exemption . . . . .	60.19
Economically significant activity. . . . .	60.20
Partnership holds non-resident co . . . . .	60.21
s.3 distribution relief . . . . .	60.22
Deduction relief . . . . .	60.23
Reimbursement by non-resident co . . . . .	60.24

Section 3 remittance basis .....	60.25
CG group reliefs .....	60.26
“Group” .....	60.27
“51/75/90 % subsidiary” .....	60.28
UK-group relief .....	60.29
Non-resident group relief .....	60.30
De-grouping charge .....	60.31
Reorganisation relief .....	60.32
Private residence relief .....	60.33
BAD relief: Trade group .....	60.34
Foundations .....	60.35
Pension scheme .....	60.36
Administration and appeals .....	60.37
Tax return: s.3 gain .....	60.38
DT relief: s.3 gain .....	60.39
Trust participator: No DT relief .....	60.40
Foreign tax credit relief: s.3 .....	60.41

## **CHAPTER 61**

### **Capital Losses**

Capital losses: Introduction .....	61.1
Deduction of losses .....	61.2
Loss within scope of CGT .....	61.3
Corporation tax losses .....	61.4
Computation of loss .....	61.5
Allowable loss .....	61.6
Loss of non-resident .....	61.7
Loss in split year .....	61.8
Loss on connected person disposal .....	61.9
Chattels .....	61.10
Losses used in best way .....	61.11
Losses on death .....	61.12
Loss of non-resident trust .....	61.13
Personal loss and s.87 gain .....	61.14
Personal loss and s.86 gain .....	61.15
Loss of remittance basis taxpayer .....	61.16
Foreign loss disallowed if no election .....	61.17
Effect of loss election .....	61.18
When is loss election worthwhile .....	61.19
Basic planning for losses .....	61.20
Capital-loss TAAR .....	61.21
Spouse-transfer loss .....	61.22
Loss-TAAR: Critique .....	61.23

DT relief on gain + loss . . . . .	61.24
------------------------------------	-------

**CHAPTER 62**

**Life Policies and Contracts**

Policies: Introduction . . . . .	62.1
Definitions . . . . .	62.2
The charge . . . . .	62.3
Individuals and settlors . . . . .	62.4
No remittance basis . . . . .	62.5
Non-UK period relief . . . . .	62.6
Non-UK period relief: PRs/trustees . . . . .	62.7
Pre-2013 non-UK period relief . . . . .	62.8
Liability of UK trust . . . . .	62.9
ToA: Chargeable event gains . . . . .	62.10
s.624: Chargeable event gains . . . . .	62.11
Personal representatives . . . . .	62.12
Planning for immigrant to UK . . . . .	62.13
Personal portfolio bonds . . . . .	62.14
Definition of PPB . . . . .	62.15
Whitelisted property . . . . .	62.16
Whitelisted indices . . . . .	62.17
Variation of policy . . . . .	62.18
Converting PPB into non-PPB . . . . .	62.19
Chargeable event regime: EU-law . . . . .	62.20
CGT exemption for policies . . . . .	62.21
Tax return: Chargeable event . . . . .	62.22
DT relief: Chargeable event gain . . . . .	62.23
Policy held by non-dom: IHT . . . . .	62.24

**CHAPTER 63**

**Offshore Funds: Definitions**

Offshore funds: Introduction . . . . .	63.1
Participant/participate . . . . .	63.2
“Offshore fund” . . . . .	63.3
“Mutual fund” . . . . .	63.4
Condition C: Realisation value . . . . .	63.5
Winding-up exemption . . . . .	63.6
Condition F: No fund income . . . . .	63.7
Share buy-back and share issue . . . . .	63.8
Company in liquidation . . . . .	63.9
Umbrella arrangements . . . . .	63.10
Different class of interest . . . . .	63.11
Reporting/non-reporting fund . . . . .	63.12

“Transparent fund” . . . . .	63.13
Clearance . . . . .	63.14

## **CHAPTER 64**

### **Offshore Income Gains**

Taxation of offshore funds . . . . .	64.1
Definitions . . . . .	64.2
Charge to tax on OIG . . . . .	64.3
Meaning of “disposal” . . . . .	64.4
OIG charge on death . . . . .	64.5
OIG arising to partnership . . . . .	64.6
OIG remittance basis . . . . .	64.7

OIG non-residence defence . . . . .	64.9
OIG arising to non-resident trust . . . . .	64.10
OIG anti-avoidance: Outline . . . . .	64.11
OIG ToA provisions . . . . .	64.12
OIG s.87 charge . . . . .	64.13
OIG s.3 charge . . . . .	64.14
OIG and s.86 . . . . .	64.15
Anti-avoidance rules: Interaction . . . . .	64.16
OIG s.87/ToA: Priority . . . . .	64.17
OIG s.87/ToA interaction with motive defence . . . . .	64.18
Computation of OIG . . . . .	64.19
CGT gain from offshore fund . . . . .	64.20
Losses from offshore funds . . . . .	64.21
Tax regimes priority to OIG . . . . .	64.22
Transparent fund exemption . . . . .	64.23
DT reliefs: OIG . . . . .	64.24
Reorganisations: navigation . . . . .	64.25
“Collective investment scheme” . . . . .	64.26
Usual reorganisation rules disapplied . . . . .	64.27
Exchange within same scheme . . . . .	64.28
Exchange: other scheme units . . . . .	64.29
Reconstruction: issue of units . . . . .	64.30
Reconstruction involving conversion . . . . .	64.31
Supplementary provisions . . . . .	64.32
Reorganisation TAAR . . . . .	64.33
Reorganisations: Offshore funds . . . . .	64.34

## **CHAPTER 65**

### **Income from Offshore Funds**

Introduction . . . . .	65.1
------------------------	------

Bond fund . . . . .	65.2
Deemed reporting-fund income . . . . .	65.3
Taxation of reporting-fund income . . . . .	65.4
Non-reporting fund income . . . . .	65.5
Summary . . . . .	65.6
Non-reporting fund holds reporting fund . . . . .	65.7
Fund treated as non-trading . . . . .	65.8
Non-reporting becomes reporting fund . . . . .	65.9
2009 transitional rules . . . . .	65.10

## **CHAPTER 66**

### **Unit Trusts**

Unit trusts: Introduction . . . . .	66.1
Definition of “unit trust” . . . . .	66.2
Authorised unit trust . . . . .	66.3
Income accruing to unit trust . . . . .	66.4
Unit trust CGT: Deemed company . . . . .	66.5
Umbrella schemes . . . . .	66.6
Unit trust transparent offshore fund . . . . .	66.7
Situs of unit . . . . .	66.8
Gain on disposal of unit . . . . .	66.9
Fonds commun de placement . . . . .	66.10
Irish Common Contractual Fund . . . . .	66.11

## **CHAPTER 67**

### **Intermediated Securities**

Securities law background . . . . .	67.1
Transparent/contract-based securities . . . . .	67.2
Situs of transparent intermediated security for IHT & IT . . . . .	67.3
Situs of proprietary intermediated security for CGT . . . . .	67.4
Transparent intermediated securities: CGT . . . . .	67.5
Taxation of contract-based intermediated securities . . . . .	67.6

## **CHAPTER 68**

### **Investment Manager Exemptions**

Investment manager exemptions . . . . .	68.1
IME PE relief . . . . .	68.2
IME non-resident IT relief . . . . .	68.3
IME UK-representative relief . . . . .	68.4
IME definitions . . . . .	68.5
Investment manager conditions . . . . .	68.6
Cond. A/B: Investment manager . . . . .	68.7
Cond. C: Independence test . . . . .	68.8
The 20% rule . . . . .	68.9

Cond. E: Customary remuneration . . . . .	68.10
Independent broker conditions . . . . .	68.11
Transactions through broker . . . . .	68.12
Relevance of trading to IME . . . . .	68.13
What is a financial trade? . . . . .	68.14

**CHAPTER 69**

**Investment Management Fees & Carried Interest**

Investment management fees & carried interest . . . . .	69.1
DIMF: history and guidance . . . . .	69.2
“Disguised fee” . . . . .	69.3
“Management fee” . . . . .	69.4
“Carried interest” . . . . .	69.5
Misc definitions . . . . .	69.6
DIMF: Deemed trade . . . . .	69.7
DIMF: Territorial limitation . . . . .	69.8
Who receives DIMF . . . . .	69.9
809EZDA: Connected non-company . . . . .	69.10
809EZDB: Company/unconnected person . . . . .	69.11
DIMF TAAR . . . . .	69.12
DIMF double taxation . . . . .	69.13
Carried interest: CGT . . . . .	69.14
“Permitted deductions” . . . . .	69.15
Co-investment . . . . .	69.16
Disposal of carried interest . . . . .	69.17
Carried-interest remittance basis . . . . .	69.18
Non-residents . . . . .	69.19
Other anti-avoidance rules . . . . .	69.20
Carried-interest TAAR . . . . .	69.21
Carried interest double taxation . . . . .	69.22
External investors . . . . .	69.23
Deferred carried interest . . . . .	69.24
Interest ceases to be deferred . . . . .	69.25
Income-based carried interest . . . . .	69.26
ICBI: Returning non-resident . . . . .	69.27
Returns and compliance . . . . .	69.28

**CHAPTER 70**

**IHT Terms and Concepts**

IHT terminology . . . . .	70.1
Estate . . . . .	70.2
Transfer of value/value transferred . . . . .	70.3
Disposition . . . . .	70.4

Chargeable/exempt transfer . . . . .	70.5
Qualifying interest in possession . . . . .	70.6
“Relevant property” . . . . .	70.7
Settlement commencement date. . . . .	70.8
“Associated operation” . . . . .	70.9
Why associated operations matter . . . . .	70.10
Arm’s length transaction . . . . .	70.11
Relevant operation . . . . .	70.12
Disposition by 2 operations . . . . .	70.13
Gift followed by sale: APR/BPR. . . . .	70.14

## **CHAPTER 71**

### **Excluded Property: Definition**

Excluded property: Introduction . . . . .	71.1
Non-settled foreign property . . . . .	71.2
Non-settled UK funds . . . . .	71.3
Non-settled FOTRA securities. . . . .	71.4
FOTRA exemption conditions. . . . .	71.5
English-law beneficial ownership . . . . .	71.6
Channel Islands/IoM domicile. . . . .	71.7
Trusts: Foreign property . . . . .	71.8
Income unpaid on life tenant death . . . . .	71.9
Trusts: UK funds . . . . .	71.10
Trusts: FOTRA securities . . . . .	71.11
Estate IIP trust . . . . .	71.12
Initial interest settlor/spouse . . . . .	71.13
s.80 transitional rules . . . . .	71.14
Adding property: 2020 changes. . . . .	71.15
Interest in trust property. . . . .	71.16

## **CHAPTER 72**

### **Excluded Property Exemptions**

Excluded property exemptions. . . . .	72.1
Lifetime IHT charge. . . . .	72.2
Lifetime IHT charge: Exemption. . . . .	72.3
Death: IHT charge & exemption . . . . .	72.4
IHT spouse exemption and excluded property . . . . .	72.5
Allocation of exemption. . . . .	72.6
10-year charge . . . . .	72.7
Exit charge . . . . .	72.8
Exit charge reliefs . . . . .	72.9
Termination of qualifying IIP . . . . .	72.10
Termination of IP: Reliefs . . . . .	72.11

When excluded property matters . . . . .	72.12
Foreign currency account . . . . .	72.13
Works of art . . . . .	72.14
Residence nil-rate band . . . . .	72.15
Overseas pensions . . . . .	72.16
Excluded property planning . . . . .	72.17
UK dom settlor becomes non-dom . . . . .	72.18
Planning for non-estate IIP trust . . . . .	72.19
Planning: Trust with UK dom settlor . . . . .	72.20
UK funds v foreign funds . . . . .	72.21
FOTRA securities: Planning . . . . .	72.22
Channel Islands/IoM domicile . . . . .	72.23

## **CHAPTER 73**

### **Wills and IOVs**

IHT on death: Introduction . . . . .	73.1
UK-dom testator: Non-dom beneficiaries . . . . .	73.2
Non-dom testator: UK-dom beneficiaries . . . . .	73.3
Gifts to spouse by will . . . . .	73.4
Charitable gift by will . . . . .	73.5
Instrument of variation (IOV) . . . . .	73.6
Forced heirship/légitime/Sharia . . . . .	73.7
Family Provision Act claim . . . . .	73.8

## **CHAPTER 74**

### **Reservation of Benefit**

GWR: Introduction . . . . .	74.1
Purpose of GWR . . . . .	74.2
Basic GWR conditions . . . . .	74.3
GWR terminology . . . . .	74.4
Disposal by way of gift . . . . .	74.5
Reservation of benefit . . . . .	74.6
Full consideration exemption . . . . .	74.7
IHT on disposal by way of gift . . . . .	74.8
Gift of excluded property . . . . .	74.9
GWR spouse exemption . . . . .	74.10
GWR exempt transfer reliefs . . . . .	74.11
GWR death charge . . . . .	74.12
GWR over debt owed by deceased . . . . .	74.13
Death: Non-settled excluded prop . . . . .	74.14
Death: Settled excluded property . . . . .	74.15
Gift to non-dom who creates trust . . . . .	74.16
GWR lifetime charge . . . . .	74.17

GWR on termination of IIP . . . . .	74.18
GWR on death: Spouse exemption . . . . .	74.19
Tracing gifted property . . . . .	74.20
Tracing non-settled property . . . . .	74.21
Tracing settled property . . . . .	74.22
1986 transitional relief . . . . .	74.23

## **CHAPTER 75**

### **Inter-trust Transfers: IHT**

Inter-trust transfers: Navigation . . . . .	75.1
Addition/transfer to trust . . . . .	75.2
One IHT-settlement or more . . . . .	75.3
Inter-trust transfer: IHT effect . . . . .	75.4
Separate-settlement fiction . . . . .	75.5
B adds property to A's trust . . . . .	75.6
Direct and indirect settlors . . . . .	75.7
Transfer: A's trust to B's trust . . . . .	75.8
Transfer: A's trust to A's trust . . . . .	75.9
Same-settlement fiction: s.81 . . . . .	75.10
Trust-transfer retesting . . . . .	75.11
Post-2020 transfer retesting . . . . .	75.12
s.81 transitional rules . . . . .	75.13
Pension trust . . . . .	75.14

## **CHAPTER 76**

### **IHT Deduction for Debts**

IHT deduction for debts: Introduction . . . . .	76.1
Basis of deduction for debts . . . . .	76.2
Amount of deduction for debt . . . . .	76.3
Allocation of debt . . . . .	76.4
GWR property subject to debt . . . . .	76.5
Unenforceable debt . . . . .	76.6
Time-barred debt . . . . .	76.7
Disallowed debts: Introduction . . . . .	76.8
Right to reimbursement . . . . .	76.9
Debt not for full consideration . . . . .	76.10
Section 103 FA 1986 . . . . .	76.11
Debt owed by individual to trust . . . . .	76.12
Debts to and from trusts . . . . .	76.13
Deduction for trust debt . . . . .	76.14
Estate IIP trust debt to life tenant . . . . .	76.15
Deduction for foreign taxes . . . . .	76.16
Excluded property disallowance . . . . .	76.17

“Financing” an acquisition . . . . .	76.18
Maintenance/enhancement of value . . . . .	76.19
“Indirectly” financing . . . . .	76.20
Excluded property disallowance reliefs . . . . .	76.21
Disposal of debt-financed asset . . . . .	76.22
Debt-financed asset becomes non-excluded property . . . . .	76.23
Debt exceeds excluded property . . . . .	76.24
Debt attributable to foreign account . . . . .	76.25
Excluded property disallowance: planning . . . . .	76.26
Business/agricultural property debt . . . . .	76.27
Business property debt . . . . .	76.28
Agricultural property debt . . . . .	76.29
Debt of unincorporated business . . . . .	76.30
Property qualifying for BPR/APR . . . . .	76.31
Gift of debt-financed business/agricultural property . . . . .	76.32
Part payment of mixed debt . . . . .	76.33
Payment of disallowed debt . . . . .	76.34
Debt unpaid after death . . . . .	76.35
Discharge “out of the estate” . . . . .	76.36
Commercial reason defence . . . . .	76.37
Part payment of mixed debt after death . . . . .	76.38
Interaction of s.175A disallowance/spouse exemption . . . . .	76.39
When must debt be discharged? . . . . .	76.40
The 2013 disallowances: Critique . . . . .	76.41
GAAR: Debt reduces 10 year charge . . . . .	76.42
GAAR: Debt against UK residence . . . . .	76.43
Funeral expenses . . . . .	76.44
Foreign administration expenses . . . . .	76.45

**CHAPTER 77**

**IHT Close-company Code**

Transfer of value by close co . . . . .	77.1
Close company terminology . . . . .	77.2
Individual participators . . . . .	77.3
Trustee participators . . . . .	77.4
Change in share capital/rights . . . . .	77.5
Close-co IHT: Liability . . . . .	77.6

**CHAPTER 78**

**IHT Residential Property Code**

IHT residence-property code . . . . .	78.1
De-exclusion of sch A1 property . . . . .	78.2
Residence-company . . . . .	78.3

Residence-partnership . . . . .	78.4
5% exemption . . . . .	78.5
Liabilities of Residence-company . . . . .	78.6
Relevant loans . . . . .	78.7
Relevant loan: Definition . . . . .	78.8
Deductibility of relevant loan . . . . .	78.9
Residence-security . . . . .	78.10
Residence-security: Double IHT issues . . . . .	78.11
Residence-tail . . . . .	78.12
Residence-tail Property . . . . .	78.13
Residence exit-charge relief . . . . .	78.14
Company dividend in specie . . . . .	78.15
Spouse and other exemptions . . . . .	78.16
Sch A1 TAAR . . . . .	78.17
DTA override . . . . .	78.18
“Residential property interest” . . . . .	78.19
Residence co: Share value . . . . .	78.20
Home of non-dom: Planning . . . . .	78.21
IHT residence code: Critique . . . . .	78.22

## **CHAPTER 79**

### **Family Home and Chattels: Benefit in Kind Charges**

Home/chattels owned by company . . . . .	79.1
The benefits code . . . . .	79.2
Property law background . . . . .	79.3
“Family” and “household” . . . . .	79.4
“Director” . . . . .	79.5
Shadow directors . . . . .	79.6
“Employment” & related terms . . . . .	79.7
Accommodation/benefit charge . . . . .	79.8
Personal relationship exemption . . . . .	79.9
Former employee . . . . .	79.10
Market rent . . . . .	79.11
Accommodation: The charge . . . . .	79.12
Available but not used . . . . .	79.13
Cash equivalent: Computations . . . . .	79.14
Cost of providing accommodation . . . . .	79.15
Home sub-£75k: Computation . . . . .	79.16
“Making good” . . . . .	79.17
Home over £75k: Computation . . . . .	79.18
Revaluation: Delayed occupation . . . . .	79.19
Home for more than 1 employee . . . . .	79.20
Accommodation charge: Planning . . . . .	79.21

Reimbursement solution .....	79.22
Settlor finance .....	79.23
Co-ownership of home .....	79.24
Defences to home BiK charge .....	79.25
Foreign homes relief .....	79.26
Other planning .....	79.27
BiK/general earnings: Interaction .....	79.28
Planning for home charge .....	79.29
Home BiK: HMRC enquiries .....	79.30
Home BiK: Critique .....	79.31
SDLT on accommodation charge .....	79.32
Benefit BiK charge .....	79.33
“Cash equivalent” .....	79.34
s.205 cost rule .....	79.35

Partnerships . . . . .	80.22
Non-resident individual . . . . .	80.23
UK resident non-dom. . . . .	80.24
Former non-dom. . . . .	80.25
Loan to trust . . . . .	80.26
Quantum of charge: Land. . . . .	80.27
Quantum of charge: Chattels . . . . .	80.28
Quantum: Intangible property . . . . .	80.29
Land/intangibles charge overlap . . . . .	80.30
Interaction with benefits in kind . . . . .	80.31
De minimis exemption . . . . .	80.32
POA election . . . . .	80.33
Election: Eversden scheme . . . . .	80.34
Election: Home loan scheme . . . . .	80.35
Unwinding existing structures . . . . .	80.36
Is existing scheme validly created . . . . .	80.37
Human rights . . . . .	80.38
Critique. . . . .	80.39

## CHAPTER 81

### Loans from Non-resident Companies

Loans from non-resident company. . . . .	81.1
Employment-related loan . . . . .	81.2
“Employment-related loan” . . . . .	81.3
“Employment-related” . . . . .	81.4
Official rate of interest. . . . .	81.5
Loan to participators . . . . .	81.6
Benefit to participators. . . . .	81.7
Company loans: GAAR . . . . .	81.8

## CHAPTER 82

### Partnerships

Partnerships: Introduction . . . . .	82.1
“Partnership” and “Firm”. . . . .	82.2
Nature of partnership share . . . . .	82.3
Valuation of partnership share. . . . .	82.4
Partnership law primer . . . . .	82.5
Partners. . . . .	82.6
Nominee partner. . . . .	82.7
Partnership is partner . . . . .	82.8
Service companies . . . . .	82.9
Limited partnership . . . . .	82.10
Investment partnership. . . . .	82.11

Investment partnership/co-ownership compared . . . . .	82.12
Partnership: person/body corporate . . . . .	82.13
Partnership: Body/office . . . . .	82.14
Partnership transparency: IT/CT . . . . .	82.15
Entity disregard rule. . . . .	82.16
“Trade”. . . . .	82.17
Partnership income: Remittance basis . . . . .	82.18
Partnership transparency: CGT . . . . .	82.19
Limited liability partnership . . . . .	82.20
Tax treatment of LLP. . . . .	82.21
Residence of partnership . . . . .	82.22
Partnerships: Group reliefs . . . . .	82.23
DT relief: Partnership . . . . .	82.24

**CHAPTER 83**

**Partnership Income Attribution**

Partnership income: Computation . . . . .	83.1
Partnership income: Attribution. . . . .	83.2
Mixed partnership code . . . . .	83.3
s.850C application conditions . . . . .	83.4
Condition X: Deferred profit rule . . . . .	83.5
Condition Y: Excess profit allocation rule . . . . .	83.6
Condition Y(a): Profit share excessive . . . . .	83.7
Appropriate notional profit . . . . .	83.8
Condition Y(b): Power to enjoy. . . . .	83.9
PtoE condition Y(c): PtoE is cause . . . . .	83.10
s.850C counteraction: Income reallocation . . . . .	83.11
A (transferor) not partner: s.850D . . . . .	83.12
s.850D counteraction: deemed partner . . . . .	83.13
Associated partnership. . . . .	83.14
Reliefs for B (transferee) . . . . .	83.15
Alternative investment fund manager . . . . .	83.16
Business transferred to partnership . . . . .	83.17
Takeover of LLP . . . . .	83.18
Private equity investment. . . . .	83.19
Share issue . . . . .	83.20
International aspects. . . . .	83.21
International structures. . . . .	83.22

**CHAPTER 84**

**Estates of Deceased Persons: CGT**

Succession law background . . . . .	84.1
Meaning of “PRs” for CGT . . . . .	84.2

Residence of PRs for CGT . . . . .	84.3
Acquisition by PRs . . . . .	84.4
Rebasing on death of life tenant . . . . .	84.5
Transfer from PRs to beneficiaries . . . . .	84.6
Deceased not UK resident . . . . .	84.7
Non-resident co held by non-resident PRs . . . . .	84.8
Capital payment from co in estate . . . . .	84.9
Deceased UK resident . . . . .	84.10
CGT planning for UK PRs . . . . .	84.11
CGT planning by IoV . . . . .	84.12
Succession under foreign law . . . . .	84.13

## **CHAPTER 85**

### **Estates of Deceased Persons: Income Tax**

Income taxation of estates . . . . .	85.1
Meaning of “PRs” for IT . . . . .	85.2
Residence of PRs for IT . . . . .	85.3
Income taxation of PRs . . . . .	85.4
Income from specific legacy . . . . .	85.5
Income from residuary estate . . . . .	85.6
Types of interest in residue . . . . .	85.7
“UK estate” and “foreign estate” . . . . .	85.8
Other definitions . . . . .	85.9
Charge to tax on estate income . . . . .	85.10
Estate income . . . . .	85.11
Amount of estate income . . . . .	85.12
“Basic amount of estate income” . . . . .	85.13
Assumed income entitlement . . . . .	85.14
Beneficiary a discretionary trust . . . . .	85.15
Estate income remittance basis . . . . .	85.16
Non-resident beneficiary of UK estate: DT relief . . . . .	85.17
Non-resident beneficiary of UK estate: Concessionary relief . . . . .	85.18
Time limit for claim/assessment . . . . .	85.19
HMRC practice: Conventional basis . . . . .	85.20
Tax returns & registration . . . . .	85.21
Income tax of estates: Critique . . . . .	85.22

## **CHAPTER 86**

### **Foreign Entities**

Foreign entities: Introduction . . . . .	86.1
“Transparent” and “opaque” . . . . .	86.2
Definition of “IHT-settlement” . . . . .	86.3
Definition of “company” . . . . .	86.4

Body corporate . . . . .	86.5
Bare trust/nomineeship . . . . .	86.6
US grantor trust . . . . .	86.7
Garland trusts . . . . .	86.8
Liechtenstein: Introduction . . . . .	86.9
Beneficiary rights . . . . .	86.10
Stiftung/Foundation . . . . .	86.11
Anstalt/Establishment . . . . .	86.12
Treuunternehmen/Trust Enterprise . . . . .	86.13
Treuhandshaft (trust) . . . . .	86.14
AG/GmbH/SE . . . . .	86.15
Proper liferent (Scotland) . . . . .	86.16
Legal life interest (N. Ireland) . . . . .	86.17
Usufructs . . . . .	86.18
Foreign partnership: Legal person . . . . .	86.19
German partnerships . . . . .	86.20
Offene Handelsgesellschaft . . . . .	86.21
Kommanditgesellschaft . . . . .	86.22
Stille Gesellschaft . . . . .	86.23
Société en nom collectif . . . . .	86.24
Société civile . . . . .	86.25
Société en commandite par actions . . . . .	86.26

Payer/Payee/Relevant deduction . . . . .	87.12
“Payer/payee jurisdiction” . . . . .	87.13
“Ordinary Income” . . . . .	87.14
Hybrid entity . . . . .	87.15
Chap 7 application conditions . . . . .	87.16
Chap 7 condition D: D/NI mismatch . . . . .	87.17
Chap 7 condition E . . . . .	87.18
Chap 7 counteraction: Outline . . . . .	87.19
Counteraction: Disallow deduction . . . . .	87.20
Counteraction: CT charge . . . . .	87.21
Hybrid LLP payee . . . . .	87.22
Hybrids TAAR . . . . .	87.23
Minor definitions . . . . .	87.24
“Control group” . . . . .	87.25
Partnership income . . . . .	87.26
HMRC example: LLP . . . . .	87.27
HMRC example: tax-exempt investor . . . . .	87.28
HMRC example: Reverse hybrid . . . . .	87.29
Interaction with other provisions . . . . .	87.30
The future . . . . .	87.31

## CHAPTER 88

### Protected Trusts

Protected-trust regime . . . . .	88.1
Protected trusts: Policy . . . . .	88.2
s.86 protected-trust relief . . . . .	88.3
Condition D: Tainting . . . . .	88.4
Tainting-loan rules . . . . .	88.5
Protected income: Terminology . . . . .	88.6
Protected s.624 income . . . . .	88.7

s.624 protected-trust relief . . . . .	88.8
s.629 protected-trust relief . . . . .	88.9
Protected s.720 income . . . . .	88.10
Protected s.720 trust income . . . . .	88.11
Protected s.720 company income. . . . .	88.12
s.720: Protected-trust relief . . . . .	88.13
s.727 protected-trust relief . . . . .	88.14
Protected-trust conditions: Navigation . . . . .	88.15
Protected-trusts: Commencement . . . . .	88.16
Tax return: Protected income/gains . . . . .	88.17

**CHAPTER 89**

**Non-dom/Non-resident Spouse**

Non-dom/non-resident spouse . . . . .	89.1
Restricted IHT spouse exemption . . . . .	89.2
Settlor spouse/widow: trust receipt . . . . .	89.3
Disposition for maintenance of spouse . . . . .	89.4
Transferable nil-rate band . . . . .	89.5
Residence Nil-rate Band . . . . .	89.6
Gift of BPR/APR property to spouse . . . . .	89.7
Divorce settlement . . . . .	89.8
Spouse gift: Associated operations . . . . .	89.9
Non-dom spouse: IHT planning. . . . .	89.10
CGT spouse exemption . . . . .	89.11
Non-dom spouse: CGT . . . . .	89.12
Non-dom/non-resident spouse: IT . . . . .	89.13
s.624 spouse exemption . . . . .	89.14
Gift to spouse: s.720 . . . . .	89.15
Gifts to spouse: GAAR . . . . .	89.16

**CHAPTER 90**

**Joint Accounts**

Introduction . . . . .	90.1
Property law background . . . . .	90.2
Joint account: IHT . . . . .	90.3
Trust from joint account: Who is settlor . . . . .	90.4
Scottish joint account. . . . .	90.5
Remittance from joint account. . . . .	90.6
Property held jointly by spouses . . . . .	90.7
Planning for joint account . . . . .	90.8

**CHAPTER 91**

**Foreign Currency Issues**

Foreign currency: Introduction . . . . .	91.1
--	------

CGT: Currency conversion date . . . . .	91.2
Trading and property income . . . . .	91.3
Arising basis: Conversion date . . . . .	91.4
Income converted to foreign currency . . . . .	91.5
Remittance basis: Conversion date . . . . .	91.6
Sub-£2k taxpayer: Currency conversion date . . . . .	91.7
Nominated income/gains: Currency conversion date . . . . .	91.8
Foreign tax credit: Currency conversion date . . . . .	91.9
Foreign currency bank account: CGT . . . . .	91.10
Foreign banknotes/coins . . . . .	91.11
Interaction with mixed fund rules: HMRC examples . . . . .	91.12
Foreign currency issues: Critique . . . . .	91.13

## **CHAPTER 92**

### **Unremittable Assets**

Unremittable assets: Introduction . . . . .	92.1
Unremittable asset relief . . . . .	92.2
“Unremittable” income . . . . .	92.3
The relief . . . . .	92.4
ECGD payment . . . . .	92.5
Claims . . . . .	92.6
Remittance basis claimant . . . . .	92.7
Clawback of unremittable income relief . . . . .	92.8
Position if no relief claim made . . . . .	92.9
Unremittable trading/property income . . . . .	92.10
Unremittable accrued income profits . . . . .	92.11
Interaction with anti-avoidance rules . . . . .	92.12

## **CHAPTER 93**

### **ATED and SDLT**

ATED regime . . . . .	93.1
ATED terminology . . . . .	93.2
“Chargeable interest” . . . . .	93.3
Annual tax on enveloped dwellings . . . . .	93.4
Corporate ownership condition . . . . .	93.5
Chargeable person . . . . .	93.6
Rates of ATED . . . . .	93.7
Change of ownership . . . . .	93.8
Taxable value . . . . .	93.9
Valuation for ATED . . . . .	93.10
“Chargeable period” . . . . .	93.11
“Single-dwelling interest” . . . . .	93.12
Different interests in 1 dwelling . . . . .	93.13

Interests of connected person . . . . .	93.14
Partnerships . . . . .	93.15
Tax consequences of paying ATED . . . . .	93.16
ATED reliefs . . . . .	93.17
ATED rental relief . . . . .	93.18
Non-qualifying individual . . . . .	93.19
Farmhouses . . . . .	93.20
“Chargeable”, “within the charge” . . . . .	93.21
ATED returns . . . . .	93.22
SDLT: Introduction . . . . .	93.23
Ordinary SDLT rates . . . . .	93.24
ATED-SDLT rate . . . . .	93.25
“High-value” transaction . . . . .	93.26
Co. purchaser (non-natural person) . . . . .	93.27
Trusts . . . . .	93.28
Linked transactions . . . . .	93.29
ATED-SDLT reliefs . . . . .	93.30
SDLT on winding up company . . . . .	93.31
Company in liquidation owes debt . . . . .	93.32
Section 75A: Anti-avoidance . . . . .	93.33
Notional land transaction . . . . .	93.34
Charities and ATED taxes . . . . .	93.35
ATED in Scotland\Wales . . . . .	93.36
De-enveloping . . . . .	93.37
Methods of de-enveloping . . . . .	93.38
ATED regime: Critique . . . . .	93.39
SDLT non-resident surcharge . . . . .	93.40
Non-resident surcharge . . . . .	93.41
Meaning of “non-resident transaction” . . . . .	93.42
Residence of individual . . . . .	93.43
When post-acquisition period ignored . . . . .	93.44
Crown employees . . . . .	93.45
Non-resident company . . . . .	93.46
Foreign-controlled company . . . . .	93.47
Non-UK control . . . . .	93.48
Attribution of rights and powers . . . . .	93.49
Funds . . . . .	93.50
Co-ownership contractual scheme . . . . .	93.51
Spouses . . . . .	93.52
Bare trust acquiring lease . . . . .	93.53
Trust purchaser . . . . .	93.54
Alternative property finance . . . . .	93.55

SDLT surcharge: administration . . . . .	93.56
Dwelling . . . . .	93.57
Surcharge: Commencement . . . . .	93.58

**CHAPTER 94**

**Who is the Settlor**

Why settlors matter . . . . .	94.1
Definitions of “settlement” . . . . .	94.2
Settlement: Standard IT/CGT definition . . . . .	94.3
Settlement-arrangement definition . . . . .	94.4
Settlement: IHT definition . . . . .	94.5
Definitions of “settlor” . . . . .	94.6
Nominal settlor . . . . .	94.7
Tainting . . . . .	94.8
Making/entering into settlement . . . . .	94.9
A gives to B, B gives to trust . . . . .	94.10
Reciprocal arrangements . . . . .	94.11
B makes trust at A's request . . . . .	94.12
Trust appoints to B, B gives to new trust . . . . .	94.13
Inter-trust transfer: Trust law background . . . . .	94.14
Inter-trust transfer: Appointment . . . . .	94.15
Inter-trust transfer: IHT . . . . .	94.16
Inter-trust transfer: Advancement . . . . .	94.17
Inter-trust transfer: General power . . . . .	94.18
Settlement powers . . . . .	94.19
Consent to exercise power . . . . .	94.20
Beneficiary assigns interest . . . . .	94.21
Disclaimer . . . . .	94.22
Dividend-waiver settlement . . . . .	94.23
Alphabet shares . . . . .	94.24
Partnership-settlement . . . . .	94.25
Resettlement by beneficiaries . . . . .	94.26
Variation under VTA 1958 . . . . .	94.27
Property provided to co in a trust . . . . .	94.28
Provision of services . . . . .	94.29
Loans . . . . .	94.30
Giving an indemnity . . . . .	94.31
Giving a guarantee . . . . .	94.32
Transaction on favourable terms . . . . .	94.33
Payment of admin expenses . . . . .	94.34
Property maintenance/management . . . . .	94.35
Retaining life tenant income . . . . .	94.36
Purpose: Inattentive settlor . . . . .	94.37

Purpose: Adviser/agent of settlor . . . . .	94.38
Trust by court: Person lacking capacity . . . . .	94.39
Trust by compromise: Minor/person lacking capacity . . . . .	94.40
Trust under Criminal Injuries Compensation Scheme . . . . .	94.41
Trust made by deed of variation . . . . .	94.42
Pension/employee benefit trust . . . . .	94.43
Property provided by company . . . . .	94.44
Planning to create excluded property trust . . . . .	94.45

**CHAPTER 95**

**Multiple Settlers**

Trust with multiple settlers . . . . .	95.1
Two settlers: IT . . . . .	95.2
Two settlers: CGT . . . . .	95.3
Just & reasonable apportionment . . . . .	95.4

**CHAPTER 96**

**Statutory Tax Indemnities**

Statutory tax indemnities . . . . .	96.1
Settlor trust-tax indemnities . . . . .	96.2
Enforceability of indemnity . . . . .	96.3
Tax on indemnity payment . . . . .	96.4
Failure to claim indemnity . . . . .	96.5

**CHAPTER 97**

**Situs of Assets for IHT**

Concepts of situs . . . . .	97.1
Intangible property has a situs . . . . .	97.2
Every asset has one situs . . . . .	97.3
Situs of shares: General principle . . . . .	97.4
Situs of registered shares . . . . .	97.5
Registered debt-securities . . . . .	97.6
Bearer and negotiable instruments . . . . .	97.7
CREST . . . . .	97.8
Share certificate endorsed in blank . . . . .	97.9
Letter of allotment of shares . . . . .	97.10
International organisation security . . . . .	97.11
Simple contract debt . . . . .	97.12
Specialty obligation . . . . .	97.13
Meaning of “specialty” . . . . .	97.14
Jurisdictions without “deeds” . . . . .	97.15
Specialties: Conflict of laws . . . . .	97.16
Mortgage debt . . . . .	97.17
Claim for breach of trust . . . . .	97.18

Debt under letter of credit . . . . .	97.19
Judgment debt . . . . .	97.20
Bank account . . . . .	97.21
Building society account . . . . .	97.22
Insurance policy . . . . .	97.23
Land . . . . .	97.24
Chattels. . . . .	97.25
Ships and aircraft . . . . .	97.26
Goodwill. . . . .	97.27
Intellectual property . . . . .	97.28
Land subject to contract of sale . . . . .	97.29
Bare trust or nominee ship . . . . .	97.30
Interest under substantive trust . . . . .	97.31
Estate of deceased person . . . . .	97.32
Situs of partnership share. . . . .	97.33
Situs of pension and death benefits . . . . .	97.34
Cryptoassets . . . . .	97.35
Reform of IHT/CGT situs rules . . . . .	97.36

## **CHAPTER 98**

### **Situs of Assets for CGT**

Asset situs for CGT: Introduction . . . . .	98.1
“Shares” and “debentures”. . . . .	98.2
Co-owned assets. . . . .	98.3
Municipal/government security . . . . .	98.4
Securities of UK company . . . . .	98.5
Registered security: Non-UK co . . . . .	98.6
Bearer shares . . . . .	98.7
Bearer debenture: Non-UK co . . . . .	98.8
Debt situs rule . . . . .	98.9
Judgment debt . . . . .	98.10
Debt rules: Critique . . . . .	98.11
Bank account . . . . .	98.12
UK-law rule . . . . .	98.13
Futures/options. . . . .	98.14
Insurance policy . . . . .	98.15
Land . . . . .	98.16
Chattels. . . . .	98.17
Ships and aircraft . . . . .	98.18
Goodwill. . . . .	98.19
Intellectual property . . . . .	98.20
Bare trust or nominee ship . . . . .	98.21
Substantive trust interest . . . . .	98.22

Estate of deceased person . . . . . 98.23  
Planning: Changing situs . . . . . 98.24

**CHAPTER 99**

**Control, Connected, Close and Related Expressions**

Introduction . . . . . 99.1  
Control . . . . . 99.2  
Control: Ultra-wide sense . . . . . 99.3  
Trustees of settlement . . . . . 99.4  
Nominees: Control . . . . . 99.5  
Associates. . . . . 99.6  
Associate-attribution rule. . . . . 99.7  
Ultra-wide control: Critique. . . . . 99.8  
Control: Strict sense. . . . . 99.9  
Strict-sense control: Trusts . . . . . 99.10  
Control of partnership . . . . . 99.11  
Connected person. . . . . 99.12  
Connected: Family members . . . . . 99.13  
Connected: Trustees. . . . . 99.14  
Connected: Company. . . . . 99.15  
Company connected with trust. . . . . 99.16  
Associated co/joint control . . . . . 99.17  
Connected: Partners . . . . . 99.18  
Connected: Unit trust . . . . . 99.19  
Examples . . . . . 99.20  
Why participators matter . . . . . 99.21  
Definitions of participator . . . . . 99.22  
Participator: Standard definition . . . . . 99.23  
Participator: Extended definition. . . . . 99.24  
Loan creditor . . . . . 99.25  
Close company: Introduction. . . . . 99.26  
Control test. . . . . 99.27  
Winding-up test . . . . . 99.28  
Non-close companies . . . . . 99.29  
State-controlled company. . . . . 99.30  
Open company exemption . . . . . 99.31  
Pension schemes . . . . . 99.32  
Quoted company exemption . . . . . 99.33  
Principal members: Vote cap. . . . . 99.34

**CHAPTER 100**

**Participation and % Interest Tests**

Participation. . . . . 100.1

Direct participation . . . . .	100.2
Indirect participation tests . . . . .	100.3
Indirect participation: s.159 . . . . .	100.4
Major participant: s.160 . . . . .	100.5
s.161 test: s.148/175 financing. . . . .	100.6
s.162 test: Other financing . . . . .	100.7
25%/50% investment tests . . . . .	100.8

**CHAPTER 101**

**Permanent Establishment and Branch/Agency**

PE: Introduction . . . . .	101.1
PE: UK-law/OECD Model meanings . . . . .	101.2
PE in other contexts . . . . .	101.3
Some general points . . . . .	101.4
Fixed place of business PE . . . . .	101.5
Geographic condition . . . . .	101.6
“Through which” enterprise carried on . . . . .	101.7
Fixed/permanency . . . . .	101.8
Personnel condition . . . . .	101.9
The enterprise. . . . .	101.10
Items included as PE . . . . .	101.11
Agency-PE . . . . .	101.12
OECD Model agency-PE . . . . .	101.13
Independent agent exemption . . . . .	101.14
Independent status . . . . .	101.15
Controlled companies/groups . . . . .	101.16
Preparatory/auxiliary activities . . . . .	101.17
Fragmented business operation . . . . .	101.18
Services PE . . . . .	101.19
Alternative finance arrangements . . . . .	101.20
PE: Pre-1963 DTAs . . . . .	101.21
Trade in UK without PE . . . . .	101.22
Definitions of PE: Critique . . . . .	101.23
Why branch/agency matters. . . . .	101.24
Meaning of “branch or agency” . . . . .	101.25
Branch/agency: Critique . . . . .	101.26
Home office due to Covid . . . . .	101.27

**CHAPTER 102**

**Post-Brexit EU Law**

Brexit . . . . .	102.1
EU law and UK taxation . . . . .	102.2
EU-law terminology . . . . .	102.3

The EU Treaties . . . . .	102.4
EU/UK law relationship . . . . .	102.5
EU case law . . . . .	102.6
The treaty freedoms . . . . .	102.7
Freedom of establishment . . . . .	102.8
“Establishment” . . . . .	102.9
“Restriction” on establishment . . . . .	102.10
Who is entitled to freedom of establishment . . . . .	102.11
Free movement of capital . . . . .	102.12
Movement of capital to third countries . . . . .	102.13
Permitted restrictions on cross border activity . . . . .	102.14
Abuse . . . . .	102.15
Other justifications for FoE/FMC restrictions . . . . .	102.16
Discrimination on grounds of nationality . . . . .	102.17
Option to be treated as resident . . . . .	102.18
State aid . . . . .	102.19
IHT and EU law . . . . .	102.20
Gibraltar . . . . .	102.21
Channel Islands and Isle of Man . . . . .	102.22

## **CHAPTER 103**

### **Double Taxation Arrangements: Introduction**

DT reliefs: Introduction . . . . .	103.1
Treaty terminology . . . . .	103.2
Types of double taxation . . . . .	103.3
DT exemption/credit compared . . . . .	103.4
Double non-taxation . . . . .	103.5
Types of residence/dual residence . . . . .	103.6
DTA: Classes of residents . . . . .	103.7
DTA income categories . . . . .	103.8
DTA interpretation principles . . . . .	103.9
OECD Commentary . . . . .	103.10
Undefined treaty terms . . . . .	103.11
Taxes Covered . . . . .	103.12
Effectively connected with PE . . . . .	103.13
BEPS multilateral instrument . . . . .	103.14
Definitions . . . . .	103.15
Scope of BEPS MLI . . . . .	103.16
BEPS MLI commencement . . . . .	103.17
Incorporation of DTAs in UK law . . . . .	103.18
Claim for DT reliefs . . . . .	103.19
Remittance basis income . . . . .	103.20
Third-party DT relief . . . . .	103.21

Characterisation . . . . .	103.22
Channel Islands/IoM DTAs . . . . .	103.23
Pre-1963 DTAs . . . . .	103.24
The future . . . . .	103.25

**CHAPTER 104**

**DTA Anti-Abuse Rules**

DTA anti-abuse rules: Introduction . . . . .	104.1
DTA title/preamble/purpose . . . . .	104.2
BEPS MLI preambles . . . . .	104.3
Purpose of DTAs: Summary . . . . .	104.4
Domestic anti-abuse rules . . . . .	104.5
Implied treaty anti-abuse rule . . . . .	104.6
OECD-concept abuse . . . . .	104.7
Principal purpose test . . . . .	104.8
Savings Clause . . . . .	104.9
US DTA: Conduit arrangement . . . . .	104.10
DTA beneficial owner rule . . . . .	104.11
Bona fide conduit co . . . . .	104.12
Beneficial ownership: Canada . . . . .	104.13
“Subject to tax” . . . . .	104.14

**CHAPTER 105**

**Limitation on Benefits**

Limitation on Benefits . . . . .	105.1
Qualified persons . . . . .	105.2
Active conduct of business . . . . .	105.3
Derivative Benefits . . . . .	105.4
Principal purpose test . . . . .	105.5
LoB: Definitions . . . . .	105.6
Channel Islands/IoM LoB . . . . .	105.7

**CHAPTER 106**

**Credit for Foreign Tax**

Credit for foreign tax . . . . .	106.1
DTA/Unilateral Credit compared . . . . .	106.2
DTA Credit: TIOPA rules . . . . .	106.3
Which foreign taxes give credit . . . . .	106.4
Same income rule . . . . .	106.5
Domestication relief . . . . .	106.6
Same gain: roll-over relief . . . . .	106.7
Foreign source rule . . . . .	106.8
Tax in accordance with DTA . . . . .	106.9
Example: Hybrid entity . . . . .	106.10

Tax credit: Dividends . . . . .	106.11
DTA/Unilateral Credit: Priority . . . . .	106.12
DTA excluding tax credit . . . . .	106.13
Method of providing credit . . . . .	106.14
Foreign tax credit: Claim . . . . .	106.15
Tax sparing arrangements . . . . .	106.16
When credit not allowed . . . . .	106.17
Restriction to UK residents . . . . .	106.18
Election against credit . . . . .	106.19
Computing FTC: Income . . . . .	106.20
Computing FTC: CGT . . . . .	106.21
Minimisation of foreign tax . . . . .	106.22
Limit on credit relief . . . . .	106.23
Credit for TNR CGT . . . . .	106.24
UK-resident US citizen . . . . .	106.25
Credit for underlying US co tax . . . . .	106.26
CGT/IT computation deduction . . . . .	106.27

**CHAPTER 107**

**Non-discrimination**

Non-discrimination: OECD Model . . . . .	107.1
Nationals discrimination . . . . .	107.2
Stateless persons discrimination . . . . .	107.3
PE discrimination . . . . .	107.4
Discrimination in tax deductions . . . . .	107.5
Enterprise owned in other state . . . . .	107.6
“Taxes” . . . . .	107.7
“Non-discrimination provision” . . . . .	107.8
Channel Islands/IoM DTAs . . . . .	107.9

**CHAPTER 108**

**IHT Double Taxation Treaties: Introduction**

IHT double taxation treaties . . . . .	108.1
Estate and inheritance taxes . . . . .	108.2
OECD IHT Model . . . . .	108.3
IHT DTAs: Taxes covered . . . . .	108.4
IHT DTAs: Incorporation in UK law . . . . .	108.5
Claims for IHT DTA reliefs . . . . .	108.6
Nil-rate band and DTAs . . . . .	108.7
Deductions for DTA purposes . . . . .	108.8
EU-law aspects . . . . .	108.9
The future . . . . .	108.10

**CHAPTER 109**

**IHT DTAs: India, Pakistan, Italy, France**

Estate duty/IHT treaties . . . . .	109.1
Estate duty DTAs applied to IHT . . . . .	109.2

## CHAPTER ONE

# FOREIGN DOMICILE: TAX POLICY

1.1

### 1.1 Introduction

The topics of this chapter are:

- (1) Policy arguments for and against a lighter tax regime for foreign domiciliaries (or some similar class of footloose individuals)<sup>1</sup>
- (2) A brief history of domicile tax reform
- (3) An assessment of the reforms of
  - (a) 2008
  - (b) 2017/18
- (4) State of UK tax reform, and prospects for the future

### 1.2 Tax competition

All UK residents may choose where to reside, but foreign domiciled individuals are in general less securely attached to the UK. Tax competition arguments claim that if their tax burden was as great as that of a UK domiciliary, fewer would choose to live in the UK, and overall the UK economy would lose:

- (1) directly, from tax paid by foreign domiciliaries (including VAT); and
- (2) indirectly, from UK investment and expenditure which is more likely

---

1 For discussion on policy issues, see STEP, “Residence and Domicile: Response to Background Paper” (2003)  
[https://www.kessler.co.uk/wp-content/uploads/2013/07/Domicile\\_reform\\_STEP\\_response.pdf](https://www.kessler.co.uk/wp-content/uploads/2013/07/Domicile_reform_STEP_response.pdf)  
CIOT, “Reviewing the Residence and Domicile Rules” (2003)  
<http://www.tax.org.uk/Resources/CIOT/Migrated%20Resources/j-l/j-jenkins-esq.pdf>  
CIOT, “PBRN18 (Residence & Domicile Review)” (2007)  
<https://www.kessler.co.uk/wp-content/uploads/2018/12/PBRN18ResAndDomReview-final201107.pdf>

to be made by UK residents.<sup>2</sup>

Similarly, UK firms competing in the global market for talent and expertise will find recruitment easier if the tax regime for foreign employees is lighter. Some potential employees would not choose, or could not afford, to come if the UK tried to tax them as it does its own domiciliaries.

In a nutshell: the argument is that the UK economy benefits from foreign domiciliary reliefs.

### 1.2.1 Tax competition: Analysis

Tax competition raises a number of sub-issues, in particular:

- (1) To assess the existence and importance of tax competition
- (2) What the UK should do in the light of tax competition
- (3) What international agreements might do to regulate tax competition

The first question is essentially one of fact; the second is a question of domestic politics. The third is a matter of foreign politics.

In principle there are many low-tax or preferential tax regimes where wealthy individuals may choose to reside.<sup>3</sup> Switzerland, for instance, has a lump sum taxation regime for non-Swiss citizens, specifically targeted for this purpose and more favourable than the UK remittance basis.<sup>4</sup> Ireland retains the pre-2008 remittance basis.

In assessing the existence and strength of international tax competition several points must be borne in mind.

Effective low tax may be achieved in other countries by relaxing legal provisions at administrative level, in a non-transparent way.

2 Except to the extent that tax makes investment by UK resident foreign domiciliaries difficult, as to which, see 18.23 (Investment relief: Critique).

3 In 2017, Italy introduced a fixed levy in lieu of tax on foreign income of new residents: art.24-bis [Italy] *Testo unico delle imposte sui redditi*; as there is no further tax on remittance, this is much more favourable than the UK system. Daniel Simon also singled out Spain, Portugal and France: *Tax Journal* (21 July 2017).

4 See 8.5.4 (Swiss forfait taxpayer). This was at one time politically controversial; it was abolished in Zurich in 2009 and 5 other cantons followed suit. But in a referendum in 2014, the regime was supported by 59% of voters, on a 49% turnout; see Sigg and Luongo, "The Swiss lump-sum taxation regime: after the storm comes the calm?" [2015] *JITTCP* 169; <http://www.swissinfo.ch/eng/bloomberg/swiss-say-foreign-millionaires-are-still-welcome-after-tax-vote/41144174>

So I expect that Swiss tax law is now stable. In the 2014/15 edition of this work I added "and probably more stable than the UK" and that proved to be correct!

One-paragraph summaries of a country's tax system are bound to be misleading.

The terms of statutory tax law are only one aspect of tax competition. Compliance costs are important. The quality of tax administration is important. An OECD study identifies six desiderata: a developed legal system, confidentiality, impartiality, proportionality, responsiveness (meaning a CRM for large companies, and at least answering correspondence from lesser taxpayers) and competence. They add:

Frequent changes in legislation, particularly where there has been an absence of consultation, can have an adverse impact on the taxpayers and their advisers trust in the tax system.<sup>5</sup>

But there are others: can a tax authority subject an individual to an expensive and intrusive tax investigation without evidence that tax returns were wrong? Certainty is very important.<sup>6</sup> Perception matters as much as reality. Rates of tax on UK source income may matter more than the rules for foreign domiciliaries. By many of these measures, the UK competes poorly.

### 1.2.2 *Other tax competition*

The debate about international tax competition is long standing.<sup>7</sup> Tax competition arises in many areas of taxation, and affects different types of income in different ways.

In areas where investment by non-residents is (more or less) completely mobile, tax competition has driven UK tax rates down to zero. Examples include:

- (1) Interest arising to non-residents on UK bank deposits (and other cases where there is no withholding tax on interest)
- (2) Trading income arising to non-residents from investment management

---

5 "Engaging with High Net Worth Individuals on Tax Compliance" (2009) para 208 and 243; see <http://www.oecd.org/ctp/aggressive/engagingwithhighnetworthindividualsontaxcompliance.htm>

6 See 2.8 (The Rule of Law).

7 See the evidence of Lord Vestey to the 1920 Royal Commission, [https://www.kessler.co.uk/wp-content/uploads/2013/07/Vestey\\_Royal\\_Commission\\_evidence\\_and\\_ensuing\\_debate.pdf](https://www.kessler.co.uk/wp-content/uploads/2013/07/Vestey_Royal_Commission_evidence_and_ensuing_debate.pdf)

(3) IHT on UK funds held by foreign domiciliaries<sup>8</sup>

In the case of very mobile sources of income, such as interest on bank deposits and trading income from asset management, any UK tax charge would only cause the non-resident investor to move the investments to a different jurisdiction with a resultant loss in economic activity and profits in the UK.

In the corporate field, tax competition has reduced the rate of CT, though not of course to zero or near it. Tax competition may not be the only factor which contributed to the reduction in CT rates, but if HM Treasury is to be believed, it is one of the important factors. In the 2017 spring budget:

3.11 The UK is one of the most open economies in the world, and a highly competitive business tax regime remains a key factor in retaining that position. The UK's corporate tax rate is the lowest in the G20.<sup>9</sup>

But headline rates are only part of the story, and if one looks deeper, a different (and more complex) picture emerges, having regard to other major changes to corporate taxation:

- (1) reduced capital allowances<sup>10</sup>
- (2) increase in taxation of dividends in 2016 (though perhaps this is less relevant to tax competition, as it does not apply to non-residents)

The proposed increase in CT rates announced in the 2021 budget is a reversal of this trend, which surprised everyone who expected consistency in tax policy. The explanation may partly be that the government were constrained by promises not to raise the rates of IT or VAT. And as Paul Johnson pointed out, a rise in corporation tax is politically attractive

- 
- 8 See 71.3 (Non-settled UK funds). Another example from the field of shipping: "The location of ownership, flagging (registration) and management activities is very 'footloose', since it can easily be transferred from one country to another. This makes it vital to have regard to the fiscal regimes in other countries if we want to maintain a successful shipping industry in the UK. The modern armoury in the battle for success invariably includes a virtually tax-exempt fiscal regime." (Independent Enquiry into a Tonnage Tax, Lord Alexander, HM Treasury 1999.) Another example is the exemptions for major sports events; see s.48 FA 2014. These events would not be held in the UK in the absence of tax exemption.
  - 9 <https://www.gov.uk/government/publications/spring-budget-2017-documents>  
This is the latest in a line of similar statements, traced in the 2016/17 edition of this work para 1.2.2, but I omit that here as it has diminishing contemporary significance.
  - 10 See Pomerleau, "What We Can Learn from the UK's Corporate Tax Cuts" (2017) <https://taxfoundation.org/can-learn-uks-corporate-tax-cuts/>

because it is not obvious who ends up paying the bill.

### 1.2.3 *Tax competition within UK*

Devolution raises the issue of tax competition within the UK. Debate has focused on the possibility that Scotland may compete in the corporate field, by a lower corporation tax rate than England:

a lower headline rate of corporation tax could encourage greater investment by Scottish and UK firms in both physical and human capital and in research and development within Scotland.

At the same time, it could make the country more attractive as a location for multi-national investment. It could also act as an important signal to global companies and investors as to Scotland's ambition to be a location for competitive business.<sup>11</sup>

Similar issues apply to taxation of individuals.<sup>12</sup> Competition in the foreign domicile field is therefore only one aspect of a wider topic.

### 1.2.4 *Attitudes to tax competition*

Most though not all commentators would accept that tax competition is an

---

11 "Devolution of tax powers to the Scottish Parliament - Commons Library Standard Note" (2012, 2013) <http://www.parliament.uk/briefing-papers/SN05984>

The consultation paper does not consider the possibility that England might match the Scottish lower rate and does not address the question of what constitutes a Scottish company for the purpose of the lower rate. The most recent version of this paper is "Devolution of tax powers to the Scottish Parliament - recent developments" (2016) <https://commonslibrary.parliament.uk/research-briefings/sn07077/>

Likewise in Northern Ireland: The Corporation Tax (Northern Ireland) Act 2015; House of Commons Briefing paper No 7078, "Corporation tax in Northern Ireland" (2017)

<http://researchbriefings.parliament.uk/ResearchBriefing/Summary/SN07078#full-report>

HMRC, "Draft guidance on the NI CT regime"

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/677832/NI\\_CTregime-draft\\_guidance.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/677832/NI_CTregime-draft_guidance.pdf)

Wales would also like to join in:

"If Northern Ireland is allowed to cut corporation tax, it would be outrageous if Welsh politicians did not have the option of doing the same."

Gerald Holtham, chair of the Holtham Commission for Wales (Cited in the Scottish consultation paper).

So in due course there might be no shortage of corporation tax competition within the UK.

12 See 40.3.4 (IT competition within UK).

important consideration in framing UK taxation.

Tax competition offers advantages to countries which compete successfully and disadvantages to those who do not. In many areas government have accepted the challenge of competition, and sometimes with enthusiasm:

The [investment manager] exemption enables non-residents to appoint UK-based investment managers without the risk of UK taxation and is one of the key components of the UK's continuing attraction for investment managers.<sup>13</sup>

Those opposed to the consequences of this line of argument deride it as:

- (1) a “race to the bottom”<sup>14</sup>; and
- (2) “harmful” tax competition

It is correct that tax competition should logically drive tax rates on the mobile sources of income of non-residents down to zero, and in some cases that has been the result. Of course tax competition is not the only consideration in forming tax policy.

The expression “harmful tax competition” conceals awkward questions about harmful to whom? “Harm” is not an obvious or self-defining concept. The focus is often on harm to the G7 countries.<sup>15</sup>

Most sober commentators recognise that the UK could not act alone, as if there were no such thing as international tax competition.<sup>16</sup>

13 SP 1/01; see 68.1 (Investment manager exemptions).

14 This metaphor goes back at least to OECD *Harmful Competition* (1998)  
<https://ntanet.org/NTJ/51/3/ntj-v51n03p601-08-oecd-report-harmful-tax.pdf>

The problem is not unique to tax: international regulatory competition may also lead to a “race to the bottom”; but perhaps in areas outside tax it is easier to reach international agreements imposing minimum standards.

15 See Littlewood, “Tax Competition: Harmful to Whom?” in Asif Qureshi and Xuan Gao, eds, *Critical Concepts in Law: International Economic Law*, Routledge, London (2010) volume VI, 162-234; reprinted from (2004) 26 *Michigan Journal of International Law* 411-487

<https://repository.law.umich.edu/cgi/viewcontent.cgi?article=1227&context=mjil>  
 Avi-Yonah “Globalization, Tax Competition, and the Fiscal Crisis of the Welfare State” [2000] *Harvard Law Review* p.1573.

16 However at the extreme even this is denied; eg “Tackle Tax Avoidance” a campaign of Progress (which describes itself as a New Labour pressure group):

“There is real fear at the heart of government that if it gets tough on business, businesses will flee the UK. But as the chief executive of Google, Eric Schmidt, himself admitted in an interview: ‘Google will continue to invest in the UK no

Unfortunately, it is always hard to predict what will be the overall economic effect of any reform, and predictions reflect the views and hopes of the partial pundits who make them.<sup>17</sup> Ascertaining the effect of reforms after they are made is scarcely less difficult.

### 1.2.5 Tax competition: EU-law

The freedom of the UK to enter into tax competition against other countries is subject to certain constraints of EU and international law and politics. International fiscal co-operation in this area at present operates only to a limited extent, but it has made some progress in a (non-binding) EU code of conduct on business taxation.<sup>18</sup>

State Aid rules also impose restrictions on UK's freedom to tax and untax.<sup>19</sup>

The EC has expressed disapproval of the remittance basis:

The Commission does not advocate remittance base taxation, as it may lead to double non-taxation.<sup>20</sup>

That did not seem to have had any impact on UK domestic politics. But the issue is ongoing. In 2018 the European Parliament set up a committee on financial crimes, tax evasion and tax avoidance whose remit includes

---

matter what you guys do because the UK is just too important for us.'  
<http://www.progressonline.org.uk/campaigns/tackle-tax-avoidance/articles/>  
(accessed 2013).

17 For instance, HMRC estimate that a reduction in the rate of Corporation Tax in Scotland to 12.5% would cost £2.6bn, but the Scottish Parliament say the impact would be positive: "Corporation Tax: Discussion Paper Options for Reform" (2011) p.43, <http://www.scotland.gov.uk/Resource/Doc/919/0120786.pdf>

The reductions in the UK corporation tax rates from 2012 may have been partly motivated by anticipation of Scottish tax competition; if so, this was tactfully not mentioned.

18 [http://ec.europa.eu/taxation\\_customs/taxation/company\\_tax/harmful\\_tax\\_practices/index\\_en.htm](http://ec.europa.eu/taxation_customs/taxation/company_tax/harmful_tax_practices/index_en.htm)

19 See 102.19 (State aid).

20 Kovács (EU Taxation and Customs Commissioner 2004 - 2010) IP/07/445 (2007). More analytically, the remittance basis gives rise to non-taxation, but not to *double* non-taxation, in the normal sense. Foreign income/gains of a remittance basis taxpayer are potentially subject to tax in the source state, even though unremitted and so effectively untaxed in the UK; see 103.5 (Double non-taxation). There would be double non-taxation to the extent that the source state chooses not to exercise its taxing rights.

to assess national schemes providing tax privileges for new residents.<sup>21</sup> What (if anything) may result, and how it may impact on the UK post-Brexit, remain unpredictable; though it seems safe to say that nothing will happen soon.

### 1.2.6 *International tax law reform*

Since tax competition extends beyond the EU, and EU powers in relation to tax are (to say the least) politically controversial, those hoping for a body to curb international tax competition tend to look to OECD.<sup>22</sup> At present this is focussed on corporate rather than personal taxation.

## 1.3 **Fairness of 2017 reforms**

The other consideration in the assessment of foreign domicile taxation is fairness.

### 1.3.1 *What is fairness*

The starting point for any serious discussion of fairness in tax is terminology from economics rather than law:

- (1) “**Horizontal equity**”, the view that people who are relevantly equal should pay the same amount of tax.
- (2) “**Vertical equity**”, the view that people who are relevantly different should pay different amounts of tax, which leads to the (more or less) accepted view that fair taxation should be progressive rather than regressive.

Economists have developed these concepts with considerable sophistication<sup>23</sup> but their limitations are exposed when one tries to apply them in a real life context, such as an assessment of the fairness of the

21 <http://www.sven-giegold.de/wp-content/uploads/2018/02/adopted-tax3-mandate-2018-02-08.pdf>

22 Eg Jeffrey Sachs “Stop this race to the bottom on corporate tax” Financial Times, March 28 2011.

23 For a starting point, see Kaplow, “Horizontal Equity: Measures in Search of a Principle” National Tax Journal 42, no. 2 (1989) p.139-55

<http://www.ntanet.org/NTJ/42/2/ntj-v42n02p139-54-horizontal-equity-measures-search.pdf>

Musgrave “Horizontal Equity Once More” National Tax Journal 43, no. 2 (1990) p.113-23

<http://www.ntanet.org/NTJ/43/2/ntj-v43n02p113-22-horizontal-equity-once-more.pdf>

taxation of foreign domiciliaries. The concept of horizontal equity is not so much a definition of fairness as an approach to identifying the issues. In deciding whether one group (foreign domiciliaries, say) is fairly taxed, one needs to identify another group by way of comparison (UK domiciliaries, say) and ask if they are relevantly equal.

### 1.3.2 *Are non-dom reliefs fair*

In the author's view, domicile is in general a useful and practical measure of UK linkage, and to regard UK and foreign domiciled residents as completely equivalent is facile. Or put the other way, foreign domicile does constitute a significantly weaker UK link than UK domicile. Accordingly conferring a lighter UK tax regime on foreign domiciliaries, such as a remittance basis, is indeed fair. This is especially so bearing in mind that:

- (1) Residence alone does not require a very close connection to the UK.<sup>24</sup>
- (2) A foreign domiciliary may not have had a fair opportunity to arrange their affairs with UK tax in mind; for instance creating settlements from which they were excluded.
- (3) Another consideration is the impracticality (both for taxpayers and HMRC) of untangling ownership of assets, especially in family ownership arrangements which are common in third world countries.

This view is not universally held. Some maintain that any distinction (for IT or CGT) between UK residents based on domicile is unfair. The two are relevantly equal. It is difficult to see how the dispute between the rival views can be judged, or what either side could do or say to convince the other. The concept of fairness is insufficiently precise to resolve the dispute. One might say that it comes down to a matter of impression, or politics; which is to say the same thing.

Those who advocate this view most strongly are not tax practitioners, and I think would be surprised to find how little is required to be UK resident: their views are based on a paradigm of a foreign domiciliary who is a very long-term UK resident (at least). Thus the Guardian front page offered the heading:

“We'll end non-dom status”- Miliband. All who live *permanently* in

---

<sup>24</sup> Though the SRT has mitigated the worst excesses of the pre-2013 (common law) residence test.

UK will pay all their tax here.<sup>25</sup>

Similarly, in Ireland, which has similar rules, a Commission on Taxation report argued:

Equity requires that taxpayers who are in a comparable situation should be afforded the same treatment for tax purposes. Making a distinction between individuals based on their domicile results in a situation where taxpayers who are otherwise in a comparable situation are treated for tax purposes in different ways. This is inequitable. Thus, for example, an individual who, although domiciled outside of Ireland, is a *permanent resident* should be treated the same as any other resident taxpayer. The special treatment afforded to individuals who are resident, but not domiciled, in Ireland whereby they are only taxable in Ireland on foreign source income and capital gains to the extent that the income and gains are remitted to Ireland is inequitable and should be discontinued.<sup>26</sup>

To repeal the remittance basis altogether in order to tax “permanent residents” (however that expression is defined) is to throw out the baby with the bathwater. To restrict the remittance basis to those who are not “permanent residents” requires thought to be given to a definition of the term.

It has to be said that in political debate, depth of analysis is not to be expected; assessment of fairness is visceral, and sensitive ears might detect elements of class or wealth hostility and xenophobia.

### 1.3.3 *Is a remittance basis fair*

Even if it is accepted that it is fair to tax foreign domiciliaries less than UK domiciliaries, the question of what constitutes a fair reduction is a distinct and more difficult issue. The 2008 reforms accepted the principle of a distinction (which is why they did not go far enough for some commentators) but reduced the extent of the tax reduction by making the remittance basis less attractive.

The remittance basis of taxation is a form of qualified non-taxation. In

---

25 Guardian 8 April 2015. Similarly, perhaps, the Labour Manifesto 2015: “we will abolish non-dom status so that all those who make the UK their home pay tax in the same way as the rest of us.” But the words “make the UK their home” may mean little or much.

26 [Ireland] Commission on Taxation Report (2009) para 6.2.2  
<https://www.kpmg.com/IE/en/IssuesAndInsights/ArticlesPublications/Documents/Tax/COT.pdf>

assessing its fairness it is relevant to compare different groups of foreign domiciliaries:

- (1) *Short-term residents* who are:
  - (a) wealthy individuals, who can elect for the remittance basis and are able to retain (or spend) significant foreign income/gains abroad, and
  - (b) less wealthy individuals for whom the remittance basis offers little or no benefit since they have no foreign income/gains, or cannot afford to retain (or spend) much foreign income/gains abroad.
- (2) *Long-term residents*
  - (a) ultra-wealthy individuals, who can elect for the remittance basis and are able to retain significant foreign income/gains abroad, and
  - (b) less wealthy individuals for whom the remittance basis does not justify paying the remittance basis charge.

The effective rate of tax under the remittance basis approximately declines with income and it can be described as regressive taxation. If one accepts that taxation ought in principle to be progressive, which has always been a broad feature of UK taxation, then there is a sound argument that the remittance basis is unfair.

What effect did the 2008 reforms have in this area? So far as they decreased the attractiveness of the remittance basis by withdrawal of personal reliefs as a cost of the remittance basis they have decreased the unfairness.

So far as they have introduced the remittance basis claim charge, the reforms have targeted the benefit of the remittance basis at a small number of ultra-wealthy individuals. That may make sense under the tax competition argument, but from a fairness point of view it is difficult to justify.

#### **1.4 Domicile as fiscal test: Critique**

The domicile concept is not ideally framed to identify the “footloose” individuals, whose UK links are sufficiently less that a lighter tax regime is appropriate on fairness or tax competition arguments. The adhesive quality of a domicile of origin, and the restrictive rules for the acquisition of a domicile of choice, sometimes allow fortunate individuals to enjoy foreign domicile tax treatment, despite very close UK links and only tenuous, historical and fortuitous links to their domicile of origin. To the extent that they do so the current tax system fails on both economic and

fairness criteria.

In considering this objection to domicile, however, one should bear in mind that no perfect criteria exists: the question is not whether domicile always produces the right answer, but whether one can do significantly better with other concepts or refinements.

Other concepts are sometimes used:

- (1) Long term residence, of which UK tax uses a variety of tests:
  - (a) Deemed domicile: 15 years residence
  - (b) Remittance basis claim charge: 7 and 12 years residence
  - (c) Temporary non-residence: 4 years residence and 5 years absence
  - (d) Arriver/leaver rules for residence & OWR: 3 years residence
- (2) Citizenship (not much used in UK domestic tax law but used in OECD Model and some IHT DTAs)

These are all alternative ways to make the distinction between UK residents with strong and weaker UK links; whether they would serve better in general than a domicile test seems to me rather doubtful. The 2017 deemed domicile rules take us down this path, but the rules for protected trusts means that common law domicile will continue to be important.

## 1.5 Non-dom tax reform

It is helpful to distinguish different ways of altering the tax system for foreign domiciliaries:

- (1) Alter the definition of domicile for general purposes and so alter the class who qualify for foreign domicile tax treatment. Of course this would have ramifications beyond tax. Those proposing reforms of this kind are not usually motivated by tax – though those objecting to them may be.<sup>27</sup>
- (2) Alter tax laws applying to all foreign domiciliaries.
- (3) Alter the definition of foreign domicile for some or all tax purposes.
- (4) Identify subclasses of foreign domiciliaries with close UK links so as to tax them more heavily than foreign domiciliaries with less close UK links.

One can of course achieve the same end result by more than one technique. The 2017 deemed domicile changes adopt approaches (3) and (4).

---

<sup>27</sup> See 3.7.5 (Domicile of choice: Critique).

## 1.6 Non-dom tax reform history

The chequered history reflects the difficulty, or impossibility, of reconciling incompatible policy considerations.<sup>28</sup>

### 1.6.1 1974-2002

The 1974 Finance Bill included a provision (clause 18) that an individual ordinarily resident in the UK for 5 out of 6 years should be deemed UK domiciled for IT and CGT purposes. By the time the clause came to be debated, the Labour (Wilson) administration proposed to amend it so that individuals resident for 9 years out of 10 years were deemed UK domiciled.<sup>29</sup> But even after this concession, the clause did not survive to the Finance Act.<sup>30</sup>

The 1988 Consultative Document (Residence in the UK) made radical proposals. The remittance basis would be abolished. Those resident here for less than seven out of 14 years (and, perhaps, who are also not UK domiciled) would qualify for a new “intermediate basis” of taxation. This would require disclosure of worldwide income in order to tax it at an effective rate of 2% or less. This proposal was abandoned.

### 1.6.2 2003 - 2008

In 2002 a newspaper campaign emerged which pressed the Blair administration into action, or at least into the appearance of action. The Budget of April 2003 delivered a “background paper”.<sup>31</sup> This was a facile document<sup>32</sup> but it may be unfair to criticise its (unnamed) authors. Their

---

28 See too 16.2 (History of remittance basis).

29 Hansard, Finance Bill debate 9 May 1974.

30 For an account of the lobbying behind this, see Barnett, *Inside The Treasury* (1982) p.28–9. For the Parliamentary debate, see HC Deb 13 June 1974 vol 874 cc1842-948 [http://hansard.millbanksystems.com/commons/1974/jun/13/cases-i-and-ii-of-schedule-e#S5CV0874P0\\_19740613\\_HOC\\_311](http://hansard.millbanksystems.com/commons/1974/jun/13/cases-i-and-ii-of-schedule-e#S5CV0874P0_19740613_HOC_311)

It is perhaps relevant to the outcome that the Labour administration was a minority government from 4 March 1974 until the election on 10 October 1974, after which it had a majority of 3 seats.

31 “Reviewing the residence and domicile rules as they affect the taxation of individuals” [http://webarchive.nationalarchives.gov.uk/20091222074811/http://www.hmrc.gov.uk/budget2003/residence\\_domicile.pdf](http://webarchive.nationalarchives.gov.uk/20091222074811/http://www.hmrc.gov.uk/budget2003/residence_domicile.pdf)

32 It contained an outline of the law (a rehash of IR20) and one paragraph summaries of the law of 29 other countries (of insufficient detail to be of any use and generally said to be misleading). The paper did not consider any proposals or their possible impact.

instructions may have been to be uncontroversial; by saying nothing, there was nothing in the document to which anyone could object.

Nothing then happened from 2003 to 2008.<sup>33</sup> It is clear that the review of foreign domicile tax did not follow the normal course of consultation, decision and implementation. In the absence of a frank explanation of what went on, it is tempting to speculate. The likely explanation is that the Blair administration wanted to do nothing, but prevaricated to avoid an announcement which would have led to a furore from those in favour of reform. Blair resigned in 2007. A change of power led to an unannounced U-turn from that unannounced policy.<sup>34</sup>

## 1.7 Approach to assessment of reform

The 2003 background paper on domicile recited the principles that taxation of foreign domiciliaries should:

- [1] be fair
- [2] support the competitiveness of the UK economy<sup>35</sup>
- [3] be clear and
- [4] be easy to operate

Although not mentioned, the principles derive from Adam Smith, *The Wealth of Nations* (1776).<sup>36</sup>

It (consciously?) ignored every earlier discussion of reform: the Royal Commissions of 1920 and 1955, the 1936 Codification Committee, the 1974 Finance Bill, the 1987 Law Commission Report and the 1988 Consultation Paper.

For an account of the decline in quality of government white and green papers, see Forster, *British Government in Crisis* (2005), p.134.

33 The history is set out in the 9<sup>th</sup> edition of this work para 1.3.2.

34 Earlier editions of this work contain a more detailed history of this period, but details seem less important with the passage of time and changes of government.

35 I think this just means, benefit the economy: "competitiveness" was the buzzword of the day. The principal benefit must be to raise revenue, though one might, perhaps, look for other more intangible benefits.

36 Smith *The Wealth of Nations* (1776) Book 5 chapter 2.

<http://www.bibliomania.com/2/1/65/112/frameset.html>

In Scotland, Adam Smith is more highly regarded:

“As with the entire approach the Government takes ... on taxation, these proposals are firmly founded on principles, Scottish (!) principles, that have stood the test of time. Adam Smith in 1776 in his “Inquiry into the nature and causes of the Wealth of Nations”, set out four maxims with regard to taxes; the burden proportionate to the ability to pay, certainty, convenience and efficiency of collection.”

“The Scottish Government’s Approach to Taxation” (2012)

It is naive to recite these principles without noting (as Adam Smith did) that they are irreconcilably conflicting and incommensurable values. Mirrlees stated:

- These recommendations may command near-universal support but
- [1] they are not comprehensive, and
  - [2] they do not help with the really difficult questions which arise when one objective is traded off against another.<sup>37</sup>

It is a common feature of HMRC papers to ignore point [2], and to claim the mantles of fairness and competitiveness without acknowledging a conflict between them. Thus the HMRC policy paper “Domicile: Income Tax and CGT”:

The government wants to reform the tax treatment of non-doms so that the UK can continue to benefit from the presence of talented foreigners while also addressing unfair tax outcomes.<sup>38</sup>

This is the Janet and John approach to tax reform.

The House of Commons Treasury Committee provide an intelligent approach to assessment of tax reform, identifying 8 criteria:

The Committee recommends that tax policy should be measured by reference to the following principles. Tax policy should:

1. **be fair.** We accept that not all commentators will agree on the detail of what constitutes a fair tax, but a tax system which is considered to be fundamentally unfair will ultimately fail to command consent.
2. **support growth and encourage competition.**
3. **provide certainty.** In virtually all circumstances the application of the tax rules should be certain. It should not normally be necessary for anyone to resort to the courts in order to resolve how the rules operate in relation to his or her tax affairs. **Certainty about tax requires**
  - i. **legal clarity:** Tax legislation should be based on statute and subject to proper democratic scrutiny by parliament.
  - ii. **Simplicity:** The tax rules should aim to be simple, understandable and clear in their objectives.
  - iii. **Targeting:** It should be clear to taxpayers whether or not they are

---

<http://www.scotland.gov.uk/News/Speeches/taxation07062012>

37 Mirrlees, *Tax By Design* (2011) p.22

<http://www.ifs.org.uk/uploads/mirrleesreview/design/ch2.pdf>

38 <https://www.gov.uk/government/publications/domicile-income-tax-and-capital-gains-tax/domicile-income-tax-and-capital-gains-tax> (2016)

liable for particular types of charges to tax. When anti-avoidance legislation is passed, due regard should be had to maintaining the simplicity and certainty of the tax system.

4. **provide stability.** Changes to the underlying rules should be kept to a minimum and policy shocks should both be avoided. There should be a justifiable economic and/or social basis for any change to the tax rules and this justification should be made public and the underlying policy made clear.

5. The Committee also considers that it is important that a person's tax liability should be easy to calculate and straightforward and cheap to collect. To this end, tax policy should be **practicable**.

6. The tax system as a whole must be **coherent**. New provisions should complement the existing tax system, not conflict with it.

The Committee acknowledge that these objects are incompatible:

85. No tax system is, or can be, static. There will always be trade-offs and difficult decisions; a desire for fairness may increase complexity; a desire for certainty may increase administrative complexity. Nonetheless, the principles we set out, which reflect a surprising degree of convergence within our evidence, give a direction of travel which, in the long run, can both secure consent and improve the performance of the economy.<sup>39</sup>

I think Adam Smith would be content with that.

## 1.8 2008 reform: Assessment

The 2008 reforms increased the tax burden on foreign domiciliaries in four main ways:

- (1) Remittance basis claim charge for long-term residents
- (2) Withdrawal of personal allowances for remittance basis claimants
- (3) ITA remittance basis, stricter than the pre-2008 remittance basis
- (4) Extension of anti-avoidance provisions to remittance basis taxpayers (in particular, the s.720, s.3 and s.87 remittance bases)

### 1.8.1 *Clear and easy to operate*

It will be evident to anyone who skims this volume that the 2008 rules are a failure by this criteria. The rules are unclear, often difficult and

---

39 Treasury "Principles of tax policy" (2011)

<http://www.publications.parliament.uk/pa/cm201011/cmselect/cmtreasy/753/753.pdf>

sometimes impossible to operate. In these respects they are unquestionably worse than the pre-2008 rules.

Government policy normally requires an impact assessment.<sup>40</sup> None was carried out in relation to any of the 2008 reforms. Many features of the reforms could not have survived if it had been.

### 1.8.2 *Benefit to UK economy*

On one side of the account is the gain of more tax paid by foreign domiciliaries. On the other is:

- (1) Tax and investment lost from individuals who leave the UK, and those who (because of the reforms) decide not to come.
- (2) The loss to the economy that the 2008 rules generally discourage or prevent investment in the UK and use of UK service providers.

In the 2008/09 edition of this work my initial assessment was as follows:

Overall it seems to me implausible that the reforms will make a positive contribution to the UK economy. One can test the matter this way. If a wealthy individual, a beneficiary of offshore trusts created by himself or his family, asked for advice on the desirability of choosing the UK as a residence, what would one say? Even now the individual could still do worse; and if enough advance planning and restructuring is possible, the problems may be ameliorated, at an administrative cost. Thus tax may still not prevent an individual from coming to the UK if he wants to sufficiently. Also, the old cliché about the tax tail and the commercial dog still holds good. But all this is a far cry from the pre-2008 position, where one would simply respond that the UK was clearly a desirable place to reside.<sup>41</sup>

The 2008 reforms did not in the event greatly reduce the non-dom population, though they may have reduced it slightly.

### 1.8.3 *Fairness of 2008 reforms*

The FA 2008 contained a package of reforms and any short assessment of its merits must be limited to its main features.

The remittance basis claim charge distinguishes between short term and long-term residents, and taxes the latter more heavily, the connecting factor here being the long term residence tests. One cannot categorise those

---

40 [http://old.tax.org.uk/ciot\\_media/themakingoftaxlaw.pdf](http://old.tax.org.uk/ciot_media/themakingoftaxlaw.pdf)

41 Kessler, *Taxation of Non-Residents and Foreign Domiciliaries* (7th ed, 2008), pp. 8

distinctions as unfair.

On the other hand, among long-term foreign domiciliaries, the charge distinguishes between the extremely wealthy (to whom the remittance basis is still attractive) and others (to whom it is not). This offends against the principle of vertical equity, which suggests that people with higher incomes should pay more tax. That is not fair, it represents a decision to prioritise the economic advantage of tax competition by targeting the remittance basis to the wealthiest. The tax competition consideration conflicts with fairness.

The withdrawal of personal allowances as a quid pro quo of a remittance basis is not unfair (though it comes at a cost in terms of complexity).

Of perhaps greater importance is the other aspects of a package of reforms which affect all foreign domiciliaries, not just long-term residents.

The stricter ITA remittance basis is not unfair, except for the wilder reaches of the relevant person definition<sup>42</sup> and the supposed rule (probably ignored in practice) that the taxable amount remitted may exceed the value of the asset remitted.<sup>43</sup>

The extended 2008 anti-avoidance rules can work unfairly but complete fairness is impossible to achieve in this area.

The transitional rules were another matter but their significance has faded over time.

All in all, the 2008 reform may be given some limited marks for fairness. This is not to say that the pre-2008 rules should be regarded as unfair: the concept of fairness (especially if viewed with some attention to practicality) is so vague that a very wide range of tax policies may all be categorised as “fair”.

Some of the hardest hit are long-term UK resident US citizens, who pay

- (1) US tax on a citizenship basis and
- (2) substantially greater UK tax liabilities under the 2008 regime with only treaty relief to mitigate double taxation, as far as it goes.

That is unfair, but the reason is not that UK unfairly taxes its long-term residents, but that the US imposes US tax on non-resident citizens, so all its non-residents face the burden of double taxation: US tax and tax in their country of residence (subject to limited tax credit relief). In this respect the US is almost unique. The only other country which taxes worldwide

---

43 See 17.32.2 (Remittance of derived property).

income of non-resident citizens is Eritrea.<sup>44</sup>

#### 1.8.4 Process of implementation

The manner in which the FA 2008 was introduced deserves to be recorded.

In January 2008, 26 pages of draft clauses were published whose unwritten message to wealthy non-residents was broadly: *do not come to the UK if possible; if you must, do not invest any money here*. The clauses were officially described as work in progress, but this was unfit for publication.

HMRC<sup>45</sup> presumably agreed. On 27 March the Finance Bill was published, containing 54 pages of legislation. The FB clauses bore almost no resemblance to the January draft. One consequence is that the professional time and clients' money spent considering the old clauses was almost entirely wasted. That certainly cost many £millions. Another consequence was that the profession had nine frantic days to scramble around before the end of the tax year. Because of the absence of sensible transitional reliefs, large amounts of tax depended on decisions and actions taken in those days. Sensible consideration of difficult and important matters was rendered impossible.

On the date of publication the Treasury announced that the Finance Bill was incomplete and amendments covering almost every aspect of the rules<sup>46</sup> were made in the course of progress of the Finance Bill.<sup>47</sup> Thirty

44 A few countries (i.e. Finland, France, Hungary, Italy, Spain and Turkey) tax on citizenship, but only for a limited duration or in special cases.

Ironically, in 2011 the United States condemned Eritrea at the United Nations for its "diaspora tax".

See Hammer, "Old Habits Die Hard: Should the United States Abolish Citizenship-Based Taxation?" (2016), IBFD

[http://www.ibfd.org/IBFD-Tax-Portal/White-Papers?utm\\_source=linkedin&utm\\_medium=social-media&utm\\_campaign=linkedin-discussion-week-9&utm\\_content=IBFD-Tax-Portal/White-Papers](http://www.ibfd.org/IBFD-Tax-Portal/White-Papers?utm_source=linkedin&utm_medium=social-media&utm_campaign=linkedin-discussion-week-9&utm_content=IBFD-Tax-Portal/White-Papers)

45 In this work I use the expression HMRC loosely, to include those in HM Treasury and in Government who share the responsibility for tax reform; it is not easy, or necessary, to identify where tax reform decisions are actually made.

46 Explanatory notes to sch7, para 36 (mixed funds); para 47 (s.87 charge); para 52 (non-resident trusts); para 74 (sch 4C); para 91 (ToA provisions); para 106 (works of art); para 107 (employment related securities).

47 In the 2008/09 edition I said:

"This is a new development in tax legislation. While from time to time inadequately drafted clauses have always been found in Finance Bills, this is as far as I am aware

pages of amendments duly emerged in mid June – far too late in the Finance Bill timetable to give them any serious consideration. Forty eight more Report Stage amendments were published on 26 June. The report stage and third reading (after which no further amendments could be made) were held on 1 and 2 July 2008. Avery Jones notes that “Report Stage amendments are usually a disaster.”<sup>48</sup>

The former editor of *Taxation* is blunt:

The standard of strategic policy making at the Treasury has been unacceptably poor in recent years, but this must surely have been one of its lowest ebbs ever.<sup>49</sup>

CIOT say:

when corners are cut, especially under time pressures, there can be serious deficiencies.

and their example to prove the point is the non-domicile rules in the FA 2008.<sup>50</sup>

The House of Lords Economic Affairs Committee comment in measured language:

Our private sector witnesses would not have used words like “a real shambles” if they did not feel strongly about this. ...

176. We recommend that, if they have not already done so, HMT and HMRC should carry out a full review of the reasons why there were so many difficulties in the development of this policy initiative. They should ensure that the lessons are learned so that these problems do not emerge in other initiatives.

177. We also recommend that if another policy initiative gets to the point where the legislation cannot be finalised for inclusion in the Finance Bill, that initiative should not be included in the Bill, or, if feasible, the part which is not finalised should not be included. We cannot support the

the first time that the Government has had to announce that fact at the time of publication of the Finance Bill.”

There are similar examples in the FA 2009 but it has not become a trend.

48 See “Taxing Foreign Income from Pitt to the Tax Law Rewrite—The Decline of the Remittance Basis”, Avery Jones in *Studies in the History of Tax Law* (Vol 1 2004) <https://www.kessler.co.uk/wp-content/uploads/2013/12/Remittance-basis.pdf>

49 *Taxation* 12 June 2008 Vol 161 No. 4160 p.627 (Malcolm Gunn).

50 The Making of Tax Law, para 3.2, CIOT, June 2010

<http://www.tax.org.uk/resources/CIOT/Documents/2010/09/themakingoftaxlaw.pdf>

approach of the Finance Bill's still being subject to much amendment at the time it is published, particularly when the proposals come into effect from the beginning of the tax year, as in this case.<sup>51</sup>

No review was carried out.

Does it now matter? Readers may think it pointless to cry “foul” in a game which has no referee, and whose result was long ago declared. But I think the story deserves to be recorded as what Lord Howe described as “an object lesson in how not to legislate.”<sup>52</sup>

## **1.9 2017 domicile reform: Assessment**

The 2017 reforms<sup>53</sup> contain another package of reforms and any short assessment of its merits must be limited to its main features. These are:

- (1) 15-year deemed domicile rule for IT/CGT
- (2) Formerly domiciled residents rules
- (3) Protected trust regime
- (4) IHT residential-property regime
- (5) Non-resident disregard for s.87 gains

### *1.9.1 Political background*

The inspiration for the changes was political. The decision did not much depend on an assessment of the policy arguments analysed in this chapter. The decision should be seen in the context of the 2015 summer budget's adoption of other Labour policies: the increased national living wage<sup>54</sup> and the apprenticeship levy.<sup>55</sup> The Cameron administration sought to occupy

---

51 Select Committee on Economic Affairs, 2nd Report of Session 2007–08, The Finance Bill 2008

<http://www.publications.parliament.uk/pa/ld200708/ldselect/ldeconaf/117/117i.pdf>

52 Making Taxes Simpler - The final report of a Working Party chaired by Lord Howe (2008) [https://conservativehome.blogs.com/torydiary/files/making\\_taxes\\_simpler.pdf](https://conservativehome.blogs.com/torydiary/files/making_taxes_simpler.pdf)

53 The reforms should be considered as a package with the supplemental offshore trust reforms which were announced together but deferred until 2018.

54 Labour Manifesto 2015 provided: “We will [raise] the National Minimum Wage to more than £8 an hour by October 2019”.

<http://www.labour.org.uk/page/-/BritainCanBeBetter-TheLabourPartyManifesto2015.pdf>

55 Labour Manifesto 2015 provided: “[Apprenticeships] will be co-funded ... by employers...”

<https://www.slideshare.net/miquimel/2015-04-labourgeneralelectionmanifesto2015britaincanbetterlabour>

middle ground left vacant, or perceived vacant, by the Corbyn opposition.

The Government have shown no interest in debate on the policy issues. Since the policy was taken from the Labour manifesto,<sup>56</sup> and continued to be supported by Labour, there was little possibility of a successful lobby against it.

This is not to say that the 2017 reforms are not defensible, on the basis of fairness or otherwise, just that little reasoned debate took place in public, and probably little debate took place in private. The IFS, as usual, shone an intelligent beam into the fog, though I am not sure that anyone took any notice.<sup>57</sup>

Contrast the 2008 reforms where there was at least the appearance of consultation and debate.

Perhaps it would be naive to expect otherwise.

### 1.9.2 *Clear and easy to operate*

By this criterion the 2017 reforms fail hopelessly.

### 1.9.3 *Fairness*

A 15-year deemed domicile rule for IT/CGT seems fair. The protected trust regime leaves us short of equality between long term foreign domiciled individuals and UK domiciliaries, but that can itself be defended as fair.

Formerly domiciled residents rules can work harshly, but all workable rules must have hard cases at the borders and the number of truly unfair cases will be very small.

The difficulty in assessing the fairness of the IHT residential-property regime is that IHT (unlike, say, CTT) is a fundamentally unfair and illogical tax. I would have thought it reasonably clear that any advantage does not justify the complexity and oddity of the results from the territorial limits of the tax which now apply.

The non-resident disregard will operate unfairly, and significantly extends the unfairness of a code which was already unfair.

### 1.9.4 *Benefit to UK economy*

Perhaps more importantly: Will the reforms benefit the UK economy? The

---

<sup>56</sup> See 1.3.2 (Are non-dom reliefs fair).

<sup>57</sup> IFS, "Unknown quantities: Labour's 'non-dom' proposal" (2015)  
<http://www.ifs.org.uk/publications/7703>

consultation was prefaced with the statement that:

The government wants to attract talented individuals to live in the UK who will help to contribute to the success of this country by investing here and creating jobs. The long-standing tax rules for individuals who are not domiciled in the UK are an important feature of our internationally competitive tax system, and the government remains committed to that aim.<sup>58</sup>

I wonder how far that was meant to be taken seriously. In 1974, when the Conservatives successfully opposed a similar reform proposed by Labour, Peter Rees (later Conservative Chief Secretary to the Treasury) said:

I agree with my hon. Friend the Member for Pembroke (Roger Edwards, now Lord Crickhowell), that very little tax will be gained.<sup>59</sup>

But it was, perhaps, a different computation when income tax rates reached 83% or 98%, and without the protected trust regime.

## 1.10 Statistics

HMRC offer statistics,<sup>60</sup> of which the most meaningful may be summarised as follows:

<i>Tax Yr</i>	<b>Remittance basis users</b>						
	<b>All</b>		<b>£30k chargepayers</b>		<b>Above £30k chargepayers</b>		
<i>Ends</i>	<i>No.</i>	<i>Total tax</i>	<i>No.</i>	<i>Total tax</i>	<i>No.</i>	<i>Total tax</i>	<i>Tax per person</i>
2009	48,500	£5,268	5,400	£1,719			
2010	45,600	£5,832	5,200	£1,949			
2011	49,200	£6,364	5,500	£1,724			
2012	48,900	£6,571	5,600	£1,629			
2013	48,000	£6,491	5,100	£1,551	3800	£1,122	£0.295
2014	53,000	£6,971		£1,883	3700	£1,398	£0.378
2015	55,100	£6,934	5,100	£1,815	3700	£1,316	£0.356
2016	55,100	£7,010	4,300	£1,806	3100	£1,310	£0.423

58 Consultation paper “Reforms to the taxation of non-domiciles” (2015) <https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles/reforms-to-the-taxation-of-non-domiciles>

59 [http://hansard.millbanksystems.com/commons/1974/jun/13/cases-i-and-ii-of-schedule-e#S5CV0874P0\\_19740613\\_HOC\\_311](http://hansard.millbanksystems.com/commons/1974/jun/13/cases-i-and-ii-of-schedule-e#S5CV0874P0_19740613_HOC_311)

60 <https://www.gov.uk/government/statistics/statistics-on-non-domiciled-taxpayers-in-the-uk> (July 2021)

The figures for 2019 and 2020 are provisional.

2017	53,800	£7,789	4,700	£2,295	3300	£1,728	£0.524
2018	46,100	£6,087	1,800	£761	500	£275	£0.550
2019	45,600	£6,398	1,900	£842	500	£322	£0.644

Notes

RB: Remittance basis.

Tax figures are £ million

The figures are interesting as far as they go; but they are insufficient to answer the key questions:

- what tax was gained, ie additional tax paid as a result of the 2008 and 2017 reforms?
- what tax was lost, due to those who left or decided not to come to the UK

It would need a team with economic and tax expertise to seek out further data, and to analyse it. No such analysis has been published.<sup>61</sup>

Some key facts:

- The number of individuals who claim the remittance basis once the £30k charge kicks in is small, just under 2,000.
- The number who continue to claim once the charge increases to 60k is very small, just 500. But these individuals pay more than £600k tax each.
- The CGT element in the figures (not given here) is tiny. The tax is almost all IT and NIC. IHT is not mentioned.

It would be interesting - though perhaps not rewarding - to compare these figures to the estimates given at the time of the reforms. I suspect those who believed the estimates would be disappointed. Of course, untangling the effect of non-dom tax changes from other developments is likely to be contentious.

In the estimated figures, no account was taken of:

- (1) secondary impacts that the reforms could have, for example, on spending or investment here by those who decide to leave.
- (2) those who decide not to come to the UK as a result of the reforms.

I am told that the Office for Budget Responsibility considered these effects

---

61 For international studies in this area, see: Kleven et al., "Taxation and Migration: Evidence and Policy Implications" NBER Working Paper No. 25740 (April 2019); Young et al., "Millionaire Migration and Taxation of the Elite: Evidence from Administrative Data" *American Sociological Review* Vol 81, Issue 3, (2016); Kleven et al., "Migration and Wage Effects of Taxing Top Earners: Evidence from the Foreigners' Tax Scheme in Denmark" *The Quarterly Journal of Economics* (2014) p.333.

would not be significant.<sup>62</sup> But could that really be correct?

Perhaps economic benefit was not a major consideration, or not a consideration at all, in the 2008 or the 2017 reforms. Does it now matter? Discuss.

### 1.11 The promise of stability

There is a long tradition of instability in the UK tax system. In 1981:

One of the most noticeable characteristics of the British tax system is that it is under continual change.<sup>63</sup>

In 1993:

The major distinguishing characteristic of the British tax system is its instability. The British tax system changes faster, more frequently, and more radically than any other tax system I have observed.<sup>64</sup>

In 1999:

The UK tax system is caught in a culture of never-ending change.<sup>65</sup>

The years 2008 - 2013 saw a series of broken promises of stability without any perceptible change of practice.<sup>66</sup> The promises of stability should be regarded as lip-service to the desideratum of stability. The practice, which lies deep in the culture of government, proved immune to such announcements. A true commitment to stability requires HMRC to refrain from making reforms which they would like to make, and when actual proposals come to the table, the interest of reform overcomes the interest of stability. It is easier for politicians to talk about stability than to achieve it. Perhaps HMRC have recognised this, as the 2014, 2015 budgets contained no further promises of stability. The 2017 budget had only a vague reference to “a more stable and certain tax environment”, and I doubt if anyone was expected to take that seriously. The 2020 budget makes no reference to stability in taxation.

<http://www.icaew.com/en/technical/tax/towards-a-better-tax-system>

66 I set them out the 2016/17 edition of this work para 1.10 (The promise of stability) but omit that here as it has diminishing contemporary significance.

## 1.12 State of UK tax reform

In 2010 CIOT expressed itself strongly:

The way tax law is developed and effected in the UK is deeply flawed.<sup>67</sup>

Two publications shed light on what went wrong with tax legislation in recent years. Demos say:

The centralisation of [tax policy-making power] is a particular problem because of the lack of institutional accountability of the Treasury on taxation policy and the lack of accountability of chancellors themselves in matters of taxation. ... The concept of checks and balances in tax policy is nonexistent.

... the current relationship between the Treasury and HMRC was ‘very dysfunctional’, had ‘almost gone as wrong as it could have gone’...

At the moment, pursuing a career only in tax policy is not valued within the Treasury hierarchy. Officials pass through the tax teams rather than making tax policy a career choice. ... High turnover results in a lack of experience in the tax section and little institutional memory...

... There are traditional areas that are ring-fenced as not for consultation, including tax rates and anti-avoidance measures. ...

... ‘at the moment [anti-avoidance] works like a drive-by shooting. You might hit your objective but you also hit a lot of other people.’

At present, policies are frequently changed without understanding the impact the policy has initially had in practice.<sup>68</sup>

Re-inforcing the tendency not to consult is an HMRC culture which is profoundly hostile to the tax profession . The Director of the HMRC Tax Avoidance Group 2004-2009 records:

... I was never happier than when a new tax avoidance initiative was greeted with howls of protest from the tax avoidance quarter.<sup>69</sup>

In short, preventing avoidance has been a priority that outweighs other considerations, such as certainty, workability and the Rule of Law; or rather obliterates all consideration; and listening to the tax avoidance quarter – which includes the professional bodies and almost any

---

Demos claims to be Britain’s leading cross-party think-tank.

69 Tailby, “Some Reflections on Tax Avoidance” [2011] PCB 41.

practitioner who said what HMRC did not want to hear – has been ruled out. The professional bodies are regarded by HMRC as a pressure group whose vaunted commitment to fairness, practicality and the Rule of Law is merely a cloak for self-interested whingeing of a featherbedded elite.<sup>70</sup>

That policy has ruled since the 1997 Blair administration, and its consequences can be seen in seeking to state the law, as this book seeks to do, or in seeking to understand the law, as you the reader will do now.

### 1.12.1 *Tax Consultation Framework*

In 2011 the coalition administration promised a fresh start with The Tax Consultation Framework. The 2015 Cameron administration also committed to this.<sup>71</sup> I am not sure that any subsequent administration has formally committed to it, though it has not been repudiated either.

It provides:

2. There are five stages to the development and implementation of tax policy:

Stage 1 Setting out objectives and identifying options.

Stage 2 Determining the best option and developing a framework for implementation including detailed policy design.

Stage 3 Drafting legislation to effect the proposed change.

Stage 4 Implementing and monitoring the change.

Stage 5 Reviewing and evaluating the change.

3. Where possible, the Government will:

- engage interested parties on changes to tax policy and legislation at each key stage of developing and implementing the policy;
- make clear at what stage (or stages) the engagement is taking place so that its scope is clear;
- carry out at least one formal, written, public consultation in areas of significant reform;
- set out, as the policy develops, its strategy for stakeholder engagement

---

<sup>70</sup> This may be seen in the context of a more general antagonism to the legal (and other) professions, and dismissal of their ethical pretensions. That is an ancient trope, but took renewed vigour under the Thatcher administration, and has led to a transfer of regulatory power from the Bar and Law Society to regulation by non-lawyers.

<sup>71</sup> HM Treasury: “Tax policy consultation will continue and be strengthened. The government remains committed to consulting on policy as set out in ‘The new approach to tax policy making’ in 2010.” (November 2016).

<https://www.gov.uk/government/news/7-things-you-need-to-know-about-the-new-budget-timetable>

- including planned formal consultation periods, informal discussions, working groups and workshops;
- consult, where it can, on the policy design, draft legislation and implementation of anti-avoidance and other revenue protection measures, provided this does not present additional risk to the Exchequer;
  - minimise the occasions on which it consults only on a confidential basis. Where confidential consultation has been necessary the Government will be as transparent as possible about its outcome and consult openly if pursuing the policy change further; and
  - provide feedback which sets out the Government's response to the views received and makes clear what changes, if any, have been made to the planned approach as a result of those views.
4. At each stage of consultation, the Government will set out clearly:
- the policy objectives and any relevant broader policy context;
  - the scope of the consultation, in particular what is already decided and where there is still scope to influence the outcome;
  - its current assessment of the impacts of the proposed change and seek to engage with interested parties on this analysis. A final assessment of impacts will be published once the final policy design has been confirmed...
5. Informal consultation will be as transparent as possible, consistent with the need to protect revenue. The best principles of formal consultation will be applied to informal consultation to ensure clarity of scope, impact, accessibility, and meaningful feedback. ... Informal consultation can run alongside formal consultation but will often be most appropriate at the earliest and latest stages of tax policy development to identify options and then to fine-tune the detailed legislation and implementation of change.

### **Exceptions**

8. The Government will generally not consult on straightforward rates, allowances and threshold changes, or other minor measures; recognising, however, that even in these cases some level of consultation can often be informative. It may also adopt a different approach for revenue protection or anti-avoidance measures where following this Framework could present a risk to the Exchequer. In other circumstances where the Government decides not to consult during tax policy development it will explain the reasons for that decision.

9. There will be times when it will be necessary to deviate from this Framework. In these circumstances the Government will be as open as

possible about the reasons for such deviations.<sup>72</sup>

Of course tax is not unique in this respect: similar considerations apply to all areas of law reform. The Data Retention and Investigatory Powers Act 2014 was enacted in two working days; and in holding it to be unlawful, the Divisional Court noted in moderate terms:

legislation enacted in haste is more prone to error.<sup>73</sup>

And again:

it is widely acknowledged that the [Immigration] Rules have become overly complex and unworkable. They have quadrupled in length in the last ten years. They have been comprehensively criticised for being poorly drafted, including by senior judges. Their structure is confusing and numbering inconsistent. Provisions overlap with identical or near identical wording. The drafting style, often including multiple cross-references, can be impenetrable. The frequency of change fuels complexity.<sup>74</sup>

### 1.12.2 *Compliance with Framework*

How far has tax reform since 2011 complied with the Framework? That is a broad question; it would need a series of volumes, there has been so much.

In brief, compliance with the Framework's tax reform timetable has been patchy. It is easier to announce good intentions than to abide by them. The culture of "ready, fire, aim" still prevails.

A few examples will illustrate the point.

The ATED regime was introduced in breach of the Framework. The House of Lords Economic Affairs Committee commented:

... the Government's response to SDLT avoidance might have been more appropriately designed had it consulted interested parties at the outset as its 'new approach to tax policy making' stipulates. We recommend that the Government adhere to that approach in designing future tax changes.<sup>75</sup>

---

<sup>72</sup> [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/89261/tax-consultation-framework.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/89261/tax-consultation-framework.pdf)

<sup>73</sup> *Davis (R, oao) v Secretary of State* [2015] EWHC 2092 (Admin) at [121].

<sup>74</sup> Law Com No 388, "Simplification of the Immigration Rules: Report" (2020) para 1.1.

<sup>75</sup> House of Lords Select Committee on Economic Affairs *The Draft Finance Bill 2013* (March 2013) para 210

The 2013 disallowances of debts for IHT were introduced in breach of the Framework. But neither here, nor, as far as I am not aware, in any other case have the Government acknowledged a breach of the Framework or been “as open as possible about the reasons for such deviations.”

The 2016 dividend income reforms, a major change (also misdescribed as simplification<sup>76</sup>), were introduced in breach of the Framework. The House of Lords Economic Affairs Committee comment:

We deeply regret the lack of consultation on the savings [Personal Savings Allowance] and dividend income proposals and repeat the recommendation in our Report on the draft Finance Bill 2014 that the Government should reassert its commitment to the ‘new approach’ to tax policy making and make sure that, in future, it adheres to it in full except in the most exceptional circumstances.<sup>77</sup>

The Law Society say:

... the new approach is (i) not always followed, and (ii) side-stepped by labelling new tax law as anti-avoidance when it is no such thing.

A case in point is the FA 2014, which introduced changes to the way in which certain members of limited liability partnerships were taxed. When this proposal was first published, it was an anti-avoidance measure. Following initial consultation, the nature of the proposal changed markedly and became more widely applicable to professional partnerships. This was not anti-avoidance legislation but, nevertheless, there was no formal consultation of the kind envisaged by Tax Consultation Framework.<sup>78</sup>

The Tax Professionals Forum note some cases where the framework was followed, and then say:

In contrast, however, in other cases, consultations have started:

- part way through the process (such as that on the provisions relating to the transfer of assets abroad and gains made by offshore close companies),

---

<http://www.publications.parliament.uk/pa/ld201213/ldselect/ldeconaf/139/139.pdf>

76 Summer Budget 2015, para 1.186: “the government will reform and simplify the system of dividend taxation...”

77 “The Draft Finance Bill 2016” (2016), para 250

<http://www.publications.parliament.uk/pa/ld201516/ldselect/ldeconaf/108/108.pdf>

78 The House of Lords Economic Affairs Committee was also highly critical: see the Committee report “The Draft Finance Bill 2014” (2014).

- without a clear articulation of the policy involved (for example, on IR35 and Controlling Persons), or
- without any discussion of the policy (for example, the changes to SDLT on properties owned by non-residents through companies, investment funds and others and the cap on income tax reliefs).<sup>79</sup>

The 2017 domicile reforms were announced in 2015, which should have allowed time for thinking and consultation. Two years is an appropriate time scale to introduce major reforms, and at the time it seemed a refreshing break from the pattern of 2008 to see reform enacted on that basis. But two caveats to this welcome development:

- (1) A distant deadline allowed the more difficult and serious work to be put off, the matter was concluded in the usual frantic rush, and the end result is disappointing. Still, deferring the some aspects of the offshore tax reforms to 2018, to allow consideration, is encouraging.
- (2) The need for time was not accepted by Labour:

... why else would the Government have given a grace period for those non-doms affected to get an offshore trust if they do not have one already? ... why else would the Government have actively signposted the changes for non-doms, which has set hares running? It seems to me that those are things that the architect of the measures would do if they were of a mind to completely undermine the measures' effectiveness.<sup>80</sup>

On the other hand, the IHT residence nil-rate band, 10 dense pages of foolish legislation, was slotted into F(no.2)A 2015, precluding debate and consideration, even though the rules only took effect from 2017/18! and even though there had to be a second installment of the legislation in FA 2016.

The 2020 reforms on IHT transfers to trusts were introduced in breach of the framework.<sup>81</sup>

The last part of the Tax Consultation Framework requires post-implementation monitoring and evaluation. This is almost never done.<sup>82</sup>

---

<sup>79</sup> Tax Professionals Forum Second Independent Annual Report (2013).

<sup>80</sup> Peter Dowd (Labour Shadow Chief Secretary to the Treasury) Hansard, 19 Oct 2017 [https://hansard.parliament.uk/Commons/2017-10-19/debates/aea0b4b1-dc6c-4153-a24f-09fb6be7d155/FinanceBill\(FourthSitting\)](https://hansard.parliament.uk/Commons/2017-10-19/debates/aea0b4b1-dc6c-4153-a24f-09fb6be7d155/FinanceBill(FourthSitting))

<sup>81</sup> See 75.12.7 (2020 trust rules: Critique).

<sup>82</sup> Even in the cases where the FA 2018 required post-implementation reviews, the results were "singularly unilluminating. Most of them merely contains words to the effect of 'this legislation is new and we haven't yet seen how it will work in practice'."

It is interesting to speculate what would happen if it were. Much would depend on the identity of those carrying out the review and, in controversial areas, on their instructions and on their politics.<sup>83</sup>

### 1.12.3 *Alternatives to Framework*

There is one route and one route only to a good tax system: sound tax policy, devised by those with a sound understanding of the current tax system, carried out by those who have reflected seriously on the issues in the context of the tax system as a whole; a leisurely timetable of consultation and legislative drafting as envisaged in the Tax Consultation Framework and the 10 tax tenets of ICAEW.<sup>84</sup> That is a hard prescription, though CIOT and others continue to bang the drum, and IFS do useful work.<sup>85</sup>

It is tempting to look for easier solutions. Past attempts include the Tax Law Rewrite, which achieved little; and, perhaps, the GAAR.<sup>86</sup> Advocates of the GAAR claimed:

Enacting an anti-abuse rule should make it possible, by eliminating the need for a battery of specific anti-avoidance sub-rules, to draft future tax rules more simply and clearly. Also, fewer schemes would be enacted and so there will be less call for specific remedial legislation...In time, once confidence is established in the effectiveness of the anti-abuse rule, it should be possible to initiate a programme to reduce and simplify the existing body of detailed anti-avoidance rules.<sup>87</sup>

I am not sure if anyone seriously believed that, but it has not happened, and it seems unlikely that it will. But it will take several decades to assess whether the GAAR will yield a consistent case law and reasonable

See Hubbard, *Taxation Magazine*, 4 April 2019.

83 See 115.15.5 (12 year limit: Critique).

84 <https://www.icaew.com/en/technical/tax/towards-a-better-tax-system/ten-tenets-of-tax>

85 See Institute for Government, “Better Budgets: Making tax policy better” (Jan 2017) <https://www.instituteforgovernment.org.uk/publications/better-budgets-making-tax-policy-better>

86 I have wondered whether the HMRC Charter might be added to this list, but its object lies in administration rather than substantive tax law. Its subject is “standards of behaviour and values to which HMRC will aspire when dealing with people in the exercise of their functions”; s.16A CRCA 2005.

87 Aaronson, *GAAR Study* (2011) para 1.7

[http://webarchive.nationalarchives.gov.uk/20130321041222/http://www.hm-treasury.gov.uk/d/gaar\\_final\\_report\\_111111.pdf](http://webarchive.nationalarchives.gov.uk/20130321041222/http://www.hm-treasury.gov.uk/d/gaar_final_report_111111.pdf)

predictability of outcome.

### **1.13 The future**

The 2017 reforms may put to an end the lobbying on the domicile issue from the left (also to some extent from beyond that). But that seems unlikely.

In the 2016/17 edition of this work I cited the assessment of Martin Wolf (chief economics commentator at the Financial Times):

The chancellor has little interest in making the tax system less complex and more coherent.<sup>88</sup>

That still seems to be the case, and the conclusion in earlier editions of this work seems justified by events:

The complexity and incoherence of the UK tax system will continue to increase for as long as the HMRC view prevails, that simplicity and coherence, while perhaps desirable, have low or nil priority in the context of tax reform;<sup>89</sup> and that the current state of tax and tax reform is good, or if it is not good, nothing can be done to make it better.

Perhaps the safest prediction is continued publication of new reports lamenting the existing state of tax legislation and seeking improvement. For the most recent, see Institute for Government, “Overcoming the barriers to tax reform” (Apr 2020).<sup>90</sup>

---

88 Financial Times 9 July 2015.

89 Thus the OTS has no role in the development of new tax law.

## CHAPTER TWO

# TAX AVOIDANCE

2.1

### 2.1 Tax avoidance: Introduction

Tax avoidance is as old as taxation itself,<sup>1</sup> but the topic has taken prominence over the last decade, with extensive attention from parliament and the media.<sup>2</sup>

The subject impinges on many aspects of this book, but it is best to consider it as a topic and in a chapter of its own.

### 2.2 Avoidance/mitigation, evasion

I first discuss the complicated, emotionally charged, and in practice constantly abused term “tax avoidance.”

#### 2.2.1 Terminology

It is helpful to begin with a fourfold categorisation:

- (1) *Tax evasion*: Conduct which constitutes a criminal offence (fraud on HMRC or similar offences). This typically involves dishonest submission of an incorrect tax return. Dishonesty is essential to these

---

1 For examples from 1798 and 1920, see “Tax Avoidance in 1798” <https://www.kessler.co.uk/wp-content/uploads/2013/06/Tax-avoidance-criticism-in-1798.pdf> and “Vestey: Royal Commission debate”

[https://www.kessler.co.uk/wp-content/uploads/2017/11/Vestey\\_Royal\\_Commission\\_debate.pdf](https://www.kessler.co.uk/wp-content/uploads/2017/11/Vestey_Royal_Commission_debate.pdf)

2 It is interesting to speculate why that has been the case. I think the reasons lie in politics and sociology rather than tax law or practice. The Public Accounts Committee, and some effective pressure groups, have clearly contributed but given the pressure on the front page, why has their work received so enthusiastic a reception? The 2008 financial crisis and climate of austerity may be a factor.

offences.<sup>3</sup>

- (2) *Honest misdeclaration*: The submission of an incorrect tax return without dishonesty. Those involved may be culpable (eg careless) but not dishonest.
- (3) *Tax avoidance*: Arrangements that reduce tax liability in a manner contrary to the intention of parliament (I come later to consider this concept in more detail).
- (4) *Tax mitigation*: Conduct which reduces tax liabilities without “tax avoidance” (not contrary to the intention of parliament).

The distinctions between these concepts (especially avoidance/evasion and avoidance/mitigation distinctions) are now commonplace. They may appear obvious. They are taught to every student. No sensible debate is possible without them. However, the concepts and their terminology have only emerged after a gradual process of development and even now the terminology is not always adopted. It is essential to bear this in mind on reading sources on this subject.<sup>4</sup>

### 2.2.2 Avoidance/evasion distinction

An avoidance/evasion distinction very similar to the present was recognised very early (and was surely self-evident at any time) but at first there was no terminology, or at least no commonly agreed terminology, to express it. In 1860 Turner LJ suggested evasion/contravention (where evasion stood for the *lawful* side of the divide).<sup>5</sup> In 1900 the distinction

---

3 See ? (Fraudulent tax offences). Although there are now tax offences which do not require dishonesty, I would not characterise these offences as evasion; see NEW? (Non-fraudulent offences).

4 eg the 1920 Royal Commission on the Income Tax Cmd. 615 discussed evasion, honest misdeclaration and avoidance in a chapter headed “The Prevention of Evasion”, in which the words “avoidance” and “evasion” were used quite indiscriminately, see para 625. It is an interesting question whether the absence of terminology hampered discussion of the issues or whether the lack of discussion or interest led to the absence of suitable terminology. I suggest the latter: in the 1920s, criminal prosecution for tax evasion was rare, and only in blatant cases. Thus the avoidance/evasion distinction was not relevant. Likewise, tax avoidance (in the modern sense) was then still in its infancy so the avoidance/mitigation distinction also had little relevance.

5 *Fisher v Brierly* (1860) 1 de G F&J 643 at p.663. It is a pity that this use of *contravention* did not catch on because it is more transparent than *evasion*.

was noted as two meanings of the word “evade”.<sup>6</sup> It is possible that the current use of the words avoidance/evasion in the modern sense originated in the USA where it was established by the 1920s.<sup>7</sup> But by 1936, at least, knowledgeable writers in the UK adopted the same terminology, and castigated those who did not:

In referring to these devices, those who took part in the debates on the new [ToA] provisions in the House of Commons repeatedly used the word “evasion.” Even the spokesmen of the Government at times allowed themselves this indulgence. The Financial Secretary to the Treasury (for example) described [s.18 FA 1936, transfer of assets] as a “Clause for the prevention of tax evasion”,<sup>8</sup> while the Attorney-General, dealing with the same clause, spoke of “marginal cases in which there may be some element other than tax evasion”.<sup>9</sup> Private members, and on at least one occasion the Financial Secretary,<sup>10</sup> spoke of “guilt” and “innocence” as though the House were discussing the suppression of crime.

There can be no question of any real confusion of thought, but the confusion of language is none the less to be deprecated. The new provisions have nothing to do with “evasion”; they are concerned solely with legal avoidance.<sup>11</sup>

---

6 *Bullivant v AG* [1901] AC 196 at p.207:

“The word ‘evade’ is ambiguous. ... there are two ways of construing the word ‘evade’: one is, that a person may go to a solicitor and ask him how to keep out of an Act of Parliament – how to do something which does not bring him within the scope of it. That is evading in one sense, but there is nothing illegal in it. The other is, when he goes to his solicitor and says, ‘Tell me how to escape from the consequences of the Act of Parliament, although I am brought within it’. That is an act of quite a different character.”

7 It is found in the scholarly Sears, *Minimising Taxes* (1922), and can be traced to Oliver Wendell Holmes in *Bullen v Wisconsin* (1916) 240 US 625 at p.630. It is regarded as basic in Hartman, *Tax Avoidance* (1930) which cites two textbook definitions in similar terms. Perhaps the practice of tax avoidance began earlier in the USA; the first published work on the subject in England was Moore, *The Saving of Income Tax Surtax and Death Duties* (1935), the publication of which led to the enactment of the ToA provisions.

8 Official Reports, 15<sup>th</sup> June 1936, col. 676.

9 *Ibid.* col. 704.

10 *Ibid.* vol. 692.

11 Stein & Marks, *Tax avoidance: An interpretation of the provisions of the Finance Act, 1936, relating to transfers of assets, companies’ sur-tax, children’s settlements*

The distinction is accepted internationally:

72. The terms “tax evasion” and “tax avoidance” have not always been used precisely or with a uniform meaning. Strictly speaking, tax evasion is considered to consist of wilful and conscious non-compliance with the laws of a taxing jurisdiction. Tax evasion is an action by which a taxpayer tries to escape legal obligations by fraudulent or other illegal means. The illegal conduct might involve simply failing to report income or fabricating deductions, or it may involve highly sophisticated tax planning that is premised on false or intentionally deceptive representations to the tax authorities. ...<sup>12</sup>

73. Tax avoidance, in contrast, involves the attempt to reduce the amount of taxes otherwise owed by employing legal means. However, the borderline between evasion and avoidance in specific cases may be difficult to define. For one thing, the criminal laws of countries differ, so that behaviour that is criminal under the laws of one country may not

---

(1936) p.1. Jacques Stein (1887–1973) was a significant figure in his day, and a foremost expert on taxation, according to <http://www.encyclopedia.com/religion/encyclopedias-almanacs-transcripts-and-maps/stein-leonard>.

Similarly, the 1955 Royal Commission Cmd. 9474 para 1016:

“It is usual to draw a distinction between tax avoidance and tax evasion. The latter denotes all those activities which are responsible for a person not paying the tax that the existing law charges upon his income. *Ex hypothesi* he is in the wrong, though his wrongdoing may range from the making of a deliberately fraudulent return to a mere failure to make his return or to pay his tax at the proper time. By tax avoidance, on the other hand, is understood some act by which a person so arranges his affairs that he is liable to pay less tax than he would have paid but for the arrangement. Thus the situation which he brings about is one in which he is legally in the right, except so far as some special rule may be introduced that puts him in the wrong.”

Note that “evasion” is used here (unlike present usage) to describe dishonest criminal evasion and honest mis-declaration. Lord Templeman used this (by then old-fashioned) terminology in *IRC v Challenge Corporation* [1986] STC 548: “Tax evasion occurs when the commissioner is not informed of all the facts relevant to an assessment of tax. Innocent evasion may lead to a re-assessment. Fraudulent evasion may lead to a criminal prosecution as well as re-assessment.” It does aid clarity if the term “evasion” is restricted to what Lord Templeman termed “fraudulent evasion”.

- 12 The text muddies the waters here by adding: “In a broader sense, tax evasion may encompass a reckless or negligent failure to pay taxes legally due, even if there is no deliberate concealment of income or relevant information.” But this is not common usage, and is better regarded as incorrect usage.

be criminal under the laws of another. In addition, the definitions of civil and criminal tax fraud may overlap, so that it is within administrative discretion whether or not to pursue a criminal fraud case in a specific instance. In reality, there is a continuum of behaviour, ranging from criminal fraud on one extreme, to civil fraud, to tax avoidance that is not fraudulent but which runs afoul of judicial or statutory anti-avoidance rules and therefore does not succeed in minimizing tax according to law, and finally to tax-planning behaviour which is successful in legal tax reduction. ...<sup>13</sup>

Avoidance/evasion distinctions are found outside tax, though the terminology may differ. Accountants for instance distinguish “creative accounting” (also known as aggressive accounting), which is legal; and accounting fraud, which is criminal.<sup>14</sup>

### 2.2.3 Avoidance/evasion terms misused

There are contexts where the reader will see evasion/avoidance terminology misused (evasion being used for avoidance or vice versa).

The first is historical: in law reports and elsewhere, at least up to the 1970s. In *Hawker v Compton* (1922):<sup>15</sup>

... it is perfectly open for persons to evade this particular tax if they can do so legally. I again say I do not use the word "evade" with any dishonourable suggestion about it. If certain documents are drawn up, and the result of those documents is that persons are not liable to a particular duty, so much the better for them.

The word evade continued to be used to refer to lawful tax planning (not

---

13 United Nations Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries) 2016 (footnotes omitted).

14 See Jones (ed) *Creative Accounting, Fraud and International Accounting Scandals* (2011).

15 8 TC 306 at p.314.; the tax involved was income tax of occupiers of farmland; the tax would be reduced if the land was farmed in partnership, and the issue was whether a partnership existed. So this was not what one would call a case of avoidance in modern terminology.

necessarily avoidance in the modern sense)<sup>16</sup> until the 1970's.<sup>17</sup> At that time UK economists were giving increasing attention to the subject of tax avoidance and evasion<sup>18</sup> and perhaps their work had an effect on legal usage.

The second context is in post-1970 writing of those not knowledgeable about tax, including lawyers<sup>19</sup> (non-tax lawyers) and politicians.<sup>20</sup> When writing for non-tax lawyers, it may be helpful to use the expressions “legal avoidance”<sup>21</sup> and “illegal evasion”, or better, “fraudulent evasion” to make the meaning clearer.

Outside the UK, the older terminology may still be found.<sup>22</sup>

Lastly, the distinction may be deliberately muddled for polemical effect:

in practice tax evasion and avoidance are too often conflated ... For example, users of disguised remuneration schemes were troubled when

16 Examples include: *Coutts v IRC* [1964] 1 AC 1393 at p.1420; *Jamieson v IRC* (1963) 41 TC 43 at p.70; *Cory v IRC* [1965] AC 1088 at p.1107; *Greenberg v IRC* (1971) 47 TC 240 at p.271: “Parliament attempted to prevent this and other methods of tax evasion by provisions in the FA 1960”.

17 Note that this is purely a semantic and not a substantive point that is being made here. The old usage does not reflect the view that the evasion/avoidance distinction is unreal or unclear or that one can shade into the other. The legal distinction between the two is tolerably clear since evasion involves dishonesty, a tolerably well defined and understood concept. The IEA *Tax Avoidance* (1979) coined the term “avoidance” to mean avoidance/evasion. The book noted the lack of *economic* distinction between the two concepts; the economic similarity was the justification for the new coinage. The book also noted the blurring of a moral distinction between the two concepts either because avoidance was seen by some as immoral or because evasion was seen by some as not immoral; the book did not suggest a lack of a legal distinction which was unquestioned then and still should be now.)

18 IEA, *Tax Avoidance* (1979) p.1,

19 For example, see *R v Charlton* [1996] STC 1418 at p.1421.

20 Eg The Progress Tackle Tax Avoidance Charter: “HMRC HAS GOT TO GET A GRIP ... 4. Get tough on tax avoiders by mounting more prosecutions.” See <http://www.progressonline.org.uk/campaigns/tackle-tax-avoidance>

21 “Legal avoidance” is a standard term in recent double tax conventions.

22 The avoidance/evasion distinction in UK terminology is not adopted in EU law, which has a distinct technical terminology: see 102.3 (EU-law terminology); 102.15.2 (Abuse/avoidance/evasion: Terminology).

Similarly, s.482 United States Internal Revenue Code refers to allocation of income that “is necessary to prevent evasion of taxes” but the intended concept is one of avoidance.

the schemes were called “illegal” by the Chancellor of the Exchequer and the Financial Secretary to the Treasury. HMRC has not claimed that these schemes are illegal; rather that they are not effective, ... in reducing an individual’s tax liabilities.<sup>23</sup>

It is sometimes hard to tell whether the misuse is deliberate or accidental. But as Alldridge observes, those who wish to equate avoidance and evasion should pay attention to where this may lead.<sup>24</sup>

See too **NEW**? (Non-fraudulent offences).

### 2.3 Politics of tax avoidance

The topic is political, so I begin with a politician (David Cameron):

Of course there is a difference between tax evasion and tax avoidance. Evasion is illegal. It can and should be subject to the full force of the criminal law.

But what about tax avoidance? Now of course there’s nothing wrong with sensible tax planning and there are some things that governments want people to do that reduce tax bills, such as investing in a pension, a start up business or giving money to a charity. But there are some forms of avoidance that have become so aggressive that I think it is right to say these raise ethical issues, and it is time to call for more responsibility and for governments to act accordingly.

In the UK we’ve already committed hundreds of millions (?) into this effort, but acting alone has its limits. Clamp down in one country and the travelling caravan of lawyers, accountants and financial gurus will just move on elsewhere. ...

I believe in low taxes, that is why my government is cutting the top rate

---

23 House of Lords Economic Affairs Committee “HMRC: Treating Taxpayers Fairly” (2018) para 23, 24.

<https://publications.parliament.uk/pa/ld201719/ldselect/ldeconaf/242/242.pdf>

The report recommended “Clearer distinctions are needed in the Government’s approach and rhetoric towards tax avoidance.” But the Government rejected the recommendation, so this debate will continue: HMRC, “The Powers of HMRC: Treating Taxpayers Fairly (House of Lords Paper 242) Government Response” p.2 <https://www.parliament.uk/documents/lords-committees/economic-affairs/Govt%20HMRC%20Powers%20report%2022%20Jan%202019%20.pdf>

24 Alldridge, *Criminal Justice and Taxation* (1<sup>st</sup> ed, 2017) p.34 (Blurring the line between avoidance and evasion).

of income tax, we've cut corporation tax. [*Delete - political*].<sup>25</sup>  
 Individuals and businesses must pay their fair share. And businesses who think they can carry on dodging that fair share, or that they can keep on selling to the UK and setting up ever more complex tax arrangements abroad to squeeze their tax bills right down, well they need to wake up and smell the coffee, because the public who buy from them have had enough.<sup>26</sup>

All the main tropes of the political debate are in this passage:

- (1) Everyone should pay a “fair share” of tax.
- (2) Some taxpayers fail to do so due to tax avoidance.
- (3) Tax avoidance is unethical, immoral or anti-social.
- (4) Acknowledgement of the avoidance/evasion distinction;<sup>27</sup> but it does not contradict point (3). In the words of Margaret Hodge: “We’re not accusing you of being illegal, we’re accusing you of being immoral.”
- (5) Disparaging references to tax advisers.<sup>28</sup>

On the political left, the same points are made, but more stridently, and, of course, without Cameron’s approval of low taxes.

## 2.4 Need for analysis

This chapter draws on a paper published by the Oxford University Centre for Business Taxation, (the “**OUCBT paper**”).<sup>29</sup> The OUCBT paper says:

The question is how to tackle the problems. This requires a clear analysis of their cause and differentiation between different causes. Labelling a whole range of quite different behaviours as “avoidance” without further differentiation is unhelpful. ...

Differentiation requires terminology. As there is no agreed terminology, it is best not to use any terms at all without some explanation of what is

---

25 This side note is included in the version of the speech published online; one wonders what happened when the speech was delivered.

26 David Cameron speech to World Economic Forum in Davos, 2013

<https://www.gov.uk/government/speeches/prime-minister-david-camerons-speech-to-the-world-economic-forum-in-davos>

27 I suspect newspaper libel readers (rightly) insert this if a journalist overlooks it.

28 This feeds on a very ancient trope concerning lawyers.

29 “Tax avoidance” (2012)

[http://eureka.sbs.ox.ac.uk/4428/2/TA\\_3\\_12\\_12.pdf](http://eureka.sbs.ox.ac.uk/4428/2/TA_3_12_12.pdf) (I omit some footnotes here).

meant.

### 2.4.1 Categorisation of avoidance

If one is to identify the correct response to the problems of avoidance, one must distinguish:

- (1) **Ineffective avoidance** (no tax saving if the law is correctly applied)
- (2) **Effective avoidance** (tax saved by avoidance)
- (3) **Non-avoidance** (little tax paid but not due to avoidance)<sup>30</sup>

These are important distinctions because:

- (1) Ineffective avoidance may be countered by enforcement of the law.
- (2) Effective avoidance can only be countered by changes in tax law.
- (3) In cases of non-avoidance:
  - (a) It may be no change in tax law is appropriate.<sup>31</sup>
  - (b) If change is needed, the change is one of policy as well as of tax law; and the matter should be considered without the haste and moral outrage that effective avoidance tends to cause.

If one wishes to assess emotional and moral responses to avoidance, and actual or theoretical anti-avoidance rules, we need further vocabulary to discuss the range of tax-motivated behaviour.

We might cover the terrain in four categories:<sup>32</sup>

**Uncontroversial tax planning** Taking advantage of a tax relief in a manner *everyone* would accept as reasonable and indeed desirable. As this is at the bottom of the spectrum, it is easy to find clear examples: for

---

30 The OUCBT paper adopts the somewhat unhelpful labels “categories A, B, and C”. It is difficult to find short labels which neatly sum up the concepts: “Ineffective avoidance” is not ideal as this is not really “avoidance” at all.

31 It may be that a change in public expectation or knowledge is desirable.

32 There are many ways to slice this cake. Lord Walker proposed seven types of tax avoidance (a riff on Empson’s *Seven Types of Ambiguity*): “Ramsay 25 years on” [2004] LQR 120. Contrast Barnett, “A baker’s dozen” *Taxation Magazine*, 2 August 2012. But one must resist the temptation to taxonomy for its own sake. Classification is (or should be) purposive: a useful taxonomy must draw *useful* distinctions: it should identify categories which call for different responses, and only those.

instance, pension contributions, and moderate<sup>33</sup> charity giving.<sup>34</sup> This is so even if, as is usually the case, care is needed in order to use or to maximise the relief, for instance, limiting contributions each year to below the cap for the relief, or limiting benefits within the permitted limits for gift aid.

**Ordinary tax planning** Using tax legislation in a way which *some* politicians and commentators do not like, but where the planning is ordinary in the sense that many people have done and continue to do it; it is obvious and foreseeable; the point probably came to the mind of those responsible for the legislation, or should have done, or there is no reason to think that parliament would have done anything different if it had considered the point. Ordinary tax planning is not contrary to the “intention of parliament” as that construct is normally understood.

Examples are:

- (1) Advancing or delaying
  - (a) disposals for CGT purposes or
  - (b) payment of income (eg by dividends or bonus)
  - (c) pension contributions for IT purposes  
in anticipation of changes of rates or going non-resident
- (2) Transfer of family assets or business to a spouse to equalise income
- (3) Transfer to a company to reduce tax rates
- (4) Lifetime giving to avoid IHT
- (5) Going non-resident

The term “tax mitigation” could be used to cover uncontroversial tax planning and ordinary tax planning.

**Tax avoidance** Something legal but contrary to the intention of parliament in the sense that had parliament thought about it, it would probably prevent the tax advantage. Examples are likely to have been counteracted by subsequent legislation (though it may be a matter of judgement whether the legislation is to stop avoidance or reflects a change in policy. Examples are:

---

33 In the debate on the Budget 2012, some said that giving more than £50k or 25% of income was excessive.

34 These are the examples which Cameron called “sensible tax planning” in the quote at the start of this chapter.

- (1) Transfer of assets abroad (counteracted by ToA code)
- (2) The scheme in *Furniss v Dawson* (counteracted by s.137 TCGA)
- (3) Temporary non-residence (counteracted by TNR rules); but one might place that at the upper reaches of the ordinary tax planning spectrum

**Tax abuse** Tax avoidance with aggravating features (typically, self-cancelling steps) that make it (more) unreasonable.<sup>35</sup> As this is at the top of the spectrum, it is easy to find clear examples, eg:

*Ramsay*

*Fitzwilliam v IRC*<sup>36</sup>

*Astall*

*Mayes*

*UBS*

*RFC 2012 Plc (formerly Rangers Football Club) v AG*<sup>37</sup>

Thus this terminology raises three distinctions:

- (1) Uncontroversial/ordinary tax planning
- (2) Tax planning/avoidance
- (3) Tax avoidance/abuse

Before considering whether these distinctions have, or should have, different consequences, it is important to note three difficulties which they entail:

- (1) *Demarcation problems* Except at the extreme ends of the spectrum, the demarcation problem is intractable: the classification of specific examples (if it actually had to be decided) would give rise to endless disagreement (and has done so in the context of tax motive defences). There are two reasons for this:
  - (a) The distinctions rely on:
    - (i) imponderable hypothetical questions (what would parliament have done if it had noticed the issue?)

---

35 The epithet commonly used is “egregious” or “aggressive”. That does not clarify anything but it neatly expresses the point.

For completeness: In technical EU-law terminology the term “abuse” is used in a different sense; see 102.15.2 (Abuse/avoidance/evasion: Terminology); similarly in OECD discussion; see 104.7 (OECD-concept abuse). However we are not concerned with that usage here.

36 For this case, see 94.9 (Trust appoints to B, B gives to new trust).

37 [2017] UKSC 45 at [2]: “an aggressive tax avoidance scheme”.

- (ii) vague constructs (“intention of parliament” and “spirit of the legislation”)
  - (iii) identifying tax policy (there may be no clear policy, or it may fluctuate)
- (b) The four distinct categories attempt to impose an order on tax motivated behaviour which exhibits a scale of unreasonableness, without distinct divisions. It might be better to mark out a sliding scale from 1 to 10, recognising finer distinctions, but that would not help for practical purposes. It is often the case that experience is a continuum on which the law seeks to impose bipolar categories, but the difficulty in doing so here is greater than usual because the distinction is more imponderable.
- (2) *Tax-law knowledge problems* Except for the extreme ends of the spectrum, (a small part of the field) a serious discussion of where any particular arrangement should be classified, or graded, can only be carried out by someone who understands the tax background. Few non-practitioners have much understanding. Journalists in the UK do not arrange for their work to be reviewed by someone who understands tax. Politicians are characterised by grandstanding and soundbites. Pressure groups grind their axes. The details, important to those within the profession, are likely to bore or bewilder most people outside it.
- (3) *Factual knowledge problems* If discussing particular instances, one needs to know the facts, which are not usually in the public domain.

#### 2.4.2 *Why distinctions matter*

The distinctions I have drawn are not entirely satisfactory, but it is hard to think of better.

The ordinary tax planning/tax avoidance dividing line is established in tax law at least since *Willoughby* (1997). It marks the point where:

- (1) Tax motive provisions begin to bite
- (2) Extra-statutory concessions cease to apply
- (3) HMRC Manuals cease to bind HMRC<sup>38</sup>

---

38 HMRC Guidance Manuals introduction: “Subject to [limited specified] qualifications readers may assume the [HMRC Manual] guidance applies in the normal case; but where HMRC considers that there is, or may have been, avoidance of tax the guidance will not necessarily apply.”

For this distinction, see 38.15 (Avoidance/mitigation distinction) to 38.48 (Tax avoidance: Critique).

The tax avoidance/tax abuse distinction was established in 2013: it marks the point at which the GAAR is intended<sup>39</sup> to bite:

The Government agrees with the Report's recommendation to introduce a rule which is targeted at artificial and abusive arrangements (those that the Report refers to as "egregious", "very aggressive" or "highly abusive contrived and artificial"). It accepts the Report's conclusion that introducing a "broad spectrum" general anti-avoidance rule would not be beneficial for the UK tax system. ... the GAAR should not affect what the Report describes as "the centre ground of tax planning".<sup>40</sup>

There has not been much judicial discussion (the issue has not arisen for decision) but a passage in *Furniss v Dawson* recognises something like a tax avoidance/abuse distinction:

The scheme [in *Furniss*] has none of the extravagances of certain tax avoidance schemes which have recently engaged the attention of the courts, where the taxpayer who has been fortunate enough to realise a capital profit has gone out into the street and, with the aid of astute advisers, manufactured out of a string of artificial transactions a supposed loss in order to counteract the profit which he has already made. The scheme before your Lordships is a simple and honest scheme which merely seeks to defer payment of tax until the taxpayer has

---

<http://www.hmrc.gov.uk/manuals/advisory.htm>

39 The statutory definition (perhaps unavoidably) allows some scope for mission creep. Section 207(2) FA 2013 provides for the purposes of the GAAR:

"Tax arrangements are "abusive" if they ... cannot reasonably be regarded as a reasonable course of action..."

It is significant that the GAAR is called a general anti-*abuse* rule, not a general anti-*avoidance* rule. The extent to which HMRC or the Courts will focus the GAAR on this target remains to be seen. See 23.6.7 (Sale of company: GAARable?)

40 HMRC consultation document "A General Anti-Abuse Rule" (2012) para 2.1. Similarly, HMRC consultation document "Modernising the taxation of corporate debt and derivative contracts" (2013) para 14.3: "The test of "abuse", for the purposes of the GAAR, is a high threshold, and ...[the GAAR] does not seek to encompass the full range of tax avoidance activity." See

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/205432/2013\\_06\\_05\\_Condoc\\_FINAL\\_FOR\\_PUBLICATION.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/205432/2013_06_05_Condoc_FINAL_FOR_PUBLICATION.pdf)

received into his hands the gain which he has made.<sup>41</sup>

The arrangement in *Furniss* was, in modern terms, avoidance but not abuse.

The uncontroversial/ordinary tax planning distinction is not relevant in tax law, but it is relevant to the public debate on avoidance.

## 2.5 Attitudes to tax avoidance

### 2.5.1 *Morality and taxation*

This is intended to be a practical work. But attitudes to tax avoidance do of course have practical consequences for tax: it affects judicial attitudes and decisions; it was a driver for the enactment of the GAAR and will play an important role in its interpretation.

The topic of the relationship between morality and taxation should be seen as part of a wider discussion of the relationship between morality and law. Without entering into these deep waters, it should generally be accepted that not everything which is disapproved of should be proscribed by law.

### 2.5.2 *Judicial view in the past*

Older cases uniformly took a neutral attitude to tax avoidance:

Bundey J. recognises to the full both the legal *and the moral* right of every man to dispose of his property if he can in a way which does not expose it to be taxed under the existing system of taxation.<sup>42</sup>

In 1922:

it is perfectly open for persons to evade<sup>43</sup> this particular tax if they can do so legally. I again say I do not use the word “evade” with any dishonourable suggestion about it. If certain documents are drawn up, and the result of those documents is that persons are not liable to a particular duty, so much the better for them.<sup>44</sup>

In 1926:

---

41 [1984] AC 474 at p.518.

42 *Simms v Registrar of Probates* [1900] AC 323 at p.333.

43 Nowadays one would use the word “avoid” here; but the modern terminology had not developed at this point; see 2.2.2 (Avoidance/evasion distinction).

44 *Hawker v Compton* 8 TC 306 at p.30.

the highest authorities have always recognised that the subject is entitled so to arrange his affairs as not to attract taxes imposed by the Crown, so far as he can do so within the law, and that he may legitimately claim the advantage of any express terms or of any omissions that he can find in his favour in taxing Acts. In so doing, he neither comes under liability *nor incurs blame*.<sup>45</sup>

During the second world war, judicial opinion changed. In 1941:

[The Transfer of Asset provisions] are intended to be an effective deterrent which will put a stop to practices which the Legislature considers to be against the public interest. For years a battle of manoeuvre has been waged between the Legislature and those who are minded to throw the burden of taxation off their own shoulders on to those of their fellow subjects. In that battle the Legislature has often been worsted by the skill, determination and resourcefulness of its opponents ... It would not shock us in the least to find that the Legislature has determined to put an end to the struggle by imposing the severest of penalties. It scarcely lies in the mouth of the taxpayer who plays with fire to complain of burnt fingers.<sup>46</sup>

This expresses an ethos which (along with the military metaphor) was appropriate to the wartime background; “as we are at war, the ordinary mode of construing legislation has been suspended”.<sup>47</sup>

In 1943:

of recent years much ingenuity has been expended in certain quarters in attempting to devise methods of disposition of income by which those who were prepared to adopt them might enjoy the benefits of residence in this country while receiving the equivalent of such income, without sharing in the appropriate burden of British taxation. Judicial dicta may be cited which point out that, however elaborate and artificial such methods may be, those who adopt them are “entitled” to do so. There is, of course, no doubt that they are within their legal rights, but that is no reason why their efforts, or those of the professional gentlemen who assist them in the matter, should be regarded as a commendable exercise

---

45 *IRC v Fisher's Executors* 10 TC 302 at p.340. If yet another example is needed, which I doubt, see *Levene v IRC* 13 TC 486 at p.501-502.

46 *Howard de Walden v IRC* 25 TC 121 at p.124.

47 Darling J, cited in Foxton, “*R v Halliday* in Retrospect” [2003] LQR 455.

of ingenuity or as a discharge of the duties of good citizenship. On the contrary, one result of such methods, if they succeed, is, of course, to increase pro tanto the load of tax on the shoulders of the great body of good citizens who do not desire, or do not know how, to adopt these manoeuvres.<sup>48</sup>

After the war, the old orthodoxy returned. In 1965:

The fact that a settlement is drawn with a view to avoiding particular charging provisions is *neither reprehensible, nor* a proper ground for inclination to a conclusion that it ought to come within those or some other charging provisions. ... If any moral criticism could be levelled at them, then the consciences of the judges of the Chancery Division, in the exercise of their discretionary jurisdiction under the Variation of Trusts Act 1958, would be in a sorry state.<sup>49</sup>

Lord Diplock expressed the traditional view in 1964:

Tax law no more lies within the field of morals than does a crossword puzzle.<sup>50</sup>

Likewise in 1982:

the fact that the purpose of the scheme was tax avoidance does not carry any implication that it was in any way reprehensible or other than perfectly honest *and respectable*.<sup>51</sup>

Without attempting a full survey, which would require a team of experts, it appears that the same view was held throughout the common law world. In America in 1947:

Over and over again courts have said that there is nothing sinister in so arranging one's affairs as to keep taxes as low as possible. Everybody does so, rich or poor; and all do right, for nobody owes any public duty to pay more than the law demands: taxes are enforced exactions, not voluntary contributions. To demand more in the name of morals is mere

---

48 *Latilla v IRC* 25 TC 107 at p. 117.

49 *Re Kirkwood* [1965] Ch 286 at p.327.

50 Diplock, "The Courts as Legislators" Address to The Holdsworth Club (1965) <https://www.kessler.co.uk/wp-content/uploads/2012/05/CourtsAsLegistlators.pdf>

51 *IRC v Burmah Oil* 54 TC 200 at p.220; followed in 1988 in *Craven v White* 62 TC 1 at p.196.

cant.<sup>52</sup>

Oliver Wendell Holmes is often quoted for his extra-judicial comment “I like to pay taxes. With them I buy civilization.”<sup>53</sup> But those who quote that tend to quote selectively. The same judge said:

The only purpose of the vendor here was to escape taxation... The fact that it is desired to evade the law, as it is called, is immaterial, because the very meaning of a line in the law is that you may intentionally go as close to it as you can if you do not pass it.<sup>54</sup>

In Australia in 1995:

The obligation to pay [income tax] is a legal one. Some politicians try to treat it as a moral obligation. But it is not. The citizen is bound to pay no more tax than the statute requires him to pay according to the relevant state of his affairs.

Consistently with this view, it has long been a principle of the law of income taxation that the citizen may so arrange his affairs as to render him less liable to pay tax than would be the case if his affairs were cast in some different form. .. This is sometimes expressed as a right to avoid tax.<sup>55</sup>

### 2.5.3 *Pro-avoidance rationale*

The following points can be made in favour of the traditional view, that tax avoidance is morally neutral:

#### (1) *Difficulties of “right” amount of tax*

The tax system is full of anomalies, artificial, arbitrary, and not based on any consistent principles. One might say there is generally no “right” amount of tax except in the sense of what is due by statute.

#### (2) *Difficulty of applying moral principles*

---

52 *Commissioner v Newman*, 159 F2d 848 (1947). The case concerned the taxation of settlor-interested trusts.

53 In *Ensign Tankers v Stokes* [1992] STC 226 at p.235 the apophthegm is paraphrased, with, perhaps, a change of nuance: “taxation is the price which we pay for civilisation.”

54 *Superior Oil Co v. Mississippi* 280 US 390.

55 Sir Garfield Barwick (Chief Justice of Australia 1964–81), *A Radical Tory* (1995) at p.229.

This is perhaps another way of putting point (1): The view that taxation is governed by moral principles distinct from the rules of black letter tax law either:

- (a) requires one to enter into the intractable distinction of tax avoidance/abuse; or
- (b) spreads the net very wide, far wider than any practitioner is likely to accept (and still requires one to enter into the intractable distinction of uncontroversial/ordinary tax planning).

In practice, public debate does not engage with black letter tax law and it is difficult to envisage that it ever could. Ethics is a practical subject. It only works if the entities called “right” and “wrong” are reasonably distinguishable and of a more or less permanent nature. If standards are so vague, or so difficult to apply in actual cases, that we cannot see how we could act on them, we become sceptical. That suggests that morality has little if any role to play.

### (3) *Egregious over-taxation*

I coin the expression “**egregious over-taxation**” to refer to situations where HMRC take advantage of anomalies in their favour in a manner which is unfair and contrary to the intention of Parliament (as that expression is understood in a tax avoidance context). It is the opposite of tax avoidance. Three distinct sub-issues arise here:

- (a) Does egregious over-taxation arise in practice
- (b) Is it proper for HMRC to seek egregious over-taxation
- (c) What light does that shed on the issue of tax avoidance morality

Issue (a) is a question of fact, to which the short answer is, yes. Of course the Courts generally try to construe statutes to prevent egregious over-taxation, just as they try to prevent avoidance; but sometimes they do not achieve this. For instance, the unfortunate Mr Lobler fell into the trap of a partial surrender of life policies:

He made no profit or gain as that term is commonly or commercially understood and yet he becomes liable to pay tax which exhausts his life savings and may bankrupt him. That is an outrageously unfair result... This is legislation which does not seek to tax real or commercial gains. Thus it makes no sense to say that the legislation must be construed to apply to transactions by reference to their commercial substance...No overriding principle can be extracted from the legislation...

Thus with heavy hearts we dismiss the appeal.<sup>56</sup>

There are then four possible moral approaches:

<b>View</b>	<b>Tax avoidance</b>	<b>Egregious over-taxation</b>
1	Wrong	Right
2	Right	Wrong
3	Wrong	Wrong
4	Right	Right

One might perhaps adopt view 1, that tax avoidance is wrong but egregious over-taxation is right, in short, fairness should apply in favour of HMRC but not the taxpayer; but no-one has had the temerity to advocate that.

One might perhaps adopt view 2, that tax avoidance is right, but HMRC should be bound by a further requirement of fairness; but few if any advocate that either.

So if sauce for the goose is sauce for the gander, we are limited to views 3 or 4.

View 3 is possible, but it is not supported by HMRC. Those who support the view that tax should be governed by rules rather than discretion cannot logically criticise HMRC for seeking egregious over-taxation, where the law requires, though one could criticise HMRC for not seeking to change the law promptly after unfairness has been identified (and, if appropriate, publish an ESC to operate in the meantime).

So we fall back on view 4, thus this consideration supports the view that there is nothing wrong in avoidance.<sup>57</sup>

One might wish that HMRC were as concerned about egregious over-taxation as they are about its flipside, avoidance (egregious or otherwise).

---

<sup>56</sup> *Lobler v HMRC* [2013] UKFTT 141 (TC). In order to avoid the unfairness the Upper Tribunal allowed the appeal, though it had to rewrite the law of rectification as previously understood in order to do so; see [2015] UKUT 152 (TCC). The law was later amended; See 62.3.5 (Partial surrender trap). But that does not affect the point being made here.

For another example, see *Hunters Property v HMRC* [2018] UKFTT 96 (TC), where EIS relief was unfairly lost, because a group company was member of a guarantee company which was “merely a vehicle for holding client funds and had no intrinsic value of its own”.

<sup>57</sup> For an example of this line of reasoning in use, see the *Ayrshire Pullman* quote below.

Of course, egregious over-taxation is different in that it brings in revenue rather than losing it; however, in addition to the unfairness for its victims, it has an intangible cost in that it brings the UK tax system into disrepute. But there it is.

(4) *Tax avoidance sometimes leads to fair result*

This relates to point (3): There are cases where tax avoidance avoids egregious over-taxation. An example is the use of multiple policies to avoid the tax trap of partial surrender.<sup>58</sup>

Parliament sometimes admits this, by enacting a new relief to allow directly what had previously been achieved by avoidance. Examples are:

- (a) Nil rate band discretionary trusts, which allowed transferable nil rate bands before the IHT relief was enacted in 2007.
- (b) CGT group relief to obtain loss relief. A company about to realise a gain on an asset would formerly transfer it to a group company that had realised an allowable loss. Alternatively, a company which had realised a gain might acquire from a group company an asset which was to be sold at a loss. That would allow the loss to be set against the gain before the introduction of the election to allocate gains and losses around a group, in 2009.<sup>59</sup>

Offshore trusts mitigate the economically deleterious lock-in effect of CGT by deferring tax until gains are received.

Tax avoidance (if it be such) sometimes permits a business to continue which would otherwise be destroyed by taxation.<sup>60</sup>

Related to this is the use of tax avoidance for political/economic ends. High tax rates may be mitigated by avoidance, achieving a pragmatic compromise between incompatible political viewpoints, or allowing a public perception which is different from the reality. IFS say:<sup>61</sup>

... there may even be benefits to the UK from avoidance opportunities if the lower tax rates achieved on mobile activities – for example, through profit shifting – mean that more real activity is in the UK than

---

58 See 62.3.5 (Partial surrender trap).

59 Section 171A TCGA.

60 For an example, see *Fisher v HMRC* [2014] UKFTT 805 (TC).

61 IFS, *Green Budget 2013* p.290 <http://www.ifs.org.uk/budgets/gb2013/gb2013.pdf>

would otherwise be the case.<sup>62</sup>

This fudge has its costs, including the inefficiencies that arise from tax planning, fiscal instability and public cynicism; but it happens.

#### 2.5.4 Practitioner/judicial views today

The above sets out the intellectual case in favour of the view that avoidance, like Lord Diplock's crossword, is morally neutral. It was formerly generally accepted, and has never been refuted. But the argument has been found less convincing, or unconvincing, I think for two reasons:

- (1) The traditional view was formed in earlier times when there was tax avoidance but little (if any) activity in the category of tax abuse. After that began to change, I think in the 1970's, the view became far reaching, and so might be regarded more skeptically.
- (2) The argument requires an understanding of the tax system as it actually is. Politicians and other non-tax practitioners entered into the debate without that knowledge.

Whatever the reason, the argument has become perceived as less cogent. By 2007:

For many directors, the objection to arrangements that are in their view 'too' artificial may be framed largely in terms of business ethics. Other directors, equally determined to behave in an ethical way, may consider that the degree of artificiality is not an ethical issue provided no attempt is made to misrepresent the facts or to hide them from the tax authorities....

At one time such a view would perhaps have been more widely held than now. At the present time it represents one end of a range of views in a debate where probably most commentators would hold that within the compass of what is legal there is some behaviour that is acceptable and some that is not...<sup>63</sup>

---

62 Footnote original: There is an academic literature on the costs and possible benefits of tax planning. See for example, D. Dharmapala, "What problems and opportunities are created by tax havens?", *Oxford Review of Economic Policy*, 2008, 24, 661–79.

63 David Williams "Developing the Concept of Tax Governance" (2007) [http://webcache.googleusercontent.com/search?q=cache:gn5Xu4GPUIMJ:www.ibrarian.net/navon/paper/Tax\\_and\\_Corporate\\_Social\\_Responsibility.pdf%3Fpaperid%3D8404118+&cd=7&hl=en&ct=clnk&gl=uk](http://webcache.googleusercontent.com/search?q=cache:gn5Xu4GPUIMJ:www.ibrarian.net/navon/paper/Tax_and_Corporate_Social_Responsibility.pdf%3Fpaperid%3D8404118+&cd=7&hl=en&ct=clnk&gl=uk)

In 2011, Aaronson's GAAR study reported the views of taxpayer representative bodies:

There was unanimous disapproval, indeed distaste, for egregious tax avoidance schemes.<sup>64</sup>

Of course tax practitioners do not all share the same view. But I think it is the case that they are mostly drawn to the view that opprobrium should only attach at the top end of the scale, in cases of tax abuse, in which case the GAAR has more or less rendered the issue academic; or if any opprobrium attaches to tax motivated behaviours lower down the scale, the amount of opprobrium should vary according to the scale.

This might be consistent with Lord Templeman's views in tax abuse cases, which were expressed trenchantly (some would say, stridently<sup>65</sup>):

In common with my predecessors I regard tax-avoidance schemes *of the kind invented and implemented in the present case* as no better than attempts to cheat the Revenue.<sup>66</sup>

In the Supreme Court in 2014:

Since the seminal decision of the House of Lords in *Ramsay v IRC*<sup>67</sup> there has been an increasingly strong and general recognition that artificial tax avoidance is a social evil which puts an unfair burden on the shoulders of those who do not adopt such measures.<sup>68</sup>

“Social evil” represents the top end of judicial rhetoric in recent times,<sup>69</sup> though the scope of the critique depends on the word “artificial”, which may mean little or much.

---

64 Aaronson, *GAAR Study* (2011)

[http://webarchive.nationalarchives.gov.uk/20130321041222/http://www.hm-treasury.gov.uk/d/gaar\\_final\\_report\\_111111.pdf](http://webarchive.nationalarchives.gov.uk/20130321041222/http://www.hm-treasury.gov.uk/d/gaar_final_report_111111.pdf)

65 Lord Neuberger referred more tactfully to Lord Templeman's “characteristically colourful language”; *Evans (R, oao) v Attorney General* [2015] UKSC 21 at [53].

66 *IRC v Fitzwilliam* (1993) 67 TC 614 at p.756. Lord Templeman's claim that his attitude is held in common with his predecessors is untenable. It was not even held in common with his contemporaries. But it is held in common with his successors. In this respect, Lord Templeman was ahead of his time.

67 54 TC 101.

68 *Futter v HMRC* [2013] UKSC 26 at [135].

69 But perhaps “social evil” differs from evil as “social justice” differs from justice.

And again in 2015, but more moderately expressed:

[Tax avoidance] gives rise to social costs which are significant and increasingly controversial.<sup>70</sup>

There is no current judicial unanimity, and the pendulum may swing erratically. In a rating avoidance case in 2019:

Views may differ as to whether the purpose for which the SPVs were used was socially reprehensible.<sup>71</sup>

### 2.5.5 Avoidance: Discretionary remedies

In *Altus Group v Baker Tilly* negligent accountants argued it was contrary to public policy to award damages for their failure to advise or implement an avoidance scheme. The argument was summarily rejected.<sup>72</sup>

Where courts grant discretionary remedies, the question arises whether a tax avoidance scheme context is a reason to refuse the remedy. Examples of discretionary remedies include: setting aside a gift for mistake, rectification, applications under the Variation of Trusts Act 1958, and remedies for unfair prejudice to minority shareholders.

The idea was tentatively raised in *Futter v HMRC*:<sup>73</sup>

In some cases of artificial tax avoidance the court might think it right to refuse relief, either on the ground that such claimants, acting on supposedly expert advice, must be taken to have accepted the risk that the scheme would prove ineffective, or on the ground that discretionary relief should be refused on grounds of public policy. ... But it is unnecessary to consider that further on these appeals.

In practice, there has not been a mistake case where relief was refused on the grounds of avoidance,<sup>74</sup> and I think it would have to be a very extreme case. In the light of the GAAR, that is not likely to happen now.

In Guernsey, the Courts have rejected the idea. Thus when an ill-advised

---

70 *Pendragon v HMRC* [2015] UKSC 37 at [5].

71 *Hurstwood Properties v Rossendale BC* [2019] EWCA Civ 364. The decision was reversed on appeal but without comment on this point. For other aspects of this case see 72.17.4 (Companies: Situs planning).

72 [2015] EWHC 12 (Ch) at [59](3) and [65].

73 [2013] UKSC 26 at [135].

74 See *Bhaur v Equity First Trustees* [2021] EWHC 2581 (Ch) at [118] - [119].

gift to an EBT was set aside for mistake, the fact that the individual was seeking to avoid UK tax was not a reason for the Guernsey Court to refuse relief.<sup>75</sup> It may be that UK tax avoidance is regarded with less hostility in foreign jurisdictions, and especially tax haven jurisdictions. Foreign courts may also be more sympathetic than UK courts to taxpayers facing unfair or penal anti-avoidance rules.<sup>76</sup>

*Estera Trust (Jersey) v Singh*<sup>77</sup> was an unfair prejudice case. The unfairly prejudiced shareholder was a non-resident trust. The Court ordered the company (“the defendant co”) to purchase the trust’s shares. Unfortunately that would be a distribution for tax purposes, and subject to IT at the dividend trust rate. The trust proposed a different arrangement:

- (1) The trust transferred the shares to a newly created company wholly owned by the trust (“Newco”)
- (2) The defendant co purchased its shares from Newco

This would avoid the IT charge.<sup>78</sup> The Court refused to order this arrangement for a variety of reasons, but one of them was that:

the scheme ... could be regarded as aggressive tax avoidance, even though relatively unsophisticated in comparison with other notified avoidance schemes. The Court should not without very good reason order reluctant parties to enter into a scheme that could be held to be improper (in the sense that I have identified).<sup>79</sup>

A tax practitioner may be surprised that this simple arrangement could be regarded as “aggressive”; for as the Court acknowledged, it is “perfectly common” for Jersey trusts to own companies that hold trust assets. But practitioners should remember that these issues are not decided by tax practitioners.

### 2.5.6 Impact of the GAAR

---

<sup>75</sup> *Whittaker v Concept Fiduciaries* (Guernsey 15/2017).

See too *Nourse v Heritage Trustees* (Guernsey) 15 Jan 2015) at [15] and [71] accessible <https://www.kessler.co.uk/tfd-archive>

<sup>76</sup> See App ? (Critique of s.87 regime).

<sup>77</sup> [2019] EWHC 2039 (Ch).

<sup>78</sup> The case was not a tax case, and does not give much tax analysis. For completeness: the transfer at step (1) would in principle give rise to a trust gain but presumably that did not matter on the facts of the case.

<sup>79</sup> [2019] EWHC 2039 (Ch) at [26].

Has the GAAR altered the position? GAAR guidance provides:

B2.1 The GAAR Study Group Report was based on the premise that ... all taxpayers should pay their fair share. This same premise underlies the GAAR.

It therefore rejects the approach taken by the Courts in a number of old cases<sup>80</sup> to the effect that taxpayers are free to use their ingenuity to reduce their tax bills by any lawful means, however contrived those means might be and however far the tax consequences might differ from the real economic position.

HMRC cite one of the best known dicta in taxation:

- [1] No man in this country is under the smallest obligation, moral or other, so to arrange his legal relations to his business or to his property as to enable the Inland Revenue to put the largest possible shovel into his stores.
- [2] The Inland Revenue is not slow - and quite rightly - to take every advantage which is open to it under the taxing Statutes for the purpose of depleting the taxpayer's pocket.
- [3] And the taxpayer is in like manner entitled to be astute to prevent, so far as he honestly can, the depletion of his means by the Revenue.<sup>81</sup>

HMRC say that the GAAR has changed this:

[The above quote] epitomises the approach which Parliament has rejected in enacting the GAAR legislation.<sup>82</sup>

At the abuse end of the spectrum, the GAAR now applies, so the rules have indeed changed. This impinges on the avoidance-morality debate insofar as the debate only concerns successful avoidance, ie avoidance not caught by the GAAR. But nothing else has changed. *Ayrshire* itself was *not* an abuse case (the issue was whether the taxpayer's children had

---

80 The phrase "a number of old cases" is a tendentious way to refer to judicial unanimity from the earliest times until the 1980s; see 2.5.2 (Judicial view in the past). But GAAR guidance is not a neutral document: it is written by HMRC and adopts an HMRC perspective.

81 *Ayrshire Pullman Motor Services v IRC* 14 TC 754 at p.763.

82 HMRC, "GAAR Guidance" (2017)

<https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules>

entered into a valid partnership) and the decision would not have been affected by the GAAR. Proposition [1] of the quote is still correct. It also continues to be the case that HMRC enforce egregious over-taxation when the rules work in their favour, and it is unlikely that they intended to cast doubt on proposition [2]. And proposition [3] is still broadly correct, though now qualified in more extreme cases of abuse.

The above paragraph is reading the text closely and in the manner of a lawyer. It is it is a matter of speculation as to what thoughts were actually in the mind of the author of the GAAR guidance. I think we are in the territory of mood music here.

The rhetoric continues:

Taxation is not to be treated as a game where taxpayers can indulge in any ingenious scheme in order to eliminate or reduce their tax liability.

The game metaphor begs an essay to itself.<sup>83</sup>

### 2.5.7 Codes of practice/regulators

PCRT provides:

Members must not create, encourage or promote tax planning arrangements or structures that

i) set out to achieve results that are contrary to the clear intention of

---

<sup>83</sup> What, in fact, is a game? It is an elastic concept which can be analogised in different ways. What is it in the notion of game which HMRC would characterise as significantly different from tax? Is it a notion of non-seriousness? Or an adversarial approach? Or a notion of a rule-based activity? Or arbitrary rules? In the latter three respects, tax law and non-tax law very much resemble games.

Perhaps the thinking is that games are morally neutral, whereas tax avoidance is held up as morally obnoxious. If this is the point, it is significant that a moral based argument needs to present itself in non-moral terminology. But elsewhere, “fair play” and “playing by the rules” are understood positively, and even claimed as defining features of the English national character.

These problems suggest that it would help clarity of thinking not to use the word “game”: a stale and failed metaphor. See Midgley, *Heart and Mind* (1981) chapter 8 (The game game).

However the game metaphor seems to be irresistible, in rhetoric if not in sober thought. For a recent example, see *Clark v HMRC* [2020] EWCA Civ 204 at [114]: “Both grounds seem to me to be examples of tax litigation as a board game, with large prizes for the winners. People who pay tax in the usual way are entitled to feel aggrieved when elaborate avoidance schemes ... succeed.”

- Parliament in enacting relevant legislation and/or
- ii) are highly artificial or highly contrived and seek to exploit shortcomings within the relevant legislation.<sup>84</sup>

I take this as a rough paraphrase of the GAAR. In earlier editions of this work I criticised this, saying:

But as no-one would *sensibly* advise clients to enter into avoidance schemes which do not work, because of the GAAR or otherwise, it is (more or less) meaningless exhortation.

But this overlooks that the code does serve a purpose in providing a sanction for those who foolishly advise clients to enter into hopeless avoidance schemes.

A more literal reading might take this as prohibiting advice on avoidance arrangements which *do* work. There are conflicting normative visions of the lawyer's role, raising the basic question: can a good lawyer be a good person? For legal practitioners, client autonomy is a fundamental value, and the client is in all cases entitled to be told what the law is. That is an aspect of the Rule of Law.<sup>85</sup> So this part of the PCRT does not apply to lawyers, because SRA/Bar codes of conduct have priority.<sup>86</sup> These issues could be properly examined in the context of disciplinary proceedings - but in practice disciplinary proceedings may be limited to extreme cases, in which case this will not happen.

SRA jumped to HMRC's beat, in a document entitled "Tax avoidance -

---

84 PCRT, Helpsheets B: Tax Advice. Para (ii) is otiose, but it does not matter.

In 2015 HMRC called on the professional bodies "to take on a greater lead and responsibility in setting and enforcing clear professional standards around the facilitation and promotion of avoidance to protect the reputation of the tax and accountancy profession and to act for the greater public good." See "Tackling tax evasion and avoidance" (the juxtaposition is significant) (2015) para 3.19.

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/413931/Tax\\_evasion\\_FINAL\\_\\_with\\_covers\\_and\\_right\\_sig\\_.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/413931/Tax_evasion_FINAL__with_covers_and_right_sig_.pdf)

This was presumably the spur for PCRT Helpsheets B.

85 That view is not wholeheartedly accepted, or understood, by the general public or by HMRC, and a whole chapter would be needed to discuss this topic. For an introduction, see Windsor, "The Ethics of Government Legal Advisers" in Feldman (ed) *Law in Politics, Politics in Law* (2015).

86 See 116.1.1 (Status of PCRT).

your duties”.<sup>87</sup> After repeating HMRC’s dubious statement that the approach of *Ayrshire Pullman* has been rejected by Parliament by bringing in the GAAR,<sup>88</sup> we some quite extraordinary claims:

GAAR is clearly explained in HMRC guidance.

It seems unlikely that the author read the guidance (admittedly not an easy task).

Similarly, the widespread assumption that “tax avoidance is legal” no longer applies.

This is not correct.<sup>89</sup>

While public tax debate is characterised by misinformation and shallow thinking,<sup>90</sup> perhaps inevitably so, it is dispiriting to see the same applies to the SRA.<sup>91</sup>

The Charity Commission has made the same points as the SRA.<sup>92</sup> I guess that HMRC sent round a circular to regulators, with draft text, and the regulators complied without consulting tax practitioners.

### 2.5.8 *Views of non-tax practitioners*

Outside the tax profession, the concept of what is unacceptable/immoral is not restricted to tax abuse, but extends to the ordinary tax planning level. That is, some very ordinary tax planning has come under fire. Practitioners might dismiss the views of those who know nothing about tax as unworthy of consideration. I give four examples from those whose views carry some weight.

---

87 <https://www.sra.org.uk/solicitors/code-of-conduct/guidance/warning-notice/Tax-avoidance---your-duties--Warning-notice.page> (September 2017).

88 See 2.5.6 (Impact of the GAAR).

89 Unless “avoidance” is intended to mean abuse within the scope of the GAAR.

90 See App 13.1 (Nature of parliamentary debate).

91 See Blackwell, “Conduct unbecoming: Solicitors, the SRA and Tax Avoidance” [2019] BTR 31 concluding that some aspects of the SRA statement are “simply wrong”.

92 “Charity tax reliefs: guidance on Charity Commission policy” (2015): “The GAAR makes it clear (!) that taxation is not to be treated as a game where taxpayers can indulge in any contrived or inventive scheme in order to eliminate or reduce their tax liability.”

<https://www.gov.uk/government/publications/charity-tax-reliefs-guidance-on-charity-commission-policy/charity-tax-reliefs-guidance-on-charity-commission-policy>

*Deferring bonus in order to take advantage of announced reduction in tax rates:* This arose in 2013/14 when top rates fell from 50% to 45%. Practitioner-readers are likely to agree that this is ordinary tax planning near the bottom end of the scale. But Mervyn King, then Governor of the Bank of England, is reported to have criticised Goldman Sachs for it.<sup>93</sup> The House of Lords select committee noted that the GAAR will not apply to the deferral of bonuses from one tax year to another,<sup>94</sup> but one might infer that they disapproved none the less for that.

*The Bump Plan* In 2013 a minor political furore arose after David Heaton was secretly filmed, suggesting bonus payments to pregnant employees; if made during the relevant period this would increase the amount of statutory maternity pay. I do not think practitioners would regard that as on the abusive side of the line (though there are many points which need to be made to properly understand the legal and moral analysis, none of which were heard in the public debate).<sup>95</sup> The point was not just political hot air: Heaton had to leave the GAAR panel following criticism from David Gauke (Exchequer Secretary to the Treasury).

*Income transfer between spouses* I think practitioners were surprised that HMRC found this unacceptable in their (ultimately unsuccessful) attack in *Jones v Garnett*.

To digress: It is interesting to note that the same planning has been

---

93 Financial Times, 15 Jan 2013. King is co-author of the excellent (now out of date) *British Tax System* (5<sup>th</sup> ed, 1990).

94 Select Committee on Economic Affairs Report on The Draft Finance Bill 2013 <http://www.publications.parliament.uk/pa/ld201213/ldselect/ldeconaf/139/139.pdf>  
The Select Committee said this was because that “the issue is one concerning the structure of the tax system rather than avoidance involving manipulation of loopholes in the legislation.” More analytically, the reason is that these are not examples of tax abuse (in my sense, which I take to be the same as the definition of “abusive” in the GAAR).

The GAAR guidance makes this point; see 53.8.8 (Postpone disposal: GAAR).

95 In particular: (1) This planning does not give rise to a tax advantage, but to a benefit advantage for the employer; it could not be counteracted by the GAAR. (2) Not every payment to an employee is earnings so it is possible for planning of this kind to fail on the facts. (3) The privacy aspects of secret filming, and the ease with which short clips may misrepresent nuanced positions, seem particularly worrying.

For the background, see Johnson, “Tax, Lies and Hypocrisy” (CCH Tax News, Issue 133 25 September 2013); for the law, see the Statutory Maternity Pay (General) Regulations 1986.

criticised in India:

While tax evasion is universally condemned, there is a disposition in certain quarters to regard tax avoidance as a permissible course of action. We are unable to endorse this view. The mere fact that the income-tax law is not violated does not mean that the procedure which results in tax avoidance is justified. We might take as an illustration the act of introducing, without adequate consideration, one's wife ... as partner in a business of which the assessee himself is a partner. It is an attempt to fraction income and reduce tax liability under a provision of law meant to apply to genuine partnerships. Conduct of this nature, though legal, cannot but be regarded as anti-social.<sup>96</sup>

But different jurisdictions will approach the intractable issues of taxation of families in different ways. I would not go so far as to say that international comparisons are never helpful, but valid comparisons would require a good understanding of both tax systems, which would generally need a team rather than a single author. Isolated quotes are likely to mislead. In the UK, at least, Parliament has decided that income sharing and other inter-spouse transfers are acceptable tax planning, subject to quite limited exceptions.<sup>97</sup>

*Gift of company to political party* A donor who owns a suitable company might arrange that:

- (1) The donor gives the company to the political party.
- (2) The political party extracts the funds by way of dividend.

The gift at stage (1) qualifies for CGT hold-over relief; and the distribution at stage (2) would not be taxable, assuming the party is a company for tax purposes.

It seems that Labour arranged this in 2013, giving rise to a fit of indignation, or purported indignation, from the Tories. An open letter from George Osborne to Ed Milliband provided:

... the Labour Party has gone to great lengths to help your biggest donor,  
... avoid paying tax on a political donation. ...

The Labour Party registered a donation of shares in JML worth £1.65

---

96 Government of India, *Report of the Taxation Enquiry Commission (1953-54)*, Vol II para 5.

97 See 89.1 (Non-dom/non-resident spouse).

million in January 2013, from Mr John Mills. By making a donation in shares rather than as a single cash dividend, it has been reported that Mr Mills managed to avoid a potential tax charge of £724,710.<sup>98</sup> ...

As leader of the Labour Party, and given your previous statements on tax avoidance, such actions by your party appear to be directly at odds with your public statements.

Most importantly, will you now pass the amount of tax that has been avoided to the Exchequer? As you say, this is money that is needed to fund vital public services such as the health service and our schools.<sup>99</sup>

What is one to make of this? I think any practitioner, or anyone who understood the tax background, would regard this as in the category of “sensible tax planning” or, perhaps, ordinary tax planning; in either case, well short of avoidance and opprobrium. The letter could be seen as just an example of debased political debate, meaningless playground insults whose object is just to knock the opposition. It could be taken as a case where ordinary tax planning is regarded as immoral. However, it may be regarded as an illustration of the difficulties which arise if one regards taxation as governed by moral principles distinct from black letter tax law. The letter might then be regarded as a rather subtle contribution to the political/moral debate. Perhaps there are elements of each of these.

### 2.5.9 Context of discussion

It is possible to discuss tax-morality in a lofty, disinterested and high-minded way. What is the good life? What would Aristotle say?

But in practice discussion is invested with flaming indignation, hatred for those who benefit from or support perceived injustices. This is fed by a sense of superiority that we are not like these instruments and accomplices of evil. The result is moral panic, contempt and aggression.<sup>100</sup> There is a great and easily mobilised hostility to anything that can be represented as avoidance. The remedies proposed become ever more penal and more

---

98 This figure is wrong: it represents a tax rate of 44%. The effective rate of tax should have been 36.11% = £600k tax. Perhaps it is a typo. Perhaps it is irony. Perhaps no-one is intended to take the letter so seriously as to check the figures. If this is an indication of the tax advice given to Mr Osborne, it is rather worrying.

99 6 June 2013

100 This is a danger to which any discussion of morality is subject: see Taylor, *A Secular Age* (2007) chapter 18.

discretionary.

The debate sometimes suffers from profound bad faith or hypocrisy. Politicians accuse others of tax-immorality in order to attack their opponents. Or journalists do so to sell papers. A example is when the archive of Tony Benn was transferred to the British Library, under the acceptance in lieu scheme, which one might have thought entirely innocuous.<sup>101</sup>

In 2021, it emerged that:

- (1) Tony & Cheri Blair had (in 2017) incorporated a company (the purchaser).
- (2) The purchaser acquired a BVI property company (holding office accommodation) from an unconnected non-resident company.
- (3) The purchaser liquidated the BVI company and so acquired the land, which was subsequently used for a trading business of Cheri Blair.

The (suggested) avoidance here was that SDLT was not payable, which it could have been if the purchaser had acquired the land directly rather than the BVI company!<sup>102</sup> Of course any practitioner would understand that:

- The choice between a company purchase and an asset purchase is one which Parliament has allowed, is not avoidance, and is so commonplace that no-one would have expected the matter to be dealt by a company purchase.
- The fact that this was a *BVI* company was irrelevant to the SDLT saving, as (more or less) the same saving would have applied to a purchase of a UK property company.<sup>103</sup>

101 Reported by the Telegraph (4 Mar 2019) under the heading “Tories praise Tony Benn’s financial planning as donation of his archive knocks £210,000 off family’s tax bill”. The article shows some signs of a libel readers scrutiny, as it falls just short of an allegation of hypocrisy.

102 The Guardian, 5 Oct 2021 “Tony and Cherie Blair bought property via offshore firm and saved £300,000 in tax”.

103 In the case of a UK company the SDLT saving would have been only slightly reduced by SDRT at the rate of 0.5%.

For a complete tax analysis further points need to be made.

There was also a tax downside to the arrangement as the purchaser acquired the historic acquisition cost of the BVI company; though that too could be avoided by an onward sale of the UK company rather than its asset.

Even the acquisition of the property by the BVI company should not be regarded as avoidance: Non-residents will (almost) always acquire non-residential investment

“Move along, nothing to see here” - but that does not sell news or promote party politics.

### 2.5.10 Conclusion

In short, there is widespread disagreement about the starting point, not to mention finish line, when it comes to the concept of avoidance or on issues of morality in connection with tax avoidance. This should not be a surprise, since the same applies to many contemporary moral issues, for instance, assisted suicide. There is no tribunal to adjudicate arguments on morality, except the court of public opinion, which, as Ibsen observed, is an extremely mutable thing. But disapproval of avoidance, however understood, is now the norm. That that represents a major change of attitude is now forgotten. Changes in morality are generally accompanied by amnesia.

## 2.6 Tax Gap

Another thread in public debate is a vast estimate of the amounts involved. HMRC publish annual figures, with a catchy title, the “tax gap”.<sup>104</sup> This is said to be £35 billion, or 5.3% of tax liabilities, in 2019/20.<sup>105</sup>

Broken down, the HMRC figures are:

Amount £bn	Behaviour	Explanation
6.7	Failure to take reasonable care	
5.2	Criminal attacks	
5.5	Evasion	Excluding hidden economy
5.8	Legal interpretation	Taxpayer/tribunal disagree with HMRC on tax law (excluding avoidance) <sup>106</sup>
4.0	Non-payment	Tax written off as uncollectible

---

property through a company - again from a UK tax viewpoint it makes no difference whether it is a BVI company or established elsewhere.

104 I think this tabloid friendly term originated in the US, where IRS have been measuring the Federal Tax Gap since at least 1993:  
<https://www.irs.gov/statistics/irs-the-tax-gap>

105 HMRC, “Measuring tax gaps 2021 edition,  
<https://www.gov.uk/government/statistics/measuring-tax-gaps>

106 The concept is so arbitrary and subjective that it can fairly be described as ludicrous. CIOT rightly ask why it should be part of the tax gap at all.

3.0	Hidden economy	Income undeclared/understated
3.7	[Non-careless] error	
1.5	Avoidance	
<u>35</u>	<u>Total</u>	

Statistics are only as useful and reliable as the definitions on which they are based. Most of these categories are vague, and assessment of the figures is, to say the least, challenging. I think a certain amount of scepticism is in order. There is a danger that spurious statistics may gain currency and influence policy.<sup>107</sup>

The combination of disparate categories makes the total “tax gap” figure meaningless, but perhaps it is intended only for headline purposes. I write it with scare quotation marks.

IFS say:

we don’t know how much corporate tax is lost to the UK as a result of tax avoidance. This is partly because there is no accepted definition of exactly what constitutes ‘avoidance’ and partly because we lack full information about the activities of firms.<sup>108</sup>

Of course, the fact that an amount is unknown and unknowable does not mean that it is small or unimportant. I wonder if time spent guessing at figures is productive. It is however striking how small a part tax avoidance plays in the “tax gap” figures, compared to the attention it receives.

The IFS report continues:

Importantly, even if we knew that information and could calculate the tax lost to avoidance, it would not be right to assume that, were all avoidance opportunities to be completely removed, the UK would be

---

107 For a critique of the methodology, see Oxford University Centre for Business Taxation “The Tax Gap for Corporation Tax”, (2012)

[http://eureka.sbs.ox.ac.uk/4428/4/TaxGap\\_3\\_12\\_12.pdf](http://eureka.sbs.ox.ac.uk/4428/4/TaxGap_3_12_12.pdf)

The HMRC paper itself acknowledges at B3 that “there are sources of uncertainty and potential error”. (Formerly this read “many sources” but the *many* has been deleted.) The caveat is forgotten in the figures provided, which present a spurious precision, and in public discussion.

For the practical relevance of the data, see Mirrlees Review, *Dimensions in Tax Design* (2010), p.1132.

108 IFS, *Green Budget 2013* p.297 <http://www.ifs.org.uk/budgets/gb2013/gb2013.pdf>

able to collect that full amount. We would expect higher taxes to feed through, at least to some degree, to lower investment and changes in prices such that genuine UK profits may be lower. To the extent that the corporate tax affects prices or wages, or the location of firms' activities (and therefore jobs), there may also be lower receipts from income taxes or VAT.

This is true for all taxes, but particularly for corporation tax:

First, corporation tax is a particularly distortionary form of taxation that can work to reduce investment. This is especially the case for internationally mobile investments because firms will consider tax when choosing where to locate real activities...

Second, the ultimate incidence of corporate tax always lies with households and is borne either by the owners of capital (in the form of lower dividends), by workers (in the form of lower wages) or by consumers (in the form of higher prices). We do not know with any precision who is made worse off as the result of the corporation tax. However, estimates suggest that, because capital tends to be much more mobile than workers or consumers, a significant share of the burden of corporate tax tends to be shifted to domestic factors – and specifically labour. In other words, there is reason to believe that at least a part, and in some cases a large part, of the corporation tax that companies are subject to is ultimately passed on to workers in the form of lower wages.<sup>109</sup>

There is a certain irony in the second point, given the left's enthusiasm for corporation tax; I think most economists agree that the burden of corporation tax is generally borne by employees,<sup>110</sup> though not all. But all that matters for practical politics is that no-one *realises* who pays it.

## 2.7 Avoidance legislation 1955 critique

---

109 IFS, *Green Budget 2013* p.290 <http://www.ifs.org.uk/budgets/gb2013/gb2013.pdf> (footnotes omitted).

110 ETPF Policy Paper 1 "Who bears the burden of corporate income taxation?" (2015) <http://www.etpf.org/papers/PP001CorpTax.pdf>  
European Economic and Social Committee, "The Role of Taxes on Investment to Increase Jobs in the EU – An Assessment of Recent Policy Developments in the Field of Corporate Taxes" (2019) <https://www.eesc.europa.eu/sites/default/files/files/qe-03-19-343-en-n.pdf>

In 1955 the Royal Commission said:<sup>111</sup>

We are disturbed by the criticism that much of the anti-avoidance legislation is obscurely worded and drawn more widely than its purpose requires. ... We doubt if many lawyers could expound with confidence the effect of the 26 sections that make up Part XVIII of the [ITA 1952]. [The Royal Commission quoted the ToA definition of “power to enjoy” to illustrate the point, and continued:] It appears to us that, if the legislation in this field has to be expressed in this way, there is a danger that our system is becoming delusive. For, while it presents the form of statutory control of the subject by Parliament, it means that in substance the assessment of the individual affected and the charge of tax upon him is not determined by law but by the decision of the [Revenue] ... we think that, now that the main lines of this legislation are to be regarded as fully developed (!) and the administration of them has had time to settle down, the opportunity should be taken in the course of the next few years to conduct an expert review of the enactments as a whole... The purpose of the review would be (a) to enquire to what extent, if any, the relevant legislation may have been shown, in the light of experience, to have been drawn too widely for its purpose,<sup>112</sup> (b) to recommend any modifications of the legislation that will make it shorter, briefer, and more precise.

Here are 4 critiques which have become familiar: obscurity, imprecision, provisions drawn too widely (“overkill”), and discretionary application. With hindsight, we see that anti-avoidance legislation was then in its infancy. The 26 sections complained of covered the settlor-interested trust code, ToA and transfer of income streams, with a concision which today one could not dream of.

Nowadays these critiques may be framed in terms of the Rule of Law.

## 2.8 The Rule of Law

### 2.8.1 What is “the Rule of Law”

There is a consensus on the Rule of Law. It is a constitutional principle.<sup>113</sup>

---

111 Cmd. 9474 para 1029

112 The decision in *Vestey* subsequently addressed one of the concerns at (a).

113 Section 1 Constitutional Reform Act 2005.

It is one of four fundamental British values.<sup>114</sup> It is also one of the six values on which the EU is founded<sup>115</sup> though perhaps that matters less after Brexit.

There is no consensus on the meaning of the expression. It is an emotionally charged label for a set of principles, or sub-principles, the content of which is contested. This may not be a bad thing: consensus on the importance of the Rule of Law is only possible because of dissensus as to its meaning. There is a certain irony in that the principle which forbids vague legislation is itself difficult to pin down. But the same is true of other cherished political virtues, such as democracy. A discussion needs a book to itself;<sup>116</sup> but as the term is used in different ways, it is best not to use it without some explanation of how it should be, or may be, understood. This section draws on a paper by Craig, “The Rule of Law” prepared for the House of Lords Constitution Committee.<sup>117</sup>

There is a consensus that the Rule of Law includes at least the following

---

114 The other three are democracy, liberty and tolerance, according to the Government “Prevent Strategy”, Cm 8092 (2011), para 6.58 where opposition to these values is the definition of “extremism”. The point is repeated in the Government “Counter-Extremism Strategy” Cm 9148 (2015): “Extremism is the vocal or active opposition to our fundamental values, including democracy, the rule of law, individual liberty and the mutual respect and tolerance of different faiths and beliefs.”

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/97976/prevent-strategy-review.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/97976/prevent-strategy-review.pdf)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/470088/51859\\_Cm9148\\_Accessible.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/470088/51859_Cm9148_Accessible.pdf)

115 Article 2 TEU provides: “The Union is founded on the values of respect for human dignity, freedom, democracy, equality, the rule of law and respect for human rights...”

116 Raz, *The Authority of Law* (2nd ed., 2009), ch. 11 (“The Rule of Law and its Virtue”); Tamanaha, *On the Rule of Law* (1<sup>st</sup> ed, 2004); Pech, “The Rule of Law as a Constitutional Principle of the EU” (2009)

[http://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=1463242](http://papers.ssrn.com/sol3/papers.cfm?abstract_id=1463242)

For the Rule of Law in a tax context, see Freedman & Vella, “HMRC’s Management of the UK Tax System: The Boundaries of Legitimate Discretion” Legal Research paper No 73/2012 (2012)

[http://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=2174946##](http://papers.ssrn.com/sol3/papers.cfm?abstract_id=2174946##)

117 <http://www.publications.parliament.uk/pa/ld200607/ldselect/ldconst/151/15115.htm>

minimum requirements.<sup>118</sup>

Craig says:

*The Rule of Law and Lawful Authority*

A core idea of the rule of law to which all would subscribe is that the government must be able to point to some basis for its action that is regarded as valid by the relevant legal system. Thus in the UK such action would commonly have its foundation in statute, the prerogative or in common law power.

It follows that tax should be imposed by parliament through legislation.

Craig continues:

*The Rule of Law and Guiding Conduct*

A further important aspect of the rule of law is that the laws thus promulgated should be capable of guiding ones conduct in order that one can plan ones life.

It is from this general precept that Raz deduced a number of more specific attributes that laws should have in order that they could be said to comply with the rule of law. All are related to the idea of enabling individuals to be able to plan their lives. The 'list' includes the following

- (1) laws should be prospective, not retrospective;
- (2) they should be relatively stable;
- (3) particular laws should be guided by open, general and clear rules;<sup>119</sup>
- (4) there should be an independent judiciary;
- (5) there should be access to the courts;
- (6) the discretion which law enforcement agencies possess should not be allowed to undermine the purposes of the relevant legal rules.

I think these are best regarded as distinct principles, albeit with one underlying rationale.

Although not standard usage, in this work I write *Rule of Law* with initial capitals. It is not exactly a technical expression, that suggests a precision of meaning; but the capitals do indicate that it carries considerable intellectual baggage.

---

118 This may be referred to as a thin, formal, procedural or narrow understanding of the Rule of Law.

119 The OUCBT paper spells out an implication of this: "The rule of law requires that taxpayers are able to determine the tax consequences of their actions in advance."

### 2.8.2 Rule of Law v. other values

The Rule of Law is something to boast of,<sup>120</sup> and a feature which makes the UK an attractive place to reside, invest or litigate. The Judicial Office boast:

The Rule of Law represents the cornerstone of liberty and democracy, and is one of the main reasons that the UK attracts global businesses and investors.

Laws in the UK are:

- public (so that everyone knows what they say)
- certain (so that everyone knows where they stand)
- prospective rather than retrospective (so that they cannot be broken before they exist)<sup>121</sup>

The reality may not match the rhetoric. There is nothing in the idea of government by majority to show that the majority will respect the Rule of Law. Rule of Law principles are challenged, or breached, in various aspects of taxation,<sup>122</sup> but the conflict in the context of tax avoidance is particularly deep. Anti-avoidance is facilitated and indeed characterised by features which breach the Rule of Law:

- (1) Legislation which is:
  - (a) obscure
  - (b) vague
  - (c) retrospective
- (2) Administrative discretion, which falls into two types:
  - (a) expressly conferred
  - (b) a consequence, unavoidable but no doubt sometimes intended and welcomed, of obscure or vague legislation
- (3) Soft tax law, ie rules (which may be described or misdescribed as guidance or statements of practice) laid down by HMRC without authority of Parliament. This is typically combined with

---

120 The boast is an old one. See Blackstone's *Commentaries on the Laws of England* (1765) vol 2 chap 37: "a country like this, which boasts of being governed in all respects by law and not by will"; and contrast John Adams "A government of laws, and not of men" (1780).

121 "English Law, UK Courts and UK Legal Services after Brexit The View beyond 2019".

122 See for instance the problems raised by *Lobler* at 2.5.2 (Judicial views).

administrative discretion, both because the terms of guidance in practice are generally vague, but more fundamentally, because HMRC are not usually bound by their guidance and may withdraw retrospectively.

- (4) Overkill is not (or at least, not necessarily) a breach of the Rule of Law. However in practice it is generally accompanied by administrative relaxation, which breaches Rule of Law principles because it is not laid down by Parliament, and because it confers HMRC discretion.

It is desirable to recognise that there is a *trade-off* between conflicting policy aims, the Rule of Law and the combat of avoidance, rather than to fudge the matter by saying, or pretending, that these matters are consistent with the Rule of Law. Indeed there is a set of trade-offs, because the Rule of Law is a set of rules. For instance, if a TAAR has a clearance procedure, then the ability of taxpayers to plan with confidence is increased, which supports aspect of the Rule of Law; but HMRC discretion is also increased, which breaches another aspect.

Then one can face the choices aware of the consequences of one choice or another. Craig says:

... the rule of law in the above sense is only one virtue of a legal system, and may have to be sacrificed to attain other desired ends. We may feel that the rule of law virtues of having clear, general laws should be sacrificed if the best or only way to achieve a desired goal is to have more discretionary, open-textured legal provisions. This may be so where it is not possible to lay down in advance in the enabling legislation clear rules in sufficient detail to cover all eventualities. Modifications to the rule of law in this manner are not somehow forbidden or proscribed. Given that it is only one virtue of a legal system it should not prevent the attainment of other virtues valued by that system.

In 1974, Lord Simon put the Rule of Law above the need to combat tax avoidance:

Disagreeable as it may seem that some taxpayers should escape what might appear to be their fair share of the general burden of national expenditure, it would be far more disagreeable to substitute the rule of

caprice for that of law.<sup>123</sup>

The cure could be worse than the disease. In contemporary debate it is rare to find a statement in such strong terms. An exception comes from the Joint Committee on Statutory Instruments, discussing this provision:

If—

- (a) a person enters into any arrangements; and
- (b) the main purpose, or one of the main purposes, of the person in entering into the arrangements is to avoid any obligation under these Regulations,

these Regulations are to have effect as if the arrangements had not been entered into.<sup>124</sup>

The Committee said:

... people who are satisfied that the terms of the regulations do not apply to them will be at constant risk of HMRC initially concluding that they have attempted to avoid the regulations and that the regulations therefore apply anyway – that being the default position in the absence of an appeal. It is unclear that such a result, which breaches the principle of certainty, would be within the contemplation of enabling powers that do not contain express provision for the type of anti-avoidance provision used.

The fact that Parliament has, notably in Part 5 of the Finance Act 2013, [the GAAR] enacted anti-avoidance provisions which are similarly imprecise or discretionary is irrelevant to the security of such provisions in subordinate legislation, in the absence of express enabling powers. The Committee accordingly reports regulation 21 for a doubt as to whether it is *intra vires*.<sup>125</sup>

But this example also illustrates the weakness of the Rule of Law in the UK:

(1) Regulation 21, whose validity is in doubt, remains in the legislation.

---

123 *Ransom v Higgs* 50 TC 1 at p.94. A similar spirit informed the decision in *Vestey v HMRC* in 1979; see 46.2 (Charge on transferor).

124 Reg 21 The Taxes (Base Erosion and Profit Shifting) (Country-by-Country Reporting) Regulations 2016.

125 <http://www.publications.parliament.uk/pa/cm201516/cmselect/cmstatin/461-ix/46103.htm#inst01>

The Committee report was published after the provision came into force.

- (2) Identical wording is found in:
- (a) reg 23 International Tax Compliance Regulations 2015<sup>126</sup>
  - (b) The residence-property TAAR

Tax avoidance is an issue of international tax as well as domestic tax, and in the US, the Rule of Law is, perhaps, more highly valued.<sup>127</sup> Bob Stack (US Treasury Deputy Assistant Secretary for International Tax Affairs) criticised OECD BEPS reforms, and UK diverted profits tax, for breaching Rule of Law/international tax law principles:

Rather than producing administrable rules, the BEPS negotiators seemed to be opting instead for giving wide discretion to tax officials.<sup>128</sup> This brought into question the whole international tax system. Do the international tax rules even matter anymore?" Do we really need a standard setter to say, 'Tax administrators can use the pornography test to catch tax avoidance. We know it when we see it. And we will get you if we want to'?...

[Diverted Profits Tax] ... took us further down the road in which a taxpayer is at the mercy of whatever a tax auditor decides is the right amount to pay. What made this particularly perturbing was that these measures emanated not from the usual suspects such as India, China, Brazil and South Africa, but from strong traditional residence countries [UK and Australia] that happened to be two of our closest friends.<sup>129</sup>

### 2.8.3 Breach of Rule of Law

Craig says:

The fact that a law is vague or unclear, and that it therefore provides little by way of real guidance for those affected by it, will not lead to a statute being invalidated in the UK.

---

126 The argument that reg. 23 is ultra vires is weaker than for reg. 21, because unlike the position for the 2016 regulations, CRS authorises and requires "rules to prevent ... practices intended to circumvent the reporting and due diligence procedures". See 121.34 (CRS TAAR). Perhaps the argument is still tenable. Perhaps reg 23 will be read purposefully and somewhat restrictively.

127 Though it is difficult to assess the validity of such a broad generalisation and the statement became more doubtful under the former Trump administration.

128 Stack probably had in mind the PPT; see 104.8 (Principal purpose test). For another example, see 8.18 (Tie-breaker: mutual agreement).

129 Speech to OECD International Tax Conference, 2015, as reported <https://www.bna.com/beps-troublegloves-off-b17179928708/>

In relation to secondary legislation (statutory instruments) a court could strike down provisions on the grounds of breach of the Rule of Law (which might be said to be *ultra vires*, in the absence of very clear or direct authority in the authorising act of parliament). In relation to primary legislation, a court could issue a statement of incompatibility. But in a tax context this has not happened.

In other words, the Rule of Law lacks full justiciability. Perhaps ironically, the Rule of Law is not in the strict sense a rule of law. To adopt Dworkin's distinction, it is a principle and not a rule. As such it may encourage a court to interpret a statute more narrowly, in favour of the individual. In this way, however deeply, inchoately, and inconsistently, Rule of Law considerations do to some extent affect case law outcomes<sup>130</sup> and perhaps, tax policy (though I am less sure about that.)

#### 2.8.4 *Is tax Rule of Law compliant*

In earlier editions of this work, I said:

The UK tax system is largely based on the rule of law rather than informal practice and discretion.

By 2014, as TAARs and other anti-avoidance were multiplying, I qualified the boast, saying: “that is less the case than formerly”.<sup>131</sup>

In 2014 the City of London Law Society said:

2.4 ... tax policymakers are insufficiently conscious of the importance of the rule of law – that is, the constitutional right of a citizen to determine the law applicable to him at any given date. Related to this is a similar problem of lack of respect for legislation as the only proper source of law, and over-reliance on guidance.<sup>132</sup>

---

130 In the context of rules which would prevent access to a Court, the Rule of Law affects outcomes more directly; see for example *Haworth v HMRC* [2019] EWCA Civ 747 at [66].

131 Kessler, *Taxation of Non-Residents and Foreign Domiciliaries* (13th ed., 2014) para 2.4 (The Rule of Law).

132 Response to OTS competitiveness review (2014)  
<http://www.citysolicitors.org.uk/attachments/article/105/20140605%20Response%20to%20Office%20of%20Tax%20Simplification%E2%80%99s%20Competitiveness%20review%20-%20initial%20thoughts%20and%20call%20for%20evidence.pdf>

In 2015 the Law Society made the same point:

... in recent years, there has been a tendency on the part of government to allow the rule of law in taxation to risk being eroded in the interests of making the executive more effective, in particular in seeking to combat avoidance...

The question “is tax Rule of Law compliant” seems meaningful but it oversimplifies the issue(s). As the Rule of Law is a set of rules, it is not one question but a set of questions. In relation to each of the rules, the question is not *whether* tax is Rule of Law compliant but *to what extent*. To answer that question fully, one would test every rule of tax law against each of the principles of the Rule of Law set out above. As tax is vast, discussion must be selective and impressionistic.

