For this reason the occasion of a trustee purchasing UK funds is not an occasion that Parliament intended, following the 2003 reforms, to be included in the reference to property "ceasing to be relevant property."

---

32 See the House of Lords in *Barclays Mercantile Business Finance v Mawson* 76 TC 446 at [28] - [32]. The passage is too well known to need to be set out here.

Such was the intention of Parliament. The concept of the “intention of Parliament” is a construct. It is to be deduced from the words of the legislation; in most cases one cannot say what would be the intention(s) in the many hundreds of minds involved in both Houses, and it would be idle to speculate. However if a proverbial "officious bystander" had asked any member of Parliament in 2003 whether they intended an IHT charge to arise in these circumstances, the response would be: of course not!

It is not, I think, ever suggested that purposive construction is a one way street which can be used if it favours HMRC. That is clear on principle, but if authority is needed, there is *Bibby v Prudential Assurance* 73 TC 235:

> 69. ... The warning [in *Ramsay*] against a literal construction that would permit the use of a taxing provision for a purpose never intended or contemplated by Parliament was directed at taxpayers, or their tax advisers, but must, in my judgment, be heeded also by the Revenue. The assessments in the present case have represented, in my view, an attempt to use s 95 for a purpose never intended or contemplated by Parliament. Such an attempt is no more acceptable from the Revenue than it would be from a taxpayer.

At least some within HMRC would agree. Chris Tailby former director of the HMRC anti-avoidance group has written:

> The point applies equally to the government (I use the term to include HM Treasury and HMRC) which should not stretch tax law to attempt to collect tax which Parliament did not intend to collect.[33]

The IHT Manual was amended in September 2010 and now provides:

> **4262 Holdings in Open End Investment Companies (OEICs) and Authorised Unit Trusts (AUTs)**
> ... However, this exclusion does not always apply to relevant property trusts as IHTA84/S48(3A) is excluded from IHTA84/S65(7). Any case where the transfer concerns property held in a (relevant property trust where:

33 Tailby, “Some reflections on Tax Avoidance” [2011] PCB 41 at 44.

- the trust was created by a settlor domiciled outside the UK, and
- the trust disposes of UK situs (IHTM27071) assets and also acquires AUTs / OEICs

must be referred to Technical Group.

It appears that HMRC are at present taking the point, but it is considered that the better view is that there is no exit charge; and the sooner that is officially acknowledged, the better for the UK investment management industry.

## 53.10 Trusts: FOTRA securities

FOTRA securities held by trustees may be excluded property. Under this exemption the domicile of the settlor is irrelevant; one must look at the ordinary residence of the relevant beneficiary or beneficiaries and, if appropriate, their domicile.

For the interaction with s.44(2) IHTA, see 55.4.1 (When separate settlements fiction does not apply).

### 53.10.1 *Estate IP trust*

Section 48(4) IHTA provides:

> Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; but the securities are excluded property if—
>
> (a) a person of a description specified in the condition in question is entitled to a qualifying interest in possession in them.

Qualifying IP is defined in s.59(1) IHTA:

> (1) In this Chapter "qualifying interest in possession" means—
> (a) an interest in possession—
> (i) to which an individual is beneficially entitled, and
> (ii) which, if the individual became beneficially entitled to the interest in possession on or after 22nd March 2006, is an immediate post-death interest, a disabled person's interest or a transitional serial interest, or
> (b) an interest in possession to which, where subsection (2) below

> applies, a company is beneficially entitled.[34]

That is, a qualifying IP is what this book describes as an estate IP. The 2006 reforms have (inadvertently?) greatly restricted the scope of the exemption for FOTRA securities in settlements.

### 53.10.2 *Other trusts*

Section 48(4) IHTA provides:

> Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; but the securities are excluded property if—
> ...
> (b) no qualifying interest in possession subsists in them but it is shown that all known persons
> [i] for whose benefit the settled property or income from it has been or might be applied, or
> [ii] who are or might become beneficially entitled to an interest in possession in it,
> are persons of a description specified in the condition in question.

The IHT Manual correctly states:

> **27248 - Unknown persons** [June 2006]
> The legislation refers to "known persons". Accordingly, when considering the question of domicile and ordinary residence you should disregard the possibility that some (currently) unknown person (e.g. an unborn child or future spouse/civil partner of an existing beneficiary) might become a beneficiary in the future.
> **27249 - UK charities**
> In the case of *Von Ernst and Cie S.A. v IRC* [1980] 1 WLR 468 the Court ruled **that any payment or potential payment** from the settled property to an incorporated UK charity – to be used by the charity for its charitable purposes – would not be an application for the "benefit" of the charity. Accordingly you should not deny the exclusion for exempt securities merely because a UK charity (whether incorporated or not)

34 The position for companies entitled to IPs is not considered here.

has received or might receive any of the settled property or income from it.

### 53.10.3 *Exit charge on acquisition of FOTRA securities*

Section 65(1) IHTA provides:

> There shall be a charge to tax under this section—
> (a) where the property comprised in a settlement or any part of that property ceases to be relevant property...

The acquisition of FOTRA securities would give rise to a charge but s.65(8) IHTA provides relief:

> If the settlor of a settlement was not domiciled in the UK when the settlement was made, tax shall not be charged under this section by reason only that property comprised in the settlement is invested in securities issued by the Treasury subject to a condition of the kind mentioned in section 6(2) above and thereby becomes excluded property by virtue of section 48(4)(b) above.

If the settlor is UK domiciled, there is still an exit charge.

## 53.11 Estate IP trust

### 53.11.1 *The question*

As we have seen, there are two sets of definitions of excluded property:
(1) Section 6 IHTA defines categories of excluded property for non-settled property to which a person is beneficially entitled.
(2) Section 48 IHTA defines corresponding categories of excluded property for trust property.
Property is either settled or not, so at first sight the definitions appear to be mutually exclusive. However, a settlement under which a beneficiary has an estate interest in possession raises a doubt. Property held in a settlement with an estate IP is certainly settled property (so *prima facie* the s.48 rules apply). However, s.49(1) IHTA provides (for an estate IP):

> A person beneficially entitled to an interest in possession in settled property shall be treated for the purposes of this Act as beneficially

entitled to the property in which the interest subsists.

Since the person is treated as beneficially entitled, should the s.6 IHTA rules apply to settled property?

### 53.11.2 *Foreign situate property and UK funds in estate IP trust*

The answer is provided by s.48(3)(b) IHTA:

> Where property comprised in a settlement is situated outside the UK...
> (b) section 6(1) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property*;

Thus for settled foreign-situate property the s.48 definition applies and the s.6(1) definition is disapplied. The operation of these rules can be illustrated by two examples:

(1) Suppose a foreign domiciled beneficiary has an estate IP in a settlement made by a UK domiciled settlor. The trust property is situated outside the UK.

The trust property is not excluded property as it does not meet the requirements of s.45(3)(a). It would meet the requirements of s.6(1) but s.48(3)(b) disapplies s.6(1).

(2) Suppose the reverse situation – a UK domiciled beneficiary has an estate IP in a settlement created by a foreign domiciled settlor. The trust property is again situated outside the UK.

The tax position is now reversed. The trust property would not qualify as excluded property under s.6(1) but it does qualify under s.48(3)(a). Section 48(3)(b) disapplies s.6(1) but that is irrelevant: the trust property is excluded property.

For UK funds, the same answer is provided by s.48(3A)(b) IHTA:

> Where property comprised in a settlement is a holding in an authorised unit trust or a share in an open-ended investment company ...
> (b) section 6(1A) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property;*

Thus for settled AUTs and OEICs, the s.48 definition applies and the s.6(3A) definition is disapplied.

### 53.11.3 *FOTRA securities in estate IP trust*

Section 48(4) IHTA provides:

> Where securities issued by the Treasury subject to a condition of the kind mentioned in subsection (2) of section 6 above are comprised in a settlement, that subsection shall not apply to them; ...

Again, the s.48(4) definition of excluded property applies and the s.6(2) definition is disapplied. This is not actually necessary because s.6(2) and s.48(4)(a) lead to the same result, but it does no harm.

### 53.11.4 *Qualifying certificates in estate IP trust*

Qualifying certificates of an individual domiciled in the Channel Islands or the Isle of Man ("**an Islander**") are excluded property.[35] If an Islander is entitled to an estate IP in qualifying certificates, the certificates are not excluded property under s.48(3) or s.48(4). But it is considered that the property does qualify as excluded property under s.6(3) since the individual is to be treated as if they were beneficially entitled. In this case there is no express provision that s.48 overrides s.6. Section 48 and s.6 do not contradict each other; rather they offer two alternative routes to attain excluded property status. Such settled property is therefore excluded property. HMRC agree.

## 53.12 Initial interest of settlor or spouse

### 53.12.1 *The s.80 fictions*

Special rules apply where the settlor or spouse have an estate interest in possession in a trust when it is made ("**an initial IP**"). The basic rule is set out in s.80(1) IHTA:

> Where a settlor or his spouse or civil partner is beneficially entitled to an interest in possession in property immediately after it becomes comprised in the settlement,

35 See 53.7 (Individual domiciled in Channel Islands or Isle of Man).

[a] the property shall for the purposes of this Chapter[36] be treated as not having become comprised in the settlement on that occasion;

[b] but when the property or any part of it becomes held on trusts under which neither of those persons is beneficially entitled to an interest in possession, the property or part shall for those purposes be treated as

[i] becoming comprised in a separate settlement

[ii] made by that one of them who ceased (or last ceased) to be beneficially entitled to an interest in possession in it.

Thus where the settlor or spouse has an initial IP, s.80 imposes three fictions ("**the s.80 fictions**"):

(1) Property which is actually in one settlement ("the actual settlement") will be treated as being comprised in a separate settlement ("the notional settlement").

(2) The person who is treated as the settlor of the notional settlement may be the spouse, ie different from the real settlor of the actual settlement.

(3) The time at which trust property is treated as becoming comprised in the notional settlement is when the settlor/spouse IP ceases, which is different from the time that property actually became comprised in the actual settlement.[37]

### 53.12.2 *Trusts before 1974 and after 2006*

Section 80(3) IHTA provides:

> This section shall not apply if the occasion first referred to in subsection (1) above occurred before 27 March 1974.

"The occasion first mentioned in subsection (1)" is the date that the property becomes comprised in the actual settlement, ie the date that the settlement is made. So:

(1) Section 80 does not apply to property settled before 27 March 1974.

(2) Section 80 can apply to property settled between 27 March 1974 and

36 "This Chapter" is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

37 This fiction does not apply for the purposes of the ten-year anniversary date, which is fixed by the date of the actual settlement: see s.61(2) IHTA 1984. I cannot see the reason for that rule.

22 March 2006.

The position from 22 March 2006 is governed by s.80(4):

> Where the occasion first referred to in subsection (1) above occurs on or after 22 March 2006, this section applies—
> (a) as though for "an interest in possession" in each place where that appears in subsection (1) above there were substituted "a postponing interest", and
> (b) as though, for the purposes of that subsection, each of the following were a "postponing interest"—
> (i) an immediate post-death interest;
> (ii) a disabled person's interest.

Section 80 can apply to trusts made from 22 March 2006 only if the trust confers an IPDI (which only applies to will trusts) or a disabled person's interest (which will be rare).

### 53.12.3 *Spouse with initial IP: excluded property rule*

Suppose:
(1) In Year 1, H creates a trust under which W has an initial IP.
(2) In Year 2, W dies (so her IP comes to an end). H does not become entitled to an IP at the time that W dies.
In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as comprised in a notional trust, which is treated as made in Year 2 and W is treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if W was foreign domiciled at the time of her death in Year 2. The domicile of H would be irrelevant. This would benefit the taxpayer if (for instance) H was UK domiciled and W was not, and could sometimes be used for tax avoidance.

Therefore where s.80 applies, s.82 IHTA imposes a further condition relating to excluded property.[38] This provides:

---

38 With an economy of drafting, s.82 is also used to for the purposes of the same settlement fiction but although there is some overlap, it is easiest to discuss that aspect separately. See 55.9.1 (Section 81 excluded property rule).

> (1) For the purposes of this Chapter[39] ... property to which section 80 ... applies shall not be taken to be excluded property by virtue of section 48(3)(a) above unless the condition in subsection (3) below is satisfied (in addition to the conditions in section 48(3) that the property is situated outside the UK and that the settlor was not domiciled there when the settlement was made).
>
> ...
>
> (3) The condition referred to in subsection (1) ... is—
>
> (a) in the case of property to which section 80 above applies, that the person who is the settlor in relation to the settlement first mentioned in that section ...
>
> was not domiciled in the UK when that settlement was made.

The "settlement first mentioned" in s.80 is the actual settlement made by H. (The notional settlement treated as made by W is the second settlement mentioned in s.80.)

In relation to foreign situate trust property, s.82 prevents the s.80 fiction from benefiting the taxpayer. The fiction may however benefit HMRC. Suppose:

(1) H is the settlor.
(2) W has an initial IP.
(3) Subsequently the settled property is held on trusts where neither H nor W has an interest in possession.[40]

It is necessary to look at the domicile of H at the time when the actual settlement was actually made *and* at the domicile of W at the time her interest in possession came to an end in order to determine whether foreign situate trust property (in the notional settlement) is excluded property. Both must be domiciled out of the UK (at the right time) in order for foreign situate property to qualify securely for excluded property status.

### 53.12.4 *Settlor with initial IP: excluded property rule*

In practice in lifetime trusts it is rare for the settlor's spouse to have an initial IP but it is common for the settlor to have an initial IP. Suppose first that:

---

39 "This Chapter" is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

40 Whether an estate IP or not. This is anomalous, but the drafter of the 2006 rules did not think through the consequences for s.80.

(1) Year 1: H has an initial IP; and
(2) Year 2: that IP comes to an end (without W becoming entitled to an IP).

In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as comprised in a notional trust, which is treated as made in Year 2 though H is still treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if H was foreign domiciled in Year 2. The domicile of H at the time the trust was made would be irrelevant. This could not be used for tax avoidance, but s.82 IHTA nonetheless imposes its further condition relating to excluded property. It is necessary to look at the domicile of H at the time when the actual settlement was actually made *and* at the time their interest in possession came to an end in order to determine whether foreign situate trust property (in the notional settlement) is excluded property. H must be domiciled out of the UK at both times in order for foreign situate property to qualify securely for excluded property status.

Suppose:
(1) In Year 1, H creates a trust under which H has an estate IP.
(2) In Year 2, H dies and W becomes entitled to an IP.
(3) In year 3, W's interest comes to an end (H not at that time becoming entitled to an IP).

In this example H is the settlor of the actual trust and Year 1 is the date of commencement of the actual trust. However, applying the s.80 fictions, the property is treated as comprised in a notional trust, which is treated as made in Year 3 and W is treated as the settlor.

If that were all, it would follow that the trust property could be treated as excluded property if W was foreign domiciled at the time of her death in Year 3. The domicile of H would be irrelevant. Once again, s.82 IHTA imposes a further condition relating to excluded property. In relation to foreign situate trust property, s.82 prevents the s.80 fictions from benefiting the taxpayer. It may however benefit HMRC. It is necessary to look at the domicile of H at the time when the actual settlement was actually made *and* at the domicile of W at the time her interest in possession came to an end in order to determine whether foreign situate trust property (in the notional settlement) is excluded property. Both must be domiciled out of the UK (at the right time) in order for foreign situate property to qualify for excluded property status.

### 53.12.5 *Planning for partly excluded property trust*

I use the term **"partly excluded property trust"** to refer to a trust where:

(1) the trust property in the actual settlement is excluded property on ordinary principles; but

(2) it is not excluded property in the notional settlement under s.80/82 rules.

The s.80/82 rules apply only for the purposes of "this chapter": the relevant property trust regime. They have no wider application. So foreign property of a partly excluded property trust:

(1) is not excluded property for the purposes of the relevant property trust taxation; but

(2) is excluded property for all other IHT purposes (eg GWR and the estate IP trust regime).

Before 2006, s.80 did not much matter as a partly excluded property trust could remain IP in form throughout its life. So in practice it qualified as excluded property. Now it cannot do so. So the tax position of these trusts has been seriously affected as an accidental result of the 2006 reforms.

### 53.12.6 *Avoiding s.80/82 problems: trusts made on or after 22 March 2006*

No difficulty arises for lifetime trusts from 22 March 2006, unless the trust confers a disabled person's interest (which will be rare).

Section 80 still poses a trap for will trusts, where the testator is not UK domiciled and the spouse is UK domiciled. One needs to avoid an IPDI.

A simple solution is to arrange that the will trust is discretionary at the outset, ie the widow does not have an initial interest in possession. A two-year discretionary period will in principle be needed to avoid s.144 IHTA. This is easy if the property given to the trust is not UK situate.

### 53.12.7 *Avoiding s.80/82 problems: trusts made before 22 March 2006*

In cases where an existing trust conferred an initial IP on the settlor/spouse, it would be desirable to revoke the IP before the settlor becomes deemed UK domiciled. It does not matter that the settlor/spouse may have an initial IP provided that when it comes to an end[41] the life tenant is not UK domiciled or deemed domiciled.

53.12.8 *Avoiding s.80/82 problems by FOTRA securities or UK funds*

Section 80 provides that property shall not be taken to be excluded property *by virtue of s. 48(3)* IHTA.[42] So it prevents foreign situate property from being excluded property. It does not apply to FOTRA securities and AUTs.

53.12.9 *Commentary*

What is the purpose of the three s.80 fictions? The standard IHT trust regime would not work well where the settlor or their spouse has the first interest in possession under a settlement commencing after 26 March 1974. Dymond explains:

> In such a case there will be no chargeable transfer when the settlement was made and so no occasion to value the settled property for CTT or IHT at that time. If an exit charge arose nearly 10 years later, it might be difficult to ascertain the value at the commencement of the settlement, as required by s.68(5)(a) IHTA, because important evidence might have been lost or destroyed. It might also not be easy to ascertain the settlor's cumulative total at that time as required by s.68(4)(b) IHTA. The same difficulty with the settlor's cumulative total might occur at the time of the 10 yearly charge, because of s.66(5)(a).[43]

Section 80 solves this valuation problem but the reader may agree with the author that even before 2006 the cure was worse than the disease. (This does explain why the s.80 fictions only apply for the purposes of the standard IHT trust regime.)

Since 2006 the operation of the rules is bizarre, but (as is generally the case with bizarre law) careful planning can mitigate much of the unfairness.

---

41 Not being followed by another IP for the settlor/spouse.

42 I am grateful to Chris Jarman for pointing this out.

43 *Dymond's Capital Taxes*, para 19.700.

## 53.13 Settlor adds property to trust after change of domicile

Suppose:
(1) a settlor creates a trust when not UK domiciled; and
(2) the same settlor[44] adds funds to the trust later when UK domiciled.
Can the added property be excluded property? The IHT Manual para 4272 provides:

> **4272. When the settlement was made** [October 2007]
> The legislation refers to the settlor's (IHTM16000) domicile (IHTM13000) 'at the time the settlement was made'. You should proceed on the basis that, for any given item of property (IHTM04030) held in a settlement, the settlement was made when that property was put in the settlement. Refer any case where this view is challenged to TG.
> *Example*
> S, when domiciled abroad, creates a settlement of Spanish realty. Later he acquires an UK domicile and then adds some Australian property to the settlement.
> The Spanish property is excluded property because of S's overseas domicile when he settled that property. However, the Australian property is not excluded property as S had a UK domicile when he added that property to the settlement.[45]

The relevant time in s.48(3) is not "the time when the property was settled"; it is "the time the settlement was made". HMRC seek to treat the transfer of an asset to an existing settlement as the making of a new settlement. It would follow that a person adding property to an existing settlement would be creating a second settlement or as many settlements as there are additions.

There is nothing conceptually impossible in HMRC's view that a separate settlement is deemed to be made where a person adds property to

44 This section considers the position where the *settlor* adds to a trust. For the position where others add to a trust, see 55.5 (B adds property to A's trust).

45 This view is repeated in RI 166.

an existing settlement made by them.[46] But since adding property does not in fact create a new and separate settlement, two separate settlements do not exist;[47] one needs something express or implied in the legislation to deem what is in fact one settlement to be treated as two. When new property is added to an existing settlement, the new property *becomes comprised* in the settlement at that time, but that is not the same as saying the settlement (or a new settlement) was made at that time. The HMRC view leads to a more sensible result. But the legislation is so clearly inconsistent with the HMRC view that even a purposive construction cannot assist.[48]

Section 43 IHTA provides:

> (1) The following provisions of this section apply for determining what is to be taken for the purposes of this Act to be a settlement, and what property is, accordingly, referred to as property comprised in a settlement or as settled property.
> (2) "Settlement" means any *disposition or dispositions* of property,

---

46 This fiction is applied when there are two settlors, see 55.4 (The separate settlements fiction). The same fiction could in principle apply when the settlor adds property to an existing settlement.

47 This is self-evident but if authority is needed see *Truesdale v FCT* (1970) 120 CLR 353 at p.362 accessible *http://law.ato.gov.au*.

> "The words created a trust in s.102 are not, I think, apt to describe the payment of money to a trustee to hold under a trust already constituted. There is an obvious difference between creating a trust in respect of property, on the one hand, and, on the other, transferring property to a trustee to hold upon the terms of an established trust. To read the section as if it applied to such a transfer would be, in the absence of a context, to expand it. Such a reading would be tantamount to saying that the transfer to the trustee of property to be held as part of the assets of an already constituted trust would be to create a second trust, whereas, from the point of view of both the trustee and of the beneficiary, there would be but one trust and the property transferred would be nothing more than an addition to the property subject to the trust."

Contrast Civil Procedure Rules 64.4(2) which distinguishes the person who created a trust from one who provided property for the purpose of the trust.

48 "It may be perfectly proper to adopt even a strained construction to enable the object and purpose of legislation to be fulfilled. But it cannot be taken to the length of applying unnatural meanings to familiar words or of so stretching the language that its former shape is transformed into something which is not only significantly different but has a name of its own. This must particularly be so where the language has no evident ambiguity or uncertainty about it." *Clarke v Kato* [1998] 1 WLR 1647 at p.1655.

> whether effected by instrument, by parol or by operation of law, or partly in one way and partly in another, whereby the property is for the time being—
>
> (a) held in trust for persons in succession or for any person subject to a contingency, or
>
> (b) held by trustees on trust to accumulate the whole or part of any income of the property ... or
>
> (c) charged ... with the payment of any annuity ...
>
> (Emphasis added)

Perhaps the HMRC argument is that because a "settlement" means any disposition of property, each disposition constitutes a new and separate settlement. However, the words "any disposition or dispositions of property" indicate that more than one disposition can create a single settlement. One example would be where an original trust has been modified by a disposition by beneficiaries;[49] another would be where the settlor has made separate dispositions to the same trust. So these words do not help the HMRC argument.[50] See *Rysaffe v IRC* [2003] STC 536 at [13]:

> Section 43 does not specifically address a numerical question: what is the number of relevant settlements existing in a particular inheritance tax situation? In the absence of specific statutory provisions the answer to the numerical question is to be found in the general law of trusts.

Further, the HMRC view is incompatible with many provisions of the IHTA. If each addition to an existing trust is a new settlement it makes nonsense of the added property provisions in s.67 IHTA and the many references to added property in the surrounding sections. It also makes nonsense of the separate settlements fiction[51] which assumes (in the absence of s.44(2) IHTA) that one settlement may have two settlors.

The HMRC view is not consistent with s.49(5) FA 1977. This section clearly distinguished between:

(1) "the time when a settlement was made", and

---

49 See 69.10.1 (The trust law background).

50 The drafter of the words "disposition or dispositions" almost certainly had in mind the reference to "instrument or instruments" and "compound settlement" in the earlier legislation and the comments in *Dymond's Death Duties*, 15th ed, p.129.

51 See 55.4 (The separate settlements fiction).

(2) "the time when [added] property was settled".
It did so in the context of excluded property. That section is now repealed but the fact that the drafter took this view in 1977 remains relevant.

On the other hand, the transitional relief for the deemed domicile rule appears to assume the HMRC view, that excluded property status depends on domicile of the settlor at the time the property was added.[52] But overall this factor is outweighed by the others.

It might take litigation before HMRC amend their published stance on this issue but I think they would be advised not to fight. Until the point is clear, trustees should follow this advice in RI 166:

> **Trust records**
> ... the trustees of a settlement should keep adequate records to enable any necessary attribution of the settled property to be made if ...the settlor has added further assets to the settlement after it was made...

Suppose a settlor creates a trust when UK domiciled and adds property to it when foreign domiciled. On my view, none of the property is excluded property. However, HMRC must abide by their statement (at least until it is officially and publically withdrawn with appropriate transitional relief) and accept the added property may be excluded property! Thus, the consequence of their statement (if my view is right) is that HMRC have the worst of both worlds. Of course, a well advised settlor should not be in this situation, but it does arise from time to time by accident.

### 53.13.1 *Contract to transfer to trust*

It may be possible to avoid this problem if a foreign domiciled person contracts to assign property to a trust; provided that the contract is made while non-UK domiciled, domicile at the time of the transfer may not matter.

### 53.13.2 *Same settlor adds property to company held by trust after acquisition of UK domicile*

Suppose:
(1) A settlor creates a trust while domiciled outside the UK;

52 See 52.6 (Pre-1974 transitional rules).

(2) The settlor becomes UK domiciled; and
(3) The settlor gives property to a company owned by the trust.
Then HMRC's argument does not run at all. The shares in the company (if not UK situate) must be and remain excluded property. But watch out that the gift may be a gift with reservation and/or a chargeable transfer for IHT.

## 53.14 Occasions where excluded property is relevant for IHT

RI 166 states:

> However, an "excluded" asset is not always completely irrelevant for the purposes of IHT. So—
> [1] an "excluded" asset in a person's estate may still affect the valuation of another asset in the estate, for example, an "excluded" holding of shares in an unquoted company may affect the value of a similar holding in the estate which is not "excluded";
> [2] the value of an "excluded" asset at the time the asset becomes comprised in a settlement may be relevant in determining the rate of any tax charge arising in respect of the settlement under the IHT rules concerning trusts without [estate] interests in possession—ss 68(5), 66(4) and 69(3).

This is correct, but point [1] does not arise in practice and point [2] will only rarely be significant.