In the broadest outline, then, to what extent is it the case that:

*Taxpayers are able to determine the tax consequences of their actions in advance?* Increasingly not, obscurity, vagueness and overkill are rife, mitigated by HMRC guidance or concession mislabeled as guidance.<sup>133</sup>

Most supporters of the GAAR deny or downplay its uncertainty, but, significantly, Jim Harra, Director General, Business Tax at HMRC applauded it:

It will also create an additional level of uncertainty for the promoters and users of schemes. I believe that that will be a deterrent.<sup>134</sup>

*Is tax imposed by Parliament or HMRC?* Increasingly the latter.

*Is there a right of appeal to a Court?* Not quite always.<sup>135</sup>

*Is tax law retrospective?* Sometimes, but I do not detect a trend towards increasing retrospectivity.

---

No-one appears to have taken any notice of the Law Society’s lobbying.

133 Examples include: (1) s.30 FA 2014 (avoidance by transfer of corporate profits); (2) TAARs, which have become standard in new legislation, especially those of the tax-advantage type. See for instance, 61.21 (Capital-loss TAAR).

134 Hansard, Public Accounts - Minutes of Evidence (6 December 2012)  
<http://www.publications.parliament.uk/pa/cm201213/cmselect/cmpubacc/788/121206.htm>

135 For instance: (1) The Code of Practice on Taxation for Banks; there is no right of appeal against HMRC determination of a breach of the code. (2) Follower notices: there is no right of appeal against the issue of such a notice on a number of important grounds.

*Is tax law stable?* No, though this has always been the case.

Breaking down the issues under these separate heads illustrates what a disparate group of principles fall within the concept of the Rule of Law. I doubt whether “the Rule of Law” is a helpful label in the context of tax law. It conflates disparate issues and so confuses discussion. While it gives a critique gravitas - the Rule of Law is a powerful slogan - it lies at a level well above the pragmatism that is said to characterise an Anglo-Saxon approach to large philosophical, political and economic issues.

However that may be, we are not, for the most part, as disturbed about these problems as was the Royal Commission in 1955. Should we be? Discuss.

## 2.9 Retrospective tax legislation

There is general agreement that the Rule of Law includes a prohibition of retrospective legislation.

Although a sub-topic of the Rule of Law, the topic deserves a separate discussion. A full discussion requires a book to itself.<sup>136</sup>

### 2.9.1 *Meaning of retrospective*

It seems to me that retrospectivity is best considered as a matter of degree, not a matter of yes/no, either/or. Legislation not retrospective in form may be retrospective in effect, if it operates by reference to arrangements carried out in the past, and/or lacks fair and appropriate transitional provisions. In assessing whether (or, better, the extent to which) a provision is retrospective, one should have regard to the object of the prohibition on retrospective legislation, which is that a person should be reasonably able to plan their affairs on the basis of what the law says. In this sense, legislation backdated to the date of an announcement of a proposed change in the law is not retrospective, or at least not objectionably so.

On this analysis, to determine whether a provision is retrospective is an

---

<sup>136</sup> For an illuminating discussion of the policy issues in a US context, see Shaviro, *When Rules Change* (1<sup>st</sup> ed, 2000). UK taxpayers may on this point look with envy to the USA, where a norm opposing retrospective legislation is “strongly rooted in popular sentiment, legislative practice, and perhaps even the Constitution as the courts are likely to interpret it” (p.104).

evaluative exercise. So those defending legislation can and generally do contend, with varying degrees of plausibility, that the relevant provision is not retrospective.<sup>137</sup>

The issue does not usually arise in a justiciable context. We are in the realm of politics, not law.

### 2.9.2 *Retrospective legislation: Extent*

It is perhaps only a slight exaggeration to say that retrospective tax legislation has become a matter of routine, having been applied in particular to a somewhat arbitrary selection of tax avoidance schemes. Examples include:

<b>Topic</b>	<b>Date</b>	<b>See para</b>
<i>Retrospective reversal of avoidance schemes:</i>		
DT relief for partnership	1987	82.24
s.23 FA 2012 (loan relationships)	2012	<i>Not discussed</i>
<i>Provisions retrospective in effect:</i>		
Pre-owned assets	2004	80.39.2
IHT: former Accumulation & Maintenance trusts	2006	<i>Not discussed</i>
Aspects of the ITA remittance rules	2008	1.8.3
Disallowance of debts for IHT	2013	76.35.2

Generally, I think the norm requiring commencement rules to avoid retrospective effect has weakened since about 2000, perhaps in line with changed attitudes to tax avoidance.

### 2.9.3 *Retrospective legislation: Protocol*

In Budget 2011, the coalition Government published a statement on retrospective legislation, grandly entitled a “Protocol” with a capital P. The most important part provides:

The Government has made clear its aim to strike the right balance between  
 [1] restoring the UK tax system’s reputation for predictability, stability and simplicity (!) and

---

137 See for instance HM Treasury, “Section 95 of the Finance Act 2019: report on time limits and the charge on disguised remuneration loans” (March 2019)  
[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/789160/DR\\_loan\\_charge\\_review\\_web.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/789160/DR_loan_charge_review_web.pdf)

[2] preserving its ability to protect the Exchequer by making changes where necessary.

In particular, changes to tax legislation where the change takes effect from a date earlier than the date of announcement will be wholly exceptional.<sup>138</sup>

The attempt to formulate the principles behind a decision to enact retrospective legislation is to be applauded. But the sanction (if any) for ignoring the protocol is political only.

The 2011 statement does not purport to bind future governments. The Cameron administration (2015 - 2016) did not resile from it, but the extent to which the current or subsequent administrations will follow it remains to be seen. The protocol has perhaps shifted political debate from whether or not legislation is justified to debate on whether or not legislation is retrospective, but it is doubtful whether it has had much if any effect on the outcome.

#### 2.9.4 *Retrospective legislation: Validity*

The Rule of Law is not justiciable as such and so neither is the restriction on retrospective legislation. Human Rights challenges have not been successful.<sup>139</sup> The protocol has not changed this. That is self-evident, but if authority is needed:

The Protocol was an extra-statutory announcement or promise made by the government. As such, it operated: in the realm of politics, not of the courts, and the question whether the government should be held to such a promise is a political rather than a legal matter... The sovereignty of Parliament cannot be confined by extra-statutory promises like the Protocol.<sup>140</sup>

I think this is as it should be: the content of legislation is in principle a matter for parliament and not for the courts.

#### 2.9.5 *Retrospective legislation: Politics*

---

138 [http://webarchive.nationalarchives.gov.uk/20130129110402/http://cdn.hm-treasury.gov.uk/2011budget\\_taxavoidance.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://cdn.hm-treasury.gov.uk/2011budget_taxavoidance.pdf)

139 See *Huitson (R, oao) v HMRC* [2011] STC 1860; *APVCO 19 Ltd (R, oao) v HM Treasury* [2015] EWCA Civ 648; *Zeeman v HMRC* [2020] EWHC 794 (Admin).

140 *APVCO 19 Ltd (R, oao) v HM Treasury* [2015] EWCA Civ 648 at [58].

Various reasons have been given to justify retrospective legislation.

One is that it concerns an avoidance scheme which will fail (or so the Government believe). If that is true, the legislation is unnecessary; if not (and it is generally debatable) it is not a good reason.

Another is that it concerns an abusive avoidance scheme (however that flexible term may be understood). Whether that justifies retrospective legislation is ultimately a political question on which views differ depending on how much one values the Rule of Law. It is arbitrary and unfair in that a few particular schemes are retrospectively stopped and others – no less elaborate, artificial and abusive – are not. Pragmatists (to whom the Rule of Law is of little interest) should bear in mind that retrospective legislation increases the “legal risk”, a measure under which the UK falls low on international surveys, and the lowering of the UK’s reputation in that regard has a significant albeit intangible cost. I suspect major factors in picking on some arrangements may include salience, politics, and the amount of money involved.

#### 2.9.6 *Retrospective relieving legislation*

Retrospective legislation has also become common to provide relief for unintended charges under (what the need for retrospective legislation shows to be) ill thought out legislation. The policy issues are different here. So far as retrospective legislation favours the taxpayer, most would regard it as unobjectionable on Rule of Law grounds; even to the Rule of Law purist, it is less objectionable than the alternative of extra-statutory concession. But the need for it on a regular basis should cause concern about the quality of the tax legislation process.

#### 2.9.7 *Retrospective legislation: Future*

How often will retrospective legislation be used in the future? What advice can anyone give to taxpayers seeking to know their position? Prior to the enactment of the GAAR, I said:

Much depends on the politics of the day, but I guess that retrospective legislation will continue to be a rare response; a popular scheme carried out by many taxpayers and involving larger sums is certainly more at risk than others.<sup>141</sup>

---

141 Kessler, *Taxation of Non-Residents and Foreign Domiciliaries* (7<sup>th</sup> ed., 2008), Vol.1

The compatibility of the GAAR with the Rule of Law is open to debate, on the grounds of vagueness in particular. But one positive consequence may be (and should be) at least to restrict the practice of retrospective anti-avoidance legislation; wholly retrospective legislation should less often be necessary. But effectively retrospective legislation, in the form of unfair commencement rules, will no doubt continue.

## 2.10 TAAR/unallowable purpose test

### 2.10.1 *No universal anti-avoidance rule*

There is no *universal* rule that tax avoidance is ineffective. In *Hurstwood Properties v Rossendale BC*:<sup>142</sup>

We emphasise that this conclusion is not founded on the fact that the defendant's only motive in granting the lease was to avoid paying business rates, although that was undoubtedly so. If the leases entered into by the defendants had the effect that they were not liable for business rates, their motive for granting the leases is irrelevant.

Instead we have somewhat more focussed rules - though still extremely wide ranging.

### 2.10.2 *TAAR terminology*

TAAR stands for “targeted anti-avoidance rule”. It is used to describe unallowable purpose tests in specific UK tax codes<sup>143</sup> (as opposed to the GAAR, which is an unallowable purpose test which applies throughout taxation).

As far as I know, the term “TAAR” was coined by HMRC and first used in a press release of 5 December 2005. The term “unallowable purpose” was first used by Parliamentary Counsel in 1996, in the context of loan relationships.<sup>144</sup>

Before then the term used was motive (or purpose) test. Those labels remain in use primarily for older TAARs, such as the ToA motive defence.

---

142 [2021] UKSC 16 at [51].

143 TAAR may also refer to the wider anti-avoidance rule of which an unallowable purpose test forms part; but I here focus only on the unallowable purpose test.

144 See Para 13 sch 9 FA 1996, now s.441 CTA 2009.

“TAAR” is best regarded as a technical term, detached from its literal meaning. So IFS can say without obvious irony that:

TAARs need to be well targeted ... costs can outweigh the ... lost revenues when a poorly targeted TAAR is compared with a well-targeted TAAR.<sup>145</sup>

“TAAR” is a tendentious, approbative term; who could object to *targeted* anti-avoidance? Parliamentary Counsel rightly do not use it in statutory drafting. “Unallowable purpose test” is more transparent, but clumsy. An appropriate term might be “specific anti-avoidance rule” (SAAR) but that is not in common use. So slightly reluctantly, I use “TAAR” in its technical sense in this work.

### 2.10.3 *Types of TAAR*

The number of TAARs is very large.<sup>146</sup> Although there is a variation of wording, TAARs share a common framework or frameworks. I would distinguish three types of TAAR, depending on the nature of the unallowable purpose, and coin the following terminology to describe them:

<b>Unallowable purpose expressed as</b>	<b>Type of TAAR (my term)</b>
Tax avoidance (in strict sense)	Avoidance-purpose TAAR
Obtaining a tax advantage	Tax-advantage TAAR
Avoiding application/effect of specified rules	Application/effect TAAR

A tax-advantage style TAAR is very wide, if one understands “tax advantage” to include cases where there is no element of tax avoidance.

An application/effect style TAAR may be wider still. The Joint Committee on Statutory Instruments said this wording is too wide and vague.<sup>147</sup> But no-one has taken any notice of that. It continues to be a common form (perhaps it will become the most common form) for new TAARs.

<sup>145</sup> The same report refers later to a “wide-ranging TAAR”. IFS, “Countering Tax Avoidance in the UK” TLRC discussion paper 7 (2009), para 8.18  
<http://www.ifs.org.uk/comms/dp7.pdf>

<sup>146</sup> Unallowable Purpose Tests Draft Guidance p.7 gave the number as “over 200” in 2009. The number increases with every Finance Act. For the Draft Guidance, see 49.1 (Motive defence: Introduction).

<sup>147</sup> See 2.8.2 (Rule of Law v. other values).

The same code may include both a tax-advantage TAAR (so it only applies if the taxpayer has the purpose of obtaining a tax advantage) and an application/effect style TAAR (so arrangements are disregarded if their purpose is to secure that the code does not apply).

TAAR wording sometimes includes a commerciality test.<sup>148</sup> It sometimes includes “reasonable to assume/conclude” wording.<sup>149</sup> Here is a table of TAARs discussed in this book identifying these features:

---

148 See 5.2 (Commercial).

149 See App. 2.21 (Reasonable-to-assume).

Topic	Type of TAAR	Para	Test	Reasonable	Commercial	Date
ToA	Tax avoidance	49.1	Transfer/assoc ops	Y	Y	1936/2005
TiS (CT)	Tax advantage	– <sup>150</sup>	Transactions in securities	Y		1960
CGT reorganisations	Tax avoidance	53.18.4	Arrangement		Y	1977
Loan relationships	Tax advantage	2.12.5	Transaction	Y		1996
SDLT group relief	Tax avoidance	49.40.3	Transaction		Y	2005
Capital loss	Tax advantage	53.25	Arrangements			2007
Mixed fund	Tax advantage	19.10	Arrangements			2008
TiS (IT)	Tax advantage	52.10	Transaction in securities			2010
s.3 TCGA	Tax avoidance	60.17	Arrangements			2012
Remittance investment relief	avoidance	18.7	Arrangements			2012
Sales relief	Tax avoidance	18.40.6	Arrangement			2012
GAAR	Tax advantage	– <sup>151</sup>	Arrangements	Y		2013
IHT deduction of debt	Tax advantage	76.37	Discharge of liability		Y	2013
DIMF	Application	69.12	Arrangements			2015
Carried interest	Application	69.21	Arrangements			2015
CRS	Application	121.34	Arrangements			2015
Country reporting	Application	2.8.2	Arrangements			2016
Land-dealing	Tax advantage	21.4	Arrangement			2016
Transactions in land	Tax advantage	21.15	Arrangement			2016
Royalty deemed source	Effect	31.8.6	Arrangements			2016
Royalty withholding tax	Effect	31.11.2	Arrangements			2016
Winding up	Tax advantage	29.8.4	Winding-up	Y		2016
Hybrids	Tax avoidance	87.23	Arrangements			2016
Residence-property	Effect	78.17	Arrangements			2017
Profit fragmentation	Tax advantage	50.16	Arrangements	Y		2019
Land-rich company	Tax advantage	54.13.1	Arrangements			2019
Offshore IP receipts	Tax advantage	31.35	Arrangements			2020

This is not a full list, but it is evident that the number of TAARs has exploded since about 2012; though unannounced, and not much discussed, this constituted a major change in tax policy.

The most litigated TAAR is the TiS purpose test, though in recent years there have been more cases on the loan relationship TAAR. Cases (and guidance) on one TAAR can shed light on others, though one must allow for differences of context and wording. Cases on one TAAR have been cited in cases on another TAAR:

<sup>150</sup> Section 734 CTA 2010, not discussed in this work, but too important to omit here.

<sup>151</sup> I do not discuss the GAAR as a discrete topic in this book, but GAAR guidance is discussed in many contexts.

- (1) ToA cases cited in TiS cases (& vice versa)<sup>152</sup>
- (2) Pre-2010 TiS cases may be relevant to the current IT TiS code

#### 2.10.4 *Disentangling issues*

Discussion of (say) a tax advantage TAAR can logically be split into a number of distinct issues:

- (1) Is there a tax advantage (with a sub-issue, the meaning of tax advantage)
- (2) Is there a purpose to obtain a tax advantage (with sub-issues as to the meaning of purpose and how to ascertain purpose)
- (3) Is that a “main” purpose

But in practice discussion easily segues from one to the other.

#### 2.10.5 *Consequence of TAAR*

If the unallowable purpose condition of a TAAR is met, the consequence may be as follows:

##### **Consequence of TAAR**

##### **My terminology**

Precisely specified in the TAAR:

- (1) Disapply a specified relief
- (2) Apply specified anti-avoidance rules

Counteraction (details unspecified)

Counteraction-style TAAR

Disregard effect of arrangements

Disregard-style TAAR

Here is a table of consequences of TAARs discussed in this book:

<b>Topic</b>	<b>Type of TAAR</b>	<b>Para</b>	<b>Consequence</b>	<b>Date</b>
ToA	Tax avoidance	49.1	Apply ToA rules	1936
TiS (CT)	Tax advantage	–	Counteraction	1960
CGT reorganisations	Tax avoidance	53.18.4	Disapply reorganisation relief	1977
TiS (IT)	Tax advantage	52.10	Counteraction	1960/2010
Loan relationships	Tax advantage	2.12.5	Credit/debit disallowed	1996
SDLT group relief	Tax avoidance	49.40.3	Disapply group relief	2005
Capital loss	Tax advantage	53.25	Disapply loss relief	2007
Mixed fund	Tax advantage	19.10	Just and reasonable	2008
s.3 TCGA	Tax avoidance	60.17	Apply s.3 rules	2012
Remittance investment relief	Tax avoidance	14.7	Disapply relief	2012
Sales relief	Tax avoidance	18.40.6	Disapply sales relief	2012

<sup>152</sup> In *Willoughby* in the Court of Appeal, *Brebner*, a TiS case, was cited in the context of the ToA motive defence.

GAAR	Tax advantage	– <sup>153</sup>	Counteraction	2013
IHT deduction of debt	Tax advantage	76.37	Disallow debt	2013
DIMF	Application	69.12	Disregard arrangement	2015
Carried interest	Application	69.21	Disregard arrangement	2015
CRS	Application	121.34	Disregard arrangement	2015
Country reporting	Application	2.8.2	Disregard arrangement	2016
Land-dealing	Tax advantage	21.4	Counteraction	2016
Transactions in land	Tax advantage	21.15	Counteraction	2016
Royalty deemed source	Effect	31.8.6	Disregard arrangement	2016
Royalty withholding tax	Effect	31.11.2	Disregard arrangement	2016
Winding up	Tax advantage	29.8.4	Apply winding-up rule	2016
Hybrids	Tax avoidance	87.23	Counteraction	2016
IHT Residence-property	Effect	78.17	Disregard arrangement	2017
Profit fragmentation	Tax advantage	50.16	Apply profit fragment'n code	2019
Land-rich company	Tax advantage	54.13.1	Counteraction	2019
Offshore IP receipt	Tax advantage	31.35	Counteraction	2020

The disregard-style TAAR approach is novel and problematic. What does one regard and what does one disregard? For one set of examples, see 78.17 (Sch A1 TAAR).

## 2.11 “Main” purpose

TAARs generally refer to main purpose.<sup>154</sup>

I consider “purpose” elsewhere,<sup>155</sup> but here consider “main” purpose. In *Travel Document Service v HMRC*:

I do not accept that, as was submitted by [counsel for HMRC], “main”, as used in paragraph 13(4) of schedule 9 of FA 1996, means “more than trivial”. A “main” purpose will always be a “more than trivial” one, but the converse is not the case. A purpose can be “more than trivial” without being a “main” purpose. “Main” has a connotation of importance.<sup>156</sup>

<sup>153</sup> I do not discuss the GAAR as a discrete topic in this book, but GAAR guidance is discussed in many contexts.

<sup>154</sup> The ToA motive defence is an exception here (omitting the word *main*); see 49.4 (Enactment history).

The CT TiS TAAR refers to *object* (not *purpose*) but the meaning is the same: see 49.11.1 (Purpose: Terminology).

<sup>155</sup> See the discussion beginning at 49.9 (Purpose words: Terminology).

<sup>156</sup> [2018] EWCA Civ 549 at [48]. This was said in relation to the main purpose test in the loan relationship TAAR, but the comment applies generally in TAARs.

HMRC formerly argued that:

any purpose which is more than incidental is prima facie a main purpose.<sup>157</sup>

But that is no longer tenable.

One sometimes sees the phrase “more than mere icing on the cake”<sup>158</sup> but that stale metaphor does not help much, if at all.

In applying a TAAR, one looks at the purpose of the whole arrangement. In *Euromoney v HMRC*.<sup>159</sup>

the scheme or arrangements must be considered as a whole, rather than considering one element in isolation from the other elements.

In that case the arrangement was an exchange of shares for (1) shares worth \$85m and (2) loan notes worth \$21. The loan notes were issued (rather than cash, as originally proposed) for reasons held to be tax avoidance.<sup>160</sup> But in the context of the whole arrangement, the loan notes were a small element, and avoidance was held to be a purpose, but not a main purpose, of the arrangement, even though it was the main purpose of one of the steps in the arrangement.

## 2.12 “Tax advantage”

### 2.12.1 *Tax advantage: Definitions*

The expression “tax advantage” was first used in TAARs but it is now found elsewhere:

158 *IRC v Sema Group Pension Scheme* 74 TC 593.

159 [2021] UKFTT 61 (TC) at [81].

160 See 49.14.2 (How evident is “evident”).

It is always defined. There is no single standard definition, but the definitions generally adopt common form wording, with minor variations, so it is helpful to consider the definitions together as a single topic.

The expression was first used in the TiS purpose test in 1960.<sup>161</sup> That definition survives in the current CT version of the rules and elsewhere.

I discuss here the following definitions:<sup>162</sup>

<b>Definition (my terminology)</b>	<b>Reference</b>
IT/CGT definition	<i>Many</i>
GAAR definition	s.208 FA 2013
CT definition	s.1139(2) CTA 2010
IHT definition	s.162A(8) IHTA

<b>IT/CGT definition</b> <sup>163</sup>	<b>GAAR definition</b>	<b>IHT definition</b>	<b>CT definition</b>
“corporation tax advantage” means—	A “tax advantage” includes—	“tax advantage” means—	“Tax advantage” means—
(a) a relief from corporation tax or increased relief from corporation tax,	(a) relief or increased relief from tax, <sup>164</sup>		(a) a relief from tax or increased relief from tax,

161 Section 43(4)(g) FA 1960.

162 TiS has a slightly non-standard definition: see 52.13.1 (“Income tax advantage”).

163 I set out s.732(1) CTA 2010 as an example of this form. The actual tax referred to varies from place to place, but in other respects this definition is standard.

164 In the GAAR definition itself, the word “tax” is of course widely defined. Section 206(3) FA 2013 provides:

“The general anti-abuse rule applies to the following taxes—

- (a) income tax,
- (b) corporation tax, including any amount chargeable as if it were corporation tax or treated as if it were corporation tax,
- (c) capital gains tax,
- (d) petroleum revenue tax,
- (da) diverted profits tax,
- (e) inheritance tax,
- (f) stamp duty land tax, and
- (g) annual tax on enveloped dwellings.”

(b) a repayment of corporation tax or increased repayment of corporation tax,

(b) repayment or increased repayment of tax,

(b) a repayment of tax or increased repayment of tax,

(c) the avoidance or reduction of a charge to corporation tax or an assessment to corporation tax, or

(c) avoidance or reduction of a charge to tax or an assessment to tax,

(a) the avoidance or reduction of a charge to tax, or

(c) the avoidance or reduction of a charge to tax or an assessment to tax,

(d) the avoidance of a possible assessment to corporation tax.

(d) avoidance of a possible assessment to tax,

(b) the avoidance of a possible determination in respect of tax.

(d) the avoidance of a possible assessment to tax,

(e) deferral of a payment of tax or advancement of a repayment of tax, and

(f) avoidance of an obligation to deduct or account for tax.<sup>165</sup>

(da) the avoidance or reduction of a charge or assessment to a charge under Part 9A of TIOPA 2010 (controlled foreign companies),

165 I think para (f) is referring to withholding tax.

(e) the avoidance or reduction of a charge or assessment to the bank levy under Schedule 19 to FA 2011 (the bank levy), or

(f) the avoidance or reduction of a charge to diverted profits tax.

The drafter sometimes adds a provision that:

it does not matter whether the avoidance or reduction is effected—

- (a) by receipts accruing in such a way that the recipient does not pay or bear income tax<sup>166</sup> on them, or
- (b) by a deduction in calculating profits or gains.

This also derives from the original 1960 provision. It is hard to see what it adds, and it probably adds nothing.<sup>167</sup> But as the precedent is there it has often been followed.

The GAAR definition is slightly wider than the standard IT/CGT definition:

- (1) It has become an inclusive definition. But since it is so widely defined, it is not easy to think of anything which is a tax advantage which does not fall within paras (a) to (f).
- (2) Paras (e) and (f) are added.

Post-2013 TAARs often adopt the GAAR definition, either by reference or repeating it verbatim, (though generally with a narrower definition of “tax”).

The standard IHT definition is based on the standard IT/CGT definition

166 See App.2.4.1 (Bear tax by deduction or otherwise).

167 This is (almost) self-evident, but if authority is needed, see *HMRC v Hyrax Resourcing Ltd* [2019] UKFTT 175 (TC) at [185]: “I would say that those additional words are unnecessary as that meaning is implicit in the first part of the definition ...”.

of tax advantage, adapted as appropriate for IHT.

### 2.12.2 Tax advantage: Comparators

The context of each TAAR is important, but some general comments can be made.

The GAAR guidance provides:

The concept of a ‘tax advantage’ is common in UK tax legislation. The language suggests that in deciding whether an advantage arises the actual tax position should be compared with another tax position.

The appropriate comparison or alternative tax position will depend on the facts, but will usually derive from the arrangements that would have occurred without the abusive tax purpose (which may include no arrangement at all).

In situations where there is more than one alternative arrangement that might have been adopted if the taxpayer had not adopted an abusive arrangement, then the appropriate comparison would be the transaction that the taxpayer would most likely have carried out.<sup>168</sup> This might not be the arrangement that would give rise to the greatest tax liability.<sup>169</sup>

The loss-TAAR guidance<sup>170</sup> proposes a test to help identify the main purpose:

... it will be relevant to draw a comparison in order to consider whether, in the absence of the tax considerations:

[1] the transaction giving rise to the advantage would have taken place at all;

[2] if so,

[a] whether the tax advantage would have been of the same

---

168 Footnote original: This follows the approach adopted by Lord Hoffmann in the Hong Kong case *IRC v Tai Hing Cotton Mill* (CACV 343/2005): “[The Commissioner] would not be entitled, as the more alarmist submissions of counsel for the taxpayer suggested, to make an assessment on the hypothesis that the taxpayer had entered into an alternative transaction which attracted the highest rate of tax. That would not be a reasonable exercise of power. But she may adopt the hypothesis which the evidence suggests was most likely to have been the transaction if the taxpayer had not been able to secure the tax benefit.”

169 HMRC “GAAR Guidance” (2015) para C2.5

<https://www.gov.uk/government/publications/tax-avoidance-general-anti-abuse-rules>

170 See 63.19 (Capital-loss TAAR).

- amount;<sup>171</sup> and
- [b] whether the transaction would have been made under the same terms and conditions.

I refer to this as a “**but-for**” test. It is not a decisive test.

Where the taxpayer passes the but-for test, ie the same arrangements would be made even without the tax advantage, it is likely that tax is not a main purpose. But tax *might* still be a main purpose. A person may have two main purposes, P1 (non-tax) and P2 (tax) either of which may be sufficient to cause the arrangements.

Where the taxpayer fails the but-for test, ie the same arrangements would *not* have been made but-for the tax advantage, it is likely that tax is a main purpose. A person may have two purposes, P1 (non-tax) and P2 (tax), where P1 is the main purpose (but not sufficient to trigger the arrangements). P2 is just enough, the straw that breaks the camel’s back, but not a main purpose in itself. But that scenario seems somewhat implausible.

Elsewhere in the loss-TAAR guidance, HMRC say:

So to determine whether or not the TAAR applies all the circumstances surrounding the arrangements have to be taken into account, considering:

- the overall economic objective of the arrangements,
- whether that objective is one that the participants might be expected to have, and which is genuinely being sought, and
- whether that objective is being fulfilled in a straightforward way, or additional, complex or costly steps have been inserted.

### 2.12.3 *Loan relationship TAAR guidance*

The guidance on the loan relationship unallowable purpose test is lengthy, but worth setting out in full.

Section 441 CTA 2009 provides the rule. In short:

- (1) This section applies if in any accounting period a loan relationship of a company has an unallowable purpose.
- (2) The company may not bring into account for that period for the

---

171 Para [a] is not well expressed. It seems to ask whether in the absence of the tax considerations the tax advantage would have been of the same amount. It is not clear what point is being made here. But the rest of the paragraph makes sense.

purposes of this Part so much of any credit in respect of exchange gains from that relationship as on a just and reasonable apportionment is attributable to the unallowable purpose.

(3) The company may not bring into account for that period for the purposes of this Part so much of any debit in respect of that relationship as on a just and reasonable apportionment is attributable to the unallowable purpose...<sup>172</sup>

Section 442 CTA 2009 defines “unallowable purpose”:

(1) For the purposes of section 441 a loan relationship of a company has an unallowable purpose in an accounting period if, at times during that period, the purposes for which the company—

- (a) is a party to the relationship, or
- (b) enters into transactions which are related transactions<sup>173</sup> by reference to it,

include a purpose (“the unallowable purpose”) which is not amongst the business or other commercial purposes of the company.

(2) If a company is not within the charge to corporation tax in respect of a part of its activities, for the purposes of this section the business and other commercial purposes of the company do not include the purposes of that part.

(3) Subsection (4) applies if a tax avoidance purpose is one of the purposes for which a company—

- (a) is a party to a loan relationship at any time, or
- (b) enters into a transaction which is a related transaction by reference to a loan relationship of the company.

(4) For the purposes of subsection (1) the tax avoidance purpose is only regarded as a business or other commercial purpose of the company if it is not—

- (a) the main purpose for which the company is a party to the loan relationship or, as the case may be, enters into the related transaction, or
- (b) one of the main purposes for which it is or does so.

(5) The references in subsections (3) and (4) to a tax avoidance purpose are references to any purpose which consists of securing a tax

---

172 Also see s.455B CTA 2009.

173 Defined s.42(1A) CTA 2009: “In subsection (1)(b) “related transaction”, in relation to a loan relationship, includes anything which equates in substance to a disposal or acquisition of the kind mentioned in section 304(1) (as read with section 304(2)).”

advantage<sup>174</sup> for the company or any other person.

This sets out two tests:

- (1) a purpose which is not a business/commercial purpose of the company
- (2) tax advantage

This differs in part from standard TAAR wording. But the guidance is still relevant for other TAARs. The CF Manual provides:

**CFM38150 Example** [Nov 2019]

**Example of unallowable purpose**

A company borrows £50 million from a finance company at arm's length. The company becomes insolvent and disposes of all its assets. This leaves it with an outstanding debt of £40 million. The company is not liquidated and interest continues to accrue on the debt.

The finance company either does not accrue the interest receivable or it accrues the interest and then writes it off as a bad debt. The company accrues the interest and makes a deficit on which group relief claims are made.

The company continues to exist and the interest accrues, but is it correct to say that the company “accrues the interest”? The company does not do anything.

HMRC give two reasons why the debit is disallowed. The first is based on s.444(2) which has no equivalent in other TAARs.

The company has no activity which is within the charge to corporation tax (CTA09/S442(2)). The purpose of the loan relationship is therefore specifically excluded from being a business or commercial purpose and it is an unallowable purpose.

The second reason is of wider interest:

In addition, although the loan relationship was originally bona fide, its continued existence is not commercial. The test of unallowable purpose given by CTA09/S442(1) & (2) is the purpose of the loan relationship in the accounting period. The only purpose of the loan relationship in the current accounting period is to generate group relief, securing a tax

---

174 “Tax advantage” has the CT definition: see s.476(1) CTA 2009. It is confusing to use the term “tax avoidance” and define it to mean tax advantage, as the two concepts are usually used with quite distinct meanings. But there it is.

advantage for another group company (CTA09/S442(5)).

The debits relating to the loan relationship should be disallowed.

The omission to liquidate the company, or write off the debt, is itself an unallowable purpose. Is that going too far? Since HMRC's first reason is sufficient, the question does not arise here but it might elsewhere.

#### **CFM38160 Application** [Nov 2019]

##### **Applying the unallowable purposes rule**

... You will note from the Economic Secretary's comments that SS441-442

- will normally apply where UK branches of overseas companies borrow for overseas activities outside the UK tax net,
- will not normally apply where a company borrows to acquire shares in companies, whether in the United Kingdom or overseas, or to pay dividends, provided that the borrowings are not structured in an artificial way. And a similar view is taken as regards borrowings, whether from a third party or intra group, to acquire other business assets whether located in the United Kingdom or overseas. This approach is not affected by the substantial shareholdings rules, and
- will not normally apply where a company is choosing between different ways of arranging its commercial affairs, if it chooses the course that gives a favourable tax outcome, provided that tax avoidance is not the object, or one of the main objects, of the arrangements.

#### **CFM38170 Application: Hansard Report** [Nov 2019]

##### **Applying the unallowable purposes rule: Economic Secretary's comments**

'The Government are aware of concerns that have been raised by my hon. Friends and by others regarding the particular anti-avoidance provisions in paragraph 13 [now s.441/442]. This paragraph was amended significantly in Standing Committee but, because of the concerns that my hon. Friends and others have raised, I take the opportunity to allay some of the fears that have been expressed about the anti-avoidance rules.

Paragraph 13 of the schedule disallows tax deductions to the extent that tax avoidance is the main motive behind a loan relationship. We have been told of concerns that this could be interpreted as preventing companies from getting tax relief for legitimate financing arrangements. I am happy to offer a reassurance that this is not the intention of the legislation. The paragraph denies tax deductions on loans that are for the purpose of activities outside the charge to corporation tax. Among other things, this will ensure that United Kingdom branches of overseas companies do not get tax relief for borrowings that are for overseas activities outside the United Kingdom tax net.

We have been asked whether financing - which, for example, is to acquire shares in companies, whether in the United Kingdom or overseas, or is to pay dividends - would be affected by the paragraph. In general terms, the answer is no, but the paragraph might bite if the financing were structured in an artificial way.

It has been suggested that structuring a company's legitimate activities to attract a tax relief could bring financing within this paragraph - some have gone so far as to suggest that the paragraph might deny any tax deduction for borrowing costs. These suggestions

are clearly a nonsense.<sup>175</sup> A large part of what the new rules are about is ensuring that companies get tax relief for the cost of their borrowing.

One specific point has been put to me by my hon. Friend the Member for Gloucester - that is, borrowing by a finance leasing company to acquire assets where this is more tax efficient than the lessee investing in the asset direct. Again, I am happy to offer a reassurance. Where a company is choosing between different ways of arranging its commercial affairs, it is acceptable for it to choose the course that gives a favourable tax outcome. Where paragraph 13 will come into play is where tax avoidance is the object, or one of the main objects, of the exercise.

Companies that enter into schemes with the primary aim of avoiding tax will inevitably be aware of that. The transactions we are aiming at are not ones which companies stumble into inadvertently. As one top tax adviser said recently, companies will know when they are into serious tax avoidance; apart from anything else, they are likely to be paying fat fees for clever tax advice and there will commonly be wads of documentation.

The last thing I want to do, however, is set out a list of so-called acceptable or unacceptable activities. Borrowing for commercial purposes can be structured in a highly artificial way in order to avoid tax. If we said that borrowing for certain types of activity would always be okay, tax advisers would quickly take advantage and devise artificial financial arrangements simply to avoid tax. Provided that companies are funding commercial activities or investments in a commercial way, they should have nothing to fear. If they opt for artificial, tax-driven arrangements, they may find themselves caught. It is clear that a balance must be struck between meeting the concerns that have been raised and weakening the provision in those instances where it needs to apply, but I can assure my hon. Friends that we shall keep the matter under review.' (Hansard 28 March 1996 Finance Bill Report Stage, Columns 1192-1193.)

The reader may think that is rather shallow.

**CFM38180 Transactions Not Normally Within ‘Unallowable Purposes’ [Nov 2019]  
When CTA09/SS441-442 will not normally apply**

S441-442 will not normally apply to loan relationship debits:

- simply because a company is able to obtain relief for the same expenditure or loss on the borrowing to which the debits relate in more than one jurisdiction. However, S441-442 would apply where the structure that has been adopted has one or more non-commercial features (so that the loan relationship can be said to have an unallowable purpose) and/or where, taking account of the overall position of the company or group, relief for interest and other finance costs might otherwise be available more than once in the UK in respect of the true economic costs of the borrowing;
- that relate to a borrowing from an exempt body (such as a pension fund), even if that exempt body is connected with the borrower, provided the arrangements are commercial;
- that relate to a straightforward borrowing by a UK plc in order to fund a repurchase of its shares provided that there are no attempts to structure the arrangement in such a way

---

<sup>175</sup> Author's footnote: The reader may not agree.

as to provide a tax advantage for any other person and/or the amount borrowed (the level of gearing up) is dictated by market forces and hence is at arm's length;

- that relate to a third party borrowing undertaken by one group member, that fulfils the commercial borrowing requirements of the group, which it on-lends interest-free (or at a rate not exceeding the costs of the third party borrowing) to other UK-resident group members. In such circumstances, S441-442 would not apply, provided that the group gets one and only one deduction in the UK for the costs associated with the true economic cost of the borrowing. For example, S441-442 will not normally apply where intra-group interest-free loans are made primarily to enable borrowings to be matched with assets within the meaning of CTA09/S317; or
- where a loan relationship debit in one group company is matched by an equal and opposite loan relationship credit, which is fully taxed, in another group company for the same loan relationship and the funding is not then utilised to secure a tax advantage. On the other hand, S441-442 are potentially in point if the main or one of the main purposes of the intra-group funding is to achieve a tax advantage for the group as a whole, in that the loan relationship credit on the intra- group funding is in some way shielded from tax. An example of the loan relationship credit being shielded would be the soaking up of otherwise stranded surplus expenses of management etc. Where the loan relationships involve cross-border transactions, thin capitalisation and transfer pricing legislation as well as the provisions of the Double Taxation Treaties may be applicable.

#### **CFM38190 Transactions Normally Within 'Unallowable Purposes' [Nov 2019]**

##### **When CTA09/SS441-442 will normally apply**

SS441-442 would normally apply to loan relationship debits:

- which, subject to the comments at CFM38180 (fourth and fifth bullets), relate to the write-off of loans where the purpose of the loans was not amongst the business or other commercial purposes of a company. An example of a loan of this nature would be an interest-free loan made by a company, whose business consists in operating a widgets retail outlet, which had lent the money to a football club supported by one of the directors of the company for the purpose of providing financial support to the football club. Furthermore, if the company borrowed to make the loan to the football club, then SS441-442 would normally also apply to disallow the loan relationship debits relating to the interest or other finance costs on that borrowing. If, however, the purpose of the loan included a commercial or other business purpose such as advertising, then this would be taken into account in arriving at the amount attributable to the unallowable purpose on a just and reasonable basis (S441(1)-(3));
- which, subject to the comments at CFM38180 (fourth and fifth bullets), relate to a borrowing the proceeds of which are used in such a way that the company cannot or does not expect to make an overall pre-tax profit. An example would be where a company borrows at interest and on- lends at a rate of interest that is less than the rate of interest on the borrowings; or
- where a company or a group of companies enters into one or more transactions or arrangements which have the main purpose or one of the main purposes of securing loan relationship debits for repayments of loan principal, in addition to payments of interest, on the true economic commercial borrowing to the company or group. An example of this would be where one group company undertakes a borrowing of £20 million at 8.4%

for 5 years from a third party and at the same time a second group company pays that third party £13 million for preference shares of £20 million in the first group company to be delivered 5 years later. The effect of this is that, economically, the group borrows £7 million on an amortising basis at 8.4% but for tax purposes the group claims relief as loan relationship debits for both the interest of £1.4 million on the group amortised borrowing of £7 million and the repayment of the £7 million loan principal. In such circumstances SS429-430 are likely to apply to disallow the amounts equivalent to repayments of principal.

#### 2.12.4 *Tax advantage: Case law*

The TAAR guidance above is soundly based on TiS case law. The leading case is *IRC v Parker*:

- The paragraph, as I understand it, presupposes a situation in which
- [1] an assessment to tax, or increased tax, either is made or may possibly be made,
  - [2] that the taxpayer is in a position to resist the assessment by saying that *the way in which he received what it is sought to tax* prevents him from being taxed on it;
  - [3] and that the Crown is in a position to reply that if he had received what it is sought to tax *in another way* he would have had to bear tax.

In other words, there must be a contrast as regards the “receipts” between

- [a] the actual case where these accrue in a non-taxable way with
  - [b] a possible accruer in a taxable way,
- and unless this contrast exists, the existence of the advantage is not established.<sup>176</sup>

In the following discussion:

- (a) The actual case, where the receipt accrues in a non-taxable way, is the “**actual receipt**”
- (b) The “possible accruer in a taxable way” is the “**comparator**”, (sometimes called the “hypothetical receipt”)

The comparator need not be received as a result of the same kind of transaction as did the actual receipt. *IRC v Cleary*<sup>177</sup> concerned a share sale: the shareholder sold shares to a company for cash. The actual receipt

---

<sup>176</sup> 43 TC 396 at 441 (emphasis added).

<sup>177</sup> 44 TC 399 at p.423. For TiS aspects of this case, see 52.11.1 (Close co buys close co for cash).

of the proceeds of sale was not income-taxable. The comparator was a possible dividend from the company (which would have been income-taxable). So there was a “tax advantage”.<sup>178</sup> A dividend and a sale are different types of transaction. The dividend would reduce the company’s assets available for distribution (unlike the actual sale). That did not matter. So in short, the question was whether the company can pay a dividend to the shareholder equal to the amount which the shareholder received tax-free.

The comparator must involve receipt of the same asset as the actual receipt. *Anysz v IRC*<sup>179</sup> concerned a share for share exchange: the shareholder transferred shares in A Ltd to another company (B Ltd) in exchange for an issue of shares in B Ltd. B Ltd could have declared a cash dividend, but cash was not a valid comparator to the actual receipt of B Ltd shares. However A Ltd could have:

- (1) bought B Ltd shares, and
- (2) distributed them to the shareholder by dividend in specie.

That was a valid comparator. Hence the shareholder obtained a “tax advantage”.

#### 2.12.5 Tax advantage/avoidance compared

On a natural reading, “tax advantage” in the standard sense is wider than tax avoidance. Tax advantage includes a relief from or repayment of tax, as well as the avoidance or reduction of a charge to tax. The concept thus includes both tax avoidance and mitigation.

In *Marwood Homes v IRC*:

Taking steps to obtain relief under s 242 [ICTA 1988] following payment of a dividend outside a group election is clearly within the spirit of the ACT code in the tax legislation. But the fact that a transaction has been carried out to achieve a benefit conferred by a statutory provision will not of itself exclude the application of [the TiS rules]. This follows from the definition of tax advantage in [what is now s.732 CTA 2010] which covers both everyday tax planning and transactions, such as traditional dividend stripping, which fall more obviously within the mischief that [the TiS code] was introduced to

---

178 At that time the standard IT/CGT definition applied to both IT and CT TiS codes.

179 53 TC 601.

counteract. The only safeguards available to the taxpayer are the clearance procedures and the escape clause [motive defence]. It cannot therefore avail Marwood to rest its case on the simple proposition that the dividends ... were directly within the spirit of s 242.<sup>180</sup>

That concerns the meaning of “tax advantage” in the TiS code, where special principles of construction apply.<sup>181</sup>

The same approach was taken in the context of DOTAS.<sup>182</sup>

Nevertheless, the context of some TAARs may show otherwise. HMRC guidance on TAARs often adopts an avoidance test.<sup>183</sup>

### 2.13 Naming and shaming

“Naming and shaming”: The alliteration is irresistible, and for some reason sounds more reputable than just “shaming”, which is what this topic is about.

The expression covers a variety of arrangements. I distinguish between statutory shaming, discussed elsewhere,<sup>184</sup> and media shaming, discussed here.

The OUCBT paper provides:

... searching for individual or corporate villains will not assist in remedying the underlying problems...

Even if public naming and shaming influences a few taxpayers in the public eye to impose their own voluntary constraints, it will not necessarily affect the worst avoiders, and may even encourage some non-compliance from those who feel that “everyone is at it”. Only understanding the flaws in the tax system and working on serious changes can give long-term results....

Even if that were to have an effect on one taxpayer it would not tackle the underlying issues.

No-one has taken any notice of that!

Media shaming is at present common for various purposes (more than

180 [1999] STC (SCD) 44 at [20].

181 See 52.1.1 (Construction of TiS code).

182 *HMRC v Hyrax Resourcing Ltd* [2019] UKFTT 175 (TC) at [151] - [161]. But the arrangement in that case did constitute tax avoidance in the strict sense, so the issue did not need to be decided.

183 See 61.21.5 (“Genuine” loss and the TAAR).

184 See 120.53 (Public list of defaulters).

one may be present at the same time):

- (1) In marketing: To sell newspapers with exposures of celebrities who have been involved in tax avoidance schemes.<sup>185</sup>
- (2) In politics: To knock the opposition by alleging that politicians, or other party supporters, are guilty of tax avoidance. In this respect, anything goes and some stories have been farcical. For instance, Peter Mandelson was berated for taking a loan from a UK company<sup>186</sup> and Ed Miliband was accused of avoiding tax by means of a deed of variation.<sup>187</sup> The allegations are so off-target as to cast doubt the good faith of those who make them and newspapers which uncritically promote them.
- (3) As a scandalisation technique, to promote the view that avoidance is immoral; often combined with juxtaposition of avoidance and evasion and the suggestion that there is little or no difference.

When these allegations are made it is impossible to defend oneself.

So public debate is not uninformed but misinformed. It is a yeasty mingling of dimly understood facts with vague but deep impressions, and images, half real, half fantastic. It has more than its fair share of misunderstanding and jejune polemics.

In these circumstances, media shaming may easily lead away from the Rule of Law. In 2012, Starbucks paid £20m to HMRC following a threat to occupy its cafes.<sup>188</sup> If one calls that payment “taxation” at all, it was certainly not taxation imposed by law. A hostile commentator would call this taxation by mob rule. Google and Amazon, who do not have public premises vulnerable to the same threat, have not had to pay similar sums. Perhaps the point was understood, as the campaign was not repeated.

## 2.14 EU tax haven blacklist

---

185 Typically film schemes, as the names of members of the LLPs concerned are in the public domain.

186 <http://www.theguardian.com/politics/2015/jan/27/peter-mandelson-400000-pound-tax-free-loan> The Guardian later amended its website to concede that the loan had been wrongly described as tax-free.

187 Leading to a gibe in the Spring 2015 budget announcing a policy review of deeds of variation. The Guardian rightly asked: what came first – the policy or the joke?

188 Ironically, the post-tax cost of the payment would have been diminished as it should in principle be deductible in computing taxable profits.

### 2.14.1 “Non-cooperative jurisdictions”

EU publish a list of “non-cooperative jurisdictions for tax purposes”. The current list is set out in Annex 1 of 2020/C 64/03. This provides a list of 12 tax havens, and the reasons they are on the list:

#### 1. American Samoa

American Samoa does not apply any automatic exchange of financial information, has not signed and ratified, including through the jurisdiction they are dependent on, the OECD Multilateral Convention on Mutual Administrative Assistance as amended, did not commit to apply the BEPS minimum standards and did not commit to addressing these issues.

#### 2. Cayman Islands

Cayman Islands does not have appropriate measures in place relating to economic substance in the area of collective investment vehicles.

#### 3. Fiji

Fiji is not a member of the Global Forum on transparency and exchange of information for tax purposes (‘Global Forum’), has not signed and ratified the OECD Multilateral Convention on Mutual Administrative Assistance as amended, has harmful preferential tax regimes, has not become a member of the Inclusive Framework on BEPS or implemented OECD anti-BEPS minimum standard, and has not resolved these issues yet.

#### 4. Guam

Guam does not apply any automatic exchange of financial information, has not signed and ratified, including through the jurisdiction they are dependent on, the OECD Multilateral Convention on Mutual Administrative Assistance as amended, did not commit to apply the BEPS minimum standards and did not commit to addressing these issues.

#### 5. Oman

Oman does not apply any automatic exchange of financial information, has not signed and ratified the OECD Multilateral Convention on Mutual Administrative Assistance as amended, and has not resolved these issues yet.

#### 6. Palau

Palau does not apply any automatic exchange of financial information, has not signed and ratified the OECD Multilateral Convention on Mutual Administrative Assistance as amended, and has not resolved these issues yet.

#### 7. Panama

Panama does not have a rating of at least ‘Largely Compliant’ by the Global Forum on Transparency and Exchange of Information for Tax Purposes for Exchange of Information on Request and has not resolved this issue yet.

#### 8. Samoa

Samoa has a harmful preferential tax regime and has not committed to addressing this issue.

Furthermore, Samoa committed to comply with criterion 3.1 by the end of 2018 but has not resolved this issue yet.

#### 9. Seychelles

Seychelles has harmful preferential tax regimes and has not resolved these issues yet.

**10. Trinidad and Tobago**

Trinidad and Tobago does not apply any automatic exchange of financial information, has a ‘Non-Compliant’ rating by the Global Forum on Transparency and Exchange of Information for Tax Purposes for Exchange of Information on Request, has not signed and ratified the OECD Multilateral Convention on Mutual Administrative Assistance as amended, has harmful preferential tax regimes, and has not resolved these issues yet.

**11. US Virgin Islands**

US Virgin Islands does not apply any automatic exchange of financial information, has not signed and ratified, including through the jurisdiction they are dependent on, the OECD Multilateral Convention on Mutual Administrative Assistance as amended, has harmful preferential tax regimes, did not commit to apply the BEPS minimum standards and did not commit to addressing these issues.

**12. Vanuatu**

Vanuatu does not have a rating of at least ‘Largely Compliant’ by the Global Forum on Transparency and Exchange of Information for Tax Purposes for Exchange of Information on Request, facilitates offshore structures and arrangements aimed at attracting profits without real economic substance and has not resolved these issues yet.

The 2020 list is limited in number; from a UK perspective the only significant entry is Cayman, and I doubt if it will stay there very long. The immediate significance of being on this list is relatively small,<sup>189</sup> but it seems to have had some success in encouraging change.

Scotland will not make a coronavirus-related grant to a company with a parent/subsidiary in these jurisdictions.<sup>190</sup> Clearly, there will not be many, if any, grants refused as a result of that particular provision, though it may form part of a more general trend.

How will this approach of ostracism/penalisation of tax havens develop in the future? This is a question of international politics, not law.

**2.15 Avoidance: Multinationals**

Much attention has been given to multinational companies. The Public Accounts Committee looked at Starbucks, Amazon and Google. The verdict was guilty.<sup>191</sup>

---

189 See Thornton, “The Cayman Islands and the EU ‘blacklist’ Tax Journal, 6 Mar 2020.

190 Para 16 sch 4 Coronavirus (Scotland) (No.2) Act 2020.

191 Or was it? “We were not convinced that their actions, in using the letter of tax laws both nationally and internationally to immorally minimise their tax obligations, are defensible.” Public Accounts Committee 19<sup>th</sup> report 2012, para 12. If the convoluted wording was intended to reflect a note of caution, it was lost in the

It is not possible to comment sensibly on the taxation of a multi-national group without knowing the relevant facts, which are not usually in the public domain. The claim that these companies have avoided UK corporation tax is often based on the size of their UK sales or UK staff, set against the corporation tax actually paid. But all well-informed commentators know that corporation tax is not a tax on sales, or the size of an establishment, and large sales/staff does not mean large profits. The OUCBT paper provides:

Starbucks and Facebook ... have been criticized for not paying tax where they are making sales, but sales are not the basis for the corporation tax, so this alone is no cause for criticism of the companies concerned. We could argue that the tax base should change, but unless and until that occurs, the fact that there is a high turnover but no taxable profit is not in itself an indicator that the taxpayer is behaving in an unreasonable way.

Likewise the fact that relatively little CT is paid proves nothing. The OUCBT paper provides:

The fact that there is little or no tax payable is not, however, conclusive evidence that there is effective or ineffective avoidance. In some of these cases, these companies are simply operating in accordance with incentives created by the international tax system and by domestic governments trying to attract economic activity into their jurisdictions. This the governments may do for non-tax reasons, or because this activity gives rise to forms of taxes other than those which are not being collected. ...

The IFS say:

A low corporate tax bill is not in itself therefore evidence of tax avoidance. Even if income appears high, there may be genuinely low UK taxable profits if a firm has relatively high current expenditures or can offset the effects of large investment expenditures or losses. The UK tax bill can also be appropriately relatively low compared with declared

---

public debate. But perhaps the obfuscation is just the dialect of politics. The PAC returned to this theme in Ninth Report of Session 2013–14 “Tax Avoidance–Google”. A PAC hearing is not, perhaps, well suited to ascertaining the facts; it is not possible to ascertain from this whether the complaint of the PAC is that Google have been conducting successful or unsuccessful tax avoidance.

income if that income is the result of genuinely non-UK activities.

HMRC make the same point:

Globalisation means that multinationals have the opportunity to structure their business to take advantage of beneficial tax rules in different countries. Provided that this results in profits being taxed in line with where genuine economic activity is carried on, this does not amount to tax avoidance. ... In broad terms, companies are required to pay corporation tax in the country where they carry on the economic activity that generates their profits, not where their customers are located.<sup>192</sup>

Unusually, the facts are known in relation to Apple as a result of US congressional hearings (I suspect, better conducted than the UK equivalent). These have been well analysed by Antony Ting.<sup>193</sup> In short, there is no reason to think that Apple have avoided *UK* tax. The group has avoided Irish/US tax by Irish/US hybrid entities; and, perhaps, it has reduced Irish tax by informal transfer pricing agreements with the Irish Revenue.

### 2.15.1 *Transfer pricing*

It is often said that multinationals engage in avoidance through transfer pricing. For instance, Christian Aid say:

There is debate about the extent to which companies engage in trade mispricing (artificially suppressing the income they earn from activities such as resource extraction, to reduce payments to government), but few would doubt that it has a significant impact on the incomes of governments in the global South.<sup>194</sup>

Transfer pricing is not strictly avoidance. It is in principle in the category of ineffective avoidance:

We may well question whether the transfer pricing rules are adequate, ...

---

192 HMRC, “Taxing the profits of multinational businesses” Issue Briefing (2012) [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/89030/profits-multinationals.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/89030/profits-multinationals.pdf)

194 Christian Aid, “Tax for the common good (2014) <http://www.christianaid.org.uk/images/Tax-Morality-Report-J2951.pdf>

but these are considerations relating to tax policy reform and not to tax avoidance.

The fundamental problem is not terminology, but that the facts needed to assess these claims are not in the public domain. Robert Maas says:

The Public Accounts Committee believes that Starbucks overpays for its coffee. I am not an expert on the economics of coffee, but I am a bit puzzled that the PAC members consider themselves sufficiently knowledgeable in this area to be able to pass judgment (sorry, to express scepticism).

The committee thinks that a 16.67% margin to a company that sources and buys coffee throughout the world, exercises quality control and works with local farmers, is excessive. Personally, I do not but then I don't have any expertise in coffee.

The PAC also believes that the rate of interest on the inter-company loan from the US company (4.9%) is excessive, "at a higher rate than any similar loan we have seen". I do not know what similar loans the committee has seen, ie a loan to a loss-making business with little asset backing. I must say it looks modest to me...<sup>195</sup>

If transfer pricing is conducted with the consent of the tax authority concerned, it is not avoidance, though it may be unfair tax competition. The EC are currently pursuing state aid rules;<sup>196</sup> it will be interesting to see what results.

### 2.15.2 GAAR

The GAAR guidance provides:

Many of the established rules of international taxation are set out in double taxation treaties. These cover, for example,

- [1] the attribution of profits to branches or between group companies of multi-national enterprises, and
- [2] the allocation of taxing rights to the different states where such enterprises operate.

The fact that arrangements benefit from these rules does not mean that the arrangements amount to abuse, and so the GAAR cannot be applied to them. Accordingly, many cases of the sort which generated a great

---

<sup>195</sup> Maas, Taxation Magazine, 27 February 2013.

<sup>196</sup> See 102.19 (State Aid).

deal of media and parliamentary debate in the months leading up to the enactment of the GAAR cannot be dealt with by the GAAR.<sup>197</sup>

In my terminology, these issues are non-avoidance, and in some cases, tax avoidance, but not tax abuse.

But where there is abuse, one country's domestic GAAR cannot resolve the issue. Apple's planning, for instance, turned on a hybrid entity:

- (1) transparent under Irish tax law, and so not paying tax on its profits in Ireland;
- (2) opaque in US tax law, and so not paying tax on its profits in the US.

CIOT say:

As in much of the BEPS project, this is not a case of tax avoidance as previously understood; there can be no avoidance where there is no intent to tax in the first place.<sup>198</sup>

If avoidance is action contrary to the intention of a Parliament, then this kind of planning may properly be described as tax avoidance if it is the case that:

- (1) The intention of Oireachtas is that the entity's income should be taxed in the US, and
- (2) The intention of US Congress is that the entity's income should be taxed in Ireland.

One might refer to it as international tax avoidance (though there is of course no such tax as "international tax"). The tax advantage is not contrary to the tax policy of either country in isolation; it is the result of a gap between the two.<sup>199</sup> In this case, the gap may in fact be intentional, in that both Ireland and the US deliberately chose to facilitate the

198 CIOT, "BEPS Action 2: Neutralise the effects of hybrid mismatch arrangements (Recommendations for domestic laws) Response by CIOT (May 2014)

<https://www.oecd.org/ctp/aggressive/comments-action-2-hybrid-mismatch-arrangements.pdf>

199 See de Boer & Nouwen (eds) *The EU's struggle with Mismatches and Aggressive Tax Planning* (2013), para 3.5.2 (General anti-abuse rule).

planning;<sup>200</sup> in which case the planning should not be called avoidance at all.

Whatever the terminology, CIOT are right to say that the tools to deal with multinational planning/avoidance will not be the same as those used for domestic tax avoidance. It is an international problem which only international consensus can resolve. Hence the OECD BEPS project and Pillar 1 & 2.

We should never lose sight of the fact that public debates about tax avoidance are simultaneously fiscal, moral and political debates, raising issues of equality, redistribution, class, and tax competition; and sensitive ears may also detect elements of xenophobia.

## CHAPTER THREE

# DOMICILE

### 3.1

#### *Further reading*

For discussion of the general law of domicile, see Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012) (“*Dicey*”). “Mr Dicey’s celebrated work”<sup>1</sup> is the one that the Courts and HMRC most often cite.

For a sobering reminder of the need for rule scepticism (legal realism) in this area, see Fawcett, “Result Selection in Domicile Cases”.<sup>2</sup>

### 3.1 Domicile: Introduction

Domicile is important for many tax purposes, in particular:

- (1) IT/CGT remittance basis
- (2) IHT on foreign situate assets

Domicile is also important for non-tax purposes, including aspects of family law, civil jurisdiction and succession.

### 3.2 Concepts of domicile

Domicile is a concept of private international law.

In English law, the rules are laid down by common law, but modified by statute.

Scots domicile law is (mostly)<sup>3</sup> the same as English law.<sup>4</sup> Indeed the

2 [1985] OJLS vol 5 p.378

<http://www.ojls.oxfordjournals.org/content/5/3/378.full.pdf>

See 3.9 (Acquisition of foreign domicile).

3 See 3.18 (Child’s domicile: Scotland).

4 *Arnott v Groom* (1846) 9 Court of Sess Cas (2nd Series) 142 accessible <https://www.kessler.co.uk/wp-content/uploads/2015/06/Arnott-v-Groom.pdf> “in a matter like the present, involving a question of international law, the judgments of the

leading case of *Udny v Udny* is a Scottish case. Northern Ireland domicile law is the same as English law.

These rules apply for tax purposes except so far as modified by tax law.

“Domicile” has a technical meaning in UK law which is distinct from the meaning of “domicile” in ordinary English (it is not used much in ordinary English, but if used it simply means, home).<sup>5</sup>

This chapter considers the UK law sense of domicile, which one may call the general law sense; and references to domicile below are to that sense of the word. Note however that there are a number of other (more or less) distinct concepts of domicile.

An individual may be deemed to be UK domiciled for tax purposes (“deemed domicile”).<sup>6</sup> I discuss deemed domicile in the next chapter. If an individual is deemed UK domiciled, their actual domicile may not matter; but it may still be important, eg for:

- protected-trust relief
- 2017 rebasing<sup>7</sup>
- non-tax purposes

For DTA purposes it is sometimes necessary to look at foreign law concepts of domicile. As a general rule:

- (1) Foreign common law jurisdictions have a concept of domicile which is similar, though not always identical, to English law.
- (2) Civil law jurisdictions also use the word “domicile” but it has a different meaning there (which is, perhaps ironically, close to ordinary English usage).<sup>8</sup>

The term “domicile” is used in a defined sense in IHT DTAs. I refer to that as “**treaty-domicile**”; the exact definition varies from one treaty to

---

English courts are of equal authority with our own.”

5 e.g. in Walt Disney’s *Lady and the Tramp*:

“Now we lookin’ over our new domicile  
If we like we stay for maybe quite a while”(!)

6 See 4.1 (Deemed domicile: Introduction); App 8.1 (Parliamentarians).

7 See 53.14 (2017 rebasing).

8 Article 102 of the French Civil Code provides: “Le domicile de tout Français est au lieu où il a son principal établissement” (The *domicile* of a French person is where he has his main establishment).

another.<sup>9</sup>

The term “domicile” is also used in a defined sense in EU regulations and international treaties, but that is not usually relevant for UK tax purposes.

The spelling *domicil* (without the final -e) should be regarded as archaic.<sup>10</sup>

A person whose domicile is under consideration was traditionally called the *propositus*, but the Latin word is unnecessary and best avoided.

### 3.3 Only one domicile

Everyone has one and only one domicile. The expression “**non-domiciled**” is in a literal sense inapt, because everyone is domiciled somewhere. It is, however, an acceptable and convenient abbreviation (in context) for non-UK domiciled (just as “non-resident”, in context, means non-UK resident).

I once regarded “non-dom” as slang, but language evolves, and in keeping with the *Zeitgeist*, the irresistible monosyllables entered the statute book in 2013.<sup>11</sup> “Non-dom” should now be regarded as acceptable standard usage. For the time being, at least, I prefer not to use it in more formal writing; though it is useful in headings, where space is limited, and eventually the title of this book might be shortened to *Taxation of Nonresidents and Non-doms*.

A person must be domiciled in a single legal jurisdiction.<sup>12</sup> The expression “**UK domiciled**” is in a literal sense inapt because a person must be domiciled in England, Scotland or Northern Ireland. It is, however, universally and aptly used to describe someone who is domiciled

---

9 See 109.5 (Domicile: applicable law); 113.5 (Treaty-domicile) for USA IHT DTA; 112.5 (Treaty-domicile) for Swiss IHT DTA.

10 Garner, *Dictionary of Legal Usage* (3<sup>rd</sup> ed., 2011) entry under *Domicile* states: “the word “is spelt both with and without the final -e but the better and more common spelling is with it”. A Google search records an overwhelming preference for spelling with a final -e.

11 The FA 2013 uses the heading *Remittance basis restricted to non-doms*. A *Bailii* search shows the expression gradually finding its way into the law reports. At present the law reports often use quotation marks, implying a certain unease; but it seems safe to predict those will disappear in the course of time.

12 See 3.21 (Domicile territory/country).

in England, Scotland or Northern Ireland.<sup>13</sup> For tax purposes it makes no difference where in the UK a person is domiciled, though for non-tax purposes that may be important.

### 3.4 Domicile of origin

Dicey states:

- (1) Every person receives at birth a domicile of origin:
  - (a) A legitimate child born during the lifetime of his father has his domicile of origin in the country in which his father was domiciled at the time of his birth;
  - (b) A legitimate child not born during the lifetime of his father, or an illegitimate child, has his domicile of origin in the country in which his mother was domiciled at the time of his birth; ...<sup>14</sup>

This rule embodies gender assumptions which reflect its date of origin. Domicile is now one of the few areas of English law where legitimacy still matters.

Where the parents of an illegitimate child marry, the child becomes legitimate from the date of the marriage, so that does not affect the domicile of origin.<sup>15</sup> The legal definition of legitimacy is a large topic, but not sufficiently important in the present context to discuss here.

At present illegitimacy issues rarely arise, because domicile most commonly concerns older individuals who were born at a time when illegitimacy rates were low. Approximately 50% of children in the UK are now born to unmarried parents, so in a generation's time, the issues will arise much more often.

The position in Scotland has been revised and avoids sex/marital status

13 Section 721(3) ITEPA (somewhat pedantically) states this expressly: "Any reference in this Act to being domiciled in the UK is to be read as a reference to being domiciled in any part of the UK."

The Tax Law Rewrite later decided this was unnecessary, and (quite correctly) did not put an equivalent clause in subsequent rewrite legislation. Section 721(3) ought to be repealed as otiose.

Similarly the 2011 Swiss Tax Agreement referred to individuals "domiciled *anywhere within* the UK"; for the text see the 2016/17 edition of this work para 97.5.1.

14 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 6R-025.

15 Section 2 Legitimacy Act 1976. The marriage may affect a domicile of dependency; see 3.17 (Child's domicile: England).

discrimination.<sup>16</sup> English law should follow Scotland, and, the reader may think, the sooner the better.

Dicey continues:

(2) A domicile of origin may be changed as a result of adoption<sup>17</sup> or by issue of a parental order under the Human Fertilisation and Embryology Act 2008, but not otherwise.<sup>18</sup>

### 3.5 Domicile of choice

Dicey states:

Every independent person can acquire a domicile of choice by the combination of residence and intention of permanent or indefinite residence, but not otherwise.<sup>19</sup>

Thus there are two requirements: residence and intention. I consider them separately.

### 3.6 Domicile-residence requirement

Residence matters for:

- (1) Acquisition of domicile of choice: in order to acquire a domicile of choice, the individual must be resident in the country concerned.
- (2) Abandonment of domicile of choice: in order to lose a domicile of choice, the individual must cease to be resident in the country concerned.

“Residence” in the context of these domicile rules is not quite the same as residence for tax purposes (the SRT). It is necessary to have different terms: I use “**tax-residence**” and “**domicile-residence**”.

Domicile cases do not provide much discussion of domicile-residence. It has been said to mean “a bona fide resident here, not casually, or as a traveller”;<sup>20</sup> not, as one would say today, a tourist or short-term business visitor. The word sometimes used is “as an inhabitant”; as in *Plummer v*

16 See 3.18 (Child’s domicile: Scotland). It is doubtful whether the English law rule is human-rights compliant.

17 See 3.19 (Adoption).

18 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 6R-025.

19 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 6R-033.

20 *Manning v Manning* (1871) LR 2 P & D 223.

*IRC*:<sup>21</sup>

I find the contrast between an inhabitant and a person casually present useful to describe the minimum quality of residence which must be taken up in a new country before a domicile there can be acquired...

But inhabitant is just another word for resident, so this does not take us very far.

In practice tax-residence and domicile-residence will usually come to the same thing, since tax-residence (before and after the SRT) is intended to encapsulate the ordinary meaning of the word residence. So far as possible it would be best to avoid having two concepts of residence, one for tax and one for domicile. But there are some differences:

- (1) For domicile-residence an individual is resident (or not) on a particular date, whereas for tax-residence an individual is UK resident (or not) for a tax year.
- (2) Assuming an individual resides as an inhabitant, there is no minimum period of presence required for domicile-residence: domicile-residence commences immediately on arrival if the intention is to stay.<sup>22</sup>
- (3) Domicile-residence must be in one of England, Scotland or Northern Ireland; tax-residence is in the UK. But this will rarely if ever matter in practice.
- (4) Is it possible to have domicile-residence (or in the case of dual residence, a chief residence) in the UK without being tax-resident under the SRT (which may allow up to 119 UK days each year, or in

---

21 60 TC 452 at p.463.

22 *Fasbender v AG* [1922] 2 Ch 850 at p.857-8: "I have great doubts whether her domicile at the time of the marriage was English. She had left England, and become resident in Germany at the time, though she had only been there a few days. She had done so with the intention of being married to a German resident in Germany, and of continuing to reside there with him after marriage, and I think this is, at any rate, evidence that she had adopted a German domicile." Likewise *Bell v Kennedy* (1868) LR 1 Sc & Div 307 at p.320: "Now this case was argued at the Bar on the footing, that as soon as Mr. Bell left Jamaica he had a settled and fixed intention of taking up his residence in Scotland. And if, indeed, that had been ascertained as a fact, then you would have had the *animus* of the party clearly demonstrated, and the *factum*, which alone would remain to be proved, would in fact be proved, or, at least, would result immediately upon his arrival in Scotland."

exceptional circumstances even more, without being UK tax-resident)? Certainly it would not be common because, as noted, the object of the SRT is to clarify the ordinary meaning of residence, not to set a residence test significantly different from the ordinary meaning of “resident”.

Domicile cases tend to use the expressions home and residence interchangeably:

... the true test is whether he intends to *make his home* in the new country....<sup>23</sup>

Case law expressions should not be construed like statutory expressions, and that applies even if the expression is codified in a textbook rule in the style of Dicey.

### 3.7 Permanent/indefinite residence

Intention to reside permanently/indefinitely matters for:

- (1) Acquisition of domicile of choice: in order to acquire a domicile of choice, the individual must intend to reside permanently/indefinitely in the country concerned.
- (2) Abandonment of domicile of choice: in order to lose a domicile of choice, the individual must cease to intend to reside permanently/indefinitely in the country concerned.

“Permanent” residence seems straightforward, but despite the apparent rigidity of the word, what constitutes “permanence” in human affairs is to some extent a matter of degree and dependant on context.<sup>24</sup>

The meaning of “indefinite” is similarly, and more obviously, a matter of degree and context-dependent.

I think the phrase “permanent or indefinite” should be regarded as a composite expression, with a nuance slightly different from the sum of its parts, but given the context-dependant nature of the parts, it does not much matter. It is not a statutory expression, and should not be construed in the manner of a statute.

---

23 *IRC v Bullock* 51 TC 522 at p.540. The conflation of *home* and *residence* is found elsewhere; see 55.2.2 (Residence/home compared).

24 For a context where relatively short periods count as “permanent” see 8.12.2 (“Permanent”).

“Indefinite” (in its context) requires that the individual intends to reside in a country “until the end of his days”. It seems to me that “indefinite” is an inapt word to use, because in its standard sense it is used to describe any period whose duration is not known exactly, even a relatively short period. For instance the duration of a strike may be indefinite;<sup>25</sup> so is the duration of a contract of employment. That is not the meaning here. However there is no single English word which neatly encapsulates the intended meaning. “Unlimited” is sometimes used and seems to me to be more apt, but this too needs clarification. *IRC v Bullock* 51 TC 522 cited the “classic statement” that a domicile of choice is acquired when:

a man fixes voluntarily his sole or chief residence in a particular place with an intention of continuing to reside there for an *unlimited* time... it must be residence fixed not for a limited period or particular purpose, but general and indefinite in its future contemplation.<sup>26</sup>

*IRC v Bullock* continues:

I accept that statement ... with this qualification only that the expression “unlimited time” requires some further definition. A man might remove to another country because he had obtained employment there without knowing how long that employment would continue but without intending to reside there after he ceased to be employed. His prospective residence in a foreign country would be indefinite but would not be unlimited in the relevant sense. On the other hand, ... I do not think that it is necessary to show that the intention to make a home in the new country is irrevocable or that the person whose intention is under consideration believes that for reasons of health or otherwise he will have no opportunity to change his mind.<sup>27</sup>

And crucially:

---

25 This is self-evident, but if authority is needed, see *Howard E. Perry v British Railways Board* [1980] 1 WLR 1375 at p.1380 which described the period of a strike as “clearly ... indefinite. It may be short, or it may be long; but it is plainly uncertain.” The Law Commission made the same point in *The Law of Domicile* (1987) Law Com 186 [http://www.scotlawcom.gov.uk/download\\_file/view/228/](http://www.scotlawcom.gov.uk/download_file/view/228/) para 5.12: “‘Indefinitely’ by itself is insufficient: it could, on one view, cover an intention to live in a country for a short time for some temporary purpose, for example a short holiday of indefinite duration.”

26 *Udny v Udny* (1869) LR 1 Sc & Div App 441 at p.458 (emphasis added).

27 51 TC 522 at p.540.

... the true test is whether he intends to make his home in the new country until the end of his days unless and until something happens to make him change his mind.<sup>28</sup>

It is helpful to have a label to describe this, and I use the expression “**intention to reside permanently (in the domicile sense)**”. Earlier generations used the expression *animus manendi* (intention to remain). Legal Latin provided convenient shorthand labels for complex legal concepts. In the absence of a good knowledge of Roman law, which contemporary lawyers do not possess, the use of Latin expressions offered little more than that, it seems to me; but also no less. But the current generation does not know even the rudiments of the classical languages, and Latin expressions should no longer be used.

The intention to reside permanently (in the domicile sense) is therefore very strict. In *IRC v Bullock*<sup>29</sup> the taxpayer resided in England for 40 years but hoped to return home to Nova Scotia (to which his wife objected) should he survive her or persuade her to change her mind. This possibility had sufficient substance to represent a real determination to return home rather than a vague hope or aspiration. Group Captain Bullock did not acquire a UK domicile of choice but retained his domicile of origin.<sup>30</sup>

### 3.7.1 *Vague or doubtful possibility*

In *IRC v Bullock*:

... if a man who has made his home in a country other than his domicile of origin has expressed an intention to return to his domicile of origin or to remove to some third country upon an event or condition of an indefinite kind; for example. “if I make a fortune” or “when I’ve had enough of it.” it might be hard, if not impossible, to conclude that he retained any real intention of so returning or removing. Such a man ... is like a man who expects to reach the horizon; he finds it at last no

---

28 *IRC v Bullock* 51 TC 522 at p.540. This test was reaffirmed in *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [5] to [7].

29 51 TC 522.

30 There are many examples of long periods of UK residence without acquiring a UK domicile: *Buswell v IRC* 49 TC 334; *Cyganik v Agulian* [2006] EWCA Civ 129; *Ramsay v Liverpool Royal Infirmary* [1930] AC 588 (36 years); *Winans v AG* [1904] AC 287 (37 years).

nearer than it was at the beginning of his journey. In *Aikman v. Aikman*<sup>31</sup> Lord Campbell LC said that a mere intention to return to a man's native country on a doubtful contingency would not prevent residence in a foreign country putting an end to his domicile of origin.<sup>32</sup>

An example is *Re Furse* where the taxpayer intended to live in England for the rest of his life except that he would return to America if he became physically incapable of taking an active interest in his farm. This was too indefinite:

That contingency is altogether indefinite. It has no precision at all. A man's idea of an active physical life is likely to contract with the years. At the age of 80, after 40 years in England, the testator was still living at West Hoathly and, although he had been ill, he had no firm plans at all for leaving England.

The testator's expressed intention, it seems to me, depended entirely on his own assessment of whether an ill-defined event had occurred.<sup>33</sup>

Accordingly Mr Furse acquired a domicile of choice in England. Again:

If a man intends to return to the land of his birth upon a clearly foreseen and reasonably anticipated contingency, e.g., the end of his job, the intention required by law [to acquire a domicile of choice] is lacking; but, if he has in mind only a vague possibility, such as making a fortune (a modern example might be winning a football pool), or some sentiment about dying in the land of his fathers, such a state of mind is consistent with the intention required by law.<sup>34</sup>

In another case, the intention to return was "no more than a pipe dream" and the individual acquired a domicile of choice in the UK.<sup>35</sup> In plain English: "wishful thinking".

In *Henkes v HMRC*<sup>36</sup> the taxpayer claimed to intend to leave the UK on retirement. That would normally prevent acquisition of a domicile of choice in the UK. However the circumstances were extreme and cast doubt on his claim. He was age 76 and had no current plans to retire. The

32 51 TC 522 at p.541.

33 [1980] STC 596 at p.604.

34 [1980] STC 596 at p.604.

35 *Ray v Sekhri* [2014] 2 FLR 1168.

36 [2020] UKFTT 159 (TC).

intention to retire was “no more than a vague aspiration.” He had no significant links to his domicile of origin, or elsewhere. (A holiday home in Spain, and a Dutch passport, did not count for much). His links to the UK were profound: more than 50 years residence; his children and grandchildren were settled here; his wife was settled here and even on retirement he might stay in the UK during the rest of her lifetime. In these circumstances he was held to have acquired a domicile of choice here.

### 3.7.2 *Tax and intention*

Tax may be relevant to intention. For instance if a tax exile remains in the UK, intending to return home if and when their home tax regime is relaxed, they would not acquire a domicile of choice here.

Likewise if an individual intended to remain in the UK only so long as UK tax law continues to allow a remittance basis and protected trust reliefs, they would not acquire a domicile of choice here.

In *Spence v Spence* an individual moved to Spain to avoid CGT. The CGT avoidance motive showed an intention to remain in Spain long enough to cease to be resident and ordinarily resident in the UK (the then requirement) but as far as intention to reside permanently was concerned, it was a neutral factor. It shed no light either way. It was argued that if the avoidance of tax was a dominant factor in the move to Spain, this undermined the argument that the individual had from the start the intention of residing there permanently. That was a non-sequitur:

... the mere fact that a person moves to another country in order to avoid liability to tax in the country of origin does not necessarily mean that he cannot or is unlikely to acquire thereby a domicile of choice in that other country. It is plainly a matter which depends upon the facts and circumstances of the particular case.<sup>37</sup>

The acquisition of a foreign domicile which is primarily motivated by a desire to avoid UK IHT is possible in theory, but may be difficult in practice, as the intention to live in the territory may prove to be insufficiently firm. Sir Charles Clore is an example:

... Sir Charles was ... unhappy in Monaco and often said that he would really like to return to England permanently and accept the tax

---

37 [1995] SLT 335 at p.339.

consequences. [A witness] asked him why he had decided to go there when all his interests were elsewhere. Sir Charles said that he did not know and that he was thinking of changing his mind and returning to live in England... he did not feel at home in Monaco.<sup>38</sup>

On those facts the court found that Clore had not acquired a domicile of choice in Monaco.

### 3.7.3 *Standard of proof*

In *Ramsay v Liverpool*:<sup>39</sup>

A domicile of origin can be changed and in its place a domicile of choice acquired, but the alteration is a serious matter not to be lightly assumed, for it results in a complete change of law in relation to two of the most important facts of life, marriage and devolution of property.

It has been said that the same applies to the abandonment of a domicile of choice:

That leaves the question whether there is any difference in

[1] the strength of the case which Mr Henwood must show if he acquired a domicile of choice in Mauritius without his domicile of origin reviving and

[2] the strength of the case which he must show if his domicile of origin revived [on abandonment of a domicile of choice].

It would be odd to have two different approaches within the same case...

It seems to me that as a general proposition the acquisition of any new domicile should in general always be treated as a serious allegation because of its serious consequences. ... such an approach ensures logical consistency between two situations where the policy interest to be

---

38 *Re Clore (No. 2)* [1984] STC 609 at p.615.

39 [1930] AC 588, at p.590. Again, in *Winans v Attorney-General* [1904] AC 287 at p.291: “‘unless you are able to shew that with perfect clearness and satisfaction to yourselves, it follows that a domicil of origin continues.’ So heavy is the burden cast upon those who seek to shew that the domicil of origin has been superseded by a domicil of choice! And rightly, I think. A change of domicil is a serious matter -- serious enough when the competition is between two domicils both within the ambit of one and the same kingdom or country -- more serious still when one of the two is altogether foreign. The change may involve far-reaching consequences in regard to succession and distribution and other things which depend on domicil.”

protected is ... the same.<sup>40</sup>

But just how “clear and compelling” the evidence needs to be depends on the facts of the case in point.<sup>41</sup>

#### 3.7.4 Allocation of burden of proof

In *The Lauderdale Peerage*:<sup>42</sup>

The onus of proving a change of domicile... lies upon those who assert it.

So the burden of proof lies on HMRC to show that an individual has acquired a UK domicile of choice.<sup>43</sup>

But the significance of this is limited:

the importance of onus of proof is easily exaggerated. While the burden of proof always exists, few substantial cases turn upon it and in making their factual findings the judge is usually expressing their considered judgment as to what in truth occurred.<sup>44</sup>

The onus of proof may be significant in ascertaining the domicile of a person who died long ago, as surviving documentary or other evidence is likely to be limited.

#### 3.7.5 Domicile of choice: Critique

It is difficult to acquire a domicile of choice for two reasons:

- (1) The requirement of intention to reside permanently (in the domicile sense) is a strong one.
- (2) The onus of proof is a heavy one.

The reason is in part historical:

For centuries, people have gone into the world from this country intending ultimately to return and without any intention of severing their connection with the British legal system and the ideas underlying it. It

43 See too 5.37 (Residence: Burden of proof).

44 Bingham, “The Judge as Juror”, *Current Legal Problems* (1985) p.2; reprinted in *The Business of Judging* (2000) p.2 (good holiday reading).

would not be in harmony with the temper of the British people if those who happen to be living abroad had to be told that there was no method whereby they could continue to regulate their lives according to the familiar British conceptions. It should also be remembered that a country which does not apply nationality as a yardstick in matters of private international law is bound to substitute for it a strict test involving a measure of permanence.<sup>45</sup>

The rules were designed to accommodate the empire builders of the 19<sup>th</sup> century. It is pleasant and profitable to trace the origin of legal rules in the social and economic conditions of a bygone age. But the question arises whether the rules are appropriate at the current time. The purpose here is of course private international law, not (or not primarily) tax law.

It is often said that the rules are too strict. In 1954 the Private International Law Committee proposed that if an individual had his home in a country, they should be presumed to intend to reside there permanently (in the domicile sense).<sup>46</sup> A bill to that effect was introduced in 1958 but failed as a result of lobbying by UK resident foreign domiciliaries. The government argued that the fears of foreign businessmen were groundless, as the reform would not affect them; but that was a damaging defence, as if the reform did not have much effect, why was it worth making?<sup>47</sup>

A similar reform was proposed by the Law Commission in 1987.<sup>48</sup> The Government initially accepted the 1987 proposals but there was no change in the law. In 1996 the proposals were formally abandoned, probably for the same reason.<sup>49</sup>

47 The controversy is recorded in Mann "The Domicile Bills"(1959) 8 ICLQ 457.

48 Law Com. No. 168 *The Law of Domicile*,  
[http://www.scotlawcom.gov.uk/download\\_file/view/228/](http://www.scotlawcom.gov.uk/download_file/view/228/)

49 According to Hansard HC, 16 Jan 1996 Col 487:

"The Government have decided not to take forward these reforms on the basis that, although they are desirable in themselves, they do not contain sufficient practical benefit to outweigh the risks of proceeding with them and to justify disturbing the present long established body of case law on this subject."

This was the right reason for the right decision. However, behind this decision was

Neither of these proposals were tax motivated. If they had any effect, it should have been broadly revenue-neutral, as to the extent that they may have made it easier to acquire a UK domicile of choice, they also made it easier to acquire a foreign domicile of choice. But they suffered from the problem of many tax reforms, that potential losers (UK resident foreign domiciliaries) complain more than potential winners.

In considering reform of the onus of proof, one should bear in mind that it may have limited significance in the way that cases are actually decided. If that is right, the reform of amending the burden of proof in domicile cases would have little if any practical effect, at least as a matter of law.

### **3.8 Remaining non-dom: UK resident**

Suppose an individual with a foreign domicile of origin (and not born in the UK) comes to the UK and wishes to retain their foreign domicile. The concern is not to acquire a UK domicile of choice.

The primary advice to be given is that the individual may live in the UK as long as they wish from year to year, but should not form the intention to reside here permanently. Unless they do so, the essential condition for the acquisition of a new domicile is not satisfied.

However, the individual should not be content with this mental step unless their stay here is short or fixed term. They should also take appropriate steps to broadcast the absence of any intention of residing here permanently and to manifest an intention to return elsewhere in due course. This is important because the court will decide for itself what is the true intention of the individual, and will have regard to the way that the individual conducts their affairs while in the UK.

The individual should if possible retain ties with their country of origin or the country where they intended in the future to settle. There are many ways to do so and they need not adopt them all. Possibilities for consideration include regular and extended visits home; local business interests, bank accounts and investments; membership of local social, political and religious organisations.

Conversely, the individual's social and business commitments in the UK should be minimised. But the significance of such commitments depends

---

pressure of the foreign domicile lobby: see "Rules for Determining Domicile", Law Reform Commission of Hong Kong (2005) para 4.28 <http://www.hkreform.gov.hk>

on the facts. The purchase of a home in this country (directly or through a trust structure) might indicate a greater degree of permanence than rented accommodation, but purchasing a property may imply nothing more than an intention of medium-term residence. Changing one's name (or its spelling) to accord with UK usage, may suggest a long term intention to remain in the UK; but it was common before and during the 2<sup>nd</sup> world war for refugees to change their name for the protection of themselves and relatives exposed to enemy control,<sup>50</sup> and not much of an inference as to long term intention could be drawn from that.

The individual should make a will taking effect under the law of their domicile.<sup>51</sup> The will should include a declaration that the individual intends to return home in due course or the circumstances in which that is to occur. The will might if appropriate express a desire to be buried in that country.

The purchase of a burial plot suggests an expectation to be buried in that country. If that is in the UK, it suggests an intention to remain there for the rest of the individual's life. If the burial plot is elsewhere, it may suggest an intention to leave the UK. However, this is not necessarily a matter which carries much weight and if done at the suggestion of a tax adviser, it carries no weight at all.

The retention of the foreign domicile of origin is not dependent on establishing a positive intention to return home: it is determined negatively by the absence of an intention to stay in the UK. An intention to move from the UK, whether to the country of origin or somewhere else, is enough to enable the domicile of origin to be retained:

though a man has left the territory of his domicile of origin with the intention of never returning, though he be resident in a new territory, yet if his mind be not made up or evidence be lacking or unsatisfactory as to what is his state of mind, his domicile of origin adheres.<sup>52</sup>

The assembling of evidence of an intention to return to the country of origin, while potentially helpful, is in some cases unnecessary or inappropriate.

---

50 This was so common that there was a standing order to facilitate the procedure: Army Council Instruction no 475 of 1943.

51 A separate UK will may also be appropriate to deal with UK property.

52 *Re Fuld* [1968] P 675 at p.685.

### 3.8.1 *Involvement in politics*

The general rule is that involvement in UK politics is compatible with a non-UK domicile though it is a factor to be taken into account in ascertaining domicile. However, MPs and other parliamentarians are deemed UK resident and domiciled,<sup>53</sup> and the position of other foreign domiciled individuals is politically fraught.<sup>54</sup>

There is a proposed rule that (in short) non-resident and foreign domiciled individuals may not make gifts (above a small amount) to a political party.<sup>55</sup> But although the law was enacted in 2009,<sup>56</sup> it is not in force: the necessary commencement order has not been made. Presumably the Brown administration fell before it could be done, and subsequent coalition/Conservative administrations did not favour the change. So gifts to political parties by foreign domiciliaries are currently lawful. However it may be safer for foreign domiciliaries whose domicile might be challenged not to make major donations; but it depends on the facts.

The UK franchise may include commonwealth and Irish citizens, so while voting in the UK is not irrelevant to intention and domicile, it should not count for much.

Registration and voting as an overseas elector<sup>57</sup> is (in short) ignored in

53 See App 3.1 (Parliamentarians).

54 This has been the case at least since the 1920's when a peerage was given to Lord Vestey who had been a tax exile: see "*Vestey: Royal Commission evidence and debate*"

[https://www.kessler.co.uk/wp-content/uploads/2013/07/Vestey\\_Royal\\_Commission\\_evidence\\_and\\_ensuing\\_debate.pdf](https://www.kessler.co.uk/wp-content/uploads/2013/07/Vestey_Royal_Commission_evidence_and_ensuing_debate.pdf)

55 The requirement is that "the individual's liability to income tax for the current tax year (including eligibility to make any claim) falls to be determined (or would fall to be determined) on the basis that the individual is resident, ordinarily resident and domiciled in the UK in that year."

Would that condition be met if the individual was deemed domiciled, or did not claim the remittance basis in the year, at least if the individual was not the settlor of a protected trust? At present the point does not arise.

56 Section 10 Political Parties and Elections Act 2009 amending s.54 Political Parties, Elections and Referendums Act 2000.

57 This is an interesting corner of election law. Before 1985 non-residents could not vote in Parliamentary elections. The Representation of the People Act 1985 extended the franchise to "Overseas electors" who are (in short) non-resident British citizens who had registered as voters when UK resident; they may continue to vote until they

a domicile tax appeal, unless the taxpayer wishes otherwise.<sup>58</sup> This rule was intended to encourage UK expatriates to vote without imperiling their claim to be non-UK domiciled. There is considerable force in the objection made by Labour MP Mike O'Brien:

Whereas the American colonies in 1774 cried, "No taxation without representation," it seems that ... overseas voters are now demanding representation without taxation... [Section 200] has all the hallmarks of a cynical amendment motivated by the self-interest of the Tory party. ... registration to vote shows a commitment to one's country. It can be evidence of domicile. In each case, that evidence will have a different weight, depending on the other circumstances of the individual, but it is right that registration should have some weight and show some degree of commitment to one's country.<sup>59</sup>

The rule ought to be repealed, but in the scramble for political advantage it would be unrealistic to expect cool and impartial reflection, and it does not much matter.<sup>60</sup> Those who are concerned about possible UK domicile would still be best advised not to register or vote in the UK (and to vote in their country of domicile, if possible).

### 3.9 Acquisition of foreign domicile

The domicile rules are favourable to individuals with a foreign domicile of origin. They may stay many years in this country without acquiring a

---

have been non-resident for 15 years.

<http://researchbriefings.parliament.uk/ResearchBriefing/Summary/SN05923>

58 See s.200 FA 1996; the section was (unhelpfully) rewritten for IT purposes in s.835B ITA.

59 Hansard, HC Deb 27 March 1996 vol 274 cc1106-10.

<http://www.publications.parliament.uk/pa/cm199596/cmhansrd/vo960327/debtext/60327-41.htm> The subsequent election (1997) was the Blair landslide, and O'Brien was no doubt also right to question whether this provision helped the Tories.

60 There are over 5m overseas British citizens, and as at December 2018, there were 124,190 registered overseas electors: see

<https://www.electoralcommission.org.uk/who-we-are-and-what-we-do/our-views-and-research/our-research/analysis-electoral-registration-data>

The US has a similar rule in s.106 [US] Uniformed and Overseas Citizens Absentee Voting Act 1986, but since the US taxes its non-resident citizens, its practical significance must be rather less.

UK domicile of choice and becoming exposed to the concomitant tax burden (though this is subject to the 15-year deemed domicile rule). But the rules are correspondingly unfavourable to an individual who wishes to replace their UK domicile of origin by the acquisition of a foreign domicile of choice. Such a person must not only reside in that other country; they must hold and manifest their intention to remain resident there permanently.

An individual cannot shed their UK domicile of origin without acquiring a domicile of choice in another country; it is not enough to intend to leave the UK permanently, never to return. A domicile of origin is not lost by abandonment but by replacement. Departure from the UK must therefore be accompanied by permanent residence in the chosen country. If any time is spent in the UK, the UK must not be the chief residence

In order to acquire a domicile of choice in a country, one must *want* to live there. If a UK domiciliary has plans of a business or personal nature which lead them to want to settle abroad, then acquiring a foreign domicile may be feasible. Links with the UK must be kept to a minimum, particularly at first, and the facts must be clear. Fawcett concluded in 1985 that an unspoken policy of not allowing individuals with a UK domicile of origin to escape UK tax was influential in determining the result in domicile tax cases.<sup>61</sup> Subsequent cases suggest this is still true.<sup>62</sup>

### 3.10 Abandoning domicile of choice

Dicey states:

- (1) A person abandons a domicile of choice in a country by ceasing to reside there and by ceasing to intend to reside there permanently or indefinitely, and not otherwise.<sup>63</sup>

Thus there are two requirements: cessation of residence<sup>64</sup> and cessation of

---

61 “Result Selection in Domicile Cases” (1985) OJLS vol 5 p.378.

<http://www.ojls.oxfordjournals.org/content/5/3/378.full.pdf> The 2017 formerly-domiciled rule reflects a similar intuition: see 4.7.1 (Former-dom resident: Critique).

62 Cases in which apparently strong claims of a UK domiciliary to a foreign domicile of choice failed include: *Portland*; *Plummer*; *Gaines-Cooper*.

Fawcett also found that a policy of upholding wills is influential in probate cases.

63 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 6R-074.

64 See 3.6 (Domicile-residence requirement).

intention<sup>65</sup>. Dicey continues:

- (2) When a domicile of choice is abandoned, either
  - (i) a new domicile of choice is acquired; or
  - (ii) the domicile of origin revives.<sup>66</sup>

The concern of a person who has a UK domicile of origin but has acquired a foreign domicile of choice is that they may lose their domicile of choice. They must:

- (1) maintain their residence in the country of domicile of choice; or
- (2) maintain the intention to reside there permanently; or
- (3) acquire a new foreign domicile of choice.

*Steiner v IRC*<sup>67</sup> considers the relationship between abandonment of a domicile of choice and acquisition of a new domicile of choice:

A criticism was made of the decision of the Special Commissioners that there was no finding in terms of abandonment of the German domicile of choice. This is, strictly speaking, correct; but I do not take it to be a valid criticism, because, if a tribunal comes to the conclusion that a sufficient intention has been established to justify a conclusion of a different domicile of choice, then it necessarily involves a finding of abandonment of the other. They are inseparable opposite sides of the same coin.

### 3.10.1 *Abandoning domicile of dependency*

A domicile of dependency ceases:

- (1) for a child, on attaining the age of independence
- (2) for a woman who was married on 1 January 1974, on that date or when the marriage ended, if earlier

Once the dependency has ceased, the domicile of dependency continues but it may be abandoned in the same way as a domicile of choice.<sup>68</sup> In this respect a domicile of dependency is treated like a domicile of choice.<sup>69</sup>

---

65 See 3.7 (Permanent/indefinite residence).

66 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 6R-074.

67 49 TC 13 at p.35.

68 See 3.16.2 (Marriage existing in 1974); 3.16.1 (Marriage ended pre-1974); 3.17 (Child's domicile: England).

69 Indeed, a domicile of dependency has been described as a type of domicile of choice, see 3.16.3 (Marriage ended pre-1974). The reader may think that is somewhat

It has been suggested that the test for abandonment of a domicile of dependency is more lenient than the test for abandonment of a domicile of choice. However, it is considered that the *test* is the same: the individual must (1) cease to reside in the place of domicile of dependency and (2) cease to intend to reside there permanently. In the case of a domicile of dependency it is possible that the individual may never have intended to reside there permanently, in which case requirement (2) may in practice be easier to satisfy. The test is more lenient in that the onus of proof may be easier to satisfy.<sup>70</sup>

### 3.11 Dual residence and domicile

The tests of residence and intention to reside are (relatively) straightforward if a person resides (and intends to reside) in only one country. What if the person resides (or intends to reside) in more than one country? Increased mobility makes this a common problem.

#### 3.11.1 *Acquiring domicile of choice: Dual resident*

In *Udny v Udny* Lord Westbury said that a domicile of choice is acquired when:

a man fixes voluntarily his sole *or chief* residence in a particular place,

---

stretching the concept of “choice”, and some writers have suggested the term “quasi-choice”. But it does not matter whether or not one calls a domicile of dependency a type of domicile of choice, or quasi-choice. We simply need some rule for abandoning a domicile of dependency, after the dependency has ceased, and it is sensible to apply the same rule as that which applies for abandoning a domicile of choice.

70 Dicey, Morris & Collins, *Conflict of Laws* (15th ed., 2012) para 6-018 states:

There is a presumption that a person continues to be domiciled in the country in which he is domiciled; or, to put it differently, the burden of proving a change of domicile lies on those who assert it. This presumption varies in strength according to the kind of domicile which is alleged to continue. It is weakest when that domicile is one of dependency and strongest when the domicile is one of origin.

*Henderson v Henderson* [1967] P. 77 at p.82 cites this and comments:

There are dicta in some Scottish and Irish cases to support this statement; though I think that it is really more a matter of common sense and experience than a rule of law. The abandonment of a domicil of choice acquired dependently in favour of a domicil of origin re-acquired by personal volition must, in the nature of things, generally be of all changes of domicil the one the least onerous of proof.

with an intention of continuing to reside there for an unlimited time.<sup>71</sup>

If a person resides in more than one country, it is considered that they acquire a domicile of choice in country A if and only if:

- (1) country A is their chief residence; and
- (2) their intention is permanently to reside in country A as their chief residence.

If a person has a secondary residence in a country (for example they use a holiday home there every summer or winter), they do not acquire a domicile in that country even if they intend to retain that secondary residence permanently. But if they acquire (and intend to permanently retain) a chief residence in a country they become domiciled there even if they retain a secondary residence elsewhere.

In *Plummer v IRC*:<sup>72</sup>

... a person who retains a residence in his domicile of origin can acquire a domicile of choice in a new country only if the residence established in that country is his chief residence...

[Counsel] submitted that a person whose presence in a new country is sufficient to amount to residence may, notwithstanding that his chief residence remains in his domicile of origin, acquire a domicile of choice by evincing an intention to continue to reside permanently in the new country. I think that this submission is inconsistent with the passage which I have quoted<sup>73</sup> ... which has always been treated as an authoritative statement of the circumstances in which a domicile of choice may be acquired.

This should not be controversial.<sup>74</sup>

---

71 (1869) LR 1 Sc & Div App 441 at p.458 (Emphasis added).

72 60 TC 452 at p.463.

73 See 3.7 (Permanent/indefinite residence).

74 “It is possible for a person to have two homes, each in a different territory. In that event, the relevant enquiry is which of the two homes is the chief residence”: *Re Shaffer* [2004] WTLR 457 at [11]. The same point is made in *IRC v Bullock* 51 TC 522 at p.539F where the expression used is “principal home”.

In *IRC v Duchess of Portland* 54 TC 648 at p.656, Nourse J said that the test was, in which of the two countries did the individual reside “as an inhabitant”. That comes to the same thing, but to ask which of the two countries is the chief or principal residence is a clearer way to approach the question. This point was made in *Plummer v IRC* 60 TC 452 at p.463 (“the concept of being an inhabitant seems to me less

### 3.11.2 *Losing domicile of choice: Dual resident*

The judge continued:

Rule 13(1) of Dicey and Morris, if read literally, appears to go too far. This says that:

“A person abandons a domicile of choice in a country by ceasing to reside there and by ceasing to intend to reside there permanently or indefinitely, and not otherwise.”

These words might suggest that a domicile of choice (and presumably a fortiori a domicile of origin) cannot be lost unless the person in question has ceased altogether to reside there. I do not think that the rule was framed with dual residence in mind. At any rate, it seems to me that *Udny v Udny* shows that loss of a domicile of *origin or choice* is not inconsistent with retention of a place of residence in that country if the chief residence has been established elsewhere.

(Emphasis added)

This passage is obiter, and has caused confusion. One needs to consider domicile of origin and domicile of choice separately:

- (1) *Loss of domicile of origin* The only way to lose a domicile of origin is to acquire a domicile of choice. This passage (so far as it concerns a domicile of origin) is correctly stating the point made at 3.11.1 (Acquiring domicile of choice: dual resident).
- (2) *Loss of domicile of choice* There are two ways to lose a domicile of choice:
  - (a) by acquiring a new domicile of choice
  - (b) by abandonment without acquiring a new domicile of choice

The judge here is considering acquisition of a new domicile of choice.<sup>75</sup> The passage (so far as it relates to a domicile of choice replaced by a new domicile of choice) correctly states the point made at 3.11.1 (Acquiring domicile of choice: dual resident) above.

What is the test for abandonment of a domicile of choice (without acquiring a new domicile), in a dual residence context? It is considered that Hoffmann is correct to say that T abandons his domicile of choice

---

illuminating in cases of dual or multiple residence”).

<sup>75</sup> Hence the words at the end of the passage (“if the chief residence has been established elsewhere”).

where:

- (1) T acquires a domicile of choice in country A.
- (2) T continues to reside in country A but
  - (a) they cease to reside there as their chief residence; and
  - (b) they cease to intend to reside there as their chief residence.
- (3) T does not acquire a domicile of choice elsewhere.

This is consistent with the test of acquisition of domicile of choice.<sup>76</sup>

### 3.11.3 *Which is chief residence*

How does one ascertain which of two competing residence countries is the chief residence? The test is multifactorial: no single factor is decisive. In *Barlow Clowes International v Henwood*:

[The] test of chief residence ... cannot simply be a reference to the main home in terms of size or amenities. Nor can it be a reference to the home in which the subject spends the most time. The court has to look at the quality of the residence in order to decide in which country the subject has an intention to reside permanently.<sup>77</sup>

The cases offer examples and a little guidance, but the question is essentially one of fact and degree.

In *Plummer v IRC* the taxpayer had a domicile of origin in England. She intended to live in Guernsey, but was studying at university in London. In all, she spent two-thirds of her time in England and one-third in Guernsey (some weekends and holidays). It was held that England remained her chief residence so she did not acquire a domicile of choice in Guernsey. However the test was not just a matter of counting days:

[Counsel for the taxpayer] submitted that the Commissioners paid no regard to anything except the relative amounts of time which the taxpayer spent in England and Guernsey during the years in question. They ignored the quality of her presence in each country; the fact that she was in England solely for the purpose of education and in Guernsey because it was her family home. I do not think that this is a fair reading of the Commissioners' decision. They set out at length the taxpayer's ties with Guernsey and her reasons for remaining in England. In

---

<sup>76</sup> See 3.11.1 (Acquiring domicile of choice: Dual resident).

<sup>77</sup> [2008] EWCA Civ 577 at [104].

deciding whether the house in St. Peter Port had become her chief residence, they said:

“We accept the [taxpayer’s] evidence that she likes Guernsey and enjoys the amenities of the island when she is there, quite apart from enjoying the company of her family ... We do not underestimate the part which Guernsey plays in her thinking..”

Nevertheless they said that these considerations did not outweigh the fact that the taxpayer had resided for the greater part of the year in England and that there had been no “break in the pattern” which would justify a finding that she had ceased to have her chief residence in England. She had not, to use the language of Lord Hatherley in *Udny v Udny*,<sup>78</sup> settled in Guernsey.

... in my judgment it was the right conclusion. If the taxpayer had ... broken altogether with England and settled in Guernsey like her mother and sister and then, even after a relatively short interval, returned to England for study, the quality of her presence here might have been such as to prevent a revival of her domicile of origin. But the fact is that she has not yet settled in Guernsey, and the reasons why she has been unable to do so are in my view irrelevant. ... To treat the house in Guernsey as her chief residence simply because it is the sole residence of her mother and sister would in my view be attributing to her a kind of quasi-dependent domicile for which there is no legal justification. And the fact that the taxpayer may intend to settle in Guernsey after her education and training are completed and then to remain permanently is not sufficient to give her a proleptic domicile of choice.<sup>79</sup>

The concept of “chief residence” is one of a cluster of similar concepts:

Concept	Relevant for	See para
Centre of vital interests	Treaty-residence	8.13
Main private residence	MPR relief	55.7

Some guidance may be had from discussion of those concepts, though the period of enquiry may perhaps be different.

### 3.12 Statements of domicile

#### 3.12.1 Declaration of domicile

Where domicile may be unclear, a will should contain a statement of

78 LR 1 Sc & Div 441 at p.452 (“the country in which he has chosen to settle himself”).

79 60 TC 452 at p.464.

domicile.

According to *Proles v Kohli*:<sup>80</sup>

the courts are reluctant to give effect to declarations which refer in terms to "domicile" since the declarant is unlikely to have understood the meaning of the word.

Whether the individual has understood the meaning of “domicile” depends of course on the facts. An uninstructed lay person is unlikely to fully understand the legal meaning of the word, but if competent advisors are acting, the matter will be explained. Still, a short template declaration that “I am domiciled in xxx” is weak evidence. The statement should be drafted in accordance with the individual’s specific circumstances.<sup>81</sup>

Further evidence may take the form of a full statement, or, for added gravitas, a statutory declaration under the Statutory Declarations Act 1835.

These declarations may be self-serving when the individual has a motive for claiming a particular domicile. Of course, declarations of intention are not conclusive. They

must be examined by considering the persons to whom, the purposes for which, and the circumstances in which they are made, and they must be further be fortified and carried into effect by conduct and action consistent with the declared expressions.<sup>82</sup>

*Agulian v Cyganik* made the point more strongly:

in a case of proof of the subjective intentions of a person who has died, little weight is attached to direct or indirect evidence of statements or declarations of intention by the person concerned. Subjective intentions have to be ascertained by the court as a fact by a process of inference from all the available evidence about the life of the person, whose domicile is disputed.<sup>83</sup>

---

80 [2018] EWHC 767 (Ch) at [13].

81 For precedents, see Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 18.36 (Testator domiciled outside the UK).

82 *Ross v Ross* [1930] AC 1 cited *Proles v Kohli* [2018] EWHC 767 (Ch) at [12]. For an example of a simple declaration rightly disregarded, see *Reddington v MacInnes* [2002] ScotCS 46 at [28]. (If those drafting the will had considered domicile more carefully, the litigation might have been avoided.)

83 [2006] EWCA Civ 129 at [13].

In another case, the evidence included the memoir of the playwright Anthony Shaffer:

The book opens with a quotation from Gore Vidal:

“A memoir is how one remembers one’s own life, while an autobiography is history, requiring research, dates, facts double-checked.”

The parties invited me to read it, which I did. I have not taken it as evidence of historical facts, but it has helped me in forming a view about Mr Shaffer’s state of mind during its composition.<sup>84</sup>

### 3.12.2 *Evidence of living individual*

*Wilson v Wilson* noted:

Most of the cases of domicile occur after the death of the party,<sup>85</sup> and the Court has therefore to infer from the character of the residence in a particular country to which he has removed himself, from the ties that he has created for himself, from the property that he has acquired, the obligations that he has entered into in connection with the new country. The Court has to determine the fact that he has really chosen to reside there ... “for an indefinite period as his home”.<sup>86</sup>

The position is different if the individual is alive and able to testify:

still when we have the man here, and when he swears that that was his intention, why should not the Court believe him?<sup>87</sup>

The answer is that the court may accept the individual’s statement (though of course it assesses that evidence in the light of any other evidence). This is self-evident, but *Wilson v Wilson* provides authority if needed:

The Court must not take his word as conclusive proof of the fact, and if there are circumstances in the case which tend to shew that what he says is not true or likely to be true, they may influence the conclusion at which the Court would arrive. Therefore the question is here not so much whether the circumstances of his English residence tend to prove English domicile as whether, the man swearing to his intention to create

---

84 *Re Shaffer* [2004] WTLR 457 at [5]-[6].

85 Author’s footnote: This is true of succession disputes. In tax disputes, it tends to be the other way round. But nothing turns on that.

86 (1872) LR 2 P & D 435 at p.444.

87 (1872) LR 2 P & D 435 at p.444.

an English domicile, there are such circumstances on the other side as warrant the Court in throwing over his oath and disbelieving him.<sup>88</sup>

### 3.13 Domicile of choice: Illness

In *Moorhouse v Lord*:

Take the case of a man labouring under a mortal disease. He is informed by his physicians that his life may be prolonged for a few months by a change to a warmer climate and that at all events his sufferings may be mitigated by such a change. Is it to be said that if he goes out to Madeira he cannot do that without losing his character as an English subject, without losing his right to the intervention of the English laws as to the transmission of property after his death, and the construction of his testamentary instruments. My lords, I apprehend that such a proposition is revolting to common sense, and the common feelings of humanity.<sup>89</sup>

Thus a person does not *acquire* a domicile of choice in a place to which they move for short term medical reasons. This is so even if they go for end-of-life care and know that they will not recover to return home.

For the same reason, a person will not *lose* a domicile of choice in a country, if they leave that country for end-of-life medical care, even if they go to the country of their domicile of origin for treatment.<sup>90</sup> In *Proles v Kohli* an individual had a domicile of origin in India, acquired a domicile of choice in England, but fell ill and died in India:

---

88 (1872) LR 2 P & D 435 at p.444.

89 (1863) 10 HLC 272 at p.292. Similarly *Udny v Udny* (1869) 1 LR Sc & Div 441 at p.458: “There must be a residence freely chosen, and not prescribed or dictated by any external necessity, such as ... the relief from illness ...”. And more recently, *Foote v. Foote Estate* [2011] ABCA 1 at [21]: “Some authorities speak of one’s domicile of choice as a place where one intends to “end one’s days”. That language is unhelpful where, as here, a person with a fatal and fast-moving illness makes a trip shortly before his death for treatment. Determining an intention to change domiciles in such a situation is not a simple matter of saying the deceased intended to “live out his days” in the new location. It could not, in most cases, be described as a voluntary move.”

90 But the individual could become deemed UK domiciled, as a formerly domiciled resident.

It may be that as his illness progressed, it became clear that he would be unable to [return to England]. It may be that at some stage it became clear to the deceased that he would die within a short period; and that at that stage he decided to remain in India. In my judgment, such decisions would not be an abandonment of his English domicile of choice, for two reasons. The first is that such a decision would be one forced upon him by his illness and impending death: .... The second is that it would not be a decision as to where he was to live indefinitely, because, for all practical purposes, there was, sadly, no life remaining to be lived by him.

Indeed, even if the deceased had travelled to India intending to die there, this would not, in my judgment, be an abandonment of his domicile of choice, for similar reasons. Where, for practical purposes, a person has no life left to live, then a decision to go to his/her country of origin to die, is not a decision to spend any significant part of one's life ("the end of one's days") in that country - it is a decision that the specific event of his/her death should be in that country.<sup>91</sup>

However, that applies only to a person who goes purely for short term medical treatment or palliative care. If, say, a person comes to England who is housebound and needs long-term care, or because the weather in Bournemouth is better for their health than Falkirk,<sup>92</sup> they may acquire an English domicile. In *Hoskins v Matthews*:

it was contended ... that Mr Matthew's residence out of England was a matter of necessity and not of choice. That his health compelled him to reside abroad, and that domicile cannot be founded on such a compulsory residence. That there may be cases in which even a permanent residence in a foreign country, occasioned by the state of the health, may not operate a change of domicile may well be admitted. ... But such cases must not be confounded with others in which the foreign residence may be determined by the preference of climate or the hope or the opinion that the air or the habits of another country may be better suited to the health or the constitution. In the one case, the foreign abode is determined by necessity; in the other it is decided by choice.<sup>93</sup>

---

91 [2018] EWHC 767 (Ch) at [144], [145].

92 As in *Reddington v MacInnes* [2002] ScotCS 46.

93 (1856) 8 De GM & G 13 at p.28.

It seems to me that to ask whether a person has acted by necessity or by choice is not the best way to put the question: where a person goes to a country for medical reasons, there is (almost) always *some* element of volition. The better way to put the question is whether the individual has “settled” in the country to which they have gone; whether they are there “as an inhabitant”. But it comes to the same thing, as if an individual goes to a country for medical reasons as a matter of necessity, they will not have settled there.

### 3.14 Citizenship and domicile

This section draws on:

Shachar (ed), *The Oxford Handbook of Citizenship* (2017) (“**Oxford Handbook**”).

Citizenship: Our Common Bond (“**Goldsmith report**”)<sup>94</sup>

Citizenship<sup>95</sup> has generated a lively scholarship, which ranges across law, politics, ethics and sociology.

#### 3.14.1 *Citizenship/domicile compared*

The starting point is to note that citizenship is distinct from domicile.<sup>96</sup> Important differences include the following:

- (1) The rules for acquiring/changing domicile are distinct from the rules for acquiring/changing/losing citizenship.
- (2) Every person has one and only one domicile, but a person may have two or more nationalities (dual nationals) or no nationality (stateless persons).
- (3) A person who is a citizen of a federal or multi-jurisdiction state (such as the UK) is domiciled in only one of its legal jurisdictions (eg

---

<sup>94</sup> <https://www.kessler.co.uk/wp-content/uploads/2012/10/Citizenship-Report-Goldsmith.pdf>

<sup>95</sup> A note on terminology: the words citizenship and nationality are (more or less) interchangeable; though attempts are made to desynonymise them, and when dealing with statutory provisions it is best to adopt the statutory term.

<sup>96</sup> This is self-evident, but if authority is needed, see *IRC v Bullock* 51 TC 522 at p.540; *Udny v Udny* 1 Sc & Div 441 at p.452: “The question of naturalization and of allegiance is distinct from that of domicile;” likewise at p.457.

England, Scotland or Northern Ireland).

Although citizenship and domicile are distinct, decisions as to citizenship reflect on intention, which is central to domicile.

### 3.14.2 *Retention of citizenship*

In *IRC v Bullock*:

The fact that the taxpayer chose to retain his Canadian citizenship and not to acquire UK citizenship would not be inconsistent with his having acquired a domicile in the UK, but his adherence to his Canadian citizenship is, in my opinion, one of the circumstances properly to be taken into consideration in deciding whether he acquired a UK domicile.<sup>97</sup>

That is not controversial.

### 3.14.3 *Change of citizenship*

Acquiring citizenship is known as naturalisation. In *Wahl v Attorney-General*:<sup>98</sup>

- [1] Naturalisation is one thing; change of domicile is another:
- [2] it is not the law either
  - [a] that a change of domicile is a condition of naturalisation, or
  - [b] that naturalisation involves necessarily a change of domicile.

Point [1] is correct. The two points at [2] are distinct:

- (a) Whether a change of domicile is a condition of naturalisation is a question of nationality law and practice.
- (b) Whether naturalisation involves a change of domicile is a question of domicile law.

These points require further consideration in the light of changes in law

---

<sup>97</sup> 51 TC 522 at p.540. Similarly, in *Gaines-Cooper v HMRC* the Special Commissioners noted that the taxpayer retained British citizenship, and did not apply for citizenship in the Seychelles. Perhaps more significantly, his wife applied for British citizenship: [2008] STC 1665 at [141].

<sup>98</sup> (1932) 147 LT 382; [1938] All ER 922 at p.926.

<https://www.kessler.co.uk/wp-content/uploads/2012/04/Wahl-v-Attorney-General.pdf>

The case concerned naturalisation under the 1870 Act.

and practice since *Wahl*. I focus on the acquisition of British citizenship.

### 3.14.4 Nationality law background

The law of naturalisation has changed over the years:

<b>Act</b>	<b>Intention required for naturalisation</b>
1870 Act	To reside [permanently] <sup>99</sup> in the UK <sup>100</sup>
1914 Act	To reside [permanently] in His Majesty's dominions <sup>101</sup>
1948 Act	To reside [permanently] in the UK or in any colony, protectorate or UK trust territory, or Anglo-Egyptian Sudan <sup>102</sup>
1981 Act	Home (or principal home) in the UK

The current legislation is the British Nationality Act 1981. In order for a person to become a British citizen under this Act, it is usually a requirement that:

his intentions are such that, in the event of a certificate of naturalisation as a British citizen being granted to him, his home or (if he has more than one) his principal home will be in the UK.<sup>103</sup>

I refer to this as the “**UK-home naturalisation requirement**”. The applicant must certify that that is their intention; I refer to that as the “**UK-home statement**”.

The 1981 Act was preceded by a White Paper, *British Nationality Law*.<sup>104</sup> This sheds some light on the present wording, and why it differs from the pre-1981 law, which referred to *residence* as opposed to *home/principal home*:

60. In the Government's view the residential qualification should be such as to demonstrate very clearly that an applicant has thrown in his lot with the UK, and that he intends to regard the UK as his home. There have been signs that under the present [pre 1981] law citizenship

---

99 The word “permanently” was not in the Acts of 1870, 1914 or 1948, but it appears to have been required by Home Office practice.

100 Section 7 Naturalization Act 1870 (this is the spelling of the 1870 Act).

101 Section 2 British Nationality and Status of Aliens Act 1914.

102 Sch 2 para 1(e) British Nationality Act 1948.

103 Para 1(d) sch 1 British Nationality Act 1981.

104 Cmnd 7987 (1980) <http://www.uniset.ca/naty/maternity/wpaper.pdf>

has sometimes been sought merely for the convenience of having a UK passport, and that having obtained one, the person has later gone elsewhere to live. The Government do not take the view that citizenship should be available solely for convenience of travel.

This may explain why the practice before 1981 was to require a declaration of intention to reside *permanently*.<sup>105</sup>

61. Neither of the terms “residence” and “ordinary residence” has been the subject of interpretation by the Courts for purely nationality purposes. Neither has been found entirely satisfactory in all circumstances.<sup>106</sup>

This may explain why the wording of the naturalisation UK-home requirement changed from “residence” to “home/principal home”. The change was not intended to relax the naturalisation requirement and maybe tends to strengthen it.<sup>107</sup>

Home Office practice is set out in the document “Nationality policy: Naturalisation as a British citizen by discretion”.<sup>108</sup> This contains the guidance used by the Home Office when deciding applications for citizenship.

### **Principal home in the UK**

... Information may also come to our attention<sup>109</sup> that HMRC regard an applicant as domiciled abroad for tax purposes. In such cases, you must request the applicant’s permission to contact the HMRC.<sup>110</sup> You should

---

105 The word “permanently” was not in the statute, but as the grant of nationality was discretionary, the Home Office presumably considered it had power to add this requirement.

106 This is something of an understatement: see the 2012/13 edition of this work para 3.12 (Commentary: Assessment of case law tests).

107 But although residence/home may have a slightly different nuance, the words are often used interchangeably; see 3.6 (“Residence”).

108 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/885368/naturalisation-as-a-british-citizen-by-discretion-v5.0-gov-uk.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/885368/naturalisation-as-a-british-citizen-by-discretion-v5.0-gov-uk.pdf) (May 2020)

109 Author’s footnote: Presumably the Home Office ask HMRC for this information.

110 Author’s footnote: This is not necessary as the citizenship application form now authorises HMRC to disclose. Presumably this sentence dates back to when the application form did not have that wording.

then ask the HMRC to provide us a copy of the applicant's completed 'Domicile Enquiry' questionnaire,<sup>111</sup> which may throw some light on future intentions. If the applicant refuses permission you must refuse the application...

**Applicant intends to live outside the UK**

If applicants make it clear that, while they intend to live in the UK for a period, they have made firm plans to establish their principal home abroad at some future date the application must be refused. You must not refuse an application solely on the suspicion that the applicant will reside outside of the UK.

... Where an applicant has more than one home and their principal home is outside of the UK at the time of application you must refuse the application.

The Home Office formerly regarded the UK-home naturalisation requirement (that the individual's "home is in the UK") as distinct from, and falling short of, the requirement for acquisition of a domicile of choice (an intention to reside in the UK permanently, in the domicile sense).<sup>112</sup> The current guidance suggests that, at least from Sep 2019, the Home Office will not accept an application for naturalisation by a person who openly maintains that they will not be domiciled in the UK after naturalisation. Whether the Home Office regard this is a requirement of nationality law, or as a matter of Home Office practice in exercising their discretion, is not clear (the Home Office have probably not addressed the question); it does not much matter.

### 3.14.5 *Naturalisation: Domicile cases*

The case law in this area needs some care as a cursory reading will mislead.

*Wahl v Attorney-General* concerned an individual naturalised under the

---

111 Author's footnote: The reference is to form Dom1, which is not now used, but that does not matter. Any tax return will disclose if a claim is made for foreign domicile.

112 See Home Office Nationality Instructions 2013, set out in the 2018/19 edition of this work para 3.11.4. This stated: "The replies to the [HMRC] domicile questionnaire [form Dom 1] should not be given undue weight, and they should not form grounds for refusal if they merely indicate that applicants see their ultimate home as a country other than the UK. (It is not a requirement for naturalisation that applicants intend to make their home permanently in the UK.)" The change came in Sep 2019.

1870 Act. He declared that he intended to reside *permanently* in the UK and had no intention of permanently leaving the UK. The House of Lords found nevertheless that he did not intend to make his home in the UK and did not acquire a UK domicile of choice.<sup>113</sup> But that was a finding of fact (not law) which depended on all the facts of the case.<sup>114</sup>

The point was reargued in *Steiner v IRC*, which also concerned naturalisation under the 1870 Act. So once again the taxpayer had declared that he intended “to reside *permanently* in His Majesty’s dominions” (which, in the context, meant England). The court, I think rightly,<sup>115</sup> brushed *Wahl* aside:

The Special Commissioners attached some importance to the declaration associated with the naturalisation application, and so do I ... I bear in mind, of course, the views expressed in the House of Lords in *Wahl v Attorney-General*. But the significance of such matters must be judged in the context of any particular case and the background against which the application for naturalisation and the statements therewith is to be viewed. ... I think it would be quite wrong for this Court to dismiss the view of the Special Commissioners ...

And again:

Now, it is true that in *Wahl v Attorney-General* a similar application and a statement in somewhat similar terms were regarded by the majority of the House of Lords as not affording any strong evidence of intention to reside permanently in England; but Lord Macmillan, in a dissenting speech, was of opinion that considerable weight should be attached to these matters, and Lord Atkin, who was one of the majority, said, at page 385: “I am far from saying that an application for naturalisation is not a matter to be carefully considered as part of the evidence in a case of

---

113 (1932) 147 LT 382; [1938] All ER 922

<https://www.kessler.co.uk/wp-content/uploads/2012/04/Wahl-v-Attorney-General.pdf>

The reader may find the decision less than convincing. Lord Macmillan dissented and the failure of the mainstream law reports to report the case might be taken as tacit disapproval.

114 Nowadays the Supreme Court would not concern itself with issues of fact. The reader may think this finding of fact somewhat implausible, but insofar as the point is one of fact and not law, it does not now matter.

115 But for a defence of *Wahl*, see 3.14.8 (Citizenship: Critique).

domicile”; and the opinion of Lord Atkin was entirely concurred in by Lord Dunedin. In those circumstances, it appears to me that the Special Commissioners acted entirely properly in taking into account [1] the fact of the application for naturalisation, to which they indicated that they did not attach great weight, and [2] further in taking into account the statement made as to the applicant’s intentions as to residence.<sup>116</sup>

It would be relevant to consider whether after naturalisation the individual has dual citizenship. There are three possibilities:

- (1) After naturalisation the individual may be a British citizen only, because:
  - (a) The individual was formerly stateless, or
  - (b) Foreign citizenship lapsed on becoming a British citizen<sup>117</sup>
- (2) After naturalisation the individual may have dual citizenship

Naturalised citizens may and often do identify with their homeland as well as with their new state of residence: both form part of their identity. But of course “identity” is not the test of domicile.

### 3.14.6 *Naturalisation: Conclusions*

In summary:

- (1) British naturalisation, and the declaration of intention which that

116 49 TC 13. Likewise *Gulbenkian v Gulbenkian* [1937] 4 All ER 618 at p.627: “When ... Gulbenkian expressed upon oath that he intended to reside permanently in Great Britain, I can see no reason why that declaration should not be taken at its full value as a desire to acquire a domicile of choice in this country.”

Likewise *Bheekhun v Williams* 1 ITEL 491: on the independence of Mauritius in 1968, the individual had to choose British or Mauritian nationality; the choice of British nationality was a “clear pointer” towards acquisition of a domicile of choice in England.

For completeness, *Wahl* was cited in *F v IRC* [2000] STC (SCD) 1 but *Steiner* was not cited and *F* has nothing to add.

117 Dual citizenship is increasingly common. In the UK, the rule was formerly that British citizenship lapsed on becoming a citizen elsewhere, s.13 British Nationality Act 1914, but that ceased to be the case after the 1948 Act. In some countries, eg China, citizenship is lost on naturalisation elsewhere. India prohibits dual citizenship but there is an intermediate category of “Overseas Citizen of India” which confers most citizenship rights (to reside and to work) but not political rights.

requires, are both relevant in determining intention for domicile purposes, and always have been.

- (2) Nevertheless, it was accepted practice before 2019<sup>118</sup> that:
- (a) A change of domicile was not a condition of naturalisation, and
  - (b) Naturalisation did not *necessarily* involve acquiring a UK domicile.

In particular, it was considered that the UK-home statement in the naturalisation application did not entail the high degree of permanency in residence which a domicile of choice requires (the intention to reside permanently in the domicile sense).

- (3) From 2019 it seems that:
- (a) A change of domicile is or is intended to be a condition of naturalisation: Home Office practice is to refuse a naturalisation application made by a person who openly maintains that they will continue to be domiciled outside the UK if granted citizenship.
  - (b) While Home Office practice does not determine the facts or the law, the inference that a person acquiring a British citizenship post 2019 has the intention to reside permanently in the domicile sense, (and so acquires a domicile of choice) is somewhat stronger than before.

There are circumstances where naturalisation falls short of demonstrating an intention to reside permanently (in the domicile sense):

- (1) If an application was primarily for the convenience of a UK passport, (or if for any other reason the application was not accompanied by a genuine intention to reside in the UK permanently).
  - (a) The White Paper records this happened in practice under the 1948 Act.
  - (b) *F v IRC*<sup>119</sup> concerned an application under the 1981 Act. The individual wanted citizenship in order to obtain a British passport; he lied in his naturalisation application. In the circumstances his application did not show an intention to reside in the UK.
  - (c) The same may apply after the 2019 Home Office change of practice. A taxpayer is not bound by the terms of their UK-home

---

118 This applies to naturalisation under 1981 Act and under its predecessors.

119 [2000] STC (SCD) 1.

statement, or any other statement which accompanies the application for naturalisation.<sup>120</sup> Mistakes are always possible, and indeed lies. But the Tribunal may not view with favour a taxpayer who argues that statements made in their application for naturalisation were incorrect or were intended to be understood narrowly.<sup>121</sup> In short, the Tribunal may adopt an unspoken policy of not allowing individuals naturalised after 2019 to escape UK tax.

- (2) There are two further exceptions of somewhat narrow interest:
- (a) A person who intends their home to be in the UK might not have decided whether to reside in England, Scotland or Northern Ireland: one cannot acquire a UK domicile of choice unless and until one intends to reside in one specific jurisdiction.<sup>122</sup> However, in practice this will rarely if ever matter, since a person who makes an application for naturalisation will normally have decided where in the UK their home is to be.
  - (b) In some exceptional cases an applicant for naturalisation does not need to intend that their home will be in the UK.<sup>123</sup> In these cases it is still consistent for an the individual who becomes a naturalised British citizen to maintain that they have not acquired a UK domicile of choice. However even without the UK-home naturalisation requirement, the decision to apply for naturalisation still tends to suggest that the individual has formed the intention

---

120 See 3.12.2 (Evidence of living individual).

121 The argument might also risk revocation of naturalisation on the grounds of false representation; see s.40 British Nationality Act 1981.

122 This is self-evident, but if authority is needed, the point was made in *Wahl*.

123 A full discussion of naturalisation law is not possible here, but one alternative requirement is that the person intends, in the event of naturalisation,

“to enter into, or continue in,

[a] Crown service under the government of the UK, or

[b] service under an international organisation of which the UK or Her Majesty’s government therein is a member, or

[c] service in the employment of a company or association established in the UK.”

See sch 1 British Nationality Act 1981.

In these cases a person may become a British citizen by registration without expressing any intention to make their home in the UK.

to live in the UK permanently: the issue is to be decided in the light of all the facts.

An individual who does acquire a UK domicile of choice on naturalisation may of course lose it later, by abandonment.<sup>124</sup>

An individual who is naturalised, or who acquires a UK domicile of choice, may still be treaty-resident outside the UK, if (in short) the facts show the centre of vital interests (personal and economic relations) are abroad.

It is possible to renounce citizenship and renunciation is likely to be highly persuasive evidence of an intention not to return. Though again, it depends on the facts.

### 3.14.7 *Holding a UK passport*

A British passport is evidence that the holder is a British citizen, and something to which every British citizen is in principle entitled.<sup>125</sup> Holding British citizenship and holding a British passport are (more or less) synonymous: they are two sides of the same coin. So holding a passport is not a separate or further indication of intention, for the purposes of the law of domicile.

### 3.14.8 *Citizenship: Critique*

Citizenship is a status. It confers a bundle of rights and responsibilities, but not just that. It also has social, psychological, cultural, political and emotional aspects, which link to deep questions of nationhood and identity. As a matter of political theory, naturalisation involves a reciprocal relationship in which an individual offers loyalty to a state in exchange for protection.<sup>126</sup> It is a form of membership of a community.

The reader may accept this theory, and may even think it self-evident. But attitudes vary. Naturalised individuals will feel or understand the implications of their nationalisation in a variety of ways.<sup>127</sup> The incentives

---

124 See 3.10 (Abandoning domicile of choice).

125 See the Goldsmith report para 3.34.

126 See the Goldsmith report para 1.1.

127 That is, the immigrants may not have studied or accepted the political theory. The 1980 White Paper cited above reported that “citizenship has sometimes been sought

to naturalise may be instrumental or affective. Likewise, some native born citizens may not lightly accept naturalised individuals as full members of the community, no doubt more in the past than now.<sup>128</sup>

If one does accept the political theory, what impact do they have on domicile, or on domicile taxation? Can we descend from the general to the particular? In earlier editions of this work I suggested that there should be a rule that naturalised citizens should be deemed UK domiciled for UK tax purposes.<sup>129</sup> On this point the lighter fiscal regime for foreign domiciliaries could be better targeted.

Subsequently, in the 2017/18 edition, I rejected the suggestion, as the need for this change was reduced by the introduction of the 15-year deemed domicile rule, and the benefit did not seem to be worth the trouble involved in a statutory change.

But the 2019 change in Home Office practice is a step towards just that reform. The reader may speculate whether the change was connected with the change in HMRC practice on domicile.<sup>130</sup> It seems unlikely to be entirely co-incidental. Needless to say, there was no public consultation.

### 3.15 Refugee/illegal immigrant/temporary visa

Refugees may be forced to sever their links with their country of origin.

---

merely for the convenience of having a UK passport, and that having obtained one, the person has later gone elsewhere to live.” And notwithstanding Government disapproval, that may sometimes continue to be the case.

The literature shows different behaviour for immigrants from different origin countries and human capital endowments. For example, while naturalised non-Turkish immigrants were found to less likely to leave Germany, citizenship is not significantly correlated with the return migration of Turkish immigrants living in the same country; Oxford Handbook, p.214.

128 Eg Harman J in *Loudon v Ryder (no.2)* [1953] Ch 423 at p.424: “The defendant Ryder is a Polish Jew, born in Galicia, and educated in Vienna. He lived until 1938 on the Continent, either in Rumania or in Brussels, and though he has been in this country since shortly before the war and was naturalized in 1947, he remains very much a foreigner.” This sceptical, perhaps hostile, attitude to naturalisation may lie behind the decision in *Wahl*. Naturalisation has in the past been, and perhaps sometimes still is, a contested concept.

129 See the 2015/16 edition of this work para 3.11.6 (Commentary) for a fuller discussion of the issues.

130 See 3.23.1 (Change of HMRC practice).

But while that may show they have no intention to return to their country of origin, it would not, by itself, show that they have acquired an intention to reside in the UK permanently.

A person in a country illegally may become domiciled there, though the illegality is a factor in deciding whether they have a genuine intention of remaining there.<sup>131</sup>

In *Barlow Clowes International v Henwood*:

He was not able to live there on a permanent basis without the permission of the Mauritian government. His residence was ... in that sense precarious. This does not make it impossible for him to acquire a domicile of choice in Mauritius but makes it less likely that he did so.<sup>132</sup>

### 3.16 Married women

#### 3.16.1 *Marriage post-1974*

Until 1 January 1974, a married woman had the domicile of her husband (a “domicile of dependency”). This no doubt represented a patriarchal view of the family, though giving husband and wife the same domicile also simplified family law jurisdiction issues, and prevented dual nationality for the offspring, which was once more frowned upon than it is today.

Section 1 Domicile and Matrimonial Proceedings Act (“DMPA”) 1973 now provides:

(1) Subject to subsection (2) below, the domicile of a married woman as at any time after the coming into force of this section shall, instead of being the same as her husband’s by virtue only of marriage, be ascertained by reference to the same factors as in the case of any other individual capable of having an independent domicile. ...

(3) This section extends to England and Wales, Scotland and Northern Ireland.<sup>133</sup>

---

131 *Mark v Mark* [2006] AC 98.

132 [2008] EWCA Civ 577 at [119].

133 For the background to this provision, see Law Commission report no. 48, *Family Law Report on Jurisdiction in Matrimonial Causes* (1972)  
<http://www.bailii.org/ew/other/EWLC/1972/48.pdf>

Although a wife does not automatically acquire the domicile of her husband, the decision to marry and set up home in the UK tends to suggest an intention to reside in the UK permanently; but of course that depends on all the facts.<sup>134</sup>

### 3.16.2 *Marriage existing in 1974*

There is a transitional rule for women who were married on 1 January 1974. Section 1(2) DMPA 1973 provides:

Where immediately before this section came into force [1 January 1974] a woman was married and then had her husband's domicile by dependence, she is to be treated as retaining that domicile (as a domicile of choice, if it is not also her domicile of origin) unless and until it is changed by acquisition or revival of another domicile either on or after the coming into force of this section.

A domicile of choice under s.1(2) continues unless and until it is lost by abandonment.<sup>135</sup>

The issue arose in *IRC v Duchess of Portland* 54 TC 648, where a foreign domiciled wife married a UK domiciled husband before 1974, so she acquired a UK domicile of dependency. After 1974 she continued to reside in the UK. However at no time did she intend to reside there permanently. She therefore retained her former domicile of dependency (“as a domicile of choice”). That domicile could only be abandoned by ceasing to intend to reside in the UK permanently (which she did) *and* ceasing to reside in the UK (which she did not).

In Ireland the wife's domicile of dependency was held unconstitutional<sup>136</sup> and it is an interesting question whether the UK transitional provision is human-rights compliant. In practice the issue may never arise.

### 3.16.3 *Marriage ended pre-1974*

---

134 This is obvious but if authority is needed, see *Cyganik v Agulian* [2006] EWCA Civ 129 at [46]. Likewise the fact that T's spouse is resident in the UK (and not resident elsewhere) may tend to suggest that T has not acquired a foreign domicile of choice; see (if authority is needed) *Gaines-Cooper v HMRC* [2008] STC 1665 at [46] [47].

135 See 3.10.1 (Abandoning domicile of dependency).

136 *JW v JW* (1992) 4 Irish Tax Reports p.437.

Under the pre-1974 law, a domicile of dependency also continued after the marriage ended, unless and until it was lost by abandonment.<sup>137</sup> The issue arose in *Re Wallach*<sup>138</sup> where a widow died in 1943, five days after the death of her husband. The Judge cited *Udny* (“Other domicils, including domicile by operation of law, as on marriage, are domicils of choice”) and continued.<sup>139</sup>

He, therefore, included the domicile which counsel for the plaintiff prefers to call a dependent domicile under the heading of domicile of choice and that seems to me to be the appropriate heading under which to put it because when a woman marries a man she exercises a choice in the marriage and takes the consequence of that choice which in law involves the acquisition of his domicile. There is no reason why, if it is a domicile of choice, it should be lost in a way different from that in which any other domicile of choice can be lost, namely, by abandonment.

This is the same test which applies to a woman who was married on 1 January 1974.

The marriage in *Wallach* ceased on death of the husband, but the position is the same in the case of a pre-1974 divorce: the ex-wife’s domicile of dependency continues as a domicile of choice, unless and until it is abandoned.

#### 3.16.4 *Woman a US national*

The USA/UK DTA<sup>140</sup> undoes the effect of a UK domicile of dependency for a woman who is a US national who married before 1974. Article 4(6) of the treaty provides:

A marriage before January 1st, 1974 between a woman who is a United States national and a man domiciled within the UK shall be deemed to have taken place on January 1st, 1974 for the purpose of determining

---

137 See 3.10.1 (Abandoning domicile of dependency).

138 [1950] 1 All ER 199, followed in *Re Scullard* [1957] Ch 107 where, on the facts, the domicile of choice was found to have been abandoned immediately following the death of the husband.

139 [1950] 1 All ER 199 at p.200.

140 That is, the IT/CGT treaty (2001). The USA IHT DTA (1978) does not contain the same rule. Gender issues presumably had greater importance by 2001.

her domicile for UK tax<sup>141</sup> purposes, on or after the date on which this Convention first has effect in relation to her.

The USA/UK DTA Technical Explanation provides:<sup>142</sup>

under UK law, a female US citizen who married a UK domiciliary male before January 1, 1974, does not have the same opportunity to prove a domicile outside the UK as does a male US citizen who married a UK domiciliary female before January 1, 1974. Paragraph 6 of the Convention equalizes the treatment of male and female US citizens in this situation.

As far as I am aware, the US Treaty is the only one which does this. Perhaps this reflects a cultural difference, a greater sensitivity to gender equality issues in the US.<sup>143</sup> This rule does not however apply where a *UK* woman married an *American* man before 1 January 1974. In that case the 1974 transitional rule continues to apply, and the woman keeps her domicile of dependency as a domicile of choice. In this situation a woman is in a better position than a man.

### 3.17 Child's domicile: England

The domicile of a child is not usually important during its minority. However if the child acquires a domicile of dependency during their minority, that domicile will continue until lost by abandonment, so the issue may arise long after the child has become adult.

This section deals with the position in England and Northern Ireland. Scotland is considered in the next section.

#### 3.17.1 *Domicile independence age*

Section 3 DMPA 1973 provides:

- (1) [a] The time at which a person first becomes capable of having an independent domicile shall be when he attains the age of sixteen or marries under that age;

---

141 ie, Income tax and CGT; see art 2(1) USA/UK DTA.

142 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>

143 The English common law rule that a married woman had the domicile of her husband was rejected by US case law.

[b] and in the case of a person who immediately before 1st January 1974 was incapable of having an independent domicile, but had then attained the age of sixteen or been married, it shall be that date.

(2) This section extends to England and Wales and Northern Ireland (but not to Scotland).

The age at which a person becomes capable of having an independent domicile has been reduced gradually:

Age of independence	In force from	May apply to those born from	Reference
21	-	-	Common law rule
18	1 Jan 1970	1 Jan 1949 <sup>144</sup>	s.1 Family Law Reform Act 1969 <sup>145</sup>
16	1 Jan 1974	1 Jan 1958 <sup>146</sup>	s.3 DMPA 1973

The age of 16 was set as the age at which a person may marry; it was thought a person old enough to marry should be regarded as old enough to acquire a domicile of choice.<sup>147</sup>

### 3.17.2 *Domicile of dependency*

Dicey states:

Subject to [s.4 DMPA 1973 discussed below] the domicile of an unmarried child under 16 is determined as follows:

- (1) the domicile of a legitimate child is, during the lifetime of his father, the same as, and changes with, the domicile of his father;
- (2) the domicile of a legitimated child is, from the time at which the legitimation takes effect, during the lifetime of his father, the same as, and changes with, the domicile of his father;
- (3) the domicile of an illegitimate child and of a child whose father is

144 Those born 1949-1951 reached the age of independence on 1 January 1970, which would have been after their 18<sup>th</sup> Birthday.

145 The 1969 Act adopted the recommendations of the Report of the Committee on the Age of Majority (the Latey Report), 1967 Cmnd 3342. Northern Ireland had separate legislation: s.1 Age of Majority Act (Northern Ireland) 1969.

146 Those born 1956-1957 reached the age of independence on 1 January 1974, which would have been after their 16<sup>th</sup> Birthday.

147 See Law Commission report no. 48, *Family Law Report on Jurisdiction in Matrimonial Causes* (1972) <http://www.bailii.org/ew/other/EWLC/1972/48.pdf>

dead is, in general,<sup>148</sup> the same as, and changes with, the domicile of his mother;

(4) the domicile of a legitimate or legitimated child without living parents, or of an illegitimate child without a living mother, probably cannot be changed;

(5) the domicile of an adopted child is determined as if he were the legitimate child of the adoptive parent or parents.<sup>149</sup>

A child's domicile of dependency can be abandoned after the age of independence.<sup>150</sup>

### 3.17.3 Parents living apart

Section 4 DMPA 1973 provides:

(1) Subsection (2) of this section shall have effect with respect to the dependent domicile of a child as at any time after the coming into force of this section when his father and mother are alive but living apart.

(2) The child's domicile as at that time shall be that of his mother if—

(a) he then has his home<sup>151</sup> with her and has no home with his father; or

(b) he has at any time had her domicile by virtue of paragraph (a) above and has not since had a home with his father.

(3) As at any time after the coming into force of this section, the domicile of a child whose mother is dead shall be that which she last had before she died if at her death he had her domicile by virtue of subsection (2) above and he has not since had a home with his father.

(4) Nothing in this section prejudices any existing rule of law as to the cases in which a child's domicile is regarded as being, by dependence, that of his mother.

(5) In this section, "child" means a person incapable of having an independent domicile.<sup>152</sup>

---

148 See *Conflict of Laws* (15<sup>th</sup> ed., 2012), 6-093 (Illegitimate and fatherless children).

149 *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 6R-090. Some tie-breaker rule will be needed in case of a child adopted by same-sex civil partners/spouses, if the couple have different domiciles.

150 See 3.10.1 (Abandoning domicile of dependency).

151 See 8.12.1 ("Home").

152 See 3.17.1 (Domicile independence age).

(6) This section extends to England and Wales, Scotland<sup>153</sup> and Northern Ireland.

Prior to 1/1/1974, what was the test of domicile of a child whose parents were divorced, and who was living with the mother? Dicey recorded that the position in Scotland was that domicile followed the father; in Northern Ireland, it followed the mother; Dicey suggested English law should follow the Northern Ireland decision.<sup>154</sup>

### 3.18 Child's domicile: Scotland

The position is different in Scotland.

#### 3.18.1 *Age of independence in Scotland*

In the law of Scotland the age at which a child could acquire an independent domicile was originally 12 for girls and 14 for boys.<sup>155</sup> These ages derived from Roman law, reflecting an understanding that girls mature faster than boys.

The provisions of the FLRA 1969 and the DPMA 1973 which set the age of independence for domicile in England did not apply in Scotland. The rule was instead altered by s.7 Age of Legal Capacity (Scotland) Act 1991 which provided:

The time at which a person first becomes capable of having an independent domicile shall be the date at which he attains the age of 16 years.

This provision was repealed by the Family Law (Scotland) Act 2006 (which provided new rules for children under 16, see below). Presumably it was considered unnecessary because by implication, it continued to be the case that children over the age of 16 may acquire a domicile of choice. So the age at which a person becomes capable of having an independent domicile under Scots law is as follows:

---

153 Schedule 3 Family Law (Scotland) Act 2006 repeals this section in relation to Scotland. However see below on whether this has effect for tax purposes.

154 Dicey & Morris, *Conflict of Laws* (9<sup>th</sup> ed., 1973) p.119. This passage is not in later editions.

155 Scottish Law Commission Report No 110, "Legal Capacity and Responsibility of Minors and Pupils" (1987), recommending the changes which took effect in 1991.

Age of independence	In force from	Applies to those born from	Reference
12 (girls)	-	-	Scots common law rule
14 (boys)	-	-	Scots common law rule
16 (girls)	25 July 1991	25 July 1979	s.7 ALC (Scotland) Act 1991/s.22
16 (boys)	25 July 1991	25 July 1977	Family Law (Scotland) Act 2006

### 3.18.2 Domicile of child under 16

Section 22 Family Law (Scotland) Act 2006 provides:

#### **Domicile of persons under 16**

(1) Subsection (2) applies where—

- (a) the parents of a child are domiciled in the same country as each other; and
- (b) the child has a home with a parent or a home (or homes) with both of them.

(2) The child shall be domiciled in the same country as the child’s parents.

(3) Where subsection (2) does not apply, the child shall be domiciled in the country with which the child has for the time being the closest connection.

(4) In this section, “child” means a person under 16 years of age.

I refer to domicile under the rules of s.22(2)/(3) as “**s.22(2)/(3) domicile**”.

### 3.18.3 Scots domicile post- age 16

The relevant commencement order provides:

2 ... the provisions of the Act shall come into force on 4th May 2006....

4 The provisions of sections ... 21, 22 ... shall not apply in relation to any proceedings which commenced before 4th May 2006.<sup>156</sup>

This does not consider domicile after the individual has reached the age of 16. Clearly, an individual after 16 can acquire a new domicile of choice. But can an individual abandon their s.22(3) domicile, without acquiring a domicile of choice? There are various permutations. Suppose,

---

156 Reg 2 Family Law (Scotland) Act 2006 (Commencement, Transitional Provisions and Savings) Order 2006.

for instance:

### Case 1

At birth, an individual (“P”) has a s.22(2) domicile in country X (both parents domiciled in X, and P has a home with them).

P then acquires a s.22(3) domicile in country Y (eg parents separate, and P’s closest connection is in Y.

P then attains 16

### Case 2

At birth, an individual (“P”) has a s.22(3) domicile in country X (eg parents differently domiciled, and P’s closest connection is in X.

P then acquires a s.22(3) domicile in country Y (eg P’s closest connection becomes country Y.

P then attains 16

Can P abandon their s.22(3) domicile by ceasing to reside in country Y, and ceasing to intend to reside there? and if so, is country X regarded as a domicile of origin, which revives? It is considered that domicile of origin is abolished, in Scotland, and s.22 domicile cannot be abandoned, it continues unless replaced by a new domicile of choice.<sup>157</sup>

#### 3.18.4 Commencement

The 2006 Act does not make plain the time at which the section 22 rule takes effect. Does it govern the domicile only of those who, at the date of coming into force of the Act, were under 16, and those born subsequently? Or does it also govern the domicile of someone who attains 16 before commencement, but dies after commencement? One would expect not.

#### 3.18.5 Abolition of illegitimacy

Section 22 domicile does not depend on legitimacy/illegitimacy: that is irrelevant for s.22 domicile. Scots law (like most countries but not, yet, England) has abolished the status of illegitimacy:

No person whose status<sup>158</sup> is governed by Scots law shall be

---

157 This accords with the recommendation of the Law Commission in *The Law of Domicile* (1987) Law Com 186

[http://www.scotlawcom.gov.uk/download\\_file/view/228/](http://www.scotlawcom.gov.uk/download_file/view/228/) para 4.21 etc.

Though the Law Commission draft Bill, sensibly, made this point expressly.

158 “Status” means the status of being legitimate/illegitimate.

illegitimate; and accordingly the fact that a person's parents are not or have not been married to each other shall be left out of account in—

- (a) determining the person's legal status; or
- (b) establishing the legal relationship between the person and any other person.<sup>159</sup>

This raises the question of when a person's status is governed by Scots law.

If (applying s.22 if relevant) a person has Scottish domicile, their status cannot be one of illegitimacy.

If (applying s.22 if relevant) a person does not have a Scottish domicile, their status must be determined by foreign law, which may apply a legitimate/ illegitimate distinction.<sup>160</sup>

### 3.18.6 *Does Scots domicile law apply for tax*

The Family Law (Scotland) Act 2006 is an Act of the *Scottish* Parliament. It is an interesting question whether its reform of Scots domicile law of applies for tax purposes. Taxation is (in general) a reserved matter over which the Scottish Parliament has no competence.

A full discussion of Scottish Parliament competence would need a long chapter, which the importance of the issue here does not justify; it is however suggested that a reform of domicile law, which has a merely incidental consequential effect on taxation, should be within the power of the Scottish Parliament.<sup>161</sup>

HMRC agree: the RDR Manual provides:

**RDRM22120 The Family Law (Scotland) Act 2006** [Mar 2019]

The Family Law (Scotland) Act 2006 [FL(S)A 2006] came into effect on 4 May 2006. Section 22 of the Act creates a new form of domicile in Scotland for individuals under the age of sixteen. Legitimacy has ceased to be a factor in determining domicile in Scots law under the FL(S)A 2006, section 21 of the Act having abolished the status of illegitimacy.

---

159 s.1(1) Law Reform (Parent and Child) (Scotland) Act 1986 as amended s.21 Family Law (Scotland) Act 2006.

160 See s.41 Family Law (Scotland) Act 2006.

161 See *Martin v HM Advocate* [2010] UKSC 10.

In Scotland only, since 4 May 2006, where a child's parents share a domicile and the child has a home with either or both of them, the child is domiciled in the same country as its parents.

Where a child's parents are domiciled in different countries, or the child has a home with neither parent, the child is domiciled in the country with which he or she has 'for the time being the closest connection'.

The wording of FL(S)A 2006 indicates that in any proceedings commenced on or after 4 May 2006 the legislation should be applied retrospectively in order to determine the domicile of an individual under the age of sixteen.

But then what is the position of a person where English and Scots law produce a different answer as to domicile? The solution to the conundrum is to remember that when statute refers to domicile in the UK, that is shorthand for domiciled in England, Scotland or Northern Ireland. A person should be regarded as domiciled in the UK if they are:

- (1) domiciled in England according to English law, or
- (2) domiciled in Scotland according to Scots law, or
- (3) domiciled in Northern Ireland according to NI law.<sup>162</sup>

It could then happen that (say) an English tribunal has to apply Scots law principles in order to consider whether a taxpayer is domiciled in Scotland, and so domiciled in the UK. But that is inevitable; one should avoid so far as possible a situation under which the selection of a tribunal (which may turn on matters such as the residence of a witness) leads to a difference as to applicable law and so to a different outcome.

It is suggested that the law of domicile ought to be as similar as possible in each jurisdiction, and in this case, the law of England and Northern Ireland ought to be amended to adopt the Scots law approach.

### 3.19 Adoption

Section 67 Adoption Act 2002 provides:

- (1) An adopted person is to be treated in law as if born as the child of the adopters or adopter.

---

<sup>162</sup> See too 97.16.2 (Situs in Scots law).

- (2) An adopted person is the legitimate child of the adopters or adopter and, if adopted by—
- (a) a couple, or
  - (b) one of a couple under section 51(2),
- is to be treated as the child of the relationship of the couple in question.
- (3) An adopted person—
- (a) if adopted by one of a couple under section 51(2), is to be treated in law as not being the child of any person other than the adopter and the other one of the couple, and
  - (b) in any other case, is to be treated in law, subject to subsection (4), as not being the child of any person other than the adopters or adopter; but this subsection does not affect any reference in this Act to a person's natural parent or to any other natural relationship.
- (4) In the case of a person adopted by one of the person's natural parents as sole adoptive parent, subsection (3)(b) has no effect as respects entitlement to property depending on relationship to that parent, or as respects anything else depending on that relationship.

In short, the domicile of origin of an adopted child follows from that of their adoptive parents. The same principles apply to adoption under Scots and Northern Ireland law.<sup>163</sup>

Further consideration would be needed in the case of foreign law adoption.

### 3.20 No mental capacity

Dicey states:

A person lacking mental capacity to make decisions as to his future permanent residence cannot acquire a domicile of choice and, subject to the Exception hereinafter mentioned, retains, while lacking that capacity, the domicile he had when last having that capacity...

*Exception:* The domicile of a person who never acquires, or who loses as a dependent child, the mental capacity to make decisions as to his

---

163 Section 40 Adoption and Children (Scotland) Act 2007; s.40 Adoption (Northern Ireland) Order 1987.

As at 2020, there are about 3,000 adoptions p/a in England; see <https://www.gov.uk/government/statistics/children-looked-after-in-england-including-adoption-2018-to-2019>

future permanent residence is determined, so long as he lacks that capacity, as if he continued to be a dependent child.<sup>164</sup>

The exception does not apply in Scotland. The Law Commission say:

In Scots law it seems likely that the domicile of an incapax is the domicile he had on reaching the age of [independence] or at the onset of his incapacity, whichever is the later. Certainly, so long as he is incapable of forming the necessary intention he cannot abandon an existing domicile or acquire a new domicile of choice.<sup>165</sup>

Thus it is possible to envisage circumstances where Scotland/England reach different outcomes, for a person who never had capacity, or who loses capacity while under 16. But it will rarely if ever matter for tax. Such individuals are not likely to have sufficient assets to fall within the scope of IHT.

### 3.21 Domicile territory/country

Dicey states that a person has a domicile in a “country”, and comments on the terminology:

This word [Country] has from long usage become almost a term of art among English-speaking writers on the conflict of laws... It was defined by [Albert Venn] Dicey as ‘the whole of a territory subject under one sovereign to one body of law.’<sup>166</sup>

In *Adams v Cape Industries*:<sup>167</sup>

... for conflict of law purposes, each state within the United States is a “country” and ... for many conflicts of law purposes the United States is not a “country”. Each state, for example, has its own common law. The United States has no common law... Domicile in the United States as a whole is a meaningless concept.

---

164 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 6R-107, 6E-115.

165 Working paper no 88 “The Law of Domicile” (1985), para 3.10

<https://www.lawcom.gov.uk/project/private-international-law-law-of-domicile/>

166 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 1-065 (Meaning of “Country”).

167 [1990] Ch. 433 at p.488.

This rule is obviously necessary because one of the main purposes of domicile is to link a person to a jurisdiction for the purposes of family and succession law. If one needs to know which law to apply, one must make the link to a single jurisdiction, applying a specific law; and in the USA, each state has its distinct family and succession law.

The question, then, for federal states is to determine whether

- (1) the federation has “one body of law”, in which case one is domiciled in the federation; or
- (2) the individual states have distinct bodies of law, or as it is sometimes put, distinct legal systems,<sup>168</sup> in which case one is domiciled in an individual state within the federation.

Dicey states:

England, Scotland, Northern Ireland, the Isle of Man, Jersey, Guernsey, Alderney, Sark, each British colony, each of the American and the Australian states and each of the Canadian provinces is a separate country in the sense of the conflict of laws, though not one of them is a state known to public international law.

... On the other hand, Wales is not a country, because its system of law is the same as that of England.<sup>169</sup>

There may be borderline cases, and the position may change from time to time as a result of devolution or other major constitutional changes.

### 3.21.1 Terminology

When the word “Country” is used in this technical sense, one should perhaps use an initial capital, or scare quotation marks. I think “legal jurisdiction” is a better expression, because, say, California is not in the normal sense a country, but it is a legal jurisdiction.

There have been other suggestions:

[Albert Venn Dicey] suggested that a better expression might be ‘law district’: but this phrase has never found much favour with English-speaking writers, who prefer the more familiar word

---

168 Re Fuld [1968] P 675 at p.684.

169 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 1-065-1.067.

‘country’.<sup>170</sup>

The use of the word “Country” seems too well established to change.

### 3.21.2 *Bailiwick of Guernsey*

The Royal Commission on the Constitution states:<sup>171</sup>

The Channel islands consist of two separate Bailiwicks, the Bailiwick of Jersey... and the Bailiwick of Guernsey, which comprises the Islands of Guernsey (with Herm and Jethou), Alderney and Sark... There are no formal links between the two Bailiwicks. ... Alderney and Sark both have a large measure of independence within the Bailiwick of Guernsey ... and legislative assemblies of their own.

The RDR Manual provides:

**RDRM20060 Domicile and Law Territories** [Mar 2019]

... the Bailiwick of Guernsey includes Guernsey, Alderney and Sark, which are all separate law territories.

That is, a person is domiciled in one of these three jurisdictions, not in “the Bailiwick of Guernsey”.<sup>172</sup>

### 3.21.3 *Ireland*

Para 8 Government of Ireland (Adoption of Enactments) (No. 1) Order 1922 provides:

For the purpose of determining the domicile of any person, Northern Ireland shall be deemed always to have been a separate part of the UK.

In *Re M*<sup>173</sup> the question arose concerning a person’s domicile prior to the partition of Ireland in 1922. A person who lived all their life in what is now Northern Ireland was held to be domiciled in the part of the divided territory in which they had resided.

---

170 Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 1-065 (Meaning of “Country”).

171 Cmnd. 5460 (1973) para 1349 etc.

172 See too App 2.16.2 (British Isles).

173 [1937] NI 159 followed in *Re P* [1945] Ir Jur Rep 17. Both cases accessible <https://www.kessler.co.uk/tfd-archive>

The RDR Manual provides:

**RDRM20060 Domicile and Law Territories** [Mar 2019]

The last two centuries have seen many changes in national and political boundaries. Any new territories should be regarded as having existed for the purposes of ascertaining domicile **prior** to their creation. Authority for this approach is provided by cases in which the 1921 division of Ireland into its present parts was considered.

### 3.21.4 *Switzerland*

Switzerland is a federation of 26 cantons. But I understand that Swiss family and succession law are set at federal level, and not at canton level.<sup>174</sup> So it is considered that a person is domiciled in Switzerland, not in one of its cantons.

### 3.22 **HMRC domicile ruling**

HMRC formerly provided rulings on domicile, but that stopped in 2010.<sup>175</sup> Perhaps rulings were judged not to be efficient use of HMRC resources.

Domicile rulings are obtainable on death. PRs complete form IHT401 (Domicile outside the UK). The IHT Manual explains HMRC practice on receipt of this form:

**IHTM13011 Investigation of form IHT401** [Jan 2020]

When a taxpayer or agent considers that a deceased person was domiciled outside the UK they must submit a form IHT400 together with a form IHT401. We will consider the question of domicile after the grant has been issued..

Pre-Grant will flag up the fact that a foreign domicile has been claimed before they issue form IHT421 [Probate summary]. The file will then be passed to Risk who will decide whether a domicile outside the UK can be accepted or should be referred to Compliance to take the matter up with the taxpayer or agent.

If a Double Taxation Convention (IHTM27161) applies and foreign tax has not been paid the initial calculation should be made without taking the convention into account. The caseworker should investigate the tax

---

174 See Thommen, *Introduction to Swiss Law*

[https://www.open-ius.ch/literatur/thommen\\_introduction-to-swiss-law.pdf](https://www.open-ius.ch/literatur/thommen_introduction-to-swiss-law.pdf)

175 HMRC Brief 34/10.

implications of the convention further at a later stage.

**IHTM13012 Risk decisions** [Jan 2020]

Where an IHT401 is submitted with a foreign domicile claimed, it is referred to Risk. They will make a risk assessment decision to:

- accept the domicile, or
- investigate the domicile.

This decision is based on a number of factors. These can include whether the deceased was born, lived and died abroad, or whether they were born abroad and resided in the UK for a fixed period (which ended before the death and lasted no more than 10 years).

If the domicile can be accepted, that will be the end of the domicile question, unless other information subsequently arises which will lead HMRC to challenge it.

In cases where Risk cannot agree the domicile, the file will be referred to Compliance to challenge the domicile claim.

If Risk need any further information to make a decision at this stage they will refer the file to Technical.

### 3.22.1 *Effect of old ruling*

A ruling that a UK resident individual is not UK domiciled will generally entail two findings of fact:

- (1) The individual did not have a UK domicile of origin (or a UK domicile of dependency).
- (2) The individual had not acquired a UK domicile of choice at or before the time of the ruling.

It is self-evident that a ruling does not entail any statement that the individual will not acquire a UK domicile of choice *after* the date of the ruling. HMRC Brief 17/09 makes this point:

Where an individual has already submitted a form DOM 1 or P86 and obtained an initial view from HMRC about their domicile status it will be unusual for us to open an enquiry into domicile status in the few years after that, unless new information becomes available that indicates our initial view was incorrect or there has been a change in circumstances. However with the passage of time, circumstances and intentions change and so that initial view from HMRC can become less and less useful as an indicator of domicile status. For example if an individual had advised HMRC on their arrival in England a decade or

so ago that they planned to leave the UK after five years but had since married, had a family and decided to make England their permanent home then they will have adopted a domicile of choice within the UK.

### **Domicile and Inheritance Tax**

... As is currently the case, where HMRC has expressed an opinion on the domicile status of a settlor for Inheritance Tax purposes we will not normally seek to reconsider that opinion unless new information becomes available that indicates our initial opinion was incorrect or there has been a material change in the circumstances of the settlor. However, when we make a decision it applies only to the date of the transaction concerned. So if circumstances change, the individual returns to the UK for example, that individual's domicile may need to be considered again at another point in time. Domicile is not a static thing, it can change as people's circumstances and intentions change.

... Where HMRC has expressed a view on an individual's domicile status for income tax or capital gains tax purposes, as a result of an enquiry, then that view will also apply for Inheritance Tax purposes at that time. Likewise a HMRC view expressed for Inheritance Tax purposes, following a Part VIII IHTA enquiry, will also apply for income tax and capital gains purposes at that time. However, it is important to remember that each decision on domicile will be made at a certain point in time, if circumstances have changed since the time of the relevant decision, the domicile of the taxpayer may also have changed.

In *Gulliver v HMRC*<sup>176</sup> the taxpayer (chief executive of HSBC) had a UK domicile of origin. He obtained a (somewhat cursory<sup>177</sup>) ruling for 2002

---

176 [2017] UKFTT 222 (TC).

177 The decision at [10] provided:

At the time, HMRC took a "risk based approach" to requests for confirmation of the IHT treatment of lifetime transfers that took into account the amount of the tax potentially in issue, and the chance of the taxpayer concerned being UK domiciled on the basis of the information provided. Applying that approach, Mr Murray did not consider it an appropriate use of resources to engage in a full enquiry into all aspects of Mr Gulliver's domicile given that the amount of tax in issue was only £4,735. He also concluded that there was not a high risk, based on the information provided, of Mr Gulliver having a UK domicile. Mr Murray did not, therefore, conduct a detailed investigation as to Mr Gulliver's circumstances before writing the Letter.

With hindsight, there was perhaps a false economy on the part of the taxpayer. But

that he had acquired a domicile of choice in Hong Kong in about 1999.<sup>178</sup> HMRC opened a domicile enquiry for 2013/14, a decade or so later. The taxpayer argued that HMRC were bound (presumably, for ever) by the ruling: they could not question the acquisition of a domicile of choice, though they were entitled to contend that the taxpayer had abandoned his domicile of choice after the date of the ruling. This was an argument that HMRC were bound not to collect tax which may actually have been due. It is well established that such an argument requires judicial review, and cannot be taken before the tribunal in a tax appeal, or in proceedings preliminary to a tax appeal (in this case, an appeal against a sch 36 notice requiring information going back to 1981.) The taxpayer's appeal failed for that procedural reason.

Could the taxpayer have succeeded in judicial review? That was (rightly) not investigated, but the facts reported in the judgment fall far short of the required degree of unfairness. This does not mean that all rulings are unenforceable, but enforceability depends on the facts, it requires something more than just an HMRC view or representation, and even if enforceable for earlier periods, the unfairness of reopening the issue diminishes over time.<sup>179</sup>

The particular issue in *Gulliver* was whether HMRC were bound by a ruling that an individual with a UK domicile of origin had acquired a foreign domicile of choice. More commonly the question will be whether HMRC are bound by a ruling that an individual has a foreign domicile of origin (and has not acquired a UK domicile of choice). But the principles of enforceability are the same.

The issue will arise less often after the introduction of the 2017 deemed domicile rules, but actual domicile still matters for protected trusts and for years before 2017/18.

With hindsight, HMRC domicile rulings should have included clear indication of when they can be relied on. Some did, but we generally had the usual muddle and fudge.

---

that is not relevant to the decision.

178 That seems surprising, bearing in mind that Hong Kong sovereignty was only transferred to China in 1997.

179 It is also relevant to note that post-ruling facts are relevant to the issue of acquisition of domicile of choice in a pre-ruling year; see 3.23.4 (Period for domicile enquiry).

## 3.23 HMRC investigations

### 3.23.1 Change of HMRC practice

In 2013 HMRC practice on domicile was described as follows:

with the exception of the one case of *Steiner v IRC*<sup>180</sup> and perhaps another one, HMRC had never won a case on domicile against a living taxpayer [with a foreign domicile of origin] and ... they rarely take on such cases.<sup>181</sup>

In the past, HMRC's domicile cases normally concerned those with a UK domicile of origin who claimed to have acquired a foreign domicile of choice.

HMRC policy changed in about 2016 (there was no announcement or consultation). HMRC have set up a unit which pursues investigations into individuals with a foreign domicile of origin, who have been UK resident for substantial periods. The change is illustrated by the fact that HMRC have often decided that HMRC's earlier domicile rulings were wrong.<sup>182</sup>

This is so even though from 2017, under new deemed domicile rules, the amount at stake will be less than before.<sup>183</sup>

This unit is acting zealously, and in some cases, in a manner which amounts to bullying and harassment.

This includes HMRC sending letters in 2018 to their customers directly, even though the taxpayer is professionally represented.<sup>184</sup> These letters threatened penalties under the requirement to correct legislation. ICAEW comment:

We understand that HMRC's Wealthy Units are writing to all taxpayers within their units with respect to the RTC. From what we have seen there appear to be two different categories of letters going out:

---

180 For *Steiner* see 3.14.4 (Citizenship if UK home required).

181 *Mehjoo v Harben Barker* [2013] EWHC 1500 (QB) at [258]. The point was not considered on appeal.

182 See 3.22.1 (Effect of old ruling)

183 In the absence of neglect, the years in issue will be 2013/4 to 2016/17. Of course even in those four years the tax at stake, with interest, will sometimes be substantial.

184 The professional bodies criticised HMRC for similar action in 2013, see 16.25 (Remittance compliance/enquiry).

1. Specific detailed letters where there is an ongoing enquiry.
2. A basic one-page bulk mailing to other individuals within the Wealthy Units.

There is a sub-category of letters within category 1 letters that deals with enquiries into individuals claiming foreign domiciled status. The letters sent out are detailed (a four-page letter and a three-page schedule) and are mostly the same for each taxpayer, with some occasional minimal tailoring of the schedule to add requests for a few additional pieces of information HMRC considers relevant.

#### **Our concerns**

We have a number of issues with these letters and have communicated our concerns to HMRC.

We think that where there is an ongoing enquiry, the letters are too aggressive in tone (particularly the domicile letters). We are particularly concerned that none of the letters mention reasonable excuse where appropriate advice has been taken from a disinterested adviser. This is a material omission and gives advisers and individuals the wrong impression.

We also think that the information HMRC is requesting from taxpayers goes beyond what the legislation defines as “relevant information” and does not follow HMRC’s own guidance on domicile enquiries.<sup>185</sup>

The first domicile decision arising from the work of this unit resulted in a win for HMRC,<sup>186</sup> more cases are bound to follow.

### 3.23.2 *Enquiry procedure*

In the absence of a binding ruling, the usual enquiry rules apply. HMRC Brief 17/09 provides:

#### **Enquiries into domicile status**

... if HMRC decides to enquire into an individual’s domicile status this will be by way of a section 9A TMA enquiry into their Self Assessment tax return. (Alternatively in appropriate cases HMRC may enquire into an individual’s domicile status by way of a Part VIII IHTA enquiry into an Inheritance Tax return.) Where a claim to the remittance basis is not

---

185 <https://ion.icaew.com/taxfaculty/b/weblog/posts/requirement-to-correct-update-on-hmrc-letters-to-taxpayers>

186 See 3.7.1 (Vague or doubtful possibility).

challenged for that year it does not mean HMRC necessarily accepts the individual's domicile is outside the UK and does not prevent HMRC from later opening an enquiry to consider the domicile status of the individual in relation to that, or any earlier year.

HMRC Brief 34/10 provides:

HMRC will consider opening an enquiry where domicile could be an issue, or making a determination of Inheritance Tax in such cases, only where there is a significant risk of loss of UK tax.

The significance of the risk will be assessed by HMRC using a wide range of factors. The factors will depend very much on the individual case but will include, for example:

- a review of the information available to HMRC about the individual on HMRC databases
- whether there is a significant amount of tax (all taxes and duties not just Inheritance Tax) at risk

HMRC does not consider it appropriate to state an amount of tax that would be considered significant, as the amount of tax at stake is only one factor.<sup>187</sup> It should be borne in mind that HMRC will take into account the potential costs involved in pursuing an enquiry, and also those of potential litigation should the enquiry not result in agreement between HMRC and the individual; clearly such costs can be substantial.

Where HMRC does open an Inheritance Tax enquiry in any of these cases, it will keep the factors in view and may stop the enquiry at any stage if it considers the continuation of the enquiry is not cost effective. The outcome of such an enquiry may be that HMRC does not consider it appropriate to make a determination of the Inheritance Tax.

### 3.23.3 *Domicile appeal procedure*

HMRC should be supplied with the information they reasonably require; and once HMRC have sufficient information to make a decision on domicile, the taxpayer should generally apply for a closure notice. In the absence of such pressure, HMRC domicile enquiries may drag on for many years, and sometimes decades.

---

187 Author's footnote: I would have thought the true (and proper) reason to withhold this information is to prevent fraud.

In *Wrottesley v HMRC* the UT refused to allow the issue of domicile of origin to be tried as a preliminary issue (separately from the issue of domicile of choice/dependency).<sup>188</sup>

The time estimate for a trial of the domicile issue in *Wrottesley* was in excess of 10 days, which in the author's view is excessive.<sup>189</sup> Better case management is needed to prevent cases running so long. In *U v J* the Court had to determine the domicile of both parties, and an issue of *forum non conveniens*, in a case involving "particularly unusual and complex facts," and "about as difficult a forensic exercise as one might encounter in a case of this kind".<sup>190</sup> The hearing lasted 3 days.

Ascertaining the tax at stake will sometimes be a lengthy, complex and expensive matter. Then the sensible procedure would be to resolve the issue of domicile first. That seems self-evident, but at present HMRC wish in every case to ascertain in advance the exact amount of tax that would be at stake if the taxpayer were UK domiciled. The current law will be determined when *Embiricos v HMRC* is final.<sup>191</sup>

In *Perlman v HMRC*<sup>192</sup> the FTT held:

- (1) It could not determine a disputed domicile in an appeal against an information notice.
- (2) Even if it could, it would chose not to do so.

*Perlman* is not yet final; but even if the FTT did have power to determine domicile on an appeal against an information notice, cases where it would be appropriate to do so would be very rare.

188 [2015] UKUT 637 (TCC). The tribunal also considered the example of a case where domicile and residence were in dispute. These are separate issues but given the likely factual overlap it would usually be sensible to consider them at the same hearing; see at [26]. But I don't think anyone would suggest otherwise.

189 10 days is far longer than the courts have generally taken to decide domicile: see <https://www.kessler.co.uk/wp-content/uploads/2017/06/Domicile-cases-length-of-hearing.pdf> Whether for this or some other reason, the substantive hearing never took place.

190 [2017] EWHC 449 (Fam) at [6].

191 In *HMRC v Embiricos* [2020] UKUT 370 (TCC) the FTT found for the taxpayer, the UT for HMRC, and the case is proceeding to the Court of Appeal. Other domicile appeals are stayed pending the outcome.

192 [2021] UKFTT 219 (TC), not following *Henkes v HMRC* [2020] UKFTT 159 (TC).

### 3.23.4 *Period for domicile enquiry*

What is the period for an enquiry into domicile?<sup>193</sup> The issue is normally domicile as at some particular date, but conduct long before that date may be relevant. In *Cyganik v Agulian* :

... the question ... is whether Andreas was domiciled in England and Wales at the date of his death. Although it is helpful to trace Andreas' life events chronologically and to halt on the journey from time to time to take stock, this question cannot be decided in stages. Positioned at the date of death in February 2003 the court must look back at the whole of the deceased's life, at what he had done with his life, at what life had done to him and at what were his inferred intentions in order to decide whether he had acquired a domicile of choice in England by the date of his death. Søren Kierkegaard's aphorism that 'Life must be lived forwards, but can only be understood backwards'<sup>194</sup> resonates in the biographical data of domicile disputes.<sup>195</sup>

Likewise, although the question is domicile on some particular date, conduct after that date may be relevant. That is self-evident, but if authority is needed, see *Re Grove*.<sup>196</sup>

in order to determine a person's intention at a given time, you may regard not only conduct and acts before and at the time, but also conduct and acts after the time, assigning to such conduct and acts their relative and proper weight and cogency.

Likewise *Gaines Cooper v HMRC*.<sup>197</sup>

---

193 See 8.16 (Period of enquiry: Tie-breaker).

194 Kierkegaard,(1843) Journals IV.A.164 in Papers and Journals: A Selection (1996) (A. Hannay, trans.) pp 63, 161.

195 [2006] EWCA Civ 129 at [46].

196 (1888) 40 Ch D 216; likewise *Perdoni v Curati* 14 ITELR 725 at [26]: "In making an assessment of the intention as to domicile of a person at a particular date, the evidence of things said and done by him up to that date will obviously be important. In my view, evidence of things said and done by him after that date may also be relevant, but only in so far as an inference can properly be drawn from them as to what his intention in fact was at the date in question." (This point did not arise on the appeal).

197 [2007] EWHC 2617 at [39], [43].

if the fact-finder is required to determine which of two residences is a person's chief residence, then the tribunal must look at the evidence over a more prolonged period ...

It seems probable, as a matter of common sense, that the further one gets from the point at which a domicile of choice is alleged to have been acquired, the less cogent will be any inference that one can draw from conduct. But that is a question of evaluating the evidence, rather than saying that it is irrelevant.

### 3.23.5 *Facts relevant to domicile*

Domicile disputes generally turn on the individual's intention. So the court must determine what is or was the individual's intention. In order to do so the court will have regard to all facts which might shed light on intention.<sup>198</sup>

HMRC Brief 17/09 provides:

Enquiries aimed at establishing an individual's domicile are, by their very nature, examinations of an individual's background, lifestyle, habits and intentions, possibly over the course of a lifetime. Consequently, any such enquiries conducted by HMRC will, where necessary, extend to areas of individuals' and their families' affairs that may not normally be regarded as relevant to their UK tax position. ...

The RDR Manual provides:

**RDRM23080 Domicile: Enquiries into domicile status: Schedule of useful information and documents** [Mar 2019]

The list below shows the types of information that might be requested during an enquiry. It should not be regarded as either prescriptive or comprehensive, and the individual may offer other relevant information or evidence for consideration too.

Any information request should be tailored to the particulars of the individual's claim, and their present circumstances. It is always important to think about the relevance of particular items of information to the detailed subject matter of each enquiry.

This is sound advice, but unfortunately not well observed in practice.

---

198 Except voting as an overseas elector: see 3.8.1 (Involvement in politics).

An information request need not be limited only to the items listed here, nor will all items listed necessarily be appropriate in all cases. It may not be possible for some individuals to provide some of the items on the list, even if they would be useful to an understanding of their domicile status. Given the inevitable passage of time in many cases, HMRC and the individual may need to consider how best the facts can be checked and tested.

HMRC lists the following:

**Information**

Date of birth.

Full name at birth.

Parents' full names, including mother's maiden name, and places of birth.

Place of birth, identifying the relevant law territory.

Background to the place of birth, if this was not in the same territory as the parental home at the time.

Details of any name changes, and where, if at all, such changes were registered.

Nationality (citizenship) at birth, including an explanation of its basis where this is not obvious from the context.

Details of any changes in or additions to the nationality (citizenship) at birth, with explanations of the relevant background.

Family background, including marital status of parents during the period of derived domicile<sup>199</sup>.

Information about any adoption proceedings.

If parents were not living together at any time during the period of derived domicile, an explanation of the background to this matter and how parental responsibilities were exercised.

Information about relationships entered into by parents following their separation during the period of derived domicile.

Details of siblings

List of places of residence from birth to the time of the enquiry, including home addresses.

An explanation of the reason for residence at each place on the list.

Details of legal rights of residence in respect of each place and a summary of any visas, permits or other official documents required.

Summary of educational background, including places of education, periods of attendance and qualifications obtained.

Details of military service.

Details of governmental or diplomatic service.

Summary of employment and/or business history.

---

199 Author's footnote: the correct term is "domicile of dependency".

Explanation of employment and/or business plans, including anticipated retirement, and any arrangements that are in place in respect of these matters.

A detailed summary of properties that have been available for use other than as short-term holiday lettings. This should include the addresses of all the properties, a description of them, details of their ownership, the periods during which the properties have been available, and an explanation of how they have been used when not occupied by the individual.

Details of all marriages, civil partnerships, separations and divorces, including information relating to other relationships involving long-term cohabitation. These should cover the full names of any relevant parties, their dates, places of birth and nationalities, the periods during which the relationships existed, the dates of any formal acts or ceremonies, information relating to the domicile of the other parties, and explanations of any periods during which the parties to the relationship did not live together.

Information about transfers of property, including those between spouses or civil partners.

A summary of the names, dates of birth and nationalities of the children of the individual. Details of where any children were or are being educated.

The current locations of any children and the relevant background.

Information relating to the exercise of political rights in any territory, as either a voter or a representative.

Membership of any political parties, or participation in campaigns or lobbying groups, and the extent of any activities.

Details of professional qualifications, membership of professional bodies and active participation in these, including offices held.

Summary of membership of clubs, societies, associations, organisations and other bodies, and details of the level of participation in these.

Information about any representative activities undertaken on behalf of a country, territory, or any political, territorial or other sub-division thereof.

The location of personal papers and any items of financial, sentimental or other value. If such items are moveable, the place where they are usually kept and details of any insurance policies in respect of them.

Details of any wills, including an explanation of the law by which the will is intended to be construed and upon which it relies for its formal validity.

Summary of any deeds, declarations, covenants and similar documents created, including those relating to dependants.

Information relating to any legal proceedings or other matters in which domicile was relevant, either as a basis for any action or as an evidential point.

Locations of members of the extended family, including a description of the relationship between the individuals.

Details of religious, cultural and social connections, including the degree of religious observation, the level of participation in social and cultural life, and ability to speak, read and write relevant languages.

Information about charitable and voluntary activities, including the foundation of charitable trusts, donations to charities and good causes, and active participation in the

administration or fund-raising activities of third-sector organisations.

Summary of professional and personal advisers, including their locations and details of the nature and extent of the services that they provide.

An explanation of the individual's intentions for the future. What plans have been made? What contingencies have been taken into account? What would cause a change of residence? What provision has been made for the future? What has the individual actually done that provides evidence for the answers to these questions?

A summary of any connections not specifically mentioned above that the individual has with various territories. When did these begin and precisely what form have they taken over the years? How much time has the individual spent in each territory during the relevant period? What was the reason for such presence?

### **Documents**

The list below deals with the types of documentary evidence that might be requested during an enquiry. Again, it is important to think about the relevance of particular documents to the detailed subject matter of each enquiry. Also, consider the extent to which corroborative documentary evidence of particular aspects of an individual's lifestyle or background is needed.

In some cases it might be necessary to request applications and other documents relating to the acquisition, loss or withdrawal of the items listed below:

Birth certificates	and other documents relevant to the ownership, occupation or use of property
Adoption papers	Mortgage and loan agreements
Registrations of name changes	Health insurance policies
Marriage certificates	Property, motor and other insurance policies
Civil Partnership certificates	Life assurance policies
Passports and identification documents	Documents relating to savings, retirement and pension plans
Social security documents	Wills, expressions of wishes, deeds of covenant and other legal documents
Applications for nationality (citizenship)	Personal financial records, including bank account and credit card statements and documents relating to investments
Documents renouncing nationality (citizenship)	Documents confirming membership of or participation in organisations and activities
Visas, residence permits, work permits and similar documents	Personal correspondence, photographs or electronic records relating to an individual's background, lifestyle and intentions
Driving, firearms and other licences	
Practising certificates and authorisations from professional or regulatory bodies	
School records and reports	
Examination certificates	
Military service records	
Employment contracts	
Business accounts, reports and planning documents	
Conveyances, leases, tenancy agreements	

This is a daunting list, but forewarned is forearmed.

There are nevertheless limits to what information HMRC can require, based on relevance, proportionality and article 8 ECHR (respect for private life and correspondence). In *Re Flynn*.<sup>200</sup>

In one sense there is no end to the evidence that may be adduced; for the whole of a man's life and all that he has said and done, however trivial, may be prayed in aid in determining what his intention was at any given moment of time.

If one takes that approach to its logical conclusion, then no enquiry will ever be completed. But the judge continued:

... All that the court can do is to draw inferences from what has been said and done; *and in doing this, too much detail may stultify.*

There are 3 objections to providing more information than reasonably required. The first is a principle of privacy.<sup>201</sup> The second is cost. The third is the risk that what starts out as a domicile enquiry may segue into other issues.

### 3.23.6 Allegation of carelessness

It appears that HMRC may routinely allege carelessness, in cases where a taxpayer concedes the domicile point. Whether or not a taxpayer, or their agents, are guilty of carelessness is a matter of fact, but some general points can be made.

Ascertaining domicile is not a straightforward question. The difficulties have often been recognised. The Hong Kong Law Reform Commission say:

2.10 The principal criticisms of the rules for acquiring a domicile of choice are ... they also lead to uncertainty: it is hard to decide a person's domicile because of the inherent difficulty of ascertaining his intention.

2.12 The problems stemming from the difficulties and uncertainties of determining a person's domicile were well summarised as follows:

Trials are apt to be long and expensive; for since a man's state of

---

200 [1968] 1 All ER 49 at p.51. This comment is cited with approval in a number of subsequent domicile cases.

201 In particular, article 8 ECHR (respect for private and family life).

mind must be investigated, evidence even of the smallest matter is relevant. Besides, the difficulty of reaching certainty in matters of domicile in the absence of any decision by a competent court is a serious inconvenience to numerous people when they come to make a will or in the many other circumstances in which it is necessary to know which legal system is applicable. The practitioner may find it impossible to advise his client with confidence, since he cannot prophesy what impact the facts will have upon the judge's mind.<sup>202</sup>

The English Domicile Report mentioned went on to note that

Mr Winans' optimistic hopes of being able at some time to return to the United States impressed Lord Macnaghten, but were dismissed by Lord Lindley as of no significance.

It would be easy to assemble further observations of this kind.

There has been a significant change in HMRC practice.<sup>203</sup> What steps would be taken by a reasonable taxpayer, and their reasonably careful advisors, must be assessed in the light of HMRC's practice at the time the steps were taken. In an appropriate case the circumstances behind setting up the current HMRC unit, and what proportion of cases where the domicile question is conceded immediately lead to an allegation of carelessness by HMRC, against the taxpayer or their advisors, are matters which would merit a full examination.

Although the issue is, typically, domicile in the years to 2016/17, conduct after that date is relevant insofar as it may shed light on intention at an earlier time.<sup>204</sup> But facts not available at the time the relevant tax returns were submitted are not relevant to the issue of carelessness, which cannot be decided with the benefit of hindsight.

In a case where a taxpayer's advisors have been careless, the question would arise as to whether they were acting on behalf of the taxpayer, in

---

202 Law Reform Commission of Hong Kong, *Rules For Determining Domicile* (2015) <https://www.legco.gov.hk/yr06-07/english/bc/bc54/papers/bc540713-rpt0504-e.pdf> citing the First Report of the Private International Law Committee (1954) Cmd 9068 para 9 [https://www.kessler.co.uk/wp-content/uploads/2014/07/1261\\_001.pdf](https://www.kessler.co.uk/wp-content/uploads/2014/07/1261_001.pdf)

203 See 3.23.1 (Change of HMRC practice).

204 See 3.23.4 (Period for domicile enquiry).

the relevant sense.<sup>205</sup>

### 3.23.7 Disclosure to curtail enquiry

The advantage of full disclosure is that, for any tax year, HMRC can only open the domicile issue, after the end of the enquiry period for that year (one year from submission of the tax return), if (in short) the inspector “could not have been reasonably expected to be aware” that the taxpayer is UK domiciled.<sup>206</sup>

It is impossible to disclose *all* the information which could be relevant to domicile, but if the taxpayer discloses the principal information relevant to the case *against* foreign domicile, it should be difficult for HMRC to raise an assessment, after the one-year enquiry period, unless they can show that some of the statements given are false.

In practice the taxpayer might supply:

- (1) The answers to the questions in the former form Dom 1 (which asks mostly routine questions)<sup>207</sup>
- (2) A statement setting out the relevant background information.

This would be attached to the self-assessment tax return.

## 3.24 Domicile of company

A company is domiciled where it is registered, which is the place of incorporation.<sup>208</sup>

Company domicile as such<sup>209</sup> does not usually matter for tax purposes. But the issue of company domicile can arise; for instance, Inheritance Taxation of trusts depends on the domicile of the settlor, and this rule applies to a corporate settlor.

A UK resident foreign incorporated company could be deemed domiciled in the UK for IHT purposes, as the relevant provision refers to

205 See 115.14.6 (Carelessness of agent).

206 See 115.9 (Full-disclosure defence).

207 <http://webarchive.nationalarchives.gov.uk/20090211190203/http://www.hmrc.gov.uk/cnr/dom1.pdf>

208 *Gasque v IRC* 23 TC 209; Dicey, Morris & Collins, *Conflict of Laws* (15<sup>th</sup> ed., 2012), para 30-002.

209 Tax rules generally refer to place of registration or incorporation, rather than domicile, though of course it comes to the same thing.

a “person”, which includes a company. In practice this point will rarely if ever arise.

A company could not be deemed domiciled for IT/CGT purposes as the relevant provision refers to an individual. But this point will not arise because a UK resident company is subject to CT, not IT/CGT.

It is better where possible to avoid using the word domicile, in relation to a company, and to refer to place of incorporation/registration, as that term is more basic and transparent; but it comes to (more or less) the same thing.

In general speech, the word domicile is often used in connection with companies without any very precise meaning.<sup>210</sup> But the same is true of domicile in connection with individuals.

See too 86.44.1 (Redomiciliation).

### 3.25 Domicile: Adviser’s duty to client

An adviser’s duty depends on the terms of their retainer:

There is no such thing as a general retainer ... The expression “my solicitor” is as meaningless as the expression “my tailor” or “my bookmaker” in establishing any general duty apart from that arising out of a particular matter in which his services are retained. The extent of his duties depends upon the terms and limits of that retainer and any duty of care to be implied must be related to what he is instructed to do.<sup>211</sup>

In *Mehjoo v Harben Barker* the judge held that a generalist accountant should:

- (1) Raise the topic of domicile, if aware that the client was originally from outside the UK.

---

210 For instance, Budget 2016 provides: “The measure forms part of wider work to establish the UK as an attractive domicile for vehicles issuing insurance linked securities... the government has been working with the insurance industry to develop a new corporate and tax structure for allowing vehicles issuing Insurance Linked Securities to be domiciled in the UK.”

HMRC, “Overview of legislation and rates” (2016) para 1.43

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/508859/OOTLAR\\_complete\\_for\\_publication.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/508859/OOTLAR_complete_for_publication.pdf)

211 *Midland Bank Trust Co v Hett Stubbs & Kent* [1979] Ch 384 at p.402.

- (2) Be aware that “non-dom was a favoured status ... which brought with it tax advantages... there was some sort of opportunity there.”<sup>212</sup>
- (3) Advise the client to take further advice from a non-dom expert.<sup>213</sup>

But the Court of Appeal took a more limited view of the accountant’s retainer, or more accurately speaking, of this accountant’s retainer:

56. The reasonably competent accountant setting out to advise Mr Mehjoo of the tax consequences of the sale would not, in my view, have been under any obligation to raise for discussion the claimant’s domicile unless it was relevant to the CGT liability on the disposal. The accountant would have known that [domicile] gave Mr Mehjoo no tax advantages in relation to the sale of [UK registered] shares unless the situs of the shares could be changed. As this was something which [the accountants] neither knew or could have been expected to know was achievable, there was no reason to mention the matter still less a liability in negligence for not having done so...

59. I take the same view in respect of the claim that [the accountant] should have told Mr Mehjoo that his probable non-dom status carried with it significant tax advantages. Again, these were not advantages which were available to the claimant on the sale of UK registered shares and, in the absence of any claim that [the accountants] should have known and advised Mr Mehjoo that it would or might be possible to change the situs of the shares without triggering a charge to CGT in the process, it is difficult to understand why they were under any legal duty to bring the existence of “very significant tax advantages” to the claimant’s attention. The competent accountant would not have believed that they existed.<sup>214</sup>

---

212 The opportunity was a bearer share scheme. There is still scope for planning, and for CGT planning if action is taken at the time the company is set up (rather than at the time of disposal): see 98.24.4 (UK resident non-UK incorporated co).

213 [2013] EWHC 1669 (QB) at [183] - [189]. The judge said, correctly, that it is not time-consuming or difficult for a generalist to recommend taking specialist advice. In that case, £800k CGT was at stake; the damages came to £1.2m and the claimant’s costs were over £5m. The cost of consulting a specialist (in 2004) was said to be £500 (presumably the cost of an initial enquiry rather than detailed advice).

214 [2014] EWCA Civ 358.

## CHAPTER FOUR

# DEEMED DOMICILE

### 4.1

#### *Cross references*

The following topics are considered elsewhere:

- 1.9 (2017 Domicile reform: Assessment)
- 3.24 (Deemed domicile of company)
- App 8.1 (Parliamentarians)

### 4.1 Deemed domicile: Introduction

This chapter discusses the deemed domicile rules which apply for IHT and IT/CGT.

The development of the rules can be traced in a series of papers which are now of historical interest only:

- “Technical Briefing on Non-Dom changes” (“**the July 2015 Non-Dom paper**”)<sup>1</sup>
- Consultation paper “Reforms to the taxation of non-domiciles” (“**the September 2015 condoc**”)<sup>2</sup>
- Policy paper “IHT: reforms to the taxation of non-domiciles” & draft IHT clauses (December 2015)<sup>3</sup>
- Policy paper “Domicile: Income Tax and CGT” & draft IT/CGT clauses (“**the Feb 2016 policy paper**”)<sup>4</sup>

## 4.2 Deemed domicile: Outline

IT/CGT have 2 categories of deemed-domicile; IHT has those and 2 more, making four in all:

Deemed-domicile category	IT/CGT: ITA	IHTA
Formerly-domiciled resident <sup>6</sup>	s.835BA Condition A	s.267(1)(aa)
15-year rule	s.835BA Condition B	s.267(1)(b)
3-year rule	<i>not applicable</i>	s.267(1)(a)
Spouse-election	<i>not applicable</i>	s.267ZA

A person who is domiciled under these rules is “**deemed domiciled**”.<sup>7</sup>

A person who is UK domiciled under the general law, discussed in the last chapter, may be described as “**actually domiciled**”.

## 4.3 Scope of deemed-domicile

### 4.3.1 Scope of IT/CGT deemed-dom

IT/CGT deemed-domicile applies “for the purposes of the provisions of the Income Tax Acts or TCGA which apply s.835BA ITA (deemed-domicile rule)”,<sup>8</sup> ie only when s.835BA is expressly applied. This is done by a standard form clause:

Section 835BA of ITA 2007 (deemed domicile) applies for the purposes of [the specified provision].

I refer to that as a “**standard-form deemed-domicile application clause**”. That clause appears dozens of times, and the total list covers (just about) everything which is important:

<sup>5</sup> <https://www.gov.uk/government/consultations/reforms-to-the-taxation-of-non-domiciles-further-consultation>

<sup>6</sup> For clarity I add the hyphen which is not in the statutory term.

<sup>7</sup> Thus the meaning of “deemed domiciled” depends on whether the context is IT/CGT or IHT. Where statute uses this term, it is defined: for instance, para 5A sch 5 TCGA, see 88.4 (Condition D: Tainting).

<sup>8</sup> Section 835BA(1) ITA.

**Income tax**

ICTA: s.266A

ITEPA: s.355, 373, 374, 376

ITA: s.476, 718, 809B, 809E, 834

**CGT**

TCGA: s.69, 86, 275

Sch 5A para 3

Sch 7 FA 2008 transitional reliefs (formerly-domiciled residents only):

paras 100(1)(b), 101(1)(c) and 102(1)(e)

para 118(3)(b) so far as having effect for the purposes of para 118(1)(d)

paras 124(1)(b), 126(7)(b), 127(1)(e) and 151(1)(b)

Where IT/CGT legislation refers to domicile but does not expressly apply s.835BA, the IT/CGT deemed-domicile rules do not apply and the reference is to actual domicile. This is rare, but there are examples:

Section	Topic	See para
s.809D ITA	Remittance basis for sub-£2k taxpayer	16.9
sch 5A TCGA	Disclosure of non-resident trusts	123.4.1

Tax often distinguishes formerly-domiciled residents (more harshly treated) from other deemed domiciliaries. So a common formula is to refer to an individual who-

(a) is domiciled in the UK, or

(b) is regarded for the purposes of [a specified provision] as domiciled in the UK as a result of section 835BA having effect because of Condition A in that section being met [formerly-domiciled resident].

In para (a), the context, and the absence of a standard-form deemed-domicile application clause, show that the reference to domicile is a reference to actual domicile; for clarity, I gloss the provision to add the word [actual] in square brackets.

The drafter of the s.643A close-family income rule, and the s.731 equivalent, coined the term “relevantly domiciled” to describe this case (ie where someone is actually domiciled or a formerly domiciled resident).<sup>9</sup> The reader may think that the legislation is easier to follow without this opaque term; and, perhaps for the best, it is not used elsewhere.

---

9 See 47.15.1 (“Relevantly domiciled”).

### 4.3.2 *Scope of IHT deemed-dom*

IHT deemed-domicile applies “for the purposes of the IHTA”<sup>10</sup> ie for all IHT purposes, unless expressly disapplied.

The situations where deemed-domicile is disapplied for IHT are rare:

- (1) FOTRA securities/qualifying certificates of IoM/Channel Island domiciliaries<sup>11</sup>
- (2) Double tax treaties<sup>12</sup>

## 4.4 **IT/CGT deemed-domicile**

Section 835BA ITA provides:

- (1) This section has effect for the purposes of the provisions of the Income Tax Acts or TCGA 1992 which apply this section.
- (2) An individual not domiciled in the UK at a time in a tax year is to be regarded as domiciled in the UK at that time if—
  - (a) condition A is met, or
  - (b) condition B is met.

I refer to “**IT/CGT dom conditions A and B**”.

### 4.4.1 *Condition A: Formerly dom*

Section 835BA(3) ITA provides:

Condition A is that—

- (a) the individual was born in the UK,
- (b) the individual’s domicile of origin was in the UK, and
- (c) the individual is resident in the UK for the tax year referred to in subsection (2).

Statute does not coin a term for an individual who is domiciled under IT/CGT dom condition A. Instead, it uses the clumsy formula:

regarded for the purposes of [a specified section] as domiciled in the UK as a result of section 835BA having effect because of Condition A in

<sup>10</sup> See s.267(1) IHTA.

<sup>11</sup> See 71.5.1 (Deemed domicile disapplied). For these exemptions generally, see 71.4 (Non-settled FOTRA securities); 71.11 (Trusts: FOTRA Securities); 71.7 (Channel Islands/IoM domicile).

<sup>12</sup> See 109.6.1 (Deemed domicile disapplied); 109.6.2 (Spouse-election domicile disapplied).

that section being met

I use the term “**formerly-domiciled resident**” for IT/CGT as well as for IHT. This might be regarded as slightly loose language, because:

- (1) Statute uses the term “formerly domiciled resident” only in its IHT sense.<sup>13</sup>
- (2) The two definitions (IHT and IT/CGT) are not quite identical, as IT/CGT has no equivalent to para (d) of the IHT definition (one-year grace period).
- (3) The expression “formerly domiciled resident” is in any case a rough shorthand, because it ignores the requirement to be born in the UK. (“Born-domiciled” would be more accurate; but it is best to adopt the statutory terminology, because anything else is even more confusing).

I do not think my terminology is likely to cause confusion in practice.

So for IT/CGT, the domicile start date for a formerly domiciled resident is 6 April in the 1<sup>st</sup> year of residence. In that year, a formerly-domiciled resident may be a formerly domiciled resident for IT/CGT but not for IHT.

The domicile end date is 6 April in a year of non-residence, which is the same as the IHT rule.

#### 4.4.2 Condition B: 15-year rule

Section 835BA(4) ITA provides:

Condition B is that the individual has been UK resident for at least 15 of the 20 tax years immediately preceding the tax year referred to in subsection (2).

This is the equivalent of the IHT 15-year rule.

Section 835BA(5) ITA provides:

But Condition B is not met if—

- (a) the individual is not UK resident for the relevant tax year, and
- (b) there is no tax year beginning after 5 April 2017 and preceding the relevant tax year in which the individual was UK resident.

At first this seems slightly different from the IHT rule, because s.835BA(5) is not an exact equivalent of s.267(1)(b)(ii). But on further examination that does not matter.

---

<sup>13</sup> See 4.7 (Formerly-domiciled resident: IHT).

## 4.5 Counting split years

A tax year for which the individual is UK resident will count in full for deemed domicile purposes, even if the year is a split year.<sup>14</sup>

It follows that there is a mismatch in the overseas part of a split year:

- (1) For IT/CGT: Foreign income/gains arising to the individual in the overseas part of a split year are not usually taxed; deemed domicile does not prevent split-year relief applying.
- (2) For IHT: Foreign situate property is chargeable (non-excluded) property even in the overseas part of the year.

But this is not the only mismatch between IHT and IT/CGT deemed-domicile rules; so perhaps it does not matter.

## 4.6 IHT 3-year rule

Section 267(1) IHTA provides:

A person not domiciled in the UK at any time (in this section referred to as “the relevant time”) shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if—

- (a) he was domiciled in the UK within the three years immediately preceding the relevant time...

The 3-year rule concerns the person who is actually UK domiciled and who loses their UK domicile. The domicile start date for this rule is the date of change of domicile, and the domicile end date is 3 years after that date.

The IHT Manual gives a straightforward example:

### **IHTM13024 Change of Domicile: Deemed Domicile [Jan 2020]**

... **Example 1** (Paula)

P has an English domicile and lives in England. She retires from work and decides that she wants to live for the rest of her life in Spain. She goes to Spain and takes a Spanish domicile of choice on 31 January 2007.

She dies on 1 January 2010 still in Spain.

Because of the deemed domicile ‘three year rule’ she is deemed domiciled in the UK at her death and her world wide estate is chargeable

---

<sup>14</sup> See 9.1 (Residence throughout tax year).

to IHT. Her estate can, of course, claim tax relief for any Inheritance Tax paid in another country.

Unlike the 15-year rule, the domicile start and end dates do not relate to tax years.

Section 267(5) IHTA provides:

In determining for the purposes of this section whether a person is, or at any time was, domiciled in the UK, sections 267ZA and 267ZB are to be ignored.

Thus spouse-election domicile and the 3-year rule operate independently: the loss of spouse-election domicile does not give rise to deemed domicile under the 3-year rule.

#### 4.7 Formerly-domiciled resident: IHT

Section 267(1) IHTA provides:

A person not domiciled in the UK at any time (in this section referred to as “the relevant time”) shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if ...

- (aa) he is a formerly domiciled resident for the tax year in which the relevant time falls (“the relevant tax year”)

“Formerly-domiciled resident” is a label for a set of four rules. Section 272 IHTA provides:

In this Act, except where the context otherwise requires ...

“formerly domiciled resident”, in relation to a tax year, means a person—

- (a) who was born in the UK,
- (b) whose domicile of origin was in the UK,
- (c) who was resident in the UK for that tax year, and
- (d) who was resident in the UK for at least one of the two tax years immediately preceding that tax year.

I call the condition in para (d) the “**one-year grace period**”. IT/CGT does not have an equivalent requirement.<sup>15</sup>

The place of birth can be ascertained if necessary from the birth certificate.

The domicile start date for formerly-domiciled residents under the IHT

---

15 See 4.4.1 (Condition A: Formerly dom).

deemed dom rule is 6 April in the 2<sup>nd</sup> year of residence.

The domicile end date for formerly-domiciled residents is 6 April in the first year of non-residence.

The July 2015 Non-Dom paper provides:

25. Some individuals who have a UK domicile at the date of their birth (i.e. a UK domicile of origin) may emigrate. They may successfully be able to show that under general law they have acquired a domicile of choice overseas as they intend to settle in the foreign country. Under current [pre-2017]rules... they will remain UK deemed domiciled for IHT purposes for at least 3 years after they have formed the intention to settle permanently (and do settle) in the foreign country even if they have been non-UK resident for many years before reaching that decision. Once they have lost their UK domicile and deemed domicile for IHT purposes they can set up trusts and obtain favourable treatment for excluded property trusts and their worldwide estate will fall outside IHT...

26. However some of these individuals later return to the UK for some years and still maintain they have a foreign domicile of choice. In these circumstances, the new rules will mean that they are taxed as UK domiciled for tax purposes on their return irrespective of their domicile status under general law.

27. Irrespective of their actual intentions, such an individual (the returning UK dom) will become UK domiciled for tax purposes once they become UK resident. In addition, while UK resident after their return here, the returning UK domiciliary will not benefit from any favourable tax treatment in respect of trusts set up while not domiciled here (whether inheritance tax treatment or otherwise)...

The rules can catch in particular:

- (1) Those who (would like to) return to the UK for medical treatment of a terminal illness
- (2) Short term secondees from abroad
- (3) Those who make settlements when non-domiciled and subsequently return to the UK

#### 4.7.1 *Former-dom resident: Critique*

The rule reflects an intuition that a formerly-domiciled resident is likely to have a closer connection to the UK than other UK resident non-doms. Perhaps there is also a disapproval of those losing UK domicile and subsequently becoming UK resident again, or some administrative

convenience in not having to argue domicile issues in these circumstances.

However the rule can affect those whose UK connections seem quite tenuous, because:

- (1) The rules which determine domicile of origin can be capricious
- (2) The place of birth is to some extent a matter of chance

CIOT give this example:

an individual:

- born in the UK of UK domiciled but non-resident father who is in the UK for some temporary purpose
- taken out of the UK in infancy, grows up, lives and works abroad for the next, say, 30-40 years during which time he acquires a foreign domicile of choice;
- seconded by his employer to the UK on a short term basis

CIOT say:

The individual will ... be treated for income tax and capital gains tax purposes in the same way as a UK domiciliary.

This is arguably inequitable given that it is pure happenstance that the individual was born in the UK.

The harshness of the rule is highlighted further if one compares the position with the individual's sibling who was born outside the UK and who is, therefore, not affected by the returning UK domiciliary proposal.

The sibling may therefore take up temporary secondment in the UK or come to the UK to look after his/her parents without incurring the same adverse consequences as the individual.<sup>16</sup>

This applies for IHT and IT/CGT, though in the case of IHT the unfairness is mitigated slightly by the one-year grace period.

It seems to me that the answer to this objection is that all connecting factors used to define territorial limits to tax must be slightly arbitrary. There is no perfect solution, and to ask for one is to cry for the moon.<sup>17</sup>

Others may question whether the place of birth should be regarded as "pure happenstance". Compare the rule (known as birthright citizenship)

---

16 CIOT, "Response to Consultation on draft clause 43 Finance Bill 2016" (Feb 2016) [http://www.tax.org.uk/sites/default/files/file\\_uploads/160201%20Draft%20Finance%20Bill%202016%20Clause%2043%20Inheritance%20Tax%20-%20Domicile%20-%20CIOT%20comments.pdf](http://www.tax.org.uk/sites/default/files/file_uploads/160201%20Draft%20Finance%20Bill%202016%20Clause%2043%20Inheritance%20Tax%20-%20Domicile%20-%20CIOT%20comments.pdf)

17 See 1.4 (Domicile as fiscal test: Critique).

that a person becomes a citizen of the place where they happen to be born. This applies even to children of short term visitors and illegal immigrants. That was formerly UK law, and continues to be the law in the USA<sup>18</sup> and some other countries.

But views may differ.

#### 4.8 IHT 15-year rule

Section 267(1) IHTA provides:

A person not domiciled in the UK at any time (in this section referred to as “the relevant time”) shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if ...

(b) he was resident in the UK—

- (i) for at least fifteen of the twenty tax years immediately preceding the relevant tax year, and
- (ii) for at least one of the four tax years ending with the relevant tax year.

I refer to this as the “**IHT 15-year rule**”.

The 15-year rule does not apply to visiting forces.<sup>19</sup>

The start date for acquisition of 15-year deemed domicile is 6 April in the tax year *after* the 15/20 year test is satisfied. It does not matter whether or not a person is resident in that tax year. But if the person remains non-resident, the only impact of IHT deemed-domicile is a 3year “tail” of IHT exposure, which may not be a serious matter.

It may be useful to set out an aide memoire of when the 15-year rule begins to apply. Assuming a continuous period of UK residence:

<b>UK residence from</b>	<b>Deemed-domicile start date</b>	<b>UK residence from</b>	<b>Deemed-domicile start date</b>
2003/04	6 April 2018	2012/13	6 April 2027
2004/05	6 April 2019	2013/14	6 April 2028
2005/06	6 April 2020	2014/15	6 April 2029
2006/07	6 April 2021	2015/16	6 April 2030
2007/08	6 April 2022	2016/17	6 April 2031

18 The 14th Amendment to the United States Constitution, ratified in 1868, provides: “All persons born ... in the United States, and subject to the jurisdiction thereof, are citizens of the United States ...”. Hence the phenomenon of “accidental Americans”, a category which included Boris Johnson.

19 See App 9.4.2 (IHT deemed-domicile).

2008/09	6 April 2023	2017/18	6 April 2032
2009/10	6 April 2024	2018/19	6 April 2033
2010/11	6 April 2025	2019/20	6 April 2034
2011/12	6 April 2026	2020/21	6 April 2035

#### 4.8.1 Domicile end date

Deemed domicile under the 15-year rule ends when an individual ceases to meet *either* of the two conditions in s.267(1)(b). The conditions are:

- (b) he was resident in the UK—
- (i) for at least fifteen of the twenty tax years immediately preceding the relevant tax year, *and*
  - (ii) for at least one of the four tax years ending with the relevant tax year.

The condition in (b)(ii) is not met from the beginning of the individual's fourth consecutive year of non-residence (including the relevant year). But if the individual has not been UK resident for 15 consecutive years, then the condition in s.267(1)(b)(i) will not be satisfied. So the condition in (ii) only matters at the margin.

Take the case of an individual continually UK resident since 2004/05 who ceases to be UK resident in 2019/20:

Relevant Year	deemed dom	Res years / 20 exclude rel year <sup>20</sup>	non-res years include rel year <sup>21</sup>
1 2004/05 resident	no	0	-
2 2005/06 resident	no	1	-
3 2006/07 resident	no	2	-
4 2007/08 resident	no	3	-
5 2008/09 resident	no	4	-
6 2009/10 resident	no	5	-
7 2010/11 resident	no	6	-
8 2011/12 resident	no	7	-
9 2012/13 resident	no	8	-
10 2013/14 resident	no	9	-
11 2014/15 resident	no	10	-

20 That is, the number of years in the last 20, not including the relevant tax year, in which the individual was UK resident.

21 That is, the number of years, including the relevant tax year, in which the individual was continually not UK resident.

12	2015/16	resident	no	11	-
13	2016/17	resident	no	12	-
14	2017/18	resident	no	13	-
15	2018/19	resident	no	14	-
16	2019/20	non-resident	yes	15	1
17	2020/21	non-resident	yes	15	2
18	2021/22	non-resident	yes	15	3
19	2022/23	non-resident	no *	15	4
20	2023/24	non-resident	no *	15	5
21	2024/25	non-resident	no *	15	6
22	2025/26	non-resident	no	14	7

In the years marked \*, ie 2022/23 to 2024/25, the fourth to sixth years of continuous non-residence, the individual escapes deemed domicile because of s.267(1)(b)(ii) (four continuous years of non-residence). If they resume UK residence, they become deemed domiciled. But in the following year, the seventh year, the individual escapes deemed domicile because of s.267(1)(b)(i) (less than 15 years UK residence over the last 20) and if they subsequently become UK resident, the 15 year period starts again from zero.

#### 4.8.2 “Residence” for 15-year rule

Section 267(4) IHTA provides:

For the purposes of this section the question whether a person was resident in the UK for any tax year shall be determined as for the purposes of income tax.

This is not needed from 2013/14, as the statutory residence test applies for IHT generally.<sup>22</sup>

It is, perhaps, relevant for the years from 1993 to 2013 (when the SRT took effect), but the wording was there for historical reasons only.

Prior to 1993/94, the provision concluded: “but without regard to any dwelling-house available in the UK for his use”.<sup>23</sup> That phrase was deleted in 1993 “where the year of assessment concerned is 1993-94 or a

<sup>22</sup> See 5.3 (Scope of SRT).

<sup>23</sup> For a more detailed analysis, see Kessler, *Taxation of Non-Residents and Foreign Domiciliaries* (15<sup>th</sup> ed., 2016-2017) para 4.2.5 (Meaning of “residence” for 17-year rule).

subsequent year of assessment.”<sup>24</sup> The pre-1993 wording would still be relevant in ascertaining the domicile of the settlor for IHT purposes, and so for excluded property status, if the settlement was made between 1975 and 2013, and residence in the period 1973-1993 is in issue.

#### 4.9 Start/end date uncertainty

Under the 15-year rule, deemed domicile in a year (year X) can depend on:

- (1) UK residence for the previous year, under s.267(1)(b)(i), which depends on facts during the previous year, and also in some cases, on facts after that year; and
- (2) UK residence for the actual (relevant) year under s.267(1)(b)(ii)

So on 6 April, and for some time after, an individual may not know whether they are resident, and so they will not know whether they are deemed domiciled for IHT or not. On the facts of the example set out above, the individual ceases to be UK domiciled on 6 April 2022 and may in principle safely make a gift of excluded property to a trust. But if they unexpectedly become UK resident in the year 2022/23, that turns into a chargeable transfer. So the tax cost of a return to the UK may be high.

Similar problems arise for formerly-domiciled residents, whose domicile in a year depends on UK residence for that year.

As at a domicile start or end date of 6 April, in any year, the individual will often not know whether they will be resident for the year or not, because facts which emerge during the year (or even after the year) are relevant to determine residence. So they will not know whether they are deemed domiciled or not. For IT/CGT this matters less, as tax returns are due long after the year end, by which time the position should be known. For IHT, on the other hand, the returns may be due before the relevant facts are known. Taxpayers will have to judge as best they can.

#### 4.10 Children

##### 4.10.1 *Child of deemed domiciliary*

The July 2015 Non-Dom paper provides:

20. The deemed domicile of the long term resident non-dom has no effect on the domicile status of the children, whose actual and deemed

---

<sup>24</sup> Section 208 FA 1993.

domicile position is looked at independently. Thus they will take their father's domicile under general law at the date of their birth and if they are long term residents within the new rules will become deemed domiciled here. But they do not become deemed domiciled here simply because either parent is deemed domiciled here nor do they lose deemed domicile just because a parent does.

Similarly, the RDRM provides:

**RDRM25080: Deemed domicile: Other issues** [May 2020]

Unlike domicile under common law, deemed domicile status is not passed from parent to child.

#### 4.10.2 *Children under 18*

UK resident years count towards the 15 year total even if the individual is under the age of 18. So a child who is born in the UK and who does not have a UK domicile of origin could become deemed-domiciled before reaching adulthood. However, the child could still lose deemed-UK domiciled status if they leave the UK and spend sufficient years non-resident.

### 4.11 Commencement

Section 30(9) F(no.2)A 2017 provides:

The amendments made by this section have effect in relation to times after 5 April 2017, subject to subsections (10) to (12).

#### 4.11.1 *IHT 15-year rule: Transitional*

The July 2015 Non-Dom paper provides:

16.... For those who leave the UK before 6 April 2017 but would nevertheless be deemed domiciled under the 15 year rule on 6 April 2017 the present rules will apply.

Accordingly, s.30(10) F(no.2)A 2017 provides:

The amendment to section 267(1) of IHTA 1984 made by subsection (1)(c) does not have effect in relation to a person if—

- (a) the person is not resident in the UK for the relevant tax year, and
- (b) there is no tax year beginning after 5 April 2017 and preceding the relevant tax year in which the person was resident in the UK.

In this subsection “relevant tax year” is to be construed in accordance

with section 267(1) of IHTA 1984 as amended by subsection (1).

Undoing the 2017 amendments, s.267(1)(b) IHTA reverts to its pre-2017 form (a 17-year rule):

A person not domiciled in the UK at any time (in this section referred to as “the relevant time”) shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if ...

- (b) he was resident in the UK in not less than seventeen of the twenty years of assessment ending with the year of assessment in which the relevant time falls.

Section 30(11) F(no.2)A 2017 provides:

The amendment to section 267(1) of IHTA 1984 made by subsection (1)(c) also does not have effect in determining—

- (a) whether settled property which became comprised in the settlement on or before that date is excluded property for the purposes of IHTA 1984;
- (b) the settlor’s domicile for the purposes of section 65(8) of that Act in relation to settled property which became comprised in the settlement on or before that date;
- (c) whether, for the purpose of section 65(8) of that Act, the condition in section 82(3) of that Act is satisfied in relation to such settled property.

Although there is no grandfathering, the 15-year rule is not retrospective in that it does not impact on past actions taken. For example, suppose a trust was made in January 2017, by a settlor who

- (1) was not deemed domiciled under either the then 17-year rule or the 3-year rule, but
- (2) would be deemed domiciled under the current 15-year rule.

The trust continues to have excluded property status after 5 April 2017.

CIOT lobbied for transitional relief for individuals who:

- (1) left the UK before they became deemed-domiciled for IHT under the former 17-year rule and
- (2) subsequently returned to the UK:

a non-UK domiciliary who had been in the UK for many years, then left prior to 2011/12 and returned just after 2014/15 would have stayed for four complete tax years out of the UK. On their return he/she would have reasonably expected to be able to complete another 17 years in the UK

before the current IHT deemed domicile 17/20 year test would have caught them again. It is not unreasonable for 17 years to be shortened to 15 years for such a case. However, it is unreasonable for the period to be shortened to zero years, because they will be become immediately deemed domicile again on 6 April 2017.<sup>25</sup>

However no relief is given for this case, so on these facts the individual will become deemed domiciled on 6 April 2017.

#### 4.11.2 *IHT former dom transition*

There is no transitional relief for formerly-domiciled residents. The July 2015 Non-Dom paper provides:

29. This measure will affect all returning UK doms from 6 April 2017, including those who returned prior to April 2017. The five year rule will affect UK doms leaving after 5 April 2017. It will also affect trusts set up while such individuals were not UK domiciled if they are UK resident on or after 6 April 2017. In these circumstances, an individual will be taxed on all income and gains arising in such trusts under the same rules as any other UK domiciliary. The IHT treatment of such trusts will also be the same as for UK taxpayers who have never lost a UK domicile.

#### 4.11.3 *Pre-2015 temporary non resident: CGT*

ICAEW raised a problematic interaction with the temporary non-UK residence rules:

On 2 January 2015, prior to the announcement, an individual, who would have met the “15 out of 20” rule if it had been in force, left the UK on a three year secondment.

Between January and June 2015 she made various disposals of foreign assets at very significant gains with the expectation that when she returned she would pay the £90,000 Remittance Basis Charge and not have to pay tax on the gains (as there would not be any remittances).

Without a transitional provision the changes mean that she will not be able to access the remittance basis when she returns to the UK, so she

---

25 CIOT, “Response to Consultation on draft clause 43 Finance Bill 2016” (Feb 2016) [http://www.tax.org.uk/sites/default/files/file\\_uploads/160201%20Draft%20Finance%20Bill%202016%20Clause%2043%20Inheritance%20Tax%20-%20Domicile%20-%20CIOT%20comments.pdf](http://www.tax.org.uk/sites/default/files/file_uploads/160201%20Draft%20Finance%20Bill%202016%20Clause%2043%20Inheritance%20Tax%20-%20Domicile%20-%20CIOT%20comments.pdf)

will have a very significant CGT liability.<sup>26</sup>

The Feb 2016 policy paper accepted the point:

The part of the measure affecting capital gains tax in respect of foreign chargeable gains accruing to temporary non-residents will not affect accruals arising in respect of periods of temporary non-residence beginning on or before 7 July.

Accordingly, para 16 sch 8 F(no.2)A 2017 provides:

(1) This paragraph applies in a case where section 10A of TCGA 1992 as substituted by paragraph 119 of Schedule 45 to FA 2013 applies in relation to an individual.

(2) For the purposes of capital gains tax in respect of foreign chargeable gains accruing to the individual during a temporary period of non-residence beginning before 8 July 2015, the amendment made by paragraph 14(2) does not have effect in relation to the tax year which consists of or includes the period of return.

(3) Where by virtue of sub-paragraph (2) an individual makes a claim under section 809B of ITA 2007 for any of the tax years 2017–18 to 2020–21 inclusive, sections 809C, 809G and 809H of ITA 2007 do not apply to the individual for that tax year.

(4) In this paragraph, “foreign chargeable gain” has the meaning given by section 12(4) of TCGA 1992.

(5) Part 4 of Schedule 45 to FA 2013 explains what “temporary period of non-residence” and “period of return” mean.

Para 15 contains the same rule for pre-2013 departures; that is needed as they have a separate code.

This only refers to gains. It does not apply to *income* accruing in the period of temporary non-residence. For employment income, the August 2016 consultation paper provides:

Some stakeholders sought clarification of the tax treatment which would apply where an individual who is subject to the remittance basis receives employment income relating to a period when they were not deemed-domiciled under the 15 out of 20 rule but is paid after they become deemed-domiciled... the government can confirm that such income will be taxable only to the extent that it is remitted to the UK.

---

26 Taxguide 04/15.

This is in line with the current treatment, which currently applies to deferred payments made after an individual ceases to be taxed on the remittance basis.

#### 4.11.4 *1974 transitional rules*

Section 267(3) IHTA contains five transitional rules:

Para (a) of subsection (1) above shall not apply in relation to a person who (apart from this section) has not been domiciled in the UK at any time since 9th December 1974 ...

This disapplies the 3-year rule only. It would only apply in a relatively rare case of someone who was actually UK domiciled and ceased to be so before 9 December 1974.

and para (b) of that subsection shall not apply in relation to a person who has not been resident there at any time since that date ...

This only disapplies the former 17-year rule. It would apply to someone who had been UK resident for 17-years and ceased to be so before 9 December 1974.

and that subsection shall be disregarded—

- (a) in determining whether settled property which became comprised in the settlement on or before that date is excluded property,

This applies to pre-9 December 1974 settlements.

that subsection shall be disregarded— ...

- (b) in determining the settlor's domicile for the purposes of section 65(8) above in relation to settled property which became comprised in the settlement on or before that date, and
- (c) in determining for the purpose of section 65(8) above whether the condition in section 82(3) above is satisfied in relation to such settled property.

This applies to the exemption for FOTRA securities.

These transitional reliefs are preserved by the 2017 reforms. Section 30(12) F(no.2)A 2017 provides:

Despite subsection (2), section 267(1) of IHTA 1984, as originally enacted, shall continue to be disregarded in determining—

- (a) whether settled property which became comprised in the

- settlement on or before 9 December 1974 is excluded property for the purposes of IHTA 1984;
- (b) the settlor's domicile for the purposes of section 65(8) of that Act in relation to settled property which became comprised in the settlement on or before that date;
  - (c) whether, for the purpose of section 65(8) of that Act, the condition in section 82(3) of that Act is satisfied in relation to such settled property.

## **4.12 Deemed domicile: Planning**

### *4.12.1 Anticipating deemed domicile*

There is scope for planning in anticipation of acquisition of deemed domicile. Many of the proposals discussed at App 12.1 (Pre-arrival planning) will be relevant here.

A person ("H") with a UK place of birth and domicile of origin may be married to a person ("W") who was not born in the UK, or who did not have a UK domicile of origin. If H and W become UK resident, then H will be deemed domiciled as a formerly-domiciled resident; and W will not. In that case the tax issues can be resolved by a transfer from H to W (and a transfer from a settlement made by H to W). This should be considered before H and W become UK resident.

### *4.12.2 Losing deemed domicile*

An individual who is deemed domiciled because of:

- (1) a spouse election; or
- (2) 15 years UK residence

will lose deemed domicile status for IHT after 3 or 4 years non-residence. A formerly-domiciled resident ceases to be UK domiciled on non-residence.

For such individuals, a simple form of IHT planning is to refrain from making any gifts until they have ceased to be deemed domiciled.

A non-resident individual who is deemed domicile may obtain exemption without waiting 4 years by purchasing FOTRA securities. This may be important for deathbed planning.

In the case of an individual who is deemed domiciled but actually domiciled in the Isle of Man or in the Channel Islands there is scope for

acquiring excluded property in the form of exempt saving certificates.<sup>27</sup>

### 4.13 Spouse-election domicile

The legislation is slotted in after s.267 and before s.267A, so the two sections are numbered s.267ZA and s.267ZB.<sup>28</sup> The drafting is as abstruse as the numbering.

There are essentially two parties involved here, and I call them H (the donor) and W (the non-dom donee). My terminology embodies a gender assumption, which the drafter of the statute rightly avoids, namely that *H* makes a gift to *W*. But in the statutory provision “person” sometimes refers to one spouse and sometimes the other, and discussion is easier to follow if this is glossed with H or W, as the case may be. The reader may grasp at any aid to navigation.

Section 267ZA IHTA provides:

- (1) A person [W, the non-dom donee] may, if condition A or B is met, elect to be treated for the purposes of this Act as domiciled in the UK (and not elsewhere).
- (2) A person’s personal representatives [W’s PRs] may, if condition B is met, elect for the person [W] to be treated for the purposes of this Act as domiciled in the UK (and not elsewhere).

I coin the following terminology:

<b>Term</b>	<b>Meaning</b>
Spouse election	Election under s.267A
Spouse-election domicile	IHT deemed-domicile under s.267ZA
Spouse-election conditions A & B	The conditions in s.267ZA

The point of making a spouse<sup>29</sup> election is to qualify for the unrestricted IHT spouse exemption.<sup>30</sup>

The spur to the provisions was EC infringement proceedings,<sup>31</sup> and their

27 See 71.7 (Channel Islands/IoM domicile).

28 See App.11.3 (Section numbering system).

29 I use the word “spouse” to include a civil partner.

30 See 89.2 (Restricted IHT spouse exemption for non-dom spouse). There may, exceptionally, be a case where an election may be made to qualify for relief under a DTA, but I doubt if that would ever happen.

31 See 89.2.3 (Spouse exemption: EU-law).

development can be traced through an HMRC Technical Note<sup>32</sup> but that is now of historical interest only.

#### 4.13.1 *Spouse-election conditions*

*Condition A:* Section 267ZA(3) IHTA provides:

Condition A is that, at any time  
[a] on or after 6 April 2013 and  
[b] during the period of 7 years ending with the date on which the election is made,  
the person [W, the non-dom donee] had a spouse or civil partner [H, the donor] who was domiciled in the UK.

*Condition B:* Section 267ZA(4) IHTA provides:

Condition B is that  
[A] a person (“the deceased”) [H, the donor] dies and,  
[B] at any time  
[i] on or after 6 April 2013 and  
[ii] within the period of 7 years ending with the date of death,  
the deceased [H, the donor] was—  
(a) domiciled in the UK, and  
(b) the spouse or civil partner of the person [W, the donee] who would, by virtue of the election, be treated as domiciled in the UK.

The spouse-election conditions are in short that H (the donor) is or was UK domiciled or deemed domiciled. But in practice W (the non-dom donee) or her PRs will only consider a spouse election if:

- (1) H has made (or intends to make) a gift to W.
- (2) H is UK domiciled or IHT deemed-domiciled at the date of the gift.
- (3) W is not UK domiciled or IHT deemed-domiciled at the date of the gift.
- (4) The gift would or might otherwise be chargeable, being:
  - (a) made on the death of H (the donor) or
  - (b) a failed PET (H has died within 7 years of the gift) or

---

32 HMRC, “IHT: spouses and civil partners domiciled outside the UK” (2012)  
<http://webarhive.nationalarchives.gov.uk/20130102183002/http://www.hmrc.gov.uk/budget-updates/11dec12/784.pdf>

(c) a failed PET is anticipated (H still living but may not survive 7 years from the gift).

In the following discussion, it is assumed that this is the case. That is the scenario where the IHT spouse election is important.<sup>33</sup>

4.13.2 *Lifetime/death election*

Section 267ZB(1) IHTA defines these terms:

For the purposes of this section–

- (a) references to a lifetime election are to an election made by virtue of section 267ZA(3) [election by W, the non-dom donee], and
- (b) references to a death election are to an election made by virtue of section 267ZA(4) [election by W’s PRs].

A *lifetime* election (s.267ZA(3)) is made by W so W must be alive at the time of the election.

A *death* election (s.267ZA(4)) is made by W’s PRs, so W must have died at the time of a death election. H (the donor) may be alive or dead at the time of a lifetime election. But H must have died in order to make a death election).

Summarising in a table:

<b>W(non-dom donee)</b>	<b>H (donor)</b>	<b>Election</b>	<b>Which condition met</b>
Alive	Alive	Lifetime election	A
Alive	Dead	Lifetime election	A
Dead	Alive	No election possible until H dies <sup>34</sup>	
Dead	Dead	Death election	B

4.13.3 *Conditions A/B: 7 year periods*

Spouse-election conditions A and B refer to distinct periods, thus:

<b>Condition</b>	<b>Period</b>
Condition A	7 years ending with date on which the election is made
Condition B	7 years ending with date of death of H (the donor)

I refer to these as the “**7-year periods**”.

33 See 89.2 (Restricted IHT spouse exemption).

34 It does not seem logical that if W dies survived by H, no election can be made until H dies. Could it be that an election could be made under s.267ZA(3) by W’s PRs?

#### 4.13.4 *Spouse-election dom start date*

It is necessary to distinguish:

- (1) The date that the spouse election is *made*
- (2) The date that the spouse election *takes effect*; this is earlier, and will be spouse-election domicile start date.

The starting point is that W (the non-dom donee), or her PRs, can choose the date from which the spouse election takes effect. Section 267ZB(3) IHTA provides:

A lifetime or death election is treated as having taken effect on a date specified, in accordance with subsection (4), in the notice.

Then s.267ZB(4) IHTA goes on to impose a number of restrictions on that freedom of choice. Firstly:

- (4) The date specified in a notice under subsection (3) must—
  - (a) be 6 April 2013 or a later date

The earliest date that a spouse election can take effect is 6 April 2013. That is the effective commencement date of the spouse-election regime. That will not normally matter now, as pre-2013 PETs must have become exempt.<sup>35</sup>

Section 267ZB IHTA continues:

- (4) The date specified in a notice under subsection (3) must ...
  - (b) be within the period of 7 years ending with—
    - (i) in the case of a lifetime election [condition A], the date on which the election is made, or
    - (ii) in the case of a death election [condition B], the date of the deceased's death ...

In the case of a lifetime election the election must take effect (and spouse-

---

<sup>35</sup> The issue could still arise where:

- (1) H made a gift to W before 2013.
- (2) The gift was a gift with reservation of benefit.
- (3) H dies and there is a charge under the GWR rules.

In these circumstances EU law remedies will need to be considered; ee 89.2.3 (Spouse exemption: EU-law). In practice that will not often happen (and if it does, the GWR may often be overlooked).

election domicile begins) within 7 years of the election.

If H (the donor) makes a gift to W (the non-dom donee), and the gift is a PET, there is a choice:

- (1) W could elect immediately.
- (2) W could wait and see. If H died (or was expected to die) then an election could be made later:
  - (a) If H survived 7 years then an election would not be needed.<sup>36</sup>
  - (b) If H died within the 7-year period, W could make an election after the death of H. This allows W to consider the advantages and disadvantages of the election in the light of the circumstances at the time. For instance, if H survived more than 3 years from H's gift, then W's election decision could take into account IHT taper relief.

Section 267ZB IHTA provides:

- (4) The date specified in a notice under subsection (3) must—
  - (c) meet the condition in subsection (5).

So we turn to s.267ZB(5) IHTA:

The condition in this subsection is met by a date if, on the date—

- (a) in the case of a lifetime election—
  - (i) the person making the election was married to, or in a civil partnership with, the spouse or civil partner, and
  - (ii) the spouse or civil partner was domiciled in the UK, or
- (b) in the case of a death election—
  - (i) the person who is, by virtue of the election, to be treated as domiciled in the UK was married to, or in a civil partnership with, the deceased, and
  - (ii) the deceased was domiciled in the UK.

In short, H (the donor) must be UK domiciled when the spouse election takes effect, but that does not matter as in practice the election is only wanted in those circumstances.

If H (the donor) has become UK domiciled, W may still make an election to cover an earlier period when H was non-UK domiciled.

The IHT Manual correctly provides:

---

<sup>36</sup> Unless there is a GWR.

**IHTM13046: election by non-UK domiciled spouse or civil partner: the date the election takes effect [Jan 2020]**

The person making the election does not need to be married or in a civil partnership when the election is made

Individuals who divorce may make an election to cover the period they were married.

4.13.5 *Spouse-election dom end date*

IHT deemed-domicile is advantageous from the point of view of allowing the unrestricted IHT spouse exemption; but of course it has the drawback that IHT may become due on the death of W (the electing spouse) and on gifts made by her. How much that matters depends of course on the facts of the case. It may be a serious drawback; it may not. The point of the election is to allow the electing spouse to weigh the advantages and disadvantages.

Section 267ZB(9) IHTA provides:

A lifetime or death election cannot be revoked.

There is one escape from spouse election domicile: non-residence. Section 267ZB(10) IHTA provides:

If a person who made an election under section 267ZA(1) [W, the donee] is not resident in the UK for the purposes of income tax for a period of four successive tax years beginning at any time after the election is made, the election ceases to have effect at the end of that period.

So the spouse-election domicile end date is 5<sup>th</sup> April in the 4<sup>th</sup> non-resident year; four years non-residence effectively breaks the connection with the UK, and IHT liability then ceases for foreign situate assets.<sup>37</sup>

The IHT Manual provides:

**IHTM13049: election by non-UK domiciled spouse or civil partner: election ceasing to have effect [Jan 2020]**

...This approach is in line with the position where a taxpayer is deemed

---

<sup>37</sup> Assuming W is not then deemed IHT domiciled under s.267 IHTA, or actually UK domiciled.

domiciled in the UK under IHTA84/S267(1)(b). To shake off that deemed domicile, they need to be resident outside the UK for four years.

In fact the rules are not aligned. The spouse exemption domicile end date is 5<sup>th</sup> April in the 4<sup>th</sup> *successive* tax year of non-residence; under the 3 year rule, the deemed domicile end date is at the end of the 4<sup>th</sup> year of non-residence. The requirement to lose s.267 deemed IHT domicile under the 15-year rule is to be non-resident for 4 tax years, but the non-resident years need not be successive and the deemed domicile end date is the start of the fourth year of non-residence.<sup>38</sup>

#### 4.13.6 *Time limit for election*

There is no express time limit for a lifetime election. However since the election can only take effect within the 7-year period up to the election, there is an effective time limit of 7 years from the death of H (the deceased donor spouse).<sup>39</sup>

Section 267ZB(6) IHTA provides:

A death election [by W's PRs] may only be made within 2 years of the death of the deceased [H]<sup>40</sup> or such longer period as an officer of Revenue and Customs may in the particular case allow.

#### 4.13.7 *Spouse exemption: EU-law*

CIOT say:

##### **3 Non-compliance with EU law**

3.1 The proposed changes do not appear to us to be compliant with EU law. ...

3.2 Although, from an EU perspective, the availability of an election, which allows a non-domiciled spouse to elect to be UK-domiciled for IHT purposes, appears to level the playing field, this is a disproportionate response to the perceived problem of assets escaping the inheritance tax net because an election will have the effect of bringing all of the non-domiciled spouse's assets within the UK IHT net.

---

38 See 4.8.1 (Domicile end date).

39 See 4.13.1 (Spouse-election condition B).

40 I think "the deceased" refers back to s.267ZA(4) so it refers to H, not to W (though W has also died).

3.3 The European Court has held that discrimination cannot be countered by the availability of an election to be treated in particular way if the making of the election, while alleviating the specific issue causing the discrimination, puts the taxpayer in a worse position in some other respect.<sup>41</sup>

3.4 In our view a more proportionate response to the discrimination faced by non-domiciled spouses would be to provide for an election which, if made, would apply only to the assets being transferred, that is there would be no inheritance tax on the transfer of value to the spouse, but that the assets would then be caught by UK inheritance tax on a subsequent transfer of value by the non-domiciled spouse regardless of where they are situated.<sup>42</sup>

HMRC did not respond, at least publically, and CIOT followed this up with a complaint to the EC. The EC decided not to pursue the matter, though an individual might still do so.<sup>43</sup>

#### 4.13.8 Planning

The IHT Manual provides some IHT planning advice:

**IHTM13047 election by non-UK domiciled spouse or civil partner: consequences of making an election [Jan 2020]**

When an election is made, the person making the election will be treated

---

41 CIOT refer to *Gielen*: see 102.18 (Option to be treated as resident).

42 CIOT, “IHT Spouses and Civil Partners domiciled outside the UK” (February 2013) <https://www.kessler.co.uk/wp-content/uploads/2018/12/130204-IHT-and-NDS-CIOT-comments.pdf>

43 The EC contented themselves with action against Germany. The EC say: “The European Commission asked Germany today to bring its inheritance tax rules on special maintenance allowances in line with EU law. German legislation allows German tax authorities to grant a special maintenance allowance to surviving spouses or registered partners of a deceased individual only if either one or both of them are tax residents in Germany. The allowance is not available to surviving spouses or registered partners when they inherit an estate or an investment that is located in Germany but the deceased and the heir are tax resident in another Member State. The Commission considers this to be an unjustified restriction on the free movement of capital (Article 63 (1) of TFEU) as the value of the inheritance is reduced in cases where these tax residence criteria are not fulfilled. Moreover, it may deter other EU nationals from investing their capital in German properties and investments.” See Case No 2012-2158; [http://europa.eu/rapid/press-release\\_MEMO-15-6006\\_en.htm](http://europa.eu/rapid/press-release_MEMO-15-6006_en.htm)

as domiciled in the UK for all IHT purposes from the date stated in the election. Consequently, any transfers between spouses or civil partners made after that date qualify for full spouse or civil partner exemption. Whether to make an election and the date it takes effect from will require careful consideration as it could mean that a transfer that did not give rise to a charge at the time it was made, proves to be chargeable.

**Example** (David and Birgit) (“H” and “W”)

H, who is domiciled in the UK transfers property worth £1m in 2014 to his spouse, W who is not domiciled in the UK.

Subsequently, in 2016, W transfers some German shares to the trustees of an offshore<sup>44</sup> trust.

H dies in 2019.

The HMRC analysis is as follows:

At the time of H’s transfer, the value transferred is exempt to the extent of £325,000 and a PET to the extent of £675,000. Following his death, the failed PET is chargeable and after deducting the nil-rate band, £350,000 is subject to tax.<sup>45</sup>

W’s transfer was a transfer of excluded property, IHTA84/S6(1). Following H’s death, W has the choice of electing to be treated as domiciled in the UK. If she does so, the gift from H in 2014 will become fully exempt as a transfer where both spouses are domiciled in the UK. However, W will then be treated as domiciled in the UK from 2014 for all IHT purposes. This means that her transfer to the trustees is no longer one of excluded property and will be subject to IHT. As a transfer to a trust, it will be immediately chargeable to tax.

W will need to consider all the consequences of making an election...

W (or her advisers) will indeed have much to consider. Firstly, if she elects and falls within the scope of IHT, what will be the IHT on her death? Is she, or will she become non-resident for 4 years, so as to lose IHT spouse-election domicile? Will the current law be held to be invalid under EU law and does she have to take the point now, or can she make the election and take it later?

---

44 Author’s footnote: The residence of the trust is not relevant to the example.

45 Author’s footnote: It is assumed that H has not made earlier gifts which would reduce the IHT spouse exemption. Some taper relief is available as H survived 5 years from the date of the gift.

The example assumes that W did not have to consider the position until the death of H in 2019. But if she is non-resident, she should consider the issue in 2014 when the gift was made. If she had made an election then, and was non-resident, her spouse-election domicile would expire in 2018; by waiting until 2019, she extends the period during which she is at risk of IHT on her death.

In fact, if W is non-resident, she should consider the position before H makes the gift. If W had made the spouse election in 2013, then the gift made in 2016 would be exempt, and spouse-election domicile would expire in 2017. Even if W is in good health, insurance against the risk of death would be cheaper if the election is made sooner rather than later.

#### 4.13.9 *Procedure for making election*

Section 267ZB(2) IHTA provides:

A lifetime or death election is to be made by notice in writing to HMRC.

There is no prescribed form. The IHT Manual provides:

**IHTM13043: election by non-UK domiciled spouse or civil partner: how to make an election [Jan 2020]**

An election must be made by notice in writing and sent to HMRC. It must be made by the person who is not domiciled in the UK. There is no prescribed form of election, but for HMRC to keep meaningful records it must contain:

- the full name and address of the person making the election, or for whom the personal representatives are making an election,
- their date of birth and, if appropriate, their date of death,
- the full name of their spouse or civil partner who is domiciled in the UK, and
- the date the election is to take effect from.

If you receive an election that does not contain all of the information we need you should write to the sender, using standard letter SL16, to ask for the missing information. The election should be sent to:

WMBC Assets Risk Team (Elections), Inheritance Tax, HM Revenue and Customs, BX9 1HT.

#### 4.13.10 *IHT payment/return dates*

A retrospective election could mean that gifts made by the electing spouse become retrospectively chargeable. This requires some tinkering with the

rules relating to time limits and interest. Section 267ZB IHTA provides:

- (7) Subsection (8) applies if—
  - (a) a lifetime or death election is made,
  - (b) a disposition is made, or another event occurs, during the period beginning with the time when the election is treated by virtue of subsection (3) as having taken effect and ending at the time when the election is made, and
  - (c) the effect of the election being treated as having taken effect at that time is that the disposition or event gives rise to a transfer of value.
- (8) This Act applies with the following modifications in relation to the transfer of value—
  - (a) subsections (1) and (6)(c) of section 216 [date for payment of IHT]<sup>46</sup> have effect as if the period specified in subsection (6)(c) of that section were the period of 12 months from the end of the month in which the election is made, and
  - (b) sections 226 and 233 [interest on unpaid tax] have effect as if the transfer were made at the time when the election is made.

#### 4.13.11 *Informing PRs of election*

The IHT Manual provides:

**IHTM13045: election by non-UK domiciled spouse or civil partner: disclosure about elections [Jan 2020]**

If a person who has made an election has died, it is possible that their personal representatives may want to know whether or not a lifetime election had been made. This is because it could have a significant impact on the tax liability that arises following their death. If they cannot trace any information amongst the deceased's papers, they may phone the Helpline to find out if we have any record of an election.

You may not disclose any information about the existence of an election over the phone. Instead, you should ask the executors to make their request in writing and provide evidence that they are the people entitled to apply for a grant of representation.

If the executors can demonstrate that they are appointed by sending us a copy of the Will, you can disclose whether or not the person has made an election and the date that the election took effect. You can also

---

<sup>46</sup> See 119.5 (Reporting: Standard estate).

disclose this information to administrators, provided they can demonstrate that they are applying for letters of administration, or that they are entitled to apply. You should refer any case of doubt to Technical.

#### 4.13.12 *Critique*

I wonder if this was fully worked out at the time when the legislation was enacted. Probably not. One's confidence is slightly dented by s.267ZA(8) IHTA which provides:

In determining for the purposes of this section whether a person making an election under this section is or was domiciled in the UK, section 267 is to be ignored.

This is otiose as the domicile of the person making the election (in my terminology, W, the electing person) is not relevant. The provision made sense under the original Finance Bill clauses, but lost its purpose when the provisions were amended at committee stage.

#### 4.14 Channel Islands/IoM Domicile

The law discussed in this section is of historical interest only, but there are important territorial policy issues here which continue to resound.

Section 45(1)(c) FA 1975 formerly provided a person was deemed domiciled for IHT purposes if:

- [i] he has, since 10th December 1974, become and has remained domiciled in the Islands<sup>47</sup> and,*
- [ii] immediately before becoming domiciled there, he was domiciled in the UK.*

This was unlike other types of deemed domicile in that it would continue without limit of time.

The rule was repealed by s.12 F(no.2)A 1983:

- (1) Section 45(1)(c) of the FA 1975 (which treats certain persons who have become domiciled in the Channel Islands or in the Isle of Man as domiciled in the UK) shall cease to have effect.

---

47 Section 45(3) FA 1975 provided: "In this section "the Islands" means the Channel Islands and the Isle of Man."

(2) This section has effect in relation to transfers of value made, and other events occurring, on or after 15th March 1983.

The repeal extends to the taxation (from 1983) of a settlement made by an Islander who was deemed domiciled under the former s.45(1)(c): the former deemed domicile of the settlor is now disregarded so the trust property may now be excluded property.

John Moore (then Economic Secretary to the Treasury) explained the reason for the repeal:

The original justification for the [deemed domicile] rule applying to emigrants to the offshore islands was that they were thought to provide particularly convenient bases for those who wished to maintain some contact with the mainland. Moreover, at the time when the rule was introduced the islands were within the exchange control area. It was thus easier to shift property there than elsewhere abroad. The rule has been strongly resented in the islands as being discriminatory. The removal of exchange control restrictions has deprived one of the main arguments in support of the special rule of its force.<sup>48</sup>

Although not mentioned, I wonder if enforceability issues also affected the decision. EU-law compliance was probably not given consideration in 1983, but that may now also be an issue.

#### **4.15 International comparisons**

Short summary descriptions of foreign tax laws are bound to mislead. Nevertheless the following quote is of interest as it illustrates how foreign jurisdictions have, unsurprisingly, also struggled with the policy issues underlying deemed domicile rules:

Last year, Japanese inheritance tax rules were amended such that, where a foreign national had lived in Japan for 10 years (in the aggregate) out of the last 15, died outside of Japan, the foreigner national's heirs would be subject to Japanese inheritance tax on such foreign national's assets located both in Japan and elsewhere (a similar rule also applies for gift tax purposes).

The above rule resulted in a situation where the heirs of a foreign

---

48 Hansard HC Deb 14 July 1983 vol 45 cc1055-9,  
<http://hansard.millbanksystems.com/commons/1983/jul/14/domicile>

national who had left Japan would potentially be subject to Japanese inheritance tax on the foreign national's worldwide assets for up to five years after such foreign national had left Japan. The fact that Japanese inheritance tax could "follow" a foreign national for up to five years after such person had left Japan caused great concern among Japan's expatriate community, and threatened to derail the Japanese government's efforts at attracting successful foreign talent to live and work in Japan.

In this year's tax reform, the Japanese government indicates that it will abolish the above rule applying to foreign nationals, subject to a certain anti-avoidance countermeasures in the context of gift tax... This change to the inheritance tax provisions should aid Japan in its efforts to show Japan to be an attractive location for successful foreign executives to reside long term.<sup>49</sup>

49 <http://www.bakermckenzie.com/en/insight/publications/2017/12/japan-2018-tax-reform-proposal>

CHAPTER FIVE

RESIDENCE OF INDIVIDUALS

5.1

Cross references

The following topics are considered elsewhere:  
App 8.1 (Parliamentarians)

5.1 Concepts of residence

This main topic of this chapter is the definition of residence of individuals for UK tax. This is known as the statutory residence test (“SRT”).<sup>1</sup>

I also discuss the definition of Scottish/Welsh taxpayers.

It aids clarity of thought to distinguish between:

- (1) A person’s *residence for tax purposes*, which is a status, and requires a nexus between a person and a territory; and
- (2) A person’s residence in the sense of *home* or *dwelling*, which is an item of property, and requires a nexus between a person and that property<sup>2</sup>

I use the terms *tax-residence* (or territory-residence) and *private residence* (or dwelling/residential property). Both terms should be seen in the context of a cluster of synonyms and related concepts:

Concepts of territory-residence:

<b>Concept</b>	<b>Relevant for</b>	<b>See para</b>
Tax-residence (SRT)	Most taxes	<i>See this chapter</i>
Treaty-residence	DTAs	8.1
Jurisdiction-residence	Situs/private international law	97.12.1

---

1 This is the statutory term. Para 1(2) sch 45 FA 2013 provides: The rules are referred to collectively as “the statutory residence test”.

2 Though of course there is some overlap, as the location of a private residence may be relevant to territory-residence.

Domicile-residence	Domicile	3.6
Ordinary residence	NICs and others	5.39
Habitual residence	International law	43.12.6
Habitual abode in state	Treaty-residence	8.14
Usual place of abode outside UK	Withholding tax	25.10
Usual place of residence in country	VAT	25.21.5
Normally lives/lived in country	Employment-related loan	81.5.1
Permanent home in state	Double Tax Treaties	8.12
Place to live in UK	Accommodation tie	5.28.1
Place of residence in UK	Scottish/Welsh taxpayer	5.45.5
SDLT surcharge residence	SDLT	93.43
Residence for MLR	Trust registration	122.3.3

### Concepts similar to private residence:

<i>Concept</i>	<i>Relevant for</i>	<i>See para</i>
[Private] residence	CGT private residence relief	55.2
Dwelling/Residential property	CGT/SDLT/ATED/IHT	App 2.19
Accommodation	Accommodation tie/benefits in kind	5.28.1; 79.8
Home	Many purposes	5.20

Tax law is not economical with its concepts or with its terminology; but such is the patchwork nature of taxation.

Generally a person is tax-resident (or not) for all tax purposes, but occasionally a person may be tax-resident for some purpose but not for others.<sup>3</sup>

The question may also arise which of two competing territories is the chief territory-residence; and which of two competing private residences is the main private residence.<sup>4</sup>

## 5.2 History and guidance

From 2013-2019, HMRC guidance was in RDR3, described as a booklet but more like a book in its length and detail. This was withdrawn in 2019 and the guidance was moved to the RDRM.<sup>5</sup>

3 See 53.4.4 (“UK resident for a tax year”).

4 See 3.11.3 (Which is chief residence); 55.7 (Which is main residence).

5 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/841051/Agent\\_update\\_issue\\_74.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/841051/Agent_update_issue_74.pdf) (2019). The reason for the change was not given. Perhaps the RDR Manual has a lower status so that HMRC are less likely to be bound by its contents? I have not identified any changes in the

For completeness there are also:

- (1) RDR3<sup>6</sup> (post-2019 version): this is now short, entry-level guidance.
- (2) A general guide (RDR1)<sup>7</sup> covering residence and domicile and their tax implications. In any attempt to address these vast topics in 88 pages, oversimplification and omission is inevitable. RDR1 is entry-level guidance, aimed at the nonprofessional reader, and practitioners will not usually benefit from it.<sup>8</sup>
- (2) An online Tax Residence Indicator.<sup>9</sup> I suspect that this is also aimed at the nonprofessional user and practitioners will not usually find it useful.

The development of the SRT can be traced through 3 HMRC papers:

- (1) Consultation paper<sup>10</sup>
- (2) Response to consultation<sup>11</sup>
- (3) A further response paper<sup>12</sup>

---

guidance.

- 7 HMRC “Guidance Note: Residence, Domicile and the Remittance Basis”

<https://www.gov.uk/government/publications/residence-domicile-and-remittance-basis-rules-uk-tax-liability>

- 8 Gordon gave this a poor review in *Taxation Magazine*, 24 October 2013, p.5: “The new RDR1 goes so far out of its way to avoid making any promises that a taxpayer could rely on, that it puts caveats on propositions that are actually provided for by the statute. ... RDR1 will be an inadequate guide for anyone wishing to determine their residence status, whereas anyone who does rely on it will risk being misled.”

[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/consult\\_responses\\_statutory\\_definitions\\_of\\_tax\\_residence\\_reform\\_of\\_ordinary\\_residence\\_responses.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/consult_responses_statutory_definitions_of_tax_residence_reform_of_ordinary_residence_responses.pdf)

These are now of historical interest only.

### 5.3 Scope of SRT

Para 1 sch 45 FA 2013 provides:

(1) This Part of this Schedule sets out the rules for determining for the purposes of relevant tax whether individuals are resident or not resident in the UK....

(4) “Relevant tax” means-

- (a) income tax,
- (b) capital gains tax, and
- (c) (so far as the residence status of individuals is relevant to them) inheritance tax and corporation tax.

In para (c), the words in brackets are not strictly needed, but they recognise the fact that (unlike IT/CGT) the role of residence is less important to IHT/CT. However, there are circumstances where the residence status of an individual is relevant to IHT; the most important is deemed domicile. But are there any circumstances where the residence status of an individual is relevant to CT? I cannot think of any.

The SRT does not apply for VAT<sup>13</sup> or NIC<sup>14</sup>.

Para 1(3) sch 45 FA 2013 provides:

The rules do not apply in determining for the purposes of relevant tax whether individuals are resident or not resident in England, Wales, Scotland or Northern Ireland specifically (rather than in the UK as a whole).

But it is a very rare case where that matters.

The SRT does not apply in determining whether a person is resident in a foreign state, but that does not often matter for UK tax.<sup>15</sup>

13 For residence for VAT purposes, see 25.21.5 (Usual place of residence).

14 See 43.12 (Residence and ordinary residence).

15 Cases where residence in a foreign state is relevant for UK tax include:

<b>Topic</b>	<b>Definition of residence</b>	<b>See para</b>
DTA	Treaty-residence	8.3
Private residence relief	Mix of OECD Model/SRT	55.4
CI/IOI resident personal allowance	No definition	41.7.3
Offshore Receipts for IP	Based on OECD Model	31.8.1
Hybrid entities	Foreign tax/general sense	87.24.2

In cases where the SRT does not apply, the common law residence test still applies,<sup>16</sup> but I expect that the SRT will be influential. That would be sensible since the SRT “broadly recreates the outcome” of the pre-2013 residence rules”.<sup>17</sup> The fewer residence tests we have the better.

Para 2(1) sch 45 FA 2013 dots *I*'s and crosses *T*'s:

In enactments relating to relevant tax, a reference to being resident (or not resident) in the UK is, in the case of individuals, a reference to being resident (or not resident) in the UK in accordance with the statutory residence test.

### 5.3.1 SRT: Application to trustees/PRs

The SRT only applies to individuals: there are distinct definitions of residence for trustees, PRs, and companies.

Para 145 sch 45 FA 2013 provides a non-standard definition of individual:

In this Schedule ... “individual” means an individual acting in any capacity (including as trustee or personal representative);

Para 2(2) sch 45 FA 2013 makes a similar point; it needs to be read with para 2(1) to follow the sense:

(1) In enactments relating to relevant tax, a reference to being resident (or not resident) in the UK is, in the case of individuals, a reference to

---

<sup>16</sup> See chapter 3 of the 2012/13 edition of this work. The pre-2013 law was hopelessly uncertain, and following changes of HMRC practice leading up to *Gaines Cooper*, it generated more litigation than any other topic. So cases on pre-2013 residence continue to roll in.

Residence needs to be reviewed in the light of: *Yates v HMRC* [2012] UKFTT 568 (TC); *Rumbelow v HMRC* [2013] UKFTT 637; *Daniel v HMRC* [2014] UKFTT 173; *Healey v HMRC* [2014] UKFTT 889 (TC); *Glyn v HMRC* [2015] UKUT 551 (TCC) and [2018] TC 06452; *Peck v HMRC* [2017] UKFTT 770 (TC); *Charman v HMRC* [2018] UKFTT 765. *Hargreaves v HMRC* [2019] UKFTT 244 (TC) considers carelessness, established practice, and assessment time limits in the context of residence.

Australia follows pre-2013 UK residence case law, and also generates much litigation: *Dempsey v CT* [2014] AATA 335; *Shord v CT* [2015] AATA 355; Board of Taxation, *Review of the IT Residency Rules for Individuals* (2017) para 1.48

<https://cdn.tspace.gov.au/uploads/sites/70/2018/07/T307956-income-tax-res-rules.pdf>

<sup>17</sup> See 5.40 (SRT/pre-2013 law compared).

being resident (or not resident) in the UK in accordance with the statutory residence test.

(2) Sub-paragraph (1) applies even if the reference relates to the tax liability of an actual or deemed person who is not an individual (for example, where the liability of another person depends on the residence status of an individual).

I think the point is that where an individual is trustee or PR, the residence of the PRs or trustees depends (at least in part) on the residence of the individual in their private capacity; and for that purpose the SRT applies.

## 5.4 Outline of SRT

Sch 45 FA 2013 provides:

- 3 An individual (“P”)<sup>18</sup> is resident in the UK for a tax year (“year X”) if—
- (a) the automatic residence test is met for that year, or
  - (b) the sufficient ties test is met for that year.
- 4 If neither of those tests is met for that year, P is not resident in the UK for that year.

This suggests a two-stage test, but it is better to regard the SRT as having three stages:

**1. Automatic overseas tests:** First are 5 overseas tests; if one of these tests are met the individual is not UK resident:

<b>No.</b>	<b>Requirement in outline</b>	<b>See para</b>
1	Less than 16 UK days	5.6
2	3 years non-residence and less than 46 UK days	5.7
3	Overseas work	5.8
4	Death in year; 2 years non-residence & less than 46 UK days	5.32.2
5	Death in year; overseas work	5.32.3

**2. “Automatic” UK tests:** Subject to that, there are four UK tests, if one these tests are met the individual is UK resident:

<b>No.</b>	<b>Requirement in outline</b>	<b>See para</b>
1	183 UK days	5.10
2	UK home	5.11
3	UK work	5.13
4	Death in year; UK home	5.32.4

---

<sup>18</sup> “P” stands for “person”.

**3. Sufficient ties test:** Then comes the sufficient ties test, with 4 or 5 connecting ties. If the individual has sufficient UK ties (the number depending on the number of UK days) the individual is UK resident, and otherwise, not UK resident. The possible ties are:

<b>Tie</b>	<b>See para</b>
Family tie	5.27
Accommodation tie	5.28
Work tie	5.29
90-day tie	5.30
Country tie	5.31

## **5.5 Automatic overseas tests**

Sch 45 FA 2013 first sets out the “automatic” UK tests in paras 6-10, and then the automatic overseas tests in paras 12-16. I consider the overseas tests first as if they apply, they have priority over the UK test. An overseas test trumps an “automatic” UK test and leads to a conclusion of non-residence.

Para 11 sch 45 FA 2013 provides:

There are 5 automatic overseas tests.

I refer to these as “**overseas tests 1-5**”.

## **5.6 Overseas test 1: < 16 UK days**

Para 12 sch 45 FA 2013 provides:

The first automatic overseas test is that–

- (a) P was resident in the UK for one or more of the 3 tax years preceding year X,
- (b) the number of days in year X that P spends in the UK is less than 16, and
- (c) P does not die in year X.

If condition (a) is not met (ie P was non resident for the 3 preceding years) then one moves on to the (more generous) overseas test 2.

If condition (c) is not met (ie P dies in year X) then one moves on to overseas tests 4 and 5.

## **5.7 Overseas test 2: 3 years non-resident**

Para 13 sch 45 FA 2013 provides:

The second automatic overseas test is that—

- (a) P was resident in the UK for none of the 3 tax years preceding year X, and
- (b) the number of days that P spends in the UK in year X is less than 46.

This applies even if P dies in the year.

### 5.7.1 *Newborn child*

A child born on or after 20 February (21 February in a leap year) is non-UK resident for that year! They will not have been resident in any previous year and will not spend 46 days or more in the UK in that year.

The same can apply to a child born after that date, if they spend some days out of the UK.

Or does one count days spent *in utero*?

## 5.8 Overseas test 3: Overseas work

### 5.8.1 *Introduction & terminology*

This test is complicated. Para 14(1) sch 45 FA 2013 provides:

The third automatic overseas test is that—

A set of 4 conditions then follow: I refer to “**overseas work conditions (a) to (d)**”.

- (a) P works sufficient hours overseas, as assessed over year X,
- (b) during year X, there are no significant breaks from overseas work,
- (c) the number of days in year X on which P does more than 3 hours’ work in the UK is less than 31, and
- (d) the number of days in year X falling within sub-paragraph (2) is less than 91.

I refer to days within (c) as “**UK workdays**” and days within (d) as “**UK days**”.

For a comparison with UK test 3 (UK work) see 5.13.8 (UK/foreign work tests compared).

### 5.8.2 (a): *Sufficient hours overseas*

Para 14(1) sch 45 FA 2013 requires:

- (a) P works sufficient hours overseas, as assessed over year X.

This takes us to para 14(3) sch 45 FA 2013, which provides:

Take the following steps to work out whether P works “sufficient hours overseas” as assessed over year X—

*Step 1 [disregard UK workdays]*

Identify any days in year X on which P does more than 3 hours’ work in the UK, including ones on which P also does work overseas on the same day.

The days so identified are referred to as “disregarded days”.

It may be more helpful to use the term “**disregarded UK workdays**”.

*Step 2 [net overseas hours]*

Add up (for all employments held and trades carried on by P)

[a] the total number of hours that P works overseas in year X, but

[b] ignoring any hours that P works overseas on disregarded days [UK workdays].

The result is referred to as P’s “net overseas hours”.

*Step 3 [reference-period days]*

Subtract from 365 (or 366 if year X includes 29 February)—

(a) the total number of disregarded days [UK workdays], and

(b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.<sup>19</sup>

The result is referred to as the “reference period”.

Armed with the figures from steps 2 and 3, we proceed to the computation. This is set out in the remaining two steps:

*Step 4 [reference-period weeks]*

Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.

Division by 7 (rounded down) yields the number of full weeks in the reference period. If there are no disregarded days or other deductions, then the computation is  $365 \text{ (or } 366) \div 7 = 52 \text{ (rounded down)}$ .

---

<sup>19</sup> See 5.23 (Reference period: non-work days).

One might question whether rounding is appropriate at this preliminary stage; though in this case rounding down slightly helps the taxpayer. It does not matter much.

*Step 5 [compute net overseas hours ÷ no. of reference-period weeks]*

Divide P's net overseas hours by the number resulting from step 4.

If the answer is 35 or more, P is considered to work "sufficient hours overseas" as assessed over year X.

The computation set out in steps 4 and 5 might have been more clearly expressed algebraically; but the drafter of the SRT was somewhat algebra-phobic.

The RDRM provides two examples:

**RDRM11180: Annual and parenting leave** [Aug 2019]

Example (Anne)

A is working overseas, and has had a period of maternity leave, she is considering her UK residence status. She finds she needs to consider whether she has worked sufficient hours overseas in the tax year, to be treated as working full-time overseas for the purposes of the third automatic overseas test.

*Step 1:* A has no disregarded days [UK workdays]

*Step 2:* A has no sickness absences or gaps between employments. Her normal pattern of employment is for 7 hours 40 minutes, Monday to Friday. During the year she:

- worked as normal between 6 April and 2 June
- started her maternity leave on 3 June, returning to work after 26 weeks, on 2 December
- worked from 2 December to 20 December
- took annual leave across the Christmas period from Monday, 23 December through to Wednesday 1 January, returning to work on 2 January
- worked as usual through from 2 January to 5 April; taking 5 days leave from Monday 3 February to Friday 7 February, and another 3 days leave from Thursday 13 March to Monday 17 March (dates are inclusive).

A calculates her net overseas hours (Step 2)

between 6 April and 2 June, she worked on 38 days, (there were 2 bank holidays in this period)

- between 2 December and 20 December she worked on 15 days
- between 2 January and 5 April she worked on 59 days

- total days worked =  $38 + 15 + 59 = 112$
- on each day she worked for 7 hours 40 minutes, therefore her total net overseas hours =  $112 \times 7 \text{ hours } 40 \text{ minutes} = 858 \text{ hours and } 40 \text{ minutes}$

*Step 3:* To calculate her reference period A starts with 365 days and subtracts:

- maternity leave, including embedded weekends from Monday 3 June, to Friday 29 November = 180 days, (30 November and 1 December do not meet the rules about embedded non-working days)
- annual leave on 23, 24, 27, 30 and 31 January, 3-7 February and 13, 14 and 17 March = 13 days

As 25 and 26 December and 1 January and all the weekend dates are non-working days that do not meet the rules about embedded non-working days, A makes no adjustment for them.

A calculates her reference period:

$$= 365 - 180 - 13 = 172 \text{ days}$$

*Step 4:* Divide number from Step 3 by 7 =  $172/7 = 25.47$  (rounded down to 25)

*Step 5:* Divide net overseas hours by result from Step 4 =  $858 \text{ hours and } 40 \text{ minutes} / 24 = 35.78$

A meets the sufficient hours test. She will need to consider whether she meets all other parts of the third automatic overseas test, in particular that the number of days spent in the UK was less than 91.

### **RDRM11160: Gaps between employments [Aug 2019]**

Example 2 (MayLing)

ML is considering whether she meets the third automatic overseas test in respect of her work in Italy in the previous tax year. She worked for her first employer there for an average of 8 hours a day, 5 days per week, between 6 April and 23 August (20 weeks). During that period she took 9 days annual leave, (there were no embedded non-working days); consequently ML had worked for 18 full weeks and only 1 day in another week. She ceased that employment and took a break of 30 days to tour round Italy.

She then took up a new employment, again in Italy, between 23 September and 5 April (27 weeks and 6 days - amounting to 28 working weeks). During that period she worked for 9 hours and 30 minutes from Monday to Thursday, and for 4 hours on a Friday. She took:

- 5 days of annual leave; for 3 weeks she only worked 3 long days and a short day, and for 1 week she worked 2 long days and a short day, thereby reducing her number of full working weeks by 5 weeks

- 10 days of annual leave, with 2 embedded non-working days, (the Saturday and Sunday in the middle of this 2 week period), reducing her number of full working days by 2
- 5 days continuous sick leave, (with no embedded non-working days), reducing her number of full working weeks by 1

She therefore worked for only 20 full working weeks in this part of the year. ML spends no time in the UK in the tax year.

*Step 1*

ML has no disregarded days

*Step 2* Net overseas hours

Employer 1: 18 weeks and 1 day at (5 days × 8 hours) = 728 hours

Employer 2: 20 weeks at (4 days × 9.5 hours) + 4 hours) = 840 hours

3 weeks at (3 days × 9.5 hours) + 4 hours) = 97.5 hours

1 week at (2 days × 9.5 hours) + 4 hours) = 23 hours

Total net overseas hours: = 728 + 840 + 867.5 + 23 = 1688.5 hours

*Step 3* Reference period:

subtract from 365 days

disregarded days 0 days

Other days that can be deducted:

9 days leave Employer 1

15 days leave Employer 2

2 embedded days

5 days sick = 9 + 15 + 2 + 5 = 31 days

Gaps between employments 15 days (total gap 30 days but the amount deducted is limited to 15 days)

Reference period is: 365-31-15 = 319 days

*Step 4*

Divide reference period by 7: = 319/7 = 45.57 (rounded down to 45)

*Step 5*

Divide net overseas hours by figure at Step 4

= 1688.5/45 = 37.52

ML meets the sufficient hours test. She will need to consider whether she meets all other parts of the third automatic test.

### 5.8.3 Sufficient hours: Planning

Peter Ashby has done the maths:

The good news here is that you exclude from the days that qualify sick days and paternity or maternity leave. You also exclude holidays – which is fair enough as you don't work any hours then. But you do not exclude weekends (or more correctly non-working days because these include

public holidays – and for shift workers it may not be the weekend that is a non-working day) unless they are ‘embedded’ in a holiday. So one week of holiday excludes five days and a two-week holiday means 12 days are excluded – unless you start your holiday midweek because you need at least three days before and after the weekend to qualify that weekend. As you divide the denominator by seven to calculate a weekly amount, you do lose out by including these ‘non-qualifying embedded days’. The answer of course is to work longer hours. If you can!

Say I usually work 37 hours per week and take three two-week holidays, the average hours would be:

$$\frac{37 \times (52-6)}{(365 - (3 \times 12)) / 7} = 36.2 \text{ hours}$$

If you work 40 hours a week it will probably make no difference. If you work 36 hours a week you may be borderline and fail. If you work 35 hours a week you will almost certainly not get [sufficient hours overseas] without doing some overtime.

I suppose it does at least encourage a work mentality so [foreign] employers may be happy with this!<sup>20</sup>

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

**Sufficient hours – interaction with significant breaks**

**Question:** Can a non-working period of up to 31 days (i.e. a lesser period than a significant break) preceding or following a period of full-time work can be included as part of that period (assuming that the 35 hours test is met)?

**HMRC Answer:** Provided the FTW test is met over the period by the calculations that are set out, it does not matter if there is a non-working period of up to 31 days at the start or end of the period. An individual would need to work significantly more than 35hrs a week in order to do enjoy periods off from work (which were not annual, sick or parenting leave) and still meet the FTW tests.<sup>21</sup>

5.8.4 (b): *No significant break*

Para 14(1) sch 45 FA 2013 requires:

---

<sup>20</sup> Ashby, “Employees working abroad” [2013] Tax Adviser 38.

<sup>21</sup> 29 January 2014

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/302475/140326\\_Expats\\_Forum\\_Jan\\_14\\_Minutes\\_FINAL.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf)

(b) during year X, there are no significant breaks from overseas work

See 5.24 (“Significant break from work”).

#### 5.8.5(c): *Less than 31 UK workdays*

Para 14(1) sch 45 FA 2013 requires:

(c) the number of days in year X on which P does more than 3 hours’ work in the UK is less than 31

I refer to these days as UK workdays.

#### 5.8.6(d): *Less than 91 UK days*

Para 14(1) sch 45 FA 2013 requires:

(d) the number of days in year X falling within sub-paragraph (2) is less than 91.

(2) A day falls within this sub-paragraph if—

- (a) it is a day spent by P in the UK, but
- (b) it is not a day that is treated under paragraph 23(4) as a day spent by P in the UK.

Para 2(b) excludes the deeming rule (frequent visits) in computing days spent in the UK.<sup>22</sup> Why?

### 5.9 “Automatic” UK tests

Sch 45 FA 2013 provides:

5 The automatic residence test is met for year X if P meets—

- (a) at least one of the automatic UK tests, and
- (b) none of the automatic overseas tests.

6 There are 4 automatic UK tests.

I refer to these as “**UK tests 1-4**”. “Automatic” residence tests is not a particularly apt label for this set of tests; I add scare quotation marks.

### 5.10 UK test 1: 183 UK days

Para 7 sch 45 FA 2013 provides:

---

<sup>22</sup> See 5.19 (Deeming rule (frequent visits)).

The first automatic UK test is that P spends at least 183 days in the UK in year X.

The figure 183 is one day more than half a year.

## **5.11 UK test 2: UK home**

### *5.11.1 Introduction*

This test is complicated. Para 8(1) sch 45 FA 2013 provides:

The second automatic UK test is that—

- (a) P has a home in the UK during all or part of year X,
- (b) that home is one where P spends a sufficient amount of time in year X, and
- (c) there is at least one period of 91 (consecutive) days in respect of which the following conditions are met—
  - (i) the 91-day period in question occurs while P has that home [the UK home],
  - (ii) at least 30 days of that 91-day period fall within year X, and
  - (iii) throughout that 91-day period, condition A or condition B is met or a combination of those conditions is met.

I refer to these 3 paragraphs as “**UK-home limbs (a) to (c)**”.

### *5.11.2 UK home: Limb (a)*

Para 8(1) sch 45 FA 2013 requires:

- (a) P has a home in the UK during all or part of year X

See 5.20 (“Home”).

### *5.11.3 30 days in UK home: Limb (b)*

Para 8(1) sch 45 FA 2013 requires:

- (b) that home [the UK home] is one where P spends a sufficient amount of time in year X

Para 8(4) sch 45 FA 2013 provides:

In relation to a home of P’s in the UK, P “spends a sufficient amount of

time” there in year X if there are at least 30<sup>23</sup> days in year X when P is present there on that day for at least some of the time (no matter how short a time).

The test for limb (b) is the number of days spent in the home *in year X*, not in the Test Window (which is different).

#### 5.11.4 “Present at the home”

Para 8(6)(b) sch 45 FA 2013 provides:

In sub-paragraphs (4) and (5)...

- (b) a reference to P being present at the home is to P being present there at a time when it is a home of P’s (so presence there on any other occasion, for example to look round the property with a view to buying it, is to be disregarded).

Thus “present at the home” means present at a time when the property is a home. It is not necessary to be present at midnight (unlike the days spent test).

#### 5.11.5 *More than one UK home*

Para 8(8) sch 45 FA 2013 provides:

If P has more than one home in the UK—

- (a) each of those homes must be looked at separately to see if the second automatic UK test is met, and
- (b) the second automatic UK test is then met so long as it is met in relation to at least one of those homes.

Time spent at one home is not aggregated with time spent at another home, in assessing limb (b).

The RDRM provides a straightforward example:

**RDRM11360: 30 day presence rule** [Aug 2019]

Example (Fatima)

F has had 4 UK homes for several years, in the tax year under consideration, F is present in her home in Swansea on 15 days, 20 days

<sup>23</sup> Para 8(6)(a) sch 45 FA 2013 explains how to count to 30: “In sub-paragraphs (4) and (5)—

(a) a reference to 30 days is to 30 days in aggregate, whether the days are consecutive or intermittent”.

in her home in Callander, 29 in her London apartment and 29 in her Newcastle apartment.

F has been present on 92 days in total in those UK homes. However, as she was not present in any individual home on at least 30 days, she will not have spent a sufficient amount of time in any single UK home. She will not meet the second automatic UK test for the tax year under consideration.

This example is straightforward: UK-home limb (b) is not met.

At first sight F's peripatetic lifestyle seems somewhat implausible; but perhaps F acted on tax advice on how to avoid the UK home test.

#### 5.11.6 91 day Test Window: Limb (c)

Para 8(1) sch 45 FA 2013 requires:

- (c) there is at least one period of 91<sup>24</sup> (consecutive) days in respect of which the following conditions are met—
- (i) the 91-day period in question occurs while P has that home,
  - (ii) at least 30 days of that 91-day period fall within year X, and
  - (iii) throughout that 91-day period, condition A or condition B is met or a combination of those conditions is met.

It is limb (c) which makes the UK home test complicated.

Limb (c) is in fact a set of requirements, which I call “**conditions (c)(i), (c)(ii), and (c)(iii)A and C(ii)B**”.

I refer to the 91-day (= 13 weeks) period in limb (c) as the “**Test Window**”. As 30 days of the Test Window must fall within a tax year:

- the Test Window must begin no earlier than 61 days before the tax year starts (ie 4 February<sup>25</sup>)
- the Test Window must end no later than 61 days after the tax year ends (ie 5 June)

For any tax year, there are altogether 426 possible Test Windows:

- The first is 4 Feb<sup>26</sup> - 5 May (inclusive) starting in the previous tax year

<sup>24</sup> Para 8(7) sch 45 FA 2013 explains that numbers do not stop at 91: “Sub-paragraph (1)(c) is satisfied so long as there is a period of 91 days in respect of which the conditions described there are met, even if those conditions are in fact met for longer than that.”

<sup>25</sup> 5 February if the February is in a leap year.

<sup>26</sup> 5 February if the February is in a leap year.

- The next is 5 Feb<sup>27</sup> - 6 May (inclusive)
- The list of Test Windows continues from day to day until:
- The last Test Window is 4 Mar-2 June (inclusive) ending in the next tax year

#### 5.11.7 *Overseas home conditions A & B*

Para 8(2) sch 45 FA 2013 provides:

Condition A is that P has no home overseas.

Condition B is that P has a home but does not use it enough. Para 8(3) sch 45 FA 2013 provides:

Condition B is that—

- (a) P has one or more homes overseas, but
- (b) each of those homes is a home where P spends no more than a permitted amount of time in year X.

Para 8(5) sch 45 FA 2013 provides:

In relation to a home of P's overseas, P "spends no more than a permitted amount of time" there in year X if there are fewer than 30 days in year X when P is present there on that day for at least some of the time (no matter how short a time).

The test for Overseas Home Condition B is the number of days spent in the home *in year X*, not in the Test Window (which is different).

The requirement is that throughout the 91-day Test Window, condition A or condition B is met or a combination of those conditions is met. Conditions A and B cannot be met at the same time, but it is possible that first one condition is met, and then the other.

If P has a UK home, P must spend at least 30 days in year X in P's overseas home. However, there is no requirement for P to have the overseas home during the whole of the 91-day Test Window, provided there is at least 1 day in the Test Window when P does have an overseas home.

If P's overseas home ceases to be P's home (eg it is sold) the requirements of UK test 2 will still not be met provided P acquires another overseas home within 90 days of the disposal of the previous home, and

---

<sup>27</sup> 6 February if the February is in a leap year.

P is present in either the old overseas home or the new one for 30 days in year X.

## 5.12 UK test 2: Examples

The RDRM provides some examples of UK test 2 (UK home).

### 5.12.1 *Acquiring UK home*

The first example is straightforward: an individual ceases to have an overseas home and acquires a UK home. The facts (stripping out irrelevancies) are as follows:<sup>28</sup>

#### **Example 1**

S ceases to have an overseas home on 10 January 2014.

S acquires a UK home on 1 February 2014 and remains there for a year.

The HMRC analysis is as follows:

In 2013-14 S has a home in the UK ... and is present in it on at least 30 days.

Thus UK-home limbs (a) and (b) are met.

Also from 1 February 2014 there is a period of 91 consecutive days at least 30 of which fell in 2013-14 (the tax year under consideration) when S has a UK home and no overseas home.

Thus UK-home limb (c) is met. The Test Window is 1 February - 3 May 2014. UK-home limb (c)(iii)A is met.

As S does not meet any of the automatic overseas tests, he is resident under the second automatic UK test for tax year 2013-14.

---

28 The example in full (including its irrelevant detail) is as follows:

#### **RDRM11340: Time spent in the UK home** [Nov 2019]

##### Example 1 (Stan)

S has lived in Australia all his life. In June 2012 he takes a holiday in London and likes it so much he decides to immigrate to the UK. He spends the next few months preparing for the move. He sells his Australian house (his only home), on 10 January 2014, and arrives in the UK on 25 January 2014. He finds a flat in London and moves in on 1 February 2014. The London flat is now his only home and he lives there for a year.

During the 2013-2014 tax year S is present in his Australian home on 250 days, and he is present in his London flat on 55 days.

There are several points to note from this example:

- (1) The Test Window extends well into 2014/15, so S does not know on 6 April 2014 whether he was resident in 2013/14. If he had left, or died, before 3 May 2014, he would not have been UK resident.
- (2) S is UK resident in 2013-14 even though he is present in his overseas home on 250 days, and present in his UK home on only 55 days. But split year relief (Case 8) may apply and DT relief should be available for the period when S was treaty-resident overseas.
- (3) A little planning would avoid UK residence. For instance, if S kept his overseas home until 7 March, rather than selling or letting it on 10 January, he would not be UK resident.

### 5.12.2 *Acquiring overseas home*

The next example is an individual who acquires an overseas home and retains a UK home:

**RDRM11340: Time spent in the UK home** [Nov 2019]

Example 2 (Jane)

J has a home in the UK throughout the tax years 2013-2014 and 2014-2015. She is present in that home on more than 30 days during the 2013-2014 tax year.

Thus UK-home limbs (a) and (b) are met.

J acquires a home overseas on 1 March 2019 and is present there on 30 days in the 2013-2014 tax year.

The HMRC analysis is as follows:

Although there is a period of 91 consecutive days, 30 of which fall in 2013-2014, (the tax year under consideration), when J had both a UK home and an overseas home; there is also a period of at least 91 consecutive days, (6 April 2013 to 28 February 2014), when she had a UK home, (in which she spent sufficient time in 2013-2014), but no overseas home.

The Test Window is 6 April - 28 February 2014. UK-home limb (c)(iii)A is met.

J is therefore resident in the UK for 2013-2014 under the second automatic UK test.

### 5.12.3 *No overseas home*

The next example is an individual who retains a UK home and does not acquire an overseas home:

#### Example 3 (Edith)

E has had a home in Cheshire for many years. It is her only home. E retires towards the end of 2014-2015 tax year, and decides to use her retirement lump sum to see the world.

During the 2015-2016 tax year she takes 3 long holidays, visiting 22 different countries. She moves around and does not establish a home overseas. She keeps her Cheshire home throughout, returning briefly between trips, and is present there on 41 days in the 2015-2016 tax year.

The HMRC analysis is as follows:

In 2015-2016 E has a home in the UK in which she is present on at least 30 days in the tax year.

Thus UK-home limbs (a) and (b) are met.

During the year E has no overseas home.

Thus UK-home limb (c) is met. The Test Window is the whole of 2015/16. UK-home limb (c)(iii)A is met.

E does not meet any of the automatic overseas tests, and therefore she is resident under the second automatic UK test for the 2015-2016 tax year.

This is straightforward.

### 5.12.4 *Losing overseas home*

Next, an example of passing the UK home test by renting out an overseas home.

#### Example 4 (Berni)

At 6 April 2014 B considers whether she meets the second automatic UK test for 2013-2014:

- she bought a home in the UK on 1 January 2013 - it was her only home throughout 2013-2014
- she was present in that home on at least 30 days in the tax year 2013-2014
- she came to the UK on 10 April 2013 and rented out her overseas home, (which she had owned for many years), from 11 April 2014 to

10 March 2014

Therefore, during 2013-2014 there was a period of 91 days, 30 of which fell in the tax year during which B had a home in the UK in which she was present for a sufficient amount of time, and had no overseas home. As B did not meet any of the automatic overseas tests she is resident under the second automatic UK test.

If there is any uncertainty over whether a property constitutes a home RDRM13020 gives further details.

In certain circumstances a home can cease to be a home temporarily, which may have a bearing on whether an individual meets the second automatic UK test.

Thus UK-home limbs (a) and (b) and (c)(iii)A are met.

If B had not let out the overseas home, and had been present there sufficient days, she would not have been resident under the UK home test.

#### 5.12.5 *Acquiring UK home*

The last example might be designed to illustrate the importance of tax planning. The facts (stripping out irrelevancies) are as follows:<sup>29</sup>

##### Example 5 (Rosa)

R is a professional cricketer who lives in New Zealand. She comes to the UK for the summer of 2015 to play for Trinity Bridge Ladies. She rents a house in Dorking for 4 months, commencing on 1 May 2015. She is present in her Dorking home on 100 days in 2015-2016. After the English cricket season ends she returns to New Zealand.

Throughout 2015-2016 R owns a house in New Zealand. She is present in that house on 200 days in 2015-2016.

While she is in the UK, R lets out her New Zealand home on a commercial basis to a third party, from 1 June to 31 August 2015, (92

---

<sup>29</sup> The example including its irrelevant detail in full is as follows:

“R is a professional cricketer who lives in New Zealand. She comes to the UK for the summer of 2015 to play for Trinity Bridge Ladies. She rents a house in Dorking for four months commencing 1 May 2015. She is present in her Dorking home on 100 days in 2015-16. After the English cricket season ends she returns to New Zealand. Throughout 2015-16 R owns a house in New Zealand. She is present in that house on 200 days in 2015-16.

While she is in the UK, R lets out her New Zealand home on a commercial basis to a third party, from 1 June to 31 August 2015 (92 days). For that period the New Zealand house is not R’s home.”

days). For that period the New Zealand house is not R's home.

The HMRC analysis is as follows:

There is a period of 91 consecutive days, at least 30 of which fall in 2015-2016, when R had a UK home where she spends a sufficient amount of time, and when she does not have an overseas home. R meets the second automatic UK test for 2015-2016.

HMRC draw the moral:

If R had not let out her New Zealand house, and it had remained available for R to use throughout the summer; it would have remained her home and R would not have met the second automatic UK test.

It may make no difference whether R is resident or not, once one has allowed for DT relief and that UK source income earned as a sportswoman while in the UK would be subject to UK tax anyway. But the cost of dealing with UK tax affairs may well exceed the rent from the short let of the overseas home.

### 5.13 UK test 3: UK work

#### 5.13.1 *Introduction and terminology*

This test is complicated. Para 9(1) sch 45 FA 2013 provides:

The third automatic UK test is that—

- (a) P works sufficient hours in the UK, as assessed over a period of 365 days,
- (b) during that period, there are no significant breaks from UK work,
- (c) all or part of that period falls within year X,
- (d) more than 75% of the total number of days in the 365-day period on which P does more than 3 hours' work are days on which P does more than 3 hours' work in the UK, and
- (e) at least one day which falls in both that period and year X is a day on which P does more than 3 hours' work in the UK.

I follow the terminology of RDRM and refer to the “**365-day reference period**”. This period must satisfy the five conditions, which I refer to as “**UK-work conditions (a) to (e)**”.

#### 5.13.2 (a): *Sufficient UK hours*

Para 9(1) sch 45 FA 2013 requires:

- (a) P works sufficient hours in the UK, as assessed over a period of 365 days...

This takes us to para 9(2) sch 45 FA 2013 which provides:

Take the following steps to work out, for any given period of 365 days, whether P works “sufficient hours in the UK” as assessed over that period—

*Step 1 [disregarded overseas days]*

Identify any days in the period on which P does more than 3 hours’ work overseas, including ones on which P also does work in the UK on the same day.

The days so identified are referred to as “disregarded days”.

It may be more helpful to use the term “disregarded overseas days”.

*Step 2 [net UK hours]*

Add up (for all employments held and trades carried on by P) the total number of hours that P works in the UK during the period, but ignoring any hours that P works in the UK on disregarded days.

The result is referred to as P’s “net UK hours”.

*Step 3 [reference-period days]*

Subtract from 365—

- (a) the total number of disregarded days, and
- (b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.<sup>30</sup>

The result is referred to as the “reference period”.

*Step 4 [reference-period weeks]*

Divide the reference period by 7.

If the answer is more than 1 and is not a whole number, round down to the nearest whole number.

If the answer is less than 1, round up to 1.

Division by 7 reflects the number of weeks in the reference period.

If there are no disregarded days or other deductions, then the computation is  $365 \div 7 = 52$  (rounded down).

---

<sup>30</sup> See 5.23 (Reference period: non-work days).

One might question whether rounding is appropriate at this preliminary stage; it does not matter much.

*Step 5 [compute net UK hours ÷ no. of reference-period weeks]*

Divide P's net UK hours by the number resulting from step 4.

If the answer is 35 or more, P is considered to work "sufficient hours in the UK" as assessed over the 365-day period in question.

This mirrors the approach of overseas test 3 (overseas work).<sup>31</sup>

The RDRM provides an example:

**RDRM11380: Is the work full-time in the UK** [Aug 2019]

Example (Sam)

S has never been resident in the UK. On 3 March 2014, he starts a 2 year contract to work on a North Sea oil platform in UK waters. S is contracted to work 2 weeks off-shore, working 12 hours a day over 14 days, followed by 2 weeks onshore field break.

Unfortunately, half-way through his shift on 9 April 2104, S has an accident at work and is medically unfit to work up to 30 April 2014. The doctor certifies that he is fit enough to return to work from 1 May 2014. From 10 April to 30 April 2014 (21 days), when S is unfit to work, there is a period of 14 days (14-27 April), which were non-working days, when S was scheduled for his onshore field break.

For the purpose of calculating whether he meets the third automatic UK test, S considers whether he worked sufficient hours in the UK. Usually, his non-working days cannot be deducted from the 365 day period over which his average weekly hours are calculated; as they do not meet the rules about embedded non-working days (see RDRM11190).

However, when calculating whether S works sufficient hours in the UK over a 365 day period, the 14 non-working days between 14 and 27 April 2014 can be subtracted from the 365 day period when calculating the 'reference period' at Step 3 of the calculation.

This is because the 14 non-working days are embedded within a period

- where S was unfit to work, from 10-30 April 2014, and
- there were at least 3 consecutive days of sick leave before the non-working period, and
- there were at least 3 consecutive days of sick leave after the non-working period

For the purpose of this example we look at the 365 day period starting

---

31 See 5.8.2 ((a): Sufficient hours overseas).

on 3 March 2014, the date S started work in the UK.

*Step 1:* there are no disregarded days on which S worked for more than 3 hours overseas

*Step 2:* net UK hours - S worked for 23.5F days (between 3 March and midway through 9 April), then a total of 22 weeks and 5 days between 5 May and 2 March 2015.

Hours worked =  $((22 \times 7) + 23.5) \times 12 = 2190$  hours

*Step 3:* calculate the reference period - subtract from 365 the disregarded days and other days that can be subtracted =  $365 - 21 = 344$

*Step 4:* divide reference period by 7 =  $344/7 = 49.19$ , rounded down to 49

*Step 5:* divide net UK hours by result of Step 4 =  $2190/49 = 44.69$

S works sufficient hours in the UK because he works an average of more than 35 hours per week, calculated over the 365 day period. He would have to consider other aspects of the third automatic UK test to determine his residence status.

### 5.13.3 *Significant break from work*

Para 9(1) sch 45 FA 2013 requires:

(b) during that period, there are no significant breaks from UK work

See 5.24 (“Significant break from work”).

### 5.13.4 *365-day period across tax year*

Para 9(1) sch 45 FA 2013 requires:

(c) all or part of that period falls within year X

### 5.13.5 *75% UK workdays*

Para 9(1) sch 45 FA 2013 requires:

(d) more than 75% of the total number of days in the 365-day period on which P does more than 3 hours’ work are days on which P does more than 3 hours’ work in the UK

I refer to days on which P does more than 3 hours’ work in the UK as “**UK workdays**”.

### 5.13.6 *UK workday in year/365-day period*

Para 9(1) sch 45 FA 2013 requires:

- (e) at least one day which falls in both that period and year X is a day on which P does more than 3 hours' work in the UK.

Para (e) ensures that at least one day of more than 3 hours' work must fall within both year X and the 365-day period. Without it, the test could be satisfied if the 365-day period ended in, for example, May (with no days of working more than 3 hours in the UK in that tax year), but there was a solitary 7 hour UK workday in the following March.

### 5.13.7 HMRC examples

The RDRM provides some examples. The first is straightforward:

**RDRM11370: Third automatic UK test** [Aug 2019]

Example 1 (Henri)

H travels to the UK on 1 July 2013 to start a new job the following day. His posting finished on 1 July 2014, and he leaves the UK on 6 August 2014, 400 days after he arrived.

The reference period is 1 July 2013 - 30 June 2014. UK-work conditions (a) and (b) are satisfied for that period. The period falls within 2012/13 and 2013/14 so condition (c) is satisfied for those years.

Over the 365 day period to 30 June 2014, H calculates that he worked full-time in the UK and has not taken a significant break from his UK work during this period. Part of the period of 365 days fall in the tax year 2013-2014 and part within the tax year 2014-2015.

So UK-work condition (e) is satisfied for 2013/14.

Over the period of 365 days ending 30 June 2014, H works for over 3 hours on 240 days, 196 (80%) of which are days when H worked for more than 3 hours in the UK. At least 1 day when H does more than 3 hours work in the UK falls within tax year 2013-2014; therefore H is resident in the UK under the third automatic UK test for 2013-2014 tax year.

So UK-work condition (e) is satisfied for 2014/15.

The next example is a case where one 365-day reference period does not satisfy the conditions, but another does (resulting in UK residence):

Example 2 (Frank)

F works full-time in Paris for a branch of a multi-national export company. He comes to work in the UK every month for 2 days; on both

days he works for more than 3 hours in the UK. On 1 September 2013 F is seconded to work in the UK for a period of 2 years. F returns to the Paris office and works there for more than 3 hours on 2 days each month. In the period of 365 days ending 5 April 2014 F calculates he worked full-time in the UK, (the days worked overseas are identified and disregarded at Step 1 of the calculation of full-time work overseas). As F worked for more than 3 hours on 2 days each month in the UK prior to September 2013, F did not have a significant break from UK work. In the 365 day period ending 5 April 2014, F worked for more than 3 hours on 240 days. However, only 150 days (62%) were days when F worked for more than 3 hours in the UK. Using that 365 day reference period F would not be resident in the UK under the third automatic UK test for the 2013-2014 tax year.

So it seems that the UK work test is not satisfied. But no:

F needs to check the 75% test against another 365 day period. In the 365 day period ending 31 August 2014, F calculates he worked full-time in the UK. Again days worked overseas are identified and disregarded at Step 1 of the calculation of full-time work overseas. In the 365 day reference period ending 31 August 2014, F worked for more than 3 hours on 230 days; 210 days (91%) were days when F worked for more than 3 hours in the UK. Part of this 365 day period falls within the 2013-2014 tax year and at least 1 day in 2013-2014 is a day on which F worked for more than 3 hours in the UK. Therefore, using the 365 day reference period ending 31 August 2014, F is resident in the UK under the third automatic UK test for 2013-2014.

### 5.13.8 *UK/foreign work tests compared*

To keep in mind the differences between the UK and the overseas full-time work tests, it may be helpful to set them side by side:

#### **Sch 45 para 9: UK work test**

- (1) The third automatic UK test is that—
- (a) P works sufficient hours in the UK, as assessed over a period of 365 days,
- (b) during that period, there are no significant breaks from UK work,

#### **Para 14: Overseas work test**

- (1) The third automatic overseas test is that—
- (a) P works sufficient hours overseas, as assessed over year X,
- (b) during year X, there are no significant breaks from overseas work,

(c) all or part of that period falls within year X,

(d) more than 75% of the total number of days in the 365-day period on which P does more than 3 hours' work are days on which P does more than 3 hours' work in the UK, and

(e) at least one day which falls in both that period and year X is a day on which P does more than 3 hours' work in the UK.

(c) the number of days in year X on which P does more than 3 hours' work in the UK is less than 31, and

(d) the number of days in year X falling within sub-paragraph (2) [UK days] is less than 91.

(2) A day falls within this sub-paragraph if—

- (a) it is a day spent by P in the UK, but
- (b) it is not a day that is treated under paragraph 23(4) as a day spent by P in the UK.

The definitions of sufficient hours are sufficiently close that they can more conveniently be set out in track change format. Para 9(2)/14(3) provide:

~~(3)~~(2) Take the following steps to work out, for any given period of 365 days, whether P works “sufficient hours ~~overseas~~ in the UK” as assessed over ~~year X~~ that period—

*Step 1*

Identify any days in ~~year X~~ the period on which P does more than 3 hours' work ~~in the UK~~ overseas, including ones on which P also does work ~~overseas~~ in the UK on the same day.

The days so identified are referred to as “disregarded days”.

*Step 2*

Add up (for all employments held and trades carried on by P) the total number of hours that P works ~~overseas in year X~~ in the UK during the period, but ignoring any hours that P works ~~overseas~~ in the UK on disregarded days.

The result is referred to as P's “net ~~overseas~~ UK hours”.

*Step 3*

Subtract from 365 (or 366 if year X includes 29 February) —

- (a) the total number of disregarded days, and
- (b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.

The result is referred to as the “reference period”.

*Step 4*

Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.

*Step 5*

Divide P’s net ~~overseas~~ UK hours by the number resulting from step 4. If the answer is 35 or more, P is considered to work “sufficient hours ~~overseas~~ in the UK” as assessed over ~~year X~~ the 365-day period in question.

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

**Sufficient hours - simultaneous FTWUK and FTWO**

*Question:* Because of the way in which working days are disregarded for both the numerator and denominator of the sufficient hours test where the employee has worked for more than three hours in the “wrong” country (e.g. worked for more than three hours in the UK on some days when working all day abroad on most other days) it is possible to be employed full-time simultaneously in both the UK and an overseas work country for a period. This might happen where an individual transitions into a new cross-border role over a short period. This is not an intuitive outcome and will confuse taxpayers. Could there be a rule to prevent it?

*HMRC answer:* Because the FTW tests are mechanical, HMRC agrees it is possible to be simultaneously FTWUK and FTWO. In reality this is likely to happen in a small number of cases and for a very short period of time. The SRT provides a tie-breaker in this scenario, with those meeting automatic overseas tests becoming definitively non resident. The split year cases have also been drafted so there is a priority rule between Case 5 (starting FTWUK) and Case 6 (ceasing FTWO).<sup>32</sup>

## 5.14 Sufficient ties test

---

32 29 January 2014

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/302475/140326\\_Expats\\_Forum\\_Jan\\_14\\_Minutes\\_FINAL.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf)

Para 17(1) sch 45 FA 2013 provides:

The sufficient ties test is met for year X if–

- (a) P meets none of the automatic UK tests and none of the automatic overseas tests, but
- (b) P has sufficient UK ties for that year.

#### 5.14.1 “Sufficient” ties

Para 17(3) sch 45 FA 2013 defines “sufficient”:

Whether P has “sufficient” UK ties for year X will depend on–

- (a) whether P was resident in the UK for any of the previous 3 tax years, and
- (b) the number of days that P spends in the UK in year X.

The sufficient ties test distinguishes between “leavers” and “arrivers”:

#### Category Para Test

Leavers	18	UK resident for 1 or more of the 3 tax years preceding year X
Arrivers	19	UK resident for none of the 3 tax years preceding year X

Para 18/19 sch 45 FA 2013 define “sufficient ties” for leavers/arrivers. It is convenient to combine the two into a single table:

Days spent by P in the UK in year X	sufficient ties	sufficient ties
	<i>leavers</i>	<i>arrivers</i>
More than 15 <sup>33</sup> but not more than 45	At least 4	[non-resident]
More than 45 but not more than 90	At least 3	All 4
More than 90 but not more than 120	At least 2	At least 3
More than 120	At least 1	At least 2

See too 5.36.4 (Recordkeeping: UK ties).

The same result might have been achieved more neatly by counting residence in any of the 3 preceding years as another UK tie. But it comes to the same thing.

The rules reflect a policy principle that residence should be adhesive; that is, it should be harder to lose residency than to acquire it.

## 5.15 Days spent in UK

---

33 The words “More than 15” are otiose since if P spends less than 16 days in the UK automatic overseas test 1 will be satisfied and P will not be UK resident.

“Days spent” matters for many SRT purposes, in particular:

- (1) Overseas test 1: Less than 16 UK days
- (2) Overseas test 2: 3 years non-residence, less than 46 UK days
- (3) UK test 1: 183 UK days
- (4) The sufficient ties test:
  - (a) The number of “sufficient” UK ties depends on the number of UK days spent
  - (b) The 90 day tie
  - (c) The country tie

Para 24 sch 45 FA 2013 tries to explain the word “in”:

Any reference to a number of days spent in the UK “in” a given period is a reference to the total number of days spent there (in aggregate) in that period, whether continuously or intermittently.

#### 5.15.1 *Ascertaining “days spent” in UK*

Sch 45 FA 2013 provides the general rule:

22(1) If P is present in the UK at the end of a day, that day counts as a day spent by P in the UK...

23(1) If P is not present in the UK at the end of a day, that day does not count as a day spent by P in the UK.

There are three exceptions to this general rule:

Exception	Outline	See para
Transit passengers	Transit days not counted as days in UK	5.16
Exceptional circumstances	Up to 60 UK days not counted	5.17
Deeming rule	Frequent visits count as UK days even though <i>not</i> present at midnight	5.19

So “days spent” are ascertained by a qualified midnight test, not a simple midnight test.

#### 5.16 Transit days

The rule is in para 22(3) sch 45 FA 2013 but that needs to be read with para 22(1)(2):

- (1) If P is present in the UK at the end of a day, that day counts as a day spent by P in the UK.
- (2) But it does not do so in the following two cases.

- (3) The first case is where–
- (a) P only arrives in the UK as a passenger on that day,
  - (b) P leaves the UK the next day, and
  - (c) between arrival and departure, P does not engage in activities that are to a substantial extent unrelated to P’s passage through the UK.<sup>34</sup>

This is vague, but the RDRM provides a gloss:

**RDRM11730: Days spent in the UK: Transit days** [Dec 2019]

Merely taking dinner or breakfast at their hotel, in the normal course of events, would be related to their passage.

In contrast, enjoying a film at a local cinema, spending any time in your home in the UK or catching up with friends or relations would be considered substantially unrelated to their passage through the UK. ...

**Example 1 (Holly and Lawrence)**

H regularly visits the UK for work and social engagements. She also travels widely. She is planning to visit her aunt in Philadelphia, and will be flying in from Rome to connect with her flight at Heathrow.

H’s flight lands at 23.05 on Monday evening. Her flight to Philadelphia does not depart from Heathrow until 11.05 on Tuesday morning. H decides to stay at an airport hotel to catch some sleep, before returning to board the plane for her onward journey. She merely leaves the airport terminal, catches a taxi to the hotel, sleeps, and snatches a quick breakfast before returning to the airport.

The transit arrival day (Monday) spent in the UK would not count as a day for H when she considers how many days she spent in the UK at the end of the tax year. The departure day (Tuesday), may count as a qualifying day under the deeming rule.

**Example 2(a)**

H’s brother, L, has a similarly itinerant lifestyle. He too is visiting their aunt in Philadelphia, and will be flying in from Toulouse to connect with their continental flight at Heathrow.

L’s flight lands at 17.20 on Monday evening. The flight to Philadelphia does not depart Heathrow until 11.05 on Tuesday morning. L decides to stay at an airport hotel, before returning to board the plane on Tuesday.

In this scenario the midnight spent in the UK will not count as a day spent in the UK for SRT purposes. The departure day (Tuesday), may

---

34 The drafting is, exceptionally for the SRT, from the pre-2013 legislation: s.831(1B)(b) ITA.

count as a qualifying day under the deeming rules.

Example 2(b)

The circumstances are for 2(a), but L decides that as he has a long transit period in the UK he will meet up with some friends and go to the theatre. In this scenario L's meeting friends and visiting the theatre is regarded as being to a substantial extent unrelated to his passage through the UK. The midnight spent in the UK will count as a day spent in the UK for SRT purposes. The following day (Tuesday), may also count as a qualifying day under the deeming rule.

Example 2(c)

The circumstances are as for 2(a), but L meets his team leader for dinner to discuss work related issues. Their meeting lasts for an hour and a half. In this scenario the meeting with his team leader is regarded as being to a substantial extent unrelated to his passage through the UK, and the midnight spent in the UK will count as a day spent in the UK for SRT purposes. The following day (Tuesday), may also count as a qualifying day under the deeming rule.

Example 3(a) (Simon)

S is a lawyer who lives in France but works internationally. A business trip to Canada requires him to transit through the UK. He lands at Gatwick at 18.30 on Tuesday and his onward flight to Canada departs Heathrow at 14.00 on Wednesday.

While S is waiting for the shuttle bus to his Heathrow hotel he spots a work colleague from the London office who he has not seen for some time. They go for a coffee and talk about their families and recent holidays. That evening after dinner in his hotel, S uses social media to look at his colleague's holiday photographs and then exchanges a few emails with him about them. Before going to bed S watches a film on an internet website.

S's chance meeting with his colleague and his use of social media and internet websites are regarded as being related to his transit through the UK. This is because the meeting was entirely by chance, not planned, and he and his colleague did not talk about work issues. His use of social media at the hotel is acceptable, as it was not used in any way whatsoever for business or work purposes.

S's day of arrival in the UK may be treated as a transit day and will not count as a day of presence in the UK for SRT purposes. S's departure day (Wednesday) may also count as a qualifying day under the SRT deeming rule.

Example 3(b)

The situation is the same as for example 3(a), however S and his

colleague discuss a litigation case they are both involved in. That evening S contacts his boss on his social media site to make him aware of the earlier discussion with his colleague, and they exchange some emails on the case.

Although S met his colleague by chance they discussed both private and work related issues. He also used social media for work purposes. These activities are regarded as being to a substantial extent unrelated to his transit through the UK.

S's day of arrival in the UK may not be regarded as a transit day and will be treated as a day spent in the UK for SRT purposes. If S works in the UK for more than 3 hours, the day will also count as a UK work day. S's departure day (Wednesday), may also count as a qualifying day under the SRT deeming rule.

EN FB 2008 provides some unexceptionable examples:

*Example 1* – Peter works for the Jersey arm of HSBC and is travelling from Jersey to Frankfurt. He flies from Jersey to Gatwick and will catch his onward flight the next day to Frankfurt from London City airport. He travels from Gatwick to Canary Wharf for a meeting with several other HSBC colleagues before staying overnight in a nearby hotel.

The meeting with colleagues is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

*Example 2* – John works for the Jersey arm of HSBC and is travelling from Jersey to Frankfurt via Gatwick and London City airport. In lobby of his hotel near London City Airport, he unexpectedly spots another colleague who has just arrived from Paris. They have a couple of pints together and their conversation covers a number of business-related issues. [John]<sup>35</sup> then travels to London City airport to catch his onward connection.

This meeting was not planned and therefore it can be considered that John's activities in the UK substantially related to completing travel to a foreign destination. The transit passenger provisions will apply.

*Example 3* – Shirley lives in Guernsey and is travelling to New Zealand by way of Gatwick and Heathrow. She has planned to spend most of the day with her daughter and grandchildren, who live in Crawley and will also spend the night there before travelling to Heathrow for her onward flight.

Her visit is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

*Example 4* – Phil lives in Guernsey and is travelling to New Zealand by way of Gatwick and Heathrow. His flight from Guernsey is delayed by fog and he arrives too late to make his onward connection to New Zealand that day. His son had already arranged to meet him at Gatwick and drive him to Heathrow, now

---

35 The original erroneously reads: Peter.

he drives him to a hotel near Heathrow instead where Phil will stay overnight before catching his rearranged flight. At the hotel they have a snack together. These activities are substantially related to completing travel to a foreign destination – Phil would have eaten in the hotel even if he had been unaccompanied. The transit passenger provisions will apply.

*Example 5* – George lives in the Isle of Man and is flying to New York on business via Manchester. He has made an appointment with a consultant orthopaedic surgeon based in Manchester to carry out a number of tests. He will stay in the clinic overnight before travelling on to New York the following afternoon.

The appointment is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

*Example 6* – George lives in Jersey and is travelling to Stavanger. He does not fly and travels to the UK by ferry before continuing to London by train. He stays overnight at a West End hotel, having prearranged dinner and a trip to the theatre with friends. The next day he travels to Newcastle by train, where he boards a ferry to Stavanger. His activities in the UK are not substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

The minutes of the Joint Forum on Expatriate Tax and NICs provides:

#### **Transit days and “substantially related” – general clarification**

*Question:* If the statutory phrasing is viewed narrowly, whatever [an individual] is likely to do, whether watching a film in his hotel room, telephoning family, reviewing work e-mails, catching up with friends on Facebook or going to the hotel gym or pool could be viewed as “substantially unrelated” to passage through the UK because it is not an intrinsic part of the journey.

*HMRC answer:* HMRC confirms that it will not interpret “substantially related” narrowly. It is reasonable to expect that, for example, anyone who chose to stay in a hotel to avail themselves of the facilities, to check Facebook and so on. The facts in each case will be important. In the final analysis we would consider whether a person was in fact enjoying the benefit of being in the UK – for example by going to the theatre – which is out with the spirit of a transit day. However it is true that doing any work, including reviewing emails, is unrelated to P’s passage through the UK and the day would result in a day spent in the UK.

#### **Transit days and “substantially related” – work of any sort and alternative approaches**

*Question:* A restriction on doing work of any sort means individuals cannot check work emails (e.g. on smartphones and tablets) which is unreasonable. Can a more pragmatic interpretation be struck? e.g. US Treasury Regulations 301.7701(b)-3(d) covering Days in Transit, which

hinges on whether or not there has been a business meeting.

*HMRC answer:* HMRC interprets the term “substantially unrelated” with reference to what the transit day provisions are there to achieve – to allow leeway for day counting purposes for those passing through the UK who carry out no work. A simple reading means there is can be no debate around the degree and nature of work done.

### **Departure days and deemed days**

*Question:* Are departure days that are disregarded under the transit rule counted for the deeming rule? In other words, do transit departure days count towards an excess over 30 days, as per in para 23(3)?

*HMRC answer:* Departure days, following a day in transit, are not disregarded under the transit rules and may count towards the deemed days rule. A day of departure may be a “qualifying day” under the terms of para 23(3)(b). The intention is to minimise the scope for the deemed days rule to be circumvented.<sup>36</sup>

If the individual arrives in the UK and leaves on the *same* day, that day will not count even though work or other matters are done in between.<sup>37</sup> The individual does not need to rely on the transit passenger exemption.

The transit passenger rule is essential to the role of Heathrow airport as an international hub. Heathrow relies on transit passengers for the viability of its hub status. Transit passengers facilitate network diversity and frequency. Passengers would not arrange to change planes in the UK if that might make them UK resident.

## **5.17 Exceptional circumstances**

### *5.17.1 Exceptional circ. disregard*

The rule is in para 22(4) sch 45 FA 2013 but that needs to be read with para 22(1)(2):

- (1) If P is present in the UK at the end of a day, that day counts as a day spent by P in the UK.
- (2) But it does not do so in the following two cases....
- (4) The second case is where–
  - (a) P would not be present in the UK at the end of that day but for exceptional circumstances beyond P’s control that prevent P

---

<sup>36</sup> 29 January 2014

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/302475/140326\\_Expats\\_Forum\\_Jan\\_14\\_Minutes\\_FINAL.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf)

<sup>37</sup> Unless the deeming rule (frequent visits) applies.

- from leaving the UK, and  
 (b) P intends to leave the UK as soon as those circumstances permit.

I refer to this as the “**exceptional circumstances disregard**”.

Para (4) can be unpacked into 5 separate requirements:

<b>Ref</b>	<b>Requirement</b>
<i>Para (a)[i]</i>	The circumstances are exceptional
<i>Para (a)[ii]</i>	The circumstances are beyond P’s control
<i>Para (a)[iii]</i>	The circumstances prevent P from leaving the UK
<i>Para (a)[iv]</i>	P would not be present in the UK but for those circumstances
<i>Para (b)</i>	P intends to leave the UK as soon as those circumstances permit

There is an element of overlap, but these are the five requirements which must be satisfied, and it is best to address them seriatim.

“The circumstances” here means the matters which cause P to be present in the UK at any particular time.

In assessing whether circumstances are “beyond P’s control” or “prevent” P from leaving the UK, it is appropriate to adopt the approach in the test of duress in criminal law, which is “whether a person of reasonable firmness, sharing the characteristics of P, would have responded to the situation by acting as P did.”<sup>38</sup> One might summarise the requirements by saying that P’s presence in the UK must be forced.

The RDRM provides:

**RDRM13240: What are exceptional circumstances** [Aug 2019]  
 ... the event or situation in question must be one over which the individual has no control or influence, and which cannot reasonably have been foreseen.

This is a loose paraphrase of the statutory words, and perhaps has a pro-HMRC nuance, but these are not precise words, and I doubt if they are intended to be construed very closely.

The exceptional circumstances disregard does not require a formal claim or election, but where the relief applies the individual must complete box 11 in SA109 (Residence, remittance basis etc) (2020/21). The rubric to this box provides: “Number of days in box 10 [days spent in the UK] attributed to exceptional circumstances”.

### 5.17.2 *Exceptional*

---

38 Halsbury’s Laws of England, Volume 25 (Criminal law), para 27 (Duress by threats).  
 FD\_5\_Residence\_of\_Individuals.wpd 03/11/21

“Exceptional” is contextual, evaluative, and a matter of degree. (Is war exceptional? Discuss).

Para 22(5) sch 45 FA 2013 elucidates the word here:

Examples of circumstances that may be “exceptional” are–

- (a) national or local emergencies such as war, civil unrest or natural disasters, and
- (b) a sudden or life-threatening illness or injury.

The RDRM provides a self-evident example:

**RDRM13240: What are exceptional circumstances** [Aug 2019]

For example, if an individual is a passenger on a commercial aircraft that is forced to make an emergency landing in the UK, and there is no available onward flight to their original destination for 2 days afterwards. The 2 days that would otherwise count as time spent in the UK would be ignored due to exceptional circumstances...

Outside the movies, emergency landings are, happily, exceptional (and more often due to medical emergencies than other reasons).

### 5.17.3 *Para (a)[iii] & [iv]*

*Para (a)[iii]* The circumstances prevent P from leaving the UK

*Para (a)[iv]* P would not be present in the UK but those circumstances

These are distinct conditions, but more conveniently considered together.

**RDRM13240: What are exceptional circumstances** [Aug 2019]

**Example 3** (Claude’s car crash)

The facts (stripping out irrelevancies) are as follows:<sup>39</sup>

C came to the UK 1 June intending to leave on 31 October.

On 29 September C has an accident and is in hospital for 14 weeks.

He leaves the UK on the day he is discharged.

The HMRC analysis is as follows:

---

<sup>39</sup> The example in full (including its irrelevant detail) is as follows:

“C is retired and came to the UK for the first time on 1 June for a 5 month extended travelling holiday, intending to leave on 31 October.

On 29 September while travelling to Scotland C is involved in a car crash, suffering multiple injuries. He is in hospital for a total of 14 weeks and arranges to travel back to his home in France on the day he is discharged.”

C has been in the UK for 220 days.

C spent 14 weeks in hospital, but because his original intention was to stay in the UK until 31 October, only the days from 1 November up to the date of discharge can be ignored due to exceptional circumstances.

More analytically, until 31 October, C fails the condition in para (a)[iv], that “P would not be present in the UK but those circumstances”.

The maximum number of days in the tax year that can be ignored is 60.

In this scenario C has 160 days counted as a day of presence in the UK.

HMRC accept that (subject to the 60 day cap)<sup>40</sup> the hospital days fall within the exceptional circumstances disregard.

The RDRM provides

**RDRM13250: Foreign and Commonwealth Office advice** [Aug 2019]

Exceptional circumstances will generally not apply in respect of events that bring an individual back to the UK. However, there may be circumstances such as civil unrest or natural disaster where associated FCO advice is to avoid all travel to the region.

Individuals who return to and stay in the UK while FCO advice remains at this warning level would normally have days spent in the UK ignored under the SRT, subject to the 60 day limit.

The Manuel provides a straightforward example of this factual scenario:

**RDRM13250: FCO advice** [Aug 2019]

**Example** (Philip - military coup)

The facts (stripping out irrelevancies) are as follows:<sup>41</sup>

---

40 See 5.17.6 (60 day cap).

41 The example in full (including its irrelevant detail) is as follows:

“P is a structural engineer, and has worked full-time abroad for many years. He is currently working on a project in Africa. His wife and children live in the UK.

In May the government of the country in which he is working is overthrown in a military coup. This initially gave rise to peaceful protests, but soon developed into increasing levels of civil unrest. In early July the FCO issued advice against all but essential travel to the country. P continued to work there.

By mid-October the country was on the verge of civil war, and the FCO upgraded their advice, warning against all travel to the country. P returned to the UK on 21 October.

Due to international intervention, by the end of January the following year, political stability had returned to the country. On 29 January the FCO downgraded their advice to avoid all travel to the country. P took the first available flight back and resumed

P is works outside the UK. His wife and children live in the UK.

In early July the FCO issued advice against all but essential travel to the country. P continued to work there.

In mid-October the FCO upgraded their advice, warning against all travel to the country. P returned to the UK on 21 October.

On 29 January the FCO downgraded their advice to avoid all travel to the country. P took the first available flight back.

The HMRC analysis is as follows:

The days P spent in the UK were due to an exceptional circumstance beyond his control, and can be ignored for the purpose of the day counting tests of the SRT. However, the maximum period that can be ignored due to exceptional circumstances is 60 days. P was in the UK for 103<sup>42</sup> days during this period, which means P must count 43 days as days spent in the UK for the purposes of the SRT day counting tests.

Here, HMRC accept:

*Para (a)[iii]* The circumstances prevent P from leaving the UK

*Para (a)[iv]* P would not be present in the UK but those circumstances

HMRC do not argue P could have arranged to live almost anywhere else in the world, though no doubt he could. That must be right, assuming that P's home is in the UK, which is suggested by saying that "His wife and children live in the UK." This illustrates that whether P is forced to be in the UK is assessed by reference to what a reasonable person would do.

Similarly, the exemption could apply to someone whose home was in the UK, and who had been planning to leave, but was prevented due to civil unrest/natural disaster in the intended destination. There would be nothing to stop them going to a third country. But that still counts as exceptional circumstances which prevent P leaving the UK if P is *reasonably* prevented from leaving the UK.

A similar point arises in relation to illness/injury of a person's family members. The RDRM provides:

---

work on 31 January."

42 For completeness: It does not affect the point of the example, but the figure of 103 days is wrong. P arrived in the UK on 21 October. The example does not precisely identify the date he left the UK, but it was between 29 January (when FCO downgraded their advice) and 31 January (when P resumed work). Days spent in the UK were therefore between 100 and 102 days.

**RDRM13240: What are exceptional circumstances** [Aug 2019]

There may also be limited situations where an individual who needs to stay in the UK to deal with a sudden or life threatening illness or injury to a spouse, person who they are living with as husband and wife, civil partner or dependent child; can have those days spent in the UK ignored under the SRT, subject to the 60 day limit.

There may also be limited situations where an individual who comes back to the UK to deal with a sudden or life threatening illness or injury to a partner or dependent child, can have those days spent in the UK ignored under the SRT subject to the 60 day limit.

**Example 2(a)** (Henrik and Victoria - injury to minor daughter)

The facts (stripping out irrelevancies) are as follows:<sup>43</sup>

H is a lone parent. V, his 13 year-old daughter, usually lives with him. V comes to the UK for a holiday. She has an accident and is taken to hospital with a suspected major injury.

H travels to the UK, to be with V.

H arranges for V to be moved back to Germany as soon as possible. This happens 3 days after the accident.

The HMRC analysis is as follows:

The 3 days H spends in the UK with his daughter arranging her transfer, after this potentially life changing accident, would count as exceptional circumstances.

Again, HMRC accept:

*Para (a)[iii]* The circumstances prevent P from leaving the UK

*Para (a)[iv]* P would not be present in the UK but those circumstances

It would have been possible for the father not to visit his daughter. But the requirements are not construed so strictly.

---

43 The example in full (including its irrelevant detail) is as follows:

“H is working in the construction industry and lives in Germany. He has business interests in the UK and has spent 68 days working here in the current tax year. He is a lone parent and his children usually live in the family home in Germany with him. H sends V, his 13 year-old daughter, for a 2 week holiday at a UK summer holiday camp. Whilst undertaking one of the activities she has an accident and is taken to hospital with a suspected major neck injury. H immediately travels to the UK, to be with his daughter and arranges for her to be moved back to Germany as soon as possible. This happens 3 days after the incident. V remains in hospital in Germany for a further 4 weeks.”

Why does the example specify that V is a lone parent? Suppose V lived with both parents, and H still came to the UK. I think H's visit is still forced, even if W could have come instead. But this illustrates how HMRC examples tend to posit very strong facts, so as not to give any hostage to fortune. Would the answer be different if Victoria was a young adult?

**Example 2(b)**

A similar judgement would be applied had H and his daughter been in the UK when the accident had occurred. If H stays with his daughter beyond their planned return date,<sup>44</sup> until she can be transferred back to Germany, the additional days where he is present at midnight would count as exceptional circumstances.

Although RDRM refers to a partner or dependent child, the same may apply to other close relatives and dependents, it is a question of fact. I stress this as HMRC have argued the contrary. But this is consistent with the pre-2013 rules,<sup>45</sup> and any other view is offensive to humanity.

Had H chosen not to arrange for his daughter to be transferred to a German hospital, and had elected to stay in the UK until she was released from hospital here, the additional time spent in the UK would not be considered as exceptional circumstances.

It would be a matter of medical evidence at what point it becomes *reasonably* possible for H to return home, but that point should not be before the discharge from hospital.

5.17.4 *Para (b): Intention to leave*

The RDRM provides:

**RDRM13240: What are exceptional circumstances** [Aug 2019]

For days spent in the UK due to exceptional circumstances to be ignored, an individual must intend to leave the UK as soon as those circumstances permit. If an individual does leave the UK once the exceptional circumstances have ended, HMRC will usually accept this as evidence of

---

44 The period before the planned return date does not meet the condition in para (a)[iv]; see the example of Claude's car crash, above.

45 The former IR20 provided: "Any days spent in the UK because of exceptional circumstances beyond your control, for example the illness of yourself or a member of your immediate family, are not normally counted for this purpose."

such an intention.

The RDRM provides a straightforward example:

**RDRM13240: What are exceptional circumstances** [Aug 2019]

**Example 4**

The circumstances are the same as example 3.<sup>46</sup>

However, C's nephew, who lives in Wales, writes to him in hospital and suggests C should stay with him when C leaves hospital. C writes back on 1 December agreeing.

From 1 December it is no longer C's intention to leave the UK as soon as the exceptional circumstances have come to an end; and so only the period 1 November to 30 November can be discounted as exceptional circumstances for SRT day counting purposes.

C would do better to leave the UK as soon as he recovers, and then visit the Welsh nephew on a subsequent occasion. How long a gap should there be? Strictly, one day away would suffice, but the reader may think that a little longer may be wise. Fortunately the problem will not often arise.

5.17.5 *Non-exceptional: examples*

The RDRM provides:

**RDRM13260: Examples of circumstances not normally considered to be exceptional circumstances** [Aug 2019]

Days spent in the UK will not be considered exceptional where the circumstances are not beyond the individual's control, or where they could have reasonably have been foreseen or predicted.

Life events such as birth, marriage, divorce and death, are not routinely regarded as exceptional circumstances.

A visit to the UK on the occasion of the birth of a grandchild may not be exceptional enough, in the absence of special circumstances. But if a visit for the illness or accident of close family is sufficient (see above) why not the same for a visit to attend the funeral? One may be getting close to the border, here, and the issue is fact sensitive. "Not routinely" is not much guidance, but it may be the most that can be said.

Choosing to come to the UK for medical treatment, or to receive elective medical services such as dentistry, cosmetic surgery or therapies will not be regarded as exceptional circumstances.

---

<sup>46</sup> The example of Claude's car crash; see 5.17.2 (Exceptional).

There are two possible reasons why the relief may not apply here:

- (1) Medical treatment for less serious conditions may not be exceptional enough.
- (2) If a person chooses to come to the UK for the treatment, when they could remain in their home state for the treatment, then the requirement of para (a)[iv] is not met that “P would not be present in the UK but for the exceptional circumstances”. The effective reason that the person is in the UK is not the treatment, but that they chose to come here for the treatment.

It is however a matter of fact and degree.

Travel problems, for example a delayed or missed flight due to traffic disruption, train delays or cancellations, or a car breakdown, will not be considered as exceptional circumstances, nor will delays in obtaining visas.

Ordinary travel problems are (by definition) not exceptional, but it is a question of fact and degree. HMRC (rightly) accepted that air travel disruption caused by the Eyjafjallajökull volcanic eruption in 2010 was exceptional.<sup>47</sup>

#### 5.17.6 60 day cap

Para 22(6) sch 45 FA 2013 caps the number of exceptional days allowed:

For a tax year—

- (a) the maximum number of days to which sub-paragraph (2) may apply in reliance on sub-paragraph (4) is limited to 60, and
- (b) accordingly, once the number of days within sub-paragraph (4) reaches 60 (counting forward from the start of the tax year), any subsequent days within that sub-paragraph, whether involving the same or different exceptional circumstances, will count as days spent by P in the UK.

The RDRM provides a simple example. The facts are the same as for Claude’s car crash:

**RDRM13240: What are exceptional circumstances [Aug 2019]**

**Example 1 (Anna - explosion)**

---

<sup>47</sup> See the 2012/13 edition of this work para 3.26.1 (Volcanic Ash: disruption to air travel 2010/11).

The facts (stripping out irrelevancies) are as follows:<sup>48</sup>

A suffers an accident on a boat. She is found unconscious. The emergency services airlift A to the UK, where she remains for 5 months. A leaves the UK as soon as she is discharged from hospital. A has been in the UK for 202 days.

The HMRC analysis is as follows:

The disaster would be considered to be an exceptional circumstance beyond A's control. However, the maximum number of days that can be ignored towards days spent in the UK is 60. So A has 142 days which count as days spent in the UK.

What if A had remained conscious? Once again, the example posits easy facts and avoids harder problems.

#### 5.17.7 *Exceptional: Record keeping*

RDRM12930 comments on record keeping. If appropriate, the individual should keep information and records relating to:

- what their circumstances were
- what did they do to mitigate them where that was possible, for example making alternative travel arrangements

#### 5.17.8 *Exceptional circumstances ignored*

The RDRM provides:

**RDRM13220: Annex B: SRT day counting rules where exceptional circumstances can be taken into account when determining the number of days spent in the UK [Aug 2019]**

The following SRT tests allow for the deduction of days attributable to exceptional circumstances to be discounted:

---

48 The example in full (including its irrelevant detail) is as follows:

“A is returning to her home in Denmark having spent her 7 week summer holiday working in the UK. This was her first visit to the UK.

On her boat journey home there is an explosion in the engine room. Emergency rescue services attend the vessel, and A is found unconscious and badly burned. The emergency services make the decision to airlift A to a specialist burns unit in the UK, where she remains for 5 months. A returns to Denmark as soon as she is discharged from hospital.

A has been in the UK for 202 days.”

- First automatic UK test– an individual spends 183 days or more in the UK
- First automatic overseas test– an individual spends fewer than 16 days in the UK
- Second automatic overseas test– an individual spends fewer than 46 days in the UK
- Third automatic overseas test– number of days an individual spends in the UK is fewer than 91, excluding qualifying days under the deeming rule
- Fourth automatic overseas test for deceased individuals - an individual spent less than 46 days in the UK
- Sufficient ties tables– number of days an individual spends in the UK compared against the number of ties they have
- 90 day tie– an individual spends more than 90 days in the UK in the previous tax year, or the one before that
- Split year cases 1 and 2– permitted limit of number of days an individual spends in the UK, excluding qualifying days under the deeming rule
- Split year cases 4 and 8 – an individual spends fewer than 16 days in the UK
- Split year cases 4 and 5– proportionately reduced number of days an individual spends in the UK for sufficient ties

#### 5.17.9 Exceptional circumstances not ignored

However there are many SRT rules for which exceptional circumstances do not provide a defence:

**RDRM13230: SRT day counting tests where exceptional circumstances cannot be taken into account when determining number of days spent in the UK [Aug 2019]<sup>49</sup>**

The following SRT tests do not allow for the deduction of days attributable to exceptional circumstances to be discounted:

[1] Second automatic UK test

- An individual is present in their home on at least (for UK homes), or fewer than (for overseas homes) 30 separate days
- Period of 91 consecutive days, at least 30 of which fall within the tax year

[2] Third automatic UK test

- An individual works sufficient hours in the UK, as assessed over a period of 365 days
- 75% of the total number of days
- At least 1 day in the tax year is a day on which an individual does more than 3 hours of work in the UK

---

<sup>49</sup> I have amended the layout for the sake of clarity.

- Significant break – 31 days go by
- [3] Third automatic overseas test
- Significant break – 31 days go by
  - Number of days on which an individual does more than 3 hours work in the UK is fewer than 31
- [4] Full-time work – 15 day gap between employments, and 30 day maximum number of days that may be subtracted for gaps between employments
- [5] Family tie
- An individual spends time with their child in person on 60 days or fewer, for all or part of a day
  - An individual’s child spends fewer than 21 days in the UK outside term-time
- [6] Accommodation tie
- Continuous period of 91 days
  - Gap of 15 days or fewer
- [7] Work tie – an individual works in the UK for at least 40 days
- [8] Country tie – midnight test – greatest number of midnights
- [9] Deeming rule – if an individual has more than 30 qualifying days, the excess are treated as if the individual were in the UK at the end of the day, subject to the conditions set out in RDRM11720.

That rather reduces the value of the exceptional circumstances disregard.

## 5.18 Covid

### 5.18.1 Covid: *Exceptional circumstances*

RDRM specifies five straightforward cases where Covid-related circumstances meet the statutory requirements. I set these out here. But these cases are not a comprehensive list of when Covid constitutes exceptional circumstances, and do not claim to be:

#### **RDRM11005 Coronavirus (COVID-19)** [May 2020]

Whether days spent in the UK can be disregarded due to exceptional circumstances will always depend on the facts and circumstances of each individual case.

I set out the guidance below, but ultimately the question to consider is not whether P’s circumstances fall within one of the HMRC specified cases, but whether they meet the statutory requirements set out above.

In considering whether a person is forced to be in the UK due to Covid, it should be assumed that the person will comply with the law and follow government guidance. It does not matter that a person might theoretically

be able to leave the UK in breach of the law, or in breach of government guidance.

### 5.18.2 *Quarantine/self-isolation*

#### **RDRM11005 Coronavirus (COVID-19)** [May 2020]

... if you:

[1] are quarantined or advised by a health professional or public health guidance to self-isolate in the UK as a result of the virus...  
the circumstances are considered as exceptional.

#### **RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A** [Aug 2020]

##### **4. Does UK wide Government advice on self-isolation mean that exceptional circumstances apply?**

If you are self-isolating in line with government advice, the period of self-isolation will be covered by exceptional circumstances.

### 5.18.3 *Advice not to travel*

#### **RDRM11005 Coronavirus (COVID-19)** [May 2020]

... if you ...

[2] find yourself advised by official Government advice not to travel from the UK as a result of the virus...  
the circumstances are considered as exceptional.

The RDR Manual provides:

#### **RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A** [Aug 2020]

##### **... 1. Are travel restrictions due to the COVID-19 pandemic counted as exceptional circumstances for the statutory residence test?**

... Circumstances are considered exceptional where you find yourself advised by official government advice not to travel from the UK as a result of the virus. For example, on the 17 March 2020 the Foreign and Commonwealth Office (FCO) advised British nationals against all but essential international travel during the pandemic.

Para [3] could apply to anyone in the UK, for the period that:

- (a) The Government advised against all but essential travel, or
- (b) Travel was prohibited in the absence of a reasonable excuse. What constitutes a reasonable excuse will partly depend on government guidance, which has varied over time. From 26 March to 1 June 2020, travel was permitted only for limited reasons, eg for work which could

not be done from home.<sup>50</sup> Leaving one's home in the UK was in principle unlawful.

#### 5.18.4 *Closure of borders*

##### **RDRM11005 Coronavirus (COVID-19) [May 2020]**

... if you ...

[3] are unable to leave the UK as a result of the closure of international borders...

the circumstances are considered as exceptional.

The RDR Manual provides:

##### **RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A [Aug 2020]**

###### **2. What does HMRC mean by closure of international borders?**

Circumstances are considered exceptional where you are unable to leave the UK as a result of the closure of international borders.

Many territories will continue to allow citizens, permanent residents or nationals to return to those territories even with wider border restrictions in place. However, if you are unable to leave the UK as a result of the closure of international borders, for exceptional circumstances to apply, you must be able to demonstrate that you have made every effort to leave once those restrictions have been lifted.

#### 5.18.5 *Return at request of employer*

##### **RDRM11005 Coronavirus (COVID-19) [May 2020]**

... if you ...

[4] are asked by your employer to return to the UK temporarily as a result of the virus

the circumstances are considered as exceptional.

#### 5.18.6 *Return to support family*

##### **RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A [Aug 2020]**

**7. I came to the UK to support my vulnerable family members who needed assistance during the COVID-19 pandemic. Would this be considered an exceptional circumstance?**

---

<sup>50</sup> Reg 6 Health Protection (Coronavirus, Restrictions) (England) Regulations 2020 (26 March 2020). Lockdown in the UK started 23 March 2020, with some restrictions in effect earlier.

Certain vulnerable people have been asked to ‘shield’ or ‘self-isolate’ due to the COVID-19 pandemic. Whether or not the impact of those circumstances is exceptional to you, will depend on the facts and circumstances of your case. You will need to be able to demonstrate why it was necessary for you to come and remain in the UK to provide support for a vulnerable member of your family.

See the HMRC example of Henrik at 5.17.3 (Para (a)[iii] & [iv]).

### 5.18.7 Covid: other residence rules

Covid provides no relaxation or relief for tax rules beyond the exceptional circumstances rule. For instance, there are no extensions to the 60 day cap for exceptional circumstances,<sup>51</sup> or the 30 day UK workday limit<sup>52</sup>. The minutes of the Joint Expatriate Forum on Tax & NICs provide:

**Question:** Is there going to be any movement from HMRC on the 60 days for exceptional circumstances, particularly given we are in June now? For people this year, still stranded in the UK, that is a key question. Also, regarding full-time work abroad, are HMRC are reviewing any concessions where an individual is remote working in the UK and has gone over the 30 workdays?

**HMRC Answer:** The 60 days is a statutory rule. We have no latitude to impact that, and there is nothing in line to amend the legislation in respect to that at the moment. The same applies to working in the UK for 31 or more days. Discretion can be exercised with exceptional circumstances, however as statutory issues are not within our gift, it would be a ministerial consideration. There are also no plans to change the legislation in respect of a ‘significant break’...

There are no plans to change the legislation in respect of the 60 days and UK workdays, and we think the SRT is written broadly enough to accommodate people having to stay in the UK a little bit longer. We are only at the start of the tax year, and so people have the rest of the year to plan their presence here.<sup>53</sup>

Lobbying on that issue was not productive. The Manual now restates HMRC’s approach:

---

51 See 5.17.6 ( 60 day cap).

52 See 5.8.5 ((c): Less than 31 UK workdays).

53 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/897729/HMRC\\_Joint\\_Expatriate-Forum-Tax\\_NICs\\_minutes-11-June-2020.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/897729/HMRC_Joint_Expatriate-Forum-Tax_NICs_minutes-11-June-2020.pdf)

**RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A [Aug 2020]**

... The maximum of 60 days in a tax year that can be disregarded due to exceptional circumstances will continue to apply...

Any day on which you work in the UK for more than 3 hours will count as a UK workday, even if they are days which have been disregarded for other tests due to exceptional circumstances...

**9. I am normally non-resident for UK tax purposes. My company have asked me to come to the UK to work because of COVID-19. How will this impact my residence status?**

Returning to the UK may result in a significant break in your overseas work (see RDRM11760) and you may no longer meet the 3rd automatic overseas test (working full-time abroad). Any day on which you work in the UK for more than 3 hours will count as a UK workday, even if they are days which have been disregarded for other tests due to exceptional circumstances.

... A change in anticipated residence in 2020-2021 may affect the prior year if it was a split year, see RDRM13230.

**11. As a trustee of a non-UK resident trust, if I am unable to leave the UK due to COVID-19 travel restrictions, how will my presence in the UK affect the trust?**

There are no special rules for determining the residence status of a trustee, the SRT rules apply. Days spent in the UK as a result of exceptional circumstances will be considered in determining whether you have become UK resident. If you become UK resident, this could affect the residence of the trustees as a body.

**13. If I was planning to leave the UK during 2020-2021 so that I do not become deemed domiciled in 2021-2022, but I am unable to do so because of the restrictions currently in place, how am I affected?**

There have been no changes to the deemed domiciled rules...

**15. I usually carry out the duties of my employment both in the UK and abroad. I am non-UK domiciled and the duties I carry out abroad are taxed on the remittance basis. If I am unable to travel due to travel restrictions, how will I be taxed if I carry out my overseas duties in the UK?**

There have been no changes to the current legislation. The earnings for the duties you perform in the UK will be treated as earnings in respect of UK duties. These earnings will not be eligible for the remittance basis and they will be taxed on the arising basis.

**17. How will the employment article within a treaty be applied while I am working in the UK but for an overseas employer?**

There is no change to the employment article and how it applies will depend on your circumstances.

In short: it is largely a matter of business as usual.

See too 8.31 (Covid issues re treaty-residence).

### 5.19 Deeming rule (frequent visits)

Para 23 sch 45 FA 2013 provides:

- (1) If P is not present in the UK at the end of a day, that day does not count as a day spent by P in the UK.
- (2) This is subject to the deeming rule.

Para 23 sch 45 FA 2013 provides:

- (3) The deeming rule applies if—
  - (a) P has at least 3 UK ties for a tax year,
  - (b) the number of days in that tax year when P is present in the UK at some point in the day but not at the end of the day (“qualifying days”) is more than 30, and
  - (c) P was resident in the UK for at least one of the 3 tax years preceding that tax year.
- (4) The deeming rule is that, once the number of qualifying days in the tax year reaches 30 (counting forward from the start of the tax year), each subsequent qualifying day in the tax year is to be treated as a day spent by P in the UK.
- (5) The deeming rule does not apply for the purposes of sub-paragraph (3)(a) (so, in deciding for those purposes whether P has a 90-day tie, qualifying days in excess of 30 are not to be treated as days spent by P in the UK).

The label “deeming rule” is opaque; I adopt the statutory term but add in brackets: “frequent visits”.

### 5.20 “Home”

#### 5.20.1 Why “home” matters

Home matters for many tax purposes, in particular:

<b>Purpose</b>	<b>See para</b>
The SRT:	
UK test 2 (UK home)	
UK test 4 (UK home in year of death)	
Accommodation tie (but home is not very important there)	

Split-year rules, Cases 2, 3, 4, 7, 8	
Treaty-residence	8.12
Child's domicile, if parents living apart	3.17.3
Deductibility of travel expenses for employment income	34.9; 34.10

The word *home* is also used:

- (1) as a synonym for private-residence (ie having a home is the same as having a private-residence);<sup>54</sup> and
- (2) as a synonym for territory-residence (ie having a home in a territory is synonymous with residing in the territory)<sup>55</sup>

Also see 5.36.2 (Record keeping: Home).

### 5.20.2 Home: nutshell definitions

In *Re Y*:

'Home' is defined thus in the Shorter Oxford English Dictionary:

"A dwelling-place, house, abode: the fixed residence of a family or household; one's own house; the dwelling in which one habitually lives, or which one regards as one's proper abode."

It is a definition which, in my judgment, contains the essential elements of a "home" as it is to be understood for present purposes.<sup>56</sup>

The Law Commission observes:

"Home" conveys ... the combined ideas of physical presence and emotional link.<sup>57</sup>

The point is encapsulated in the folk saying that "home is where the heart is". In the dictionary definition set out above, home is a place which one *regards* as one's proper abode. The views of the individual are therefore highly relevant. It would be surprising if a place which an individual regards as home is not in fact their home. The views of the parties as to which property was the main residence were held to be relevant in *Frost v Feltham*; see 55 TC at p.16; the same applies *a fortiori* in determining whether a property is a "home".

A New Zealand case offers a metaphor:

54 See 55.2.2 (Residence/home compared).

55 See 3.6 (Domicile-residence requirement).

56 [1985] Fam 136 at p.140.

57 *The Law of Domicile* (1987) Law Com 186 at para 4.20  
[http://www.scotlawcom.gov.uk/download\\_file/view/228/](http://www.scotlawcom.gov.uk/download_file/view/228/)

the location of what for the present constitutes the centre of gravity of the domestic life of the taxpayer—the axis around which his domestic life revolves.<sup>58</sup>

I am not sure how helpful that would be in a borderline case.

Fox discusses “home” from an interdisciplinary viewpoint, and concludes that the concept “represents a complex amalgam of financial, practical, social, psychological, cultural, politico-economic, and emotional interests to its occupiers”.<sup>59</sup>

The fact that one does not have a room set aside for oneself in a “home” does not shed much light on whether it is a “home”. The more important question is whether space is available when one wishes to use it. In Robert Frost’s lines:

Home is the place where, when you have to go there,  
They have to take you in.

### 5.20.3 HMRC examples: Disclaimer

The RDRM provides the usual disclaimer:

**RDRM13030 The second automatic UK test and the context of a ‘home’ [Aug 2019]**

As the meaning of ‘home’ can vary according to its context, it is not possible for this guidance to provide an absolute definition of the term. What this guidance does is to give indicators outlining the characteristics that a home will generally have.

There are some general examples of what a home may or may not be. Whether a place is or is not a home will always be dependent on the facts and circumstances of its use by the individual. HMRC may choose to enquire into those facts and circumstances.

### 5.20.4 Caravans, houseboats

Para 25(1) sch 45 FA 2013 provides:

A person’s home could be a building or part of a building or, for example, a vehicle, vessel or structure of any kind.

---

58 *Geothermal Energy New Zealand Ltd v CIR* [1979] 2 NZLR 324 approved *O’Brien v Quigley* [2013] IEHC 398 at [31] - [33].

59 Fox, “The meaning of home: a chimerical concept or a legal challenge?” [2002] JLS 580.

The RDRM gives a straightforward example of a caravan:

**RDRM13050 The principles and characteristics of a home for the purposes of the SRT [Dec 2020]**

Example 1 (Jim)

J lives in a mobile home with his wife. They travel extensively throughout the UK to wherever J can find work. They keep their personal belongings in the mobile home, take most of their meals there, and with the exception of their annual holiday abroad, sleep in it every night. It is where J and his wife spend most of their time when J is not working. It is their home.

OECD Model Commentary provides:

13 As regards the concept of home, it should be observed that any form of home may be taken into account (house or apartment belonging to or rented by the individual, rented furnished room).

This is making a similar point in the context of treaty-residence, and it reflects the general meaning of the word.

#### 5.20.5 *Permanence of occupation*

One characteristic of a “home” is that one lives there. As the court said in *Re Y*:

I have no doubt that any individual may have two homes; but each, in my judgment, to be properly so called, must comprise some element of regular occupation (whether past, present, or intended for the future, even if intermittent), with some degree of permanency, based upon some right of occupation whenever it is required, where ... “You find the comforts of what is known as home”; the fixed residence of a family or household.

However, the *amount* of time that one spends in a place may not shed much light on whether that place is a “home”. One can spend relatively little time in a place which is still a home, or even a main or principal residence.<sup>60</sup> Para 25(2) sch 45 FA 2013 acknowledges the point without providing any further guidance:

Whether, for a given building, vehicle, vessel, structure or the like, there is a sufficient degree of permanence or stability about P’s arrangements

---

<sup>60</sup> *Frost v Feltham* 55 TC 10, see 3.11.3 (“Chief” residence).

there for the place to count as P's home (or one of P's homes) will depend on all the circumstances of the case.

The RDRM gives an example of an international commuter:

**RDRM13050 The principles and characteristics of a home for the purposes of the SRT** [Dec 2020]

Example 3 (William)

W has business interest in both Switzerland and the UK. He flies to Switzerland each Monday returning to the UK every Thursday. In Switzerland he lives in a rented flat. When in the UK he lives with his family at the family home, which he has owned for many years. In this situation both properties are his homes.

W subsequently decides he does not need to spend so much time in Switzerland, and starts to travel there less frequently. He sub-lets his flat in Switzerland retaining no rights to use it, choosing instead to stay in whatever hotel can accommodate him. He now only has 1 home, which is in the UK.

The next example concerns a relatively short temporary absence (2 months):

**RDRM13050 The principles and characteristics of a home for the purposes of the SRT** [Dec 2020]

Example 4 (Elizabeth)

E is seconded to New York for 2 months by her UK employer. She stays at a hotel when she is there. Prior to her secondment she lived with her husband in their home in London. Her husband continues to live and work in the UK. When E returns to the UK after her secondment she returns to live with her husband in their London home. The London house was E's home throughout the period of her secondment.

The next example concerns a longer and more indefinite absence:

**RDRM13050 The principles and characteristics of a home for the purposes of the SRT** [Dec 2020]

Example 5 (Asif)

A has lived and worked in the UK for many years, occupying the same apartment in Liverpool since the day he arrived here. A's father lives in Sweden and is seriously ill. Ten months ago A decided to take a career break to care for his father and moved to Sweden. He does not know how long he will be out of the UK.

Since moving to Sweden A has not returned to Liverpool, but his apartment remains empty and available for him to return to whenever he

wants. In this situation A will have a home both in Liverpool and Sweden, even though he is spending all of his time in Sweden.

The next example concerns absence during temporary building work:

**RDRM13050 The principles and characteristics of a home for the purposes of the SRT [Dec 2020]**

A place that is used as a home will remain a home even if it is temporarily unavailable, for example, because of damage or renovation work.

Example 6 (Rachel and Tom)

R and T's kitchen and dining room have suffered flood damage. The estimated clean-up and repair operation will take 6 weeks, so they stay with R's parents while the work is being done. The property will remain their home even though R and T are unable to stay there for the time being.

Building work *before* moving into a home is different:

An individual's home starts to be their home as soon as:

- it is capable of being used as their home, for example, individual has taken ownership of it, even if it is temporarily unavailable because of renovation
- they actually use it as their home

If the first point above is satisfied, but in fact the individual never actually uses it as their home, then it will not be the individual's home.

**RDRM13050 The principles and characteristics of a home for the purposes of the SRT [Dec 2020]**

Example 7 (Aneta)

A moved from Poland to the UK and she completed the purchase of her new house on 1 June. Whilst it was empty she stayed with friends, until her belongings arrived. These were moved in by the removal firm on 15 June.

A stayed in her new home overnight that night. However, as she had arranged to have some extensive refurbishment done to her bathrooms and kitchen, she stayed in a local hotel and with friends while the main works were carried out. She moved into her home on a permanent basis on 15 July.

For SRT purposes HMRC would consider that the house became A's home from 15 July.

The key points are that:

- a place must be capable of being used as a home, even if it is temporarily unavailable

- an individual must actually use it as a home.

Two DTA cases are consistent with this guidance, and illustrate how the issue is multi-factorial and fact sensitive.

In *FFF v IRC*<sup>61</sup> the taxpayer took a 3 year post in Fiji (later extended). He retained the property in New Zealand which had been the family home. He conducted building works at the property, expected to be a six-month project, but matters dragged on, as commonly happens. The building work was to enhance the property as his family home, and on return to New Zealand he returned to the property. In the meantime he lived in accommodation provided by his employer in Fiji, which did not constitute a home. In these circumstances the taxpayer continued to have a home in New Zealand throughout the rebuilding works.

Contrast *O'Brien v Quigley*.<sup>62</sup> Here the taxpayer, who did have a home in Portugal, purchased a property in Ireland in May 2000, commenced major work in June 2000, and moved into the property in 2002. The property was not his home prior to moving in, in 2002.

#### 5.20.6 Holiday home

Para 25(3) sch 45 FA 2013 provides:

But somewhere that P uses periodically as nothing more than a holiday home or temporary retreat (or something similar) does not count as a home of P's.

The RDRM provides:

**RDRM13060 What is not considered a home for the purposes of the SRT** [Aug 2019]

[The Manual sets out para 25(3) and continues:] So a holiday home where an individual spends time for occasional short breaks, and which clearly provides a distinct respite from their ordinary day to day life, will not be a home.

However, if there comes a time when an individual's use of a holiday home or temporary retreat changes, so that it is used as a home, it will become a home from the time of the change. It will then continue to be a home until such time as circumstances change again, and it ceases to be used as a home.

---

61 [2011] NZTRA 8. The reader may think this a borderline case.

62 [2013] IEHC 398; and see Avery Jones case note in 19 ICLR 605.

**Example 3 (Jenny)**

J lives in Birmingham and works from home. She also owns an apartment in Spain, which she rents out apart from 2 to 3 weeks a year when she takes her holiday there. The Spanish property is not her home.

However, J then decides to live in the Spanish apartment throughout the British winter time, from October to March. Her use of the property has changed from being somewhere she used as an occasional short break, to somewhere she uses as a home for part of the year. The property is her home from the point she commences using the property as her home.

**5.20.7 No ownership requirement**

Para 25 sch 45 FA 2013 provides:

(4) A place may count as a home of P's whether or not P holds any estate or interest in it (and references to "having" a home are to be read accordingly).

(5) Somewhere that was P's home does not continue to count as such merely because P continues to hold an estate or interest in it after P has moved out (for example, if P is in the process of selling it or has let or sub-let it, having set up home elsewhere).

A house belonging to parents will be the home of children who live there:

**RDRM13050 The principles and characteristics of a home for the purposes of the SRT [Dec 2020]****Example 2 (Mary)**

M comes back to the UK to take up employment after spending 3 years studying abroad. She has given up the tenancy on the flat she occupied abroad and moves into her parent's house. Her parent's house is her home.

The RDRM provides:

**RDRM13060 What is not considered a home for the purposes of the SRT [Aug 2019]**

If an individual moves out of their home completely, and makes it available to let commercially on a permanent basis; it will not be their home during the period it is let unless, they or their family retain a right to live there.

This can happen, for example, where the rental agreement permits the individual to use the property or part of the property as living accommodation.

**Example 1 (Ivan)**

I left the UK to work in Germany. He lets the flat he previously lived in

to a tenant on a 2 year lease. After 18 months I is made redundant and returns to the UK. The rental agreement on his flat gave exclusive use of the property to the tenant, so I arranged to stay with relatives and friend until the lease expires. For the period his property was let, it is not his home.

However, if the rental agreement had allowed I to use the flat and he had stayed there when he visited the UK, it would have remained his home throughout.

A place that has never been capable of functioning as a home cannot be a home. For example, a property purchased in such a state of disrepair that it is not capable of being lived in as a home, is not a home, until such time as it becomes habitable.

If an individual completely moves out of a property and make no further use if it whatsoever, it will no longer be their home.

**RDRM13060 What is not considered a home for the purposes of the SRT [Aug 2019]**

Example 2 (Harry)

H's new job requires him to travel extensively around Europe. He spends some time working in the UK, but most of his work is carried out in other countries. He decides to sell his UK property. On 3 June he puts his furniture and other belonging in storage, and 2 weeks later he hands the keys to his estate agent.

He did not return to his UK property after 3 June, and stayed in hotels or with friends, on the occasions he came back to the UK. The property is not his home from 3 June, the date H put his furniture and belongings into storage.

It makes no difference whether a property is owned by an individual or by a company of which the individual is the ultimate beneficial owner.<sup>63</sup>

#### 5.20.8 Home: SRT/DTA compared

According to the RDRM, “home” in DTAs has a different meaning from “home” in the SRT:

The concept of home as described in this guidance relates only to the SRT. The guidance does not apply for the purpose of applying the Residence Article under a double taxation agreement. Double taxation agreements have additional qualifiers that are not included as part of the SRT and so the 2 terms do not have the same meaning.

---

<sup>63</sup> This is self-evident, but if authority is needed, see *O'Brien v Quigley* [2013] IEHC 398 at [49].

The expression in OECD Model is “permanent home” but “permanent” does not add much. It reflects the point that a temporary abode does not constitute a “home” at all. It is suggested that the meaning is the same in both contexts, or as near as makes no difference.

### 5.20.9 *Home/residence compared*

Is there a difference between “home” (in the SRT) and “residence” (in the sense of private residence<sup>64</sup>)? There could be a difference of nuance, for while a home must be a residence, the word home is more emotive and perhaps a residence need not be a home. But the difference is too slight to bear any weight, given the general vagueness of both words, and home has been used as a synonym of residence.<sup>65</sup> It is suggested that the words have essentially the same meaning. The drafter of the SRT rightly preferred the word “home” to avoid using “residence” in two different senses in the same schedule. Thus cases and guidance on what constitutes a residence for CGT private residence relief<sup>66</sup> may be relevant in determining what is a home.

This view leaves the law in a more rational state, as a distinction between a home and a residence is a fine one, if it is comprehensible at all, and best avoided if possible.

## 5.21 “Work”

### 5.21.1 *Work: Introduction*

“Work” matters for:

- (1) Overseas test 3: Overseas work
- (2) UK test 3: UK work
- (3) The work tie

See too 5.36.3 (Record keeping: Work).

The starting point is para 26(1) sch 45 FA 2013 which provides:

P is considered to be “working” (or doing “work”) at any time when P is doing something—

- (a) in the performance of duties of an employment held by P, or
- (b) in the course of a trade carried on by P (alone or in partnership).

---

64 See 5.1 (Concepts of residence).

65 See 5.2 (“Residence”).

66 See 5.2 (“Residence”).

In the following discussion:

Work within para (a) is “**employment-work**”.

Work within para (b) is “**trading-work**”.

The residence consultation response paper explains:

3.53 A variety of respondents asked for clarification about the definition of work as applied throughout the residence test. There were concerns that the definition would be too broad and could include activities that were related to work but which did not amount to undertaking work. ...

3.54 The Government proposes that, for the purposes of the residence test, an individual will be working if they are performing the duties of their office or employment or, in the case of the self-employed, doing something in the course of their trade. The Government believes this will ensure that the definition is not too broad.<sup>67</sup>

For instance, gardening in one’s own garden, or completing one’s own tax return, does involve work, often hard work, in the general sense; but it is not employment-work or trading-work, which is narrower.

### 5.21.2 *Employment-work*

Para 26(1) sch 45 FA 2013 provides:

P is considered to be “working” (or doing “work”) at any time when P is doing something—

(a) in the performance of duties of an employment held by P...

There is a similar definition in s.689(6) ITEPA.<sup>68</sup>

In order to apply this, it is necessary to ask:

- (1) whether P holds an employment; and
- (2) what are the duties of the employment.

The question of what are the duties of an employment comes up in various contexts, but most importantly in s.336 ITEPA which provides:

... a deduction from earnings is allowed for an amount if... the amount is incurred wholly, exclusively and necessarily in the performance of the

---

67 HM Treasury/HMRC, “Statutory definition of tax residence and reform of ordinary residence: a summary of responses” (June 2012)

[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_srt\\_or\\_summary.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf)

68 See 35.5.3 (“Work”).

duties of the employment.

“Duties of the employment” has always been narrowly understood. *Snowdon v Charnock* summarised:<sup>69</sup>

All the authorities distinguish between

- [1] expenditure incurred in the performance of duties (which is deductible) from
- [2] expenditure incurred to put the taxpayer in a position to perform the duties (which is not).

In *Consultant Psychiatrist v HMRC*:<sup>70</sup>

The principle to be derived from the authorities is that there is a distinction between

- [1] the nature of the job requiring the incurring of the expenditure, and
- [2] the expenditure enabling the person to do the job better ...

So in *Simpson v Tate*<sup>71</sup> the expenses of a medical officer keeping up-to-date were not deductible: this was not

moneys expended in the performance of his official duties. He does not incur these expenses in conducting professional inquiries or get the journals in order to read them to the patients ... He incurs these expenses in qualifying himself for continuing to hold his office.

Similarly, in *Humbles v Brooks*<sup>72</sup> the expenses of a headmaster attending history lectures were not deductible:

“In the performance of the said duties” means in the course of their performance ... “in doing the work of the office ...”. It does not include qualifying initially to perform the duties of the office, or even keeping qualified to perform them ... it does not mean adding to [his] usefulness in performing his duties.

In *Perrin v HMRC*<sup>73</sup> the judge summarised these cases and continued:

25. These cases to my mind expose a prior question: you have to decide

69 [2001] STC (SCD) 152 at [15]; and see Morse, “A confusion of facts, opinion and law? Employment income expenses and questions of fact and law: HMRC v Banerjee in the Court of Appeal” [2010] BTR 485.

70 [2006] STC (SCD) 653.

71 9 TC 314 at 318.

72 40 TC 500 at 502.

73 [2008] STC (SCD) 672.

what is the nature of the job before you can decide whether what is done is in the course of the job, or is merely enabling or improving. A surgeon reads the latest research in his lunch break, looks at the scans and x-rays, consults his notes, washes his hands, puts on his gloves and picks up his knife. Which of those acts are part of the nature of his job and which enable him to do it better or puts him in a position to perform the duties of his job? It depends on how, semantically, you describe the nature of his job.

In *Fitzpatrick v IRC* Lord Templeman said:

The journalists in the present case chose to spend several hours everyday reading a formidable mass of repetitive newsprint dealing with the events of yesterday. In my opinion, they were not, in the course of that reading, engaged in the performance of the duties for which they were paid.<sup>74</sup>

I note the last few words 'for which they were paid'. Lord Templeman then also notes that a fact common to all the journalists was that 'the journalist was not remunerated for the time he spent in reading newspapers at home.' It seems to me therefore that a valuable insight into the nature of the job may be obtained by asking: what activities are paid for? And there may be a difference between the activities which are paid for, and those which are required as a condition of the employment (the student assistant in the laboratories in *Blackwell v Mills*, the bank manager in *Brown v Bullock* were all required to do something, but in each case that was not something 'paid for' or in the course of his duties)...

30. In *Snowdon v Charnock* Dr Brice found the following factors as being particularly relevant to the decision that the attendance at the psychotherapy sessions was not in the duties of the training post job: that the cost was not normally met by the employer; that the timing was not dictated by the employer but a matter between the individual and the analyst; and that the timing of the sessions was not acceptable as a reason for being unable to fulfil course requirements. It seems to me that the last two of these factors are valuable indicators of what the psychiatrist was 'paid for'.

31. If an employer recruits a number of new employees and says to them 'You will start work in the summer, but on the following 1 October and 1 February you must all attend a week's course at our training centre', then it seems to me that this attendance is part of the nature of the job and in the performance of their duties: they are paid to attend, they

---

74 66 TC 407.

attend at a place and at times specified by the employer, and do what their employer wants them to do there. The same would be true in my view if the course were run by a third party. And, in such a case, if the employee were obliged to pay for the course, then it could be said that the nature of the duties included attendance at the course, and that the obligation to pay was incurred in the performance of those duties.

32. But where the employer does not dictate the times of attendance, where the attendance is generally required but is outside normal working hours, where attendance must not conflict with other duties, in those situations one hesitates to say that the employee is 'paid for' attendance, and it can be said that the nature of the job does not encompass attendance even though it may be required by the employer.

33. In Mr Perrin's case I find that the following factors point away from the attendance at the courses being one of the duties for which he was paid (or something required by the nature of his job):

- (i) some of the courses took place partly on Saturdays and he was not paid for attendance on Saturdays,
- (ii) the staff handbook indicated that study leave could be granted in the discretion of the firm: it is described as 'leave' ie in the nature of time away from his duties; and there was no prescription as to what training should be done when. The requirement to attend training in the letter of 6 April 2004 did not alter the fact that paid leave to attend the courses was discretionary.

34. I do not find that [the employer's] view that the attendance at the courses was in the performance of Mr Perrin's duties, nor the fact that Mr Perrin was obliged to attend them by his contract nor even that he could be dismissed if he did not, sufficient to cause me to think that the attendance was part of the nature of his job. Mr Perrin was a trainee accountant and it seems to me that he was not paid for attending the courses, but for his work in the firm's business.

35. I conclude that the nature of Mr Perrin's job did not require the expenditure on the courses even though it enabled him to do the job better (with consequent benefit for himself and the firm), and even though attendance was required by his contract; and therefore that the cost of attendance was not incurred in the performance of the duties of his employment.

The EIM discusses this issue:

**EIM31650 in the performance of the duties** [May 2020]

An expense cannot be deducted under the general rule for employees' expenses in Section 336 ITEPA 2003 unless it is incurred "in the

performance of the duties of the office or employment”. The Courts have emphasised the importance of finding out exactly what the duties entail, see EIM31635, and have traditionally taken a very restrictive approach. In *Nolder v Walters* (15 TC 380) Rowlatt J commented at page 387 that the phrase means:

“in doing the work of the office, in doing the things which it is his duty to do while doing the work of the office.”

Therefore, to satisfy this test, the expense must be incurred in actually carrying out the duties of the job. It is not enough for the expense to be relevant to the job, or to be incurred in connection with the duties of the job. Nor is it enough if the expense only puts the employee in a position to start work or keeps the employee qualified to do the work. Expenses that are incurred in preparation to carry out the duties of the employment or as training to carry out the duties of the employment are not deductible...

#### **EIM31651 decided cases** [May 2020]

There are a number of cases in which the Courts have held that expenditure incurred in connection with an employment was not deductible because it was not incurred in the performance of the duties of the employment. Examples include

*Shortt v McIlgorm* (26 TC 262) Fees paid to an employment agency to get a job, see EIM32560.

*Blackwell v Mills* (26 TC 468) Cost of attending evening classes to become better qualified, see EIM32525.

*Eagles v Levy* (19 TC 23) Legal costs to recover wages, see EIM32865.

*Ansell v Brown* (73 TC 338) Cost of dietary supplements for professional sports player, see EIM32507.

#### **EIM31652 Fitzpatrick v IRC** [May 2020]

The case of *Fitzpatrick v IRC* (66 TC 407) contains a recent restatement by the House of Lords of the traditionally stringent and restrictive approach of the Courts to defining the duties of the employment.

The case concerned journalists and other employees in the newspaper industry who received an allowance from their employer to pay for the purchase of other newspapers that they mostly read at home. It was not disputed that the allowance was a taxable emolument but they argued for a deduction for the amount spent because reading other newspapers was part of the duties of their employment.

It was accepted by the Courts that the purpose of the journalists in reading other newspapers was to perform their duties more efficiently. It was also accepted that the reading of other newspapers was encouraged or even required by their employers. Nevertheless, no

deduction was allowed.

Lord Templeman commented on page 521 that:

“a journalist does not purchase and read newspapers in the performance of his duties but for the purpose of ensuring that he will carry out his duties efficiently... A sports reporter is employed to report sport, not to read newspapers, a photographer is employed to produce pictures for his newspaper not to study the pictures of others. An editor is employed to select, draft and arrange items in his newspaper, not to read other newspapers. A journalist who reads newspapers does so in order to be able to perform his duties to the highest possible standard but he does not read “in the performance of his duties”.

**EIM31653 in the performance of the duties: example** [May 2020]

An employee is a salesman for a company with a major export trade to France. He knows that he will not be able to perform his duties properly unless he improves his command of the French language. He enrolls in a night school course for one evening each week. He asks for a deduction for the cost of the course.

No deduction is due. The employee’s duties as a salesman do not extend to learning French at night school, see EIM31650.

Underlying all these decisions was a policy decision not to allow employees to deduct expenses. In *Simpson v Tate*:<sup>75</sup>

I think that all subscriptions to professional societies and all taking in of professional literature and all that sort of expense, which enables a man to keep himself fit for what he is doing, are things which can none of them he allowed. If they were allowed every professional man would say “I have to belong to this society and I have to belong to that society; I have to take in this publication and I have to take in that publication, and to do all sorts of things,” and there would be no end to it.

Lord Templeman picked up the point in *Fitzpatrick*:<sup>76</sup>

If deductions of this kind were allowed in one case every journalist or other similar employee would claim to be entitled to deduct the payment made by him for every newspaper and periodical which he chose to purchase “...and there would be no end to it”.

But the phrase “in the performance of duties of an employment” should

---

<sup>75</sup> 9 TC 314 at p.318.

<sup>76</sup> 66 TC 407 at p.521H.

have the same meaning throughout, so the same approach applies in deciding what counts as working for the SRT; even though in residence cases it will sometimes be in the interest of HMRC to argue that actions *are* in the performance of the duties of employment, and in the interest of taxpayer to argue that they are not.

### 5.21.3 *Para 26(2) employment-income test*

Para 26(2) sch 45 FA 2013 provides:

In deciding whether something is being done in the performance of duties of an employment, regard must be had to whether, if value were received by P for doing the thing, it [the receipt] would fall within the definition of employment income in section 7 of ITEPA 2003<sup>77</sup>.

I refer to this provision as the “**para 26(2) employment-income test**”.

There are two aspects to this provision:

- (1) A hypothetical question: if value were received by P for doing something, would the receipt be employment income?
- (2) If the answer to that question is yes, then it does not necessarily follow that the thing done is employment-work. One must “have regard” to that fact. It is suggested that this means that the thing done should be regarded as work if appropriate in the context of the SRT. That must be decided on the facts of the case.

The hypothetical question is not as straightforward as the authors of the SRT may have thought.

- (1) It does not specify who provides the value received by P. The passive voice (“if value were received”) conceals the identity of the actor, in this case the person who provides the value.<sup>78</sup> If value (a benefit) is provided by the employer, it would be deemed to be by reason of the employment and so necessarily employment income!<sup>79</sup> But clearly that is to be ignored for the purposes of the hypothetical question. The question is whether the value would be ordinary earnings<sup>80</sup> (in pre-write terminology, emoluments).

---

77 See 33.4.4 (“Employment income”).

78 See Fowler’s *Dictionary of Modern English Usage* (4<sup>th</sup> ed, 2015) entry under *Passive Voice 5: Criticised Uses*.

79 See 79.10 (“By reason of the employment”).

80 See 33.4.1 (“Ordinary” earnings).

- (2) If someone else pays, the question is, why did they pay? Was it a reward for services?

For instance, an employee may choose to have a health check. If an employer paid the employee to do that, the receipt would be employment income.<sup>81</sup> But if anyone else paid then presumably, not. The health check is not employment-work. However, one hardly needs the help of para 26(2) to reach that conclusion.

Given the difficulties of the hypothetical question, and the intangible nature of the consequences of the answer to it if an answer can be found, it is doubtful whether the para 26(2) employment-income test is ever going to be helpful. It may be significant in relation to the topics of gardening leave and shadow directors; see below.

#### 5.21.4 *Trading-work*

Para 26(1) sch 45 FA 2013 provides:

P is considered to be “working” (or doing “work”) at any time when P is doing something ...

- (b) in the course of a trade carried on by P (alone or in partnership).

In order to apply this, it is necessary to ask:

- (1) whether P carries on a trade; and
- (2) whether P is doing something in the course of that trade.

Para 145 sch 45 FA 2013 provides an inclusive definition of trade:

“trade” also includes–

- (a) a profession or vocation,
- (b) anything that is treated as a trade for income tax purposes, and
- (c) the commercial occupation of woodlands (within the meaning of section 11(2) of ITTOIA 2005).

Para 26(3) sch 45 FA 2013 provides guidance towards the issue of whether something is done in the course of a trade:

In deciding whether something is being done in the course of a trade, regard must be had to whether, if expenses were incurred by P in doing the thing, the expenses could be deducted in calculating the profits of the

---

<sup>81</sup> Perhaps under the benefits code, which falls within the definition of employment income, see 33.4 (Employment income/earnings).

trade for income tax purposes.

Para 26(3) seems self-evident, since deductible trading expenses are incurred wholly for trading purposes. Perhaps the point is that if expenses could not be deducted (because they were incurred partly for non-trading purposes) then that suggests the activity is not done in the course of a trade. But since para 26(3) does not supply a determinative factor (it only says “regard must be had...”) this really does not take us much further; though it does no harm.

#### 5.21.5 *Training*

Para 26 sch 45 FA 2013 provides:

- (5) Time spent undertaking training counts as time spent working if—
  - (a) in the case of an employment held by P, the training is provided or paid for by the employer and is undertaken to help P in performing duties of the employment, and
  - (b) in the case of a trade<sup>82</sup> carried on by P, the cost of the training could be deducted in calculating the profits of the trade for income tax purposes.
- (6) Sub-paragraphs (4) and (5) have effect without prejudice to the generality of sub-paragraphs (2) and (3).

Para (a) does not add much, as the gist of the cases above is that training is paid for by the employer is likely to be one of the duties of the employment, in the general sense, and so working within the general definition.

Para (b) seems self-evident, since deductible trading expenses are incurred wholly for trading purposes. Perhaps the point is that if cost could not be deducted (because it was incurred partly for non-trading purposes) then that suggests the training is not done in the course of a trade.

#### 5.21.6 *Time on call*

The RDRM provides:

**RDRM11750: Days spent in the UK: Travel either to or from a temporary workplace** [May 2020]

... Being on- call or stand-by may count as time spent working depending

---

82 Para 145 sch 45 FA 2013 provides a wide definition set out in a footnote above.

on the conditions of an individual's employment and the nature of their duties.

The RDRM provides 2 examples:

Example 3 (Paula)

P works as an engineer and is contractually required to be on-call for 4 night a month, in addition to her normal full-time attendance. She is paid a retainer for those 4 nights, in addition to being paid for any work if she is called out. The 4 nights are counted as working time.

Example 4 (Franek)

F is a self-employed locksmith, who keeps his mobile phone switched on 24 hours a day to receive customer calls. For the purposes of calculating work time, F should only include the time spent carrying out his jobs and the related travelling time.

While care needs to be taken in referring to cases on different provisions, this is consistent with case law on the working time regulations.<sup>83</sup>

### 5.21.7 Gardening leave

The expression “gardening leave” is used when an employee is instructed not to work, during a notice period. P is not working in the general sense and not within para 26(1) as P is not “doing something”. P is doing nothing. If that is working, how many hours a day is P working? and where is the work done?

But the para 26(2) employment-income test<sup>84</sup> does support the view that gardening leave counts as employment-work, as P is being paid for doing nothing, and what he is paid is employment income. The answer to the hypothetical question in para 26(2) is, yes.

The HMRC view is that gardening leave counts as working. The RDRM provides:

**RDRM11740: Days spent in the UK: Work for the purpose of the SRT [May 2020]**

...An individual's time spent working includes:

- instances where their employer instructs an individual to stay away from work, for example while serving a period of notice while they remain on the payroll.

---

<sup>83</sup> *MacCartney v Oversley House Management* [2006] UKEAT 0500\_05\_3101.

<sup>84</sup> See 5.21.3 (Para 26(2) employment-income test).

HMRC say:

*Question:* If an expat is on gardening leave abroad for say 90 days (in between 2 overseas employments), would this be considered a significant break<sup>85</sup> when looking at residence status for FTWA. They would not be able to go to work for the odd day but are they really on call (so working) so not on a break ?

*HMRC answer:* HMRC can confirm that for the purpose of the SRT gardening leave is regarded as work and satisfies the test at para 26(2) Sch 45 FA 2013. In the scenario outlined there is no significant break from work.<sup>86</sup>

### 5.21.8 Travel

Para 26 sch 45 FA 2013 provides:

- (4) Time spent travelling counts as time spent working–
  - (a) if the cost of the journey could, if it were incurred by P, be deducted
    - [i] in calculating P’s earnings from that employment under section 337, 338, 340 or 342 of ITEPA 2003,
    - [ii] or, as the case may be, in calculating the profits of the trade<sup>87</sup> under ITTOIA 2005, or
  - (b) to the extent that P does something else during the journey that would itself count as work in accordance with this paragraph...
- (6) Sub-paragraphs (4) and (5) have effect without prejudice to the generality of sub-paragraphs (2) and (3).

The rules for the deductibility of travel costs are complex. For employments see 34.1 (Travel expenses: Introduction). For trades there are no express statutory rules but there is extensive case law, discussed in BIM37605 onwards. I hope to cover that topic in a future edition.

Para (a) raises the pleasing possibility of situations where HMRC argue *for* deductibility of the expenses, and the taxpayer argues against.

Para (b) applies “to the extent” that the individual works; eg if the individual spends 5 minutes working during a six hour journey only the 5

---

<sup>85</sup> See 5.24 “Significant break from work”.

<sup>86</sup> Joint Expatriate Forum on Tax and NICs (July 2014)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/347913/140731\\_Expatriate\\_Forum\\_Minutes.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expatriate_Forum_Minutes.pdf)

<sup>87</sup> Para 145 sch 45 FA 2013 provides a wide definition of trade, set out in a footnote above.

minutes will be classified as work. Reading emails will count as work, so in practice travel will generally involve some work, unless the employee deliberately chooses not to work.

What is “travelling” is not always clear. A person who stops at a traffic light is still travelling. A person who stops for lunch has stopped travelling. What about queuing at immigration or for luggage? Perhaps it depends on whether the queue is an ordinary one or unusually long.

See too 5.22 (Where is work done).

#### 5.21.9 *Assumption of chargeability*

Para 26(7) sch 45 FA 2013 provides:

Assume for the purposes of sub-paragraphs (2) to (5) that P is someone who is chargeable to income tax under ITEPA 2003 or ITTOIA 2005.

This prevents an argument that the rules in para 26(2)-(5) are not applicable where DT relief overrides the usual charge on employment income.

#### 5.21.10 *Shareholder tasks*

Suppose a person is both shareholder and director. One must distinguish:

- (1) Actions carrying out duties of the directorship
- (2) Actions carrying out powers (or duties, if any) of shareholders which are not duties of the directorship (“shareholder tasks”).

Shareholder tasks are not employment-work. Under standard company articles, that includes decisions such as appointing directors, issuing shares, and putting a company into liquidation.

It is considered that the para 26(2) employment-income test<sup>88</sup> does not alter that conclusion. But in practice, little time will be spent on shareholder tasks, and it is likely that the large majority of the time spent will count as employment-work.

#### 5.21.11 *Work by shadow director*

Para 26(1) sch 45 FA 2013 provides:

P is considered to be “working” (or doing “work”) at any time when P is doing something–

---

<sup>88</sup> See 5.21.3 (Para 26(2) employment-income test).

- (a) in the performance of duties of an *employment* held by P...

A shadow director does not hold an “employment” within the applicable definition.<sup>89</sup> So at first sight it seems that a shadow director cannot do employment-work.

It would however be surprising if one could avoid the work tie (and UK test 3, UK work) by:

- (1) arranging not to be a director or employee, while
- (2) continuing to work for the company, and act as shadow director, for no express remuneration (but able to take effective remuneration by way of dividend).

HMRC may well argue that the answer is found in the para 26(2) employment-income test:<sup>90</sup>

- (1) If value were received by the shadow director for doing what he does, the receipt would fall within the definition of employment income in s.7 ITEPA.<sup>91</sup>
- (2) One must “have regard” to that fact. In the context of the SRT, it is suggested that the implication is:
  - (a) a shadow directorship is to be regarded as an employment
  - (b) the things done by the shadow director are to be regarded as duties.

#### 5.21.12 *Work by actual director*

Suppose an individual is not a shadow director, but nevertheless does work for a company (of which they may be the owner or indirect owner) for no express remuneration (but able to take effective remuneration by way of dividend). Assume that the individual does not have an actual contract of employment or office.

In this scenario, the individual again does not have an “employment” within the applicable definition.<sup>92</sup> So at first sight it seems that the individual cannot do employment-work.

HMRC may argue that the para 26(1) definition of work is inclusive, not exclusive. Thus a person who does not have an employment (or trade) may be “working”, if their activities are otherwise exactly what one would

---

<sup>89</sup> See 5.25.1 (“Employment”). It is assumed that the shadow director does not have an actual contract of employment.

<sup>90</sup> See 5.21.3 (Para 26(2) employment-income test).

<sup>91</sup> See 79.6.4 (Charge on shadow director).

<sup>92</sup> See 5.25.1 (“Employment”).

expect to fall within the scope of para 26(1). But if one treats para 26(1) as an inclusive definition, it is difficult to see where to draw the line between work which counts for the SRT and work which does not.

HMRC may argue that the answer is found in the para 26(2) employment-income test.<sup>93</sup>

- (1) If value were received by the individual for doing what he does, would the receipt would constitute employment income? In the absence of an employment, it would not. But if value were received, there is likely to be an employment. In other words, para 26(2) imposes a deemed employment.
- (2) If the answer to the hypothetical question is yes, and one has regard for it, the provision may be taken to allow the non-employees employment-like activities to count as employment-work.

It is suggested that the court should draw the line at shadow directors, so those who are not employees or shadow directors cannot do employment-work. But taxpayers concerned about the work tie should err on the side of caution; and in cases where a taxpayer terminated a contract of employment specifically to take advantage of this rule, the courts may not be sympathetic.

## 5.22 Where is work done

The location of work matters as work must be done overseas to qualify for overseas test 3 (overseas work), and in the UK to qualify for UK test 3 (UK work) or for the work tie. See 33.30 (Where are duties performed).

Para 27(1) sch 45 FA 2013 provides a commonsense rule:

Work is done where it is actually done, regardless of where the employment is held or the trade is carried on by P.

There is special rule for the location of travelling work. Para 27 sch 45 FA 2013 provides:

- (2) But work done by way of or in the course of travelling to or from the UK by air or sea or via a tunnel under the sea is assumed to be done overseas even during the part of the journey in or over the UK.
- (3) For these purposes, travelling to or from the UK is taken to—
  - (a) begin when P boards the aircraft, ship or train that is bound for a destination in the UK or (as the case may be) overseas, and

---

<sup>93</sup> See 5.21.3 (Para 26(2) employment-income test).

- (b) end when P disembarks from the aircraft, ship or train.

This applies:

- (1) Where travel itself counts as work<sup>94</sup> (“work by way of travelling); and
- (2) Where the travel is not work, but other work is done while travelling (“work in the course of travelling”).

This rule may make flying directly to or from a regional airport more attractive as UK work would not start until the individual disembarks at the regional airport rather than at (say) Heathrow/Gatwick before taking a connecting flight or other transport to the destination. The use of cross channel ferries may be disadvantageous when compared with travel by Eurostar given the point at which UK work is deemed to begin and end. But I suspect that however the journey is arranged, it will be rare for a business trip to the UK not to constitute a 3-hour UK workday.

### **5.23 Reference period: Non-work days**

The reference period matters for computing the sufficient hours tests for

- (1) Automatic overseas test 3 (Overseas work) and
- (2) “Automatic” UK test 3 (UK work).

Para 28(1) sch 45 FA 2013 provides:

This paragraph applies in calculating the “reference period” (which is a step taken in determining whether P works “sufficient hours in the UK” or “sufficient hours overseas” as assessed over a given period of days).

#### *5.23.1 Reduction for non-work days*

There are three reductions. Para 28(2) sch 45 FA 2013 provides:

The number of days in the given period may be reduced to take account of—

- (a) reasonable amounts of annual leave or parenting leave taken by P during the period (for all employments held and trades carried on by P during the period, whether in the UK or overseas),
- (b) absences from work at times during the period when P is on sick leave and cannot reasonably be expected to work as a result of the illness or injury in question, and
- (c) non-working days embedded within a block of leave for which

---

94 See 5.21.8 (Travel).

a reduction is made under paragraph (a) or (b).

### 5.23.2 Annual/parenting leave

These terms matter for the concepts of reference period and significant breaks from work, which are relevant for overseas test 3 (overseas work) and UK test 3 (UK work).

Para 145 sch 45 FA 2013 provides:

“parenting leave” means maternity leave, paternity leave, adoption leave or parental leave (whether statutory or otherwise);

Para 146 sch 45 FA 2013 provides:

In relation to an individual who carries on a trade—

- (a) a reference in this Schedule to annual leave or parenting leave is to reasonable amounts of time off from work for the same purposes as the purposes for which annual leave or parenting leave is taken, and
- (b) what are “reasonable amounts” is to be assessed having regard to the annual leave or parenting leave to which an employee might reasonably expect to be entitled if doing similar work.

HMRC say, correctly, that regular (rotational) leave is not “annual leave”:

*Question:* Client works a 48 hour week (Mon to Sat) in Saudi and he works the 48 hour weeks in blocks of 10. He then gets 2 weeks off and this is called rotational leave, he does not get any other annual leave.

Are the 2 weeks off after every 10 weeks of work considered annual leave for the ‘sufficient hours worked overseas’ test, or would it fall within the non-working day embedded within a block of leave rules.

*HMRC answer:* The SRT does not define annual leave. Any entitlement to annual leave will usually be set out in the clauses of an employment contract or contract for services.

[HMRC refer to the statutory provisions and continue]

In the example you have used the 2 week periods of rotational leave taken after every 10 weeks of working 48 hours per weeks do not appear to be annual leave and therefore no deduction in the reference period calculation will be due. The days do however appear to be non-working days. However no deduction can be made in the reference period calculation for them unless they are ‘embedded within a block of leave’. This will of course be a question of fact.

For example, if a period of sick leave includes days when the individual would not normally work (and does not work) no deduction can be made

for those non work days in the reference period calculation. However, if the period of sick leave begins at least 3 days before the non work day(s) and ends at least 3 days after the non work days the non work days are regarded as ‘embedded within’ a block of leave and can be deduced in the reference period calculation.<sup>95</sup>

Para 28(4) sch 45 FA 2013 attempts to elucidate “reasonable amounts”:

For any particular employment or trade, “reasonable” amounts of annual leave or parenting leave are to be assessed having regard to (among other things)—

- (a) the nature of the work, and
- (b) the country or countries where P is working.

### 5.23.3 *Disregarded days*

Para 28(3) sch 45 FA 2013 provides:

But no reduction may be made in respect of any day that is a “disregarded day” (see paragraphs 9(2) and 14(3) in Part 1 of this Schedule).

For overseas test 3 (overseas work), “disregarded days” are UK workdays.<sup>96</sup>

For UK test 3 (UK work), “disregarded days” are overseas workdays.<sup>97</sup>

### 5.23.4 *“Embedded in block of leave”*

Para 28(5) sch 45 FA 2013 provides:

Non-working days are “embedded within” a block of leave only if there are, as part of that block of leave—

- (a) at least 3 consecutive days of leave taken before the non-working day or series of non-working days in question, and
- (b) at least 3 consecutive days of leave taken after the non-working day or series of non-working days in question.

### 5.23.5 *“Non-working day”*

---

95 Joint Expatriate Forum on Tax and NICs (July 2014)

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/347913/140731\\_Expat\\_Forum\\_Minutes.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/347913/140731_Expat_Forum_Minutes.pdf)

96 See 5.8.2 ( (a): Sufficient hours overseas).

97 See 5.13.2 (Sufficient hours in UK)..

Para 28(6) sch 45 FA 2013 provides:

A “non-working day” is any day of the week, month or year on which P—

- (a) is not normally expected to work (according to P’s contract of employment or usual pattern of work), and
- (b) does not in fact work.

### 5.23.6 Rounding

Para 28(7) sch 45 FA 2013 deals with rounding:

In calculating the reductions to be made under sub-paragraph (2)—

- (a) if it turns out, after applying sub-paragraph (3), that the reasonable amounts of annual leave or parenting leave or, as the case may be, the absences from work on sick leave do not add up (across the period) to a whole number of days, the number in that case is to be rounded down to the nearest whole number, but
- (b) any such rounding is to be ignored for the purposes of subparagraph (2)(c).

### 5.23.7 Change of employment

Para 28 sch 45 FA 2013 provides:

(8) If—

- (a) P changes employment during the given period,
- (b) there is a gap between the two employments, and
- (c) P does not work at all at any time between the two employments,

the number of days in the given period may be reduced by the number of days in that gap.

(9) But—

- (a) if the gap lasts for more than 15 days, only 15 days may be subtracted, and
- (b) if there is more than one change of employment during the period, the maximum number of days that may be subtracted under subparagraph (8) for all the gaps in total is 30.

The RDRM gives a straightforward example:

#### **RDRM11160: Gaps between employments [May 2020]**

Example 1 (Jack)

J is calculating his reference period and has 2 gaps between employments within the 365 day period he is considering.

The first gap was of 21 days and the second 5 days. J does not work at all in either gap. As the first gap exceeded the maximum number of days allowed for a single gap, J can only subtract 15 days from his reference period in relation to this gap between employments. He can subtract the full 5 days of the second gap.

J therefore subtracts a total of 20 days for gaps between employments from his 365 days period under Step 3 of the sufficient hours calculation.

The provision for gaps between employments does not apply for the self-employed; there is no deduction for gaps between self-employed work periods.

## 5.24 “Significant break from work”

“Significant break from work” matters for:

- (1) Overseas test 3 (Overseas work)
- (2) UK test 3 (UK work)

Para 29 sch 45 FA 2013 provides the definitions, which are conveniently read side by side:

### Para 29(1): Break from UK work

There is a “significant break from UK work” if at least 31 days go by and not one of those days is—

- (a) a day on which P does more than 3 hours’ work in the UK, or
- (b) a day on which P would have done more than 3 hours’ work in the UK but for being on annual leave, sick leave or parenting leave.<sup>98</sup>

### 29(2) Break from overseas work

There is a “significant break from overseas work” if at least 31 days go by and not one of those days is—

- (a) a day on which P does more than 3 hours’ work overseas, or
- (b) a day on which P would have done more than 3 hours’ work overseas but for being on annual leave, sick leave or parenting leave.

## 5.25 Minor definitions

### 5.25.1 “Employment”

“Employment” matters for:

---

<sup>98</sup> See 5.23.2 (Annual/parenting leave).  
FD\_5\_Residence\_of\_Individuals.wpd

- (1) Overseas test 3: Overseas work
- (2) UK test 3: UK work
- (3) The work tie

Para 145 sch 45 FA 2013 incorporates the standard ITEPA definition.<sup>99</sup> In short, the term includes:

- (1) Employment in the strict employment law sense
- (2) An office (the most common example is company director)

Para 26(8) sch 45 FA 2013 provides:

A voluntary post for which P has no contract of service does not count as an employment for the purposes of this Schedule.

At first sight, this is otiose. A contract of service is simply another expression for an employment contract. It would however be relevant in the case of a director of a charitable company (or other nonprofit company). That director would typically not be paid and not have a contract of service. Such a person would not hold an employment for the purposes of the SRT. That may in principle be advantageous (if the director works in the UK) or disadvantageous (if the director works outside the UK); but in the latter case it may be possible to give the director a contract of service, so that time spent working for the charity does count for the sufficient hours test.

Similarly, a trusteeship is an office but an unremunerated trusteeship is a voluntary post. That is so even if trustees could be remunerated, under a trustee charging clause in the trust deed or by statute, so long as the power to remunerate is not used. So acting as unpaid trustee does not count as work. That is the case for private trusts and for charitable trusts.

Well organised nonprofit organisations will have contracts with regular volunteers, but the contract is not likely to be a contract of service (an employment contract) so volunteers are not likely to have an employment.

“Voluntary post” is not defined. A voluntary post must be unpaid, but not all unpaid posts are voluntary. The word suggests an element of altruism. A director/shareholder of a commercial (for-profit) company may choose

---

<sup>99</sup> “employment”—

(a) has the meaning given in section 4 of ITEPA 2003, and

(b) includes an office within the meaning of section 5(3) of that Act.

For this definition see 33.3 (“Employer”, “employee” “employment”).

to work for no remuneration, taking profits by way of dividend; but a directorship of that kind is not a voluntary post.

### 5.25.2 “Overseas”

Para 145 sch 45 FA 2013 provides a definition:

“overseas” means anywhere outside the UK;

One might have thought “abroad” was more apt. Northern Ireland is not “overseas” but if one crosses the land border to the Republic of Ireland, one finds oneself “overseas”! But it does not matter.

### 5.25.3 *Zero is a number (!)*

Para 147 sch 45 FA 2013 provides:

A reference in this Schedule to a number of days being less than a specified number includes a case where the number of days is zero.

The drafter’s concern that zero may not be considered a number seems somewhat misconceived.

## 5.26 UK ties

This section considers the definition of “UK tie”. This matters for the application of the sufficient ties test, see 5.14 (Sufficient ties test).

Para 31(1) sch 45 FA 2013 provides:

What counts as a “UK tie” depends on whether P was resident in the UK for one or more of the 3 tax years preceding year X.

Thus there are different rules for leavers and for arrivers. Para 31(2) sets out the ties for leavers:

If P was resident in the UK for one or more of those 3 tax years, each of the following ties counts as a UK tie.

- (a) a family tie,
- (b) an accommodation tie,
- (c) a work tie,
- (d) a 90-day tie, and
- (e) a country tie.

Para 31(3) sets out the ties for arrivers:

Otherwise, each of the following ties counts as a UK tie.

- (a) a family tie,

- (b) an accommodation tie,
- (c) a work tie, and
- (d) a 90-day tie.

These are the same, but without the country tie.

## 5.27 Family tie

Para 32(1) sch 45 FA 2013 provides:

P has a family tie for year X if–

- (a) in year X, a relevant relationship exists at any time between P and another person, and
- (b) that other person is someone who is resident in the UK for year X.

If a couple split up at any time during the year, or a child attains 18, the family tie can still be met until the next tax year.

### 5.27.1 *Relevant relationship*

Para 32(2) sch 45 FA 2013 provides:

A relevant relationship exists at any time between P and another person if at the time–

- (a) P and the other person are husband and wife or civil partners and, in either case, are not separated,<sup>100</sup>
- (b) P and the other person are living together as husband and wife or, if they are of the same sex, as if they were civil partners,<sup>101</sup> or
- (c) the other person is a child of P's and is under the age of 18.

### 5.27.2 *Limited child contact in UK*

Para 32(3) sch 45 FA 2013 provides:

P does not have a family tie for year X by virtue of sub-paragraph (2)(c) if P sees the child in the UK on fewer than 61 days (in total) in–

- (a) year X, or
- (b) if the child turns 18 during year X, the part of year X before the day on which the child turns 18.

---

100 Para 32(5) sch 45 FA 2013 provides the standard definition of “separated”: see App 3.4.3 (Living together: married couple). The definition is repeated here because the standard definition applies for IT/CGT but not for IHT or (generally) for CT.

101 See App 3.4.3 (Meaning of “living together”).

The RDRM provides examples:

**RDRM13330: Annex C: Relevant relationships** [May 2020]

Example 1 (Jurgen)

Between May and November J visited the UK for 125 days, 104 of which were days on which he worked for more than 3 hours in the UK. When in the UK he stayed in a number of different hotels, so has no accommodation tie. He was not resident in the UK for any of the last 3 years. J's 17 year-old son lives and works full-time in the UK and is UK resident.

Under the sufficient ties test, J will be resident if he has 2 or more UK ties. He has a work tie. However, the only tie J and his son spent together in the UK during his visit was 3 weeks in the summer. Therefore J has no family tie and, having only 1 tie is not resident in the UK for that tax year. ...

Example 2 (Pierre)

P has a company flat in the UK which is permanently available to him and which he always uses when he comes here. This year P has been in the UK for 75 days, 41 of which were days on which he worked for more than 3 hours in the UK. He was resident in the UK the year before last. P's ex-wife lives in the UK with their 15 year old daughter. P has spent 70 days with his daughter this year.

Under the sufficient ties test (see RDRM11500 onwards), P will be UK resident if he has 3 or more UK ties. He has an accommodation tie and a work tie.

However, although P has spent 70 days with his daughter in the tax year, 21 of these days were spent at P's home in Paris, and 14 were spent in Spain. Only 35 of the days P has spent with his daughter were spent in the UK. So, P does not have a family tie, and because he only has 2 ties he will not be UK resident for this tax year. ...

It is a sign of the times that the drafter clarifies the word "see". Para 32(4) sch 45 FA 2013 provides:

A day counts as a day on which P sees the child if P sees the child in person for all or part of the day.

Seeing one's child on Skype does not count.

A blind person cannot satisfy the family tie.

In some circumstances, a parent may need to instruct a child to stay in bed and not get up until they leave the house!

If relevant, the individual should keep records of time spent visiting children in the UK.

### 5.27.3 *Ascertaining spouse's residence*

In order for an individual to apply the family tie test, it is necessary to decide whether the spouse/child is resident in the UK. But in order to decide whether an individual's spouse is resident under the SRT, it may be necessary to decide whether the individual is resident in the UK.

Para 33 sch 45 FA 2013 solves that problem by amending the residence test:

(1) This paragraph applies in deciding for the purposes (only) of paragraph 32(1)(b) whether a person with whom P has a relevant relationship (a "family member") is someone who is resident in the UK for year X.

(2) A family tie based on the fact that a family member has, by the same token, a relevant relationship with P is to be disregarded in deciding whether that family member is someone who is resident in the UK for year X.

The RDRM provides:

**RDRM13320: Annex C: The importance of a family tie** [May 2020]

Example (George and Mary)

G and his wife M both spend 140 days in the UK, (a fewer number of days than the 183 day threshold in the automatic UK test). Neither of them was resident in any of the 3 previous tax years. Under the sufficient ties test they will each be resident if they have 2 or more ties.

Both G and M have an accommodation tie. They also have a relevant relationship to each other, because they are man and wife. Therefore, if they had a family tie they would both be regarded as resident in the UK. However, because the family tie only exists because of their relevant relationship, the tie can be ignored.

As each of them only has 1 UK tie, neither of them is UK resident in that tax year.

### 5.27.4 *Child in full-time education*

Children at school in the UK are likely to be UK resident under UK test 1(183 UK days) or the sufficient ties test.

Para 33(3) sch 45 FA 2013 provides a special rule for residence of children for the purposes of the family tie:

A family member falling within sub-paragraph (4) is to be treated as being not resident in the UK for year X if the number of days that he or

she spends in the UK in the part of year X outside term-time is less than 21.

The RDRM provides:

**RDRM13330: Annex C: Relevant relationships** [May 2020]

For the purpose of the SRT half-term breaks are regarded as term-time.

Para 33 sch 45 FA 2013 provides:

- (4) A family member falls within this sub-paragraph if he or she—
  - (a) is a child of P’s who is under the age of 18,
  - (b) is in full-time education in the UK at any time in year X, and
  - (c) is resident in the UK for year X but would not be so resident if the time spent in full-time education in the UK in that year were disregarded.
- (5) In sub-paragraph (4)—
  - (a) references to full-time education in the UK are to full-time education at a university, college, school or other educational establishment in the UK, and
  - (b) the reference to the time spent in full-time education in the UK is to the time spent there during term-time.

The RDRM provides examples:

**RDRM11540: Full-time education of children and the family tie** [May 2020]

Example (Yok Lin)

YL attends boarding school in the UK. Term dates are:

- Saturday 6 April to Friday 5 July
- Sunday 3 September to Friday 15 December
- Sunday 7 January to Friday 23 March
- Sunday 15 April to Friday 6 July

She remains in the UK for the half-terms, staying with various friends and relatives, returning to the family home in Thailand during Christmas and Easter holidays. She spends 2 weeks of the summer break with her friends, travelling home to Thailand on 21 July.

As YL is only in the UK for 14 days outside term-time, her parents will not have a family tie with YL for the purposes of the SRT.

**RDRM13330: Annex C: Relevant relationships** [May 2020]

Example 3 (Clara)

C is 14 years-old and her parents, who reside in Dubai, because of her father’s work, send her to boarding school in the UK. She spends 10 days of her summer break on a school trip to Scotland, and 1 week (7 days),

of her Christmas break staying with friends in London. C has therefore spent 17 days in the UK outside term-time, but will not be regarded as resident in the UK for the purposes of the family tie, even though C herself is resident for tax purposes in the UK. ...

The RDRM provides:

**RDRM13410 International tax clarifications due to coronavirus (COVID 19) - Q&A [Aug 2020]**

**8. For the purposes of the family tie, are children under 18 years old still considered in full-time education although schools were currently shut due to the COVID-19 pandemic?**

For the purpose of the family tie a child who is in full-time education in the UK and as a result is resident here will not be treated as resident if they spend less than 21 days in the UK outside of term time.

As a result of the COVID-19 pandemic many schools closed, other than for vulnerable children or the children of key workers. However, there was a clear expectation that children's full-time education would continue albeit in a different environment. Therefore, they are considered to still be in full time education for this period.

If due to travel restrictions a child in full time education spends 21 days or more in the UK outside of term-time they cannot be treated as non-UK resident (assuming they are otherwise UK resident) for the purposes of the "family tie". This is because these days are not covered by the exceptional circumstances exception.

## 5.28 Accommodation tie

Para 34(1) sch 45 FA 2013 provides:

P has an accommodation tie for year X if–

- (a) P has a place to live in the UK,
- (b) that place is available to P during year X for a continuous period of at least 91 days, and
- (c) P spends at least one night at that place in that year.

### 5.28.1 *Place to live*

Para 34(3) sch 45 FA 2013 provides a commonsense definition:

P is considered to have a "place to live" in the UK if–

- (a) P's home or at least one of P's homes (if P has more than one) is in the UK, or
- (b) P has a holiday home or temporary retreat (or something similar) in the UK, or

- (c) accommodation is otherwise available to P where P can live when P is in the UK.

Para (a) is unnecessary, as a home is by definition a place to live, but perhaps it is intended to set the context for para (b) and (c).

A hospital bed is not a place to live, as it is not a home or accommodation, but is also perhaps unlikely to be available for 91 days.

A hospice could be a place to live, at least if available for 91 days.

### 5.28.2 Accommodation “available”

Para 34(4) sch 45 FA 2013 provides:

Accommodation may be “available” to P even if P holds no estate or interest in it and even if P has no legal right to occupy it.

The RDRM provides:

#### **RDRM13070 accommodation tie** [May 2020]

Example (Peter)

P left the UK last year to travel the world. He let his UK property on a 2 year lease, and has no rights to use the property. P has no home in the UK.

Before leaving the UK P agreed with his cousin that he could stay with her on any occasion he was in the UK. This is more than a casual offer; P’s cousin is fully prepared to put P up for several months at a time should he need it. He made 2 visits to the UK this year, each for 10 days, and stayed with her. P has an accommodation tie.

The main difference between the term ‘home’ for SRT purposes and available accommodation, is that accommodation can be transient and does not require the degree of stability or permanence that a home does. If an individual does not have a home in the UK they may still have an accommodation tie if they have a place to live in the UK.

#### **RDRM13080 The principle and characteristics of accommodation as a UK tie** [May 2020]

This guidance aims to give examples of what an accommodation tie may or may not be; whether somewhere is or is not an accommodation tie will always be dependent on the facts and circumstances of its use by the individual. HMRC may choose to enquire into those facts and circumstances.

Example 1 (Mary)

M has lived and worked in the USA for many years. Her uncle has a holiday houseboat in the UK where he has agree M can stay any time she wishes, for as long as she wishes, when she comes to the UK. M’s uncle

does not allow other people to stay in the houseboat.

Last year M came to the UK twice. She made arrangements to stay for 3 weeks with a friend and for 4 weeks with her brother. Although the houseboat was available for a continuous period of at least 91 days, M did not use it at all. Therefore, she had no accommodation tie in respect of the houseboat last year.

This year M again visited the UK twice, spending her 5 week summer holiday on her uncle's houseboat. This year M has an accommodation tie as the houseboat is available for a continuous period of at least 91 days and she has stayed on it for at least 1 night.

Example 2 (Simone)

S has lived and worked in France all her life. She and her brother purchased a cottage in the UK several years ago as a holiday home. The cottage is let for most of the year but June, July and August are always kept free so S or her brother can stay there. There are sufficient rooms in the cottage to ensure that S is able to stay there even when her brother and his family are there also.

S spent 2 weeks in the cottage last year and 3 weeks this year. S has an accommodation tie both last year and this year.

Accommodation is regarded as available to an individual for a continuous period of 91 days if they are able to use it, or it is at their disposal, at all times throughout that period, (subject to the 16 day gap rule, see below). If a relative were to make their home available to an individual casually, for a social visit, say, it will not mean that the accommodation would be regarded as being available to them. However, if it is available to an individual for a continuous period of 91 days and they use it casually, it will be a tie.

Similarly, a casual offer from a friend to 'stay in my spare room any time', will not constitute an accommodation tie, unless the friend really is prepared to put the individual up for 91 days at a time, (whether they actually do so or not).

Example 3 (Sacha)

S visits the UK on business and usually stays in different hotels. On one of these visits he takes an opportunity to attend Wimbledon Tennis Championships. A business associate who lives in Wimbledon invites S to stay at his flat for 3 nights rather than use a hotel. The arrangement is a one-off invitation, and the accommodation is not available to S for 91 days. It is not an accommodation tie. ...

**RDRM13090 When accommodation is not considered to be an accommodation tie** [May 2020]

Accommodation owned by an individual but which they have wholly let

out commercially would not be considered as available to live in unless they retained the right to use the property or part of the property...

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

*Question:* It would be useful to have some guidance as to what arrangements HMRC perceive to be continuously available for a consecutive period of 91 days – e.g. a situation where “your room” in your parents’ home is always potentially available but is not maintained for your exclusive use. If the parent has other visitors, they may also be put in that room. Consequently, it will always necessary to check in advance of each visit whether it will be possible to stay on specific dates. Can HMRC confirm this type of arrangement would not constitute continuously available accommodation for purposes of the SRT?