## 53.15 Transfer of value by close company

Section 94 IHTA provides:

> **Charge on participators**
> (1) Subject to the following provisions of this Part of this Act, where a close company[53] makes a transfer of value, tax shall be charged as if each individual to whom an amount is apportioned under this section

53 Section 102(1) IHTA provides a referential definition of "close company":
"In this Part of this Act—
'close company' means a company within the meaning of the Corporation Tax Acts which is (or would be if resident in the UK) a close company for the purposes of those Acts."

> had made a transfer of value of such amount as after deduction of tax (if any) would be equal to the amount so apportioned, less the amount (if any) by which the value of his estate is more than it would be but for the company's transfer ...

Section 94(2) IHTA explains how the apportionment is made. It contains an exemption for foreign domiciliaries:

> if any amount which would otherwise be apportioned to an individual who is domiciled outside the UK is attributable to the value of any property outside the UK, that amount shall not be apportioned.

This exemption does not apply to FOTRA securities because they are UK situate. This was presumably an oversight and the IHT Manual extends the exemption to cover this:

> **14854. Foreign aspects** [October 2007]
> [The Manual summarises the statutory exemption and continues:]
> [1] A transfer of value by
> - a company incorporated abroad (hence domiciled abroad - *Gasque v IRC* [1940] 2 KB 80) of
> - property situate abroad
>
> is **not** excluded property since s.6(1) IHTA only applies to individuals.
> [2] Nevertheless, if such a company
> - is resident abroad and
> - makes a transfer of exempt Government securities within s.6(2) IHTA,
>
> they **do** qualify as excluded property.[54]

There is no exemption for UK situate AUTs or OEICs but an HMRC concession would be sensibly consistent with the practice on FOTRA securities.

---

54 Sentence [1] is not technically accurate. It would be strictly correct to say that *property* of a company incorporated abroad and situate abroad is not excluded property, because the definition of excluded property in s.6(1) only applies to property of individuals; however that is beside the point because (as the Manual has just noted) s.94(2) confers an equivalent exemption. But the important point here is that (however clumsily worded) sentence [2] extends the exemption to FOTRA securities.

## 53.16 Interests in trust property

An interest in trust property (an equitable interest) is itself an item of property which may be subject to IHT. That would lead to double taxation, eg in a trust for A for life, remainder to B, there might be

(1) tax on the death of A (if A has an estate IP) or 10 year charges; and
(2) tax on the death of B (if the reversionary interest is an asset of B's estate).

### 53.16.1 *Reversionary interest*

Section 48(1) IHTA deals with this problem by providing that a reversionary interest is generally excluded property:

> (1) A reversionary interest is excluded property unless—
> (a) it has at any time been acquired (whether by the person entitled to it or by a person previously entitled to it) for a consideration in money or money's worth, or
> (b) it is one to which either the settlor or his spouse [or civil partner] is or has been beneficially entitled, or
> (c) it is the interest expectant on the determination of a lease treated as a settlement by virtue of section 43(3) above.

What about a reversionary interest within (a) to (c)? Section 48(3) IHTA provides:

> Where property comprised in a settlement is situated outside the UK—
> (a) the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the settlement was made, and
> (b) section 6(1) above applies to a reversionary interest in the property *but does not otherwise apply in relation to the property ...*
> but this subsection is subject to subsection (3B) below

The words in italics make it clear that the non-settled property rules apply. An equitable interest which is a reversionary interest may be excluded property if it meets the conditions of s.48(1) or if it is not UK situate and owned by a foreign domiciliary.

### 53.16.2 *Interest in possession*

An equitable interest which is an estate IP is excluded properly only if it is owned by a foreign domiciliary and is not UK situate. However, the disposal of the interest is not a transfer of value; s.51 IHTA. Tax is charged under s.52 only if the settled property is not excluded property.

### 53.16.3 *Purchased equitable interests*

Section 48(3) and (3A) IHTA both provide:

> but this subsection is subject to subsection (3B) below. ...

Section 48(3B) IHTA is an anti-avoidance provision which applies to two categories of settled excluded property: foreign situate property and UK funds. It provides:

> Property is not excluded property by virtue of subsection (3) or (3A) above if—
> (a) a person is, or has been, beneficially entitled to an interest in possession in the property at any time,
> (b) the person is, or was, at that time an individual domiciled in the UK, and
> (c) the entitlement arose directly or indirectly as a result of a disposition made on or after 5th December 2005 for a consideration in money or money's worth.

EN FB 2006 explains:

> 8. ... By purchasing interests in existing trusts originally settled by a person domiciled outside the UK, UK-domiciled individuals have increasingly exploited this exemption to convert their wealth into IHT-free form.
> 9. This clause is aimed at blocking such avoidance by providing that property is not excluded property by virtue of section 48(3) or section 48(3A) IHTA if, at any time, a person domiciled in the UK has had an interest in possession in it, and their interest arose from a disposition for a consideration in money or money's worth. This applies whoever paid the money, and if the interest was acquired indirectly (for example, under a will or by intestacy) or has been passed on to someone else.

Section 48(3C) IHTA expands on this:

> For the purposes of subsection (3B) above—
> (a) it is immaterial whether the consideration was given by the person or by anyone else, and
> (b) the cases in which an entitlement arose indirectly as a result of a disposition include any case where the entitlement arose under a will or the law relating to intestacy.

Section 48(3C)(a) confirms (what would have been clear) that the provision can apply if an interest is purchased by A and then given by A to B. I am unable to see the point of s.48(3C)(b).

### 53.16.4 *F(No.1) A 2010 rules*

Sections 52, 53 F(No.1)A 2010 also require consideration, but will require many pages to discuss. They are some way from the themes of this book but I hope to address them in a future edition.

## 53.17 Non-residents foreign currency bank accounts

### 53.17.1 *Individual's account*

Section 157(1)(a) IHTA provides a limited relief for non-residents foreign currency bank accounts:

> (1) In determining for the purposes of this Act the value of the estate immediately before his death of a person to whom this section applies there shall be left out of account the balance on—
> (a) any qualifying foreign currency account of his ...
>
> (5) In this section "qualifying foreign currency account" means a foreign currency account with a bank[55]; and for this purpose—
> (a) "foreign currency account" means any account other than one denominated in sterling.

Section 157(2) IHTA explains who qualifies for the relief:

---

55 Section 157(6) IHTA provides: "In this section 'bank' has the meaning given by section 991 of the Income Tax Act 2007."

> This section applies to a person who is not domiciled in the UK immediately before his death, and is neither resident nor ordinarily resident[56] there at that time.

### 53.17.2 *Trustees bank account*

Section 157(1)(b) IHTA provides a similar restricted relief for trustees foreign currency bank accounts:

> (1) In determining for the purposes of this Act the value of the estate immediately before his death of a person to whom this section applies there shall be left out of account the balance on ...
> (b) subject to subsection (3) below, any qualifying foreign currency account of the trustees of settled property in which he is beneficially entitled to an interest in possession.
>
> (3) Subsection (1)(b) above does not apply in relation to settled property
> [a] if the settlor was domiciled in the UK when he made the settlement, or
> [b] if the trustees are domiciled, resident or ordinarily resident in the UK immediately before the beneficiary's death.

For the definition of trust residence see 4.14 (Trust residence for IHT). Domicile presumably depends on the domicile of the trustees in their personal capacity (the rule that trustee domicile should be relevant is difficult to understand).

### 53.17.3 *Overdrawn account*

The IHT Manual provides at para 4380:

> Where the conditions are met, the balance on the account, whether in credit or in debit should be left out of account. You should refer any case of difficulty, especially if you are seeking to disallow a debit

---

56 Section 157(4) IHTA incorporates the income tax definitions of residence and ordinary residence:
"For the purposes of this section—
(a) the question whether a person is resident or ordinarily resident in the UK shall, subject to para (b) below, be determined as for the purposes of income tax;"
(Para (b) deals with trustee residence, discussed below).

balance, to TG.

The second sentence suggests, perhaps, that HMRC are not entirely confident in this interpretation. It seems literally correct on a first reading, and provides a certain symmetry of treatment with accounts with a positive balance; on the other hand it is a daft rule, a petty trap easily avoided by the well advised, and inconsistent with the general approach of deduction for debts.[57] I do not think it could have been the intention of Parliament.

### 53.17.4 *Commentary*

This is a limited relief. The bank account is *not* excluded property for IHT purposes. It is only disregarded on the death of the owner or life tenant, so it is taken into account for lifetime gifts of individuals, and ten-year anniversary charges on trusts. The conditions for the relief are also stricter than for excluded property. It would in almost all cases be better to use a foreign bank account (which will be excluded property) rather than to rely on this exemption.

If the purpose of the relief is to encourage foreign domiciliaries to deposit funds with UK banks, these restrictions make no sense. It is suggested that foreign currency accounts (indeed all accounts) ought simply to qualify as excluded property in the same way as non-UK accounts. That change would also ensure the deductibility of overdrawn accounts. Otherwise the relief is just clutter in the system and if (as I expect) it is not much used it would be better to repeal it.

## 53.18 Works of art

The IHTA provides a pragmatic relief for works of art. Section 5(1) IHTA provides relief on death:

> For the purposes of this Act a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...
> (b) the estate of a person immediately before his death does not include ... a foreign-owned work of art which is situated in the UK for one or more of the purposes of public display, cleaning and restoration

57 See 56.5 (Deduction for debt of foreign domiciled individual).

(and for no other purpose).

Section 64(2) IHTA provides relief from ten year charges:

> For the purposes of subsection (1) above, a foreign-owned work of art which is situated in the UK for one or more of the purposes of public display, cleaning and restoration (and for no other purpose) is not to be regarded as relevant property.

Section 272 IHTA defines these terms:

> "foreign-owned", in relation to property, means property in the case of which the person beneficially entitled to it is domiciled outside the UK or, if the property is comprised in a settlement, in the case of which the settlor was domiciled outside the UK when the property became comprised in the settlement;
> "public display" means display to which the public are admitted, on payment or not, but does not include display with a view to sale;

The reason is self-evident. Dawn Primarolo (then Financial Secretary to the Treasury) explained :

> the public interest would not be served if foreign owners of works of art were unwilling to send them to the UK for [purposes of public display, cleaning or restoration] for fear of a potential inheritance tax charge.[58]

This relief falls short of a complete exemption but in practice it is sufficient, and the gaps are not sufficiently important to discuss further here. See too 10.31 (Public access rule).

## 53.19 Overseas Pensions

A full discussion of the IHT treatment of pensions needs a book to itself. This section focusses on the issues closest to the themes of this book. See too 53.19 (Situs of pension and death benefits).

The IHT Manual provides:

58 Ministerial Statement 25 February 2003 [2003] STI 303.

**17140. Overseas pensions** [October 2007]

Under Section 153 IHTA 1984 certain overseas pensions are left out of account in determining the value of a person's estate (IHTM04029) immediately before their death. See the part of the table at IHTM17132 (IHTM17132) dealing with overseas service for further details.

Where a UK domiciliary (IHTM13000) is a member of an overseas pension scheme although the scheme cannot be 'approved' (IHTM17121) for Section 151 IHTA 1984 purposes it may well still qualify as a sponsored (IHTM17122) superannuation scheme. On the death therefore the relieving provisions of Section 151 IHTA 1984 will still apply to any pension rights terminating and in respect of the pension scheme discretionary trusts itself.

Where the member dies in service and a death benefit (IHTM17030) is paid the IHT treatment is along the normal lines (IHTM17052) and depends on the terms of the pension scheme in question and, in particular, the rules governing payment of the lump sum death benefit. If the death benefit is held by the trustees of the pension scheme on discretionary trusts as regards payment then no claim will arise and Section 151 IHTA 1984 may apply (see IHTM17121 (IHTM17121)). If however the payment is due to the estate as of right (IHTM17052) or if the member has a general power (IHTM17081) of appointment over the funds or if they have assigned rights (IHTM17071) into trust whilst in ill health or where they can withdraw the funds at any time then a charge to IHT may arise.

The concept of a trust is alien in many overseas countries (although the type of pension foundation found in Switzerland and the Netherlands is sometimes considered to be somewhat akin to a UK trust arrangement). It follows that there is not usually a degree of discretion in those arrangements which would mirror a UK trust and they are therefore generally vulnerable to an IHT claim.

Details of lump sums payable under overseas pensions should be included in the form D6 (IHTM10033) at question 2 and will be considered by the Pension Specialist in TG at IHT Edinburgh.

As overseas pension schemes are not approved they are not covered by SP10/86 (IHTM17073). The funds in a pension scheme are regarded (IHTM17125) as provided by the employee whether contributed by the employee or the employer and accordingly the employee would be regarded as the settlor of any trust affecting these funds. If the employee were a beneficiary or possible beneficiary under these trusts the question of a reservation of benefit (IHTM14025) pursuant to Section 102 FA 1986 would be relevant.

Claims under this head will normally be identified by TG on examination of the Trust Deed or Scheme Rules.