*HMRC answer:* HMRC can confirm that accommodation availability has to be more than ad hoc or casual. Arrangement can be tacit, verbal or written but the availability itself will be a question of fact and every case will be determined by reference to the available facts and circumstances of each case. Situations where availability is agreed but on a particular occasion it cannot be used - perhaps because some else is using it – will often be rendered irrelevant by the ‘gaps of fewer than 16 days are ignored’ rule at 34(2).<sup>102</sup>

### 5.28.3 Continuous period of 91 days

Para 34(2) sch 45 FA 2013 provides:

If there is a gap of fewer than 16 days between periods in year X when a particular place is available to P, that place is to be treated as continuing to be available to P during the gap.

This would be a problem for those who visit and stay in hotels every fortnight, because one ignores the gap of 15 days. The RDRM provides:

**RDRM13080 The principle and characteristics of accommodation as a UK tie [May 2020]**

Example 4 (Hyo)

H lives and works in Poland, he is his company’s European sales manager. This year he will be responsible for launching a new product in the UK and will need to spend time here. His sales force are on the road

---

102 29 January 2014

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/302475/140326\\_Expats\\_Forum\\_Jan\\_14\\_Minutes\\_FINAL.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf)

in the last week of every month, so he books a room in the same hotel for the first 3 weeks of June, July, August and September.

H has an accommodation tie.

**RDRM13090 When accommodation is not considered to be an accommodation tie** [May 2020]

Short stays at hotels and guesthouses will not usually be considered to be an accommodation tie. However, if an individual books a room in the same hotel or guesthouse, (and does not cancel those bookings), for at least 91 days continuously in a tax year, bearing in mind that short gaps may be discounted, they will have an accommodation tie. (See example 4 in RDRM13080).

#### 5.28.4 Home of close relative

Para 34(5) sch 45 FA 2013 provides:

If the accommodation is the home of a close relative of P's, subparagraph (1)(c) has effect as if for "at least one night" there were substituted "a total of at least 16 nights".

Amended as para 34(5) directs, para 34(1) provides:

P has an accommodation tie for year X if–

- (a) P has a place to live in the UK [in the form of accommodation which is the home of a close relative of P],
- (b) that place is available to P during year X for a continuous period of at least 91 days, and
- (c) P spends ~~at least one night~~ a total of at least 16 nights at that place in that year.

The relief is that one can stay up to 15 nights at a close relative without satisfying the accommodation tie. If someone is in a position where night 16 could trigger an accommodation tie, they may have to move to a hotel.

Para 34(6) sch 45 FA 2013 provides:

A "close relative" is–

- (a) a parent or grandparent,
- (b) a brother or sister,
- (c) a child aged 18 or over, or
- (d) a grandchild aged 18 or over,

in each case, including by half-blood or by marriage or civil partnership.

The words "by marriage or civil partnership" do not make sense; maybe they come from an earlier draft; maybe the intention is to include close

relatives of a spouse/civil partner or the spouse/civil partner of a close relative?

The RDRM gives a straightforward example:

**RDRM13080 The principle and characteristics of accommodation as a UK tie** [May 2020]

Example 5 (Ravi)

R can stay with his grandparents whenever he is in the UK. They will put him up for more than 91 days if he wishes. He usually comes from India every year to visit them, and stays with them for the whole summer.

Last year R spent only the first 2 weeks with his grandparents, then went on a one-off visit to his uncle, (who would not be regarded as a close relative for the purposes of the SRT), for 2 months before returning home. So, although accommodation at his grandparents, who are regarded as close relatives, was available for more than 91 days, R stayed with his grandparents for only 14 days, and therefore had no accommodation tie.

This year R spent the whole of the summer with his grandparents.

This year R has an accommodation tie.

If an individual stays in UK accommodation held by a spouse, partner or minor children, then they will be considered to have an accommodation tie if they spend at least 1 night there.

**RDRM13080 The principle and characteristics of accommodation as a UK tie** [May 2020]

Example 6 (Peter and Andrew)

P and his civil partner A share an apartment in London. Last year A moved to the USA to take up a university post to study marine biology. This year A came back to the UK for a 3 week holiday which he and P spent in Scotland. A spent the first and last nights of his holiday in their London apartment.

This year A has an accommodation tie.

It is possible to have more than 1 place in the UK that counts as available accommodation. However, this would still represent only 1 accommodation tie, no matter how many different places of accommodation are available.

**RDRM13080 The principle and characteristics of accommodation as a UK tie** [May 2020]

Example 7 (Julie)

J has lived in Canada with her husband for many years.

J and her husband own a holiday home in the UK which they do not let out, and in addition J can stay with her parents whenever she is in the UK, for as long as she wishes.

This year J visits the UK and stays with her parent for 4 weeks, and then spends a further 3 weeks in her holiday home before returning to Canada. This year although J has 2 places that count as available accommodation, she only has 1 accommodation tie.

### 5.29 Work tie

Para 35(1) sch 45 FA 2013 provides:

P has a work tie for year X if P works in the UK for at least 40 days (whether continuously or intermittently) in year X.

Para 35(2) sch 45 FA 2013 defines “works in the UK for a day”:

For these purposes, P works in the UK for a day if P does more than 3 hours’ work in the UK on that day.

Thus the requirement is forty 3-hour UK workdays. An individual may work any number of days in the UK if they work less than 3 hours in that day. On a workday they may work up to 24 hours and the day would only count as one UK workday for the work tie.

A day may count as a UK workday which does not count as a “day spent” in the UK (because P is not in the UK at midnight or because of exceptional circumstances).<sup>103</sup>

### 5.30 90-day tie

Para 37 sch 45 FA 2013 provides:

P has a 90-day tie for year X if P has spent more than 90 days in the UK in—

- (a) the tax year preceding year X,
- (b) the tax year preceding that tax year, or
- (c) each of those tax years separately.

### 5.31 Country tie

Para 38(1) sch 45 FA 2013 provides:

P has a country tie for year X if the country in which P meets the midnight test for the greatest number of days in year X is the UK.

Para 38(2) sch 45 FA 2013 provides a tie-breaker rule in the unusual case where P spends an equal number of midnights in two countries:

---

103 See 5.15.1 (Ascertaining days spent in UK).  
FD\_5\_Residence\_of\_Individuals.wpd

If–

- (a) P meets the midnight test for the same number of days in two or more countries, and
- (b) that number is the greatest number of days for which P meets the midnight test in any country in year X,

P has a country tie for year X if one of those countries is the UK.

The country tie applies to leavers but not to arrivers. That seems anomalous, but it does slightly simplify the administrative burden on those who are not leavers.

Perhaps one object is that HMRC can notify tax authorities of the country where the individual spends most time, to see if tax should be paid there.<sup>104</sup>

### 5.31.1 *The midnight test*

Para 38(3) sch 45 FA 2013 provides:

P meets the “midnight test” in a country for a day if P is present in that country at the end of that day.

The 3 exceptions which qualify the midnight test for “days spent” (transit passengers /exceptional circumstances/frequent visitors deeming rule)<sup>105</sup> do not apply here.

Para 145 sch 45 FA 2013 provides:

“country” includes a state or territory

Thus if an individual spends time in different states of a federal state, such as the USA, then the time counts as spent in one country. Eg if P spends 100 days in Florida, 100 days in New York, and 165 days in the UK, that counts as 200 days in the USA and P will not satisfy the country tie. That might not have been clear without the definition.<sup>106</sup>

Some constitutional research will occasionally be necessary. Are Spain and Majorca one country? Or Guernsey, Alderney and Sark? Or are they separate countries?

## 5.32 Year of death

### 5.32.1 *Death and the SRT*

---

104 See too 5.42 (Resident of nowhere).

105 See 5.15.1 (Ascertaining days spent in UK).

106 See 3.21 (Domicile territory/country).

Many of the residence tests depend on the number of days that some condition is satisfied during the year. The outcome could be affected if the individual dies during the year. For instance, overseas test 1 requires less than 16 UK days. There needs to be some provision for death during the year, or someone who died between 6 and 20 April would be non-resident.

Death alters the SRT in the following ways:

- (1) Overseas test 1 does not apply in the year of death
- (2) Additional residence tests apply in the year of death: overseas tests 4 and 5 and UK test 4
- (3) The day count requirement in the sufficient ties test is reduced in the year of death

### 5.32.2.3 years non-resident: Overseas test 4

Para 15 sch 45 FA 2013 provides:

- (1) The fourth automatic overseas test is that—
  - (a) P dies in year X,
  - (b) [i] P was resident in the UK for neither of the 2 tax years preceding year X or, alternatively, [ii] P's case falls within sub-paragraph (2), and
  - (c) the number of days that P spends in the UK in year X is less than 46.
- (2) P's case falls within this sub-paragraph if—
  - (a) P was not resident in the UK for the tax year preceding year X, and
  - (b) the tax year before that was a split year as respects P because the circumstances of the case fell within Case 1, Case 2 or Case 3 (see Part 3 of this Schedule) [that is, a leaver's split year].

### 5.32.3 Working overseas: test 5

Para 16 sch 45 FA 2013 provides:

- (1) The fifth automatic overseas test is that—
  - (a) P dies in year X,
  - (b) P was resident in the UK for neither of the 2 tax years preceding year X because
    - [i] P met the third automatic overseas test [Overseas work] for each of those years or, alternatively,
    - [ii] P's case falls within sub-paragraph (2), and
  - (c) P would meet the third automatic overseas test for year X if

paragraph 14 were read with the relevant modifications.

- (2) P's case falls within this sub-paragraph if—
  - (a) P was not resident in the UK for the tax year preceding year X because P met the third automatic overseas test for that year, and
  - (b) the tax year before that was a split year as respects P because the circumstances of the case fell within Case 1 (see Part 3 of this Schedule) [leaving for overseas work].<sup>107</sup>
- (3) The relevant modifications of paragraph 14 are—
  - (a) in sub-paragraph (1)(a) and (b) and sub-paragraph (3), for “year X” read “the period from the start of year X up to and including the day before the day of P's death”, and
  - (b) in step 3 of sub-paragraph (3), for “365 (or 366 if year X includes 29 February)” read “the number of days in the period from the start of year X up to and including the day before the day of P's death”.

Amended as para 16(3) directs, para 14 reads:

- (1) The third automatic overseas test is that—
  - (a) P works sufficient hours overseas, as assessed over ~~year X~~ the period from the start of year X up to and including the day before the day of P's death,
  - (b) during ~~year X~~ the period from the start of year X up to and including the day before the day of P's death, there are no significant breaks from overseas work,
  - (c) the number of days in year X on which P does more than 3 hours' work in the UK is less than 31, and
  - (d) the number of days in year X falling within sub-paragraph (2) is less than 91.
- (2) A day falls within this sub-paragraph if—
  - (a) it is a day spent by P in the UK, but
  - (b) it is not a day that is treated under paragraph 23(4) as a day spent by P in the UK.
- (3) Take the following steps to work out whether P works “sufficient hours overseas” as assessed over ~~year X~~ the period from the start of year X up to and including the day before the day of P's death—

*Step 1 [disregarded days]*

Identify any days in ~~year X~~ the period from the start of year X up to and including the day before the day of P's death on which P does more than 3 hours' work in the UK, including ones on which P also does work overseas on the same day. The days so identified are referred to as “disregarded days”.

---

<sup>107</sup> See 9.6 (Case 1: Start work overseas).

*Step 2 [net overseas hours]*

Add up (for all employments held and trades carried on by P) the total number of hours that P works overseas in ~~year X~~ the period from the start of year X up to and including the day before the day of P's death, but ignoring any hours that P works overseas on disregarded days.

The result is referred to as P's "net overseas hours".

*Step 3 [reference-period days]*

Subtract from ~~365 (or 366 if year X includes 29 February)~~ the number of days in the period from the start of year X up to and including the day before the day of P's death

- (a) the total number of disregarded days, and
- (b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.

The result is referred to as the "reference period".

*Step 4 [reference-period weeks]*

Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.

*Step 5 [compute net overseas hours ÷ no. of reference-period weeks]*

Divide P's net overseas hours by the number resulting from step 4.

If the answer is 35 or more, P is considered to work "sufficient hours overseas" as assessed over ~~year X~~ the period from the start of year X up to and including the day before the day of P's death.

#### 5.32.4 UK test 4: UK home

Death in a year may prevent any of the UK tests from being met. For instance, UK test 2 (UK home) will not be met if P dies within the 91-day Test Window.

Para 10(1) sch 45 FA 2013 provides an additional UK test for the year of death:

The fourth automatic UK test is that—

- (a) P dies in year X,
- (b) for each of the previous 3 tax years, P was resident in the UK by virtue of meeting the automatic residence test,

UK residence by virtue of meeting the sufficient ties test does not count.

- (c) even assuming P were not resident in the UK for year X, the tax year preceding year X would not be a split year as respects P (see Part 3 of this Schedule),

So if the preceding year (year X - 1) is a split year, UK test 4 is not met. The words "even assuming P were not resident in the UK for year X" are

needed for split year Cases 2 and 3, under which a requirement for split year treatment in one year is that P is non-resident in the following year.<sup>108</sup>

- (d) when P died, either—
  - (i) P's home was in the UK, or
  - (ii) P had more than one home and at least one of them was in the UK

Unlike UK test 2, there is no requirement to have a home for a specified time, or to spend any time in the home. But there must be a home at the time of death (not earlier). There might be some scope for deathbed planning there: granting lease to a third party just before death would prevent this condition being met.

- (e) if P had a home overseas during all or part of year X, P did not spend a sufficient amount of time there in year X.

The point of para (e) is that the test is not intended to catch, for example, someone who is living back in their overseas home following a secondment to the UK but retains a UK home. Provided the 'spending sufficient time' requirement is met, in respect of an overseas home, the rule ensures that the individual does not automatically become UK resident as a result of their death.

Para 10 sch 45 FA 2013 provides:

- (2) In relation to a home of P's overseas, P "spent a sufficient amount of time" there in year X if—
  - (a) there were at least 30 days in year X when P was present there on that day for at least some of the time (no matter how short a time), or
  - (b) P was present there for at least some of the time (no matter how short a time) on each day of year X up to and including the day on which P died.

Para (b) must be hard to meet. If P becomes ill, and is taken to hospital, then condition (b) is met if P dies on the same day but not if P dies on the next day. If P has two foreign homes, and is sometimes present in one and sometimes present in the other, condition (b) will not be met.

- (3) In sub-paragraph (2)—

---

108 See 9.9.5 (Non-resident in next year: Case 2); 9.6.4 (Non-resident in next year: Case 3).

- (a) the reference to 30 days is to 30 days in aggregate, whether the days were consecutive or intermittent, and
  - (b) the reference to P being present at the home is to P being present there at a time when it was a home of P's.
- (4) If P had more than one home overseas—
- (a) each of those homes must be looked at separately to see if the requirement of sub-paragraph (1)(e) is met, and
  - (b) that requirement is then met so long as it is met in relation to each of them.

This repeats the rules which apply to UK test 2.

### 5.32.5 Death: Sufficient ties

The sufficient ties test is amended if the individual dies during the year. Para 20(1) sch 45 FA 2013 provides:

If P dies in year X, paragraph 18 has effect as if the words “More than 15 but” were omitted from the first column of the Table.

The first column of the table therefore reads:

<b>Days spent by P in the UK in year X</b>	<b>Number of ties that are sufficient</b>
<del>More than 15 but</del> not more than 45	At least 4

Para 20 sch 45 FA 2013 provides:

(2) In addition to that modification, if the death occurs before 1 March in year X, paragraphs 18 and 19 have effect as if each number of days mentioned in the first column of the Table were reduced by the appropriate number.

(3) The appropriate number is found by multiplying the number of days, in each case, by  $A \div 12$

where “A” is the number of whole months<sup>109</sup> in year X after the month in which P dies.

(4) If, for any number of days, the appropriate number is not a whole number, the appropriate number is to be rounded up or down as follows—

- (a) if the first figure after the decimal point is 5 or more, round the appropriate number up to the nearest whole number,
- (b) otherwise, round it down to the nearest whole number.

---

109 Para 145 sch 45 FA 2013 provides: “whole month” means the whole of January, the whole of February and so on, except that the period from the start of a tax year to the end of April is to count as a whole month.

Amended as para 20 requires, the sufficient ties test for a death before 1 March becomes:

**Leavers**

<b>Days spent by P in UK in year X</b>	<b>Number of ties that are sufficient</b>
More than <del>15</del> but not more than $\frac{46 \times A}{12}$	At least 4
More than $\frac{45 \times A}{12}$ but not more than $\frac{91 \times A}{12}$	At least 3
More than $\frac{90 \times A}{12}$ but not more than $\frac{121 \times A}{12}$	At least 2
More than $\frac{120 \times A}{12}$	At least 1

**Arrivers**

<b>Days spent by P in UK in year X</b>	<b>Number of ties that are sufficient</b>
More than $\frac{45 \times A}{12}$ but not more than $\frac{91 \times A}{12}$	All 4
More than $\frac{90 \times A}{12}$ but not more than $\frac{121 \times A}{12}$	At least 3
More than $\frac{120 \times A}{12}$	At least 2

The RDRM offers the following tables:

**RDRM11970: Deceased individuals: Table C [May 2020]**

Ties needed by a deceased person who was UK resident in one or more of the 3 tax years before the tax year under consideration.

The figures shown in the table below represent the days spent in the UK in the year of death.

Date of death	At least 4 ties	At least 3 ties	At least 2 ties	At least 1 tie
6 - 30 April	not more than 4	5 - 7	8 - 10	over 10
1 - 31 May	not more than 7	8 - 15	16 - 20	over 20
1 - 30 June	not more than 11	12 - 22	23 - 30	over 30
1 - 31 July	not more than 15	16 - 30	31 - 40	over 40
1 - 31 Aug	not more than 19	20 - 37	38 - 50	over 50
1 - 30 Sep	not more than 22	23 - 45	46 - 60	over 60
1 - 31 Oct	not more than 26	27 - 52	53 - 70	over 70
1 - 30 Nov	not more than 30	31 - 60	61 - 80	over 80
1 - 31 Dec	not more than 34	35 - 67	68 - 90	over 90
1 - 31 Jan	not more than 37	38 - 75	76 - 100	over 100
1 - 29 Feb	not more than 41	42 - 82	83 - 110	over 110
1 Mar - 5 Apr	not more than 45	46 - 90	91 - 120	over 120

**RDRM11980: Deceased individuals: Table D [May 2020]**

Ties needed by a deceased person who was UK resident for none of the 3 tax years before the tax year under consideration.

The figures shown in the table below represent the days spent in the UK in the year of death.

Date of death	All 4 ties	At least 3 ties	At least 2 ties
6 - 30 April	4 - 7	8 - 10	over 10
1 - 31 May	8 - 15	16 - 20	over 20

1 - 30 June	11 - 22	23 - 30	over 30
1 - 31 July	15 - 30	31 - 40	over 40
1 - 31 Aug	19 - 37	38 - 50	over 50
1 - 30 Sep	23 - 45	46 - 60	over 60
1 - 31 Oct	27 - 52	53 - 70	over 70
1 - 30 Nov	31 - 60	61 - 80	over 80
1 - 31 Dec	34 - 67	68 - 90	over 90
1 - 31 Jan	38 - 75	76 - 100	over 100
1 - 29 Feb	42 - 82	83 - 110	over 110
1 Mar - 5 April	46 - 90	91 - 120	over 120

### 5.32.6 *UK residence risk on death*

A person with a UK home faces some risk of being unexpectedly UK resident in the event of death. This can happen in two ways:

- (1) An individual may expect not to meet UK test 2, on the basis that they will spend sufficient time 30 days in the overseas home later in the year. If they die unexpectedly, the person may be resident under UK test 2 because they may not have had the opportunity to clock up the 30 days.
- (2) The person may be UK resident under UK test 4, particularly if they die early in the year and have not clocked up 30 days residence in the home.

The only way to avoid this risk is to ensure that the person spends some time in the overseas home in each of the first 30 days of the tax year; though there is no guarantee that will be possible.

A person with four UK ties also faces a risk of being unexpectedly UK resident in the event of death. The individual may expect not to spend 16 days in the UK, so as not to meet the usual sufficient ties test. But in the year of death they will be UK resident even if they spend *no* days in the UK.

### 5.32.7 *Transitional: Years to 2015/16*

Para 154(5) sch 45 FA 2013 deals with the transitional problem where the 3 previous tax years include pre-2013 periods, where the SRT (and in particular the automatic residence tests) did not apply:

Unless, in relation to a pre-commencement tax year, an election is made

under sub-paragraph (3) as respects that year<sup>110</sup>—

- (a) paragraph 10(b) of this Schedule has effect in relation to that year as if the words “by virtue of meeting the automatic residence test” were omitted

### **5.33 International transport workers**

#### *5.33.1 “Relevant job”*

Para 30(1) sch 45 FA 2013 provides:

P has a “relevant” job on board a vehicle, aircraft or ship if condition A and condition B are met.

“Relevant job” is not a helpful label: I refer to a person with a relevant job as an **“international transport worker”**.

I refer to **“international transport conditions A and B.”**

#### *5.33.2 Transport condition A*

Para 30(2) sch 45 FA 2013 provides:

Condition A is that P either—

- (a) holds an employment, the duties of which consist of duties to be performed on board a vehicle, aircraft or ship while it is travelling, or
- (b) carries on a trade, the activities of which consist of work to be done or services to be provided on board a vehicle, aircraft or ship while it is travelling.

Para 30(4) sch 45 FA 2013 provides:

Sub-paragraph (2)(b) is not satisfied unless, in order to do the work or provide the services, P has to be present (in person) on board the vehicle, aircraft or ship while it is travelling.

#### *5.33.3 Transport condition B*

Para 30(3) sch 45 FA 2013 provides:

Condition B is that substantially all of the trips made in performing those duties or carrying on those activities are ones that involve crossing an international boundary at sea, in the air or on land (referred to as “cross-border trips”).

---

110 See 5.35 (Ascertaining pre-2013 residence).  
FD\_5\_Residence\_of\_Individuals.wpd

#### 5.33.4 *Incidental duties*

The RDRM provides:

**RDRM11750: Days spent in the UK: Travel either to or from a temporary workplace** [May 2020]

... Being on-call or stand-by may count as time spent working depending on the conditions of an individual's employment and the nature of their duties.

Example 3 (Paula)

P works as an engineer and is contractually required to be on-call for 4 night a month, in addition to her normal full-time attendance. She is paid a retainer for those 4 nights, in addition to being paid for any work if she is called out. The 4 nights are counted as working time.

Example 4 (Franek)

F is a self-employed locksmith, who keeps his mobile phone switched on 24 hours a day to receive customer calls. For the purposes of calculating work time, F should only include the time spent carrying out his jobs and the related travelling time.

Para 30(5) sch 45 FA 2013 provides:

Duties or activities of a purely incidental nature are to be ignored in deciding whether the duties of an employment or the activities of a trade consist of duties or activities of a kind described in sub-paragraph (2)(a) or (b).

The RDRM provides:

**RDRM11780: Days spent in the UK: Workers with relevant jobs** [May 2020]

... In deciding whether or not an individual falls within one of the categories of relevant job, duties or activities of a purely incidental nature can be ignored. For instance, where a pilot whose job consists of making long haul international flights; attends a meeting in the UK to hear an announcement about the airline's restructuring, the duties spent at the meeting are incidental to the duties of flying the plane, and so can be ignored.

Example 2 (Preeya)

P is a member of a cabin crew on board flights between London and Geneva for a short-haul airline. For 1 month during the year she changes her shifts and works on UK domestic flights. However, substantially all of the trips she makes in the performance of her duties are cross-border ones, P does have a relevant job.

An individual will not have a relevant job simply because they occasionally work during a journey from 1 country to another; for example, if they catch up on business emails during a flight from their base in 1 country to visit a client in another country.

See 33.16 (Incidental duties in UK).

### 5.33.5 Significance of relevant job

Para 9(3) sch 45 FA 2013 disapplies UK test 3 (UK work):

This paragraph does not apply to P if—

- (a) P has a relevant job on board a vehicle, aircraft or ship<sup>111</sup> at any time in year X, and
- (b) at least 6 of the trips that P makes in year X as part of that job are cross-border trips that either begin in the UK, end in the UK or begin and end in the UK.

Para 14(4) sch 45 FA 2013 disapplies overseas test 3 (Overseas work). The wording is identical.

The work tie is different for international transport workers. The rules in para 35, 36 sch 45 FA 2013 need to be read together:

35 (1) P has a work tie for year X if P works in the UK for at least 40 days (whether continuously or intermittently) in year X.

(2) For these purposes, P works in the UK for a day if P does more than 3 hours' work in the UK on that day.

36 (1) This paragraph applies for the purposes of paragraph 35.

(2) It applies in cases where P has a relevant job on board a vehicle, aircraft or ship.

(3) When making a cross-border trip as part of that job—

- (a) if the trip begins in the UK, P is assumed to do more than 3 hours' work in the UK on the day on which it begins,
- (b) if the trip ends in the UK, P is assumed to do fewer than 3 hours' work in the UK on the day on which it ends.

(4) Those assumptions apply regardless of how late in the day the trip begins or ends (even if it begins or ends just before midnight).

(5) For the purposes of sub-paragraph (3)(a), it does not matter whether the trip ends on that same day.

(6) A day that falls within both paragraph (a) and paragraph (b) of sub-

---

111 Defined para 145 sch 45 FA 2013: “‘ship’ includes any kind of vessel (including a hovercraft)”.

paragraph (3) is to be treated as if it fell only within paragraph (a).

(7) In the case of a cross-border trip to or from the UK that is undertaken in stages—

- (a) the day on which the trip begins or, as the case may be, ends is the day on which the stage of the trip that involves crossing the UK border begins or ends, and
- (b) accordingly, any day on which a stage is undertaken by P solely within the UK must (if it lasts for more than 3 hours) be counted separately as a day on which P does more than 3 hours' work in the UK.

### 5.34 Coronavirus worker relief

#### 5.34.1 *Outline of relief*

The relief was announced, unusually, in a letter from the Chancellor to the Treasury Committee:

We will amend the Statutory Residence Test to ensure that any period(s) between 1 March and 1 June 2020 spent in the UK by individuals working on COVID-19 related activities will not count towards the residence tests. It is right that these changes are time limited and only support those people whose skillsets are currently required. The qualifying criteria will therefore be designed so that the relaxation of the rules is tightly targeted, minimising the risk of abuse.<sup>112</sup>

#### 5.34.2 *Application of relief*

Section 109 FA 2020 provides:

- (1) This section applies for the purposes of determining—
  - (a) whether an individual was or was not resident in the UK for the tax year 2019-20 for the purposes of relevant tax,<sup>113</sup> and
  - (b) if an individual was not so resident in the UK for the tax year 2019-20 (including as a result of this section), whether the individual was or was not resident in the UK for the tax year 2020-21 for the purposes of relevant tax.

---

112 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/878943/CX\\_to\\_letter\\_to\\_Mel\\_Stride\\_MP\\_TSC\\_09042020.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/878943/CX_to_letter_to_Mel_Stride_MP_TSC_09042020.pdf)

113 Section 109(1) FA 2020 incorporates the definition by reference: “Relevant tax” has the meaning given by paragraph 1(4) of sch 45 to FA 2013 (statutory residence test). See 5.3 (Scope of SRT).

Thus the rules apply retrospectively for 2019/20, and for 2020/21.

Section 109 FA 2020 provides:

- (2) That Schedule is modified in accordance with subsections (3) to (13).

There are in 2020/21 two sets of residence rules: the original rules which are set out above, and modified rules for coronavirus workers who were non-resident in 2019/20. We have reached the level of microdetail here, but I set out the rules for completeness.

Section 109(10) FA 2020 provides power to extend the relief by statutory instrument.

### 5.34.3 *Coronavirus workers*

Section 109 (4) FA 2020 provides:

Paragraph 22 (key concepts: days spent)<sup>114</sup> has effect as if—

- (a) in sub-paragraph (2), for “two cases” there were substituted “three cases”;
- (b) after sub-paragraph (6) there were inserted—
  - “(7) The third case is where—
    - (a) that day falls within the period beginning with 1 March 2020 and ending with 1 June 2020,
    - (b) on that day P is present in the UK for an applicable reason related to coronavirus disease,<sup>115</sup> and
    - (c) in the tax year in question, P is resident in a territory outside the UK (“the overseas territory”).<sup>116</sup>
- (8) The following are applicable reasons related to coronavirus disease—
  - (a) that P is present in the UK as a medical or healthcare professional for purposes connected with the detection, treatment or prevention of coronavirus disease;
  - (b) that P is present in the UK for purposes connected with the

---

114 See 5.16 (Transit days).

115 Defined by reference in s.109(13): Paragraph 145 (interpretation) has effect as if at the appropriate place there were inserted— ““coronavirus disease” has the same meaning as in the Coronavirus Act 2020 (see section 1(1) of that Act);”.

116 Defined in subsection (9): “For the purposes of paragraph (7)(c), P is resident in an overseas territory in the tax year in question if P is considered for tax purposes to be a resident of that territory in accordance with the laws of that territory.”

development or production of medicinal products (including vaccines), devices, equipment or facilities related to the detection, treatment or prevention of coronavirus disease.

I refer to individuals who meet all these conditions as “**Coronavirus workers**”. I wonder if there are more than a handful of them. Bearing in mind that they would likely have qualified for the remittance basis anyway, perhaps the number *materially* affected will be less than that. This may be a relief with no more than a single individual in mind, or else perhaps the purpose is to obtain a headline.<sup>117</sup> But there it is.

HMRC say: “This measure is expected to have a positive impact on non-UK resident individuals, who are in the UK specifically to work on coronavirus related activities.” But that is true only if they come from lower tax jurisdictions. As the individual must be tax-resident in some foreign jurisdiction, those who come from a jurisdiction with higher rates than the UK will continue to pay tax on those rates rather than UK rates. DT relief will not apply as the individuals will not be UK treaty-resident (they will not be “liable for tax” in the UK). Perhaps that won’t happen. The individual is also spared the cost of dealing with UK tax returns, except so far as necessary to show their non-resident status (which of course in itself requires specialist tax advice).

#### 5.34.4 Amendment of other SRT rules

Other SRT rules are amended correspondingly. Section 109 FA 2020 provides:

(3) Paragraph 8 (second automatic UK test: days at overseas homes) has effect as if after sub-paragraph (5) there were inserted—

“(5A) For the purposes of sub-paragraphs (1)(b) and (4), a day does not count as a day when P is present at a home of P’s in the UK if it is a day that would fall within the third case in paragraph 22(7) (if P were present in the UK at the end of it).”

(5) Paragraph 23 (key concepts: days spent and the deeming rule) has effect as

---

117 HMRC, “Technical Note: Modifications of the Statutory Residence Test in connection with coronavirus” provides:

“the UK government has taken steps to welcome to the UK talent and expertise from around the world to help tackle coronavirus.”

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/895355/Technical\\_Note\\_-\\_Modifications\\_of\\_the\\_Statutory\\_Residence\\_Test\\_in\\_connection\\_with\\_coronavirus.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/895355/Technical_Note_-_Modifications_of_the_Statutory_Residence_Test_in_connection_with_coronavirus.pdf)

if after sub-paragraph (5) there were inserted—

“(5A) For the purposes of sub-paragraph (3)(b) and (4), a day does not count as a qualifying day if it is a day that would fall within the third case in paragraph 22(7) (if P were present in the UK at the end of it).”

(6) Paragraph 28(2) (rules for calculating the reference period) has effect as if—  
(a) in paragraph (b) the “and” at the end were omitted;

(b) after paragraph (b) there were inserted—

“(ba) absences from work at times during the period specified in an emergency volunteering certificate issued to P under Schedule 7 to the Coronavirus Act 2020 (emergency volunteering leave), and”;

(c) in paragraph (c), for “or (b)” there were substituted “, (b) or (ba)”.

(7) Paragraph 29 (significant breaks from UK or overseas work) has effect as if in sub-paragraphs (1)(b) and (2)(b), for “or parenting leave” there were substituted “, parenting leave or emergency volunteering leave under Schedule 7 to the Coronavirus Act 2020”.

(8) Paragraph 32 (family tie) has effect as if after sub-paragraph (4) there were inserted—

“(4A) But a day does not count as a day on which P sees the child if the day on which P sees the child would be a day falling within the third case in paragraph 22(7) (if P were present in the UK at the end of it).”

(9) Paragraph 34 (accommodation tie) has effect as if after sub-paragraph (1) there were inserted—

“(1A) For the purposes of sub-paragraph (1)—

(a) if the place is available to P on a day that would fall within the third case in paragraph 22(7) (if P were present in the UK at the end of that day), that day is to be disregarded for the purposes of sub-paragraph (b), and

(b) a night spent by P at the place immediately before or after a day that would fall within the third case in paragraph 22(7) (if P were present in the UK at the end of that day) is to be disregarded for the purposes of sub-paragraph (c).”

(10) Paragraph 35 (work tie) has effect as if after sub-paragraph (2) there were inserted—

“(3) But a day that would fall within the third case in paragraph 22(7) (if P were present in the UK at the end of it) does not count as a day on which P works in the UK.”

(11) Paragraph 37 (90-day tie) has effect as if—

(a) the existing text were sub-paragraph (1);

(b) after that sub-paragraph, there were inserted—

“(2) For the purposes of sub-paragraph (1), a day that would fall within the third case in paragraph 22(7) (if P were present in the UK at the end of it) does not count as a day P has spent in the UK in the year in question.”

(12) Paragraph 38 (country tie) has effect as if after sub-paragraph (3) there were inserted—

“(4) For the purposes of sub-paragraph (3), P is to be treated as not being present in the UK at the end of a day that would fall within the third case in paragraph 22(7) (if P were present in the UK at the end of that day).”

HMRC give some worked examples,<sup>118</sup> but the issue is not sufficiently important to set them out here.

### 5.35 Ascertaining pre-2013 residence

The distinction between leavers and arrivers depends on whether a person is UK resident in the previous 3 years, so pre-2013 residence will be relevant to determine whether a person is a leaver or an arriver, and so may be relevant to post-2013 residence:

**2013/14:** position depended on residence in 2010/11, 2011/12, 2012/13

**2014/15:** position depended on residence in 2011/12, 2012/13

**2015/16:** position depended on residence in 2012/13

From **2016/17** the position depends on residence in 2013/14 onwards, but the residence position may in part depend on the old law. Thus it will take decades before pre-2013 residence is completely irrelevant to post 2013 residence, but the number of cases in which it matters is now small and will continue to diminish.

Para 154 sch 45 FA 2013 explains how one determines pre-2013 residence. In short, one applies the pre-2013 residence law but with an election to apply the SRT. But it is not necessary to discuss this here.<sup>119</sup>

### 5.36 Record keeping

Careful record keeping will often be necessary, especially for individuals whose residence is governed by the sufficient ties test.

#### 5.36.1 *Record of UK days*

Note that it is not possible in practice to be present in the UK without leaving an electronic trail. In *Morris v HMRC*:

the Revenue used their powers ... to obtain copies of the taxpayers' credit card and mobile phone records. These indicated that their credit cards and phones had been used in the UK on many more days than the taxpayers claimed they had been in the country. In subsequent

---

118 HMRC, "Technical Note: Modifications of the Statutory Residence Test in connection with coronavirus"

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/895355/Technical\\_Note-Modifications\\_of\\_the\\_Statutory\\_Residence\\_Test\\_in\\_connection\\_with\\_coronavirus.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/895355/Technical_Note-Modifications_of_the_Statutory_Residence_Test_in_connection_with_coronavirus.pdf)

119 See the 2018/19 edition of this work para 5.28, 5.29.

correspondence, the solicitors said that this was because they had been used by other family members...<sup>120</sup>

Perhaps it would be wise for non-UK residents not to share their phones and credit cards with UK residents.

### 5.36.2 *Record keeping: Home*

Two issues may arise: whether a residence is a home; and when is the individual present in the home. The RDRM provides:

**RDRM12920: Record keeping: Home** [May 2020]

When considering whether the individual had a home in the UK or abroad, HMRC would look for evidence that establishes the individual's presence at a particular home, and whether or not a home existed, the following information would help establish the facts:

- general overheads – utility bills which may demonstrate that the individual has been present in that home, for example, telephone bills or energy bills, which show usage commensurate with living in the property
- TV/satellite/cable subscriptions
- local parking permits
- membership of clubs, for example, sports, health or social clubs
- mobile phone usage and bills pointing to the individual's presence in a country
- lifestyle purchases pointing to the individual spending time in their home, for example, purchases of food, flowers and meals out
- presence of your spouse, partner or children
- engagement of domestic staff or an increase their hours
- home security arrangements
- increases in maintenance costs or the frequency of maintenance, for example, having their house cleaned more often
- insurance documents relating to that home
- SORN notification that a vehicle in the UK is 'off road'
- re-directed mail requests
- the address to which the individual's personal post is sent
- the address to which the individual's driving license is registered
- bank accounts and credit cards linked to the individual's address, and statements which show payment made – for example to utility companies

---

120 79 TC 184 at [6].

- evidence of local municipal taxed being paid
- registration at that address with local medical practitioners
- what private medical insurance cover the individual has, is it an international policy?
- credit card and bank statements which indicate the pattern and place of the individual's day by day expenditure

The list above is not definitive, no one piece of evidence will demonstrate the existence of the individual's UK or overseas home, with the requisite time spent there. HMRC will consider the weight and quality of all the evidence as, taken together, a number of pieces of evidence may be sufficiently strong enough to demonstrate their presence in a particular home.

Where the individual's home has changed from a holiday home to their home for the purposes of the SRT. The change in occupation could be evidence by amongst other things:

- utility bills which may show an increase in usage
- changes they have notified to:
- local municipal authorities
- the company providing their buildings and contents insurance

The same record keeping may be required to determine whether an individual is a Scottish/Welsh taxpayer.

### 5.36.3 Record keeping: Work

The RDRM provides:

**RDRM12930: Record keeping: Working hours and location of work done - records** [May 2020]

Where the individual's residence status is determined by the automatic tests relating to working full-time in the UK or overseas, they should keep information and records relating to:

- the split in their working life between the UK and overseas, particularly noting days where they worked (including training, being on stand-by and travelling), for more than 3 hours
- the nature and duration of their work activities – a work diary/calendar or timesheet is likely to indicate this. It might be found to be beneficial to ensure the diary is sufficiently detailed, maybe reflecting hours worked, and the nature of the work. For example, reviewing and responding to emails, meetings or completing travel claims
- breaks the individual had from working, for example between jobs,

and why

- any periods of annual, sick or parenting leave
- time spent visiting dependent children (those under the age of 18), when they are in the UK
- their contracts of employment, and documentation/communications which relate to these, particularly to curtailment or extension of these or other changes to them
- time the individual has had to spend in the UK owing to exceptional circumstances:

#### 5.36.4 Record keeping: UK ties

The RDRM provides:

**RDRM12940: Record keeping: The sufficient ties test** [May 2020]

...

- In which countries they have spent their days and midnights, for example:
  - Their travel schedule/details
  - Booking information
  - Tickets and boarding cards (including etickets)
- If they left the UK to live or work abroad:
  - the date they left the UK
  - visa or work permit applications
  - contracts of employment
- If they come to the UK to live or work
  - the date they arrived here
  - Visa or work permit applications
  - documentation relating to when they take up employment, or ceasing their previous employment
- When the individual was present at their home or homes, or other available accommodation
- How long the individual owned or rented those homes, for example when they purchased, sold or leased those homes
- The time their home was unavailable for their use, for example because it was rented out

#### 5.37 Residence: Burden of proof

The burden of proof generally lies on the taxpayer. This follows from s.50(6) TMA:

If, on an appeal notified to the tribunal, the tribunal decides—

- (a) that the appellant is overcharged by a self-assessment;
- (b) that any amounts contained in a partnership statement are excessive; or
- (c) that the appellant is overcharged by an assessment other than a self-assessment,

the assessment or amounts shall be reduced accordingly, but otherwise the assessment or statement shall stand good.

In *Norman v Golder*:<sup>121</sup>

... the language of [what is now s.50(6) TMA] makes it clear, beyond possibility of doubt, that the assessment stands, unless and until the taxpayer satisfies the Commissioners that it is wrong... The point really is not arguable.

In *Brady v Group Lotus Car Companies*:<sup>122</sup>

The starting point is an ordinary appeal before the commissioners. Here, however unacceptable the idea may be to the ordinary member of the public, it has been clear law binding on this court for sixty years that an inspector of taxes has only to raise an assessment to impose on the taxpayer the burden of proving that it is wrong.

Unfortunately the point which the Court of Appeal said was not arguable was argued successfully in a company residence case, where residence was wrongly said to be a matter of jurisdiction. It is no more a matter of jurisdiction than any other fact relevant to an appeal. In practice no-one has taken much notice and the burden of proof, in issues of individual and corporate residence, has generally been held to rest on the taxpayer.<sup>123</sup>

For completeness: a case to the contrary is *Marsh v HMRC* which concerned residence of an individual:<sup>124</sup>

That the burden of proof [on residence] is on HMRC can be seen from

121 26 TC 293 at p.297.

122 [1987] STC 635, at p.642.

123 See *Wood v Holden* 78 TC 1 (Special Commissioners) at [120]. Brandon considers the point in more detail, and reaches the same conclusion, in *Taxation of Non-UK Resident Companies and their Shareholders* (1<sup>st</sup> ed, 2002) para 2.1.2 (Burden of Proving Residence Status). In any event, disputes are rarely decided by the burden of proof: see 3.7.4 (Allocation of burden of proof).

124 [2017] UKFTT 320 (TC) at [58]. The burden of proof on ordinary residence was also held to be on HMRC, at [59]; but ordinary residence does not now matter.

*Cesena Sulphur Co Ltd v Nicholson* 1 TC 88 cited and approved in *Untelrab Ltd v McGregor* [1996] STC (SCD) 1).

But the parties were not represented by Counsel, and the point had not been argued.

The rule that the onus of proof is on the taxpayer is inconsistent with the HMRC Charter (“We’ll assume you’re telling the truth, unless we’ve good reason to think you’re not.”). But no-one takes any notice of that.

### 5.38 Non-resident’s tax return: SA109

Non-residents who complete a tax return will include SA109 (Residence, remittance basis etc), which contains HMRC’s standard questions on residence.

The Joint Expatriate Forum on Tax and NICs discussed this form in 2014:<sup>125</sup>

3.3 HMRC was aware that some agents and taxpayers felt that the SA109 asked for unnecessary or duplicate information. HMRC explained that this additional information was useful because it would allow HMRC to consider whether the claimed residence status was correct even though the basis of the claim was incorrect, e.g. an individual who failed to be automatically non-resident might not have sufficient UK ties or days of presence to be resident, and vice versa. HMRC made clear that an individual had no obligation to answer question other than those they believed to be appropriate to their circumstances.... HMRC said that it is up to the individual to decide which of the boxes are appropriate to complete and use a white space note to qualify the information provided.

### 5.39 Ordinary residence

FA 2013 (more or less) removed the concept of ordinary residence from tax law. The concept survives in the context of NICs,<sup>126</sup> in non-tax law, and in obscure corners of tax where it could not conveniently be abolished.<sup>127</sup>

---

125 [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/327284/140704\\_Expat\\_Forum\\_Minutes\\_FINAL.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/327284/140704_Expat_Forum_Minutes_FINAL.pdf) (April 2014)

126 See 43.12 (Residence and ordinary residence).

127 Eg, taxation of diplomats; see s.841 ITA. The concept of habitual residence, which covers similar ground, remains in the context of DTAs.

## 5.40 SRT/pre-2013 law compared

The Residence Consultation Paper provides:

3.55 The SRT ... will broadly recreate the outcome of the current residence rules...<sup>128</sup>

In short, the SRT was not generally intended to change the old law, only to clarify its vagueness.

It is possible to identify some cases which would be decided differently under the SRT. I discussed these in earlier editions<sup>129</sup> and concluded that they were outliers: the SRT has provided a test of residence which is true to the principles of the pre-2013 (common law) rules as well as being more clear and certain. But I omit the discussion now, as the details are of historical interest only.

## 5.41 Tax motivated non-residence

In *Reed v Clark* the taxpayer carefully organised his year abroad to reduce his tax liability but that did not matter:

Residence abroad for a carefully chosen limited period ... is no less residence abroad for that period because the major reason for it was the avoidance of tax.<sup>130</sup>

The same principle will apply under the SRT.

I would regard tax-motivated migration by itself as mitigation rather than avoidance.<sup>131</sup> It may be different if that is combined with further steps in addition to take advantage of non-resident status: avoidance/mitigation is heavily fact-dependent.<sup>132</sup> Fortunately, the avoidance/mitigation issue does not often arise in this context.

---

128 HM Treasury/HMRC, “Statutory Definition of Tax Residence” (2011) [http://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/81588/consult\\_condoc\\_statutory\\_residence.pdf](http://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81588/consult_condoc_statutory_residence.pdf)

129 2021/22 ed, para 5.39 (SRT/pre-2013 law compared).

130 58 TC 528 at p.556.

131 See 104.7.2 (Emigration to treaty-state).. Contrast the Special Commissioner in *Shepherd v IRC* 78 TC 389 at [62]: “Although the Appellant’s intention in going to Cyprus was to *mitigate* tax, I do not regard that as a relevant factor in deciding whether he was resident in the UK.”

132 See 53.18.4 (CGT avoidance).

As to whether becoming treaty non-resident might constitute avoidance or abuse, see 104.7 (OECD-concept abuse).

## 5.42 Resident of nowhere

“**Resident of nowhere**” is a convenient term to describe a person who is not tax-resident under the domestic law of any jurisdiction.

It is in principle possible for a peripatetic individual to be a resident of nowhere, since most jurisdictions require a person to be present for a certain period of time before they become tax-resident. Though in practice it is not likely to arise much, and there must be very few indeed who continue to qualify as residents of nowhere for extended periods of time.

In Australia:

1.231 ... Where an individual becomes a non-resident ... but has not established tax residency in another jurisdiction, the individual can become a ‘resident of nowhere’. ..

1.232 When adopting the new outbound individual resident rules, the Board considers that, where an individual that has been an Australian resident might otherwise determine their status as a non-resident, the change in status should only be effective where the individual can demonstrate that they have established residency in another country...

1.233 The new test should reflect that such individuals remain Australian residents unless and until tax residency is established in another jurisdiction.<sup>133</sup>

This is not part of UK law, under the SRT, though some of its rules may reflect a similar policy intuition.<sup>134</sup>

Coronavirus workers relief (for what it is worth) is designed to exclude a resident of nowhere.<sup>135</sup>

Trusts and companies may also be residents of nowhere. Indeed this is more easily the case, as criteria of trust residence differs more than for individuals.<sup>136</sup>

Residents of nowhere are not such a challenge in international taxation as the eye-catching label might suggest to a non-tax practitioner. There is

---

133 Board of Taxation recently a review of Australia’s individual income tax residency rules (2018).

134 See 5.31 (Country tie); 9.8.5 (Sufficient overseas link: Split Year Case 3).

135 See 5.34 (Coronavirus worker relief).

136 See 7.24 (Company resident nowhere).

little practical difference for tax between (1) being a resident of nowhere and (2) being a resident in a jurisdiction which does not impose tax on worldwide income/gains (which for non-doms could include the UK). The latter does not involve being a resident of nowhere, though it might be relevant for other regulatory purposes, such as CRS.

### 5.43 SRT: Critique

The consultation response paper provided:

3.5 [1] The Government does not believe the test is complicated (!) and [2] taxpayers will be able to determine their residence status with clarity if they know how many days they have spent in the UK and which of the relevant connection factors they have.<sup>137</sup>

Tax complexity is a complex topic;<sup>138</sup> but no practitioner will take point [1] seriously, and nor do HMRC:

HMRC noted that while the statutory test provides certainty, the legislation is quite lengthy and can be resource intensive to learn and apply.<sup>139</sup>

Australia will not follow the UK example:

On balance, the Board considers that codification akin to the UK approach would not align with the Government's simplification agenda and the Board's preferred principles based drafting approach. The overly complex drafting of the law and increased length of legislation is in direct conflict with simplification.<sup>140</sup>

It is however true that taxpayers will be able to determine their residence status (in the large majority of cases) with reasonable certainty. That is a

137 HM Treasury/HMRC, "Statutory definition of tax residence and reform of ordinary residence: a summary of responses" (June 2012)

[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_srt\\_or\\_summary.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_srt_or_summary.pdf)

138 See the Introduction to this work.

139 Board of Taxation, *Review of the IT Residency Rules for Individuals* (2017) para 1.171

<https://cdn.tspace.gov.au/uploads/sites/70/2018/07/T307956-income-tax-res-rules.pdf>

140 Board of Taxation, *Review of the IT Residency Rules for Individuals* (2017) para 1.172

<https://cdn.tspace.gov.au/uploads/sites/70/2018/07/T307956-income-tax-res-rules.pdf>

change for the better. The SRT is complex, voluble and repetitious, onerous in record keeping, and on some points uncertain; but no-one would swap the complexities of the SRT for the uncertainties of the previous law. Almost all the problems raised by the pre-2013 (non)definition of residence have been swept away. This carries out the reform recommended by the Consolidation Committee in 1936,<sup>141</sup> though the committee would have been astonished that the definition of residence required more than 50 pages of legislation and over 100 pages of guidance.

The reform benefited from the input of the professional bodies from an early stage of policy development, rather than being produced by HM Treasury/HMRC and then presented in a complete form, at a consultation stage.

#### **5.44 Future of SRT**

Section 218(2) FA 2013 provides:

The Treasury may by order make any incidental, supplemental, consequential, transitional or saving provision in consequence of Schedule 45.

It appears that parliament anticipated that changes might be needed as the effect of the rules began to be understood. But in practice none have been made.

CIOT once lobbied for a review:

CIOT notes that the TIIN for the SRT, published on 11 December 2012, included a commitment that ‘This measure will be kept under review through communication with affected taxpayer groups.’...<sup>142</sup>

Accordingly, after a suitable interval, CIOT recommends that the new SRT be formally evaluated, by an independent review, against its declared objectives in order to assess whether it is achieving those objectives.<sup>143</sup>

---

141 See the 2012/13 edition of this work, para 3.15.1 (Practice prior to 1936).

142 Author’s footnote: An internet search shows this is a standard form sentence, frequently cut and pasted into TIINs. But perhaps it is not intended to be taken seriously: few if any substantial reviews seem to result in practice.

143 CIOT, letter to HMRC (2013)

[http://www.tax.org.uk/system/files\\_force/file\\_uploads/131203%20Evaluation%20of%20the%20Statutory%20Residence%20Test%20-%20CIOT%20comments.pdf?](http://www.tax.org.uk/system/files_force/file_uploads/131203%20Evaluation%20of%20the%20Statutory%20Residence%20Test%20-%20CIOT%20comments.pdf?)

But HMRC did not carry out a significant review and it now seems unlikely.

One hopes that a review (if it did happen) would give weight to the desiderata of stability. Residence status in earlier years (sometimes very distant years) is often relevant to tax issues in the current year (the arrivers/leavers distinction for the SRT; temporary non-residence; deemed domicile; etc). So where there is a change in the definition of residence, advisers must keep in mind the old law as well as the present law, for two decades and sometimes more.

## 5.45 Scottish/Welsh taxpayers

### 5.45.1 Scots/Welsh taxpayer: Concept

The concepts of Scottish/Welsh taxpayer are distinct from the concept of residence as defined in the statutory residence test. They are relevant for the Scots/Welsh rates of income tax.<sup>144</sup> Even where the rates are the same, Scottish/Welsh taxpayer status is important for the government(s), as it affects the allocation of tax receipts.

The statutory provisions are in the Scotland Act (SA 1998) and Government of Wales Act 2006 (GOWA). The provisions are (more or less) the same so I set them out side by side.

HMRC have published Manuals (in very similar terms):

- (1) Scottish Taxpayer Technical Guidance<sup>145</sup>
- (2) Welsh Taxpayer Technical Guidance

### 5.45.2 The basic rule

#### **s.80D(1) SA 1998**

For any tax year, a Scottish taxpayer is an individual (T)—

#### **s.116E(1) GOWA**

For any tax year, a Welsh taxpayer is an individual (T)—

---

*download=1*

CIOT tried again two years later: letter to HMRC (21 July 2015)

<http://www.tax.org.uk/policy-technical/submissions/evaluation-statutory-residence-test-srt-ciot-comments>

144 See 40.5 (IT rates: the numbers); 40.6 (IT rates: Application).

145 This is based on HMRC, “Scottish Rate of Income Tax – Technical Guidance on Scottish Taxpayer Status” (2015) (now withdrawn) (“Scottish Taxpayer Guidance”).

- (a) who is resident in the UK for income tax purposes for that year (see sch 45 to the Finance Act 2013), and [identical]  
 (b) who, for that year, meets condition A, B or C.

For condition C, see App 8.3 (Scottish/Welsh parliamentarian).

In order to be a Scottish/Welsh taxpayer, the individual must be UK resident under the SRT. The following cannot be a Scottish/Welsh taxpayer:

- (1) A non-individuals (trust or company)
- (2) A non-resident individual

#### 5.45.3 Condition A (close connection)

##### **s.80D(2) SA 1998**

T meets condition A if T has a close connection with Scotland (see section 80E).

##### **s.116E(2) GOWA**

T meets condition A if T has a close connection with Wales (see section 116G).

Section 80E(1) SA 1998/s.116G(1) GOWA define close connection:

To find whether, for any year, T has a close connection with any part of the UK see—

- (a) subsection (2) (where T has only one place of residence in the UK), or
- (b) subsection (3) (where T has 2 or more places of residence in the UK).

#### 5.45.4 One UK residence

Section 80E(2) SA 1998/s.116G(2) GOWA provide:

T has a close connection with a part of the UK if in that year—

- (a) T has only one place of residence in the UK,
- (b) that place of residence is in that part of the UK, and
- (c) for at least part of the year, T lives at that place.

#### 5.45.5 “Place of residence”

Section 80E(4) SA 1998/s.116G(4) GOWA provide:

In this section “place” includes a place on board a vessel or other means of transport.

Thus a caravan or houseboat may be a place of residence.<sup>146</sup>

Residence is not otherwise defined, but it should carry (more or less) the same meaning as “residence” for CGT private residence relief,<sup>147</sup> which is in turn (more or less) the same as “home” in the SRT.<sup>148</sup>

HMRC agree. Scottish Taxpayer guidance provides:

10. [“Place of residence”] is not defined by the legislation so must be given its ordinary meaning.

For an individual its ordinary meaning is the dwelling in which that person habitually lives: in other words his or her home. As such, it should be regarded as having similarities to the concept of “home” within the Statutory Residence Test.

11. This interpretation is supported by considerable case law, albeit relating to similar but not identical concepts elsewhere in law.

N.B. An individual’s election of ‘main residence’ for CGT purposes will not determine ‘main place of residence for Scottish taxpayer status purposes.

The guidance then copies the text of the CG Manual on what is a residence for PRR.<sup>149</sup>

Scottish taxpayer guidance provides:

**A property which is used as nothing more than a holiday home, temporary retreat or something similar** is not a place of residence. So a holiday home where an individual spends time for only occasional short breaks, and which clearly provides a distinct respite from their ordinary day to day life will not be a place of residence. However if there comes a time when an individual’s use of a holiday home or temporary retreat changes so that it is used more frequently and for longer periods of time it will become a place of residence from the time of the change.

*Example*

40. Jenny lives in Birmingham and works from home. She also owns a

---

146 A similar rule applies for the SRT: see 5.20.4 (Caravans, houseboats).

147 See 55.2 (“Residence”).

148 See 5.20.9 (Home/residence compared).

149 For the CG Manual text, see 55.2 (“Residence”).

small house on Skye which she rents out apart from 2 to 3 weeks a year when she takes her holiday there. The Skye property is not a place of residence.

The SRT has an express provision to cover the point.<sup>150</sup>

A property, vehicle or other ‘home’ that an individual never stays in will not be a place of residence for them. For example a property purchased solely as an investment or a property bequeathed to an individual and which they never stay in will not be a place of residence. This point is further reinforced by “close connection” test set out in s.80E Scotland Act 1998<sup>151</sup> making clear that “living” at a place is necessary to establish a “close connection”.

Likewise for “residence” for PRR: see 55.2.5 (Physical occupation).

#### 5.45.6 *Two UK residences*

Section 80E(3) SA 1998/s.116G(3) GOWA provide:

T has a close connection with a part of the UK if in that year—

- (a) T has 2 or more places of residence in the UK,
- (b) for at least part of the year, T’s main place of residence in the UK is in that part of the UK,
- (c) the times in the year when T’s main place of residence is in that part of the UK comprise (in aggregate) at least as much of the year as the times when T’s main place of residence is in each other part of the UK (considered separately), and
- (d) for at least part of the year, T lives at a place of residence in that part of the UK.

If T has 2 or more places of residence in the UK at the same time, it is necessary to decide which is the main place of residence. For this question, Scottish taxpayer guidance repeats the CG Manual guidance on “main residence”.<sup>152</sup>

Scottish taxpayer guidance provides:

68. Where, in the course of a tax year, an individual has more than one “main place of residence” but all in the same part of the UK, they will

---

150 See 5.20.6 (Holiday home).

151 The original erroneously reads: 2012.

152 See 55.7 (Which is main residence).

have a “close connection”, to that part of the UK. If that part of the UK is Scotland they will be a Scottish taxpayer

69. Where in the course of a tax year, an individual has a “main place of residence” both in Scotland and elsewhere in the UK, (this may occur through a move from a single place of residence to another; or where there is more than one place of residence throughout the tax year) - whether a “close connection” with Scotland exists will be determined by whether his or her main place of residence was in Scotland for at least as much of the year as it was in any one other part of the UK

70. It is important to note that, for the purposes of this test, the time for which a main place of residence was in Scotland during a particular tax year is compared to the time for which it was in England, Northern Ireland or Wales individually during the course of that year not in aggregate.

The guidance gives an example of a move from one place of residence to another:

Example (Donovan)

73. D has rented and lived at a house in Birmingham for a number of years – this is his sole place of residence.

On June 30th he stops renting the Birmingham property and purchases a flat in Aberdeen, moving in immediately and living there for the rest of the tax year.

The HMRC analysis is as follows:

In the course of the tax year D has two places of residence – one in Birmingham and one in Aberdeen. On the basis that D’s place of residence was in Scotland (Aberdeen) for a greater period of time (July-April 5<sup>th</sup>) than it was in any other part of the UK (England – Birmingham from 6th April to June 30th), D has a close connection to Scotland and is a Scottish taxpayer for the whole of the tax year.

Were the order of the moves to be reversed (i.e. Aberdeen to Birmingham) but the dates stay the same then D would not be a Scottish taxpayer as, on the basis the length of time at each place of residence, a close connection to England would exist.

In the next example the individual moves twice:

Example (Emily)

74. E has owned and lived at a house in Fort William for a number of years – this is her sole place of residence.

In the course of the year she sells her house in Fort William and moves into rented accommodation in Swansea where she stays until moving into a new house she has purchased in London.

The period of time each location constituted her place of residence in the course of the tax year was as follows:

Fort William	125 days
Swansea	115 days
London	115 days

The HMRC analysis is as follows:

E is a Scottish taxpayer, for the whole of the tax year, on the basis that the period of time for which her place of residence was in Scotland was a least as great (and in this case greater) than the periods of time her place of residence was in any one of the other parts of the UK.

#### 5.45.7 “Living at” place of residence

“Living at” a place is not defined but I do not think it is obscure. If a person is physically present in a place of residence, for more than a minimal transitory period (such as dropping in to collect post) they are “living at” the place.

#### 5.45.8 *Cond. B: Scots/Welsh days*

It will be a rare case where condition A does not apply. That would only arise if:

- (1) T has no place of residence in the UK
- (2) T has a place of residence in the UK but does not live at that place during the year
- (3) T has 2 or more places of residence in the UK but none of them is T’s main place of residence in the UK
- (4) T has a main place of residence in a part of the UK but does not live there (or in another place of residence in that part) during the year.

In these circumstances one turns to condition B.

**s.80D(3) SA 1998**

**s.116E(3) GOWA**

T meets condition B if—

- (a) T does not have a close connection with England, Wales or Northern Ireland (see section 80E), and
- (b) T spends more days of that year in Scotland than in any other part of the UK (see section 80F).

T meets condition B if—

- (a) T does not have a close connection with England, Scotland or Northern Ireland (see section 116G), and
- (b) T spends more days of that year in Wales than in any other part of the UK (see section 116H).

There a slightly artificial definition of the phrase “spends more days of that year in Scotland/Wales”:

**s. 80F(1) SA 1998**

T spends more days of a year in Scotland than in any other part of the UK if (and only if)-

- (a) the number of days in the year on which T is in Scotland at the end of the day equals or exceeds
- (b) the number of days in the year on which T is in any other part of the UK at the end of the day.

**s.116H(1) GOWA**

T spends more days of a year in Wales than in any other part of the UK if (and only if)

- the number of days in the year on which T is in Wales at the end of the day exceeds each of the following—
- (a) the number of days in the year on which T is in England at the end of the day;
- (b) the number of days in the year on which T is in Scotland at the end of the day;
- (c) the number of days in the year on which T is in Northern Ireland at the end of the day.

Scottish taxpayer guidance provides:

**83. Where an individual spends at least as many days in Scotland as elsewhere in the UK they are a Scottish taxpayer.**

84. In other words - days spent in Scotland compared to days spent in England, Northern Ireland, and Wales in aggregate rather than to days spent in each of those parts of the UK individually.

85. For these purposes Scotland includes the adjacent UK territorial waters (i.e. up to 12 nautical miles from the shore), but does **not** include the adjacent UK continental shelf. Days spent in the UK continental

shelf (for example on an oil rig or similar installation) are **not** days spent in any part of the UK for these purposes.

**Note** - this is a different test to that used to establish “close connection” where an individual has had, in any given tax year, “places of residence” or a “main place of residence” in more than one of the constituent regions of the UK (England, Wales, Scotland & Northern Ireland). In such cases days where the residence is in Scotland are considered separately against days where the residence is in each region individually.

Section 80F(2) SA 1998/s.116H(2) GOWA provide a rule for transit days:

T is treated as not being in the UK at the end of a day if-

- (a) on that day T arrives in the UK as a passenger,
- (b) T departs from the UK on the next day, and
- (c) during the time between arrival and departure T does not engage in activities which are to a substantial extent unrelated to T’s passage through the UK.

This is based on the SRT rule; see 5.16 (Transit days).

Scottish taxpayer guidance provides an example where an individual has places of residence but no main place of residence:

Example (Meera)

89. M and her husband own and run a successful multi-national business. They have no children or close family. Both travel extensively on business, occasionally staying in hotels but usually basing themselves at houses they own in a variety of UK and overseas locations. Despite this travel both are resident in the UK for tax purposes. They are registered to vote at their London residence but seldom stay long at any of their residences and have numerous bank accounts and cars registered at different addresses.

M and her husband have numerous “places of residence” but it is not possible to identify one of these as their “main place of residence” – Scottish taxpayer status should be decided for each by a day count for days spent in Scotland and elsewhere in the UK.

Similarly an example where an individual has no place of residence:

Example (Ruth)

90. R is employed by an oil company working four weeks on/four weeks off, on a rig in the North Sea. R is single and has no children. When not on the rig she stays in work-related accommodation near Aberdeen but

spend most of her nonworking time visiting friends or on holiday. She keeps some of her possessions in storage near Aberdeen but the majority are at her mother's home in Belfast which she also uses as her address for bank and other correspondence, although she seldom visits.

R has no place of residence. Her mother's house is not a "place of residence" as R does not reside there. Neither the rig (even if it is in UK territorial waters) nor the on-shore work accommodation are places of residence as there is little permanence or continuity in their occupation – none of her possessions are kept in them – there is no close connection. R's Scottish taxpayer status will be decided by day counting.

Example (Stuart)

91. S is a UK citizen but has no fixed place of residence during the course of a tax year – neither owning nor renting property. He works for consultancy firm advising on IT implementation projects and as such travels round the UK on short term assignments, staying in hotels. In the course of the tax year he spends 120 days in Scotland, 100 days in England, 50 days in Wales and 10 days in Northern Ireland.

Since S has no place of residence during the course of the tax year so the "days" he spends in Scotland are compared against the days he spends in aggregate in other parts of the UK. Since the 120 "days" S spent in Scotland is less than the 160 "days" he spent in another part of the UK he is not a Scottish taxpayer.

Had the number of days S spent in another part of the UK stayed the same but the number of days he spent in Scotland increased to 160 days or more – S would have been a Scottish taxpayer.

#### 5.45.9 *Irrelevant factors*

HMRC Scottish Taxpayer guidance correctly states:

None of the following factors will cause an individual to be a Scottish taxpayer if their place of residence is outside of Scotland.

- National identity – regarding oneself to be Scottish
- Location of work – working in Scotland
- Location of income source – receiving a pension or salary from a Scottish entity
- Travelling in Scotland – driving a lorry in or frequent work visits to Scotland

#### 5.45.10 *Split year*

Scottish taxpayer guidance provides:

50. If an individual is identified as being a Scottish taxpayer that status applies for a whole tax year - it is not possible to be a Scottish taxpayer for part of a tax year.

51. However, it should be noted that, in a year that the individual becomes or ceases to be UK tax resident the extent to which income in that tax year is subject to income tax at the Scottish rates remains subject to 'split year' treatment under the statutory residence test.

#### 5.45.11 *Administration*

An individual may not know until the end of the year whether or not they are a Scottish/Welsh taxpayer.

CIOT comment:

3.2 We understand that it is the responsibility of HMRC to identify Scottish taxpayers and notify them. In addition, for PAYE taxpayers, they will issue specific 'S' PAYE codes to employers and pension providers. We have a concern, however, that for some taxpayers, whose residence status changes during a tax year, the only way of resolving their tax position will be via self assessment – since it will only be possible to determine their final residence status in retrospect. It is likely therefore that many more individuals will be forced into self assessment as a result of the changes to income tax under the Scotland Act ...

See too 5.36 (Record keeping).

## CHAPTER SIX

# RESIDENCE OF TRUSTEES

6.1

### *Cross references*

The following topics are considered elsewhere:

- 9.15 (Split year of trustees and PRs)
- 57.3.1 (Non-classic trust: Trustee)

## **6.1 Trustees and residence: Introduction**

The topics of this chapter are:

- (1) Who are the trustees
- (2) Residence of trustees

The identity of trustees matters in particular:

- (1) to ascertain trust residence
- (2) for liability to tax: the trustees are the persons liable to IT/CGT/IHT on trust income/gains/capital.

Residence of trustees matters in particular for:

- (1) Territorial limitations for IT/ CGT. Trust residence plays a role similar to individual residence:
  - (a) UK resident trustees are taxable on worldwide income/ gains
  - (b) Non-resident trustees are taxable only on UK source income and certain UK-linked gains.
- (2) Anti-avoidance rules such as s.87 and ToA rules: these rules (in general) only apply to trusts which are non-resident.

Different rules apply to PRs<sup>1</sup> and unit trusts<sup>2</sup>.

---

1 See 84.4 (Residence of PRs for CGT); 85.3 (Residence of PRs for IT).

2 See 66.4.5 (Residence of unit trust).

## 6.2 Who are the trustees

“Trustee” is not usually defined in tax legislation, and the identity of trustees of a classic trust is a matter of trust law.

For the question whether a protector may be a trustee, see 6.18 (Protectors and trust residence).

For trustees of settlement-arrangements and IHT settlements, which may not be trusts in the trust-law sense, see 57.3 (Non-classic trusts).

### 6.2.1 *Nominees/bare trustees*

Trust property may be, and often is, held by nominees for trustees. Nominees are trustees in the sense that they hold property on trust. Nominees/bare trustees are synonymous terms, and a bare trustee must by definition be a type of “trustee”. But nominees are not the “trustees of a settlement” for the purposes of s.474 ITA/s.69 TCGA:<sup>3</sup> they are trustees of a bare trust which is not a settlement. No-one would doubt that, but it is helpful to keep this in mind in considering the position of de facto trustees.

In ordinary legal usage, the term “trustee” (without further elaboration) is normally reserved for trustees of a settlement.

### 6.2.2 *De facto trustees*

What if there has been an invalid appointment of new trustees, and (perhaps) the trust property has been transferred to the invalidly-appointed trustees? Trust law distinguishes between:

- (1) A validly appointed trustee
- (2) A person purportedly but invalidly appointed trustee; such a person is not the proper owner and administrator of the trust assets, but:
  - (a) If trust assets are held by them, of course they have a duty to transfer the assets to the correct trustees, like any bare trustee; and
  - (b) if they act as trustee, they become a de facto trustee (also called a trustee *de son tort*, but it is not necessary, or desirable, to use

---

3 In addition, for CGT, a nominee would be within s.60 TCGA which provides that “this Act shall apply as if the property were vested in, and the acts of the nominee or [bare] trustee in relation to the property were the acts of, the person or persons for whom he is the nominee or [bare] trustee”; see 1.7 (Bare trust/nomineeship). IT does not have an express equivalent of s.60, but if necessary the same rule could be implied.

antique Law French).<sup>4</sup>

A de facto trustee is not a “trustee” in the normal trust-law sense, for instance:

- (1) A de facto trustee cannot exercise trustee powers, such as a power of appointment.
- (2) It does not need a deed of retirement for a de facto trustee to cease to act.

A de facto trustee may be described as a constructive trustee, and so in one sense, perhaps a loose sense, may be described as a type of trustee.<sup>5</sup> But even if that usage is correct, de facto trustees are not “trustees of a settlement”, for the purposes of s.474 ITA/s.69 TCGA,<sup>6</sup> and in ordinary legal usage, the term “trustee” (without further elaboration) is normally reserved for the latter. In that respect the position is analogous to that of bare trustees or nominees.

### 6.3 Trustees a distinct person

The IT/CGT provisions are effectively identical; it may be helpful to read them side by side:

#### s.474(1) ITA

For the purposes of the Income Tax Acts (except where the context otherwise requires), the trustees of a settlement are together treated as if they were a single person (distinct from the persons who are the trustees of the settlement from time to time).

#### s.69(1) TCGA

For the purposes of this Act the trustees of a settlement shall, unless the context otherwise requires, together be treated as if they were a single person (distinct from the persons who are trustees of the settlement from time to time).

4 The term “de facto trustee” is defined and used in this sense in the Charities SORP. One might alternatively use the term “ostensible trustee”.

5 See R.C. Nolan’s learned article “Equitable Property” [2006] LQR 232.

6 See *Jasmine Trustees v Wells & Hind* [2007] EWHC 38 (Ch) at [33] - [50]; this describes the point as “obvious” - at [39] - but then goes on to examine the scheme of the TCGA in detail before concluding that the obvious answer is correct.

Express provision is therefore needed to say that a de facto executor is a personal representative for IHT purposes; see 119.2 (Meaning of “PRs” for IHT).

I refer to this as the “**distinct-person fiction**”.

Section 1169 CTA 2010 applies the IT rule for corporation tax.<sup>7</sup>

EN CTA 2010 Annex 1 change 3 discusses this provision:

Section 474(1) of ITA ... substitutes a notional person for the trustees. That notional person is not a company and so cannot be an associated company [for the purposes of s.25 CTA 2010]. It follows that [the former] ESC C9<sup>8</sup> is not needed to prevent a trustee company and a company which it controls from being treated as associated.<sup>9</sup> Similarly, if section 474(1) of ITA treats the trustees of two settlements as separate notional persons, the concession is not needed to prevent two companies controlled by different settlements from being treated as associated [even if the trustees are actually the same person].<sup>10</sup>

Following the EN, I refer to the single person (distinct from the actual trustees) as the “**notional person**”.<sup>11</sup>

The definition of associated company in s.25 CTA has been repealed, but it still matters in other contexts that a corporate trustee is a notional person, and not a company for IT/CGT purposes.

The distinct-person fiction applies for the taxation of the trust but not for the taxation of the trustee in their private capacity: trustee remuneration is income of the person who is actually the trustee, not the notional person. That is a case where context “otherwise requires”.

7 The IHT position is more complicated. Sections 178(4)/191(3) IHTA apply a distinct-person fiction for the purposes of Chapters 3/4 Part 6 IHTA (Sale of land/shares from deceased’s estate). Apart from that there is no express distinct-person rule; but it may be implied, see 99.23.8 (PRs and beneficiaries of estate), and it will not often matter.

8 ESC C9 provided (so far as relevant): “The Revenue will not, by concession, treat one company as being associated with a trustee company where the company is only associated with that trustee company because it is under its control by taking into account rights and/or powers the trustee company holds in trust.”

9 Section 25(4) CTA 2010 provided (so far as relevant): “a company is an associated company of another at any time when one of the two has control of the other”.

10 Section 25(4) CTA 2010 provided (so far as relevant): “a company is an associated company of another at any time when... both are under the control of the same person or persons”.

11 ITA uses the expression “the single person mentioned in s.474(1)”; TCGA uses the expression “the deemed person referred to in s.69(1)”.

For completeness: 65(2) TCGA provides:

... nor shall any trustee or personal representative be regarded for the purposes of this Act as an individual.

This is otiose, as the word individual is not normally understood to refer to trustees or personal representatives.

Even where there is no express provision, a distinct-person fiction, or something similar, may be implied by context. Thus the SDLT Manual provides:

**SDLTM31745: Changes in the composition of trustees of a continuing settlement** [Nov 2019]

For Stamp Duty Land Tax (SDLT) purposes we treat trustees of a settlement as a single and continuing body of persons, as we do for capital gains tax.

It follows that for a continuing settlement a change in the composition of trustees is not a land transaction.

This means in particular that there is no charge on such an occasion where trust property is secured by a mortgage or other borrowing.

Since there is no land transaction for SDLT purposes on a change in the composition of trustees of a continuing trust, a land transaction return should not be completed...

### 6.3.1 Terminology: Trustees or trust

As a matter of trust law, and tax law, trustees are persons, but a trust is not a person. So it is more accurate to refer to trustee residence, not trust residence; and to say *the trustees hold*, or *lend*, not *the trust holds*, or *lends*; etc. However the expressions may be used synonymously, without causing confusion; and they often are.<sup>12</sup>

Moreover, in the present context, it is essential to distinguish between:

- (1) Residence of the trustees (in their capacity as trustees); or, more accurately, the residence of the notional person referred to in s.474/s.69
- (2) Residence of trustees (in their private capacity)

For simplicity, I refer to:

- (1) **“Residence of the trust”**

---

<sup>12</sup> See 8.21.1 (Trust law background).

**(2) “Residence of trustees (in their private capacity)”****6.4 Trust residence for IT/CGT**

There is one main definition of trust residence, which is the same for IT and CGT.<sup>13</sup> The IT and CGT provisions are differently worded, but the effect of the rules is the same.<sup>14</sup> In this chapter I set out both sets of provisions.

The current rules adopt proposals originally made in the Trusts Consultative Document (1991).<sup>15</sup> This is of more than historical interest, as it explains the background to the current rules.

**s.475 ITA**

(1) This section applies for income tax purposes and explains how to work out, in relation to the trustees of a settlement, whether or not the single person mentioned in section 474(1) [the notional person] is UK resident.

(2) If at a time either condition A or condition B is met, then at that time the single person is UK resident.

**s.69 TCGA**

(2) The deemed person referred to in subsection (1) [the notional person] shall be treated for the purposes of this Act as resident in the UK at any time when a condition in subsection (2A) or (2B) is satisfied.

---

13 For IHT see 6.19 (IHT trust residence for IHT).

14 When introduced in 2006, the wording was exactly the same (though the provisions were set out twice, in ICTA and in TCGA). But ITA repealed the ICTA provisions and recast them in its own plain English style. If (as the professional bodies asked at the time) the 2006 reform had been put back to 2007, this complication would have been avoided. This history is now unimportant, but it illustrates how transient microeconomic considerations (convenience of civil service administration) may lead to a permanent sub-optimal outcome.

15 Chapter 10 [https://www.kessler.co.uk/wp-content/uploads/2014/02/1108\\_001.pdf](https://www.kessler.co.uk/wp-content/uploads/2014/02/1108_001.pdf)

(3) If at a time neither condition A nor condition B is met, then at that time the single person is non-UK resident.

(2E) If the deemed person referred to in subsection (1) [the notional person] is not treated for the purposes of this Act as resident in the UK, then for the purposes of this Act it is treated as being not resident in the UK.

There are therefore two circumstances in which a trust is UK resident. In the ITA they are called Conditions A/B. In the TCGA they are called Conditions 1/2. I refer to them as “**trust-residence conditions**”.

## 6.5 Trustees all UK resident

### s.475(4) ITA

Condition A is met at a time if, at that time, all the persons who are trustees of the settlement are UK resident.

### s.69(2A) TCGA

Condition 1 is that all the trustees are resident in the UK.

If all the trustees are UK resident, the trust is UK resident. If all the trustees are not resident in the UK, then (subject to the PE-residence rule) the trust is non-resident.

### 6.5.1 *Ascertaining trustee residence*

One must identify whether the trustees are UK tax-resident in their private capacities, applying:

- (1) the statutory residence test, if the trustee is an individual<sup>16</sup>
- (2) the company residence rules, if the trustee is a company

In the case of a company not incorporated in the UK, residence is decided by central management and control, which is where the top-level decisions are made. A company which is a trustee will make two classes of top-level decisions:

- (1) Trustee decisions, made in its capacity as trustee (eg major decisions relating to management and distribution of trust assets)
- (2) Corporate decisions, made in its private capacity (eg decisions as to

---

<sup>16</sup> See 5.3.1 (SRT: Application to trustees/PRs).

whether to act as trustee, what it charges, how to distribute its profits)

Strictly speaking, only the corporate decisions are relevant to ascertain the trust company's tax-residence. Trustee decisions are treated as made by a separate, notional, person. The place where those decisions are made does not matter, for corporate residence, regardless of how important the decisions may be. But trustee decisions can matter for the PE-residence rule.

What if the trustee is a company incorporated *in* the UK? The company is UK resident for CT purposes under the incorporation rule.<sup>17</sup> But this rule is expressed to apply only for the purposes of Corporation Tax. Perhaps the company might be regarded as non-resident, if central management and control was not in the UK. Perhaps a purposive (non-literal) construction is appropriate here. Fortunately this question is not likely to arise in practice.

## 6.6 Mixed-resident trustees

Condition B deals with the position of trustees of mixed residence.

### Section 475(5), 476 ITA

**475(5)** Condition B is met at a time if at that time—

(a) at least one person who is a trustee of the settlement is UK resident and at least one such person is non-UK resident, and

### s.69 TCGA

(2B) Condition 2 is that:

(a) at least one trustee is resident in the UK,  
(b) at least one is not resident in the UK, and

---

<sup>17</sup> See 7.3 (The incorporation rule). The same would apply to other statutory company residence rules, but it is difficult to see that the point could ever arise in practice.

(b) a settlor in relation to the settlement meets condition C (see section 476).

(c) a settlor in relation to the settlement was resident or domiciled<sup>18</sup> in the UK at a time which is a relevant time in relation to him

**s.476(1)** This section applies for the purpose of working out whether a settlor (“S”) in relation to a settlement meets condition C at a time.

(2C) In subsection (2B)(c) ‘relevant time’ in relation to a settlor—

**s.476(2)** If—

(a) the settlement arose on S’s death (whether by S’s will, on S’s intestacy or in any other way), and  
(b) immediately before S’s death, S was UK resident or domiciled<sup>19</sup> in the UK,  
then S meets condition C from the time of S’s death until S ceases to be a settlor in relation to the settlement.

(a) means where the settlement arose on the settlor’s death (whether by will, intestacy or otherwise), the time immediately before his death, and

---

18 Section 69(2F) TCGA /s.476(3A) ITA provide:

Section 835BA (deemed domicile) applies for the purposes of subsection (2B)(c).

Section 835BA (deemed domicile) applies for the purposes of subsections (2)(b) and (3)(b).

This is the standard wording to apply the deemed domicile rules.

19 See above footnote.

**s.476(3)** If—

(a) the settlement is not within subsection (2)(a), and  
 (b) at a time when S made the settlement (or is treated for the purposes of the Income Tax Acts as making the settlement), S was UK resident or domiciled<sup>20</sup> in the UK, then S meets condition C from that time until S ceases to be a settlor in relation to the settlement.

(b) in any other case, a time when the settlor made the settlement (or was treated for the purposes of this Act as making the settlement).

## 6.7 Residence condition C

Trust-residence condition C corresponds to the CGT relevant time requirement in s.69(2B)(c) and (2C) TCGA.

There is no express split-year rule, so the default rule applies: condition C is met even if a trust is made during the overseas part of a split year.<sup>21</sup>

For the purposes of discussion it is convenient to have some terminology and I coin the following terms:

- (1) A “**UK-linked settlor**” is one within Condition C, i.e. (in short) who is resident or domiciled in the UK when they made the settlement.
- (2) A “**UK-linked trust**” is one where the settlor (or a settlor) was UK-linked when they made the settlement.
- (3) A trust has “**mixed-resident trustees**” if some trustees are UK resident and some are not.

Thus (in my terminology) a trust with mixed-resident trustees is UK resident if it is a UK-linked trust; conversely it is non-resident if it is not a UK-linked trust.

### 6.7.1 Adding property: Tainting

In trusts with mixed-resident trustees, it is necessary to identify the settlor(s)<sup>22</sup> and to ascertain when the settlor(s) provide trust property.

A trust whose settlor is not UK-linked may have some UK trustees (as

---

<sup>20</sup> See above footnote.

<sup>21</sup> See 9.1 (Residence throughout tax year).

<sup>22</sup> See 94.1 (Why settlors matter).

long as they are not the sole trustees). In that case, however, one must take care that no other UK-linked person provides even a nominal amount of funds because that will make them co-settlors and the trust UK resident. This is known as “tainting” the trust.<sup>23</sup>

Suppose:

- (1) Year 1: the settlor makes a trust when not UK resident;
- (2) Year 2: the *same* settlor becomes UK resident and then adds property to the settlement.

The time that S made the settlement was year 1; S does not make a separate settlement in year 2; so at first sight it seems that the settlement is not UK-linked. But S is treated as making a settlement in year 2,<sup>24</sup> so it is considered that the settlement does become UK-linked.

### 6.7.2 Ordinary residence: 2013 transitional rules

Prior to the abolition of ordinary residence in 2013, s.476 ITA provided:

- (2) If—
  - (a) the settlement arose on S’s death (whether by S’s will, on S’s intestacy or in any other way), and
  - (b) immediately before S’s death, S was UK resident, ordinarily UK resident or domiciled in the UK,

then S meets condition C from the time of S’s death until S ceases to be a settlor in relation to the settlement.

- (3) If—
  - (a) the settlement is not within subsection (2)(a), and
  - (b) at a time when S made the settlement (or is treated for the purposes of the Income Tax Acts as making the settlement), S was UK resident, ordinarily UK resident or domiciled in the UK,

then S meets condition C from that time until S ceases to be a settlor in relation to the settlement.

---

<sup>23</sup> See 94.6 (Tainting).

<sup>24</sup> See ? (Tax advantage: Standard IT/CGT definition). The pre-rewrite wording was clearer. Section 110 FA 1989 referred to “the time *or, where there is more than one, each of the times* when he has provided funds ... for the purposes of the settlement.” It is an interesting question to what extent the courts will refer to pre-rewrite legislation to construe post-rewrite legislation. But that will not arise here, as the current legislation seems clear enough.

Para 57(2)(3) sch 46 FA 2013 deleted the underlined words. But para 57 provides:

(4) The amendment made by sub-paragraph (2) does not apply if the person died before 6 April 2013.

(5) The amendment made by sub-paragraph (3) does not apply if the settlement was made before 6 April 2013.

Thus the pre-2013 rules continue to apply to govern the income taxation of pre-2013 settlements. But it only makes a difference if a settlor is ordinarily resident but not UK resident, which rarely if ever happens.<sup>25</sup>

Prior to the abolition of ordinary residence in 2013, s.69 TCGA provided:

(2) The [trustees] shall be treated for the purposes of this Act as resident and ordinarily resident in the UK at any time when a condition in subsection (2A) or (2B) is satisfied...

(2B) Condition 2 is that—

(a) at least one trustee is resident in the UK,

(b) at least one is not resident in the UK, and

(c) a settlor in relation to the settlement was resident, ordinarily resident or domiciled in the UK at a time which is a relevant time in relation to him.

Para 82 sch 46 FA 2013 deleted the underlined words. In this case there are no transitional provisions. There is a small difference between the IT and the CGT rules, though in practice it will rarely if ever matter.

## 6.8 Individual trustee/split year

The HM Treasury residence response paper provides:

3.122 Under the SRT an individual is resident for the whole of a tax year or not at all. It follows that provisions that look at residence status at a particular time may not work in the same way as previously. It is recognised that this may have an unintended impact on the position of a trust in the year in which an individual trustee comes to or leaves the UK and is resident for that year.

3.123 Accordingly the draft legislation contains a new rule that provides that an individual trustee is not regarded as resident for the purposes of determining the residence status of the trust if the only period in the year

---

<sup>25</sup> See the 2012/13 edition of this work para 3.14 (Ordinarily resident but not resident).

when the individual is a trustee falls within the overseas part of a split year for that individual.<sup>26</sup>

**s.69(2DA) TCGA**

A trustee who is resident in the UK for a tax year is to be treated for the purposes of subsections (2A) and (2B) as if he or she were not resident in the UK for that year if—

- (a) the trustee is an individual,
- (b) the individual becomes or ceases to be a trustee of the settlement during the tax year,
- (c) that year is a split year as respects the individual, and
- (d) in that year, the only period when the individual is a trustee of the settlement falls wholly within the overseas part of the year.

**s.475(7)(8) ITA**

(7) Subsection (8) applies if—

- (a) an individual becomes or ceases to be a trustee of the settlement during a tax year,
  - (b) that year is a split year as respects the individual, and
  - (c) the only period in that year when the individual is a trustee of the settlement falls wholly within the overseas part of the year.
- (8) The individual is to be treated for the purposes of subsections (4) and (5) as if he or she had been non-UK resident for the year (and hence for the period in that year when he or she was a trustee of the settlement).

This applies if an individual becomes trustee during the overseas part of a split year. It does not apply if the individual is trustee throughout the year. In such a case the trust may be resident in part of the year, and so subject to CGT for the whole year.

---

26 HM Treasury, “Statutory definition of tax residence and reform of ordinary residence: summary of responses to the June 2012 consultation” (2012)  
[http://webarhive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/consult\\_responses\\_statutory\\_definitions\\_of\\_tax\\_residence\\_reform\\_of\\_ordinary\\_residence\\_responses.pdf](http://webarhive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/consult_responses_statutory_definitions_of_tax_residence_reform_of_ordinary_residence_responses.pdf)

There is an exception relating to the PE residence rule.<sup>27</sup>

### **s.69(2DB) TCGA**

Subsection (2DA) is subject to subsection (2D) and, accordingly, an individual who is treated under subsection (2DA) as not resident is, in spite of that, to be regarded as resident whenever the individual acts as mentioned in subsection (2D).

### **s.475(9) ITA**

But subsection (8) is subject to subsection (6) and, accordingly, an individual who is treated under subsection (8) as having been non-UK resident is, in spite of that, to be treated as UK resident whenever the individual acts as mentioned in subsection (6)

## **6.9 Accidental residence: A trap**

A trust may become UK resident if:

- (1) its sole trustee becomes UK resident; or
- (2) any trustee becomes UK resident and it is a UK-linked trust.

The consequences of a trust becoming UK resident will be disastrous for CGT and (except for IIP trusts) for IT. So it is essential for an individual to resign trusteeship before becoming UK resident if:

- (1) trustee of a UK-linked trust; or
- (2) a sole trustee.<sup>28</sup>

This includes trusteeships of foreign law charitable trusts.

This state of affairs is deliberate, for the 1991 consultative document discussed a relief for temporary resident trustees, but suggested, implausibly, that the problem was not significant. In practice, in cases of unfairness, I expect the problem will be overlooked or ignored by non-compliant taxpayers, and HMRC may not spot it or turn a blind eye.

## **6.10 Separate sub-fund trustees**

It is common for one trust to hold separate funds (“sub-funds”) on separate terms, and it is possible (though not common) for the sub-funds to have separate trustees. The position here is governed by s.474(2)(3) ITA and

---

<sup>27</sup> See 6.12 (PE residence rule).

<sup>28</sup> In the case of a non-UK linked trust, an appointment of a second non-resident trustee would be an alternative.

s.69(3) TCGA. I do not set these out here because I do so elsewhere.<sup>29</sup>

The trust is UK resident unless the trustees of the sub-funds jointly meet the trust-residence conditions.

#### 6.10.1 *Settled land act settlement*

The same provisions also deal with Settled Land Act settlements. These are (almost) obsolete in England, but the rules may shed light on the position of foreign trust-like entities by analogy. The trustees for tax purposes are the settled land act trustees *and* the tenant for life.

What is the position where the settled land is vested in the tenant for life, and there are no other investments, so nothing is vested in the trustees of the settlement? It is suggested that the trustees (for tax purposes) are still the tenant for life and the trustees of the settlement for SLA purposes. Whether the settlement includes investments representing capital money should not affect the question of who are the trustees.

### 6.11 Transfer between settlements

Section 476 ITA deals with transfers between settlements:

- (4) Further, if—
- (a) there is a transfer of property in relation to which section 471 applies,
  - (b) S is a settlor in relation to settlement 2 as a result of that section, and
  - (c) immediately before the disposal by the trustees of settlement 1, S meets condition C as a settlor in relation to settlement 1 as a result of subsection (2) or (3) or this subsection,
- then S meets condition C as a settlor in relation to settlement 2 from the time S becomes such a settlor until S ceases to be such a settlor.
- (5) “Settlement 1” and “settlement 2” are to be read in accordance with section 470(1).

For CGT, the equivalent is the last paragraph of s.69(2C) TCGA:

and, in the case of a transfer of property from Settlement 1 to Settlement 2 in relation to which s.68B applies, “relevant time” in relation to a settlor of the transferred property in respect of Settlement 2 includes any

---

<sup>29</sup> See 59.1.1 (Separate sub-fund trustees). For the (somewhat theoretical) case where a sub-fund election is made, see 59.9 (Effect of sub-fund election).

time which, immediately before the time of the disposal by the trustees of Settlement 1, was a relevant time in relation to that settlor in respect of Settlement 1.

## 6.12 PE-residence rule

Section 475(6) ITA provides:

If at a time a person (“T”) who is a trustee of the settlement acts as trustee in the course of a business which T carries on in the UK through a branch, agency or permanent establishment there, then for the purposes of subsections (4) and (5) assume that T is UK resident at that time.<sup>30</sup>

I refer to this as the “**PE-residence rule**”.

The PE-residence rule has four requirements:

- (1) A trustee carries on a business.
- (2) It carries on business in the UK.
- (3) It carries on business through a branch/agency or PE in the UK.
- (4) It acts as trustee in the course of that business.

HMRC has published guidance on the PE-residence rule (“**HMRC PE-residence rule guidance**”).<sup>31</sup>

The professional bodies have issued a 31-page guidance note “Taxguide 06/15”.<sup>32</sup> This consists of (I think, excessively) detailed examples put to HMRC, followed by brief generalities from HMRC. That format makes it difficult to identify relevant principles, though one or two significant points can be found.

See too 6.20.1 (Reason for PE-residence rule).

### 6.12.1 “Business”

---

30 The CGT equivalent is s.69(2D) TCGA.

31 [http://www.hmrc.gov.uk/manuals/tsemmanual/attachments/tsem1461\\_appendix1.doc](http://www.hmrc.gov.uk/manuals/tsemmanual/attachments/tsem1461_appendix1.doc)  
The guidance was published in 2009 and lightly revised in 2011 (though the website version is still dated 1 July 2009). The guidance is in appendix 1 of the TSE Manual but in the form of a downloadable word file, not online text; as a result it is missing in commercial tax databases.

32 <http://www.step.org/sites/default/files/Policy/pdfs/trustee-residence-guide-2015.pdf>  
This provides: “This Taxguide was originally published as Taxguide 3/10 which is now withdrawn. It has been reissued following a change to example 19 and the removal of example 28 which is now covered in the extended example 19. The revised example 19 was agreed by HMRC in 2015.”

The PE-residence rule only applies if the trustee carries on a business. A trustee which does not charge, or only charges to recoup expenses (such as a family trustee company) does not carry on business. This may offer a solution to the problem of the PE-residence rule.

HMRC agree. HMRC PE-residence rule guidance provides:

By business we mean the business of providing professional trustee services for a fee.

### 6.12.2 *Acting in course of business*

The business must be (or include) the business of acting as trustee. For instance, if the trust holds UK investment properties, the trustee will carry on a property business in the UK, but is not acting as trustee in the course of running that business: it is running the business in the course of acting as trustee. In other words, the test is looking at the business that the trustee is carrying on in its private capacity, not in its capacity as trustee.

HMRC agree. HMRC PE-residence rule guidance provides:

8. When considering the applicability of the [PE-residence rule] the following three questions are relevant:

**A. Is the trustee carrying on a business in the UK?**

... This question does not relate to the business of a particular trust that might be conducted by the trustee. It enquires whether the person who is a trustee carries out business activities (as a professional or businessman, not as trustee of a particular trust) in the UK.

**B. If the trustee is carrying on a business in the UK is it carrying on that business through a branch, agent, or permanent establishment in the UK?**

Again this means that the trustee is carrying on through the branch, agency or permanent establishment the sort of activities from which it substantially derives its worldwide profits - providing professional services for a fee - and not what it is doing in relation to an individual trust.

### 6.12.3 *Business “carried on in UK”*

What if T carries on business partly in the UK and partly elsewhere? It is suggested that T carries on business in the UK, so if the UK part is carried on through a PE, T is deemed UK resident. If this is right, the rule lacks all proportionality. There is no *de minimis* rule. If a small part of T’s trust

business is carried on through a UK PE, the entire trust may become UK resident. As to whether a business is partly carried on in the UK, see 20.4.3 (Trading income of a non-resident), but if the business is carried on through a PE in the UK, there must be a business carried on (at least partly) in the UK.

#### 6.12.4 *One trustee of several trusts*

What is the position if a person is trustee of several trusts and acts as trustee through a UK PE for one trust, but not the others? It is considered that only that one trust is UK resident. This follows from the rule that trustees are a notional person distinct from the person who is actually trustee.<sup>33</sup> This view also makes better sense in the context.

HMRC agree. HMRC PE-residence rule guidance provides:

8. When considering the applicability of the [PE-residence rule] the following three questions are relevant ...

**C. If so is the trustee carrying on the activity of being a trustee of that particular trust in the course of its business through the branch, agent or permanent establishment?**

For example, a corporate trustee could have a permanent establishment in the UK but it is only when it is acting as a trustee through that place that the deemed residence rules apply in relation to the particular trust for which the company acts as trustee. The test is on a trust by trust basis. So while a corporate trustee might be acting as a trustee in relation to one trust through a fixed place of business in the UK, other trusts must be considered separately according to their facts and circumstances.

The same principle applies in the case of a non-corporate trustee: the test is on a trust by trust basis.

#### 6.12.5 *Several trustees of one trust*

Suppose:

- (1) a trust has two trustees, T1 and T2.
- (2) T1 is deemed UK resident (because it has a UK PE) but T2 is not (e.g. T2 is an individual who does not carry on business).

This is treated as a trust with mixed-resident trustees So where a trust does not have a UK-linked settlor, the appointment of a co-trustee who does not

---

<sup>33</sup> See 6.3 (Trustees a distinct person).

carry on trustee business would solve the difficulty posed by the PE-residence rule.<sup>34</sup> HMRC agree. Trust residence guidance example 4b provides:

**Example 4b** (December Ltd & Mr Wednesday joint trustees of Tuesday Trust)

As in example 4a<sup>35</sup> but the significance of the meetings M has in the UK with the beneficiaries of the Tuesday Trust is sufficient for D Ltd to have a permanent establishment in the UK in respect of that trust. However D Ltd has a co-trustee Mr. W who is a non-UK resident trustee.

**HMRC view:** As there is a co-trustee who is non-UK resident and as the settlor of the T Trust was not resident or domiciled in the UK when he introduced property into the trust that means that the trustees of the T Trust as a body will not be UK resident.

#### 6.12.6 “Through branch/agency/PE”

In UK domestic tax law, the concept PE is used for companies<sup>36</sup> and “branch or agency” is used for individuals.<sup>37</sup>

HMRC PE-residence rule guidance provides:

5. HMRC accept that for trustees the ‘branch’ and ‘agency’ tests apply to non-corporate trustees and the ‘*permanent establishment*’ test to corporate trustees. Non-UK resident companies that are trustees therefore need only be concerned about being treated as UK resident if they carry on a business through a permanent establishment in the UK. This is in line with section 10B TCGA 1992 which has the effect that an overseas company is not taxed on the gains made by a UK branch or agency, but only on those made by a permanent establishment here. ...

Thus in the HMRC view, the PE-residence rule applies:

- (1) If a corporate trustee is carrying on a trustee business through a PE.
- (2) If an individual trustee is carrying on a trustee business through a branch/agency.

---

34 See 6.6 (Mixed-resident trustees).

35 See 6.15.4 (Director/employee of trustee).

36 The statutory definition of PE applies only to companies: see 101.2.2 (Scope of UK law definition).

37 See 101.2 (PE: UK-law/OECD Model meanings); 101.25 (Meaning of “branch or agency”).

One does not ask if an individual has a PE, or if a company has a branch or agency.

In practice offshore trusts do not often have individuals as trustees, and where individuals do act, they do not usually do so in the course of business. Accordingly, the question will normally be whether a corporate trustee has a PE: branch/agency will not normally arise. Since branch/agency is a somewhat undeveloped concept that is just as well. If, exceptionally, the issue did arise, the concept of branch/agency is more or less the same as PE and for most practical purposes is identical.<sup>38</sup>

If, as advocated in this book, the concept of branch/agency was replaced altogether by PE, this complication would cease.<sup>39</sup>

### 6.12.7 Which definition of PE

The term “permanent establishment” has several distinct definitions.<sup>40</sup> I use the following terminology:

- (1) “**UK-law PE**” defined in s.1141 CTA 2010
- (2) “**OECD-Model PE**” defined in OECD Model
- (3) PE as defined in any particular DTA

The term “PE” is not defined for the purposes of trust residence. Which definition applies? It is suggested that the UK-law PE should be the relevant definition. That is a statutory, taxes-act-wide definition.

The UK-law definition of PE only applies “in relation to a company”<sup>41</sup> so it does not apply to a non-corporate trustee, which is consistent with the view that for non-corporates, one applies the branch/agency rule and PE is not relevant.

A corporate trustee is treated as not being a company for IT/CGT purposes<sup>42</sup> unless the context otherwise requires. But we are here concerned with the business which the trustee carries on in its private capacity, so it is suggested that the context does otherwise require.

HMRC PE-residence rule guidance in its original form (2009) assumed that the applicable definition was OECD-Model PE. That is *an* ordinary

38 See 101.25 (Meaning of “branch or agency”) .

39 See 101.26 (Branch/agency: Critique).

40 See 101.2 (PE: UK-law/OECD Model meanings).

41 See 101.2.2 (Scope of UK-law definition).

42 See 6.3 (Trustees a distinct person).

sense, but in the light of the statutory definition, it cannot be said to be *the* ordinary sense. Another difficulty is that this definition may change under the BEPS MLI. Which definition applies, the historic one or the current one? While UK tax legislation occasionally delegates, or outsources, to OECD, one would expect the legislation to say so.

In 2011, the following passage was added to the guidance:

### **Treaty Issues**

13. Most UK treaties contain a permanent establishment threshold (Article 5 in OECD Model) for taxing business profits of a non-resident. This applies to both corporate and non-corporate trustees. Although permanent establishment is generally relevant to corporate trustees, and branch and agency to non-corporates, where trustees are residents of a treaty country (and the treaty contains a permanent establishment threshold) then effectively that is the standard that needs to be met in the case of all trustees, non-corporate as well as corporate. This means that for treaty countries broadly the same considerations for permanent establishment as set out in the guidance will apply in the case of non-corporates. This includes the independent agent exemption outlined below.

14. Thus, where a treaty exists between the UK and the country in which the trustee is resident the permanent establishment article needs to be satisfied for the trustee to be treated as UK resident for the purposes of the trustee residence rules.

15. Annex A outlines in more detail how OECD Commentary interprets Article 5...

Thus the HMRC view is as follows:

- (1) Where a corporate trustee is treaty-resident in a foreign state under a DTA with a definition of PE, the expression PE in the PE-residence rule is understood to refer to PE as defined in the treaty. Branch/agency does not apply.
- (2) Where an individual trustee is treaty-resident in a foreign state under a DTA with a definition of PE, the expression PE in the PE-residence rule is understood to refer to PE as defined in the treaty. Branch/agency does not apply.
- (3) Where a trustee is not treaty-resident in a foreign state under a DTA with a definition of PE:
  - (a) In the case of a corporate trustee, one applies OECD-Model PE (I think); and branch/agency does not apply.

- (b) In the case of a non-corporate trustee, one asks whether the trustee has a UK branch/agency; and PE does not apply.

I suspect that the authors of the guidance (both the original and the 2011 revision) overlooked the UK-law definition of PE.

This is all a terrible muddle, though it could easily be resolved by straightforward tax simplification.<sup>43</sup> Fortunately (in the context of a trustee business in particular) there is probably little difference between:

- (1) UK-law PE
- (2) OECD-Model PE
- (3) PE as defined in any particular treaty
- (4) Branch/agency

So it will rarely if ever matter which definition or concept applies. Still, it would be good to know precisely what we are talking about.

### 6.13 When is there a UK PE

The more important question is what amounts to a PE, whichever definition applies. The difficulty is that the concept of PE, which was designed for international tax/DTA purposes, is not well suited as a test of trustee residence. Moreover I suspect that the part of HMRC which deals with trusts does not speak much to the part which deals with PE, and has little understanding of the difficult definition of PE. So on this point HMRC PE-residence rule guidance offers only vague and heavily qualified generalities.

There are two types of PE which I call:

- (1) **“Fixed place of business PE”** and
- (2) **“Agency PE”**

#### 6.13.1 *Auxiliary v core activities*

HMRC PE-residence rule guidance provides:

**Core activities**

9. In connection with Question C and in line with the Commentary to the OECD Tax Model Convention, “carrying on the function of being a trustee” means in this context activities which are the core activities of a

---

43 See 101.23 (Definitions of PE: Critique).

trustee and not those activities which are auxiliary or preparatory.<sup>44</sup> This applies equally to non-corporate trustees.

It is correct that activities of a preparatory or auxiliary character do not constitute a PE.<sup>45</sup> The use of the label “core activities” to describe those which are not merely preparatory/auxiliary is not entirely apt. In another context, the expression is criticised by Lord Templeman, referring to the “incomprehensible test” of core duties.<sup>46</sup>

HMRC PE-residence rule guidance explains what it regards as “core activities”:

10. A trustee is the person who has a legal duty to manage the assets of that trust in the best interests of the beneficiary or beneficiaries. The trustee manages, employs and disposes of the trust assets in accordance with both the terms of the trust and the duties and responsibilities which the law places upon trustees. The core activities of a trustee would therefore be regarded as including:

10.1 the general administration of the trusts

10.2 the over-arching investment strategy

10.3 monitoring the performance of those investments

10.4 decisions on how trust income will be dealt with and whether distributions should be made.<sup>47</sup>

HMRC PE-residence rule guidance then explains “auxiliary activities”:

11. There are other activities which trustees carry out which are not core activities central to their conduct and management of the trust, but are instead preparatory or auxiliary activities. These *generally* can include information gathering meetings, including meetings with independent agents or with beneficiaries but, as mentioned below, each case will have to be considered individually.

The rule that information gathering is auxiliary is in fact a statutory rule.<sup>48</sup> But in practice meetings tend to move seamlessly from information gathering to decision making.

---

44 See 6.12.4 (One trustee of several trusts).

45 See 101.17 (Preparatory and auxiliary activities).

46 *Fitzpatrick v IRC* 66 TC 407 at p.527.

47 The draft guidance included a further paragraph 10.5: “accounting, making tax returns and record keeping.” Significantly, the final guidance deleted this.

48 See 101.17 (Preparatory and auxiliary activities).

12. In deciding whether the conduct and management of a particular trust is being carried on in the course of the corporate trustee's business through a permanent establishment, HMRC's approach will be to look at where the core activities are physically being carried out. If these core activities are being carried on in the UK through the corporate trustee's permanent establishment, the trustee would be treated as UK resident for the purposes of the particular trust. However as well as the nature or significance of the individual activities and meetings and whether they are core activities, we would also consider the issue of frequency. So where there is, in relation to a particular trust, evidence of considerable administrative work – such as meetings with investment managers or beneficiaries – being carried on in the UK through a permanent establishment, so that such meetings have become a major element of the trustee's activities in relation to that trust, and no longer preparatory or auxiliary, we would need to consider carefully whether as a matter of fact the non-UK resident corporate trustee was acting as a trustee through that permanent establishment.

Before turning to examples, the Guidance sets out the usual disclaimers:

16. The guidance that follows sets out examples of when a corporate trustee may or may not be regarded as UK resident. This guidance is based on the law as it stood on the day of publication. HMRC will publish amended or supplementary guidance if there is a change in the law or in the Department's interpretation of it. Whilst the guidance is intended to be as extensive and helpful as possible, it should not be assumed that it will provide a definitive answer in every case. That will depend upon the facts of each individual case. You can of course take your own advice on this issue...

### 6.13.2 *Marketing*

Marketing to prospective settlors is not carrying on trust business in the UK, because no trust at that time exists. HMRC agree:

#### **1. Preparatory work prior to the creation of any trust**

1.1 A non-UK resident trust company that is to be a trustee of a settlement may carry out a number of activities in the UK before the trust is created. This might, for example, include discussions with clients such as potential settlors or beneficiaries over the appropriate terms of any trust. It could also include research with specialist professionals about possible trust investments and assets. These discussions may take place even before the

beneficiaries are chosen.

**Example 1** (February Ltd trustee of January trust)

Before the J Trust is established, F Ltd, a non-UK resident trust company holds several meetings in the UK at its Manchester office with the potential settlor Mr J. The meetings are to discuss the possible terms of the trust and suitable investments.

**HMRC view** The J trust does not yet exist, so there is no need to consider the tests in section 69(2D) TCGA 1992 and section 475(6) ITA. In any case, introductory meetings and discussions of this type would generally be regarded as preparatory or auxiliary activities and not core activities.

## 6.14 Fixed place of business PE

### 6.14.1 Occasional visits

A place which the trustees use occasionally to meet the settlor, beneficiaries or others cannot constitute a fixed place of business PE, which requires a degree of permanency.<sup>49</sup> HMRC PE-residence rule guidance provides:

#### 2. Trustee carrying out duties for the administration of any trust

As mentioned in paragraphs 9 to 11 of the Background section of this guidance,<sup>50</sup> a range of activities may be carried out by a trustee once a trust has been set up including meetings. When considering whether the corporate trustee is carrying on the administration of a particular trust in the course of their business through the permanent establishment, the frequency of the meetings will be looked at as well as their significance and quality.

**Example 2** (March Ltd, trustee of April trust)

M Ltd, a non-UK resident trust company that is trustee of the A Trust, holds quarterly meetings in the UK at its London offices with investment advisers. The purpose of these meetings is for M Ltd to collect purely factual information about potential assets to inform future investment strategy for the A trust. The actual decisions about the investment strategy are taken by M Ltd at their home office outside the UK. No other activities or meetings relating to the A Trust are carried on in the UK.

**HMRC view:** M Ltd has a permanent establishment in the UK. However, the significance of the meetings with the investment advisers is not sufficient for March Ltd to be regarded as acting as a trustee in respect of

---

49 See 101.8.2 (Degree of permanency).

50 See 6.13.1 (Auxiliary v core activities).

April Trust through that permanent establishment. They will not, therefore, be regarded as UK resident for the purposes of the April Trust.

The correct analysis is that the trustee does not have a PE in the UK, for two independent reasons: information collecting is an auxiliary matter, and the office is not used with sufficient regularity to constitute a PE. (One is of course looking on the matter on a trust by trust basis).

The author assumes that the trustee does have a fixed place of business PE but does not carry on business through it. Strictly a PE means a place of business through which a business is carried on, so there is no PE. However the end result is the same.

By contrast:

**Example 2a** (May Ltd, trustee of June Trust)

M Ltd, a non-UK resident trust company, is sole trustee of the J Trust. M Ltd carries out all the work for the trust through its UK offices, including preparatory work, general administration, meetings with investment managers, accountants, beneficiaries etc.. The investment and distribution policies are also all determined in the UK office. Formal ratification of those strategies, including signature of documents, is made by M Ltd at very brief meetings outside the UK, with little or no further discussion of the proposals before approval is given.

**HMRC view:** Although the strategic decisions are core activities, all the administration of the J Trust has been carried out in M Ltd's UK office. The formal meetings outside the UK although prima facie core activities are in reality merely "rubber stamping" all the UK work. M Ltd has acted as a trustee in respect of the J Trust through its UK permanent establishment and so will be treated as UK resident for the purposes of the J Trust.

That seems correct. M Ltd has a fixed place of business PE.

**Example 2b** (July Ltd, trustee of August trust)

J Ltd, a non-UK resident trust company is trustee of the A Trust. It always carries out the core activities of the A Trust at its office overseas. The beneficiary of the trust has a single one-off meeting with J Ltd at J's Manchester office to discuss the potential release<sup>51</sup> of capital from the A trust. The discussion involves the imposition of certain conditions on the

---

51 The Guidance seems unfamiliar with trust terminology and practice, though nothing turns on that.

beneficiary before such a release.

**HMRC view:** On the face of it J Ltd by discussing the release of capital and the imposition of conditions with the beneficiary has engaged in a core activity and this has taken place at what is J's permanent establishment in the UK. So prima facie J Ltd is acting as trustee of the A Trust through a permanent establishment. However the whole context has to be looked at - i.e. where the decision making on the trust is being carried on and if the meeting in the UK was a one-off. If the trustee took the information from the meetings out of the UK with them and then discussed and made the decisions outside the UK, they would not be UK resident. If there was any doubt as to where the decision making is taking place we would as part of our considerations consider the frequency of any meetings both within and outside the UK.

More analytically, the issues (which are not clearly identified or addressed) are:

- (1) Are the acts of the trustee in the UK merely preparatory (such as information gathering)? If so, there is no PE.
- (2) Is the office used with sufficient regularity to constitute a fixed place of business PE? On the given facts, a one-off meeting is clearly not sufficient and the UK office is not a PE, so (although the HMRC example does not reach any conclusion) the answer is that the trustee is not UK resident.

## 6.15 Agency PE

An agency PE arises if (in short):

- (1) An agent has and habitually exercises authority to do business on behalf of the trustee; and
- (2) it is not an agent of independent status acting in the ordinary course of their business.<sup>52</sup>

### 6.15.1 Accountancy/law/tax advice

A person who provides accountancy services, or legal or tax advice, cannot be an agency PE as providing services of that kind does not constitute doing business on behalf of the trustee: an accountant or tax adviser has no authority to do any business at all on behalf of the trustee.

---

<sup>52</sup> See 101.12 (Agency PE) and 101.14 (Independent agent exemption).

If necessary, I would also say that these activities were auxiliary, not core; but it is not necessary to rely on that.

The accountant or adviser is likely to be an agent of independent status, and so not a PE for that reason too.

### 6.15.2 *Investment managers/brokers*

If IME PE relief applies, it is not necessary to consider further whether or not the broker/IM would otherwise be an agency PE.<sup>53</sup> In this section I concentrate on investment managers; the position of brokers is the same.

The relief is in s.1146(1) CTA 2010 which provides:

This section applies if an investment transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the UK acting as an investment manager.

This relief can apply. The non-UK resident company (the trustee) is not carrying on the trade of dealing in securities. However the trustee is carrying on the trade of acting as trustee in the UK. The contrary view has been suggested, but this seems reasonably clear.

The question then is whether investment manager conditions A to E are met. I deal with these briefly here as they are discussed in detail elsewhere.<sup>54</sup> Conditions A and B are straightforward. Conditions C and E require an arm's length relationship and full remuneration (which overlap: can one envisage an arm's length relationship without remuneration?). Condition D is the 20% rule. This was not written with trustees in mind, but construed in the context (perhaps a purposive construction) it should be regarded as satisfied provided that the investment manager (and connected persons) do not have an interest in more than 20% of the trust income. That will usually be the case.

It follows that investment managers/brokers on arm's length terms will not constitute a PE. Taxguide 06/15 confirms this:

It doesn't matter that there is a corporate relationship between the investment manager and the trustee (such as the two entities being in the same corporate group) and this will not prevent the independent agent status applying. This follows the principle in OECD Commentary on

---

53 See 68.2 (IME PE relief).

54 See 68.6 (Investment manager conditions).

Article 5 that a subsidiary is not automatically assumed to be a dependent agent of its parent.

### 6.15.3 *HMRC guidance*

The HMRC guidance in this area bears only a tenuous connection to the law. The original HMRC guidance did have the merit of clarity:

I can confirm that our interpretation of the rules is that the provision of services on an arms length basis would not cause non-UK trustees to have a permanent establishment and therefore would not make the non-resident trustee UK resident.

More specifically, this would include where services are carried out by a subsidiary on a fully arms length basis, such as:

- maintaining the financial or accounting records
- preparation of accounts
- preparation and submission of tax returns for any settlement by a separate entity within the organisation contracting at arms length terms.

Provided the services are contracted (at arms length terms) HMRC would not consider this constitutes a permanent establishment as the UK company will be rendering a service to the trust. Therefore, these activities would not cause the non-UK trustees to have a permanent establishment in the UK and the non-UK trustee is not made resident by [the PE-residence rule].<sup>55</sup>

The correct questions are whether the agent has and habitually exercises authority to do business on behalf of the trustee, and if so whether the IM exemption applies, and whether the agent is of independent status and acting in the ordinary course of their business. The question is not whether the agent is receiving an arm's length fee. However the HMRC arm's length fee test reflects the policy aims of the provision, would be a simpler and workable rule, and would not normally give a different result from the correct approach.

In HMRC PE-residence rule guidance, this approach is maintained but is watered down with qualifications such as "likely" or "ordinarily":

---

55 Extract from letter dated 18 July 2007

<http://old.tax.org.uk/attach.pl/5810/6458/TrusteeResidenceTestHMRCtoEC180707.pdf>

### 3. Activities carried on for the trust other than by the non-UK resident trust company

3.1 Whilst a non-UK resident trust company acting as a trustee may not carry out trust business at a fixed place of business permanent establishment in the UK, it is also necessary to consider whether activities are carried out in the UK on that non-UK resident trust company's behalf by a dependent agent. If this is the case the trustee may be treated as having a permanent establishment in the UK. ...

3.2 The activity of providing services to a non-UK resident trustee, whether by a connected person or not, does not of itself create a dependent agency permanent establishment ... It is necessary to consider the capacity in which the person provides the services to the trust on behalf of the non-UK resident trustee. Where

- [1] the services that are provided to the trust are only those that the person is contractually obliged to provide under their agreement with the non-UK resident trustee and
  - [2] are remunerated at arm's length,
- then this is *unlikely* to create a dependent agency permanent establishment.

Point [1] is hard to understand. Who would provide services without a contract? Perhaps the author has in mind a beneficiary providing services to the trust informally, but it is difficult to see how remuneration could be paid in the absence of a contract, express or implied.

3.3 Whether there is a dependent agency permanent establishment will depend on the facts of the case; the position is the same whether it is an unconnected third party or a UK subsidiary or other connected person that carries out the work for the trust. Where, say, a UK subsidiary of a non-UK resident trust company is providing services to a trust, then unless the powers granted to it by the non-UK resident trust company are such that it becomes a '*dependent agent with authority to do business on behalf of the non-resident trustee*' ... we will not contend that the UK subsidiary's actions cause the non-UK resident trustee company to have a permanent establishment.

This is correct.

**Example 3** (September Ltd trustee, October Ltd investment advisers, November trust)

S Ltd, a non-UK resident trust company contracts with O Ltd which is a UK company within the same group. The services to be provided by O

Ltd are for investment advice for the N Trust. The contract between S Ltd and O Ltd is on an arm's length basis and O Ltd has no powers granted to it by September Ltd.

**HMRC view:** O Ltd is providing a service for S Ltd and has contracted to do so on arm's length terms. They have no authority to do business on behalf of S Ltd so are not their dependent agent. Therefore, S Ltd will not be treated as having a permanent establishment through the work carried out by O Ltd in the UK. So S Ltd will not be treated as UK resident for the purposes of the N Trust.

This is straightforward. If the investment adviser had no authority to do business on behalf of its principal, then it is not an agent at all. It cannot be an agency PE.

If the investment adviser did have power to do business on behalf of the trust, it is still not PE as long as it qualified for the IM exemption (which in practice should usually be the case).

Other examples which would be treated in the same way where there was an arm's length relationship are:

- Preparing trust accounts for the trustees' review and approval
- Preparing trust tax returns for the trustees' review and approval and filing the return on their behalf with HMRC
- Obtaining quotes for necessary repair work on trust property
- Having contact with workmen to ensure that those repairs are carried out
- Day to day management of let property (such as dealing with tenants etc)
- Signing small cheques such as paying for minor repairs

**Example 3a** (September Ltd trustee, October Ltd investment advisers)

As above but O Ltd also has authority to buy and sell commodities with a view to realising profits for the trust subject to trading limits set by S Ltd. It receives an arm's length fee for this activity.

**HMRC view:** The investment manager is appointed by the trustee, and so is its agent. If it receives an arm's length fee for the investment management services, it will not *ordinarily* constitute a dependent agent of the non-UK resident trustee.

If, however O Ltd was providing investment management services to the trustees other than on arm's length terms i.e. was acting as their dependent agent, rather than simply providing a service to them, in that case the trustees would be *likely* to have a dependent agent permanent establishment.

(This is in line with the Investment Manager Exemption provisions – in particular that the provision of services at less than a customary rate can indicate that the investment manager is not an independent agent of the non-UK resident trustee.)

#### 6.15.4 *Director/employee of trustee*

The question may arise whether a UK resident director/employee of a corporate trustee can constitute an agency PE; though I wonder how often a non-resident trustee company has a UK resident director/employee.

HMRC PE-residence rule guidance provides:

#### **4. UK resident directors or other employees of a non-UK resident trust company.**

4.1 First, it is necessary to consider the role of the UK resident director or employee of the non-UK resident trustee.

4.2 If the UK resident employee is not carrying out activities that would be regarded as core trustee activities in relation to a particular trust then the presence in the UK of an employee of a non-UK resident trust company could not by itself cause a non-UK resident trustee to have a permanent establishment in the UK.

This is consistent with the point made at 6.13.1 (Auxiliary v core activities).

4.3 Where in relation to a particular trust the UK resident employee does carry out [core] trustee activities in the UK then it is likely that the non-UK resident trustee will have a permanent establishment in the UK. This will be the case if

- [1] the employee operates from a fixed base, or
- [2] does not have a fixed base but habitually acts on behalf of the non-UK resident trustee for the particular trust, i.e. is a dependent agent permanent establishment of the non-UK resident trustee.

The crucial point in relation to a dependent agent permanent establishment is whether the non-UK resident trustee company has in the UK-resident employee a dependent agent with authority to conduct business on behalf of the non-UK resident trustee. If this UK resident employee of a non-UK resident trustee does have the authority to make decisions then s/he is likely to constitute a dependent agent permanent establishment of the non-UK resident trust company.

The first example is a simple variant of example 1.<sup>56</sup>

**Example 4 (December Ltd trustee; Mr Monday employee)**

D Ltd, a non-UK resident trustee has a director or other employee M who is resident in the UK. (This individual may also be an employee or director of UK resident group members.)

The group provides office accommodation in the UK to M. His role is to market the business of the non-UK resident trust company in the UK which includes meeting with prospective settlers and other business contacts for this purpose.

**HMRC view:** In this case, M's role is only meeting with prospective settlers and other business contacts for the purpose of marketing the business of D Ltd. Although these activities are carried out at the same place, they are not activities as a trustee that are carried out at a fixed place of business. They would generally be preparatory or auxiliary activities. This would not cause D Ltd to be treated as carrying on trustee business through a permanent establishment in the UK.

In the next example, the director/employee does more than marketing:

**Example 4a**

As in example 4, but M's role also extends to meeting beneficiaries of existing trusts.

**HMRC view:** In this case, the importance of the subject matters discussed and the decisions taken at those meetings, and the frequency of the meetings held, will need to be analysed in relation to each trust in order to reach a conclusion as to whether D Ltd is carrying on a business through a permanent establishment in the UK for that trust through M. If no office accommodation is at his disposal M could still constitute a dependent agent permanent establishment of the non-UK resident trustee if he has authority to enter into contracts or otherwise do business on behalf of the trustee of the trusts i.e. more than simply meeting the beneficiaries and he habitually exercises that authority on behalf of his employer for the trust.

HMRC do not answer the question in the example, but the general approach to the answer is correct. Of course the example only applies if the trustee acts as trustee in the course of a business.

## 6.16 Individual trustee: Branch/agency

---

<sup>56</sup> See 6.13.2 (Marketing).

### 6.16.1 *General approach*

Taxguide 06/15 provides:

**Example 19** (Mr S trustee of Rho Trust; Sigma Ltd fund manager)

Mr S, a resident of the Cayman Islands, carries on a business of providing trustee services in the Cayman Islands. Mr S is the sole trustee of the R Trust. Mr S is not UK resident.

Because its sole trustee is non-UK resident, the R Trust is non-resident for income tax and CGT purposes, unless Mr S acts as trustee for the R Trust in the course of business which Mr S carries on in the UK through a branch or agency.

HMRC accepts that the “permanent establishment” test normally applies only to corporate trustees. In this case there is no Article 5 in the UK: Cayman Double Taxation Agreement and the PE threshold do not need to be considered, only branch or agency.

**Question**

When might ITA 2007, s 475(6)/TCGA 1992, s 69(2D) apply such that the non-resident R Trust is UK resident for income tax and CGT purposes?

**Analysis**

As set down in the HMRC Trustee residence guidance (Trusts and Estates Manual, Appendix 1) when considering the applicability of the tests in ITA 2007, s 475(6) and TCGA 1992, s 69(2D) the following three questions are relevant:

- a) Is the trustee carrying on a business in the UK?
- b) If the trustee is carrying on a business in the UK is it carrying on that business through a branch, agent, or permanent establishment in the UK?
- c) If so is the trustee carrying on the activity of being a trustee of that particular trust in the course of its business through the branch, agent or permanent establishment?

If the answer to all three questions is “yes” then Mr S will be acting as trustee for the R Trust in the course of business which he carries on in the UK through a branch or agency and, since he is the sole trustee, this will mean that the trust is UK resident.

The answers to the three questions will depend on the specific facts. The facts set out above are insufficient to enable any of the questions to be answered. As such, supplementary facts are provided in each of scenarios 19.1 to 19.4 below...

### 6.16.2 *UK office*

Taxguide 06/15 provides:

**19.1 Mr S has an office in the UK and activities with respect to his trustee business are carried out through that office.**

Mr S's London office is a branch of his Cayman trustee business. As such:

- a) Mr S is carrying on a business in the UK.
- b) Since there is a London office Mr S is carrying on that business through a branch in the UK.

If activities with respect to the R Trust are carried out through the London office, then the R Trust is UK resident. But the R Trust would not be UK resident if the affairs of the R Trust are not handled through the London office.

Note that if Mr S has employees who work through the London office he would also have agents in the UK. However, since the London office is a branch and so within the ITA s 475(6) requirement by virtue of that fact alone, this does not need to be considered further.

### 6.16.3 *Fund manager*

Taxguide 06/15 provides:

**19.2 Mr S does not have an office in the UK. Mr S appoints S Ltd. a London fund manager, to manage the R Trust's portfolio. Neither Mr S nor his employees visit the UK.**

S Ltd is not connected to Mr S and so is not a branch of his business of providing trustee services. S Ltd is not acting as agent of the trustee, but providing a service to the trust, for which it is paid. S Ltd is not an agent of Mr S in his personal capacity of administering trusts. There is no branch or agency so the R trust is non-UK resident.

### 6.16.4 *Employee of trustee*

Taxguide 06/15 provides:

**19.3 Mr S does not have an office in the UK. Mr S appoints S Ltd. a London fund manager, to manage the R Trust's portfolio. Mr S's employees visit the UK to discuss the affairs of the R Trust with S Ltd at S's London office.**

As discussed above (19.2), S Ltd cannot be said to be either a UK branch or a UK agent through which Mr S carries out trustee activities with

respect to the R Trust. Even though Mr S's Cayman trustee business does not have a UK office, the R Trust could be UK resident if employees of Mr S visited the UK, and discussed the affairs of the R Trust with S Limited at its office. In this event Mr S would be carrying on part of his trustee business of providing trustee services in the UK through the employees acting as Mr S's agents in the UK.

Whether the trust was UK resident or not would depend on the nature and extent of the employees visits to the UK offices of S Limited:

- If the activities carried out are core activities then the trust will be UK resident.
- If the activities are merely auxiliary or preparatory (such as delivering instructions from Mr S or picking up reports) then the trust will not be UK resident.

#### 6.16.5 *Trustee not own agent*

Taxguide 06/15 provides:

**19.4 Mr S does not have an office in the UK. Mr S appoints S Ltd. a London fund manager, to manage the R Trust's portfolio. Mr S himself visits the UK to discuss the affairs of the R Trust with S Ltd at S's London office.**

As discussed above (19.2), S Ltd cannot be said to be either a UK branch or a UK agent through which Mr S carries out trustee activities with respect to the R Trust.

A person cannot be an agent of himself. As such, the R Trust would not be UK resident if Mr S made the visits to S Limited himself.

As explained in above (19.3) the position would be different if Mr S's employees made the UK visits to S Limited as the employees would be acting as Mr S's agents in the UK.

### 6.17 PE-residence rule guidelines

It is considered that the following guidelines will avoid difficulties under the PE-residence rule. It is assumed that the trust has only a corporate trustee, or if it has individual trustees, they are not carrying on a business (so it is necessary to consider PE issues but not branch/agency issues).

Use of professional UK investment managers and brokers on arm's length terms is safe.

Use of professional UK advisers to prepare tax returns or give tax advice is safe.

Use of UK agents to manage UK property investments is safe, providing

they are acting in the ordinary course of their business, which in practice they should be.

The trustees may meet beneficiaries (or others) in the UK in any of the following circumstances:

- (1) If the meeting is at the offices of the beneficiaries (or others) or hotels; not in the trustees own offices, or in offices provided by a company in the same group as the trustees.
- (2) If the meeting is occasional. Once a year or less would safely be “occasional” for this purpose.
- (3) If the meeting is purely for information gathering purposes. (The minutes of the meeting should make that clear.) However it may be difficult to restrict meetings to information gathering topics.

The trustees should not appoint a beneficiary to act for the trustee (unless, exceptionally, the beneficiary is carrying on a business and acting in the course of that business).

Where the trustees own a house which is occupied by the beneficiary, I see no difficulty in the trustees authorising the beneficiary to maintain the house, as that does not constitute carrying on business in the UK.

Marketing and meetings with prospective settlors are safe.

In cases where the settlor was not UK resident or domiciled when the settlement was made, all difficulty under the PE-residence rule can be avoided by the appointment of an individual co-trustee who is not UK resident and not carrying on a business.

## **6.18 Protectors and trust residence**

### *6.18.1 Protectors*

It is common practice to appoint a “protector” who (typically) has power:

- (1) to consent to certain key matters of trust administration; and
- (2) to appoint and dismiss trustees

A protector could not be regarded as a trustee<sup>57</sup> and so their actual

---

<sup>57</sup> In *Bridge Trustees v Noel Penny (Turbines)* [2008] EWHC 2054 (Ch) an employer had power to distribute the surplus assets of a pension scheme. The employer was not “a trustee properly so called, that is to say, a person in whom property is vested as trustee”; see at [23].

All the textbooks agree: Hubbard *Protectors of Trusts* (1<sup>st</sup> ed, 2013) paras 2.24 (Distinction between a Protector and a Trustee) and 8.70 (‘Not a trustee’ provision);

residence is irrelevant in ascertaining the actual residence of the trustees in

Underhill and Hayton, *Law of Trusts and Trustees* (19<sup>th</sup> ed, 2016), para 1.79: “Because the protector merely has powers vested in him and not trust property he is not a trustee”; Hayton (ed.) *International Trusts* (3rd ed, 2011) at para 4.11; *Thomas on Powers* (2<sup>nd</sup> ed 2012), para 7.109 fn 458.

If further authority is needed, which I doubt, see *Manoogian v Sonsino* [2002] EWHC 1304 (Ch). In this case a trust provided (in short):

“the Bank [which was the trustee] shall make such investments as may be directed to be made by the Armenian Patriarchate of Jerusalem.”

The Patriarch was not a trustee for the purposes of the Charities Act:

“His position is analogous to powers of a life tenant under a conventional strict settlement. The life tenant is often given powers to possess land, direct investments and so on, but none of those things make him a trustee of the settlement.” See at [41].

To the same effect, see *Gomez v Gomez* [2008] EWCA Civ 1065. One of the questions in this case was whether the defendant was sued “as trustee of a trust” within the meaning art article 5(6) Council Regulation (EC) No 44/2001 (now repealed). Article 5(6) was to be interpreted narrowly, or restrictively. The Court of Appeal said at [99]:

“... I can see no basis for extending Article 5(6) to such persons as appointors, or protectors, or to any other person with fiduciary powers who does not come within the normal meaning of the expression “trustee.”

*Gomez* is a decision on a provision where the word “trustee” had to be understood restrictively, but it confirms, if confirmation is needed, that protectors, and any other person with fiduciary powers, do not come within the *normal* meaning of the word “trustee.”

For completeness: It might be different if the protector’s role extends beyond that normally given to a protector. One could imagine a trust deed under which:

- (1) persons named “trustees” held legal title to property; and
- (2) a person (mis)named “protector” held the administrative and dispositive powers normally given to trustees.

This case (depending on the drafting) might be equivalent to the common situation where trust property is vested in nominees. In such a case no one suggests that the nominees are “trustees” for the purposes of the trust residence rule. Although the legal title may not be vested in the trustees, the trustees have the right to call for it. Alternatively (depending on the drafting) the case may be equivalent to the situation where custodian trustees hold the trust fund on behalf of managing trustees under s.4 Public Trustee Act 1906. In such a situation, the (so-called) protector would be a trustee. This is hypothetical – I have never seen it in practice – but worth mentioning as warning of problems which might arise if the powers of a UK resident protector were extremely extended.

Many offshore Trust Laws state expressly that a protector is not a trustee; but (i) that only states what would in principle be the position, and (ii) that could not be determinative of the meaning of “trustee” in a UK statute.

their private capacities.

A protector has functions conferred by the trust deed, and is not an agent of the trustees. So a protector does not constitute an agency PE, and does not affect trust residence under the PE-residence rule.

It follows that a protector may be UK resident without affecting the residence of the trust.

If trust assets are held through an underlying company, the acts of a protector in the UK could be relevant to the company's tax residence, if they impinge on its central management & control. But that seems unlikely.

### 6.18.2 *Reserved powers*

The same points arise for reserved power trusts. Taxguide 06/15 provides:

If the settlor has reserved the investment function to himself do HMRC consider the settlor to be an agency PE of the trustees if he habitually exercises the investment function while present in the UK?

Our view is that this is NOT the case. The settlor cannot be a PE of the trustees' business because the investment function is not part of the trustees' business. The trustees' primary and overriding responsibility is to comply with the terms of the trust deed and the trust deed does not give the trustees the investment function in the first place.

#### **HMRC answer**

If settlor has investment function under trust deed then it cannot be acting as agent of trustee.

## **6.19 Trust residence for IHT**

Trust residence is not very important for IHT but the concept is used on a few occasions. IHT definitions of trust residence are different from the IT/CGT definition.

For the (somewhat academic) relief for foreign currency bank accounts,<sup>58</sup> s.157(4) IHTA provides:

For the purposes of this section—

- (a) the question whether a person is resident in the UK shall, subject to paragraph (b) below, be determined as for the purposes of income tax; but

---

<sup>58</sup> See 72.13 (Foreign currency account).

- (b) the trustees of a settlement shall be regarded as not resident in the UK unless the general administration of the settlement is ordinarily carried on in the UK and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are resident there.

For the duty to disclose the creation of non-resident trusts,<sup>59</sup> s.218(3) IHTA provides:

For the purposes of this section trustees of a settlement shall be regarded as not resident in the UK unless the general administration of the settlement is ordinarily carried on in the UK and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are for the time being resident in the UK.

For the purposes of s.201(1)(d) IHTA (collection of non-resident trust tax from settlor), s.201(5) IHTA makes an identical provision.<sup>60</sup>

For the question of where the administration of a settlement is carried on, see the 5<sup>th</sup> edition of this work, para 5.6. There are various interesting points that could in theory arise under these definitions, but I doubt if they will arise in practice.

### 6.19.1 *IHT trust residence: Critique*

IHT trust residence is a mess: essentially the same definition is repeated four times.

There is no need to have a separate definition of trust residence for IHT at all, and if we need to keep the concept of trust residence, it would be best to switch to the IT/CGT definition. Failing that, a single standard definition applying for all IHT purposes would be a small improvement.

## 6.20 Trust residence: Critique

Various policy considerations simmer below the surface of this topic.

One factor is tax competition: the desirability of attracting trust administration business to the UK (or not driving it away). The work will not be done in the UK if that is going to incur additional tax liabilities.

Another factor is to avoid a loss of tax, measured from the benchmark of

---

<sup>59</sup> See 123.2 (Reporting creation of settlement).

<sup>60</sup> For completeness, the same definition is set out yet again in the IHT (Delivery of Accounts) (Excepted Settlements) Regulations 2008.

the present system.

More fundamentally, trust residence needs to be discussed in the context of the very broad set of questions of how to tax trusts generally on (1) trust gains, and (2) trust income.<sup>61</sup>

Residence of *individuals* is a sensible connecting factor for UK taxation: everyone accepts that an individual who is UK resident should to some extent at least be subject to UK tax. It is not self-evident that residence should be the main connecting factor, or a connecting factor at all, for the taxation of *trusts*. The move from individual residence to trust residence is problematic in two respects:

- (1) Residence of trusts is a matter which is chosen by the appointment of trustees.
- (2) Trustees are taxed as representing the beneficiaries, who may or may not be UK resident. Unfortunately the solution of taxing beneficiaries on trust income or gains on an arising basis is not available.

There are three broad categories of solution. None are wholly satisfactory. The first solution is the present system with or without minor variants.

The second solution is a system of residence by election:

Why not let all trustees elect that they and their beneficiaries and settlors should be taxed as if they were non-UK resident. All the trust business which now goes offshore could come back to the UK. The economy, and therefore the Revenue, would benefit, while beneficiaries would be less exposed to some of the practical problems to which offshore trusts are prone. Drug enforcement officers would then know that the reason that Mr X had set up a trust in some Caribbean jurisdiction would have nothing to do with UK taxation.<sup>62</sup>

Venables concludes: “No doubt the suggestion will be dismissed out of hand. Yet is it so absurd?” Discuss.

A third and more radical solution abandons the concept of trust residence. Trusts pay tax on trust income and gains regardless of the residence of the trustees: the connecting factor should be that property is provided by a UK

---

61 In this paragraph I use the term “trust income” to mean income of trustees other than a life tenant’s income. The taxation of life tenant’s income is easy: one should tax the life tenant. I assume that settlor-interested trust rules are not in point.

62 Venables, *Comments on the Inland Revenue Consultative Document on Trusts* (1991) p.60.

domiciled or resident settlor. Conversely, trusts should be exempt from CGT and IT (like non-residents) in relation to property provided (or wholly provided) by foreign domiciled non-resident settlors. This is (I think) the basis of taxation of trust income and gains in Canada, New Zealand and, I suspect, most other common law jurisdictions. It is also the basis of IHT trust tax. Of course, domicile and residence of the settlor are not perfect connecting factors. Such a thing does not exist. International families can sometimes break the link by tax planning. But the rickety anti-avoidance structure of ss.86 to 98 TCGA, bolstered (supposedly) by Schs 4A to 5A, can be replaced with one based on the TAA rules. The reform, like any, would bring winners and losers but the overall result could - if properly drafted - be a system which was fairer, simpler and more effective.

New Zealand takes this view of the policy issue:

#### **What is a foreign trust?**

4.7 The term foreign trust is used to describe a trust that is established in New Zealand but where no settlor is resident in New Zealand at any time. The term was developed specifically for New Zealand tax purposes (see section HC 11 of the Income Tax Act 2007 (ITA)). This sometimes creates confusion, as a trust in Australia, for example, may be viewed from New Zealand as a foreign trust, but it would not be a foreign trust for New Zealand tax purposes.

4.8 A foreign trust may have one or more trustees resident in New Zealand. Most New Zealand foreign trusts have one resident trustee, often a limited liability company that provides professional trustee services. Some also have one or more trustees who are resident offshore.

4.9 It is normal for all of the beneficiaries of a foreign trust to be resident offshore, but there is no prohibition against having New Zealand beneficiaries.

#### **Tax treatment and underlying tax policy**

4.10 Foreign trusts which do not derive New Zealand source income or distribute income to New Zealand resident beneficiaries are exempt from New Zealand tax.<sup>63</sup> The tax exemption is one of the key features of New Zealand law that is attractive to offshore investors looking to establish foreign trusts in this country. The tax status of such trusts features prominently on the websites of firms providing services to foreign investors.

4.11 Commentary in the media around the Panama Papers has caused some observers to describe the exempt tax status foreign trusts enjoy in New Zealand as a loophole, and it has been suggested that this should be closed by imposing tax ...

4.12 Before 1988, New Zealand's rules for taxing trusts followed the residence of the trustees. This led to concerns in relation to the taxation of income derived by New Zealand residents from offshore. A trust established overseas with non-resident trustees was not liable to New Zealand tax on its foreign sourced income, even where the settlor and the

---

63 Footnote original: The exemption is in ss. CW 54 and HC 26(1) ITA.

beneficiaries were New Zealand residents.

4.13 As a result, the old trust tax rules made it relatively easy for New Zealand residents to escape tax on their offshore income. This could be achieved by establishing a trust offshore and settling investment assets on it. The trustee, who would be a non-resident of New Zealand, would invest the funds and accumulate income. No New Zealand tax would be payable on the income except where it was distributed within six months of the trust's tax year end to beneficiaries resident in New Zealand. Distributions after that time were capital, and not taxable. Unsurprisingly, distributions of income were rare.

4.14 Like many aspects of the New Zealand tax system at that time, the trust tax rules were wholly deficient. They were overhauled in 1988 as part of a comprehensive overhaul of New Zealand's international tax rules. As was the case with the other international tax reforms, the changes were designed to protect the domestic tax base.

4.15 The reforms were based on the core principle of taxing New Zealand residents on their worldwide income and non-residents on income sourced from New Zealand. It follows from this principle that non-residents should not be taxed on non-New Zealand sourced income. This was, and remains, orthodox international tax policy.

4.16 For trusts, the residence of the settlor was chosen as the basis for determining the liability (through the trustee<sup>64</sup>) for New Zealand tax. This was because, although the settlor has no right to receive income from the trust, in reality he/she typically has substantial influence over the trustees, either through specific provisions in the trust deed or on an informal basis. The economic substance of a trust may differ from its legal form.

4.17 The Consultative Committee<sup>65</sup> that recommended the settlor regime in 1988 specifically recognised that one consequence of this approach would be that New Zealand would not tax the foreign source income of a resident who was the trustee of a trust with a non-resident settlor. The Committee noted<sup>66</sup>-

*In our view, this is the appropriate treatment since such income has no definite connection with New Zealand apart from the existence here of the trust administrator ... who will ... have no beneficial interest in the income.*

4.18 The Inquiry considers that the current tax treatment of foreign trusts is based on design considerations that are entirely consistent with the coherent set of core principles that underpin New Zealand tax policy. It is clear from the history that the primary driver of the international tax reforms, of which the trust regime is an important subset, was to protect the New Zealand tax base.

The reforms appear to have been very effective in achieving that goal.<sup>67</sup> New Zealand's

---

64 Footnote original: If the trustee does not pay the tax (because it is not resident in New Zealand) the tax liability for trustee income falls to the New Zealand settlor as agent.

65 Footnote original: Prebble, (1988) International Tax Reform Part 1. Report of the Consultative Committee.

66 Footnote original: Ibid, para 5.25.

67 Footnote original: The fact that very few New Zealanders have been named as investors in the entities in the Panama Papers is probably attributable to the scope and effectiveness of the international tax rules.

attractiveness as a place to invest from offshore was a by-product of the reforms and the primary reason for this (the foreign trust tax exemption) was identified at the time. While it seems unlikely that policy makers predicted the size of the New Zealand foreign trust industry that would emerge, the Inquiry doubts that it would have created any concerns had they done so.<sup>68</sup>

### 6.20.1 *Reason for PE-residence rule*

It appears that the PE-residence rule is based in part on loss of tax considerations and in part (somewhat implausibly) on a desire to support UK professional trustees.

The Trusts Consultative Document (1991) explains:

10.21 The income tax test might need to be modified for certain foreign corporate trustees. A trust company, resident outside the UK, could be the sole trustee of a trust which was dealt with in this country by the company's UK branch. It would not be appropriate if such a trust were treated as non-resident, because it would then be taxed more favourably than a similar trust dealt with by a branch of a UK corporate trustee, or by some other UK professional. That could both lead to a loss of tax and put UK professionals at a competitive disadvantage. It is therefore suggested that the UK branch of a foreign trustee should be treated as a trustee resident in the UK for the purpose of the common residence test.<sup>69</sup>

### 6.20.2 *Relief for professional trustee*

The law before 2007/08 provided that a UK professional trustee of a trust with a non-resident, non-domiciled settlor was regarded as non-resident. This sensible provision allowed UK professional trustees to act without attempting to tax them. The object was to allow the UK to compete on equal tax terms with foreign trustees. The reason given for its abolition was that the Department of Trade and Industry had advised the rule breached EU State Aid rules.<sup>70</sup>

---

68 Government Inquiry into Foreign Trust Disclosure Rules (2016)

<https://treasury.govt.nz/sites/default/files/2016-06/report-giftdr-27jun2016.pdf>

69 [https://www.kessler.co.uk/wp-content/uploads/2014/02/1108\\_001.pdf](https://www.kessler.co.uk/wp-content/uploads/2014/02/1108_001.pdf)

70 The view that the former law was not State Aid compliant was debatable, and indeed the former UK rule still applies in Ireland: s.574(b) [Ireland] Taxes Consolidation Act 1997. HMRC refused to disclose the DTI advice which makes it impossible to assess the advice which HMRC said they received. One might speculate as to whether State Aid was the true reason or a pretext. Following an application under the Freedom of

---

Information Act, the Information Tribunal urged HMRC to disclose their reasons (which were “bald and substantially unexplained.”) Unfortunately the Tribunal did not order HMRC to do so and HMRC disregarded the urging of the Information Tribunal as non-binding. This hinders public debate, which the reader may think unfortunate. This non-disclosure may be viewed in the context of a more general culture of secrecy.

For the freedom of information aspect, see <https://www.kessler.co.uk/FoI> For the State Aid aspect, see 102.19 (State aid).

## CHAPTER SEVEN

# RESIDENCE OF COMPANIES

### 7.1

#### *Cross references*

The following topics are considered elsewhere:

5.37 Residence: Burden of proof

## 7.1 Company residence: Introduction

Residence of companies matters in particular for:

- (1) Territorial limitations. Company residence plays a role similar to individual residence:
  - (a) UK resident companies are taxable on worldwide income/gains.
  - (b) Non-resident companies are taxable only on UK source income and certain UK-linked gains.
- (2) Anti-avoidance rules such as s.3 TCGA and ToA rules only apply to companies which are non-resident.

Normally HMRC will want to argue that a company is UK resident, and the company will want to argue that it is not. But there are circumstances where the boot may be on the other foot.

## 7.2 History of corporate residence

### 7.2.1 *Early history*

The INTM sets out the old ITH, parts of which are cited here. It is melancholic to compare the quality of the ITH with contemporary Manuals. But no doubt it also outshone its former contemporary HMRC manuals, which were not published until 1994.

#### **ITH309 Company residence: incorporation and residence: early**

**days**

In the early days we regarded a company as resident in this country if it was incorporated here. Viscount Sumner refers to the matter in the *Egyptian Delta Land* case (ITH311). He mentions Dowell who was the Board's Solicitor and whose 'Income Tax' was a standard work. The 1874 edition of Dowell, the first edition, said nothing at all on the subject of company residence. The second edition in 1885<sup>1</sup> merely said that a company incorporated here was resident here. We clearly started with the idea that residence was determined by incorporation and in the middle of the nineteenth century there was no problem. But as foreign trading became more complex this simple view was questioned.

**ITH310 Company incorporation/residence: early days: Calcutta Jute Mills**

One of the first cases was *Calcutta Jute Mills* [*Calcutta Jute Mills Company v Nicholson* 1 TC 83] a company which did what its name implies. It held board meetings and annual general meetings in London in an office lent by a director but everything of a practical nature was in India. It claimed that it was not resident here and that its trade was not carried on here. The judgements in *Calcutta Jute Mills* are the basis on which our later residence ideas rest and on which the case which became the authority on residence - *De Beers* - drew heavily (ITH314). The company was an English incorporated company at a time when it would have been exceptional for an English company to have directors and shareholders meetings anywhere but in England. The Judges, while looking at the board of directors and giving much weight to its constitutional role of management in this country, also took into account the fact that annual general meetings were here and incorporation was here. The people in India were mere agents acting solely on behalf of the company to be instructed by the company here; their acts were the company's acts. The case was decided before the Court of Appeal decision in the *Automatic Self-Cleansing Filter Syndicate Company*<sup>2</sup>.

**ITH311 Company incorporation/residence: early days: Egyptian Delta Land**

After the *Calcutta Jute Mills* case in 1876 it was many years before another company residence case came before the Courts and it seems to have been generally accepted that a UK incorporated company was

---

1 Author's footnote: The pace of change in the mid-19th century was such that 11 years passed between the first and the second edition.

2 See 7.7.1 (Board /shareholder roles).

resident here. There was no further litigation until the *De Beers* case in 1905 and it is important to remember that De Beers was not a UK incorporated company. The significance or otherwise of incorporation was, rather surprisingly perhaps, not settled until the *Egyptian Delta Land* [*Todd v The Egyptian Delta Land and Investment Company Ltd* 14 TC 119] case in 1928. Then the Lords reversing the lower Courts held that the bare fact of incorporation here did not constitute residence. Both Rowlatt J in the High Court and the Court of Appeal came down quite clearly for the Revenue. The Lords were equally clearly against us.

This is now of historical interest only but it explains the background to the older cases.

### 7.2.2 Treasury consent to migration

#### **ITH401 Companies: Treasury consent: migrations/transfers of business**

Subsection 1(a) and (b) of ICTA88/S765 and its predecessors required companies to have Treasury consent to a migration or to a transfer of business to a non-resident. Provisions (a) and (b) of subsection 1 were repealed by FA 1988 with effect from 15 March 1988. However, for nearly forty years (a) was the major obstacle in the Taxes Acts to companies moving their residence out of the UK without regard for loss of tax to the Exchequer. Consent for transfer of business was a necessary corollary to prevent the transfer of the whole of the business to a newly formed non-resident company thus defeating the purpose of the Section. But since 1965 the charge on capital gains has provided some compensation to the Revenue for transfers of business.

#### **ITH402 Companies: migrations/business transfers: Treasury consent: why needed**

The reasons for the introduction of the Treasury consent requirement in 1951 were mentioned in chapter 1 (ITH127). The post war improvement in communication had led to greater mobility and some important companies transferred their management and control abroad. The Revenue regarded such action as tax avoidance. The Royal Commission of 1953 disagreed but the decision to enact what became Section 765 was pragmatically based. The country simply could not afford the loss of tax which wholesale migration would have led to and decided to hold on to what it held.

#### **402-403 Company residence. Some consequences of the law**

The difficulty our predecessors had in framing this provision was

discussed in Chapter 1. In the climate of emergency at that time no alternative was seen to what has come to be known as the 'turnstile' - the requirement that Treasury consent be sought. The Treasury would rely on the Revenue for advice. The 1951 provision for Treasury consent extended to the issues and transfers of shares and debentures in non-resident subsidiaries of UK resident companies. This requirement survives in subsection 1(c) and (d) of Section 765 [ICTA, now repealed]

...

#### **ITH403 Companies: migrations/business transfers: Treasury consent: later need**

It became clear some years after the Treasury consent provisions were enacted that it would no longer be possible or necessary to resist the migration of the type of company at which the section had originally been aimed. The intention had been to keep resident in the UK companies whose main trading activities were overseas where tax rates were low so that substantial UK tax would continue to be paid. But as former colonies became independent, political pressure grew for these companies to be wholly established locally. At the same time overseas tax rates increased with a consequent increase of credit against UK tax. The terms of reference of the Advisory Panel, which was set up to advise the Chancellor on cases where refusal was contemplated, no longer justified refusal of consent for these companies to cease to be resident.

However, we continued to need subsections(1)(a) and (b) to prevent loss of tax from migrations in rather different circumstances. Absolute freedom in the residence field might have had some very undesirable consequences.

- 1 Take the case of the UK company whose business was here in every way. Without (1)(a) such a company could have run its operation here as a branch of a tax haven resident company. If it did, it would have had all sorts of problems, but it might not have been beyond the wit of the tax planners to surmount them.
- 2 After the tax haven legislation was enacted a UK company whose interests were mainly overseas could simply have moved offshore to avoid the legislation.
- 3 There would have been companies who would migrate just before realising substantial capital gains - possibly becoming resident again later.

#### **ITH404 Companies: Treasury consent: migrations: Daily Mail Trust**

One company which nearly succeeded in migrating to avoid a charge on capital gains was the Daily Mail and General Trust plc. This was an investment holding company whose main interests were in the UK. The company wanted to transfer its central management and control to the Netherlands before a reorganisation in the course of which it intended to sell part of its assets which would yield substantial capital gains. It applied for Treasury consent. When the Revenue and Treasury raised objections the company claimed, on judicial review [*Regina v HM Treasury ex parte Daily Mail and General Trust plc* (1987) STC 157 (1988) STC 787] that the requirement for Treasury consent was contrary to Article 52 of the Treaty of Rome. This Article prohibits restrictions on the freedom of establishment of nationals, including companies, of a Member State in the territory of another Member State. The English court referred the matter to the European Court of Justice. The European Court was clear that the Article applied to restrictions on nationals leaving to go to another Member State as well as restrictions on those coming in but, somewhat to the surprise of experts in European law, the Court decided that Article 52 did not confer a right on a company incorporated in one Member State to transfer its central management and control to another Member State.

The Daily Mail decision was something of an anti-climax. While the case was going through the European Court procedures, fundamental changes in UK law on company residence and migrations took place and the requirement for Treasury consent to migrations and transfers of business was abolished.

We have seen in the preceding chapter that it was in 1988 that the incorporation rule of residence was enacted and that the possible threat from the Treaty of Rome was a contributory factor. One obvious result of the rule was that, broadly speaking, it stopped UK incorporated companies from migrating, although FA94/S249 [now s.18 CTA 2009] has changed the position again.

### 7.3 The incorporation rule

Section 14(1) CTA 2009 provides:

A company which is incorporated in the UK is UK resident for the purposes of the Corporation Tax Acts.

I refer to this as “**the incorporation rule**”.

This rule only applies for the purposes of the CT Acts. So for other tax purposes, it does not apply, unless the context shows otherwise. But that

is rarely (if ever) important in practice.<sup>3</sup>

The INTM has an extract from the ITH:

**ITH356 Company residence: incorporation rule**

When reform of the residence law was first mooted in 1981 there was a tentative suggestion that incorporation in the UK should make a company resident. This suggestion did not survive the first round of consultations. But only a few years later FA88/S66 introduced the rule that companies incorporated in the UK are to be regarded as resident there for tax purposes...

**ITH357 Company residence: incorporation rule: reasons for the rule**

Three factors contributed to the coming of the incorporation rule. One was the possible threat posed by the Treaty of Rome to the provision in what became ICTA88/S765 that UK resident companies could not lawfully cease to be resident without Treasury consent. This provision was repealed when the incorporation rule became law. ...

The second factor was the growing use by non-residents of UK incorporated but non-resident companies in order to avoid other countries' tax or for even more nefarious purposes...

The third factor, not unconnected with the second, was that in not having an incorporation rule of residence the UK was out of line with most other countries in Europe and indeed in the developed world. Most of the countries have a residence type rule equivalent to our incorporation rule though in some civil law countries it takes the form of the 'seat' test which comes to much the same thing. Very broadly speaking, a company formed under the laws of a country which has a 'seat' test must designate its seat of central management and administration in its registered 'Articles' and it is generally difficult for such a company to have its designated seat outside the country in which it was formed.

*7.3.1 Relationship of incorporation rule to other rules*

Section 14(2) CTA 2009 provides:

Accordingly, even if a different place of residence is given by a rule of law, the company is not resident in that place for the purposes of the Corporation Tax Acts.

---

3 These problems are raised in 6.5.1 (Ascertaining trustee residence); 45.6.3 (Company resident outside UK): ToA. But they are unlikely to arise in practice.

SP 1/90 refers to this and provides:

23 ... This incorporation rule determines residence under UK domestic law and is subject to the provisions of any applicable double taxation agreement. It does not override the provisions of a double taxation agreement which may make a UK incorporated company a resident of an overseas territory for the purposes of the agreement (see paras 20 and 21 above).

The INTM has an extract from the ITH:

**ITH358 Company residence: incorporation rule: effect of the rule**

The incorporation rule takes precedence over the case law rule for UK incorporated companies. But it does not displace the case law rule which remains the rule of residence. Nor was there any attempt to enshrine the case law rule in statute so there is still no comprehensive statutory definition of residence. The case law rule is the only rule for companies incorporated outside the UK. If residence outside the UK is mentioned without any qualification, for example in ICTA88/S293 (2) ‘resident in the UK and not resident elsewhere’, then, even for a UK incorporated company, ‘resident elsewhere’ means centrally managed and controlled elsewhere. Nor does the incorporation rule displace the tie-breaker in a double taxation agreement which may award residence to the other country for the purpose of the agreement.

## 7.4 Business cessation/winding up

Section 15 CTA 2009 provides:

- (1) This section applies to a company which is neither–
  - (a) incorporated in the UK, nor
  - (b) resident in the UK by virtue of section 16 or 17.<sup>4</sup>
- (2) If the company–
  - (a) is no longer carrying on a business, and
  - (b) was UK resident for the purposes of the Corporation Tax Acts immediately before it ceased to carry on business,the company continues to be UK resident for the purposes of the Corporation Tax Acts.
- (3) If the company–
  - (a) is being wound up outside the UK, and

---

4 See 7.22 (Societas Europea/SCE).

- (b) was UK resident for the purposes of the Corporation Tax Acts immediately before any of its activities came under the control of a foreign liquidator, the company continues to be UK resident for the purposes of the Corporation Tax Acts.
- (4) In subsection (3) “foreign liquidator” means a person exercising functions which, in the UK, would be exercisable by a liquidator.

## 7.5 Pre-1988 companies

The INTM has an extract from the ITH:

### **ITH359 Company residence: incorporation rule: exceptions**

During the course of the Finance Bill representations were made on behalf of companies which had been resident but had migrated, or were about to migrate, with Treasury consent. In response to these representations, a category of indefinite exceptions to the incorporation rule was created for companies which migrated with Treasury consent, so long as they continued to carry on business and their central management and control remained outside the UK. Most of these companies would have had specifically to apply to the Treasury for consent and their reasons for migration would have been scrutinised. But some companies controlled by non-residents were entitled to migrate under the benefit of a general consent which did not require them to make a specific application. These companies only qualify for indefinite exception if they are also liable to tax in another country on a basis intended to be the equivalent of taxation on worldwide income. The aim of this latter provision was to cut down as far as possible the number of companies with operations based in tax havens which would be entitled to indefinite exception.

SP 1/90 provides:

2 The incorporation rule applies to companies incorporated in the UK subject to the exceptions in FA 1988 Sch 7 for some companies incorporated before 15 March 1988.

### 7.5.1 *Carrying on business*

SP 1/90 provides:

3 The exceptions from the incorporation test in FA 1988 Sch 7 depend in part on the company carrying on business at a specified time or

during a relevant period. The question whether a company carries on business is one of fact to be decided according to the particular circumstances of the company. Detailed guidance is not practicable but the Revenue take the view that “business” has a wider meaning than “trade”; it can include transactions, such as the purchase of stock, carried out for the purposes of a trade about to be commenced and the holding of investments including shares in a subsidiary company. Such a holding could consist of a single investment from which no income was derived.

4 A company such as a shelf company whose transactions have been limited to those formalities necessary to keep the company on the register of companies will not be regarded as carrying on business.

5 For the purposes of the case law test (see B below) the residence of a company is determined by the place where its real business is carried on. A company which can demonstrate that in these terms it is or was resident outside the UK will have carried on business for the purposes of FA 1988 Sch 7.

### 7.5.2 *Taxable in territory outside UK*

SP 1/90 provides:

6 A further condition for some companies for exception from the incorporation test is provided by FA 1988 Sch 7 paras 1(1)(c), 5(1). The company has to be taxable in a territory outside the UK. “Taxable” means that the company is liable to tax on income by reason of domicile, residence or place of management. This is similar to the approach adopted in the residence provisions of many double taxation agreements....<sup>5</sup>

### 7.5.3 *“Treasury consent”*

SP 1/90 provides:

8 Before 15 March 1988 it was unlawful for a company to cease to be resident in the UK without the consent of the Treasury. Companies which have ceased to be resident in pursuance of a Treasury consent, as defined in FA 1988 Sch 7 para 5(1), are excepted from the incorporation rule subject to certain conditions. A few companies ceased to be resident without Treasury consent but were informed subsequently by letter that

---

<sup>5</sup> See 8.6.1 (By reason of residence).

the Treasury would take no action against them under the relevant legislation. Such letter is not a retrospective grant of consent and the companies concerned cannot benefit from the exceptions which depend on Treasury consent.

## 7.6 Central management/control test

If no statutory rule applies, the case law fills the gap. In *De Beers Consolidated Mines v Howe*:<sup>6</sup>

In applying the concept of residence to a company, we ought, I think, to proceed as nearly as we can upon an analogy of an individual. A company cannot eat or sleep, but it can keep house and do business. We ought, therefore, to see where it really keeps house and does business...a company resides for purposes of income tax where its real business is carried on. I regard that as the true rule, and the real business is carried on where the central management and control actually abides.

SP 1/90 provides:

10 The “central management and control” test, as set out in *De Beers*, has been endorsed by a series of subsequent decisions. In particular, it was described by Lord Radcliffe in the 1959 case of *Bullock v Unit Construction Company* [(1959) 38 TC 712 at 738] as being-

‘as precise and unequivocal as a positive statutory injunction ... I do not know of any other test which has either been substituted for that of central management and control, or has been defined with sufficient precision to be regarded as an acceptable alternative to it. To me ... it seems impossible to read Lord Loreburn’s words without seeing that he regarded the formula he was propounding as constituting the test of residence.’

Nothing which has happened since has in any way altered this basic principle for a company the residence of which is not governed by the incorporation rule; under current UK case law such a company is regarded as resident for tax purposes where central management and control is to be found.

It is rare to elevate a case law phrase to the status of statute law, but that

---

6 5 TC 198 at p.212. This view comes from the *Calcutta Jute Mills* case as far back as 1 TC. *De Beers* was the company founded by Cecil Rhodes, who has taken an unexpected prominence in contemporary political life.

is what has happened here.<sup>7</sup> But the meaning of the phrase still depends on the case law.<sup>8</sup>

“Management and control” is a composite phrase, where the two words are used more or less synonymously. There are not two distinct tests, one of management and one of control.

Central management and control may be abbreviated to CMC.

### 7.6.1 Guidance on CMC

In addition to the usual UK sources, foreign revenue guidance may be helpful, as the CMC test applies in many common law jurisdictions. For instance, *Unit Construction v Bullock* cites the Australian case of *Koitaki Para Rubber Estates v FCT*.<sup>9</sup>

Material on place of effective management may be helpful as the test is (more or less) the same.<sup>10</sup> This chapter draws on:

“**Australia CMC guidance**”<sup>11</sup>

“**SA POEM guidance**”<sup>12</sup>

See too: 8.19.8 (Trust Fund CMC in Australia).

## 7.7 Control: company law background

### 7.7.1 Board /shareholder roles

Gower explains:<sup>13</sup>

Until the end of the 19<sup>th</sup> century, it was generally assumed that ... the board of directors was ... subject to the control of the company in

7 It was relevant that this phrase had received statutory recognition: see *Bullock v Unit Construction* 38 TC 712 at p.735.

8 This is self-evident, but if authority is needed, see *Swedish Central Railway v Thompson* 9 TC 342: “That test must be applied as interpreted in the decided cases.”

9 64 CLR 15 and 241.

10 See 8.19.4 (POEM/CMC compared).

11 TR 2018/5 Income tax: central management and control test of residency

12 Interpretation Note: No. 6 (Issue 2) (2015)

[http://www.sars.gov.za/AllDocs/LegalDoctlib/Notes/LAPD-IntR-IN-2012-06%20-%20IN%206%20Resident%20-%20Place%20of%20effective%20management%20\(companies\).pdf](http://www.sars.gov.za/AllDocs/LegalDoctlib/Notes/LAPD-IntR-IN-2012-06%20-%20IN%206%20Resident%20-%20Place%20of%20effective%20management%20(companies).pdf)

This strictly concerns place of effective management, not CMC, but the difference is not significant here.

13 Gower, *Principles of Modern Company Law* (11<sup>th</sup> ed, 2021), para 9-003.

general meeting. It followed that the shareholders could at any time by ordinary resolution give the directors binding instructions as to how they were to exercise their management powers...

In 1906, however, the Court of Appeal in *Automatic Self-Cleansing Filter Syndicate Co v Cuninghame*,<sup>14</sup> made it clear that ... the division of powers between the board and the company in general meeting depended entirely on the construction of the article of association, and that, where powers had been vested in the board, the general meeting could not interfere with their exercise. ... since *Quin & Axtens v Salmon*<sup>15</sup> it has been generally accepted that where the relevant articles are in the normal form... the general meeting cannot interfere with a decision of the directors ...

The pre-1906 law may still be relevant to understanding the oldest company residence cases. Gower continues:

In *Shaw & Sons (Salford) Ltd v Shaw*,<sup>16</sup> in which a resolution of the general meeting disapproving the commencement of an action by the directors was held to be a nullity, the modern doctrine was expressed ...as follows:

“A company is an entity distinct alike from its shareholders and its directors. Some of its powers may, according to its Articles be exercised by directors; certain other powers may be reserved for the shareholders in General Meeting. If powers of management are vested in the directors, they and they alone can exercise those powers. The only way in which the general body of the shareholders can control the exercise of the powers vested by the Articles in the directors is by altering the Articles or, if opportunity arises under the Articles, by refusing to re-elect the directors of whose actions they disapprove.<sup>17</sup> They cannot themselves usurp the powers which by the Articles are vested in the directors any more than the directors can usurp the powers vested by the Articles in the general body of shareholders.”

Standard articles now provide:<sup>18</sup>

---

14 [1906] 2 Ch 34.

15 [1909] 1 Ch 311.

16 [1935] 2 KB 113 at p.134,

17 They can now remove the directors by ordinary resolution.

18 Sch 1 Companies (Model Articles) Regulations 2008.

### **3. Directors' general authority**

3. Subject to the articles, the directors are responsible for the management of the company's business, for which purpose they may exercise all the powers of the company.

### **4. Shareholders' reserve power**

4.(1) The shareholders may, by special resolution, direct the directors to take, or refrain from taking, specified action.

(2) No such special resolution invalidates anything which the directors have done before the passing of the resolution.

The board is therefore the normal source of management and control.

### **ITH317 Company residence: legal power to manage/control: with directors**

... Of course the shareholders in General Meeting have rights and duties apart from those of appointing and dismissing the directors. They approve the accounts and pass the dividend and have a voice in such matters as issuing new capital, in the reduction of capital and in changes of the objects clause of the Memorandum or changes in the Articles. These things do not constitute the management and control of the business. They are rather keeping a critical eye on the interests of the shareholders...

#### *7.7.2 Foreign law*

In the case of a foreign company, it will be a matter of considering the foreign company law, which may of course be quite different.

In Germany, a two-tier board is mandatory for an Aktiengesellschaft (public company). The managing board runs the business and the supervisory board monitors the managing board. The INT Manual provides:

#### **INTM120180 How To Review Residence [May 2020]**

... We would usually take the view that central management and control of the business is to be found at Managing Board level. But the exact set-up differs from country to country and between different types of company in each country and may depend on the instrument governing the management of the company. In some companies the shareholders themselves may have management functions.

The supervisory/managing board split would only affect company residence if the two boards operate in different countries, which would be

unusual.

## 7.8 CMC: Top level control

SP 1/90 provides:

11 In determining whether or not an individual company outside the scope of the incorporation test is resident in the UK, it thus becomes necessary to locate its place of “central management and control”. The case law concept of central management and control is, in broad terms, directed at the highest level of control of the business of a company. It is to be distinguished from the place where the main operations of a business are to be found, though those two places may often coincide.

CMC means control at board level.

A decision of a director to resign does not count for the purposes of CMC, because it is not a board decision. Likewise shareholder decision in general meeting to appoint or dismiss directors.<sup>19</sup>

Decisions of a corporate trustee in its capacity as trustee also do not count for the purposes of CMC of the company.<sup>20</sup>

Australian CMC guidance comments further on what constitutes CMC:

16. Exercising central management and control of a company can involve:

[1] setting investment and operational policy including:

- [a] setting the policy on disposal of trading stock, and/or the use and development of capital assets
- [b] deciding to buy and sell significant assets of the company

[2] appointing company officers and agents and granting them power to carry on the company’s business (and the revocation of such appointments and powers)

[3] overseeing and controlling those appointed to carry out the day-to-day business of the company, and

[4] matters of finance, including determining how profits are used and the declaration of dividends.

*Matters of company administration*

17. Matters of company administration are not acts of central management and control. These include:

---

19 See 7.12 (Parent/subsidiary relationship).

20 See 6.5.1 (Ascertaining trustee residence).

- [1] keeping a company's share register, including registering transfers of shares
- [2] keeping and adopting a company's accounts
- [3] where a company pays dividends, and
- [4] the minimum acts necessary to maintain a company's registration.

### 7.8.1 *Day-to-day/operational level*

There are many ways to slice the management cake. One should distinguish top level and day-to-day control. The Australian CMC guidance provides:

12. The control and direction of a company is different from the day-to-day conduct and management of its activities and operations. The day-to-day conduct and management of a company's activities and operations is not ordinarily an act of central management and control. Nor is the management of day-to-day activities under the authority and supervision of higher-level managers or controllers.

13. The day-to-day conduct and management of a company's operations might be an exercise of central management and control in circumstances where they are effectively the same. For example, for a small passive investment company with a very small number of investments, the decisions to make, hold and dispose of those investments, would be both the day-to-day management and the central management and control of the company.

The term sometimes used is operational management: that is the same as day-to-day control. SA POEM guidance discusses the same issue:

#### **4.2.6 Operational management versus broader top level management**

Operational management decisions are generally of limited relevance in determining a company's place of effective management and must be distinguished from the key management and commercial decisions.

Operational management generally concerns the oversight of the day-to-day business operations and activities of a company. Key management and commercial decisions are concerned with broader strategic and policy decisions and tend to be made by members of the senior management team. For example, a decision to open a major new manufacturing facility or to discontinue a major product line would be examples of key commercial decisions affecting the company's business as a whole. By contrast, decisions by the plant manager appointed by

senior management to run that facility, concerning repairs and maintenance, the implementation of companywide quality controls and human resources policies, would be examples of operational management.

What constitutes a key management or commercial decision as opposed to an operational management decision is critical since it is the former that is relevant in the context of establishing the place of effective management. Again, determining what constitutes a key management or commercial decision is an aspect that can be determined only on a case-by-case basis. For example, in some businesses the conclusion of each and every contract will be a key commercial decision while in other businesses the setting of standardised pricing will be a key commercial decision but the conclusion of individual contracts will not be.

Depending on the particular case, the person responsible for operational decisions may be the same as the person responsible for the key management and commercial decisions. In this situation it is still necessary to distinguish between the two types of decisions and to assess where the key management and commercial decisions are made. The location of this decision-making is critical.

*Kotakai*<sup>21</sup> is a case of rubber but not rubber-stamping:

130. ... The company in *Koitaki*, which was incorporated in Sydney, owned rubber plantations in Papua. The plantations were managed by an officer of the company who acted under a power of attorney by which the company authorised him to manage, carry on and conduct the company's property, affairs and business. The officer sent weekly reports of the working of the plantations to the chairman of directors in Sydney which is where the directors of the company resided and met. He also periodically sent to the manager of the company in Sydney for presentation to the directors, reports concerning the running of the plantations and the yield of rubber.

131. ... the company was not a resident of Papua as the company's central management and control was not there exercised, despite the responsibilities of the attorney. His Honour stated that the responsibility of the attorney was confined to the production and shipment of rubber and did not extend to the control of the general or corporate affairs of

---

21 *Koitaki Parra Rubber Estates v FCT* (1941) 64 CLR 241.

the company or to matters of policy and finance.<sup>22</sup> The matters of policy and finance were matters which in fact formed part of the CM&C of the company as distinct from the day to day management of the production and shipment of rubber. The fact that the performance of the attorney was being monitored from Sydney was also an important consideration in the decision of Dixon J.

### 7.8.2 *Head office v top level control*

The ITH provides:

**ITH328 Company residence: looking at the command structure**

... the problems start to emerge when different levels of management can be seen in different countries.

**ITH329 command structure: three levels of management**

There might, for example, be a company engaged in some real activity in which it would be possible to detect at least three levels of management. Starting at the bottom there might be

- 1 shop floor or on the spot management;
- 2 what might, in every day language, be called the Head Office; the place where one would expect to find the executives and senior staff who actually make the business tick, the people directly giving the orders that govern the company's operations;
- 3 the central policy core of the whole enterprise - and this is the difficulty. It may be indistinguishable from (ii) above or it may not. It may be a passive sort of body merely keeping its eye on things or it may be a very active body.

**ITH330 Company residence: executive/non-executive directors**

The way in which UK public companies actually go about organising themselves has changed over the years. At the time of some of the older tax cases our whole social pattern was very different from today's. Then, the men at level two - the action men - would probably have been people like the chief general manager and his immediate management colleagues who would not have been members of the board at all. The board would have consisted wholly of non-executive directors. Later, senior managers became board members and indeed the managing director or chief executive may have near absolute power.

That is a great change; such people are seen, and see themselves, as rare and valuable and will not be given orders by a non-executive board. But

---

22 (1940) CLR 15 at 18; (1940) 6 ATD 42 at 45.

the practice of appointing non-executive directors did not disappear and indeed became more customary in the later years of the twentieth century. These directors are not necessarily mere ciphers, and a board which includes both executives and non- executives may well exercise central management and control. Some so-called non-executives may in fact act more like executives. In this respect titles can be misleading and should not be regarded as conclusive of the true role taken by an individual.

### **ITH331 Company residence: command structure: The pinnacle doctrine**

It is quite apt to think of the central management and control doctrine as the pinnacle doctrine - one looks at the very top of the pyramid of control. There is nothing conceptually wrong with that, indeed it is an idea which, in theory, is reasonably easy to apply. Putting aside the exceptional cases of dual residence in the special sense described in ITH338, a pyramid has only one top. There is no doubt whatever that in the past the non-executive directors who sat on the board did hold the reins though active intervention by them in the working of the company may have been a rare thing. Theirs was the power and everybody knew it. Even with the increasing power of executive directors it is difficult to find the pinnacle of control anywhere other than with the board combining executive and non-executive directors. That is level three management. With modern means of communication it is easy to move that sort of pinnacle about. The board does not have to be tied to the operational base. It is less easy, though not impossible, to move level two around.

#### *7.8.3 Economic nexus*

SA POEM guidance provides:

##### **4.2.8 Economic nexus**

The extent of a company's economic nexus with a country is generally irrelevant in the determination of its place of effective management. However, this factor may be considered circumstantial and given some weight in cases where other factors are inconclusive.

The term "economic nexus", undefined, is too vague to be a satisfactory test, or even a factor, for determining CMC.

#### *7.8.4 Legal nexus*

SA POEM guidance provides:

#### 4.2.7 Legal factors

Legal factors such as a company's place of incorporation, formation or establishment, the location of its registered office and the location of its public officer are generally not relevant in the determination of a company's place of effective management.

## 7.9 CMC a question of fact

In *De Beers* [*De Beers Consolidated Mines Ltd v Howe* 5 TC 198]:

I regard that as the true rule; and the real business is carried on where the central management and control actually abides. It remains to be considered whether the present case falls within that rule. This is a pure question of fact, to be determined, not according to the construction of this or that regulation or by-law, but upon a scrutiny of the course of business and trading.

SP 1/90 provides:

12 Successive decided cases have emphasised that the place of central management and control is wholly a question of fact. For example, Lord Radcliffe in *Unit Construction* said that "the question where control and management abide must be treated as one of fact or 'actuality'".<sup>23</sup> It follows that factors which together are decisive in one instance may individually carry little weight in another.

Why does the heart sink when one reads that something is a pure question of fact?

## 7.10 Directors meetings

### 7.10.1 *Board meeting significance*

SP 1/90 provides:

12... a series of decisions has attached importance to the place where the company's board of directors meet. There are very many cases in which the board meets in the same country as that in which the business operations take place, and central management and control is clearly located in that one place. In other cases central management and control

---

<sup>23</sup> 38 TC 712 at p.741.

may be exercised by directors in one country though the actual business operations may, perhaps under the immediate management of local directors, take place elsewhere.

13 But the location of board meetings, although important in the normal case, is not necessarily conclusive. Lord Radcliffe in *Unit Construction* pointed out<sup>24</sup> that the site of the meetings of the directors' board had not been chosen as "the test" of company residence. In some cases, for example, central management and control is exercised by a single individual. This may happen when a chairman or managing director exercises powers formally conferred by the company's Articles and the other board members are little more than cyphers, or by reason of a dominant shareholding or for some other reason. In those cases the residence of the company is where the controlling individual exercises his powers.

14 In general the place of directors' meetings is significant only insofar as those meetings constitute the medium through which central management and control is exercised. If, for example, the directors of a company were engaged together actively in the UK in the complete running of a business which was wholly in the UK, the company would not be regarded as resident outside the UK merely because the directors held formal meetings outside the UK. While it is possible to identify extreme situations in which central management and control plainly is, or is not, exercised by directors in formal meetings, the conclusion in any case is wholly one of fact depending on the relative weight to be given to various factors. Any attempt to lay down rigid guidelines would only be misleading.

15 Generally, however, where doubts arise about a particular company's residence status, the Revenue adopt the following approach-

- (i) they first try to ascertain whether the directors of the company in fact exercise central management and control;
- (ii) if so, they seek to determine where the directors exercise this central management and control (which is not necessarily where they meet);
- (iii) in cases where the directors apparently do not exercise central management and control of the company, the Revenue then look to establish where and by whom it is exercised.

### 7.10.2 *Where meeting takes place*

---

24 38 TC 712 at p.738.

If or so far as the location of a meeting is important, the question arises where a meeting does take place. Developments in communication and business practice have made this problematic.

If the directors meet in person, no problem arises. In other cases, assuming a fully functioning board, it is suggested that the position is in principle as follows:

- (1) If one director attends electronically (by phone or computer link such as Zoom) and the rest meet physically in one place, the place of meeting is where the majority meet.
- (2) Where all directors attend by electronic means:
  - (a) If all are in the same territory, the meeting takes place in that territory.
  - (b) If they are all in different territories, it is impossible to identify anywhere where the meeting “takes place”. For corporate residence purposes the concept is then useless and inappropriate, and I would say it is meaningless. If all meetings take place in this way, one must either look for some other links to determine residence, such as the location of the head office; or else the company may have to be regarded as dual resident.<sup>25</sup>
  - (c) If they are all in the same territory but one, the meeting takes place in that territory.

It has been suggested that company articles might provide that the place of a board meeting held electronically “should be deemed to be the place

---

<sup>25</sup> See 7.16 (Dual residence/no CMC). The issue is not an entirely new one. SP 1/90 also comments on developments in communications:

19 The case law test examined in this statement is not always easy to apply. The courts have recognised that there may be difficulties where it is not possible to identify any one country as the seat of central management and control. The principles to apply in those circumstances have not been fully developed in case law. In addition, the last relevant case was decided almost 30 years ago, and there have been many developments in communications since then, which in particular may enable a company to be controlled from a place far distant from where the day-to-day management is carried on. As the Statement makes clear, while the general principle has been laid down by the courts, its application must depend on the precise facts.

But that does not take us very far.

where the chairman or a nominated director was present”.<sup>26</sup> But the place (if any) where a meeting actually takes place is a question of fact which is not determined or even affected by a deeming provision of that kind. Or more analytically, an article of that kind has effect only for the purposes of the articles,<sup>27</sup> and not for the purpose of ascertaining company tax-residence.

### 7.10.3 *Delegation of board powers*

The ITH provides:

**ITH318 Company residence: power to manage/control: managing director**

... Of course the board of directors can still appoint agents and as long as they are mere agents they do not, by the bare fact of being there and fulfilling their agencies, detract from the management and control of the board. There is, however, one special case and that is where the board under the authority of the Articles appoint a managing director. In such cases one has to look very carefully at what the powers of the managing director are. One distinguished writer [Gower, *The Principles of Modern Company Law*] on the subject has said that if the service agreement with a managing director purports to confer exclusive powers on him without expressly reserving a right of supervision, he thinks that the board could not interfere with a managing director’s exercise of his powers during the subsistence of the service agreement. The writer concludes that in that situation the directors are in effect substituting a managing director for themselves as one of the primary organs of the company. Certainly there is all the difference in the world between a managing director in that sense and a manager who happens also to be a director.

Delegation by the board may be wider or narrower, but I expect it is usually narrower. In *BW Noble v Mitchell*<sup>28</sup> the directors exercised their power of delegation, granting a power of attorney which gave one of the

---

26 Chadwick, “Control of Special Purpose Vehicles” *Jersey & Guernsey Law Review* 2007 [https://www.jerseylaw.je/publications/jglr/Pages/JLR0706\\_Chadwick.aspx](https://www.jerseylaw.je/publications/jglr/Pages/JLR0706_Chadwick.aspx)  
I discuss this article further below.

27 It would have effect for the purposes of another article (if there is one) referring to the place where a board meeting is held.

28 11 TC 372.

directors power to carry on the company's business in France. The French attorney sent some reports on the progress of the business to the directors in London, and on one or two occasions received the agreement of the board to his proposals. It was held that CMC of the company remained with the board of directors in London, and had not shifted to France under the delegation:

...that power of attorney did not and could not, consistently with the Articles, and did not by its tenor, divest the Board in London of their authority; it did not make an independent plenipotentiary who could do what he liked until the power of attorney was determined. It seems to me that although he held the power of attorney, the Directors at any moment could have said to him: 'Well, we do not think under your power you ought to do this; we decide that it shall not be done, although you might have done it under your power of attorney if we had not told you to the contrary'.<sup>29</sup>

#### 7.10.4 *Passive oversight/tacit control*

SP 1/90 provides:

11 Moreover, the exercise of control does not necessarily demand any minimum standard of active involvement: it may, in appropriate circumstances, be exercised tacitly through passive oversight.

The ITH provides:

##### **ITH327 difficulties: central management/ control test**

It is now possible to look at the heart of our difficulties over the central management and control test. If, as is usual in this country and in many others, the directors of a company have the constitutional power to manage and control, they can exercise that power in truth and fact by doing very little indeed. They can appoint agents and servants to attend to the day-to-day running of affairs on the spot and they can exercise their management and control perhaps from far away. Nothing in the *Unit Construction* case changes that: what *Unit Construction* says is that if the directors stand aside and allow others to manage and control, it is those people to whom one must look in reaching a conclusion. The clearest example in Case Law of the minimal activity required to

---

29 11 TC 372 at p.410.

establish management and control is *Ogilvie v Kitton* [5 TC 338] the case of the gentleman in Aberdeen with a shop in Canada...<sup>30</sup> It is not indeed a residence case but concerned with the Case I/Case V argument. It is nevertheless wholly relevant to the point.

The difficulty can be put in this way - just as *Calcutta Jute Mills* can be managed and controlled in the UK so can an English trading company be managed and controlled in a tax haven. The law sets no minimum standard of participation in the affairs of the business to establish management and control. Lord Sumner said in the *Egyptian Hotels Case* (again on the Case I/Case V point - see ITH343) that it was not enough that the proprietors had the legal right to intervene. There must be actual participation and then come the very important qualifying words 'though it may not go beyond passive oversight and tacit control' [6 TC 542 at p.551].

#### 7.10.5 *Usurping board powers*

In *Unit Construction v Bullock*, a UK parent company had three subsidiary companies incorporated in Kenya, with boards of directors consisting of local people, and carrying on trading activities in Africa - merchanting, mining, leather business, etc. Their articles of association provided that management was vested in the directors and their boards could meet anywhere other than in the UK. Presumably the person drafting that was trying to avoid UK residence.<sup>31</sup> But in practice, every decision of any importance was taken by the directors of the parent company in London. That was because the subsidiaries had been operating so unsuccessfully that the parent company had decided that "it was unwise to allow them to be managed in Africa any longer, and their management must be taken over by the directors of [the parent company] in London".<sup>32</sup>

On these facts the Kenyan subsidiaries were UK resident.<sup>33</sup>

Nothing can be more factual and concrete than the acts of management which enable a Court to find as a fact that central management and control is exercised in one country or another. It does not in any way

---

30 See 20.4 (IT territorial limit: Trading).

31 Ironically, it was the company which was arguing for UK residence, for reasons relating to loss relief.

32 at p.737.

33 38 TC 712 at p.736.

alter their character that in greater or less degree they are irregular or unauthorised or unlawful. The business is not the less managed in London because it ought to be managed in Kenya. Its residence is determined by the solid facts, not by the terms of its constitution, however imperative. ... it is the actual place of management, not that place in which it ought to be managed, which fixes the residence of a company.

De facto control was exercised in the UK and the local directors “stood aside” from their duties and did not even purport to function as a board of management. That was said to be unusual:

It is surely exceptional for a parent company to usurp the control; it usually operates through the boards of the subsidiary companies.<sup>34</sup>

That is no doubt true, both when written and now, in cases of large and well run company groups, with access to good legal advice. Beyond that, readers will have to judge for themselves. The answer is not self-evident.

The INTM has an extract from the ITH:

**ITH323 legal control overridden: Unit Construction**

... the Revenue view had been that in looking at the acts which constitute management and control one should look only at those acts which are intra vires the Articles - at those acts which are constitutional. This view was held to be wrong in the *Unit Construction* [*Bullock v The Unit Construction Co Ltd* 38 TC 712] case .... Here, the Lords, overruling both lower Courts, dismissed the argument that ‘only constitutional, and therefore authorised, management and control are relevant to an enquiry as to the residence of a company’...

It seems strange that the Revenue chose to argue the point, for it was surely against their own interest. As Counsel for the taxpayer must have pointed out:<sup>35</sup>

In how many cases would a limited company register in a foreign country, prescribe by its articles that its business should be carried on by its directors meeting in that country, and then claim that its residence

---

34 38 TC 712 at p.744. The point was repeated in *Wood v Holden* [2005] EWHC 547 (Ch) at 23 describing *Unit Construction* as “a very important case, but ... a highly exceptional case in terms of the result”.

35 At p.736.

was in that country though every act of importance was directed from the United Kingdom?

The ITH continues:

So there are two questions.

- 1 Where and by whom according to the constitution of the company and the law of the land ought this company to be managed and controlled.
- 2 Exceptionally, if the people lawfully charged with management and control did not exercise it, who did? ...

The distinction between passive oversight and no oversight can be a fine one. A case on the other side of the line is *Esquire Nominees v CT*.<sup>36</sup> The question was whether Esquire Nominees was resident in Norfolk Island, an Australian offshore territory. The company was incorporated in Norfolk Island, its office was there, the directors and shareholders were there, and meetings of the company and of the directors were held there. The business of the company was to act as trustee of trusts set up on the advice of accountants in Melbourne for its clients. The Australian Revenue contended that the directors of the trustee company merely carried out directions given to them by the accountants, so management and control of the company was in Australia. It was said that the activities of the company were confined to acting as trustee of trusts set up on the advice of the accountants; that the administration of the various trusts followed a pattern which had been laid down by that firm in advance; and that detailed agenda for meetings of the directors of the company, and of the company itself, were prepared by the accountants in advance. But the company was not controlled in Australia:

... what the appellant did ... was done in the course of carrying out a scheme formulated in Australia and that [the accountants] not only communicated to the appellant particulars of the scheme but advised the appellant in detail of the manner in which it should be carried out. But if it be accepted that the appellant did what [the accountants] told it to do in the administration of the various trusts, it does not follow that the control and management of the appellant lay with [the accountants]. That firm had no power to control the directors of the appellant in the

---

36 129 CLR 177.

exercise of their power or the ‘A’ shareholders in the exercise of their voting rights. Although it is doubtless true that steps could have been taken to remove the appellant from its position as trustee of one or more of the trust estates, [the accountants] could not control the appellant in the conduct of its business of a trustee company. The firm had power to exert influence, and perhaps strong influence, on the appellant, but that is all. The directors in fact complied with the wishes of [the accountants] because they accepted that it was in the interests of the beneficiaries, having regard to the tax position, that they should give effect to the scheme. If, on the other hand, [the accountants] had instructed the directors to do something which they considered improper or inadvisable, I do not believe that they would have acted on the instruction. It was apparent that it was intended that the appellant should carry on its business of trustee company on Norfolk Island. It was in my opinion managed and controlled there, none the less because control was exercised in a manner which accorded with the wishes of the interests in Australia.<sup>37</sup>

In short, the fact that directors of an SPV were accustomed to act in accordance with the wishes of the sponsor – in that case, the accountants as adviser to their client – did not lead to the conclusion that the CMC of company was where the sponsor was.

This was followed in *Untelrab v McGregor*.<sup>38</sup> The directors of the company were in Bermuda and Jersey. Board meetings were held in Bermuda, two or three times a year. The meetings were not attended by the Jersey based director; but he was sent copies of the minutes. The company had been set up for the specific purpose of receiving a payment due to its parent, Unigate plc, The business of Untelrab was the receipt of the money, investment, and making loans to other companies in the Unigate group. Requests for such loans usually originated from Unigate. The Special Commissioners said:

although a board might do what it is told to do it did not follow that the control and management of the company lay with another, so long as the board exercised their discretion when coming to their decisions and

---

37 at 190-1 (emphasis added). There was no appeal on this point, and on the appeal, 2 of the 4 members of the full Court expressly agreed with it.

38 [1996] STC (SCD) 1.

would have refused to carry out an improper or unwise transaction

The manner in which the board of Untelrab carried out its role was close to being controlled by the parent, Unigate, but did not cross the line. The board met in Bermuda and transacted the company's business there; at board meetings, proposals were discussed and decisions made by the two directors present "in the best interests of the company"; and the directors would have refused to carry out any proposal which was improper or unreasonable. Unigate could have removed the directors; but could not control them in the exercise of their powers. The special commissioners found that, although Untelrab was compliant to do the wishes of Unigate, "it did actually function in giving effect to its parent's wishes." That is, the directors did actually address their minds to the question whether, in relation to each request for a loan, it was in the interests of Untelrab to comply with the request.

The crucial question in cases of this type is whether the directors of the company are able to say "No" to a proposed transaction; and can be expected to do so if their duty to the company so requires.

This approach is consistent with *Wood v Holden* which concerned the residence of a company, Eulalia, incorporated in the Netherlands. Eulalia had been acquired, on the advice of Price Waterhouse, for a CGT avoidance scheme. The sole director was the trust company of a Dutch bank. Eulalia was used for a single transaction: the acquisition and disposal of shares. The director of Eulalia caused it to participate in the transaction in accordance with the scheme devised by Price Waterhouse and on the basis of documents which Price Waterhouse had prepared. Although Price Waterhouse intended and expected that Eulalia would make the decisions which it did make, Price Waterhouse did not dictate what decision it should take. In particular:

it is inherently improbable that a major bank (or its trust company) would allow its actions to be dictated by a client's professional advisers (however eminent).<sup>39</sup>

Or so the CA thought. There was no reason why Eulalia should not decide to do as it was requested; and ample reason why it should enter into the

---

39 [2006] EWCA Civ 26 at 41.

transaction, as it was expected that it would.

The INTM provides:

**INTM120180 How To Review Residence [May 2020]**

...When determining whether the directors do have control, the first step may be to consider whether any person is, in fact, likely to be able to instruct the directors, irrespective of the legal position. If so, are the directors of sufficient standing and likely to have the requisite expertise to be able to act on their own authority and do they, in fact, do so?

... The place of directors' meetings is significant as an indication of the place of central management and control if, but only if, the board of directors does have the controlling power and exercises that power wholly or mainly at board meetings. The place of meetings will not be decisive if the directors are acting on the instructions of some other person or if they artificially divorce the place of their meetings from the place where they together manage and control the business outside the meetings - see paragraph 14 of SP1/90 at INTM120200.

It is necessary to look at what happens between meetings. But if, for example, a main board made up of executive and non-executive directors meets regularly overseas and the directors in the UK are only executive directors, subject to the control of the board, it is unlikely that the company is resident in the UK even though the role of the main board may be relatively passive. The board must, however, have real control. This is unlikely if it is made up partly of 'stooge' directors recruited simply to give the appearance of control.

In a detailed examination of residence, try to build up a complete picture of just how the business is run, over a period of time. Meetings with those involved in the management, and examination of records and correspondence are essential to a thorough examination.

#### 7.10.6 *Sleeping directors*

The Australian CMC guidance provides:

23. A person who has legal power or authority to control and direct a company, but does not use it, does not exercise central management and control.<sup>40</sup> For example, in *Bywater*,<sup>41</sup> the court disregarded the role of those directors who were formally appointed but did not play any real

---

40 *BW Noble* at p.412.

41 *Bywater Investments v CT* [2016] HCA 45.

role in the affairs of the company.

I refer to a board which is not “rubber stamping” the decisions of others as a “**functioning board**” and one all of whose directors participate (no sleeping directors) is a “**fully functioning board**”.

#### 7.10.7 *Influence v control*

Australian CMC guidance provides:

26. An outsider who merely influences those with legal power to control and direct a company, even if they can and do exert strong influence, is not the relevant decision maker and does not exercise central management and control of the company. However, if an outsider is more than merely influential, and actually dictates or controls the decisions made by the directors, the outsider will exercise central management and control of the company.

27. The distinction turns on what amounts to decision making for the central management and control test of residency. In *Bywater*,<sup>42</sup> the High Court observed that this turns on whether the people said to make the decisions of the company, actually consider whether to do what they are told, or are advised to do, and make a decision to do it because it is in the best interests of the company. If they do, they are the relevant decision maker and exercise central management and control of the company. If they do not, and merely mechanically implement or rubberstamp company decisions already made by others based on what they are told or advised to do, the person who gave the instruction is the real decision-maker and exercises central management and control of the company.

28. It is relevant to consider whether the directors would refuse to follow advice or directions of outsiders that are improper or inadvisable. If they would, it is more likely the directors are the real decision makers. If not, it is more likely the outsider who exercises central management and control.

29. The directors’ knowledge of the business is also relevant. A lack of knowledge of the business sufficient to enable them to determine if following advice or instructions would be improper or inadvisable, suggests they are not the real decision makers and are more likely rubberstamping or implementing decisions already made by others.

---

42 *Bywater Investments v CT* [2016] HCA 45.

SA POEM guidance provides:

In considering whether a board is making the decisions or, alternatively, is limited to formally approving or rubber-stamping the decisions made by someone else, a variety of factors must be taken into consideration. These factors include, for example, whether the directors have sufficient knowledge and information at hand, whether the directors are suitably qualified and experienced generally and in relation to the particular company, and whether the directors had reasonable time to assess the information and make the decision. The details regarding quorums and casting votes and the circumstances in which those aspects are applied may be relevant. Again, it is necessary to look at all the relevant facts and circumstances of a particular case.

Similarly, when considering the role of different directors, it must be established whether the particular director is involved in the decision-making or is perhaps merely ratifying a decision made by other directors or people. For example, it is possible for a director to be appointed with a governance-focussed role or as a shareholder representative and custodian as opposed to being actively involved in making decisions on behalf of the company. In some companies executive directors have traditionally been involved in decision-making while non-executive directors have not had a decision-making role.

#### 7.10.8 *Service of inevitability*

This section draws on an article by Chadwick LJ writing extra-judicially.<sup>43</sup> This considers the position of an “orphan SPV”. That is an entity where:

- (1) the entity is established for a person (“the sponsor”) who does not control the entity (in the strict sense of control); but
- (2) the sponsor intends and expects that the SPV will in practice conduct its affairs in a way which fulfils the sponsor’s purpose, which is usually determined in advance.

Directors or trustees of such entities may be said to provide a “commercial service of inevitability”.<sup>44</sup>

---

<sup>43</sup> Chadwick, “Control of Special Purpose Vehicles” *Jersey & Guernsey Law Review* 2007 [https://www.jerseylaw.je/publications/jglr/Pages/JLR0706\\_Chadwick.aspx](https://www.jerseylaw.je/publications/jglr/Pages/JLR0706_Chadwick.aspx)  
This was written a year after Chadwick gave his judgment in *Wood v Holden*.

<sup>44</sup> This felicitous phrase is from *Macdonald v Dextra Accessories* 77 TC 134 at p.157.

In *Wood v Holden*:<sup>45</sup>

‘Vehicle’ has a belittling sound to it, but such companies ... can and do fulfil important functions within international groups, and they are principals, not mere nominees or agents, in whatever roles they are established to undertake. They usually have board meetings in the jurisdictions in which they are believed to be resident, but the meetings may not be frequent or lengthy. The reason why not is that in many cases the things which such companies do, though important, tend not to involve much positive outward activity. So the companies do not need frequent and lengthy board meetings

Chadwick gives the following advice:

What guidance can be given in relation to practical problems which may arise in the course of administering an orphan SPV. The problems can, I think, be addressed under two main heads. The first may be described as constitutional: the second as comprehensional.

On the constitutional aspect:

The constitution of the SPV company must ensure that the sponsor does not have legal control. That precludes the sponsor from having a legal or beneficial interest in a controlling shareholding. It is probably safer that the sponsor has no interest as shareholder. The structure in *Mahonia*<sup>46</sup> – where the shares in the SPV company were owned by a charitable trust – provides an obvious way in which this requirement can be met. The structure in *Esquire Nominees*, or in *Regent*, will suffice: provided it can be demonstrated that the shareholders are wholly independent of the sponsor.

The constitution of the SPV company should vest management control in the board of directors. It should provide for the appointment of directors by the shareholders. There are obvious dangers in giving the sponsor power to nominate directors; and dangers in giving the sponsor power to remove directors. Those dangers are better avoided. The constitution should specify the minimum number of directors. It should

---

45 [2005] EWHC 547 (Ch) at [25] approved on appeal by Chadwick LJ at [2006] EWCA Civ 26 at [27].

46 Author’s footnote: The reference is to *Mahonia v West* [2004] EWHC 1938 (Comm). A charity must take care to fulfill its charitable objects, which can be problematic. But Chadwick does not seem to share these concerns.

contain provisions as to the notice to be given in relation to board meetings; and should specify the quorum for a valid board meeting. A quorum of at least two directors is desirable: there are dangers in having a sole director, or in providing for a quorum of one.

In cases where the residence of the SPV is of importance – as it usually will be if the SPV is to be used for a fiscal purpose – it will be sensible to provide for the territory in which the board is to meet. That will not, of course, be determinative of residence if the board does, in fact, choose to meet elsewhere: as the *Unit Construction* case demonstrates. But it may have the advantage of focussing attention on the need to exercise central management and control in the specified territory...<sup>47</sup>

The comprehensional aspect is what actually matters, because constitutional issues do not determine residence.<sup>48</sup>

I have described the second of the problems as comprehensional. By that I mean that the directors of the SPV must have a proper understanding of their role; and that that understanding must be shared by the sponsor and its advisers.

The directors must understand that their first and overriding duty is to have regard to the interests of the SPV company; the desire to give effect to the wishes of the sponsor must be subordinate to that duty. In that context it is, I think, no coincidence that, in [*Esquire Nominees*], one of the two directors was a solicitor; that a solicitor was the Jersey based director of Untelrab Ltd; and that both Regent and Mahonia were owned and directed by Jersey law firms. The advantages of having an independent lawyer or other professional in the role of director of the SPV are twofold. Not only can he be expected to appreciate the scope of the fiduciary duties imposed on directors: his own professional standing is likely to provide a powerful incentive to observe those duties. Taking those factors together, the assertion by a professional that he would not accede to a request which he thought contrary to the company's interests is likely to carry weight: as it did in the cases that I have mentioned.

That is not, of course, to suggest that directors from other disciplines or with other experience or expertise will not inspire equal confidence; as in the case of the bank trustee company in the *Eulalia* case. But it is to

---

47 The omitted passage deals with electronic meetings.

48 See 7.12 (Parent/subsidiary relationship).

suggest that the directors of an orphan SPV should be chosen with care; and with the requirement that they may need to demonstrate a proper understanding of their role in mind...

Finally, I should emphasise that it is necessary that the sponsor and its advisers should have a proper understanding of the function of the SPV directors. The sponsor's wishes should not be couched in terms of instructions or demands; but in terms of proposals and requests. Its advisers should not lose sight of the fact that the SPV directors are not the sponsor's agents or employees: to do as they are told without question. If the course proposed is a sensible course and in the interests of the SPV company, the directors are no less likely to follow it if they are merely requested to do so than they would be if they were instructed to do so: or if they are, then they are the wrong choice for the role. And, if the transaction comes under scrutiny, it will be easier to satisfy the regulator, the revenue or the court that both sponsor and orphan understood the nature of the relationship if the communications between them reflect that understanding. The key to a successful relationship, of course, lies in the need for the sponsor and its advisers to be attuned to what the directors of the orphan SPV can, and cannot, properly be asked to do.

The issue may be compared to the philosophical problem of reconciling free will with determinism/divine foreknowledge. If it is (more or less) certain what the outcome will be, can directors (or anyone else) actually be making decisions? But maybe that is over-conceptualising.

Underlying Chadwick's advice is an attitude of neutrality to tax avoidance which was changing at the time it was written and now seems dated.<sup>49</sup> Courts unsympathetic to avoidance could either step back from the law as set out above, or decide that appeals fail on the facts; and subsequent to the date of Chadwick's article (2007), this has been happening.<sup>50</sup>

SP 1/90 comments on avoidance cases:

---

49 See 2.5.4 (Practitioner/judicial views today).

50 Examples are:

- (1) *Smallwood*. a POEM case, but (more or less) the same principles apply; see 8.19.6 (POEM: Round the World scheme); ? (Avoidance in tie-breaker cases)
- (2) *HMRC v Development Securities* [2020] EWCA Civ 1705; see [2021] BTR 51 but this case is not yet final.

18 In outlining factors relevant to the application of the case law test, this statement assumes that they exist for genuine commercial reasons. Where, however, as may happen, it appears that a major objective underlying the existence of certain factors is the obtaining of tax benefits from residence or non-residence, the Revenue examine the facts particularly closely in order to see whether there has been an attempt to create the appearance of central management and control in a particular place without the reality.

### 7.11 Some UK directors

This section considers how the CMC test works where:

- (1) The directors manage the company, ie we are not concerned with usurpation/rubber stamping.
- (2) Some of the directors work is done in the UK.

*De Beers* offers an illustration. On one side:<sup>51</sup>

The head office is formally at Kimberley, and the general meetings have always been held there.

Also, the profits have been made out of diamonds raised in South Africa, and sold under annual contracts to a Syndicate for delivery in South Africa ...

Further, some of the Directors and Life Governors live in South Africa, and there are Directors Meetings at Kimberley as well as in London.

On the other side:

... the majority of Directors and Life Governors live in England, ... the Directors' Meetings in London are the meetings where the real control is always exercised in practically all the important business of the Company, except the mining operations.

London has always controlled the negotiation of the contracts with the Diamond Syndicates, has determined policy in the disposal of diamonds and other assets, the working and development of mines, the application of profits, and the appointment of directors.

London has, also, always controlled matters that require to be determined by the majority of all the Directors, which include all questions of expenditure except wages, materials, and such like at the

---

<sup>51</sup> 5 TC 198 at p.213.

mines...

On these facts, CMC was in the UK. I would not say that was obvious. A minority of directors, and governance of the mining (which one might think was important, for a mining company) were in South Africa.

#### 7.11.1 *HMRC examples*

The INTM provides:

**INTM120150 When HMRC Will Not Usually Review Residence: Examples** [May 2020]

Examples 1 to 8 illustrate circumstances in which HMRC would not usually seek to establish that a company is UK resident for the purposes of S5/CTA09 (see INTM120010).

The examples are subject to 8 qualifications, which I set out first. These qualifications are wide as to would allow HMRC to refuse to follow the examples on any occasion, but of course the guidance is not binding on HMRC even if, as could happen, the facts were that all that the HMRC qualifications require them to be.

[1] Enquiries will still be undertaken if they are necessary in order to fulfil the UK's obligations under a double taxation agreement.

It is difficult to see how this could arise in practice, or at least, it will be rare.

[2] HMRC also reserves the right to enquire into any case in which arrangements appear to have been made to exploit these examples by, for example, creating the form of compliance without the substance.

This overlaps with point [6] below. In practice it could mean little or much. Maybe contemporary tax haven substance requirements likely to meet this requirement.

[3] The following circumstances are assumed to be present in all the examples below;

[a] the company is wholly owned by a UK headed group or a UK headed sub-group with a non-UK resident ultimate parent;

INTM120160 [May 2020] returns to this point:

a company may fall outside one of the examples because it is not wholly owned by a UK headed group or sub-group. Where this is due to the

presence of small minority shareholdings wholly unconnected with the wider group arising from, say, local legal requirements regarding employee share ownership, it is unlikely to have an impact on the corporate residence issue.

But why are the examples meant to be limited to cases of UK groups or subgroups? Would not a 100% UK parent only make a subsidiary more likely UK resident, not less?

- [b] the company is incorporated outside the UK in a territory where it is considered to be resident for tax purposes by virtue of its incorporation there;
- [c] the country of incorporation and residence has a double taxation agreement with the UK which contains a residence tie-breaker (INTM120070);

What has any of this to do with UK corporate residence is obscure.

- [d] the company is genuinely established in its territory of residence;

Whatever that means, it overlaps with point [1] above.

- [e] the company does not (except in the particular circumstances of examples 6 to 8 [holding co of trading group]) have investment business as its main business, and;
- [f] the central management and control of the business of the company is at least in part exercised at meetings of its board of directors.

The explanation of requirements [3](a) and (e) may perhaps be that the examples were composed to respond to questions from specific multi-national trading groups, and the fact that the similar problems arise for corporate residence more generally has been ignored.

Subject to those (considerable) qualifications, the examples where HMRC will in principle accept non-residence then follow. In summary:

<b>Example</b>	<b>Directors</b>	<b>UK board meetings</b>
1	single UK director, not sole director	none
2,6	minority of UK directors	none
3	exceptionally, majority UK directors	none
4,7	minority UK directors	meet electronically, from UK
5,8	minority UK directors	1 or 2 UK board meetings

In all these cases, HMRC accept the company as non-resident:

**Example 1** [single UK director, not sole director]

A company includes as a member of its board of directors a UK resident, all other members being resident in its territory of residence and elsewhere outside the UK. The company's board of directors meets only outside the UK.

**Example 2** [minority of UK directors]

A company has more than one UK based director on its board, but the majority of board members are based outside the UK in its territory of residence or elsewhere. The board meets only outside the UK.

**Example 3** [exceptionally, majority of UK directors]

The minority UK based attendance in example 2 becomes a majority on an isolated occasion due to the unforeseen unavailability of one or more of the overseas based directors.

**Example 4** [minority UK directors meet by electronic link]

The UK based directors in examples 1 and 2 do not travel to attend board meetings in person but habitually participate by electronic link from the UK.

**Example 5** [minority UK directors, small minority UK board meetings]

The board of directors in examples 1 and 2 hold the majority of its meetings in any one accounting period outside the UK but a small minority - no more than one or two - of the meetings are habitually held in the UK.

Similar rules apply to a holding company of a non-resident group, where examples 6-8 mirror examples 2, 4, 5

**Example 6** [minority of UK directors]

A company has as its main business the holding of majority shareholdings in operating companies resident in its own territory of residence or region (which does not include the UK). Its board of directors meets both in its territory of incorporation and in the territories of incorporation of its subsidiaries. It includes on its board a minority of one or more UK based directors.

**Example 7** [minority UK directors meet by electronic link]

The UK based directors in example 6 habitually participate in meetings by way of electronic link from the UK.

**Example 8** [minority UK directors, small minority UK board meetings]

The situation is the same as in examples 6 or 7 except that while the board holds the majority of its meetings in any one accounting period outside the UK, a small minority of the meetings (no more than one or

two) are habitually held in the UK.

**INTM120160 When HMRC Will Not Usually Review Residence: Other Cases** [May 2020]

*Cases falling outside the examples*

Inevitably very many cases will fall outside the scope of the examples set out at INTM120150. Whilst this means that they will not strictly be covered by this guidance it is crucial to remember that the application of the case law test depends on the facts in particular situations. Therefore a consideration of the reasons why a particular company falls outside the examples may assist in assessing the likelihood of HMRC raising enquiries. The examples therefore have a wider role in the risk assessment of company residence issues...

The passage ends remarkably:

The examples should not be interpreted to suggest that the correct test for residence involves comparing the number of board meetings held in the UK against those held elsewhere. The application of the test in *De Beers Consolidated Mines Ltd v Howe*, 5 TC 213 involves scrutinising the company's course of business and trading. Relevant factors would therefore be what happened at particular board meetings and what happened between them...

That is of course exactly what all the examples (5 & 8 in particular) do suggest.

In summary, the author of INTM120150 wished to give the appearance of guidance without the slightest hostage to fortune, and succeeded in doing so. But I think the examples are worth studying, not so much because it is HMRC who published them, but because they are, subject to the usual caveats, a correct interpretation of the CMC test - as illustrated by the facts of *De Beers* itself.

7.11.2 *Director tax residence n/r*

Of course if director(s) spend more time in the UK, or if there is a larger number or proportion of directors living here, there is correspondingly more opportunity for management and control of the company to take place in the UK. But a director's tax-residence as such does not matter, in the sense that the SRT has no role to play here. HMRC agree:

**INTM120170 When HMRC Will Not Usually Review Residence:**

**Individual Directors** [May 2020]*Location of individual directors*

The relevance of individual directors' tax residence to the place of central management and control of the companies that they serve is sometimes raised as an issue. In principle it is the place from which an individual exercises central management and control that is the relevant factor for locating the residence of a company rather than the territory in which their personal tax liabilities arise.

That is self-evident, though there is authority if needed.<sup>52</sup>

**7.11.3 UK directors meeting abroad**

The ITH provides:

**ITH334 Company residence: the reality**

It has been said that the management and control test is bad because it leads to the nonsense of directors flying to Jersey for board meetings. That device is no longer of use to a UK incorporated company which is resident here anyway. But it is quite easy for a company operating here to incorporate in Jersey and claim to be managed and controlled there with only a minimal tax cost in Jersey provided the shareholders are not resident there. So the criticism is still relevant.

On the face of it the point is a valid one. But criticism of that kind is concerned as much with questions of fact as of concept and the two things must be kept separate in our minds. There is, in principle at any rate, no reason why a business which is visibly in this country should not be managed and controlled from, let us say, Jersey. But if the directors of that company are working in this country on a regular basis and probably living here as well, it may be highly unlikely that they will be doing anything more in Jersey than reaffirming decisions already taken here. If that is so the mere fact of having board meetings in the Channel Islands is irrelevant. The question is, where do the people concerned exercise management and control. If they really do it in this country and go through a meaningless form of words in Jersey, that will achieve nothing for them but, of course, it leaves the Revenue with the difficult burden of proof.

It may help to put the problem into a context which is very familiar. A

---

<sup>52</sup> *John Hood v Magee* 7 TC 327; *North Australian Pastoral Co v FCT* (1946) 71 CLR 623 at p.628.

small grocery store is run by a man A and his son A junior. There is a grandfather, once sole proprietor, who no longer takes an active part in the business but owns the property and makes his views known on important matters. A company is formed with A as chairman and managing director, the son as sales director and grandfather as a mere shareholder. Every year A and his son spend holidays in Jersey. It is very unlikely that any body of Commissioners would accept that by holding their only board meetings when they are in Jersey they had made the company resident outside the UK. Both level two and level three management are exercised by A and his son and they are clearly based in the UK.

But an alternative scenario has grandfather as both major shareholder and chairman with A and his son as full-time working directors. Grandfather takes no part in the day-to-day running of the business but takes a keen interest in its success and his word on important matters carries great weight. Here level three management emerges as something quite distinct from level two which remains with A and his son. Level three may be found either with grandfather alone or with grandfather and his sons acting as a board depending on the extent of grandfather's real power. If grandfather moves to Jersey, level three management may genuinely move with him, either because he alone exercises central management and control from Jersey or because the board meetings, at which he plays an important part, are held there...

The INTM discusses the same question, but does not give any hostage to fortune:

**INTM120150 When HMRC will not usually review residence** [May 2020]

**Example 9**

The majority of directors habitually perform a significant part of their duties in the UK, merely leaving the UK to attend board meetings. HMRC may wish to examine all relevant factors in such a case to determine whether or not the company should be regarded as resident in the UK.

It is instructive to contrast the two passages. The author(s) of the ITH would not have written anything deliberately vague and unhelpful. But the ITH was written before the Manuals were published.

## **7.12 Parent/subsidiary relationship**

This section discusses subsidiary companies, but there should be little difference in principle between a group (parent/subsidiary) relationship and any other shareholder/company relationship, eg if the shareholder is a trust or an individual.

In *Wood v Holden*:

in any consideration of the principles governing the common law of corporate residence the normal realities of the parent and subsidiary relationship have to be taken into account... In the context of a group of companies where matters proceed in a normal way and not in an exceptional way it is to be expected that the parent company will have plans for what it wants its subsidiaries to do, and that the directors of the subsidiaries will ordinarily be willing to go along with the parent company's wishes. If in those circumstances the subsidiaries were resident for tax purposes wherever the parent company is resident the consequences would, in my view, be unsatisfactory, productive of double taxation clashes between different jurisdictions, and disruptive of national tax systems.

There is a difference between, on the one hand, exercising management and control and, on the other hand, being able to influence those who exercise management and control. There is another difference, highlighted by *Unit Construction v Bullock*, between, on the one hand, usurping the power of a local board to take decisions concerning the company and, on the other hand, ensuring that the local board knows what the parent company desires the decisions to be. It is also necessary to keep in mind that, while the cases which I have referred to so far all involved the residence of companies with active continuing businesses, it is possible (and is common in modern international finance and commerce) for a company to be established which may have limited functions to perform, sometimes being functions which do not require the company to remain in existence for long.<sup>53</sup>

SP 1/90 provides:

16 It is particularly difficult to apply the “central management and control” test in the situation where a subsidiary company and its parent operate in different territories. In this situation, the parent will normally influence, to a greater or lesser extent, the actions of the subsidiary.

---

53 From the decision at the HC stage: [2005] EWHC 547 (Ch) at [24].

Where that influence is exerted by the parent exercising the powers which a sole or majority shareholder has in general meetings of the subsidiary, for example to appoint and dismiss members of the board of the subsidiary and to initiate or approve alterations to its financial structure, the Revenue would not seek to argue that central management and control of the subsidiary is located where the parent company is resident.

That is right, because CMC means control at board level, not at general meeting level.

However, in cases where the parent usurps the functions of the board of the subsidiary (such as *Unit Construction* itself) or where that board merely rubber stamps the parent company's decisions without giving them any independent consideration of its own, the Revenue draw the conclusion that the subsidiary has the same residence for tax purposes as its parent.

17 The Revenue recognise that there may be many cases where a company is a member of a group having its ultimate holding company in another country which will not fall readily into either of the categories referred to above. In considering whether the board of such a subsidiary company exercises central management and control of the subsidiary's business, they have regard to the degree of autonomy which those directors have in conducting the company's business. Matters (among others) that may be taken into account are the extent to which the directors of the subsidiary take decisions on their own authority as to investment, production, marketing and procurement without reference to the parent.

The INT Manual provides:

**INTM120180 How To Review Residence [May 2020]**

... Some element of supervision by the parent will be expected. For example, there is often a system of regular reporting from subsidiaries to parents. Reporting by itself, or the issue of general group directives on such matters as finance control, do not necessarily indicate that the residence of the subsidiary lies with the parent. Intervention beyond this may lead to that result.

... It remains possible for central management and control to lie with a subsidiary's directors even where it seems improbable that they would act other than in accordance with the directors of the parent.

The INTM has an extract from the ITH:

**ITH335 Company residence: parent subsidiary relationship**

The next difficulty in identifying real management and control is concerned essentially with the parent subsidiary relationship. A parent company is merely a shareholder and may have no constitutional right to run the business of the subsidiary; but such parent companies do increasingly exercise influence in the management of their subsidiary companies. The Royal Commission of 1920 observed this and the problem has got a great deal worse since then. The question always is whether the influence exercised by the parent amounts to the management and control of the business of the subsidiary. *Unit Construction* wanted its African subsidiaries to be resident here - there were losses that could be relieved. For many years the Revenue had taken the view that that was an exceptional case, and it relied on some words of Lord Cohen in his judgment where he said

‘the facts of the case before your Lordships are most unusual. It is surely exceptional for a parent company to usurp the control; it usually operates through the boards of the subsidiary companies, and had the Commissioners found in the present case that that was what had in substance happened, it may well be that your Lordships could not have disturbed that finding’. [38 TC 744]

The Department adopted its line for good reason. First, there was some support for it in Lord Cohen’s words. We did not want to argue that large numbers of overseas subsidiaries of UK parent companies were resident here. When such subsidiary companies make profits one often finds that after Double Taxation Relief there is very little UK tax left. Further, we did not want to argue that large numbers of UK incorporated companies, being the subsidiaries of foreign parents, were not resident here: they were quite prepared to be treated as resident and their tax planning was on that basis.

But it became clear that *Unit Construction* was not so exceptional after all. It may be exceptional for the directors of a company to stand aside completely. It is, however, not unusual for directors to act in accordance with the wishes of the parent. We took advice about the matter and the advice was that the test should properly be whether the local directors apply their minds to ‘suggestions’ from the parent and form an independent judgment before implementing their parent’s wishes or whether, on the other hand, they merely ‘rubber stamp’ and carry out without serious question the higher policy wishes of the parent

company.

### 7.12.1 *Parent co guidelines*

SA POEM guidance provides:

Shareholders sometimes limit the authority of, or provide guidelines for, the board and senior managers of a company. For example, a parent company may set limitations of authority or guidelines for a subsidiary company. These limitations of authority or guidelines must, in conjunction with all the other facts and circumstances, be reviewed in detail to determine whether the effect is that the shareholder is actually making the key decisions or whether the company, although receiving guidance or some input, is still making them. It is quite common for a parent entity of a multinational group to set guidelines and policies for the group as a whole in order to direct, coordinate and monitor activities of the group as a whole. This does not necessarily mean, and often does not mean, that the subsidiary company is not making its own decisions, but all the facts must be considered when making this assessment.

#### **Example 2 – Limitation of authority**

##### *Facts:*

Company A concludes long-term contracts with clients which extend over a number of years. A single contract can have a significant effect on the financial viability of Company A and as a result Company A's senior management team sign off on all contracts. The conclusion of sales contracts represents a predominant key commercial decision for Company A.

Under a limitation of authority, the company's senior management team is restricted to concluding contracts not exceeding a contract value of R10 million. For contracts exceeding this value, the company must submit its recommendation to the parent company and the parent company makes the decision whether or not the contract may be accepted. The company must implement the parent company's decision. 90% of contracts have a value that exceeds R10 million.

##### *Result:*

Although more detail would be required and all the facts affecting all the key management and commercial decisions of the company as a whole would have to be taken into account, the facts suggest that the effective management of the company may have been usurped by the parent company. The limitation of authority in this

case has effectively removed the company's real authority to make decisions and has gone beyond a mere monitoring mechanism or information-reporting requirement.

Limitations of authority and guidelines are common in multi-national groups of companies. The details are critical in assessing who is, in substance, making the company's key management and commercial decisions.

### 7.12.2 *Support functions*

SA POEM guidance provides:

#### **4.2.9 Support functions**

It is not uncommon for a multinational company to centralise certain support functions such as data management, human resources, customer support or accounting, and to locate those services in countries that offer advantages such as superior infrastructure, lower costs or a highly skilled workforce. A group of companies may house these services in the group's ultimate holding company or in a separate subsidiary which provides the services to all the members of the group.

In these situations, the locations where those services are primarily performed and where the senior managers responsible for them are based may be different to the location of the company's head office where the top senior management and the senior management's direct support staff are located. Although such support services may be essential to a company with support service related policies and procedures having a company-wide effect, the managers in charge of those services are often not involved, or only secondarily involved, in making key management and commercial decisions that affect the conduct of the company's business as a whole (outside of the area of the specific support functions that they are responsible for). Consequently, the location where such support services may be located is generally of limited relevance to the determination of a company's place of effective management.

The location where a company's accounting records are retained will generally not be indicative of the place where the key management and commercial decisions are made and in these circumstances would therefore be irrelevant in determining a company's place of effective management.

### **7.13 Period of enquiry**

The position must be considered for each tax year under appeal.

In *HMRC v Development Securities*:<sup>54</sup>

Events before or after the particular date in question may be relevant as casting light on the position on that date

In *Laerstate BV v HMRC*:<sup>55</sup>

the residence of a company will not fluctuate merely by reason of individual acts of management and control taking place in different territories. The whole picture must be considered in each case.

Similarly *Untelrab v McGregor*:<sup>56</sup>

when deciding the issue of residence one should stand back from the detail and make up one's mind from the picture which the whole of the evidence presents.

See too 8.16 (Period of enquiry: tie breaker).

## 7.14 Covid & company residence

### **INTM120185 HMRC Approach to Company Residence in response to COVID-19 Pandemic [May 2020]**

#### **Background**

The COVID-19 pandemic has resulted in significant disruption to international travel and business operations, including the locations of directors, employees and other individuals.

HMRC is very sympathetic to the disruption that is being endured.

We have been asked about HMRC's response to the corporate residence challenges posed by COVID-19. The presence of individuals in the UK as a consequence of COVID-19 raises questions about whether the foreign companies, of which those individuals may be directors or employees, could become UK tax resident.

#### **Overview**

HMRC considers that the existing legislation and guidance in relation to company residence already provides flexibility to deal with changes in business activities necessitated by the response to the COVID-19

---

54 [2020] EWCA Civ 1705 at [14].

55 [2009] UKFTT 209 (TC) at [29] followed in *Mark Higgins Rallying v HMRC* [2011] UKFTT 340 (TC) at [55].

56 [1996] STC (SCD) 1 at 22-23.

pandemic.

We do not consider that a company will necessarily become resident in the UK because a few board meetings are held here, or because some decisions are taken in the UK over a short period of time. HMRC guidance makes it clear that we will take a holistic view of the facts and circumstances of each case...

### **Company Residence.**

Where the central management and control of a company actually abides is a question of fact. HMRC take the view that whilst the site of board meetings may be important in determining where CMC abides, it is not determinative (see INTM120130 and INTM120180). Each case turns on its own facts and circumstances which makes it difficult for HMRC to provide definitive guidance as to where CMC may abide in cases where businesses are forced to make changes in response to the COVID-19 pandemic.

However, our published guidance as to when we would not usually challenge a company's view on its residence will be relevant in the current circumstances. See in particular INTM120140 and INTM120150.<sup>57</sup> Whilst the examples given in the latter are based on a number of assumptions being made, this guidance sets out HMRC's view that occasional UK board meetings, or participation in such meetings from the UK, does not necessarily result in CMC abiding in the UK.

Similarly, INTM120160 provides guidance in respect of cases which fall outside the examples in INTM120150. This guidance makes it clear that HMRC's view will depend on the facts in particular situations...

See too 8.31 (Covid and treaty-residence).

## **7.15 CMC: Summary**

After a lengthy discussion, a summary may be helpful. In *Mark Higgins Rallying v HMRC*:<sup>58</sup>

52. We have found helpful the summary put forward by the Special Commissioners in *Untelrab*<sup>59</sup> (at [74]):

“From these authorities we have identified the following principles:

---

57 See 7.11 (Some UK directors).

58 [2011] UKFTT 340 (TC).

59 *Untelrab v McGregor* [1996] STC (SCD) 1.

that the residence of a company is where the directors meet and transact their business and exercise the powers conferred upon them; that if the directors meet in two places then the company's residence is where its real business is carried on and the real business is carried on where the central management and control actually abides; that a determination as to whether a case falls within that rule is a pure question of fact to be determined by a scrutiny of the course of business and trading; that the actual place of management, and not the place where a company ought to be managed, fixes the place of residence of a company; ... and that when deciding the issue of residence one should stand back from the detail and make up one's mind from the picture which the whole of the evidence presents."

53. Also, the views of the Tribunal in *Laerstate*<sup>60</sup>:

"There is no assumption that [central management and control] must be found where the directors meet. It is entirely a question of fact where it is found. Where a company is managed by its directors in board meetings it will normally be where the board meetings are held. But if the management is carried out outside board meetings one needs to ask who was managing the company by making high level decisions and where, even where this is contrary to the company's constitution.

It is significant, we think, that Lord Loreburn (in *De Beers*) referred to the test as being where central management and control 'abides'.<sup>61</sup> This is a test that does not confine itself to a consideration of particular actions of the company, such as the signing of documents or the making of certain board resolutions outside the UK if, in a given case, a more general overview of the course of business and trading demonstrates that as a matter of fact central management and control abides in the UK. As Lord Loreburn said (at 212-213), the factual question must be considered 'upon a scrutiny of the course of business and trading'.

This is consistent with the analogy with individual residence which was the basis on which Lord Loreburn propounded the central management and control test. Just as for an individual, for example, where a temporary departure from the UK would not of itself give rise to a change of residence, the residence of a company will not

---

<sup>60</sup> *Laerstate BV v HMRC* [2009] UKFTT 209 (TC) at [27]-[29].

<sup>61</sup> See 7.6 (Central management/control test).

fluctuate merely by reason of individual acts of management and control taking place in different territories. The whole picture must be considered in each case.”...

62. We find that the place where certain contracts – even important ones such as the manufacturers’ works team agreements – were signed is not in itself a determining factor. It is evidence towards where decisions were being made but it is the location of the decision-making, rather than where the contracts were signed, which is important.

## 7.16 Dual residence/no CMC

In *Swedish Central Railway v Thompson* at first instance:<sup>62</sup>

just as an individual can have two residences, so can a corporation. ... it is easier for a corporation to have two residences than for a natural person because, after all, a natural person, existing as he does in space, as a physical body, can only be in one place at once, and if he has got a residence where he is not in fact, it is because it is all ready for him and he is prepared to go there and intends to go there, and merely is away temporarily, but he is away. It seems to me that as regards a company, which only exists in law and in the mind and does not occupy space at all, the residence which can be imputed to it can co-exist, the presence which can be imputed to a company can be in more places than one at the same time. Therefore I do not think there is any difficulty in the fact that it may be necessary to impute two residences to a company; ... a company residence depends only on the fact of control. It may have two residences if its control shifts every alternate six months or something of that sort from one capital to another. It may have both those residences, just as a natural person who lives a part of the year in one place and part of the year in another has both as his residences; but... the only test of residence, one or more, is direction and control of the business.<sup>63</sup>

This was for a time controversial, but it was confirmed in *Unit Construction v Bullock*:<sup>64</sup>

it must now be regarded as clear law that an artificial person may, like

---

62 9 TC 342 at p.352.

63 Part of this is quoting the submissions of HMRC; but the judge is clearly approving them. Dual residence was upheld in the subsequent appeal.

64 38 TC 712 at p.735.

a natural person, have more than one residence...

[In the *Union Corporation* case 34 TC 207] The facts were not such as to allow of Lord Loreburn's test being applied, and therefore some other basis of decision had to be selected. The solution chosen by the Court of Appeal appears to have been that residence arose in any country in which "to a substantial degree" acts of controlling power and authority were exercised; ... It may perhaps still be open to question whether, where the facts are such that Lord Loreburn's test cannot be applied as a whole, the correct way of determining residence is, so to speak, to fragmentate his principle and establish a residence for tax purposes wherever the exercise of some portion of controlling power and authority can be identified. The point does not arise for our decision in this case and I express no view at all upon it. I only note the decision in the *Union Corporation* case as an instance of dual or multiple residence for tax purposes which has its origin in the fact that circumstances do not always make it feasible to apply the Loreburn [CMC] formula.

The International Manual provides:

**INTM120060: central management and control** [Jun 2016]

**... Divided or multiple residence**

The *De Beers* test points to a single country of residence. But the courts have recognised that, exceptionally, a company may have a dual or multiple residence. ... There are some companies for which it is not possible to identify any one country as the seat of central management and control. Management and control may be divided or may change from place to place even. The *De Beers* test as such cannot be applied. No general rule for establishing the residence of these companies has been established. But if, in the context of the company's business, what is done in the UK amounts to part of the management and control, the company is arguably resident here. The decision in the *Swedish Railway Company v Thompson*, 9 TC 342, should be interpreted in this way. The company was not engaged in active trading and its administrative control was divided between this country and Sweden. The Courts decided that the company, while it might be resident abroad, was nevertheless also resident here for tax purposes...

The INTM has an extract from the ITH:

**ITH338 Companies: dual residence: domestic law**

Divided central management and control was considered by the Court of Appeal in the *Union Corporation* [34 TC 207] group of cases,

although the House of Lords decided the cases on another issue and did not consider the question. Drawing on the judgment in an Australian case, Sir Raymond Evershed's view was that the final and supreme authority cannot be divided between two places. But that is not required for dual residence. The situation can arise where some part of the superior or directing authority may be found in two countries at the same time. The company is resident wherever 'to some substantial degree' acts of controlling power and authority are exercised.

That conclusion is not entirely easy to reconcile with the idea that central management and control is to be found at the pinnacle. It is easier to understand that the pinnacle may move from place to place, for example where there are ambulatory board meetings. But if one thinks of the pinnacle as the top cone rather than the very top point then that cone can be divided even if one part carries with it the top point.

Lord Radcliffe in *Unit Construction* makes a valuable contribution towards reconciling the cases on dual residence although dual residence was not an issue in the case. From him we learn that there is one class of case where the *De Beers* test cannot be applied - that is where it is not possible to find central management and control in one country alone.

What test is then applicable remains, to some extent, an open question. Where there is a genuine division of the top-most layer of central management and control between identifiable places, we can follow the criteria adopted by the Court of Appeal in *Union Corporation* and cited by Lord Radcliffe - establishing in which of those places acts of controlling power and authority are exercised to some substantial degree. However, where there is not that kind of division but rather the company is peripatetic in the sense that relevant acts of control and management are exercised at different times at perhaps a variety of different locations, it is considered that the Courts have not yet fully addressed the question.

Examples are (assume the company's directors between them exercise top-level control):

- (1) Directors meet only by electronic means, and one cannot identify a territory where board meetings take place.
- (2) Directors meetings are in a series of different countries each year.

In these cases one must look for other factors than directors meetings, or else fall back on dual residence. This may not arise much in practice, as a company conscious of residence issues will not do this.

SA POEM guidance provides an example of case (2):

**Example 3 – Place of effective management (Bigco)**

*Facts:*

B is a multinational company, incorporated under the laws of the UK, with substantial operations in South Africa, the UK and the United States. Its shares have a primary listing on the JSE, a secondary listing on the London Stock Exchange and are also traded on the New York Stock Exchange through American Depository Receipts.

The company's head office is located in South Africa and its Managing Director, Financial Director and Chief Operating Officer are based in South Africa. The divisional managers who are responsible for the company's operations in the UK and the United States are based in those countries, as are several non-executive directors.

B's board makes the key management and commercial decisions for the conduct of the company's business as a whole. It generally holds three meetings each year, one in each of the countries where B operates. B's Managing Director, Financial Director and Chief Operating Officer typically attend all of the company's board meetings and use the trips to meet with the company's operational managers in the UK and the United States as well as to meet with investors or investment analysts in those countries.

All of the 'board packs' are prepared by personnel at B's head office, which may include information sent to the head office by the divisional managers. Head office personnel, including the Managing Director, Financial Director and Chief Operating Officer, and their direct staff, are also responsible for developing and formulating proposed strategic plans for consideration and action by the board. The board actively reviews these plans before taking a decision and, from time to time, either rejects or requires modifications to those proposals.

*Result:*

Under the circumstances, B's place of effective management is South Africa. Amongst other things, one of the three board meetings where decisions are made is held in South Africa with a majority of board meetings not being held at the other locations. In addition, its head office and highest level of senior management are both located in South Africa.

The fact that B is incorporated in the UK is irrelevant. Any circumstantial evidence related to the company's economic nexus with any of the countries in question would also be of limited or no probative value in this instance.

## 7.17 HMRC practice/clearance

### **INTM120160 When HMRC Will Not Usually Review Residence: Other Cases [May 2020]**

... HMRC is willing to discuss residence issues with businesses. Given the factual basis of the case law test such discussions are generally likely to be more profitable the more information there is available about a particular situation. However in some cases, such as those involving dual resident companies or non-standard tie-breakers (see INTM120070), operational certainty may not be achievable without a joint approach by the company to both tax authorities under the relevant double taxation agreement.

## 7.18 CMC/trade income source compared

Company residence depends on CMC. Source of trading income depends on whether the trade is carried on wholly abroad.<sup>65</sup> Since 1965 the question whether a UK resident company has foreign source trading income has been significant mainly for loss relief (corporate loss relief is not discussed here). The INTM has an extract from the ITH which discusses the issue:

### **ITH343 Company residence: Case V trade: UK central management control**

... If a company is resident in the UK because the central management and control of its business is here, can it have a Case V trade? Usually the answer will be 'no'. But there is one case which suggests that it can. It is the *Egyptian Hotels* [*Egyptian Hotels Ltd v Mitchell* 6 TC 152 and 542] case. That company succeeded as narrowly as possible in establishing a Case V trading source while at the same time remaining resident in the UK (The House of Lords being evenly divided, victory went to the company). It is important to remember that residence was not an issue in the case and that *Egyptian Hotels Ltd* was incorporated in the UK. Although *Egyptian Hotels* was heard some six years after *De Beers* which is the great authority for the management and control test, there was ... still some idea that if a company was incorporated here it was resident here. There is no reason why a company which is resident by reason only of incorporation here should not have a Case V trade.

---

<sup>65</sup> See 20.4 (IT territorial limit: Trading).

The short answer to the apparent contradiction in the *Egyptian Hotels* case is that under the central management and control test (and ignoring the 1988 incorporation rule) we would probably today regard the company as non-resident.

**ITH344 Company/foreign partnership: Case V: UK central management control**

However, business has a wider meaning than trade. There is one situation where a company managed and controlled in the UK may reasonably have a Case V trade. That is where the company is a partner in a partnership but the business of the partnership is managed and controlled abroad.

## 7.19 DTA company residence rule

Section 18 CTA 2009 provides:

- (1) This section applies to a company which is treated as—
  - (a) resident in a territory outside the UK, and
  - (b) non-UK resident,for the purposes of any double taxation arrangements.
- (2) For the purposes of the Corporation Tax Acts the company is—
  - (a) resident outside the UK, and
  - (b) non-UK resident.
- (3) Subsection (2) applies even if the company would otherwise be UK resident for the purposes of the Corporation Tax Acts by virtue of section 14, 15, 16 or 17 or another rule of law.
- (4) To decide whether a company is treated as mentioned in subsection (1)(a) and (b) for the purposes of any double taxation arrangements, assume that—
  - (a) the company has made a claim for relief under the arrangements, and
  - (b) in consequence of the claim it falls to be decided whether the company is to be treated as mentioned in subsection (1)(a) and (b) for the purposes of the arrangements.

I refer to this as the “**DTA company residence rule**”.

The usual case will be a company which is incorporated in the UK but treaty-resident in a foreign state under the tie-breaker: the treaty overrides the incorporation rule. It is also theoretically possible that a company incorporated outside the UK, with CMC in the UK, could be treaty-non resident: the treaty overrides the CMC test. But this will be rare in

practice.<sup>66</sup>

The INTM has an extract from the ITH:

**ITH365 Company residence: incorporation rule/treaty non-residents**

The incorporation rule was introduced primarily as a protection against exploitation of the case law rule and the misuse of UK incorporation. But it is hardly surprising that such a major change in the law had some less desirable repercussions. These appear in what we call Treaty Non-Resident companies - TNRs. These are companies which are resident both in the UK under its domestic law and in another country under that country's law and the tie-breaker in the Double Taxation Agreement between the two countries awards residence for Agreement purposes to the other country. There is more in chapter 5 about residence for treaty purposes (ITH514). The most common tie- breaker awards residence to the country in which the company's place of effective management is to be found. Even when the case law rule was the only residence rule of the UK it was possible for a company to be a TNR. It could be centrally managed and controlled here and effectively managed elsewhere. But the incorporation rule increased the scope for TNRs because a company can be incorporated in the UK and yet conduct its business wholly overseas.

**ITH366 Company residence: the problem**

The problem of the TNR is that for treaty purposes it is non-resident and we cannot tax its income or gains unless the treaty allows us to. If a company incorporated here has all its management and operations abroad there will be little, if anything, that the UK can tax under the treaty. But before 1988 UK domestic law assumed that if a company was resident here it was liable to tax on its world-wide income and gains. So some provisions will not work as intended if the company is resident but not liable. For example, the capital gains provisions allow transfers of assets between resident members of a group on a no gain no loss basis on the assumption that the gain will be taxed when the asset is sold outside the group. But without specific provision to the contrary, an asset could be transferred to a TNR on that basis but the treaty could prevent our taxing the gain when the TNR sells the asset. Examples of other anomalies requiring special treatment for TNRs are to be found in other group situations where a TNR can be treated as a group member

---

66 See 8.19.4 (POEM/central M&C compared).

for the purpose of intra-group payments of dividends and interest. And, without specific provision to the contrary, a TNR could not be a controlled foreign company nor count as a non-resident in the income tax anti-avoidance provisions against transfers of assets [abroad].

**ITH367 Company residence: legislation against treaty**

Starting with 1988 there had been legislation which was either aimed specifically at preventing possible avoidance through TNRs or which, in introducing new provisions for companies in general, took account of TNRs. These provisions are briefly considered in Chapter 4. But by 1993 it was realised that there were many other opportunities for tax planners to exploit the mismatches attributable to a company being resident under domestic law while not resident for treaty purposes. So rather than continue to tackle the problem piecemeal it was decided to go for a general solution and deem such a company to be not resident in the UK for all purposes...

**ITH368 Company residence: general solution**

[s.18 CTA 2009] provides that a TNR company is not resident for UK tax purposes...

A company does not have to make a claim under a treaty before the new rule applies. This is to stop companies moving in and out of UK residence depending on whether a claim is made for a particular year. The residence tie-breaker in most treaties applies an objective test - often the location of 'effective management' (ITH348). If under that objective test, residence has been or would be awarded to our treaty partner then Section [18] applies.

In a few treaties - for example, in the agreement with Canada, where the tie-breaker can only operate upon agreement between the two authorities, the new rule cannot run until that agreement has been reached. The new rule has no application where treaty residence would be awarded to the UK (because then there is no mismatch between the treatment under domestic law and under the treaty) or where the treaty does not contain a tie-breaker ...

**ITH453 Company residence: other consequences of [s.18]**

Although in cases where [s.18] applies it should be easier to challenge the more blatant cases involving manipulation of our residence rules, the main purpose of [s.18] is to align a company's treatment under domestic law with its treatment under a Double Taxation Agreement. It also removes the anomaly that all taxing rights on profits could be eliminated under a treaty but the company nevertheless remained liable to account for ACT. Where a treaty does not contain a tie-breaker, the company

remains UK resident under the treaty and it is logical that its UK residence under domestic law is also unaffected.

Furthermore, it is not intended that the new rule should be applied in marginal cases where there is no mischief unless the company itself invokes the Double Taxation Agreement. For instance, the location of effective management of the holding company for the UK subgroup of an overseas group may be unclear in a case where a company is mainly managed here but some management decisions are taken abroad. We would not regard as objectionable the fact that the company exists to allow losses to flow as group relief between members of the UK subgroup and the benefit of any doubt on the location of effective management may be given to the company.

Would it not be sensible for the same rule to apply to individuals, ie individuals who are treaty non-resident should also be non-resident for UK domestic law?

## **7.20 Change of company residence**

Under the SRT, an individual is resident (or not) for a tax year and not during part of a year.<sup>67</sup> This rule does not apply to a company, which may change residence at any time. But an accounting period ends (and a new one starts) when a company becomes, or ceases to be, UK resident.<sup>68</sup>

## **7.21 OEIC**

ITTOIA EN Vol II discusses OEIC residence:

50. The definition of an open-ended investment company ... carries a limitation that the company should be incorporated in the UK<sup>69</sup> ... All open-ended investment companies within the definition ... are therefore subject to the company residence rule [the incorporation rule]... The company DTA residence rule] could in theory also apply to make such companies non-resident (as explained in connection with industrial and provident societies).<sup>70</sup>

## **7.22 Societas Europea/SCE**

---

67 See 9.1 (Residence throughout tax year).

68 Section 10 CTA 2009.

69 See App.2.8 (Open-ended investment co).

70 See 25.16 (Co-operative & community benefit society income).

Post-Brexit, this ceases to be an issue but I deal with it for completeness. Section 16/17 CTA 2009 are conveniently read side by side:

**s.16 CTA 2009 Societas Europaea**

**s.17 CTA Societas cooperativa Europaea**

(1) This section applies to an SE which transfers its registered office to the UK in accordance with Article 8 of Council Regulation (EC) No 2157/ 2001 on the Statute for a European company (Societas Europaea).

(2) The SE is UK resident for the purposes of the Corporation Tax Acts from the time of its registration in the UK.

(3) Accordingly, even if a different place of residence is given by a rule of law, the SE is not resident in that place for the purposes of the Corporation Tax Acts.

(4) The SE does not cease to be UK resident merely because it later transfers its registered office from the UK.

(1) This section applies to an SCE which transfers its registered office to the UK in accordance with Article 7 of Council Regulation (EC) No 1435/ 2003 on the Statute for a European Cooperative Society (SCE).

(2) The SCE is UK resident for the purposes of the Corporation Tax Acts from the time of its registration in the UK.

(3) Accordingly, even if a different place of residence is given by a rule of law, the SCE is not resident in that place for the purposes of the Corporation Tax Acts.

(4) The SCE does not cease to be UK resident merely because it later transfers its registered office from the UK.

**7.23 Company residence: Critique**

The INTM has an extract from the ITH:

**ITH347 Company residence: proposed new management test**

The central management and control test can be of advantage to the Revenue in the battle against tax haven subsidiaries. We look at this in the next chapter. But in the climate following the abolition of exchange control in 1979 the disadvantages of the case law test were considered to outweigh any advantages. Wholesale migration of UK resident companies was not a danger whilst the requirement for Treasury consent was still in place.<sup>71</sup> But there were other possibilities of exploitation and no guarantee that the requirement for Treasury consent would continue forever.

So in 1981 proposals were made for a statutory definition of company

---

71 See 7.2.2 (Treasury consent to migration).

residence which were designed to solve the problems inherent in the test of central management and control. The aim was for a definition which would have allowed us to look at the place where, in every day language, the Head Office was to be found rather than a remote place where ultimate policy decisions might be taken. The very pinnacle of control would have been ignored. In the case of the UK subsidiary of a United States parent company, for example, the purpose was to look at the activity of the UK board even though it might act under the de facto control of the United States parent. What was really being attempted was to cut level three - where it was distinguishable - out of the reckoning.

**ITH349 Company residence: proposed new management test: abandoned**

That kind of approach to a new test would have linked residence to a less mobile level though it was never supposed that it would have solved all the problems. It may have solved some of the loss-making problems like *Unit Construction* itself, but it certainly would not have solved all of them. The essential object of the proposed statutory definition was to make the law consistent with what in fact we had been doing for a long time. In the event it proved peculiarly difficult to devise a test which would cut out top level management - level three - but not end up at too low a level. In draft legislation it was suggested that 'immediate day-to-day management of the business as a whole' might identify the level of management to which residence should be attached. What was intended was the type of day-to-day management exercised by a managing director but the expression 'day-to-day' was criticised as possibly implying too low a level of management. The difficulty of providing a sufficiently precise definition, which would not require a long period of litigation before the Courts could determine its meaning, was one of the reasons which caused the attempt at a statutory definition to be abandoned - at least for the time being. However, in 1985 an echo of the draft legislation found its way into what became ICTA88/S812(7) - part of the suspended anti-unitary tax legislation held as a sword of Damocles over companies connected with the unitary states in the United States (see chapter 5 ITH539).

Arnold discusses similar proposals:<sup>72</sup>

Couzin finds both the place-of-incorporation and the central management and control tests vulnerable to manipulation by taxpayers. He suggests that consideration should be given to tests based on the location of executive (day-to-day) management of the corporation or the main business operations of the corporation. My initial reaction is to wonder why, even if these tests are better than the existing tests,<sup>73</sup> it is necessary to have a single test. Our current test is a combination of central management and control and place of incorporation. In principle, I have no difficulty adding other tests so that a corporation might be taxable on its worldwide income if

- it is incorporated in Canada,
- its central management and control are in Canada,
- the executive (day-to-day) control is exercised in Canada,
- the majority of the corporation's shareholders are resident in Canada,
- a substantial or controlling shareholder is resident in Canada, or
- the corporation has substantial business operations in Canada.

In practice, however, I suspect that such supplementary tests would have little positive impact on the Canadian tax net... in most of these situations, the corporation will also be resident in another country, and the tiebreaker rule in the treaty will often work in favour of the other country. In many cases, therefore, the treaty... will effectively negate the addition of supplemental residence rules. If the tie-breaker rules do not resolve the dual-residence conflicts, unrelieved double taxation becomes a serious concern.

---

72 Arnold, "A Tax Policy Perspective on Corporate Residence" [2003] Canadian Tax Journal 1559 at p.1562.

[https://www.fcf-ctf.ca/ctfweb/Documents/PDF/2003ctj/2003ctj4\\_arnold.pdf](https://www.fcf-ctf.ca/ctfweb/Documents/PDF/2003ctj/2003ctj4_arnold.pdf)

73 Footnote original: Superficially, it is not readily apparent why these tests are preferable to the existing tests. Executive management is probably as susceptible to manipulation as is central management and control. The executive management test provides less certainty than the place-of-incorporation test. The principal-place-of-business test is not susceptible to manipulation, and it has the virtue of establishing the residence of a corporation exclusively in one country. However, a principal-place-of-business test relies heavily on the facts in a particular case and is therefore uncertain in application. In my view, the type of test of corporate residence adopted by Canada is not as important as international consensus on a particular test.

## 7.24 Company resident nowhere

The INTM has an extract from the ITH:

### **ITH445 Company residence: nowhere companies before incorporation rule**

Before looking at the consequences of the incorporation rule of residence, it is convenient to consider briefly the phenomenon of the UK registered non-resident ‘nowhere’ company before 1988. It was a product not so much of the central management and control test as of the absence of an incorporation rule.

A ‘nowhere’ company is not subject to tax on worldwide income anywhere and is unlikely to suffer tax at all. In the 1970s, foreign operators began to realise that the UK provided an ideal opportunity for such companies. Traditional tax-haven countries such as the Channel Islands and Isle of Man have provided tax shelters for companies incorporated but not having real activity there on payment of a fee. In the UK there was no fee - only the cost of setting up and keeping the company on the register. All the operators had to do was to make sure that there was nothing like management and control or trading activity or income here. There was the added advantage of the respectability of UK incorporation. Before other countries got wise to the ploy they might even have assumed the company to be taxable here. Until 1979, exchange control was something of a hindrance ...

Our own attempts at getting information met with little success. Not only would this information identify the exceptional case of UK resident ownership, it could be passed on to the countries of the beneficial owners where this exchange of information is authorised by a Double Taxation Agreement. But some companies operating in low tax areas such as the Middle East used the UK for the benefit of recourse to its law and had no reason to hide anything. Representations on behalf of these companies were partly responsible for stifling the proposal for an incorporation rule in 1981. By 1988 the number of dubious companies had increased enormously, the Revenue authorities of some countries were complaining at our acquiescence and it was suspected that a number of companies were being used for criminal activities.

### **ITH446 Company residence: successors to the nowhere company**

... ‘Son of nowhere’ companies have appeared in two main guises. In one there is a UK incorporated and, therefore, resident company. But the company is alleged to carry on all its activities as trustee or nominee and only the trustee’s remuneration appears in the accounts. As with the

original nowhere company, our difficulty is getting at the structure behind the company. The fact that the company is resident and, therefore, within our taxing charge gives us a stronger lead. International Division is interested to see any such cases.

The other ploy to replace the nowhere company is the 'nowhere' limited partnership. There is more about this in chapter 16 on Foreign Partnerships (ITH1639).

Even after 1993 it is not quite impossible to come across a UK incorporated nowhere company although it will not be one of the type so far considered. A UK incorporated company which migrated with special Treasury consent and continues to be outside the incorporation rule may have become a nowhere company. It does not have to be managed and controlled in the same country or carry on the same business as when it migrated although it does of course have to comply with all the conditions for indefinite exception from the incorporation rule.<sup>74</sup>

## 7.25 Loss importation

The INTM has an extract from the ITH:

### **ITH419 Company residence: loss importation**

We now come to two problems associated with the central management and control test which we have with companies which become or remain resident here. The first problem is referred to as loss importation. When an overseas subsidiary of a UK parent is making losses it is relatively easy for the parent to ensure that the central management and control of the subsidiary is in the UK even if the whole of its operations are overseas. The losses become available for group relief. The *Unit Construction* case gives an early example of this (chapter 3 ITH323). In those days relief was obtained by way of a deduction for subvention payments. Although the mischief is more obvious if the subsidiary only becomes resident when it starts to make losses, it can also be seen when the subsidiary is resident from the beginning. And there are also possible problems when losses are incurred not by a subsidiary but by an overseas branch of a UK resident company.

### **ITH420 Company residence: loss importation: the branch**

The root of the problem is this. When two countries tax the same source of trading income the treaties, or unilateral relief, soften the impact of

---

74 See 7.5 (Pre-1988 companies).

double taxation. But where there is a loss both countries may give relief for the loss. The simplest example is that of the genuine branch. In the following illustrations the company is resident in the UK and has a trading branch in country X. There is a standard Double Taxation Agreement with country X so both countries tax the profits and the UK gives credit. The tax rates are illustrative only.

**ITH421 Company residence: loss importation: the branch: example**

**EXAMPLE 1**

THE BRANCH

Branch result

THE BRANCH

Branch result

THE BRANCH

Branch result

Year 1	Profit	£1,000
Year 2	Loss	£(1,000)
Year 3	Profit	£1,000
	UK	Country X
Year 1	£	£
Profit	1,000	1,000
Tax @ 33%	330	330
Credit	-330	
Net Tax	NIL	330
Year 2		
Loss relief @ 33%	-330	
(reduces Case 1)		
Year 3		
Profit	1,000	1,000
Loss relief		-1,000
Tax	330	
Net Tax	330	NIL

Both countries give loss relief and the result is fair. The relief that the UK gives in year 2 is recouped in year 3, so there is nothing essentially offensive in the idea that we give relief for losses which have also been relieved abroad. The next example is of the same situation except that the losses in country X are so large that the operation there is closed down.

**ITH422 Company residence: loss importation: branch closes down:**

**example****EXAMPLE 2****THE BRANCH CLOSE DOWN**

Branch result THE BRANCH CLOSE DOWN

Branch result THE BRANCH CLOSE DOWN

Branch result

Year 1	Profit	£1,000
Year 2	Loss	£1,000
Year 3	Profit	(£10,000)

	UK	Country X
Year 1	£	£
Profit	1,000	1,000
Tax @ 33%	330	330
Credit	-330	
Net Tax	NIL	330

Year 2 as Year 1		
Net Tax	NIL	330
(reduces Case 1)		

Year 3		
Loss relief @ 33%	-3,330	NIL

Country X may have some provision for allowing the loss in part by carry- backwards, but such a large loss is probably in the nature of things not totally relievable in country X which is taxing only the branch profit. The UK, on the other hand, will give relief either by setting against other Case I profit or by group relief. Thus we will have given relief which will never be recouped but that is arguably a consequence of asserting taxing rights on the basis of residence. The company might argue that overall the result is fair. Overall there is a loss of £8,000 (£10,000-£2,000), tax has been paid on £2,000 in country X and the UK has given relief on £10,000 so that in total only £8,000 has been relieved.

**ITH423 Company residence: loss importation: the subsidiary**

Next we have a similar situation but the trading operations are carried on wholly in country X by a subsidiary which is incorporated there and taxed as a resident there. If the subsidiary is managed and controlled in the UK it will also be taxed as resident here unless in a treaty case FA94/S249 applies to deem the company to be not resident in the UK. If country X allows relief for losses only by way of carry forward, then

on the same results, the tax position of the subsidiary in the UK will be the same as that of the branch in examples 1 and 2, except that relief for losses will be by way of group relief.

But for a subsidiary company there are other possibilities. The subsidiary may be part of a sub-group in country X and that country may also give loss relief against group profits. It may be possible for the subsidiary to move its residence in and out of the UK so as to get the best advantage from the provisions for tax credit and loss relief. The following examples illustrate these possibilities.

**ITH424 Company residence: loss importation: the subsidiary:  
example 3A**

SUBSIDIARY RESIDENT IN COUNTRY X:	SUBSIDIARY RESIDENT IN COUNTRY X :	SUBSIDIARY RESIDENT IN COUNTRY X :
Subsidiary results	Subsidiary results	Subsidiary results
Year 1	Profit	£1,000
Year 2	Loss	£(1,000)
Year 3	Profit	£1,200

The subsidiary is also resident in the UK all years. Country X gives group relief for year 2.

	UK	Country X
Year 1	£	£
Profit	1,000	1,000
Tax @ 33%	330	330
Credit	-330	
Net Tax	NIL	330
Year 2		
Group relief @ 33%	-330	-330
Year 3		
Profit	1,200	1,200
Tax	396	396
Credit	-396	
Net Tax	NIL	396
Overall Tax	-330	+396

**ITH425 Company residence: loss importation: the subsidiary:  
example 3B**

The subsidiary is not UK resident in Year 1; it is UK resident Years 2 and 3. It carries back losses in country X.

	UK	Country X
Year 1	£	£
Profit		1,000
Less Loss		Carried back 1,000
Net Tax	NIL	NIL
Year 2		
Group relief @ 33%	-330	NIL
Year 3		
Profit	1,200	1,200
Tax	396	396
Credit	-396	
Net Tax	NIL	396
Overall Tax	-330	+396

**ITH426 Company residence: loss importation: the subsidiary: example 3C**

The subsidiary is not UK resident Year 1; is resident Year 2; is not resident Year 3. It carries forward losses in country X.

	UK	Country X
Year 1	£	£
Profit		1,000
Tax @ 33%		330
Year 2		
Group relief @ 33%	-330	NIL
Year 3		
Profit		1,200
Less Loss		- 1,000
		200
Net Tax	NIL	66
Overall Tax	-330	+396

In all three examples A, B and C the UK gets no tax but gives relief on £1000 & 33%. The company makes net overall profits of £1200 but pays tax on only £200 if group relief is taken into account.

**ITH427 Company residence: loss importation: the subsidiary: example 3D**

If, in example 3C, the company remained resident in Year 3, we would expect the tax to be

	UK	Country X
Year 1	£	£
Profit		1,000
Tax @ 33%		330
Year 2		
Group relief @ 33%	-330	NIL
Year 3		
Profit		1,200
Less Loss		- 1,000
		200
Net Tax	NIL	66
Overall Tax	-330	+396

But prior to FA94/S249 the company may have turned to the treaty between the UK and country X. It would have argued that its place of effective management is in country X and that that is the country, and the only country, of which it is a resident for the purposes of the treaty (see chapter 5 ITH515). It may have a permanent establishment in the UK (the offices where the directors meet) but there is hardly any profit attributable to that. In such circumstances it is unlikely that we would be able to persuade country X that the place of effective management is in the UK or that we could tax any profit. So the result would be

	UK	Country X
Year 3	£	£
Tax	NIL	66

just as in example 3C.

### **ITH 427 Company residence: loss importation: the subsidiary: example 3D**

In all the variations of example 3 the key factor is that the company is resident in the UK in the year of loss. Under the central management and control test that is reasonably straightforward to achieve. But following FA94/S249 if there is a treaty between the UK and country X containing a company residence tie-breaker, we will be able to look to the test in the tie- breaker in determining residence for UK tax purposes. If the tie-breaker is based on the location of effective management which is shown to be in country X in year 3, then it is likely that effective management in year 2 is also in country X.

### **ITH429 Company residence: loss importation: branch and**

**subsidiary**

One final comment on example 3: looking back to the branch position referred to in example 2, that obviously cost the Revenue money and it was suggested that it was, arguably, not offensive. It is the inevitable consequence of asserting taxing rights over income when the primary taxing rights lie with another country. The same sort of thing can occur in the context of an overseas subsidiary becoming resident in the UK during the period of large losses leading to the closure of its business. However, that is different from the branch situation. The benefits of loss relief in the UK do not then arise as an inevitable consequence of the UK's more general assertion of taxing rights over the entity but rather because the company, having chosen to put its profits out of range of UK tax, later endeavours to reverse the consequences of its own action. Such claims merit critical examination.

**ITH430 Company residence: loss importation: effect of Section 249**

As we have seen, where a company is resident in the UK under the case law test and also resident in another country with whom we do not have a treaty, or where the treaty lacks a company residence tie-breaker, the company may be able to manipulate its residence status to its advantage. Where, however, it is also resident in another country with whom we have a treaty containing a tie-breaker the effect of Section 249 is to make manipulation more difficult. It will generally be less feasible to move the location of effective management.

It might be asked why we did not legislate for all dual resident companies. But this would have come close to introducing a new statutory company residence rule. The 1994 legislation was not directed specifically at loss importation but instead at removing the anomalies attributable to the mismatch between residence under domestic law and residence under a treaty.

**ITH437 Company residence: getting profits back tax free**

The second problem for specific mention is loosely referred to as profit importation. It is a fundamental of our tax system that we tax a UK company under Case V if and when it receives a dividend from an overseas subsidiary. There are other tax systems where this is not so - the exemption method countries. But as a matter of policy we do not have such an approach, although, where the subsidiary is a genuine trader, we accept its right to decide whether to retain its profits or to send home dividends. It follows that we must be concerned if companies devise ways of getting profit back to this country tax free. Subsection (1)(c) and (d) of Section 765 which is considered in chapter 13, is

concerned with devices of that sort and chapter 13 also looks at the problem of 'upstream loans' - from overseas subsidiaries to UK parents. Our concept of residence too may be manipulated in a way which has the effect of bringing home profit tax free.

**ITH438 Companies: getting profits back tax free: inward migration**

All that happens is that a non-resident subsidiary company - full of lowly taxed profit - becomes resident in the UK. The fact of becoming resident here does not involve that company or its parent in any liability to UK tax in respect of the profit, and once the subsidiary is here it is quite a simple matter to make that profit available to the parent. There are two common ways of achieving this.

1 The subsidiary company declares a dividend which, since it is now resident, is intra-group.

The subsidiary makes a loan to its parent.

The parent company thus has the money in its hands and, tax apart, is in the same position as it would have been in, had the subsidiary company declared a dividend while it was non-resident. Some very large examples of this device have been seen. The tax-haven legislation may have reduced the amounts of lowly taxed profits available for importation and thus the need for legislative action. But capital gains and other profits which escape the CFC provisions may still be worth bringing in this way. International Division would like to be kept informed of cases detected in Districts. It is sometimes possible to make a challenge either by showing that the company was resident when the gains or other profits arose, or by showing that the company has not become resident in the UK. In a treaty case, following FA94/S249 it will normally be necessary for the company to show that effective management is now exercised in the UK.

**ITH442 Company residence: advantage of central management/control test**

The consequences of the central management and control test are not all negative for the Revenue. Once we had recognised the significance of the Unit Construction case and had set out our views in the 1983 Statement of Practice, it was possible to take a firmer line on tax-haven subsidiaries. We could argue that central management and control lay in the UK either with the parent or with any UK resident directors of the subsidiary. We have had some success in bringing into the UK tax net tax-haven profits in this way.

Since 1984 the profits of some companies can be taxed under the tax-haven (controlled foreign companies) provisions, but these provisions

do not afford complete coverage. The assiduous use of a mixer company to pass dividends to the UK (see chapter 7 ITH728) can further reduce the effectiveness of the provisions. So in CFC cases, as in others, residence will remain an important issue. The residence position should always be borne in mind when an overseas subsidiary is reviewed under the CFC provisions. If arguments on residence are likely to get to Commissioners the case requires an exhaustive review of the facts. Even so, much may depend on oral evidence before Commissioners. It is, therefore, not surprising that cases tend to be settled by some compromise agreement. Nevertheless some settlements have been very substantial indeed. Important cases are usually worked by or under the supervision of International Division who like to hear of potential cases at an early stage.

## CHAPTER EIGHT

# TREATY-RESIDENCE

### 8.1

#### *Cross references*

The following topics are considered elsewhere:

103.1 (DT Reliefs: Introduction)

For further reading, see Avery Jones et al, “Dual Residence of Individuals: The Meaning of the Expressions in OECD Model Convention”, [1981] BTR 15 & 104  
Maisto (ed.) *Residence of Individuals under Tax Treaties and EC Law* (2010)

### 8.1 Treaty-residence: Introduction

The starting point is to note that there are (at least) three distinct concepts of residence.<sup>1</sup> We need terms to describe them, and I coin the following terminology.

**UK-law residence:** residence as defined in UK tax law

- (a) **UK-law UK resident:** A person who is resident in the UK within the UK tax law definition
- (b) **UK-law non-UK resident:** A person who is not resident in the UK within the UK tax law definition

**Treaty-residence:** residence as defined in a DTA

- (a) **Treaty-resident in the UK:** A person who is a resident of the UK within a DTA definition
- (b) **Treaty-resident in the foreign state:** A person who is resident in the foreign state within a DTA definition. One could use the term “treaty-resident outside the UK.” Statute sometimes calls this “*treaty non-resident*” but I think my term is clearer.

**Foreign-law residence:** residence as defined in some foreign tax law.

---

<sup>1</sup> See 5.1 (Concepts of residence).  
FD\_8\_Treaty-Residence\_2021.wpd

**Domestic law:** the law of the UK, or of a foreign state, as opposed to treaty or international law

This chapter discusses treaty-residence. The discussion is mainly on OECD Model, though I refer at points to actual treaties. In any particular case it will be necessary to review the terms of the relevant treaty.

OECD Model refers to a resident *of* a treaty state and UK tax law refers to a person who is resident *in* the UK; but nothing turns on the choice of preposition. I guess that OECD Model wording was influenced by the French version *résident d'un État contractant*.

## 8.2 Treaty/UK-law residence

In general, a person cannot be treaty-resident in two treaty states: OECD Model tie-breaker tests require treaty-residence to be in one state alone.

However a person who is UK-law UK resident may be resident in another state under the UK law, foreign law, or DTA definitions of residence. That is, UK-law UK residence does not preclude residence elsewhere.

In particular, a person may be UK-law UK resident while treaty-resident in a foreign state. Treaty-residence in a foreign state does not preclude UK-law UK residence (except for companies).

The INT Manual provides:

### **154020. Dual residents** [Jan 2018]

... Although the agreement overrides some of the normal consequences of being a UK resident, it does not, in the case of an individual, override the fact of UK residence itself for purely domestic law purposes. Even though an individual may be resident for agreement purposes elsewhere, they (as a resident of the UK for UK tax purposes) still have to complete returns and fulfil any similar obligations imposed by the Taxes Management Act.

Sometimes this rule works in favour of the taxpayer; for instance, it may preserve the right to IT personal allowances (which are conferred on UK-law UK residents but not always available to non-residents).<sup>2</sup> Mostly however the rule works in favour of HMRC. For instance, a year in which an individual is UK-law UK resident counts for the purposes of:

---

<sup>2</sup> See 41.8 (Personal allowances under DTAs).

- (1) the long-term residence test for the remittance basis claim charge;<sup>3</sup>
  - (2) deemed domicile for IHT (the 15-year residence rule);
- even though the individual is treaty-resident in a foreign state throughout the year.

In the Canadian case *Black v The Queen*<sup>4</sup> the taxpayer was Canadian-law resident in Canada but treaty-resident in the UK under the tie-breaker. He argued that (contrary to the view taken here) treaty-residence outside Canada precluded his being Canada-law resident. I do not see how this was properly arguable: under the treaty, treaty-residence was defined only *for the purposes of this Convention*. The court agreed, though it took 20 pages to set out the arguments behind that conclusion.

### 8.3 Residence under art 4(1)

Article 4(1) OECD Model provides:

For the purposes of this Convention, the term “resident of a Contracting State” means any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, place of management or any other criterion of a similar nature....

I describe a person who is within this paragraph as “**resident in a state under art 4(1)**”.

For the purposes of discussion it is convenient to abbreviate the phrase “domicile, residence, place of management or any other criterion of a similar nature” to “UK-law residence”; in a UK context this is a permissible shorthand since in general it is UK-law residence (not the other criteria mentioned) which determines whether a person is liable to UK tax.

There are then four requirements to be a resident of a state under art 4(1):

- (1) There must be a “person”.
- (2) The person must be liable to tax in the state.
- (3) The person must be domestic-law resident in that state.
- (4) Domestic-law residence must be the reason for liability to tax.

These are conceptually distinct issues, but they may overlap in practice.

Under art 4(1):

---

3 See 16.12.9 (Individual treaty non-resident).

4 2014 TCC 12 <https://www.canlii.org>

- (1) A person may be a resident of one treaty state alone, in which case they are treaty-resident in that state.
- (2) A person may be a resident of both treaty states, in which case the tie-breaker tests discussed below are applied to identify the state of treaty-residence.

So far as the UK is concerned, a person who is UK-law UK resident is in principle a resident of the UK under art 4(1).

## 8.4 Treaty-person

The first requirement of treaty-residence is that there must be a “person” and one must identify:

- (1) Who that person is
- (2) Whether that person is an individual or not (because different tie-breaker tests apply)
- (3) Whether that person is liable to tax

### 8.4.1 Person: OECD definition

The use of the word “person” always requires some care.<sup>5</sup>

The term is defined (after a fashion). Article 3.1 OECD Model provides:

1. For the purposes of this Convention, unless the context otherwise requires:
  - a) the term “person” includes an individual, a company<sup>6</sup> and any other body of persons;

I refer to a person within this definition as a “**treaty-person**”. But the definition does not take us very far.

Individuals (who are “natural persons”) are straightforward; but trusts, partnerships and some other entities are more problematic. They are better considered individually, rather than as a single topic. See:

- 8.21 (Treaty-residence: Trusts)
- 8.22 (Treaty-residence: Partnerships)
- 86.31.4 (Stichting a treaty-person)
- 86.36.2 (Cell co: CFCs)

---

<sup>5</sup> See App.2.9 (Person).

<sup>6</sup> See 29.9.4 (“Company” in OECD Model). But even if an entity is not a company, as defined, it is still a treaty-person if it is a “body of persons”.

## 8.5 “Liable to tax”

Assuming we have identified a person, we move on to consider whether that person is “liable to tax”. This should be regarded as a technical term in the OECD Model, and it is sometimes appropriate to write it in scare quotation marks.

### 8.5.1 *Liable to which tax?*

“Tax” is not defined as such, but the definition follows from art 2 of the DTA (Taxes Covered).<sup>7</sup> Article 2 France/UK DTA is typical:

- (1) The taxes which are the subject of this Convention are:
  - (a) in the case of the United Kingdom:
    - (i) the income tax;
    - (ii) the corporation tax;
    - (iii) the capital gains tax...

In order to be a resident of the UK, the person is must be liable to IT, CT or CGT. Liability to other UK taxes does not count. In this chapter references to tax are to those taxes.

The Mauritius/UK DTA provides:

- (1) The existing taxes to which this Convention shall apply are...
  - (b) in Mauritius:
    - (i) the income tax;
    - (ii) the capital gains tax (*morcellement*);

In *HMRC v Smallwood*:

“Liable to taxation”<sup>8</sup> ... is a reference to any of the taxes covered by the DTA.<sup>9</sup>

Thus if a person was liable to income tax in Mauritius by reason of their residence, but not liable to CGT, that would be sufficient to make them a resident of Mauritius under art 4(1); even in a case where the taxpayer claimed relief under the capital gains article of the Mauritius/UK DTA. Similarly, if a person was liable to CGT in the UK by reason of their

---

<sup>7</sup> See 103.12 (Taxes Covered).

<sup>8</sup> The treaty wording was “liable to taxation” (the 1963 draft Model wording) rather than “liable to tax” (the 1977 Model introduced the current wording). But that makes no difference.

<sup>9</sup> [2010] EWCA Civ 778 at [13].

residence, but not liable to IT, they would be a resident of the UK under art 4(1).

### 8.5.2 Narrow exemption

It is useful for discussion to distinguish:

- (1) **Narrow exemption:** exemption<sup>10</sup> from tax, as a result of which a person does not pay tax in some circumstances, even quite wide circumstances, but there are at least some circumstances where the person may pay tax.
- (2) **General exemption:** there are no circumstances (other than a change of law) in which the person may pay tax.

A person may be “liable” to tax in a state (and so qualify as treaty-resident in the state) even if they enjoy narrow exemptions, and so do not in fact actually pay any tax. Provided the taxpayer is “liable to tax”, DT relief is in principle available even in respect of income/gains on which the person is not liable to tax.

Loss reliefs and DT reliefs are examples. SP 1/90 provides:

7 ... a company is regarded as liable to tax in a particular territory if it is within the charge there even though it may pay no tax because, for example, it makes losses or claims double taxation relief.

Charities and pension fund tax reliefs are examples. The International Manual provides:

**INTM162040 whether the customer is a resident of the UK** [Feb 2020]

The phrase ‘liable to tax’ means that they only have to be within the general scope to tax. Charities and pension funds can therefore be regarded as resident even if their income is exempt from tax.

OECD Commentary leaves this point slightly open. It provides:

8.11 Paragraph 1 refers to persons who are “liable to tax” in a Contracting State under its laws by reason of various criteria. In many States, a person is considered liable to comprehensive taxation even if the Contracting State does not in fact impose tax. For example, charities and other organisations may be exempted from tax, but they are exempt only if they meet all of the requirements for exemption specified in the

---

10 or relief: the two words are synonymous.

tax laws. They are, thus, subject to the tax laws of a Contracting State. Furthermore, if they do not meet the standards specified, they are also required to pay tax. Most States would view such entities as residents for purposes of the Convention ...

8.12 In some States, however, these entities are not considered liable to tax if they are exempt from tax under domestic tax laws. These States may not regard such entities as residents for purposes of a convention unless these entities are expressly covered by the convention...

It seems reasonably clear that a UK charity is “liable” to UK tax since charity exemptions do not apply to all types of income, and are restricted by numerous anti-avoidance rules. The same applies to UK pension funds. Perhaps the reservation expressed in para 8.12 concerns bodies which qualify for a general exemption; see below.

HMRC, “Double Taxation Pension Scheme Consultation Document” provides:

The generally held view is that pension funds are tax resident in a jurisdiction for tax treaty purposes, even if they do not pay tax (see Paragraph 8.6 of the OECD model tax treaty commentary). The UK agrees with this and therefore regards pension funds as resident for the purposes of tax treaties where they are located and able to access treaty benefits.<sup>11</sup>

The remittance basis is another example. A remittance basis taxpayer is “liable to tax” (and so resident in the UK under art 4(1)).<sup>12</sup> Where a state operates a remittance basis, treaty relief is generally restricted to remitted

---

11 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/525399/Double\\_Taxation\\_Treaty\\_Passport\\_scheme\\_review.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/525399/Double_Taxation_Treaty_Passport_scheme_review.pdf) (2016) para 2.18.

12 This is, I think, self-evident; but if authority is needed:

(1) The Canada Revenue Authority take this view: “The Department takes the view that individuals who are subject to tax on a remittance basis are liable to tax on a world income basis. Accordingly, persons who are liable to tax in a contracting state on a remittance basis, would not in our view, be precluded from being resident there for the purposes of paragraph 1 of the residence article of a convention.” See Canada Revenue Authority, “Income Tax – Technical News No. 16” (March 1999).

(2) OECD Commentary also assumes that is right; see 103.20 (Remittance basis income).

See Sykes [2021] GITC Review p.54 criticising an Italian case which said that a UK remittance basis taxpayer was not treaty-resident in the UK.

(taxable) income.<sup>13</sup> So the fact that a remittance basis taxpayer is “liable to tax” does not much matter in practice, except so far as it affects the drafting of treaties. But it illustrates my point that a person may be liable to tax without actually paying any tax, because of narrow exemptions.

### 8.5.3 General exemption

Different considerations apply where:

- (1) An entity (unlike a UK charity/pension fund) has an general, unqualified exemption so it does not pay any tax under any circumstances. An example is a UK Local Authority, which is entirely exempt from UK tax.<sup>14</sup>
- (2) A person is resident in a jurisdiction which does not impose any tax.<sup>15</sup>

I refer to that as a “**wholly exempt person**”.

Is a wholly exempt person “liable to tax”?

Of course a wholly exempt person *could* be taxed, if the State decided to change its law, and that would be in accordance with the international law principle that a state may tax its residents. One could construe “liable to tax” so widely as to include such a case. On this view, “liable to tax” merely means within the scope of a taxing jurisdiction, within the scope of a state’s right to tax. I refer to that as “**the wide view**”.

The wide view might be regarded as an application, or small extension, of the principle that a person who qualifies for narrow reliefs is still “liable to tax”. However:

- (1) It does not seem to fit the natural meaning of the words.
- (2) It does not fit with the object of a DTA, to avoid double taxation.
- (3) The well-established principle that narrow tax exemptions do not matter does not entail accepting the wide view. There is a difference between narrow and general exemptions, which is generally a

13 See 103.20 (Remittance basis income). For completeness: The issue is one for foreign tax authorities rather than HMRC. It would matter for UK tax only if the foreign state operated a remittance basis; the only examples of which I am aware are Ireland and Japan (in respect of remittances from a branch to head office in Japan). But the DTAs with those states contain the standard form restriction so that unremitted (untaxed) income does not qualify for DTA relief.

14 See Kessler, Wong and Birkbeck, *Taxation of Charities and Nonprofit Organisations*, 2019/20 ed, chap 44 (Local Authorities).

15 It is difficult to see why a DTA should be made with a state which does not impose tax, but a state with a DTA might perhaps repeal the tax leaving the DTA in force.

significant difference, even if in some cases the difference may only be small (see the discussion on Jersey companies below).

- (4) The well-established principle that transparent bodies are not “liable to tax” is not logically consistent with the wide view.

*Crown Forest Industries v Canada*, discussed below, is not consistent with the wide view. But international case law is inconsistent. (Perhaps that is not unusual, in relation to DTAs). On the other side is *Assistant Director of Income Tax v Green Emirate Shipping & Travels*.<sup>16</sup> The question was whether a shipping company was treaty-resident of UAE under the then India/UAE DTA:

... being ‘liable to tax’ in the contracting state does not necessarily imply that the person should actually be liable to tax in that contracting state by virtue of an existing legal provision but would also cover the cases where that other contracting state has the right to tax such persons irrespective of whether or not such a right is exercised by the contracting state.<sup>17</sup>

HMRC have argued in favour of the wide view. In *Weiser v HMRC*<sup>18</sup>:

22. ... There is, [counsel for HMRC] submitted, an internationally recognised distinction ... which gives the expression “liable to tax” a broader meaning than the expression “subject to tax”. She argued that “liable to tax” is understood to require only an abstract liability to taxation on income in the sense that a contracting state may exercise its right to tax the income in question (whether or not the exercise of that right actually results in an amount of tax becoming payable).

But this was not a case where the issue actually arose, and I wonder if HMRC fully realised the implications of their position.

The current OECD Model states expressly that the state and its subdivisions and local authorities are residents of the state.<sup>19</sup> Before then, they were generally regarded as treaty-resident, which implies they were “liable to tax”. The Model Commentary on article 4(1) states this proposition and continues:

---

16 9 ITLR 1.

17 9 ITLR 1 at p.10.

18 [2012] UKFTT 501 (TC). For other aspects of this case, see 104.14 (“Subject to tax”).

19 See 8.7 (State/subdivision/local authority).

FD\_8\_Treaty-Residence\_2021.wpd

49. ... paragraph 8.4 of the Commentary on Article 4 explains that the inclusion of these words in 1995 confirmed the prior general understanding of most member States.

That statement might be taken as supporting the wide view. But the statement is self-serving, and if one thinks about it, the proposition that (say) the UK is liable to tax in the UK (not to mention, liable by reason of its residence, etc) is surprising. Some readers may use a stronger word. Treaty amendment to say this expressly suggests some unease with that position.

The Model Commentary continues:

50. Issues may arise, however, in the case of entities set up and wholly-owned by a State or one of its political subdivisions or local authorities. Some of these entities may derive substantial income from other countries and it may therefore be important to determine whether tax treaties apply to them (this would be the case, for instance, of sovereign wealth funds: see paragraph 8.5 of the Commentary on Article 4). In many cases, these entities are totally exempt from tax and the question may arise as to whether they are entitled to the benefits of the tax treaties concluded by the State in which they are set up.

There is no support for the wide view in that paragraph.

In conclusion: It is considered that the wide view is not one that the UK courts would find attractive.

#### 8.5.4 *Swiss forfait taxpayer*

SP 1/90 provides:

7. A company has to be liable to tax on income so that a company which is, for example, liable only to a flat rate fee or lump sum duty does not fulfil the test.

The Swiss forfait regime (sometimes translated as “lump-sum taxation”) is a tax that is usually calculated at five times the annual rental value of the individual’s home in Switzerland (subject to a certain minimum amount). Forfait taxpayers do not pay tax on their worldwide income or on income from securities.<sup>20</sup>

---

20 See Sigg and Luongo, “The Swiss lump-sum taxation regime: after the storm comes the calm?” [2015] JITTCP 169.

Some Swiss DTAs deal expressly with the treaty-residence status of forfait taxpayers. For instance, art 4 Switzerland/Canada DTA follows OECD Model form for individuals, but art 4(5) provides:

5. Where by reason of the provisions of paragraphs 1 and 2 an individual would be a resident of a Contracting State but is not subject in that State, with respect to all income generally taxable from sources from the other Contracting State, to the generally imposed income taxes, then such individual is not a resident of the first-mentioned State for the purposes of this Convention.<sup>21</sup>

USA/Switzerland DTA Technical Explanation provides:

Paragraph 5 provides that certain individuals are not treated as Swiss residents because they are not liable for tax on the same basis as other Swiss residents. This rule is necessary because Switzerland permits certain alien residents to elect not to be subject to the regularly applicable income tax on residents and instead to pay the “forfeit tax.” The base for the forfeit tax is a multiple of rental value, deemed rental expenses or living expenses of the electing resident. It also includes all income that benefits from a reduction of tax under Swiss income tax conventions. A person who would otherwise be treated as a resident of Switzerland will not be considered a resident of Switzerland for purposes of the Convention if the person makes an election under Swiss law not to be subject to the income tax on residents.<sup>22</sup>

A forfait taxpayer is liable to tax of some kind, and, it appears, they pay it by reason of their residence. The question is whether the forfeit tax is

---

21 <http://www.fin.gc.ca/treaties-conventions/switzerland-suisse-eng.asp>

22 Department of the Treasury Technical Explanation of the USA/Switzerland DTA  
<http://www.irs.gov/pub/irs-trty/swistech.pdf>

a “tax” as defined in the Switzerland/UK DTA.<sup>23</sup> If not, the taxpayer is not treaty-resident in Switzerland.

However it would follow that all these express provisions are unnecessary,<sup>24</sup> and Obrist & Pfister record the opposite view as generally held:

Through [forfait] tax status, only a portion of the individual’s worldwide income and wealth is ordinarily taxed. According to most Swiss DTCs, a lump sum taxpayer is generally considered as a resident under the DTCs and can therefore claim relief on his foreign source income.<sup>25</sup>

### 8.5.5 *Liable at 0%: Jersey company*

Section 123C [Jersey] Income Tax Act 1961 provides:

- (1) This Article applies to a company –
  - (a) which is regarded as resident in Jersey, or which has a permanent establishment in Jersey; and
  - (b) which is not any of the following –
    - (i) a company to which Article 123D applies,
    - (ii) a utility company, or
    - (iii) a registered person within the meaning of Article 118C, such person being exempt from income tax under Article 118C(9).

23 Article 2(1) Switzerland/UK DTA provides:

The taxes which are the subject of this Convention are ... (b) in Switzerland: the federal, cantonal and communal taxes on income (total income, earned income, income from capital, industrial and commercial profits, capital gains and other items of income)

Les impôts auxquels s’applique la présente Convention sont ... (b) en Suisse: les impôts fédéraux, cantonaux et communaux sur le revenu (revenu total, produit du travail, rendement de la fortune, bénéfices industriels et commerciaux, gains en capital et autres revenus)

24 But this is not a powerful argument; see 103.9.6 (Variations between DTAs).

25 Maisto (ed) *Residence of Individuals Under Tax Treaties and EC Law* (2010) p.565 (footnotes omitted). A full understanding of the relevant Swiss law would be needed to get to the bottom of this issue.

Sykes QC [2021] GITC Review p.54 reports that “the Italian authorities believe that an Italian resident paying the Italian flat tax for non-Italian income would be a resident of Italy for treaty purposes.”

(2) Notwithstanding the rate of tax required by Article 1 to be charged for a year of assessment, a company to which this Article applies shall be charged to tax under Schedule D at the rate of 0%.

In short, Jersey companies pay income tax at the rate of 0%. Exceptions are:

- The trade of importing or supplying hydrocarbon oil
- Financial services companies with a PE in Jersey<sup>26</sup>

Is the company “liable to tax” and so treaty-resident in Jersey?

One might say liability at 0% is a liability of some kind, but I see no difference between tax at the rate of 0% and no tax liability. Even if there were thought to be a technical difference, a DTA is not to be so technically construed.

One might say that a Jersey company qualifies for a narrow exemption and not a general one. It would be taxable if it was a financial services company. Exemption under the Jersey treaty rests on this somewhat slender possibility.

The protocol to the Jersey/UK DTA provides:

It is understood that the term “liable to tax” in paragraph 1 will be interpreted by the Territories in accordance with the principles set out in paragraph 8.6 of the Commentary on Article 4 of the OECD Model Tax Convention as it read on 15 July 2014.

As at 15 July 2014 the Commentary provided:

8.6 Paragraph 1 refers to persons who are “liable to tax” in a Contracting State under its laws by reason of various criteria. In many States, a person is considered liable to comprehensive taxation even if the Contracting State does not in fact impose tax. For example, pension funds, charities and other organisations may be exempted from tax, but they are exempt only if they meet all of the requirements for exemption specified in the tax laws. They are, thus, subject to the tax laws of a Contracting State. Furthermore, if they do not meet the standards specified, they are also required to pay tax. Most States would view such entities as residents for purposes of the Convention (see, for example, paragraph 1 of Article 10 and paragraph 5 of Article 11).<sup>27</sup>

---

26 Section 123CA and 123D [Jersey] Income Tax Act 1961.

27 The text, amended slightly but not significantly, is now in para 8.11 of the Model Commentary.

In the view of Revenue Jersey, this ensures that 0% tax paying companies are “liable to tax”.<sup>28</sup>

## 8.6 Liable to tax: Causation requirement

Article 4 OECD Model provides:

the term “resident of a Contracting State” means any person who, under the laws of that State, is liable to tax therein by reason of his domicile,<sup>29</sup> residence, place of management or any other criterion of a similar nature....

It is not enough to be liable to tax: the person must be liable by reason of one of the specified criteria.

### 8.6.1 *By reason of residence*

OECD Commentary on art 4(1) provides:

8. ... As far as individuals are concerned, the definition aims at covering the various forms of personal attachment to a State which, in the domestic taxation laws, form the basis of a comprehensive taxation (full liability to tax). It also covers cases where a person is deemed, according to the taxation laws of a State, to be a resident of that State and on account thereof is fully liable to tax therein (e.g. diplomats or other persons in government service).

### 8.6.2 *By reason of domicile/place of management*

In relation to companies, SP 1/90 provides:

6. Territories which impose tax on companies by reference to incorporation or registration or similar criteria are covered by the term “domicile”.<sup>30</sup> Territories which impose tax by reference to criteria such as “effective management”, “central administration”, “head office” or

---

<sup>28</sup> Private correspondence.

<sup>29</sup> For completeness: the word “domicile” here may be understood to have a meaning along the lines of the English common law concept, or the civil law concept; but it does not matter since both meanings are included, one way or another, in the expression “domicile, residence, place of management or any other criterion of a similar nature”.

<sup>30</sup> See 3.24 (Domicile of company).

“principal place of business” are covered by the term “place of management”.

In *Crown Forest Industries v Canada*<sup>31</sup> the question was whether a company was a resident of the USA for the purposes of the US/Canada treaty. The definition was not materially different from the OECD Model.

The company was incorporated in the Bahamas. Its office and place of business was in the US. Under the UK central management and control test, the company would no doubt be US resident. But the US marches to a different drum. It does not tax foreign incorporated companies on worldwide income even if management/control is in the US. Instead the US statute provided:

A foreign corporation engaged in trade or business within the United States during the taxable year shall be taxable ... on its taxable income which is effectively connected with the conduct of a trade or business within the United States.

The company was engaged in a trade in the US, and so would have paid US tax on its income; but it qualified for a narrow exemption as an international shipping company.

The Canadian Supreme Court accepted that the company was “liable to tax” (despite the shipping exemption, which was, in my terminology, a narrow exemption). However the company not liable to US tax *by reason of its place of management*. The test was “engaged in business in the US” which is different.

### 8.6.3 Criterion of similar nature

In *Crown Forest Industries v Canada*<sup>32</sup> the company was liable to tax by reason of its being engaged in a trade in the US; but that was not “a criterion of a similar nature” to place of management:

the most similar element among the enumerated criteria is that, standing alone, they would each constitute a basis on which states generally impose full tax liability on world-wide income... In this respect, the criteria for determining residence in Article IV, paragraph 1 involve more than simply being liable to taxation on some portion of income (source liability); they entail being subject to as comprehensive a tax

---

31 [1995] 2 SCR 802

32 [1995] 2 SCR 802

liability as is imposed by a state. In the United States and Canada, such comprehensive taxation is taxation on world-wide income. However, tax liability for the income effectively connected to a business engaged in the U.S. ... amounts simply to source liability. Consequently, the “engaged in a business in the U.S.” criterion is not of a similar nature to the enumerated grounds since it is but a basis for source taxation.<sup>33</sup>

The taxpayer did not argue the wide view, ie that it was “liable to tax” on the basis that the US could have imposed a worldwide tax on the company. The result of the *Crown Forest* case is not consistent with the wide view.

*GE Financial Investments v HMRC*<sup>34</sup> concerned a company was liable to US tax under rules relating to stapled stock. This was held not to be a criterion of a similar nature, so that the company was not a resident of the US. Further discussion must be deferred until the case is final.

## 8.7 State/subdivision/local authority

Article 4(1) OECD Model continues:

The term “resident of a Contracting State” ... also includes that State and any political subdivision or local authority thereof as well as a recognised pension fund of that State.

## 8.8 Exception where source tax only

Article 4(1) OECD Model continues with a second sentence:

This term [“resident of a Contracting State”], however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or capital situated therein.

This only applies in the unusual case where:

- (1) A person is liable to tax in a state by reason of their domicile, residence, place of management or similar criterion; but
- (2) the person is only liable on income/gains from a source in that state.

In most cases, liability on income/gains from a source in a state is not restricted to residents of the state. One example where this provision is needed is the case of a UK resident nominee or trustee for a non-resident

---

33 at [40].

34 [2021] UKFTT 210 (TC).

beneficiary. Such a person is within the first sentence of art 4(1) but taken out by the second sentence.<sup>35</sup>

OECD Commentary refers to this paragraph and provides:

8.1 ... That situation exists in some States in relation to individuals, e.g. in the case of foreign diplomatic and consular staff serving in their territory.

UK resident diplomats and consular officials are exempt from tax on foreign source income and gains and so not treaty-resident in the UK.

OECD Commentary provides:

8.2 According to its wording and spirit the second sentence also excludes from the definition of a resident of a Contracting State foreign held companies exempted from tax on their foreign income by privileges tailored to attract conduit companies. It also excludes companies and other persons who are not subject to comprehensive liability to tax in a Contracting State because these persons, whilst being residents of that State under that State's tax law, are considered to be residents of another State pursuant to a treaty between these two States. ...

8.3 The application of the second sentence, however, has inherent difficulties and limitations. It has to be interpreted in the light of its object and purpose, which is to exclude persons who are not subjected to comprehensive taxation (full liability to tax) in a State, because it might otherwise exclude from the scope of the Convention all residents of countries adopting a territorial principle in their taxation, a result which is clearly not intended.

## 8.9 Residence change during year

### 8.9.1 *Split year of Individual*

UK-law UK residence lasts an entire tax year: an individual cannot cease to be UK-law UK resident during a tax year.<sup>36</sup>

If the split-year rules are met, the individual is still resident in the UK during the overseas part of a split year. During that part the individual is still "liable to tax", since the reliefs for the overseas part of a split year cover most types of income but not all; so the individual is a resident of the UK under art 4(1) during the overseas part of a split year.

---

35 See 104.14.1 (Subject to tax: History).

36 See 9.1 (Residence throughout tax year).

For the avoidance of doubt, para 42 sch 45 FA 2013 confirms the point:

The existence of special charging rules for cases involving split years is not intended to affect any question as to whether an individual would fall to be regarded under double taxation arrangements as a resident of the UK.

Some DTAs expressly address the question of migration during the year. For instance, art 14(6) France/UK DTA qualifies OECD Model CG article:

The provisions of [art 14(5), CGT relief] shall not affect the right of a Contracting State to levy according to its law a tax chargeable in respect of gains from the alienation of any property  
[a] on a person who is, and has been at any time during the previous six fiscal years, a resident of that Contracting State or  
[b] on a person who is a resident of that Contracting State at any time during the fiscal year in which the property is alienated.

### 8.9.2 *Mismatch between UK/foreign years of assessment*

The INT Manual provides:

#### **INTM154040 Individuals** [Dec 2019]

...Different countries have different fiscal years, for example, the United States tax year ends on 31 December. An individual who wishes to make a treaty claim as a resident of the United States in respect of the UK tax year 2010/11 will need to demonstrate that he is a resident of the United States during both of the United States tax years 2010 and 2011. If an individual was resident in the United States during the tax year 2010 but ceased to be so resident after 31 December 2010, then he may make a claim as a United States resident for any 2010/11 income which arose during 2010 but no claim is possible in respect of income arising in 2011.

If income arises partly during a period of residence in the other country and partly during a period of residence in the UK, the income may be apportioned between the periods on a time basis, unless it is clear that the income arose unevenly over the two periods, for example a bonus payable for duties performed in one of the periods.

### 8.9.3 *Trust residence moves in tax year*

For the various ways that a trustee may change residence, and the time the change takes effect, see 9.15 (Split year of trustees and PRs ).

*HMRC v Smallwood*<sup>37</sup> concerned a Round the World scheme. A trust had three different trustees, resident in different states, in the course of the tax year 2000/01:

Apr - Dec: a Jersey resident trustee (“the Jersey period”)

Dec - March: a Mauritius resident trustee (“the Mauritian period”)

March onwards: two UK resident trustees (“the UK period”)

A gain accrued during the Mauritian period. During this period the trustee was a resident of Mauritius under art 4(1), as it was liable to Mauritian tax<sup>38</sup> by reason of its residence in Mauritius.

The question was whether, during the Mauritian period, the trustee was a resident of the UK under art 4(1).<sup>39</sup>

One might have thought that it was not, on the basis that it was not in fact UK tax resident during that period. The Mauritian trustee was liable to CGT in the UK during the Mauritian period, but not by reason of *their* residence during the Mauritian period: it was liable by reason of *someone else’s* residence (namely, the residence of their successor trustees) during the UK period.<sup>40</sup> However the Court of Appeal held that the trustee-body was a resident of the UK under art 4(1) during the Mauritian period<sup>41</sup> since:

---

37 *HMRC v Smallwood* [2010] EWCA Civ 778.

38 In fact the trustees were not liable to CGT in Mauritius, but only to income tax; but that made no difference because the trustees were liable to “taxation” as defined; see 8.5.1 (Liable to which tax?).

39 A further question arose concerning POEM; see 8.19.6 (POEM: Round the World scheme).

40 At the time, s.2(1) TCGA provided (so far as relevant):

*“a person shall be chargeable to capital gains tax in respect of chargeable gains accruing to him in a year of assessment during any part of which he is resident in the UK”.*

As the judge pointed out “residence in part of the year gives rise to a charge to tax on gains made in another part of the year, but [the provisions] do not do so by deeming the residence to be for any period longer than the actual period of residence. They do so simply by defining the gains by reference to the period in which they arise. There is a difference between those approaches, and I do not consider this distinction to be too subtle for the purposes of the Treaty “

Note that the current law is different: see 53.4.3 (Territorial scope).

41 and indeed during the Jersey period, but that is not relevant so I refer only to the Mauritian period here.

- (1) it was liable to UK tax<sup>42</sup> during that period; and
- (2) it was so liable by reason of “its” UK residence, albeit in the subsequent UK period, because of the rule that trustees should be regarded as a continuing body distinct from the actual trustees.<sup>43</sup>

During Mauritian period the trustee could not know that it was a resident of the UK under art 4(1), as the facts which made it a resident of the UK occurred later. That did not matter: “The issue of liability has to be looked at retrospectively”.<sup>44</sup> Of course, it can happen that individuals do not know in real time whether they are UK resident, since that can depend on what happens later in the same tax year; or indeed under the SRT, it may depend on events in the subsequent tax year. So the position is similar for trust residence.

Thus the trustee was both a resident of the UK under art 4(1), and a resident of Mauritius under art 4(1); so treaty-residence was decided under the tie-breaker test.<sup>45</sup>

The reader might think that the reasoning in the High Court was more convincing; but (1) the point is moot as the pre-2019 law must be regarded as settled; and (2) the law changed in 2019 and now a trustee is deemed to be UK resident for the whole year, if resident in any part of it, so the issue does not now arise.<sup>46</sup>

In *Smallwood* the outcome favoured HMRC. However the rule will sometimes favour the taxpayer because gains arising at a time when a person does not meet the requirements to be a resident of a treaty state

42 In fact it could have been argued that the trustees were *not* liable to tax in the UK, because of s.77 TCGA and s.624 ITTOIA; but the taxpayer did not take that point.

43 The court relied on s.69 TCGA. The wording of the section has changed, but the changes are not significant. The current wording reads: “*For the purposes of this Act the trustees of a settlement shall, unless the context otherwise requires, together be treated as if they were a single person (distinct from the persons who are trustees of the settlement from time to time).*” It might have been argued that s.69 does not apply for treaty purposes. However art.3(2) (undefined terms have domestic law meanings) would justify treating trustees as a continuing body of persons, and the decision on this point seems right.

44 *HMRC v Smallwood* [2010] EWCA Civ 778 CA at [42].

45 See 8.19.6 (POEM: Round the World scheme).

46 See 53.4.4 (“UK resident for a tax year”). Perhaps the drafter had *Smallwood* in mind when drafting the current provisions.

under art 4(1) may later meet those requirements, and retrospectively qualify for relief. Suppose:

- (1) A company within s.3 TCGA is resident in Jersey during part of a tax year (“the Jersey resident period”).
- (2) The company becomes resident in state A under the law of state A during part of the tax year (“the state A resident period”).
- (3) Under the tax law of state A the company is liable to tax throughout both periods. That is, state A has a rule similar to that which applies to individuals and trusts in the UK.
- (4) The company is at no time UK-law UK resident.

A gain arising in the Jersey resident period will retrospectively qualify for relief under a treaty between the UK and state A, which would benefit a UK participator within the scope of s.3. (Before the Court of Appeal’s decision in *Smallwood*, an adviser might have thought that the company had to be able to say at the time the gain accrued. that it was resident under art 4(1) at that time, in order for treaty relief to apply. But now we know the position is looked at retrospectively.)

## 8.10 Tie-breaker tests

It is of course possible for a person to be:

- (1) a resident of state A under art 4(1) during the whole of a tax year and
- (2) a resident of state B under art 4(1) during the whole of the same period.

This may arise for various reasons:

- (1) Two states may have different domestic-law definitions of residence.
- (2) Residence (however defined) is distinct from presence: a person may be UK-law UK resident throughout a year while only present in the UK during part of the year; such a person may be regarded by the foreign state as a resident of the foreign state.

In such cases tie-breaker tests are needed. There are two tests, or sets of tests. Article 4(2) deals with individuals. Article 4(3) deals with other persons, which I call “**entities**”; that includes companies, trustees and PRs.

## 8.11 Tie-breaker tests: Individuals

For individuals, there are a series of tie-breaker tests, in order of priority:

- (1) permanent home
- (2) centre of vital interests
- (3) habitual abode
- (4) nationality
- (5) mutual agreement

OECD Commentary provides:

10. To solve this conflict special rules must be established which give the attachment to one State a preference over the attachment to the other State. As far as possible, the preference criterion must be of such a nature that

[1] there can be no question but that the person concerned will satisfy it in one State only,

[2] and at the same time it must reflect such an attachment that it is felt to be natural that the right to tax devolves upon that particular State.

The last sentence reflects the conflict, endemic throughout taxation, between formal rules which offer more certainty, and rules which seek to track the economic reality, if there is such a thing.

## 8.12 Permanent home

Article 4 OECD Model provides:

2. Where by reason of the provisions of paragraph 1 an individual is a resident of both Contracting States, then his status shall be determined as follows:

- a) he shall be deemed to be a resident only of the State in which he has a permanent home available to him;

For clarity of exposition it is helpful to consider separately the concepts of:

- (1) “home”
- (2) “permanent”
- (3) “available”

But this neat analysis is not practical: the three terms interact, for a property which is not “available” or “permanent” is less likely to be a “home”.

### 8.12.1 “Home”

“Home” matters for several tax purposes:

- (1) Treaty-residence
- (2) Residence<sup>47</sup>
- (3) Child’s domicile, if parents living apart.<sup>48</sup>

See 5.20 (“Home”).

### 8.12.2 “Permanent”

The concept of “permanent” is as vague as the concept of “home”. OECD Commentary is untrammelled by the restraint of precision:

11 The Article gives preference to the Contracting State in which the individual has a permanent home available to him. This criterion will frequently be sufficient to solve the conflict, eg where the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State.

12 Subparagraph (a) means, therefore, that in the application of the Convention (that is, where there is a conflict between the laws of the two States) it is considered that the residence is that place where the individual owns or possesses a home; this home must be permanent, that is to say, the individual must have arranged and retained it for his permanent use as opposed to staying at a particular place under such conditions that it is evident that the stay is intended to be of short duration.

13. ... But the permanence of the home is essential; this means that the individual has arranged to have the dwelling available to him at all times continuously, and not occasionally for the purpose of a stay which, owing to the reasons for it, is necessarily of short duration (travel for pleasure, business travel, educational travel, attending a course at a school, etc).

Para 11 of the Commentary looks at the situation where “the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State”. The Commentary is not making a contrast between:

- (1) permanent, and
- (2) a stay of some length.

---

47 See 5.20 (“Home”).

48 See 3.17.3 (Parents living apart).

The point correctly being made is that the existence of one (undoubtedly) permanent home impacts on whether one regards *another* place as a permanent home.

Paras 12 and 13 contrast:

- (1) permanent use, and
- (2) a stay of short duration; exemplified as “travel for pleasure, business travel, educational travel, attending a course at a school, etc”.

This suggests that a stay of more than short duration qualifies as permanent. Thus in *Hankinson v HMRC* an apartment was held under an 18 month lease. The taxpayer spent some 130 nights there in the period 6 Apr 1998 - 2 Jan 1999 (a period of 271 days). This was held to be a permanent home.<sup>49</sup>

A similar view is taken in Australia on the phrase “permanent place of abode”:<sup>50</sup>

“permanent” is used in the sense of something which is to be contrasted with that which is temporary or transitory. It does not mean everlasting. The question is thus one of fact and degree.<sup>51</sup>

### 8.12.3 “Available”

HMRC Self Assessment helpsheet HS302 (Dual Residents 2020) provides:

#### **Permanent home**

This is accommodation that’s always available for your personal use for the year in question. You do not have to own it. If you’ve a permanent home in both countries, move to the ‘centre of vital interests’ test. If you do not have a permanent home in either country, move to the ‘habitual abode’ test.

### 8.13 Centre of vital interests

Article 4(2)(a) OECD Model provides:

---

49 [2009] UKFTT 384 (TC) at [67]. The point was not discussed in the appeal.

50 Section 6(1) [Australian] Income Tax Assessment 1936 provides: “resident or resident of Australia ... includes a person ... whose domicile is in Australia, unless ... his permanent place of abode is outside Australia”.

51 *Applegate v FCT* [1978] 1 NSWLR 126 at p.134, affirmed on appeal [1979] FCA 37; (1979) 38 FLR 1.

if he has a permanent home available to him in both States, he shall be deemed to be a resident only of the State with which his personal and economic relations are closer (centre of vital interests);

This test is only applied where the individual has a permanent home available to him in both States. If there is a permanent home in one state only, that is the state of residence. If there is no permanent home in either state, then one moves on to the habitual abode test.

The test is multifactorial: no single factor is decisive. OECD Commentary provides:

15 If the individual has a permanent home in both Contracting States, it is necessary to look at the facts in order to ascertain with which of the two States his personal and economic relations are closer. Thus, regard will be had to

- [1] his family and social relations,
- [2] his occupations,
- [3] his political, cultural or other activities,
- [4] his place of business,
- [5] the place from which he administers his property, etc.

OECD gives some inkling of priority between the different factors:

The circumstances must be examined as a whole, but it is nevertheless obvious that considerations based on the personal acts of the individual must receive special attention.

History also comes into the balance:

If a person who has a home in one State sets up a second in the other State while retaining the first, the fact that he retains the first in the environment where he has always lived, where he has worked, and where he has his family and possessions, can, together with other elements, go to demonstrate that he has retained his centre of vital interests in the first State.

A similar expression “centre of a debtor’s main interests” is used in the EU Regulation on insolvency proceedings,<sup>52</sup> case law on that may be helpful in relation to the expression centre of vital interests.

---

52 (EC) No 1346/2000 (29 May 2000).

*Yates v HMRC*<sup>53</sup> and *Hankinson v HMRC*<sup>54</sup> offer illustrations but are otherwise of little importance.

The Australian Revenue offer another illustration:

**Facts**

The taxpayer and his spouse and children initially lived in the UK.

The taxpayer accepted employment in Australia for a period of 18 months, which is the period in question.

The taxpayer and his spouse and children moved to Australia for that period.

The taxpayer and his spouse own family homes both in Australia and in the UK, and each home is maintained so that it can be used by the taxpayer or his family at any time.

Thus we apply the centre of vital interests test.

Prior to, and during, the period in question, the taxpayer had business interests in both the UK and Australia.

While the taxpayer lived in Australia, he managed both his Australian and UK business interests from Australia, but he made occasional short trips to the UK when it was necessary.

The taxpayer is a member of several clubs in the UK. When he was living in the UK or visiting the UK he would regularly socialise with friends and with members of his extended family.

While he was living in Australia the taxpayer did not join any clubs, and he did not socialise as regularly, as he did not have many friends or any extended family members in Australia.

The taxpayer's hobby is attending cooking classes, and he attended cooking classes as often as he could, both in Australia and in the UK. During the 18 months that the taxpayer lived in Australia, he remained on the electoral roll in the UK but he was not on the Australian electoral roll.

The taxpayer's children have a cat, which remained in the UK with friends while the taxpayer was living in Australia.

At the end of the 18 months, the taxpayer and his spouse and children returned to the UK to live.

**Reasons for Decision**

Paragraph 10 of the OECD Commentary on Article 4 states that the facts to which the special rules in Article 4(2) of the OECD Model will

---

53 [2012] UKFTT 568 (TC).

54 [2009] UKFTT 384 (TC); the treaty-residence issue was not discussed in the appeal.

apply are those existing during the period when the residence of the taxpayer affects tax liability. In this case the relevant period is the 18 months that the taxpayer lived in Australia.

[The Australian Revenue cite para 15 of OECD Commentary and continue:] This means that the taxpayer's relations with Australia must be weighed against the taxpayer's relations with the UK, with more weight being given to the taxpayer's personal acts.

Klaus Vogel on Double Taxation Conventions<sup>55</sup> is consistent with paragraph 15 of the OECD Commentary on Article 4(2)(a) and states that 'personal relations encompass a taxpayer's entire way of life' .... This includes family and social, political and cultural relations. At paras 74 and 74a of p.249, Vogel suggests that factors that are part of a person's personal relations include intention to spend their old age at a certain place; possession of an identity card; enlistment on the electoral roll; and relations to a thing or to an impersonal entity such as a private collection or membership in a club or the exercise of a hobby.

As the taxpayer pursued his hobby in both Australia and the UK, the hobby is not significant in deciding the centre of vital interests.

The registration on the electoral roll; the club memberships; the presence of friends and extended family members and the family's cat; and the active social life when he visits the UK, are factors which point to the UK as the taxpayer's centre of vital interests during the 18 months that he is living in Australia.

However, at p.249, para 74a, Vogel states that the most significant factor in establishing to which state a taxpayer's personal relations are closer is where the taxpayer regularly lives with his family. Where a taxpayer lives alone, the location of any family members will be relevant if the taxpayer maintains relations with them.

The taxpayer lived with his family in Australia during the 18 months in question. Even though he had strong ties with the UK during that time, the presence of his spouse and children in Australia carries greater weight.

Regarding economic relations, the OECD Commentary on Article 4 at paragraph 15 refers to 'the place from which he administers his property, etc'.

Consistent with this, Vogel at p.249, para 74b, states:

---

55 See *Klaus Vogel on Double Taxation Conventions* (4<sup>th</sup> ed., 2015), paras 92-101. The text of the current edition, which has changed somewhat from the 3<sup>rd</sup> edition referred to by the ATO, contains a helpful discussion.

**Economic relations will primarily exist with activities** linked with a locality or with sources of income. ... A permanent home mainly serving the realization or maintenance of economic relations, would be a manifestation of special ties with a place to live. This, will as a rule, be **that home from where the individual proceeds to perform his everyday work and from where he manages and controls his capital or income** (emphasis added).

In this case, during the 18 months in question the taxpayer was employed in Australia so the home from where he proceeded to perform his everyday work was in Australia. In addition, although he made some trips to the UK when his business interests made it necessary, he generally managed his business interests from Australia during the time he lived in Australia.

For the 18 months in question the taxpayer lived with his spouse and children in Australia, and generally managed his business interests from Australia. Consequently, even though he also had ties with the UK, the taxpayer's personal and economic relations, during the 18 months in question, were closer with Australia than with the UK.<sup>56</sup>

In short, an 18 month placement in Australia (with family) outweighed all the UK links, even the cat.

## 8.14 Habitual abode

Article 4(2) OECD Model provides:

- b) if
  - [i] the State in which he has his centre of vital interests cannot be determined, or
  - [ii] if he has not a permanent home available to him in either State, he shall be deemed to be a resident only of the State in which he has an habitual abode;

The habitual abode test applies in two cases:

- (1) Where the individual has a permanent home available in both Contracting States and it is not possible to determine in where is the centre of vital interests: the CVI test is too close to call
- (2) Where the individual has a permanent home available in neither Contracting State.

---

<sup>56</sup> ATO ID 2011/53.

I would have thought case (1) would rarely if ever arise. A tribunal would normally be able to decide CVI one way or another.

OECD Commentary discusses this with a comment on habitual abode:

17 In the first situation, the case where the individual has a permanent home available to him in both States, the fact of having an habitual abode in one State but not in the other appears therefore as the circumstance which, in case of doubt as to where the individual has his centre of vital interests, tips the balance towards the State where he stays more frequently. For this purpose regard must be had to stays made by the individual not only at the permanent home in the State in question but also at any other place in the same State.

Case 2 will not be common, but it could happen. OECD Commentary here provides a further comment on habitual abode:

18 The second situation is the case of an individual who has a permanent home available to him in neither Contracting State, as for example, a person going from one hotel to another. In this case also all stays made in a State must be considered without it being necessary to ascertain the reasons for them.

OECD Commentary continues:

19. The application of the criterion provided for in subparagraph b) requires a determination of whether the individual lived habitually, in the sense of being customarily or usually present, in one of the two States but not in the other during a given period; the test will not be satisfied by simply determining in which of the two Contracting States the individual has spent more days during that period. The phrase “*séjourne de façon habituelle*”, which is used in the French version of subparagraph b), provides a useful insight as to the meaning of “habitual abode”, a notion that refers to the frequency, duration and regularity of stays that are part of the settled routine of an individual’s life and are therefore more than transient. As recognised in subparagraph c), it is possible for an individual to have an habitual abode in the two States, which would be the case if the individual was customarily or usually present in each State during the relevant period, regardless of the fact that he spent more days in one State than in the other. Assume, for instance, that over a period of five years, an individual owns a house in both States A and B but the facts do not allow the determination of the State in which the individual’s centre of vital interests is situated. The individual works in State A where he habitually lives but returns to State

B two days a month and once a year for a three-week holiday. In that case, the individual will have an habitual abode in State A but not in State B. Assume, however, that over the same period of five years, the individual works short periods of time in State A, where he returns 15 times a year for stays of two weeks each time, but is present in State B the rest of the time (assume also that the facts of the case do not allow the determination of the State in which the individual's centre of vital interests is situated). In that case, the individual will have an habitual abode in both State A and State B.

HMRC Self Assessment helpsheet HS302 (Dual Residents 2020) provides:

### **Habitual abode**

This shows which of the 2 countries you live in regularly, normally or customarily. The test considers the number of visits you made to each country and the length of time you stayed there....

In *Hankinson v HMRC*:<sup>57</sup>

In a case in the Tax Court of Canada ... *Lingle v R* 12 ILTR 55, Campbell J makes the point that the French equivalent to an habitual abode is *où elle séjourne d'une façon habituelle* which means "where one stays<sup>58</sup> in an habitual way." He was dealing with the US-Canada treaty the official languages of which are English and French whereas we are dealing with the Treaty, which is in English and Dutch but as the French is the same in the French official version of the OECD Model we consider that it is permissible to look at it to confirm the meaning of the expression in English which is an odd use of the English language.

That does not take us much further. More usefully:

In the overlap period [the appellant] did not stay in either state because he was in Barbados. We find that he did not have an habitual abode in either state during the overlap period. If it is possible to look at a longer period as required by paragraph 19 of the Commentary, such as the UK

---

57 [2009] UKFTT 384 (TC); the issue was not discussed in the appeal.

58 Footnote original: We also point out that *séjourne* is also translated as "is present" in art 15(2)(c) of the Model: *le bénéficiaire séjourne dans l'autre État pendant une période ou des périodes n'excédant pas au total 183 jours durant toute période de douze mois....* ("the recipient is present in the other state for a period or periods not exceeding in aggregate 183 days in any twelve month period...").

tax year 1998-99, he stayed in an habitual way in both countries (some 130 nights in the Netherlands and 82 nights in the UK, including non-working days) and the intervals were fairly evenly spaced. We regard both of these as habitual. We do not read this test as purely a matter of counting days in spite of the Commentary's reference to "tips the balance towards the State where he stays more frequently" unless one is far larger than the other because the Treaty deals with the possibility of habitual abode being in both or neither state, which would virtually never arise with counting days. We would therefore decide if it were relevant that the Appellant had an habitual abode in neither state if only the overlap period were taken or that he had an habitual abode in both states if the tax year 1998-99 were taken.<sup>59</sup>

### 8.15 Nationality/mutual agreement

Article 4(2)(c)(d) OECD Model provides:

- c) if he has an habitual abode in both States or in neither of them, he shall be deemed to be a resident only of the State of which he is a national;
- d) if he is a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

This will rarely if ever arise in practice.

### 8.16 Period of enquiry: Tie-breaker

OECD Commentary provides a general comment:

10. The facts to which the special [tie-breaker] rules will apply are those existing during the period when the residence of the taxpayer affects tax liability, which may be less than an entire taxable period. For example, in one calendar year an individual is a resident of State A under that State's tax laws from 1 January to 31 March, then moves to State B. Because the individual resides in State B for more than 183 days, the individual is treated by the tax laws of State B as a State B resident for the entire year. Applying the special [tie-breaker] rules to the period 1 January to 31 March, the individual was a resident of State A. Therefore, both State A and State B should treat the individual as a State

---

59 [2009] UKFTT 384 (TC) at [69].  
FD\_8\_Treaty-Residence\_2021.wpd

A [treaty-]resident for that period, and as a State B [treaty-]resident from 1 April to 31 December.

### 8.16.1 Enquiry period: *Habitual abode*

OECD Commentary provides:

19.1 [Art 4(1)(b), habitual abode] does not specify over what length of time the determination of whether an individual has an habitual abode in one or both States must be made. The determination must cover a sufficient length of time for it to be possible to ascertain the frequency, duration and regularity of stays that are part of the settled routine of the individual's life. Care should be taken, however, to consider a period of time during which there were no major changes of personal circumstances that would clearly affect the determination (such as a separation or divorce). The relevant period for purposes of the determination of whether an individual has an habitual abode in one or both States will not always correspond to the period of dual-residence, especially where the period of dual-residence is very short.

This is illustrated by the following example. Assume that an individual resident of State C moves to State D to work at different locations for a period of 190 days. During that 190-day period, he is considered a resident of both States C and D under their respective domestic tax laws. The individual lived in State C for many years before moving to State D, remains in State D for the entire period of his employment there and returns to State C to live there permanently at the end of the 190-day period. During the period of his employment in State D, the individual does not have a permanent home available to him in either State C or State D.

The OECD analysis is as follows:

In this example, the determination of whether the individual has an habitual abode in one or both States would appropriately consider a period of time longer than the 190-day period of dual-residence in order to ascertain the frequency, duration and regularity of stays that were part of the settled routine of the individual's life.

In *Hankinson v HMRC*:

It seems therefore that while one applies the tie-breaker at the time of alienation in a case concerning capital gains, this does not mean that one cannot look at a longer period in applying the elements of the tie-breaker

when appropriate, which it may not be for permanent home, but it is necessarily for habitual abode.<sup>60</sup>

While one needs to determine whether a person is treaty-resident at a particular moment, or period, one looks over an appropriate period of time to determine whether they are treaty-resident at that moment.<sup>61</sup>

### 8.17 Tie-breaker: Entities

There are two main tie-breaker tests for entities (ie non-individuals). I refer to them as follows:

<b>Tie-breaker</b>	<b>OECD Model</b>	<b>See para</b>
Mutual agreement tie-breaker	Post-2017	8.18
POEM tie-breaker	Pre-2017	8.19

There are also some different tests in non-OECD Model treaties.

The tie-breaker is only needed for persons who are treaty-resident in both States under art 4(1). OECD Commentary provides:

21... It may be rare in practice for a company, etc. to be subject to tax<sup>62</sup> as a resident in more than one State, but it is, of course, possible if, for instance, one State attaches importance to the registration and the other State to the place of effective management. So, in the case of companies, etc., also, special rules as to the preference must be established.

#### 8.17.1 *Person other than individual*

Art 4(3) OECD Model (both pre- and post-2017 forms) refers to “a person other than an individual”.

That includes trustees. This may be said to follow from the distinct-person fiction<sup>63</sup> but I think it would be clear on first principles.<sup>64</sup>

60 [2009] UKFTT 384 (TC) at [60]. The issue was not discussed in the appeal.

61 See 8.19.5 (Period for enquiry into POEM)). See too 3.23.4 (Period for domicile enquiry).

62 This should read, “liable to tax” but it does not matter.

63 See 6.3 (Trustees a distinct person).

64 If authority is needed, which I doubt, see the IHT Manual:

**IHTM353600 Claims by trustees in Ireland** [Mar 2016]

Article 4(3) (Fiscal Residence) of the convention makes reference to ‘a person other than an individual’. Trustees act as a body of persons and so are persons other than an individual for the purposes of the article, and we therefore refer to the criteria in Article 4(3) to determine whether trustees of an Irish trust are resident in the Ireland

OECD Commentary provides:

21. This paragraph [art 4(3)] concerns companies and other bodies of persons, irrespective of whether they are or not legal persons.

### **8.18 Tie-breaker: Mutual agreement**

From 2017, art 4(3) OECD Model and BEPS MLI<sup>65</sup> are effectively identical, with changes only to conform to MLI's terminology:

#### **art 4(3) OECD Model**

[1] Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States, the competent authorities of the Contracting States shall endeavour to determine by mutual agreement the Contracting State of which such person shall be deemed to be a resident for the purposes of the Convention, having regard to

- [a] its place of effective management,
- [b] the place where it is incorporated or otherwise constituted and
- [c] any other relevant factors.

#### **art 4 BEPS MLI**

1. [A] Where by reason of the provisions of a Covered Tax Agreement<sup>66</sup> a person other than an individual is a resident of more than one Contracting Jurisdiction,<sup>67</sup> the competent authorities of the Contracting Jurisdictions shall endeavour to determine by mutual agreement the Contracting Jurisdiction of which such person shall be deemed to be a resident for the purposes of the Covered Tax Agreement, having regard to

- [a] its place of effective management,
- [b] the place where it is incorporated or otherwise constituted and
- [c] any other relevant factors.

---

for the purposes of the convention...

65 See 103.14 (BEPS MLI).

66 See 103.15.3 (Covered tax agreement).

67 See 103.15.2 (Contracting jurisdiction/signatory).

[2] In the absence of such agreement, such person shall not be entitled to any relief or exemption from tax provided by this Convention except to the extent and in such manner as may be agreed upon by the competent authorities of the Contracting States.

[B] In the absence of such agreement, such person shall not be entitled to any relief or exemption from tax provided by the Covered Tax Agreement except to the extent and in such manner as may be agreed upon by the competent authorities of the Contracting Jurisdictions.

### 8.18.1 *Relevant factors*

OECD Commentary provides:

24.1 Competent authorities having to apply [art 4(3)] would be expected to take account of various factors, such as

[a] where the meetings of the person's board of directors or equivalent body are usually held,

[b] where the chief executive officer and other senior executives usually carry on their activities,

[c] where the senior day-to-day management of the person is carried on, where the person's headquarters are located,

[d] which country's laws govern the legal status of the person,

[e] where its accounting records are kept,

[f] whether determining that the legal person is a resident of one of the Contracting States but not of the other for the purpose of the Convention would carry the risk of an improper use of the provisions of the Convention etc...

### 8.18.2 *Mutual agreement procedure*

OECD Commentary provides:

24.2 A determination under [art 4(3)] will normally be requested by the person concerned through the mechanism provided for under paragraph 1 of Article 25 [Mutual agreement procedure]. Such a request may be made as soon as it is probable that the person will be considered a resident of each Contracting State under paragraph 1. Due to the notification requirement in paragraph 1 of Article 25, it should in any event be made within three years from the first notification to that person of taxation measures taken by one or both States that indicate that reliefs or exemptions have been denied to that person because of

its dual-residence status without the competent authorities having previously endeavoured to determine a single State of residence under [art 4(3)]. The competent authorities to which a request for determination of residence is made under [art 4(3)] should deal with it expeditiously and should communicate their response to the taxpayer as soon as possible.

24.3 Since the facts on which a decision will be based may change over time, the competent authorities that reach a decision under that provision should clarify which period of time is covered by that decision.

Even in the case of a POEM tie-breaker, the two States may seek to resolve residence (and other) issues under the mutual agreement procedure. In the context of a treaty-residence dispute, the Tribunal refused to order disclosure of documents relating to discussions between the UK and the foreign state.<sup>68</sup> That must be right, because the documents had little if any relevance to the Tribunal hearing, which had to make up its own mind on the treaty-residence issue on the basis of the factual evidence.

### 8.18.3 *Position if no agreement*

OECD Commentary provides:

24.4 The last sentence of [art 4(3)] provides that in the absence of a determination by the competent authorities, the dual-resident person shall not be entitled to any relief or exemption under the Convention except to the extent and in such manner as may be agreed upon by the competent authorities. This will not, however, prevent the taxpayer from being considered a resident of each Contracting State for purposes other than granting treaty reliefs or exemptions to that person. This will mean, for example, that the condition in subparagraph b) of paragraph 2 of Article 15 will not be met with respect to an employee of that person who is a resident of either Contracting State exercising employment activities in the other State. Similarly, if the person is a company, it will be considered to be a resident of each State for the purposes of the application of Article 10 to dividends that it will pay.

---

68 *McCabe v HMRC* [2020] UKUT 266 (TCC).

The mutual agreement tie-breaker confers a wide Revenue discretion, but governments do not seem to regard that as objectionable.<sup>69</sup>

#### 8.18.4 *The MLI change*

Article 4 BEPS MLI<sup>70</sup> provides:

2. Paragraph 1 shall apply in place of or in the absence of provisions of a Covered Tax Agreement that provide rules for determining whether a person other than an individual shall be treated as a resident of one of the Contracting Jurisdictions in cases in which that person would otherwise be treated as a resident of more than one Contracting Jurisdiction. Paragraph 1 shall not apply, however, to provisions of a Covered Tax Agreement specifically addressing the residence of companies participating in dual-listed company arrangements.

Art 4(3) BEPS MLI provides a variety of opt-outs but the UK has not opted out of this provision.

As required by art 4(4) BEPS MLI, HMRC have published a list of DTAs with tie-breaker provisions, which will be replaced by the mutual agreement tie-breaker under the MLI.<sup>71</sup>

#### 8.18.5 *MLI transitional rules*

It is possible that as a result of the MLI change, a person who was formerly treaty-resident in one treaty-state under the POEM test, becomes treaty-resident in the other treaty-state, at the time the MLI takes effect. It is also possible that a person may change treaty-residence at any time as a result of changed view of the Revenue authorities, or as a result of some change in circumstances, which need not include a change in POEM. But in practice I expect that this will be exceptional.

The INTM provides:

**INTM120070: ‘Treaty non-resident’ companies [Jul 2020]  
... DTAs with standard tie-breakers**

... Following Action Point 6 of the Base Erosion and Profit Shifting (BEPS) project, the tie-breaker provision of Article 4(3) of the OECD

69 See 2.8 (The Rule of Law).

70 See 103.14 (BEPS MLI).

71 [https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/725261/Final\\_list\\_of\\_UK\\_reservations\\_and\\_notifications\\_made\\_on\\_deposit\\_of\\_the\\_instrument\\_of\\_ratification.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/725261/Final_list_of_UK_reservations_and_notifications_made_on_deposit_of_the_instrument_of_ratification.pdf)

Model Tax Convention was amended from one based on the entity's 'place of effective management' to one based on a determination by the Competent Authorities. A number of the UK's existing DTAs, including those with Canada and the Netherlands, already include this type of tie-breaker. However, many others will be modified to give effect to this recommendation through the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent BEPS (MLI). As such, the Competent Authority based tie-breaker can now be referred to as the 'standard tie-breaker'.

Where an existing DTA is modified by the MLI and a company was subject to the tie-breaker of Article 4 and determined to be resident in only one of the countries before the modification came into effect, HMRC will generally not seek to revisit any previous determination of the treaty residence position so long as all the material facts remain the same. However, if the arrangements in relation to which the determination has been made are such that any treaty benefits under them would be denied under the conditions of the Principal Purpose Test (PPT) in paragraph 9 of Article 29 of the 2017 OECD Model Tax Convention then HMRC would review the prior determination. Where HMRC believes arrangements in relation to which the determination has been made are such that any treaty benefits under them would be denied under the conditions of the PPT, HMRC may seek a new determination from the date on which the modification came into effect.

In other cases, where the material facts change after the modification came into effect, HMRC would generally seek for any new determination (or the loss of treaty benefits pursuant to the absence of a mutual agreement) to apply only to income or gains arising after the new determination (or notice to the taxpayer of the absence of an agreement) but this will depend on the facts and circumstances.

HMRC cannot however apply the above approach unilaterally and will be subject to agreement between the Competent Authorities.

Such agreement has been reached with the New Zealand Competent Authority and so any previous determination would be 'grandfathered' as set out above. HMRC has also agreed with the Netherlands Competent Authority that in cases where the residence position has previously been determined under either the 1980 or 2008 UK/Netherlands DTC (before the latter was modified by the MLI), that determination will be 'grandfathered' as set out above.

In 2018, HMRC entered into new DTAs with Jersey, Guernsey and Isle of Man. These DTAs include standard tie-breakers. HMRC has agreed

with the Competent Authorities of those territories that where a company was determined to be resident in either territory under the previous Arrangement that determination will be ‘grandfathered’ as set out above.

As the standard tie-breaker depends on the agreement of the Competent Authorities, the CTA09/S18 rule cannot be applied unilaterally by HMRC. It can only apply where the respective Competent Authorities have made a determination of residence and residence has been formally awarded to the other country. As is clear from the wording of the legislation, the absence of a claim by a company will not prevent S18 from being applied following a determination by the Competent Authorities. However, it is likely that bilateral negotiations will generally be initiated following discussions between the company and at least one of the tax authorities concerned

#### 8.18.6 *A cautionary tale*

The question of residence under a mutual agreement tie-breaker arose in the context of a Round the World scheme, under which:

- (1) Trustees resident in Canada were appointed for a short period, April - December 2001 (“the Canadian period”).
- (2) UK trustees were appointed in December 2001.

The Round the World scheme worked on the basis that the trustees were treaty-resident in Canada during the Canadian period.

The advisers overlooked that the Canada/UK DTA applied a *mutual agreement* tie-breaker rule, not the (former) OECD Model POEM tie-breaker. CRA and HMRC agreed that the trust should be treaty-resident in the UK during the Canadian period, so DT relief did not apply.

The only surprise is that it took until 2013 for the two authorities to reach that decision (the reason for the decade delay is not given); and that (for limitation purposes) the Court considered that the loss from the adviser’s negligence only arose in 2013, so the negligence claim was not out of time. I would have thought that the authorities’ decision on treaty-residence was inevitable from the outset, and so the loss arose in 2001.<sup>72</sup>

---

<sup>72</sup> *Evans v PricewaterhouseCoopers* [2019] EWCH 1505 (Ch). I mention this case only for illustration: The actual decision concerned limitation issues which are outside the scope of this work, and the facts are not likely to recur.

The moral of the story is that advisers should read the treaty, and not assume it follows OECD Model form.

### 8.19 POEM tie-breaker

Until 2017, art 4(3) OECD Model provided:

*Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States, then it shall be deemed to be a resident only of the State in which its place of effective management is situated.*<sup>73</sup>

The majority of UK DTAs originally had this form. Under the BEPS MLA it is replaced by the mutual agreement tie-breaker, but it will be some time before the POEM tie-breaker is wholly obsolete.

The mutual agreement tie-breaker still refers to POEM as a relevant consideration. Where POEM is clear it should be an important consideration; but where POEM is unclear, or marginal, it will not.

#### 8.19.1 *One place of effective management*

Pre-2017 the OECD Commentary provided:

*24. ... An entity may have more than one place of management, but it can have only one place of effective management at any one time.*<sup>74</sup>

That makes sense in the context of a POEM tie-breaker clause. In practice it would be unusual that the management would be so decentralised that a court is unable to identify one place as that of effective management, so the issue is not likely to arise.

#### 8.19.2 *POEM: Top level management*

Pre-2017 OECD Commentary provided:

---

<sup>73</sup> See Avery Jones, “Place of Effective Management as Residence Tie-Breaker” (2005) 59 Bulletin for International Fiscal Documentation 1, 20; Avery Jones, “2008 OECD Model: Place of Effective Management- What can we learn from the History?” (2009) 63 Bulletin for International Taxation 183.

<sup>74</sup> The point is made in *Oceanic Trust Co Ltd v Commissioner for South African Revenue Service* (2011) 15 ITLR 172 at [54] cited in *Lee v HMRC* [2017] UKFTT 279 (TC) at [61].

24. ... *The place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business as a whole are in substance made.*<sup>75</sup>

This has often been cited and adopted in UK cases, as one would expect.

In *Wensleydale's Settlement Trustees*:

The place of effective management is where the shots are called, to adopt a vivid transatlantic colloquialism.<sup>76</sup>

The slang may be a vivid metaphor, but it hinders clarity of thought:

[Counsel for the taxpayer] warned about adopting alternative paraphrases such as “calling the shots” because in a way shareholders called the shots but this was not a relevant type of control.<sup>77</sup>

It is better to refer to the place where the most important decisions are made, which allows focus on the issue of what constitute the most important questions. Thus in *Lee v HMRC*:

the essential question is, where were the most important decisions relating to the governance, or management, of the Settlements taken? The first step in the enquiry, as it seems to me, is to identify what were the most important decisions.<sup>78</sup>

The UN Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries 2019 provides:<sup>79</sup>

215. There was uncertainty, however, concerning the meaning of “place of effective management”.

[1] Some countries considered that this referred to a place, such as the headquarters of a company, where an entity was managed on a day-to-day basis

[2] while other countries considered that this referred to the place where the most senior person or groups of persons (such as the board of directors of a company) reached their decisions.

75 The passage continues: “All relevant facts and circumstances must be examined to determine the place of effective management.” But that is self-evident.

76 [1996] STC (SCD) 241 at p 250j.

77 *HMRC v Smallwood* [2008] UKSPC SPC00669 at [114].

78 [2017] UKFTT 279 (TC) at [74].

79 <https://www.un.org/development/desa/financing/sites/www.un.org.development.de.sa.financing/files/2020-03/manual-bilateral-tax-treaties-update-2019.pdf>

The UK is clearly in group [2], and I find it hard to see how the approach of group [1] (“day-to-day management”) could be reconciled with the OECD guidance (“key decisions”).

### 8.19.3 *POEM: Real management*

There are, inevitably, references to “real” effective management. In *HMRC v Smallwood*:<sup>80</sup>

We believe ‘effective’ should be understood in the sense of the French ‘effective’ (*siège de direction effective*) which connotes real, French being the other official version of the [OECD] model, though not of the [Mauritius/UK] treaty.

And similarly:

we adopt [counsel’s] reference to “realistic, positive management.”<sup>81</sup>

This does not take matters much further. The word “real” never does<sup>82</sup> and “realistic” is even worse.<sup>83</sup>

### 8.19.4 *POEM/CMC compared*

The former ITH provided:

**ITH348 Company residence: proposed new test: place/effective management**

... At one time the view of the UK was that our domestic concept of central management and control meant the same thing as place of effective management and there was a note to this effect in the Commentary on the 1977 OECD Model Double Taxation Convention. We no longer believe that necessarily to be so and the note does not appear in the 1992 edition of the OECD Model.

The place of effective management is generally understood to be the place where the Head Office is: the Head Office in the sense of - not the registered office - but the central directing source. The place where one would expect to find the finance director, for

---

80 [2008] UKSPC SPC00669 at [102] approved [2010] EWCA Civ 778 at [60].

81 *HMRC v Smallwood* [2010] EWCA Civ 778 at [114] referring to *Wood v Holden* [2006] EWCA Civ 26 at [6].

82 See App.6.1 (What do we mean by “Real”?).

83 See App.6.6 (Realistic view of facts).

example, the sales director and, if there is one, the managing director. The company records would normally be found there together with the senior administrative staff.

If that Head Office were to be, let us say, in the Netherlands the place of effective management would not be altered if the directors chose to hold their occasional formal meetings in Belgium. Many other countries have a management type test of residence (as well as an incorporation type test). We think our revised idea of effective management and the attempted 1981 definition<sup>84</sup> are nearer at least to our European Community partners' management tests than is central management and control. Nevertheless it is not that easy to divorce effective management from central management and control and in the vast majority of cases they will be located in the same place.

SP 1/90 also refers to the pre-1992 OECD Commentary and continues:

22... It is now considered that effective management may, in some cases, be found at a place different from the place of central management and control. This could happen, for example, where a company is

[1]run by executives based abroad, but

[2]the final directing power rests with non-executive directors who meet in the UK.

In such circumstances the company's place of effective management might well be abroad but, depending on the precise powers of the non-executive directors, it might be centrally managed and controlled (and therefore resident) in the UK.

In *HMRC v Smallwood*:

[In] *Wood v Holden* ... Chadwick LJ expressed the view that it was difficult to draw any meaningful distinction between the two tests [POEM, and central management and control] but that even if they did in fact differ in substance, they were unlikely to lead to different results.<sup>85</sup>

---

84 See 7.23 (Company residence: Critique).

85 [2010] EWCA Civ 778 at [58].

It is considered that the difference (if any) between top level control (CMC), and key management decisions (POEM) is one of almost imperceptible nuance; what matters is that both stress “top level” or “key supervision” and neither are concerned with day-to-day management. So there never has been a case where CMC and POEM were in different places, and it is safe to say that there never will be.

There might be a difference that there can only be one POEM, but there could be two or more places of CMC. In *HMRC v Smallwood* the Special Commissioners say:

There was thus some debate about whether, or to what extent, POEM differed from CMC [central management and control]. We consider that this misses the point; the two concepts serve entirely different purposes. CMC determines whether a company is resident in the UK or not; POEM is a tie-breaker the purpose of which is to resolve cases of dual residence by determining in which of two states it is to be found. CMC is essentially a one-country test; the purpose is not to decide where residence is situated, but whether or not it is situated in the UK...

POEM, on the other hand, must be concerned with what happens in both states since its purpose is to resolve residence under domestic law in both states, caused for whatever reason, which could include incorporation in one state and management in the other, or different meanings of management applied in each state, or different interpretations of the same meaning of management applied in each state, or divided management. One must necessarily weigh up what happens in both states and ... decide in which state the place of effective management is found.<sup>86</sup>

But this is only theoretical, because in practice dual residence (CMC in two places or in none) does not arise.<sup>87</sup>

In practice, POEM cases and guidance refer extensively to CMC case law.

### 8.19.5 *Period for enquiry into POEM*

---

<sup>86</sup> [2008] UKSPC SPC00669 at [111]-[112]. This case concerned a trust, but the same applies to a company: *Laerstate BV v HMRC* [2009] UKFTT 209 at [48]. See Avery Jones, “The Definition of Company Residence in Early UK Tax Treaties” [2008] BTR 556.

<sup>87</sup> See 7.16 (Dual residence/no CMC).

While one needs to determine whether a person is treaty-resident at a particular moment, one looks over an appropriate period of time to determine POEM.<sup>88</sup> The issue is where key management and commercial decisions are regularly and predominately made.

#### 8.19.6 POEM: Round the World scheme

*HMRC v Smallwood*<sup>89</sup> concerned a Round the World scheme. A trust had three different trustees, resident in different states, in the course of the tax year 2000/01:

Apr - Dec: a Jersey resident trustee

Dec - March: a Mauritius resident trustee (“the Mauritian period”)

March onwards: two UK resident trustees

It was necessary to apply the tie-breaker test.<sup>90</sup>

As there is (more or less) no difference between CMC/POEM, the same distinction should drawn between influence and usurpation/rubber stamping, which is discussed in CMC cases.<sup>91</sup>

Patten LJ (dissenting) adopted the traditional usurpation test:

the question [is]

[1] whether the effective decision by [the Mauritian trustee] to implement the tax scheme and to sell the shares was taken by the board of directors of that company, albeit on the advice and at the request of KPMG Bristol, or

[2] whether the [trustees] effectively ceded any discretion in the matter to KPMG by agreeing to act in accordance with their instructions.

---

88 This is self-evident, but if authority is needed, see *HMRC v Smallwood* [2010] EWCA Civ 778 at [47]:

“Both sides approached [the POEM] issue by reference to what the Special Commissioners described as the Mauritius period: i.e. the period up to and including the sale of the shares during which [the Mauritian trustee] remained the trustee. This was on the basis that it is in respect of the Mauritius period that the trustees are chargeable to tax in both Contracting States.”

Contrast 8.16 (Period of enquiry: Tie-breaker).

89 *HMRC v Smallwood* [2010] EWCA Civ 778.

90 See 8.9.3 (Trust residence moves in tax year).

91 Eg, South African Interpretation Note: No. 6 (Issue 2) (2015)

[http://www.sars.gov.za/AllDocs/LegalDoclib/Notes/LAPD-IntR-IN-2012-06%20-%20IN%206%20Resident%20-%20Place%20of%20effective%20management%20\(companies\).pdf](http://www.sars.gov.za/AllDocs/LegalDoclib/Notes/LAPD-IntR-IN-2012-06%20-%20IN%206%20Resident%20-%20Place%20of%20effective%20management%20(companies).pdf) For this case law, see 7.6 (Central management/control test) ff.

Given that the directors of [the trustee] remained in place and exercised their powers as directors to effect the sale, the approach to this issue suggested by Chadwick LJ in *Wood v Holden* must be the right test.

Applying this test:

... the Special Commissioners ... accepted ... that there was no agreement that [the Mauritian trustees] would behave in a certain way or make certain decisions as a quid pro quo for the introduction of the trust and that had the sale of the shares not been in the interests of the beneficiaries as at the date of the sale then [the trustee] would not have agreed to sell.

... [the trustees] accepted the advice of KPMG to proceed with and implement the scheme in the interests of the beneficiaries. But they retained their right and duties as trustees to consider the matter at the time of alienation and did not ... agree merely to act on the instructions which they received from KPMG.

The function of the directors was not therefore usurped in the sense described in *Wood v Holden*. It seems to me to follow that the Special Commissioners' conclusions are not ones which were therefore open to them on the evidence or on the findings of fact which they made.

But the majority reached the opposite conclusion:

If the question were the POEM of the particular trust company trustee for the time being at the moment of disposal, namely [the Mauritian trustee], then it may (?) be that the reasoning in *Wood v Holden* would justify the conclusion that the Commissioners fell into this kind of error. ... their findings do not go so far as findings that the functions of [the Mauritian trustee] were wholly usurped, and I agree that *Wood v Holden* reminds us that special vehicle companies (or, no doubt, special vehicle boards of trustees) which undertake very limited activities are not necessarily shorn of independent existence; indeed they would be ineffective for the purpose devised if they were.

So far, so conventional.

But it seems to me that to apply this reasoning to the present case is to ask the wrong question, and indeed to return to the rejected snapshot approach. The taxpayers with whom we are concerned ... are the trustees. Trustees are ... treated as a continuing body...

On the primary facts which the Special Commissioners found at paragraphs 136-145, which are set out in the judgment of Patten LJ, I

do not think that it is possible to say that they were not entitled to find that the POEM of the trust was in the UK in the fiscal year in question.

The Court then explains why:

The scheme was devised in the UK by Mr Smallwood on the advice of KPMG Bristol. The steps taken in the scheme were carefully orchestrated throughout from the UK, both by KPMG and by Quilter. And it was integral to the scheme that the trust should be exported to Mauritius for a brief temporary period only and then be returned, within the fiscal year, to the UK, which occurred. Mr Smallwood remained throughout in the UK. There was a scheme of management of this trust which went above and beyond the day to day management exercised by the trustees for the time being, and the control of it was located in the UK.<sup>92</sup>

It seems to me that various arguments are hinted at here.

The first is that one determines POEM on the basis of a whole year and not on the basis of the “brief temporary” Mauritian period (in fact, 2½ months). But that cannot be right.<sup>93</sup>

The second rejects the usurpation test. But the majority actually said that they were not doing this.

One falls back on the argument that the Special Commissioners were entitled to find as a fact that discretion of the Mauritian trustee was usurped. On that basis *Smallwood* depends on its facts; and that is the analysis adopted in *Haworth, R (oao) v HMRC*:<sup>94</sup>

Hughes LJ did not decide that it was an inevitable consequence of a scheme which shared the *Smallwood* pointers<sup>95</sup> that its POEM would

---

92 *HMRC v Smallwood* [2010] EWCA Civ 778 at [70].

93 See 8.19.5 (Period for enquiry into POEM).

94 [2021] UKSC 25 at [75].

95 Seven “*Smallwood* pointers” were identified at [31]:

- 1 The tie-breaker test in the applicable DTT was the (then) standard POEM wording.
- 2 The taxpayer was UK resident.
- 3 The scheme or arrangements had been devised in the UK.
- 4 The steps taken in the scheme were carefully orchestrated throughout from the UK.
- 5 The trust was exported to the overseas territory for a brief period only.
- 6 The trust returned to the UK in the tax year.
- 7 The arrangements were implemented in a way which integrated these features. (Point 7 does not seem to add much to points 1-6, but it does not matter).

In practice a Round the World scheme would (almost) always meet these pointers.

be the UK and not Mauritius. All the members of the Court of Appeal accepted that the test was that set out in the Commentary ... that “no definitive rule can be given and all relevant facts and circumstances must be examined to determine the place of effective management”. Although Hughes LJ summarised the findings of the Special Commissioners in para 70 of his judgment, he was not, in my view, listing those pointers as being necessary and sufficient to establish in any other case that the POEM of the trust is the UK. On the contrary, he referred to the full description of the primary facts found by the Special Commissioners as set out in the judgement of Patten LJ as supporting their finding that in Mr Smallwood’s case, the POEM of their trust had been the UK.

The reader may think the dissenting decision of Patten LJ is more convincing, but so far as the outcome depended on its facts, rather than a point of law, it does not matter - at least, as a matter of strict law. A legal realist may think that *Smallwood* is one of those cases where decision came first and grounds later, and may suspect that the same may apply elsewhere.

The reader can draw the conclusion that a Round the World scheme, and any avoidance scheme requiring short term residence in a treaty state, needs meticulous care in execution if it is not to fail on factual POEM grounds.

#### 8.19.7 *POEM of trust*

POEM is the tie-breaker for trusts and PRs, as well as for companies, even if the trustees are individuals.<sup>96</sup>

The test of POEM of a trust is the same as for a company, though the approach and terminology used requires adaptation to reflect trust structures.

HMRC agree. The International Manual provides:

**INTM353600. Claims by trustees in Ireland [Mar 2016]**

...

***Criteria for determining the place of effective management of an Irish trust***

You need to find out who generally controls and supervises the work of administering the trust. By administering the trust we mean: keeping

---

<sup>96</sup> See 8.21 (Treaty-residence: Trusts).

accounts, conducting correspondence, arranging the trustees' meetings and putting the trustees' decisions into effect.

***If the trustees are all individuals***

You will need to find out which of the trustees is responsible for the tasks outlined above, and the dates and locations of all trustees' meetings held during the period of the claim.

***If a professional body acts as a trustee***

You can accept that the place of business of the professional body is the place of effective management of the trust.

For this purpose the professional body is appointed by the testator or settlor of the trust, and does not include:

- An individual who is a solicitor or an accountant
- An agent or an attorney administrator appointed by the trustees

***Residence of a professional body***

If a professional body acting as a trustee is a branch in Ireland of a UK bank or similar institution, it is considered to be in Ireland for the purposes of Article 4(3). A UK branch of an Irish bank would however not be considered to be in Ireland.

This is commenting on the Ireland/UK DTA but the same should apply generally as that follows OECD Model.

### 8.19.8 *Trust Fund CMC in Australia*

The Australian Revenue have given guidance on “central management and control” of a superannuation fund (which is a trust) and it is considered this is also helpful to the concept of POEM of a trust. I only set out selections here:<sup>97</sup>

***Meaning of ‘central management and control’ in the context of a superannuation fund***

111. ... the question arises as to whether the CM&C test that is applied to companies can also be applied to determine the meaning of CM&C as it relates to superannuation funds.<sup>98</sup>

---

97 Taxation Ruling TR 2008/9, “Income tax: meaning of ‘Australian superannuation fund’ in subsection 295-95(2) of the Income Tax Assessment Act 1997” <http://law.ato.gov.au/atolaw/view.htm?locid=%27PAC/19970038/295-95%282%29%27&PiT=99991231235958#295-95%282%29>

Some footnotes are omitted.

98 For the CM&C test for companies see TR 2018/5 discussed at 7.1 (Company residence: Introduction).

... despite differences between the kinds of activities a company may undertake and those of a superannuation fund, we consider that an analogy can be drawn between the business activities of a company and the activities of a superannuation fund in that the activities of a superannuation fund, like the business activities of a company, require personal control and direction. Accordingly, we consider that the principles established in cases dealing with the operation of the CM&C test in relation to companies are capable of application to determine the meaning of CM&C as it relates to superannuation funds....

115. Like companies, determining the CM&C of a superannuation fund involves a focus on the who, when and where of the strategic and high level decision making of the fund.

116. In the context of the operations of a superannuation fund, the strategic and high level decision making of the fund includes the performance of the following duties and activities:

- formulating the investment strategy for the fund;
- reviewing and updating or altering the investment strategy of the fund as well as monitoring and reviewing the performance of the fund's investments;
- if the fund has reserves - the formulation of a strategy for their prudential management; and
- determining how the assets of the fund are used to fund member benefits, for example the decision to segregate certain fund assets to support superannuation income stream benefits.

117. The other principal areas of operation of a superannuation fund that form part of the day-to-day or operational side of the fund's activities will not constitute CM&C. These activities do not form part of the CM&C of the fund because they are not of a strategic or high level nature. Rather, these activities are of a more formalistic or administrative nature. Examples of such activities include the acceptance of contributions that are made on a regular basis, the actual investment of the fund's assets, the fulfilment of administrative duties<sup>99</sup> and the preservation, payment and portability of benefits.

118. Furthermore, in accepting such contributions, paying benefits and in the fulfilment of administrative obligations, the prudential requirements in SISA, the governing rules of the fund and other legislative requirements are merely being complied with. As emphasised by the courts in the context of companies, compliance with statutory requirements is not, of itself, sufficient to constitute CM&C but rather is a matter to be taken into account in determining where the CM&C is located...

***Who exercises the CM&C of the fund?***

119. As mentioned above, the majority of superannuation funds operate under a trust structure. According to the general law of trusts, a trust is not a legal person but rather is a collection of rights, duties and powers arising from the relationship to property held by the trustee for the benefit of beneficiaries. Therefore, the trustee is the legal person to that relationship. Since the legal responsibility for operating and managing the fund, including the responsibility for performing the high level duties and actions mentioned in paragraph 116 of this Ruling rests solely with the trustee, it is the trustee of the fund who has the legal obligation for exercising the CM&C of a fund.

---

99 Footnote original: Such as lodging the regulatory and income tax return for the fund, the preparation of financial statements, the audit of the fund and record-keeping.

122. ... the trustee's duty or responsibility to carry out or perform those activities that constitute CM&C does not, of itself, amount to CM&C. It is only by performing those high level duties and activities that the trustee will be exercising the CM&C in practice. There also may be situations where a person other than the trustee is exercising the CM&C of the fund...

***Delegation of the investment management function***

128. The trustee of a superannuation fund will often appoint an investment manager to invest the assets of the fund, consistent with the investment strategy of the fund, on behalf of the trustee. Importantly, the investment manager is subject to a prudential requirement under SISA to periodically provide information to the trustee of the fund regarding the making of, and return on those investments and to provide such information as is necessary to enable the trustee to assess the capability of the investment manager to manage the investments of the fund.

129. The delegation of the investment management function to an investment manager does not mean however that the investment manager is exercising the CM&C of the fund in any sense. This is because the trustee is still controlling the operations of the fund by ensuring that the investments of the fund are consistent with the investment strategy of the fund and by monitoring and evaluating the performance of the investment manager. Further, the actions of the investment manager in investing the assets of the fund in accordance with the fund's investment strategy comprise part of the day-to-day or 'operational' side of the operations of the fund rather than the strategic or high level decision making activities of the fund...

## **8.20 POEM: Critique**

The POEM tie-breaker test has arisen in tax avoidance cases. I refer to these as "POEM avoidance cases". Examples are *Wensleydale* and *Smallwood*.

### **8.20.1 *Ascertaining POEM in avoidance cases***

The reader may think that an unspoken policy of defeating tax avoidance has in practice been a factor in determining the result in POEM avoidance cases.

The policy is not wholly "unspoken". OECD Commentary provides:

24.5 Some States, however, consider that it is preferable to deal with cases of dual residence of entities through the rule based on the "place of effective management" that was included in the Convention before 2017. *These States also consider that this rule can be interpreted in a way that prevents it from being abused.*

### **8.20.2 *Abolition of POEM to counter avoidance***

As early as 1978 some UK DTAs contained a mutual agreement tie-breaker.<sup>100</sup> The 2008 Update to the OECD Model Tax Convention offered the mutual agreement tie-breaker as an alternative to POEM.<sup>101</sup> However a POEM tie-breaker remained the norm until 2017.<sup>102</sup>

OECD report BEPS Action 6 explains the background to the change from POEM to mutual agreement tie-breaker:<sup>103</sup>

... a company is a dual-resident often involve tax avoidance arrangements. For that reason, the current rule found in Article 4(3) should be replaced by the [Mutual agreement tie-breaker], which allows a case-by-case solution of these cases.

OECD Commentary provides:

22. When [art 4(3)] was first drafted, it was considered that it would not be an adequate solution to attach importance to a purely formal criterion like registration and preference was given to a rule based on the place of effective management, which was intended to be based on the place where the company, etc. was actually managed.

23. In 2017, however, the Committee on Fiscal Affairs recognised that although situations of double residence of entities other than individuals were relatively rare, there had been a number of tax-avoidance cases involving dual resident companies. It therefore concluded that a better solution to the issue of dual residence of entities other than individuals was to deal with such situations on a case-by-case basis.

Was this a good reason? Certainly, Round the World schemes such as *Smallwood* were not uncommon, but that could have been dealt with by more targeted legislation. How often did this problem arise elsewhere? OECD Model Commentary refers to “a number of tax-avoidance cases”. OECD report BEPS Action 6 went further and said that dual-resident companies *often* involve tax avoidance arrangements. Some readers may think that “often” was an exaggeration. But it is hard to say.

---

100 Eg the Canada/UK DTA (1978). Netherlands/UK DTA (2008 art 4(4) roughly follows the OECD wording but has an exception, not considered here, for listed companies.

101 The report refers to art 4 commentary, para 24, 24.1; see 8.18 (Tie-breaker: Mutual agreement).

102 See 8.19 (POEM tie-breaker).

103 OECD/G20 “Preventing the Granting of Treaty Benefits in Appropriate Circumstances” (BEPS Action 6); (2015), p.72.

Did the problem of avoidance justify the substantial increase in Revenue power conferred by a mutual agreement tie-breaker? Or could it be justified by the advantage that we will no longer have unsatisfactory POEM case law? Perhaps there is now less uncertainty than before?<sup>104</sup> Discuss.

### 8.20.3 *Modern business practice*

Van der Merwe identifies other difficulties with CMC:

... the phrase was coined when companies were generally organised in a hierarchical structure and management could be located at a specific point within a certain period of time. However, modern companies are increasingly run and managed divisionally rather than through the legal entities in which the divisions are formed. This has resulted in an organisational network spread across different countries.

The second point is perhaps more serious:

Also, due to modern technology, management has become much more mobile and traditional places of effective management may rotate. Technology has furthermore made it possible to manage without the need for a group of persons to be physically located or to meet in one place, for instance at the company's headquarters. Because of these changed management structures and technology, effective management based on where the directors meet becomes a matter of choice and manipulation. Even when based on a wider interpretation of key management and decision making, it is evident that technology makes it difficult to pin effective management down to one constant location...<sup>105</sup>

These difficulties were not cited as the driver for the change from POEM to mutual agreement tie-breaker, but perhaps they might have been.

The reader may think that this discussion of the merits of the MLI change is of academic interest only. The mutual agreement tie-breaker is now settled law. But exactly the same considerations arise in relation to the central management and control test of company residence. Here, however, it has not (yet?) been suggested that CMC should be replaced by a HMRC discretion to determine corporate residence.

---

104 See 49.48.2 (Avoidance concepts defended).

105 Van der Merwe, "The Phrase 'place of effective management': Effectively Explained?" 18 SA Merc LJ 121 at p.124-125.

## 8.21 Treaty-residence: Trusts

The first step is to identify who is the “person” for treaty purposes.<sup>106</sup>

### 8.21.1 Trust law background

The use of the word “person” always requires some care.<sup>107</sup>

Three propositions are well established:

- (1) A trust is not a person (ie does not have legal personality). This is the case in the trust law of England, Scotland,<sup>108</sup> and, as far as I know, all common law jurisdictions.<sup>109</sup> (In other jurisdictions, trusts or trust-like entities generally do have legal personality.)
- (2) A trustee is a person.
- (3) It is often convenient to distinguish:
  - (a) a person acting in their capacity as trustee and
  - (b) that person acting in their private capacity.

However trust law does not usually recognise the concept of separate personality: as there is only one person, the person acting in one capacity is not a different person from the person acting in another capacity. For instance, a person (as trustee) cannot enter into a contract with himself or herself (in a private capacity, ie as an

---

<sup>106</sup> See 8.4 (Treaty-person).

<sup>107</sup> See App.2.9 (Person).

<sup>108</sup> The Scottish Law Commission discussed but rejected a proposal to give trusts legal personality: *Discussion Paper on the Nature and the Constitution of Trusts* (2006) para 2.29-2.45 [https://www.scotlawcom.gov.uk/download\\_file/view/128](https://www.scotlawcom.gov.uk/download_file/view/128)

<sup>109</sup> Though a trust is close to being a person. Gretton, “Trusts Without Equity” (2000) 49 ICLQ 599 reprinted in Valsan (ed), *Trusts and Patrimonies* (2015) chap 5: “In ordinary language the noun ‘trust’ is a person word. Idiom treats it like ‘company’. ‘This land is owned by a trust.’ ‘These shares are held by a trust’. ... ‘The trust is liable for this debt.’ Ordinary language is right.”

So one should not rule out the possibility that context may show that the word “person” is used (loosely rather than strictly) to mean or include a trust.

individual) because of the rule in English law<sup>110</sup> that a contract must be made between distinct persons.<sup>111</sup>

---

110 The contract law position may be different in Scotland: McBryde, *The Law of Contract in Scotland*, (3<sup>rd</sup> ed, 2007) para. 3-05 n.11: “A [person] might contract with himself under a different title, e.g. as an individual and as an executor”. But the trust law rule is the same. See *Shenken v Phoenix Life* [2015] CSOH 96 at [24]: “From the perspective of [Phoenix Life] as debtor under the policy, Mr Schwartz was a single, indivisible, legal person. Either he had title, as a matter of law, to receive the policy proceeds or he did not. If he had had title ... then it would not have mattered, in my view, if he had purported to claim payment in the wrong capacity; the defenders would still have paid the correct person and their liability would have been extinguished.”

111 Discussion of the topic demands reference to *The Mikado*:

**Ko-Ko.** Pooh-Bah, it seems that the festivities in connection with my approaching marriage must last a week. I should like to do it handsomely, and I want to consult you as to the amount I ought to spend upon them.

**Pooh-Bah.** Certainly. In which of my capacities? As First Lord of the Treasury, Lord Chamberlain, Attorney General, Chancellor of the Exchequer, Privy Purse, or Private Secretary?

**Ko-Ko.** Suppose we say as Private Secretary.

**Pooh-Bah.** Speaking as your Private Secretary, I should say that, as the city will have to pay for it, don't stint yourself, do it well.

**Ko-Ko.** Exactly – as the city will have to pay for it. That is your advice.

**Pooh-Bah.** As Private Secretary. Of course you will understand that, as Chancellor of the Exchequer, I am bound to see that due economy is observed.

**Ko-Ko.** Oh! But you said just now “Don't stint yourself, do it well”.

**Pooh-Bah.** As Private Secretary.

**Ko-Ko.** And now you say that due economy must be observed.

**Pooh-Bah.** As Chancellor of the Exchequer.

**Ko-Ko.** I see. Come over here, where the Chancellor can't hear us. Now, as my Solicitor, how do you advise me to deal with this difficulty?

**Pooh-Bah.** Oh, as your Solicitor, I should have no hesitation in saying “Chance it”

**Ko-Ko.** Thank you. I will.

**Pooh-Bah.** If it were not that, as Lord Chief Justice, I am bound to see that the law isn't violated.

**Ko-Ko.** I see. Come over here where the Chief Justice can't hear us. Now, then, as First Lord of the Treasury?

**Pooh-Bah.** Of course, as First Lord of the Treasury, I could propose a special vote that would cover all expenses, if it were not that, as Leader of the Opposition, it would be my duty to resist it, tooth and nail. Or, as Paymaster General, I could so cook the accounts that, as Lord High Auditor, I should never discover the fraud. But then, as Archbishop of Titipu, it would be my duty to denounce my dishonesty and give myself into my own custody as first Commissioner of Police.

One might say that the source of difficulty is not the rule that a trust is not a person: it is the rule that a trustee does not have a separate personality. But perhaps that comes to the same thing. However that may be, this rule (or its consequences) can be overridden by context. Despite that rule, references in legislation to “individuals” have always been understood to exclude trustees even if the trustees are individuals in their private capacity. Likewise, references to “trustees” exclude individuals. That usage takes us towards some concept of separate personality. Further, for IT/CGT purposes, a trustee is deemed to be a distinct, notional person.<sup>112</sup> So in an IT/CGT context, at least, rule (3) does not apply: the person acting as trustee *is* in principle regarded as a separate person from the same person acting in their private capacity.

### 8.21.2 Trustees under OECD Model

One would expect:

- (1) Trustees (if more than one) to be treated as one person (“a trustee-person”). That avoids the difficulty which otherwise arises if a trust has trustees resident in different places in their private capacities.
- (2) Where there is a single trustee, that person is to be treated as a person (again, I use the expression “trustee-person”) who is distinct from the individual or company who is the trustee, acting in their private capacity. That allows for the possibility that the person may be treaty-resident in one state in their private capacity and treaty-resident in another state in their trustee capacity.

Is there any difficulty in reading the model treaty to reach this result? Where there is more than one trustee, there is no difficulty at all: the trustees should be regarded as a body of persons (and so constitute one person) for treaty purposes. That trustee-person is necessarily distinct from the persons who act as trustees.

Where there is a sole trustee, it should still be regarded as a person distinct from the person who is actually the trustee in their private capacity. It would be odd to have one rule for a sole trustee and another where there is more than one trustee. One way to reach this result is to say that even a sole trustee is a “body of persons”. A single person constitutes

---

**Ko-Ko.** That’s extremely awkward.

112 See 6.3 (Trustees a distinct person).

a body of persons, because the current trustee together with successors and predecessors constitute the “body”. A corporation sole may be an example.

Another way to reach this result is to say that “person” is to be understood by reference to domestic tax law, domestic IT/CGT law treats the trustee as a separate person, despite the trust law rule to the contrary; and so the same rule applies for treaty purposes.

The trustee-person is not an individual, so in a tie-breaker case, its treaty-residence is decided by the POEM rule, not the rule for individuals (which would obviously not be appropriate).

Another possible analysis would be that the *trust* is a person for OECD Model purposes (a treaty-person). There are two difficulties with that:

- (1) A trust is not a “person” in English law.
- (2) Even if the trust were a treaty-person, it is only treaty-resident in a treaty state under art 4(1) if it is a person “liable to tax.” Whether a person is liable to tax is a matter of domestic law. In UK law, it is the trustees rather than trust which is liable to tax.

These arguments are not insuperable: since treaties can be loosely construed, there are no words from which there is no escape. One could say that a trust is a treaty-person even though not a person in English law; and that the trust is “liable to tax” (in the treaty sense) since the trust fund will bear the tax. But there is no need to take this high-handed course, as to regard the trustee or trustees as a distinct trustee-person is the simpler and more satisfactory solution.<sup>113</sup>

INT Manual provides:

**162120. Certificates of Residence: for trusts** [May 2019]

Trusts are not themselves liable to tax in the UK, but the trustees may be liable to tax in the UK. A trust therefore cannot be a resident of the UK for the purposes of most UK DTAs. Accordingly a Certificate of Residence (CoR) cannot normally be issued in respect of a trust...

Trustees as a body (rather than the trust) are regarded as a single person. Where the trustees as a body are regarded as resident in the UK

---

113 It has been suggested that the question whether the person for the purposes of OECD Model is the trustees (as a body) or the trust is purely theoretical; it makes no difference in practice. I have some sympathy with that view. But (1) it is always good to know what one is talking about; (2) HMRC need to know what name(s) to put on a residence certificate: the trust or the trustee(s).

they will be entitled to the benefits of a DTA as they are liable to tax in the UK in respect of the income of the trust. Subject to the comments in the next paragraph a CoR can be issued in respect of a UK resident body of trustees.

Similarly, the TSE Manual provides:

**TSEM10035 residence rules: dual resident trusts** [Aug 2019]

Trusts may be resident in the UK under UK tax law, and also resident for the same period in another country under that country's rules - if so, they are dual resident.

If there is a Double Taxation Agreement with another country, it may have a 'tie breaker' provision. A tie breaker makes the trust a resident of one of the countries but this is only for the purposes of applying the provisions of the Double Taxation Agreement. The rules for determining 'residence' for the purposes of a Double Taxation Agreement can be complex. For trusts, the provisions look at where the effective management of the trust is situated.

If it is 'dual resident' the trust may be able to claim the exemption and reliefs from UK tax granted to residents of that other country.

Refer any case in which a trust claims to be dual resident for a particular year to Trusts & Estates Nottingham.

While it is possible that a foreign law might look at the matter differently, it would be desirable if possible for countries to adopt the same approach, and in practice this seems generally to be the case. But a trust in Mauritius was found to be a person.<sup>114</sup>

The same would apply to the estate of a deceased person.

### 8.21.3 Trusts: Non OECD Model DTAs

INT Manual provides:

**162120. Certificates of Residence: for trusts** [May 2019]

... However, some trusts are included within the definition of 'resident of a Contracting State' in specific DTAs. In those limited circumstances a certificate of residence can be issued in respect of a trust. It is therefore essential that the relevant DTA is checked on receipt of all applications.

---

114 *Lee v HMRC* [2017] UKFTT 279 (TC) at [87]. For the consequences, see 103.21.2 (Third-party DT relief).

An example is art 3(1) of the UK/US DTA which provides:

For the purposes of this Convention, unless the context otherwise requires—

- (a) the term “person” includes an individual, an estate, a trust, a partnership, a company, and any other body of persons;

Thus a trust is a person under this DTA.

## 8.22 Treaty-residence: Partnerships

This section considers whether a partnership is a treaty-resident of a state. For other DT issues see 8.2.24 (DT relief for partnership).

### 8.22.1 *Partnership a treaty-person*

The first question is whether a partnership is a treaty-person, ie a person for treaty purposes.<sup>115</sup> Before turning to the OECD Model definition, one might expect a partnership to be a treaty-person, since:

- (1) It avoids difficulty which would arise if a partnership had partners who were resident in different places in their private capacity.
- (2) It avoids an undesirable distinction between English partnerships (which are not legal persons in the English law sense) and Scottish partnerships (which are).
- (3) “It is highly improbable that so common a vehicle for commercial activity as a partnership should have been intended to be excluded” from a DTA.<sup>116</sup>

Article 3.1(a) OECD Model provides:

1. For the purposes of this Convention, unless the context otherwise requires:

- a) the term “person” includes an individual, a company and any other body of persons;

There are three bases for arguing that a partnership is a treaty-person ie within this definition:

- (1) A partnership is a body of persons, and so within the definition (the “body of persons” argument).

---

<sup>115</sup> See 8.4 (Treaty-person).

<sup>116</sup> *Padmore v IRC* 62 TC 352 at p.377.

- (2) A partnership is a person in the ordinary sense of the expression (the “ordinary person” argument.)
- (3) Partners (being individuals or companies) are persons (in their private capacities) and a partnership is a person because the singular includes the plural (the singular/plural argument).

Discussion is made more difficult because of the variety of wording in different treaties.

The body of persons argument succeeded in *Padmore v IRC*, where a partnership was held to be a person for the purposes of the former Jersey/UK DTA. This was a pre-1963 DTA,<sup>117</sup> and the definition of “person” was not quite OECD Model form:

The term “person” includes any body of persons, *corporate or not corporate*

The court held that a partnership is a body of persons in the ordinary sense of that term. Accordingly it constituted a treaty-person within that definition.

The Revenue argument was a subtle one. They referred to the general rule that undefined treaty terms have domestic tax law meanings<sup>118</sup> and argued:

“Body of persons” ... is a term of art in UK tax law and is defined in [what is now s.989 ITA] as follows:

“ ‘Body of persons’ means any body politic, corporate or collegiate, and any company, fraternity, fellowship and society of persons whether corporate or not corporate”.<sup>119</sup>

The Jersey Law has a provision in the same terms ....<sup>120</sup>

That is, the Revenue argued that (1) a partnership (although a body of persons in the general sense) was not a body of persons in this UK tax law sense and (2) the UK tax law sense applied in the treaty.

117 See 103.24 (Pre-1963 DTAs).

118 The relevant provision of the former Jersey/UK DTA was similar to OECD Model form; see 103.11 (Undefined treaty terms).

119 Section 989 ITA copies the earlier provision verbatim. These terms are now of historical significance only, and it is a pity that the tax law rewrite failed to modernise and simplify this.

120 *Padmore v IRC* 62 TC 352 at p.377.

The court's reason for rejecting the argument at point (2) was equally subtle:

If that [UK tax law] definition [of body of persons] is applicable, a partnership is (I will assume) not within it; because a partnership cannot be brought within any of the groups specified in the definition.<sup>121</sup> ... however ... the [UK tax law] definition is not applicable. The draftsman of the Arrangement in para 2(1)(d) was giving a comprehensive definition of the word "person". If he was assuming that the statutory definition of "body of persons" would apply, I see no reason why he should have added the words "corporate or not corporate". They form part of the Article 2(1)(d) definition itself, and their inclusion had no purpose if the statutory definition applied. I do not think that they can be dismissed as mere tautology. On the face of the Arrangement they are a specific part of what is intended to be a self-contained definition for the purposes of the Arrangement. They are not, it seems to me, consistent with an intention on the part of the draftsman to utilise the statutory definition. They indicate a contrary intention. A partnership is, as a matter of the ordinary use of English, plainly a body of persons, and the language used by the draftsman does not, in my opinion, indicate that he was intending any different meaning.

Unfortunately that reasoning does not apply to OECD Model definition, since that lacks the words "corporate or not corporate."<sup>122</sup> It is however considered that "body of persons" in OECD Model should still be given its ordinary meaning rather than its UK tax meaning. It is relevant to note that the term does not have a UK tax meaning, only an income tax meaning. There is no definition for CGT. Thus a partnership is a body of persons (within the meaning of the OECD Model) and so a treaty-person within the OECD definition.

Avery Jones agrees:<sup>123</sup>

...it is hardly likely that the other State, if it had troubled to ask in the course of negotiations what body of persons meant in UK tax law, would wish to have an 18th century list of bodies govern the interpretation of the treaty. It is therefore not difficult to say that the

---

121 This is supported by s.681DL(7) ITA, which expressly provides that a body of persons includes a partnership.

122 See 8.4.1 (Person: OECD definition).

123 Avery Jones, "Bodies of Persons" [1991] BTR 453 at p.464.

context otherwise requires, and one should include partnerships either within the ordinary meaning of body of persons, or merely by reading the singular as the plural.<sup>124</sup> On the basis a partnership may be included in those cases where wording similar to the 1977 Model is used.<sup>125</sup>

Alternatively one could fall back on the ordinary person or the singular/plural arguments. One difficulty with that is that some treaties provide:

the term “person” *comprises* an individual, a company and any other body of persons;

Others provide:

the term “person” *means* an individual, a company and any other body of persons;

Avery Jones comments:

Normally in modern UK treaties the definition of person is that it *comprises* an individual, a company and any other body of persons, which was the wording of the 1963 model; at first sight this might prevent the ordinary meaning of *person* from being used.<sup>126</sup> The official French version of the Model, however, uses the same word *comprend* in both the 1963 and the 1977 versions. There may therefore be no difference between it and the 1977 Model, which makes it difficult to see why the UK persists in using the 1963 wording. In eight treaties the word *means* is used instead of the Model’s *includes*, in which case the ordinary meaning, in addition to the defined meaning, of person cannot be used. But certainly where *includes* and probably in the light of the French version where *comprises*, is used, the argument that the context includes partnerships under the ordinary meaning of body of persons is still available, as these words are not intended to be comprehensive. It

---

124 Footnote original: This was mentioned as a possibility in *Padmore* [1989] STC 493, 498G but Fox L.J. stated that this was not sufficient for the taxpayer to succeed, as those persons were not all resident in Jersey. It is not clear why persons in partnerships should not be given a single residence under TA 1988, s.112, which the court held to be applicable for the purpose of interpreting the treaty...

125 Footnote original: See art 1 Comm. Paras. 2-6 of the application of OECD Model to partnerships. The UK gives a residence to a partnership: TA 1988, s.112(1).

126 Footnote original: OECD Commentary (art 3 Comm. Para.2), however, stated that the provision was not worded as an exhaustive definition and should be read as indicating that the term person is used in a very wide sense.

is considered that partnerships are so included under that wording, on the basis that they cannot have been intended to be excluded.<sup>127</sup>

It is considered that any of these arguments will suffice, so a partnership is a treaty-person in all treaties, though the precise arguments must vary from one wording to another. OECD Commentary to art 3 supports this view:

Partnerships will also be considered to be “persons”  
[1] either because they fall within the definition of “company”<sup>128</sup>  
[2] or, where this is not the case, because they constitute other bodies of persons.

### 8.22.2 Partnership “liable to tax”

Even though a partnership is a person, it only qualifies as a resident of a treaty state within OECD definition if it is a person liable to tax. Whether a person is liable to tax is a matter of domestic law.

In UK law, it is the partners rather than the partnership which is liable to tax. Partners are of course “persons” in their private capacity. They can be treaty-resident in the UK. It seems that a partnership (though a “person”) cannot be treaty-resident in the UK. A partnership could (depending on the foreign domestic law) be treaty-resident in a foreign state.

INT Manual provides:

**INTM162110 certificates of residence: for partnerships** [Feb 2020]  
UK partnerships (including English and Scottish LPs and UK LLPs) cannot be resident in the UK for the purpose of most of the UK’s DTAs, because they are not themselves liable to tax in the UK. Only in a few limited circumstances, when the DTA specifically states that a partnership can be regarded as resident, such as in the UK/Argentina DTA, will HMRC be able to issue a Certificate of Residence (CoR) in the name of the partnership.

This is correct.

Similarly the OECD Commentary on art 4:

---

127 Avery Jones, “Bodies of Persons” [1991] BTR 453 at p.464.

128 This is not the case for UK partnerships, though it may be for foreign partnerships; see 29.9.4 (“Company” in OECD Model).

8.13 Where a State disregards a partnership for tax purposes and treats it as fiscally transparent, taxing the partners on their share of the partnership income, the partnership itself is not liable to tax and may not, therefore, be considered to be a resident of that State. In that case, however, paragraph 2 of Article 1 clarifies that the Convention will apply to the partnership's income to the extent that the income is treated, or purposes of taxation by that State, as the income of a partner who is a resident of the State ...

OECD, "The Application of the OECD Model Tax Convention to Partnerships" (1999) expands on this:

38. ... In many countries, the tax laws provide that income derived by a partnership from a particular source must be computed at the partnership level as if the partnership were a distinct taxpayer. Each partner is then allocated his share of that income which retains its character and is added to his income for purposes of determining his taxable income. His taxable income, including his share of the partnership's income is then reduced by the personal allowances and deductions to which he is entitled and tax is then determined, assessed and paid at the partner's level. In such cases, it is clear that the partnership is not itself liable to tax.

That is the UK tax system.

39. In other countries, the income and the tax payable is computed in a similar way, but the tax payable by the partners is then aggregated at the level of the partnership which is then assessed for the total amount of the tax. In these cases, the assessment of the tax in the hands of the partnership is a collection technique that does not change the fact that the tax payable on the income of the partnership is determined at each partner's level taking into account the other income of that partner, the personal allowances to which he is entitled and the tax rate applicable to him (which may vary depending on his total income or his nature). In such cases, the partnership is also not liable to tax.

This was the pre-1995 UK tax system.

40. The Committee agreed that for purposes of determining whether a partnership is liable to tax, the real question is whether the amount of tax payable on the partnership income is determined in relation to the personal characteristics of the partners (whether the partners are taxable or not, what other income they have, what are the personal allowances to which they are entitled and what is the tax rate applicable to them).

If the answer to that question is yes, then the partnership should not itself be considered to be liable to tax. The fact that the income is computed at the level of the partnership before being allocated to the partners, that the tax is technically paid by the partnership or that it is assessed on the partnership as described in the preceding paragraph will not change that result.

41. The fact that a partnership may be said to be liable to tax in a State will not, however, be sufficient for it to be considered a resident of that State for purposes of tax conventions. Paragraph 1 of Article 4 also requires that the liability to tax in that State be caused by one of the criteria listed therein (e.g. residence, domicile etc.). Thus, for a partnership to be a resident of a Contracting State, it has to be liable to tax in that State by reason of one of these criteria.<sup>129</sup>

However HMRC do not always apply this view in practice.

### 8.22.3 DT claims in partnership cases

INT Manual provides:

**INTM162110 certificates of residence: for partnerships** [Feb 2020]  
 ... As a result [of fiscal transparency], partnerships are not themselves entitled to claim benefits under most of the UK's DTAs. However, partnerships will usually be able to claim benefits on behalf of those of its partners who are residents of the UK.<sup>130</sup>

---

129 This view was rejected in India: *Linklaters LLP v Income Tax Officer* [2010] ITEL R 245. However in India (unlike the UK) a partnership is treated as a person for income tax purposes: s.2 [India] Income Tax Act 1961.

130 The BI Manual repeats the point in relation to LLPs:

**“BIM82145 Limited Liability Partnership: international aspects** [Apr 2016]

...A UK LLP is not itself liable to tax in the UK as the LLP tax provisions identify other persons (i.e. the members) as the persons who are to be taxed. Accordingly for the purposes of the Double Taxation Agreements (DTAs) the LLP is not regarded as being resident in the UK and cannot itself therefore claim relief from foreign taxes under such agreements. As is the case with ordinary and limited partnerships the members must make the claim.”

Assuming they are UK residents in accordance with the provisions of the relevant DTA the members of an LLP are entitled to relief for any withholding tax on overseas dividends. Normally a DTA provides for withholding tax of a maximum of 15% to be deducted and relief for that tax given. Where a partner is an individual then no relief is due in respect of the taxes paid (the underlying taxes) on the profits out of which the dividend is paid.

In the very narrow circumstances where the LLP is not treated as transparent, but

HMRC allow claims from US partnerships. There is no reason why American partnerships should be treated better than other partnerships, and other partnerships could therefore seek to obtain similar treatment, even though there would be no legal remedy if HMRC insist on applying the strict law. In practice HMRC practice has been inconsistent: they have sometimes certified that a partnership is treaty-resident and sometimes refused to do so. Recent comment on this point by OTS<sup>131</sup> may lead to greater consistency.

INT Manual provides:

**335510. Background** [Jun 2018]

***How Double Taxation Agreements treat partnerships***

DTAs do not normally give a tax-transparent concern such as a partnership the right to claim treaty relief. Instead, in those cases where the income of the partnership is taxable in the hands of the partners (rather than at the level of the partnership) each partner should in strictness make a separate claim to treaty relief...

***HMRC's approach to Partnerships***

We recognise that applying the provisions of the DTA in such a literal way would be unwelcome and could possibly hamper the business interests of both countries.

Accordingly, HMRC may accept a single claim from a partnership on behalf of its partners. Where a partnership wishes to take advantage of this departure from the strict position and to claim treaty benefits on behalf of its partners, the general or managing partner should sign the declaration on the claim form. In addition to the normal information that is required by the claim form, a list of the names and addresses (residential addresses for individuals and registered addresses where the partners are companies) of the partners should be supplied. These lists should also normally show for each partner their respective percentage shares of the income that is the subject of the claim. In those cases where all of the partners are resident for tax purposes in the same

---

instead as a body corporate for tax purposes (such as when the LLP is in liquidation or being wound up in circumstances where transparency cannot be retained), we take the view that the LLP can itself claim relief for foreign taxes, including if appropriate underlying tax.”

131 OTS, “Review of partnerships: final report” (2015) para 4.18

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/396668/ots\\_partnerships\\_report\\_final.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/396668/ots_partnerships_report_final.pdf)

country as the one in which the partnership is established (the country with which the DTA applies) it is not necessary to insist upon this information being provided.

Where any of the partners are resident for tax purposes in a country other than that in which the partnership is established, they should make separate claims to relief from UK tax under the terms of any relevant DTA...

### **335520. Examination of claims [Jun 2018]**

#### ***What Personal Tax International will do***

Where you are able to conclude that all of the beneficial owners of the income for which relief is being claimed are “qualifying persons” within the meaning of a DTA, then you should process the claim in the normal way without further enquiry. This includes asking the tax office for the UK payer of the income to complete a report on forms in the 4450 series as appropriate.

If the supplementary information that is supplied with the claim form does not allow you to conclude that each of the partners is resident for tax purposes in the same country as that in which the partnership is established, you will have to ask for further information to be supplied. If any of the partners that are identified are themselves (at face value) transparent for tax purposes (for instance Limited Partnerships and Limited Liability Companies, as well as Trusts and some types of investment funds) you should ask for similar information to be supplied about these 2nd and 3rd level partners. Your aim should be to reach a reasonable level of assurance that all of the underlying participators in these concerns are themselves “persons” who would be able to claim double taxation relief if they were receiving the money directly rather than through the partnership.

*(This content has been withheld because of exemptions in the Freedom of Information Act 2000)*

Where the partnership is unable to provide sufficient information about the identity of its partners to allow you to be satisfied that each person is entitled to relief from UK tax, the amount of relief to be allowed must be restricted to the percentage share of the income that is attributable to the partners who you accept as being entitled to treaty benefits in their own right.

INT Manual provides:

### **INTM162110 certificates of residence: for partnerships [Feb 2020]**

UK partnerships (including English and Scottish LPs and UK LLPs) cannot be resident in the UK for the purpose of most of the UK’s

DTAs, because they are not themselves liable to tax in the UK. Only in a few limited circumstances, when the DTA specifically states that a partnership can be regarded as resident, such as in the UK/Argentina DTA, will HMRC be able to issue a Certificate of Residence (CoR) in the name of the partnership.

As a result, partnerships are not themselves entitled to claim benefits under most of the UK's DTAs. However, partnerships will usually be able to claim benefits on behalf of those of its partners who are residents of the UK.

To assist with such claims, HMRC therefore provides a CoR which confirms that whilst the partnership itself is not UK resident, some or all of its partners are.

It should be noted that, with regards to LLPs, references to 'partners' below is interchangeable with 'members'. If requested by the customer, it will therefore be acceptable to replace the references to 'partners' in the CoR with 'members'.

#### **Partnerships with only UK Resident Partners**

For partnerships where all partners are UK resident there should not be a problem as we will, if requested, confirm that although the partnership itself cannot be UK resident the individual partners are, and are therefore entitled to the relevant DTA benefits.

#### **Partnerships with Non-Resident Partners**

Non-resident partners are not entitled to the benefits arising from DTAs between the UK and its treaty partners because they are not persons resident in the UK as set out in the residence Article of a UK DTA. But HMRC will, if requested, confirm that although the partnership itself cannot be UK resident, the UK resident partners are entitled to the relevant treaty benefits.

#### **Information required**

As with any request for a certificate of residence, any partnership requiring a CoR should provide the information listed at INTM162020 as well as:

For partnerships with UK partners only: A list detailing the partners' names with confirmation that each and every partner is UK resident at the date of the request for the CoR.

For partnerships with UK and non-resident partners:

1. A contact name and address for the partnership; and
2. A list detailing the partners' names, separately identifying those that are UK resident and those that are not and confirming that each of the UK partners is UK resident at the date of the request for the CoR.

Once the Officer is satisfied that they can issue a CoR (after making the checks at INTM162030-50), they may issue one using the following form of words...

As stated at INTM162030, HMRC can also certify residence for a particular period (for the purpose of claiming relief in all countries), so long as that period does not end any later than the date of issue. The wording in each case as above can therefore be amended to refer to the period for which certification is required if necessary (although the partnership would need to confirm the periods for which each partner was UK resident)...

## 8.23 Partnership: Non-OECD Model DTAs

Where specific difficulties are apparent, HMRC seek to make express provision in the treaty. Examples include the treaties with France and Japan, and protocols with Canada and India.

The INTM provides:

### **335510. Background** [Jun 2018]

#### ***How Double Taxation Agreements treat partnerships***

... In cases where such a partner is resident in a country which (unusually) does not regard the partnership as fiscally transparent - which would mean that it regards the partnership rather than the UK payer as the source of the payments its resident receives - then that partner may have difficulty in getting a claim form certified as relevant to a DT treaty with the UK. In such rare cases, you should consider accepting an uncertified claim form. If you decide to invite a claim in these circumstances you should ask for the claim form to be supported by additional evidence (for example copies of recent tax returns) to show that the partner is resident for tax purposes in the country concerned. Any such case should be referred to Specialist Personal Tax, PT International Advisory at an early stage.

### **INTM153340 Partnerships** [Jun 2016]

UK policy, following *Padmore v IRC*, is to negotiate a provision in agreements confirming UK taxing rights over a UK resident partner's share of partnership profits where the partnership as an entity is resident in the other country for tax purposes under its domestic law. (See INTM163130 for more background).

However, a special article is required in treaties where partnerships established in the other state count as 'persons' qualifying for benefits. It ensures that individual members of such a partnership who are

themselves UK resident remain taxable in the UK on their share of the profits of the partnership.

UK domestic law treats partnerships as transparent and taxes individual members on their share of the partnership's profits.

What we now seek to do is either:

- exclude all partnerships from a treaty, by removing them from the definition of 'person' in, typically Article 3, of our treaties; or
- if the other state treats partnerships as taxable entities and wishes them to be covered by the treaty, another article, typically at Article 23A of our treaties, must be included. This ensures that the UK's right to tax UK resident members of partnerships set up under the laws of the other state is maintained.

### 8.23.1 Partnership: UK/Switzerland DTA

Article 4(1) UK/Switzerland DTA provides an example of the policy:

In the case of Switzerland, the term [resident of a Contracting State] includes a partnership created or organised under Swiss law.

Article 27(2) UK/Switzerland DTA provides:

Where under any provision of the Convention a partnership is entitled, as a resident of Switzerland, to exemption from the UK tax on any income, such provision shall not be construed as restricting the right of the UK to charge any member of the partnership which is a resident of the UK to tax on its share of the income of the partnership; but any such income shall be deemed for the purposes of Article 22 to be income from sources within Switzerland.

The DTR Manual provides:

**DT18105: Switzerland: Notes** [Nov 2019]

*Partnerships (Article 4)*

The agreement makes it clear that, if a partnership is a resident of Switzerland and is entitled, in accordance with the provisions of the agreement, to exemption from UK tax on any income, the UK nevertheless has the right to tax a UK resident partner on his share of the partnership income. Such income is deemed to be income from a source in Switzerland (Article 27(2)).

The agreement provides in Article 4 (1) that, in the case of Switzerland, the term 'resident of a Contracting State' includes a partnership created or organised under Swiss law. This provision should not be understood to override the general requirement that a resident must be liable to

taxation in the relevant Contracting State. Where a claim is received in respect of the income of a Swiss partnership it should be ascertained that the income is actually taxed in Switzerland. Any claim that income of a Swiss partnership which has not been taxed in Switzerland should be relieved from taxation in the UK should be referred to Business Profits, International.

### 8.23.2 Partnership: UK/USA DTA

Article 3 UK/US DTA provides:

(1) For the purposes of this Convention, unless the context otherwise requires—

(a) the term “person” includes an individual, an estate, a trust, a partnership, a company, and any other body of persons;

Thus a partnership is a person under this DTA.

## 8.24 Treaty-residence: Pension fund

### 8.24.1 “Pension fund”

Paragraph 1 of Article 3 provides:

i) the term “recognised pension fund” of a State means

[1] an entity or arrangement

[2] established in that State

[3] that is treated as a separate person under the taxation laws of that State and:

[4] (i) [ia] that is established and operated exclusively or almost exclusively to administer or provide retirement benefits and ancillary or incidental benefits to individuals and

[ib] that is regulated as such by that State or one of its political subdivisions or local authorities; or

(ii) that is established and operated exclusively or almost exclusively to invest funds for the benefit of entities or arrangements referred to in subdivision (i).

See too 37.10.1 (“Pension scheme”).

### 8.24.2 “Entity or arrangement”

OECD Commentary provides:

10.9 The first part of the definition of “recognised pension fund” refers to “an entity or arrangement established in that State”. There is considerable diversity in the legal and organisational characteristics of pension funds around the world and it is therefore necessary to adopt a broad formulation. The reference to an “arrangement” is intended to cover, among other things, cases where pension benefits are provided through vehicles such as a trust which, under the relevant trust law, would not constitute an entity: the definition will apply as long as the trust or the body of trustees is treated, for tax purposes, as a separate entity recognised as a separate person. It is required, however, that the entity or arrangement be treated as a separate person under the taxation laws of the State in which it is established: if that is not the case, it is not necessary to deal with the issue of the residence of the pension fund itself as the income of that fund is treated as the income of another person for tax purposes (see paragraph 10.5 above).

#### 8.24.3 *Purpose to provide benefits*

OECD Commentary provides:

10.10 ... It does not matter how many individuals are entitled to such retirement benefits: a recognised pension fund may be set up, for instance, for a large group of employees or for a single self-employed individual. States are free to replace the phrase “retirement and ancillary or incidental benefits” by a different formulation, such as “retirement and similar benefits”, as long as this formulation is interpreted broadly to include benefits such as death benefits.

10.11 The phrase “exclusively or almost exclusively” makes it clear that all or almost all the activities of a recognised pension fund must be related to the administration or the provision of retirement benefits and ancillary or incidental benefits to individuals. The words “almost exclusively” recognise that a very small part of the activities of a pension fund might involve activities that are not strictly related to administration or provision of such benefits (e.g. such as marketing the services of the pension fund).

#### 8.24.4 *“Retirement benefit”*

OECD Commentary provides:

10.12 The entity or arrangement must be established and operated exclusively or almost exclusively for the purpose of administering or providing retirement benefits and ancillary or incidental benefits to individuals. A pension paid upon retirement from active employment

or when an employee reaches retirement age would be the typical example of a “retirement benefit” but this term is broad enough to cover one or more payments made at or after retirement, or upon reaching retirement age, to an employee, a self-employed person or a director or officer of a company, even if these payments are not made in the form of regular pension payments.

10.13 In many States, pension funds provide a number of benefits that are not strictly linked to retirement and the phrase “ancillary or incidental benefits” is intended to cover such benefits. The words “ancillary or incidental” make it clear that such benefits are provided in addition to retirement benefits: a fund that would be set up primarily in order to provide benefits that are not retirement benefits would therefore not meet the definition. Whilst it would be impossible to provide an exhaustive list of all benefits that would qualify as “ancillary or incidental benefits”, the following are typical examples of such benefits:

- payments made as a result of the death or disability of an individual;
- pension or other types of payments made to surviving members of the family of a deceased individual who was entitled to retirement benefits;
- payments made to an individual suffering from a terminal illness;
- income substitution payments made in the case of long-term sickness or unemployment;
- housing benefits, such as a loan at a preferential rate granted from accumulated pension contributions to a pension contributor for the acquisition of a principal residence;
- education benefits, such as the withdrawal of accumulated pension contributions that a pension contributor would be allowed to make for the purpose of financing her education or that of her children;
- the provision of financial advice to pension contributors.

#### 8.24.5 *Regulated*

OECD Commentary provides:

10.14 ... The requirement is intended to restrict the definition to entities or arrangements that are subject to some conditions imposed by the State where it is established (or one of its political subdivisions or local authorities) in order to ensure that the entity or arrangement is used as a vehicle for investment in order to provide retirement and ancillary or incidental benefits to individuals. That part of the definition would therefore exclude an entity, such as a private company, that might be set up and used by a person to invest funds in order to provide retirement

benefits to persons related to, or employed by, that person but that would not be subject to any special treatment or to rules imposed by the State, political subdivision or local authority concerning the use of that entity as a vehicle to provide retirement benefits. It does not matter whether the regulatory framework to which the entity or arrangement is subjected is provided in tax laws or in other legal instruments (e.g. the legislation that establishes a State-owned entity that will operate a public pension fund); what matters is that the entity or arrangement be recognised by law as a vehicle established to finance retirement benefits for individuals and be subject to conditions intended to ensure that it is used for that purpose.

10.15 An example of an entity or arrangement that would satisfy the requirements of the definition of “recognised pension fund” is an agency or instrumentality of a State set up exclusively or almost exclusively to administer or provide retirement benefits and ancillary or incidental benefits under the social security legislation of that State. Another example would be a company or other entity that is established in a State for the purpose of administering or providing retirement benefits and ancillary or incidental benefits to individuals and whose only assets include funds that are covered by a retirement scheme regulated by the tax laws of that State which provide that the income from that scheme is exempt from tax. The definition of recognised pension fund would apply to that company or entity regardless of whether that company or entity otherwise qualifies as a resident of a Contracting State because it is “liable to tax therein” by reason of the criteria mentioned in the first sentence of paragraph 1 of Article 4, e.g. because it must pay tax on any income not derived from the scheme (see paragraphs 8.8 to 8.10 of the Commentary on Article 4).

10.16 Subdivision (i) of the definition applies regardless of whether the benefits to which it refers are provided to individuals who are residents of the State in which the entity or arrangement is established or are residents of other States....

#### 8.24.6 *Pooled pension funds*

OECD Commentary provides:

10.17 Subdivision (ii) of the definition covers entities or arrangements that pension funds covered by subdivision (i) use to invest indirectly. Pension funds often invest together with other pension funds pooling their assets in certain entities or arrangements and may, for various commercial, legal or regulatory reasons, invest via wholly owned

entities or arrangements that are residents of the same State. Since such arrangements and entities act only as intermediaries for the investment of funds used to provide retirement benefits to individuals, it is appropriate to treat them like the pension funds that invest through them.

#### 8.24.7 *Administration*

OECD Commentary provides:

10.18 The phrase “exclusively or almost exclusively” found in subdivision (ii) makes it clear that all or almost all of the activities of such an intermediary entity or arrangement must be related to the investment of funds for the benefit of entities or arrangements that qualify as recognised pension funds under subdivision (i).

#### 8.24.8 *Treaty-residence of pension fund*

Article 4(1) OECD Model provides:

1. For the purposes of this Convention, the term “resident of a Contracting State” ... includes ... a recognised pension fund of that State...

OECD Commentary provides:

8.6 Paragraph 1 also refers expressly to a “recognised pension fund”. Most member countries have long considered that a pension fund established in a Contracting State is a resident of that State regardless of the fact that it may benefit from a limited or complete exemption from taxation in that State. Until 2017, that view was reflected in the previous version of paragraph 8.6, which referred to “pension funds, charities and other organisations” as entities that most States viewed as residents. Paragraph 1 of the Article was modified in 2017 to remove any doubt about the fact that a pension fund that meets the definition of “recognised pension fund” in paragraph 1 of Article 3 constitutes a resident of the Contracting State in which it is established...

8.8 Where, however, a fund constitutes a “person” which is distinct from any other person by whom, or for the benefit of whom, it has been established and is operated, the definition of “recognised pension fund” will be relevant and, to the extent that the conditions of that definition are met, the fund will itself constitute a “resident of a Contracting State”. This will be the case in many countries because it is “liable to tax therein” by reason of the criteria mentioned in the first sentence of

paragraph 1, as this sentence is interpreted by the Contracting States or, if that is not the case, because of the specific inclusion of the term “recognised pension fund” in paragraph 1.

## 8.25 RIC/REIT/REMIC

The USA/Switzerland DTA Technical Explanation<sup>132</sup> provides:

Certain entities that are nominally subject to tax but that in practice are rarely required to pay tax also would generally be treated as residents and therefore accorded treaty benefits. For example, RICs, REITs and REMICs are all residents of the United States for purposes of the treaty. Although the income earned by these entities normally is not subject to U.S. tax in the hands of the entity, they are taxable to the extent that they do not currently distribute their profits, and therefore may be regarded as “liable to tax.” They also must satisfy a number of requirements under the Code in order to be entitled to special tax treatment.

While this is directed at the US DTA, the wording in point (“liable to tax”) is the same and the same argument should apply to REITs in other states.

## 8.26 USA/UK DTA

This section considers the definition of treaty-residence in the USA/UK DTA.

Article 4(1) USA/UK DTA provides:

[a] Except as provided in paragraphs 2 and 3 of this Article, the term “resident of a Contracting State” means, for the purposes of this Convention, any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, citizenship, place of management, place of incorporation, or any other criterion of a similar nature.

This is OECD Model form except:

- (1) Citizenship is added. This reflects the US rule that US citizens are liable to tax regardless of residence.

---

132 <https://www.irs.gov/pub/irs-trty/swistech.pdf>  
FD\_8\_Treaty-Residence\_2021.wpd

- (2) Place of incorporation is added. This reflects the US rule that US incorporated companies are liable to tax regardless of residence.<sup>133</sup>
- (3) “Person” has a non-OECD Model definition.

Article 4(1) USA/UK DTA continues:

[b] This term, however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or capital situated therein.

This is close to OECD Model form<sup>134</sup> (the differences do not seem material).

### 8.26.1 US citizen/green card holder

Article 4(2) USA/UK DTA provides:

An individual who is a United States citizen or an alien admitted to the United States for permanent residence (a “green card” holder) is a resident of the United States only

[a] if the individual has a substantial presence, permanent home or habitual abode in the United States and

[b] if that individual is not a resident of a State other than the UK for the purposes of a double taxation convention between that State and the UK.

The USA/UK DTA Technical Explanation<sup>135</sup> provides:

Paragraph 2 contains an exception to the general rule of paragraph 1 that residence under internal law also determines residence under the Convention. The exception applies with respect to a U.S. citizen or alien lawfully admitted for permanent residence (i.e., a “green card” holder). Under paragraph 1, a person is considered a resident of a Contracting State for purposes of the Convention if he is liable to tax in that Contracting State by reason of citizenship. Although this rule applies to both Contracting States, only the United States taxes its non-resident citizens in the same manner as its residents. In addition, aliens admitted

---

133 The reference to place of incorporation is strictly otiose, on the basis that place of incorporation is equivalent to domicile, or is a criterion of a similar nature; though it may be relevant in a treaty with a country with a different concept of domicile, and it is sensible to use a single form which works in all jurisdictions.

134 See 8.8 (Exception where source tax only).

135 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>  
FD\_8\_Treaty-Residence\_2021.wpd 03/11/21

to the United States for permanent residence (“green card” holders) qualify as U.S. residents under the first sentence of paragraph 1 because they are taxed by the United States as residents, regardless of where they physically reside.

Under the exception of paragraph 2, a U.S. citizen or green card holder will be treated as a resident of the United States for purposes of the Convention, and, thereby entitled to treaty benefits, only if he meets two conditions.

[1] First, he must have a substantial presence (see section 7701(b)(3)), permanent home or habitual abode in the United States. This rule requires that the U.S. citizen or green card holder have a reasonably strong economic nexus with the United States.

[2] Second, he must not be treated as a resident of a state other than the UK under any treaty between the UK and a third state. This rule prevents a U.S. citizen or green card holder who is a resident of a country other than the United States or the UK from choosing the benefits of the Convention over those provided by the treaty between the UK and his country of residence. If the U.S. citizen or green card holder’s country of residence does not have a treaty with the UK, however, then he will be treated as a resident of the United States as long as he meets the first requirement of an economic nexus...

The text goes on to give some examples:

Thus, for example, an individual resident of Mexico who is a U.S. citizen by birth, or who is a Mexican citizen and holds a U.S. green card, but who, in either case, has never lived in the United States, would not be entitled to benefits under the Convention. However, a U.S. citizen who is transferred to Mexico for two years would be entitled to benefits under the Convention if he maintains a permanent home or habitual abode in the United States and is not a resident of Mexico for purposes of the U.K.-Mexico tax treaty. If he were treated as a resident of Mexico under the U.K.-Mexico tax treaty, he could claim only the benefits of that treaty, even if the Convention would provide greater benefits.

The fact that a U.S. citizen who does not have close ties to the United States may not be treated as a U.S. resident under the Convention does not alter the application of the saving clause of paragraph 4 of Article 1 (General Scope) to that citizen. For example, a U.S. citizen who pursuant to the “citizen/green card holder” rule is not considered to be a resident of the United States still is taxable on his worldwide income under the generally applicable rules of the Code.