Section 153 IHTA provides a narrow relief:

> (1) In determining for the purposes of this Act the value of a person's estate immediately before his death there shall be left out of account any pension payable under the regulations or rules relating to
> [a] any fund vested in Commissioners under section 273 of the Government of India Act 1935 or
> [b] to any fund administered under a scheme made under section 2 of the Overseas Pensions Act 1973 which is certified by the Secretary of State for the purpose of this section to correspond to an Order in Council under subsection (1) of the said section 273....
> (3) Subsection (1) above shall be construed as if contained in section 273 of the Government of India Act 1935 ...
> (4) If, by reason of Her Majesty's Government in the UK having assumed responsibility for a pension, allowance or gratuity within the meaning of section 1 of the Overseas Pensions Act 1973 payments in respect of it are made under that section, this section shall apply in relation to the pension, allowance or gratuity, exclusive of so much (if any) of it as is paid by virtue of the application to it of any provisions of the Pensions (Increase) Act 1971 or any enactment repealed by that Act, as if it continued to be paid by the Government or other body or fund which had responsibility for it before that responsibility was assumed by Her Majesty's Government in the UK.

## 53.20 IHT planning for individual

A foreign domiciliary should endeavour to secure, as far as possible, that their assets are situated outside the UK so that they qualify as excluded property and fall outside the inheritance tax net. The foreign domiciliary's property becomes excluded property the moment that it becomes non-UK situate; there is no qualifying period such as is required for agricultural or business property reliefs. The same applies to trustees of a settlement made by a foreign domiciliary. The question is: how is the individual's property to be transferred abroad?

The transfer abroad of £ Sterling from a UK bank account poses no problem. The transfer of bearer instruments abroad raises no problem. The transfer abroad of foreign currency in a UK bank account abroad needs consideration as to CGT. Chattels could be physically moved abroad but that may not be practical.

It is possible to turn UK situate shares and securities into non-UK situate assets for IHT: see 70.7 (Bearer documents).

Any UK asset could be sold and the proceeds remitted abroad. This is simple and satisfactory for inheritance tax; however, a sale may be ruled out by CGT or commercial reasons.

If the foreign domiciliary does not wish assets to be sold, they might give them to a company owned wholly by them. The shares in the company should not be UK situate.[59] The company should normally be non-resident. The gift would not be a transfer of value for IHT because the donor's estate would not be reduced in value. It is considered that it is not a disposal by way of gift, as there is no gratuitous intent. In *Shiu Wing v Commissioner of Estate Duty*[60] the Hong Kong Court of Final Appeal refused to apply the *Ramsay* doctrine to arrangements made by the taxpayer to create property situated abroad (in this case situated outside Hong Kong). The gift would, of course, be a disposal for CGT purposes and hold-over relief would not normally be available. Accordingly, this option will only be a satisfactory solution either if no capital gain arises or if hold-over relief is available.[61]

If the individual is in good health, there is a lot to be said for doing nothing and ignoring IHT planning. The only inheritance tax risk in this strategy is that the individual might die so suddenly that no steps to save tax can be taken. This risk is reduced (but not eliminated) if the spouse exemption is available. It might be possible to take out insurance. In principle it is clearly undesirable to allow a beneficiary in poor health to retain an interest in possession in non-excluded property.

## 53.21 IHT planning for non-estate IP trusts

A discretionary trust (and a non-estate IP trust) is subject to IHT on its ten-year anniversaries. If the settlor is not UK domiciled when they made the

59 See 70.4 (Situs of registered shares) and 70.7 (Bearer documents).

60 2 ITELR 794.

61 A gift to the company by way of *donatio mortis causa* solves the CGT problem: s.62(5) TCGA. But such a gift is not effective for inheritance tax purposes. The donor retains the right of revocation which would not be excluded property on their death.

trust, all that matters for IHT is the situs of the trust fund on that date.[62] The trustees may safely invest in the UK for a number of years, provided that, by the deadline, they hold foreign situate assets.

In principle this short-term planning may be extended indefinitely:

(1) As each ten-year anniversary approaches the trustees could sell the UK trust property (or even mortgage it) and invest in excluded property.
(2) Immediately after the anniversary they might sell and revert to UK investments.

In practice such a course might be subject to *Ramsay* but it depends on how it is done. Ideally the trustees should look for a different strategy such as holding the UK assets in a foreign registered company.

## 53.22 IHT planning for trustees of settlement with UK domiciled settlor

If the settlor is UK domiciled when the settlement was made, trust property is not normally excluded property even if the beneficiary is foreign domiciled.

### 53.22.1 *Beneficiaries not ordinarily resident*

If the life tenant is not ordinarily resident in the UK, the trustees might invest in FOTRA securities. The trust property would then be excluded property. See 53.10 (Trusts: FOTRA securities).

Likewise if all the known beneficiaries of a discretionary trust are ordinarily resident abroad. This option is not available if any of the beneficiaries are domiciled or ordinarily resident in the UK. A deed of appointment might be needed to satisfy these conditions. This would give rise to an exit charge unless the settlor is foreign domiciled when the settlement was made: see s.65(8) IHTA. However, the amount of the charge may be moderate or small.

### 53.22.2 *UK settlor: foreign domiciled beneficiary*

The best option – if circumstances allow – may be to bring the present

---

62 Note also the possible tax charge on the death of the settlor, under the gift with reservation rules, if the property is UK situate: see 54.12 (GWR death charge: excluded property rules for settled property) and following.

settlement to an end by appointment to the foreign domiciled beneficiary absolutely. CGT needs consideration if the trust is UK resident and s.87 TCGA needs consideration if it is not. The beneficiary may after an appropriate period re-settle. This may also be appropriate where the settlor has become foreign domiciled after making the settlement.

An alternative course may be to confer a general testamentary power on the foreign domiciled beneficiary. The beneficiary may on their death create a new trust with excluded property.

### 53.22.3 *Life tenant domiciled in Channel Islands or Isle of Man but deemed UK domiciled*

For this case, see 53.7 (Individual domiciled in Channel Islands or Isle of Man).

CHAPTER FIFTY FOUR

# RESERVATION OF BENEFIT

## 54.1 GWR – Introduction

Here is a rendezvous of questions and question marks! A full discussion needs a book to itself. I focus on matters closest to the themes of this book. The IHT Manual contains much fascinating material which cannot be set out here for reasons of space.

Section 102(1) FA 1986 provides:

> ... this section applies where, on or after 18 March 1986, an individual disposes of any property by way of gift and either—
> (a) possession and enjoyment of the property is not bona fide assumed by the donee at or before the beginning of the relevant period;[1] or
> (b) at any time in the relevant period the property is not enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise ...

There are two sets of conditions:

(1) An individual (in this chapter "**the donor**") makes a disposal of property by way of gift. There are three separate elements here: a *disposal*, of *property*, which must be *by way of gift.*

(2) Condition (a) or (b) above must be satisfied (a reservation of benefit).

## 54.2 Terminology

Section 102(2) FA 1986 provides one defined term:

---

1 Section 102(1) provides:
> ..."in this section 'the relevant period' means a period ending on the date of the donor's death and beginning seven years before that date or, if it is later, on the date of the gift."

If and so long as—
(a) possession and enjoyment of any property is not bona fide assumed as mentioned in subsection (1)(a) above, or
(b) any property is not enjoyed as mentioned in subsection (1)(b) above,
the property is referred to (in relation to the gift and the donor) as property subject to a reservation.

In the following discussion:
(1) "**GWR property**" is property subject to a reservation.
(2) "**Settled GWR property**" is GWR property which becomes settled property by the gift (ie the gift is to a settlement).
(3) "**Non-settled GWR property**" is GWR property which does not become settled property by the gift (ie the gift is not to a settlement).
(4) "**The GWR death charge**" is the charge imposed by s.102(3) FA 1986.
(5) "**The GWR PET charge**" is the charge imposed by s.102(4) FA 1986.

## 54.3 Disposal before 18 March 1986

The GWR rules only apply to disposals on or after 18 March 1986. The IHT Manual states correctly:

> **14311 Initial requirements** [November 2009]
> A pre-18 March 1986 settlement which would have been caught by the GWR provisions had it been made after 17 March 1986 will therefore escape the GWR charge unless further gifts into settlement are made after that date. The GWR provisions will apply to the property settled by those further gifts. ...
> *Example*
> On 1 January 1985 the donor settled £100,000 on discretionary trusts under which he was a potential beneficiary. On 1 January 1989 he added a further £50,000 to the settlement. The donor dies 1 April 1992 having remained a potential beneficiary throughout.
> The GWR provisions apply to the 1989 addition but not to the property originally settled. The GWR claim extends to the assets in the settled fund at 1 April 1992 representing that £50,000. The Double Charges Regulations (IHTM 14711) will be in point.

But GWR will apply to pre-1986 settlements on the termination of an estate IP.[2]

## 54.4 When is there a "disposal by way of gift"?

There are some general issues on the meaning of a "disposal by way of gift". Is the surrender of a lease or life interest a "disposal"? Or the giving of consent to an exercise of a power of advancement or appointment? Is a sale at an undervalue "by way of gift"? Or a transfer to a settlement in which the settlor has an estate interest in possession? These questions are not considered here. Generally one is dealing with gifts where the position should be clear.

It is considered that a sale at market value, where the purchase price is left outstanding as an interest-free loan, repayable on demand, is not a disposal "by way of gift".

## 54.5 When is there a reservation of benefit?

The words used in the statute are remarkably obscure. While in most cases the matter will be clear enough there are significant areas of uncertainty. Some doubtful areas have been resolved for practical purposes by HMRC statements.

### 54.5.1 *Gift to discretionary trust, settlor a beneficiary*

IHT Manual provides:

> **14393 Settlement on discretionary trusts** [November 2009]
> If a donor makes a settlement and is one of the members of the discretionary class of beneficiaries, this is a GWR.
> - The donor's position as a member of the discretionary class of beneficiaries is not an equitable interest retained by them (and so not included in the gift) and
> - as the donor is a member of the class, they have not been excluded (IHTM14333), or virtually excluded, from enjoyment. The fact that they do not receive any tangible benefit during the relevant period is immaterial.

2 See 54.15 (GWR on termination of interest in possession).

This is correct.[3] It is considered that the same applies where an individual makes a gift to a discretionary trust under which:

(1) the settlor is not included in the class of beneficiaries; but
(2) the trustees have an unrestricted power to add the settlor to the class of beneficiaries.[4]

### 54.5.2 *Gift from A to B followed by gift to trust by B*

The position is different where:

(1) A makes a gift to B.
(2) Later, by an independent transaction, B creates a discretionary trust under which A is a beneficiary (or where A can be added as a beneficiary).

In these circumstances A is *not* the settlor. It is considered that there is no reservation of benefit merely because A is a discretionary beneficiary. There will be a reservation of benefit if A actually receives a benefit.

## 54.6 IHT on the disposal by way of gift

A gift which is a chargeable transfer will give rise to a charge to IHT (assuming it exceeds the nil rate threshold) whether or not it is a gift with a reservation.[5] The reservation of benefit does not affect this charge; just

---

3 *IRC v Eversden (Greenstock's Executors)* 75 TC 340. (The Court of Appeal did not consider this point.)

4 The HMRC view is, however, equivocal. The IHT Manual provides:

> "**14393 Settlement on discretionary trusts** [November 2009]
> *Example 2*
> ... The question of whether the possibility that A's name might be added to the class is a reservation is one which you can only determine on the particular facts. Refer any case where the point is material to the Litigation Section".

5 The IHT Manual makes this somewhat elementary mistake:

> "**14316 Sales for less than full consideration** [November 2009]
> *Example 1*
> In 1989 the donor sold a house, then worth £100,000, to his son for £25,000. This is a disposition partly by way of sale and partly by way of gift. The donor dies in 1993.
> - If the donor has been excluded from enjoyment of the property throughout the period, the gift is a PET chargeable on his death. The loss to his estate is the value of the entirety of the property less the consideration received (£100,000 less

on the death of the donor there may be a further charge to tax. The Inheritance Tax (Double Charges Relief) Regulations 1987 mitigate a double charge. This chapter does not consider the IHT which might arise on a gift; it considers only the GWR aspects.

## 54.7 Gift of excluded property

Section 102 FA 1986 applies when an individual disposes of any property by way of gift. A foreign domiciliary is certainly "an individual". A gift of UK situate property by a foreign domiciliary is clearly within the GWR rule.

What is the position where a foreign domiciliary disposes of excluded property by way of gift? There is nothing which expressly takes the gift out of the scope of the GWR rules. However, it is considered that s.3(2) IHTA does so obliquely. Section 3 IHTA provides:

> **Transfers of value**
> (1) Subject to the following provisions of this Part of this Act, a transfer of value is a disposition made by a person (the transferor) as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition; and the amount by which it is less is the value transferred by the transfer.
> (2) For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

On a literal approach to construction this makes no difference. The fact that no account is taken of the value of excluded property for the purposes of s.3(1) does not mean that the disposition is not a "disposal by way of gift". However, a purposive construction suggests otherwise. It is absurd that there should be a charge to tax in circumstances where:

---

£25,000 = £75,000).

- If the donor was not excluded from enjoyment of the property, for instance because he resided at the property following the disposition, the disposal by way of gift is a GWR. The value of the property disposed of by way of gift is 75% of the value of the whole property. Thus, if the property is still subject to a reservation immediately before the donor's death, 75% of its death value is treated as property to which the donor was beneficially entitled."

(1) a foreign domiciliary with no UK connection makes a gift of excluded property to another person with no UK connection, and enjoys some benefit; and
(2) the foreign domiciliary dies many years later at a time when property representing the property given is situate in the UK.