### 8.26.2 *Substantial presence*

“Substantial presence” is a technical term in US tax law. 26 CFR 301.7701(b)-1 provides:

**(c) Substantial presence test -**

(1) **In general.** An alien individual is a resident alien if the individual meets the substantial presence test. An individual satisfies this test if he or she has been present in the United States on at least 183 days during a three year period that includes the current year. For purposes of this test, each day of presence in the current year is counted as a full day. Each day of presence in the first preceding year is counted as one-third of a day and each day of presence in the second preceding year is counted as one-sixth of a day. For purposes of this paragraph, any fractional days resulting from the above calculations will not be rounded to the nearest whole number. (See § 301.7701(b)-9(b)(2) for transitional rules for calendar years 1985 and 1986.)

**(2) Determination of presence -**

(i) **Physical presence.** For purposes of the substantial presence test, an individual shall be treated as present in the United States on any day that he or she is physically present in the United States at any time during the day. (But see § 301.7701(b)-3 relating to days of presence that may be excluded.)

(ii) **United States.** For purposes of section 7701(b) and the regulations thereunder, the term United States when used in a geographical sense includes the states and the District of Columbia. It also includes the territorial waters of the United States and the seabed and subsoil of those submarine areas which are adjacent to the territorial waters of the United States and over which the United States has exclusive rights, in accordance with international law, with respect to the exploration and exploitation of natural resources. It does not include the possessions and territories of the United States or the air space over the United States.

(3) **Current year.** The term current year means any calendar year for which an alien individual is determining his or her resident status.

(4) **Thirty-one day minimum.** If an individual is not physically present for more than 30 days during the current year, the substantial presence test will not be applied for that year even if the three-year total is 183 or more days. For purposes of the substantial presence test, it is

irrelevant that an individual was not present for more than 30 days in the first or second year preceding the current year...

(e) **Examples.** This section may be illustrated by the following examples:

**Example 1.**

B, an alien individual, is present in the United States for 122 days in the current year. He was present in the United States for 122 days in the first preceding calendar year and for 122 days in the second preceding calendar year. In determining his status for the current year, B counts all 122 days in the United States in the current year plus  $\frac{1}{3}$  of the 122 days in the United States in the first preceding calendar year ( $40 \frac{2}{3}$  days) and  $\frac{1}{6}$  of the 122 days in the United States during the second preceding calendar year ( $20 \frac{1}{3}$  days). The total of  $122 + 40 \frac{2}{3} + 20 \frac{1}{3}$  equals 183 days. B meets the substantial presence test and is a resident alien for the current year.

**Example 2.**

C, an alien individual, is present in the United States for 25 days during the current year. She was present in the United States for 365 days during the first preceding year and 365 days during the second preceding year. The substantial presence test does not apply because C is present in the United States for fewer than 31 days during the current year.

**Example 3.**

D, an alien individual, is present in the United States for 170 days during the current year. He was present in the United States for 30 days during the first preceding year and 30 days during the second preceding year. In determining his status for the current year, D counts all 170 days in the United States in the current year plus  $\frac{1}{3}$  of the 30 days in the United States in the first preceding calendar year (10 days) and  $\frac{1}{6}$  of the 30 days in the United States during the second preceding calendar year (5 days). The total of  $170 + 10 + 5$  equals 185 days. D meets the substantial presence test and is a resident alien for the current year notwithstanding the fact that he was present in the United States for fewer than 31 days in each of the two preceding years.

HMRC accept this meaning applies in the treaty, and that seems right.<sup>136</sup>  
 HMRC Self Assessment helpsheet HS302 (Dual Residents 2020) provides:

---

136 Notwithstanding the rule in art 3(2) USA/UK DTA that undefined terms have domestic law meanings; see 103.11 (Undefined treaty terms).

**Substantial presence test**

This shows how often you're in the US over a certain period. You'll have a substantial presence if you're in the US:

- for at least 31 days of the calendar year in question
- for the year in question and the 2 years before that and all 3 years add up to at least 183 days

If you spend part of a day in the US, count it as a whole day.

For the purpose of the example below, a day spent in the US, in the following year under test, counts as 1/3rd, and a day in the year before that counts as 1/6th.

**Example** (Geetha)

G spends 48 days in the US in 2017, 250 days in 2016 and 365 days in 2015. A day spent in the US in 2016 and 2015, counts as 1/3rd and 1/6th respectively. In 2017, the calculation is as follows:

2017	48 days × 1/1	48
2016	250 days × 1/3	84
2015	365 days × 1/6	<u>61</u>
Total		<u>193</u>

G passes both parts of the substantial presence test. She's a resident in the US, under the country's domestic law.

**8.26.3 Tie-breaker**

For individuals, art 1(4) USA/UK DTA provides OECD Model wording.

For entities, art 1(5) USA/UK DTA provides:

[a] Where by reason of the provisions of paragraph 1 of this Article a person other than an individual is a resident of both Contracting States, the competent authorities of the Contracting States shall endeavour to determine by mutual agreement the mode of application of this Convention to that person.

[b] If the competent authorities do not reach such an agreement, that person shall not be entitled to claim any benefit provided by this Convention, except those provided by paragraph 4 of Article 24 (Relief from Double Taxation), Article 25 (Non-discrimination) and Article 26 (Mutual agreement procedure).

This is based on the current OECD model form.<sup>137</sup>

The USA/UK DTA Technical Explanation<sup>138</sup> provides:

137 See 8.18 (Tie-breaker: mutual agreement).

138 <http://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>  
FD\_8\_Treaty-Residence\_2021.wpd 03/11/21

Dual residents other than individuals (e.g., companies, trusts, and estates) are addressed by paragraph 5. If such a person is, under the rules of paragraph 1, resident in both Contracting States, the competent authorities shall seek to determine a single State of residence for that person for purposes of the Convention. For example, a company is treated as resident in the United States if it is created or organized under the laws of the United States or a political subdivision. Under U.K. law, a company is treated as a resident of the UK if it is either established there or managed and controlled there. Dual residence, therefore, can arise if a U.S. company is managed and controlled in the UK. Paragraph 5 provides that the competent authorities will try to determine a single State of residence for such a company.

If the competent authorities do not reach an agreement on the single State of residence, that person may not claim any benefit provided by the Convention, except those provided by paragraph 4 of Article 24 (Relief from Double Taxation), Article 25 (Non-Discrimination), and Article 26 (Mutual Agreement Procedure). Thus, for example, a State cannot discriminate against a dual resident company, and such a company can bring issues to the competent authorities.

Dual resident companies also may be treated as resident for purposes other than that of obtaining benefits under the Convention. For example, if a dual resident company pays a dividend to a resident of the UK, the U.S. paying agent would withhold on that dividend at the appropriate treaty rate because reduced withholding is a benefit enjoyed by the resident of the UK, not by the dual resident. The dual resident company that paid the dividend would, for this purpose, be treated as a resident of the United States under the Convention. In addition, information relating to dual resident companies can be exchanged under the Convention because, by its terms, Article 27 (Exchange of Information and Administrative Assistance) is not limited to residents of the Contracting States.

## 8.27 Tax exempt organisations

The USA/UK DTA Technical Explanation<sup>139</sup> provides:

[Article 4(3)] provides that certain tax-exempt entities such as pension funds and charitable organizations will be regarded as residents of a Contracting State regardless of whether they are generally liable for income tax in the State where they are established. The inclusion of this

---

139 <https://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>  
FD\_8\_Treaty-Residence\_2021.wpd 03/11/21

provision is intended to clarify the generally accepted practice of treating an entity that would be liable for tax as a resident under the internal law of a State but for a specific exemption from tax (either complete or partial) as a resident of that state for purposes of paragraph 1.

### 8.27.1 *Pension scheme*

Art 4(3) USA/UK DTA provides:

The term “resident of a Contracting State” includes—

- (a) a pension scheme;

For the definition, see 37.10.1 (“Pension scheme”).

### 8.27.2 *Employee benefit trust*

Art 4(3) USA/UK DTA provides:

The term “resident of a Contracting State” includes...

- (b) a plan, scheme, fund, trust, company or other arrangement established in a Contracting State that is operated exclusively to administer or provide employee benefits and that, by reason of its nature as such, is generally exempt from income taxation in that State;

The USA/UK DTA Technical Explanation provides:<sup>140</sup>

Subparagraph (b) applies to any plan, scheme, fund, trust, company or other arrangement established in a Contracting State that is generally exempt from taxation in that State because it is operated exclusively to administer or provide employee benefits. The reference to a general exemption is intended to reflect the fact that under U.S. law, certain organizations that generally are considered to be tax-exempt entities may be subject to certain excise taxes or to income tax on their unrelated business income.

### 8.27.3 *Charity/NPO*

Art 4(3) USA/UK DTA provides:

The term “resident of a Contracting State” includes ...

- (c) an organisation that is established exclusively for religious, charitable, scientific, artistic, cultural, or educational purposes

---

140 <https://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>  
FD\_8\_Treaty-Residence\_2021.wpd 03/11/21

and that is a resident of a Contracting State according to its laws, notwithstanding that all or part of its income or gains may be exempt from tax under the domestic law of that State;

The USA/UK DTA Technical Explanation provides:<sup>141</sup>

... an exempt section 501(c) organization (such as a U.S. charity) that is generally exempt from tax under U.S. law is a resident of the United States for all purposes of the Convention.

#### 8.27.4 *Governmental entity*

Art 4(3) USA/UK DTA provides:

The term “resident of a Contracting State” includes ...

- (d) a qualified governmental entity that is, is a part of, or is established in, that State.

Article 3(1)(k) USA/UK DTA provides the definition:

the term “qualified governmental entity” means—

- (i) a Contracting State, or a political subdivision or local authority of a Contracting State;
- (ii) a person that is wholly owned, directly or indirectly, by a Contracting State or a political subdivision or local authority of a Contracting State, provided—
  - (a) it is organised under the laws of the Contracting State;
  - (b) its earnings are credited to its own account with no portion of its income inuring to the benefit of any private person;
  - (c) its assets vest in the Contracting State, political subdivision or local authority upon dissolution; and
  - (d) it does not carry on a business;

## 8.28 S Corporation

### 8.28.1 *US law background*

The Mirrlees Review summarises the nature of a US S corporation:

... in the USA, there has been a tax penalty on incorporation for those intending to distribute profits as a result of the classical system of dividend taxation which taxes dividends both at the corporate level (via corporation tax) and at the personal level (via income tax). This was

---

141 <https://www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf>  
FD\_8\_Treaty-Residence\_2021.wpd 03/11/21

tackled in 1958 by way of Subchapter S to the Internal Revenue Code which permits partnership or pass-through treatment for US corporations satisfying certain conditions ('S' Corps).<sup>142</sup>

Thus an S corporation is not a specific type of entity: it is a company which has elected for a specific tax treatment, to be treated as transparent for US tax purposes.

### 8.28.2 S corp: Treaty-residence

HMRC classify an S corporation as opaque in the transparent/opaque list<sup>143</sup> so there is no doubt it is a treaty-person.

The Canadian Revenue Agency say:

#### **US S-Corps and LLCs**

The Department views U.S. S-Corps to be resident in the United States for the purposes of the [US/Canada] Convention. This view is based on the fact that they are "liable to tax" under the Internal Revenue Code unless they make an election to be treated as a partnership. Furthermore, notwithstanding the election, an S-Corp. would be taxed in the United States on its world-wide income if certain conditions are not met.

The CRA express reservations about their own view:

The Department recognizes that the above position is arguably inconsistent with its view that U.S. LLCs are not resident in the U.S. for the purposes of the Convention. [The Department continues to be of the view that a U.S. LLC that is treated under U.S. tax law as a partnership and which is therefore not liable to tax in the United States, is not a resident of the United States for the purposes of Article IV of the Convention.] Possibly if the Department had had the knowledge and experience it now has in the area of residency determination when it formed its opinion regarding the residence of U.S. S-Corps, it may have reached a different conclusion regarding the residence of U.S. S-Corps.<sup>144</sup>

---

142 Dimensions of Tax Design ((2010) p.1047.

See too, Staff of the Joint Committee on Taxation, "Choice of Business Entity" (2015) <https://www.jct.gov/publications.html?func=startdown&id=4765>

See 86.43 (UK check-the-box rules?)

143 See 86.40 (HMRC transparent/opaque list).

144 <http://www.cra-arc.gc.ca/E/pub/tp/itnews-16/itnews-16e.txt> The text goes on to FD\_8\_Treaty-Residence\_2021.wpd 03/11/21

But the CRA practice (that an S Corp is “liable to tax”) seems the better view, on the analysis of “liable to tax” set out above. One might distinguish the case of LLCs, as a LLC is not subject to US tax unless it elects to be non-transparent; but a S Corporation is subject to tax unless it elects for transparency.

See too 25.30.3 (S corp/LLC lender).

## 8.29 Treaty-residence: Non-OECD DTA

### 8.29.1 Resident for purposes of UK tax

Article 4 UK/New Zealand DTA provides:

(1) For the purposes of this Convention, the term “resident of a Contracting State” means, as the context requires:

- (a) any person who is resident in the UK for the purposes of UK tax; or
- (b) any person who is resident in New Zealand for the purposes of New Zealand tax...<sup>145</sup>

The INT Manual considers that this is the same as article 4(1) OECD Model (“liable to tax by reason of his residence”):

#### **INTM162040 certificates of residence...** [Feb 2020]

... Some DTAs do not specifically use the phrase ‘liable to tax’ (for example the UK/New Zealand Double Taxation Convention). Instead, these DTAs state that a UK resident means any person who is a resident of the UK for the purposes of UK tax. HMRC interprets this also to mean that the person is liable to tax by virtue of their domicile, residence, place of management or any other criterion of a similar nature.

### 8.29.2 Residence: Pre-1963 DTAs

Pre-1963 DTAs<sup>146</sup> provide a different definition of treaty-residence.<sup>147</sup> I take art 2(1)(g) Belize/UK DTA as an example:

---

comment on Canadian foreign affiliate legislation, which is not relevant here; and Barbados exempt insurance companies, which is too specialist to be considered here.

145 A tie-breaker follows in OECD Model form.

146 See 103.24 (Pre-1963 DTAs).

147 But the BEPS MLI may change this.

- (g)[i] The terms “resident of the United Kingdom” and “resident of Belize” mean respectively
- [A] any person who is resident in the UK for the purposes of UK tax and not resident in Belize for the purposes of Belize tax and
  - [B] any person who is resident in Belize for the purposes of Belize tax and not resident in the UK for the purposes of UK tax;
- [ii] and a company shall be regarded as resident in the UK if its business is managed and controlled in the UK and as resident in Belize if its business is managed and controlled in Belize.

The INTM provides:

**INTM154030 Resident of both countries** [Jun 2016]

Some early agreements, mainly with former colonies in the Caribbean ... define a resident of one country as a person who is a resident there for the purposes of that country’s tax and not resident for tax purposes in the other country. A person who, under those agreements, is a resident of both countries will only be able to get relief by way of credit for one country’s tax against the others.

This comment clearly relates to provisions in the form of art 2(1)(g)[i] which govern treaty-residence of non-companies (individuals or trusts).

Treaty-residence of companies is governed by art 2(1)(g)[ii] on which HMRC say:

HMRC now takes the view that the better interpretation of the [company residence tie-breaker] in these DTAs is that they include a tie-breaker clause to decide where a company is to be treated as resident for the purposes of the affected DTAs. This represents a change of view. HMRC’s previous view was that a dual-resident company – for example, a company resident in the UK by virtue of incorporation and resident in the other jurisdiction by virtue of management and control – was not a resident of either jurisdiction under the terms of the provisions and so was outside the scope of the DTA. HMRC now takes the view that these provisions should be read as treating such a dual-resident company as a resident of the jurisdiction in which it is managed and controlled, for the purposes of applying the affected DTAs.

In cases where the company is managed and controlled in both the UK and the other jurisdiction, it will remain outside the scope of the DTA.<sup>148</sup>

HMRC's revised view is correct; it is difficult to see the basis of the former HMRC view.

### 8.30 Proof of treaty-resident status

#### 8.30.1 *Certificate of residence*

A person who is treaty-resident in the UK may need evidence of that status in order to obtain foreign DT relief. HMRC will help by issuing a certificate of UK DTA-residence (CoR).

Conversely a person who is treaty-resident in a foreign state generally needs a certificate of overseas residence in order to prove entitlement to UK DT relief.

#### 8.30.2 *Certificate of DTA-residence*

The INT Manual provides:

**INTM162010 certificates of residence: introduction and scope of guidance**  
[Jun 2016]

Where the UK has a DTA with a foreign territory, a person who is a resident of the UK (within the meaning of the DTA) may be entitled to claim relief from certain taxes of that foreign territory (either by way of relief at source or refunds of tax already paid) if certain criteria are met.

In order to assess whether a person is entitled to such relief, the overseas fiscal authority receiving the claim will usually require HMRC to certify that the person is a resident of the UK within the meaning of the DTA. Some fiscal authorities may also require HMRC to confirm that the person fulfils other conditions.

The certification of residence may need to be made on a specific form produced by the overseas fiscal authority or in a general letter produced by HMRC. For the purpose of this guidance, a Certificate of Residence (CoR) refers to certification on a specific form or in a general letter.

HMRC is committed to providing UK residents with assistance in claiming all the benefits they are entitled to under a DTA. These DTAs have been carefully negotiated with other states and HMRC will therefore help UK residents claim

---

148 <https://www.gov.uk/government/publications/double-taxation-agreements-developments-and-planned-negotiations/change-of-view-on-the-interpretation-of-the-residence-articles-in-sixteen-double-taxation-agreements>

I have deleted Jersey/Guernsey/IoM from the list; these now have DTAs in OECD model form.

the benefits they are entitled to. On request, HMRC will therefore provide customers with a CoR where, to the best of our knowledge, that customer is a resident of the UK.

However, as the purpose of a CoR is to support claims for benefits under a particular Article of a DTA (being the Article applicable to the relevant income source), HMRC may refuse to issue a CoR where it is clear that the customer would not be entitled to those benefits. As such, there may be cases where a resident of the UK will not be able to obtain a CoR because they do not fulfil the criteria of the particular Article under which they intend to claim benefits. It is vitally important that HMRC upholds the terms and purpose of our DTAs by not issuing CoRs to those who are clearly not entitled to relief from foreign taxes. The decision as to whether relief from foreign taxes can be granted is, ultimately, one to be made by the overseas fiscal authority. It is therefore anticipated that HMRC will issue a CoR in the majority of cases and that a request will only be refused if there is no doubt that customer would not be entitled to benefits.

If HMRC has reason to believe that a customer will not be entitled to benefits, we may request further information from the customer before deciding whether a CoR can be issued. In cases where it is not clear whether a customer would be entitled to benefits, HMRC may decide to make a spontaneous exchange of information with the other state to help them come to an informed decision as to whether benefits can be granted.

Customers should also be aware that the provision of a CoR will not guarantee that they will be successful in their claim to benefits under the relevant DTA. As stated above, it will be up to the overseas fiscal authority to determine whether the customer fulfils all the relevant conditions and whether benefits can be granted. However, in any case where a customer believes an overseas fiscal authority has denied them benefits which they should be entitled to, HMRC will consider engaging with those authorities on the customers behalf under the Mutual Agreement Procedure for the relevant DTA.

To help HMRC decide whether a CoR can be issued, we will require any customer who would like a CoR to provide a certain amount of information when making their request.

The following guidance sets out the information HMRC will require, the checks we will make and the circumstances in which a request may be refused. It also sets out the processes for making and handling such requests. This guidance replaces the guidance issued on 4 January 2013 and which was previously located at INTM162010 to INTM162040.

**(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**

**INTM162020 certificates of residence: information to be supplied with a request** [Feb 2020]

As stated at INTM162010, before HMRC can certify residence for the purpose of claiming benefits under a DTA a customer will need to provide the information listed below. This applies to customers of all types and sizes and is also in addition to the information required in order to identify the customer when they make a request in accordance with INTM162160.

In certain limited circumstances, a customer may be able to agree with their Local Office, Customer Co-ordinator or Customer Compliance Manager that they may not need to provide all of the information listed below with every request.

However, individual customers will always have to provide the information referred to below as they should make a request via the on-line tool referred to at INTM162160. All other customers should also continue to provide the information referred to below unless agreement has been reached with their Local Office, Customer Co-ordinator or Customer Compliance Manager.

Where the other state produces a specific form on which a claim should be made, the customer should also provide a copy of that form (after completing the parts applicable to them) with their request. Details of those states which require claims to be made on specific forms can be found on the country specific pages of the Double Taxation Relief manual (DT2140) ... usually under the 'relief from [name of territory] tax' or 'claims procedure' section of those pages.

It should be noted that whilst HMRC tries to keep the DTR manual updated there will be occasions where it contains references to forms which are no longer used by the other state or where it does not mention forms which have been recently introduced. Customers should therefore check whether a claim has to be made on a specific form with the relevant overseas tax authorities before requesting a Certificate of Residence (CoR). Claim forms which appear over two pages should be printed on both sides of each piece of paper.

Note that HMRC will only be able to issue a CoR to a third party (such as an agent or other representative) if the principal customer has provided their consent for HMRC to do so. Such consent may be provided in the form of a 64-8<sup>149</sup> or in any other format. If the customer would like the CoR to be issued to a third party, a copy of the consent should therefore be sent with the request unless already provided.

The information HMRC will require with a request is as follows:

1. An explanation as to why the person requires a CoR, including confirmation of which DTA they wish to make a claim under.
2. Confirmation of the type of income in respect of which they wish to make a claim and the particular income article under which they wish to make a claim.
3. Confirmation of the period for which the customer requires a CoR if not for the date on which the certificate is to be issued.
4. If required by the specific DTA, confirmation as to whether the customer (for the whole of the period for which they require a CoR):
  - (a) is the beneficial owner of the income in respect of which they wish to make a claim,
  - (b) is subject to UK tax on all of the income in respect of which they wish to make a claim.

---

149 <https://www.gov.uk/government/publications/tax-agents-and-advisers-authorising-your-agent-64-8>

5. For newly incorporated companies, who have yet to file a Corporation Tax self-assessment return, the name and residence of each director and shareholder and the reason for which the company believes it is a resident of the UK (bearing in mind the guidance at INTM120030).
6. For individuals who require a CoR for periods on or after 6 April 2013 and who have yet to file a self-assessment tax return for the period required:
  - (a) the number of days spent in the UK during the tax year in which they require a certificate,
  - (b) if the individual has spent less than 183 days in the UK during the tax year in which they require a certificate, the basis on which they are believed to be resident under the Statutory Residence Test (SRT),
  - (c) the date on which the individual arrived in or departed the UK,
  - (d) if the individual arrived in or departed the UK during the tax year in which they require a CoR, confirmation of the date on which they began or ceased to be resident according to the SRT split-year rules.

Further information in respect of each of these questions can be found below:

1. If a customer requires HMRC to certify that they are a resident of the UK for any purpose other than claiming relief from foreign taxes under a DTA, they should ask for a 'letter of confirmation' in accordance with the guidance at INTM162140.

2. Customers most commonly require a CoR in order to make claims for relief from tax on business profits, dividends, interest and royalties. The income articles applicable to these sources are usually Articles 7, 10, 11 and 12 respectively (where the DTA follows the OECD Model Convention), although the numbering may be different in some DTAs.

General descriptions of the Articles normally present in a DTA can be found at INTM153000, although customers should always check the particular DTA under which they intend to make a claim as the contents may vary from one to another.

If a customer has more than one source of income (falling under the same or different articles) they should consider the questions at 3 and 4 as above in respect of each source.

3. Please note that a CoR cannot be issued for any future period as HMRC cannot certify that a customer will continue to be UK resident.

4(a). Most DTAs state that if a person wishes to claim relief from tax in the source state in respect of income such as dividends, interest and royalties (but not business profits), that person has to be the beneficial owner of that income. Customers should consider the guidance at INTM162080 before making a request for a CoR where this condition applies. If the customer is not the beneficial owner of the income, the other state may deny relief. In such cases, the customer should request or arrange for each of the actual beneficial owners to request a CoR in their own name (provided they are residents of the UK as well) so that relief can be granted.

4(b). Some DTAs provide that a person must be subject to tax on income such as dividends, interest and royalties as well as or instead of being the beneficial

owner. The meaning of subject to tax, and its distinction from liable to tax, can be found at INTM162090 ...

5. Where a company has yet to file a self-assessment tax return, it may not be possible to issue a CoR. This will be particularly so where the company is registered overseas and claims to be UK resident by virtue of being centrally managed and controlled in the UK (INTM120060). If a newly incorporated company does require HMRC to provide a CoR, it should provide as much information as possible to satisfy HMRC that it is UK resident. If HMRC is not satisfied that a company is UK resident, we may ask for further information and if still not satisfied, we may refuse to issue the CoR.

6. For periods on or after 6 April 2013, an individual's residence status for UK tax purposes will be determined by the SRT. In cases where an individual has yet to file a self-assessment tax return for the period in which the CoR is required, HMRC will require further information in order to satisfy us that they are resident for the period in question. In cases where the individual has just arrived in the UK, it may not be possible to issue a CoR until the individual has stayed in the UK for sufficient time to be able to demonstrate that they are indeed resident... It will only be not appropriate to answer the questions at 4(a) and 4(b) if the income article under which the customer wishes to make a claim does not include such a qualifying condition.

It should also be noted that the conditions referred to in 4(a) and 4(b) as above may not be the only conditions which have to be met for the claim to be accepted by the other state. All customers should therefore check the conditions of the particular income article under which they intend to make a claim before requesting a CoR...

**INTM162030 certificates of residence: What HMRC will check - reason and date for which certification is required [Feb 2020]**

When an Officer receives a request for a Certificate of Residence (CoR), including a request to certify residence on a specific form, they should initially check:

1. Why the customer wants HMRC to certify that they are a resident of the UK, including which DTA and income article the customer intends to claim relief under.

If the customer requires a CoR for any purpose other than claiming relief from, or refunds of, foreign taxes under a DTA, the instructions at INTM162140 should be followed instead.

2. Whether the other state provides a specific form, or use of words, which should be used to claim the relief in question.

The country specific pages of the Double Taxation Relief manual (DT2140) ... provides details of the forms and words known to be used by other fiscal authorities (usually under the 'relief from [name of territory] tax' or 'claims procedure' section of the country specific guidance).

Whilst HMRC tries to keep the DTR manual updated there will be occasions where it contains references to forms which are no longer used by the other state or where it does not mention forms which have been recently introduced.

If a customer does not believe it would be appropriate to complete a specific form which is mentioned in the DTR manual, the Officer can issue a general CoR instead but they should advise the customer that it may cause delay in their claim being processed if the other state insists on the specific form being completed.

3. The date as at, or period for which, the customer requires a CoR.

HMRC will normally certify that a person is a resident of the UK as at the date of issue. However, HMRC can also certify that a person was resident for a certain period, so long as the period does not end later than the date of issue (HMRC cannot certify that a person will be a resident of the UK for any future period because we cannot verify whether that will be the case).

If a customer requires a CoR for a particular period, the Officer will need to consider the points at INTM162040 and INTM162070 for the whole of that period.

An Officer should also remember that a CoR can only be issued to a third party (such as an agent or other person acting on behalf of the customer) if the customer has provided consent for them to do so. Consent may be provided in the form of a 64-8 ... or in any other format. Once consent has been obtained, the Officer should note the extent of the consent on the taxpayers' record (on SA or COTAX) for possible future use.

**INTM162040 certificates of residence: What HMRC will check - whether the customer is a resident of the UK [Feb 2020]**

Once an Officer has completed the initial checks at INTM162030, the Officer should consider whether the customer is, to the best of their knowledge, a person who is a resident of the UK within the meaning of the Double Taxation Agreement (DTA).

[The Manual summarises the OECD Model definition of residence and continues]

The issue of whether a person is a resident of the UK is a matter of self-assessment which HMRC would only normally challenge through an enquiry into a person's self-assessment tax return. ... An Officer will not be expected to carry out a detailed review of residence when they receive a request for a Certificate of Residence (CoR). The Officer will usually be able to certify residence so long as they can see that the customer is (or was for the period requested) liable to UK tax by virtue of their residence (for example, by checking the customer's tax returns or, if no such returns have been submitted yet, the information provided with the request).

However, if HMRC do not have enough information to determine whether a customer is liable to UK tax by virtue of their residence or, despite the self-assessments made by the customer, there are reasonable grounds for believing that the customer may not in fact be a resident of the UK, the request may be refused if sufficient doubt remains following additional correspondence on the issue.

It should be noted that the provision of a CoR (to a customer of any type) will not amount to a formal determination that the customer is a resident of the UK.

It will simply be confirmation that, to the best of HMRC's knowledge, the

customer is, or was for the period in question, liable to tax by virtue of their residence. HMRC will still have the right to enquire into a customer's self-assessment tax return when it is received.

In cases where a company is suspected of being dual resident or where a customer requests a certificate of residence in respect of a branch or permanent establishment, please refer to the guidance at INTM162050 and INTM162060 respectively.

**(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**

**INTM162050 certificates of residence: Dual resident companies** [Jan 2018]  
[This is not set out here as it is too far from the themes of this book]

**INTM162070 certificates of residence: what HMRC will check - whether there are any obvious reasons why the customer might not be entitled to treaty benefits** [Dec 2019]

Once the Officer has completed their initial checks at INTM162030 and is satisfied that the customer is a resident of the UK for the purpose of the DTA in question (see INTM162040), they should then consider whether, to the best of their knowledge, the customer fulfils the criteria of the particular article under which they wish to make a claim.

Whilst HMRC will not certify that a person fulfils the criteria of a particular income article, the Officer will still be expected to consider whether there are any obvious reasons for believing that the customer might not be entitled to benefits under the DTA.

As such, the Officer will need to check the criteria of the particular income article under which the customer intends to claim relief.

In relation to claims to relief from foreign tax on dividends, interest and royalties, the main criteria which an Officer will need to consider are whether the customer is the beneficial owner of (see INTM162080) and/or is subject to tax (see INTM162090) on the income in question.

The Officer will need to check the particular income article of the DTA to see what conditions need to be fulfilled. Copies or descriptions of each DTA can be found on the GOV>UK site or in the country specific pages at DT2140 ...

The Officer should use the information provided with the initial request (see INTM162020 and, in particular, the answers in response to questions 4(a) and (b), and any other information available to them (for example, the accounts, tax return and electronic records) to decide whether there are any obvious reasons for believing that the customer may not be entitled to benefits.

Officers will need to take a risk assessment approach when dealing with a request for a Certificate of Residence ('CoR'). For example, where a Customer Compliance Manager has discussed the question of CoRs with the customer and is satisfied that they have sufficient internal governance and controls to ensure requests for CoRs are only made when they fulfil all the criteria for relief, the Officer may be able to provide the CoR without a detailed review.

**(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**

As stated at INTM162010, customers should note that if HMRC does provide them with a CoR, the CoR will not guarantee that they will be able to claim benefits under the relevant DTA. The CoR will not confirm whether HMRC believe all of the relevant conditions have been fulfilled as that will be a matter for the other state to determine.

**(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**

**INTM162100 certificates of residence: for individuals and companies** [Jun 2018]

[This discusses the wording of a certificate of residence and need not be set out here]

### 8.30.3 *Certificate: Partnership*

The INT Manual provides:

**INTM162110 certificates of residence: for partnerships** [Feb 2020]

... partnerships will usually be able to claim benefits on behalf of those of its partners who are residents of the UK.

To assist with such claims, HMRC therefore provides a CoR which confirms that whilst the partnership itself is not UK resident, some or all of its partners are.

It should be noted that, with regards to LLPs, references to ‘partners’ below is interchangeable with ‘members’. If requested by the customer, it will therefore be acceptable to replace the references to ‘partners’ in the CoR with ‘members’.

#### **Partnerships with only UK Resident Partners**

For partnerships where all partners are UK resident there should not be a problem as we will, if requested, confirm that although the partnership itself cannot be UK resident the individual partners are, and are therefore entitled to the relevant DTA benefits.

#### **Partnerships with Non-Resident Partners**

Non-resident partners are not entitled to the benefits arising from DTAs between the UK and its treaty partners because they are not persons resident in the UK as set out in the residence Article of a UK DTA. But HMRC will, if requested, confirm that although the partnership itself cannot be UK resident, the UK resident partners are entitled to the relevant treaty benefits.

#### **Information required**

As with any request for a certificate of residence, any partnership requiring a CoR should provide the information listed at INTM162020 as well as:

For partnerships with UK partners only:

1. A list detailing the partners’ names with confirmation that each and every partner is UK resident at the date of the request for the CoR.

For partnerships with UK and non-resident partners:

1. A contact name and address for the partnership; and
2. A list detailing the partners’ names, separately identifying those that are UK resident and those that are not and confirming that each of the UK partners is UK resident at the date of the request for the CoR.

Once the Officer is satisfied that they can issue a CoR (after making the checks at INTM162030-50), they may issue one using the following form of words:  
[The wording is not set out here]

#### 8.30.4 *Certificate of residence: Trust*

The INT Manual provides:

**INTM162120 certificates of residence: for trusts** [May 2019]

**Information required and checks to be made**

As with any request for a CoR, the information listed at INTM162020 should be provided and guidance at INTM162030-90 followed before issuing a CoR in respect of a trust. The trust should also however provide a list detailing all the trustees names with confirmation or otherwise of UK residence.

**Confirm which CoR to issue**

It is important that you check the definition of ‘resident of a Contracting State’ contained in the residence article (usually Article 4) of the specific DTA relevant to the income concerned to ensure that the correct wording of the CoR is used.

**(This content has been withheld because of exemptions in the Freedom of Information Act 2000)**

**Wording for CoR to trust with resident body of trustees**

[The wording is not set out here]

**INTM162130 certification required to be supported by an apostille** [May 2019]

Some countries (for example, Kazakhstan) require a Certificate of Residence provided under a Double Taxation Agreement to be supported by an “apostille”. An apostille is a document prepared by the Legalisation Office of the Foreign and Commonwealth Office (FCO) that confirms that a UK public official who has signed a document is who they claim to be. The signature must be an original. The Legalisation Office have quite a few HMRC officers on their database, but it may save time for an Officer who is dealing with such a claim for the first time to send a specimen signature to the Legalisation Office in advance, otherwise they will need to verify it for first use. Once a name is on the database there is no need for subsequent verification. Details of the Legalisation Office can be found on the FCO website.

Responsibility for obtaining the apostille rests with the customer making the claim. A small fee is payable to the FCO. The customer should be referred to the current instructions on applying for an apostille that appear on the FCO website.

#### 8.30.5 *Letter of confirmation*

The INT Manual provides:

**INTM162140 certificates of residence: letter of confirmation** [May 2019]

As stated at INTM162020-30, customers will occasionally ask HMRC for confirmation that we regard them as a resident of the UK for purposes other than claiming relief from foreign taxes under the terms of a Double Taxation Agreement (DTA). For example, some countries require confirmation that that

person is regarded by HMRC as a resident of the UK before they can start trading in that country. Customers may also want HMRC to confirm that we regard them as UK resident so that they can claim relief from foreign taxes which they might be entitled to under the domestic law of the foreign state or EU law (such as under the EU Interest & Royalties Directive) rather than under the terms of the UK's DTA with that other state.

If a customer requests confirmation that HMRC regards them as being a resident of the UK for any purpose other than claiming benefits under a DTA, a 'letter of confirmation' should be issued instead of a Certificate of Residence (CoR).

The difference between a CoR and a 'letter of confirmation' is that a CoR is issued solely for the purpose of claiming benefits under a particular DTA. If a customer requires a CoR, they will be asked to provide the information listed at INTM162020 and HMRC will consider whether the customer is entitled to treaty benefits in accordance with the guidance at INTM162030-90 before issuing the CoR.

If a customer requires a letter of confirmation, the Officer will not need to check whether the customer fulfils the conditions of any DTA. They will only need to check that they can verify the statements which they are being asked to make. The standard form of words to use with a letter of confirmation should be as follows: [The wording is not set out here]

### 8.30.6 *Customised wording*

The INT Manual provides:

**INTM162150 customised certificates of residence and side letters** [May 2019]

Customers occasionally ask HMRC to provide a customised Certificate of Residence (CoR) for the purpose of claiming relief under a Double Taxation Agreement. For example, a customer may ask HMRC to confirm that they fulfil particular conditions of the DTA in question.

In such cases, providing the Officer can verify the additional statements they are being asked to make, it would be acceptable to issue a side letter to accompany the CoR. HMRC would, however, prefer not to make any deviations from the standard form of words it uses in certificates as set out in INTM162100 to INTM162120. If such deviations were allowed for some customers, it may result in other customers facing delays in having their claims to relief accepted.

Any such side letter should be headed "THIS IS NOT A CERTIFICATE OF RESIDENCE FOR THE PURPOSES OF ANY DOUBLE TAXATION AGREEMENT WITH THE UNITED KINGDOM" and, for the sake of consistency, should be referred to CSTD Business, Assets & International, Base Protection Policy Team.

### 8.30.7 *Application for certificate*

HMRC say:

**How to apply**

There are different ways to apply depending on the type of organisation, or if you're an individual.

**Individuals**

You should apply online for a certificate if your foreign income hasn't been taxed yet.<sup>150</sup> This includes self-employed sole traders.

**Partnerships - including Lloyd's syndicates**

Partnerships with a Customer Relationship Manager (CRM) or Customer Coordinator within the Large Business Service (LBS) or Large Partnership Unit should send all requests to them.

All other partnerships should send their requests to:

HMRC, Self Assessment, PO Box 4000, Cardiff CF14 8HR

**Companies**

Companies, usually limited companies, whose tax affairs are dealt with by HMRC's LBS should send requests to their CRM or any person nominated by the CRM to handle these requests.

All other companies, whose tax affairs are dealt with by HMRC's Local Compliance office should send requests to the Corporation Tax Services office responsible for handling the company's tax affairs.

**Registered pension schemes**

Fill in form APSS 146E and send it back to HMRC. Use the address on the form.

You'll also need to fill in forms APSS 146C and APSS 146D if someone's applying on your behalf.

**Collective investment schemes**

Fill in form CISC9 and send it back to HMRC. Use the address on the form.

**Trusts or non-registered pension schemes**

Write to HMRC Trust and Estates, First Floor, Ferrer's House, Castle Meadow Road, Nottingham NG2 1BB

**Charities**

Write to HMRC, Charities Correspondence SO708, PO Box 205, Bootle L69 9AZ

**Public bodies**

Write to HMRC Public Bodies Group, Customer Coordinator Team, Custom House, The Dockland, Pembroke Dock SA72 6TW<sup>151</sup>

8.30.8 *Claimant USA treaty-resident*

150 [https://online.hmrc.gov.uk/shortforms/form/PT\\_CertOfRes](https://online.hmrc.gov.uk/shortforms/form/PT_CertOfRes)

151 <https://www.gov.uk/guidance/get-a-certificate-of-residence>

HMRC Self Assessment helpsheet HS302 (Dual Residents 2020) provides:

**United States of America**

The US taxes its citizens on their worldwide income, wherever they live, so if you live in the US, you do not need a certificate of overseas residence. You're a US resident if:

- you've a substantial presence, permanent home or habitual abode in the US
- no country other than the UK treats you as a resident

### 8.31 Covid and treaty-residence

OECD have produced guidance (“**OECD Covid guidance**”).<sup>152</sup>

#### 8.31.1 *Individual stranded abroad*

OECD Covid guidance provides:

Two main situations could be imagined:

- A person is temporarily away from their home (perhaps on holiday, perhaps to work for a few weeks) and gets stranded in the host jurisdiction by reason of the COVID-19 pandemic and attains domestic law residence there...

40. In the first scenario, it is unlikely that the person would acquire residence status in the jurisdiction where the person is temporarily because of extraordinary circumstances. There are, however, rules in domestic legislation causing a person to become a resident if they are present in the jurisdiction for a certain number of days. But even if the person becomes a resident under such rules, if a tax treaty is applicable, the person is unlikely to be a resident of that jurisdiction under the treaty's tiebreaker rule. Such a temporary dislocation should therefore have no tax implications in the vast majority of cases.

The earlier version of the guidance provided:

... it is probably unlikely that the person would have a “permanent home” available to them in the host country. But if they did (and an apartment rented for a sufficiently long period would count), and they

---

152 [https://read.oecd-ilibrary.org/view/?ref=1060\\_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic](https://read.oecd-ilibrary.org/view/?ref=1060_1060114-o54bvc1ga2&title=Updated-guidance-on-tax-treaties-and-the-impact-of-the-COVID-19-pandemic)

See 101.27.1 (OECD Covid guidance).

had rented out their dwelling in their home country, they would be treated as treaty resident of the host state. Where the person had a permanent home in both states, it seems likely that the other tie-breaker tests (centre of vital interests, place of habitual abode, and nationality) would award residence to the home state. No remedial measure is suggested.

The answer is that the individual should not let out their dwelling in the home country; which in any event seems unlikely to happen in the short term.

### 8.31.2 *Individual returns home*

The OECD Covid paper provides:

Two main situations could be imagined ...

A person is working in a jurisdiction (the “current home jurisdiction”) and has acquired residence status there, but they temporarily return to their “previous home jurisdiction” because of the COVID-19 situation. They may either never have lost their status as resident of their previous home jurisdiction under its domestic legislation, or they may regain residence status on their return...

44. In the second case, the same treaty rules apply, but their application produces a more uncertain result because the person’s attachment to the previous home jurisdiction is stronger. In cases where the personal and economic relations in the two jurisdictions are close but the tie-breaker rule was in favour of the current home jurisdiction, the fact that the person moved to the previous home jurisdiction during the COVID-19 pandemic may tip the balance towards the previous home jurisdiction. This would usually be decided using the test of “habitual abode”. According to paragraph 19<sup>153</sup> of the Commentary on Article 4 of the OECD Model, however, the habitual abode of a person is where the individual lived habitually, in the sense of being customarily or usually present; the test will not be satisfied by simply determining in which of the two contracting jurisdictions the individual has spent more days during that period. “Habitual abode” refers to the frequency, duration and regularity of stays that are part of the settled routine of an individual’s life and are therefore more than transient. Days spent in a person’s previous home jurisdiction because of travel restrictions imposed as a public health measure by one of the governments of the

---

153 See 8.14 (Habitual abode).

countries involved should not result in a change to the person's habitual abode. The determination of habitual abode must cover a sufficient length of time for it to be possible to ascertain the frequency, duration and regularity of stays that are part of the settled routine of the individual's life.

45. In conclusion, because the COVID-19 pandemic is a period of major changes and an exceptional circumstance, tax administrations and competent authorities will have to consider a period where public health measures imposed or recommended by the government do not apply when assessing a person's residence status. If in the context of and as a result of the COVID-19 pandemic, an individual's temporary presence in a jurisdiction results in them becoming dual-resident, that person's place of residence for the purposes of the tie-breaker included in the applicable treaty is unlikely to change, given that the tie-breaker provision requires consideration of factors that shall also be assessed in a more normal period. A dislocation because a person cannot travel back to their home jurisdiction due to a public health measure of one of the governments of the jurisdictions involved should not by itself impact the person's residence status for purposes of the tax treaty. A different approach may be appropriate however, if the change in circumstances continues when the COVID-19 restrictions are lifted.

### 8.31.3 *Entity residence*

OECD Covid guidance provides:

29. It is unlikely that the COVID-19 situation will create any changes to an entity's residence status under a tax treaty. A temporary change in location of board members or other senior executives is an extraordinary and temporary situation due to the COVID-19 pandemic and such change of location should not trigger a change in treaty residence...

31. This potential change of circumstances may trigger an issue of dual residence (in cases where the change in the place of effective management results in a company being considered a resident of two jurisdictions simultaneously under their domestic laws). However, as recognised by the Commentary on the OECD Model, situations of dual residence of companies are relatively rare.

32. But even in situations where there would be dual residence of an entity, tax treaties provide tie-breaker rules ensuring that the entity is resident in only one of the jurisdictions. If the treaty contains a provision like the 2017 OECD Model tie-breaker rule, competent authorities deal with the dual residence issue on a case-by-case basis by mutual

agreement. This determination will take into consideration all of the facts and circumstances over the determination period. No single factor is determinative, rather a range of factors are taken into consideration. 33. In particular, paragraph 24.1<sup>154</sup> of the OECD Commentary on Article 4 illustrates the range of factors that the competent authorities are expected to take into consideration to make their determination, which includes: where the meetings of the company's board of directors or equivalent body are usually held; where the chief executive officer and other senior executives usually carry on their activities; where the senior day-to-day management of the company is carried on; where the person's headquarters are located; etc. It is also possible for competent authorities to agree to more general frameworks for such determinations, for example where particular fact patterns are present, under the authority of Article 25(3).

34. In situations where the treaty contains the pre-2017 OECD Model tie-breaker rule, the place of effective management will be the only criterion used to determine the residence of a dual-resident entity for tax treaty purposes. According to paragraph 24<sup>155</sup> of the Commentary on Article 4 of the 2014 OECD Model, the place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business as a whole are in substance made. All relevant facts and circumstances must be examined to determine the place of effective management. Paragraph 149 of the Commentary on Article 29 of the 2017 OECD Model explains that the concept of "place of effective management" was interpreted by some jurisdictions as being ordinarily the place where the most senior person or group of persons (for example a board of directors) made the key management and commercial decisions necessary for the conduct of the company's business.

35. Therefore, all relevant facts and circumstances should be examined to determine the "usual" and "ordinary" place of effective management, and not only those that pertain to an exceptional period such as the COVID-19 pandemic.

36. In conclusion, an entity's place of residence under the tie-breaker provision included in a tax treaty is unlikely to be impacted by the fact that the individuals participating in the management and decision-making of an entity cannot travel as a public health measure

---

154 See 8.18.1 (Relevant factors).

155 See 8.19.2 (POEM: Top level management).

imposed or recommended by at least one of the governments of the jurisdictions involved.

HMRC sing from the same songsheet:

**INTM120185 HMRC Approach to Company Residence in response to COVID-19 Pandemic [May 2020]**

... HMRC is very sympathetic to the disruption that is being endured.... POEM, like CMC, requires consideration of all the facts and circumstances. Unlike CMC however, the POEM can only be in one place at any one time. As such, even if CMC started to abide in the UK to a sufficient enough degree to result in UK residence under UK domestic law, it may be that after consideration of the activity in both territories, the POEM may be found to be in the other territory, and the company will therefore be treated as non-UK resident.

In cases where the DTA includes a competent authority based tie-breaker, the UK competent authority usually takes into account the factors as set out at INTM120085. Whilst it is not possible to predict the outcome of any discussions between the two competent authorities, the UK competent authority would take into account a wider range of factors than just CMC and POEM, and these will all be viewed in the round.

See too 7.14 (Covid & company residence).

## CHAPTER NINE

# SPLIT YEARS: ARRIVAL AND DEPARTURE

### 9.1

#### *Cross references*

The following topics are considered elsewhere:

- 5.38 (Arrival/departure: Disclosure)
- 5.45.10 (Split year): Scots/Welsh taxpayer
- 6.8 (Individual trustee: Split year)
- 11.1 (Exit taxes)
- App 12.1 (Pre-arrival planning)

The topic of companies becoming or ceasing to be UK resident is not discussed, though I hope to cover it in a future edition.

### **9.1 Residence throughout tax year**

The starting point, under the SRT, is that an individual is resident (or not) in the UK during the whole of a tax year. Sch 45 FA 2013 provides:

- 3 An individual (“P”) is resident in the UK for a tax year (“year X”) if—
  - (a) the automatic residence test is met for that year, or
  - (b) the sufficient ties test is met for that year.

- 4 If neither of those tests is met for that year, P is not resident in the UK for that year.

Para 2(3) sch 45 FA 2013 explains the significance of being resident “for” a year:

An individual who, in accordance with the statutory residence test, is resident (or not resident) in the UK “for” a tax year is taken for the purposes of any enactment relating to relevant tax<sup>1</sup> to be resident (or not resident) there at all times in that tax year.

---

1 “Relevant tax” means IT, CGT, IHT and CT; see para 1(4) sch 45 FA 2013, discussed 5.3 (Scope of SRT).

This general rule is subject to two reliefs of such breadth that the principle only rarely applies:

- (1) Statutory split-year reliefs
- (2) DTA relief

## 9.2 Split year rules

Para 40 sch 45 FA 2013 provides:

- (1) The effect of a tax year being a split year is to relax the effect of paragraph 2(3) (which treats individuals who are UK resident “for” a tax year as being UK resident at all times in that year).
- (2) When and how the effect of paragraph 2(3) is relaxed is defined in the special charging rules introduced by the amendments made by this Part.

I refer to these special charging rules as “split-year reliefs”.

- (3) Subject to those special charging rules (and any other special charging rules for split years that may be introduced in the future)<sup>2</sup>, nothing in this Part
  - [a] alters an individual's residence status for a tax year or
  - [b] affects his or her liability to tax.

A split year is the gateway to split-year reliefs; but the individual is UK resident throughout the split year for (almost) all UK tax purposes. In a (so-called) split year, it is not the case that the individual is UK resident in part of the year and not UK resident in the offshore part. So far as it may suggest otherwise, the term “split year” is misleading. But it is difficult to think of a better term, and no harm arises as long as that is kept in mind.

## 9.3 Split-year reliefs

### 9.3.1 *Split year: Pt 4/5 ITTOIA Income*

For Part 4 ITTOIA (Savings & Investment Income), s.368(2A) ITTOIA provides the split-year relief. To follow the sense, it needs to be read together with its preceding subsection:

- (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK.

---

<sup>2</sup> The words in brackets are otiose.

(2A) If income arising to an individual who is UK resident arises in the overseas part of a split year, it is to be treated for the purposes of this section as arising to a non-UK resident.

For Part 5 ITTOIA Miscellaneous Income, s.577(2A) repeats the same point verbatim.

### 9.3.2 Other split-year reliefs

These two provisions are quite general: they apply to all categories of income within Parts 4/5 ITTOIA (S&I Income/Part 5 ITTOIA Miscellaneous Income). Elsewhere split-year relief is set out separately for each category of income/gains. I discuss them in the chapters considering that type of income/gains:

Type of income/gain	See para	s.720 income	46.15.2; 46.20.1
Trading income	20.4.5; 20.21.4	s.731 income	47.43.6; 47.39.9
Property income	23.3.2	Chargeable-event gains	62.4.5
Employment income	33.12.1	Chargeable gains	53.7
Pension income	37.2	s.3 gains	60.12

Most of the split-year reliefs adopt the same wording as the Parts 4/5 ITTOIA split-year reliefs: they provide that income/gains in the overseas part of the split year are not charged. The individual still retains the status of resident throughout the year, but that does not matter so far as split-year relief applies. I refer to that as “**standard form split-year relief**”.

Occasionally the split-year relief provides that the individual is treated for some limited purpose as non-UK resident in the overseas part of the split year.<sup>3</sup>

### 9.3.3 When no split-year relief

In the absence of an applicable split-year relief, the default rule remains that income/gains of a year are fully chargeable, even if the year is a split year. It is not possible to give a full list of the cases where the default rule applies, but they include:

Type of income/gain	See para
<i>ToA income</i>	
s.720 income	46.15.2; 46.20.1
s.731 income	47.39.9; 47.43.6

---

<sup>3</sup> For instance, the trading income split-year reliefs.

s.643A income	44.24
s.86 gains	56.14
s.87 gains	57.18
Non-resident IT relief	42.9

Where these rules are in point, tax needs to be considered before the start of the tax year of arrival.

In addition, there is no split-year relief for the following:

<b>Topic</b>	<b>See para</b>
<i>Rules for qualifying for the remittance basis</i>	
Sub-£2k remittance basis taxpayers	16.9.1
Non-taxpayers remittance basis	16.10
<i>Year counting for</i>	
Deemed domicile	4.5
Remittance basis claim charge	16.12.10
OWR (recent arrivals) remittance basis	33.22

## 9.4 Definition of “split year”

“Split year” is elaborately defined. Para 43(1) sch 45 FA 2013 provides:

As respects an individual, a tax year is a “split year” if–

- (a) the individual is resident in the UK for that year, and
- (b) the circumstances of the case fall within–
  - (i) Case 1, Case 2 or Case 3 (cases involving actual or deemed departure from the UK), or
  - (ii) Case 4, Case 5, Case 6, Case 7 or Case 8 (cases involving actual or deemed arrival in the UK).

I refer to “**split-year Cases 1-8**”. The Cases<sup>4</sup> can be summarised as follows:

### Leaving UK

<i>Case</i>	<i>sch 45 para/Outline</i>	<i>Year before</i>	<i>Year after</i>	<i>See para</i>
1	44 Start full-time work overseas	Resident	Non-resident <sup>5</sup>	9.6
2	45 Partner starts work overseas	Resident	Non-resident	9.7
3	46 Cease to have UK home	Resident	Non-resident	9.8

### Coming to UK

4	47 Start to have only home in UK	Non-resident	Does not matter	9.9
5	48 Start full-time UK work	Non-resident	Does not matter	9.10

<sup>4</sup> Statute uses an initial capital, to reflect the technical terminology.

<sup>5</sup> The requirement for Cases 1 & 6 (only) is to be non-resident under overseas test 3 (full-time overseas work).

6	49	Cease full-time work overseas	Non-resident <sup>6</sup>	Resident	9.11
7	50	Partner ceases work overseas	Non-resident	Resident	9.12
8	51	Start to have UK home	Non-resident	Resident	9.13

## 9.5 Definitions for split-year rules

It is helpful first to deal with some definitions.

### 9.5.1 “Relevant year”

Para 43 sch 45 FA 2013 provides:

- (2) The 8 Cases are described in paragraphs 44 to 51.
- (3) In those paragraphs, the individual is referred to as “the taxpayer” and the tax year as “the relevant year”.
- (4) In applying Part 2 of this Schedule to those paragraphs, for “P” read “the taxpayer”.

The “relevant year” will be a split year if the conditions of one of the Cases is met.

### 9.5.2 “Previous/next tax year”

Para 52 sch 45 FA 2013 provides commonsense definitions:

- (1) This paragraph applies for the purposes of paragraphs 44 to 51.
- (2) A reference to “the previous tax year” is to the tax year preceding the relevant year.
- (3) A reference to “the next tax year” is to the tax year following the relevant year.

### 9.5.3 “Partner”

Para 52(4) sch 45 FA 2013 provides:

- “Partner”, in relation to the taxpayer, means—
- (a) a husband or wife or civil partner,
  - (b) if the taxpayer and another person are living together<sup>7</sup> as husband and wife, that other person, or
  - (c) if the taxpayer and another person of the same sex are living together as if they were civil partners, that other person.

In non-legal English the word “partner” has long had this sense. In legal English (or at least, in tax legislation) the word has only been used to

---

6 See above footnote.

7 See App 3.4.3 (Living together: married couple).

describe a partner within the meaning of the Partnership Acts; so this is something of a Plain English innovation. But no confusion is likely to arise.

#### 9.5.4 *Rounding*

Para 52(5) sch 45 FA 2013 provides:

If calculation of the appropriate number results in a number of days that is not a whole number, the appropriate number is to be rounded up or down as follows—

- (a) if the first figure after the decimal point is 5 or more, round the appropriate number up to the nearest whole number,
- (b) otherwise, round it down to the nearest whole number.

#### 9.5.5 *“The overseas part”*

Para 53 sch 45 FA 2013 provides:

(1) “The overseas part” of a split year is the part of that year defined below—

- (a) for the Case in question, or
- (b) if the taxpayer’s circumstances fall within more than one Case, for the Case which has priority (see paragraphs 54 and 55).<sup>8</sup>

(2) For Case 1, the overseas part is—

- (a) if there is only one period falling within paragraph 44(3) [overseas work period], the part beginning with the first day of that period, and
- (b) if there is more than one such period, the part beginning with the first day of the longest of those periods.

(3) For Case 2, the overseas part is the part beginning with the deemed departure day as defined in paragraph 45(7) and (8).

(4) For Case 3, the overseas part is the part beginning with the day mentioned in paragraph 46(3)(a) [day ceasing to have UK home].

(5) For Case 4, the overseas part is the part before the day mentioned in paragraph 47(3) [day UK Home Test is met].

(6) For Case 5, the overseas part is—

- (a) if there is only one period falling within paragraph 48(3) [roughly, day starting UK work], the part before that period begins, and
- (b) if there is more than one such period, the part before the first of those periods begins.

---

<sup>8</sup> See 9.14 (Priority between Cases).

- (7) For Case 6, the overseas part is—
  - (a) if there is only one period falling within paragraph 49(3), the part ending with the last day of that period, and
  - (b) if there is more than one such period, the part ending with the last day of the longest of those periods.
- (8) For Case 7, the overseas part is the part before the deemed arrival day as defined in paragraph 50(7) and (8).
- (9) For Case 8, the overseas part is the part before the day mentioned in paragraph 51(3)(a) [day UK home is acquired].

### 9.5.6 “*The UK part*”

Para 56 sch 45 FA 2013 provides:

“The UK part” of a split year is the part of that year that is not the overseas part.

## 9.6 Case 1: Start work overseas

Para 44(1) sch 45 FA 2013 provides:

The circumstances of a case fall within Case 1 if they are as described in sub-paragraphs (2) to (4).

### 9.6.1 *UK resident in previous year*

Para 44(2) sch 45 FA 2013 provides:

The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).

This is a requirement in each of split year Cases 1-3, which apply to leavers.

### 9.6.2 *Overseas work*

Para 44(3) sch 45 FA 2013 provides:

There is at least one period (consisting of one or more days) that—

- (a) begins with a day that—
  - (i) falls within the relevant year, and
  - (ii) is a day on which the taxpayer does more than 3 hours’ work overseas,
- (b) ends with the last day of the relevant year, and
- (c) satisfies the overseas work criteria.

### 9.6.3 “*Overseas work criteria*”

“Overseas work criteria” is a label for 4 sets of conditions. Para 44(5) sch 45 FA 2013 provides:

A period “satisfies the overseas work criteria” if—

- (a) the taxpayer works sufficient hours overseas, as assessed over that period,

See 9.6.4 (“Sufficient hours overseas”).

- (b) during that period, there are no significant breaks from overseas work,
- (c) the number of days in that period on which the taxpayer does more than 3 hours’ work in the UK does not exceed the permitted limit, and

I refer to days within (c) as “**UK workdays**”.

- (d) the number of days in that period falling within sub-paragraph (6) does not exceed the permitted limit.

I refer to days within (d) as “**UK days**”; see 9.6.6 (“The permitted limit”).

#### 9.6.4 “*Sufficient hours overseas*”

Para 44(5) sch 45 FA 2013 provides:

A period “satisfies the overseas work criteria” if—

- (a) the taxpayer works sufficient hours overseas, as assessed over that period...

Para 44(7) sch 45 FA 2013 provides:

To work out whether the taxpayer works “sufficient hours overseas” as assessed over a given period, apply paragraph 14(3) but with the following modifications—

- (a) for “P” read “the taxpayer”,
- (b) for “year X” read “the period under consideration”,
- (c) for “365 (or 366 if year X includes 29 February)” read “the number of days in the period under consideration”, and
- (d) in paragraph 28(9)(b), as it applies for the purposes of step 3, for “30” read “the permitted limit”.

Amended as para 44(7) requires, para 14(3) provides:

Take the following steps to work out whether [the taxpayer] works “sufficient hours overseas” as assessed over [the period under consideration]—

*Step 1 [disregarded days]*

Identify any days in [the period under consideration] on which [the taxpayer] does more than 3 hours' work in the UK, including ones on which [the taxpayer] also does work overseas on the same day.

The days so identified are referred to as “disregarded days”.

*Step 2 [net overseas hours]*

Add up (for all employments held and trades carried on by [the taxpayer]) the total number of hours that [the taxpayer] works overseas in [the period under consideration], but ignoring any hours that [the taxpayer] works overseas on disregarded days.

The result is referred to as [the taxpayer]’s “net overseas hours”.

*Step 3 [reference-period days]*

Subtract from the number of days in [the period under consideration]—

- (a) the total number of disregarded days, and
- (b) any days that are allowed to be subtracted, in accordance with the rules in paragraph 28 of this Schedule, to take account of periods of leave and gaps between employments.<sup>9</sup>

The result is referred to as the “reference period”.

Armed with the figures from steps 2 and 3, we proceed to the computation. This is set out in the remaining two steps:

*Step 4: [compute reference period ÷ 7]*

Divide the reference period by 7. If the answer is more than 1 and is not a whole number, round down to the nearest whole number. If the answer is less than 1, round up to 1.

*Step 5 [compute net overseas hours ÷ reference-period weeks]*

Divide [the taxpayer]’s net overseas hours by the number resulting from step 4.

If the answer is 35 or more, [the taxpayer] is considered to work “sufficient hours overseas” as assessed over [the period under consideration].

See 5.8.2 ((a): Sufficient hours overseas).

RDRM provides:

**RDRM12070: Residence: The SRT: Split year treatment: Case1: Calculating whether individual works full-time overseas in the relevant period [Sep 2019]**

The table below, sets out the permitted limits for Case 1 – the appropriate portions of the full-year permitted limits.

---

<sup>9</sup> See 5.23 (Reference period: non-work days).

Date	X - see note	Y - see note
6 - 30 Apr	30	90
1 - 31 May	27	82
1 - 30 Jun	25	75
1 - 31 Jul	22	67
1 - 31 Aug	20	60
1 - 30 Sep	17	52
1 - 31 Oct	15	45
1 - 30 Nov	12	37
1 - 31 Dec	10	30
1 - 31 Jan	7	22
1 - 29 Feb	5	15
1 - 31 Mar	2	7
1 - 5 Apr		

Note

X = permitted limit on days where you can work more than 3 hours and maximum number of days that can be subtracted for gaps between employments

Y = permitted limit on days spent in the UK

RDRM provides some examples:

**RDRM12080: Residence: The SRT: Split year treatment: Case1: The UK and overseas parts of the tax year [Aug 2019]**

Example 1 (Richard)

R has lived and worked in London for the last 10 years and is UK resident for tax purposes. He is seconded abroad by his employer for a 3 year period. His overseas contract starts on 3 November 2014, when he takes up duty at his new office in Madrid. For the purposes of this example R fails the third automatic overseas test for 2014-2015 but meets it for 2015-2016.

On 2 December 2014 R returns to the UK office to finish off a project he was involved in before his secondment. His work in the UK is completed on 16 December 2014, (11 UK workdays and 4 non-working days). He then takes leave until 28 December (12 days), flying back to Madrid and resuming work on 29 December. On his return to Madrid he works only at the Madrid office until 5 April 2015.

R calculates that he meets the criteria for Case 1 split year treatment from 3 November, this being the first date on which he works for more than 3 hours overseas. Using the table at RDRM12070 he calculates that between 3 November 2014 and 5 April 2015 he can spend 37 days in the UK and work for more than 3 hours in the UK for up to 12 days.

R determines that:

- he was UK resident for the previous tax year (2013-2014)
- he is resident in the UK for the current year (2014-2015) and that he does not meet the third automatic overseas test
- he was non-UK resident for 2015-2016
- he calculates he meets the sufficient hours overseas test for the period 3 November 2014 to 5 April 2015
- he did not exceed the limits of 12 UK work days and 37 days spent in the UK between 3 November 2014 and 5 April 2015, and
- he had no significant break from overseas work during the period.

To determine that he worked full-time overseas during the relevant period, R undertook the following calculation.

His reference period:

Days in period 3/11/14 to 5/4/15 = 154

Less:

- Disregarded days 11  
(days spent working in the UK for more than 3 hours)
- Annual, sick and parental leave 6 (Leave on 17, 18, 19, 22, 23 and 24 December)
- embedded non-working days 2 (20 and 21 December)

Total 19

Reference period = 135 days

Sufficient hours test

All hours worked overseas from 3 November 670

Less

Hours worked on disregarded days Nil

Net overseas hours 670

Divide reference period by 7 ( $135/7 = 19.28$  round down to 19)

Divide net overseas hours by 19 ( $670/19 = 35.26$ )

R meets the sufficient hours overseas test because his average over the reference period, (3 November 2014 to 5 April 2015) is more than 35.

For R the UK part of the tax year ends on 2 November 2014, and the overseas part starts on 3 November 2014 – the earliest date from which he meets all the conditions of the sufficient hours overseas test.

Example 2 (Amanda)

A has been living in the UK since she was born and is UK resident for tax purposes. She has worked in the media industry for 5 years and gets a job as a reporter on a 3 year contract based in India. She moves there on 10 November 2013, and lives in an apartment provided by her new employer. She meets the overseas work criteria from 10 November 2013. She returns to the UK to visit her family over the Christmas period for 2 weeks, and does not work while she is there.

A remains working in India throughout the tax year 2014-2015, again

only returning to the UK for a 2 week period over Christmas.

A will receive split year treatment for 2013-2014 tax year because:

- she was UK resident for 2012-2013 and 2013-2104
- she is non-UK resident for 2014-2015 and meets the third automatic overseas test for that year

From 10 November 2013 until 5 April 2014 she:

- does not work at all in the UK
- spends 14 days in the UK, which is less, by reference to the table at RDRM12070, than the permitted limit of 37 days.

For A, the UK part of the tax year will end on 9 November 2013, and the overseas part of the tax year will start on 10 November 2013.

The overseas part of the tax year starts on the first day of the relevant period, as long as the individual meets the overseas work criteria for that period. (Refer to RDRM12060).

### 9.6.5 *UK days within permitted limit*

Para 44 sch 45 FA 2013 provides:

- (5) A period “satisfies the overseas work criteria” if ...
  - (d) the number of days in that period falling within sub-paragraph (6) does not exceed the permitted limit.
- (6) A day falls within this sub-paragraph if—
  - (a) it is a day spent by the taxpayer in the UK, but
  - (b) it is not a day that is treated under paragraph 23(4)<sup>10</sup> as a day spent by the taxpayer in the UK.

I refer to days within (6) as “**UK days**”.

### 9.6.6 *“The permitted limit”*

The expression “permitted limit” is used in split-year Cases 1, 2 and 6. It is defined each time, but the Cases 1 and 6 definitions are identical.

For Case 1, the “permitted limit” matters for three purposes:

- (1) UK workdays must not exceed the permitted limit: para 44(5)(c).
- (2) UK days must not exceed the permitted limit: para 44(5)(d).
- (3) For the purposes of ascertaining the reference period: para 44(7)(d).

Case 1 has two definitions of “permitted limit”. It would have been simpler to have two terms, but there it is.

Para 44(8) sch 45 FA 2013 provides:

---

<sup>10</sup> See 5.19 (Deeming rule (frequent visits)).

The permitted limit is—

- (a) for sub-paragraphs (5)(c) [UK workdays] and (7)(d), the number found by reducing 30 by the appropriate number, and
- (b) for sub-paragraph (5)(d) [days spent in UK], the number found by reducing 90 by the appropriate number.

### 9.6.7 “*The appropriate number*”

The drafter of the SRT was fond of the expression “appropriate number” which is used in almost all the split year Cases, with a different definition every time, or sometimes (as in split-year Case 1) with two definitions. Para 44(9) sch 45 FA 2013 provides:

The appropriate number is the result of—

$$A \times (B \div 12)$$

where—

“A” is—

- (a) 30, for sub-paragraphs (5)(c) and (7)(d), or
- (b) 90, for sub-paragraph (5)(d), and

“B” is the number of whole months in the part of the relevant year before the day mentioned in sub-paragraph (3)(a).

One rounds down or up to the nearest whole number (rounding half up to the next number).<sup>11</sup>

### 9.6.8 *Overseas work in following year*

Para 44(4) sch 45 FA 2013 provides:

The taxpayer is not resident in the UK for the next tax year because the taxpayer meets the third automatic overseas test for that year (see paragraph 14).

In short, the individual must continue working overseas in the following year. See 5.8 (Automatic overseas test 3: Overseas work).

## 9.7 **Case 2: Partner starts work overseas**

Para 45(1) sch 45 FA 2013 provides:

The circumstances of a case fall within Case 2 if they are as described in subparagraphs (2) to (6).

### 9.7.1 *UK resident in previous year*

---

<sup>11</sup> See 9.5.4 (Rounding).

Para 45(2) sch 45 FA 2013 provides:

The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).

This is a requirement in each of split year Cases 1-3, which apply to leavers.

### 9.7.2 *Partner working overseas*

Para 45(3) sch 45 FA 2013 provides:

The taxpayer has a partner<sup>12</sup> whose circumstances fall within Case 1 for—  
 (a) the relevant year, or  
 (b) the previous tax year.

### 9.7.3 *Living with partner*

Para 45(4) sch 45 FA 2013 provides:

On a day in the relevant year, the taxpayer moves overseas so the taxpayer and the partner can continue to live together while the partner is working overseas.

### 9.7.4 *No (principal) UK home*

Para 45(5) sch 45 FA 2013 provides:

In the part of the relevant year beginning with the deemed departure day—  
 (a) the taxpayer  
     [i] has no home in the UK at any time, or  
     [ii] has homes in both the UK and overseas but spends the greater part of the time living in the overseas home, and  
 (b) the number of days that the taxpayer spends in the UK does not exceed the permitted limit.

There are two possible deemed departure days. Para 45 sch 45 FA 2013 provides:

(7) If sub-paragraph (3)(a) applies, [partner's split year is the same year] the "deemed departure day" is the later of—  
 (a) the day mentioned in sub-paragraph (4), and  
 (b) the first day of what is, for the partner, the overseas part of the

---

12 See 9.5.3 ("Partner").

relevant year as defined for Case 1 (see paragraph 53).

(8) If sub-paragraph (3)(b) applies, [ partner's split year is the previous year] the "deemed departure day" is the day mentioned in sub-paragraph (4).

Para 45 sch 45 FA 2013 defines the permitted limit in two stages:

(9) The permitted limit is the number found by reducing 90 by the appropriate number.

(10) The appropriate number is the result of—

$$A \times (B \div 12)$$

where—

"A" is 90, and

"B" is the number of whole months in the part of the relevant year before the deemed departure day.

One rounds down or up to the nearest whole number (rounding half up to the next number).<sup>13</sup>

It would have been easier to say that the permitted limit is  $90 - (A \times B \div 12)$  but the drafter of the SRT is somewhat algebra-phobic (or else thought that the reader would be).

### 9.7.5 *Non-resident in next year: Case 2*

Para 45(6) sch 45 FA 2013 provides:

The taxpayer is not resident in the UK for the next tax year.

### 9.7.6 *HMRC examples*

RDRM provides:

#### **RDRM12120: Residence : The SRT: Split year treatment: Case 2: The UK and overseas parts of the tax year [Aug 2019**

Example (Peter and Amanda)

P is A's husband (see example 2 at RDRM12080). He too lived in the UK for all his life and was resident in the UK for tax purposes. He travels with A on 8 January 2014 to live with her in India, having given up his job. A and P have let their flat in the UK for a 3 year period, commencing on 9 January 2014.

Once in India P spends his time following his lifelong hobby as a lepidopterist, and catalogues Indian butterflies. He spend all his time there, except for the Christmas trips to the UK with A.

---

<sup>13</sup> See 9.5.4 (Rounding).

P will receive split year treatment for the tax year 2013-2014, as he meets the Case 2 conditions:

- he has no home in the UK after 8 January 2014
- he was resident for 2012-2013
- he is non-UK resident for 2014-2015

From 8 January 2014 until 5 April 2014 P spends less than the permitted limit of 22 days in the UK, (table at RDRM12070).

For P the UK part of the tax year will end on 7 January 2014, and the overseas part of the tax year will start on 8 January 2014, the day he joined A to live together in India.

## **9.8 Case 3: Cease to have UK home**

Para 46(1) sch 45 FA 2013 provides:

The circumstances of a case fall within Case 3 if they are as described in subparagraphs (2) to (6).

### *9.8.1 UK resident in previous year*

Para 46(2) sch 45 FA 2013 provides:

The taxpayer was resident in the UK for the previous tax year (whether or not it was a split year).

This is a requirement in each of split year Cases 1-3, which apply to leavers.

### *9.8.2 No UK home*

Para 46(3) sch 45 FA 2013 provides:

At the start of the relevant year the taxpayer had one or more homes in the UK but-

- (a) there comes a day in the relevant year when P ceases to have any home in the UK, and
- (b) from then on, P has no home in the UK for the rest of that year.

### *9.8.3 Less than 16 UK days*

Para 46(4) sch 45 FA 2013 provides:

In the part of the relevant year beginning with the day mentioned in subparagraph (3)(a) [day when ceasing to have UK home], the taxpayer spends fewer than 16 days in the UK.

### *9.8.4 Non-resident in next year: Case 3*

Para 46(5) sch 45 FA 2013 provides:

The taxpayer is not resident in the UK for the next tax year.

### 9.8.5 *Sufficient overseas link*

Para 46 sch 45 FA 2013 provides:

(6) At the end of the period of 6 months beginning with the day mentioned in sub-paragraph (3)(a), the taxpayer has a sufficient link with a country overseas.

(7) The taxpayer has a “sufficient link” with a country overseas if and only if-

- (a) the taxpayer is considered for tax purposes to be a resident of that country<sup>14</sup> in accordance with its domestic laws, or
- (b) the taxpayer has been present in that country (in person) at the end of each day of the 6-month period mentioned in sub-paragraph (6), or
- (c) the taxpayer’s only home is in that country or, if the taxpayer has more than one home, they are all in that country.

### 9.8.6 *HMRC example*

RDRM provides:

**RDRM12140: Residence: The SRT: Split year treatment: Case 3: The UK and overseas parts of the tax year [Aug 2019]**

Example (M)

M has been based in the UK for most of her working life, and has been resident here for tax purposes. On holiday in Bali in the summer of 2013 she meets Maurice, who lives and works in the United Arab Emirates. Some 12 months later, they marry. M resigns from her job and moves out of her home on 24 September 2014. She spends the nights of 24 and 25 September in a hotel and flies out to the UAE to live with Maurice on 26 September 2014. She has no close family in the UK and does not return to the UK in the remainder of the tax year. She does not take up any employment in the UAE. Maurice and M plan to live in the UAE for at least another 5 years.

M will receive split year treatment for 2014-2015 as she meets the Case 3 conditions:

- she was UK resident for 2013-2014
- she is non-UK resident for 2015-2016

---

14 Para 145 sch 45 FA 2013 provides: “country” includes a state or territory.

- from 24 September 2014 until 5 April 2015 she has no home in the UK and spends fewer than 16 days in the UK
  - she had established her only home is in the UAE within 6 months
- For M, the overseas part of the tax year will start on 24 September 2014, the day she no longer had a home in the UK.

The overseas part of the tax year is the period which starts on the date in the tax year when the individual ceases to have a home in the UK until the end of the tax year.

## **9.9 Case 4: Start to have UK home only**

Para 47(1) sch 45 FA 2013 provides:

The circumstances of a case fall within Case 4 if they are as described in subparagraphs (2) to (4).

See too 9.13.5 (Cases 4/8 compared).

### *9.9.1 Non-resident in previous year*

Para 47(2) sch 45 FA 2013 provides:

The taxpayer was not resident in the UK for the previous tax year.

This is a requirement in each of split year Cases 4 - 8, which apply to arrivals.

### *9.9.2 Acquiring UK home*

Para 47(3) sch 45 FA 2013 provides:

- [a] At the start of the relevant year, the taxpayer did not meet the only home test, but
- [b] there comes a day in the relevant year when that ceases to be the case and
- [c] the taxpayer then continues to meet the only home test for the rest of that year.

Para 47(5) sch 45 FA 2013 defines the Only Home Test:

The “only home test” is met if-

- (a) the taxpayer has only one home and that home is in the UK, or
- (b) the taxpayer has more than one home and all of them are in the UK.

### *9.9.3 UK-ties tests*

Para 47(4) sch 45 FA 2013 provides:

For the part of the relevant year before that day [when Only Home Test is met], the taxpayer does not have sufficient UK ties.

UK-ties tests occur in split-year Cases 4, 5 and 8. The expression “sufficient UK ties” is defined separately, three times in all, but the definitions follow the same template. It has the usual SRT meaning<sup>15</sup> except for two adjustments:

- (1) The test is applied over the “overseas part” of the split year (if it is a split year); UK days and UK ties in the UK part of the split year do not count.
- (2) There is an reduction in the day count limit, reducing the days allowed in line with the length of the “overseas part” of the split year.

Para 47(6)(a) sch 45 FA 2013 deals with the first adjustment:

(6) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (4) with the following adjustments-

- (a) references in those paragraphs and that Part to year X are to be read as references to the part of the relevant year mentioned in subparagraph (4) [time until Only Home Test is met] ...

(8) Sub-paragraph (6)(a) does not apply to the references to year X in paragraphs 32(1)(b) and 33 of this Schedule (which relate to the residence status of family members)<sup>16</sup> so those references must continue to be read as references to year X.

It may be helpful to set out para 17 sch 45 FA 2013 as amended:

(1) The sufficient ties test is met for ~~year X~~ the part of the relevant year mentioned in subparagraph (4) [time until Only Home Test is met] if-

- (a) P meets none of the automatic UK tests and none of the automatic overseas tests, but
  - (b) P has sufficient UK ties for that year.
- (2) “UK ties” is defined in Part 2 of this Schedule.
- (3) Whether P has “sufficient” UK ties for ~~year X~~ the part of the relevant year mentioned in subparagraph (4) [time until Only Home Test is met] will depend on-
- (a) whether P was resident in the UK for any of the previous 3 tax years, and

---

15 See 5.14 (Sufficient ties test).

16 See 5.27.3 (Ascertaining family residence).

(b) the number of days that P spends in the UK in ~~year X~~ the part of the relevant year mentioned in subparagraph (4) [time until Only Home Test is met].

(4) The Tables in paragraphs 18 and 19 show how many ties are sufficient in each case.

#### 9.9.4 *Computing number of days*

Para 18/19 sch 45 FA 2013 define “sufficient ties” for leavers /arrivers. It is convenient to combine the two into a single table. As amended by para 47(6)(a), para 18/19 provide:

<b>Days spent by P in the UK in year-x [the time until Only Home Test is met]</b>	<b>sufficient ties leavers</b>	<b>sufficient ties arrivers</b>
More than [15] but not more than [45]	At least 4	[non-resident]
More than [45] but not more than [90]	At least 3	All 4
More than [90] but not more than [120]	At least 2	At least 3
More than [120]	At least 1	At least 2

Para 47 sch 45 FA 2013 adjusts the figures in square brackets:

(6) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (4) with the following adjustments ...

(b) each number of days mentioned in the first column of the Table in paragraphs 18 and 19 is to be reduced by the appropriate number.

(7) The appropriate number is found by multiplying the number of days, in each case, by  $A \div 12$

where “A” is the number of whole months in the relevant year beginning with the day mentioned in sub-paragraph (3) [day Only Home Test is met].

RDRM provides:

**RDRM12270: Residence: The SRT: Split year treatment: Case 8: Starting to have a home in the UK [Oct 2019]**

... not have sufficient UK ties to make them UK resident in the period from the 6 April to the point they start to have a UK home – when they are considering whether they have sufficient UK ties in this part of the year, they should reduce the day count limits in the sufficient ties tables (refer to RDRM11520) by substituting the values from the table below.

**Day before satisfying only home or having a UK home tests is<sup>17</sup>**

	6 to 30 Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	Jan	Feb	1 Mar to 5 Apr
“A”	1	2	3	4	5	6	7	8	9	10	11	12
A÷12	0.08	0.16	0.25	0.33	0.42	0.5	0.58	0.67	0.75	0.83	0.92	12
For 15 substitute	1	2*	4	5	6	7*	9	10	11	12*	14	15
For 45 substitute	4	7*	11	15	19	22	26	30	34	37*	41	45
For 90 substitute	7*	15	22*	30	37*	45	52*	60	67*	75	82*	90
For 120 substitute	10	20	30	40	50	60	70	80	90	100	110	120

There are two points to note about this table. Firstly, the author has taken the view that where the Only Home Test is met in the period 6-30 April, the number A is 1. Suppose the Only Home Test is met on 10 April. One might have thought that the number of whole months in the tax year beginning with 10 April is 11.

Secondly, the author has forgotten the rule that a fraction of exactly one half is to be rounded up.<sup>18</sup> The figures marked \* should all be increased by one. Perhaps fortunately, that will not often make any difference.

9.9.5 HMRC example

RDRM provides:

**RDRM12160: Residence: The SRT: Split year treatment: Case 4: The overseas and UK parts of the tax year [Aug 2019]**

Example (Olan)

O has been working for his employer in Germany for the last 5 years. He has no UK ties and was not resident in the UK. On 1 June 2013 O moves to the UK to look for work here. He rents out his apartment in Germany on a 2 year lease, from 27 May 2013.

O arrives in the UK and stays in temporary accommodation while he finds an apartment to rent. He signs a 12 month lease on an apartment in London on 1 July 2013.

He starts UK employment on 22 July 2013 and remains in the UK for a further 2 years.

O receives split year treatment for 2013-2014 as he meets the Case 4

17 I have added the first two rows to explain the computation which follows, rounded to two decimal places in the second row, and added the asterix.

18 See 9.5.4 (Rounding).

conditions:

- he is non-UK resident for 2012-2013
- he started to have his only home in the UK during the tax year and that continued until at least the end of the tax year
- he had no UK ties from 6 April 2013 to 1 July 2013

For O the overseas part of the tax year will end on 30 June 2013, and the UK part of the tax year will start on 1 July 2013, the day he started to have his only home in the UK.

Note: O might also meet the criteria for Case 5 or Case 8 split years, but priority is given to that case where the overseas part of the tax year is the shortest.

## 9.10 Case 5: Start work in UK

Para 48(1) sch 45 FA 2013 provides:

The circumstances of a case fall within Case 5 if they are as described in subparagraphs (2) and (3).

### 9.10.1 *Non-resident in previous year*

Para 48(2) sch 45 FA 2013 provides:

The taxpayer was not resident in the UK for the previous tax year.

This is a requirement in each of split year Cases 4 - 8, which apply to arrivers.

### 9.10.2 *UK work*

Para 48(3) sch 45 FA 2013 provides a set of 5 conditions:

There is at least one period of 365 days in respect of which the following conditions are met—

- (a) the period begins with a day that—
  - (i) falls within the relevant year, and
  - (ii) is a day on which the taxpayer does more than 3 hours' work in the UK,
- (b) in the part of the relevant year before the period begins, the taxpayer does not have sufficient UK ties,
- (c) the taxpayer works sufficient hours in the UK, as assessed over the period,
- (d) during the period, there are no significant breaks from UK work, and
- (e) at least 75% of the total number of days in the period on which the taxpayer does more than 3 hours' work are days on which

the taxpayer does more than 3 hours' work in the UK.

### 9.10.3 “Sufficient hours in the UK”

Para 48(4) sch 45 FA 2013 provides:

To work out whether the taxpayer works “sufficient hours in the UK” as assessed over a given period, apply paragraph 9(2) but for “P” read “the taxpayer”.

### 9.10.4 *UK-ties test: Case 5*

Para 48(3) sch 45 FA 2013 provides:

There is at least one period of 365 days in respect of which the following conditions are met ...

(b) in the part of the relevant year before the period begins, the taxpayer does not have sufficient UK ties ...

(5) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (3)(b) with the following adjustments—

(a) references in those paragraphs and that Part to year X are to be read as references to the part of the relevant year mentioned in subparagraph (3)(b), and

(b) each number of days mentioned in the first column of the Table in paragraphs 18 and 19 is to be reduced by the appropriate number.

(6) The appropriate number is found by multiplying the number of days, in each case, by  $A \div 12$

where “A” is the number of whole months in the part of the relevant year beginning with the day on which the 365-day period in question begins.

(7) Sub-paragraph (5)(a) does not apply to the references to year X in paragraphs 32(1)(b) and 33 of this Schedule (which relate to the residence status of family members) so those references must continue to be read as references to year X.

This is (more or less) the standard form for split-year UK-ties tests, and I discuss it elsewhere.<sup>19</sup>

### 9.10.5 *HMRC example*

---

<sup>19</sup> See 9.9.3 (UK-ties tests).

The RDRM provides:

**RDRM12180: Residence: The SRT: Split year treatment: Case 5: The overseas and UK parts of the tax year [Aug 2019]**

Example

Andrea arrived in the UK on 20 May 2013 from Poland for a 2 week visit. She stays with her sister who is working in the UK. This is Andrea's first trip to the UK, and she has never previously been UK resident for tax purposes.

Just before Andrea is about to return to Poland, she is offered a part-time job at a hotel. This will be her first ever job. She starts work on 10 June 2013. For the first 8 weeks of her employment she works 20 hours per week (5 hours per day), but from 5 August 2013 she is offered full-time work of 40 hours per week. Andrea takes 20 days leave during the tax year; there are no non-working days embedded within any of her periods of leave.

Although for the first 8 weeks of her employment Andrea only works 20 hours per week, she works out that she meets the third automatic UK test from 10 June 2013, her computations are:

Step 1: In a 365 days period that are no disregarded days when Andrea did more than 3 hours work overseas

Step 2: Total number of UK hours worked during 365 day period (8 weeks x 20 hours & 40 weeks x 40 hours) = 1760 hours

Step 3: Subtract disregarded days = 0, and 20 days annual leave, that can be deducted from 365 = 345 days reference period.

Step 4: Divide reference period by 7 ( $345/7$ ) = 49.29, rounded down to 49

Step 5: Divide Andrea's net UK hours by 49 (the result of step 4)  $1760/49 = 35.91$  hours

Andrea's hours average out at over 35 over the 365 day period from 10 June 2013 (which is a day on which she worked for more than 3 hours in the UK). She meets the third automatic UK test from that date.

Andrea meets the criteria for Case 5 split year on the basis that:

- she was non-UK resident in the previous tax year
- she meets the third automatic UK test for the 365 day period commencing on 10 June 2013, (which is a day on which she worked for more than 3 hours in the UK)
- in the part of the year from 6 April 2013 until 10 June 2013 she did not have sufficient UK ties. (Refer to table in RDRM12220)

The minutes of the Joint Forum on Expatriate Tax and NICs provide:

**Sufficient hours – non alignment of Case 5 and FTWUK**

These tests diverge insofar as, for Case 5, the period starts with a day on

which the individual works for three or more hours in the UK, but this is not a requirement for the third automatic UK test. You could therefore find that an individual is resident under the third automatic UK test in the tax year following return to the UK, but does not meet the Case 5 condition to split the arrival year, which would be seen as odd. Could this be addressed?

HMRC reply: HMRC agrees these dates can differ and this is because the two tests are testing different things. If an individual meets the FTWUK test for a year they will be resident here. Case 5 then determines if they are entitled to split year tax treatment in that tax year. The Case 5 3hr requirement is there to ensure that the UK part of a split year does not start before the individual has done any UK work – which would otherwise be possible under the 35hr averaging requirement. Not setting it as a requirement does not seem to make sense for a split on the basis of FTWUK. The Government believes that for the majority of people the 365 day period they identify for FTWUK is likely to start with a day on which they worked more than 3 hours in the UK even though it is not a requirement for the 3rd automatic UK test.<sup>20</sup>

## **9.11 Case 6: Stop work overseas**

Split-year Case 1 is for individuals who start work overseas. Case 6 is for individuals who have been working abroad and stop. Accordingly there are concepts and definitions in common, though the legislation repeats them in each place.

Para 49(1) sch 45 FA 2013 provides:

The circumstances of a case fall within Case 6 if they are as described in subparagraphs (2) to (4).

### *9.11.1 Non-resident in previous year*

Para 49(2) sch 45 FA 2013 provides:

The taxpayer—

- (a) was not resident in the UK for the previous tax year because the taxpayer met the third automatic overseas test for that year (see paragraph 14), but
- (b) was resident in the UK for one or more of the 4 tax years immediately preceding that year.

---

<sup>20</sup> 29 January 2014

[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/302475/140326\\_Expats\\_Forum\\_Jan\\_14\\_Minutes\\_FINAL.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/302475/140326_Expats_Forum_Jan_14_Minutes_FINAL.pdf)

Para (a) is a requirement in each of split year Cases 4 - 8, which apply to arrivers, but in this Case non-residence must be specifically due to meeting the 3<sup>rd</sup> overseas test. See 5.8 (Overseas test 3: Overseas work).

#### 9.11.2 *Full-time overseas work*

Para 49(3) sch 45 FA 2013 provides:

There is at least one period (consisting of one or more days) that—

- (a) begins with the first day of the relevant year,
- (b) ends with a day that—
  - (i) falls within the relevant year, and
  - (ii) is a day on which the taxpayer does more than 3 hours' work overseas, and
- (c) satisfies the overseas work criteria.

#### 9.11.3 *“Overseas work criteria”*

Para 49 sch 45 FA 2013 provides:

- (5) A period “satisfies the overseas work criteria” if—
  - (a) the taxpayer works sufficient hours overseas, as assessed over that period,
  - (b) during that period, there are no significant breaks from overseas work,
  - (c) the number of days in that period on which the taxpayer does more than 3 hours' work in the UK does not exceed the permitted limit, and
  - (d) the number of days in that period falling within sub-paragraph (6) does not exceed the permitted limit.
- (6) A day falls within this sub-paragraph if—
  - (a) it is a day spent by the taxpayer in the UK, but
  - (b) it is not a day that is treated under paragraph 23(4)<sup>21</sup> as a day spent by the taxpayer in the UK.

This is identical to the “overseas work criteria” in split-year Case 1: see 9.6.3 (“Overseas work criteria”).

#### 9.11.4 *“Sufficient hours overseas”*

Para 49(7) sch 45 FA 2013 provides:

---

<sup>21</sup> See 6.8 (The deeming rule).

To work out whether the taxpayer works “sufficient hours overseas” as assessed over a given period, apply paragraph 14(3) but with the following modifications—

- (a) for “P” read “the taxpayer”,
- (b) for “year X” read “the period under consideration”,
- (c) for “365 (or 366 if year X includes 29 February)” read “the number of days in the period under consideration”, and
- (d) in paragraph 28(9)(b), as it applies for the purposes of step 3, for “30” read “the permitted limit”.

This is identical to “sufficient hours overseas” in split-year Case 1: see 9.6.4 (“Sufficient hours overseas”).

Para 49 sch 45 FA 2013 provides:

- (8) The permitted limit is—
  - (a) for sub-paragraphs (5)(c) and (7)(d), the number found by reducing 30 by the appropriate number, and
  - (b) for sub-paragraph (5)(d), the number found by reducing 90 by the appropriate number.
- (9) The appropriate number is the result of  $A \times (B \div 12)$  where—
  - “A” is—
    - (a) 30, for sub-paragraphs (5)(c) and (7)(d), or
    - (b) 90, for sub-paragraph (5)(d), and
  - “B” is the number of whole months in the part of the relevant year after the 365-day period in question ends.

RDRM provides:

**RDRM12220: Residence: The SRT: Split year treatment: Case 6: Calculating whether individual has worked full-time overseas in the relevant period [Oct 2019]**

The table below sets out the permitted limits for Case 6 – the appropriate portions of the full year permitted limits.

Date	X - see note	Y - see note
6 - 30 Apr	2	7
1 - 31 May	5	15
1 - 30 Jun	7	22
1 - 31 Jul	10	30
1 - 31 Aug	12	37
1 - 30 Sep	15	45
1 - 31 Oct	17	52
1 - 30 Nov	20	60
1 - 31 Dec	22	67

1 - 31 Jan	25	75
1 - 29 Feb	27	82
1 Mar - 6 Apr	30	90

Note

X = permitted limit on days where you can work more than 3 hours in overseas part of the year or maximum number of days which may be subtracted from the reference period on account of gaps between employments

Y = permitted limit on days spent in the UK in overseas part of year

#### 9.11.5 *Resident in next year: Case 6*

Para 49(4) sch 45 FA 2013 provides:

The taxpayer is resident in the UK for the next tax year (whether or not it is a split year).

#### 9.11.6 *HMRC example*

RDRM provides:

##### **RDRM12230: Residence: The SRT: Split year treatment: Case 6: The overseas and UK parts of the tax year [Sep 2019]**

Example (Edward)

E left the UK on 1 November 2010 to work full-time for a company based in Switzerland. Prior to this date he had always lived, worked and been resident in the UK. He has kept an apartment in the UK throughout his time in Switzerland; so he had a place to stay whenever visiting family in the UK.

E retires from his employment, his last overseas workday being 31 October 2014. He returns permanently to the UK on 3 November 2014, and takes up residence in his apartment. E also has an apartment in Switzerland which is up for sale, but until a buyer is found he continues to use it when he visits Switzerland.

Provided E did not exceed the limits for days spent working more than 3 hours in the UK, or days spent in the UK before the UK part of the tax year commenced (see table at RDRM12280), he will receive split year treatment under Case 6 for 2014-2015 as follows:

- he is not resident in the UK for 2013-2014 tax year because he met the test for full-time work overseas for that year
- From 6 April 2014 until 31 October 2014 he worked full-time overseas
- he was UK resident for one or more of the 4 tax years (2009-2010, 2010-2011, 2011-2012, 2012-2013), before the year in which he was not UK resident (2013-2014)

- he is resident for the tax year following his return to the UK, 2015-2016 tax year (he has retired permanently to the UK).

The overseas part of the tax year ends on 31 October 2014. This is the day that E finished his spell of working full-time overseas and the UK part of the tax year starts on 1 November 2014.

## **9.12 Case 7: Partner stops work overseas**

Case 2 applies if an individual accompanies their partner who works overseas. Case 7 applies if the individual accompanies their partner who works in the UK. The two Cases share some common drafting.

Para 50(1) sch 45 FA 2013 provides:

The circumstances of a case fall within Case 7 if they are as described in subparagraphs (2) to (6).

### *9.12.1 Non-resident in previous year*

Para 50(2) sch 45 FA 2013 provides:

The taxpayer was not resident in the UK for the previous tax year.

This is a requirement in each of split year Cases 4 - 8, which apply to arrivers.

### *9.12.2 Living with partner*

Para 50 sch 45 FA 2013 provides:

(3) The taxpayer has a partner<sup>22</sup> whose circumstances fall within Case 6 for—

- (a) the relevant year, or
- (b) the previous tax year.

(4) On a day in the relevant year, the taxpayer moves to the UK so the taxpayer and the partner can continue to live together on the partner's return or relocation to the UK.

The wording is the same as Case 2: see 9.7.3 (Living with partner).

### *9.12.3 No previous UK home*

Para 50 sch 45 FA 2013 provides:

(5) In the part of the relevant year before the deemed arrival day—  
(a) the taxpayer

---

22 See 9.5.3 ("Partner").

- [i] has no home in the UK at any time, or
  - [ii] has homes in both the UK and overseas but spends the greater part of the time living in the overseas home, and
  - (b) the number of days that the taxpayer spends in the UK does not exceed the permitted limit.
- (7) If sub-paragraph (3)(a) applies, the “deemed arrival day” is the later of—
- (a) the day mentioned in sub-paragraph (4), and
  - (b) the first day of what is, for the partner, the UK part of the relevant year as defined for Case 6 (see paragraph 54).
- (8) If sub-paragraph (3)(b) applies, the “deemed arrival day” is the day mentioned in sub-paragraph (4).
- (9) The permitted limit is the number found by reducing 90 by the appropriate number.
- (10) The appropriate number is the result of—
- $$A \times (B \div 12)$$
- where—
- “A” is 90, and
  - “B” is the number of whole months in the part of the relevant year beginning with the deemed arrival day.

#### 9.12.4 *Resident in next year: Case 7*

Para 50(6) sch 45 FA 2013 provides:

The taxpayer is resident in the UK for the next tax year (whether or not it is a split year).

#### 9.12.5 *HMRC example*

RDRM provides:

**RDRM12260: Residence: The SRT: Split year treatment: Case 7: The overseas and UK parts of the tax year [Aug 2019]**

Example (Joan and Edward)

J is E’s wife (see RDRM12230). J lived with E in Switzerland for the duration of his employment. She also retires from work and returns to live in the UK with E. However, she does not return on 3 November 2014 with her husband; she arrives in the UK on 8 November 2014, having worked her notice at her part-time job (20 hours per week) in Switzerland.

Provided J did not exceed the limits for days spent in the UK before the UK part of the tax year commenced, she meets the criteria for case 7 for 2014-2015 as follows:

- she was not UK resident for the 2013-2014 tax year

- she does not qualify for Case 6 as she does not meet the criteria for the third automatic overseas test – nor does she qualify for Case 4, 5 or 8
  - her husband will receive Case 6 split year treatment
  - she is resident in the UK for the tax year following her return to the UK, 2015-2016
  - she has come to the UK to continue to live with her husband
- The UK part of the tax year 2014-2015 starts on 8 November 2014 when J moves to the UK.

#### 9.12.6 *Transitional rule for 2013/14*

Para 156 sch 45 FA 2013 provides:

- (1) Sub-paragraph (2) applies in determining whether the test in paragraph 50(3) is met where the relevant year is the tax year 2013-14.
- (2) The circumstances of a partner of the taxpayer are to be treated as falling within Case 6 for the previous tax year if the partner was eligible for split year treatment in relation to that tax year under the relevant ESC on the grounds that he or she returned to the United Kingdom after a period working overseas full-time.
- (3) Where the circumstances of a partner are treated as falling within Case 6 under sub-paragraph (2), the reference in paragraph 50(7)(b) to the UK part of the relevant year as defined for Case 6 is a reference to the part corresponding, so far as possible, in accordance with the terms of the relevant ESC, to the UK part of that year.
- (4) “The relevant ESC” means whichever of the extra-statutory concessions to which effect is given by Part 3 of this Schedule is relevant in the partner’s case.

#### **9.13 Case 8: Start to have UK home**

Para 51(1) sch 45 FA 2013 provides:

The circumstances of a case fall within Case 8 if they are as described in subparagraphs (2) to (5).

##### 9.13.1 *Non-resident in previous year*

Para 51(2) sch 45 FA 2013 provides:

The taxpayer was not resident in the UK for the previous tax year.

This is a requirement in each of split year Cases 4 - 8, which apply to arrivers.

### 9.13.2 *Acquiring UK home*

Para 51(3) sch 45 FA 2013 provides:

At the start of the relevant year, the taxpayer had no home in the UK but—

- (a) there comes a day when, for the first time in that year, the taxpayer does have a home in the UK, and
- (b) from then on, the taxpayer continues to have a home in the UK for the rest of that year and for the whole of the next tax year.

### 9.13.3 *UK-ties test: Case 8*

Para 51(4) sch 45 FA 2013 provides:

For the part of the relevant year before the day mentioned in sub-paragraph (3)(a) [date of acquiring UK home], the taxpayer does not have sufficient UK ties.

Para 51 sch 45 FA 2013 provides:

(6) Paragraphs 17 to 20 (and Part 2 of this Schedule so far as it relates to those paragraphs) apply for the purposes of sub-paragraph (4) with the following adjustments—

- (a) references in those paragraphs and that Part to year X are to be read as references to the part of the relevant year mentioned in subparagraph (4) [year until acquiring UK home], and
- (b) each number of days mentioned in the first column of the Table in paragraphs 18 and 19 is to be reduced by the appropriate number.

(7) The appropriate number is found by multiplying the number of days, in each case, by  $A \div 12$

where “A” is the number of whole months in the part of the relevant year beginning with the day mentioned in sub-paragraph (3)(a) [day of acquiring UK home].

(8) Sub-paragraph (6)(a) does not apply to the references to year X in paragraphs 32(1)(b) and 33 of this Schedule (which relate to the residence status of family members) so those references must continue to be read as references to year X.

This is (more or less) the standard form for split-year UK-ties tests and I discuss it elsewhere.<sup>23</sup>

---

<sup>23</sup> See 9.9.3 (UK-ties tests).

9.13.4 *Resident in next year: Case 8*

Para 51(5) sch 45 FA 2013 provides:

The taxpayer is resident in the UK for the next tax year and that tax year is not a split year as respects the taxpayer.

9.13.5 *Cases 4/8 compared*

In outline:

**Case 4: start to have *only* UK home**      **Case 8: start to have *a* UK home**

Start of year: no UK home

Start of year: no UK home [same]

For rest of the year: (1) UK home and  
(2) no home elsewhere

For rest of year: UK home (may have  
home elsewhere)

Next year: need not have UK home

Next year: must have UK home

Next year: need not be UK resident

Next year: must be UK resident

UK-ties test period: from 6 April until  
later of (1) UK home acquired and (2)  
no home elsewhere

UK-ties test period: from 6 April until  
UK home acquired

9.13.6 *HMRC example*

RDRM provides:

**RDRM12280: Residence: The SRT: Split year treatment: Case 8:  
The UK and overseas parts of the tax year [Aug 2019]**

Example (Nicola)

N is retired, she is non-resident in the UK for tax purposes having lived in Cyprus for a number of years. She has a home in Cyprus and she also has a property in the UK which has been let out on a commercial basis for the last few years.

She recently became a grandmother, and decides she will split her time between Cyprus and the UK so that she can see more of her grandson, who lives in the UK.

She comes back to the UK and moves into the UK property when the rental agreement with her tenant expires on 4 August 2014. She now has 2 homes, 1 in each country.

Between 6 April 2014 and 4 August 2014 when she started to have a UK home, N only spent 4 days in the UK, visiting her daughter; and therefore did not exceed the limit for days spent in the UK in the overseas period before she started to have a UK home.

N meets the criteria for Case 8 for 2014-2015 on the basis that:

- she was not UK resident for 2013-2014
- she is UK resident for 2015-2016 (N is possibly dual resident in UK and Cyprus)
- she continues to have a home in the UK for the rest of 2014-2015 and the following year
- she did not have sufficient UK ties to make her resident from 6 April 2014 until 4 August 2014

N does not meet the criteria for Cases 4, 5, 6 or 7 split year treatment. The UK part of the split year starts on 4 August 2014, which is when N starts to have a home in the UK.

### 9.14 Priority between Cases

If more than one Case applies, priority between them matters because they may specify different periods as the Overseas/UK part of the year.

Para 54 sch 45 FA 2013 deals with priority between split-year Cases 1 to 3 (leavers):

(1) This paragraph applies to determine which Case has priority where the taxpayer's circumstances for the relevant year fall within two or all of the following—

Case 1 (starting full-time work overseas);

Case 2 (the partner of someone starting full-time work overseas);

Case 3 (ceasing to have a home in the UK).

(2) Case 1 has priority over Case 2 and Case 3.

(3) Case 2 has priority over Case 3.

Para 55 deals with priority between split-year Cases 4-8 (arrivers):

(1) This paragraph applies to determine which Case has priority where the taxpayer's circumstances for the relevant year fall within two or more of the following—

Case 4 (starting to have a home in the UK only);

Case 5 (starting full-time work in the UK);

Case 6 (ceasing full-time work overseas);

Case 7 (the partner of someone ceasing full-time work overseas);

Case 8 (starting to have a home in the UK).

(2) In this paragraph "the split year date" in relation to a Case means the final day of the part of the relevant year defined in paragraph 53(5) to (9)<sup>24</sup> for that Case.

---

24 See 9.5.5 ("The overseas part").

- (3) If Case 6 applies—
  - (a) if Case 5 also applies and the split year date in relation to Case 5 is earlier than the split year date in relation to Case 6, Case 5 has priority;
  - (b) otherwise, Case 6 has priority.
- (4) If Case 7 (but not Case 6) applies—
  - (a) if Case 5 also applies and the split year date in relation to Case 5 is earlier than the split year date in relation to Case 7, Case 5 has priority;
  - (b) otherwise, Case 7 has priority
- (5) If two or all of Cases 4, 5 and 8 apply (but neither Case 6 nor Case 7), the Case which has priority is the one with the earliest split year date.
- (6) But if, in a case to which sub-paragraph (5) applies, two or all of the Cases which apply share the same split year date and that date is the only, or earlier, split year date of the Cases which apply, the Cases with that split year date are to be treated as having priority.

### 9.15 Split year: Tax return

Split year reliefs do not require a formal claim or election, but the individual must tick box 3 in SA109 (Residence, remittance basis etc) (2020/21). The rubric to this box provides: “If your circumstances meet the criteria for split year treatment,... put ‘X’ in the box.” The accompanying SA109 notes (2020/21) provide:

#### **Box 3**

...If you put ‘X’ in box 3:

- you must include details of which split year case applies to you in the ‘Any other information’ box, box 40
- do not put ‘X’ in box 1, but fill in box 6
- put the number of days spent in the UK for the overseas part of the tax year in box 10

#### **Box 3.1 If more than 1 case of split year treatment applies**

Put ‘X’ in box 3.1 if you think that more than one case of split year treatment applies for the 2020 to 2021 tax year. Give details of which cases apply to you in the ‘Any other information’ box, box 40, starting on page RR 3.

The Joint Expatriate Forum on Tax and NICs discussed this form in 2014:<sup>25</sup>

---

<sup>25</sup> [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/327284/140704\\_Expatriate\\_Forum\\_Minutes\\_FINAL.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/327284/140704_Expatriate_Forum_Minutes_FINAL.pdf) (April 2014)

When a taxpayer is completing Box 12<sup>26</sup> for split years and there are different ties for the UK/overseas parts, the taxpayer should explain in Box 40 [white space] which tie is relevant to which part. For split years and boxes 10<sup>27</sup> and 12, HMRC is only looking for information in relation to the overseas part of the year...

When recording split year information, all relevant cases should be disclosed in Box 40 [white space] but there is no need to identify all relevant dates where multiple cases potentially apply (subject to the statutory order of priority) – only the date the individual considers applies need be recorded.

## 9.16 Arrival/departure: Disclosure

### 9.16.1 *Arrival*

The RDRM provides:

**RDRM10215 Residence: Coming to the UK: Form P86** [May 2020]

Since 1 June 2010 the form P86 has been withdrawn and new arrivals to the UK will be integrated into HMRC processes by existing means

- The RTI process for new employees
- CWF1 for newly self employed, or
- SA1 registration process for customers who are not self-employed but who need to complete a tax return

Please refer to EIM42890 and PAYE81750.

RDR1 provides:

1.17 You should tell HMRC immediately if you come to the UK to live or work or leave the UK to live or work overseas. You should also tell HMRC if those circumstances change while you're in the UK.

There is no legal obligation to do this. But at some point arrivers are likely to have to submit a tax return, make a remittance basis claim, or give HMRC notice of liability to tax;<sup>28</sup> it may make sense to contact HMRC in advance of the formal deadlines for those steps.

### 9.16.2 *Departure: Form P85*

Form P85 (Leaving the UK – getting your tax right) is used to claim tax

<sup>26</sup> This box asks: How many ties to the UK did you have in [the relevant tax year]

<sup>27</sup> This box asks: Number of days spent in the UK during [the relevant tax year]

<sup>28</sup> See 115.2 (Duty to notify liability).

relief or a repayment of tax on becoming non-UK resident.<sup>29</sup>

## 9.17 Split year of trustees and PRs

Para 2 sch 45 FA 2013 provides that *individuals* are resident during whole tax years.<sup>30</sup> There is no equivalent statutory rule for trustees or PRs.

The split-year rules which exempt income/gains of the offshore part of a split year also apply only to individuals, and so do not apply to income/gains of trustees or PRs.

Para 41 sch 45 FA 2013 provides:

This Part [Part 3: Split Year Treatment]—

- (a) does not apply in determining the residence status of personal representatives, and
- (b) applies to only a limited extent in determining the residence status of the trustees of a settlement (see section 475 of ITA 2007 and section 69 of TCGA 1992, as amended by this Part).<sup>31</sup>

### 9.17.1 *How can trust residence change*

There are various ways that a trust may change residence:

- (1) Change of trustee's personal residence status:
  - (a) An individual trustee may change residence in their private capacity. The change happens at the end of a tax year as an individual cannot change residence during a tax year.<sup>32</sup>
  - (b) An corporate trustee may change residence in its private capacity. The change could happen during a tax year.
- (2) Change in trustees: A trustee resident in one state may be appointed in place of a trustee resident in another state. This could happen during a tax year. In practice this is more common than a change of trustee's personal residence status.

### 9.17.2 *Trust split year: IT rules*

The TSE Manual provides:

**TSEM10025 trust residence for Income Tax and CGT purposes -**

---

29 See 35.7 (Leaving UK: PAYE).

For a discussion of form P86, see Finney, "A new form of test", *Taxation Magazine* (24 October 2013).

30 See 9.1 (Residence throughout tax year).

31 For para (b) see 6.8 (Individual trustee: split year).

32 See 9.1, 11.1, 11.6, 11.9, 99.1, 99.23.8 (Residence throughout tax year).

**changes during the tax year** [Aug 2019]**Changes in residence status - Income Tax**

[1] For Income Tax purposes, for the period from 6 April 2007 to 5 April 2013, where the residence status of the trust changes during a tax year, the year is split, so that a trust could be resident for part of the year and non-resident for the other part.

But that is now of historic interest only.

[2] With the introduction of the Statutory Residence Test from 6 April 2013 there is no longer a 'split year' treatment where the trustees are individuals and the residence status of the trust changes. In such circumstances, if a trust is resident for part of the tax year, it is treated as resident for all of the tax year.

That is correct.

[3] However if an individual becomes or ceases to be a trustee of a settlement during a tax year, that tax year is a split year in respect of the individual. If the individual was acting as a trustee only in the period when they were not resident in the UK, for the purposes of determining the trust residence they will be treated as if they were non-resident for the year. This exception is overridden if the trustee is acting as such in the course of a UK business (see TSEM10020 final paragraph).

In the absence of an express relief, this is, I think, an informal concession.

[4] The residence position of a corporate trustee follows the general rules for company residence when determining their residence for the purpose of the residence of the trust.

Similarly, form TNRN1 (2019/20) provides:

If, for part of the year to 5 April 2020, all the trustees were corporate trustees and not resident in the UK, then the trustees as a whole will not be resident in the UK for that period for Income Tax purposes

The position here is affected by the rule that trustees are a single and distinct person for IT<sup>33</sup> because this notional person is not an individual, and so not affected by the rule that an individual cannot change residence during a tax year.

### 9.17.3 *Trust split year: CGT*

---

33 See 6.3 (Trustees a distinct person).

The TSE Manual provides:

**TSEM10025 trust residence for Income Tax and CGT purposes - changes during the tax year** [Aug 2019]

**Changes in residence status - Capital Gains Tax**

[1] For Capital Gains Tax purposes, if the trustees are resident for any part of a tax year, gains arising at any time in the tax year are chargeable to Capital Gains Tax.

This is correct. See 53.4 (Territorial scope of CGT).

[2] However, under the Statutory Residence Test introduced with effect from 6 April 2013 an individual trustee who is resident in the UK for a tax year is resident for every day in that tax year, including those days that fall within the overseas part of a split year for that individual.

This is also correct, but it does not matter, having regard to point [1].

[The next 2 paragraphs repeat points [3] and [4] above]...

#### 9.17.4 HMRC examples

The Manual gives four examples:

Example	Trustee	Facts	Result
1: Alpha trust	Individual	Becomes UK resident during year	Taxable
2: Beta trust	Individual	Resigns in offshore part of year	Not taxable
3: Gamma trust	Individual	Resigns in UK part of year	Taxable
4: Delta trust	Company	Replaced by UK trustee	Split year

In examples 1-3 the individual is sole trustee. This simplifies the example, as it is not necessary to consider the rules for mixed residence trustees. But in practice a sole individual trustee would be unusual.

The first example considers an individual trustee acting throughout a split year:

**TSEM10030 trust residence for Income Tax and CGT purposes - changes during the tax year - examples** [Aug 2019]

**Example 1 individual acting as trustee changes residence** (Alpha trust)

The A Trust was established many years ago and A an individual has been acting as sole trustee. A has been resident overseas.

However, on 1 October 2013 he comes to live in the UK and is considered to be UK resident from that date.

As A has become resident in the UK during 2013-14 the A Trust is

considered UK resident for both Income Tax and Capital Gains Tax for the whole of 2013-14.

The moral is that A should have retired as trustee before coming to the UK.<sup>34</sup>

The next example considers an individual trustee acting as trustee only during the non-resident part of a split year:

**Example 2 - individual ceases to act as trustee (Beta trust)**

The B Trust was established many years ago and A an individual has been acting as sole trustee. A has been resident overseas.

However, on 1 October 2013, A comes to live in the UK, after resigning as a trustee on 25 September 2013 and is replaced as trustee by B who is not resident in the UK.

As A only acted as a trustee of the Beta Trust during the part of the year 2013-14 when he was not resident in the UK he is regarded as being not resident in the UK when determining the Trust's residence for the year. As B is not resident in the UK for any part of 2013-14 the B Trust is considered non-resident for both Income Tax and Capital Gains Tax for the year.

This is, I think, concessionary.

The next example concerns an individual trustee acting during both non-resident and resident parts of a split year.

**Example 3 - individual ceases to act as trustee (Gamma trust)**

The G Trust was established many years ago, and A an individual has been acting as sole trustee. A has been resident overseas.

However, on 1 October 2013, A comes to live in the UK and resigns as trustee on 1 December 2013. B, who is not resident in the UK, replaced A as trustee on 1 December 2013.

As A acted as a trustee of the Trust during the part of the year in which he was resident in the UK, he is regarded as resident in the UK when determining the Trust's residence for the year. In the circumstances, the G Trust is considered to be UK resident for both Income Tax and Capital Gains Tax for the whole of the year 2013-14.

For the year 2014-15 assuming that B remains trustee and continues to be non-resident the Trust will be non-resident.

The moral is that A should have retired before the beginning of the UK

---

34 If the trust is not UK-linked, the appointment of a second (non-resident) trustee would suffice.

part of the split year.<sup>35</sup>

The last example concerns a corporate trustee.

**Example 4 - change in corporate trustees** (Delta trust)

A Ltd, a trust company resident overseas, has always acted as sole trustee of the D Trust.

On 1 October 2013, A Ltd resigns as trustee and is replaced by B Ltd, a company which is resident in the UK.

In the circumstances, the year 2013-14 can be split with the result that, for Income Tax purposes, the Trust is not resident in the UK up to 1 October 2013, and resident in the UK from that date.

For CGT purposes the position is different, see above.

## 9.18 Split-year rules: Critique

CIOT say:

The split-year rules... seek to replicate the previous concessions, but do not ask the question what a sensible split-year rule might look like.<sup>36</sup>

The reader who has studied this chapter may agree. Though CIOT do not address the harder question of what sensible split-year rules should look like. However that may be, HMRC do not seem to have an appetite for reform.<sup>37</sup>

---

35 Again, if the trust is not UK-linked, the appointment of a second (non-resident) trustee would suffice.

36 CIOT letter to HMRC (21 July 2015)

<http://www.tax.org.uk/policy-technical/submissions/evaluation-statutory-residence-test-srt-ciot-comments>

37 See 5.44 (Future of SRT).

## CHAPTER TEN

# TEMPORARY NON-RESIDENCE

### 10.1

#### *Cross references*

The following topics are considered elsewhere:

4.11.3 (Transitional rule for pre-2015 temporary non residents)

69.27 (DIMF: Temporary non-resident)

For the interaction with sch 4C TCGA, see 58.23.2 (Trust within s.87)

### **10.1 Temporary non-residence: Introduction**

This chapter discusses the temporary non-residence rules (“**TNR rules**”).

Deemed-domicile rules may also be said to include a short term non-residence rule: a person who ceases to be UK resident (or domiciled) continues for a 3 or 4 year period to be regarded as UK domiciled for tax purposes, and so within the scope of IHT. But this is not a *temporary* non-residence rule as it applies to those who never return to the UK.

### **10.2 Purpose of TNR rules**

It is helpful to outline the three sets of problems which the TNR rules are intended to address.

#### 10.2.1 *TNR gains*

In the absence of the TNR rules, gains accruing to temporary non-residents are not in general subject to tax.

So a possible method of CGT planning for a UK resident would be as follows. An individual could become UK-law non-UK resident and realise gains (typically by disposing of assets) during a year of non-residence; in the following tax year they could become UK resident again. Thus relatively brief periods of UK-law non-residence offered the opportunity of CGT-free disposals.

A variant of this planning is: an individual could remain UK-law UK resident but become treaty non-resident (ie treaty-resident in a state with a DTA conferring CGT relief under the tie-breaker); the individual realises gains while treaty non-resident; following the disposal the individual could cease to be treaty non-resident. Thus relatively brief periods of treaty non-UK residence offered some opportunity of CGT-free disposals (so far as CGT treaty relief could be available).<sup>1</sup>

The TNR rules bring gains into charge on the return of the temporary non-resident to the UK. The technique used is to deem the gains to accrue in the year of return, and to override any DT relief which may have otherwise have applied.

### 10.2.2 TNR income

In the absence of the TNR rules, some income of temporary non-residents is not subject to UK tax. So a similar method of IT planning for a UK resident would be to arrange for income to arise to an individual when UK-law non-UK resident, or when treaty non-resident. Relatively brief periods of UK-law or treaty non-residence offered the opportunity of receiving income free of IT.

The TNR rules bring some of this income (“TNR income”) into charge on the return of the temporary non-resident to the UK. But whereas the TNR rules apply to (almost) all types of chargeable gain, they only apply to limited categories of income. Presumably the rules are aimed at types of income which it was thought could most easily be arranged to accrue during the non-resident period. The categories of income caught by the TNR rules are (in short) as follows:

<b>Type of income: Section no</b>	<b>See para</b>
Material interest in close company	10.12; 10.16
Chargeable-event gains (life policies)	10.19
Offshore income gains	10.20
Pension schemes charges: s.394A, s.572A, 576A, 579CA ITEPA	
Specific employment income:	

---

<sup>1</sup> For completeness: it has been suggested that planning involving short periods of treaty non-residence may constitute treaty abuse, and so not qualify for treaty relief: see 104.7 (OECD-concept abuse). But in practice, I think rightly, HMRC did not take that point.

- (a) Disguised remuneration: s.554Z4A, 554Z11A ITEPA
- (b) Employer-financed retirement benefits: s.394A ITEPA

The technique used is to deem the income concerned to accrue in the year of return, and to override any DT relief which may have otherwise have applied.

Other types of income accruing to temporary non-residents remain exempt on return to the UK. That includes:

- (1) Discretionary trust income (Annual Payments)
- (2) Section 720 income (transferors)
- (3) Section 731 income (non-transferors)
- (4) Royalty income

It would be bold to plan on this continuing to be the position in the future. HMRC summarise the position as follows:

3.47 Ceasing to be UK resident means that an individual is no longer liable to UK tax on income from non-UK sources. In many instances there can also be a reduced tax liability on income from UK sources. This can result in people finding it advantageous to become not resident for a short period of time if they expect substantial amounts of income to arise which otherwise would be liable to tax in the UK. This leads to a cost to the Exchequer.

3.48 A similar position used to arise for CGT. It was possible for individuals to leave the UK temporarily and realise capital gains in the period of non-residence and therefore be exempt from liability to UK tax on those gains. Legislation was enacted in FA 1998 to counter such avoidance of CGT.

3.49 Introducing a statutory definition [the SRT] will make it clearer when a person is tax resident or not resident in the UK. This could enable those who want to avoid liability on substantial amounts of income to plan short periods of temporary non-residence with more certainty.

3.50 The SRT rules will therefore need to counteract the risk of individuals creating artificial<sup>2</sup> short periods of non-residence, during which they receive a large amount of income (which accrued during periods of UK residence) free of UK tax and then bring the income back into the UK tax-free. This activity would undermine the effectiveness

---

2 This is a contentious use of the word “artificial”, see 49.15.2 (“Artificial”/“devices”).

of an SRT (?) and present an unacceptable risk to the Exchequer.<sup>3</sup>

### 10.2.3 TNR remittances

In the absence of the TNR rules, a possible method of remitting RFI tax free would be as follows. Suppose an individual had RFI taxable on remittance (in this chapter called “**pre-departure income**”).

The individual could become UK-law non-UK resident, and remit the pre-departure income during a year of non-residence; in the following tax year they could become UK resident again. Thus relatively brief periods of UK-law non-residence offered the opportunity of tax-free remittances of pre-departure income.<sup>4</sup> The same applies for pre-departure foreign gains, though not for foreign earnings.<sup>5</sup>

The technique used is to deem the income/gains to be remitted in the year of return.

## 10.3 Terminology

### 10.3.1 Residence terminology

In this book I use the following terminology:

- (1) “**UK-law residence**” means residence as defined in UK tax law.
  - (a) A person who is resident in the UK within the UK tax law definition is “**UK-law UK resident**”.
  - (b) A person who is not resident in the UK within the UK tax law definition is “**UK-law non-UK resident**”.
- (2) “**Treaty-residence**” means residence as defined in a DTA.
  - (a) A person who is a resident of the UK within a DTA definition is “**treaty-resident in the UK**”.
  - (b) A person who is resident in a foreign state within a DTA definition is “**treaty-resident in the foreign state**”. Statute calls this “*treaty non-resident*” but I think my term is clearer.

---

3 HM Treasury/HMRC, “Statutory Definition of Tax Residence” (June 2011) [https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/81588/consult\\_condoc\\_statutory\\_residence.pdf](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/81588/consult_condoc_statutory_residence.pdf)

4 See 16.18 (Remittance when non-resident).

5 See 33.35 (Remittance when non-resident).

Since UK-law residence and treaty-residence are distinct concepts,<sup>6</sup> a person who is UK-law UK resident may be:

- (1) treaty-resident in a foreign state (treaty non-resident) under the tie-breaker test;<sup>7</sup> or
- (2) not treaty-resident in a foreign state (ie, not treaty non-resident): statute calls this “**sole UK residence**”.

These are clumsy terms but it is difficult to think of better.

### 10.3.2 *TNR terminology*

The definitions relating to temporary-non residence are in Part 4 sch 45 FA 2013.

The TNR provisions use a common terminology. There are no taxes-act-wide definitions, so they are either repeated verbatim or incorporated by reference, where used in other statutes in a TNR context.

### 10.3.3 “*Residence period*”

This term is devised to deal with split years and tax years which are not split (“**non-split years**”).

Para 109 sch 45 FA 2013 provides:

In relation to an individual, a “residence period” is—

- (a) a tax year that, as respects the individual, is not a split year, or
- (b) the overseas part or the UK part of a tax year that, as respects the individual, is a split year.

### 10.3.4 “*Treaty non-resident*”

Para 112(3) sch 45 FA 2013 provides:

An individual is “Treaty<sup>8</sup> non-resident” at any time if at the time the individual falls to be regarded as resident in a country<sup>9</sup> outside the UK

---

<sup>6</sup> See 8.2 (Treaty/UK-law residence).

<sup>7</sup> It is assumed that the treaty has OECD Model form tie-breaker clause.

It would be useful to have a short term to describe someone who is UK-law UK resident but treaty-resident in a foreign state (treaty non-resident). But I cannot think of a good term, and prefer to use the full expression when it is needed.

<sup>8</sup> The legislation, I think rather oddly, uses a capital *T* in this expression.

<sup>9</sup> Para 145 sch 45 FA 2013 provides: “country” includes a state or territory.

for the purposes of double taxation arrangements<sup>10</sup> having effect at the time.

I prefer the expression “**treaty-resident in a foreign state**” which seems clearer.

### 10.3.5 “Sole UK residence”

“Sole UK residence” is a technical term. It is a status which lasts for a residence period (contrast residence, also a status, which lasts for an entire tax year.)

Para 112 sch 45 FA 2013 provides two definitions: one for non-split years and one for split years.

For non-split years, para 112(1) sch 45 FA 2013 provides:

An individual has “sole UK residence” for a residence period consisting of an entire tax year if—

- (a) the individual is resident in the UK for that year, and
- (b) there is no time in that year when the individual is Treaty non-resident.

For split years, para 112(2) sch 45 FA 2013 provides:

An individual has “sole UK residence” for a residence period consisting of part of a split year if—

- (a) the residence period is the UK part of that year, and
- (b) there is no time in that part of the year when the individual is Treaty non-resident.

In the following discussion:

“**A UK period**” is a residence period for which an individual has sole UK residence.

“**A non-UK period**” is a residence period for which an individual does not have sole UK residence.

A short period of treaty-residence in a foreign state (treaty non-residence) means that the residence period is a non-UK period, even if the individual is present in the UK for most of the period. See, for instance, the RDR

---

<sup>10</sup> Para 145 sch 45 FA 2013 provides the standard commonsense definition:

“In this Schedule ... “double taxation arrangements” means arrangements that have effect under section 2(1) of TIOPA 2010”.

example of Max<sup>11</sup> who was treaty-resident in a foreign state for 6 weeks, but the entire tax year (a non-split year) was a non-UK period.

The UK part of a split year is likely to be a UK period. The overseas part of a split year is a non-UK period.

### 10.3.6 “Period A”

Para 110(1) sch 45 FA 2013 provides:

An individual is to be regarded as “temporarily non-resident” if—

- (a) the individual has sole UK residence for a residence period,
- (b) immediately following that period (referred to as “period A”), one or more residence periods occur for which the individual does not have sole UK residence ...

“**Period A**” is the last pre-departure UK period.

### 10.3.7 “Temporary period of non-residence”

Para 113 sch 45 FA 2013 provides:

In relation to an individual, “the temporary period of non-residence” is the period between—

- (a) the end of period A [the last pre-departure UK period], and
- (b) the start of the next residence period after period A for which the individual has sole UK residence [the period of return].<sup>12</sup>

### 10.3.8 “Year of departure”

Para 114 sch 45 FA 2013 provides:

“The year of departure” is the tax year consisting of or including period A [the last pre-departure UK period].

This is an artificial definition, as it may not be the year in which the individual actually departs. See, for instance, the RDR example of Max<sup>13</sup> who left the UK in February 2015 but his “year of departure” was 2013/14. In these cases it is helpful to write the expression with scare quotation marks.

---

11 1 See 10.5 (Examples).

12 Confusingly, the drafter here does not actually use the expression “period of return” which is defined in para 115.

13 See 10.5 (Examples).

### 10.3.9 “Period of return”

Para 115 sch 45 FA 2013 provides:

“The period of return” is the first residence period after period A [the last pre-departure UK period] for which the individual has sole UK residence.

## 10.4 “Temporarily non-resident”

Armed with these definitions, we can turn to the key term “temporarily non-resident”.

### 10.4.1 Residence then non-residence

Para 110 sch 45 FA 2013 provides:

- (1) An individual is to be regarded as “temporarily non-resident” if—
- (a) the individual has sole UK residence for a residence period,
  - (b) immediately following that period (referred to as “period A”), one or more residence periods occur for which the individual does not have sole UK residence ...

This sets the scene for the two essential conditions.

### 10.4.2 4/7 UK-years test

Para 110 sch 45 FA 2013 provides:

- (1) An individual is to be regarded as “temporarily non-resident” if...
- (c) at least 4 out of the 7 tax years immediately preceding the year of departure were either—
    - (i) a tax year for which the individual had sole UK residence, or
    - (ii) a split year that included a residence period for which the individual had sole UK residence

I refer to this as the “**4/7 UK-years test**” and I refer to years within (i) or (ii) as “**UK years**”.

### 10.4.3 5-year absence test

Para 110 sch 45 FA 2013 provides:

- (1) An individual is to be regarded as “temporarily non-resident” if...

- (d) the temporary period of non-residence is 5 years or less.

I refer to this as the “**5-year absence test**” but the label is not completely apt because the period must be more than 5 years.

RDR3 provides:

6.2... Note that, for the special [TNR] rules to not apply, your period of temporary non-residence has to be for more than five years; it does not have to be for five complete tax years.

In the absence of split years, 5 complete tax years absence is not sufficient: see 10.5.3 (5 years non-residence, no split years).

#### 10.4.4 Summary

The steps to ascertain temporary non-residence are as follows:

- (1) *Preparatory:*
  - (a) Identify the residence periods (split/non-split years)
  - (b) Classify each residence period as a UK period or a non-UK period
- (2) *The 4/7 UK years test:*
  - (a) Identify period A (the last pre-departure UK period)
  - (b) Identify the year of departure (tax year consisting of or including period A)
  - (c) Are (at least) 4/7 of the years preceding the year of departure UK years?
- (3) *The 5-year absence test:*
  - (a) Identify period A (the last pre-departure UK period)
  - (b) Identify next UK period after period A
  - (c) Identify temporary period of non-residence (period between (a) and (b): is it 5 years or less?

### 10.5 Examples

RDR3 provides 2 examples. They are easier to follow if the relevant facts are set out in a table.

#### 10.5.1 *Departure in non-split year, return in split-year*

This example only concerns the 5-year absence test. RDR3 provides:

**Example 42 (Max)**

M has had sole residence in the UK for the previous ten years. [So it is not necessary to consider the 4/7 UK years test]

On 22 February 2015 M moves to Poland and is considered resident there from this point, as well as retaining his UK residence up to the end of the tax year.

From 22 February to 5 April 2015 he is treaty non-resident.

For the purpose of this example, M does not satisfy the conditions for split year treatment in tax year 2014-15.

The HMRC analysis is as follows:

M is not solely UK resident from 22 February 2015 but he will remain UK resident for the tax year. As this is not a split year, Period A [the last pre-departure UK period] will end at the end of the tax year 2013-14, because that is the end of the last tax year in which M was solely UK resident.

His year of departure for the purpose of applying the temporary non-resident provisions is therefore 2013-14, even though he actually physically left the UK on 22 February 2015.

The next residence period begins on 6 April 2014 and M will begin to be regarded as temporarily non-resident from this point.

M returns on 26 May 2018 and split year treatment applies.

M has sole UK residence from 26 May 2018. He is treaty resident for the UK part of the year. His temporary non-residence ends on 25 May 2018. The period of temporary non-residence is 6 April 2014 to 25 May 2018 inclusive, which is less than five years and so M is within the scope of the temporary non-residence provisions.

Expressing the facts in a table:

	2013/4	2014/5 <sup>14</sup>	2015/6	2016/7	2017/8	2018/9 (split year of return)	
						6 Apr - 26 May 18 - 25 May 18 end yr	
						o/seas part UK part	
Residence periods							
UK period <sup>15</sup>	n	n	n	n	n	y	
Period A	x						
"year of departure"	x						
Period of return						x	
n/r period		←----->					

14 Non-split year of departure

15 (sole UK residence).

2014/15 is a non-split year and so one residence period.

M does not have sole UK residence for that period (it is not a UK year) as:

- (a) He is UK law UK resident for the year; but
- (b) He is treaty-resident in a foreign state (treaty non-resident) for part of the year (22 February 2015 - 5 April 2015).

So period A [the last pre-departure UK period] is the previous residence period, which is the year 2013/14. The end of period A is 5 April 2014.

The “year of departure” is 2013/14. *Note that is not in fact the year in which M actually departed!*

2018/19 is a split year.

For the overseas part of the split year (6 April - 25 May) M does not have sole UK residence as:

- (a) He is UK law UK resident for the year; but
- (b) He is treaty-resident in a foreign state (treaty non-resident).

For the UK part of the split year (16 May - 5 April) M does have sole UK residence. That is the period of return.

The temporary period of non-residence runs from 6 April 2014 (end of period A) to 26<sup>16</sup> May 2018 (start of period of return). That is less than five years so M is temporarily non-resident

The conclusion is not surprising, since M’s actual absence in fact was only just over 3 years.

### 10.5.2 *Split-year of arrival/departure*

RDR 3 provides:

#### **Example 43 (Louis)**

L moves to the UK on 9 January 2014, becoming resident here for 2013-14. He satisfies the conditions for split year treatment for 2013-14 and is treaty resident in the UK from arrival.

On 4 January 2017, L moves to the USA. He becomes a US tax resident and is not treaty resident in the UK from that point onwards. He satisfies the conditions for split year treatment and his overseas part of the split year starts on 4 January 2017.

L returns to the UK on 9 March 2022 and split year treatment applies.

---

<sup>16</sup> HMRC take the date to 25<sup>th</sup>, but it makes no difference: one is looking at midnight 25/26 May.

He is treaty resident in the UK from the date of his return.

*4/7 UK years test*

The HMRC analysis is as follows:

L meets the ‘four out of seven’ test for tax years immediately preceding his departure.

- 2013-14 was a split year which included a residence period for which L had sole UK residence
- 2014-15 and 2015-16 were full tax years for which he had sole UK residence
- 2016-17 was a tax year that included a residence period for which he had sole UK residence (6 April 2016 – 3 January 2017).

This last period is period A [the last pre-departure UK period].

This is wrong. 2016/17 is the year of departure, and the 4/7 UK year test looks at the 7 years preceding the year of departure. L does not meet the 4/7 year test. Expressing the facts in a table:

	10/1	11/2	12/3	13/4 (split arrival yr) Yr to 8/1/14	14/5	15/6	16/7 (split departure yr) Yr to 3/1/17	4/1-end yr
				O/seas part	UK part		UK part	O/seas part
Residence periods								
UK period <sup>17</sup>	n	n	n		y	y	y	n
period A							x	
year of departure							x	
7 tax years before departure	1	2	3	4	5	6	7	

*5-year absence test*

The HMRC analysis is as follows:

L has more than one residence period immediately following period A in which he does not have sole UK residence. The first such period is 4 January 2017 – 5 April 2017 (the overseas part of the split year in the year of his departure).

By the time L returns he has been non-resident for more than five years (4 January 2017 to 8 March 2022), therefore he is not temporarily non-resident for the purposes of the statutory residence test. He does not need to be non-resident for five complete tax years in order to be

---

17 (sole UK residence).

outside the scope of the temporary non-residence provisions.

Expressing the facts in a table:

	16/7 (split departure yr)	17/8	18/9	19/20	20/1	21/2 (split arrival yr)	
	Yr to 3/1/17	4 Jan - end yr				Yr to 8/3/22	9/3 - end yr
Residence periods							
	UK part	O/seas part				O/seas part	UK part
UK period <sup>18</sup>	y	n	n	n	n	n	y
period A	x						
period of return <sup>19</sup>							x
n/r period		←----->					

The example illustrates that L does not need to be non-resident for 5 complete tax years in order to be outside the scope of the TNR provisions.

10.5.3 5 years non-residence, no split years

STEP guidance provides:

... an individual is to be regarded as ‘temporarily non-resident’ if the temporary period of non-residence is five years or less ...

In paragraph 6.2 of RDR3, HMRC states ‘...for the special rules to not apply, your period of temporary non-residence has to be for more than five years; it does not have to be for five complete tax years.’

In certain circumstances, an individual will need to remain outside of the UK for six tax years in order not to be regarded as ‘temporarily non-resident’.

Example

An individual:

- leaves the UK on or before 5 April in one year (e.g. 4 April 2015);
- stays outside the UK for five complete tax years (being both tax years and calendar years);
- returns to the UK on 6 April or later during the following tax year (6 April 2020).

The individual is not, at any point, treaty resident in another country and is not eligible for split-year treatment in the year of arrival or departure. Under the new rules, the individual will be temporarily non-resident as the period of non-residence will be precisely five years

18 (sole UK residence).

19 (next UK period after period A).

and not more. Therefore, they would have to remain outside the UK until 6 April 2021 in order not to be regarded as temporarily non-resident.<sup>20</sup>

Expressing the facts in a table:

	2014/5	2015/6	2016/7	2017/8	2018/9	2019/20	2020/1	
UK period	y	n	n	n	n	n	y	
n/r period		←-----					-----→	

## 10.6 Residence before 2013/14

An individual whose year of departure is 2013/14 or later, and so falls within the post-2013 TNR rules, still needed to look at some pre-2013/14 years in order to apply the 4/7 UK-years test. Para 157 sch 45 FA 2013 provided transitional rules. These became obsolete on 6 April 2020. For discussion, see the 2019/20 edition of this work para 10.6 (Residence before 2013/14).

## 10.7 TNR gain/loss

Section 1M(1) TCGA provides:

If, in the case of the disposal of an asset by an individual who is temporarily non-resident—

- (a) a gain or loss accrues to the individual in the temporary period of non-residence, and
- (b) the asset is not excluded from this subsection by section 1N (certain assets acquired in that period),<sup>21</sup>

the gain or loss is treated instead as accruing to the individual in the period of return.

I refer to gains/losses within s.1M(1) as “**TNR gains/losses**”.

Section 1M works because gains are in principle chargeable gains even if they accrue to a non-resident.

Section 87 gains are TNR gains, within s.1M(1) TCGA, as they are chargeable gains, treated as accruing to the beneficiary under s.87, even if the beneficiary is non-resident.

<sup>20</sup> <http://www.step.org/sites/default/files/Policy/hmrc-statutory-residence-test-guidance-nov-2014.pdf>

<sup>21</sup> See 10.8 (Post-departure acquisitions).

However, s.1M(1) does not catch s.86 or s.3 gains, as gains under these sections do *not* accrue to a non-resident. These sections only apply to a settlor or participator who is UK resident. Hence the drafter includes express provisions to catch these gains. It was not necessary to do this for s.87.

For the interaction with sch 4C TCGA, see 58.23.2 (Trust within s.87).

### 10.7.1 TNR s.3 gain

In the absence of express provision, s.3 gains of a temporarily non-resident participator in a non-resident company would not be TNR gains. Section 3E TCGA provides:

- (1) This section applies if-
  - (a) an individual is temporarily non-resident, and
  - (b) a gain or loss accrues to a company in a tax year falling wholly or partly in the temporary period of non-residence.
- (2) So much of the gain as would, as a result of section 3, have been treated as accruing to the individual in the tax year if the residence assumption were made is to be treated as accruing to the individual in the period of return.
- (3) But if-
  - (a) the remittance basis applies to the individual for the tax year that comprises or includes the period of return, and
  - (b) any part of the gain has not been remitted to the UK before the period of the return,subsection (2) has effect subject to the further application of Schedule 1 (as read with section 3D) in relation to that part of the gain.
- (4) Paragraph 5 of Schedule 1 applies for the purposes of subsection (3) as it applies for the purposes of that Schedule.
- (6) For the purposes of this section the “residence assumption” is-
  - (a) that the individual was resident in the UK for the tax year in which the gain or loss accrued to the company, and
  - (b) that the tax year was not a split year as respects the individual.
- (7) Nothing in any double taxation arrangements prevents a charge to capital gains tax arising as a result of this section.

### 10.7.2 TNR s.3 loss

In the absence of express provision, s.3 losses of a temporary non-resident would not be within the TNR rules, and would not be allowable. Section 3E TCGA provides:

(5) So much of the loss accruing in the tax year as would, in accordance with section 3(9), have reduced or extinguished a gain treated as accruing to the individual in that year as a result of section 3 if the residence assumption were made is to be treated as accruing to the individual in the period of return.

Section 3 losses are limited to s.3 gains. This is consistent with the usual rule for s.3 losses: see 60.15 (Loss accruing to non-resident company).

Careful timing of disposals is necessary to ensure that s.3 losses are not wasted.

### 10.7.3 *TNR s.86 gain*

In the absence of express provision, s.86 gains would not be TNR gains. Section 1M(3) TCGA provides:

If—

- (a) an individual is temporarily non-resident, and
  - (b) a gain would, as a result of section 86, have accrued to the individual in a tax year falling wholly or partly in the temporary period of non-residence if the individual had been resident in the United Kingdom for that year,
- the gain is treated instead as accruing to the individual in the period of return (but see also section 86A).

### 10.7.4 *Gain on arising basis*

Section 1M(5) TCGA provides:

Nothing in this section is to affect a gain or loss which, apart from this section, would be chargeable to capital gains tax or would be an allowable loss.

This sensibly disapplies the TNR rules where the temporarily non-resident individual is already subject to CGT. That may be:

- (1) If the individual is UK-law UK resident and treaty non-resident but:
  - (a) the treaty does not have a CG article; or
  - (b) the treaty CG article does not apply to the gain (eg UK land).
- (2) If the individual is UK-law non-UK resident but carrying on a trade

in the UK through a branch or agency.<sup>22</sup>

(3) A gain on a disposal of UK land or a land-rich asset.

### 10.7.5 TNR gain remitted

Section 1M(2) TCGA provides:

If—

- (a) a gain is, as a result of subsection (1), treated as accruing to an individual in a tax year for which the remittance basis applies<sup>23</sup> to the individual,
- (b) the tax year consists of or includes the period of return, and
- (c) the gain was remitted to the United Kingdom in the temporary period of non-residence,

the gain is treated instead as remitted to the United Kingdom in the period of return.

See 10.2.3 (TNR remittances).

What about s.3 gains of a temporary non-resident?

A foreign domiciled settlor is not within s.86, so this provision does not refer to s.86 TNR gains.

## 10.8 Post-departure acquisition

Section 1N(1) TCGA provides:

An asset is excluded from section 1M(1) if— ...

I refer to this as “**post-departure acquisition relief**”.

Four conditions (or sets of conditions) then follow.

### 10.8.1 Acquisition post-departure

Section 1N TCGA provides:

- (1) An asset is excluded from section 1M(1) if—
  - (a) it was acquired by the individual in the temporary period of non-residence,
  - (b) the acquisition was otherwise than by means of a disqualifying

---

22 See 53.5 (Non-resident trader with UK branch).

23 Defined in s.1M(7): “In this section the reference to “the remittance basis” applying to an individual for a tax year is to section 809B, 809D or 809E of ITA 2007 applying to the individual for the year.”

no gain/no loss disposal.

The asset must be acquired in the temporary period of non-residence.

The relief does not apply where:

- (1) T acquires an asset when non-resident.
- (2) T returns to the UK.
- (3) T becomes temporarily non-resident.

The relief does not apply to a s.3 gain accruing to a temporary non-resident who is a participator in a non-resident company, on the disposal of an asset by the company, because the acquisition is not by the individual.

### 10.8.2 *No gain/loss acquisition*

Section 1N TCGA provides:

- (1) An asset is excluded from section 1M(1) if—
  - (b) the acquisition was otherwise than by means of a disqualifying no gain/no loss disposal,

In practice the first of these is the most important.

Section 1N TCGA defines “relevant disposal”:

- (3) For the purposes of this section “a UK resident disposal” means a disposal by a person (“P”) of an asset which was acquired by P at a time when—
  - (a) P was resident in the United Kingdom, and
  - (b) P was not Treaty non-resident.
- (4) For the purposes of this section “a disqualifying no gain/no loss disposal” means a UK resident disposal to which section 58, 73 or 258(4) applies.

The sections referred to are:

#### **TCGA s. Topic**

- |        |                           |
|--------|---------------------------|
| s.58   | Transfers between spouses |
| 73     | Death of life tenant      |
| 258(4) | Works of art              |

The drafter not used the term “Sole non-residence”; perhaps because the term is defined in sch 45 FA 2013 and incorporating a definition by reference was more trouble than it was worth.

### 10.8.3 *Exclusion for settled property*

Section 1N TCGA provides:

- (1) An asset is excluded from section 1M(1) if—
  - (b) the acquisition was otherwise than by means of a disqualifying no gain/no loss disposal.

This prevents an avoidance scheme under which T might acquire an interest under a settlement with relevant income or trust gains, and then sell the interest tax free.

### 10.8.4 *Exclusion after roll-over*

Section 1N TCGA provides:

- (1) An asset is excluded from section 1M(1) if—
  - (c) there is no reduction in the consideration for the acquisition under section 23(4)(b) or (5)(b), 152(1)(b), 153(1)(b), 162(3)(b) or 247(2)(b) or (3)(b) by reference to a UK resident disposal, and

The sections referred to are:

<b>TCGA s.</b>	<b>Topic</b>
23	Compensation and insurance
152/153	Business assets roll-over relief
162	Transfer of business to a company
247	Compulsory acquisition

### 10.8.5 *Exclusion after reorganisation*

Section 1N(2) TCGA provides:

This exclusion does not apply in the case of an asset (“the new asset”) if—

- (a) on a disposal of the new asset a gain or loss is treated as a result of 116(10) or (11), 134 or 154(2) or (4) as accruing (ignoring section 1M),
- (b) the gain or loss is calculated by reference to another asset (“the old asset”), and
- (c) the new asset is one that meets the conditions for exclusion but the old asset does not.

The sections referred to are:

<b>TCGA s.</b>	<b>Topic</b>
116	New asset is qualifying corporate bond
134	Compensation stock
154	Depreciating asset

### 10.8.6 *Interaction with share pooling*

CIOT raise an interesting question:

Suppose an individual were to own 100 shares in a limited company. The individual becomes non-resident and, whilst non-resident, purchases in the market a further 200 shares (of the same class) in the same company.

Whilst non-resident, the individual then disposes of the entire shareholding at a gain.

Under TCGA 1992 section 10A, assets owned at the date of departure which are then disposed of whilst non-resident are treated as disposed of in the year of return if the individual is away for fewer than five tax years. Section 10A therefore catches the disposal of the 100 shares. The policy behind section 10A would not therefore seek to charge tax on any gain arising in respect of the 200 shares acquired, held and disposed of whilst the individual was non-resident. This would ordinarily be provided for by section 10A(3)(a). However, section 104 provides that shares (and other fungible assets) are treated as a single asset ‘growing or diminishing’ as the case may be. Therefore, it would appear that section 104 TCGA treats the 200 shares as if they were part of the same asset which previously consisted of only 100 shares. That asset is one that was held prior to the individual’s departure (and therefore falls outside the exception for post-departure acquisitions).<sup>24</sup>

### 10.9 DTA override: Gains

Most DTAs with a capital gains article broadly adopt OECD Model form:

Gains from the alienation of any property, other than [specified exceptions] shall be taxable only in the Contracting State of which the

---

<sup>24</sup> <https://www.kessler.co.uk/wp-content/uploads/2018/12/121011-CGTsection-10A-shares-and-nonresidents-CIOT-comments.pdf>

alienator is a resident.<sup>25</sup>

Gains accruing to an individual when treaty-resident in a foreign state (in the statutory terminology, treaty non-resident) would in principle qualify for this relief even if within the scope of s.1M. Section 1M(4) TCGA provides a treaty override:

Nothing in any double taxation arrangements prevents a charge to capital gains tax arising as a result of this section.

This constitutes a breach of treaties in OECD Model form.<sup>26</sup> However the intention of parliament is clear and prevails over the treaty.<sup>27</sup>

### 10.9.1 *Foreign tax credit relief*

EN FB 2005 provides:

The application of section 10A [now s.1M] in relation to an individual does not prevent the individual obtaining relief for foreign tax paid in respect of chargeable gains which are treated as arising to him or her in the year of return.

The same would apply to the current rules. For an example in the context of the USA/UK DTA, see 106.24 (Credit for TNR CGT charge),

## 10.10 TNR: BAD relief claim

The CGT liaison group (HMRC and the tax professional bodies) has issued a guidance note which provides:<sup>28</sup>

### **Technical tax analysis put forward for HMRC comment**

49 Under s.10A TCGA 1992 the gain will be treated as accruing to a taxpayer in the year of return. The view taken is that the original disposal date applies for ER [now business asset disposal relief] purposes. As s.169M TCGA requires an election for ER to be made before the first anniversary of 31 January following the tax year in

---

25 See 16.18 (DT relief for taxable gains).

26 This is recognised in some treaties, where a specific provision authorises a s.10A charge (and any foreign state equivalent). See 53.23.5 (DTA recent departure rules).

27 See 103.18.7 (Conflict between DTA/UK law).

28 [http://www.tax.org.uk/system/files\\_force/file\\_uploads/120213%20ER%20Technical%20Questions%20and%20HMRC%20response.pdf?download=1](http://www.tax.org.uk/system/files_force/file_uploads/120213%20ER%20Technical%20Questions%20and%20HMRC%20response.pdf?download=1)

which the disposal takes place, it is likely that the individual will be out of time in making an ER claim if he waits until he has resumed UK residence. The advice is therefore to make a protective claim...

**HMRC response ...**

51 ER is only available on the making of a claim and such claim must be made within the statutory time limit which is set by reference to the date of the qualifying disposal (see s.169M(3) TCGA 1992). It is for the taxpayer to consider whether to submit a protective claim for ER within this time period.

**10.11 TNR s.86/s.87 interaction**

In the absence of relief, gains accruing to the trustees during the settlor's period of temporary non-residence may be:

- (1) s.86 gains of the settlor in the year of return, and
- (2) s.1(3) amounts (trust gains) which may effectively be charged on beneficiaries of the settlement who receive capital payments.

Section 86A TCGA provides relief against double taxation

Section 86A TCGA provides:

- (1) Subsection (3) applies if—
  - (a) chargeable gains of an amount equal to the amount referred to in section 86(1)(e) for a tax year ("year A") are treated under section 1M(3)<sup>29</sup> as accruing to a settlor under section 86 in the period of return

"Year A" is one of the temporary non-resident years. The label is not ideal, but I adopt it as it is easiest to follow the statutory terminology.

- (b) there are amounts on which beneficiaries of the settlement are charged to tax under section 87 or 89(2) for one or more tax years, each of which is earlier than the year of return, and
- (c) those amounts are in respect of matched capital payments<sup>30</sup> received by the beneficiaries.

It is considered that non-resident beneficiaries are not "charged to tax" unless they are temporary non-resident beneficiaries who have returned

---

<sup>29</sup> See 10.7.3 (TNR s.86 gain).

<sup>30</sup> Defined s.86A(2): "A "matched" capital payment is a capital payment, all or part of which is matched under section 87A with the section 1(3) amount for year A."

to the UK before the settlor's year of return. Remittance basis beneficiaries are "charged to tax" even if nothing is remitted.

### 10.11.1 *The reliefs*

There are three reliefs. Firstly, s.86A(3)(4) TCGA provides s.87 gains charged to tax are deducted from the settlor's s.86 gains:

(3) The amount of the chargeable gains mentioned in subsection (1)(a) for year A that are treated under section 1M(3) as accruing to the settlor under section 86 in the period of return is to be reduced by the appropriate amount.

(4) The appropriate amount is—

- (a) the sum of the amounts mentioned in subsection (1)(c) to the extent that the matched capital payments are matched under section 87A with the section 1(3) amount for year A, or
- (b) if the property comprised in the settlement has at any time included property not originating from the settlor, so much (if any) of that sum as, on a just and reasonable apportionment, is properly referable to the settlor.

Section 86 gains which are brought into charge are deducted from s.1(3) amounts. That follows the usual rule in s.87(4)(b) TCGA.<sup>31</sup> The legislation has separate rules for the year of return and for earlier years (why?). Section 86A(5) deals with the year of return:

(5) If a reduction falls to be made under subsection (3) for the year of return, the deduction to be made in accordance with section 87(4)(b) for the settlement for that year must not be made until—

- (a) all the reductions to be made under subsection (3) for that year for each settlor have been made, and
- (b) those reductions are to be made starting with the year immediately preceding the year of return and working backwards.

Lastly, s.86A(6)(7) deals with the earlier years:

(6) Subsection (7) applies if, with respect to year A, an amount remains to be treated under section 1M(3) as accruing to any of the settlors in the period of return after having made the reductions under subsection

---

31 See 57.6.2 (s.86 gain deducted from s.1(3) amount).

(3) with respect to year A.

(7) The aggregate of the amounts remaining to be so treated (for all of the settlors) is to be applied in reducing so much of the section 1(3) amount for year A as has not already been matched with a capital payment under section 87A for any year prior to the year of return (but not so as to reduce the section 1(3) amount below zero).

Section 86A(8) TCGA provides definitions needed for a trust with multiple settlors:

(8) In this section—

- (a) “the settlement” means the settlement in relation to which the settlor mentioned in subsection (1)(a) is a settlor,
- (b) a reference to “the settlors” or “each settlor” is to the settlors or each settlor in relation to the settlement,
- (c) “period of return” and “year of return” have the same meanings as in section 1M(3), and
- (d) paragraph 8 of Schedule 5 applies in construing the reference to property originating from the settlor.

## 10.12 TNR dividends regime

A table may assist navigation. In order of importance, the provisions are:

Section	Topic	See para
<i>Foreign dividends</i>		
408A ITTOIA	Foreign dividend	10.14
689A ITTOIA	Foreign distribution	10.14
<i>UK dividends</i>		
812A ITA	Non-resident IT relief	10.16
401C ITTOIA	DT relief	10.17
413A ITTOIA	Stock dividend	<i>not discussed</i>
420 ITTOIA	Debt write-off	<i>not discussed</i>

I refer to the provisions together as the “**TNR dividends<sup>32</sup> regime**”.

## 10.13 TNR dividends: Terminology

Some common terminology is used throughout the TNR dividends regime.

---

32 Where context permits, I use the word “dividends” loosely to include distributions.

### 10.13.1 “Participator”/“associate”

These terms have their standard meanings. Section 408A(4) ITTOIA provides:

For the purposes of subsection (3)—  
 “associate” and “participator” have the same meanings as in Part 10 of CTA 2010 (see sections 448 and 454)

This only applies for s.408A, but the same definition is repeated throughout the TNR dividends regime.<sup>33</sup>

See 99.6 (Associates); 99.22 (Definition of “Participator”).

### 10.13.2 “Material” participator

Section 408A(4) ITTOIA adopts the definition in the close company participator loan rules:

a “material participator” is a participator who has a material interest in the company, as defined in section 457 of that Act

This only applies for s.408A, but the same definition is repeated throughout the TNR dividends regime.<sup>34</sup>

So our journey takes us to s.457 CTA 2010, which provides:

(1) A person has a material interest in a company for the purposes of section 456 if condition A or B is met.

(2) Condition A is that

- [i] the person (with or without one or more associates) or
- [ii] any associate of that person (with or without one or more other such associates)

is—

- (a) the beneficial owner of, or
  - (b) directly or indirectly able to control,
- more than 5% of the ordinary share capital of the company.

Control of a company is understandable. Control of shares means power to exercise rights of ownership, eg trustees have control of shares held in trust; shareholders of a parent company have (indirect) control of shares

---

<sup>33</sup> See s.401C(12), 689A(4)(a) ITTOIA.

<sup>34</sup> See s.401C(12) (with immaterial differences); 689A(4)(b) ITTOIA.

held by the company.

- (3) Condition B is that, in the case of a close company,
- [i] the person (with or without one or more associates) or
  - [ii] any associate of that person (with or without one or more other such associates)
- possesses or is entitled to acquire such rights as would—
- (a) in the event of the winding up of the company, or
  - (b) in any other circumstances,
- give an entitlement to receive more than 5% of the assets which would then be available for distribution among the participants.

The net is cast wider than necessary to deal with TNR avoidance.<sup>35</sup>

### 10.13.3 “Relevant time”

“Relevant time” matters for the material participator test.<sup>36</sup>

Section 408A(4) ITTOIA provides:

In this section ...

“relevant time” means—

- (i) any time in the year of departure or, if the year of departure is a split year as respects the individual, the UK part of that year, or
- (ii) any time in one or more of the 3 tax years preceding that year;

This only applies for s.408A, but the same definition is repeated throughout the TNR dividends regime.<sup>37</sup>

## 10.14 Foreign dividend/distribution

For historical reasons there are separate provisions for foreign dividends/distributions,<sup>38</sup> but the rules are (mostly) identical.

### 10.14.1 TNR dividends taxed on return

The rules are in s.408A/689A ITTOIA and are best read side by side:

---

35 Contrast s.3 TCGA, which also started with a 5% de minimis limit, later increased to 10% and (following EU pressure) is now set at an appropriate 25%.

36 See 10.15.3 (Material participator test).

37 See 401C(12), 689A(4)(c) ITTOIA.

38 See 29.5.4 (Income-distribution: IT charge).

**Dividends: s.408A**

(1) This section applies if an individual is temporarily non-resident.

(2) Dividends within subsection (3) are to be treated for the purposes of this Chapter [Chapter 4 Part 4] as if they were received by the individual, or as if the individual became entitled to them, in the period of return.

**Distributions: s.689A**

(1) [Identical]

(2) Distributions within subsection (3) are to be treated for the purposes of this Chapter [Chapter 8 Part 5] as if they had been received by the individual, or as if the individual had become entitled to them, in the period of return.

**10.14.2 TNR dividends remitted****Dividends: s.408A(5)**

If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the year of return, any dividend within subsection (3) that was

remitted to the UK in the temporary period of non-residence is to be treated as remitted to the UK in the period of return

**Distributions: s.689A(5)**

If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the year of return, any distribution within subsection (3) that is [i] relevant foreign income and [ii] is remitted to the UK in the temporary period of non-residence is to be treated as remitted to the UK in the period of return.

See 10.2.3 (TNR remittances).

The requirement in s.689A(5) that the distribution must be RFI is otiose, as the distribution will always be RFI.

Section 408A(9) ITTOIA deals with interaction with SIP regime; not discussed here.

**10.15 TNR dividend/distribution****Dividends: s.408A(3)**

A dividend is within this subsection if—

**Distributions: s.689A(3)**

A distribution is within this subsection if—

A set of four conditions then follow. I refer to these as “**TNR dividend/**

**distribution conditions (a)-(d)**". Dividends/distributions which meet these conditions are **"TNR dividends/distributions"**.

#### 10.15.1 *Condition (a): Receipt*

**Dividends: s.408A(3)**

A dividend is within this subsection if—  
(a) the individual receives or becomes entitled to it in the temporary period of non-residence,

**Distributions: s.689A(3)**

A distribution is within this subsection if—  
(a) [identical]

This is straightforward.

#### 10.15.2 *Condition (b): Close co*

**Dividends: s.408A(3)**

A dividend is within this subsection if ...  
(b) it is a dividend of a company that would be a close company if the company were UK resident,

**Distributions: s.689A(3)**

A distribution is within this subsection if ...  
(b) it is a distribution of a company [i] that is a close company or [ii] that would be a close company if the company were UK resident,

The reference in s.689A(b)[i] to a distribution of a *close* company is odd. An individual will always be liable to tax in respect of the distribution from a close (ie UK resident) company;<sup>39</sup> so the condition in (d)(i) will never be satisfied.<sup>40</sup> Perhaps it is a mistake which was noticed and corrected in s.408A, but remained uncorrected in s.689A.

#### 10.15.3 *Material participator test*

**Dividends: s.408A(3)**

**Distributions: s.689A(3)**

---

<sup>39</sup> See 29.2 (UK dividend regime).

<sup>40</sup> See 10.15.4 (Condition (d): Liability).

A dividend is within this subsection if ...  
 (c) the individual receives or becomes entitled to it by virtue of being at a relevant time—  
 (i) a material participator in the company, or  
 (ii) an associate of a material participator in the company, and

A distribution is within this subsection if ..  
 (c) the individual receives or becomes entitled to the distribution by virtue of being at a relevant time—  
 (i) a material participator in the company, or  
 (ii) an associate of a material participator in the company

I refer to this requirement (which comes in many places in the TRN dividends regime) as “**material participator test**”.

There are two requirements to satisfy condition (c):

- (1) The individual was a material participator/associate in the company at a relevant time. That is relatively straightforward. If an individual purchases shares after departure, condition (c) is not satisfied.
- (2) The dividend was made to the individual *by virtue of* being a material participator/associate at the relevant time.

Requirement (2) is a causation test, and causation is not straightforward. Bramwell says:

Take the most obvious case: a shareholder in a close company departs from the UK in Year 1 (“the year of departure”) for a period of temporary non-residence.

In Year 2 (a year of non-residence) a dividend is declared and paid on the shares he owned in the year of departure and which he continues to own.

The issue is whether the income arises to him because he was a material participator in the company at “a relevant time” namely, at a time in the year of departure. In fact the income arises to him because he owns the shares when the dividend is declared in Year 2.<sup>41</sup>

It is correct that the income arises to the shareholder because they own shares in year 2 when the dividend is declared. But the reason they own shares in that year is that they held the shares in year 1 (the year of

---

41 Bramwell, *Taxation of Companies and Company Reconstructions* (looseleaf) para E2.3.11.

departure) and have retained them. The causation test ought to be applied in the context of the purpose of the provisions. So in the context it is suggested that the causation part of condition(c) is satisfied. (If that were wrong, would the provisions ever apply?)

Similarly, if T holds shares before departure, and by a reorganisation becomes entitled to other shares, then a distribution on the other shares in principle meets condition (c).

What if T holds shares before departure and:

- (1) T sells those shares when non-resident and T repurchases shares in the same company; or
- (2) T sells the shares to his spouse?

It is suggested that the causation condition is met if there is an arrangement designed to avoid the rules.

At first sight, one might have expected condition (c) to provide:

*The dividend/distribution arises in respect of shares held by the individual/associate at any time in the relevant period.*

But that would be too wide: it would catch cases where the individual had bought and sold and later bought the same shares in the period of temporary nonresidence. The work involved in keeping track could be considerable. At the cost of some uncertainty, the causation wording allows some innocent arrangements to escape, and catches some arrangements designed to avoid the rules.

#### 10.15.4 Condition (d): Liability

##### **Dividends: s.408A(3)**

A dividend is within this subsection if ...

- (d) ignoring this section, the individual—
- (i) is not liable for tax under this Chapter [Chapter 4 Part 4] in respect of the dividend, but
  - (ii) would have been so liable if the individual had received the dividend, or become entitled to it, in the period of return.

##### **Distributions: s.689A(3)**

A distribution is within this subsection if ...

- (d) ignoring this section the individual—
- (i) is not liable for tax under this Chapter [Chapter 8 Part 5] in respect of the distribution, but
  - (ii) would have been so liable if the individual had received the distribution, or become entitled to it, in the period of return.

Is it ever the case that the condition in s.408A(3) is not met? While it is the case that the condition in s.698A(3)(i) may not be met,<sup>42</sup> is it ever the case that the condition in s.698A(3)(ii) is not met?

For dividends, s.408A(4)(d) ITTOIA provides:

For the purposes of subsection (3) ...

(d) paragraph (d)(i) includes a case where the individual could be relieved of liability on the making of a claim under section 6 of TIOPA 2010 (double taxation relief), even if no claim is in fact made.<sup>43</sup>

Why is this needed?

#### 10.15.5 *Settlor-interested trust*

The income of a settlor-interested trust would not meet condition (c)(i) as:

- (1) The settlor (“S”) is not in principle a participator.
- (2) Even if S was a participator (because S held some interest in the company directly) a distribution to the trustees is not treated as made to S because S was a material participator; it is treated as made to S because S is the settlor of a settlor-interested settlement.

This is perhaps caught by condition (c)(ii). That would probably apply to the settlor of a settlor-interested trust where the trustees are the material participator; the argument is that the dividend is treated as made to the settlor because he was an associate of the trustees, so the causation condition in (6)(b)(ii) may be satisfied.

On a literal reading the argument is subject to serious objections:

- (1) S is not an “associate of a material participator”. Although the trustees are associates of S, the contrary does not hold.<sup>44</sup>
- (2) Even if S is an associate, the income does not arise to S because S is an associate. It arises because the settlement is settlor-interested. You can have a situation where the trust is settlor interested but the settlor has no personal interest in it and so the trustees are not associates (eg if the spouse of the settlor is a beneficiary). You can have a situation where the

---

42 See 10.15.2 (Condition (b): Close co).

43 For distributions, s.689A(4) ITTOIA is identical.

44 See 99.6.4 (Trustees & settlor/relatives).

settlor does have an interest but the settlement is not settlor-interested, eg if one of the exceptions in s.625(2) ITTOIA applies.

However a purpose construction probably applies. On the literal view, when do the paragraphs using this wording (that is, s.401C(6)(b)(ii) ITTOIA, 408A(3)(c)(ii), 689A(3)(c)(ii) ITTOIA ITTOIA, and 812A(4)(c)(ii) ITA) ever apply? It seems anomalous that settlor-interested trust income is not caught, if these paragraphs do not catch it, what are they aimed at?

The words “arises or is *treated* as arising” in 812A(4)(c) may be taken a reference to s.624 which also uses the word “treated”, but it may simply be a reference to s.385(1) ITTOIA.

## 10.16 Non-resident IT relief

### 10.16.1 Relief clawback on return

Section 812A(1) ITA provides:

This section applies if—

- (a) an individual is temporarily non-resident,
- (b) the individual’s liability to income tax for a tax year is limited under section 811 [Non-resident IT relief],<sup>45</sup>
- (c) that tax year (“the non-resident year”) falls within the temporary period of non-residence, and
- (d) the individual’s income for that tax year includes relevant investment income.

Assuming these conditions are met, we move on to the rule in s.812A(2):

The total income (see Step 1 of the calculation in section 23) on which the individual is charged to income tax for the year of return is to be increased by an amount equal to the amount of that relevant investment income.

### 10.16.2 Relevant investment income

Section 812A(4) ITA provides the definition:

Income is “relevant investment income” if—

- (a) it is chargeable under Chapter 3 or 5 of Part 4 of ITTOIA 2005

---

<sup>45</sup> See 42.1 (Non-residents IT relief: Introduction).

- (dividends etc from UK resident companies and stock dividends from UK resident companies),
- (b) the distributing company is a close company, and
- (c) the income arises or is treated as arising to the individual because the individual was at a relevant time—
  - (i) a material participator in that company, or
  - (ii) an associate of a material participator in the company.

Para (c) is the material participator test.<sup>46</sup>

### 10.16.3 *Credit for tax*

Section 812A(3) ITA provides:

But the notional UK tax on that relevant investment income is to be allowed as a credit against the individual’s liability to income tax for the year of return under Step 6 of the calculation in section 23.

Section 812A(7) ITA provides:

The “notional UK tax” on relevant investment income is—

- (a) the total of any sums in respect of that income that were included within amount A in determining the limit under section 811, less
- (b) any credit for foreign tax paid in respect of that income that was allowed under Chapter 2 of Part 2 of TIOPA 2010 against the individual’s liability to income tax for the non-resident year.

### 10.16.4 *DTA override: relief clawback*

Section 812A(9) ITA provides:

Nothing in any double taxation arrangements is to be read as preventing the individual from being chargeable to income tax by virtue of this section (or as preventing a charge to that tax from arising as a result).

## 10.17 **DTA override: UK dividend**

### 10.17.1 *“Relevant distribution”*

Section 401C(6) ITTOIA provides:

---

<sup>46</sup> See 10.15.3 (Material participator test).

For the purposes of this section, a dividend or other distribution is a “relevant distribution” if—

- (a) it is a dividend or other distribution of a close company, and
- (b) it is made or treated as made to the individual because<sup>47</sup> the individual was at a relevant time—
  - (i) a material participator in the company, or
  - (ii) an associate of a material participator in the company.

Para (b) is the material participator test.<sup>48</sup>

### 10.17.2 *UK dividends taxed on return*

In the absence of a specific rule, a relevant distribution may qualify for DT relief in the hands of a treaty user. Treaty relief is in art.10 OECD Model.<sup>49</sup> It is easier to follow if rewritten to specify which Contracting State is which. In outline, in the present context:

1. Dividends paid by a company which is a resident of a Contracting State [the UK] to a resident of the other [foreign] Contracting State may be taxed in that other [foreign] State.
2. However, dividends paid by a company which is a resident of a Contracting State [the UK] may also be taxed in that State [the UK] according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other [foreign] Contracting State, the tax so charged shall not exceed:
  - a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company ... which holds directly at least 25 per cent of the capital of the company paying the dividends ...;
  - b) 15 per cent of the gross amount of the dividends in all other cases.

Equipped with the definition of relevant distribution, and with this DT relief in mind, we can at last turn to the TNR rule itself. Section 401C(1) ITTOIA provides:

---

47 The drafter has used “because” where the s.408A/689A rules used “by virtue of”. I guess that the drafter started with more traditional legal language, and someone later remembered the plain legal English aspect, but did not reword the provisions consistently.

48 See 10.15.3 (Material participator test).

49 See 29.9 (DT relief: dividend income).

This section applies if—

- (a) an individual is temporarily non-resident,
- (b) a relevant distribution is made or treated as made to the individual in the temporary period of non-residence,
- (c) the tax year in which it is made or treated as made (“the distribution year”) is a tax year for which the individual is UK resident, and
- (d) the amount of income tax charged on the distribution under this Chapter [Chapter 4 Part 4] is less than it would have been if the existence of double taxation relief arrangements were disregarded.

If these conditions are satisfied, one moves on to the rules.

The rules distinguish between the year of return and earlier temporary non-resident years. For the earlier non-resident years, s.401C ITTOIA provides:

(2) Subsections (3) and (4) have effect in cases where the distribution year is not the year of return.

(3) The total income (see Step 1 of the calculation in section 23 of ITA 2007) on which the individual is charged to income tax for the year of return is to be increased by an amount equal to the amount on which tax would be charged under this Chapter [Chapter 4 Part 4] in respect of the distribution disregarding any double taxation relief arrangements.

(4) But the notional UK tax<sup>50</sup> on that distribution is to be allowed as a credit against the individual’s liability to income tax for the year of return under Step 6 of the calculation in section 23.

For the year of return, s.401C(5) ITTOIA provides:

If the distribution year is the year of return, the tax charged under this Chapter [Chapter 4 Part 4] in respect of the relevant distribution is to be charged and assessed without regard to the existence of double taxation relief arrangements.

---

50 Section 401C(10) ITTOIA provides: “The “notional UK tax” on the relevant distribution is so much of the income tax paid by the individual for the distribution year as is attributable on a just and reasonable basis to the relevant distribution.” The tax is not “notional”, it is payable.

## 10.18 Post-departure trade profits

The reliefs for post-departure trade profits is repeated four times, as follows:

Section	Topic	Post-departure trade profit relief
<i>Foreign dividends</i>		
408A ITTOIA	Foreign dividend	s.408A(6)
689A ITTOIA	Foreign distribution	<i>None</i>
<i>UK dividends</i>		
812A ITA	Non-resident IT relief	s.812A(5)
401C ITTOIA	DT relief	s.401C(7)
413A ITTOIA	Stock dividend	s.413A(7) <i>not discussed here</i>

There is no relief for a foreign distribution, under s.689A; I wonder if that is an oversight. The point will not often arise.

It is helpful to consider the statutory wording side by side:

### **s.408A(6) ITTOIA**

This section does not apply to a dividend within subsection (3) to the extent that it is paid in respect of post-departure trade profits.

### **812A(5) ITA**

But income within subsection (4) in the form of a cash or stock dividend is not “relevant investment income” to the extent that the dividend is paid, or the share capital is issued, in respect of post-departure trade profits

### **s.401C(7) ITTOIA**

But a dividend or other distribution within subsection (6) in the form of a cash dividend is not a “relevant distribution” to the extent that the dividend is paid in respect of post-departure trade profits.

The s.812A/401C reliefs apply only to a cash dividend. It is difficult to see why a dividend in specie should not qualify, but perhaps it will not often matter.

The definitions of “post-departure trade profits” are slightly differently worded, but come to the same thing:

### **s.408A ITTOIA**

### **812A ITA**

### **s.401C ITTOIA**

(7) “Post-departure trade profits” are—

(a) trade profits of the company arising in an accounting period that begins after the start of the temporary period of non-residence, and

(b) so much of any trade profits of the company arising in an accounting period that straddles the start of that temporary period as is attributable (on a just and reasonable basis) to a time after the start of that temporary period.

(6) “Post-departure trade profits” are—

(a) trade profits of the distributing company arising in an accounting period that begins after the start of the temporary period of non-residence, and

(b) so much of any trade profits of the distributing company arising in an accounting period that straddles the start of that temporary period as is attributable (on a just and reasonable basis) to a time after the start of that temporary period.

(8) “Post-departure trade profits” are—

(a) trade profits of the close company arising in an accounting period that begins after the start of the temporary period of non-residence, and

(b) so much of any trade profits of the close company arising in an accounting period that straddles the start of that temporary period as is attributable (on a just and reasonable basis) to a time after the start of that temporary period.

Similarly, the definitions of “trade profits” are slightly differently worded, but the differences do not seem material:

**s.408A ITTOIA**

“trade profits of the company” means the profits of any trade carried on by the company, as they would be calculated in accordance with Part 3 of CTA 2009 (trading income) if the company were UK resident.

**812A ITA**

“trade profits of the distributing company” means the profits of any trade carried on by the distributing company, as calculated in accordance with Part 3 of CTA 2009 (trading income);

**s.401C ITTOIA**

In this section... “trade profits of the close company” means the profits of any trade carried on by the close company, as calculated in accordance with Part 3 of CTA 2009 (trading income).

10.18.1 *Apportionment*

Section 408A(8) ITTOIA provides:

The extent to which a dividend is paid in respect of post-departure trade profits is to be determined on a just and reasonable basis.

The same provision is found in s.401C(9) ITTOIA.

## 10.19 TNR: Life policies

### 10.19.1 TNR chargeable-event gains

Section 465B ITTOIA provides:

- (1) This section applies if an individual is temporarily non-resident.
- (2) The individual is liable for tax under this Chapter [Chapter 9 Part 4] for the year of return in respect of any gain that meets the conditions in subsection (3).
- (3) The conditions are—
  - (a) the gain arose in the temporary period of non-residence,
  - (b) it arose from a policy issued in respect of an insurance made, or from a contract made, before the start of that period,<sup>51</sup>
  - (c) the chargeable event giving rise to it was neither
    - [i] a death nor
    - [ii] a chargeable event treated as occurring under section 525(2) [personal portfolio bond annual charge],
  - (d) no-one is liable under section 466 or 467 in respect of the gain, [personal representatives; UK trustees]
  - (e) no-one is liable by virtue of section 468 for either the year of return or an earlier tax year as a result of the gain, [transfer of asset rules] and
  - (f) the individual would have been liable under section 465 in respect of the gain, applying the assumptions in subsection (4).
- (4) The assumptions are—
  - (a) the individual was UK resident for the tax year in which the gain arose, and
  - (b) that tax year was not a split year as respects the individual.

### 10.19.2 CE gains taxed on return

Section 465B ITTOIA provides:

- (5) If the individual is liable by virtue of subsection (2) in respect of a gain—

---

51 Section 465B(7) provides: “If the gain arises from a policy or contract treated under section 473A as a single policy or contract, the date, for the purposes of subsection (3)(b), on which the insurance or contract is made is the date on which the first insurance is made in respect of which the connected policies were issued or, as the case may be, the date on which the first of the connected contracts is made.”

- (a) the amount of the gain in respect of which he or she is liable is the amount on which tax would have been charged under this Chapter [Chapter 9 Part 4] applying the assumptions in subsection (4), but
  - (b) in determining that amount, section 528 [non-resident period relief] must be applied ignoring those assumptions.
- (6) That amount is treated as income of the individual for the year of return.

### 10.19.3 *Exception*

Section 465B(8) ITTOIA provides:

This section does not apply to a gain if—

- (a) in relation to the policy or contract from which the gain arises, a terminal event<sup>52</sup> occurs in the temporary period of non-residence or in the period of return,
- (b) the chargeable event giving rise to the gain occurred before that terminal event,
- (c) the chargeable event giving rise to the gain is one that is treated as occurring under section 509(1) as a result of the application of section 498(1)(a),
- (d) section 498(1)(a) applies other than by virtue of section 500, and
- (e) a person (whether or not the individual) is liable for tax under this Chapter [Chapter 9 part 4] (including by virtue of this section) in respect of any gain resulting from the terminal event.

### 10.19.4 *DTA override: CE gains*

Section 465B(9) ITTOIA provides:

Nothing in any double taxation relief arrangements is to be read as preventing the individual from being liable for tax under this Chapter [Chapter 9 part 4] in respect of any gain in respect of which the individual is liable for tax by virtue of subsection (2) (or as preventing a charge to tax on that gain from arising under this Chapter).

## 10.20 TNR: Offshore funds

---

<sup>52</sup> Section 465B(11) ITTOIA provides a referential definition: In this section—  
“terminal event” means an event mentioned in section 499(3);...

The regulations were rewritten by the Temporary Non-Residence (Miscellaneous Amendments) Regulations 2013.

Regulation 2 of these regulations provides:

2. The amendments made...
  - (b) by regulation 4 have effect for the purposes of income tax for the tax year 2013-14 or any subsequent tax year.

This is unlike the FA 2013 commencement rule, which only applies if the *year of departure* is 2013/14 or later.<sup>53</sup> The new offshore fund rules apply to OIGs from 2013/14 regardless of the year of departure.

Regulation 23 OFTR provides:

- (1) This regulation applies where an individual (“the taxpayer”) is temporarily non-resident.
- (2) The taxpayer is chargeable to income tax as if offshore income gains within paragraph (3) were offshore income gains arising to the taxpayer in the period of return.

I refer to OIGs within (3) as “**TNR OIGs**”.

#### 10.20.1 *TNR OIG*

Regulation 23 OFTR provides:

- (3) The offshore income gains within this paragraph are those that—
  - (a) arise to the taxpayer in the temporary period of non-residence, and
  - (b) would be treated under section 13 of TCGA 1992 (attribution of gains to members of non-resident companies) as it applies to offshore income gains by virtue of regulation 24 as having arisen to the taxpayer in that period if the residence assumption were made.
- (4) The residence assumption is—
  - (a) that the taxpayer had been resident in the UK for the tax year in which the offshore income gain arose to the company, or
  - (b) if that tax year was a split year as respects the taxpayer, that offshore income gain had arisen to the company in the UK part of it.

---

<sup>53</sup> See 10.1 (Temporary non-residence – Introduction).

This is the same as s.1M TCGA, except (consistently with the OIG regime) there is no relief for losses and no provision dealing with s.86.

#### 10.20.2 *OIG taxed on arising basis*

Regulation 23(5) OFTR provides:

But a gain is not within paragraph (3) if, ignoring this regulation, the taxpayer is chargeable to income tax in respect of it (and could not cease to be so chargeable by making a claim under section 6 of the Taxation (International and Other Provisions) Act 2010).

This sensibly disapplies the TNR rules where the temporarily non-resident individual is already subject to IT on the OIG. That may be:

- (1) If the individual is UK-law UK resident and treaty-resident in a state whose treaty does not have an article giving relief from OIGs.
- (2) If the individual is UK-law non-UK resident but carrying on a trade in the UK through a branch or agency.<sup>54</sup>

#### 10.20.3 *TNR OIG remitted*

Regulation 23(7) OFTR provides:

If section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the taxpayer for the year of return, any offshore income gains to which regulation 19(2) applies falling within paragraph (3) of this regulation by virtue of sub-paragraph (a) of that paragraph that were remitted to the UK at any time in the temporary period of non-residence are to be treated as remitted to the UK in the period of return.

See 10.2.3 (TNR remittances).

What about gains within reg 23(3)(b)?

#### 10.20.4 *Post-departure acquisitions*

Regulation 23A(1) OFTR deals with post-departure acquisitions:

- (1) Regulation 23(2) does not apply to an offshore income gain accruing on the disposal by the taxpayer of an asset if –
  - (a) the asset was acquired by the taxpayer in the temporary period

---

<sup>54</sup> This is only theoretical: see 64.9 (OIG non-residence defence).

- of non-residence,
- (b) it was so acquired otherwise than by means of a relevant disposal<sup>55</sup> that by virtue of section 58, 73 or 258(4) TCGA 1992 is treated as having been a disposal on which neither a gain nor a loss accrued, and
  - (c) the asset is not an interest created by or arising under a settlement.

See 10.8 (Post-departure acquisitions).

#### 10.20.5 *DTA override: OIG*

Regulation 23A(2) OFTR provides the DTA override:

Nothing in any double taxation relief arrangements is to be read as preventing the taxpayer from being chargeable to income tax in respect of any offshore income gains treated under regulation 23 as accruing to the taxpayer in the period of return (or as preventing a charge to that tax from arising as a result).

See 10.9 (DTA override: Gains).

#### 10.20.6 *Time limit for assessment*

Regulation 23A(3) OFTR provides the (unnecessary) time extension for assessment:

Nothing in any enactment imposing any limit on the time within which an assessment to income tax may be made prevents any assessment for the year of departure from being made in the taxpayer's case at any time before the end of the second anniversary of the 31 January next following the year of return.

See 10.20.6 (Time limit for assessment).

### **10.21 Pre-departure income**

Section 832A ITTOIA provides:

- (1) This section applies if an individual is temporarily non-resident.
- (2) Treat any of the individual's relevant foreign income within

---

<sup>55</sup> Defined by reference in reg 23A(4) "In this regulation (a) "relevant disposal" has the meaning given in section 10AA(2) of TCGA 1992".

subsection (3) that is remitted to the UK in the temporary period of non-residence as remitted to the UK in the period of return.

See 10.2.3 (TNR remittances).

I refer to income within (3) as “**pre-departure RFI**”.

### 10.21.1 *Pre-departure RFI*

Section 832A(3) ITTOIA provides:

Relevant foreign income is within this subsection if—

- (a) it is relevant foreign income for the UK part of the year of departure or an earlier tax year, and
- (b) section 832 applies to it.

So we need to refer back to s.832(1) ITTOIA:

This section applies to an individual’s relevant foreign income for a tax year (“the relevant foreign income”) if section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

This is intended to apply to a temporary non-resident who is UK-law non-UK resident and remits pre-departure RFI<sup>56</sup> during the temporary period of non-residence.

It is not needed where a temporary non-resident is UK law UK resident treaty non-resident and remits pre-departure RFI during the temporary period of non-residence. Treaties do not provide relief in this situation, so tax planning of this kind was not possible. Nevertheless s.832A does apply in this case.

The drafter may perhaps have thought that this planning was possible, or may have introduced the rule unintentionally by copying across in s.832A the s.1M TCGA rules which were designed for a different situation.

Income arising after the year of departure is not caught by this section. What about pre-2005 income to which s.832 ITTOIA does not apply?

---

<sup>56</sup> That is, RFI which:

- (1) is taxed on a remittance basis, ie accruing to a remittance basis taxpayer while the individual was UK resident; and
- (2) which was not remitted prior to departure (so was not subject to tax before departure).

### 10.21.2 *Apportionment*

Section 832A(4) ITTOIA provides:

Any apportionment required for the purposes of subsection (3)(a) is to be done on a just and reasonable basis.

### 10.21.3 *DTA override: RFI*

Section 832A(5) ITTOIA provides:

Nothing in any double taxation relief arrangements is to be read as preventing the individual from being chargeable to income tax in respect of any relevant foreign income treated by virtue of this section as remitted to the UK in the period of return (or as preventing a charge to that tax from arising as a result).

This is based on a misconception that DT relief may apply in this case.

### 10.21.4 *HMRC examples*

RDR3 gives a straightforward example:

#### **Example 46 (Marie)**

M returned to the UK during the tax year 2018–19 after a period of residence abroad.

She originally left the UK to become resident abroad on 2 September 2013 (end of period A) and so her year of departure was 2013–14. She had been resident in the UK for the seven years before her departure and claimed the remittance basis in those years.

While M was resident abroad she remitted to the UK the following relevant foreign income (RFI):

<b>RFI</b>	<b>From</b>	<b>Remitted</b>
£15,000	2009–10	2014–15
£18,000	2010–11	2014–15
£18,000	2011–12	2015–16
<u>£20,000</u>	2012–13	2016–17
<u>£71,000</u>		

As she was not resident in the UK, this income was not taxed when remitted here.

On her return to the UK on 1 June 2018 (the beginning of the UK part of split year 2018-19), M is within the special [TNR] rules because her period of temporary non-residence was less than five years. She will be

liable to UK tax on these earlier remittances which took place when she was temporarily non-resident. They will be chargeable to UK tax in 2018-19, the tax year of her return.

M should have been advised to remain outside the UK a little longer, so as to fall outside the TNR rules.

## 10.22 Pre-departure gains

What is the position if a temporary non-resident remits pre-departure gains to the UK (ie gains which accrued when solely UK resident)?

### 10.22.1 Position pre-2019 CGT rewrite

Before 2019/20, s.12 TCGA provided:

- (1) This section applies to foreign chargeable gains accruing to an individual in a tax year (“the foreign chargeable gains”) if—*
  - (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and*
  - (b) the individual is not domiciled in the UK in that year.*
- (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.*

The gains are deemed to accrue when remitted. This deeming then brought into effect the former s.10A TCGA:

- (1) This section applies if an individual (“the taxpayer”) is temporarily non-resident.*
- (2) The taxpayer is chargeable to capital gains tax as if gains and losses within subsection (3) were chargeable gains ... accruing to the taxpayer in the period of return.*
- (3) The gains and losses within this subsection are—*
  - (a) chargeable gains ... that accrued to the taxpayer in the temporary period of non-residence,*

Pre-departure gains remitted when non-resident did not accrue to the taxpayer in the temporary period of non-residence, but they were deemed to have done so, so they were further deemed to accrue in the year of return.

### 10.22.2 Position from 2019/20

Sch 1 TCGA is the equivalent of the former s.12. Para 1 sch 1 TCGA provides:

- (1) This paragraph applies in the case of an individual to whom the remittance basis<sup>57</sup> applies for a tax year if—
  - (a) in that year the individual disposes of foreign assets,<sup>58</sup>
  - (b) chargeable gains accrue to the individual on the disposal of those assets, and
  - (c) the gains are not taken outside the charge to capital gains tax as a result of section 1G (cases where tax year is a split year).
- (2) The gains are treated as accruing to the individual only so far as, and at the time when, they are remitted to the UK.

Section 1M(1) TCGA provides:

If, in the case of the disposal of an asset by an individual who is temporarily non-resident—

- (a) a gain or loss accrues to the individual in the temporary period of non-residence, and
- (b) the asset is not excluded from this subsection by section 1N (certain assets acquired in that period),

the gain or loss is treated instead as accruing to the individual in the period of return.

The deeming in sch 1 does not bring into effect s.1M(1) TCGA, as there is no disposal of an asset by an individual who is temporarily non-resident. So strictly there is no charge on remittance by a temporarily non-resident of pre-departure gains. But a purposive construction might possibly impose the charge. See 10.2.3 (TNR remittances).

## 10.23 Planning

It may be advantageous to arrange that temporary non-residents receive types of income not caught by the TNR rules while abroad. For instance:

- (1) income payments from discretionary trusts

---

57 Para 5(2) sch 1 TCGA provides: “For the purposes of this Schedule any reference to “the remittance basis” applying to an individual for a tax year is to section 809B, 809D or 809E of ITA 2007 applying to the individual for the year.”

58 Para 5(1) sch 1 TCGA provides: “For the purposes of this Schedule “foreign asset” means an asset situated outside the UK.”

## (2) payments of up front interest

Remittance basis taxpayers must take care not to mix foreign income/gains of the non-resident period with other sums which can be remitted tax free.

Careful timing is needed for gifts to charity: normally avoid gifts during the period of temporary non-residence, and defer them to the year of return. Likewise for other IT reliefs.

The conditions allow (indeed invite) tax planning by arranging that the period of non-residence is more than 5 years.

### 10.24 TNR rules: Critique

The TNR rules are aimed at taxpayers who deliberately accrue or remit income or gains in years of temporary non-residence.<sup>59</sup> But the rules apply regardless of whether the individual intended to reduce UK tax.

The TNR rules work unfairly in that they assign income and gains of up to *five* tax years into the year of return, so:

- (1) Lower rate taxpayers may fall into the higher or additional rates of tax
- (2) IT personal allowances of non-resident years are lost
- (3) CGT annual exemptions of non-resident years are lost

Before 2013, this was unfair but perhaps not grievously so, as the amounts involved were not so significant, and bunching is always a possible downside of the remittance basis. Following the extension of the TNR rules in 2013, the unfairness has increased. A motive test would be difficult to operate and an averaging rule would be complicated. However the unfairness is not difficult to mitigate. The TNR rules should not apply to TNR income/gains if the rate of foreign tax is, say, at least 50% of the UK rate. If that exclusion does not apply, there should be a *de minimis* exclusion, say, twice the IT personal allowance/ CGT annual exemption for each year of non-residence. That would target the rules at those at whom they are aimed.

#### 10.24.1 EU-law compliance

The rules can give rise to an exit charge and where the charge arises on

---

<sup>59</sup> See 10.2 (Purpose of the temporary non-residence rules).

ceasing to reside in an EU member state, it is an interesting question whether the charge is EU-law compliant.<sup>60</sup>

---

<sup>60</sup> See 11.9 (EU restriction on exit taxes).

## CHAPTER ELEVEN

# EXIT TAXES

### 11.1

#### *Cross references*

The following topics are considered elsewhere:

- 9.1 (Residence throughout tax year)
- 123.6 (Disclosure on trust emigration)
- App 12.9 (Departure planning)

### **11.1 Exit taxes: Introduction**

This chapter considers exit taxes, that is, taxes imposed on emigration from the UK. They are as follows:

- (1) Emigration of individual:
  - (a) Clawback of hold-over relief
  - (b) Clawback of EIS relief
- (2) Emigration of trust: deemed disposal charge<sup>1</sup>
- (3) Emigration of persons carrying on a trade

Restrictions on CGT reorganisation are similar to an exit charge and also need consideration if someone is planning to leave the UK.<sup>2</sup>

I do not consider:

- Exit taxes on companies
- The anti tax avoidance directive (EU) 2016/1164 (which applies to taxpayers subject to corporate tax).<sup>3</sup>

---

1 Trust migration may also lose the benefit of transitional reliefs for s.86 TCGA; see 56.6 (Pre-1998 protected trusts); 56.8 (Pre-1991 protected trusts). But that is not an exit tax.

2 See 53.18.2 (CGT reorganisation relief TAAR).

3 See 87.8.1 (Anti-tax avoidance directive),

In this chapter:

**“Emigration”** refers to a person becoming UK law non-UK resident (ie an individual ceasing to be resident as defined in the SRT)

**“Treaty-emigration”** refers to a person becoming treaty-resident in a foreign state (ie resident of a foreign State, as defined in a DTA)

Apart from the above, there is no general charge on the emigration of an individual.

## 11.2 Hold-over clawback: Emigration of individual

Section 168(1) TCGA provides a clawback of hold-over relief<sup>4</sup> where:

- (1) A gift (or disposal) has been made to an individual (“the transferee”).
- (2) Hold-over relief is claimed.
- (3) The transferee ceases to be UK resident.

Section 168(1) TCGA provides:

If—

(a) relief is given

[i] under section 165 in respect of a disposal to an individual or

[ii] under section 260 in respect of a disposal to an individual

(“the relevant disposal”); and

(aa) the transferee is resident in the UK at the time of that disposal; and

(b) at a time when he has not disposed of the asset in question, the transferee ceases to be resident in the UK,

then, subject to the following provisions of this section,

[A] a chargeable gain shall be deemed to have accrued to the transferee immediately before that time, and

[B] its amount shall be equal to the held-over gain (within the meaning of section 165 or 260) on the relevant disposal.

There is no charge if the individual becomes treaty non-resident but remains UK-law UK resident.

The gain accruing to the individual may qualify for DT relief.

An individual ceases to be resident in the UK at the end of a tax year, even if the year is a split year.<sup>5</sup>

---

<sup>4</sup> See 54.31 (Hold-over relief).

<sup>5</sup> See 9.1 (Residence throughout tax year).

### 11.2.1 *Pre-emigration disposal*

The clawback charge does not apply if the individual disposes of the asset before emigration. Section 168(2) TCGA provides an artificial definition of “disposal”:

For the purposes of subsection (1) above

- [a] the transferee shall be taken to have disposed of an asset before the time there referred to only if he has made a disposal or disposals in connection with which the whole of the held-over gain on the relevant disposal was represented by reductions made in accordance with section 165(4)(b) or 260(3)(b)
- [b] and where he has made a disposal in connection with which part of that gain was so represented, the amount of the chargeable gain deemed by virtue of this section to accrue to him shall be correspondingly reduced.

Where a transfer is made to a transferee who qualifies for 2017 CGT rebasing, and hold-over relief is claimed, the transferee could not make a disposal, under this definition, so remains exposed to a clawback for the full 6 years.

Section 168(3) TCGA provides that inter-spouse disposals are disregarded:

- [1] The disposals by the transferee that are to be taken into account under subsection (2) above shall not include any disposal to which section 58 applies<sup>6</sup>;
- [2] but where any such disposal is made by the transferee, disposals by his spouse or civil partner shall be taken into account under subsection (2) above as if they had been made by him.

This is obviously right.

### 11.2.2 *Time limit*

Section 168(4) TCGA contains a time limit:

Subsection (1) above shall not apply by reason of a person ceasing to be resident more than 6 years after the end of the year of assessment in which

---

<sup>6</sup> See 89.11 (CGT spouse exemption).

the relevant disposal was made.

### 11.2.3 *Short term posting abroad*

Section 168(5) TCGA contains a relief for short term postings abroad:

Subsection (1) above shall not apply in relation to a disposal made to an individual if—

- (a) the reason for his ceasing to be resident in the UK is that he works in an employment or office all the duties of which are performed outside the UK, and
- (b) he again becomes resident in the UK within the period of 3 years from the time when he ceases to be so, without having meanwhile disposed of the asset in question;

and accordingly no assessment shall be made by virtue of subsection (1) above before the end of that period in any case where the condition in para (a) above is, and the condition in para (b) above may be, satisfied.

Section 168(6) TCGA deals with part-disposals and inter-spouse disposals by the short term non-resident. The wording is based on s.168(2)(3) but its effect is different:

For the purposes of subsection (5) above a person shall be taken to have disposed of an asset if he has made a disposal in connection with which the whole or part of the held-over gain on the relevant disposal would, had he been resident in the UK, have been represented by a reduction made in accordance with section 165(4)(b) or 260(3)(b) ...

This is a strict rule, since even a part-disposal loses the benefit of the relief for the entire asset. The subsection continues:

and subsection (3) above shall have effect for the purposes of this subsection as it has effect for the purposes of subsection (2) above.

Thus there is no clawback charge on an asset if T goes non-resident, and gives the asset to the spouse, provided that T becomes UK resident again within 3 years and the spouse does not dispose of the asset during that period. It is irrelevant whether the spouse becomes UK resident.

### 11.2.4 *Liability of donor/trustee*

The exit charge tax may be collected from:

- (1) the donor who gave the asset to the individual; or

(2) the trustee who transferred the asset to the individual.

This may not be important for an individual donor because they may be prepared to take a view about the future actions of their donee. It is important for trustees who transfer assets to beneficiaries and claim hold-over relief to avoid a charge under s.71 TCGA, or to avoid s.1(3) amounts (trust gains).

Section 168(7) TCGA provides:

Where an amount of tax assessed on a transferee by virtue of subsection (1) above is not paid within the period of 12 months beginning with the date when the tax becomes payable then, subject to subsection (8) below, the transferor may be assessed and charged (in the name of the transferee) to all or any part of that tax.

Section 168(8) TCGA sets out a time limit:

No assessment shall be made under subsection (7) above more than 6 years after the end of the year of assessment in which the relevant disposal was made.

Thus a transferor who makes a claim for hold-over relief is at risk of a clawback if the donee emigrates within (approximately) 4 years of the transfer. Suppose:

- (1) In 2011/12 D makes a gift to E.
- (2) E emigrates in 2015/16.

The exit charge is payable on 31 January 2017.

E cannot be assessed until 12 months later, 31 January 2018. That is just within “6 years after the end of the year of assessment in which the relevant disposal was made”. But if E had made the gift in 2010/11 it would have been too late for HMRC to collect the tax from E.

Thus:

<b>Disposal</b>	<b>No charge on migration from</b>	<b>Transferor not liable from</b>
2016/17	6 April 2023	6 April 2021
2017/18	6 April 2024	6 April 2022
2018/19	6 April 2025	6 April 2023
2019/20	6 April 2026	6 April 2024
2020/21	6 April 2027	6 April 2025
2021/22	6 April 2028	6 April 2026

Section 168(9) TCGA provides an indemnity (for what it may be worth):

Where the transferor pays an amount of tax in pursuance of subsection (7) above, he shall be entitled to recover a corresponding sum from the transferee.

Trustees may protect themselves against the risk of liability in the following ways:

- (1) Express indemnity. This would be easier to enforce in a foreign jurisdiction than the statutory indemnity but there is still a risk that the covenantor may be unable to pay. If more than one person can be found so as to give the trustees a joint indemnity, the risk is reduced.
- (2) Retain trust assets as security for the four year period.
- (3) Hold-over relief liability insurance.

### 11.2.5 *Prevention of double charge*

Section 168(10) TCGA provides:

Gains on disposals made after a chargeable gain has under this section been deemed to accrue by reference to a held-over gain shall be computed without any reduction under section 165(4)(b) or 260(3)(b) in respect of that held-over gain.

This prevents double UK taxation (if the individual later makes a disposal within the charge to CGT, eg if they return to the UK). It does not prevent double taxation if the individual pays foreign tax on the same gain.

## 11.3 **Clawback of EIS relief**

There is a similar clawback of EIS relief if (in short) an individual becomes non-resident within three years of acquiring EIS shares: para 3 sch 5B TCGA.

## 11.4 **Charge on emigration of trust**

Section 80 TCGA provides an exit charge for trusts:

- (1) This section applies if the trustees of a settlement become at any time (“the relevant time”) not resident in the UK.
- (2) The trustees shall be deemed for all purposes of this Act—
  - (a) to have disposed of the defined assets immediately before the relevant time, and

- (b) immediately to have reacquired them, at their market value at that time.

Unlike the clawback of hold-over relief discussed above, this applies to all gains, not just held-over gains.

Also see 123.6 (CGT Disclosure: trust emigration); 53.10.4 (Analysis of identification rule - share matching).

The deemed disposal takes place at the time that the trustees become non-resident, even though they continue to be chargeable on gains accruing after becoming non resident until the end of the tax year.<sup>7</sup>

#### 11.4.1 *Defined assets*

“Defined assets” is a label which brings in a number of rules which limit the scope of the charge. Section 80(3) TCGA provides:

Subject to subsections (4) and (5) below, the defined assets are all assets constituting settled property of the settlement immediately before the relevant time.

#### 11.4.2 *Assets of UK trade*

Section 80(4) TCGA brings in an exception for UK trades:

If immediately after the relevant time—

- (a) the trustees carry on a trade in the UK through a branch or agency, and
  - (b) any assets are situated in the UK and either used in or for the purposes of the trade<sup>8</sup> or used or held for the purposes of the branch or agency,
- the assets falling within para (b) above shall not be defined assets.

No charge is needed as these assets remain within the charge to CGT.

#### 11.4.3 *DTA exemption*

Section 80(5) TCGA brings in an exception for assets protected by DTAs:

Assets shall not be defined assets if—

- (a) they are of a description specified in any double taxation relief

---

<sup>7</sup> See 9.15 (Split year of trustees and PRs); 53.4 (CGT/CT: Territorial scope).

<sup>8</sup> See 53.5.2 (Used in/for purposes of trade).

- arrangements, and
- (b) were the trustees to dispose of them immediately before the relevant time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

No charge is needed as these assets never were within the charge to CGT.

#### 11.4.4 *Restriction of roll-over relief*

Section 80 TCGA provides:

- (6) Section 152 shall not apply where the trustees—
  - (a) have disposed of the old assets, or their interest in them, before the relevant time, and
  - (b) acquire the new assets, or their interest in them, after that time, unless the new assets are excepted from this subsection by subsection (7) below.
- (7) If at the time when the new assets are acquired—
  - (a) the trustees carry on a trade in the UK through a branch or agency, and
  - (b) any new assets are situated in the UK and either used in or for the purposes of the trade<sup>9</sup> or used or held for the purposes of the branch or agency,
 the assets falling within para (b) above shall be excepted from subsection (6) above.
- (8) In this section “the old assets” and “the new assets” have the same meanings as in section 152.

Section 80(6) prevents roll-over relief under s.152 TCGA, from applying, so as to avoid the exit charge, where trustees:

- (1) dispose of assets before becoming non-resident, and
- (2) acquire new assets, outside the CGT charge, after becoming non-resident.

#### 11.4.5 *Exit charge: UK land*

Section 80A TCGA provides:

- (1) This section applies if—

---

<sup>9</sup> See 53.5.2 (Used in/for purposes of trade).

- (a) an interest in UK land<sup>10</sup> is deemed to have been disposed of under section 80(2) by trustees of a settlement at any time, and
  - (b) the trustees make an election under this subsection.
- (2) The gain or loss that, but for this subsection, would have accrued to the trustees at that time is not to accrue at that time.
- (3) But, on a subsequent disposal by the trustees of the whole or part of the interest in UK land, the whole or a corresponding part of the gain or loss is treated as accruing on the subsequent disposal.
- (4) This gain or loss is in addition to any gain or loss that actually accrues on the subsequent disposal.

There is no exemption for land-rich assets, within the indirect disposal charge.

#### 11.4.6 *Emigration on death of trustee*

Section 81(1) TCGA provides:

Subsection (2) below applies where—

- (a) section 80 applies as a result of the death of a trustee of the settlement, and
- (b) within the period of 6 months beginning with the death, the trustees of the settlement become resident in the UK.

I refer to the period between the trustee death and the re-appointment of a UK resident trustee as the “**non-resident period**”.

The typical case is where a trust has a UK trustee and a foreign trustee, and the UK trustee dies, leaving it with a sole foreign trustee. There could be other cases.

Assuming this condition is met, we move on to the relief in s.81(2) TCGA:

That section [s.80 trustee emigration charge] shall apply as if the defined assets were restricted to such assets (if any) as—

- (a) would be defined assets apart from this section, and
- (b) fall within subsection (3) or (4) below.

In short, there is no exit charge apart from the exceptional cases of (3) and

---

<sup>10</sup> Section 80A(5) TCGA incorporates the s.1C TCGA definition: see App 2.18 (Interest in land/chargeable interest).

(4).

Section 81(3) TCGA provides:

Assets fall within this subsection if they were disposed of by the trustees in the period which—

- (a) begins with the death, and
- (b) ends when the trustees become resident in the UK.

The trustees will be UK resident for the year of the death<sup>11</sup> and in principle subject to CGT on the trust gains.<sup>12</sup> If so s.81(3) will not usually make a great deal of difference, though it might alter the year in which the gain arises. But it is possible that during the non-resident period, the trustees dispose of assets and qualify for CGT DT relief. In that case s.81(3) effectively brings the gain (as at the time of migration) back into charge to CGT.

Section 81(4) TCGA provides:

Assets fall within this subsection if—

- (a) they are of a description specified in any double taxation relief arrangements,
- (b) they constitute settled property of the settlement at the time immediately after the trustees become resident in the UK, and
- (c) were the trustees to dispose of them at that time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

Trustees will need to consider the relevant treaty and the facts of the case; but assuming the trust was treaty-resident in the UK before the death, it is likely to be treaty-resident in the UK at the end of the non-resident period.

#### 11.4.7 *Immigration on death of trustee*

Section 81(5) TCGA provides relief where there has been an accidental immigration to the UK followed by emigration:

---

11 If the non-resident period straddles two tax years, the trustees will be UK resident for both tax years.

12 See 53.4 (CGT/CT: Territorial scope).

Subsection (6) below applies where—

- (a) at any time the trustees of a settlement become resident in the UK as a result of the death of a trustee of the settlement, and
- (b) section 80 applies as regards the trustees of the settlement in circumstances where the relevant time (within the meaning of that section) falls within the period of 6 months beginning with the death.

Assuming this condition is met, we read on to the relief in s.81(6) TCGA:

That section [s.80 trustee emigration charge] shall apply as if the defined assets were restricted to such assets (if any) as—

- (a) would be defined assets apart from this section, and
- (b) fall within subsection (7) below.

In short, there is no charge apart from the one exceptional case of s.81(7) TCGA:

Assets fall within this subsection if—

- (a) the trustees acquired them in the period beginning with the death and ending with the relevant time, and
- (b) they acquired them as a result of a disposal in respect of which relief is given under section 165 or in relation to which section 260(3) applies.

This is only a limited relief: it avoids the exit charge, but it does not avoid the CGT charge on actual disposals of assets by the trustees in a year when accidentally UK resident.

## 11.5 Trustees liable for exit charge

There are special rules. The usual rule for CGT liability of trustees is in s.65(1) TCGA:

Subject to subsection (3) below, capital gains tax chargeable in respect of chargeable gains accruing to the trustees of a settlement or capital gains tax due from the personal representatives of a deceased person may be assessed and charged on and in the name of any one or more of the relevant trustees ....<sup>13</sup>

---

13 Defined in s.65(4): “In this section ...

“the relevant trustees”, in relation to any chargeable gains, means the trustees in the

Section 65(3) has an exemption for trustees who retired before an emigration without knowing of a proposed emigration:

Where section 80 applies as regards the trustees of a settlement (“the migrating trustees”), nothing in subsection (1) above shall enable any person—

- (a) who ceased to be a trustee of the settlement before the end of the relevant period,<sup>14</sup> and
- (b) who shows that, when he ceased to be a trustee of the settlement, there was no proposal that the trustees might cease to be resident in the UK,

to be assessed and charged to any capital gains tax which is payable by the migrating trustees by virtue of section 80(2).

Section 82 TCGA provides:

(1) This section applies where—

- (a) section 80 applies as regards the trustees of a settlement (“the migrating trustees”), and
- (b) any capital gains tax which is payable by the migrating trustees by virtue of section 80(2) is not paid within 6 months from the time when it became payable.

(2) The Board may, at any time before the end of the period of 3 years beginning with the time when the amount of the tax is finally determined, serve on any person to whom subsection (3) below applies a notice—

- (a) stating particulars of the tax payable, the amount remaining unpaid and the date when it became payable;
- (b) stating particulars of any interest payable on the tax, any amount remaining unpaid and the date when it became payable;
- (c) requiring that person to pay the amount of the unpaid tax, or the aggregate amount of the unpaid tax and the unpaid interest, within 30 days of the service of the notice.

(3) This subsection applies to any person who, at any time within the

---

year of assessment in which the chargeable gains accrue and any subsequent trustees of the settlement...”

14 Defined by reference in s.65(4): “In this section “the relevant period” has the same meaning as in section 82”.

relevant period,<sup>15</sup> was a trustee of the settlement, except that it does not apply to any such person if—

- (a) he ceased to be a trustee of the settlement before the end of the relevant period, and
  - (b) he shows that, when he ceased to be a trustee of the settlement, there was no proposal that the trustees might cease to be resident in the UK.
- (4) Any amount which a person is required to pay by a notice under this section may be recovered from him as if it were tax due and duly demanded of him; and he may recover any such amount paid by him from the migrating trustees.
- (5) A payment in pursuance of a notice under this section shall not be allowed as a deduction in computing any income, profits or losses for any tax purposes.

SP 5/82 sets out HMRC practice:

5 Payment can only be sought from former trustees where the Revenue is unable to obtain payment from current trustees. In the first instance, payment will generally be sought from those persons who resigned as trustees immediately before the trust migrated and then from earlier trustees. Each case will, however, need to be considered in the light of the relevant facts.

### 11.5.1 *The relevant period*

This term is defined in s.82(6) TCGA:

For the purposes of this section—

- (a) [this is a spent transitional rule for 1991-2];
- (b) in any other case, the relevant period is the period of 12 months ending with the relevant time.

Thus the relevant period is in effect one year.

### 11.5.2 *Critique*

In short, a trustee at the time of the emigration is liable, and a trustee who retired up to a year before is liable if aware of the proposal to migrate the trust. This may help HMRC (because they can go back to trustees in an

---

<sup>15</sup> See 11.5.1 (The relevant period).

earlier year) and it may help the trustees (if they can say that they were not aware of a migration). But it is not likely to make any difference either way. There is no good reason for special rules and s.82 and s.65(3) TCGA should be repealed, resulting in a small but worthwhile tax simplification.

## 11.6 Treaty-emigration of trust

Section 83 TCGA provides:

(1) This section applies if the trustees of a settlement, while continuing to be resident in the UK, become at any time (“the time concerned”) trustees who fall to be regarded for the purposes of any double taxation relief arrangements —

- (a) as resident in a territory outside the UK, and
- (b) as not liable in the UK to tax on gains accruing on disposals of assets (“relevant assets”) which constitute settled property of the settlement and fall within descriptions specified in the arrangements.

(2) The trustees shall be deemed for all purposes of this Act—

- (a) to have disposed of their relevant assets immediately before the time concerned, and
- (b) immediately to have reacquired them, at their market value at that time.

### 11.6.1 “DTR arrangements” for CGT

Section 288(1) TCGA defines DTR arrangements for CGT purposes:

“double taxation relief arrangements”—

- (a) in relation to a company<sup>16</sup> means arrangements that have effect under section 2(1) of TIOPA 2010 except so far as they have effect in relation to petroleum revenue tax, and
- (b) in relation to any other person means arrangements that have effect under section 2(1) of TIOPA 2010 but only so far as they have effect in relation to capital gains tax;

The treaty needs to have effect in relation to CGT, in short, to contain a capital gains article. Most treaties do have a CG article, following the OECD Model, but some do not. For instance, the Belize DTA does not

---

<sup>16</sup> Companies are not relevant to this chapter but one needs to read para (a) in order to follow para (b).

count as “DTR arrangements” within this definition, because it applies for IT but not for CGT. Note that the same expression is often used with a wider definition.<sup>17</sup>

The treaty-emigration charge does not contain any of the exceptions applicable to the s.80 exit charge and has no special rules for trustee liability.

### 11.6.2 *Restriction of roll-over relief*

Section 84 TCGA provides:

- (1) Section 152 shall not apply where—
  - (a) the new assets<sup>18</sup> are, or the interest in them is, acquired by the trustees of a settlement,
  - (b) at the time of the acquisition the trustees are resident in the UK and fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK,
  - (c) the assets are of a description specified in the arrangements, and
  - (d) were the trustees to dispose of the assets immediately after the acquisition, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

This is the equivalent of s.80(6) TCGA: see 11.4.4 (Restriction of roll-over relief).

### 11.7 **Payment by instalments**

Sch 3ZAA TMA (introduced 2019) allows payment of the CGT to be made by 6 annual instalments. Interest is payable. This is not a particularly generous relief.

Paragraph 1 sch 3ZAA TMA provides:

- (1) This Schedule makes provision for certain persons who are liable to pay an exit charge under section 25 or 80 of the 1992 Act to agree with HMRC to pay the charge in instalments.
- (2) An agreement under this Schedule is called a “CGT exit charge”

---

17 For an example, see 10.3.4 (“Treaty non-resident”).

18 Defined by reference in s.84(2): “In this section “the new assets” has the same meaning as in section 152.”

payment plan”.

### 11.7.1 Eligibility

The relief applies to charges under s.80 TCGA (trust emigration) and s.25 TCGA.<sup>19</sup> It is helpful to read para 2/3 sch 3ZAA TMA side by side:

#### Para 2 (s.25 charge)

(1) This paragraph applies where a person resident in an EEA state outside the UK is liable to pay an exit charge for a tax year by virtue of section 25(1) or (3) of the 1992 Act (deemed disposals by non-residents).

(2) The person is eligible to enter into a CGT exit charge payment plan in relation to any one or more of the assets to which the exit charge relates if—

(a) at the time of the event giving rise to the exit charge, the person had a right to freedom of establishment, or

#### Para 3 (s.80 charge)

(1) This paragraph applies where the relevant trustees of a settlement are liable to pay an exit charge for a tax year by virtue of section 80 of the 1992 Act (charge on ceasing to be resident in the UK).

(2) The relevant trustees are eligible to enter into a CGT exit charge payment plan in relation to any one or more of the assets to which the exit charge relates if—

(a) at the time the trustees of the settlement ceased to be resident in the UK for the purposes of that section, they had a right to freedom of establishment,<sup>20</sup>

(b) immediately before that time, the trustees of the settlement used the asset or assets for an economically significant activity carried on in the UK,<sup>21</sup> and

19 See 53.6 (Asset ceases to be chargeable). In practice s.25 rarely applies.

20 Defined in para 10 sch 3ZAA TMA: ““right to freedom of establishment” means a right protected by—

(a) Article 49 of the Treaty on the Functioning of the European Union, or

(b) Article 31 of the EEA agreement”.

21 Defined by reference in para 10 sch 3ZAA TMA: “economically significant activity” has the meaning given by section 13A(4) of the 1992 Act (reading references to a company as references to trustees)”. The drafter has overlooked the 2019 CGT

- |   |  |
|---|--|
| <p>(b) at any time after that event, the person carries on a trade in an EEA state other than the UK through a branch or agency and the asset or assets is or are—</p> <p>(i) used in or for the purposes of that trade,<sup>22</sup> or</p> <p>(ii) used or held for the purposes of the branch or agency.</p> | <p>(c) immediately after that time, those trustees—</p> <p>(i) become resident in another EEA state for the purposes of the 1992 Act, and</p> <p>(ii) use the asset or assets for an economically significant activity carried on there.</p> |
|---|--|

### 11.7.2 *Tax to which plan relates*

Paragraph 4 sch 3ZAA TMA provides:

- (1) A CGT exit charge payment plan may relate to—
  - (a) the whole of the exit charge attributable to the asset or assets to which the plan relates (the “deferrable exit charge”), or
  - (b) only part of the deferrable exit charge.
- (2) In this Schedule—
 

“deferred exit charge” means the amount of the exit charge to which a plan relates;

“taxpayer”, in relation to a plan, means the person eligible under paragraph 2 or 3 to enter into the plan.
- (3) For the purposes of this Schedule the exit charge attributable to an asset is such proportion of the exit charge as any gain accruing to the taxpayer in respect of the asset by virtue of section 25(1) or (3) or 80 of the 1992 Act in the tax year bears to the total gains to which the exit charge relates.

### 11.7.3 *Payment by instalments*

Paragraph 5 sch 3ZAA TMA provides:

- A CGT exit charge payment plan must provide for the deferred exit charge to be payable in 6 equal instalments where—
- (a) the 1st instalment is due on the day on which payment of the exit charge is (apart from the plan) due and payable under

---

rewrite; see 60.19 (Economically significant activity).

<sup>22</sup> See 53.5.2 (Used in/for purposes of trade).

section 59B, and

- (b) the other 5 instalments are due one on each of the first 5 anniversaries of that day.

#### 11.7.4 *Application for plan*

Paragraph 6 sch 3ZAA TMA provides:

- (1) To enter into a CGT exit charge payment plan, the taxpayer must apply to HMRC.
- (2) An application for a CGT exit charge payment plan must—
  - (a) be made on or before the date specified in section 59B as the date by which the exit charge is payable, and
  - (b) contain details of all the matters which are required by this Schedule to be specified in the plan.
- (3) A CGT exit charge payment plan is entered into when—
  - (a) the taxpayer agrees to pay the deferred exit charge, and any interest on it, in accordance with the plan, and
  - (b) an officer of Revenue and Customs agrees to accept payment of the deferred exit charge in accordance with the plan.
- (4) A CGT exit charge payment plan is void if—
  - (a) an event giving rise to the exit charge is part of arrangements the main purpose of which, or one of the main purposes of which, is to defer the payment by the taxpayer of the exit charge, or
  - (b) any information furnished by the taxpayer in connection with the plan does not fully and accurately disclose all facts and considerations material to the decision of the officer of Revenue and Customs to accept payment in accordance with the plan.

#### 11.7.5 *Contents of plan*

Paragraph 7 sch 3ZAA TMA provides:

- (1) If the taxpayer is eligible under paragraph 2, a CGT exit charge payment plan must specify—
  - (a) the EEA state in which the person entering into the plan is resident, and
  - (b) if the person has ceased to carry on a trade in the UK through a branch or agency there, the date on which the person ceased to do so.
- (2) If the taxpayer is eligible under paragraph 3, a CGT exit charge

payment plan must specify—

- (a) the date on which the trustees of the settlement became not resident in the UK for the purposes of section 80 of the 1992 Act, and
  - (b) the EEA state in which those trustees became resident.
- (3) A CGT exit charge payment plan must specify—
- (a) the amount of the exit charge which, in the taxpayer's opinion, the taxpayer is liable to pay under section 25 or (as the case may be) section 80 of the 1992 Act in respect of the tax year, and
  - (b) the amount of the deferred exit charge.
- (4) A CGT exit charge payment plan may contain appropriate provision regarding security for HMRC if an officer of Revenue and Customs considers that there would be a serious risk to collection of any amount of deferred exit charge without it.

#### 11.7.6 *Effect of plan*

Paragraph 8 sch 3ZAA TMA provides:

- (1) This paragraph applies where a CGT exit charge payment plan is entered into by the taxpayer.
- (2) The deferred exit charge remains due and payable under section 59B (payment of income tax and capital gains tax: assessments other than simple assessments).
- (3) However, the Commissioners for Her Majesty's Revenue and Customs—
  - (a) may not seek payment of any of the deferred exit charge otherwise than in accordance with the plan, and
  - (b) may make repayments in respect of any of the deferred exit charge paid, or any amount paid on account of the deferred exit charge, before the plan is entered into.
- (4) The deferred exit charge carries interest in accordance with Part 9 as if the plan had not been entered into; and each time a payment is made under the plan, it is to be paid together with any interest payable on it.
- (5) The taxpayer is liable to penalties for late payment of the deferred exit charge only if the taxpayer fails to make payments in accordance with the plan (see item 3C of the Table at the end of paragraph 1 of Schedule 56 to the Finance Act 2009).
- (6) Any of the deferred exit charge which is for the time being unpaid may be paid at any time before it becomes payable under the plan together with interest payable on it to the date of payment.

(7) If—

- (a) the taxpayer becomes bankrupt under the law of England and Wales or Northern Ireland or the taxpayer's estate is sequestrated under the law of Scotland,
- (b) an event corresponding to an event in paragraph (a) occurs under the law of an EEA state outside the UK, or
- (c) the taxpayer becomes resident in a country or territory that is not an EEA state,

the outstanding balance of the deferred exit charge is payable on the date on which the next instalment would otherwise have been due under the plan.

### 11.7.7 *Definitions*

Sch 3ZAA TMA provides:

9 If, for the purposes of any double taxation arrangements, a person is treated at any time as resident in a territory other than an EEA state, the person is also to be treated as resident there at that time for the purposes of this Schedule.

10 In this Schedule—

“double taxation arrangements” means arrangements made by two or more territories with a view to affording relief from double taxation;

“exit charge” means—

- (a) for the purposes of paragraph 2, any amount of capital gains tax which a person is liable to pay for a tax year which the person would not be liable to pay if gains arising by virtue of section 25 of the 1992 Act in the tax year were ignored;
- (b) for the purposes of paragraph 3, any amount of capital gains tax which the relevant trustees are liable to pay for a tax year which they would not be liable to pay if gains arising by virtue of section 80 of the 1992 Act in the tax year were ignored;

“trade” includes a profession or vocation.

### 11.7.8 *Commencement*

Para 7 sch 7 FA 2019 provides:

The amendments made by paragraphs 1 and 2 [inserting sch 3ZAA TMA] have effect in relation to amounts of capital gains tax which a person is liable to pay by virtue of section 25(1) or (3) or 80 of TCGA

1992 in relation to events occurring on or after 6 April 2019.

## 11.8 Emigration of trader

Section 17(1) ITTOIA provides:

- (1) This section applies if—
  - (a) an individual carries on a trade<sup>23</sup> otherwise than in partnership, and
  - (b) there is a change of residence.

### 11.8.1 “Change of residence”

Section 17 ITTOIA provides:

- (1A) For the purposes of this section there is a “change of residence” if—
  - (a) the individual becomes or ceases to be UK resident, or
  - (b) a tax year is, as respects the individual, a split year.
- (1B) The change of residence occurs—
  - (a) in a case falling within subsection (1A)(a), at the start of the tax year for which the individual becomes or ceases to be UK resident, and
  - (b) in a case falling within subsection (1A)(b), at the start of whichever of the UK part or the overseas part of the tax year is the later part.

### 11.8.2 Deemed cessation

Section 17(2) ITTOIA provides:

- If this section applies and the individual does not actually cease permanently to carry on the trade immediately before the change of residence occurs, the individual is treated for income tax purposes—
- (a) as permanently ceasing to carry on the trade at the time of the change of residence, and
  - (b) so far as the individual continues to carry on the trade, as starting to carry on a new trade immediately afterwards.

### 11.8.3 Trading losses

---

<sup>23</sup> Section 17(4) ITTOIA provides: “This section applies to professions and vocations as it applies to trades.”

Section 17(3) ITTOIA provides:

But subsection (2) does not prevent a loss made before the change of residence from being deducted under section 83 of ITA 2007 from profits arising after the change.

#### 11.8.4 *Emigration of partner*

For the equivalent rules for partnerships, see s.852 ITTOIA:

(6) If there is a change of residence, the partner is treated as permanently ceasing to carry on one notional trade when that change of residence occurs and starting to carry on another immediately afterwards...

(8) Subsections (1A) and (1B) of section 17 apply for the purposes of subsection (6).

### 11.9 EU restriction on exit taxes

#### 11.9.1 *Emigration of individual*

An EC communication on exit taxes<sup>24</sup> provides:

#### **2. EXIT TAXES: LEGAL FRAMEWORK**

##### **2.1. The decision of the ECJ in *de Lasteyrie*<sup>25</sup> and its implications for individuals**

On 11 March 2004, the ECJ gave an important interpretation of the freedom of establishment in the context of French legislation taxing unrealised increases in value of securities where individual taxpayers move their tax residence outside France. When Mr. de Lasteyrie du Saillant in 1998 moved from France to Belgium, he was subject to immediate taxation on the unrealised increase in value of the shares which he held in a French company.

This is similar to the s.80 exit charge, but applied to individuals rather than to trusts.

The ECJ held that the French provision in question was likely to restrict the exercise of the freedom of establishment, having at the very least a

---

<sup>24</sup> “Exit taxation and the need for co-ordination of Member States’ tax policies” 19.12.2006 COM(2006) 825 final

[ec.europa.eu/taxation\\_customs/resources/documents/taxation/COM\(2006\)825\\_en.pdf](http://ec.europa.eu/taxation_customs/resources/documents/taxation/COM(2006)825_en.pdf)

<sup>25</sup> *de Lasteyrie du Saillant v Ministère de l’Économie* [2005] STC 1722.

dissuasive effect on taxpayers wishing to establish themselves in another MS, because they were subjected in the exit country, by the mere fact of transferring their tax residence outside France, to tax on a form of income that had not yet been realised, and thus to disadvantageous treatment by comparison with a person maintaining his residence in France.

Although the ruling in *de Lasteyrie* relates to the facts and circumstances of the case at issue, the ECJ's interpretation of EC Law implies conclusions as regards exit taxes in general.

Taxing residents on a realisation basis and departing residents on an accruals basis is a difference in treatment which constitutes an obstacle to free movement. Where a MS decides to assert a right to tax gains accrued during a taxpayer's residence within its territory, it cannot take measures which present a restriction to free movement.

This rules out the possibility of immediate collection of the tax due on the unrealised gains when taxpayers move their tax residence to another MS.

This view has since been reaffirmed in *National Grid Indus.*<sup>26</sup>

The EC then considers permitted forms of charges on departing residents (not applicable in the UK)<sup>27</sup> and concludes:

---

26 *National Grid Indus BV v Inspecteur van de Belastingdienst* [2012] STC 114.

27 "The ECJ ruled in *de Lasteyrie* and in *N* [*N v Inspecteur van de Belastingdienst Oost/kantoor Almelo*, [2008] STC 436] that the possible suspension of payment made subject, for example, to conditions that guarantees must be provided, constitutes a restrictive effect in that the taxpayer is deprived of enjoyment of the assets given as a guarantee. Similarly, it is clear from *de Lasteyrie* that suspension of payment cannot be made subject to the condition of designating a representative in the MS of origin. In general, any means of preserving the tax claim must be strictly proportional to that aim and must not entail disproportionate costs for the taxpayer.

As the ECJ confirmed in *N*, when a resident of a MS transfers his/her residence to another MS, the MS from which he/she departs is not prevented by EU law from assessing the amount of income on which it wishes to preserve its tax jurisdiction, provided this does not give rise to an immediate charge to tax and that there are no further conditions attached to the deferral. Such a practice is in line with the principle of fiscal territoriality, connected with a temporal component, namely residence within the territory during the period in which the taxable profit arises. A requirement, that the taxpayer submits a tax declaration at the time of the transfer of residence, necessary for the purpose of assessing the income, can be considered proportionate having regard to the legitimate objective of allocating the taxing powers, in particular

Most MSs which had exit tax rules on individual shareholders similar to those at issue in *de Lasteyrie* have since abolished or amended them in line with the ruling. This has enabled the Commission to suspend infringement proceedings against a number of MSs on this particular aspect. The Commission will, however, continue to monitor MSs' rules in this area with a view to ensuring their EC law compatibility.

The UK has three exit charges on individuals, the hold-over clawback, the EIS clawback, and the charge on migrating traders. So far they seem to have escaped EC attention. If the migration is to a member state, these can hardly be described as compliant with EU freedom of establishment<sup>28</sup> and freedom to reside.<sup>29</sup>

### 11.9.2 *Emigration of trust*

What about the exit charge for trusts? The EC communication does not discuss trusts, but it does discuss companies:

#### **3.1. Implications of *de Lasteyrie* for companies**

The Commission is of the opinion that the interpretation of the freedom of establishment given by the ECJ in *de Lasteyrie* in respect of exit tax rules on individuals also has direct implications for MSs' exit tax rules on companies.

This is clearly correct since freedom of establishment applies to companies as well as individuals.<sup>30</sup> The same will apply to a trust either on the grounds that it is an "undertaking" within the meaning of the freedom of establishment rule<sup>31</sup> or on the grounds of the freedom of movement or establishment of the trustee in its personal capacity. HMRC did not agree, but in *Panayi* the CJEU ruled:

The provisions of the FEU Treaty relating to freedom of establishment

---

so as to eliminate double taxation, between the MSs."

28 See 102.9.4 (Trusts).

29 Art. 21 TFEU provides:

"Every citizen of the Union shall have the right to move and reside freely within the territory of the Member States, subject to the limitations and conditions laid down in the Treaties and by the measures adopted to give them effect."

30 See 102.8 (Freedom of establishment).

31 See 56.18 (Section 86: EU-law compliance).

preclude, in circumstances, such as those in the main proceedings, where the trustees, under national law, are treated as a single and continuing body of persons, distinct from the persons who may from time to time be the trustees, legislation of a Member State, such as that at issue in the main proceedings, which provides for the taxation of unrealised gains in value of assets held in trust when the majority of the trustees transfer their residence to another Member State, but fails to permit payment of the tax payable to be deferred.<sup>32</sup>

### 11.9.3 *Emigration to EEA state*<sup>33</sup>

The EC communication provides:

#### **4.1. Freedoms applicable to EEA-states**

The EEA Agreement provides for the same four basic freedoms as the EC Treaty (goods, persons, services and capital). It also includes horizontal provisions relevant to the four freedoms. Secondary Community legislation in the area of taxation, however, has not been incorporated in the EEA Agreement. The Mutual Assistance Directive and the Recovery Directive therefore do not apply to these states

#### **4.2. Emigration of individuals/transfer of seat of companies – free movement of workers/freedom of establishment**

Taxes levied in case of the emigration of individuals or the transfer of seat of companies would primarily appear to involve the free movement of workers<sup>34</sup> and the freedom of establishment respectively. The exit taxes at issue in *de Lasteyrie* and *N* which applied to individuals with substantial shareholdings were found to contravene the freedom of establishment. As the same basic freedoms apply to EEA states, the rulings in *de Lasteyrie* and *N* are of direct relevance to them. The question is whether there are significant differences in situation which could justify such restrictions in the case of EEA states. The Commission is of the opinion that an immediate collection of tax may be justified in certain circumstances by overriding reasons in the general interest, in particular the need to ensure the effectiveness of fiscal supervision and to prevent tax evasion.

---

32 *Trustees of the P Panayi Accumulation & Maintenance Settlements v HMRC* Case C-646/15.

33 The states within the EEA (European Economic Area) are Norway, Iceland and Liechtenstein.

34 Article 45 TFEU.

EEA states are not obliged to implement secondary Community legislation in the area of taxation, such as the Mutual Assistance Directive and the Recovery Directive. As a consequence, MSs do not necessarily have the same guarantees that deferred tax claims can be discharged at a later stage as they would have within the Community. In many cases, MSs have, however, concluded bilateral or multilateral tax conventions with EEA states which include information exchange obligations that provide for an equivalent level of mutual assistance. The Commission believes that in situations where a lack of administrative cooperation prevents MSs from safeguarding their tax claims they should be entitled to take appropriate measures at the moment of emigration or transfer.

Council Directive 2010/24/EU<sup>35</sup> applies to MSs but not to EEA states. However, all the EEA states have a DTA with an information exchange article, and apply CRS, which should suffice.

#### 11.9.4 *Emigration to non MS/EEA*

The EC communication provides:

##### **5. EXIT TAXES IN RESPECT OF THIRD COUNTRIES**

Of the four basic freedoms, only the free movement of capital and payments applies to third countries.

In respect of the emigration or transfer of seat to other third countries as such, the provisions on the free movement of persons do not apply and MSs remain free to assess and collect their taxes at the moment of departure. However, the emigration of an individual or the transfer of seat of a company may involve transactions which are covered by the provisions on the free movement of capital. The transfer of assets to a PE in a third country may also fall to be examined from the perspective of the free movement of capital.

Since the result of the application of the different freedoms should be the same, it would appear that an immediate collection of tax at the moment of transfer of such assets constitutes a restriction on the free movement of capital. However, as noted above, the Commission believes that a lack of administrative co-operation may justify a restriction in these circumstances. The Commission would encourage

---

35 16 March 2010, concerning mutual assistance for the recovery of claims relating to taxes, duties and other measures.

MSs, where appropriate, to enhance administrative co-operation with their non-EU partners, as this is the best means of ensuring tax compliance and preventing tax evasion.<sup>36</sup>

The European Parliament supports this view.<sup>37</sup>

In the case of an emigration to a third country (not a MS or EEA state), it would be necessary to review the treaties between the UK and that state in order to ascertain the position. The standstill derogation would also need consideration.

For the position in Australia, see Board of Taxation, *Review of the IT Residency Rules for Individuals* (2017) para 1.286.<sup>38</sup>

### 11.9.5 *EC proceedings against UK*

The migration of companies is not considered here, but the following is relevant to trusts and individuals.

The EC say:

The European Commission has formally requested the UK to amend its legislation providing for exit taxes on companies.

The UK legislation at stake results in immediate taxation of unrealised capital gains in respect of certain assets when the seat or place of effective management of a company is transferred to another EU/EEA State. However, a similar transfer within the UK would not generate any such immediate taxation and the relevant capital gains would only be taxed once they have been realised.

The Commission considers that the UK has failed to fulfil its obligations under EU rules by maintaining these restrictive provisions. Exit taxes may breach the freedom of establishment as they make it more expensive to transfer a company seat or place of effective management to another Member State than to another location in the UK.

The Commission's request takes the form of a reasoned opinion (second step of EU infringement proceedings). In the absence of a satisfactory response within two months, the Commission may refer the UK to the

---

36 In EU terminology, "tax evasion" includes tax avoidance.

37 European Parliament resolution of 24 October 2007 on the contribution of taxation and customs policies to the Lisbon Strategy.

38 <https://cdn.tspace.gov.au/uploads/sites/70/2018/07/T307956-income-tax-res-rules.pdf>

Court of Justice of the European Union.<sup>39</sup>

### 11.10 Council Resolution on exit taxation

The Council of the European Union (the Council of Ministers) adopted a resolution on 2 December 2008 which invites Member States to adopt its guiding principles.

The resolution uses the term “transfer of economic activities” which is defined to include emigration and treaty-emigration:

A. “Transfer of economic activities” means any operation whereby a taxpayer subject to corporation tax or a natural person engaged in a business:

- 1) ceases to be subject to corporate or personal income tax in a Member State (the exit State) while at the same time becoming subject to corporate or personal income tax in another Member State (the host State); or
- 2) transfers a combination of assets and liabilities from a head office or a permanent establishment in the exit State to a permanent establishment or a head office in the host State.

The first principle, not discussed here, primarily concerns trading income and companies.<sup>40</sup> The second concerns the CGT exit charge:

C. When, in connection with a transfer of economic activities, the exit State reserves the option to exercise its taxing rights on the unrealised gains corresponding to the assets held by the taxpayer, calculated as the difference between the market value of these assets on the transfer date and their book value, the host State takes the market value on the transfer date when calculating the subsequent added value in the event of

---

<sup>39</sup> IP/12/285, 22/03/2012.

<sup>40</sup> “B. When, in connection with a transfer of economic activities, the exit State reserves the option

[i] to exercise its taxing rights on the reserves made (profits realised but not yet taken into account for tax purposes) and

[ii] to take back, in full or in part, the provisions made (expenditure not yet incurred but already taken into account for tax purposes),

the host State may provide for the creation of reserves or provisions of identical or different amounts, in accordance with the rules governing the tax base in that State, and allow deduction from taxable results for the year in which they were established.”

disposal.<sup>41</sup>

This does not seem to have any impact, at least in the UK, but the law is not stable.

## 11.11 Exit taxes: DTAs

### 11.11.1 *Exit taxes/DTAs: Consistency*

OECD say that exit taxes are not prohibited by a DTA in OECD Model form:

#### *Departure or exit taxes*

65. In a number of States, liability to tax on some types of income that have accrued for the benefit of a resident (whether an individual or a legal person) is triggered in the event that the resident ceases to be a resident of that State. Taxes levied in these circumstances are generally referred to as “departure taxes” or “exit taxes” and may apply, for example, to accrued pension rights and accrued capital gains.

66. To the extent that

[a] the liability to such a tax arises when a person is still a resident of the State that applies the tax and

[b] does not extend to income accruing after the cessation of residence, nothing in the [OECD Model] Convention, and in particular in Articles 13 [capital gains] and 18 [pensions], prevents the application of that form of taxation.

Thus, tax treaties do not prevent the application of domestic tax rules according to which a person is considered to have realised pension income, or to have alienated property for capital gain tax purposes, immediately before ceasing to be a resident.

---

41 The rest of the statement deals with procedural matters.

“D. In case of disagreement between the host State and the exit State regarding the market value of the assets on the transfer date, the two States settle their dispute using the appropriate procedure.

E. The host State can require the taxpayer engaged in a transfer of economic activities to provide evidence that the exit State has exercised or will exercise its rights under the conditions set out above, as well as evidence of the market value applied by the exit State.

F. The provisions laid down at Community level in relation to Mutual Assistance provide the framework for the host State to assist the exit State, in particular for the purposes of determining the disposal date.”

The provisions of tax treaties do not govern when income is realised for domestic tax purposes (see, for example, paragraphs 3 and 7 to 9 of the Commentary on Article 13)<sup>42</sup>; also, since the provisions of tax treaties apply regardless of when tax is actually paid (see, for example, paragraph 12.1 of the Commentary on Article 15), it does not matter when such taxes become payable.<sup>43</sup>

### 11.11.2 *Exit taxes: Double taxation*

The double taxation problem arises where:

- (1) An individual pays an exit tax on income/gain on migration to a new state; and
- (2) The new state later charges tax on the same income/gain.

OECD discuss the double taxation problem:

66 ... The application of [exit] taxes, however, creates risks of double taxation where the relevant person becomes a resident of another State which seeks to tax the same income at a different time, e.g. when pension income is actually received or when assets are sold to third parties. This problem, which is the result of that person being a resident of two States at different times and of these States levying tax upon the realisation of different events, is discussed in paragraphs 4.1 to 4.3 of the Commentary on Article 23 A and 23 B.<sup>44</sup>

To follow the commentary at 4.1-4.3, it is necessary to begin at para 3:

3. International juridical double taxation may arise in three cases:
  - a) where each Contracting State subjects the same person to tax on his worldwide income or capital (**concurrent full liability to tax**, see paragraph 4 below);
  - b) where a person is a resident of a Contracting State (R)<sup>45</sup> and derives

---

42 See 53.22.8 (“Alienation”).

43 OECD, BEPS Action 6: Final Report “Preventing the Granting of Treaty Benefits in Inappropriate Circumstances” (2015).

44 OECD, BEPS Action 6: Final Report “Preventing the Granting of Treaty Benefits in Inappropriate Circumstances” (2015).

45 Footnote original: Throughout the Commentary on Articles 23 A and 23 B, the letter “R” stands for the State of residence within the meaning of the Convention, “S” for the State of source or situs, and “E” for the State where a permanent establishment is situated.

- income from, or owns capital in, the other Contracting State (S or E) and both States impose tax on that income or capital (see paragraph 5 below);
- c) where each Contracting State subjects the same person, not being a resident of either Contracting State to tax on income derived from, or capital owned in, a Contracting State; this may result, for instance, in the case where a non-resident person has a permanent establishment in one Contracting State (E) through which he derives income from, or owns capital in, the other Contracting State (S) (**concurrent limited tax liability**, see paragraph 11 below).
4. The conflict in case a) is reduced to that of case b) by virtue of Article 4 [treaty-residence]. This is because that Article defines the term “resident of a Contracting State” by reference to the liability to tax of a person under domestic law by reason of his domicile, residence, place of management or any other criterion of a similar nature (paragraph 1 of Article 4) and by providing special rules for the case of double residence to determine which of the two States is the State of residence (R) within the meaning of the Convention (paragraphs 2 and 3 of Article 4).
- 4.1 Article 4, however, only deals with cases of concurrent full liability to tax. The conflict in case a) may therefore not be solved if the same item of income is subject to the full liability to tax of two countries but at different times.

The following example illustrates that problem.

- [a] Assume that a resident of State R1 derives a taxable benefit from an employee stock-option that is granted to that person. State R1 taxes that benefit when the option is granted.
- [b] The person subsequently becomes a resident of State R2, which taxes the benefit at the time of its subsequent exercise.

In that case, the person is taxed by each State at a time when he is a resident of that State and Article 4 does not deal with the issue as there is no concurrent residence in the two States.

Where the source of the income is in the departure state, the source/residence conflict rules solve the problem.

4.2 The conflict in that situation will be reduced to that of case b) and solved accordingly to the extent that the employment services to which the option relates have been rendered in one of the Contracting States so as to be taxable by that State under Article 15 [Employment income] because it is the State where the relevant employment is exercised. Indeed, in such a case, the State in which the services have been

rendered will be the State of source for purposes of elimination of double taxation by the other State. It does not matter that the first State does not levy tax at the same time (see paragraph 32.8). It also does not matter that that State considers that it levies tax as a State of residence as opposed to a State of source (see the last sentence of paragraph 8).

Although this is considering employment income, the same reasoning can apply to an exit charge on chargeable gains.

In other cases the only solution is by inter-state mutual agreement:

4.3 Where, however, the relevant employment services have not been rendered in either State, the conflict will not be one of source-residence double taxation and, as confirmed by the phrase “except to the extent that these provisions allow taxation by that other State solely because the income is also income derived by a resident of that State” found in paragraph 1 of Articles 23 A and 23 B, any resulting double taxation will be outside the scope of these Articles.

The mutual agreement procedure provided for in paragraph 3 of Article 25 could be used to deal with such a case. One possible basis to solve the case would be for the competent authorities of the two States to agree that each State should provide relief as regards the residence-based tax that was levied by the other State on the part of the benefit that relates to services rendered during the period while the employee was a resident of that other State. Thus, in the above example, if the relevant services were rendered in a third State before the person became a resident of State R2, it would be logical for the competent authority of State R2 to agree to provide relief (either through the credit or exemption method) for the State R1 tax that has been levied on the part of the employment benefit that relates to services rendered in the third State since, at the time when these services were rendered, the taxpayer was a resident of State R1 and not of State R2 for purposes of the convention between these two States.

OECD BEPS action 6 (final report) cites the last paragraph, and continues:

67. Based on that approach, a possible basis for solving double taxation situations arising from the application of departure taxes would be for the competent authorities of the two States involved to agree, through the mutual agreement procedure, that each State should provide relief as regards the residence-based tax that was levied by the other State on the part of the income that accrued while the person was a resident of

that other State. This would mean that the new State of residence would provide relief for the departure tax levied by the previous State of residence on income that accrued whilst the person was a resident of that other State, except to the extent that the new State of residence would have had source taxation rights at the time that income was taxed (i.e. as a result of paragraphs 2 or 4 of Article 13<sup>46</sup>). States wishing to provide expressly for that result in their tax treaties are free to include provisions to that effect.<sup>47</sup>

Some DTAs deal with this. For instance, art 13(10) Canada/UK DTA provides:

10 Where an individual ceases to be a resident of a Contracting State and by reason thereof is treated under the laws of that State as having alienated property before ceasing to be a resident of that State and is taxed in that State accordingly and at any time thereafter becomes a resident of the other Contracting State, the other Contracting State may tax gains in respect of the property only to the extent that such gains had not accrued while the individual was a resident of the first-mentioned State. However, this provision shall not apply to property, any gain from which that other State could have taxed in accordance with the provisions of this Article, other than this paragraph, if the individual had realized the gain before becoming a resident of that other State. The competent authorities of the Contracting States may consult to determine the application of this paragraph.

46 See 53.23 (DT CGT relief: Exceptions).

47 OECD, BEPS Action 6: Final Report “Preventing the Granting of Treaty Benefits in Inappropriate Circumstances” (2015).

## CHAPTER TWELVE

# UK ARRIVAL OR DEPARTURE: TAX CHECKLIST

### 12.1 Pre-arrival planning

#### 12.1.1 Actions pre-start of split year

## 12.1 Review of residence status

An individual needs residence status advice *before* the start of the tax year of arrival:

<b>Issue</b>	<b>Comment/See para</b>
Consider whether the individual is treaty-resident in a foreign state for part of the year of arrival, or generally; (and whether anything can be done to improve the position)	8.2 (Treaty/UK law residence)
Consider whether the year of arrival is a split year; if so identify the dates of the UK/overseas parts of the split year (and whether anything can be done to improve the position)	9.4 (Definition of “split year”)
What record keeping is needed	5.36 (Record keeping)
If not first time of UK residence: Consider whether temporary non-resident (and whether anything can be done to improve the position)	If individual was formerly UK resident but TNR rules do not apply, consider remitting income and gains from earlier residence period to UK; see 33.35 (Remittance when non-resident)
Review domicile; consider whether steps are appropriate to manifest domicile intention	See 3.8 (Remaining non-dom: UK resident)

Review deemed domicile

Diarise the date

Note that small and easy changes may make the difference between:

- (1) Split year/non-split year
- (2) Residence/ non-residence.

Residence/non-residence is important even if the year of arrival would otherwise be a split year, for instance, for another year of overseas workday relief (arrivers earnings relief).

## 12.2 Individual coming to UK; not TNR

### 12.2.1 *Before start of split year*

Even if the year is a split year, some steps still need to be taken before the start of the *tax year* ie before 6 April; (not before the start of the UK part of the year):

Realise UK “disregarded income” when non-resident if non-resident’s IT relief applies	42.1 (Non-residents IT relief: Introduction)
Take benefit from trust within s.731/643A	47.43.6 (s.731 income in split year)
Take capital payment before start of year of residence	57.18 (s.87 gains of split year)

Advisors may also need to consider the foreign tax implications of moving to the UK.

### 12.2.2 *Before UK part of split year*

Realise foreign income when non-resident	
Realise gains when non-resident (pre-arrival rebasing)	53.8 (Date of disposal/ acquisition)
Postpone realising losses until resident	
Review securities portfolio: should not contain UK securities to avoid IT/CGT on arising basis	

Transfer UK situate property (other than UK land) to a trust/company held by a trust, if gain may otherwise arise on a disposal when UK resident	Move from arising basis to s.87 basis
Arrangements to separate taxable income/gains from (clean) capital Remit capital for property purchase and anticipated expenses at outset	17.43 (Remittance basis planning)
Review life policies if a chargeable event gain may arise when UK resident; review personal portfolio bonds This applies to policies held personally or in a trust created by individual	62.5 (No remittance basis)
Residence or chattels held in a company: consider steps to avoid this	79.1 (Home/chattels owned by company)
If individual within POA rules once resident, consider POA election (in practice this would be rare)	80.33 (POA election)
Review Will, particularly: if UK situate property is acquired if individual may acquire UK domicile of choice, or UK habitual residence, if domicile/habitual residence may be uncertain <sup>1</sup>	

### 12.3 Temporary non-resident becoming UK resident

Some of the above points will apply to temporary non-resident individuals. TNR gains and TNR income will come into charge on return to the UK. But there may be scope for realising income when non-resident which is not TNR income. See 10.2.2 (TNR income).

### 12.4 Individual an employee

Employee within overseas workday relief: Nominate qualifying account for OWR mixed fund rule Deadline: 31 January after year of nomination	33.24 (OWR: Qualifying account)
Employee within overseas workday relief or split year: Apply for s.690 direction	35.6 (PAYE clearance: s.690 direction)

---

1 See Kessler & John, *Drafting Trusts and Will Trusts* (14<sup>th</sup> ed, 2019), para 18.31 (EU Succession Regulation).

PAYE81950 and PAYE manual appendices 4, 5, 6, 7A and 7B set out special PAYE and NIC arrangements for internationally mobile employees/short term business visitors:

PAYE81950 Short Term Business Visitors UK Employers in countries not covered by a DTA or who have branches overseas. These employers would be obliged to operate PAYE on non-resident employees who come to the UK to work for them from overseas group companies or branches, but only for a short period of time. If the employees are eligible for personal allowances there may ultimately be no UK liability. See 35.12 (Short Term Business Visitor: < 30 days).

EP Appendix 4 For individuals who are:

- Resident in a country with a DTA with an employment income article
- Coming to work in the UK for a UK company or the UK branch of an overseas company, or are
- Legally employed by a UK resident employer, but economically employed by a separate non-resident entity
- Expected to stay in the UK for 183 days or less in any twelve month period. See 35.13 (Short-term visitors: EP app 4).

EP Appendix 5 For employers required to deduct foreign tax in addition to UK PAYE from payments being made to employees sent to work abroad: provisional relief for double taxation to employees who must pay both UK tax and foreign tax from the same payments of earnings. See 35.14 (Foreign tax credit: EP app 5).

EP Appendix 6 For employees assigned to work in the UK from abroad who are tax equalised. Tax equalisation is an arrangement between an employer and a foreign national employee who comes to the UK to work. The employee will be entitled to a specified amount of net earnings and benefits and the employer meets their UK Tax liability. See 35.15 (Tax equalisation: EP app 6).

Two further arrangements deal with NIC:

EP Appendix 7A For employees subject to an EP Appendix 6 agreement, who are assigned to work in the UK from abroad and have an employer or host employer in the UK liable for secondary UK NICs. The employee pays NICs on earnings in this employment above the annual upper earnings limit (UEL) for the year or on earnings at or above the UEL in each earnings period throughout the year

EP Appendix 7B For employees employed by a UK employer who are assigned to work abroad for a period of limited duration, but for more than a complete tax year, who have an ongoing liability to UK NICs whilst abroad.  
The employee will be paid above the upper earnings limit (UEL) in every earnings period throughout the tax year and will receive some earnings and benefits derived from the employment from sources other than the UK employer.  
The employee will not be liable to UK tax on the earnings from employment

## 12.5 Individual a trustee/director

If individual is a trustee, including charitable trust: Review impact of change of individual residence on residence status of trust. May need to retire before tax year of residence (or by concession, during offshore part of a split year). 6.4 (Trust residence for IT/CGT)  
9.15 (Split year of trustees and PRs)

If individual a director/shadow director: review impact of individual's residence on company residence.

## 12.6 Trusts

### 12.6.1 *Protected/settlor-excluded trust*

Distribution from trust within s.731 to remove relevant income?  
Review securities portfolio: arrange this does not contain UK securities to avoid IT on an arising basis (non-protected income)

### 12.6.2 *Settlor-interested non-protected trust*

Distribute trust income when settlor non-resident  
Realise gains when settlor non-resident (not in overseas part of split year)

## 12.7 Company not held in trust

Company within s.3 TCGA: Realise company gains when individual non-resident; postpone realising losses until resident

Company within s.720: realise income when non-resident

Consider transferring to trust to avoid non-protected income/tax on UK gains on arising basis 88.14 (Protected s.720 company income)

## 12.8 Pre-UK domicile planning

Diarise possible date of acquiring deemed IHT domicile  
In anticipation of becoming deemed domiciled:

Formerly domiciled resident: review trusts made by individual (including charitable trusts)

Deemed domicile under 15-year rule: consider creating protected trust

Review interest-free loans to trusts or underlying companies 88.7 (Tainting-loan rules)

Arrange foreign income/gains while remittance basis still applicable (similar issues to pre-residence planning)

## 12.9 Departure planning

Many of the above points apply in reverse.

For instance, realise losses before departure and postpone realising gains or income; review impact of departure on trust or corporate residence.

In addition consider:

Form P85 (Leaving the UK - getting your tax right)

Form NRL1 (Non resident landlord scheme: Application to receive UK rental income without deduction of UK tax)

Form R43 (Claim to personal allowances and tax repayment by an individual not resident in the UK)

Revoke gift aid declarations for charities which the individual may wish to continue to support.<sup>2</sup> Otherwise there could be a Gift Aid clawback charge if the individual makes a gift to the charity (even a non-UK charity) and does not pay sufficient UK tax to frank the gift.<sup>3</sup>

---

2 This would only be necessary for ongoing gift aid declarations, ie those which cover present and future gifts, but that is the standard form.

3 Section 424 ITA; see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* 2018/19 ed, para 15.44.4 (Gift Aid clawback charge).

Tax position in country of arrival

## CHAPTER THIRTEEN

# INCOME CATEGORISATION

### 13.1

#### **13.1 Income categories: Introduction**

The topics of this chapter are:

- (1) The scheme under which income is categorised for UK tax purposes<sup>1</sup>
- (2) Overlap rules for when income falls into two categories

#### **13.2 Income categories**

Income must be categorised, (or classified) into categories (or classes). Categorisation is necessary whenever different rules apply to different types of income, which often happens.

One might use the word “source” to describe what I here call categories, but the word “source” may be used in a more precise way. A bank account, (or a share in a company), may be called a source of income, but the category of income is interest (or dividends). Source is where the income comes from; categorisation is the type of income. So in the present context, I prefer the word “category” to “source”.

##### *13.2.1 Pre-rewrite categorisation*

The pre-rewrite system categorised income into Schedules (broad categories or sets of categories) and these were divided into Cases (sub-categories). In 1936 the Income Tax Codification Committee reviewed the system and were not complimentary:<sup>2</sup>

The existing classification of income cannot be defended on any logical

---

1 DTAs operate a different scheme: see 103.8 (DTA income categorisation).

2 (1936) Cmd 5131 at [43].

ground, and was, no doubt, largely based on administrative convenience. On the one hand, it involves the distribution of income of the same nature among different Schedules and Cases ... On the other hand the existing classification brings together matters having no intelligible connection. ... In [Case III of schedule D] is there is grouped with interest ... income so dissimilar from it as the profits of dealers in cattle and sellers of milk.

For all these faults, this system survived another 80 years from then, until the tax law rewrite. Perhaps it shows that coherence is not necessarily an essential feature of a tax system; or a characteristically British pragmatism; or the weight of history and the difficulty of reform; or perhaps all three. However that may be, the reader will acquire some familiarity with the schedular system from pre-2005 case law, and of course it has influenced the post-rewrite system.

### 13.2.2 ITTOIA/CTA income categories

ITTOIA/CTA 2009 classify income into:

- (1) Categories (covered by a Part<sup>3</sup> of ITTOIA/CTA 2009)
- (2) Sub-categories (covered by a Chapter of ITTOIA/CTA2009)

I refer to these as “**income categories**”. The main income categories are the following:

<b>CATEGORY</b>	<b>ITTOIA</b>	<b>CTA 2009</b>
	<i>Part: Chapter</i>	<i>Part: Chapter</i>
<b>Trading income</b>	<b>2</b>	<b>3</b>
Trade profits	2: 2	3:2
Post-cessation receipts	2: 18	3:15
<b>Property income</b>	<b>3</b>	<b>4</b>
Property income	3: 3	4: 3
Mines, etc	3: 8	4: 7
Wayleaves	3: 9	4:8
Post-cessation receipts	3: 10	4:9
<b>“Savings &amp; Investment Income”</b>	<b>4</b>	-
Interest	4:2	
Disguised interest	4: 2A	-

3 I adopt the style of the Taxes Acts, which write Part and Chapter with initial capitals, to reflect the technical nature of the words.

UK dividends	4: 3	-
Non-UK dividends	4: 4	-
Purchased life annuities	4:7	-
Deeply discounted securities	4: 8	-
Life policies: chargeable-event gains	4: 9	6:11 <sup>4</sup>
<b>“Part 5 ITTOIA Miscellaneous Income”</b>	<b>5</b>	<b>10</b>
Royalties/intellectual property income	5: 2	-
Offshore receipts from intangible property	5: 2A	-
Settlor-interested trusts	5: 5	-
Estate in course of administration	5: 6	10:3
Annual-Payment income	5: 7	10: 7
Misc Sweep-up Income	5: 8	10: 8

CT has diverged from IT, in the following cases in particular:

<b>Loan relationships/Deemed loan relationships</b>	<b>5/6</b>
<b>Derivatives</b>	<b>7</b>
<b>Intangible fixed assets/Intellectual property</b>	<b>8/9</b>

A note on the naming of Parts of ITTOIA:

*Parts 2/3:* The names here (trading/property income) are straightforward.

*Part 4:* I describe this as **“Savings & Investment Income”** with initial capitals, to indicate that it is a technical term, meaning specifically income identified in the Chapters of Part 4 ITTOIA.

*Part 5:* “Miscellaneous income” as a label scarcely does justice to this set of income types, which have nothing in common except that they have been placed in Part 5, for lack of anywhere better. I refer to it as **“Part 5 ITTOIA Miscellaneous Income”** with initial capitals to reflect the technical meaning of my term.

### 13.2.3 ITA income categories

ITA 2007 deals with reliefs and rates, but it also creates income categories relating to avoidance, including:

<b>CATEGORY</b>	<b>ITA</b> <i>Part: Chapter</i>	<b>CTA 2010</b> <i>Part: Chapter</i>
Transactions in land	<b>9A</b>	<b>8ZB</b>
Accrued income profits	<b>12</b>	-
<b>Tax Avoidance</b>	<b>13</b>	

---

4 The correspondence between ITA and CTA is inexact.

Transactions in securities	13: 1	<b>15<sup>5</sup></b>
Transfer of assets abroad	13: 2	-
Transfer of income streams	13: 5A	16:1/1A/4
- ditto - through partnerships	13: 5AA/5D	
Loan or credit transactions	13: 5C	16: 3
Disguised investment management fees	13: 5E	
Income-based carried interest	13: 5F	

Most of these items have their own chapter in this work, except for ToA, which has five chapters.

The ITTOIA categorisation scheme is not exactly simple. It is influenced by the pre-rewrite system. The decision to rewrite CTAs 2009/2010 separately from ITTOIA/ITA doubled the number of provisions, and the reader may doubt whether that was worthwhile. But there it is.

The ITTOIA/CTA 2019 categorisations seem to make sense, just about; – at least, once the reader is familiar with them. The ITA/CTA 2010 categories of tax avoidance type income are entirely *ad hoc* and have no underlying general principles.

Could anything better be devised? Discuss.

### 13.3 Categorisation overlaps

There are statutory priority rules for income which fall into two categories.

These alter the pre-rewrite position under which HMRC had some choice how to assess income which fell within more than one Case of Schedule D.<sup>6</sup> Pre-2005 case law needs review in the light of the post-rewrite provisions, but the old cases are still important on some aspects.

#### 13.3.1 *Priority in charging provision*

Sometimes priority is addressed in the charging provision. This is done in the charging provisions for Annual Payments/disguised interest/misc sweep-up income:

<b>s.683 ITTOIA</b>	<b>s.381A ITTOIA</b>	<b>s.687 ITTOIA</b>
<b>Annual Payment</b>	<b>Disguised interest</b>	<b>Misc Sweep-up Income</b>

<sup>5</sup> The correspondence between ITA and CTA is inexact.

<sup>6</sup> See *Liverpool and London and Globe Insurance v Bennett* 6 TC 327 and ITTOIA EN Change 66.

(1) Income tax is charged under this Chapter [Chapter 7 Part 5 ITTOIA] on annual payments that are not charged to income tax under or as a result of any other provision of this Act or any other Act.

(2) Income tax is charged on [a return which is economically equivalent to interest] return if the return is not charged to income tax under or as a result of any other provision of this Act or any other Act.

(1) Income tax is charged under this Chapter [Chapter 8 Part 5 ITTOIA] on income from any source that is not charged to income tax under or as a result of any other provision of this Act or any other Act.

(2) Subsection (1) does not apply to annual payments or to income falling within Chapter 2A of Part 4 [Disguised interest].

(2) Subsection (1) does not apply to annual payments that would be charged to income tax under or as a result of another provision but for an exemption.

(3) Subsection (2) does not apply to a return that would be charged to income tax under or as a result of another provision but for an exemption.

(3) Subsection (1) does not apply to income that would be charged to income tax under or as a result of another provision but for an exemption.

More often, there is a separate provision which addresses the issues of priority.

### 13.3.2 *Property/trade income overlap*

An activity may constitute both trading and a property business; and a receipt can be both a trading receipt and a receipt of a property business.

The paradigm case is rent received by a property developer from temporary letting of land awaiting development.

**s.4(1) ITTOIA**

**s.201(1) CTA 2009**

Any receipt or other credit item, so far as it falls within—

- (a) Chapter 2 of this Part (receipts of trade, profession or vocation), and
- (b) Chapter 3 of Part 3 so far as it relates to a UK property business, is dealt with under Part 3

### **s.261 ITTOIA**

Any receipt or other credit item, so far as it falls within—

- (a) Chapter 3 of this Part so far as it relates to an overseas property business or Chapter 8 or 9 of this Part (rent receivable in connection with a UK section 12(4) concern or for UK electric-line wayleaves), and
- (b) Chapter 2 of Part 2 (receipts of a trade, profession or vocation), is dealt with under Part 2.

Any receipt or other credit item, so far as it falls within—

- (a) Chapter 2 of this Part (receipts of trade), and
- (b) Chapter 3 of Part 4 so far as it relates to a UK property business, is dealt with under Chapter 3 of Part 4.

### **s.287 CTA 2009**

Any receipt or other credit item, so far as it falls within—

- (a) Chapter 3 of this Part so far as it relates to an overseas property business or Chapter 7 or 8 of this Part (rent receivable in connection with a UK section 39(4) concern or for UK electric-line wayleaves), and
- (b) Chapter 2 of Part 3 (receipts of a trade), is dealt with under Part 3.

EN ITTOIA explains:

1058. The priority rules ... make it clear that a charge under Part 3 of this Act as UK property income has priority over a charge under Part 2 as trading income. This reflects the rule in Schedule D Case I (section 18(3) of ICTA)...The rent is taxed as property income, even if it could properly be regarded as a trade receipt.

1059. In the case of a foreign trade and foreign property, the rule in section 65A(1)(b) of ICTA is the reverse of that in section 18(3) of ICTA. An overseas property business does not include “income to which section 65(3) of ICTA applies (income immediately derived from carrying on a trade)”. So the priority rule in section 261 preserves this position.

Perhaps the reason for the anomaly is to maximise income classified as UK source. Under these rules, if UK property income is a receipt of a foreign trade, it is classified as UK property income (and so taxable even in circumstances where foreign trading income may not be); whereas if

foreign property income is part of a UK trade it is treated as UK trading income (and similarly taxable).

### 13.3.3 *S&I/trade income*

A receipt can be both a trading receipt and Savings & Investment Income. The paradigm case is interest/dividends received by a bank/financial trader.

Section 366(1) ITTOIA provides:

Any income, so far as it falls within—

- (a) any Chapter of this Part [Part 4, Savings & Investment Income],  
and
- (b) Chapter 2 of Part 2 (receipts of a trade, profession or vocation),  
is dealt with under Part 2.

### 13.3.4 *S&I/property income*

A receipt can be both a receipt of a property business and Savings & Investment Income. Section 366(2) ITTOIA provides:

Any income, so far as it falls within—

- (a) any Chapter of this Part [Part 4, Savings & Investment Income],  
and
- (b) Chapter 3 of Part 3 so far as the Chapter relates to a UK property  
business,  
is dealt with under Part 3.

### 13.3.5 *Co distribution/trade/property income*

Section 931W CTA2009 makes similar provision for CT:

(1) Any income so far as it falls within—

- (a) this Part [Part 9A, company distributions], and
- (b) Chapter 2 of Part 3 (income taxed as trade profits),  
is dealt with under Part 3.

(2) Any income so far as it falls within—

- (a) this Part, and
- (b) Chapter 3 of Part 4 (profits of property businesses) so far as the  
Chapter relates to a UK property business,  
is dealt with under Part 4.

### 13.3.6 *S & I Income/ITEPA income*

Section 366(3) ITTOIA provides:

Any income, so far as it falls within—

- (a) any Chapter of this Part [Part 4, Savings & Investment Income] other than
  - [ii] Chapter 3 [UK dividends] or
  - [iii] [Chapter] 6 [release of close company loans], and
- (b) Part 2, 9 or 10 of ITEPA 2003 (employment income, pension income or social security income),

is dealt with under the relevant Part of ITEPA 2003.

An example is an annuity, which may constitute pension income.

### 13.3.7 *S & I/chargeable event income*

Section 366(4) ITTOIA provides:

Nothing in this section prevents amounts both—

- (a) being counted as income for the purposes of Chapter 9 of this Part (gains from contracts for life insurance etc.), and
- (b) being taken into account in calculating income, or counting as income, for the purposes of other Parts of this Act,

but see section 527 (reduction for sums taken into account otherwise than under Chapter 9).

### 13.3.8 *Part 5 ITTOIA/trade income*

A receipt can be both a trading receipt and Part 5 ITTOIA Miscellaneous Income. The paradigm case is royalties received by an author.

Section 575(1) ITTOIA provides:

Any income, so far as it falls within—

- (a) any Chapter of this Part [Part 5, Miscellaneous Income], and
  - (b) Chapter 2 of Part 2 (receipts of a trade, profession or vocation),
- is dealt with under Part 2.

The charge on trading profits under Part 2 ITTOIA has priority over the charge on royalty income in Part 5 ITTOIA.

### 13.3.9 *Other Part 5 overlaps*

Section 575 ITTOIA provides:

(2) Any income, so far as it falls within—

- (a) any Chapter of this Part [Part 5, Miscellaneous Income], and

(b) Chapter 3 of Part 3 so far as the Chapter relates to a UK property business,

is dealt with under Part 3.

(3) Any income, so far as it falls within—

(a) any Chapter of this Part [Part 5, Miscellaneous Income], and

(b) Chapter 2 or 3 of Part 4 (interest and dividends etc. from UK resident companies etc.),

is dealt with under the relevant Chapter of Part 4.

(4) Any income, so far as it falls within—

(a) any Chapter of this Part [Part 5, Miscellaneous Income], and

(b) Part 2, 9 or 10 of ITEPA 2003 (employment income, pension income or social security income),

is dealt with under the relevant Part of ITEPA 2003.

### 13.3.10 Trade/employment (ITEPA) income

IT/CT have different rules:

#### **s.4(2) ITTIOA**

Any receipt or other credit item, so far as it falls within—

(a) this Part [Part 2, trading income], and

(b) Part 2, 9 or 10 of ITEPA 2003 (employment income, pension income or social security income),

is dealt with under the relevant Part of ITEPA 2003.

#### **s.201(2) CTA 2009**

Any receipt or other credit item, so far as it falls within—

(a) this Part, and

(b) Chapter 4 of Part 10 (income from holding an office),

is dealt with under Chapter 4 of Part 10.

See 36.16.1 (Deemed non-employment) for some exceptions.

CHAPTER FOURTEEN

**INCOME RECOGNITION:  
RECEIVE/ENTITLED/ARISE/PAID**

14.1

**14.1 Vocabulary of income recognition**

This chapter considers a cluster of related expressions or concepts:

- a person *receiving or entitled to* income<sup>1</sup>
- income *arising* to a person
- income *of* a person
- income *paid/payable* or *due and payable* or *payment* to a person
- a person *deriving* income
- gains *accruing* to a person

These are some of the most common words in tax legislation. I refer to this as “**income recognition**” vocabulary.

“Payment” is often defined, and occasionally an attempt is made to define “receipt”:

<b>Expression</b>	<b>Context</b>	<b>See para</b>
Earnings <i>received</i> in a tax year	Employment income	33.12
Benefit <i>received</i> by a beneficiary	s.731; s.87	47.6; 57.8

I do not discuss any definitions here: this chapter considers the general meaning of these terms when there is no (or no effective) definition.

Of course meaning depends on context. Payment has been described as: “an ordinary English word, ... not a term of art, [with] a flexible meaning

---

1 In this chapter, where the context permits, I abbreviate income/gains to income and leave gains to be understood.

depending on the context in which it is used”.<sup>2</sup> That is true of all the vocabulary of income recognition. But there is a core meaning worth investigation.

Also see 86.2 (“Transparent” and “opaque”).

## 14.2 Paradigm contexts

The following are not the only the contexts in which these expressions are used, but they are paradigm cases, in which their meaning is most commonly discussed.

### 14.2.1 *Receiving/entitled: Person liable*

ITTOIA generally imposes liability to income tax on the person “receiving or entitled” to the income. For instance, s.371 ITTOIA provides:

The person liable for any tax charged under this Chapter is the person *receiving or entitled* to the interest.

I refer to this as the “**standard person-liable rule**”, that the person liable is the person receiving/entitled to the income.

The rule is set out each time there is a charge on a category of income, about 20 times in all. It may be useful to set out a table of these provisions:

ITTOIA	TOPIC	ITTOIA	TOPIC
<i>Section</i>	<i>Part:Chapter</i>	<i>Section</i>	<i>Part:Chapter</i>
8	2:2 Trading income	385 <sup>3</sup>	4:3 UK dividends
230	2:17 Adjustment income	404	4:4 Non-UK dividends
245	2:18 Post-cessation receipts	425	4:7 Purchased life annuities
271	3:3 Property income	554	4:11 Transactions in deposits
332	3:7 Adjustment income	581	5:2 Intellectual property
352	3:10 Post-cessation receipts	611	5:3 Film & sound recording
371	4:2 Interest	685	5:7 Annual Payments
381C	4:2A Disguised interest	689	5:8 Misc Sweep-up Income

Whether such repetition actually benefits the reader might be debated. Perhaps it depends on who is the reader. But that ship has sailed.

In *Anson v HMRC*.<sup>4</sup>

2 *Clark v HMRC* [2020] EWCA Civ 204 at [50]. Also see Proctor, *Mann on the Legal Aspect of Money* (7th ed, 2012) chap 7.

3 This is in a non-standard form; see 14.6 (When are dividends recognised).

4 [2015] UKSC 44 at [116].

... taxpayers can be liable to tax in respect of income to which they are entitled without receiving payment of that income. Examples include the income of an interest-in-possession trust<sup>5</sup> or of a partnership<sup>6</sup>.

#### 14.2.2 *Arising: Quantum of charge*

ITTOIA generally provides that the charge is on the amount, or full amount, of income arising in the tax year. For instance, s.370 ITTOIA provides:

Tax is charged under this Chapter on the full amount of the interest *arising* in the tax year.

This rule is also set out each time there is a charge on a category of income, in a section placed just before the person-liable rule.

There are two distinct points here.

- (1) The tax charge is on (or limited to) the income which “arises”.
- (2) The tax charge is on the “full amount” of the income.

I discuss the meaning of “arising” here. The question of what constitutes the amount/full amount, ie whether expenditure is deductible, is discussed in the chapters on the type of income concerned.<sup>7</sup>

Under this provision income must “arise” but it does not matter to whom the income arises. But sometimes it is necessary to identify the person to whom income arises, or to whom income is paid.<sup>8</sup>

#### 14.2.3 *Payment: WHT, PAYE*

Interest withholding tax applies:

if a *payment* of yearly interest arising in the UK is made...

by or to certain persons.<sup>9</sup> PAYE and other withholding taxes also apply on making a “payment”.<sup>10</sup>

---

5 Citing *Baker v Archer-Shee*.

6 Citing *Reed v Young* [1986] STC 285 at p.289; *Padmore v IRC* [1987] STC 36 at p.51.

7 See 25.7 (Interest: Charge to tax); 32.13 (Sweep-up income: Computation).

8 See 20.4.4 (To whom trading income arises); 25.20 (To whom is interest paid).

9 See 25.19 (Interest withholding tax).

10 See 31.10 (IIP WHT conditions A&B); 35.2 (Relevant payment): PAYE.

A complication of the word “payment” is that in its strict sense it means a payment of money. But the context may show that it is used widely to include non-money payments.

#### 14.2.4 *Accruing: Gains*

Section 1 TCGA provides:

Capital gains tax is charged for a tax year on chargeable gains *accruing* in the year to a person on the disposal of assets.

The terminology of the Taxes Acts is that gains are said to *accrue*; but income is said to *arise*.

#### 14.2.5 *Profits of companies*

Section 2(1) CTA 2009 provides:

Corporation tax is charged on profits *of* companies...

Here the (deceptively) simple preposition “*of*” takes the place of arising/accruing.

### 14.3 Recognition/attribution: Analysis

At first sight the different items of (what I call) income recognition vocabulary seem to raise distinct questions:

- does income arise, and if so to whom
- is there a receipt/entitlement, if so by whom
- is income paid, and if so to whom? *etc*

The significance of these questions is that they decide “**recognition**” and “**attribution**” issues:

- In what circumstances/at what point is income *recognised* as existing
- Once recognised, to which person is the income (in principle<sup>11</sup>)

---

11 The common law (should one say, common sense?) attribution rules discussed in this chapter are of course subject to other rules, typically anti-avoidance rules, under which what one would for non-tax purposes regard as income/gains of one person is treated for tax purposes as income/gains of another person: eg s.624 ITTOIA, mixed partnership code, s.3 TCGA; and (putting aside the issue of whether what is allocated is technically the same income) s.720 ITA, and CFC rules.

*attributed*<sup>12</sup>

Where the word “arising” or “payment” is used in isolation, it indicates a minimum level below which some item is not (or not yet) considered to constitute income at all. The issue is income recognition. That is, unless and until income “arises” there is no recognition of income.

Where the reference is to income arising (etc) to a person, it requires some connection between the income and the person to whom, in some sense, the income belongs. The issue is income attribution.

Wheeler proposes that varied expressions of income recognition should be seen as raising the same issues, or essentially the same issues, namely income recognition and attribution.<sup>13</sup> The varied terminology conceals the fact that the issues are essentially the same. There may be differences of context, and one should adopt the appropriate statutory terminology, but in practice these expressions cover (more or less) the same ground. So it is helpful and indeed necessary to consider them together.<sup>14</sup> It is also helpful to use one word to refer to income which is arising/received/entitled to/paid, and I call this “**recognising**” income, though one might use the term “taxable”.

This approach goes against the lawyer’s instinct that different words should have distinct meanings. But that is not a rule to apply strictly in tax legislation.

Tax legislation generally gives only a brief, seemingly commonsense, statement of recognition/attribution rules. In simple cases the position is clear. In other cases it has been left to the Courts to sort out. The borders of income recognition have proved difficult to identify, and much can depend on the drafting.

#### 14.4 Glosses and paraphrases

Although the statutory vocabulary seems more than rich enough, the

---

12 A note on terminology: in this context “attribution” and “allocation” are synonymous; I prefer “attribution”.

13 *The Missing Keystone of Income Tax Treaties* (2012) para 2.4 (Attribution of income) and Appendix 2.

14 This was acknowledged in *Girvan v Orange Personal Communications* 70 TC 602 at p.621 where a case on whether interest was *paid* was relied on when the issue was receipt/entitlement (under the standard rule, that the person liable is the person receiving/entitled to income).

temptation to explain it with a gloss or paraphrase is irresistible, and the cases disclose a large number:

*Get the money*: In *IRC v Whitworth Park*:<sup>15</sup>

Traders pay tax on the balance of profits or gains and bring money owed to them into account in striking that balance, but ordinary individuals are not assessable and do not pay tax until they get the money because until then it is not part of their income.

That does not help much. In *Dunmore v McGowan*:<sup>16</sup>

Of course, ... that remark, “individuals don’t pay tax until they get the money” begs the question: for what is meant by the word “get”? Read in isolation it does not take one very much further because one doesn’t know without reading the whole of the *Whitworth* case what precisely is meant by “get”.

Exactly the same applies to other short paraphrases or slogans, such as:

- receivability without receipt is nothing: *Leigh*
- *actual* receipt and not *notional* receipt: *Parkside Leasing*
- *the swelling of a person’s assets*: *Dunmore*
- *in the enjoyment* of a person: *Dewar*
- could a person *make use* of the money: *Dewar*
- placed *at the disposal* of a person: *Parkside Leasing*
- *practical control* over the disposal of the funds: *Aberdeen*
- money has “*come in*”, a test said to derive from the word *income*

Perhaps inevitably, we also have references to a “real” payment,<sup>17</sup> but references to reality do not help much, if at all.<sup>18</sup>

## 14.5 When is interest recognised

The area which has given rise to most discussion is the taxation of interest, but similar points arise in other areas. In this section I also discuss investment management fees, and in the next section, dividends.

### 14.5.1 Pre-ITTOIA case law

---

<sup>15</sup> 38 TC 531 at p.573.

<sup>16</sup> 52 TC 307 at p.316.

<sup>17</sup> See 14.5.3 (Credit to non-bank account).

<sup>18</sup> See App.6.1 (What do we mean by “Real?”); **App 6.10** (Cardinal principle reaffirmed).

Pre-rewrite case law will continue to apply:

1512. As the phrase [“receiving or entitled to”] is well established in case law, it is retained in the rewritten legislation. It is not, however, considered appropriate to include any further explanation of the phrase because of its wide interpretation by the courts.<sup>19</sup>

#### 14.5.2 *Interest due, not paid*

In *Dewar v IRC* the taxpayer was executor of an estate under which he was entitled to a pecuniary legacy and interest. He paid himself the legacy but not the interest. The interest was not recognised as received.<sup>20</sup>

... you must find something which is in the enjoyment of the subject. He could make use of the money which lies abroad to his use. It is in that sense in his enjoyment. At the present time, upon the present facts, there is no enjoyment by Mr. Dewar, there is no gain by him, he has derived no profit and there is nothing in his hands which will answer the test of what you mean by ‘income’.

... *Leigh v CIR* ... says this:<sup>21</sup>

‘It is to be remembered that for Income Tax purposes “receivability” without receipt is nothing. Before a good debt is paid there is no such thing as Income Tax upon it’ ...

Now it is said, and said truly, that it has not been received by Mr. Dewar or placed at his disposal owing to his voluntary act or omission; that is to say the interest has not been paid, not because the debtor cannot pay it, but because Mr. Dewar has not thought fit to ask for payment, and further has intimated the possibility of his releasing the debtor altogether from payment of that interest. But ... the question is what income the man has received, and not what income he has received or but for his

---

19 For completeness, the Tax Law Rewrite make this comment on receiving/entitled to, in the context of interest:

“1511 The phrase “receiving or entitled to” has been considered at length by the courts, although no clear definition of it has emerged. In early cases the courts placed greater emphasis on the concept of receipt than on entitlement - see, for example, *Dewar v IRC* 19 TC 561. Later, equal importance was attached to each part of the phrase - see, for example, *Aplin v White* 49 TC 93. The most recent cases, such as *MacPherson v Bond* 58 TC 579, and *Peracha v Miley* 63 TC 444, have hinged on whether or not any benefit has accrued to the taxpayer.”

Much of this is debatable; but it is not necessary to pursue that here.

20 19 TC 561.

21 11 TC 590 at p.77.

wilful default might have received.

### 14.5.3 *Credit to non-bank account*

Everyone agrees that a credit to a bank account constitutes payment/receipt. The question concerns non-bank accounts.

In *Girvan v Orange Personal Communications*:

I consider that it would require very unusual circumstances indeed before the internal arrangements of the debtor, unknown to the creditor and not, at least on the face of it, giving any new rights to the creditor, could alter the liability of the creditor to tax. It is true that the sums paid quarterly into the suspense accounts by the bank could be said to be no more and no less “the property” of Orange than any payments of interest would have been if credited to the [bank] deposit accounts in the name of Orange. However, that appears to me to ignore commercial common sense and practice. In my judgment, payment of money into a person’s bank account (although it may be said to involve nothing more than an entry into the bank’s computer records) would be regarded in the commercial world as payment, in a way that payment into an account set up by the bank in its own name for internal accounting purposes would not.

In two cases a credit entry in a non-bank account was recognised as a payment:

In *IRC v Doncaster* the credit was to a directors loan account used for crediting directors fees, dividends and interest.<sup>22</sup>

... it simply went into that loan account. I can conceive nothing more complete in the way of payment. It was simply putting it to the credit of what is equivalent to a banking account.

In *Garforth v Newsmith*,<sup>23</sup> a bonus credited to a director’s loan account was similarly held to have been paid. Likewise in *Aberdeen Asset Management v HMRC*.<sup>24</sup>

In considering what amounts to payment for the purposes of the PAYE legislation, it is important in my opinion to bear in mind that money is

---

22 8 TC 623 at p. 631.

23 52 TC 522, approved *RFC 2012 Plc v AG* [2017] UKSC 4 (the *Rangers* case) at [52].

24 [2014] SC 271 at [34] approved *RFC 2012 Plc v AG* [2017] UKSC 4 (the *Rangers* case) at [53].

a medium of exchange. In practical terms, therefore, the crucial question is whether funds have been placed in a position where as a practical matter they may be spent by the employee as he wishes; it is at that point that the employee can be said to obtain the benefit of those funds. If the PAYE legislation is construed purposively it is in my view obvious that it is such a benefit that is to be taxed. For this purpose it is not appropriate to deconstruct the precise legal nature of the employee's rights, drawing fine distinctions according to the methods that he must adopt in order to use the funds for his benefit. The fact that the employee has practical control over the disposal of the funds is sufficient to constitute a payment for the purposes of the legislation.

But it is not always the case that an entry in books of account crediting an amount as due to a payee will constitute payment. If, for instance, under the terms of his loan the creditor has the right to add arrears of interest to principal, an entry in his books showing that the interest has been added to the principal will not amount to payment of the interest. See *Paton (as Fenton's Trustee) v IRC* 21 TC 626. The taxpayer had loan accounts with two banks. Interest was debited and added to principal. The question was whether the interest had been paid:

it may well be that in a question between a bank and its customer ... the interest accruing annually may by the sanctioned method of accounting cease to be interest when it is accumulated with the principal, so that the bank can thereafter no longer sue for the interest as interest. ... But it is manifest that it is only by a legal fiction that the interest in such cases as the present can be said to have been paid. After, as before, the striking of the balance the same sum remains due, no longer, it may be, as interest,<sup>25</sup> but still due as part of the principal debt.

... what the Income Tax Act requires as the condition of repayment of tax on interest is that the sum due as interest shall have been actually discharged, not merely constructively paid. To warrant repayment of tax there must have been a real payment of tax and a real payment of interest without deduction of tax.

In *Paton*, the entry adding the accrued interest to principal was an entry in the books of the lender. In *Minsham*, interest was credited to the loan

---

25 The question whether interest accumulated in this way lost its character as interest was answered in *IRC v Oswald* 26 TC 435, which held that when the debtor paid the interest which had been added to capital, the payment was interest (and so subject to withholding tax).

account in the books of the borrower and in the books of the lender. It was suggested that there might at least be a payment if a lender agreed to increase his loan by an amount equal to the accrued interest: the increase in the amount of the loan would constitute payment of the accrued interest. But the judge disagreed even with that:

I find it difficult to imagine circumstances in which a transaction would fall to be analysed in this way even if cheques for the loan and the accrued interest were circulated. The practical effect would be the same as if the accrued interest were added to the principal (as in Paton's case) save only that if the interest were yearly interest the borrower would be bound or entitled to deduct tax from the interest, a result which the taxpayer at least would be unlikely to contend for...

I do not, however, find it necessary to consider whether this is a possible state of affairs. In my judgment it is quite plain on the facts of this case that all that happened was that accrued interest was added to principal with the result that it was compounded and thereafter bore interest.<sup>26</sup>

What is the difference between *Doncaster/Garforth*, where the entries in the account did constitute payment, and *Minsham/Fenton*, where the entries did not? The director became entitled to the money when the entry was made in the sense that the director had the right (without consent of the company) to draw on the loan account.<sup>27</sup> This is why the directors loan account was "the equivalent of a bank account".

#### 14.5.4 *Interest capitalised*

In *Paton (as Fenton's Trustee) v IRC* 21 TC 626

in the case of such a provision as is contained in the present deed, which enables the interest to be capitalized, the interest is not capitalized because it is in fact paid, but because it has in fact not been paid.

SAIM provides:

**SAIM9100: Deduction of tax: yearly interest: capitalised interest**  
[Jun 2020]

---

<sup>26</sup> 63 TC 570 at p.587.

<sup>27</sup> It might be that a different rule applies to directors loan accounts. Another difference is that the credit there made a difference. A debt came into existence. The credit of interest to a non-bank account of the debtor/creditor generally makes no difference, for the interest is due before and after the credit. But these are not the key points.

In cases of capitalised or compound interest, the amount to be added to the principal sum at any periodic rest should be the gross amount of the unpaid interest. The right and duty to deduct income tax arises only when the interest is paid, and capitalisation does not constitute payment (see *CIR v Oswald (Trustee of the Cosier Settlement)* 26 TC 435 and *Minsham Properties v Price* 63 TC 570).

Tax in respect of interest has to be accounted for only when payment of the interest is actually made, that is, at the final settlement and not at the periodic rests. Where the interest is added to the principal without deduction of tax, the tax to be accounted for is the tax at the savings rate in force at the time of the final payment on the amount of interest so calculated.

**Example** (Kirsty)

K is a director of, and owns 90% of the shares in, K Ltd. She makes a loan to the company of £10,000. The loan carries interest of 10% per annum, payable annually on 31 December, but under the terms of the loan, interest may be rolled up and added to the principal, whereupon it will itself bear interest. In years 1 - 3, the company's funds are fully committed in paying trade and bank creditors, and K is unable to draw on her loan account. The situation is therefore:

	<b>Interest credited</b>	<b>Loan principal</b>
31 December Year 1	£1,000	£11,000
31 December Year 2	£1,100	£12,100
31 December Year 3	£1,210	£13,310

On 1 January Year 4, the company makes a repayment of £5,000 to K. It is agreed between the parties that this should be allocated first of all to interest, with the remaining balance treated as repayment of the £10,000 capital.

The company therefore makes an interest payment of £3,310 on 1 January Year 4. It must deduct tax at the basic rate from this payment, and account for the tax to HMRC.

'Payment' of the interest also occurs on this date for other statutory purposes. K will only be taxable on the interest in the tax year in which she receives it (SAIM2440). And for the company, interest debits that have not been allowed on an accruals basis because of CTA09 S373 (CFM35810) will become deductible.

#### 14.5.5 Credit to charged account

In *Dunmore*, the taxpayer charged a bank account as security for a guarantee. Thus he could not withdraw interest credited to the account.

The interest was nevertheless taxable:

every penny of that interest inured to the Appellant's benefit in any event; it swelled the assets of the Appellant on that day. The reasoning is this. If the guarantee ended without the interest being resorted to under the terms of the [charge], then the £347 would be withdrawable by the Appellant from the account in due course. If the £347 was resorted to under the terms of the [charge], then it would pro tanto reduce the personal liability of the Appellant under the guarantee. In either event every penny of the interest inured immediately to the benefit of the Appellant and to the full extent of the £347. Admittedly the money was locked up in the deposit account while the guarantee subsisted, but it was locked up in such a way that it inured to the Appellant's benefit at once, either as money coming to his hands or reducing his liabilities. Whatever might be the ultimate destination of the £347, it was in my judgment received by the Appellant on the day when it was credited to the second deposit account.<sup>28</sup>

*Coxon v HMRC*<sup>29</sup> is another example of a case where interest subject to a charge was taxable.

#### 14.5.6 *Uncashed interest cheque*

In *Parkside Leasing v Smith*:<sup>30</sup>

To regard the payment of money into the payee's bank account as equivalent to the payment of the money to the payee is one thing. It reflects the part that banking arrangements play in the manner in which people arrange their financial affairs. Money credited to a person's bank account in accordance with his instructions must, in common sense and in law, be regarded as money thereby received by that person. The money is thereby placed at the disposal of that person.

But the receipt of a cheque seems to me to stand on a rather different footing. The receipt of a cheque does not of itself place the sum for which the cheque is made out or the proceeds of the cheque at the payee's disposal. It is not certain that the cheque will be honoured. It may be cancelled by the drawer before it is presented. It may be dishonoured by the bank on which it is drawn. The drawer may die

---

28 52 TC 307 at 315.

29 For another aspect of this case see 92.3 ("Unremittable" income).

30 58 TC 282.

before the cheque can be presented.<sup>31</sup> The bank may fail before the cheque can be presented. All these contingencies, and there may be others, may intervene between the receipt by the payee of the cheque and the receipt by the payee of the proceeds of the cheque. If the proceeds of the cheque are not received by the payee I do not see how it can be said that the sum therein comprised was at the payee's disposal. And if the proceeds are received by the payee I do not see how it can be said that they were received at an earlier date than they were in fact received.

While it is not certain that a cheque will be honoured, these contingencies might have been dismissed as too unlikely to matter. On the other hand, the rule may be said to be attractive as the date of payment of a cheque will be known, and the date of receipt of a cheque may be less clear. However that may be, the point is decided, at High Court level, and as cheques are not used now, at least for significant amounts, the point is not likely to arise. On the basis that a cheque would normally be cashed promptly, it does not make a great deal of difference.

#### 14.5.7 *Offset interest*

*Coxon* discusses offset mortgages (back-to-back loans):

For an offset arrangement to have the desired tax effect requires that debit and credit balances owed to and from the bank are offset, with interest being charged or paid by reference to the net balance. It is not sufficient that interest is calculated separately on the debit and credit balances and then the two interest amounts are offset. In the former case the contract between customer and bank determines that only one amount of interest is due (usually from customer to bank). In the latter, there is both interest income and interest expense for the customer, albeit the amounts may be directly or indirectly netted against each other in the books of the bank.<sup>32</sup>

#### 14.5.8 *HMRC examples*

---

31 Section 75 Bills of Exchange Act 1882 provides:

“The duty and authority of a banker to pay a cheque drawn on him by his customer are determined by—

(1) Countermand of payment:

(2) Notice of the customer's death.”

32 On the documents of the case *Coxon* was on the wrong side of this line.

The SAI Manual provides:

**SAIM2440: when interest arises** [Feb 2020]

Interest ‘arises’ when it is received or made available to the recipient. Interest has been made available if it is credited to an account on which the account holder is free to draw.

That is correct where the account is a bank account.

The SAI Manual gives 4 examples:

<b>Example</b>	<b>Facts</b>	<b>Received</b>
1	Credit to bank account; withdrawal requires 30 day notice	Yes
2a	Credit to bond account; penalty for early withdrawal	Yes
2b	No credit until bond matures	Not until maturity
3	Interest paid late	Not until paid

**Example 1 (Jonathan)**

J has a building society account, on which interest is credited every 31 December. He is free to make withdrawals from the account, at 30 days’ notice, but has not withdrawn money for many years. On 31 December 2017 he receives interest of £524, he should return the interest as income of year ended 5 April 2018, even though he has not withdrawn it.

Interest can in practice often be treated as arising when it becomes due and payable. However, if a taxpayer does not actually receive interest (or have it credited to an account) until a later date, it does not normally form part of his or her taxable income until it is received.

**Example 2[a] (Sam)**

S entered into a five year fixed-term bond on 6 April 2017. The bond credits interest to S’s account annually on the 31 December. S can only gain access to both the annual interest and the principal in advance of 5 April 2022 if a penalty is paid for early access.

Since the terms and conditions of the bond allow S to draw on the funds, although with a penalty, the interest arises and is taxable each year as it is credited.

I wonder if bonds of that kind exist. They are not likely to be popular with investors within IT. Perhaps the example is intended as tax planning advice to bond issuers.

With whom does S have the account? A bank account credit would be taxable. A credit to an internal account of the bondholder should not be taxable.

**[Example 2b (Sam)]**

If the terms and conditions of the bond did not allow access until maturity, the interest would arise and be taxed at that point.

**Example 3 (Jennifer)**

In January 2017, J makes a loan of £5,000 to her cousin to help him set up a business. They agree that interest will be payable quarterly in arrears at a rate of 5% per annum. But the business initially struggles, and J does not receive any interest until June 2018 when, after she threatens legal action, her cousin repays the debt along with interest arrears of £875.<sup>33</sup>

J is not required to pay any tax on the interest until 2018/19 when it arises. However, the whole £875 is taxable when she receives it. She cannot spread the arrears of interest over the years in which it accrued.

Interest on a judicial award should normally be regarded as arising on the date on which it is paid...

**Ponzi Schemes**

Cases where there is the potential for a Ponzi (and Ponzi-type) schemes to be involved in the return of interest contact Financial Products team at BAI for advice.

**14.5.9 Investment management fees**

The IFM discusses when disguised investment management fees arise.<sup>34</sup> The rules changed in 2015, but the discussion of the pre-2015 rules is relevant to the meaning of the word “arise” when undefined. The IFM adopts the approach of the interest cases. There is nothing surprising to be found here, but I set out the passage for completeness:

**IFM36351 sums arising on or after 6 April 2015 and before 22 Oct 2015 A management fee arising to the individual [Oct 2020]**

... Prior to 22 October 2015 a management fee had to arise directly or indirectly to an individual...

**Has the management fee arisen to the individual?**

... Generally sums arise to an individual when they are allocated to that individual and that individual actually has access to the sum allocated.

*Example - allocation and access to management fees [Michelle]*

M is a fund manager. She has two sums allocated to her as a reward for

33 Author’s footnote: The correct amount of interest is £375, but nothing turns on that.

34 See 69.3.2 (“Disguised-fee condition (c): from investment scheme”).

management services provided to an investment scheme. She has immediate access to the first sum and on receipt she chooses to reinvest the fee into the fund. The second sum is allocated to her but, at this stage, payment is to be deferred for a period of time, after which it will then become accessible.

The first sum that M receives has been allocated to her and made accessible. The evidence therefore indicates that the sum has arisen to M. In considering if the sum has arisen to the individual it is irrelevant how the individual has chosen to apply the sum after it is made available (i.e. here it has been reinvested).

The second sum that has been allocated to M has been deferred; the evidence therefore indicates that this sum has not yet arisen to her. It will arise to her at the point it is not only allocated, but also made available to her.

The above example also applies where reinvestment of sums arising is mandatory or is otherwise automatically achieved by the agreements which govern the fund arrangements. The fee is being used to meet an obligation of the individual so sums applied in this way will be treated as arising to the individual at the point they are reinvested...

Any application of sums that would otherwise be paid to the investment manager does not stop them having arisen to that individual. The DIMF rules cannot be circumvented in this way.

**IFM36356 Fact dependent circumstances (sums arising on or after 6 April 2015 and before 22 October 2015) [Oct 2020]**

*... Transparent structures*

Where an intermediate structure is transparent for tax purposes, such as a partnership, this will not be effective in taking sums arising to the manager out of the DIMF rules.

Similarly, trading income of a partnership has been held to be “payable” to the partners.<sup>35</sup>

*Escrow arrangements*

The exact analysis will depend on the terms of the arrangement. Generally, where an amount is placed into escrow and the fund manager cannot access the funds (or property representing the funds) that sum will not arise to the manager. Instead the fee will arise when the sum is released from escrow and the fund manager gains access to it. For this treatment to apply the arrangement must be a genuine escrow or deferral arrangement implemented for commercial reasons in agreement with the

---

35 See 45.7.1 (Trading/partnership income).

external investors to the fund.

## 14.6 When are dividends recognised

### 14.6.1 *The statutory provisions*

I here set out the provisions relating to UK resident companies (the UK dividend regime). I consider the position of non-resident companies (the offshore dividend regime) separately, below.<sup>36</sup>

Section 384 ITTOIA provides:

Tax is charged under this Chapter on the amount or value of the dividends paid and other distributions made in the tax year.

So dividends are recognised if they are *paid*<sup>37</sup> and other distributions if they are *made*.

Section 1168(1) CTA 2010 provides an artificial payment date:

For the purposes of the Corporation Tax Acts dividends are to be treated as paid on the date when they become due and payable.

In the following discussion:

The “**due date**” is the date that dividends are due and payable.

The “**payment date**” is the date that dividends are paid

The “**relating-back rule**” is the rule in s.1168(1): dividends may be said to relate back to the due date, on which they are deemed to be paid.

The relating-back rule applies to UK dividends but not to interest: interest is not treated as arising when due and payable, the tax charge on interest arises at the time that it is paid.

The relating-back rule is expressed to apply for CT purposes, but not for IT!<sup>38</sup> But I think it is generally accepted that the rule applies for income taxation of UK dividends as well as CT. That might be justified by the fact

36 See 14.6.6 (Offshore dividend regime). For these two regimes, see 29.1 (Dividends and distributions).

37 Similarly, s.1000(1) CTA 2010 provides:

“In the Corporation Tax Acts “distribution”, in relation to any company, means anything falling within any of the following paragraphs.

Any dividend *paid* by the company, including a capital dividend...”

38 The reason might be that a similar rule already applied for IT back when dividends were treated as annual payments. See ss 4, 835 ICTA 1988; *IRC v Crawley* [1987] STC 147. However that IT rule ceased to apply to dividends on the introduction of schedule F in 1965.

that IT adopts the CT definition of “distribution”, so IT may be taken to adopt CT principles as to when a UK distribution is treated as paid.

The CT Manual discusses the relating-back rule:

**CTM15205: dividends, distributions and company law** [Sep 2020]  
 [The Manual refers to s.1000 and s.1168 CTA 2010 and continues:]  
 What is meant by due and payable is discussed below but for present purposes it is sufficient to know that a dividend may become due and payable on an earlier date than the one on which it is actually paid. CTA10/S1000 (1) A and CTA10/S1168 (1) are interpreted as working together to deem a dividend as paid on the date it becomes due and payable. On this view the object of the predecessor of CTA10/S1168 (1) was to ensure that Advance Corporation Tax under the system abolished from 1999 was linked with the due and payable date even if actual payment of the dividend was not made until later. It is not interpreted as deeming as paid dividends that would not otherwise be paid but rather as fixing the date of payment by reference to the due and payable date once it is paid. It follows that a waived dividend is not regarded as paid.

If that is right, the questions are:

- (1) When is a dividend due and payable
- (2) Has the dividend been paid:
  - (a) If so, tax arises on the due date, if earlier,<sup>39</sup> (not the payment date)
  - (b) If not there is no tax charge

Section 385(1) ITTOIA provides:

The person liable for any tax charged under this Chapter [Chapter 3 Part 4, UK dividends] is—

- (a) the person to whom the distribution
  - [i] is made or
  - [ii] is treated as made (see Part 6 of ICTA and sections 386(3), 389(3) and 396A),<sup>40</sup> or

---

<sup>39</sup> It could theoretically happen that a dividend is paid before its due date, in which case it would also be treated as paid on the due date, not the payment date; but in practice that would only happen by accident.

<sup>40</sup> The reference to Part 6 ICTA is out of date; the other references concern specialist topics not discussed in this work:

- s.386(3) OEICs
- s.389(3) Authorised unit trusts
- s.396A Arrangements offering choice of capital or income return

The standard rule is extended in the case of deemed income, because no-one actually

(b) the person receiving or entitled to the distribution.

#### 14.6.2 *When dividend due and payable*

“Due” and “payable” are synonyms; the expression is doublet which can be abbreviated to “due”.<sup>41</sup>

When a dividend is due is a matter of company law, summarised in *Potel v CIR*:<sup>42</sup>

##### *(1) Final dividend*

(a) [under standard form articles] directors who recommend a final dividend have power at the same time to stipulate the date on which such dividend shall be paid.

(b) If a final dividend is declared by a company without any stipulation as to the date for payment, the declaration of the dividend creates an immediate debt.

(c) If a final dividend is declared and is expressed as payable at a future date a shareholder has no right to enforce payment until the due date for payment arrives.

##### *(2) Interim dividend*

In the case of an interim dividend which a board has resolved to pay, it is open to the board at any time before payment to review its decision and resolve not to pay the dividend:

Further consideration is needed if a company has non-standard form articles, or if it is governed by non-UK law.

The CT Manual provides:

#### **CTM15205: dividends, distributions and company law [Sep 2020] When is a dividend due and payable?**

... a final dividend which has been properly declared and which does not specify a date for payment creates an immediately enforceable debt. If a final dividend is declared under the terms of a resolution that states that it is payable on a future date (a fairly common occurrence for quoted companies) then the debt is enforceable, and the dividend is due and payable, only on that later date. An interim dividend, on the other

---

receives/is entitled to it. This is only for the avoidance of doubt: if a distribution is deemed to be made, it is not difficult to conclude that there is a deemed receipt/entitlement. But it does not matter.

41 This is self-evident, but if authority is needed, see Garner, *Dictionary of Legal Usage* (3rd ed., 2011), entry under *Due*.

42 46 TC 658 at p.667.

hand, may be varied or rescinded at any time before payment and may therefore only be regarded as due and payable when it is actually paid...<sup>43</sup>

Where a final dividend is declared and the resolution fixes a later date for payment then the declaration creates a debt owing to the shareholder but the shareholder may take no steps to enforce payment until the due date of payment (or payments if by fixed instalments, see *Potel*). The due and payable date in such circumstances is the date fixed for payment and not the date of declaration.

In many small private companies the directors and shareholders are identical and dividends are often credited to the directors' or shareholders' account with the company. In the case of a final dividend the dividend is due and payable on the date of the resolution unless some future date for payment is specified.

### 14.6.3 *When is dividend paid*

The CT Manual provides:

**CTM15205: dividends, distributions and company law [Sep 2020]**

**When is a dividend paid?**

A dividend is not paid, and there is no distribution, unless and until

- [1] the shareholder receives money or
- [2] the distribution is otherwise unreservedly placed at the shareholder's disposal, for instance by being credited to a loan account on which the shareholder has power to draw. ...

This adopts the approach of the interest cases.<sup>44</sup>

In the case of an interim dividend (which, see above, does not create an enforceable debt and which can be varied or rescinded prior to payment), payment is only made when the money is placed unreservedly at the disposal of the directors and shareholders as part of their current accounts with the company. Payment is not made until such a right to draw on the dividend exists, expected to be when the appropriate entries are made in the company's books.

If such entries are not made until the annual audit, not uncommon in a small company, and this takes place after the end of the accounting period in which the directors resolved that an interim dividend be paid,

---

<sup>43</sup> The paragraph omitted here concerns cheques, considered below.

<sup>44</sup> *Parkside Leasing* does not use the word "unreservedly", but that does not add anything except emphasis.

then the due and payable date is in the later rather than the earlier accounting period.

#### 14.6.4 *Uncashed dividend cheque*

For some reason a cheque to pay a dividend is traditionally called a “dividend warrant”, but nothing turns on the terminology.

#### **CTM15205: dividends, distributions and company law [Sep 2020]** **... What is meant by payment of a dividend?**

A cheque is a written order addressed by a person (the drawer) to a banker to pay money, generally to some third party (the payee) and constitutes a promise to pay on common law principles (*Marreco v Richardson* [1908] 2 KB 584). The issuing of a cheque or dividend warrant (in effect a cheque drawn by the company on its bank in favour of the shareholder concerned) renders a dividend paid at that time. If the company’s Articles so authorise, the sending of a dividend warrant by post will constitute payment and the company’s liability will be discharged (see *Thairwall v Great Western Railway* [1910] 2 KB 509).

The CT Manual provides:

#### **CTM15205: dividends, distributions and company law [Sep 2020]** **Uncashed dividends**

Prior to 6 April 1999, under the ACT system on declaring a final dividend the company assumed two liabilities; a liability to the shareholder for the dividend and a liability to the Revenue for the ACT. There was nothing in the legislation which absolved the company from meeting its liability simply because the shareholder had received the dividend warrant [ie cheque] but had decided for some reason not to pay it into their own bank account, or to endorse it to another. The shareholder had effectively assigned and not waived income...<sup>45</sup>

Companies [after the relevant time limit] might write back uncashed dividends in their books. This does not mean that any ACT accounted for at the time of payment could be repaid.<sup>46</sup>

*Parkside Leasing* held that receipt of a cheque for interest is not receipt of the interest. HMRC say that receipt of a cheque for a dividend is payment

---

<sup>45</sup> The omitted passage briefly discusses time limits to recover dividends, but a reader researching that point should turn to company law textbooks.

<sup>46</sup> Author’s footnote: A claim for repayment of ACT would normally be out of time, by the time that the limitation period had passed; but the point is now academic.

of a dividend. They could both be right, but it would be surprising.<sup>47</sup> As cheques are now uncommon, the point may never be decided.

#### 14.6.5 *When is a distribution made?*

##### **CTM15205: dividends, distributions and company law** [Sep 2020]

Other distributions, such as premiums on redemption of redeemable shares, are ‘made’ rather than ‘paid’

It is considered that “paid” refers to dividends/distributions of money, and “made” refers to dividends/distributions other than in money (ie dividends/distributions *in specie*).

and the date of making the distribution needs to be determined on the facts.

“Needs to be determined on the facts” is not exactly guidance. It is considered that the principles which govern when a money dividend is paid or arises ought in principle to govern when an *in specie* distribution is made.

#### 14.6.6 *Offshore dividend regime*

A different set of provisions applies to non-resident companies (“the offshore dividend regime”). These take the standard form: IT is charged on dividends or distributions *arising*<sup>48</sup> and the person liable is the person *receiving or entitled* to the dividends. The relating-back rule does not apply. But apart from that, the same rules apply. As is generally the case, nothing much turns on the choice of income recognition vocabulary.

### 14.7 **Waiver of interest/dividends**

This section considers waiver of interest and of dividends.

Interest is not recognised as paid/received if waived before payment, even if waiver is after the interest is due.<sup>49</sup>

The same applies to dividends. The CT Manual provides:

---

47 In the days of ACT it would have been inconvenient if receipt of a cheque for a dividend was not payment of the dividend, because a company needed to know whether to pay the ACT; but a company does not now care whether or when its dividend is regarded as paid for tax purposes.

48 See 29.5.1 (Dividend: IT charge); 29.5.4 (Income-distribution: IT charge).

49 *Dewar v IRC* 19 TC 561; *Girvan v Orange Personal Communications Services* 70 TC 602.

**CTM15205: dividends, distributions and company law [Sep 2020]****Dividend waivers**

The waiver of a dividend is only possible before payment. An act that purports to be a waiver after payment is no more than an assignment or transfer of income...

As discussed above<sup>50</sup> ... Income Tax liability depends on whether a dividend is, or is not, actually paid.

A waiver can be effective for all future dividends, or for any future period of time, or for specific dividends.

Waiver of interest/dividends may raise many tax issues in addition to recognition of income:

<b>Topic</b>	<b>Concerns</b>	<b>See</b>
Loan or credit transaction	Interest	25.25
Settlement-arrangement	Usually, dividends	94.18 - 94.19
Benefit from trust	Interest	47.5.2
Transfer of value for IHT	Interest & dividends	s.15 IHTA

There is also the issue of what constitutes a valid waiver. This is not a question of tax law, but one of company/contract/property law. But for tax (other than IHT) that may not matter much, as if interest/dividends are purportedly waived, the sum is not likely to be paid, even if the waiver is invalid; and tax depends on payment.

**14.8 Receipt by nominee/trustee**

Nominees/trustees raise two sets of questions: the position of the nominee/trustee, and the position of the beneficial owner.

**14.8.1 Position of nominee/trustee**

SAIM provides:

**SAIM2400 Taxation Of Interest: The Tax Charge [Dec 2019]**

... *A person 'receiving' interest*

The 'receiving' leg of ITTOIA/S371 comes into play only where someone receives the interest as an agent or bare trustee for another person...

In *Aplin v White* an estate agent paid clients' money into a deposit account

---

<sup>50</sup> See 14.6 (When are dividends recognised).

and received interest. The interest belonged beneficially to the clients.<sup>51</sup> The agent was taxable as the person receiving the interest:<sup>52</sup>

... the expression of “receiving or entitled to” in the alternative, enabled an assessment under Schedule D to be made upon a person who either received the income or was entitled to it. If he received some income to which he was entitled and also some income to which he was not entitled, in the sense that he was a trustee or other person who received it in a fiduciary capacity for others, it mattered not: he could be assessed under Schedule D on it all.

SAIM provides:

**SAIM2400 Taxation Of Interest: The Tax Charge** [Dec 2019]

... In practice, it is only in exceptional circumstances that HMRC would argue that an agent or nominee is chargeable to tax on interest - see examples 1 and 3 at SAIM2410. In such a case, the person receives the income in a representative capacity and not because they are beneficially entitled to it. It is not their income as an individual and under ITA07/S11 tax is charged only at the basic (and not the higher) rate, and because the income is interest, the savings rate applies by virtue of ITA07/S12.

SAIM2410 formerly included this example, deleted 2019, concerning income from stolen/misappropriated property:

*Example 3 (Keith)*

K holds a power of attorney enabling him to manage the financial affairs of his elderly mother. He opens an offshore amount in her name, in which he invests part of her capital. Interest is paid gross on this account, but is not shown either on K’s tax return or his mother’s. HMRC open an enquiry into K’s business, and the HMRC officer discovers that money introduced into the business comes from his mother’s account. K admits that the money was not a loan, and he did not have his mother’s consent to use her funds in this way.

---

51 Although the interest belonged to the clients, the estate agent kept it for himself and did not pay it to his clients! In the circumstances the estate agent’s argument that he had not received the interest seems more than slightly unmeritorious. But the outcome would have been the same if the estate agent had paid the interest on to its beneficial owner.

(One hopes that estate agents nowadays are more closely regulated).

52 49 TC 93. The quoted words are from Counsel’s submission, set out at p.,97, which the judge accepted at p.98.

K is liable to tax on the interest earned on the account at the savings rate, but not at the higher rate. He is the person receiving the interest, even if he is not entitled to it. However, it is not part of K's income and higher rate tax only applies to K's income.

Perhaps HMRC have doubts about that analysis, but what else could it be? This is almost self-evident, and if there could be doubt, the correctness of the example is confirmed by *Asplin v White*.

The same applies to receipt by a trustee of a *Baker* interest in possession trust. The standard rule, that the person liable is the person receiving/entitled to the income is thus the entire basis of the income taxation of trustees. See 39.2.1 (Income mandated to life tenant).

#### 14.8.2 Position of beneficial owner

The Manual gives this straightforward example of nominees:

**SAIM2410 Interest: Taxation Of Interest: Person Chargeable: Examples** [Feb 2020]

*Example 1 (Harriet: Nominee investment account)*

H holds a portfolio of quoted company bonds through a nominee. Although the nominee's name appears on the companies' registers of bond-holders, H is the beneficial owner of the bonds and the person entitled to the interest arising from them. H is therefore chargeable to tax on the interest.

The question may arise as to who is the beneficial owner, or when they become beneficial owner:

**SAIM2410 Interest: Taxation Of Interest: Person Chargeable: Examples** [Feb 2020]

*Example 2 (Mehta and Ian: Court Order)*

M and her former husband I, receive the decree absolute being granted on 29 December 2016. On 5 December 2016, a Court Order is made ordering M to transfer certain assets to I. These include a building society account in I's sole name. On 31 December, interest of £2,400 is credited to the building society account. On 2 January 2017, M writes to the building society asking them to change the account from her name to I's, and the building society acts on the request a week later.

The HMRC analysis is as follows:

Beneficial ownership of the account is transferred when the Court Order is made on 5 December 2016, even though the name on the account is

not changed until later. (See the guidance at CG22423 on when assets are transferred on divorce or dissolution of a civil partnership - although this applies for capital gains tax purposes, HMRC would take a similar view where entitlement to interest is concerned.)

I is therefore the person who is entitled to, and taxable on, the interest that is paid on 31 December 2016. There is no question of apportioning the interest for her period of ownership of the account - see SAIM2420.

Transparent entities raises income attribution issues; see 86.2 (“Transparent” and “opaque”).

### 14.9 Income recognition: Breach of trust

If a trust makes a distribution in breach of trust, or a company makes an unlawful distribution, it acquires in principle<sup>53</sup> two rights against the recipient:

- (1) A claim *in personam* for an amount equal to the sum distributed; and
- (2) A claim *in rem* for the asset transferred, which the recipient holds on constructive trust for the beneficial owner.

In *Ridge Securities v IRC*, a company made an unlawful distribution. The unlawful distribution was not a payment (or at least not a payment within the meaning of the provision in point).<sup>54</sup> The purported payment was “a nullity” which had “no legal operation”.<sup>55</sup> In short, a payment in breach of trust is not recognised as income.<sup>56</sup>

CT Manual provides:

**CTM15205: dividends, distributions and company law [Sep 2020]  
Ultra vires and illegal dividends**

The question whether a dividend is unlawful or not is not a tax issue. It

53 Further thought may be needed if a foreign law applies.

54 Section 169 ITA 1952 (not found in the current law).

55 See 44 TC 373 at p.395-396. HMRC apply this analysis in the context of Gift Aid; see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12th ed, 2019/20), para 9.7.5 (Unlawful distribution: Tax).

Likewise in *Russell Baker v HMRC* [2013] UKFTT 394 (TC) a company’s purchase of its own shares in breach of company law was void, and the purported payment of the purchase price (held on constructive trust for the company) was not a distribution under the standard tax definition. Similarly, no chargeable gain would arise on a disposal (or purported disposal) in breach of trust because the transferee would hold the property on constructive trust for the transferor.

56 See too 47.5.11 (“Benefit” in breach of trust).

is rather the application of company law to the particular facts, and the tax consequences flow from those facts. This is a matter in the first case to be determined by the company, and particularly in appropriate cases the company secretary who has a legal duty to ensure that the company acts lawfully, and so it will normally be the company or its advisers who first raise the point. Officers should not in general seek out cases in which it might be argued that dividends that have been paid are unlawful. An exception to this will be where the dividend is paid as part of some avoidance scheme.

There is a significant difference in the treatment of improperly paid dividends dependent upon the position of the recipient.

The Manual refers to s.847 Companies Act 2006:

- (1) This section applies where a distribution, or part of one, made by a company to one of its members is made in contravention of this Part.
- (2) If at the time of the distribution the member knows or has reasonable grounds for believing that it is so made, he is liable—
  - (a) to repay it (or that part of it, as the case may be) to the company, or
  - (b) in the case of a distribution made otherwise than in cash, to pay the company a sum equal to the value of the distribution (or part) at that time.

The Manual continues:

No such liability exists in respect of a member who is an innocent recipient. The immunity of an innocent recipient shareholder is illustrated in *Re Denham & Co* [1883] 25 Ch D 752 and *Moxham v Grant* [1990] 1 QB 88. This principle relates mainly to the liability of a shareholder in a quoted company, who cannot be expected to have detailed knowledge of the day to day running of the company, but simply receives a reward for holding shares by way of dividend. When dealing with private companies controlled by directors who are shareholders, such a member ought to know the status of the dividend and it is expected that section 847 will apply in the majority of such cases.

Where a dividend is paid and it is unlawful in whole or in part and the recipient knew or had reasonable grounds to believe that it was unlawful then that shareholder holds the dividend (or part) as constructive trustee in accordance with the principles stated by Dillon L J in *Precision Dippings Ltd v Precision Dippings Marketing Ltd* [1986] 1 Ch at page 457. Such a dividend (or part) is void for the purposes of both the Income Tax charge on distributions under ITTOIA05/S383 and the long

abolished ACT charge under ICTA88/S14. The company has not made a distribution as a matter of company law, and so the dividend does not form part of the recipient's income for tax purposes. The company has not parted with title to the sum that it purported to distribute, which as a consequence remains part of its assets under a constructive trust (see also *Ridge Securities Ltd v CIR* (1964) 44 TC 373).

Where the company concerned is a close company, it is regarded as having made a loan to the shareholder by virtue of CTA10/S455(1), thereby triggering a charge under CTA10/S455(2). Relief would however be available under CTA10/S458 where the dividend is repaid to the company. That repayment might be by cash or cheque, or by a suitable entry in the loan account.

A shareholder who had no knowledge of the illegality of the dividend and no reasonable grounds on which so to believe is not a constructive trustee and does not have to repay the sum, which will constitute a distribution under CTA10/S1000 (1) B. If such a shareholder then repaid the company (although not liable to do so) this is simply a voluntary assignment or transfer of the shareholder's own income so that it does not affect the tax position. However, in practice it is desirable to consider all such cases on their particular facts and merits.

## 14.10 Income recognition in DTAs

Similar issues arise under the OECD Model, but the vocabulary is different.

### 14.10.1 "Deriving" income

OECD Model commonly refers to income "**derived by**" a person:<sup>57</sup>

#### **Art Outline of wording**

- 1 Income derived by or through a transparent entity
- 6 Income derived by a resident of a State from immovable property
- 10 A company derives profits or income from the other Contracting State
- 13 Gains derived by a resident from the alienation of immovable property
- 15 Remuneration derived by a resident in respect of an employment
- 16 Directors' fees derived by a resident in his capacity as a member of the board of directors

The usual UK tax terminology would be that the income (or gains) arise (or accrue) to the person from the property, or from a source in the other

---

<sup>57</sup> This list is not comprehensive but includes the most common examples.

state, or the person receives/is entitled to it; but the meaning is the same.

The verb can be used transitively, as in “*a company derives profits or income*”<sup>58</sup>, or “*persons deriving pensions*”<sup>59</sup>; where British English would say “receives/receiving”.

This is not a neologism, nor is it restricted to OECD English. For instance, s. 6(1) [Australia] Income Tax Assessment Act 1936 provides:

taxpayer means a person deriving income or deriving profits or gains of a capital nature.<sup>60</sup>

In British legal English, “derive” is commonly used in the context of property deriving from other property, ie property representing property.<sup>61</sup> It is not used as a synonym of income arising from property. The transitive usage seems particularly unidiomatic. But no practical difficulty should arise.

#### 14.10.2 “Paid” and “payment”

In other places, the OECD Model uses other vocabulary, such as income of/arising to/paid:

##### **Art Wording (in outline)**

###### *Income of*

- 1 Income of a resident of a State
- 7 Profits of an enterprise of a State
- 21 Items of income of a resident of a State

###### *Paid*

- 10 Dividends paid by a company to a resident of the other Contracting State
- 15 Remuneration paid by an employer
- 18 Pensions paid to a resident of a State
- 19 Remuneration paid by a State

###### *Arising*

- 11 Interest arising in one State and paid to a resident of the other State
- 12 Royalties arising in one State, beneficially owned by a resident of the other State

###### *Beneficial owner/owned*

58 Article 10 OECD.

59 From OECD Model Commentary on art 15.

60 Likewise s.38(2) [New Zealand] Income Tax Act 1976, which provides for the payment of income tax “by every person on all income derived by him during the year”.

61 See App.2.11.2 (Derive from/represent compared).

10,11,12 Beneficial owner<sup>62</sup>

–<sup>63</sup> Profits, income and gains owned by a resident of a State

The OECD Commentary provides:

The term “paid” has a very wide meaning, since the concept of payment means the fulfilment of the obligation to put funds at the disposal of the creditor in the manner required by contract or by custom.<sup>64</sup>

This is the same as the English law approach to the word.<sup>65</sup>

#### 14.10.3 DTA recognition vocab compared

The OECD Model expressions “derived” or “paid to” do not bring with them any specific requirement, or technical meaning. They are just more items in the vocabulary cluster used to describe the recognition and attribution of income, equivalent to UK domestic law received/ entitled to/arising, etc.

For instance, art 11(1) has *Gains derived from* and art 11(2) has *Gains from ...* Clearly the concept is the same. Thus the OECD Model makes no attempt to be consistent in its income recognition vocabulary, and it does not use the words in any technical sense.

#### 14.11 Income/gains/profits

In modern terminology we refer separately to:

<b>Term</b>	<b>Subject to</b>
Income	Income Tax/CT charge on income
Gains	CGT/CT charge on gains; sometimes IT (eg, offshore income gains, DDS gains, chargeable-event gains)
Profits	Corporation Tax

That is, “gains” is nowadays understood to mean capital gains.

62 See 104.11 (DTA beneficial owner rule).

63 This form is not in the OECD Model but it is standard in UK Foreign Tax Credit articles; see 106.8.1 (Treaty source rules). In this context “owned” is just another word in the income recognition vocabulary cluster.

In the OECD Model, “owned” is used for capital but not for income, eg (“income derived or capital owned by a resident of a State”); except in the expression “beneficial owner”, which has acquired a technical meaning of its own.

64 Commentary on art 10 (dividends) para 7; on art 11 (interest) para 5; on art 12 (royalties) para 8.3.

65 See 14.2.3 (Payment: WHT, PAYE).

“*Profits or gains*” is an archaic phrase formerly used to mean “income”.<sup>66</sup> The Tax Law Rewrite took it out of the rewrite legislation, and it now survives only in dusty corners which the Tax Law Rewrite did not reach; and of course the old wording is preserved in the aspic of pre-rewrite case law.

---

66 See eg s.1 ICTA 1988, which is discussed in another context at 15.6 (No source/deemed source).

## CHAPTER FIFTEEN

# SOURCE/RFI/TERRITORIAL PRINCIPLES

15.1

### 15.1 Source/RFI: Introduction

The topics of this chapter are:

- (1) Two concepts central to the territorial limit of IT:
  - (a) Source of income
  - (b) Relevant foreign income
- (2) General territorial principles of UK taxation

### 15.2 Source: IT territorial limit

All UK taxes, and indeed all foreign taxes, have some territorial limits (“territoriality”).

#### 15.2.1 *UK IT territorial limit*

There is no single section which sets out a territorial limit for IT (or indeed for any other tax). Indeed, there is no single rule for territorial limits, though the rules share some common themes.

Section 368/577 ITTOIA provide:

- (1) Income arising to a UK resident is chargeable to tax under this Part [Part 4, Savings & Investment Income/Part 5, Miscellaneous Income] whether or not it is from a source in the UK.
- (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK.

For categories of income within those Parts, IT is not charged on foreign income of a non-resident.

There are similar rules, though not in quite the same terms, for Part 2

ITTOIA (trading income), Part 3 ITTOIA (property income), and their CT equivalents.<sup>1</sup>

In *Colquhoun v Brooks*:

- The Income Tax Acts ... themselves impose a territorial limit,  
 [1] either that from which the taxable income is derived must be situate  
 in the UK  
 [2] or the person whose income is to be taxed must be resident there.<sup>2</sup>

This is a statement of the territorial limits of IT in 1889.<sup>3</sup> It was reaffirmed in 1936 when the Income Tax Codification Committee said:<sup>4</sup>

- ... a broad distinction between  
 [1] UK income (which, generally speaking, renders the owner, whoever  
 he may be, chargeable with tax) and  
 [2] foreign income (which renders the owners chargeable only if he is  
 a person residing in the UK).

Although in the existing [Income Tax] Acts this is expressly stated only in relation to Schedule D, the universality of the principle has been recognised by the Courts.<sup>5</sup> It seems to us to be a fundamental principle of the [Income] tax...

In 1982 it was still “broadly correct”.<sup>6</sup>

One can say the same today; but with more emphasis on the qualification “broadly”; or a wider reading of the imprecise words at [1] (that there must be some kind of source in the UK).<sup>7</sup> For the general trend of recent

1 See 20.4 (IT territorial limit: Trading); 20.5 (CT territorial limit: Trading); 23.3 (Territorial limits: Property income).

2 2 TC 490 at p.498.

3 The passage can also be seen as stating, or at least illustrating, a more general principle of territoriality in taxation, see 15.12 (General territorial principle).

4 (1936) Cmd 5131 para [44].

5 The Committee refer to: *Whitney v IRC* 10 TC at p.112; *Marchioness of Ormonde v Brown* 17 TC 333 at p.344. Similarly, see *Perry v Aston* 19 TC 255 at p.280: “... the necessary limitation which is inherent in all our Income Tax legislation, namely, that what is taxed under or by virtue of this provision can only be either (1) income which is here, or (2) income of a person resident here.” (This passage is in a dissenting judgment, but the majority did not disagree on this point).

6 *Clark v Oceanic Contractors* 56 TC 183 at p.227.

7 See for instance 15.6 (No source/deemed source). *Colquhoun* is also authority for a general principle of construction relating to territorial limits in tax statutes: See App.

years has been a gradual extension of the territorial scope of UK taxation.<sup>8</sup>

### 15.2.2 Foreign IT territorial limits

Most other countries adopt a similar approach, and it might be regarded as a general principle of international income tax law (if such a thing exists) that a state will not tax non-residents on foreign income.<sup>9</sup>

The UN says:

International income taxation revolves around two main concepts—the concept of source and the concept of residence. Under their domestic tax law, countries will assert the right to tax income arising (or sourced) in their jurisdiction, and most countries will seek to tax residents on their income wherever arising.<sup>10</sup>

A tax on income from sources in and outside a country is best described as tax on “**worldwide income**”. In EU terminology the term used is limited/unlimited tax liability.<sup>11</sup>

Originally, many, perhaps most, states taxed their residents only on income from sources within that state. The UK was not far from that position until 1914, when all foreign income was taxed on the remittance basis.<sup>12</sup> The general trend has been to extend income tax on residents from income from sources within the residence state to include worldwide income. Even now, some states continue to tax their residents on income only from sources within the state. The UK does not tax non-residents on gains from UK situate property, other than land or land-rich assets, and it does not always tax non-residents on UK source income.

---

15.12 (Territorial principle).

8 Examples are (1) Diverted Profits Tax; (2) Offshore Receipts in respect of Intangible Property; see 31.17 (Offshore receipts from IP); (3) Nonresidents holding UK land/land-rich assets.

9 America is an exception, imposing worldwide taxation on its citizens even if non-resident.

10 Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries (2019) para 15

<https://www.un.org/development/desa/financing/sites/www.un.org.development.de.sa.financing/files/2020-03/manual-bilateral-tax-treaties-update-2019.pdf>

11 See 102.16.3 (Counteract non-residence tax advantage).

12 See 16.2 (History of remittance basis).

### 15.2.3 *Source in UK tax law*

So, for Parts 4 and 5 ITTOIA, and for some other UK tax purposes:

- (1) Income has a source.
- (2) Every source has a geographical location.

There is no statutory definition of “source”. The word has been paraphrased as “origin”<sup>13</sup> and “chief” or “originating” cause;<sup>14</sup> but these paraphrases are of no practical assistance. It has also been explained as either property or an activity (such as a trade, or services falling short of a trade but within the scope of misc sweep-up income); and it is certainly difficult to imagine a source which was not property or an activity.<sup>15</sup> I am not sure that that takes us much further.

The location of a source matters for various purposes, in particular:

- (1) The definition of RFI<sup>16</sup>
- (2) Withholding tax

### 15.2.4 *Source in DTAs*

The location of a source is also important for double tax treaties. DTAs sometimes lay down their own rules for locating a source (for treaty purposes) so it may be necessary to distinguish between UK domestic law source location and treaty-source location.<sup>17</sup>

### 15.2.5 *Source: terminology*

A note on terminology: UK tax statutes formerly used a variety of expressions<sup>18</sup> but now the standard phrases are:

- (1) “income arising from a source in/outside the UK”; and

---

<sup>13</sup> *Hart v Sangster* 37 TC 231 at p.235.

<sup>14</sup> *IRC v Philips’ Gloeilampenfabrieken* [1955] NZLR 868.

<https://www.kessler.co.uk/wp-content/uploads/2012/04/CIRvPhilips.pdf>

I discuss *Philips* in detail in the 14th edition of this work para 18.9.1 (*IRC v Philips*).

<sup>15</sup> *Spritebeam v HMRC* [2015] UKUT 75 (TCC) at [72]: “we cannot think of a source that could not be categorised as either property or activity.

<sup>16</sup> See 15.10.2 (“Relevant foreign income”).

<sup>17</sup> See 106.8.1 (Treaty source rules).

<sup>18</sup> e.g. in section 65 ICTA 1988 (repealed) the test was whether a possession or security was “out of the UK”, but that came to be understood to mean “having a source out of the UK”; see 25.10 (Rejection of situs approach).

## (2) “income arising in/outside the UK”

These expressions are synonymous.<sup>19</sup>

Similarly in the OECD Model, the phrases used are:

Expression	Article	Topic
Income from sources in a state	4	Residence
Payment arising from sources outside a State	20	Students
Income arising in a State	10/11/12	Dividends/interest/royalties

Again, the expressions *income arising from sources in/income arising in* are synonymous.

### 15.3 Approach to locating source

Different considerations naturally apply to different categories of income. This is discussed in the chapter on the specific income category concerned:

Type of income	See para
Trading	20.4.3
Interest	25.7
Royalties/intellectual property	31.4
Misc sweep-up income	32.15
Income from discretionary trust	38.3.1

This chapter makes general points about source which apply to more than one category of income.

Location is generally governed by case law, though occasionally statute chips in.

The IT rules for the location of an income source are different from the situs of asset rules for IHT/private international law.<sup>20</sup> It would aid clarity of thinking not to use the same word in both contexts, so in this book:

---

<sup>19</sup> An argument that there was a distinction between the source of income and the place where the income arose was rejected in *Bayfine v HMRC* [2011] STC 717 at [63]. This is also the view in Hong Kong: see 15.9 (Non-UK cases on source). The suggestion to the contrary in *Perrin v IRC* [2014] UKFTT 223 (TC) at [24] is *per incuriam*.

I have wondered if there might be a difference in that “income arising in a state” is more apt when referring to income which does not have a source; but I doubt if there is such a thing as income without a source: See 11.6 (No source/deemed source).

<sup>20</sup> See 97.1 (Concepts of situs).

- (1) I use the term “**location**” of a source of income (abbreviated to location of income)
- (2) I keep *situs* for IHT/international law concepts and CGT.

But the usage of “situs” in an income tax context is too well established to alter easily, and no difficulty ought to arise as long as one bears in mind that IHT/international law situs of assets, and IT location of source of income, may be different (though the rules often overlap).

It is considered that a source of income should be regarded as located in only one jurisdiction. This rule is necessary if source rules in tax law are to achieve the object of avoiding double taxation.

#### 15.4 Do sources have a location?

The concept of the location of a source of income is sometimes said to be misconceived:

Income itself does not have a geographical location.<sup>21</sup>

This is not an accurate statement of tax law. Every source of income has a location. In most cases it is easy to identify the location, as the same passage goes on to state:

By long standing convention,<sup>22</sup> however, income is assigned a geographical location by reference to the location of the assets and activities that are used to generate the income. When all of those assets and activities are located in one State, that State may be considered to be the unambiguous source of the income.

The problem is how to identify the location in harder cases. The passage gives the example of trading income, the hardest case to locate a source:

... When some of the assets or activities generating income are located in more than one State, the source of the income is less clear. For example, business profits derived from the manufacture of goods in State A and their sale in State B have a significant relationship to State A and

21 United Nations, Manual for the Negotiation of Bilateral Tax Treaties between Developed and Developing Countries (2016) Para 2.

<https://www.un.org/esa/ffd/wp-content/uploads/2014/09/UNPAN008579.pdf>

22 Contrast the (misconceived) view that situs of intangible property is fictional: see 97.1 (Concepts of situs).

to State B. In these circumstances, some rules for determining source are needed.

An American scholar makes the same point:

... the source of income is difficult to define. In fact, many public finance economists would claim that the concept lacks meaning in the majority of cases... the problem has been partially solved by arbitrary rules. ... Economists argue that defining the true economic source is almost impossible, because income has contributions from many countries.<sup>23</sup>

In cases where 2 or more states are involved, it is correct that there may be no “true” location of source of income in *economic* terms. However this is simply one of many cases where economists and tax lawyers reach different conclusions for the purposes of their different disciplines. Tax law must somehow choose connecting factor(s) to link a source to a state. There are many possible connecting factors, and the selection of the determining factor(s) must to some extent be arbitrary. It may matter so much what the rule is, as long as there is some rule and its application is clear.

## 15.5 Formal/substantive source rules

An American scholar draws an interesting distinction for rules which determine the location of a source of income: formal and substantive. This is helpful in identifying the policy issues which lie behind location of source rules:

Source rules fall into two basic categories. The first category comprises formal rules. These rules do not attempt to trace the economic source of the income, but rather seek to achieve administrative ease and certainty. ... Consider the following example demonstrating the formal rule: Suppose a foreign corporation exists and all of its income is earned in the United States - it has no other business activity.<sup>24</sup> From an economic perspective, it is clear that a dividend paid by this foreign corporation to its shareholders is US-source. But it is foreign-source under the dividend rule, because the payor is a foreign corporation. Notice also

---

23 Avi-Yonah, *International Tax as International Law* (2007), p.27, 38.

24 Author’s footnote: A foreign corporation is non-resident for US tax purposes: there is no central management and control test for corporate residence.

that this means that the source of dividend income is under the control of the taxpayer ... The main reason behind this rule is that it is administratively hard to tax a dividend from a foreign corporation to foreign shareholders, but easy to tax a dividend from a US corporation. The rule for interest is also a formal rule, and it is the same as the rule for dividends ... This is fortunate because of the difficulty of distinguishing debt from equity in many cases; at least the source rule is the same. ...

The other kind of source rule is the substantive rule, which attempts to trace the economic source of the income. The first one of these is the rule for royalties ... No universal consensus exists about what the source rule for royalties should be. Many countries have a source rule for royalties that focuses on the residence country; the place of ownership of the underlying copyright or the place of production (research and development). The American rule is a place of use rule, meaning that it focuses on where the copyright or patent is utilised. ...

There are other categories in which a substantive rule applies. In services, for example, the place of delivery of service controls. ...

The basic difference between formal rules and substantive rules is that the formal rules require one single determination (residence of the payor, residence of the seller, or passage of title), whereas substantive rules attempt to trace the economics of the transaction. Formal rules are generally relatively easy to administer, from both the IRS perspective and the taxpayer's perspective, whereas substantive rules may involve much more difficult determinations. For example, in the case of patents and copyrights, the rule requires determination of the location of use, which may be difficult to determine if it is used in many countries: it may be difficult to break up the income into where the service was actually delivered. Not all substantive rules are difficult to administer: real estate is relatively easy because the location of real estate governs residency, and location is simply to determine in real estate. Most of the important applications of substantive rules, however, are difficult to administer and are more difficult for the taxpayer to avoid because the formal rules are much more under the taxpayer's control.<sup>25</sup>

## 15.6 No source/deemed source

It was once the case that income tax was charged only on income from sources specified in what were called the "schedules"; so in the absence

---

25 Avi-Yonah, *International Tax as International Law* (2007), p.42.

of a source there could be no income; or if it was said to be income, there would be no income tax on it:

Income tax is traditionally a source-based annual tax, liability depending upon the existence of a source of income falling under one of the Schedules during the year of assessment...<sup>26</sup>

There are two distinct rules here:

- (1) Income tax is a source-based tax: it only applies to income from a source specified in one of the schedules.
- (2) Income tax is an annual tax: it only applies if that source exists in the year of assessment.

The first rule was self-evident.<sup>27</sup> The second rule was settled in *Brown v National Provident Institution*.<sup>28</sup> But neither rule applies today:

If the income tax had retained that ancient simplicity, it would be true to say that income could not be within the charge to tax unless there was a source within the charge ...

It is, however, no longer true to say that liability to income tax depends upon the existence during the year of assessment of a source within the charge. There are cases (such as post-cessation receipts) when liability depends upon the existence of income defined by reference to a source which does not exist within the year of assessment. Or liability may depend upon an event, such as a balancing charge on the sale of an asset which has attracted a capital allowance, or the receipt of a capital sum from a particular kind of transaction, which is deemed to be taxable income received in that year of assessment or sometimes spread over

---

26 *Walker v Centaur Clothes Group* 72 TC 379 at p.416 citing *Brown v National Provident Institution* 8 TC 57.

27 See s.1 ICTA 1970 (derived from s.2 ITA 1853): Income tax “shall be charged for that year in respect of all property, profits or gains respectively described or comprised in the Schedules ...”

28 The reader may think that the opposite view was the better reading: ie, although there had to be a source within the schedules, there was no further requirement that the source had to exist in the year of assessment. If so, the reader is in good company: that was the view of Rowlatt J and Lord Cave. The reader may therefore doubt whether *Brown v NPI* would have been decided in the same way today. But it does not matter.

several years of assessment.<sup>29</sup>

EN ITTOIA Vol II para 1639 notes that:

Such chargeable amounts [capital receipts subject to income tax] could not therefore be said to derive from a “source” in the traditional sense.

Some provisions (such as s.830 ITTOIA, the definition of RFI) refer to income which arises from a source outside the UK. Other provisions (such as s.368/577, territorial limitation for Parts 4/5 ITTOIA) refer to income from a source in the UK. Income with no source raises an obvious difficulty here.

One solution to this issue is to have a deemed source, and to deem the source to be a UK or a foreign source. There are (at least) 2 provisions which adopt this technique, for the purposes of s.830 ITTOIA (definition of RFI). EN ITTOIA explains:

1640. Although the definition [of RFI] uses “income which arises from a source” in respect of all income within the definition, specific rules have been added, in view of [the comment in *Centaur Clothes Group* set out above], in

[a] sections 428(3) ITTOIA (deeply discounted securities)<sup>30</sup> and [b] 658(2) ITTOIA (... income from estates in administration),<sup>31</sup> to attribute a foreign source to the income in question to ensure that there is no doubt that the definition [of RFI] applies to these provisions.

---

<sup>29</sup> *Walker v Centaur Clothes Group* 72 TC 379 at p.416. Contrast s.1 ICTA 1970 (derived from s.2 ITA 1853) and s.1 ICTA 1988:

**Section 1 ICTA 1970**

Where any Act enacts that income tax shall be charged for any year at any rates, then, subject to the provisions of the Income Tax Acts, the tax at those rates shall be charged for that year in respect of all property, profits or gains respectively described or comprised in the Schedules contained in the following sections of this Act.

**Section 1(1) ICTA 1988**

Income tax shall be charged in accordance with the provisions of the Income Tax Acts in respect of all property, profits or gains respectively described or comprised in the Schedules, A, B, C, D, E and F, set out in sections 15 to 20 or which in accordance with the Income Tax Acts are to be brought into charge to tax under any of those Schedules or otherwise.

<sup>30</sup> See 28.11 (DDS remittance basis).

<sup>31</sup> See 85.16 (Estate income remittance basis).

These rules deem the income concerned to have a source out of the UK, so this part of the definition of RFT is met. An alternative solution would simply be to deem the income to be RFI, ie to bypass the definition. There are many routes to the same destination.

Two deemed source rules apply for s.368/577 (territorial limitation for Parts 4/5 ITTOIA). Section 368(3)/s.577(3) ITTOIA provide:

References in this section to income which is from a source in the UK include, in the case of any income which does not have a source, references to income which has a comparable connection to the UK.

EN ITTOIA Vol II explains:

34. However, while the term “source” may apply to the majority of receipts chargeable to income tax it does not apply to all such receipts. “Source” is something from which income arises and not all sums charged to income tax are by nature income. “Source” may not be the appropriate term where the amount charged to tax represents a profit on a transaction which is not by nature income and would not be charged to income tax without a specific charge. Indeed, the chargeable profit may arise on the disposal of an income source.....

35. It has therefore been necessary to consider how to express the territorial scope in cases where there is no natural source of income.

36. [Section 368(3) ITTOIA] is broadly worded to catch such income. Where the connection such income has to the UK is comparable to the connection that income with a source in the UK has to the UK, then it is treated for the purposes of this section as income from a source in the UK.

It may be that this concern was unjustified, but these statutory provision do no harm. They only apply for s.368/577 (and so for Parts 4/5 ITTOIA); they do not apply elsewhere, eg they do not apply for the definition of RFI.

## 15.7 Income outside charge to tax

It was formerly the case that if income did not fall within the schedules, it was not subject to income tax; and it continues to be the case that if income does not fall within one of the current charges to tax, it is not taxed. Most obviously, foreign source income of a non-resident is not taxable, not because of an exemption as such, but for lack of a charging provision.

But for UK residents, the charges to tax are cast so wide that income falling outside them (other than under a specific exemption) is difficult to find.

## 15.8 Source of gains

UK domestic tax legislation does not use the word source in connection with gains of a capital nature, whether chargeable to CGT or IT. For instance:

- Foreign tax credit relief refers to gains *accruing in a territory*<sup>32</sup>
- CGT remittance basis applies to gains on a disposal of assets *situated outside* the UK

Although the word “source” is not used, it would not be an inappropriate term if it were used. The terminology itself does not matter.

In international tax law, capital gains are often said to have a source, which is taken to be the state where the asset is situate.

## 15.9 Non-UK cases on source

There are many Commonwealth cases, which ought to be helpful. It is of course necessary to consider whether the relevant Commonwealth legislation is differently worded from the relevant UK provision. This arises particularly for cases on the source of trading income.

A Southern Rhodesia statute imposed a charge on the amount:

received by ... any person ... *from any source within the Territory* ...

In *Rhodesia Metals v CT*, the Privy Council said of this provision:

... numerous cases founded on the various Income Tax Acts, English, Australian, New Zealand and South African, were cited ...

Their Lordships have no criticisms to make of any of those decisions, but they desire to point out that

[1] decisions on the words of one statute are seldom of value in deciding on different words in another statute, and that

[2] different business operations may give rise to different taxing results.

Point [2] is obviously correct but we are here concerned with point [1].

---

32 See 106.8 (Foreign source rule).

The Privy Council continue:

- [3] If the charging words of the English statute are looked at, “annual profits or gains arising to any person ... (ii.) residing in the UK from any trade wherever carried on, and (iii.) whether resident in the UK from any trade exercised within the UK”,<sup>33</sup> they are obviously different from the Southern Rhodesian charging words, total amount [other than capital] received by ... any person ... from any source within the Territory.
- [4] It is desirable, also, to point out that, at any rate for different taxing systems, income can quite plainly be derived from more than one source even where the source is business. For instance, in the case of the business of a railway company whose railway is situate abroad, as in *San Paulo (Brazilian) Railway v Carter*,<sup>34</sup> while the English company may be assessed in England on the whole of its profits because it carries on part of its business there, yet it could not be doubted that so much of the profits of the business as were in fact earned from running the railway in Brazil were derived from exercising a business in Brazil; and still less could it be doubted that the sums received by the company in Brazil were received from a source in Brazil.<sup>35</sup>

Lord Atkin correctly states at [4] that the Commonwealth legalisation and case law has no relevance to the (artificially wide) test of location of source of trading income for UK residents.<sup>36</sup> It is considered that the Commonwealth legislation does apply the same test as s.6(2) ITTOIA (trading income of non-resident). For this purpose the Commonwealth cases *are* persuasive authorities in the UK. For the object of the rules for non-residents is to avoid double taxation and ensure that income is taxed in one and only one jurisdiction. That object can only be achieved if there is an international “common law” on the subject. In practice this is the view taken. For instance, the former International Tax Handbook referred

---

33 I have corrected a minor misprint in the law report. This is only a rough summary of the statutory wording, later s.18 ICTA, now rewritten in ITTOIA.

34 3 TC 407.

35 [1940] AC 774 at p.788–9.

36 See 20.4 (UK resident trader: IT).

to *Kirk*.<sup>37</sup>

The same applies to Hong Kong, where the charge is on profits “arising in or derived from Hong Kong”.<sup>38</sup> *Smidth* is the basis of the Hong Kong case law.<sup>39</sup> The Hong Kong Revenue have issued useful guidance the “**Hong Kong guidance note**”. It is suggested that its status in an English court should be the same as that of a textbook. The Hong Kong guidance note provides:

4. Though the word “source” is not used in section 14, it has always been accepted by the courts that the words “arising in or derived from” raised the concept of source. Cases from other common law jurisdictions with legislation using the specific word “source” are therefore relevant and have been used in assisting the interpretation of the words used in section 14. In *IRC v Philips Gloeilampenfabrieken* [1955] NZLR 868, Barrowclough CJ at 874 said that the concept of derivation seems necessarily to imply the concept of a source.<sup>40</sup>

In an Indian statute, the charge was on profits “accruing or arising in British India”. This was held to be substantially the same as in Hong Kong.

This authority can only be distinguished from the instant case if the words in s 14 'derived from' are given a much wider meaning than the words 'arising in'. Whilst it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases, their Lordships do not accept that it can possibly be sufficient to bear the weight sought to be put on it in distinguishing *Mehta's* case.<sup>41</sup>

## 15.10 Relevant foreign income

### 15.10.1 *Why RFI matters*

The expression RFI is used so often in tax that it is not possible to provide a complete list. In particular:

---

37 See ITH826.

38 Section 14 Hong Kong Inland Revenue Ordinance.

39 *IRC v HK-TVB* [1992] STC 723 at p.728.

40 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No. 21 (Revised) Locality of Profits December 2012,  
[http://www.ird.gov.hk/eng/pdf/e\\_dipn21.pdf](http://www.ird.gov.hk/eng/pdf/e_dipn21.pdf)

41 *IRC v Hang Seng Bank* [1990] STC 733 at p.739.

- (1) RFI is a requirement for:
  - (a) the remittance basis
  - (b) protected-trust reliefs
- (2) There are special deductions for RFI collection costs<sup>42</sup>
- (3) There is a relief for RFI of consular officials<sup>43</sup>

### 15.10.2 “Relevant foreign income”

Section 830(1) ITTOIA provides the definition of “RFI”:

In this Act<sup>44</sup> “relevant foreign income” means income which

- (a) arises from a source outside the UK, and
- (b) is chargeable under any of the provisions specified in subs.(2) (or would be so chargeable if s.832 [remittance basis] did not apply to it).

Section 830(2) ITTOIA sets out 15 categories of RFI:<sup>45</sup>

Chapter/s.	Part	Topic
Chap 2, 17	2	Trading income, Trading adjustment income
Chap 3	3	Property income
Chap 2	4	Interest
Chap 4	4	Dividend from non-UK resident company
Chap 7	4	Purchased life annuity
Chap 8	4	Deeply discounted securities
Chap 13	4	Sale of foreign dividend coupon
s.579		Royalties
Chap 3	5	Film/sound recording
Chap 4	5	Telecommunication rights

42 See 15.11 (RFI collection costs).

43 Section 771 ITTOIA.

44 The s.830 ITTOIA definition of RFI only applies for ITTOIA, but s.989 ITA extends it to the Income Tax Acts:

“The following definitions apply for the purposes of the Income Tax Acts ... “relevant foreign income”

[a] has the meaning given by section 830(1) to (3) of ITTOIA 2005

[b] but also includes, for any purpose mentioned in any provision listed in section 830(4) of that Act, income treated as relevant foreign income for that purpose by that provision”.

45 For the sake of clarity, I set this out in table format, and substitute my terminology for the statutory section headings.

s.649		Estate income
Chap 7	5	Annual Payments not otherwise charged
Chap 8	5	Misc sweep-up income

Section 830(3) ITTOIA makes two rather specialist exceptions:

But “relevant foreign income” does not include income chargeable as a result of—

- (a) section 844 (unremittable income: income charged on withdrawal of relief after source ceases),<sup>46</sup> or
- (b) section 517C or 517E of ITA 2007 (profits on certain disposals concerned with land in the UK treated as trading profits).<sup>47</sup>

Section 830(4) ITTOIA signposts 10 provisions which direct that income is treated as RFI:<sup>48</sup>

For the treatment of other income as relevant foreign income, see—

Section	Topic	See para
s.857(3) ITTOIA	Partnership income	82.18
reg 19 OFTR	Offshore income gains	64.7
para 6(3) sch 3	Commonwealth Development Corporation Act 1999 <sup>49</sup>	
s.575(3) ITEPA	Foreign pension	37.5.2
s.613(4) ITEPA	Foreign annuity	
s.631(3) ITEPA	Pre-1973 pension under Overseas Pensions Act 1973	
s.635(4) ITEPA	Foreign voluntary annual payment	
s.679(2) ITEPA	Taxable social security income: foreign benefit	
s.670A ITA	Accrued income profit	27.9
ss.726/730/735 ITA	Transfer of assets abroad: s.720/s.731 income	47.39

In the following discussion:

“**Actual RFI**” is RFI within the definition in s.830(1)(2)

“**Deemed RFI**” is income which is treated as RFI by virtue of some other statutory provision

Section 830(4) ITTOIA is just an index of deemed RFI, intended to help

46 See 92.8 (Clawback of unremittable assets relief).

47 See 21.5 (Transactions in land: Introduction).

48 For clarity, I again set this out in table format, and substitute my terminology for the statutory section headings.

49 The Commonwealth Development Corporation, now called CDC Group Plc, is deemed non-resident and its distributions are treated as RFI.

the reader to navigate the legislation, in accordance with the principles of plain English drafting. In fact it is not quite a comprehensive index, as there are further provisions which deem income to be RFI and which are omitted from the s.830(4) list,<sup>50</sup> but it does not matter.

As far as I can see, it makes no practical difference whether income is actual RFI or deemed RFI. But there is a theoretical difference that:

- (1) For actual RFI, it is a requirement under s.830(1)(2) that the income arises from a source outside the UK (and so that the income has a source).
- (2) Deemed RFI includes categories of income which have no source. (This may be because the income is deemed income which does not exist and has no source; or because the income is a capital gain, treated as income, which is not regarded as having a source).

There are about 25 categories of RFI altogether. The categories includes almost all foreign income (other than employment income); in particular, they include trading income, property income, interest and dividends.

“Relevant foreign income” is a slightly narrower concept than “foreign income” because some types of foreign income are not “relevant foreign income.” The most important category is chargeable-event gains.<sup>51</sup>

### 15.10.3 RFI of non-resident

Foreign income arising to a non-resident is not “chargeable”; so it is not actual RFI, because it does not meet the condition in s.830(1)(b).<sup>52</sup>

The rule that foreign income of a non-resident is not RFI is not wanted when applying RFI-type exemptions to provisions which may tax a UK resident on income of a non-resident (such as s.720/731, and s.624). In these cases, statute reverses the rule by a clumsy formula, which refers to:

income which would be relevant foreign income if it were income of a

---

50 Reg 16 and 97 OFTR; see 65.4 (Taxation of reporting-fund income); 65.7 (Non-reporting fund holds reporting fund)..

51 See 62.5 (No remittance basis). That may be the only example of foreign income which is not RFI. I would be interested if readers can identify other examples of foreign income that is not RFI.

52 Unless the temporary non-residence rules apply. It could be that some types of deemed RFI count as RFI even if payable to a non-resident.

UK resident individual<sup>53</sup>

The drafter sometimes uses the term “foreign income” to describe such income; in that case “foreign income” is used in a somewhat technical sense, which is not quite the natural sense. It should perhaps be written with initial capitals or scare quotation marks.

#### 15.10.4 *Definition of RFI: Critique*

“Relevant foreign income” is not a helpful label, but no short label could do justice to the complexities.

It is suggested that “RFI” should be extended to include all income arising outside the UK.<sup>54</sup> All foreign income should qualify for the treatment currently given to RFI.

This is a simplification. The amount of tax involved is small because properly advised remittance basis taxpayers will not invest in foreign income which is taxed on an arising basis. The law is simply laying traps.

If, contrary to that view, there must continue to be special cases of foreign income which does not qualify for the remittance basis, they should be specified as express exemptions from the definition of RFI. We should not specify the categories of RFI: RFI should be all foreign income with specified exceptions.

The term RFI could then be replaced by the more transparent label, “foreign investment income” or “foreign income”; but terminology is perhaps a secondary issue.

### 15.11 RFI collection costs

Section 838(1) ITTOIA provides:

In calculating the amount of relevant foreign income to be charged to income tax for a tax year, a deduction is allowed for expenses incurred outside the UK that are attributable to the collection or payment of the income.

EN ITTOIA provides:

---

53 See 46.20 (s.720 remittance basis); 47.39 (s.731 remittance basis); 47.40.2 (Place relevant income in order); 88.9.1 (Condition A: RFI); 88.13.1 (Condition (a): RFI).

54 Except employment income, which has a separate code.

This includes, for example, banking costs involved in the collection and forwarding of dividends...

The deductions that are allowed are those solely concerned with the costs of handling the income. There is nothing in the legislation that confines those costs to costs involved in sending the money to the UK, so no such restriction has been imposed....

... the costs attributable to the collection or payment of income from a foreign trade are deductible.

Section 838(2) ITTOIA provides:

Subsection (1) does not apply to income charged for the tax year in accordance with section 832 (relevant foreign income charged on the remittance basis).

No deduction is needed when the remittance basis applies, as income used in payment of the expenses will not be remitted.

It is suggested that s.838 should be repealed. This would be a simplification. The relief made some sense when introduced in 1914, as a sop to the newly imposed restriction on the remittance basis for foreign income,<sup>55</sup> and because the collection costs then may have been more substantial. But the amount of allowable costs now will not usually be significant.

## 15.12 General territorial principle

In *Colquhoun v Brooks*:

... Schedule D... impose[s] the tax upon the annual profits or gains arising or accruing to any person residing in the UK from any trade, whether carried on in the UK or elsewhere. The Respondent does reside in the UK, profits did arise or accrue to him from a business carried on elsewhere than in the UK; therefore, say the learned counsel for the Crown, the case is within the very terms of the Act, and he must be held liable to assessment. ...

It is urged, however, on behalf of the Respondent, that if this construction be adopted a foreigner residing for a short time only in this country would be subjected to taxation here in respect of the whole of

---

55 See 16.2 (History of remittance basis).

his business earnings in his own country or elsewhere,<sup>56</sup> that so to tax him would be opposed to international comity, and that a construction which would involve such a consequence cannot be correct.

I think the learned counsel for the Respondent are right in saying that the result which they point out would follow in the case of a foreigner, but I do not feel satisfied that it would involve a violation of international law, and that the construction contended for by the Crown ought on that ground to be summarily rejected.

Reliance was placed upon the decisions under the Legacy and Succession Duty Acts, which have imposed a limit upon the broad language of the enactments, subjecting legacies and successions to taxation. But it must be remembered that it was necessary to put some limit upon these general terms in order to bring the matters dealt with within our territorial jurisdiction. Without such a limitation the Legacy Duty Act, for example, would have been applicable although neither the testator nor the legatee, nor the property devised or bequeathed, was within or had any relation to the British dominions. A construction leading to this result was obviously inadmissible.

The Income Tax Acts, however, themselves impose a territorial limit, [1] either that from which the taxable income is derived must be situate in the UK

[2] or the person whose income is to be taxed must be resident there.

If the latter condition be fulfilled, I think it is competent for the Legislature to determine the measure of taxation to be applied in the case of a person so resident.<sup>57</sup>

There are 2 distinct points here.

Firstly, *Colquhoun* is a *description of the territorial limits of IT in 1889*.<sup>58</sup> Secondly, *Colquhoun* is authority for a *general principle of territoriality, or a rule or principle of construction for tax statutes* (not just IT, as the reference to succession and legacy duty shows).<sup>59</sup> I here

---

56 Author's footnote: It appears to have been accepted that the income (from a trade carried on abroad by a partnership of which the taxpayer was a partner) did not qualify for the remittance basis.

57 2 TC 490 at p.498.

58 For the current rules, see 15.2 (Source: IT territorial limit).

59 This principle of construction of tax statutes is in turn part of a broader principle of construction applicable to all statutes: subject to context, an enactment is taken as not applying outside the UK.

discuss the second aspect.

In *Clark v Oceanic* the general territorial principle was summarised thus:

... the general principle ... is simply that, unless the contrary is expressly enacted or so plainly implied that the Courts must give effect to it, UK legislation is applicable only to British subjects or to foreigners who by coming to the UK, whether for a short or a long time, have made themselves subject to British jurisdiction. Two points would seem to be clear: first, that the principle is a rule of construction only, and secondly, that it contemplates mere presence within the jurisdiction as sufficient to attract the application of British legislation. Certainly there is no general principle that the legislation of the UK is applicable only to British subjects or persons resident here. Merely to state such a proposition is to manifest its absurdity. Presence, not residence, is the test.<sup>60</sup>

If territorial requirements are totally absent in a statute, some requirements will be implied. If territorial requirements in the statute are insufficient, some further requirements will be implied. However, as befits a principle of construction, the question of what requirement or further requirement may be implied is context-sensitive: there is no fixed, absolute, universal or prescriptive rule.

It is easy to say that UK tax must have territorial limits, and hard to say what those limits must be in any particular case. International comity is a high level principle which does not help much in practice, and context only takes one so far. But illustrations from case law offer the guidance as to the Court's approach in applying a general territorial principle.

## 15.13 Territorial principle: Application

### 15.13.1 *Application in tax cases*

The outcome in *Colquhoun* now seems self-evident.<sup>61</sup> The Income Tax Act set out what are now seen as internationally accepted territorial limitations of IT, and nothing further needed to be implied by applying the general principle of territoriality.

---

60 56 TC 183 at p.221; the passage was approved in *Jimenez (R, oao) v FTT* [2019] EWCA Civ 51 at [14].

61 Presumably the position seemed less clear in 1889.

*Clark v Oceanic* concerned the territorial limit of PAYE: was a non-resident employer required to deduct tax under PAYE?<sup>62</sup> PAYE already had the territorial requirement of the ITEPA charge on earnings. Two of the five judges were “attracted” to the view that no more need be implied by the general territorial principle. But in order to reach a 3:2 decision, and leave the law in a reasonably workable state, they adopted the compromise view that a little more was needed: the employer had to have what was called “tax presence”. That (novel) requirement was satisfied by the fact that the employer had a place of business and address for service in the UK. (The minority adopted the view that the territorial principle restricted PAYE to employers who were UK resident; but that is not the law).

*Agassi v Robinson* concerned the territorial limits of the entertainers/sportspeople code: on payment of a sponsorship fee from one non-resident (Nike) to another non-resident (Agassi Inc), was the payor subject to UK withholding tax?<sup>63</sup> The code already had a tenuous territorial requirement,<sup>64</sup> but that fell far short of the “tax presence” requirement judged the minimum sufficient for PAYE. However it was held (this time by 4:1, but reversing the CA) that the territorial requirement of the Entertainers/Sportspeople code was sufficient. Nothing further was to be implied:

(1) I am impressed by the Revenue’s point that, if Mr Agassi is right, the ease with which the tax liability imposed by [the entertainers/

---

62 See 35.4 (Duty to deduct PAYE).

63 For completeness: The appellant was Mr Agassi, not Nike, and the issue was whether Mr Agassi was subject to income tax, not whether Nike was subject to withholding tax. But the two questions were the same question, because the then legislation only imposed a tax charge on the individual if the withholding tax applied. So the individual taxpayer (Mr Agassi) could succeed in the argument that the implied territorial limit exonerated the payor (Nike) from withholding tax, he would win because that in turn exonerated him from the personal tax charge.

The legislation was subsequently amended on this point; see 22.3 (Charge independent of withholding tax). Had that been done sooner, then Mr Agassi could not have appealed the tax liability, and Nike might have had a stronger case on withholding tax. But that change does not alter the rule that the withholding tax under the entertainers/sportspeople code does not require a “tax presence”.

64 See 22.2.2 (Relevant (taxable) activity); 22.5 (Connected payment/transfer).

sportspeople code] could be avoided simply by ensuring that the potentially taxable payments were made by foreign entities with no residence or trading presence in this country would render payment of the tax to all intents voluntary. That cannot, in my opinion, have been Parliament's intention...

(3) ... The whole point of [the code] is to subject foreign entertainers or sportsmen to a charge to tax on profits on gains obtained in connection with their commercial activities in the UK. Payments to foreign companies controlled by them are to be treated as payments to them. The infrequent or sporadic nature of their commercial activities and presence in the UK and the difficulty of collecting from them the section 556 tax on their profits and gains from those activities was one of the reasons why the new collection regime was introduced .... To read into the statutory provisions a limitation preventing the collection regime from applying where the payer is a foreign entity with no UK presence and thereby relieving the foreign entertainer/sportsman from the charge to tax cannot, in my opinion, possibly be justified on the basis of a presumed legislative intention. I would hold that on the true construction of these sections the territorial limitation cannot be implied and that the statutory language should be given its natural meaning.<sup>65</sup>

It seems to me that *Agassi* constitutes a change in approach from *Clark v Oceanic* (as reflected in one dissenting judgment).

*Jimenez (R, oao) v FTT*<sup>66</sup> concerned the territorial limit of an information notice under sch 36 FA 2008. According to CA, the power to issue a notice already had one territorial requirement: the power is only exercisable on someone who is or may be liable for tax in the UK and so has at least that identifiable relationship with the UK.<sup>67</sup> The notice was served on a non-resident. CA held (unanimously, but reversing the Court below) that no further territorial requirement should be implied: the power to issue an information notice is (more or less) a worldwide power:

... there are a number of factors which point towards HMRC being authorised by paragraph 1 to give a taxpayer's notice to someone outside the UK. The first is the subject-matter and purpose of the legislation. ...

---

65 77 TC 686 at [17].

66 [2019] STC 746.

67 Different considerations might apply if the information notice was issued by HMRC at the request of a foreign revenue authority, as there would be no UK link.

The prevention of tax evasion which will often have a cross-border aspect to it serves an important public purpose in maintaining public revenue. ... A paragraph 1 notice can only be given to someone who is or may be a UK taxpayer and it is this status rather than his place of residence which is key to availability and operation of the power.<sup>68</sup>

Other powers in sch 36 are more territorially constrained. For instance, it was implied that the power in para 10 sch 36 for an officer to enter business premises did not apply to premises abroad.<sup>69</sup>

These 3 cases concern withholding tax and information powers, the administrative side of tax. There are no modern cases on implied territorial requirements which focus on substantive charges to tax.

Of course each decision was rooted in detailed statutory provisions, which makes it hard to see the wood for the trees.<sup>70</sup> However in the light of *Agassi* and *Jimenez*, it is considered that *Clark v Oceanic* would not be decided the same way today. Under the doctrine of precedent the territorial requirements of PAYE are fixed at all levels below the supreme court, but the modern cases show that the *Clark v Oceanic* concept of “tax presence” (whatever that means) is not a principle of wide application. In the language of the doctrine of precedent: *Clark* is not (yet) overruled, but it may be “restricted to its facts”; which comes to more or less the same thing. We will not hear much more of “tax presence”; instead there is a firm reluctance to imply additional territorial requirements to a statutory provision unless that seems essential.

The reason for the change of approach may be that globalisation makes a stricter territorial principle of construction inappropriate; or that judges are more sympathetic than before to the needs of HMRC to collect tax, and to prevent avoidance or evasion. In the 2020/21 edition of this work

---

68 At [39]. The second reason which follows (based on the terms of sch36) does not seem persuasive, to say the least; but I omit discussion of that because it has limited relevance in other cases.

69 at [33].

70 This is self-evident, but if authority is needed see *KBR (R, oao) v Director of the Serious Fraud Office* [2021] UKSC 2 at [46]: “Judicial decisions concerning the effect of different statutory provisions may be instructive by way of analogy but they need to be approached with some caution because they are concerned with entirely different statutory schemes, often enacted for different purposes and operating in different contexts.”

I said:

If that is right, the change of approach is permanent and the pendulum will not swing again. It will need a very strong case for the Courts to imply a territorial limitation beyond that (if any) set out in a tax statute.

This was now confirmed when SC approved the *Jimenez* decision in *KBR (R, oao) v Director of the Serious Fraud Office*.<sup>71</sup>

In *R (Jimenez) v FTT* the Court of Appeal held that para 1 sch 36 FA 2008 empowered HMRC to issue a notice requiring a UK taxpayer resident outside the UK to provide information for the purpose of checking his tax position. Patten LJ identified two factors in particular which led him to that conclusion. The first ... was the subject matter and purpose of the legislation. The court was not concerned with the facilitation of private litigation but with the prevention of tax evasion which often has a cross-border aspect to it and which serves an important public purpose in maintaining public revenue. The second (at para 40) was that the strong policy objectives of conferring effective investigatory powers on HMRC were bolstered by the language of Schedule 36 itself. However, it is clear that in coming to his conclusion he was strongly influenced by two further factors... The first of these is that the powers conferred were expressly limited for the purpose of checking the taxpayer's tax position and this therefore meant that the powers were necessarily and only exercisable in relation to someone who is or may be liable for tax in the UK and who, to that extent, had an identifiable relationship with the UK. Accordingly, a notice under paragraph 1 could only be given to someone who was or might be a UK taxpayer and it was that status rather than his place of residence which was the key to the availability and operation of the power. ... Secondly, in *Jimenez* non-compliance with a notice was not made a criminal offence and so the presumption that a statute should not be construed as making conduct abroad a criminal offence had no application. ... Both Patten LJ and Leggatt LJ considered that the sending of an information notice to a UK taxpayer in a foreign State requiring him to produce information that was reasonably required for the purpose of checking his tax position in the UK did not violate the principle of State sovereignty or contravene any international obligation of the UK.

---

71 [2021] UKSC 2 at [48/]

### 15.13.2 *Application in non-tax cases*

The general principle of territoriality in tax is part of a wider general principle of territoriality:

In resisting the interpretation ... that the Human Rights Act has extra-territorial application, the Secretary of State places heavy reliance on what he describes as ‘a general and well established principle of statutory construction’. This is ... that Unless the contrary intention appears, Parliament is taken to intend an Act to extend to each territory of the UK but not to any territory outside the UK... Unless the contrary intention appears ... an enactment applies to all persons and matters within the territory to which it extends, but not to any other persons and matters. ...

In the absence of an intention clearly expressed or to be inferred either from its language, or from the object or subject matter or history of the enactment, the presumption is that Parliament does not design its statutes to operate on its subjects beyond the territorial limits of the UK. ... That there is such a presumption is not, I think, in doubt. It appears ... to have become stronger over the years.<sup>72</sup>

---

<sup>72</sup> *Al-Skeini (R, oao) v Secretary of State for Defence* [2007] UKHL 26 followed in *KBR (R, oao) v Director of the Serious Fraud Office* [2021] UKSC 2 at [21]. Note that all the recent tax cases were cited in this non-tax case.

## CHAPTER SIXTEEN

# THE REMITTANCE BASIS

### 16.1

#### *Cross references*

I deal with this subject in four chapters:

- (1) This chapter considers:
  - (a) who qualifies for the remittance basis
  - (b) the remittance basis claim charge
- (2) Chapter 17.1: what counts as a remittance
- (3) Chapter 18.1: remittance reliefs
- (4) Chapter 19.1: mixed funds

The remittance basis as it applies to particular anti-avoidance rules is discussed in the chapter on those rules; see

- 44.8 (s.624 remittance basis)
- 46.20 (s.720 remittance basis)
- 47.39 (s.731 remittance basis)
- 57.19 (s.87 remittance basis)

The following topics are considered elsewhere:

- 39.2.3 (Life tenant remittance basis user)
- 40.10.3 (Dividends: Remittance basis)
- 40.9.4 (Interest under remittance basis)

### **16.1 Remittance basis: Introduction**

Income tax and CGT employ two types or bases of assessment:

- (1) The **“arising basis”** under which tax is charged on the amount of income/gains which arise.
- (2) The **“remittance basis”** under which tax is charged on the amount of income/gains which are received in the UK.

The remittance basis applies (in short) when a foreign domiciliary receives:

- (1) Foreign income/gains
- (2) Deemed income/gains under the settlor-interested trust code, the ToA provisions and s.87 TCGA.

I use the following self-explanatory terminology:

**“ITA remittance basis”**: applicable from 2008/09 for all tax purposes

**“Pre-2008 remittance basis”**: applicable until 2008/2009; there were different rules for different types of income/gain, so one might specifically refer to **“pre-2008 RFI/employment income/CGT remittance bases”**.

## 16.2 History of remittance basis

It is not necessary for a practitioner to know the history of the remittance basis, but it makes an interesting story.<sup>1</sup>

Until 1914 all foreign income was taxed on a remittance basis.<sup>2</sup> Since then the remittance basis has been withdrawn, in stages, except for foreign domiciliaries.

In 1914 income from “securities, stocks, shares, or rents in any place out of the UK” was brought onto an arising basis.<sup>3</sup> This did not apply to foreign domiciliaries and non-ordinarily residents. Even those who were domiciled and ordinarily resident in the UK retained the remittance basis for foreign source income other than income from securities and rents. Hence the litigation to decide whether trust income was to be regarded as income arising from securities or from the trust.<sup>4</sup>

In 1940 the general remittance basis was further restricted, to (a) income from offshore trades, professions or vocations, and (b) income from offshore offices, employments or pensions.<sup>5</sup>

The same rules applied to companies as to individuals, until the introduction of corporation tax in 1965, which put UK resident companies onto an arising basis.

---

1 See Avery Jones, “Taxing Foreign Income from Pitt to the Tax Law Rewrite—The Decline of the Remittance Basis”, *Studies in the History of Tax Law* (Vol 1 2004) <https://www.kessler.co.uk/wp-content/uploads/2013/12/Remittance-basis.pdf>

2 Section 100 Income Tax Act 1842.

3 Section 5 FA 1914.

4 See 39.3 (Taxation of life tenant).

5 Section 19 FA 1940.

In 1974 the general remittance basis was finally abolished.<sup>6</sup> One driver<sup>7</sup> of the reform was an aspect of the Lonrho scandal, in which Duncan Sandys (a former cabinet minister) was found to have received director's remuneration amounting to £130k. The amount itself was thought to be outrageous, but for good measure the sum was received in the Cayman Islands, and (presumably) claimed to be (un)taxed on the remittance basis.<sup>8</sup>

FA 2008 introduced the ITA remittance basis (new rules of what constituted a remittance) and the remittance basis claim charge. There have been changes almost every year since then.<sup>9</sup>

### 16.3 HMRC guidance

Most of the HMRC guidance is to be found in the vast RDR Manual.

The RDR Manual frequently makes its point by examples. In some cases the examples are straightforward and might have been better omitted in the interest of brevity.<sup>10</sup> In almost all cases the examples are padded out with irrelevant facts. I formerly thought that was intended, in the spirit of *Pooh-Bah*, “to give artistic verisimilitude to an otherwise bald narrative”. But in fact the aim seems to be that the Manual should have a reading age of 11.<sup>11</sup> However that may be, this is an unhelpful method of explaining statutory provisions to grown-ups. The consequence is to make it quite unnecessarily difficult to identify the important points from the examples. I try to deal with this by editing or rewriting the example to identify the relevant point; I set the original text of the Manual in a footnote, so that the reader can see what I have done.

The RDR Manual is updated from time to time, but no guidance can ever

---

6 Sections 22, 23 FA 1974.

7 There may have been others. The exception was intended, perhaps, to encourage foreign trade. The pre-1974 law also allowed tax planning by splitting a single mixed UK and foreign based trade into separate UK and foreign source trades, the latter qualifying for the remittance basis. An arrangement of this kind was held to be successful in *Newstead v Frost* 53 TC 525.

8 Whether the Inland Revenue accepted that claim is not in the public domain.

9 See 1.11 (The promise of stability).

10 But for the sake of completeness, and just in case some readers should find them helpful, I sometimes set them out.

11 See App 1.14 (“Technical note”).

be up to date as long as tax reform continues at its present frenetic pace.

Earlier guidance was in the form of Q&As.<sup>12</sup> Most of the Q&As are superseded by the RDR Manual (published 2010) but some are still relevant.

## 16.4 “Foreign income and gains”

Section 809Z7(1) ITA provides:

This section applies for the purposes of this Chapter [Chapter A1 Part 14, remittance basis].

So s.809Z7 gives chapter-wide definitions. In accordance with the principles of Plain English drafting, the Chapter contains occasional (strictly unnecessary) pointers to the definitions.<sup>13</sup>

Section 809Z7(2) ITA provides:

An individual’s “foreign income and gains” for a tax year are—

- (a) the individual’s relevant foreign earnings for that year,
- (b) the individual’s foreign specific employment income for that year,
- (c) the individual’s relevant foreign income for that year, and
- (d) the individual’s foreign chargeable gains for that year.

For the definition of RFI, see 15.10.2 (“Relevant foreign income”).

### 16.4.1 *Relevant foreign earnings*

Section 809Z7(3) ITA provides the definition of RFE:

An individual’s “relevant foreign earnings” for a tax year are—

- (a) if the individual does not meet the requirement of section 26A of ITEPA 2003 [Overseas Workday Relief] for that year, the

---

12 I refer to these as “**December 2008 Q&As**”; “**January 2009 Q&As**”; and “**March 2009 Q&As**”. HMRC have removed the Q&As from their website but they are on <https://www.kessler.co.uk/wp-content/uploads/2012/07/December-2008-QandAs.pdf> <https://www.kessler.co.uk/wp-content/uploads/2012/05/Jan2009QsAndAs.pdf> <https://www.kessler.co.uk/wp-content/uploads/2012/07/March-2009-QandAs.pdf>

13 Eg s.809C(6) ITA: “See s.809Z7 for the meaning of an individual’s foreign income and gains for a tax year”.

- individual's chargeable overseas earnings<sup>14</sup> for that year, and
- (b) otherwise, the individual's general earnings within s.26(1) of ITEPA 2003 for that year (non-UK earnings).

#### 16.4.2 *Foreign specific employment income*

Section 809Z7 ITA incorporates the definitions from ITEPA:

(4) An individual's "foreign specific employment income" for a tax year ("the relevant tax year") consists of the income (if any) within subsections (4A) and (4B).

(4A) The income within this subsection is the individual's specific employment income for the relevant tax year so far as it consists of foreign securities income for the purposes of section 41A of ITEPA 2003.

(4B) The income within this subsection is any income, or any part of any income, of the individual—

- (a) to which section 554Z9(2) or 554Z10(2) of ITEPA 2003 applies, and
- (b) which consists of the value of a relevant step, or a part of the value of a relevant step, which is "for" the relevant tax year as determined under section 554Z4 of ITEPA 2003.

Specific employment income raises a set of specialist topics not discussed in this book, though I hope to cover them in a future edition.

#### 16.4.3 *Foreign chargeable gains*

Section 809Z7(5) ITA provides:

An individual's "foreign chargeable gains" for a tax year are the chargeable gains accruing to the individual in that year on the disposal of foreign assets (within the meaning of Schedule 1 to TCGA 1992).<sup>15</sup>

TCGA formerly used the defined term "foreign chargeable gains" but this is not used after the 2019 CGT re-write, which now refers to gains on the disposal of foreign assets (defined as assets situated outside the UK). The reader may think the previous terminology was satisfactory; but there it is.

---

14 Section 809Z7(6) provides: "In subs.(3)(a) 'chargeable overseas earnings' has the same meaning as in s.22 of ITEPA 2003 (see s.23 of that Act)." See 33.14 (Chargeable overseas earnings).

15 See 53.15 (CGT remittance basis).

## 16.5 Income/capital in remittance basis

One might start off by thinking that a remittance of income is subject to income tax and a remittance of capital is not. It is not that simple. The terminology of “capital” and “income” in the context of the remittance basis is potentially confusing.

A sum received in the UK may not be taxable under the remittance basis because it is derived not from income but from some fund easily identified as capital in the hands of the taxpayer, such as a gift or inheritance, or borrowing. In cases in this category it makes sense to say that the remittance is tax free because it is one of capital.

A sum received in the UK may not be taxable under the remittance basis because:

- (1) the donor was non-resident when the remitted sum accrued; or
- (2) the remitted sum has already been subject to income tax.

Such sums might be said to be “income” in the normal sense of the word. These examples show that a remittance of a sum which is income in nature may nevertheless be remittance free of tax under the remittance basis.

- (3) Conversely, suppose a remittance basis taxpayer accumulates income offshore for many years; the accumulated fund might be said to be their “capital” in the normal sense of the word. Yet for the purposes of the remittance basis, it is in principle taxable if remitted.<sup>16</sup> Perhaps it is better described as “income”.

---

16 See (if authority is needed) *Walsh v Randall* 23 TC 55:

“... the accumulated income which he had derived from the drawings of the firm of which he was a sleeping partner. I have no doubt that he had come to regard this sum of money as capital. It was invested savings and it was in that sense capital, unless it can be said that, for instance, a professional man’s invested savings never are and never become capital. I should have thought it was quite a harmless thing to use the word ‘capital’ in relation to a professional man, or indeed to any other private person. I think that word may very definitely have a meaning with regard to ordinary private persons and may be correctly used to describe some part of their property. That, however, is not, for Income Tax purposes, the test. To the Crown the [unremitted] income of a person residing in the UK is, as I gather, always income until it is taxed.”

It is best not to use the terminology of income/capital in any of cases (1) to (3): it is unnecessary to do so.

## 16.6 Remittance basis: Who qualifies

After the traditional overview, in accordance with the principles of plain English drafting,<sup>17</sup> s.809B, 809D and 809E ITA set out three categories of individuals to whom the remittance basis applies:

ITA	My term	Requirement (in outline)
s.809B	Remittance basis claimant	Remittance basis claim
s.809D	Sub-£2k taxpayer	Unremitted foreign income/gains under £2k
s.809E	Non-taxpayer	No UK income/gains & do not remit foreign income/gains

The advantages of being in one of the two de minimis categories are:

- (1) No claim is needed, so the taxpayer may not need to submit a tax return.
- (2) The remittance basis claim charge does not apply, personal allowances remain available,<sup>18</sup> and the individual is not forced to make a CGT loss election.<sup>19</sup>

I refer to the three groups together as “**remittance basis taxpayers**”.

HMRC prefer the term “remittance basis user” (HMRC do not like to use the word “taxpayer”<sup>20</sup>). Since parliament used that term in 2012, (see below) one cannot say it is wrong. But it does seem unnatural: who would refer to an “arising basis user”? Or a herd basis user? So I continue to refer to remittance basis taxpayers; except in headings, where space considerations override.<sup>21</sup>

Statute generally uses a clumsy formula. For a remittance basis taxpayer:

If the individual is UK resident and one of sections 809B, 809D and

17 Section 809A ITA provides: “This Chapter provides for an alternative basis for charge in the case of individuals who are not domiciled in the UK”.

18 See 41.6 (Allowances: remittance basis user).

19 See 61.16 (Loss of remittance basis taxpayer).

20 See App.1.4 (“Customers” of HMRC). HMRC do occasionally lapse and use the expression “remittance basis taxpayer”.

21 See <https://en.wikipedia.org/wiki/Headlines>

809E of ITA 2007 applies to the individual ...

For an arising basis taxpayer:

If the individual is UK resident and none of sections 809B, 809D and 809E apply to the individual ...

Just occasionally one sees more transparent terminology:

Term	Used in	Introduced
Remittance basis user	s.809Y - 809Z10	ITA 2012
Individual to whom the remittance basis applies	Sch 1 TCGA	2019

Both these expressions are defined.

## 16.7 Remittance basis claim: s.809B

### 16.7.1 *Entitlement to claim*

Section 809B ITA provides:

- (1) This section applies to an individual for a tax year if the individual-
- is UK resident in that year,
  - is not domiciled<sup>22</sup> in the UK for that year, and
  - makes a claim under this section for that year.

I refer to the claim as a “**remittance basis claim**”.

### 16.7.2 *Is a claim worthwhile?*

A claim gives the advantages of the remittance basis but has the following drawbacks:

- Loss of personal allowances:<sup>23</sup>
  - CGT annual exemption
  - IT personal allowance (only a concern for those with taxable income up to about £100k as otherwise there is no personal allowance to lose<sup>24</sup>)

---

22 Section 809B(1A) ITA provides: “Section 835BA (deemed domicile) applies for the purposes of subsection (1)(b).” This is the standard wording to apply the deemed domicile rules.

23 See 16.7.2 (Is a claim worthwhile?).

24 See 41.5 (IT allowances: high earners). For completeness: in rare cases the allowance may be saved by a DTA: see 41.8.2 (Remittance basis claimants).

- (2) The need to make a CGT loss election
- (3) Remitted dividends taxed at a higher rate than dividends taxed on an arising basis
- (4) For long-term residents: the remittance basis claim charge

The effect of the remittance basis claim charge is to withdraw the remittance basis from long-term residents except the most wealthy, since a claim is not likely to be worthwhile for individuals whose income is much less than £150,000 in the year in question, though the position varies a great deal from one case to another.

For short-term residents, ie those not subject to the remittance basis claim charge, a claim is likely to be worthwhile as long as they expect to have foreign income in excess of the IT personal allowance (if available).

### 16.7.3 *Minimising cost of claim*

Basic tax planning for spouses will be to arrange that foreign income/gains accrue only to one of them, so only one spouse has to pay the remittance basis claim charge.

Basic planning for individuals who do not wish to pay the remittance basis claim charge every year is to time disposals and accruals so far as possible that foreign income/gains accrue:

- (1) before the 8<sup>th</sup> year of residence, and
- (2) only once every few years subsequently (so a claim is only needed once every few years).

Indeed this may be worthwhile even in the first 8 years, in order to mitigate the other drawbacks of a remittance basis claim.

This is possible as a claim can be made in one year but not in another year. In 2015 HMRC proposed that an election for the remittance basis should last for a minimum of 3 years. But the idea was dropped, sensibly, in the light of the 15-year deemed domicile rule.<sup>25</sup>

---

25 HM Treasury, "Summary of responses on minimum claim period consultation" (July 2015)  
[https://www.gov.uk/government/uploads/system/uploads/attachment\\_data/file/446552/Summary\\_of\\_responses\\_to\\_minimum\\_claim\\_period\\_consultation\\_July\\_2015\\_.pdf?j=1414242&e=kessler@kessler.co.uk&l=346\\_HTML&u=24004944&mid=1062735&jb=0](https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/446552/Summary_of_responses_to_minimum_claim_period_consultation_July_2015_.pdf?j=1414242&e=kessler@kessler.co.uk&l=346_HTML&u=24004944&mid=1062735&jb=0)

#### 16.7.4 *Remit. basis claim: US taxpayer*

Bober states:

Generally, the ability to claim double tax relief will mean that an adult US citizen (or green- card holder) who is a long-term UK resident will achieve a better overall tax result (meaning that less tax will be payable overall) by being subject to UK tax on the arising basis. This is because the individual will generally be subject to US tax on a worldwide basis anyway. For many, while UK tax rates are in excess of US tax rates, the additional UK tax that will be payable on the arising basis will not be in excess of the £30,000 RBC payable if the remittance basis claim is made. This will not always be the case, though, as:

- the individual may have specific issues meaning that some of their foreign income or gains are sheltered from the US tax net, and/or
- the individual might be sufficiently wealthy that the difference between the higher UK tax rates and the US tax rate will mean that paying the £30,000 is worthwhile.

In addition, some US citizens (or green-card holders) may prefer to pay tax on the remittance basis in the UK rather than try to determine the UK tax treatment with respect to some of the offshore investments they have, and make the necessary disclosure. Since the US and the UK tax systems are different the fact that an individual has to submit a US tax return showing worldwide income and gains will not necessarily mean he or she is in a position to complete a UK return without incurring significant additional compliance costs. Paying the RBC will avoid the need for this work and may result in privacy gains.<sup>26</sup>

### 16.8 Remittance basis claim: Procedure

The standard claim procedure rules apply, except that it is not necessary for a remittance basis claim to be quantified (ie to specify the amount of unremitted foreign income/gains).<sup>27</sup>

A claim is made by ticking the relevant boxes in a tax return:

- Box 28 in form SA109 (Residence, remittance basis etc) 2019/20. The caption by this box reads: *If you are making a claim for the remittance*

---

<sup>26</sup> Bober “The remittance basis charge – US issues” (2011) 9 TQR p.8 (free to STEP members or on subscription) <http://www.step.org>

<sup>27</sup> See 117.2.2 (Remittance basis claims).

*basis for 2019–20, put ‘X’ in the box.*

- Box 23 in form SA109 (2019/2020). The caption by this box states: *If you are domiciled outside the UK and it is relevant to your Income Tax or Capital Gains Tax liability for 2019–20, put ‘X’ in the box. Please explain in box 40 how your domicile is relevant to your Income Tax or Capital Gains Tax liability*

(There are further relevant boxes in form SA109 if this is the first domicile claim.)

- Box 8 in form SA100 (2019/20). The caption by this box states: *Were you, for all or part of the year to 5 April 2020, one or more of the following: not resident/ not domiciled in the UK and claiming the remittance basis / dual resident in the UK and another country?*

## 16.9 Sub-£2k taxpayer: s.809D

Section 809D ITA provides:

- (1) This section applies to an individual for a tax year if-
- (a) the individual is UK resident for that year,
  - (b) the individual is not [actually] domiciled<sup>28</sup> in the UK in that year, and
  - (c) the individual’s unremitted<sup>29</sup> foreign income and gains for that year are less than £2,000.

unless condition A or condition B is met.

(1A) Condition A is that conditions A to F in section 828B are met.<sup>30</sup>

(1B) Condition B is that the individual gives notice in a return under section 8 of TMA 1970 that this section is not to apply in relation to the individual for that year.

Why should anyone wish to give a notice under s.809D(1B) ITA, and

---

28 The deemed domicile rules do not apply: see 4.3.1 (Scope of IT/CGT deemed-dom).

29 Section 809D(2) provides a commonsense definition of “unremitted”:

“The amount of an individual’s “unremitted” foreign income and gains for a tax year is—

- (a) the total amount of what would (if this section applied) be the individual’s foreign income and gains for that year, minus
- (b) the total amount of those income and gains that are remitted to the UK in that year.”

30 This relates to lower-paid employees see 33.42 (Lower-paid employee exemption). I do not understand the reason for condition A.

move from the remittance basis to the arising basis? The reason may be that the remittance basis (for modest incomes) involves too much trouble and expense: it may be more cost effective to pay tax on an arising basis. Another reason might be to facilitate double taxation relief.

### 16.9.1 £2k limit in split year

Foreign income arising in the overseas part of a split year is not subject to UK tax. However in considering whether the £2,000 threshold limit applies, the foreign income/gains for the entire tax year must be taken into account.

This is straightforward, but the RDR Manual gives an example to drive the point home:<sup>31</sup>

#### **32120 Below £2,000 threshold users: Years of arrival and departure - interaction with ESC A11 [Jan 2019]**

...

##### *Example (Ferdinand)*

F enters the UK on 20 October 2010, and is resident for the tax year 2010-11. He claims<sup>32</sup> split-year treatment under ESC A11.

F's RFI is as follows:

6 April to 19 October 2010	£2,200
20 October 2010 to 5 April 2011	<u>£1,300</u>
Total	<u>£3,500</u>

F remits £1,000 to the UK in that year.

At the end of the year his total unremitted foreign income is £2,500.

The HMRC analysis is as follows:

Even though F has claimed split-year treatment for 2010-11, he still has to include any foreign income that arose before he entered the UK.

As F's unremitted foreign income is above the £2k threshold he cannot use the remittance basis under s809D. If he wishes to use the remittance basis he will need to claim under ITA07/s809B, and will lose his personal allowances and the annual exempt amount.

The example needs to be updated, as the former ESC A11 was replaced

---

<sup>31</sup> I have slightly altered the wording of the example for enhanced clarity.

<sup>32</sup> It would be more accurate to say F "qualifies" for split-year treatment since the former concession A11 did not need a claim, and neither do the current split-year rules. But nothing turns on that.

by the statutory split year rules in 2013; but as far as the s.809D £2k threshold is concerned, the position remains the same.

In practice, F (if well advised) would not make a claim for the remittance basis but could save a few pounds of tax by remitting £1,500.01 to the UK instead of £1,000.

The same applies for chargeable gains and RDRM32130 sets out an example. But in practice it hardly matters.

### 16.9.2 How to claim: s.809D

There is no formal claim or election for s.809D to apply. However it is necessary to tick the relevant boxes in the tax return:

- Box 29 in the SA109 form (2019/20). The caption by the box reads: *If your unremitted income and capital gains for 2019–20 is less than £2,000, put 'X' in the box.*
- Box 23 in the SA109 form (2019/20). The caption by this box reads: *If you are domiciled outside the UK and it is relevant to your Income Tax or Capital Gains Tax liability for 2019–20, put 'X' in the box. Please explain in box 40 how your domicile is relevant to your Income Tax or Capital Gains Tax liability (There are further relevant boxes if this is the first domicile claim.)*
- Box 8 in the SA100 form (2019/20). The caption by this box reads: ***Residence, remittance basis etc.*** *Were you, for all or part of the year to 5 April 2020, one or more of the following – not resident, not domiciled in the UK and claiming the remittance basis, or dual resident in the UK and another country?*

### 16.9.3 Concession: Sub-£2k taxpayer

HMRC Brief 17/09 provides:

**Remittance basis users whose foreign income and gains is less than £2,000**

Individuals making use of section 809D are still taxable on any foreign income or gains remitted to the UK. ...

It is recognised that some individuals, in particular those on low income, may make small cash remittances to the UK, out of foreign income or gains, and as a result have to complete a Self Assessment tax return possibly to pay only a small amount of tax. This is particularly the case where foreign tax has already been paid on the income or gains. Where an individual who is making use of section 809D remits less than a total

of £500 in cash, which arises from foreign income or gains, into the UK during the tax year, then HMRC will accept that such an individual does not need to make a Self Assessment Tax return simply to pay the tax on those cash remittances. However where such an individual is required to complete a Self Assessment tax return for any other reason, or HMRC serves them with a notice to make a return, then they will need to include those remittances on the return and pay the tax due. This practice will apply for 2008-09 and subsequent years.

This is a concession (the word concession is not used, perhaps because HMRC are not now supposed to issue concessions). A concession which only applies if HMRC choose not to require an SA return is a new development in tax, and setting the limit at £500 is difficult to defend, but the manner of introduction of the concession precluded any possibility of debate on it.

#### 16.9.4 £2k limit: indexation

The £2k limit has not changed since 2008.<sup>33</sup>

In 2011 HMRC rejected lobbying to increase the £2k limit:

... the Government will not look further at the following:

*Simplification* Increasing the £2,000 de minimis limit to align with the income tax personal allowance

*Government response* The Government considers that this would be likely to have a material Exchequer cost. It would also restore the income tax personal allowance and CGT Annual Exempt Amount to some individuals with a significant level of income or capital gains and the Government does not think that this can be justified.<sup>34</sup>

The paper does not mention that the decision not to increase the limit since 2008 amounts to a reduction in real terms. Lobbying continues.<sup>35</sup>

---

33 See 40.18 (Inflation/fiscal drag).

34 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (2011) para 2.127

<http://www.litr.org.uk/sites/default/files/files/151109-LITRG-response-non-dom-FINAL.pdf>

## 16.10 Non-taxpayer: s.809E

Section 809E(1) ITA provides:

This section applies to an individual for a tax year if—

- (a) the individual is UK resident for that year,
- (b) the individual is not domiciled<sup>36</sup> in the UK in that year,
- (c) for that year the individual either has no UK income or gains or has no UK income and gains other than taxed investment income not exceeding £100.
- (d) no relevant income or gains are remitted to the UK in that year, and
- (e) either—
  - (i) the individual has been UK resident in not more than 6 of the 9 tax years immediately preceding that year, or
  - (ii) the individual is under 18 throughout that year.

unless the individual gives notice in a return under s.8 of TMA 1970 that this section is not to apply in relation to the individual for that year.

I refer to a person within s.809E as “**a non-taxpayer**”. Thus there are five requirements which must all be met. Requirements (a), (b) and (e) do not need comment.

### 16.10.1 (Almost) no UK income/gains

The requirement in s.809E(1)(c) ITA is:

for that year the individual either has no UK income or gains or has no UK income and gains other than taxed investment income not exceeding £100.

Section 809E(2) ITA provides a commonsense definition:

For the purposes of subs.(1)(c) the individual’s “UK income and gains” for the tax year are the individual’s income and chargeable gains for that year other than what would (if this section applied) be the individual’s foreign income and gains for that year.

HMRC say:

---

36 Section 809E(1A) ITA provides: “Section 835BA (deemed domicile) applies for the purposes of subsection (1)(b).” This is the standard wording to apply the deemed domicile rules.

(25.2) If a non-UK domiciled, UK resident individual has  
 [1] total UK source savings income for the tax year of less than  
 £1,000,<sup>37</sup> and/or  
 [2] total UK source dividend income for the tax year of less than  
 £5,000,<sup>38</sup>  
 can HMRC confirm that income be ignored for the purpose of the test  
 at ss809E(1)(c) ITA?

**Answer**

(25.2) We can confirm that this income can be ignored for the purposes  
 of S809E(1)(c) ITA.<sup>39</sup>

This is concessionary but sensible.

Section 809E(1)(c) ITA allows a paltry £100 “taxed investment income”.  
 This term is defined in s.809E(2A) ITA:

For the purposes of subsection (1)(c) “taxed investment income” means  
 UK income or gains consisting of payments within s.946 from which a  
 sum representing income tax has been deducted.

Now that UK bank interest is generally paid gross, it no longer counts as  
 taxed investment income, so a trivial amount of bank interest would,  
 strictly, forfeit the statutory exemption. But in view of the HMRC  
 practice above, this does not matter.

### 16.10.2 *No income/gains remitted*

The requirement in s.809E(1)(d) is:

(d) no relevant income or gains are remitted to the UK in that year

Section 809E(3) ITA provides the definition:

For the purposes of subs.(1)(d) “relevant” income and gains are—  
 (a) what would (if this section applied) be the individual’s foreign  
 income and gains for the tax year mentioned in subs.(1), and  
 (b) the individual’s foreign income and gains for every other tax

<sup>37</sup> ie, the income qualifies for the savings nil rate; see 40.9 (Savings nil rate).

<sup>38</sup> ie the income qualifies for the dividend nil rate. From 2018/19 the figure of £2,000  
 replaces the figure of £5,000. See 40.10.2 (Dividend nil rate).

<sup>39</sup> Expatriate Forum Minutes Oct 2019

[https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment\\_data/file/855596/Expat\\_Forum\\_minutes\\_10\\_October\\_2019.pdf](https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/855596/Expat_Forum_minutes_10_October_2019.pdf)

year for which s.809B or 809D or this section applies to the individual.

Para 85 sch 7 FA 2008 contains transitional provisions for pre-2008 income/gains:

(1) In s.809E(3)(b) of ITA 2007, the reference to a tax year for which s.809B, 809D or 809E of that Act applies to an individual includes a tax year (not later than the tax year 2007-08) in which the individual—

(a) was UK resident, but

(b) was not domiciled in the UK or was not ordinarily UK resident.

(2) In relation to such a tax year, the reference there to the individual's foreign income and gains includes the individual's relevant foreign income if (and only if)—

(a) the individual made a claim under s.831 of ITTOIA 2005 for the year, or

(b) s.65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the year.

Foreign income arising in the overseas part of a split year is not subject to UK tax. However in considering whether the s.809E exemption applies, the foreign income/gains for the entire tax year must be taken into account.

### 16.10.3 *Purpose of s.809E*

EN FB 2008 provides:

Individuals entitled to claim the remittance basis who have no UK income or gains, and who don't remit any foreign income or gains, won't have to claim the remittance basis in years they are not liable to the RBC. This avoids them having to complete a self assessment return only so they can claim the remittance basis and then have no tax to pay.

There will not be many non-taxpayers within s.809E – mainly spouses accompanying their partners, children and some students, perhaps.

## 16.11 Time of foreign domicile

Section 809B(1) ITA requires (in short) that the foreign domiciliary is not domiciled in the UK in the year that the income arises.

It is an interesting question what is the position if a person changes

domicile during a year.

## 16.12 Remittance basis claim charge

### 16.12.1 7 & 12-year residence tests

Section 809H(1) ITA provides:

This section applies if—

- (a) s.809B (claim for remittance basis to apply) applies to an individual for a tax year (“the relevant tax year”),
- (b) the individual is aged 18 or over in the relevant tax year, and
- (c) the individual meets the 12-year residence test or the 7-year residence test for the relevant tax year.

That takes us to s.809C ITA which provides:

(1A) An individual meets the 12-year residence test for a tax year if the individual—

- (b)<sup>40</sup> has been UK resident in at least 12 of the 14 tax years immediately preceding that year.

(1B) An individual meets the 7-year residence test for a tax year if the individual—

- (a) does not meet the 12-year residence test for that year, but
- (b) has been UK resident in at least 7 of the 9 tax years immediately preceding that year.

In the following discussion:

- (1) The tests are the “**7/12 year residence tests**”
- (2) Adopting the statutory terminology, individuals who meet the 7/12 year residence tests are “**long-term residents**”.

The period of residence might be continuous or broken.

While an individual is under 18:

- (1) they are not subject to the remittance basis charge; but
- (2) any UK resident years do count for the 7/12 year residence tests.

In the year a long-term resident attains 18, the charge is payable in full. The RDR Manual 32230 provides a straightforward example of a case

---

<sup>40</sup> Para (a) has been deleted.

involving a minor.<sup>41</sup>

A split year counts as a full year of residence in determining whether an individual meets the 7/12 year residence tests.<sup>42</sup> RDR Manual 32220 offers a straightforward example of a case involving a split year.<sup>43</sup>

#### 41 **32230 Counting years of UK residence - Minors** [March 2014]

...

##### *Example (Pranav)*

“P was born on 23 October 1991. He came to the UK as a school boarder in August 2001 (tax year 01-02). He is domiciled outside the UK. He has stayed in education in the UK for every tax year since.

99-00 Not Resident	05-06 Resident
00-01 Not Resident	06-07 Resident
01-02 Resident	07-08 Resident
02-03 Resident	08-09 Resident
03-04 Resident	09-10 Resident
04-05 Resident	

In 08-09 P has foreign income of £300,000 and he claims to use the remittance basis in that year. He is a long-term resident in the UK as he has been UK resident for eight years, but as he is under 18 he may use the remittance basis in 08-09 without paying the remittance basis charge.

In October 2009 (tax year 2009-10) P turns 18. He has foreign income of £400,000. If he wishes to claim the remittance basis for that tax year he will be liable to the remittance basis charge.”

The (implausibly large) income specified is of course strictly irrelevant to the application of the remittance basis charge: the position is the same whatever is P’s income.

42 See 9.1 (Residence throughout tax year).

#### 43 **RDRM32220 Counting years of UK residence (seven out of nine)** [Jan 2019]

...

##### *Example (Dominic)*

D, a non-dom, is resident in the UK for the tax year 2008-2009.

- D came to the UK in May 1999 (99-00 tax year)
- He left to live in Spain in January 2001 (00-01 tax year)
- He returned to the UK on 12 October 2002 (02-03 tax year)
- He left to work in the Republic of Ireland on 29 April 2004 (04-05 tax year)
- He then returned to the UK on 16 May 2006 (06-07 tax year) and has been resident here since.