Nobody would expect the foreign domiciled donor or their executors to comply or to be able to comply with an obligation to pay IHT in such circumstances. The purpose of s.3(2) IHTA is to take excluded property out of the scope of inheritance tax and a disposal of excluded property is by implication ignored. Since it is ignored it is not a disposal "by way of gift". This conclusion is also supported by the use of the term "excluded property" – the property is regarded as excluded from IHT.

HMRC do not appear to accept this view.

## 54.8 GWR spouse exemption

This section considers the GWR position on inter-spouse gifts. For other IHT spouse exemption issues see 54.17 (IHT spouse exemption defence to GWR death charge), 58.1 (IHT spouse exemption on death of a foreign domiciliary); 64.2 (Restriction on IHT spouse exemption for foreign domiciled spouse).

Section 102(5) FA 1986 provides a relief which I call the "**GWR spouse exemption**":

> This section does not apply if or, as the case may be, to the extent that the disposal of property by way of gift is an exempt transfer by virtue of any of the following provisions of Part II of the [IHTA],—
> (a) section 18 (transfers between spouses or civil partners) ... ;

In short, the GWR rules do not apply on gifts between spouses if the IHT spouse exemption applies.[6]

Where a UK domiciled individual makes a gift to a foreign domiciled spouse, the IHT spouse exemption is restricted to £55,000 and a gift over that limit will be within the scope of GWR, unless some other exemption

6 I use the term "**IHT spouse exemption**" to refer to the exemption on inter-spouse transfers in s.18 IHTA. See 54.17 (IHT spouse exemption defence to GWR death charge).

is in point.[7] One solution to this problem is to sell assets at market value, so there is no disposal by way of gift. Watch the SDRT/SDLT implications.

One common situation is where one spouse gives an interest in the family home to the other spouse, but as long as the property is jointly occupied, there is in principle no GWR: see s.102B FA 1986.

### 54.8.1 *Inter-spouse gift of excluded property*

What is the position when a foreign domiciled individual makes a gift of excluded property to their spouse? On a literal construction, the gift will fall within the GWR rules. A gift of excluded property is not a transfer of value, so outside the scope of the IHT spouse exemption, so it is outside the scope of the GWR spouse exemption! But that is absurd and cannot be the correct construction, even if words must be strained to reach this result. This consideration supports the view taken here that gifts of excluded property, and gifts within s.11 IHTA, are deemed not to be by way of gift.[8]

Such property is nevertheless "subject to a reservation" and so qualifies for the GWR exemption to the pre-owned asset rules.

## 54.9 GWR death charge

Section 102(3) FA 1986 provides:

> If, immediately before the death of the donor, there is any property which, in relation to him, is property subject to a reservation then ... that property shall be treated for the purposes of the [IHTA] as property to which he was beneficially entitled immediately before his death.

I refer to this as "**the GWR death charge**". Section 102(3) is a deeming provision; the donor is not in fact beneficially entitled to the property

7 Such as the family maintenance exemption: see 64.4 (Disposition for maintenance of spouse and other exemptions).

8 If my view were wrong the further anomaly would arise that gifts of qualifying investments to charity would fall within the scope of GWR because such gifts fall within s.12 IHTA and not s.102(5)(d) FA 1986; but it is not necessary to pursue that here.

subject to the reservation but the property is treated as if they were so entitled. To understand the significance of this, it is necessary to set out the short series of sections that normally impose an inheritance tax charge on property to which a person is beneficially entitled at death.

Section 4(1) IHTA imposes the IHT charge on death:

> On the death of any person tax shall be charged as if, immediately before his death, he had made a transfer of value and the value transferred by it had been equal to the value of his estate immediately before his death.

The key word here is "estate". Section 5(1) IHTA defines estate by reference to beneficial entitlement:

> .... a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...
> (b) the estate of a person immediately before his death does not include excluded property ...

So if there is a GWR until death and the property is *not* excluded property:
(1) the property is treated as property to which the donor was beneficially entitled (in all cases);
(2) the property is part of their estate.

If there is a GWR until death and the property *is* excluded property:
(1) the property is treated as property to which the donor was beneficially entitled (in all cases);
(2) the property is not part of their estate.

## 54.10 GWR over debt owed by the deceased

Suppose:
(1) S creates a discretionary settlement under which S is a beneficiary;
(2) the trustees lend to S;
(3) S dies.

The debt ("the GWR debt") is treated as being in the estate of S. However a person cannot owe a debt to himself. If the GWR debt is treated as property beneficially owned by the debtor, it must be treated as if it ceased to exist. For this reason there is no IHT charge on the debt under the

GWR rules, on the death of S, even if the GWR debt is UK situate.[9]

## 54.11 GWR death charge: non-settled property excluded property rules

Suppose:
(1) A gives property to B, an individual, outright.
(2) There is a reservation of benefit: A enjoys benefits at the time of A's death.
(3) The property is not UK situate at the time of A's death.
A is treated as if A were beneficially entitled to the property at the time of A's death. It forms part of their estate unless it is excluded property at that time. How do the excluded property rules work in these circumstances?

Here we are concerned with non-settled property. The relevant rule is that:

> Property situated outside the UK is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.[10]

In the example above, B is *in fact* beneficially entitled to the property. A is *treated* as beneficially entitled. Who is "beneficially entitled" for the purpose of applying the excluded property rule; is it A or is it B? This does not matter if A and B are both foreign domiciled, but it does if one is and the other is not. One common case is in a gift from a UK domiciled donor to their foreign domiciled spouse.[11]

### 54.11.1 *Construction of deeming provisions*

The answer is to be found by applying the general rule of construction which applies to deeming provisions:

> If you are bidden to treat an imaginary state of affairs as real, you must surely, unless prohibited from doing so, also imagine as real the consequences and incidents which, if the putative state of affairs had in

9 If the debt is non-UK situate it may also be outside the scope of IHT because of the excluded property rules. On the question of a deduction for the GWR debt, see 56.7.3 (Debt owed by settlor to settlor-interested discretionary trust).
10 Section 6(1) IHTA.
11 See 54.8 (GWR spouse exemption).

> fact existed, must inevitably have flowed from or accompanied it.[12]
> ... [B]ecause one must treat as real that which is only deemed to be so, one must treat as real the consequences and incidents inevitably flowing from or accompanying that deemed state of affairs[13]...

But context can show that the general rule should not be applied. It is merely a general canon of construction from which "only limited assistance can be derived in choosing between alternative interpretations of the Act".[14] Experience shows that Parliament has often failed to foresee all the consequences of its deeming and nowadays the courts apply deeming provisions in a context sensitive manner.[15]

### 54.11.2 *Conclusion*

Applying this principle it follows that the domicile of the donor A is what matters for excluded property status. Thus if A has a foreign domicile, the property (if not UK situated) is excluded property. The domicile of the donee B is irrelevant. This conclusion is confirmed by the context. It would be absurd if the taxation of A depended on the domicile of B. The taxation of A should depend on A's own domicile position.

For the purposes of the excluded property rule, therefore:

(1) The domicile of the donor at the time of gift is irrelevant (contrast the position where the gift is made in trust).[16]

(2) The situs of the property at the time of the gift is irrelevant to the operation of the excluded property rules on the death of the donor.

HMRC agree. The IHT Manual provides:

---

12 Lord Asquith, *East End Dwellings Co Ltd v Finsbury Borough Council* [1952] AC 109 at p.132.

13 *Marshall v Kerr* 67 TC 56 at p.79A.

14 *Russell v IRC* [1988] STC 195 at p.205.

15 In *Murphy v Ingram* [1973] Ch 363 at p.446 Megarry J said:

> "A research student in search of a suitable topic for a thesis might do worse than to choose as his subject 'the Dangers of Deeming'."

But the modern approach reduces these dangers and *Murphy* itself would be decided differently today. For an example, see *De Rothschild v Lawrenson* 67 TC 300 at p.316.

16 See 54.12 (GWR death charge: excluded property rules for settled property) below.

> **14318 The gift: exempt transfers which cannot be GWRs** [2010]
> ...
> *Excluded property*
> Under the charging provisions (IHTM04072), excluded property (IHTM04251) cannot be the subject of a GWR...
> *Example*[17]
> Example 3 (George)
> G is originally domiciled in the UK, but moves to New Zealand and acquires a domicile of choice there. He gives some New Zealand shares to his son, R, but continues to enjoy the dividends until his death ten years later. He dies domiciled in New Zealand.
> The property is subject to a reservation and is therefore deemed to be part of G's estate on death. However, the property is situated outside the UK and the donor, who is treated as beneficially entitled to it, was domiciled outside the UK at his death. The property is therefore excluded property within IHTA84/S6 (1) and escapes the GWR charge.

This is correct; the Manual continues:

> However, if G had returned to the UK and his domicile of origin had revived, there will be a GWR claim on his death, or if the reservation had ceased in his lifetime and within 7 years of his death, the ending of the reservation will be treated as a deemed PET. This is because at the time the GWR charge arises, G is domiciled in the UK so IHTA84/S61) does not apply...

While it is correct that s.6(1) does not apply on the facts of this version of the example, it is arguable that there is no GWR.[18]

The same applies to gifts to companies, including companies held by trusts.

## 54.12 GWR death charge: excluded property rules for settled property

Suppose:

(1) S (not UK domiciled) gives property to a discretionary settlement.
(2) There is a reservation of benefit, eg S is a beneficiary.

---

17 This example was reworded and improved in 2010, probably in response to criticisms of the former wording in the 2010/11 edition of this book.

18 See 54.7 (Gift of excluded property).

(3) The property is not UK situate[19] at the time of the death of S.
S is treated as if S were beneficially entitled to the property at the time of S's death. It forms part of S's estate unless it is excluded property at that time. How do the excluded property rules work in these circumstances?

### 54.12.1 *The rival solutions*

There are two sets of excluded property rules, relating to settled and non-settled property. Which does one apply?

(1) *The Settled Property Solution*
The property subject to a reservation is in fact settled property, so on this view one applies the settled property rules set out in s.48(3) IHTA:

> Where property comprised in a settlement is situated outside the UK—
> (a) The property ... is excluded property unless the settlor was domiciled in the UK at the time the settlement was made. ...

So on this view, where an individual makes a gift to a settlement with reservation of benefit, and dies, the property is excluded property for the GWR rules if:
(1) the donor is domiciled outside the UK at the time the settlement was made. (The domicile of the donor at the time of death is irrelevant); and
(2) the property is not situated in the UK at the time of death.
I call this "**the Settled Property Solution**".

(2) *The Non-settled Property Solution*
The settled property GWR is to be treated as property to which the donor is "beneficially entitled". On this view one applies the deeming provision to its logical conclusion: if a person is beneficially entitled to property, it is not settled property. So on this view, where an individual makes a gift to a settlement with reservation of benefit, and dies, the property is excluded property for the GWR rules if:
(1) the donor was domiciled outside the UK at the time of their death. (The domicile of the donor at the time the settlement was made is

---

19 The position is the same if the property consists of UK AUTs or OEICs, but for convenience I refer to non-UK situate property only.

irrelevant for GWR, though it is relevant for other purposes); and
(2) the property is not situated in the UK at the time of death.
I call this "**the Non-settled Property Solution**".

54.12.2 *The correct solution*

The Non-settled Property Solution has supporters.[20] Nevertheless it is generally regarded as wrong. What about the deeming provision that the property is to be treated as if the donor were beneficially entitled to it? The answer is that the property must still be regarded as "settled property" for the application of the excluded property rules. One does not carry the implications of the deeming provisions as far as the Non-settled Property Solution suggests. One way to reach this conclusion is to note that the deeming provision does not deem the donor to be beneficially and *absolutely* entitled to the settled property. One can be beneficially entitled to property which is settled property. (Bear in mind that "settlement" has a wide definition for IHT. It includes property held subject to a contingency, property charged with the payment of an annuity, and a lease for life. A person entitled to such property may nevertheless be said to be "beneficially" entitled.)

This view is strongly supported by s.49(1) IHTA which provides:

> A person beneficially entitled to an interest in possession in settled property shall be treated for the purposes of this Act as *beneficially entitled* to the property in which the interest subsists.
> [Emphasis added]

No-one suggests that property to which s.49(1) applies is to be treated as non-settled property for the purposes of the GWR rules. The wording of the deeming provision in s.102(3) is materially the same.

Under the Non-settled Property Solution, the property is simultaneously excluded property (for general IHT purposes) and non-excluded property (for GWR purposes). While that is not impossible, it would be remarkable, even in as convoluted an area as this, and for this reason too the Settled Property Solution is to be preferred.

20 Robert Venables QC, "Excluded Property Trusts and GROBs" [2003] OITR Vol 11 p.75. Barrie Akin agrees: *GITC Review*, Vol 1 Issue 2, p.1, accessible *www.taxbar.com*.

It has been said that a purposive construction favours the Non-settled Property Solution: the purpose of the GWR rules is to put the donor in the same position as if they had not made the gift. This is the general purpose in the case of gifts by UK domiciliaries. However, arguments on purposive construction only run when one knows the general purpose and is confident that the general purpose applies in the particular circumstances of the case. This argument *assumes* that that purpose necessarily extends to the foreign domiciliary – which begs the question. Perhaps Parliament intended there to be a difference between the two cases. One cannot apply a purposive construction unless the purpose is clear.[21]

Trustees should bear in mind that, even in adopting the Settled Property Solution, there will arguably[22] be a charge to IHT on the death of a settlor who enjoys a benefit over trust property if at the time of their death:

(1) trust property is UK situated (and not UK AUTs or OEICs); and
(2) the property was given to the trust on or after 18 March 1986.

If the settlor is a beneficiary it is safer not to invest directly in UK situate property during their life.

Note that the Non-settled Property Solution favours the taxpayer if a UK domiciliary makes a GWR settlement, and becomes non-UK domiciled before their death. However that won't often happen.

### 54.12.3 *HMRC view*

After a decade of dithering,[23] HMRC now agree with the Settled Property Solution. The IHT Manual provides:

> **14396 Settled property: Settlement created when the settlor is domiciled outside the UK** [January 2011]
> Where the settlor was domiciled outside the UK at the time a settlement

21 In the battle of the anomalies HMRC might instance the case where a foreign domiciliary made a settlement shortly before becoming UK domiciled, and say that it is absurd that a settlement made in such circumstances should avoid IHT on the death of the settlor. But (1) this is certainly the case where the foreign domiciliary enjoys no benefit from the settlement; and (2) this was the case under estate duty; and (3) this was the case under HMRC practice in the first 15 years or so of IHT; in the circumstances it is wrong (if not absurd) to describe that result as absurd.

22 See 54.7 (Gift of excluded property).

23 See the 2010/11 edition of this work para 51.12.3.

was made, any foreign property in the settlement is excluded property and is not brought into charge for Inheritance Tax (IHT) purposes (IHTM27220). This rule applies where property is subject to a reservation of benefit even though the settlor may have acquired a domicile of choice in the UK, or be deemed to be domiciled in the UK, at the time the GWR charge arises (IHTM04071).

*Reservation ceasing on death*

At the material date FA86/S102(3) deems the donor to be beneficially entitled to property that is, at that time, settled property. As the property in which the reservation subsisted is 'property comprised in a settlement', it is the provisions of IHTA84/S48(3) that are in point. It is the domicile of the settlor at the time the settlement was made that is relevant in deciding whether foreign property in which the reservation subsisted is excluded property.

*Example* (Henry)

H, who is domiciled in New Zealand, puts foreign property into a discretionary trust under which he is a potential beneficiary (IHTM14393). He dies five years later having acquired a domicile of choice in the UK and without having released the reservation. The property is subject to a reservation on death but it remains excluded property and is outside the IHT charge.

The Manual continues by noting three exceptions:

*Exceptions to the rule*

There are, however, circumstances where this rule does not apply:

[1] If the trustees had sold the foreign assets so that at the date of death the settled property was invested in UK assets, the exclusion would not apply as the property comprised in the settlement was not situated outside the UK, so IHTA84/S48(3) cannot apply.

[2] If the donor has acquired a domicile of choice (or is deemed domiciled) in the UK and adds other property to the settlement (irrespective of the situs (IHTM27071) of the property), we regard the donor as creating a separate settlement (IHTM04272). All the trust assets will be property subject to a reservation, but the foreign assets settled when the donor was domiciled outside the UK will be excluded property, whereas the assets settled when the donor was domiciled in the UK will be subject to IHT

[3] And in the reverse situation, if a donor who is domiciled (or deemed domiciled) in the UK creates a settlement with foreign assets and the settled property remains subject to a reservation at death, the trust assets will be subject to IHT under FA86/S102(3) even if the settlor dies

domiciled outside the UK as IHTA84/S48(3) does not apply - as well as being subject to relevant property trust charges (IHTM42000).

Point [1] is correct that s.48(3) does not apply but it is arguable that there is no GWR for other reasons[24]. Point [2] is very doubtful: see 53.13 (Settlor adds property to trust after change of domicile). Point [3] is correct, assuming the settled property solution is correct. The unfairness of the double charge (which does not seem to trouble HMRC) may be avoidable by winding up the trust.

## 54.13 Gift to foreign domiciled donee who creates a settlement

Suppose:
(1) A makes an outright gift to B.
(2) B makes a gift of that property to a settlement.
(3) A is a beneficiary of that settlement and enjoys benefits so that there is a reservation of a benefit in relation to A's gift.
(4) B (and not A) is the settlor of the settlement; see 69.4 (Gift from A to B followed by gift to trust by B).

Now which set of excluded property rules is applied? It is suggested that one must apply the rules applicable to settled property for the reasons given in 54.12 (GWR death charge: excluded property rules for settled property). FA 1986 Sch. 20 para 5 needs to be considered but, properly understood, nothing there deems A to be the settlor of the settlement. If that is right, there is no reservation of benefit problem if:
(a) B (the settlor) was not domiciled in the UK when the settlement is made; and
(b) the property is not situated in the UK at the time of the death of A.

Conversely, on this view, there is a GWR problem if B (the settlor) is UK domiciled (regardless of the domicile of A).

## 54.14 GWR PET charge

So far we have considered the position where the benefit continues until the death of the donor. Section 102(4) FA 1986 provides:

24 See 54.7 (Gift of excluded property).

> If, at a time before the end of the relevant period, any property ceases to be property subject to a reservation, the donor shall be treated for the purposes of the 1984 Act as having at that time made a disposition of the property by a disposition which is a potentially exempt transfer.

I refer to this as "**the GWR PET charge**". Section 102(4) is a deeming provision; it is a different deeming from s.102(3), the GWR death charge. In s.102(3) the donor is deemed to be beneficially entitled. Here, the donor is deemed to have made a PET. To understand the significance of this, it is necessary to set out the definition of a PET. A PET is a particular kind of transfer of value (s.3A IHTA) and s.3 IHTA provides:

> (1) [a]... a transfer of value is a disposition made by a person (the transferor) as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition; [b] and the amount by which it is less is the value transferred by the transfer.
> (2) For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

Note that s.3(1) contains two definitions: s.3(1)[a] defines "transfer of value" and s.3(1)[b] defines "value transferred". For both purposes s.3(2) states that excluded property is (in short) disregarded.

### 54.14.1 *Non-settled GWR PET charge*

Suppose:
(1) a non-UK domiciliary makes a non-settled GWR of non-UK situate property; and
(2) the property ceases to be subject to a reservation (while the donor is still non-UK domiciled).

No-one could sensibly suggest that there is a possible IHT charge. The reason is in s.3(2): the donor is deemed to have made a disposition of excluded property. While one can (just) call that a PET, the value transferred is ignored and no charge to IHT can arise. Nothing in the deeming provision requires one to ignore the application of s.3(2) to s.3(1)[b]. What matters is the domicile of the donor (and the situs of the GWR property) at the time the reservation ceases. There would be a deemed PET if:

(1) F (a foreign domiciliary) makes a GWR.
(2) F becomes UK domiciled.
(3) The GWR is released.[25]

### 54.14.2 *Settled GWR PET charge*

Suppose settled property ceases to be subject to a reservation; eg a donor ceases to be a beneficiary of a trust they have created, and becomes excluded from all benefit. The issues are similar to the case of the GWR death charge: how far do you carry the implications of the deemed PET? Do you deem the GWR property which is actually settled property to be non-settled property? Although the deeming is marginally different, the context is the same as for GWR on death.

The answer must be decided consistently with the answer to the related issue for a GWR on death. If (as concluded above) the Settled Property Solution is correct on death then there is also no charge on a lifetime cessation of GWR. HMRC agree, and (having eventually come down in favour of the Settled Property Solution) accept the view that there is no charge. The IHT Manual provides:

> **14396 - Settled property: Settlement created when the settlor is domiciled outside the UK** [January 2011]
> ... *Reservation ceasing during lifetime*
> Where the reservation is released during the donor's lifetime, FA86/S102(4) treats the donor as making a disposition of the property by a disposition which is a potentially exempt transfer (PET) (IHTM04072). This is different to the basis of the charge arising on death, but as property in which the reservation ceases is 'property comprised in a settlement' the provisions of IHTA84/S48(3) are again in point to decide whether any foreign property is excluded property.
> As FA86/S102(4) treats the donor as making a disposition, it is the treatment of excluded property when disposition is made that is relevant. IHTA84/S3(2) states that no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of disposition.
> So as the donor is treated as making a disposition, property is treated as ceasing to form part of their estate. Provided that property is excluded property, IHTA84/S3(2) applies to exclude the assets in which the

25 There is a hint of this in IHTM 14318, but the point is not addressed clearly.

reservation ceased from charge.

This vindicates the view taken in the pre 2011 editions of this work. ("The taxpayer should conduct their affairs on the basis of the Settled Property Solution. ... One should not be deterred by the ghost of an argument rattling its chains in the IHT Manual.")

The Manual continues with three exceptions:

> The same exceptions to the above will apply as regards
> [1] foreign property which is replaced by UK situs property (IHTM27071),
> [2] property added to the settlement when the donor is domiciled in the UK, and
> [3] in the reverse situation outlined above, a charge will arise under FA86/S102(4) if the reservation ceases before the donor's death.

For these exceptions, see 54.12.3 (HMRC view).

## 54.15 GWR on termination of interest in possession

Before 22 March 2006, GWR did not in principle apply on the termination of an interest in possession, because the termination did not usually involve a disposal by way of gift. Now s.102ZA FA 1986 provides:

> (1) Subsection (2) below applies where—
> (a) an individual is beneficially entitled to an interest in possession in settled property,
> (b) either—
>   (i) the individual became beneficially entitled to the interest in possession before 22nd March 2006, or
>   (ii) the individual became beneficially entitled to the interest in possession on or after 22nd March 2006 and the interest is an immediate post-death interest, a disabled person's interest or a transitional serial interest, or falls within section 5(1B) of the 1984 Act and
> (c) the interest in possession comes to an end during the individual's life.
> (2) For the purposes of—
> (a) section 102 above, and
> (b) Schedule 20 to this Act,
> the individual shall be taken (if, or so far as, he would not otherwise be)

to dispose, on the coming to an end of the interest in possession, of the no-longer-possessed property[26] by way of gift.

On the termination of an interest in possession, the former life tenant is in the same position as the settlor of the trust. See 54.12 (GWR death charge: excluded property rules for settled property).

If the life tenant does not enjoy any GWR, no problem arises.

If the former life tenant does enjoy a benefit the position is thought to be as follows:

(1) The GWR rules do not apply if the GWR property is excluded property.
(2) The GWR property is excluded if:
    (a) the settlor was not UK domiciled when the settlement was made; and
    (b) the trust property is not UK situate (or UK funds excluded property) at the time of the GWR charge (the death of the former life tenant or the time of cessation of benefit).

## 54.16 GWR property subject to debt

Debts are in principle deductible in computing a GWR charge. HMRC accept this. IHT Manual provides:

> **14401. The property comprised in the gift** [November 2009]
> ... *Example*
> In 1990 the donor settles £1 on discretionary trusts of which he is, and remains until his death in 2000, an object. Shortly after the creation of the settlement he advances £50,000 to the trustees by way of loan, interest free and repayable on demand.
> At the time of his death, the settled property comprises £1 cash (representing the original £1 gift into settlement) and the proceeds of an insurance policy (purchased with the borrowed monies) on the donor's life amounting to £250,000.

26 "The no-longer-possessed property" is defined in s.102ZA(3):

> "In subsection (2) above 'the no-longer-possessed property' means the property in which the interest in possession subsisted immediately before it came to an end, other than any of it to which the individual becomes absolutely and beneficially entitled in possession on the coming to an end of the interest in possession."

> The loan of £50,000 has been repaid at the rate of £2,500 per annum by the trustees and £25,000 is outstanding at the date of death.
> The proceeds of £250,000, *less the loan of £25,000,* are derived from the original loan, and you can treat them as part of the death estate. (The balance outstanding under the loan – £25,000 – forms part of the free estate).
> (Emphasis added)

## 54.17 IHT spouse exemption defence to GWR death charge

This section considers whether the IHT spouse exemption can apply on the death of the donor so as to override the GWR death charge.[27]

Suppose:

(1) H makes a gift to S which is a GWR so the gifted property is GWR property.
(2) H dies and leaves H's entire estate to his spouse W (and the IHT spouse exemption applies to H's estate).

On the death of H the position for the GWR property is governed by s.102(3) FA 1986:

> ...that property shall be treated for the purposes of the [IHTA] as property to which [H] was beneficially entitled immediately before his death.

The GWR property is not excluded property (even if S is foreign domiciled).[28] So H will in principle be subject to inheritance tax on the GWR property on H's death.

The spouse exemption is not available on the death of H to avoid this GWR charge. The IHT spouse exemption provides that the transfer of value deemed to be made on the death of H:

> ... is an exempt transfer to the extent that the value transferred is
> [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,
> [b] so far as the value transferred is not so attributable, to the extent that

---

27 For other IHT issues see 54.8 (GWR spouse exemption); 64.1 (UK domiciliary married to foreign domiciliary) and 58.1 (IHT spouse exemption on death of a foreign domiciliary).

28 See 54.11 (GWR death charge: non-settled property excluded property rules).

that estate is increased.

This exemption does not apply to the GWR property since it does not become comprised in the estate of W. HMRC agree. The IHT Manual provides:

> **14303 Devolution of GWR property** [June 2006]
> It is important to keep in mind that that the GWR rules are fictitious treatments created only for the purposes of preventing IHT avoidance. They do not affect the **actual** devolution of the property in real life, so the gifted property does not actually pass on death under the will or intestacy, neither was any gift actually made at the time the reservation ceased.
> The gifted property passed to the actual donee at the time it was actually made. Thus, any reliefs or exemptions (IHTM11001) that may be available on death, or that apply to PET's, such as spouse or civil partner relief (IHTM11032), charity relief or annual exemptions, will **not** apply to the transfer deemed to be made on death, or deemed to be made when the reservation ceases.