D is resident in the UK for the current tax year (08-09). He has chargeable overseas earnings of £150,000 in that year, paid into his Spanish bank account and he does not remit anything. For the last nine tax years he has been resident/not resident as follows:

1 99-00 Resident	6 04-05 Resident (year he went to Ireland)
------------------	--

It may be useful to set out an aide memoire for when the 7/12 year tests begin to apply. Assuming a continuous period of UK residence:

<b>UK residence from</b>	<b>7-year test met</b>	<b>12-year test met</b>
2008/09	2015/16	2020/21
2009/10	2016/17	2021/22
2010/11	2017/18	2022/23
2011/12	2018/19	2023/24
2012/13	2019/20	2024/25
2013/14	2020/21	2025/26
2014/15	2021/22	2026/27
2015/16	2022/23	2027/28
2016/17	2023/24	2028/29
2017/18	2024/25	2029/30
2018/19	2025/26	2030/31
2019/20	2026/27	2031/32
2020/21	2027/28	2032/33
2021/22	2028/29	2033/34
2022/23	2029/30	2034/35

A 17-year residence test (and £90k remittance basis charge) was introduced in 2015, but lasted only 2 years as it was made redundant by the introduction of the 15-year deemed domicile rule in 2017. I previously discussed some policy considerations here,<sup>44</sup> but omit that now as the point is of historical interest only.

In *Radice v HMRC*<sup>45</sup> the taxpayer's advisers ticked the box in the 2015/16 tax return stating that he had been UK resident for 12 or more of the preceding 14 tax years. However, they should have ticked the box indicating that he was resident in the UK for 17 out of 20 tax years. Also, the date of entry to the UK in box 27 of the return was not completed. Accordingly, Mr Radice paid a remittance basis charge of £60k instead of £90k. But he had not been careless (and so was not subject to a penalty):

---

2 00-01 Resident (year he went to Spain)	7 05-06 Non Resident
3 01-02 Non Resident	8 06-07 Resident
4 02-03 Resident	9 07-08 Resident
5 03-04 Resident	

D is a long term resident; if he claims the remittance basis in 2008-2009 he will be liable for the remittance basis charge.”

44 See the 2018/19 edition of this work, para 11.12 (Remittance Basis Charge).

45 [2021] UKFTT 227 (TC) at [18].

In a situation such as this, it is the action of a reasonable and prudent taxpayer to obtain advice on the basis for and computation of charges to tax under the complex “remittance” rules applicable to non-UK domiciled person and, accordingly, it is reasonable for the taxpayer to rely on that advice. In the context of this understandable and good sense reliance and the difficulties for taxpayers in understanding and keeping up to date with such rules, we do not consider that Mr Radice was careless in failing to spot that an error had been made in his return which lead to an underpayment of tax. ... Mr Radice reviewed the return. He would have seen the statement in box 31 that he had been resident for 12 out of the last 14 tax years which, on its own terms, was correct. We do not consider that he could reasonably have been expected to realise that other boxes in that section of his return needed to be filled in (or what the significance of the information required in the other boxes is) when his advisers, on whom he reasonably relied, had selected box 31 and he knew that the information in it was correct.

But SA109 box 23.3 (2020/21) now requires the taxpayer to enter “the number of years you’ve been resident in the UK in the previous 20 years”, so this particular mistake is not likely to recur.

### 16.12.2 *Nomination of income/gains*

Section 809C ITA provides:

- (1) This section applies to an individual for a tax year if the individual-
  - (a) is aged 18 or over in that year, and
  - (b) meets the 12-year residence test or the 7-year residence test for that year.
- (2) A claim under s.809B by the individual for that year must contain a nomination of the income or chargeable gains of the individual for that year to which s.809H(2) is to apply.

Following the statutory terminology,<sup>46</sup> I refer to the income/gains so nominated as “**nominated income/gains**”. Section 809C continues:

---

46 Section 809H(3) ITA provides: “‘Nominated’ income or chargeable gains means income or chargeable gains nominated under s.809C in the individual’s claim under s.809C for the relevant tax year.” The definition is repeated in s.809I(3) and s.809J(3) ITA. (If a chapter-wide definition had been used the repetition would have been unnecessary.)

- (3) The income or chargeable gains nominated must be part (or all) of the individual's foreign income and gains for that year.
- (4) The income and chargeable gains nominated must be such that the relevant tax increase does not exceed
  - (a) for an individual who meets the 12-year residence test for that year, £60,000;
  - (b) for an individual who meets the 7-year residence test for that year, £30,000.

Section 809C(5) ITA provides a commonsense definition of "the relevant tax increase":

"The relevant tax increase" is-

- (a) the total amount of income tax and capital gains tax payable by the individual for that year, minus
- (b) the total amount of income tax and capital gains tax that would be payable by the individual for that year apart from s.809H(2).

EN Amendments to the Remittance Basis Charge explains the reason for the cap in s.809C(4):

This stops an individual from nominating too much income and gains and as a result paying a remittance basis charge of more than £30,000 [now the applicable amount].

The legislation does not say what happens if an individual fails to nominate any income/gains or if they nominate income/gains but the relevant tax increase exceeds the applicable amount. The RDR Manual provides:

**32310 Nomination of foreign income and gains - overview** [Jan 2019]

The individual may nominate either foreign income or foreign chargeable gains or a combination of the two. Both the claim and the nomination should be viewed as component parts of the same claims process and should not be separated. Any claim that does not include a nomination is not valid.

The following example from the RDR Manual shows how complicated this will be:

**32350 Relevant tax increase - Example 2** [Apr 2019]

Relevant tax increase: Example 2 (Lorna)

L, a non domiciled long-term UK resident makes a claim to use the remittance basis in 2011 and must pay the £30,000 remittance basis charge (RBC). She is a higher rate taxpayer paying tax at 40%, with UK source employment income of £80,000.

She also has £150,000 of interest (relevant foreign income) from an overseas investment in Country X paid to her.

Because nominated income is taxed on the “arising basis”, a remittance basis user is in the same position as any other UK resident person and is, subject to the ordinary rules that apply in such cases (s.18 TIOPA 2010), entitled to credit against UK tax for certain amounts of overseas tax that is payable on that same income.

Under the domestic law of Country X in which the investment was made, the interest was paid after deduction of 15% withholding tax. The Double Taxation Agreement between the UK and Country X provides that tax on this interest may be retained in the “source” country at the rate of 15%.

L is therefore entitled to a credit, which she takes in the form of foreign tax credit relief (FTCR), against UK tax for the tax withheld in the other country. ...

*Foreign tax credit relief calculation – general principles*

Ignoring the remittance basis issue for the moment:

L has received foreign interest of £150,000, on which Country X’s tax of £22,500 (15% as provided for in the DT treaty) has been deducted.

L’s income is chargeable to tax at 40%. The UK tax charge in respect of this £150,000 would be £60,000 (40%×£150,000).

If she claims foreign tax credit relief her net liability to UK tax after the foreign tax credit relief will be:

$$£60,000 \text{ minus } £22,500 = £37,500$$

*Relevant tax increase including FTCR*

Foreign tax credit relief is only due to the extent that the foreign income on which it is given is brought into the UK tax charge. So for remittance basis users, relief for foreign tax paid on foreign income chargeable on the remittance basis is given when that income is remitted.

However for remittance basis charge payers like L, any foreign income which she nominates is chargeable on the arising basis so foreign tax credit relief can be given in relation to that nominated income.

Because the “relevant tax increase” must be £30,000, L will need to nominate £120,000 of her foreign interest if she wishes to create an overall remittance basis charge of £30,000.

- FTCR calculation

Foreign tax that relates to the £120,000 nominated (at 15%)	£18,000
UK tax on £120,000 (at 40%)	£48,000
Net liability to UK tax after the FTCR (£48,000 minus £18,000)	£30,000

(refer to note 2 below)

- Relevant tax increase calculation

To determine the relevant tax increase we must complete two calculations.

The first calculation (a) is of the total amount of L’s income tax and capital gains

tax actually payable in the year, as a remittance basis user and RBC payer. The second calculation (b) is the total amount of L’s income tax and capital gains tax that would be payable by L in the year as a remittance basis user less the tax charged on the nominated foreign income or foreign gains.

The relevant tax increase is the total of calculation (a) minus calculation (b)

	<u>Calculation (a)</u>		<u>Calculation (b)</u>	
Non-savings income				
20% <sup>1</sup> on	<b>£34,800</b>	= <b>£6,960</b>	<b>£34,800</b>	= <b>£6,960</b>
40% on	<b>£45,200</b>	= <b>£18,080</b>	<b>£458,135</b>	= <b>£18,080</b>
	<u>£80,000</u>	<u>£25,040</u>	<u>£40,000</u>	<u>£25,040</u>
Savings				
40% on	£120,000 <sup>2</sup>	= <b>£30,000</b>	Note 4	
<b>Total Income Tax Due</b>	<b>£55,040<sup>3</sup></b>		<b>£25,040<sup>4</sup></b>	

<sup>1</sup> Rates and thresholds used here for the purposes of this example only; use the rates applying in the relevant tax year.

<sup>2</sup> This is the foreign income that is nominated, and charged to tax on the arising basis in the year. FTCR is given, which has reduced the tax to £30,000.

<sup>3</sup> As a remittance basis user, L has no personal allowances due.

<sup>4</sup> L is a remittance basis user so would not be subject to tax on her unremitted foreign income, nor would any FTCR be due.

<b>Relevant Tax Increase is</b>	Total (a)	£55,040
less	Total (b)	<u>£25,040</u>
	<b>Total</b>	<b><u>£30,000</u></b>

March 2009 Q&As provides:

**Q3:** HMRC have indicated that individuals do not have to specify which account the nominated income comes from, and from this it could be inferred that without further disclosure of the particulars of the account the taxpayer may be at risk of “tainting” every other source of income of that type. For example if an individual has an account with one bank in Jersey and another bank in a different jurisdiction, he could nominate bank interest on his Jersey account, so that it would be obvious that if he remitted income from his other account, he might not fall foul of re-characterisation provisions. However, this may not be the case if he had three different accounts with the same bank in Jersey and he wishes to nominate income from one of those accounts without disclosing the account number of that account. Can HMRC clarify what their approach to this will be?

**A:** It is up to the individual to decide how much information to give HMRC on their Self Assessment returns in order to identify the source of the nominated income or gains; if, as in this example, there is more

than one account the individual should provide sufficient detail to distinguish between them and identify the “nominated” account. That might be the entire account number, or the account “name”, or some other unique identifying feature of the account.

The RDR Manual 32380 provides:

**Completing the SA Return - How is this done in practice?** [Jan 2019]

SA109 ‘Residence, remittance basis etc’ is the supplementary page to the SA100 main tax return for remittance basis users to complete under Self Assessment.

There is a box to claim the remittance basis on the SA109 and two boxes where the ‘amount of nominated income’ and the ‘amount of nominated capital gains’ must be entered. The amount nominated can be either income or gains or a combination of the two. The source(s) of the amount nominated is the individual’s personal choice.

When either or both of these boxes are completed the SA109 notes say that details of the nominations are to be shown in the “Any other information” box.

The required information is:

- the precise amounts of income and gains that have been nominated, (this should include the country of origin and the type and source of the income)
- the computation of the gain (if applicable)
- the exchange rates used<sup>47</sup>
- the calculation of the tax due in relation to the nominated income and gains.

Also if there have been deductions for expenses or losses from either foreign income or foreign gains in arriving at the final taxable amount, full details of the amounts and nature of those expenses or losses must also be provided.

All of this information is required to validate the nomination or nominations that have been made.

### 16.12.3 *Nominated income/gain charge*

Section 809H(2) ITA provides:

Income tax is charged on nominated income, and capital gains tax is

---

<sup>47</sup> See 91.8 (Nominated income/gains: Currency conversion date).

charged on nominated chargeable gains, as if s.809B did not apply to the individual for the relevant tax year (and neither did s.809D).

This disapplies the remittance basis, so nominated income/gains are taxed on the arising basis. I refer to this as the “**nominated income/gains charge**”.

EN FB 2008 provides:

14. This charge is in addition to the tax liability for the year in question on any income and gains remitted to the UK, and any UK income or gains taxed on the arising basis. The £30,000 [now the applicable amount] will be paid on nominated income and gains not remitted to the UK in the year. (These income and gains are called “nominated” income and gains because the taxpayer is free to nominate the income and gains not remitted to the UK in the year on which tax of £30,000 is payable. For example, this could be £75,000 of unremitted foreign deposit interest on which UK tax was due at 40 per cent, so leading to an income tax charge of £30,000.)

#### 16.12.4 *Remittance basis deficit charge*

The removal of the remittance basis for nominated income/gains might not yield the desired additional tax for various reasons. The individual might under-nominate, ie, they might not nominate enough income/gains. There is no requirement to nominate enough to give rise to a IT or CGT charge of the applicable amount. Indeed, it is not always possible to know how much that would be. One could nominate just £1, as long as what is nominated is foreign income/gains. HMRC agree. The RDR Manual 32320 provides:

##### **32320 Making a Nomination** [Jan 2019]

###### *Insufficient nomination*

Although an individual may choose to make an insufficient nomination RDRM32360 they must have foreign income and/or foreign chargeable gains from the tax year such that they can nominate something, even if only £1. This fulfils the mandatory requirement that a nomination **must** be made when making the claim.

###### *Completing the self-assessment return*

All claims and nominations are made on the individual’s self assessment tax return. The minimum amount that can be nominated is £1 of foreign income or gains for the claim to be valid. Where a claim to the remittance basis is made under s809B but no nomination of either

foreign income or capital gains is made the claim is invalid. ...<sup>48</sup>

According to EN Amendments to the Remittance Basis Charge, this was done to enhance confidentiality:

7. The legislation provides the option for those who can claim the remittance basis not to disclose anything about their unremitted income or gains as they can make a claim with a nominal £1 amount and do not have to specify what further foreign income or gains remain unremitted.

But it may not be in the interest of the taxpayer to under-nominate, and the confidentiality is limited because HMRC are entitled to make further enquiries to check a taxpayer's tax position.

The removal of the remittance basis for nominated income/gains might not yield the desired additional tax where the individual has some tax reliefs (eg loss relief, interest relief, DTRs, etc).

Section 809H(4) ITA goes on to ensure that HMRC will receive their desired amount of tax:

If the relevant tax increase would otherwise be less than the applicable amount,<sup>49</sup> subsection (2) has effect as if—

- (a) in addition to the income and gains actually nominated under s.809C in the individual's claim under s.809B for the relevant tax year, an amount of income had been nominated so as to

---

48 Similarly March 2009 Q&As provides:

**Q7:** The question has arisen whether less than £1 (ie pence) can be nominated income. Given current interest rates there is concern that accounts specifically set up to generate nominated income may not generate £1 before 6 April 2009. The concern expressed is that because pence are rounded down on tax returns, it might be your view that there is no nominated income?

**A:** The minimum nomination of income or gains required to calculate the relevant tax increase is £1. This is the minimum figure to be declared on the relevant supplementary page of the Tax Return."

But where is the statutory authority for HMRC to disregard figures under £1?

49 Section 809H(5B) ITA provides: "The applicable amount" is—

- (a) if the individual meets the 12-year residence test for the relevant tax year, £60,000;
- (b) if the individual meets the 7-year residence test for the relevant tax year, £30,000.

- make the relevant tax increase<sup>50</sup> equal to the applicable amount,  
and
- (b) the individual's income for that year were such that such a nomination could have been made (if that is not the case).

I refer to s.809H(4) as the “**deficit charge**”. The deficit charge is a tax on deemed income (deemed nominated income) and not on any actual income of the taxpayer (if indeed the taxpayer has other income). Section 809H(6) ITA makes this clear (if necessary):

Nothing in subs.(4) affects what is regarded, for the purposes of s.809I or 809J, as nominated under s.809C.

I use the term “**remittance basis claim charge**” to mean the two distinct (albeit related) charges:

- (1) the nominated income/gains charge, under s.809H(2) and
- (2) the deficit charge, under s.809H(4)

It might be more accurate to refer to remittance basis claim *charges* (in the plural). However for many purposes it does not matter that there may be two charges rather than one, (especially since in practice the second may not often arise) and it is convenient to use the singular label for them both.

### 16.12.5 *Interaction with Gift Aid*

Tax paid under the remittance basis deficit charge may be used to frank a gift aid payment. The RDR Manual provides:

#### **32450. Charitable Donations and Gift Aid** [Nov 2015]

Chapter 2 of Part 8 ITA 2007 provides relief from tax for some gifts of

---

<sup>50</sup> Section 809H(5)(5B) ITA repeats the definition of “the relevant tax increase” from s.809C(5) (5A):

“‘The relevant tax increase’ is—

- (a) the total amount of income tax and capital gains tax payable by the individual for the relevant tax year, minus
  - (b) the total amount of income tax and capital gains tax that would be payable by the individual for the relevant tax year apart from subsection (2).
- (5A) The references to income tax in subsection (5) do not include income tax under s.424 (gift aid).”

If there had been a chapter-wide definition the repetition would have been unnecessary.

money to charities that are made by individuals. This is known as ‘Gift Aid’. One part of the Gift Aid rules is that the donor must pay at least as much UK income tax and/or capital gains tax in the tax year as the amount that is repayable to the charity...

### **The Remittance Basis Charge**

In exactly the same way as any other amount of income tax or capital gains tax, amounts of tax that are paid to satisfy the Remittance Basis Charge can be used to frank Gift Aid donations. That is because the remittance basis charge is ‘income tax charged’ or ‘capital gains tax charged’ on nominated income and/or gains [for the purposes of s.424(2) ITA]. ...

Tax paid under s.424 ITA does not count towards the remittance basis claim charge. Section 809H(5A) ITA provides:

The references to income tax in subsection (5) do not include income tax under s.424 (gift aid).

The RDR Manual provides:

### **32450. Charitable Donations and Gift Aid [Jan 2019]**

...

- Section 414(2)(a) ITA 2007 treats a qualifying donation as if it had been made after deduction of basic rate income tax.
- If the donor has not paid enough UK income tax and capital gains tax to ‘frank’ the gift aid donations in a tax year, a further amount of income tax is charged to make up the shortfall (s.424 ITA 2007).

... However, where the individual has:

- chosen to use the remittance basis, and
- claimed Gift Aid tax relief

any income tax that is charged under s. 424 ITA 2007 is not taken into account when calculating the ‘relevant tax increase’ (see RDRM32330) that is required to produce the remittance basis charge (s.809C(5A) ITA 2007 and s.809H(5A)).

### **Effect**

No matter how it is calculated, the Remittance Basis Charge is always £30,000 [or, in certain circumstances, from 6 April 2012, £50,000] – see RDRM32300.

For s.424 ITA, see Kessler, Wong & Birkbeck, *Taxation of Charities and Nonprofit Organisations* (12th ed, 2019/20), para 15.43 (Donor pays

insufficient tax).<sup>51</sup>

#### 16.12.6 *How much to nominate?*

It is important not to remit nominated funds to the UK. From that point of view it is convenient to under-nominate, ie nominate a nominal £1 only.

On the other hand, taxpayers who want to offset the remittance basis charge against foreign tax will want to nominate income/gains on which the foreign tax is at least equal to the applicable amount, or as close to the figure as possible; that requires a full nomination and some care in the choice of income/gains which are nominated.

#### 16.12.7 *Claim if residence in doubt*

A person may be unsure whether or not they are UK resident in a year but know that they would be a long-term resident if actually UK resident in that year. That person may if appropriate make a remittance basis claim in that year, for the avoidance of doubt, and argue the residence position at leisure; if they are eventually held to be UK resident the remittance basis claim charge is due, but if non-resident the sum is not due. Nothing is lost by making the claim.<sup>52</sup> Section 809B does not apply unless the individual meets the conditions of s.809B(1)(a) and (b) in the year.

Alternatively a person may know that they are UK resident in a year but not know if they are a long-term UK resident in that year (because they are unsure whether or not they were resident in one or more earlier years). That person should make a remittance basis claim but not nominate any income/gains. The claim is valid if they are not long-term UK resident. The claim is invalid if they are long-term UK resident, so the remittance basis claim charge is not due (unless they proceed to make a new election and nomination).

On the other hand a remittance basis claim is effective (and the remittance basis charge payable) even if the individual has less than £2k unremitted income/gains, and so would qualify as a sub-£2k taxpayer. That may be an expensive box to tick in error!

---

51 Online version <https://www.taxationofcharities.co.uk>

52 Similar points arise if a person is unsure about their domicile in a year, but in practice that would be less common because domicile is generally ascertainable.

### 16.12.8 Claim charge: Foreign tax credit

EN FB 2008 provides:

17. As the RBC consists of income tax or CGT paid on the arising basis ... the tax should be recognised as tax (on income or capital gains, as the case may be) for the purposes of our double taxation agreements.

The proposal in the Draft Clauses published January 2008 was for a simple charge of a fixed amount. This would not have qualified as a credit against foreign tax because it was not a tax on income or gains. HMRC presumably agreed, as the provisions were then recast in order that:

- (1) The provisions took the form (so far as possible) of a charge on income or gains but
- (2) the provisions had the effect (so far as possible) of a fixed charge.<sup>53</sup>

Article 24(1) UK/US DTA provides:

In accordance with the provisions and subject to the limitations of the law of the United States (as it may be amended from time to time without changing the general principle hereof), the United States shall allow to a resident or citizen of the United States as a credit against the United States tax on income

- (a) the income tax paid or accrued to the UK by or on behalf of such citizen or resident ...

It is suggested that the *nominated income/gains charge* can in principle be set against foreign tax since it is an income tax or CGT. However the remittance basis *deficit* charge is not a charge on actual income, and cannot be set against foreign tax. HMRC agree. EN Amendments to the Remittance Basis Charge provides:

16. The individual claiming the remittance basis might decide to nominate only £50,000 of bank interest under s.[809C(2)] and pay £20,000 of the £30,000 under s.[809H(2)] (assuming higher rate tax is due on all the £50,000). Section [809H(4)] would then apply with the effect that further income of £25,000 is treated as nominated to bring a further £10,000 of income tax into charge. However if the individual

---

53 See too 16.12.10 (Claim charge: Split year).

intended claiming credit for all or part of the £30,000 under a DTA then DTA relief will only be due on the income or gains actually nominated under s.[809C(2)] – £50,000 of income and £20,000 of income tax in this example. The income tax paid on income treated as nominated under s.[809H(4)] = £25,000 of income and £10,000 of income tax in this example, will not qualify for relief under DTAs as it is not tax on specific nominated income.

It follows that a careful choice of what income/gains to nominate is important, because (if foreign tax allows credit for the UK tax) that can make up to £90k difference to the foreign tax liability.

The RBC might have been regarded as a fixed levy, merely disguised as an income tax by sleight of hand, but in America, the IRS have after some delay<sup>54</sup> accepted the HMRC view. The question is of course one for foreign law, not UK law. The US ruling made August 2011 provides:

**Rev. Rul. 2011-19**

**ISSUE**

Whether a credit is allowable under section 901 of the Internal Revenue Code for the Remittance Basis Charge (RBC) of £30,000.<sup>55</sup>

[The ruling outlined the UK tax rules and continues]

**LAW AND ANALYSIS**

Section 901 generally allows a credit for the amount of any income, war profits and excess profits tax (collectively, an income tax) paid or accrued during the taxable year to any foreign country or to any possession of the United States. A foreign levy is an income tax if and only if (i) it is a tax and (ii) the predominant character of that tax is that of an income tax in the US sense. §1.901-2(a)(1).

**A. Single Levy or Separate Levies**

Each levy must be analysed separately to determine if it is an income tax under section 901. §1.901-2(d)(1). For purposes of section 901, whether a single levy or separate levies are imposed by a foreign country depends on US principles and not on whether foreign law imposes the levy or levies in a single or separate statutes. Where the base of a levy is different in kind, and not merely in degree, for different classes of persons subject to the levy, the levy is considered for

---

<sup>54</sup> One would like to know what discussions took place behind the publication of this statement. Perhaps in 2041 the relevant files will be made public.

For HMRC's opening shot in this debate see BN 107 [2008] STI (20 March 2008) annex

<sup>55</sup> Author's footnote: The increase in the remittance basis charge in 2012 will not affect the reasoning.

purposes of section 901 to impose separate levies for such classes of persons. For example, regardless of whether they are contained in a single or separate foreign statutes, a foreign levy identical to the tax imposed under section 871(b) on a US nonresident alien individual's income that is effectively connected with the conduct of a US trade or business is a separate levy from a foreign levy identical to the tax imposed by section 1 on the income of a US citizen or resident, as the tax on nonresidents has a more limited scope and therefore is different in kind from the tax on the worldwide income of US citizens and residents.

Where foreign law imposes a levy that is the sum of two or more separately computed amounts, and each such amount is computed by reference to a separate base, separate levies are considered, for purposes of section 901, to be imposed. Amounts are not separately computed if they are computed separately merely for purposes of a preliminary computation and are then combined as a single base. §1.901-2(d)(1). For example, where excess deductible expenses allocated to one type of income are applied to reduce other types of income, a single levy exists, since despite a separate preliminary computation the bases are combined before computing the tax due. See §1.901-2(d)(3), Examples (3), (4), and (5).

### **1. The Remittance Basis and the Arising Basis of Taxation Are Separate Levies**

Under both the arising basis and the remittance basis of taxation, a non-domiciliary is subject to tax on UK-source and non-UK-source income and gains. However, under the arising basis, a non-domiciliary is subject to tax on worldwide income and gains that arise or accrue in a particular taxable year; while under the remittance basis, a non-domiciliary is subject to tax only on UK-source income and gains and on non-UK-source income or gains that are remitted in a particular taxable year, whether the non-UK-source income or gains arise or accrue in the year remitted or in an earlier year. Thus, the bases of these levies are different in kind, and not merely in degree; therefore, the arising basis and remittance basis of taxation are considered for purposes of section 901 to impose separate levies.

### **2. The RBC, in Combination with the Remittance Basis of Taxation, is a Single Levy that is a Separate Levy**

All non-domiciliaries who elect the remittance basis of taxation are subject to tax on their UK-source and remitted non-UK-source income and gains. In addition, long-term non-domiciliaries must pay the RBC on nominated but unremitted non-UK-source income and gains (and, if the amount nominated generates a tax charge of less than £30,000, on income or gains realized but not nominated and on imputed income such that the tax charge equals £30,000). Losses and deductions allocated to UK-source income or gains, remitted

non-UK-source income or gains, or nominated but unremitted non-UK-source income or gains may offset income or gains in another category in determining the amount of the long-term non-domiciliary's taxable income. Therefore, under §1.901-2(d)(1), despite a separate preliminary computation, the long-term non-domiciliary's UK-source income or gains, remitted non-UK-source income or gains, and unremitted non-UK-source income or gains giving rise to the RBC are combined in determining the long-term non-domiciliary's taxable income; therefore, the tax imposed on the sum of the long-term non-domiciliary's three separately computed amounts of income constitute a single levy (the Long-Term Non-Domiciliary (LTND) Levy).

#### **A. The LTND Levy Is a Tax in the US Sense**

A foreign levy is an income tax if and only if it is a tax and the predominant character of that tax is that of an income tax in the US sense. §1.901-2(a)(1). A foreign levy is a tax if it requires a compulsory payment pursuant to the authority of a foreign country to levy taxes. §1.901-2(a)(2)(i). The LTND Levy is a tax because it is required to be paid pursuant to the authority of the government of the UK to levy taxes.

#### **A. The Predominant Character of the LTND Levy Is that of an Income Tax in the US Sense**

The predominant character of a foreign tax is that of an income tax in the US sense if the tax is likely to reach net gain in the normal circumstances in which it applies, and liability for the tax is not dependent, by its terms or otherwise, on the availability of a credit for the tax against income tax liability to another country. §1.9012(a)(3). Liability for the LTND Levy is not dependent on the availability of a credit for the LTND Levy against income tax liability to another country.

Thus, whether the LTND Levy has the predominant character of an income tax depends on whether it is likely to reach net gain in the normal circumstances in which it applies. A foreign tax is likely to reach net gain in the normal circumstances in which it applies if and only if the tax, judged on the basis of its predominant character, satisfies each of the realization, gross receipts, and net income requirements set forth in §1.9012(b)(2), (b)(3), and (b)(4), respectively.

##### **1. Realization**

A foreign tax satisfies the realization requirement if, judged on the basis of its predominant character, it is imposed upon or subsequent to the occurrence of events that would result in the realization of income under the income tax provisions of the Code. §1.901-2(b)(2)(i)(A). A foreign tax that, judged on the basis of its predominant character, is imposed upon the occurrence of realization or pre-realization events described in §1.901-2(b)(2)(i) satisfies the realization requirement even if it is also imposed in some situations upon the occurrence

of events not described in that paragraph. For example, a foreign tax that, judged on the basis of its predominant character, is imposed upon the occurrence of realization events satisfies the realization requirement even though the base of that tax also includes imputed rental income from a personal residence used by the owner. §1.901-2(b)(2)(i).

The UK-source and remitted non-UK-source income and gains of a long-term non-domiciliary electing the remittance basis of taxation generally are computed on the basis of amounts that satisfy the realization requirement. In addition, the income or gains nominated for purposes of the RBC must be part (or all) of the non-UK-source income and gains arising or accruing in that taxable year. Income tax is charged on nominated income, and capital gains tax is charged on nominated gains, as if the arising basis applied for the relevant taxable year. In other words, the nominated income and gains are subject to tax, even though they have not been remitted in the taxable year. Thus, the RBC is imposed on nominated income or nominated gains that have been realized or accrued in the taxable year.

If the long-term non-domiciliary realizes or accrues, but fails to nominate, sufficient income or gains, with the result that the tax charge on nominated income would be less than £30,000, an amount of income or gains is deemed to be nominated so as to make the tax charge equal £30,000. Thus, income or gains that have been realized or accrued but not nominated will be subject to the RBC. If a long-term non-domiciliary elects the remittance basis but does not have sufficient realized or accrued income or gains to make the tax charge equal £30,000, the long-term non-domiciliary is deemed to have sufficient realized or accrued income or gains and to have nominated such imputed income or gains to make the tax charge equal £30,000.

Section 1.901-2(b)(2)(i) states that, as provided in §1.901-2(a)(1), a tax either is or is not an income tax, in its entirety, for all persons subject to the tax; therefore, a foreign tax on a base that includes imputed rental income will satisfy the realization requirement even though some persons subject to the tax will on some occasions not be subject to the tax except with respect to such imputed income. However, a foreign tax based only or predominantly on such imputed income would not satisfy the realization requirement. Although it is possible for a long-term non-domiciliary to elect the remittance basis without having sufficient non-UK-source income or gains to support a £30,000 tax charge, in which case the base of the tax would include imputed income or gains, it is highly unlikely that substantial numbers of long-term non-domiciliaries in this situation would elect to be taxed on the remittance basis. Accordingly, it is reasonable to conclude that the RBC is not based only or predominantly on such imputed income or gains. The RBC in general is imposed on realized income or gains, whether nominated by the long-term

non-domiciliary or considered by the UK statute to have been nominated. Thus, judged on its predominant character, the LTND Levy meets the realization test.

### **1. Gross Receipts**

A foreign tax satisfies the gross receipts requirement if, judged on the basis of its predominant character, it is imposed on the basis of gross receipts or gross receipts computed under a method that is likely to produce an amount that is not greater than fair market value. §1.901-2(b)(3)(i). A foreign tax that, judged on the basis of its predominant character, is imposed on the basis of amounts described in §1.9012(b)(3)(i) satisfies the gross receipts requirement even if it is also imposed on the basis of some amounts not described in that paragraph. As is the case with income and gains that are taxed under either the arising basis or the remittance basis, nominated income and gains subject to the RBC generally are based on gross receipts. Therefore, the LTND Levy meets the gross receipts test.

### **1. Net Income**

A foreign tax satisfies the net income requirement if, judged on the basis of its predominant character, the base of the tax is computed by reducing gross receipts to permit recovery of the significant costs and expenses (including significant capital expenditures) attributable, under reasonable principles, to such gross receipts; or recovery of such significant costs and expenses computed under a method that is likely to produce an amount that approximates, or is greater than, recovery of such significant costs and expenses. §1.901-2(b)(4)(i). Since the LTND Levy is imposed on UK-source income and gains, remitted non-UK-source income and gains, and nominated but unremitted non-UK-source income and gains, all of which consist of gross receipts less costs and expenses, the LTND Levy satisfies the net income requirement.

### **1. Conclusion**

Because the LTND Levy is likely to reach net gain in the normal circumstances in which it applies, it has the predominant character of an income tax in the US sense.

### **HOLDING**

Because the LTND Levy is a tax (within the meaning of §1.901-2(a)(2)), and its predominant character is that of an income tax in the US sense, the LTND Levy, including the Remittance Basis Charge (RBC) of £30,000, is an income tax for which a credit is allowable under section 901. However, a credit for the LTND Levy will be available only if the other legal requirements for obtaining a foreign tax credit are satisfied. For example, an amount paid is treated as a compulsory payment of income tax only to the extent the taxpayer applies the substantive and procedural provisions of foreign law, including elective provisions such as those available under UK law relating to the LTND Levy, in such a way as to reduce, over time, the taxpayer's reasonably expected liability

under foreign law for income tax. §1.901-2(e)(5).

Taxpayers generally may rely upon revenue rulings to determine the tax treatment of their own transactions and need not request a ruling that would apply the principles of a published revenue ruling to the facts of their own particular cases. However, because each revenue ruling represents the conclusion of the Internal Revenue Service (IRS) as to the application of the law to the specific facts involved, taxpayers, IRS personnel, and others concerned are cautioned against reaching the same conclusion in other cases unless those cases present facts and circumstances that are substantially the same as those in the revenue ruling. §601.601(d)(2)(v)(e). Accordingly, because the provisions of UK law described in this revenue ruling are facts on which this revenue ruling bases its holding, a taxpayer may not rely on the revenue ruling if the relevant provisions have been amended in any material respect, and the taxpayer is responsible for determining whether any such modification has occurred.<sup>56</sup>

The US ruling concludes with a paragraph which one would not find in the UK:

**DRAFTING INFORMATION**

The principal author of this revenue ruling is Teresa Burridge Hughes of the Office of Associate Chief Counsel (International). For further information regarding this revenue ruling, contact Ms. Hughes at (202) 622-3850 (not a toll-free call).

What an good thing it would be if in the UK HMRC statements and regulations similarly identified a principal author who would take responsibility - both credit for the good and blame for mistakes.<sup>57</sup>

16.12.9 *Individual treaty non-resident*

The RDR Manual provides:

**RDRM32250 Dual residents - treaty non-resident** [Jan 2019]

It is possible for individuals to be resident both in the UK and in another country or countries in a tax year. In such a case we look to the provisions of existing Double Taxation Agreements (DTAs) to determine in which country the individual is resident for treaty purposes. So a person may be resident in the UK under UK law, but regarded as

---

<sup>56</sup> <http://www.legalbitstream.com>

<sup>57</sup> Contrast the rule that a senior accounting officer of large companies must take a personal responsibility for the company's tax returns.

‘treaty resident’ elsewhere and consequently treated for tax purposes as ‘not resident’ in the UK.

An individual who is, under the terms of a DTA, resident in the other country or territory but is also a long-term resident RDRM32200 in the UK (that is someone who has been resident in the UK in at least seven out of the previous nine tax years) and claims the remittance basis is, if their un-remitted foreign income and gains is £2,000 or more, liable to pay the £30,000 remittance basis charge, or for 2012/13 or later the £30,000 or £50,000 remittance basis charge.

It is considered that DT relief is in principle available against the nominated income/gains charge, but not against the remittance basis deficit charge. The effect of claiming DT relief against nominated income/gains is to reduce the remittance basis claim charge on the nominated income/gains, but to increase the deficit charge by the same amount.

This certainly defeats the spirit of any DTA. It may also breach the DTA itself. But the intention of parliament is clear, and parliament may breach DTAs.<sup>58</sup> How our treaty partners will react to this will be interesting to see.

The RDR Manual continues:

**32250 Dual residents - treaty non-resident** [Jan 2019]

...

In determining the number of years in which an individual has been resident in the UK for the purposes of the long-term resident provisions, you count all years where the individual is resident in the UK under UK domestic law even if the individual was treaty resident in another territory in some or all of those years.

This is correct.<sup>59</sup> The RDR Manual continues with some tax planning advice:

In most cases, an individual resident both in the UK and in another country and who under the Double Taxation Agreement with the other country is treated as resident in that other country (for the purpose of applying the provisions of the DTA) will be chargeable to tax in the other country on income and gains that originate in that other country

---

58 See *Padmore v IRC (No.2)* [2000] STC (SCD) 356.

59 See 8.2 (Treaty/UK-law residence).

and not in the UK. The treatment of any income and gains that originate in third countries (not the UK or the country of treaty residence) will depend upon the terms of the DTA between the UK and the country of residence.

Where, exceptionally, an individual is chargeable to tax in the UK on such income or gains, they will need to consider whether a claim for the remittance basis of taxation is in their best interests or if, instead, they should pay tax on the arising basis and in the usual way, claim a credit for the tax charged in the other territory.

#### 16.12.10 *Claim charge: Split year*<sup>60</sup>

There is no split-year rule, so the remittance basis claim charge is payable in full if the remittance basis is claimed, even in split years.<sup>61</sup>

What is the reason for that rule? If the remittance basis claim charge is a tax on the nominated income/gains, the split-year rule should logically apply. The reason is that the charge is intended only to take the form of a tax on the nominated income/gains, and it is intended to have the effect of a fixed charge.

#### 16.12.11 *Claim charge administration*

The RDR Manual provides:

##### **32210 Long-term residents and the remittance basis charge - overview** [Jan 2019]

The remittance basis charge is payable through and collected by the SA regime, and an SA tax return must be filed. The SA109 'Residence, remittance basis etc' supplementary return should be completed and filed for this purpose. Also refer to RDRM32020 'Making a claim'.

So a long-term resident who wishes to claim the remittance basis will need to file an SA tax return in order to pay the remittance basis charge.

Of course the charge could not be collected through PAYE. For one thing, the charge might be a charge to CGT and even if it is income tax it need not be a charge on employment income. Also the claim on which the charge depends will be made in the tax return some time after PAYE

---

60 For the distinct issue of the interaction of split-year reliefs and the definition of "long-term UK resident" see 16.12.1 (7 & 12 year residence tests).

61 See 9.1 (Residence throughout tax year).

is due. HMRC Brief 17/09 provides:

The rules for nominating income and gains upon which the £30,000 is paid, and the rules for identifying what is taxed if those nominated income or gains are later remitted to the UK, can be complex. To help ensure individuals who pay the £30,000 get the right level of customer support [!] from HMRC, we have decided that most individuals who pay the £30,000, or have paid it in the past, will have their tax affairs dealt with in one HMRC office from 2009-10. This will be the CAR Residency office in Castle Meadow, Nottingham.

Customers who are sent a self assessment return by a different office should make the return to the office issuing that return. Once the return has been received by HMRC we will arrange for the individual's tax records to be transferred to the CAR Residency office in Nottingham and advise the individual and any agent, accordingly. Until such time as individuals or their agents receive such a notification they should continue to deal with their current tax office.

#### 16.12.12 *IT payment on account*

The RDR Manual provides:

##### **32390 Payments on account - interaction with the remittance basis charge** [Jan 2019]

The remittance basis charge is tax on nominated income or nominated gains, (or a mixture of the two) ...

To the extent that the remittance basis charge consists of income tax, the payment on account position for those paying the charge is the same as that for any other SA taxpayer. This means their payments on account are based on their income tax liability for the previous year (TMA1970/s59A(1)).

The SA109 'Residence, remittance basis etc' supplementary pages to the SA tax return must be completed to both claim the remittance basis and nominate income or gains and pay the remittance basis charge.

##### *Effect and treatment of income*

If paying part or all of the remittance basis charge in respect of nominated income, then income tax will be due. The amount which has been nominated from income and produced income tax will need to be taken into account and included in the overall calculation of payments on account for the following year.

If an insufficient nomination is made to produce the remittance basis charge of either £30,000 or £50,000 (ITA07/s809H(4)) the additional amount treated as nominated will always produce income tax. This also has a bearing on the payments on account position, even though the additional nominated amount is from an unidentified and unspecified amount of income. The additional amount

nominated from income will automatically produce income tax that will become part of the individual's payment on account calculation for the following year.

*Effect and treatment of capital gains*

Capital gains tax is not included in computing payments on account, so any of the remittance basis charge that is constituted of nominated capital gains tax will not form any part of the following year's payments on account.

*Example (Ricardo)*

R, a non-domiciled long-term resident has an income tax liability of £200,000 for tax year 2007-08. Subsequently he makes payments of £100,000 on 31 January 2009 and on 31 July 2009 on account of his liability for 2008-09.

His tax liability for 2008-09 is £250,000, which includes for the first time the £30,000 remittance basis charge. The remaining £220,000 is income tax on UK sources. R nominated only £21,000 of his foreign income which led to a charge of £8,400 income tax; he also nominated £120,000 foreign chargeable gains which led to a capital gains tax of charge £21,600. Together these amounts make up his £30,000 remittance basis tax charge.

R's payments on account for 2009-10 will be calculated using the £220,000 income tax paid on UK income sources in 2008-09, plus the £8,400 income tax element of the remittance basis charge. This means that he will make payments on account of £114,200 on 31 January 2010 and on 31 July 2010 on account of liability for 2009-10. ...

**32400 Payments on account – nominations involving chargeable gains** [Jan 2019]

Capital gains tax included in the calculation of liability for a year is not included in computing payments on account for the next year. Any part of the remittance basis charge that is tax on nominated foreign gains will not form part of the following year's payments on account.

There is an additional box to complete on the SA109, if a nomination of capital gains is made to ensure that the capital gains tax forming part of the remittance basis charge for a year is ignored for the purpose of calculating the next year's payments on account.

This box is called 'Adjustments to payments on account for capital gains' and must be completed if any nomination of capital gains is made.

This box is not completed if a nomination of income only has been made, as any amount nominated from income will be taken into account in computing the overall payments on account liability for the following year.

The amount entered in the 'Adjustment to payments on account for capital gains' box on the SA109 is required in order for the payments on account to be calculated correctly for subsequent years:

- where a taxpayer calculates their own liability to tax, the amount for capital gains tax entered in the box to adjust payments on account, should be excluded in their calculation of payments on account
- if the tax calculation summary page is used the first payment on account for the following year will not include any part of the amount entered for capital gains tax in the adjustment to payments on account box.

*Example involving an amount of capital gains in the 'Adjustment to payments on account for capital gains' box:*

R, claims the remittance basis in 2008-09 and nominates both foreign income and foreign gains to pay the £30,000 remittance basis charge.

He nominates as follows:

£21,000 of relevant foreign income	@40%	£8,400
£120,000 of foreign chargeable gains	@18%	<u>£21,600</u>
		<u>£30,000</u>

The amount of £21,600 for capital gains tax should be entered in the 'Adjustment to payments on account for capital gains' box as this amount is excluded in calculating payments on account for the following year. Only the £8,400 tax that is chargeable on nominated income is taken into account when calculating the amount due as payments on account.

If the entire amount nominated to pay the remittance basis charge comes from capital gains then the capital gains tax element of the remittance basis charge is not included in the calculation of the payments of account. In this case the full £30,000 from nominated gains will be entered in the 'Adjustment to payments on account for capital gains' box.

### **32410 Payments on account - first-year of paying RBC [Jan 2019]**

The remittance basis charge is only payable from tax years 2008-09 onwards by long-term residents making a claim to use the remittance basis.

For example, if a remittance basis claim is made in 2008-09 and the remittance basis charge is due, then the first year that any payments on account can be considered in relation to the remittance basis charge is 2009-10 unless there is a claim to reduce ...

The fact that their tax liability for 2008-09 will be increased for those paying the remittance basis charge has no effect on the payments on account position for 2008-09 (unless there is a claim to reduce them) but, to the extent that the remittance basis charge is income tax, it will be taken into account when calculating payments on account for 2009-10.

The remittance basis charge for 2008-09 is not due for payment until 31 January 2010 when it can be paid as part of any balancing payment for the year

The same principle applies to the payment on account position in relation to the remittance basis charge for any first year that a claim to the remittance basis is made, and the remittance basis charge is due. Payments on account will not generally be affected until after the first year in which they pay the remittance basis charge (TMA70/s59A(2)).

### **32420 Payments on account: no remittance basis charge due in following year [Jan 2019]**

When the remittance basis of taxation is **not** claimed in a year following one where the remittance basis has been claimed and the remittance basis charge was paid, the amount of income used to pay part or all of the remittance basis charge may be excluded from the calculations of payment on account.

To allow this to happen, a claim to reduce payments on account may be made

on form SA303. Further information on the rules and the time-limits for making a claim to adjust payments on account can be found in the Self Assessment Manual under SAM1110.

**32430 Claim to reduce Payments on Account (PoA) [Jan 2019]**

The payment on account (PoA) position in relation to the remittance basis charge will be affected by any claims to reduce payments on account.

Where the RBC is paid in the previous year on nominated income, the amount feeds through to the individual's payments on account (PoA) for the next year, unless the individual makes a claim to reduce their PoAs on the grounds that their income tax liability for that year will be less than the sum of the two PoAs. For example this could be because they will not claim the remittance basis for the following year. If they subsequently do claim the remittance basis and pay the remittance basis charge in the following year and the income tax due for that year exceeds the sum of the PoAs made we will charge interest on the reduction in the PoA.

This is shown in the example below:

*Stage 1*

The return shows liability to income tax, which includes the RBC, partly or fully paid in respect of nominated income. The payments on account due on 31 January and 31 July are half of the relevant amount of income tax (TMA70/s59A).

For example, Marie-Clare's 2008-09 income tax liability is £55,000, of which £25,000 related to tax on UK source income, and the remainder is the £30,000 RBC (all in respect of nominated foreign income). Nothing is taxed at source. Her payments on account for 2009-10, payable on 31 January 2010 and 31 July 2010 will each be £27,500.

*Stage 2*

If the individual does not intend to use the remittance basis for the following year, and so they will not be subject to the remittance basis charge, they can claim to reduce the PoAs.

In the Marie-Clare example, if she does not think she will claim the remittance basis and so will not need to pay the remittance basis charge for 2009-10 she could reduce her payments on account for 2009-10 to £12,500 each, that is 50% of her 2008-09 income tax liability of £25,000 (if the remittance basis charge is excluded). She will of course still have to consider her other income sources and overall expected income tax liability for the year in making this decision.

*Stage 3*

If the individual subsequently decides to claim the remittance basis and to pay the £30,000 remittance basis charge and a claim to reduce payments on account has been made which resulted in insufficient PoAs being made, then interest will be charged from the due date for the payments on account until a claim to increase payments on account is made or payment is made for the year is paid to stop interest accruing (TMA70/s86).

In the Marie-Clare example, she has claimed to reduce her payments on account to omit the remittance basis charge, so she only makes payments on account of

£25,000 (two lots of £12,500). When she files her 2009-10 self-assessment return her UK income has remained, as expected, at £25,000. However she now decides to claim the remittance basis and so she has to pay the remittance basis charge. As she has erroneously claimed to reduce her payments on account in the year, she will be charged interest on the payments that she should have made, that is, on £15,000 from 31 January 2010 and £15,000 from 31 July 2010 until the date these amounts are paid.

Refer to Self-Assessment Manual – Legal Framework SALF303 for further information on claims to reduce payments on account.

*Example 1 (Eva)*

- E claimed the remittance basis and paid the remittance basis charge in 2008-09, and her income tax liability produces two payments on account for 2009-10 of £120,000 each.
- E has decided that she will not be claiming the remittance basis in 2009-10 so will not pay the remittance basis charge. E makes a claim to reduce the amount due on account of her tax liability to £200,000 due to a drop in income and because she will not pay the remittance basis charge in 2009-10. When E files her 2009-10 return in September 2010 it shows that the tax due on income is £200,000, but these are provisional figures as E is awaiting some details from her foreign bankers in relation to some foreign transactions.
- The two £100,000 payments on account appear “correct” at this stage. In November 2010 E receives the information from her foreign bankers and decides to amend her return and to claim the remittance basis. She nominates some foreign income and has to pay the remittance basis charge of £30,000, all constituting income tax, bringing her total liability to £230,000.
- E will be charged interest on the £30,000 reduction in her payments on account on the grounds that E should not have reduced them.

*Example 2 (Vali)*

- V had no foreign income or gains arising in 2008-09, so he did not claim the remittance basis and so he did not need to pay a remittance basis charge in 2008-09.
- V’s income tax liability for 2008-09 produces two payments on account of £200,000 for 2009-10. No claim is made to reduce the payments on accounts.
- When V begins to prepare his 2009-10 return he has a liability of £420,000 income tax on UK sources, so his £400,000 payments on account were correct, based on V’s previous year’s income tax liability.
- V has foreign income arising in 2009-10 and he decides to claim the remittance basis in his 2009-10 return. As a long-term but non-domiciled resident V has to pay the remittance basis charge of £30,000 bringing his total liability to £450,000. Interest will not be charged on the additional

£50,000 tax due, as long as this is paid by the proper due date.<sup>62</sup>

### 16.12.13 *Scottish/Welsh taxpayer*

HMRC say:

Long-term UK residents who are not domiciled here can pay an annual charge to be taxed under the remittance basis ... This will not be affected by the introduction of the Scottish rate of income tax. Payments of the charge due from Scottish taxpayers will continue to be paid direct to the UK Exchequer.<sup>63</sup>

The rules are in s.809H ITA(3A)(3B) and it is easiest to read them side by side:

#### **Section 809H(3A) ITA**

If the individual is a Scottish taxpayer for the relevant tax year, the individual is to be treated for the purpose of calculating income tax charged by virtue of subsection (2) as if the individual were not a Scottish taxpayer for that year.

#### **Section 809H(3B) ITA**

If the individual is a Welsh taxpayer for the relevant tax year, the individual is to be treated for the purpose of calculating income tax charged by virtue of subsection (2) as if the individual were not a Welsh taxpayer for that year.

### 16.12.14 *Critique*

The rules set out in this section can only be described as bizarre. Their purpose is to ensure the deduction of the RBC for foreign (in particular, US) tax. HMRC openly acknowledge this:

2.99 The Government sees no case for more fundamental simplification of the nominated income rules. The identification rules ensure that non-domiciles cannot gain a tax advantage by remitting their nominated income or capital gains to the UK before other income and capital gains on which they would be taxed. Removing the nominated income rules would call into question the creditability of the RBC for US tax purposes. Therefore, wider simplification of these rules would carry an

---

62 See too March 2009 Q&As Q18.

63 HMRC, “Clarifying the Scope of the Scottish Rate of Income Tax Technical Note” (May 2012) para 61.

unacceptable risk.<sup>64</sup>

### 16.13 Charge on remitted RFI

Section 809F(1) ITA provides:

This section applies if s.809B, 809D or 809E applies to an individual for a tax year.

That is, the section applies to remittance basis taxpayers. Section 809F(3) ITA provides:

The individual's relevant foreign income for that year is charged in accordance with s.832 of ITTOIA 2005.

So we turn to s.832(1) ITTOIA which provides somewhat repetitively:

This section applies to an individual's relevant foreign income for a tax year ("the relevant foreign income") if s.809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

We find the rule at last in s.832(2) ITTOIA:

For any tax year for which the individual is UK resident, income tax is charged on the full amount of so much (if any) of the relevant foreign income as is remitted to the UK—

(a) in that year...

#### 16.13.1 *Remittance in split year*

Section 832(2) ITTOIA provides:

For any tax year for which the individual is UK resident, income tax is charged on the full amount of so much (if any) of the relevant foreign income as is remitted to the UK ...

(b) in the UK part of that year, if that year is a split year as respects the individual.

Para (b) provides the split-year rule.

Where the drafter wishes to disapply the split-year rule (so that

---

64 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (2011)

[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_non\\_domicile\\_reform.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf)

remittances in the overseas part of a split year are taxable) this is done by the opaque (but effective) formula:

In the application of section 832 of ITTOIA 2005 to [specified income], subsection (2) of that section has effect with the omission of paragraph (b).<sup>65</sup>

## 16.14 Charge on remitted gains

Section 809F ITA provides:

- (1) This section applies if s.809B, 809D or 809E applies to an individual for a tax year...
- (4) The individual's foreign chargeable gains for that year are charged in accordance with paragraph 1 of Schedule 1 to TCGA 1992.

So we turn to para 1 sch 1 TCGA which provides (somewhat repetitively):

- (1) This paragraph applies in the case of an individual to whom the remittance basis applies for a tax year if—
  - (a) in that year the individual disposes of foreign assets,
  - (b) chargeable gains accrue to the individual on the disposal of those assets, and
  - (c) the gains are not taken outside the charge to capital gains tax as a result of section 1G (cases where tax year is a split year).
- (2) The gains are treated as accruing to the individual only so far as, and at the time when, they are remitted to the UK.
- (3) The amount treated as accruing is equal to the full amount remitted to the UK at that time.

For further discussion see 58.9 (CGT remittance basis). Unlike RFI, foreign gains are not chargeable to tax.

## 16.15 Remittance after income/gains arise

Suppose:

- (1) Foreign income/gains accrue to T (a remittance basis taxpayer) on or after 2008/09 and

---

<sup>65</sup> For examples, see s.726(5) ITA discussed 46.20.1 (Remittance in split year); s.733(5) ITA discussed 47.39.9 (Remittance in split year); s.735B(4) ITA discussed 47.47 (s.731 settlor-attribution remittance-basis); s.643F(3) ITTOIA discussed 44.24 (s.643A remittance basis).

(2) The sum is remitted in a subsequent year (in which T is still resident).

The income/gains are taxable in the year of remittance. There is no time limit so income/gains may be taxed many decades after they arise.

#### 16.15.1 *Pre-2008 income/gains*

Suppose:

- (1) RFI accrues to T before 2008/09 and
- (2) The RFI is remitted in 2008/09 or later (when T is still resident).

In the absence of a transitional rule, the income would not be taxable under s.832 ITTOIA because the condition in s.832(1) would not be met. Sections 809B, 809D or 809E did not apply before 2008. Para 83 sch 7 FA 2008 fills that gap for RFI:

(1) This paragraph applies to an individual's relevant foreign income for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if—

- (a) the individual made a claim under s.831 of ITTOIA 2005 for the relevant tax year, or
- (b) s.65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the relevant tax year.

(2) Section 832 of ITTOIA 2005 (as amended by this Part of this Schedule) applies in relation to the relevant foreign income as if s.809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year.

Thus pre-2008 RFI is taxed under s.832(2) if remitted from 2008/09 (as one would expect).

The same applies to gains. In the absence of a transitional rule, pre-2008 gains would not be taxable on remittance after 6 April 2008 because:

<b>Year of remittance</b>	<b>Reason there would be no charge on remittance</b>
2008/09 - 2012/13	Requirement in former s.12(1)(a) TCGA not met
2013/14 - 2017/18	Requirement in former s.12(1) TCGA not met
2019/20 -	Requirement in paras 1 and 5(2) sch 1 TCGA not met

The wording has changed 3 times, but the requirement in all cases was that s.809B ITA applied to the individual in the year of disposal.

Para 84 sch 7 FA 2008 filled that gap:

(1) This paragraph applies if s.12 of TCGA 1992 (or any corresponding superseded enactment) applied in relation to a gain accruing to an individual in the tax year 2007-08 or any earlier tax year (“the relevant tax year”).

(2) Section 12 of TCGA 1992 (as amended by this Part of this Schedule) applies in relation to that gain as if s.809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year.

The 2019 CGT rewrite should have amended para 84 to refer to the current legislation in sch 1 TCGA, which replaces s.12. But the continuity provisions fill that gap, so it continues to be the position that a remittance of a gain accruing on a pre-2008/89 disposal is chargeable. The reader may think it would have been easier in the absence of the 2019 CGT rewrite; but there it is.

#### 16.15.2 *Income pre-2005/06 remitted pre-2007/08*

Para 150 sch 2 ITTOIA provided:

A claim may be made under s.831 (claim for relevant foreign income to be charged on the remittance basis) for relevant foreign income to be charged in accordance with s.832 for the tax year 2005–06 or any later tax year, despite that income having arisen in a tax year before the tax year 2005–06; and ss.832 to 834 apply accordingly.

EN ITTOIA Vol 3 para 347 explains:

This paragraph ensures that Chapter 2 of Part 8 of this Act is not restricted in its operation to income that arose after the tax year 2004–05 (whenever the earlier income is remitted).

Para 150 was not aptly worded, but what it meant was this: if a s.831 claim is made in 2005/06, 2006/07 or 2007/08, pre-ITTOIA income (which was not taxed on receipt because a claim was made under the former s.65 ICTA) is taxed under s.832 ITTOIA if remitted in that year.

#### 16.15.3 *Income pre-2005/06 remitted post-2008/09*

EN FD Draft Clauses 2008 provided:

121. Para 47 deletes paras 150 and 151 of Schedule 2 (transitional provisions), which set out transitional arrangements for the application of the remittance basis to certain relevant foreign income arising before

the tax year 2005-06. These are now considered obsolete in light of the amendments in this Schedule.<sup>66</sup>

## **16.16 Remittance when UK domiciled**

Suppose:

- (1) RFI/gains accrue to T (a remittance basis taxpayer).
- (2) T acquires a UK domicile and for that reason ceases to be a remittance basis taxpayer. T remains UK resident.
- (3) T subsequently remits the sum.

This is taxable under the ITA remittance code.

### *16.16.1 Pre-2008 RFI/gains*

The rule for the pre-2008 RFI remittance basis was that there was no IT charge on a remittance after acquisition of a UK domicile. It is considered that the same applied for the pre-2008 CGT remittance basis, though HMRC did not accept that.

Suppose:

- (1) RFI/gains arose to T before 2008/09.
- (2) T became UK domiciled before 2008/09.
- (3) The income/gains are remitted from 2008/09.

T is taxable on the remitted income under s.832(2) ITTOIA. The tax charge is retrospective in that pre-2008 RFI/gains outside the scope of tax has now fallen within the scope of tax.

What is the position if an individual acquired a UK domicile before 6/4/2008 and remitted the income/gains before then? It is suggested that there is no charge because of the cap on the amount remitted; see 17.32.6 (Cap on amount remitted).

## **16.17 Arising basis taxpayer remittance**

Suppose:

- (1) RFI accrues to T from 2008/09 in a year in which T is a remittance basis taxpayer.
- (2) T subsequently remits the income in a year in which T is not a remittance basis taxpayer (because T's foreign income/gains exceed

---

<sup>66</sup> The equivalent passage in EN FB 2008 para 380 is less informative.

the £2k limit and T does not claim the remittance basis).

T is taxable on the remitted income under s.832(2) ITTOIA.

### 16.17.1 *Pre-2008 RFI*

The rule for the pre-2008 RFI remittance basis was that there was no charge on a remittance in a year in which no claim was made for the RFI remittance basis. HMRC accepted that (at least for years when ITTOIA applied). The new rule applies to pre-2008 RFI remitted from 2008/09. The tax charge is retrospective in that pre-2008 RFI/gains outside the scope of tax has now fallen within the scope of tax.

If RFI was remitted before 2008/09, it is considered that there is no charge because of the cap on the amount remitted; see 17.32.6 (Cap on amount remitted).

## 16.18 Remittance when non-resident

Suppose:

- (1) RFI/gains arise to T (a remittance basis taxpayer).
- (2) T remits the sum to the UK in a year when non-resident.

RFI is not taxable in the year of remittance, because the condition in s.832(2) ITTOIA is not met.<sup>67</sup> Gains are not taxable in the year of remittance because although the conditions of sch 1 TCGA are satisfied (remitted gains are treated as accruing when remitted) the individual (being non-resident) is not subject to tax on chargeable gains treated as accruing to them.

There is a planning point here. If income arises in a UK resident year, and is remitted in a later UK resident year, there is a taxable remittance, even if the individual has in the meantime been non-resident. So it may be better to remit in a non-resident year. If income is remitted to the UK in a non-resident year, without a tax charge, it cannot be remitted again and so cannot become taxable in a later year when the individual is UK resident.<sup>68</sup>

The temporary non-residence rules will apply if the individual is merely temporarily non-resident. This indicates that the planning by a person

---

<sup>67</sup> See 16.13 (Charge on remitted RFI).

<sup>68</sup> See 17.32.6 (Cap on amount remitted).

who is outside the scope of those rules does not constitute tax avoidance.  
For employment income, see 33.36 (Receipt/remittance after death).

### **16.19 Remittance after death**

Suppose:

- (1) RFI or gains accrue to T (a remittance basis taxpayer).
- (2) T dies, and the sum is received in the UK after the death.

In the following discussion,

“The year of death” is the tax year in which T dies.

“Post-death year” means a subsequent tax year.

If RFI is received in the UK in a post-death year, no IT charge arises because the requirement in s.832(2) ITTOIA is not met: the year of remittance is not one “for which the individual is UK resident”.

If gains are received in the UK in a post-death year, no CGT charge arises. Even if para 1(2) sch 1 TCGA operates to treat gains as accruing to the individual who has died, the gains do not accrue to a UK resident.

There is no taxable remittance if funds are received in the UK after the death but in the year of death. Property cannot be received in the UK by T (who is dead) or by a relevant person (there are no relevant persons in relation to a dead person); so remittance condition A cannot be satisfied.

For employment income, see 33.36 (Receipt/remittance after death).

### **16.20 Remittance after source ceased**

Section 832(3) ITTOIA provides:

Subsection (2) applies whether or not the source of the income exists when the income is remitted.

#### **16.20.1 *Pre-2008 RFI***

The rule for the pre-2008 RFI remittance basis was that there was no charge on a remittance from a source in a year after the source has ceased.

Suppose:

- (1) RFI accrued to T before 2008/09.
- (2) The source of the RFI ceased before 2008/09.
- (3) The RFI is remitted from 2008/09.

Is T taxable on the remitted income under s.832(2) ITTOIA? Yes, the tax

charge is retrospective in that pre-2008/09 income previously outside the scope of tax has now fallen within the scope of tax. It does not matter when the income arose or the source ceased: income arising in the 1950s could now come into charge, though all records relating to it would have been long discarded.

STEP rightly comment:

It appears that any source ceased funds, whenever the source ceased will be caught by the new rules. The effect of this is to retrospectively change the nature of these funds and this is unfair. If this is to be the case then taxpayers who have used this technique may have placed the funds in capital accounts which will, as a consequence of the changes to the rules, now be classified as mixed accounts. Not only do the mixed account rules fail to take into account the change in nature of these funds which were capital on 5 April 2008 and income on 6 April 2008, but there does not seem to be any clear way to separate out these funds now as the mixed account rules only apply to remittances to the UK. Whilst STEP does not object to the change in these rules for the future, we do feel that it is unfair to impose additional tax and reporting burdens on taxpayers who used a technique in the past which HMRC recognised and accepted when they used it.<sup>69</sup>

What if the source ceased and T remitted the income before 2008/09? Even if the transitional rule does not provide relief, it is considered that there is no charge because of the cap on the amount remitted; see 17.32.6 (Cap on amount remitted).

HMRC accept that there is no charge on pre-2008 deemed gains.<sup>70</sup> The same reasoning must apply here so it is considered that pre-2008 source-ceased income, which was remitted to the UK prior to 6 April 2008, remains non-taxable.

## **16.21 RFI/gains of non-resident, remitted when resident**

Suppose:

- (1) A non-resident individual receives RFI or gains. The income/gains are not taxed as they arise.
- (2) The individual becomes UK resident, and subsequently remits that

---

<sup>69</sup> STEP Representations on the FB 2008.

<sup>70</sup> See 17.33.6 (Transitional: Pre-2008 deemed gain).

sum when taxable under the remittance basis.

RFI remitted is not taxed on remittance as the condition in s.832(1) ITTOIA is not met. Gains remitted are not taxed on remittance because the condition in para 1(1) sch 1 TCGA is not met.

FAQ Remittances (April 2008) correctly states:

**Where a non-domiciled individual not resident in the UK, has purchased assets abroad out of income that has not been taxed in the UK, then moves to the UK and becomes resident, will the importation of those assets in the first year be taxed as a remittance?**

No. As the untaxed income arose while the individual was not UK resident, there is no charge unless the proposed new s.832A [ITTOIA]<sup>71</sup> applies (temporary foreign residence).

## 16.22 RFI from Ireland

### 16.22.1 *Income from 2008/09*

The position for income from 2008/09 is straightforward. The ITA remittance basis treats Irish source income in the same way as any other foreign income. The FA 2008 repealed the rule of the pre-2008 remittance basis which provided (unlawfully and probably ineffectively<sup>72</sup>) that Irish income was taxed on an arising basis.

The UK/Ireland DTA also needs to be considered but that aspect is not discussed here. Similar points arise in relation to earnings: see 33.37 (Earnings from Ireland).

### 16.22.2 *Pre-2008 Irish income*

This change raised the problem of transition. Para 83 sch 7 FA 2008 provides:

(1) This paragraph applies to an individual's relevant foreign income for the tax year 2007-08 or any earlier tax year ("the relevant tax year") if—

(a) the individual made a claim under section 831 of ITTOIA 2005

---

71 The original erroneously refers to ITA 2007.

72 The point is discussed in the 6th edition of this work para 9.51 and the 2012/13 edition para 9.19 (RFI from Ireland).

- for the relevant tax year, or
- (b) section 65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the relevant tax year. ...
- (3) But nothing in section 832 of ITTOIA 2005 applies in relation to any of the relevant foreign income that arose in the Republic of Ireland.

EN FB 2008 provides:

399. Sub-paragraph(3) provides that the new section 832 does not apply to relevant foreign income that arose in the Republic of Ireland. This ensures that no double charge can arise in relation to those tax years during which it was not possible to claim the remittance basis for such income. (This might be relevant for example where income arose in one of those years and was charged on an arising basis but was not remitted to the UK until on or after 6th April 2008.)

Para 83(3) disapplies the remittance basis charge for pre-2008 Irish income. In short, if:

- (1) Irish source income arose before 2008/09; and
  - (2) The income is remitted on or after 2008/09
- there is no tax charge on remittance.

This applies even if taxpayers successfully argue that pre-2008 Irish income should as a matter of EU law have been taxed on the remittance basis. But that point will not now often arise.

### 16.23 Remittance basis for trustees: Pre-2007 transitional rules

From 2007/08 the remittance basis applies only to individuals, so trustees do not qualify.

Before that time, UK resident foreign domiciled trustees did qualify for the remittance basis on RFI<sup>73</sup> (though I am not sure how widely that was appreciated or used). Pre-2007 income of trustees which qualified for the remittance basis when it arose, is not taxable on remittance after 5/4/2007, because s.832 ITTOIA now applies to individuals. This could be something of a windfall for trustees who qualified for the RFI remittance basis before 2007. But the point will not often arise.

---

73 See the 2012/13 edition of this work para 9.21 (Remittance basis for trustees).;

## 16.24 Forward tax agreements

Details of this arrangement were made public in an article by Malcolm Gunn in *Taxation*, 17 May 2001, under the revealing name “subscription rate method of taxation”. The taxpayers involved were very wealthy UK resident non-domiciled individuals.

HMRC required disclosure of the taxpayer’s worldwide assets. The taxpayer then offered to settle the tax liability on foreign sources for a fixed sum. A starting position was that one estimated the taxpayer’s UK living expenses; deducted from that the amount of UK income; the balance then represented funds which would be required annually from overseas, on which tax was expected. The forward tax agreement related to foreign income/gains. UK source income remained taxable in the normal way. Malcolm Gunn explained:

One may be able to negotiate the annual fixed payment downwards on the starting point figure. ... So in the final analysis, it is down to negotiating a deal which both the taxpayer and the Revenue feel they can live happily with.<sup>74</sup>

In the first edition of this book I said:

It is likely that publication will stop the practice completely. Those who believe that tax should be governed by law will add: Quite right too.

Since then the courts have tried to stop these agreements by holding them to be *ultra vires*.<sup>75</sup> Where such agreements have been made in the past, a taxpayer should have a defence to an assessment if they can show they have suffered prejudice. It is an interesting question how these agreements should deal with transitional issues such as the introduction of the remittance basis claim charge.

## 16.25 Remittance compliance/enquiry

---

<sup>74</sup> Transition from taxation by agreement to taxation by law raises additional problems discussed in Malcolm Gunn’s article.

<sup>75</sup> *Al Fayed v Advocate General* 77 TC 273. *Fayed*-style bargaining is however the basis of taxation of wealthy foreigners in many countries, including, I understand, Switzerland, France and Austria. Even in the UK after *Fayed* the temptation is ever present to move from the inconvenience of taxation by law to the convenient (but ultimately corrupt) method of taxation by negotiation.

In 2013 HMRC set out standard form letters to UK resident remittance basis taxpayers. These were popularly known as “nudge letters”; the HMRC term was “educational letters”. They were controversial in that:

- (1) HMRC sent the letters directly to its customers even if they had agents acting for them.<sup>76</sup>
- (2) The letters stated controversial positions in an unqualified and peremptory way.<sup>77</sup>

The professional bodies understandably objected<sup>78</sup> and (whether or not for that reason) HMRC did not do this again.<sup>79</sup>

In about 2014, HMRC asked agents “what tests and checks did you carry to establish whether or not remittances had been made?”. This seems a loaded question.<sup>80</sup> It contains the assumption that accountants are generally expected to conduct tests and checks. But it is correct to say that unguided lay taxpayers will not understand the meaning of remittance, as the term is defined in a wide, complex, and artificial way. Accountants responsible for completing tax returns of remittance basis taxpayers should not merely ask their clients what income/gains have been remitted. They may rely on their clients answers only if they have properly explained the rules. HMRC are entitled to ask how that has been done. Perhaps that is what the question is intended to address.<sup>81</sup>

## 16.26 Tax return: Unremitted RFI/gains

Unremitted income/gains are not taxable and need not be disclosed:

---

76 This was a breach of the HMRC Charter (“We’ll respect your wish to have someone else deal with us on your behalf, such as an accountant”).

77 See 17.13.3 (Travel to/from UK).

78 See Ashby, “Tax Adviser” (November 2013), p.16

CIOT “Remittance basis ‘educational nudge letter’ - CIOT comments”

<http://www.icaew.com/~media/archive/files/technical/icaew-representations/2013/icaew-rep-174-13-hmrc-letters-to-encourage-tax-compliance-taxrep-59-13.pdf>

79 But see 3.23.1 (Change of HMRC practice).

80 [http://en.wikipedia.org/wiki/Loaded\\_question](http://en.wikipedia.org/wiki/Loaded_question)

81 See 3.18.1 (Change of HMRC practice); Cassidy “Because I said so”, Tax Adviser, September 2014 p.42.

- (1) in a tax return<sup>82</sup> or
- (2) in an HMRC domicile enquiry or appeal<sup>83</sup>

HMRC say:

Those using the remittance basis will not be required to make any additional disclosures about their income and gains arising abroad. So long as they declare their remittances to the UK and pay UK tax on them, they will not be required to disclose information on the source of the remittances.<sup>84</sup>

## 16.27 Divorce of remittance basis user

### 16.27.1 Divorce: Unremitted income/gains

In *SA v PA*:<sup>85</sup>

The husband seeks to include a CGT and/or income tax liability of £240,000 should he remit his Dutch funds here to buy a house. [Counsel for the wife] says:-

“... this is the usual story – H says this is what his CGT liability would be if he brought all his assets onshore (he is a tax non-dom). As will be seen, he has studiously avoided for many years bringing taxable assets onshore, and there is no likelihood he will now do so. He says he intends to buy a house in the UK, but W considers this entirely unlikely. His centre of gravity has always been the Netherlands, and that is only increasing now as he spends more and more time there. Given his income he is much more likely to continue to rent in England and buy in the Netherlands.”

... [There is ] no general rule about the inclusion or exclusion of such tax but ... the court must deal in realities and must not make its order on a false basis. In this case, the evidence from KPMG is clear. These taxes cannot be avoided if the funds are brought here, or if they are used indirectly to purchase property under some back-to-back agreement. At present the husband lives a bipolar life between London and Amsterdam. In my judgment it would not be unreasonable for him to

82 See 117.3 (Quantification of claim).

83 See 3.23.3 (Domicile appeal procedure).

84 Open letter from Dave Hartnett, then acting Chairman of HMRC (12 Feb 2008)

17.38 (Proceeds of divorce settlement)

47.7 (Benefit in course of divorce)

## CHAPTER SEVENTEEN

# THE MEANING OF REMITTANCE

### 17.1

The following topics are considered elsewhere:

- 35.9 (PAYE repayment not remittance)
- 90.3.9 (Remittance from joint accounts)

### 17.1 ITA remittance basis: Introduction

This chapter considers what constitutes a remittance for tax purposes.

The law is in Chapter A1 Part 14 ITA, which sets out what I call the “**ITA remittance basis**”.

The ITA system of numbering sections is idiosyncratic. The provisions of Chapter A1 Part 14 are numbered 809A to 809Z, and, continuing beyond 809Z, are numbered 809Z2 to 806Z10. Subsequently enacted provisions are slotted in between, eg between 809V and 809W we have 15 sections numbered 809VA to 809VO.

However, s.809A is not the first section of ITA whose number begins with 809. Before it are *eight* Chapters of Part 13, (numbered Chapters 5A, 5AA, 5B-5F and 6). These begin with s.809AZA and conclude with s.809ZR.

This does make navigation unnecessarily difficult; but there it is.<sup>1</sup>

Section 809K(1) ITA identifies 6 places where the ITA remittance basis applies:<sup>2</sup>

Sections 809L to 809Z6<sup>3</sup> apply for the purposes of—

- 
- 1 This is due to a misguided application of OPC drafting guidelines; see [App.11.3](#) (Section numbering system).
  - 2 For clarity, I set this out in a table format, and abbreviate the section descriptions.
  - 3 The reference to “ss.809L to 809Z6” was slightly strange, as it omitted s.809Z7 (interpretation). Now it is wrong, because FA 2012 added further sections: it should

<b><i>Provision</i></b>	<b><i>Topic</i></b>
Chap. A1 Part 14 ITA	Meaning of remittance
s.22, s.26 ITEPA	Employment income
Chap. 5B Part 2 ITEPA	Employment-related securities
ss.554Z9-554Z11	Disguised remuneration
s.832 ITTOIA	Relevant foreign income
sch 1 TCGA	CGT

This is just a signpost provision, and not quite the full list. The ITA remittance basis is incorporated in these places, and in other places, using whatever formula floats to the drafter's mind:

See Chapter A1 of Part 14 of ITA 2007 for the meaning of “remitted to the UK” etc.<sup>4</sup>

“remitted to the UK” has the meaning given in Chapter A1 of Part 14 of ITA 2007.<sup>5</sup>

“remitted to the UK” is to be read in accordance with Chapter A1 of Part 14.<sup>6</sup>

any question as to whether, and when, amounts are “remitted to the UK” is determined in accordance with the rules in Chapter A1 of Part 14 of ITA 2007.<sup>7</sup>

This could have been drafted more neatly, but it works. As far as I can see, the ITA remittance basis in Chapter A1 Part 14 apply everywhere the expression “remitted to the UK” is used, ie everywhere the remittance basis applies.

### 17.1.1 *Remittance conditions A to D*

Section 809L(1) ITA provides:

An individual's income is, or chargeable gains are, “remitted to the UK” if—

---

be taken as a reference to “ss.809L to 809Z10”.

4 See s.22(6) ITEPA, 26(5) ITEPA, s.832(4) ITTOIA, s.12(5) TCGA (all inserted 2008); s.648(4) ITTOIA (inserted 2009); s.554Z11(4) ITEPA (inserted 2011); s.41F(10) ITEPA (inserted 2014).

5 See s.408A(10) ITTOIA, s.689A(6) ITTOIA (both inserted in 2013).

6 See s.726(7) ITA, s.730(7) ITA (both inserted in 2017).

7 Para 5(3) sch 1 TCGA.

- (a) conditions A and B are met,
- (b) condition C is met, or
- (c) condition D is met.

Thus there is a remittance if one of three conditions, or (more accurately) sets of conditions, are met. I refer to “**remittance conditions A to D**”, and I refer to the income or chargeable gains as “**income/gains**”. HMRC sometimes use the abbreviation FIG (foreign income or gains); I leave the word foreign to be understood.

It is considered that s.809L(1) is a comprehensive and not an inclusive definition of remittance. That is, a sum is remitted if and only if one of these three sets of conditions are satisfied. Remittance conditions A to D are so complex, and so broad, that there is no room for any other type of remittance.

In practice, remittance conditions A and B are the most important.

I refer to a remittance within the meaning of s.809L(1) as “**a taxable remittance**”.

A sum which can be received in the UK without a taxable remittance is referred to as “**clean capital**”; (the expression might be misunderstood, but I adopt this terminology as it is used in the RDR Manual<sup>8</sup> and FA 2017 refers to “cleansing”). The most common examples of clean capital are:

- (1) Sums which are not income/gains, eg inheritance, borrowing
- (2) Income/gains not taxable in the UK, eg income/gains of a non-resident
- (3) Income/gains already taxed in the UK, eg UK source income/gains

### 17.1.2 *Why is remittance basis hard*

The difficulty is inherent in the concept of a remittance basis. Although it is an exaggeration to say that “money has no earmark” it is often very difficult to trace or earmark money.<sup>9</sup> The fungibility between income/gains and other assets makes it hard to determine whether any specific asset received in the UK should be regarded as the income/gains. But this is what a remittance basis requires to be done.

Before 2008 the matter was largely left to the courts to sort out. It cannot

---

<sup>8</sup> See 19.2.3 (When are funds mixed); 19.5.8 (Example 2).

<sup>9</sup> *Lipkin Gorman v Karpnale* [1989] 1 WLR 1340 at p.1382 (CA). The law of tracing illustrates this.

be said that the courts were entirely successful.<sup>10</sup> In 2008 parliament recast the rules in statutory form. By most measures this has also been unsuccessful. The ITA rules are:

- (1) Unstable: they were amended almost every year in the decade after 2008, and even now the law does not seem to be stable.
- (2) Complex: the topic which took up 78 pages in the 2007/08 edition of this work needs four chapters and over 400 pages in the current edition.
- (3) Record keeping is vastly increased.

No less than before, careful planning is needed to avoid unfairness.

### 17.1.3 *Pre-2008 remittance rules compared*

The wording of the ITA remittance basis is so different that cases on the pre-2008 remittance basis need careful review to see if they have any relevance to the current law; in practice I have not found any that are still important.

HMRC agree. The RDR Manual provides:

**RDRM31210. Key differences between ‘new’ (post 5 April 2008) and ‘old’ regime (pre 6 April 2008)** [Jan 2019]

...The previous case law is now of limited relevance.

There should be no assumption of continuity, ie that the post-2008 law is the same as before. There are many transactions which are taxable remittances which were not caught under the pre-2008 rules; but there are also transactions which were formerly caught but which are not now taxable remittances.<sup>11</sup>

In earlier editions I discussed the enactment history, and differences between the pre-2008 provisions and the current law.<sup>12</sup> I omit that material now, because enactment history sheds no light on the current law, and the differences are of historical interest only; though HMRC and taxpayers will no doubt refer to the pre-2008 law where it appears to support them.

---

<sup>10</sup> Thus *Thomson v Moyse* 39 TC 291 at p.328: “this difficult branch of the law”; *Kneen v Martin* 19 TC 33 at p.41: “This subject is always troublesome”.

<sup>11</sup> For example, the remittance reliefs discussed in the next chapter.

<sup>12</sup> See the 16<sup>th</sup> (2017/18) edition of this work para 12.12.1 (Enactment history, Remittance Condition A) and 12.15.2 (Enactment history, Remittance Condition B).

## 17.2 Relevant person: Introduction

Before discussing the remittance conditions, it is necessary to consider the term “relevant person”. All four remittance conditions use this term.

“Relevant person” is defined in s.809M ITA. Section 809M(1) ITA provides:

This section applies for the purpose of this Chapter.<sup>13</sup>

The term “relevant person” is also used in transitional provisions: para 86(2)(3) sch 7 FA 2008. Here the drafter did not supply any definition but the context shows that the s.809M definition must be applied. So the definition applies throughout the remittance provisions.

A relevant person strictly means the individual to whom income/gains accrue, as well as certain persons connected to them. But in the discussion below I generally refer to the specific individual as “the individual” and use the term “relevant person” to mean the others within the statutory definition.

Strictly one should not use the term “relevant person” in the abstract. A relevant person can exist only *in relation to an individual*. But where the context is clear it is permissible to refer to a relevant person in isolation (leaving the words “in relation to an individual” and the identity of that individual to be inferred).

Section 809M ITA sets out 8 categories of relevant person. These can be split into three groups: close family, family companies, and family trusts.

## 17.3 Relevant person: Family

The first four categories of relevant person are close family. Section 809M(2) ITA provides:

A “relevant person” is—

- (a) the individual,
- (b) the individual’s husband or wife,
- (c) the individual’s civil partner,
- (d) a child or grandchild of a person falling within any of paras (a) to (c), if the child or grandchild has not reached the age of 18.

---

<sup>13</sup> This is duplicated in s.809Z(10) ITA: “In this Chapter ... “relevant person” has the meaning given by section 809M”.

Section 809M(3) ITA treats cohabittees as married persons and so they and their children/grandchildren may be relevant persons under this definition.<sup>14</sup>

## 17.4 Relevant person: Companies

The provisions discussed in this section have had a complicated evolution. I omit that here – reluctantly, as the story has amusing aspects – but it is now of historical interest only.<sup>15</sup>

Under s.809M(2)(e) ITA the next category of relevant person is:

- (e) [i] a close<sup>16</sup> company in which a person falling within any other paragraph of this subsection is a participator, or
- [ii] a company which is a 51% subsidiary<sup>17</sup> of such a close company.

Under s.809M(2)(f) ITA the next category of relevant person is:

- (f) [i] a company
  - [1] in which a person falling within any other paragraph of this subsection is a participator, and
  - [2] which would be a close company if it were resident in the UK, or
- [ii] a company which is a 51% subsidiary of such a company

This is intended to catch family companies but it is widely drawn. An individual would not usually know whether any company is a relevant person in relation to them, because they cannot tell whether it might have a participator who is a trustee of a RP trust.

Companies may also be relevant persons as bodies connected to trusts.<sup>18</sup>

14 See App.3.4.1 (Cohabitee treated as spouse).

15 For a lesson in how not to legislate, see the 9<sup>th</sup> (2010/11) edition of this work para 10.4, 10.5.

16 Section 809M(3)(c) ITA provides a referential definition:

“close company” is to be read in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439 of that Act).

This is unnecessary as that is the default definition in the ITA: see 99.26 (Close company: Introduction). But it does no harm.

17 Section 809M(3)(cb) ITA provides the standard definition: ‘51% subsidiary’ has the same meaning as in the Corporation Tax Acts (see Chapter 3 of Part 24 of CTA 2010). See 60.27 (“51/75/90 % subsidiary”).

18 See 17.6 (Body connected with trust).

For charitable companies, see 17.40.1 (Is charity a relevant person).

#### 17.4.1 “Participator”

The key term here is “participator”. Section 809M(3)(ca) ITA provides:

“participator”,

[i] in relation to a close company, means a person who is a participator in relation to the company for the purposes of section 455 of CTA 2010 (see sections 454 and 455(5) of that Act), and,

[ii] in relation to a company that would be a close company if it were resident in the UK, means a person who would be such a participator if it were a close company

Para [i] incorporates the extended definition of “participator”.<sup>19</sup>

Para [ii] is unnecessary,<sup>20</sup> but it does no harm.

### 17.5 Relevant person: Trusts

Under s.809M(2)(g) ITA the next category of relevant person is:

(g) the trustees of a settlement of which a person falling within any other paragraph of this subsection is a beneficiary.

This is intended to catch family trusts but it is so widely drawn it covers many if not most trusts in existence.

In the following discussion:

**“An RP beneficiary”** is a beneficiary falling within any other paragraph of s.809M(2).

**“An RP trust”** is a trust within s.809M(2)(g), ie one with an RP beneficiary.

Strictly one should not use these terms in the abstract. An RP trust can exist only *in relation to an individual*. But where the context is clear it is permissible to refer to a RP trust in isolation (leaving the words “in relation to an individual” and the identity of that individual to be inferred).

Thus in my terminology, if T (or T’s spouse, etc) is a beneficiary, the trust is an RP trust in relation to T, or (in short) it is an RP trust.

Section 809M(3)(e) ITA defines “beneficiary”:

---

19 See 99.24 (Participator: extended definition).

20 See 99.23.12 (Participator in non-resident co).

“beneficiary”, in relation to a settlement, means any person who receives, or may receive, any benefit under or by virtue of the settlement;

Every trust with an unrestricted power to add beneficiaries (which is a standard form) is an RP trust.

If T and their relevant close family (spouse etc) are all excluded, but the power to add beneficiaries extends to a close company in which T is a participator, then the trust is still an RP trust. The company may be a RP beneficiary even though T has no interest in it.

If the power to add beneficiaries is only exercisable with the consent of an individual, the position is different.

Suppose the beneficiaries are T’s children and their issue. If T’s children are adult and there are no minor grandchildren, then the trust is not an RP trust. However it becomes a RP trust if a grandchild is born.

A trust is not an RP trust in relation to T just because its terms provide that children or grandchildren of T can benefit after they have reached the age of 18, as long as they cannot benefit before then.<sup>21</sup>

If T is not a beneficiary, but T lends interest-free to the trust, it is considered that the trust does not become an RP trust in relation to T just because of the loan. T may receive a benefit (on repayment of the loan).<sup>22</sup> However that benefit arises under or by virtue of making the loan to the trustees, (ie, under or by virtue of the loan agreement): T does not receive a benefit under or by virtue of the settlement.<sup>23</sup>

For charitable trusts, see 17.40.1 (Is a charity a relevant person?).

Section 809M(3)(d) ITA provides:

21 See *Vestey v IRC* 31 TC 1 (known as the first *Vestey* case) which decided that a trust with power to benefit the widow of the settlor was not settlor-interested. At the time that the income arose:

(1) The settlor’s wife could not benefit (as she was not a widow).

(2) It was possible that in the future she could benefit (as she might survive the settlor and so become a widow). That did not matter because the legislation (which is comparable to s.809M) was held to apply only if *at the time that the person received a benefit* she fell within the words “spouse of the settlor”.

A different conclusion was reached in relation to s.28 IHTA (employee benefit trusts): see *Barker v Baxendale Walker Solicitors* [2017] EWCA Civ 2056; but the legislation there is not the same as s.809M.

22 See 44.6.2 (“Settlor-interested” for s.624).

23 The same point arises in relation to pre-owned assets, where HMRC accept a similar argument: see 80.8 (POA intangible property charge).

“settlement” and “settlor” have the same meaning as in Chapter 2 of Part 9.

This brings in the standard IT/CGT definition of “settlement”.<sup>24</sup> That is strictly unnecessary, since this definition applies except so far as the context otherwise requires; but it does no harm.<sup>25</sup>

The definition of “settlor” is otiose as the word is not used in the definition of “relevant person”.

Section 809M(3)(f) ITA defines “trustee” by reference:

“trustee” has the same meaning as in section 993 (see, in particular, section 994(3)).

So we turn to s.994(3) ITA:

For the purposes of section 993 “trustee”, in the case of a settlement in relation to which there would be no trustees apart from this subsection, means any person—

- (a) in whom the property comprised in the settlement is for the time being vested, or
- (b) in whom the management of that property is for the time being vested.<sup>26</sup>

This is the standard form where legislation refers to trustees of a settlement-arrangement (which may not have trustees in the trust-law sense).<sup>27</sup> The extended definition of trustee makes sense in the context of s.993 ITA, where settlement means settlement-arrangement. It does not make sense in the context of s.809M ITA where settlement has the standard IT/CGT meaning, and so must have trustees. But no significant harm arises from this mistake.

It makes no difference if the individual is a trustee, or a participator in a corporate trustee, as trustees are deemed to be a separate, notional person

---

24 See 1.4 (Settlement: Standard IT/CGT definition).

25 The definition is useful for the avoidance of doubt, since s.809M twice refers to s.993 ITA, where the settlement-arrangement definition applies. Thus the definition makes it clear that the settlement-arrangement definition of settlement is not applicable to s.809M.

26 For completeness: s.994(3) concludes: “Section 466(4) does not apply for the purposes of this subsection.” That has no relevance here.

27 See 57.3 (Non-classic trust).

(which is not a company).<sup>28</sup>

### 17.5.1 *Unit trust*

A unit trust is not a settlement, so trustees of a unit trust are not relevant persons under s.809M(2)(g) ITA.

A unit trust is not a company (though it is deemed to be a company for some specific tax purposes) so it is not a relevant person under any other head.

## 17.6 **Body connected with trust**

Under s.809M(2)(h) ITA the last category of relevant person is:

(h) a body connected with such a settlement.

That is, a body connected with an RP trust, within 809M(2)(g): a trust of which some other relevant person is a beneficiary.

### 17.6.1 “*Connected with*” settlement

Section 809M(3)(g) ITA defines “connected with”:

a body is “connected with” a settlement if the body falls within section 993(3)(c), (d), (e) or (f) as regards the settlement.

This must not be confused with the much more common tax concept of a “connected person”.

In order to follow this, one needs to set out the four paragraphs of s.993(3)(c)(d)(e) and (f).

First, s.993(3)(c)(d) ITA provide:

- (3) A person, in the capacity as trustee of a settlement,<sup>29</sup> is connected with ...
  - (c) any close company whose participators include the trustees of the settlement,
  - (d) any non-UK resident company which, if it were UK resident, would be a close company whose participators include the trustees of the settlement

---

<sup>28</sup> See 6.3 (Trustees a distinct person).

<sup>29</sup> “Settlement” in s.993 means settlement-arrangement: see s.994(1) ITA. However for a body to qualify as a relevant person under s.809M(2)(h) there needs to be a settlement within the standard IT/CGT definition.

Section 809M(3)(g) is not elegantly drafted. It refers to a body connected with a settlement; whereas s.993 refers to bodies connected with trustees of a settlement; but the meaning must be the same.

At first sight it seems unnecessary for s.809M(3)(g) to refer to s.993(3)(c) or (d), because any company within (c) or (d) would be a relevant person in any event under s.809M(2)(e) or (f).<sup>30</sup> But this does make a difference as can be seen from the examples below. In any case, one needs to have (c) and (d) in mind in order to understand s.993(3)(e).

“Participator” in s.993(3)(c)(d) is not defined; it is considered that it bears the normal close company meaning.

Section 993(3)(e) ITA provides:

- (e) any body corporate controlled (within the meaning of section 995) by a company within para (c) or (d)

For the s.995 definition of control, see 99.2.3 (Control: Strict sense).

Lastly, s.993(3)(f) ITA provides:

- (f) if the settlement is the principal settlement in relation to one or more sub-fund settlements, a person in the capacity as trustee of such a sub-fund settlement.

It seems unnecessary for s.809M(3)(g) to refer to s.993(3)(f). Possibly the drafter only intended to refer to s.993(3)(c)(d)(e) and the reference to (f) slipped in by mistake. But since the sub-fund regime is dead-letter tax law (hardly ever found in practice) the point does not matter.<sup>31</sup>

### 17.6.2 “Body”

Section 809M(2)(h) ITA refers to a “body” connected with a settlement. The term is wide and somewhat vague. However in order to fall within s.993(3)(c)(d) the body must be a company. In order to fall within s.993(3)(e) the body must be a body corporate. Presumably the word “body” was selected as the apt term to include the (somewhat theoretical) case of trustees of sub-funds under s.993(3)(f).

## 17.7 Company relevant person: Examples

---

<sup>30</sup> Because the trustees are participators.

<sup>31</sup> See 59.2 (Sub-fund regime).

It may be helpful to give some examples of how the relevant person rules apply to trust/company structures. In the following examples:

“(e)-company” is a relevant person under s.809M(2)(e)<sup>32</sup>

“(f)-company” is a relevant person under s.809M(2)(f)<sup>33</sup>

“(h)-company” is a relevant person under s.809M(2)(h)<sup>34</sup>

“non-(e) rel. person” is a person who falls within any other paragraph of 809M(2) ie (1) not a person who falls outside 809M and (2) not a person who is *only* within para (e)

“non-(f) rel. person” is a person who falls within any other paragraph of 809M(2) ie (1) not a person who falls outside 809M and (2) not a person who is *only* within para (f)

**Example 1**

**Example 2**

Assume the trust is a relevant person (eg the individual is a beneficiary). Assume all the companies are close.

A Ltd is (in my terminology):

- an (h)-company
- an (e)-company if UK resident, or an (f)-company if non-resident.
- a non-(e) rel. person and non-(f) rel person (because it is not *only* within (e)/ (f))

**Example 1**

Assume first that the companies are all non-resident close companies.

32 See 17.4 (Relevant person: Companies).

33 See 17.5 (Relevant person: Trusts).

34 See 17.6 (Body connected with trust).

B Ltd is an (f)-company because a non-(f) rel. person - A Ltd - is a participator.

C Ltd is not a relevant person. It is not an (f)-company as it does not meet the requirement in (f) that a person “falling within any *other* paragraph” of s.809M(2) is a participator.

The result is the same if all the companies are UK resident close companies, though the statutory references are different:

B Ltd is an (e)-company because a non-(e) rel. person - A Ltd - is a participator.

C Ltd is not a relevant person. It is not an (e)-company as it does not meet the requirement in (e) that a person “falling within any *other* paragraph” of s.809M(2) is a participator.

Suppose however that B Ltd is UK resident and C Ltd is non-resident. In that case C Ltd *is* a relevant person:

B Ltd is an (e)-company because a non-(e) rel. person - A Ltd - is a participator.

C Ltd is an (f)-company as a non-(f) rel. person - B Ltd - is a participator.

It follows that D Ltd is then an (e)-company if UK resident, since a non-(e) rel. person - B Ltd - is a participator.

### *Example 2*

The difference in example 2 is that the trustees are participators in B Ltd<sup>35</sup> so B Ltd is an (h)-company.

#### 17.7.1 *Co relevant person: Critique*

Where any of these companies are relevant persons, so are

- their 51% subsidiaries and
- companies they “control” (in the ultra-wide sense)

It will be apparent that the definition of relevant person for companies is far too wide; it is not realistic to think that the rules are or ever could be applied in practice to large corporate groups of close companies.

## **17.8 Relevant person: Partnership**

---

<sup>35</sup> See 99.23.2 (Chain of wholly-owned co's).

A general or limited partnership does not fall within any para of s.809M(2)(a)-(g) ITA.

A general or limited partnership does not fall within s.809M(2)(h) ITA. What if trustees control a partnership? A general or limited partnership may be a body,<sup>36</sup> but even if it is, the partnership is not “connected with” the settlement within s.809M(3)(g) as it is not a company or body corporate.<sup>37</sup>

So a general or limited partnership as such is never a relevant person. That is not surprising, since a partnership is also not a “person” in the normal legal sense of the word.<sup>38</sup>

The LLP-law analysis of a UK LLP is different from the partnership law analysis of a true partnership, but the end result should be the same. An LLP is not (generally) a company for IT/CGT purposes, so it does not fall within any para of s.809M(2)(a)-(g) ITA. What if trustees control an LLP? The LLP is not connected with the settlement under s.809M(3)(g). An LLP is actually a body corporate, but it should be deemed not to be a body corporate for this purpose.<sup>39</sup>

Of course the members of the partnership may be relevant persons; see 17.37 (Partnerships).

HMRC agree. The RDR Manual provides:

**RDRM33530. Partnerships** [Jan 2019]

*... Offshore partnerships trading or investing in the UK*

A partnership is not a relevant person RDRM33030. Individuals who are partners together in a partnership are not relevant persons by virtue of their role as a partner (although they may, of course, be relevant persons under other provisions).

## 17.9 Relevant person: Pre-2008 income/gain

Para 86(4) sch 7 FA 2008 provides:

Subject to sub-paras (2) and (3), in relation to an individual’s income

---

36 A partnership is a body in the general sense, but it is deemed not to be an entity (and so, perhaps, not a body) for IT purposes: see 82.15 (Partnership transparency: IT/CT).

But it is not necessary to rely on this point here.

37 See 82.13 (Partnership: person/body corporate).

38 See 82.13 (Partnership: person/body corporate).

39 See 82.21.2 (LLP: Partnership terms applied).

and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

This transitional rule only operates for the purposes of s.809L (remittance conditions A and B), so it has to be repeated for the purposes of remittance conditions C and D, and for s.624.<sup>40</sup> In other provisions the transitional rule does not apply: s.809Z2 (Personal use rule); para 86(2)(3) sch 7 FA 2008. The reader may wonder if that is deliberate or an oversight, but it does make sense. These are provisions where it is helpful to have a wide definition of relevant person. The point will not often arise.

The RDR Manual provides:

**RDRM31480. Relevant persons and foreign income and gains arising before 6 April 2008** [Jan 2019]

[The Manual summarises the legislation and continues:]

**Effect**

This means that the income or gains remitted either as cash or property have to be brought to, received by or used in the UK for the benefit of the individual concerned before there can be a remittance.

The Manual then provides a straightforward (if factually implausible) example<sup>41</sup> and continues:

Note: The exclusion of ‘relevant persons’ from s809L for pre 6 April 2008 income and gains does not apply in considering the other transitional rules in relation to the remittance of relevant foreign income (refer to RDRM31140 Relevant foreign income).

---

40 See 17.28 (Condition C transitional rule: Pre-2008 income/gains); 17.31 (Condition D transitional rule: Pre-2008 income/gains); 44.8.5 (Pre-2008 income: Transitional).

41 “Sanjay is a non-domiciled remittance basis user who transferred £10,000 of his foreign employment income from 2007-08 to his 15 year old grandchild’s offshore bank account.

In 2008-09 the grandchild then remits £3,000 of this to the UK to buy himself a new computer. [How the 16 year old minor would operate the account and purchase the (overpriced) computer is not explained, but it does not matter.]

Under the rules at section 809L this would create a taxable remittance of £3,000 by Sanjay because his grandson is a relevant person. However the transitional rule means that there is no taxable remittance of this income because it is employment income from 2007-08.”

I do not understand the point being made here; the cross reference does not help.

### **17.10 Relevant person: Compliance**

Suppose:

- (1) an individual gives income/gains to a relevant person (“R”); and
- (2) R remits sums to the UK.

The individual in principle becomes liable to a tax charge. The residence of R does not matter.

However, R is under no duty to inform the individual that R has remitted sums to the UK. R is under no duty to inform HMRC, as any tax liability on the remittance is that of the individual, not of R. But the rules in theory require R to keep records for the lifetime of the individual.

Similar issues arise in relation to remittance condition C. Suppose:

- (1) an individual gives income/gains to a non-relevant person (“G”, a gift recipient); and
- (2) qualifying property is enjoyed by a relevant person (or used in respect of a relevant debt).

The individual in principle becomes liable to a tax charge. The residence of G does not matter. G is under no duty to inform the individual or HMRC. But the rules in theory require G to keep records for the lifetime of the individual.

Similar issues arise in relation to remittance condition D, where any property of any third person (“P”) is enjoyed by a relevant person (or used in respect of a relevant debt) and there is a connected operation (as defined). The individual in principle becomes liable to a tax charge. The residence of P does not matter. P is under no duty to inform the individual that P has remitted sums to the UK or to inform HMRC. But the rules in theory require P to keep records for the lifetime of the individual.

Of course in practice these rules will not (and indeed could not) be observed except in straightforward cases.

The individual has no indemnity against the relevant person, gift recipient or third party.

Under the pre-2008 remittance basis, if A (a remittance basis taxpayer) transferred A’s income to any other person (“B”) and B receives that income abroad, there was in general no remittance of that income if B

subsequently remits the income to the UK. In the 6th edition of this work I said:

The law could hardly be otherwise, for A will not usually know what B does with his money after it has been transferred to B.

I was wrong about that! My comment assumed that workability was a necessary requirement of UK anti-avoidance provisions. Now it is sufficient if the law is workable in simple cases.

A relevant person who bears a grudge against an individual (eg a separated spouse) may be able to trigger a significant tax charge out of spite, by deliberately remitting income/gains they have received from the individual. They may alternatively blackmail the individual by threatening to remit unless paid not to do so.

What about a gift recipient (such as an estranged adult child)? There is no charge if they remit income/gains they have received from the individual. What if they apply property they have been given for the benefit of a relevant person, eg a minor child or grandchild of the individual? This arguably does not constitute a taxable remittance under condition B, because the sums are not derived property, but it is caught by remittance condition C.

Also see 17.38 (Proceeds of divorce settlement).

The RDR Manual provides:

**35030 remittances derived from foreign income or gains** [Jan 2019]

... Where an individual gives untaxed foreign income or gains to another person then they should ensure the donee is aware that they must tell the donor if the property or anything subsequently derived from it is bought to the UK in circumstances such that there would be a remittance under ITA07/s809L. ...

There is no statutory obligation to do this but failure will make compliance difficult.

HMRC say in March 2009 Qs & As Q9:

If

[1] the record keeping requirements are felt to be too onerous and

[2] the probability of remittance to the UK is high

the donor may wish to consider making a gift of taxed income or gains.

If “the probability of remittance to the UK is high” then the donor may

indeed prefer a gift of taxed income/gains,<sup>42</sup> quite regardless of record keeping requirements. Conversely, what advice would HMRC give its customers if the record keeping was felt to be onerous but the probability of remittance was low? Or if the donor had insufficient taxed income/gains to make the gift?

### 17.11 Relevant person: Critique

If an individual remits their own income to the UK, they are able to spend it here and there is some sense in taxing them. The same may be said for an individual's spouse and minor children.

The extension to minor grandchildren (though not to adult grandchildren) is a novel development in tax. The policy is inconsistent with other anti-avoidance provisions, and leads to strange anomalies and nonsense.<sup>43</sup> The intention is perhaps to catch grandparents paying the school fees of their UK resident grandchildren – at least if the school is in the UK. The Brown administration was not supportive of private education. But that is only a surmise, as the Government never published any explanation.

The 2010 coalition administration apparently considered this point:

2.128 ... the Government does accept that there is value in giving further consideration to the following suggestions:

- Excluding minor grandchildren from the definition of a 'relevant person'...

2.129 The Government will undertake further evaluation of these areas with a view to implementing any changes from April 2013.<sup>44</sup>

In practice nothing happened.

When a family trust or company remits its income to the UK, the individual (as beneficiary or participator) is not in any way advantaged unless and until the trustees decide to transfer the income to them or to a close family member. In these respects the definition of relevant person is extravagantly wide. What was the thought process that has led to this

---

42 Or other clean capital.

43 See 17.35 (School fees).

44 HMRC & HMT, "Reform of the taxation of non-domiciled individuals: summary of responses to consultation" (December 2011)

[http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc\\_responses\\_non\\_domicile\\_reform.pdf](http://webarchive.nationalarchives.gov.uk/20130129110402/http://www.hm-treasury.gov.uk/d/condoc_responses_non_domicile_reform.pdf)

situation? Needless to say, there was no discussion of policy issues when the rules were announced. I infer that the law is based on a conception that the remittance basis requires funds to be taxed if and when *funds* come to the UK. The policy ought surely to be to charge tax when funds are available *for personal spending* in the UK, not simply because they are invested here. The reader may think it unfortunate that the manner of the 2008 reforms precluded debate or consideration about what the remittance basis was intended to achieve.

For these reasons the definition of relevant person ought to be restricted to the individual and close family.

In the 2010/11 edition of this work I said:

The main effect of the present rules is to impose a prohibitive tax charge on investment in the UK by the foreign domiciliary or relevant persons.

This is now recognised to an extent by:

- (1) The introduction of remittance investment relief in 2012 (though that is a complex and restricted relief)
- (2) The introduction of protected-trust reliefs in 2017

It is considered that the way forward is to restrict the definition of relevant person to the individual, spouse, minor children and (perhaps regrettably, but unavoidably) cohabitee. Remittance investment relief could then be abolished; it would not be needed. That would be a significant simplification, enhance UK investment, and not result in any significant loss of tax. The 2008 reform lost sight of what the remittance basis is in fact intended to catch, and overlooked that the remittance basis was, and (if it serves any purpose) still is, intended to attract wealthy foreigners to reside *and invest* in the UK.

## **17.12 Remittance condition A: UK link**

Remittance conditions A and B go together: condition A requires a link to the UK, and condition B requires a link to the income/gains. Both conditions need to be satisfied to have a taxable remittance under s.809L(1)(a).

Section 809L(2) ITA provides:

Condition A is that—

- (a) money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person, or

- (b) a service is provided in the UK to or for the benefit of a relevant person.

There are eight ways to satisfy remittance condition A. The first six are:

- (1) Property is:
  - (a) brought to the UK
    - (i) by a relevant person
    - (ii) for the benefit of a relevant person
  - (b) received in the UK
    - (i) by a relevant person
    - (ii) for the benefit of a relevant person
  - (c) used in the UK
    - (i) by a relevant person
    - (ii) for the benefit of a relevant person

I refer to these as the “**brought**” limb, the “**received**” limb, and the “**used**” limb of condition A. I refer to property within (1) as “**property brought/received/used in the UK**”.<sup>45</sup>

The last two ways to satisfy condition A are:

- (2) A service is:
  - (a) provided in the UK to a relevant person
  - (b) provided in the UK for the benefit of a relevant person

### 17.12.1 “Property” and “money”

The remittance basis provisions use the following expressions:

<b>Undefined term</b>	<b>Used</b>	<b>See para</b>
Money or other property	Often	
Property [ <i>used by itself</i> ]	Often	
Money [ <i>used by itself</i> ]	809RC, 809UA, 809V	
<b>Defined term</b>	<b>Definition</b>	<b>Used</b>
Property	Does not include “Money”	809X-809Z6
Money	Includes specified assets	809X-809Z6, para 86
		18.30.1
		18.30.2
<b>Partly defined expression</b>	<b>Used</b>	<b>See para</b>
<b>(Money defined, property not defined)</b>		
Property (including money)	Para 86(2) sch 7	17.41.1

---

<sup>45</sup> One might refer to it as “condition A property” or “UK property” but I think it is clearer to use the clumsy expression “brought/received/used”. I leave the words “by/for the benefit of a relevant person” to be implied.

Property (other than money)

Para 86(3) sch 7

17.41.2

I think it is clear that the word “property” by itself includes money, that is, it is equivalent to “money or other property”.<sup>46</sup> In this book I use the word “property” (by itself) to mean money or other property.

When the expression “money or other property” is used, we do not care about the meaning of the word “money” because if an asset is not “money” it will be “other property”.

When the expression “money” is used by itself, or in the expression “property other than money”, we may have to consider the meaning of the word “money”.

### 17.12.2 *Property brought to UK*

The first two ways to satisfy remittance condition A are:

- (a) Property is brought to the UK by a relevant person*
- (b) Property is brought to the UK for the benefit of a relevant person*

This limb requires one to identify whether property is brought to the UK, and if so who brings it to the UK, or for whose benefit it is brought. If a relevant person brings it, condition A is satisfied. If someone else brings it, para (a) is not satisfied.

For instance, suppose T owns a chattel outside the UK, and wishes to lend it to a non-relevant person, eg an adult child, in the UK.

- (1) If T brings the chattel to the child in the UK, there is a taxable remittance.
- (2) If the child collects it abroad, or arranges for a courier to bring it, then para (a) does not apply. No other part of condition A applies, so there is no taxable remittance.

What if T instructs a courier to bring the chattel to the child in UK? One might think that T (by instructing the courier) has brought the chattel to the UK. But comparing this with cases (1) and (2) it is considered that the courier (not T) has brought the chattel to the UK, so there is no taxable remittance. It would be strange if the administrative matter of who

---

<sup>46</sup> It follows that the reference to money is otiose; but the related expression “property of any description including money” is quite common in statutory drafting, and goes back at least to s.4 Trustee Investments Act 1961.

instructs the courier should determine taxability.<sup>47</sup>

This could be relevant if a remittance basis taxpayer wished to lend to a museum, as it would not usually<sup>48</sup> be necessary to meet the conditions of the public access rule.

Para (b) would apply if N holds property as nominee for T, and N brings the property to the UK.

### 17.12.3 *Property received in UK*

The next two ways to satisfy remittance condition A are:

- (c) *Property is received in the UK by a relevant person*
- (d) *Property is received in the UK for the benefit of a relevant person*

This requires one to ask where property is received (or more precisely, whether property is received in the UK); the answer is by no means obvious. If property is received in the UK, the question is who receives it, or for whose benefit it is received.

We need the “brought” limb as well as “received”. T can receive an asset in the UK without bringing it here, eg:

- (1) on the purchase of a UK situate chattel
- (2) on a bank transfer<sup>49</sup>

Can T “bring” an asset to the UK without receiving it in the UK? Perhaps an example is if T acquires a chattel outside the UK, and packs it in T’s luggage; or acquires a car outside the UK and drives it to the UK. T “brings” the chattel or car to the UK, but does not “receive” it here.<sup>50</sup> So both these limbs of condition A are needed.

Para (d) would apply if:

- (1) N holds property as nominee for T, and N receives the property in the UK.
- (2) A payment is made into an overdrawn account. For instance, suppose a UK bank account of R (a relevant person) is £200 overdrawn, and a

---

47 This is consistent with the HMRC view discussed in 17.12.6 (Property in transit). For gifts of cash, see 17.12.7 (Gift to non-relevant person).

48 The public access rule would be needed if the museum was a relevant person.

49 See 17.12.7 (Gift to non-relevant person).

50 It is arguable that an asset can only be received once, so if it is received outside the UK it cannot later be received in the UK, but whether or not that is right, in the case of a chattel or car, there is no identifiable act of “receipt” in the UK.

payment is made into the account of £100. R's debt to the bank is reduced by £100. R does not receive any property. But the bank receives the property in the UK for the benefit of R.

#### 17.12.4 *Property used in UK*

The next two ways to satisfy remittance condition A are:

- (e) *Property is used in the UK by a relevant person*
- (f) *Property is used in the UK for the benefit of a relevant person*

This requires one to ask whether property is used, where property is used, who is the user, and what exactly is the property which is used.

It is suggested that “used” means enjoyed in specie, and property is used where it is situate.

It is difficult at first sight to see the role of the “used” limb of condition A. Normally if T uses property in the UK, T (or a relevant person) will have brought or received it in the UK, so the “brought” or “received” limbs will be satisfied. But there could arguably be a case where property comes to be held by T without being brought or received in the UK by T<sup>51</sup> and in such a case the “used” limb is needed.<sup>52</sup>

If a creditor enforces a debt, and receives money due, one does not say that the creditor is “using” the debt in the normal sense of the word, though the creditor could be said to be using rights attached to the debt. But it is not clear where these rights are used. So it is suggested that the used limb does not apply to debts or other choses in action.

If money is spent, it is “used” in the normal sense of the word.<sup>53</sup> However it is not clear where money (other than cash) is used, so it is not clear how one decides whether it is used in the UK. It is suggested that spending money should be dealt with under the receipt limb, or the brought

---

51 See 17.12.9 (Acquisition of UK security).

52 There could of course be a case where property is brought or received in the UK by a non-relevant person and used by T, eg if T gives RFI to a brother who purchases a house which T occupies. In that case condition A is satisfied under the “used” limb. But condition B is not satisfied (the house is not property of a relevant person) so the question whether condition A is satisfied does not arise. This situation is covered instead by remittance condition C.

53 That is self evident, but if an example is needed, see s.809VA ITA referring to money being “used” to make an investment.

limb of condition A, or under the relevant debt rule, eg using money to pay a debt may be a remittance of the money under the relevant debt rule; but the used limb does not apply: the money is not used in the UK. Money in a bank account is in law a debt, so that is consistent with the above paragraph. In short, in the “used” limb of condition A, “used” means used *in specie*.

### 17.12.5 *Bank entries*

Where an individual transfers money from their foreign bank account to another foreign bank, that naturally involves entries in accounting records of both banks. What if those accounting records are kept in the UK?<sup>54</sup> Remittance condition A is not satisfied: the funds are not brought/received/used in the UK. I think that is self-evident; but for completeness, the RDR Manual confirms the point:

#### **RDRM33560 Banking Issues** [Jan 2019]

##### **Banking Transactions**

Transfers between foreign centres often pass through the UK banking system, for example when a sterling payment is made abroad and the payment is cleared through London in the normal banking process.

In such circumstances HMRC do not regard the passage of funds through the UK as being a taxable remittance.

The machinery employed is irrelevant provided that, without express provision, the individual has:

- no right to payment at any intermediate point; and
- no control over the funds transferred by their foreign bank to secure payment at the agreed point.

Similarly, the EI Manual provides:

#### **EIM40302 Meaning of “remitted to the UK”** [Jan 2021]

[1] Earnings are remitted to the UK if they are paid to the employee in cash in this country or if the employee’s bank account here is credited with them. Employees may arrange to have earnings paid into offshore bank accounts to avoid this rule.

[2] Money that is transmitted from the employer’s bank in the UK to

---

<sup>54</sup> This is understood to be the position for Channel Island and IoM banks. But nowadays, accounting records may be duplicated in the cloud, and not kept in any one identifiable place.

the employee's offshore bank is not treated as remitted here. It has been in the banking system all of the time; the employee did not have access to it.

The conclusions are correct, though the statements that money "passes through the UK" or "through the UK banking system" or that money has "been in the banking system" is layman's language. The image is one of coins or banknotes, leaving one bank, and entering into another bank, where they are stored in its vaults for safekeeping, and where they belong to a customer of the bank, in some version of the vault at Gringotts. But that this is not how banking works. Banking law draws a sharp distinction between the accountholder's money and the bank's money. In *Foskett v McKeown*.<sup>55</sup>

We speak of money at the bank, and of money passing into and out of a bank account. But of course the account holder has no money at the bank. Money paid into a bank account belongs legally and beneficially to the bank and not to the account holder. ... there is no money in the account. There is merely a single debt of an amount equal to the final balance standing to the credit of the account holder. No money passes from paying bank to receiving bank or through the clearing system (where the money flows may be in the opposite direction). There is simply a series of debits and credits which are causally and transactionally linked.<sup>56</sup>

### 17.12.6 *Property in transit*

The same approach is applied in March 2009 Qs & As to physical assets transported by a courier through the UK:

---

55 [2001] 1 AC 102 at p.127.

56 Likewise, *Foley v Hill* (1848) 2 HLC 28 at p.36:

"Money, when paid into a bank, ceases altogether to be the money of the principal ... ; it is then the money of the banker, who is bound to return an equivalent by paying a similar sum to that deposited with him when he is asked for it. The money paid into the banker's custody... is then the banker's money; he is known to deal with it as his own; he makes what profit of it he can, which profit he retains to himself, paying back only the principal, ... or the principal and a small rate of interest ..."

I am not aware of differences in other legal systems, and it difficult to see how there could be, as banking is an international activity.

**Q17:** Will HMRC apply the same principle, expressed in relation to mechanistic banking transfers which pass through the UK in the banking system, in a case where a courier passes through the UK in transit carrying property not covered by the temporary importation exemption?

**A:** Yes. In principle, where the “passing through” is a mechanistic part of the courier service provision and, no relevant persons have any rights to use or access the property at any intermediate point; and no control over how property is transported to and from the agreed points. In such circumstances the passage of property which merely “touches” the UK would not be regarded as a sum remitted to the UK.

More analytically, remittance condition A is not satisfied because the owner of the property:

- (1) does not receive it in the UK;
- (2) does not bring it to the UK (the courier brings it; or it is not “brought” at all, in the relevant sense, as its UK presence is transitory).

This is consistent with art 26(1) United Nations Convention on the Law of the Sea:

No charge may be levied upon foreign ships by reason only of their passage through the territorial sea.

In the Dover Strait, the southerly shipping lane is territorial sea, and so counts as part of the UK;<sup>57</sup> but there is no taxable remittance of a foreign ship, or, presumably, property in the ship, unless or until it enters a UK port or inland waters.

#### 17.12.7 *Gift to non-relevant person*

In *Timpson’s Executors v Yerbury*<sup>58</sup> (a pre-2008 remittance case):

- (1) Mrs Timpson (“T”) gave cheques representing her income to her children.
- (2) The children cashed the cheques which were credited to their bank accounts in the UK.

Thus the income was received in the UK, but it was not received by T. This was nevertheless held to be a taxable remittance by T. Romer LJ and

---

<sup>57</sup> See App.2.16.5 (Territorial sea).

<sup>58</sup> 20 TC 155 followed in *Walsh v Randall* 23 TC 55.

(I think) Greene LJ decided *Timpson's Executors* on the basis that there was a taxable remittance if:

- (1) money is received in the UK by a third party at T's direction, and
- (2) immediately before receipt, the money (or funds representing it) belonged to T.<sup>59</sup>

This is not the law under the ITA remittance basis. Remittance condition A requires that property is brought/received/used in the UK *by or for the benefit of a relevant person*. So if a remittance basis taxpayer writes a cheque on a foreign bank account, gives it to a donee (not a relevant person) who pays the cheque into their UK bank account, remittance condition A is not satisfied. The receipt of the cheque is not a remittance.<sup>60</sup> The money is received in the UK by the donee (not by a relevant person); and if it is brought to the UK, it is brought in by the donee.

Suppose (instead of a cheque) T makes a gift to a donee (not a relevant person) by electronic transfer from T's offshore account to the UK account of the donee. It is considered that remittance condition A is not satisfied. It would be strange if there were a difference between payment by cheque and a direct electronic transfer. At first sight it seems that T "brought" the money into the UK (even though T did not receive or use it in the UK). But the better view is nothing is *brought* to the UK. One needs to understand the banking law background. A bank transfer involves the destruction of an asset (T's claim against T's bank) and the creation of a new asset (the donee's claim against the donee's bank, which may of course be a different bank).<sup>61</sup> The new asset is received in the UK but not

---

59 The judgments are discussed in more detail in the 2012/13 edition of this work, but they are not now relevant.

60 See 17.16.17 (Receipt of cheque in UK).

61 "It is something of a misnomer to speak of the transfer of funds, as there is no actual transfer of coins and bank notes from the payer to the payee, and no assignment of the debt owed to the payer by their own bank." Brindle & Cox, *The Law of Bank Payments* (5<sup>th</sup> ed., 2017), para 3-002; *R v Preddy* [1996] AC 815 at p.841D and p.834: "The question remains, however, whether the debiting of the lending institution's bank account, and the corresponding crediting of the bank account of the defendant or his solicitor, constitutes obtaining of that property. The difficulty in the way of that conclusion is simply that, when the bank account of the defendant (or his solicitor) is credited, he does not obtain the lending institution's chose in action. On the contrary, that chose in action is extinguished or reduced pro tanto, and a chose in action is brought into existence representing a debt in an equivalent sum owed by a

brought to the UK.<sup>62</sup>

In addition, remittance condition B is not met. This requires that the property “is property of ... a relevant person.” At the time the property is received in the UK, which is the time which matters,<sup>63</sup> the money is property of a non-relevant person.

The practice before 2008 was for remittance basis taxpayers to make the gift abroad (by payment into a foreign bank account of the donee). This will no doubt continue, even though it is not strictly necessary, because HMRC may not agree with this analysis. The RDR Manual provides:

**RDRM33140 Condition B - direct remittance of income and gains**

[Jan 2019]

Example 5 (Tyler)

T, a remittance basis user, donates an amount of money to a Battersea Dogs Home, a UK charity, by making a payment direct to the charity from his US bank account which contains his relevant foreign income. There has been a direct remittance of T’s income into the UK; it does not matter that he or any other relevant person does not benefit personally from the money...

In the usual style of the Manual, the example states a conclusion without addressing the relevant statutory provisions, and it is not likely that the author has considered the technical issues.

If the HMRC view were right, then law reform would be appropriate, as there is no point in forcing donees to open foreign bank accounts. But all

---

different bank to the defendant or his solicitor. In these circumstances, it is difficult to see how the defendant thereby *obtained property belonging to another*, ie to the lending institution....I start with the proposition that the money in a bank account standing at credit does not belong to the account holder. He has merely a chose in action which is the right to demand payment of the relevant sum from the bank. I use the word money for convenience but it is of course simply a sum entered into the books of the bank. When a sum of money leaves A’s account a chose in action quoad that sum is extinguished. When an equivalent sum is transferred to B’s account there is created in B a fresh chose in action being the right to demand payment of that sum from his bank.”

62 If that is right, it does follow that that the words "bringing of money to the UK" in s.809V ITA are either redundant or informal; see 18.24 (Relief on paying remittance charge). But an argument from redundancy carries little weight; see 2.1.2 (Argument from redundancy).

63 See 17.23.2 (Condition B).

that is needed is a statement of practice which recognises the existing law.  
For gifts to charity, see 17.40 (Gift to charity).

### 17.12.8 *Arm's length payment to non-relevant person*

Similar points apply to an arm's length payment to a non-relevant person. This might arise if a payment (out of income/gains) is made for a foreign asset. Suppose:

- (1) T pays to X the purchase price of an asset which T receives outside the UK.
- (2) T subscribes for shares in a non-close<sup>64</sup> offshore company X Ltd.

If T pays the money to the UK bank account of X, there is a tenable argument that there is no taxable remittance, on the grounds that neither condition A nor condition B are satisfied.

As to condition A: The sum is not received in the UK by T. It is considered that the money is not received in the UK for the benefit of T. X receives the money for his own benefit (even though the effect of the payment is to satisfy T's debt). The sum is not used in the UK, and, for the reasons set out above, is not brought to the UK.

As to condition B: Even if the money in X's account derives from T's income/gains (which is debatable) it is not property of a relevant person.

This gives a sensible result. There is no remittance in any real or meaningful sense, and no reason why one would expect a tax charge to arise.

The same applies if the payment is consideration for a service provided outside the UK. A payment which is consideration for a service provided in the UK is taxable wherever received, if the consideration is given by a relevant person (unless foreign services relief applies).

HMRC may not agree. A payment into a foreign account of X is desirable, though it is unfortunate that X must be put to the trouble of opening a foreign bank account. HMRC have argued:<sup>65</sup>

- (1) A purposive approach requires a remittance. That depends of course on identifying the purpose. One might think that the purpose of the remittance basis is to tax individuals who have spending money in the UK, not spent money relating to outside assets. HMRC will argue that

---

64 I specify X Ltd is not close, so it will not be a relevant person in relation to T.

65 Private correspondence.

the purpose is wider. But what is the purpose in forcing the vendor to open a foreign account? Purposive arguments are always vulnerable to the weakness of framing the purpose to fit the desired outcome.<sup>66</sup>

- (2) A banking law analysis (that nothing is brought to the UK) is a “technical” argument. No doubt it is. HMRC argue for what may be described as a technical remittance. Allegations of “technical” arguments may go both ways, which tends to suggest doubt as to whether “technical” is a useful analytical concept, or mere pejorative rhetoric, or another synonym of a non-purposive approach.<sup>67</sup>
- (3) The provisions should be construed in a real-world commercial manner. If this means anything other than a purposive approach, this lies the realm of rhetoric and not argument.<sup>68</sup> No-one would argue for an unreal and uncommercial manner of construction, but what does that mean and how does one decide which is which?

Note how “real”, “technical” and “purposive” are all thrown into the submission pot. Perhaps they are three ways of putting the same point.

- (4) The wording of s.809V(1) ITA (relief for payment of remittance basis charge)<sup>69</sup> supports the HMRC view. It assumes that payment to HMRC is bringing money to the UK. That is a more traditional approach of construction, and there is something in this point.

#### 17.12.9 *Acquisition of UK security*

In the following discussion, a “**UK security**” means a security<sup>70</sup> which is UK situate (usually because the company’s register is UK situate).

What is the position if T uses RFI to acquire a UK security, eg purchases a security from a third party? I assume for simplicity that:

- (1) The company which issued the security is not a relevant person.<sup>71</sup>
- (2) The RFI itself is not brought/received/used in the UK by a relevant person (I assume payment is made outside the UK).

---

66 See [App 14.4](#) (Difficulty of ascertaining tax policy).

67 See [App 1.7](#) (Technical).

68 See [App 6.7](#) (The real world).

69 See 18.24 (Relief on paying remittance basis charge).

70 I use the term here to include shares and debt-securities.

71 See 17.16.8 (T subscribes for shares in R Ltd).

The question then is whether the UK security is brought/received/used in the UK.

The “brought” limb of condition A is not satisfied: the UK security is not brought to the UK.

HMRC might rely on the “received” limb. The UK security is “received” by T, but does T receive it *in the UK*?

The ITA remittance basis requires one to identify where property is received. Identifying the place of receipt of property is comparable in two respects to identifying the situs of property or the location of a source of income:

- (1) Just as every asset has a situs (and only one situs),<sup>72</sup> and every source of income has a location (and only one location),<sup>73</sup> it is considered that property should have one (and only one) place of receipt.
- (2) In the case of tangible property, the place of receipt should be clear. In other cases, just as the situs and source rules, there are no satisfactory solutions and the question can only be answered by somewhat arbitrary selection of connecting factors.

But while situs and source are old questions, governed by well-established rules, the place of receipt of an asset is a new question on which no guidance is to be found.

Money paid to a beneficiary’s bank account is received where the account is kept.

It is considered that a security is received where the security is situated under private international law rules. I have considered whether the security might be received in the jurisdiction whose law governs the transfer or creation of the security. But that relates to how the security is received, and not where it is received.

It is arguable that T does not receive property in the UK: either the security is not received anywhere, or else it is received in the place of the law governing the transfer or creation of the security (which may or may not be a UK law). On that argument, while condition A is satisfied if the individual actually uses the security in the UK, merely acquiring UK

---

72 See 97.3 (Every asset has one situs).

73 See 15.3 (Approach to locating source).

situate securities may not be not enough.<sup>74</sup>

HMRC do not agree. One of the RDR Manual's examples of taxable remittances is the receipt of UK securities:

**RDRM33050 Practical Examples of Remittances to UK** [May 2020]

[Taxable remittances include:]

- You buy shares or bonds in a UK registered plc from a foreign broker with your foreign income.

If receipt of a UK security is receipt of an asset in the UK, then there is the surprising consequence that (except for “money”, as defined) the temporary importation rule would apply.<sup>75</sup>

In practice the answer is not to acquire UK securities except out of clean capital. In some cases it may be possible to make the security situate outside the UK, by using bearer securities or specialty debts, and arranging that the document is kept outside the UK.

#### 17.12.10 *Disposal of UK security*

If a security is not received in the UK, so remittance condition A is not met on the acquisition of the asset, the question arises whether the asset might later be used in the UK. It is arguable that “use” is appropriate to chattels but not to intangible property. Does the sale or redemption of a security amount to “use”? If it does, is the asset used “in the UK” just because the asset is situate here? Or is something else required, and if so what? The difficulties in these questions support the view that the term “use” does not apply to securities.

#### 17.12.11 *Acquisition of UK debt*

Similar issues (but not quite identical) arise in relation to simple debts, ie debts which are not securities.

In the following discussion, a “**UK debt**” means a debt which is UK situate (usually because the debtor is UK resident).

What is the position if T lends RFI to a person (“the debtor”)?<sup>76</sup>

---

74 If this were wrong then words “used in” in remittance condition C (and perhaps condition A) would arguably be otiose since chattels used in the UK must be received in or brought to the UK.

75 See 18.36 (Temporary importation rule).

76 Similar issues arise if T purchases a simple debt, but that is less common.

I assume for simplicity that:

- (1) The debtor is not a relevant person.<sup>77</sup>
- (2) The RFI itself is not brought/received/used in the UK by a relevant person (assume payment is made outside the UK).

The question then is whether the UK debt is brought/received/used in the UK.

The “brought” limb of condition A is not satisfied: the UK debt is not brought to the UK.

HMRC might rely on the “received” limb. The UK debt is “received” by T, but does T receive it “in the UK”?

It is suggested that a debt is received where the debt is situated under private international law rules. It is arguable that T does not receive property in the UK: either the debt is not received anywhere, or else it is received in the place of the law governing the transfer or creation of the debt (which may or may not be a UK law). On that argument, while condition A is satisfied if the individual actually uses the assets in the UK, merely acquiring UK situate assets may not be enough.<sup>78</sup>

There is no HMRC guidance (the RDR Manual passage discussed above refers only to “shares or bonds”).

If receipt of a UK debt is receipt of an asset in the UK, then there are some surprising consequences:

- (1) There might be a taxable remittance if an individual lends to a UK resident (even if the borrower is not a relevant person) since the lender receives a debt and a debt from a UK resident debtor is usually UK situate.
- (2) There might be a remittance if T sells a foreign asset to a UK resident and:
  - (a) the sale price remains outstanding for a time as a debt, because the debt is UK situate; or
  - (b) the sale price is unascertained, and so a contractual chose in action, as in *Marren v Ingles*,<sup>79</sup> because the contractual right is UK

---

<sup>77</sup> See 17.16.7 (T lends income/gains to R).

<sup>78</sup> If this were wrong then words “used in” in remittance condition C (and perhaps condition A) would be otiose since chattels used in the UK must be received in or brought to the UK.

<sup>79</sup> 54 TC 76.

situate.<sup>80</sup>

In these two cases it is suggested that mere delays in payment should not count as remittances; the debt or contractual right (even if UK situate) should be characterised as merely a step in the mechanism of payment and not as an independent receipt.

- (3) In the case of a debt other than “money” (as defined) the temporary importation rule would apply.<sup>81</sup>

A cautious approach where possible is to make the debt situate outside the UK, which might be done by using a specialty debt, and arranging that the document is kept outside the UK.

What if the debtor is non-resident but later becomes UK resident? It is suggested that the debt is received outside the UK, and it is not brought to the UK by (or for the benefit of) a relevant person, so the change of residence of the debtor does not constitute a remittance.

#### 17.12.12 *Disposal of UK debt*

If a debt is not received in the UK, so remittance condition A is not met on the acquisition of the asset, the question arises whether the asset might later be used in the UK. It is arguable that “use” is appropriate to chattels but not to intangible property. Does the calling in a debt amount to “use”? If it does, is the asset used “in the UK” just because the asset is situate here? Or is something else required, and if so what? The difficulties in these questions support the view that the term “use” does not apply to intangible assets.

#### 17.12.13 *Situs of property for condition A*

There are no statutory situs rules for income tax, so the common law/private international law rules apply.<sup>82</sup> So money received in a UK branch of a foreign bank is remitted, but money received in a foreign

---

[http://taxbar.com/wp-content/uploads/2016/01/A\\_Trap\\_for\\_Remittance\\_-\\_Basis\\_Taxpayers\\_The\\_Situs\\_of\\_Choses\\_in\\_Action\\_Michael\\_Firth.pdf.pdf](http://taxbar.com/wp-content/uploads/2016/01/A_Trap_for_Remittance_-_Basis_Taxpayers_The_Situs_of_Choses_in_Action_Michael_Firth.pdf.pdf)

81 See 18.36 (Temporary importation rule).

82 See 97.1 (Concepts of situs).

branch of a UK bank is not remitted.<sup>83</sup> Money is remitted if received in:

- (1) a UK account in the name of the taxpayer, and held by them beneficially; or
- (2) a UK account held in the name of a third party who holds on trust for the taxpayer.

CGT has statutory situs rules. But it is considered that the effect of para 5(3) sch 1 TCGA is to incorporate the ITA rules, so the CGT situs rules do not apply for the purpose of remittance condition A. That view is supported by s.809W(6) ITA, which applies the CGT situs rules specifically for the purposes of foreign services relief.<sup>84</sup> If that view were wrong, there could be a remittance under the CGT remittance basis when a remittance basis taxpayer:

- (1) places sterling in a foreign bank account, as the account is regarded as UK situate for CGT;<sup>85</sup> or
- (2) sells and leaves the purchase price outstanding, since the right to the purchase price is a UK situate asset under the CGT situs rules.

#### 17.12.14 *Co with UK asset (secondhand co)*

Suppose T acquires a non-UK company which holds a UK asset. If the UK asset is not enjoyed in specie by T or a relevant person, then Condition A is not satisfied. If the UK asset is (say) a house, which is occupied by T, then remittance condition A is satisfied. However, remittance condition B is not satisfied.<sup>86</sup>

### 17.13 **Service provided in UK**

The next way to satisfy remittance condition A is:

*(e) a service is provided in the UK to a relevant person*

Basic planning is to use services provided outside the UK where possible, eg foreign investment advice, foreign accountancy services, foreign travel agencies, and foreign schools. Of course tax is not the only consideration here; and foreign services relief, if applicable, may allow the use of UK-

---

83 See 97.21 (Bank account).

84 See 18.26 (Services condn A: Non-UK property).

85 See 98.12 (Bank account).

86 See 17.16.11 (T purchases R Ltd (secondhand co)).

based service providers.<sup>87</sup>

### 17.13.1 *Where are services provided*

The rule requires one to identify the place where a service is provided, or at least whether it is provided in the UK. See 33.30 (Where are duties performed).

In some cases this is straightforward. In other cases there is no obvious answer:<sup>88</sup> the connecting factors could be:

- (1) where the work is done
- (2) where the supplier is based
- (3) where is the property (if any) to which the service relates
- (4) where the customer is based

If a service is provided by an individual or individuals at a particular time and place, the service is provided in the place where the individual(s) are when the service is provided. In other words, the connecting factor should be where the work is being done, when that is physical work carried out in a physical location.<sup>89</sup> Thus a person outside the UK who is on the phone/Skype/Zoom/Teams with a person in the UK is providing his services outside the UK. If UK counsel is instructed to appear in a court outside the UK, the service is provided outside the UK. But advisory work or drafting is provided where counsel is based.

Where services are performed by a team of people, and do not involve work in a single location, the services should be said to be provided where the supplier is based. If a supplier is based in two places, the service is provided in the base most closely connected with the supply.

In practice, physical work will generally be done where the supplier is based, so factors (1) and (2) will normally point the same way. But that is not necessarily the case. If one instructs a French firm to do building work in the UK the service is provided in the UK: if one instructs a UK firm to do building work in France, the service is provided out of the UK.

Factor (3) cannot be decisive as foreign services relief assumes that a service which relates to property situate outside the UK may be a service

<sup>87</sup> See 18.25 (Foreign services relief).

<sup>88</sup> To say that the question is just one of fact is not an answer, but only a way of avoiding the question: see 25.14.1 (Source of interest: Critique).

<sup>89</sup> See 33.30 (Where are duties performed).

provided in the UK.<sup>90</sup>

The RDR Manual is consistent with this view. It provides:

**RDRM34040. Relevant services provided in the UK** [Jan 2019]

... A service is regarded as having been provided in the UK if the providers of that service are based in and give that service in the UK....

“Based in” the UK is my factor (2). I understand that the words “*and give that service in the UK*” is my factor (1), where physical work is done. This is therefore an easy case where both factors point the same way.

The RDR Manual goes on to give this example:

*Example 1 (Chandra)*

C, a remittance basis user, engages an investment manager based in the UK to manage her portfolio of investments in foreign stocks and shares of overseas concerns. ...

The service - the management of the portfolio - is provided in the UK to C...<sup>91</sup>

This is a case where there is no physical work within factor (1), so one falls back on factor (2), where the supplier is based.

---

90 See 18.25 (Foreign services relief).

91 March 2009 Q&As made the same point:

**Q23:** ... If a service provider engages with the Jersey resident trustees of a trust of which a UK resident but non-domiciled individual is a beneficiary and settlor and provides advice which is prepared and issued from the UK, but received and read in Jersey, it is not clear if this would be “a service provided in the UK.”...

**A:** ... The general rule is that, for the purposes of this condition, a service is regarded as being *provided in the jurisdiction where the providers of that service are based*. Advice which is researched, prepared and issued from the UK would therefore fall within the definition of “provided in the UK” irrespective of where the client might receive it.

**Q24:** As part of providing advice to clients who have an international aspect to their affairs, a service provider may prepare advice in several different jurisdictions, which may then be issued from only one office, and therefore country, that being the office which has the main relationship with the client.

**A:** In the case where an offshore service provider provides advice which has been prepared in several different jurisdictions, the same approach will need to be taken to determine whether the test in section 809L is met, and, *because the advisers in your scenario are based in the UK, their service will be provided in the UK.*

(Emphasis added)

### 17.13.2 *Identifying the services*

In order to decide where a service is provided, it is necessary to identify the service or services which are provided.

The RDR Manual gives an example:

**RDRM34040. Relevant services provided in the UK** [Jan 2019]

... *Example 5 (Sarah)*

S, a remittance basis user, purchases an air ticket using her foreign income and gains to travel from Sweden to Holland, using a UK based booking agency. Payment is made into the agency's offshore bank account.

There is a 'service provided in the UK', which is the agent's booking services, so the part of the cost of the service that relates to the agency's booking fee is a remittance (although not the cost of the flight between Sweden and Holland as no part of this service is provided in the UK). ...

There are two possible ways to understand this:

- (1) There are two services, a booking service and a transport service.
- (2) There is only one service, but it may be apportioned between the part made in the UK, and the part outside the UK.

These are two routes to the same destination, but I prefer solution (2). Solution (1) raises a distinction between (1) single (though composite) services and (2) multiple (but distinct) services. A similar distinction is drawn for VAT between multiple/composite supplies, but it has proved to be problematic.

In order to decide where a service is provided, it may be necessary to identify who is providing the service. If solicitors instruct counsel, counsel's services are usually provided to the solicitors.<sup>92</sup> But if the solicitors simply provide counsel's services on to the lay client, the position is the same as if counsel's services were provided directly, ie the place where counsel provides the services to the solicitors is the same place where the solicitors provide those services on to the lay client.

---

<sup>92</sup> COMBAR and Bar Council standard terms provide that the contract is between counsel and solicitors, not the lay client. De Voil Indirect Tax Service (looseleaf) para V6.134 provides: "Normally the instructing solicitor is regarded as the barrister's client and the supply will hence be seen as being made to [the solicitor]. However, the principles described in V3.128 on how to identify the recipient of a supply of services will be relevant."

### 17.13.3 *Travel to/from UK*

Where one travels entirely within the UK, the services are provided in the UK and where one travels entirely outside the UK, the services are provided outside the UK. What is the position if the journey begins in the UK and ends outside, or begins outside the UK and ends within? Possible solutions are:

- (1) The services are provided in the UK if the journey is wholly or partly in the UK, (“view 1”)
- (2) The services are only provided in the UK if the journey is wholly in the UK (“view 2”)
- (3) Apportion the journey into two parts (“view 3”).

None of these are satisfactory.

View 1: The statute does not refer to a service which is provided “wholly or in part” in the UK and the fact that that expression is used elsewhere in the same section on *four* occasions suggests view 1 is not correct. Also view 1 is not fair to the taxpayer, particularly in a case where the UK element is small.

View 2 is likewise unfair to HMRC.

View 3 is correct but impractical, as (1) there is only one service and it is not clear that one can divide that into two parts; (2) apportionment of relatively small amounts would be laborious.<sup>93</sup>

The best answer is that in this case factor (1) - where physical work is done - does not provide a solution, and one should rely on factor (2) - where the supplier is based.<sup>94</sup> That will normally be clear.<sup>95</sup>

What is the HMRC view? The RDR Manual provides:

**RDRM34040. Relevant services provided in the UK** [Jan 2019]

---

<sup>93</sup> A third possible difficulty arises if there were a flight between two non-UK destinations, but which involved flying over the UK. It is considered that a person flying over the UK is not, for this purpose, “in” the UK; contrast 17.12.6 (Property in transit).

<sup>94</sup> The same considerations led OECD Model to a comparable rule. Art 8(1) OECD Model provides: “Profits from the operation of ships or aircraft in international traffic shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated.”

<sup>95</sup> The position for Eurostar may require further examination.

... *Example 4 (Charlotte)*

C, a remittance basis user, purchases a return air ticket using her foreign income. The ticket is to travel from the UK to Belgium and return. *The ticket was purchased from a UK company* but payment was made into the company's offshore bank account.

The HMRC analysis is as follows:

Because part of the travel service was provided in the UK (the journey begins and ends in the UK) there is a remittance to the UK [ie the service is provided in the UK]. ...<sup>96</sup>

This is consistent with my analysis if it is significant that the HMRC example specified that the purchase was from a UK company. But that is not the way that HMRC express their reasoning. Fact-rich examples in the style of the Manuals make light reading but dim guidance.

In 2013 HMRC set out standard form letters to UK resident remittance basis taxpayers (“nudge letters”).<sup>97</sup> The letters gave examples of what constituted a taxable remittance including:

- You buy a return air fare from New York to London overseas using your foreign income.
- You book a holiday with a foreign travel agent to sail from Southampton to New York which you pay for with your foreign income.<sup>98</sup>

One may infer that the HMRC now take view 1, and regard a transport service as provided in the UK if any part of the journey is in the UK. The difficulty in resolving the point is that the sums in any one case are not

96 For completeness: there is another version of this example in RDRM 33130 [Jan 2019]:

“*Example 3*

Charlotte, a remittance basis user, purchases an air ticket using her foreign income. The ticket is to travel from the UK to Belgium. The ticket was purchased from an overseas company and payment made into the company's offshore bank account. Because part of the travel service was provided in the UK (the journey begins and ends in the UK) there is a remittance to the UK.”

This is incoherent, since the example states there is a ticket from the UK to Belgium, but the analysis states the journey ends in the UK.

97 See 16.25 (Remittance basis compliance/HMRC enquiries).

98 See <https://www.kessler.co.uk/wp-content/uploads/2015/06/HMRC-nudge-letters.pdf>

likely to justify litigation by the individual, but the point is worth litigating by HMRC. However if an individual needs to fight on some other more weighty issues, then this may come to the tribunal as an additional point. Some private jet providers, such as Netjets, render two levels of charges. One is a standing, fixed charge and the other is a charge based on actual usage and is therefore variable. The variable charge is like any other plane ticket. What about the fixed charge? It could be allocated based on a percentage of annual UK to non-UK usage per taxpayer. But the better view is that the fixed charge is provided where the supplier of the service is based.

Some providers sell a block of (say) 25 hours flight, and the actual flights do not take place until later. It could be that the place the service is provided is determined when the fee is paid; in that case the service is provided where the supplier is based. Or one may say that no service is provided until the flight takes place. That would mean that the year of remittance may be different from the year of payment.

#### 17.13.4 *Service for benefit of relevant person*

The last way to satisfy remittance condition A is:

*(f) a service is provided in the UK for the benefit of a relevant person*

Does para (f) add anything to para (e), that is, do the words “for the benefit of” add anything? When is a service provided for the benefit of a person but not to that person? An example is if a parent P contracts with a school to educate P’s child C. The services are perhaps provided to P (who pays for them) but for the benefit of C. That would matter if C was a relevant person and P was not (which might happen if the income was that of C’s uncle, say).

This rule may make it unnecessary to identify the person to whom the services are provided, a question which has given rise to much difficulty in a VAT context.

### **17.14 Condition B: Link to income/gain**

Section 809L(3) ITA provides:

Condition B is that—

- (a) the property, service or consideration for the service, is (wholly or in part) the income or chargeable gains,

- (b) the property, service or consideration—
  - (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
  - (ii) in the case of property or consideration, is property of or consideration given by a relevant person ...<sup>99</sup>

In condition B:

- “The property” means the property referred to in condition A, that is, in short, the property brought/received/used in the UK.
- “The service” means the service referred to in condition A, that is, in short, the service provided in the UK.

There are eight ways to satisfy remittance condition B. The first two relate to property (ie the property brought/received/used in the UK):

- (1) This property:
  - (a) is (wholly or in part) the income/gains or
  - (b) (i) is derived property and
  - (ii) is property of a relevant person

The next four<sup>100</sup> relate to services, ie a service provided in the UK:

- (2) This service:
  - (a) is the income/gains or
  - (b) derives from the income/gains or
- (3) The consideration for this service:
  - (a) is (wholly or in part) the income/gains, or
  - (b) (i) is derived property and
  - (ii) is consideration given by a relevant person

#### 17.14.1 *Property of relevant person*

Remittance condition B is met in relation to property brought/received/used in the UK if the property:

- (a) is (wholly or in part) the income/gains or
- (b) (i) is derived property and
- (ii) is property of a relevant person

---

<sup>99</sup> Section 809L(3) continues with paras (c) and (d) which relate to debt remittances, considered separately below.

<sup>100</sup> The remaining two relate to the relevant debt rule, which are considered separately below.

If the property *is* the income/gains, it does not have to meet the requirement that it is property of a relevant person. If the property is *derived from* the income/gains (“derived property”), it does have to meet that further requirement.

Why the distinction? If T transfers income/gains to R, the funds cease to be the income/gains (instead in the hands of R the funds become derived property). That is, if the property *is* the income/gains, the property must necessarily be property of the specific individual (T) (not anyone else who is a relevant person in relation to T), so it is not necessary to impose the requirement expressly. That might be the reason; though if so the matter could have been more simply expressed.

Suppose:

- (1) T gives income to S (not a relevant person).
- (2) S uses the money to buy property used by T.

Condition B is not satisfied: the purchased property is derived property but it is not the property of T or of any relevant person.<sup>101</sup>

The question whether property either *is* the income/gains or is *derived from* the income/gains also matters for the purposes of s.809P ITA (amount of income remitted).

#### 17.14.2 Services

Condition B is met in relation to a service provided in the UK if:

- (2) This service:
  - (a) is the income/gains or
  - (b) derives from the income/gains or
- (3) The consideration for this service:
  - (a) is (wholly or in part) the income/gains, or
  - (b) (i) is derived property and
    - (ii) is consideration given by a relevant person

It will be rare to have a case within (2), ie where a *service* is (or derives from) income/gains. Examples may be services which constitute earnings as benefits in kind, or services which constitute benefits taxable under s.731/s.87, which are deemed to derive from income/gains.

---

<sup>101</sup> But remittance condition C or D may then apply.

Cases will usually fall within (3). The time of remittance is the later of:  
 (1) the time the consideration is given and  
 (2) the time the service is provided

We may need to classify what the relevant person receives as (1) property or (2) a service.

In practice it will not generally matter. That is fortunate, as the distinction is not always easy. Suppose T pays rent for use of a picture in the UK. Does T receive a service? It is thought not.<sup>102</sup> Does T receive property and if so what? T does not receive the picture, but receives a contractual right, which is considered to be “property” for present purposes. Or it may be that T makes a payment in respect of a relevant debt. It is considered that there ought to be a taxable remittance under one or other of these routes, though neither analysis is entirely trouble-free.

Condition B refers to property, consideration for services, and to services. But it is impossible to keep referring to all three. For the sake of comprehensibility, I refer to property and leave the references to consideration for services (and to services) to be read in; (more or less) same points apply to each of them.

## 17.15 Property is the income or gains

The question whether property brought/received/used in the UK is income should be straightforward if the income is *pure* income, such as dividends, interest or income distributions from trusts. The income will usually be easy to identify.

### 17.15.1 *What is trading income*

The question whether property brought/received/used in the UK is *trading* income is more difficult.

Strictly speaking, trading income is not an item of property: it is a figure that emerges as the result of a computation. The gross receipts of a trade are not the trading income. Even the net receipts (ie gross receipts less trade expenses paid out of the receipts) are not the trading income: the quantum of trading income is likely to be different from the amount of net receipts, once one allows for accruals, capital expenditure, and so on.

---

102 “Service” is widely defined for VAT, but that definition is not applicable here.

That is self-evident, but if authority is needed, see *Reed v Young*:

... the distinction between the assets of a partnership and its profits for a given period. That distinction is self-evident ... A loss, like a profit, is an accounting measure of the firm's performance over a given period. Liabilities, like assets, vary from day to day. Just as you do not make a profit by acquiring an asset, so you do not sustain a loss by incurring a liability.<sup>103</sup>

Similarly *Anson v HMRC*:

... in general an entity will not have particular assets that can be said to be assets which represent the profit which it has made.<sup>104</sup>

However the meaning of words is governed by context, and the context shows that once trading income has arisen, net trading receipts should be taken as being, or including, the trading income,<sup>105</sup> for the purposes of remittance condition B. If net trading receipts are brought/received/used in the UK, therefore, there is a taxable remittance of the trading income. Otherwise the remittance basis does not work. In other words, the distinction between net receipts (assets) and trading income (a computation but not an asset) is disregarded, or at least, is not carried to its logical conclusion, where the conclusion would be absurd.<sup>106</sup>

If the trader receives a proportion of the trading receipts in the UK, there should be an apportionment, eg if half the trading receipts are received in the UK, there is a remittance of half the trading income. The mixed fund rule does not apply, as there is no mixed fund.

Trading income is regarded as arising at the end of an accounting period, not during the period, for it is only then that it can be discovered whether

---

103 59 TC 196 at p.227.

104 [2013] EWCA Civ 63 at [59]. Likewise in the Upper Tribunal: [2012] UKUT 59 (TCC) at [38]. The decision was reversed by the Supreme Court, but this point was not contentious.

105 Alternatively the net trading receipts may be said to be derived from the trading income. That may be the better analysis, but it usually makes no difference. For brevity I refer to the sum as constituting trading income rather than derived from trading income.

106 Similar issues arise in a ToA context: see 45.7 (Income “payable” to person abroad).

the trade made a profit for the relevant period and if so what the profit is.<sup>107</sup>

Suppose a person carrying on a foreign trade receives the trading receipts in the UK, during the trade accounting period and retains them in the UK. That sum is not trading income, or derived from trading income, at the time of receipt, for no trading income has yet arisen. At the end of the accounting period, when the profits are ascertainable, the sum can be regarded as derived from trading income. The trading income is regarded as remitted at that time.<sup>108</sup>

What if the trader receives trading receipts in the UK, and removes them from the UK in the same accounting period, before any trading income arises? At the time of the receipt the sum received is not trading income. On a strict reading, there is no taxable remittance later when the trading income accrues; though one might construe s.809U ITA loosely,<sup>109</sup> so that there is a remittance of trading income when the trading income arises. The safe course, if trading income is taxed on the remittance basis (typically under the s.720 remittance basis) is to ensure that all sums are received and kept outside the UK.

### 17.15.2 *What is property income*

The same applies to property income of a property business, which is computed in the same way as trading income.

Suppose an individual pays deductible expenses out of the gross rent. The property income of the individual is the net profit (rent less expenses), it is not the gross rent. So if the individual brings some of the gross rent to the UK, to pay deductible expenses, that is not a taxable remittance of the property income. The income is the profit (if any) which is left after payment of deductible expenses. That includes interest, so far as deductible.

### 17.15.3 *What is a gain*

The question of whether property brought/received/used in the UK is a gain raises a similar question and has a similar answer. Strictly speaking,

---

<sup>107</sup> *Re Robbins* [1941] Ch 434. Similarly *Anson v HMRC* [2013] EWCA Civ 63 at [59]: “... profits do not arise until an account is struck for a particular period showing that there has been a profit...”; the point was not discussed in the subsequent appeal.

<sup>108</sup> See 17.36 (Remittance before income/gains arise).

<sup>109</sup> See 17.36 (Remittance before income/gains arise).

a gain is not an item of property: like trading income, it is a figure resulting from a computation. The quantum of a gain (generally) depends (in part) on the amount or value of the proceeds of a disposal, but that does not entail that the gain is a part of the proceeds. The proceeds of a disposal are not the gain.

But notwithstanding the jurisprudential nature of a gain, the proceeds of a disposal for full consideration should be regarded as constituting or including the gain for the purposes of remittance condition B.<sup>110</sup>

HMRC agree. The CG Manual provides:

**CG25380 Mixed funds: introduction** [Nov 2019]

... Proceeds received from the disposal of a chargeable asset will include a return of some or all of the capital cost of the asset and may also include an element of gain. If a non-UK asset costing £500 is sold for ... £650, £500 represents capital and £150 represents a gain. The proceeds arise from two sources and therefore constitute a mixed fund in their own right. ...

Similarly, the RDR Manual provides:

**RDRM35320 Mixed Funds: Example 4 Note 3** [Jan 2019]

... unlike income that can be identified separately, a capital gain is merely part of the money received from the sale and has no separate existence within that amount. ...

## 17.16 Derived property

### 17.16.1 “Derived”

Remittance condition B (and C and D) refer to property which *derives* (wholly or in part, and directly or indirectly) from income/gains. I refer to this as “**derived property**”.

The words “directly or indirectly” show that the drafter did not want the word “derive” to be narrowly construed.

In the following discussion I just use the word “derive” and leave “directly or indirectly” to be understood.

---

<sup>110</sup> Alternatively the net proceeds of a disposal may be said to be derived from the gain. The position is more difficult for sales at an undervalue: see 17.33.5 (Sale of asset at undervalue).

## 17.16.2 s.22 TCGA case law

Some guidance might be drawn from case law on s.22 TCGA (“there is ... a disposal of assets ... where any capital sum is *derived from assets...*”).

In *IRC v Montgomery*, trustees sold a policy of insurance, which was valuable because a fire had damaged land insured by the trustees. The sale proceeds were derived from the policy and not derived from the land:

What, in the context of [s.22], does “derived” mean? The relevant dictionary meaning of “derivation” is to trace or show the origin, and that is what I think it means here.

A dictionary definition never solves a legal problem, because the answer will depend on the context, purpose, and facts of the case; it may provide a convenient starting point, but it rarely says anything one did not already know. Perhaps it is just a matter of clearing the throat before settling down to work:

It appears to me quite clear that the capital sum paid by [the purchaser of the policy] was derived from the sale of the rights under the policies, and that *it is not right to go back any further*. If it were legitimate to embark on the exercise of tracing the derivation of assets back in the manner of an abstract of title, I do not know where the line could ever properly be drawn. I think that one must ask the simple (?) question, “From what asset of the trustees was the capital sum ... derived?” and the simple answer is that it was derived from the ... policies of insurance.<sup>111</sup>

In *Zim Properties v Procter*:

a capital sum may be derived from assets ... even though those assets may not be the immediate source of that sum. That is not to say that Walton J. was wrong in holding in *IRC v Montgomery*, that the sum received by the trustees ... was derived from their rights under the policies. It means no more than that it would be a mistake to interpret Walton J.'s decision in that case as authority for the proposition that the asset from which a capital sum is derived must always be the asset that constitutes its immediate source... One has to look in each case for the real (rather than the immediate) source of the capital sum.<sup>112</sup>

---

111 49 TC 679 at p.686.

112 58 TC 371 at 391; this case also includes the memorable aphorism that the interpretation of legislation requires “the exercise of common sense, rather than just

In *Zim*, a taxpayer failed to sell properties due to his solicitors negligence. The negligence claim was settled for £70k. The sum was not derived from the properties.

Remittance condition B has a different context, and uses the words “directly or indirectly” which were not in the CGT provision. But I think the principle is the same in a remittance context, and indeed in any context: the line between what is and what is not derivation must be drawn somewhere, and somewhere practical, and there comes a point where *it is not right to go back any further*. These principles are at a high level of generality which may not take us far when it comes to practical issues. But assuming in these two cases the properties had been derived from foreign income, no-one would say that income was remitted if the proceeds of the insurance policy or negligence claim were received in the UK.

#### 17.16.3 *Income/gain invested/reinvested*

Suppose T uses income/gains to purchase assets. The purchased assets are derived from the income/gains. If the purchased assets are sold and the proceeds reinvested in new assets, those new assets are derived from the income/gains indirectly. This tracing process can continue for the lifetime of T.

#### 17.16.4 *T gives income/gain to R*

Suppose T gives income/gains to R. The funds in the hands of R are not the income/gains, but they are derived from the income/gains. If R uses the funds to purchase assets, the purchased assets are derived from the T’s income/gains, indirectly, and (as above) that tracing process can continue for the lifetime of T.

#### 17.16.5 *T purchases asset from R*

Suppose:

- (1) T purchases an asset (“the purchased asset”) from a relevant person (“R”) for full consideration.
- (2) T uses income/gains to pay the purchase price.

---

the brute application of verbal formulae.”

The sale proceeds in the hands of R are derived from the purchased asset, and (indirectly) from property R used to acquire the asset. But the sale proceeds in the hands of R are not derived from T's income/gains. So there is no taxable remittance of T's income/gains if R brings the sale proceeds to the UK: remittance condition B is not satisfied.<sup>113</sup>

Likewise if R provides a service to T for full consideration, and T uses income/gains to pay the fee. The fee in the hands of R is not derived from T's income/gains.<sup>114</sup>

This is a sensible rule, because if T uses income/gains to purchase an asset from a company, at arm's length, T will often have no way of knowing whether the company is a relevant person, and T can hardly be expected to ask the company what it has done with its own money. Whereas if T gives money to R, the request is not so unreasonable.

---

113 Of course the purchased asset in the hands of T is derived from T's income/gains, so there would be a taxable remittance if T brings the purchased asset to the UK.

If my view is wrong, there would be a double charge to tax where the purchased asset represented income/gains of R, that is, where:

(1) R receives income/gains (R's income) and uses it to purchase an asset (the purchased asset).

(2) T receives income/gains (T's income) and uses it to purchase the asset from R. Suppose T brings the purchased asset to the UK. There is a taxable remittance of T's income. But it would be surprising if R's income was also remitted.

114 Of course, if R provides the service to T in the UK, there is a taxable remittance (subject to foreign services relief) on the basis that T's income/gain is consideration for the service.

If it were the case that an arm's length fee for a service is derived from the income used to pay the fee, there is an (admittedly, subtle) anomaly:

(1) In cases where foreign services relief applies, there is no taxable remittance; see 18.27 (Services condn B: Pay non-UK bank).

(2) In other cases (eg if the service is not provided in the UK) there could be a taxable remittance when R brings the consideration to the UK.

A little support for this view may be found in *Cohen v Petch*. Here:

- (1) A building society lent money to T.
- (2) T used the borrowed money to purchase an asset from T’s mother.
- (3) The mother promptly gave or lent the sale proceeds back to T.
- (4) T lent the money to a company.

Diagrammatically:

T claimed relief for the interest on the building society loan. The Special Commissioner said:

... once the money had been borrowed [by] the taxpayer from the society it was paid to his mother and became her funds. Subsequently, three days later, the sum of £46,600 was returned to the taxpayer by his mother either in the form of a loan or as a gift. The funds, whether or not they are traceable in specie, were no longer the money borrowed from the society. They were funds lent or given by [the mother] to her son. *There was no longer any link between the money which the taxpayer eventually lent to the company and the money which he borrowed from the society.*<sup>115</sup>

The questions (simplifying the clumsy language of ICTA) were:

- (1) Was the money borrowed from the building society used to lend to the company.
- (2) Was the money “applied for some other purpose” before being so used.<sup>116</sup>

This not the same as the wording of the ITA remittance basis (“derived directly or indirectly”). But the words used in the decision (“no longer any link”) support the view that the derived condition would not be satisfied.

If T consciously pays *more* than full consideration, then the sale proceeds in the hands of R are derived from T’s income/gains to the extent of the excess.

### 17.16.6 T sells asset to R

115 [1999] STC (SCD) 207 at p.211.

116 The current provisions are s.385(3) ITA and 392(2) ITA.

Suppose:

- (1) T uses RFI to acquire an asset (“the RFI asset”)
- (2) T sells the RFI asset to a relevant person (“R”) for full consideration.

It is considered that the RFI asset in the hands of R is not derived from T’s RFI. So there is no taxable remittance if R brings the RFI asset to the UK: remittance condition B is not satisfied.<sup>117</sup>

Similarly, suppose:

- (1) T sells an asset to a company within s.720 or s.3, or to a trust within s.624 for full consideration.<sup>118</sup>
- (2) The company uses its income (treated as derived from T’s s.720 income) or its gains (treated as derived from T’s s.3 gains) or the trust uses its income (treated as derived from T’s s.624 income) to pay the purchase price.

The sale proceeds in T’s hands are not derived from the s.720 income, the s.3 gains or the s.624 income.

#### 17.16.7 *T lends income/gains to R*

Suppose T lends income/gains to an individual who is a relevant person (“R”). Are the funds in R’s hands derived from T’s income/gains? There are three possible solutions:

- (1) R’s borrowed money is always derived from T’s income/gains.
- (2) R’s borrowed money is never derived from T’s income/gains.
- (3) R’s borrowed money is sometimes derived from T’s income/gains.

---

<sup>117</sup> Of course, the sale proceeds in the hands of T are derived from T’s RFI, so there would be a taxable remittance if T brings the sale proceeds to the UK.

If my view is wrong, there could be a double charge to tax.

<sup>118</sup> Considerable further thought is required if the sale is for more than full consideration.

There are strong arguments in favour of solution (2):

- (1) R's promise to repay the loan is (in principle)<sup>119</sup> full consideration for the money, whether the loan is on commercial terms or interest free repayable on demand (the promise to repay an interest free loan is full consideration). R's borrowed money is derived from that promise.<sup>120</sup>
- (2) T acquires an asset (the benefit of the debt) which is derived from the RFI, and it seems surprising that R's borrowed money was also derived from the same income/gains.

The objection to solution (2) is that it is too good to be true; a remittance is too easily avoidable. There is not much point in having a charge on remittances by relevant persons which arises if T *gives* income/gains to R, but not if T *lends* income/gains to R interest-free. It is considered that there must be some circumstances in which one should regard R's borrowed money as derived from T's income/gains. The court might then describe the loan as a mere "conduit".<sup>121</sup> However "conduit" is a metaphor which constitutes a conclusion rather than a basis for reaching that conclusion. The difficulty is to find an appropriate method of distinguishing between cases where one does and does not regard borrowed money as derived from income/gains used to make the loan.

It is suggested that one should seek to distinguish between:

- (1) loans which have characteristics of an outright payment, where R's borrowed money is regarded as derived from the income/gains; and
- (2) loans which do not have those characteristics.

A loan has the characteristics of an outright payment, if, for instance:

- (1) There is no intention to repay the loan,
- (2) The loan is likely to remain outstanding for a substantial period, such as the lifetime of the borrower, or, perhaps, the period that the borrower is UK resident, or

---

119 The position would be different if the loan is a fixed-term loan at a low rate of interest as then R's promise to repay is not full consideration; that would be unusual and is assumed not to be the case here.

120 Contrast 80.6 ("Provide").

121 *Harmel v Wright*, 49 TC 149 is a case on the pre-2008 remittance basis, and so not now directly relevant, but it illustrates the point at p.157: "emoluments, which mean money, come in at one end of a conduit pipe and pass through certain traceable pipes until they come out at the other end to the taxpayer".

- (3) The borrower has insufficient funds to repay the loan (other than the borrowed money).

Such “loans” (the facts justifying scare quotation marks) are (from the recipient’s viewpoint) more or less equivalent to outright payments.

A loan on arm’s length terms is less like an outright payment, at least assuming there is in fact an intention to comply with the terms (pay the interest).

A loan made at arm’s length is not like an outright payment.

Similar points arise on a sale with the payment left outstanding (which may be regarded as commercially equivalent to a loan, though not a loan in the strict sense of the word).

#### 17.16.8 *T subscribes for shares in R Ltd*

Suppose T uses income/gains to subscribe for shares issued by a company which is a relevant person (“R Ltd”).

The shares received by T are derived from the income/gains.

It is considered that the proceeds of the share subscription received by R Ltd are also derived from the income/gains, at least indirectly, for the following reasons:

- (1) This fits the context. There would be little point in providing that companies are relevant persons if that were not so.
- (2) If the proceeds of the share subscription held by R Ltd were not derived from the income/gains, what are they derived from? A share issue is unlike a normal sale or similar transaction, as it costs the company nothing to issue shares. The issued shares did not belong to the company before they were issued.

#### 17.16.9 *Double representation*

The two paragraphs above indicate that in cases of loans, and share subscriptions, it is possible to have two distinct assets each of which are derived from the same income/gains: (1) the assets lent or used to subscribe for the shares, and (2) the benefit of the loan or the shares.

One might describe that as “**double representation**”.

There would be a taxable remittance if either of these assets are remitted to the UK. But the income/gains could only be remitted once.

#### 17.16.10 *T subscribes to investment fund*

The position is different if:

- (1) T uses income/gains to subscribe for an interest in a collective investment fund, along with other investors.
- (2) That fund invests in a portfolio of underlying companies (by way of loan or share subscription) together with other investors in those companies.

T's interest in the collective investment fund is directly derived from the income/gains. But the funds in the underlying companies portfolio should not be regarded as derived from T's income/gains. The commingling of funds at investment fund level, and again at portfolio level, creates a remoteness sufficient to break the chain of derivation from the original income/gains. The word "derive" (even "indirectly") requires a sufficient link and the link must break at some point. Derivation must stop at least at the portfolio investment level. T will not be able to keep track of how the original income/ gains are used to fund investments, once they have been pooled together, firstly with the other funds from the other investors in the collective investment fund, and subsequently at the portfolio level. In order for the law to work in practice there has to be a practical limit to the meaning of the phrase "derive indirectly".

This issue only arises if the underlying companies are close, and so relevant persons, but that can happen, because of the excessive width of the concepts of control and close company.<sup>122</sup>

#### 17.16.11 *T purchases R Ltd (secondhand co)*

Suppose T uses income/gains to purchase shares in R Ltd (a relevant person). R Ltd already owns assets. The assets of R Ltd are not derived property: they do not derive from T's income/gains.

#### 17.16.12 *T uses income/gains to pay debt*

Suppose:

- (1) B borrows from L and receives "the borrowed money"
- (2) B uses income/gains ("B's income/gains") to repay the debt to L so
  - (a) L receives "the repaid money"
  - (b) B retains the borrowed money

---

<sup>122</sup> See 99.8 (Ultra-wide control: Critique).

In the absence of a statutory provision, the borrowed money would not in principle<sup>123</sup> be derived from B's income/gains. It would not be derived from the income/gains at the time of the borrowing. It would not become derived from the income/gains later when the debt is repaid. However, the s.809R backward-tracing rule alters this.<sup>124</sup>

It is considered that the repaid money in the hands of L is not derived from B's income/gains. It is derived from the debt, and (indirectly) from the funds which L used to make the loan to B.

### 17.16.13 *Refinancing*

Suppose:

- (1) L lends "the debt 1 fund" to B ("debt 1")
- (2) Subsequently:
  - (a) L lends "the debt 2 fund" to B ("debt 2")
  - (b) B uses the proceeds of debt 2 to repay debt 1<sup>125</sup>

It is considered that the repaid money in the hands of L:

- (1) is derived directly from debt 1
- (2) is derived indirectly from the debt 1 fund
- (3) is not derived (even indirectly) from the debt 2 fund.

It would be different if B were insolvent and unable to repay debt 2.

If B is a trading company, then Remittance Investment Relief might also be considered, though the relief is not straightforward.

### 17.16.14 *Loan secured on income/gains*

It is helpful first to consider the position for unsecured loans. If T borrows without giving security, T's borrowed money is derived from the promise to repay. That is so even if T owns assets (say, RFI) and the lender would not lend had T not owned those assets. The fact that the lender would not

---

123 The position should be different if the two steps formed part of an arrangement. In those circumstances, the law recognises "backward tracing": *Brazil v Durant* [2015] UKPC 35 at [34] - [40].

Of course, if the debt were a relevant debt there would be a remittance of the income/gains on payment of the debt, under the relevant debt rule.

124 See 19.6 (Income/gains used to pay debt).

125 This would typically happen because B has no liquid assets to repay debt 1.

lend if the borrower did not have the RFI (or other assets of sufficient value) does not entail that the borrowed money is derived from the RFI. HMRC agree:

HMRC accepts that there is no remittance where

[1] a loan is unsecured, but

[2] it is clear that it [the loan] is only given because the lender is aware of the various assets the borrower has (some of which will represent or be derived from FIG [foreign income or gains]).<sup>126</sup>

Suppose T borrows on the security of income/gains. Is the borrowed money derived from the income/gains? It is considered that in this case the borrowed money is still derived from the promise to repay and not from the security. That is still the case even if T could not have borrowed without giving that specific security. There are three reasons for this view:

- (1) The position is analogous to an unsecured loan, where no-one suggests that borrowed money is derived from the borrower's income/gains, even T could not have borrowed were it not for that income/gains, and even if T subsequently charges the loan on income/gains.
- (2) A rule which says that borrowed money is derived from a security if and only if the borrower needed the security in order to borrow is not workable: the question whether the security is needed is often imponderable.
- (3) The relevant debt rule<sup>127</sup> is designed to cover this aspect of remittances and that suggests that there would not be a remittance under general principles.

It is considered that the case of *West v Trennery*<sup>128</sup> is not relevant here, since the statutory words on which the decision rests are not present in the remittance basis provisions. In practice HMRC appear to accept this view, though they do contend that there is a charge under the relevant debt rule; see 17.22 (Use as security for debt).

#### 17.16.15 *Income from income/gains*

Suppose:

---

126 ICAEW TAXREP 52/14.

127 See 17.22 (Use as security for debt).

128 For this case see App.2.11 (Representing assets).

- (1) T receives £1m (“original income”).
- (2) T invests the original income and receives £50k (“new income”).

It is considered that the new income is not derived from the original income. One must stop tracing the original income at that point. Otherwise various odd results will follow: If T remits the £50k new income, T would pay tax on:

- (1) The £1m original income<sup>129</sup> *and*
- (2) The £50k new income<sup>130</sup>

If the £50k income is mixed with the original income, there is a mixed fund (income of two separate years) of £1,050,000 to which the mixed fund rules will apply.

The same applies if the original income is invested to produce gains (“new gains”). There will be a mixed fund, as gains cannot be segregated. The new gains are not derived from the old income. So a remittance of the new gains does not constitute a remittance of the old income.

#### 17.16.16 *Gift on to third party*

The position becomes more complex if a second individual is involved. Suppose:

- (1) T gives income/gains to A (an individual, who may or may not be a relevant person).<sup>131</sup>
- (2) A gives the fund to B (a relevant person).

It is suggested that the funds in the hands of B are derived property if steps

129 See 17.32.2 (Change in property value).

130 Similarly, suppose:

- (1) T gives £1m original income to R (a relevant person).
- (2) R receives £50k new income.
- (3) R brings the £50k new income to the UK.

If the new income is derived from the original income:

- (a) R will pay tax on the new income (on an arising or remittance basis, depending on whether R is a remittance basis taxpayer; that makes no difference for the purposes of this example).
- (b) T would pay tax on the original income, on the remittance of the new income by R.

131 If A is not a relevant person, A will be a gift recipient, and remittance condition C needs consideration.

(1) and (2) form an arrangement. If there is no connection of that kind between T's gift and the transfer to B, the funds in B's hands are not derived property. The chain of derivation stops there. In particular, if B acquires the funds on the death of A, the funds are not derived property.<sup>132</sup>

If T gives income/gains to a trust and the trustees appoint the fund to B, the same approach should be applied, but the two steps do form an arrangement because the trustees is merely carrying out the intention of the settlor and is not a wholly independent mind.<sup>133</sup> So the funds in the hands of B are derived property.

#### 17.16.17 *Receipt of cheque in UK*

Suppose T receives in the UK a cheque which, if cashed, the proceeds would be income/gains. For instance, a cheque representing a dividend from a non-resident company, or a cheque drawn on a foreign account holding unremitted income of T.

A cheque has a twofold character:

- (1) It is an instruction to the payor's bank.
- (2) It is also a chose in action which entitles the payee to sue on it.<sup>134</sup>

Under neither character is the mere receipt of a cheque a taxable remittance.<sup>135</sup> So far as the cheque is an instruction to pay:

---

132 This view is supported a little by s.48(3C)(b) IHTA: see 71.16.3 (Purchased equitable interest).

133 See 4.7.5 (Trust appointment: Filling blanks).

134 Fox, *Property Rights in Money* (1<sup>st</sup> ed, 2008) para 5.18, 5.64.

135 This continues the pre-2008 law. The RDR (discussing the pre-2008 remittance basis) provides:

**“RDRM36110 Remittance Basis up to 6 April 2008: Cheques received** [Jan 2019]

If a taxpayer receives a cheque which represents taxable foreign income, before it is treated as taxable remittance it is necessary for the taxpayer to do something with it after it came into his or her hands.

For example, the cheque might be:

- Credited to a UK bank account
- Exchanged for cash (through a bank or otherwise)
- Accepted by a third party in settlement of a debt owed by the taxpayer
- Given away to a relative

A taxable remittance is not made if a cheque is received in the UK but is then sent abroad and credited to a bank account which the taxpayer has overseas.”

It is not enough to complete the beneficiary's title to the proceeds of the transfer that the beneficiary [ie payee] or his or her bank receives the payment instruction. This is the case whether the instruction is embodied in a telex or telephone instruction given by the originator [payor] or a standing order or payment order form. The instruction only confers on the originator's bank the necessary mandate to make the payment to the beneficiary as his or her agent and to debit his or her account.<sup>136</sup>

So far as the cheque is a chose in action, a promise to pay, it is a different asset from the funds in the account, and so not derived property. Remittance condition B is not satisfied. Also, the chose in action is not UK situate (even if the paper itself is in the UK) unless the cheque is a bearer instrument or negotiable.<sup>137</sup> So remittance condition A is also not satisfied.

Even if the cheque is presented to a bank in the UK, there is still no remittance if:

- (1) the credit is made to the payee's foreign account, not to a UK account;  
or
- (2) the payee is not a relevant person.<sup>138</sup>

#### 17.16.18 *Betting*

In a conventional bet, the individual puts pays a stake, in advance, to the bookmaker. The winnings (if any) are a mixed fund of the original stake and clean capital (because betting profit is not taxed).

Spread betting is explained in *Spreadex v Battu*:

Spread betting is not so much or not merely a bet, although it can be described as such, as a form of contract for differences. It enables a customer to take a position on a market (or an event) for a very small stake. Thus, if the Dow Jones index is, say, at 10,000, one can "buy" or "sell" the market at a spread around the index of, for the sake of example, 10 points either way, 9990 to 10,010. If one buys, one is betting that the market will rise above 10,010. If one sells, one is betting that the market will fall below 9990. If one buys and the market rises, one stands to gain

---

136 Fox, *Property Rights in Money* (1<sup>st</sup> ed, 2008) para 5.64.

137 Cheques drawn on UK banks have generally been non-transferable since the Cheques Act 1992.

138 See 17.12.7 (Gift to non-relevant person); 17.12.8 (Arm's length payment to non-relevant person).

£1 for every point that the index exceeds 10,010. If one sells and the market falls, one stands to gain £1 for every point that the index drops below 9990. If, however, one calls the market wrong, then one will stand to lose £1 for every point the market rises above 9990. Until the bet or “trade” is closed, the gains and losses are merely “running” gains or losses. They are real enough, but constantly changing with every change in the index, and have not yet been fixed. Closing the bet will fix the position, win or lose. Unlike a classic bet, the customer can of course lose more than his stake. Indeed, on the example given, of a sales spread point of 9990 when the market is at 10,000, if the market does not move an inch, the customer will lose £10 for every £1 staked. Nor, again unlike a classic bet, are his winnings fixed at the outset by an agreement on odds. In theory, winnings based on rising markets are infinite (in practice, of course, they are not) and losses based on falling markets are limited only in so far as they cannot exceed the consequences of a fall in the index to zero.<sup>139</sup>

#### Pelling explains:

A spread bet is a form of contract for differences. The client agrees with the firm where he holds his account that each will pay to the other a specified sum per point (the stake) in respect of movements in a nominated index. In financial spread betting the index could be the FTSE 100 or the Dow, or the price of an individual share such as BP or, conceivably, a much smaller floated company, or the price of a commodity or a rate of exchange between specified currencies. If the client is “long” the firm will pay him the stake multiplied by any increase in the index value between opening and closing, but he will have to pay the firm on the same basis if there is a decrease. If he is “short” the opposite applies. The “spread” is the difference between the long and short, or “buy” and “sell” prices at any given time. Spread bets generally have expiry dates built into them but the client is able to close his position before expiry if he chooses to do so. The firm, however, does not have the same discretion. ...

Not all spread betting is on financial indices. Spread betting markets are made by firms on a huge breadth of sporting events, although in this country anecdotal evidence suggests that the biggest individual positions are still taken on financial indices. In this regard spread betting offers certain advantages over more orthodox financial instruments when it

---

139 *Spreadex Ltd v Battu* [2005] EWCA Civ 855 at [2].

comes to profiting from market movements. First, profits on spread bets are taken free of capital gains tax.<sup>140</sup> Secondly, the “geared” or “leveraged” nature of spread bets means that typically the client only has to put up a fraction of the total cost of a position, which means that he can get bigger exposure for a given sum (in hedging the exposure the firm puts up the balance of the cost from its own resources). Thirdly, spread betting offers the client the opportunity to go “short” if he thinks that the market will fall — something that is not always available with a more straightforward brokerage.<sup>141</sup>

In a spread bet, the individual does not put up any stake, but instead incurs a liability to make a possible payment in the future.

If an individual takes a spread bet and loses, nothing can be received in the UK<sup>142</sup> and there can be no remittance. If an individual takes a spread bet and wins, the winnings are not derived from any income/gains: they are derived from the (contingent) liability which the individual undertook when making the bet. Accordingly, there is no taxable remittance if the winnings are brought to the UK.

#### 17.16.19 *Proceeds of insurance claim*

In *IRC v Montgomery*<sup>143</sup> the taxpayer sold a policy of insurance, which was valuable because a fire had damaged insured land held by the taxpayer. The sale proceeds were derived from the policy and not derived from the land. So:

- (1) If the insured land was derived from income/gains but the insurance policy was not, then the proceeds would not be taxable on remittance.
- (2) If the premium on the policy was derived from income/gains, the income/gains spent on the premium would be remitted (but not any income/gains spent on the land).

### 17.17 **Bank errors**

---

140 See 68.14.4 (“Gambling”).

141 Pelling, “The long and the short: common issues in spread betting cases” (2012) 1 JIBFL 18.

142 Assuming payment of the loss is made out of the UK.

143 The case contains some general comments on the meaning of “derived”, see 17.16.1 (“Derived”).

In *Duke of Roxburghe's Executors v IRC*<sup>144</sup> a taxpayer<sup>145</sup> received and held offshore:

- (1) income subject to UK tax on an arising basis (“taxed income”);<sup>146</sup> and
- (2) foreign income taxed on the remittance basis, and which was therefore taxed if remitted (“untaxed income”).

These were wisely held in separate accounts, and so a remittance out of the taxed income account would not be taxable. The taxpayer correctly directed the bank to make a remittance to the UK out of her taxed income account. Unfortunately the bank carelessly debited the wrong account, so according to the bank records, the sum remitted could (largely) be traced to untaxed income!

The Court of Session identified the sum remitted as taxed income because the taxpayer had *intended* the remittance to come out of taxed income.<sup>147</sup>

The same applies under the ITA remittance basis. In the terms of the ITA remittance basis, one would say that the sum the taxpayer received in the UK was derived from her taxed income. It did not matter that there was a debit, no doubt later corrected, from the untaxed income account. That banking records were wrong, and did not reflect the legal position.

The principle also applies in other circumstances of bank error, eg if

144 20 TC 711.

145 More accurately, the wife of the taxpayer: the income of a married woman was at the time deemed to be the income of the husband, so the appellant was the Duke, not the Duchess. But nothing turns on that.

146 For completeness: this was foreign source income of a class not then qualifying for the remittance basis, and so taxed on an arising basis; but nothing turns on that.

147 “The Duchess was entitled to have the remittance debited against any fund belonging to her and under her control and ... she did so effectually by the *instructions* to debit it against money not derived from the [untaxed] income.” Lord Normand at p.726 (emphasis added).

This was also the view of Lord Fleming at p.732: “I base my decision ... on the ground that it was the legal right of the Duchess to make the appropriation against any particular fund belonging to herself, and that in law she made that appropriation when she *directed* the Bank making the remittance to charge it against her funds in their hands which had already borne British Income Tax.”

A second ground of the decision was that a remittance out of a mixed fund of taxed and untaxed income is in general to be treated as out of the taxed income first, regardless of the intention of the taxpayer. The second ground is now reversed by the ITA mixed fund rules. In any case, one would not nowadays regard the two accounts as a single mixed fund.

- (1) A bank was instructed to pay a dividend into a foreign account and accidentally paid it into a UK account of the same bank
- (2) A bank was instructed to pay a dividend into an income account, and accidentally paid it into a capital account of the same bank, creating a mixed fund.

HMRC agree. The RDR Manual provides:

**RDRM33560 Banking Issues** [Jan 2019]

*Bank Errors and Mistakes*

Where

- [1] a bank acts contrary to express instructions by an account holder, and
- [2] that mistake inadvertently results in a taxable remittance to the UK by the account holder,

the account holder and the bank may alter the transaction in line with the original instructions given.

If the bank does this, HMRC will treat the earlier [mistaken] transaction as not having taken place and the new transaction as being the original transaction in looking at whether there has been a taxable remittance from that account.

The error will normally involve a bank, but the same must apply to a non-banking institution which holds accounts for a customer.

See too 19.18.8 (Accidental remittance of nominated income).

## **17.18 Relevant debt rule**

I turn to the second part of remittance condition B. Section 809L(3) ITA provides:

Condition B is that ...

- (c) the income or chargeable gains are used outside the UK (directly or indirectly) in respect of a relevant debt, or
- (d) anything deriving (wholly or in part, and directly or indirectly) from the income or chargeable gains is used as mentioned in para (c).

There are similar provisions in remittance conditions C and D, but condition B is the most important. I refer to this as the “**relevant debt rule**”.

In order to have a debt remittance under condition B, two main conditions

must be satisfied; in short:

- (1) A *relevant debt* (in short, relating to property brought/received/used in the UK).
- (2) Income/gains used *in respect of* the debt.

There is no remittance under the relevant debt rule unless both conditions are satisfied:

- (1) if a relevant debt is paid out of a sum which does not constitute income/gains; or
- (2) if income/gains are used to satisfy a debt which is not a relevant debt.

There is no taxable remittance if the income/gains arose when the individual was not UK resident.<sup>148</sup> But it does not matter when the relevant debt arose.

A further requirement is that the income/gains are used *outside the UK*; however if the income/gains are used in the UK, there will normally be a remittance under the usual remittance rules, so this is not so important in practice.

For the interaction of the relevant debt rule and exempt property, see 18.29 (Exempt property).

### **17.19 Relevant debt**

“Relevant debt” is a key term, which is used in remittance conditions B, C and D. Section 809L(7) ITA provides the definition.

There are six categories of relevant debt:

In this section “relevant debt” means a debt that relates (wholly or in part, and directly or indirectly) to—

- (a) property falling within subsection (2)(a)
- (b) a service falling within subsection (2)(b)
- (c) qualifying property dealt with as mentioned in subsection (4)(a),
- (d) a service falling within subsection (4)(b),
- (e) qualifying property dealt with as mentioned in subsection (5)(a),  
or
- (f) a service falling within subsection (5)(b).

To understand this one must read in the words in the six cross-references, thus:

---

148 See 16.21 (RFI/gains of non-resident, remitted when resident).

<b>Paragraphs</b>	<b>incorporate wording from</b>
(a) and (b)	remittance condition A
(c) and (d)	remittance condition C
(e) and (f)	remittance condition D

When one reads in the words, the text becomes:

In this section “relevant debt” means a debt that relates (wholly or in part, and directly or indirectly) to—

- (a) property falling within subsection (2)(a) [property brought/received/used in the UK],
- (b) a service falling within subsection (2)(b) [service provided in UK],
- (c) qualifying property dealt with as mentioned in subsection (4)(a) [brought/received/used in UK and enjoyed by a relevant person],
- (d) a service falling within subsection (4)(b) [service enjoyed in UK by a relevant person],
- (e) qualifying property dealt with as mentioned in subsection (5)(a) [brought/received/used in UK and enjoyed by a relevant person],  
or
- (f) a service falling within subsection (5)(b) [service enjoyed in UK by a relevant person].

Para (f) is otiose: it only repeats para (d).<sup>149</sup> But it does not matter.

In para (e) “*Qualifying* property dealt with as mentioned in s.809L(5)(a)”, the word “qualifying” is meaningless. The expression “qualifying property” is defined for remittance condition C but not for condition D.

The most important category is para (a). The discussion here concentrates on this category. There are two steps in deciding whether a debt is a relevant debt within para (a):

- (1) One must identify the property (if any) to which the debt relates. I refer to that as the “**debt-related asset**”.
- (2) One must ask if that asset is “property falling within s.809L(2)(a)” ie is the property brought/received/used in the UK by a relevant person.

Strictly one should not use the term “relevant debt” in the abstract. A relevant debt can exist only *in relation to certain persons*. If a debtor borrows, the debt is a relevant debt for:

---

149 Likewise perhaps para (e).

- (1) the individual who brings/receives/uses the money in the UK (who will normally be the debtor); and
- (2) persons who are relevant persons in relation to that individual.

For instance, if H borrows and receives the money in the UK, the debt is a relevant debt for the wife of H (who would make a taxable remittance if she used her income/gains to repay the debt). But it is not a relevant debt in relation to the father of H (who would not make a taxable remittance if he used his income/gains to repay the debt).

But where the context is clear it is permissible to refer to a relevant debt in isolation (leaving the words “in relation to a person” and the identity of that person to be inferred).

“Debt” is not defined. It is suggested that it includes any liability to pay money. If an individual holds a lease, the payment of rent is the payment of a debt. If the land is UK situate, the debt is a relevant debt. A guarantee is not a debt but if the guarantee is called on, a debt comes into existence.

The residence of the lender does not matter. A loan from a UK bank is not a relevant debt if the money borrowed is received and retained outside the UK but it is a relevant debt if the money borrowed is received in the UK. However the relevant debt rule only applies if income/gains are used *outside the UK* in respect of a relevant debt, which is not likely to happen where the loan is from a UK bank: repayment to a UK bank is in principle use of funds in the UK.

## **17.20 Debt “related” to property (debt-related asset)**

“Relates” requires some nexus between the debt and the debt-related asset; exactly what that nexus is has been left to the courts to sort out.<sup>150</sup>

The words “directly or indirectly” do not add any clarity; indeed I am not sure that it is altogether coherent to speak in the abstract of direct and indirect relationships, for “relates” requires a relationship and an indirect relationship is a type of relationship. But the word “indirectly” shows that the drafter did not want the word “relates” to be narrowly construed.

In the following discussion I just use the word “relate” and leave “directly or indirectly” to be understood.

### *17.20.1 Simple examples*

---

150 See App.2.6.3 (Relating to).

Suppose T borrows and receives money. The debt relates to the money. If T receives the borrowed money in the UK, the debt is a relevant debt.

If T borrows and receives the borrowed money outside the UK, the debt still relates to the money, but the money is not “property falling within s.809L(2)(a)” so the debt is not a relevant debt. However if T later brings the money to the UK, it becomes “property falling within s.809L(2)(a)” and the debt at that time becomes a relevant debt. HMRC agree.<sup>151</sup>

T may borrow but without receiving money: T may draw down the borrowing under a loan facility, to pay for an asset, the money being paid directly to the vendor. In that case the debt relates to the asset. If at any time T brings/receives/uses the asset in the UK the debt is a relevant debt. It makes no difference whether the loan is drawn down first, to provide money, or (which may be more usual) drawn down directly to pay for the asset.

The RDR Manual provides some examples which are consistent with the above. I set out the relevant parts of the text, relegating the full text to footnotes.

Example 1 concerns borrowing to buy UK shares.

*Example 1 (Katrina)*<sup>152</sup>

K borrows money to buy shares in a UK company.

The HMRC analysis is as follows:

This is a relevant debt as it relates to property (shares) in the UK which is for the benefit of a relevant person.

More analytically, the debt is in the HMRC view a relevant debt on the following grounds:

(1) The debt relates to the shares. (This is correct).

---

151 See the example of Ali at 17.20.6 (Borrowing/receipt/repayment by different people).

152 The example in full (including its irrelevant detail) is as follows:

**“33160 Condition B - relevant debt** [Jan 2019]

In May 2006 Katrina, a remittance basis user, borrows money from an overseas bank to buy shares in a UK company. This is a relevant debt as it relates to property (shares) in the UK which is for the benefit of a relevant person (Katrina).

From 6 April 2008 any foreign income or gains that Katrina uses in respect of the loan, for example to service or to repay the loan, are taxable as a remittance.”

(2) The shares are received in the UK by K.<sup>153</sup>

Example 2 concerns borrowing to buy UK residential accommodation:

*Example 2 (Gary)*<sup>154</sup>

G borrows money to buy an apartment in the UK which he occupies.

The HMRC analysis is as follows:

The loan is a relevant debt because money is used in the UK, and it is respect of property (the apartment) which is used in the UK for the benefit of a relevant person (G).

More analytically, this is a relevant debt on one or both of the following grounds:

- (1) It relates to the flat which is used in the UK by G. (This is correct).
- (2) It relates to money which is used in the UK by G. Whether this is correct depends on the details of the purchase arrangement, but it does not matter since the debt is a relevant debt under (1)).

Example 3 concerns borrowing to buy a UK chattel for a relevant person.

*Example 3 (Robina)*<sup>155</sup>

R borrows money to buy a car for M, a relevant person.

The HMRC analysis is as follows:

---

153 This assumes a receipt of UK situate property is a receipt in the UK; see 17.12.9 (Acquisition of UK security).

154 The example in full (including its irrelevant detail) is as follows:

“On 6 April 2015, Gary, a remittance basis user, borrows money from an overseas bank to buy an apartment in Solihull.

The loan is a relevant debt because money is used in the UK, and it is respect of property (the apartment) which is used in the UK for the benefit of a relevant person (Gary).”

155 The example in full (including its irrelevant detail) is as follows:

“In October 2012 Robina, a remittance basis user, borrows money on a fixed-rate loan from an overseas bank to buy a car for Mark, a relevant person. Robina pays £x each month from 1 November 2012, making 24 monthly payments. She uses her foreign chargeable gains to make these repayments.

The loan is a relevant debt because it is respect of property (the car) which is used in the UK by a relevant person (Mark).”

The loan is a relevant debt because it is respect of<sup>156</sup> property (the car) which is used in the UK by a relevant person (M).

More analytically, there is a relevant debt because:

- (1) The debt relates to the car.
- (2) The car is used in the UK by a relevant person, M. (Another reason is that the car must have been brought or received in the UK by R or M.)

Example 4 concerns borrowing to pay for two services, one provided in and the other out of the UK; I discuss this at 17.20.12 (Debt relates to property in part).

Example 5 concerns borrowing to purchase an asset given to a relevant person; I discuss this at 17.20.6 (Borrowing/receipt/repayment by different people).

Example 6 (Francine) is a straightforward example of borrowing to pay for services in the UK which adds nothing and so is not set out here.

For example 7, see 17.20.6 (Borrowing/receipt/repayment by different people).

### 17.20.2 *Asset derived from debt-related asset*

Suppose:

- (1) T borrows and uses the borrowed money to purchase a non-UK asset (“asset 1”).
- (2) T later sells asset 1 and uses the sale proceeds to purchase a UK asset (“asset 2”).

The debt relates to asset 1. It is considered that the debt does not necessarily relate to asset 2. The word “relates” requires more than just a historic tracing exercise. It is suggested that the debt relates to asset 2 if and only if steps (1) and (2) form part of an arrangement.

Suppose:

- (1) T borrows.
- (2) The borrowed funds (or proceeds representing them) are mixed with other funds.
- (3) Some of the mixed funds are used to acquire a UK asset (leaving an

---

<sup>156</sup> The author of the example probably regarded “relates to” and “in respect of” as synonymous, and perhaps they are; but it is best to use the statutory wording and not a paraphrase.

amount in the mixed fund which equals the borrowed funds).

Does the borrowing relate to the UK asset or to the amount remaining in the mixed fund? Unless steps (1) to (3) form part of an arrangement, the debt does not relate to the UK asset. If the debt does relate to the asset, some commonsense tracing rules must be devised; the ITA mixed fund regime does not apply.

Suppose T borrows invests the borrowed funds, and receives income from the borrowed funds. It is considered that the debt does not relate to the income. So if the income is remitted, it is in principle taxable, but the debt does not thereby become a relevant debt.

### 17.20.3 *Debt-related asset leaves UK/ceases to exist*

Suppose:

- (1) T borrowed to acquire an asset.
- (2) T brings/receives the asset in the UK so the debt is a relevant debt.
- (3) T later takes the asset outside the UK.

The debt still relates to the asset. It is suggested that the asset is still “property falling within s.809L(2)(a)” ie property brought/received in the UK by T. So the debt is still a relevant debt. The contrary view would give scope for planning/avoidance. Suppose T wanted to use property/chattels in the UK:

- (1) T borrows funds.
- (2) T uses the funds to purchase property in the UK and chattels which T brings/receives in the UK.
- (3) Interest (unpaid) rolls up on the debt.
- (4) Later when T no longer wants to use the property/chattels, the chattels are taken outside the UK, and the property is sold.
- (5) The debt and interest is then repaid.

If my view is wrong, the debt has ceased to be a relevant debt by the time it is repaid so there is no taxable remittance, even though T may have enjoyed substantial benefits in the UK.

Suppose:

- (1) T borrowed to acquire an asset.
- (2) T brings/receives the asset in the UK so the debt is a relevant debt.
- (3) The asset ceases to exist (eg it is a short lease which expires, or money which is spent).

It is considered that the debt remains a relevant debt. That is consistent with relevant debt rule for services, for if T borrows to pay for services provided in the UK, the debt is a relevant debt even after the services have ceased to be provided.

17.20.4 *Borrowing to repay debt*

Suppose:

- (1) T borrows to acquire borrowed money or other property; T has a debt (“debt 1”) and an asset (“asset 1”). Debt 1 relates to asset 1.
- (2) T borrows again (“debt 2”) and uses the borrowed funds to repay debt 1, so T retains asset 1.

Does debt 2 relate to asset 1? It is considered the answer is yes, if the steps form a scheme or arrangement.

17.20.5 *Borrowed money lent to 3<sup>rd</sup> party*

The position becomes more complex if borrowed money is lent on to another person. Suppose:

- (1) T borrows money from a bank.
- (2) T lends the borrowed money to A.
- (3) A uses the money to acquire a UK asset (“A’s UK asset”).

In this case:

- (1) T has a debt: the burden of the debt to the bank (“T’s debt”). One needs to ask if it is a relevant debt.
- (2) A has a debt: the burden of the debt to T (“A’s debt”). One needs to ask if it is a relevant debt.
- (3) T has an asset: the benefit of A’s debt to T: one needs to ask if it is UK situate.
- (4) A has an asset: “A’s UK asset”.

A’s debt is a relevant debt: it relates to A’s UK asset.

Is T's debt a relevant debt? T's debt relates to the benefit of A's debt. If the benefit of A's debt is a UK situate asset, then T's debt is a relevant debt. Let us assume this is not the case.

T's debt is also a relevant debt if (1) it relates (indirectly) to A's UK asset and (2) A is a relevant person in relation to T. It is considered that T's debt does not relate to A's UK asset if steps (1) and (2) do not form an arrangement. If there is no connection of that kind between T's debt and the UK asset, the debt does not relate to the asset.

If there is an arrangement, it is suggested that T's debt does relate to A's UK asset. The contrary is arguable, since T has another asset which does relate to the debt. Scope for tax avoidance in this conclusion is restricted, since the relevant debt rule applies to A.

If that is so, what would the position be if:

- (1) T borrows from a bank and lends to A.
- (2) A lends the proceeds of the borrowing to B.

- (3) B uses the money to acquire a UK asset. How many assets would T's debt relate to, and could T keep track of them all? Perhaps the position depends on the nature of the arrangement. In some cases it would be easy to trace, and in others, less so.

17.20.6 Borrowing/receipt/repayment by different people

The relevant debt rule has three conditions:

- (1) A debt relating to property
- (2) The property is received/brought/used in the UK by a relevant person
- (3) A payment in respect of that debt

Normally those three steps will be taken by the same person but that need not be the case. There may be two or three separate persons involved:

- (1) A may borrow
- (2) B may receive the debt-related asset in the UK
- (3) C may repay the debt

The debt is a relevant debt in relation to B and to those who are relevant

persons in relation to B.<sup>157</sup>

RDR Manual 33160 gives a straightforward example where A borrows to purchase an asset which is given to a B (a relevant person), B brings it to the UK:

*Example 5 (Ali)*<sup>158</sup>

A borrows to purchases a sculpture outside the UK.

A gives the asset to his wife W.

W brings the asset to the UK.

HMRC correctly analyse why the debt is a relevant debt:

There is a debt (the loan from the bank) which relates to property (the sculpture) which is brought to the UK by a relevant person (W).

157 As to when the relevant person test must be satisfied, see 17.23.3 (Relevant debt: Becoming/ceasing to be relevant person).

158 The example in full (including its irrelevant detail) is as follows:

**“RDRM33160 Condition B - relevant debt [Jan 2019]**

Ali, a remittance basis user, purchases a sculpture in Sweden in October 2012 (refer to the earlier example). He takes out an interest-free (!) loan with his US bank to fund this purchase, repayable within 1 year. In November 2012 he gives them to his wife as an anniversary gift.

She initially keeps it at her mother’s home in Stockholm, but 6 months later in March 2013 Ali’s wife decides to bring the sculpture to the UK to display in her UK garden. In October 2013 Ali arranges with the US bank that he will repay the loan by giving them an oil painting which is currently in his apartment in Miami, which he had purchased in May 2011, using his relevant foreign earnings, and some capital inherited from an uncle.