Suppose:
(1) H (UK domiciled) makes a gift to W (foreign domiciled at the time of the gift).[29]
(2) The gift does not qualify for the IHT spouse (or any other) exemption and H continues to enjoy benefits from the property until H's death so the gifted property is GWR property.
(3) W still owns the GWR property at the time of the death of H.
(4) W has become UK domiciled (or deemed domiciled) at the time of the death of H.

At first glance it might seem that the IHT spouse exemption does not apply. On the facts of this example the conditions of the relief are not in reality satisfied. The GWR property does not "become" comprised in the estate of the spouse; and on the occasion of the death of H, the estate of the spouse has not "increased". However, one must remember that s.102(3) FA 1986 is a deeming provision. It is the old question of how far one carries the deeming.[30] If one deems, as s.102(3) requires, the GWR

29 The gift is a PET (but assume H survives seven years so no tax charge arises on the PET).
30 See 54.11.1 (Construction of deeming provisions).

property to be property to which H was beneficially entitled, it would follow that one must deem the estate of W to be increased by reason of the death of H. The conclusion is supported by considering the object of the GWR rules. The object is to put the donor in the same position as if they had not made the gift. If H had not made H's gift then (on the facts of the above example) H would qualify for the spouse exemption.

The IHT spouse exemption would also apply to defeat a GWR death charge if H made a gift to a trust under which H's spouse acquired an estate interest in possession on H's death.

The same would apply if A made a GWR gift to B and A was not married to B at the time of the gift but was married at the time of A's death.

### 54.17.1 *Remedial tax planning where there has been a GWR*

Where H has made a gift to W, and a reservation of benefit problem arises, the following solutions may be considered:

(1) H ceases to enjoy any benefit.
(2) W gives the property back to H.
(3) Arrange that the spouse exemption applies on the death of H. (Not possible if H is UK domiciled and W is not UK domiciled at the time of the death of H).
(4) W settles the property: see 64.11.2 (Gift to foreign domiciled spouse, followed by settlement by spouse).

CHAPTER FIFTY FIVE

# IHT CONSEQUENCES OF TRANSFERS BETWEEN TRUSTS

## 55.1 Transfers between trusts – Introduction

This chapter considers the IHT consequences[1] of transfers between trusts and adding property to trusts. There are three main tiers of rules:

(1) General principles of trust law and tax law which apply in the absence of specific IHT provisions.
(2) A specific IHT provision which applies generally for IHT trust taxation: s.44(2) IHTA. I refer to this as **"general IHT law"**.
(3) Specific IHT provisions which apply only to the taxation of relevant property[2] which I call **"relevant property taxation"**: ss.81–82 IHTA.

The main significance of these rules relates to excluded property status, especially if there has been a change of domicile of the settlor. The rules can affect other matters such as the date and computation of a ten-year charge.

For completeness, a fourth tier of rules applies to employee trusts[3] and pension trusts.

## 55.2 Trust law background

There are several ways by which property can move between settlements

---

1 For CGT, see 45.19 (Transfer between trusts). Section 731 ITA may need consideration. Another issue (not discussed in this book) is that the transfer may be a transfer of value or may give rise to an exit charge under s.65 IHTA.

2 That is, trust property which is relevant property as defined by s.58 IHTA. Before 2006 this meant discretionary trusts, but (from March 2006) it includes non-estate IP trusts.

3 See s.86(4)(5) IHTA (not discussed here).

(without a person becoming beneficially entitled to the property in the meantime). For the purposes of this chapter the two important ways are as follows:

(1) Trustees may exercise a power to transfer trust property to another trust.[4]

(2) (a) A beneficiary who is entitled to a contingent or reversionary interest in the capital of the trust fund of trust A may assign that interest to trust B; and

(b) the trustees of trust B in due course become absolutely entitled to the trust fund of trust A.

## 55.3 General tax principles

The position is in short as follows:[5]

(1) If trustees exercise a power to transfer property from trust A to trust B, then, at least to the extent of the transferred property, the settlor of trust A is a settlor of trust B.[6]

(2) If a beneficiary with an equitable interest under trust A transfers this interest to trust B, then, at least to the extent of the interest transferred, the beneficiary is a settlor of trust B.

## 55.4 The separate settlements fiction

Section 44(2) IHTA provides:

> Where more than one person is a settlor in relation to a settlement and

---

4 A transfer to a separate settlement needs to be distinguished from the situation where trustees exercise a power to vary the terms on which they hold trust property without a transfer to another trust. The distinction is a trust law concept. A discussion is beyond the scope of this book: see *Dymond's Capital Taxes* para 16.230.
Trust law questions also arise: whether trustees have a power to transfer to another trust and restrictions on accumulation and perpetuity periods. These issues are not discussed here.

5 See 69.7 (Transfer from trust A to trust B by exercise of trustees' power).

6 That is:
(1) If all the property of trust B is derived from A, directly or indirectly, then A is the only settlor of trust B.
(2) If some of the property of trust B is derived from A and some from B, then A and B become joint settlors.

> the circumstances so require, this Part of this Act (except s.48(4) to (6)) shall have effect in relation to it as if the settled property were comprised in separate settlements.

I refer to this as "**the separate settlements fiction**".

The fiction is needed because inheritance taxation of trusts depends on:

(1) the domicile of the settlor

(2) the transfers made by the settlor in the 7 years before commencement of the trust (which affect the trust's nil-rate band for RP taxation).

The rules are drafted on the basis that every settlement has one settlor and only properly work on that basis; instead of making provision for a trust with multiple settlors, the scheme is to regard such trusts as multiple trusts.

IHT Manual provides:

> **42253. More than one settlor** [June 2007]
> ... This separation has 3 main effects
> [1] Where more than one trust exists each will have its own nil-rate band for rate purposes.
> [2] The value of property may be affected. For example, holdings of unquoted shares in a single trust might amount to a control holding whereas the same parcels of shares would be minority holdings if taken separately.
> [3] The separate trust made by the second person will have its own starting date. (IHTM42221)

This is correct as far as it goes, but it ignores the settlor domicile aspects of the rule.

When the separate settlements fiction applies, the settled property is treated as being in separate settlements (which I call "**notional trusts**"). It is important to note that these are fictional or notional trusts. They do not exist in the sense that the trust with several settlors exists. Each notional trust must (for IHT purposes) be regarded as possessing three features: (1) notional trust property (2) a notional settlor and (3) a notional date on which it was made. These features are as notional or fictional as the notional trust itself. The statute does not expressly tell us what they are: context and common sense must fill that gap.

### 55.4.1 *When separate settlements fiction does not apply*

The separate settlements fiction is expressed to apply for the purposes of Part 3 IHTA (not generally), but all the important provisions which govern trust tax are in Part 3.[7]

There are two cases where the separate settlements fiction does not apply.

Firstly, the fiction does not apply unless "the circumstances so require". Normally the circumstances do so require, but the drafter was aware that the separate settlements fiction might not always be appropriate. Most likely the drafter could identify any cases where the fiction should not be applied but thought there might be some such cases; another possibility is that the drafter identified some cases but thought they were too difficult or insufficiently important to set out in the statute. So that has been left to the courts to sort out.

Secondly, the fiction does not apply for the purposes of s.48(4) to (6), ie for the purposes of the exemption for FOTRA securities. The reason was that FOTRA exemption does not depend on the identity of the settlor, it depends on the identity of the beneficiaries.[8] It was therefore unnecessary to apply the separate settlements fiction. As far as I can see the fiction would not have done any harm, but it would not have had any effect: presumably the drafter thought it safer or simpler not to have to bother with the separate settlements fiction.

## 55.5 B adds property to A's trust

Suppose:
(1) an individual ("A") creates a trust ("the real trust"), and
(2) another[9] individual ("B") adds property to it.[10]

The real trust has two settlors, A and B. The separate settlements fiction applies, and one must imagine that the trust fund of the real trust is

7 The separate settlements fiction has to be repeated in s.201(4) IHTA in order to apply it to s.201 (because that is not in Part 3).

8 See 53.10 (Trusts: FOTRA securities).

9 For the position where the settlor adds to their *own* trust, see 53.13 (Settlor adds property to trust after change of domicile).

10 The same analysis applies if A and B together transfer funds to a new jointly made trust.

comprised in two notional trusts, "notional trust A" and "notional trust B". Common sense suggests:

(1) Notional trust A is regarded as if:
   (a) It holds the property given by A.
   (b) A is its sole settlor.
   (c) It was made at the time A made the real trust.
(2) Notional trust B is regarded as if:
   (a) It holds the property given by B.
   (b) B is its sole settlor.
   (c) It was made at the time B added property to the real trust.

### 55.5.1 *More than one addition to a trust*

Suppose:

(1) An individual ("A") creates a trust ("the real trust").
(2) Another individual ("B") adds property to it ("the first addition").
(3) B later adds more property to the trust ("the second addition").

It is considered that there are still two notional trusts. Notional Trust A is as before. Notional trust B is regarded as if:

   (a) It holds the property given by B.
   (b) B is its sole settlor.
   (c) It was made at the time of the first addition
   (d) B added property to the notional trust at the time of the second addition.

It follows that trust property added by the second addition may be excluded property if B was not UK domiciled at the time of the first addition.[11]

### 55.5.2 *Adding value indirectly*

It is suggested that the same applies if B adds value indirectly to the real trust (eg by a gift to a company held by the real trust). The real trust has two settlors, A and B.[12] The circumstances require the real trust to be regarded as two separate notional trusts. A division of the trust property of the real trust into two parts representing the value given by A and the

---

11 See 53.13 (Settlor adds property to trust after change of domicile).

12 See 69.14 (Provision of property for company held by trust).

value given by B is still possible. It may not be easy but it is no harder than many apportionments required for tax.[13]

## 55.6 Direct settlor and indirect settlor

Suppose there is an arrangement under which:
(1) A gives property to B, and
(2) B gives the property to a trust ("the real trust").
It appears at first sight that there are then two settlors: an indirect settlor (A) and a direct settlor (B).[14] Both have provided the *same* property.

What is the IHT analysis? On one view the separate settlements fiction applies so that the settled property in the real trust is treated as being comprised in separate trusts (which I call "notional trust A" and "notional trust B"). On this view the consequence is said to be that:
(1) Notional trust A:
    (a) holds *all* the trust property of the real trust;
    (b) A is its sole settlor;
    (c) I do not know when proponents of this view would say that notional trust A was made. It would either be at the time A gave the property to B or the time that B settled it, and this poses perhaps another difficulty with this view.
(2) Notional trust B:
    (a) also holds *all* the trust property of the real trust;
    (b) B is its sole settlor;
    (c) was made at the time B created the real trust.

The difficulty with this view is that it leads to double taxation[15] and the separate settlements fiction which only applies "if the circumstances so require" should not be used to give that result. So the better view is that the circumstances do not "so require" and the separate settlements fiction does not apply.

---

13 For instance, apportionment of gains of non-resident companies to participators.

14 See 69.4 (Gift from A to B followed by gift to trust by B). This issue usually arises in the context of failed tax planning of the kind discussed at 69.33 (Planning to create trust with foreign domiciled settlor).

15 This view is supported by comments in *Hatton v IRC* [1992] STC 140 at pp.160–161. But (1) the comments are obiter (2) the judge did not have the benefit of counsel's arguments on the issue (3) the judge did not appreciate the double taxation difficulties which arise on their view; in the circumstances it is considered that these comments do not represent the law.

We have therefore one real settlement with two settlors. What is the position for excluded property if A is foreign domiciled and B is not? It will be recalled that settled property is (in short) excluded property "unless *the settlor* was domiciled in the UK at the time the settlement was made". There are two possible solutions:

(1) One cannot say that "the settlor" was domiciled in the UK unless both settlors were domiciled here. In that case the trust property may be excluded property if either A or B are foreign domiciled.
(2) To read the word "the settlor" in this context as meaning "the settlor or one of the settlors".[16] In that case the trust property is only excluded property if A and B are both foreign domiciled.

Both solutions have anomalous results, though in one case the anomaly favours the taxpayer and in the other it favours HMRC.

The best solution to this conundrum is that one should identify A as the "real" settlor and infer that B should not be regarded as a settlor.[17] Then the anomalies do not arise.

### 55.6.1 *The HMRC view*

RI 166 provides:

> **Several persons contribute to a single settlement** [February 1997]
> ...
> [Section 44(2)] is similar in terms to FA 1975 Sch 5 para 1(8), which was considered by Chadwick J in *Hatton v IRC* [1992] STC 140. In the light of the decision in that case [HMRC] take the view
> [1] that the determination of the extent to which overseas assets in a settlement are excluded property by reason of the settlor's domicile is a relevant "required circumstance"; and that
> [2] where a clear, or reasonably sensible, attribution of settled property between the contributions made by several settlors is possible, there will be a separate settlement, with its own attributed assets, for each contributor for IHT purposes;
> [3] if such an attribution is not feasible, each separate settlement will

---

16 Applying (perhaps extending) the rule of construction that the singular includes the plural.

17 See 69.4.2 (If A is indirect settlor, is B also the settlor?).

> comprise all the assets of the single, actual settlement.[18]
>
> **Trust records**
>
> It follows from the comments above that the trustees of a settlement should keep adequate records to enable any necessary attribution of the settled property to be made if ... two or more persons have contributed funds for the purposes of the settlement.

Point [2] is correct. Point [3] is difficult to apply and doubtful. It is difficult to apply because how does one know whether attribution is "feasible"? I suggest it should always be feasible where two or more persons have contributed funds.[19] Point [3] is doubtful because it rests on a shaky obiter comment, discussed above, which was actually considering the different situation of *reciprocal* settlors. I do not wish to consider reciprocal settlors here because they are hardly ever found in practice, but if the Judge's comments are right at all, they should be restricted to the case of reciprocal settlors, where it might more plausibly be said that attribution between settlors is not feasible. RI 166[3] suggests that penal taxation may arise as a result of inadequate record keeping, but that cannot be right.

In practice it is perhaps better to avoid joint settlors (or for one person to add property to a settlement made by another). This avoids the complication of the separate settlements fiction. But in a straightforward case there should not be any difficulty as long as:

(1) all settlors are foreign domiciled or all are UK domiciled; or
(2) the settlors include both UK and foreign domiciliaries, but trust record keeping is adequate. (Ordinary trust accounts should suffice.)

It is likewise best to avoid indirect additions to a trust fund (eg a beneficiary using their own funds to improve trust property), where the

---

18 In similar vein, IHT Manual provides:

> "**42253. More than one settlor** [June 2007]
>
> ... In practice, you can take the phrase 'and the circumstances so require' to mean, 'in a simple and straightforward case'.
>
> [1] You can accept the separateness of direct additions made by the settlor's favourite aunt,
>
> [2] but if for instance the added property is situate in Liechtenstein and transferred by a nominee in Liberia to a trust company in Jersey you would need to satisfy yourself as to what the circumstances were and whether they require treatment as separate trusts."

Para [2] unhelpfully ducks the issue.

19 This is assumed in s.471 ITA; see 69.7.3 (IT and CGT rule).

original settlor is foreign domiciled and another person adding property is UK domiciled. If the settlor adds property to a trust of which they are the settlor, this problem does not arise.[20]

## 55.7 Transfer from trust made by A to trust made by B

This paragraph considers the general IHT position though if (as is usually the case) the trust property is relevant property, s.81 also needs consideration.[21]

Suppose:

(1) A gives property ("A's fund") to trust A ("real trust A").
(2) B gives property ("B's fund") to trust B ("real trust B").
(3) The trustees of real trust A transfer A's fund to real trust B.[22]

Real trust B has two settlors, A and B. The separate settlements fiction applies and one imagines that the settled property is comprised in two notional trusts ("notional trust A" and "notional trust B").

Notional trust A is regarded as if:

(1) it holds the property provided by A;
(2) A is its sole settlor;
(3) The important question is: at what time is notional trust A regarded as being made? The choice is:
    (a) at the time that real trust A was made;
    (b) at the time of the transfer to real trust B.

The latter view cannot be right, for various anomalies would then arise.

(1) Suppose A died before the transfer to real trust B. One cannot then apply the rule that the excluded property status of the trust depends on the domicile of the settlor "at the time the settlement was made".[23]

---

20 See 53.13 (Settlor adds property to trust after change of domicile).

21 See 55.9 (The same settlement fiction: s.81).

22 The same analysis applies if the trustees of real trusts A and B each transfer their trust funds to a third real trust C.

23 It has been argued that if A is UK domiciled when A made real trust A and dead at the time of the transfer to real trust B, A's fund can be excluded property after the transfer. The argument is:
(1) Notional trust A is regarded as made at the time of the transfer to real trust B.
(2) A is regarded as not "domiciled in the UK" at that time (because a dead person has no domicile).
The view that notional trust A is regarded as made at the time real trust A was made avoids obvious anomalies and is to be preferred.

(2) Suppose a transfer from trust A to trust B and A changes domicile after the date of trust A but before the transfer:
   (a) If A is UK domiciled when A made real trust A and foreign domiciled at the time of the transfer to real trust B, A's fund would become excluded property after the transfer. One would not expect HMRC to agree with that.
   (b) Conversely, if A is foreign domiciled when A made real trust A and UK domiciled at the time of the transfer to real trust B, the trust fund would cease to be excluded property.

   These are not equivalent or self cancelling anomalies, for in case (a) no transfers would usually take place, whereas in case (b) transfers would take place every time.

Under my analysis, there is in principle no IHT advantage or disadvantage from a transfer to another trust, regardless of changes in the settlor's domicile, or the settlor's death, which is logical and sensible. I see no difficulty in a rule that the notional trust is regarded as made before the transfer, for once one accepts that the notional trust is fictional, it can logically be regarded as being made on any date.

This view is also consistent with the principle in *Muir v Muir* [1943] AC 468.

## 55.8 Transfer from trust made by A to another trust made by A

This section considers the general IHT position though if (as is usually the case) the trust property is relevant property, s.81 also needs consideration.[24]

Suppose:

(1) A creates two separate trusts, trust A1 and A2.
(2) The trustees of trust A1 transfer property ("the transferred property") to trust A2.

---

If (contrary to my view) notional trust A is regarded as made at the time of the transfer to real trust B, after the death of A, one might regard A as having at that time the domicile A had:
(1) at the time of A's death; or
(2) at the time A made real trust A.
Another view is that s.44(2) only applies if the circumstances so require, and they do not so require. However adopting my approach, s.44(2) gives a sensible result.

24 See 55.9 (The same settlement fiction: s.81).

Trust A2 has only one settlor, A, and the separate settlements fiction does not apply to it. The possibilities are as follows:

*A is UK domiciled when A made trust A1 but not when A made trust A2.* It is suggested that the transferred property in trust A2 may in principle qualify as excluded property. Trust A2 *does* satisfy the condition that the settlor was foreign domiciled at the time that *this* settlement was made.

*A is foreign domiciled when A made trust A1 and UK domiciled when A made trust A2.* The result is reversed. The transferred property in trust A2 is not excluded property. Trust A2 does not satisfy the condition that the settlor was foreign domiciled when this settlement was made.

Thus there is a distinction between:
(1) transfer from trust made by A to a trust made by B (change of A's domicile irrelevant); and
(2) transfer from trust made by A to another trust made by A (change of A's domicile significant).

This is anomalous but the anomaly naturally follows from the fact that the separate settlements fiction applies in case (1) and not in case (2).

### 55.8.1 *Transfer from trust made by A to empty trust*

It is tentatively suggested that the same applies where trustees of trust A1 transfer the trust fund to new trustees who hold on the terms of a new declaration of trust which is an "empty trust", there being no trust property before the transfer ("trust A2"). In this case too the separate settlements fiction does not apply.

The view that trust A2 is regarded as made at the time trust A1 was made, applying the principle of *Muir v Muir* [1943] AC 468, gives a sensible result but is hard to reconcile with s.60 IHTA which provides:

> In this Chapter references to the commencement of a settlement are references to the time when property first becomes comprised in it.

It is considered that the transferred property may in principle be excluded property if A is living and foreign domiciled at the time of the transfer, even though A was UK domiciled when A made trust A1.

What if A is dead at the time of the transfer? On a literal reading, one might argue that (regardless of the domicile of A during A's life) the settlor A was not UK domiciled when trust A2 was made, since a deceased person has no domicile. The scope for tax avoidance would make that result unacceptable to a court in a case where A was UK domiciled at the time A made trust A1 and at the time of A's death. A court is likely to regard A as retaining after A's death the domicile A had during A's life. This is not as much of a stretch as first appears. If a company can be regarded as having a domicile (by analogy to the domicile rules of a living individual) why not a deceased person? However, it is suggested that the trust property in trust A2 may be excluded property if A was not UK domiciled at the time of A death.

## 55.9 The same settlement fiction: section 81

Section 81(1) IHTA provides:

> Where property which ceases to be comprised in one settlement becomes comprised in another then, unless in the meantime any person becomes beneficially entitled to the property (and not merely to an interest in possession in the property), it shall for the purposes of this Chapter[25] be treated as remaining comprised in the first settlement.

I call this "**the same settlement fiction**".

What is the purpose of the same settlement fiction? It must be intended to counter IHT avoidance based on moving property between settlements. Suppose a trust ("the old trust") is approaching its 10-year anniversary (on which a 10-year charge would arise). Simple examples of tax avoidance by transfer to a new trust (in the absence of s.81) are as follows:

(1) The trustees might transfer the trust property to a new trust (made by the same settlor), whose 10-year anniversary is 10 or nearly 10 years ahead.

(2 (a) The trustees might appoint a reversionary interest to a beneficiary.
 (b) The beneficiary transfers that interest to a new trust.
 (c) The new trust becomes entitled to the trust property before the ten year anniversary of the old trust.

25 "This Chapter" is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

These schemes would avoid the 10-year charge on the old trust.[26] Section 81 effectively counteracts both these schemes by deeming the trust property to remain in the old trust. This explains why the same settlement fiction applies only for the purpose of relevant property taxation.

IHT regards trust property as a continuing fund,[27] so s.81 does not apply on a sale between trusts at full value, for no property moves between settlements.

Section 81 does not apply to a loan from trust 1 to trust 2 on commercial terms. It does not apply to an interest free loan repayable on demand, because the promise to repay is full consideration.

The section only applies on a transfer of trust capital: if trustees of a discretionary trust distribute trust income to another trust, it is considered that s.81 does not apply, because the income is not "settled property".

What if property is transferred from trust A to trust B and the terms of the trusts are different? Although the property transferred from is deemed to be held in trust B, it is considered that it is not deemed to be held on the terms of trust A: it is regarded as held on the terms set out in trust B as if they had been incorporated in trust A. For instance, a transfer from a discretionary trust to an estate IP trust gives rise to an exit charge: the property is deemed to remain held in the first trust but the trust property ceases to be relevant property.

### 55.9.1 *Section 81 excluded property rule*

Where s.81 applies, s.82 IHTA imposes an additional requirement for trust property to qualify as excluded property.[28] This provides:

> (1) For the purposes of this Chapter[29] ... property to which section ... 81 above applies shall not be taken to be excluded property by virtue of

26 For completeness: these schemes might also be advantageous if the settlor had made chargeable transfers in the 7 years before the creation of the old trust, as the second trust might have a better nil-rate band in the computation of its ten years charges.

27 Contrast SP E9 "Property is regarded, for the purposes of s.48(3) IHTA, as becoming comprised in a settlement when it, *or other property which it represents,* is introduced by the settlor."

28 With an economy of drafting, s.82 is also used to for the purposes of the s.80 fictions, but although there is some overlap, it is easiest to discuss that aspect separately. See 53.12 (Initial interest of settlor or spouse).

29 "This Chapter" is Chapter 3 Part 3 IHTA which deals with relevant property trusts.

section 48(3)(a) above unless the condition in subsection (3) below is satisfied (in addition to the conditions in section 48(3) that the property is situated outside the UK and that the settlor was not domiciled there when the settlement was made).

(2) [Transitional rules: see 55.9.7 (Section 81 transitional rules).]

(3) The condition referred to in subsection (1) ... above is ...

(b) in the case of property to which subsection (1) or (2) of section 81 above applies, that the person who is the settlor in relation to the second of the settlements mentioned in the subsection concerned,

was not domiciled in the UK when that settlement was made.

I refer to the rule in s.82 (as it applies in a s.81 case) as **"the s.81 excluded property rule"**.

This rule only applies in determining whether foreign situate property is excluded property, so it does not apply for AUTs and OEICs.[30]

This rule only applies for the purposes of relevant property taxation, so one must distinguish:

(1) excluded property for the purposes of relevant property taxation (**"RP excluded property"**); and
(2) excluded property for other IHT purposes (but the scope of this has been greatly reduced by the 2006 reforms.)

The consequences of this rule depend on the circumstances of the inter-trust transfer.

### 55.9.2 *Transfer from trust made by A to another trust made by A*

Suppose:

(1) A creates two separate trusts, trust A1 and trust A2.
(2) The trustees of trust A1 transfer property ("the transferred property") to trust A2.

The possibilities are as follows:

*A is not UK domiciled when A made trust A1 but UK domiciled when A made trust A2.* The transferred property in trust A2 is not excluded property under general IHT principles.[31]

---

30 See 53.9 (Trusts: authorised unit trusts and OEICs).

31 See 55.9.5 (B transfers equitable interest to another settlement).

*A is UK domiciled when A made trust A1 but not UK domiciled when A made trust A2.* The transferred property may be excluded property under general IHT principles. However, s.82 prevents foreign situate transferred property in trust A2 from qualifying as RP excluded property. (This is probably an accidental consequence of the wording, because if the drafter had had the point in mind they would have made s.82 IHTA apply for all IHT purposes and not only for the purposes of relevant property taxation.)

In short, for foreign situate transferred property to qualify as RP excluded property, A must be domiciled outside the UK at the time A made trust A1 and trust A2.

### 55.9.3 *Transfer on to third trust or back to first trust*

Suppose:

(1) A creates three separate trusts, A1, A2 and A3.

(2) The trustees of trust A1 transfer property ("the transferred property") to trust A2.

(3) The trustees of trust A2 transfer the transferred property to trust A3.

The transferred property is treated as remaining in trust A1. It is only excluded property if A was not UK domiciled when A made "the second of the settlements mentioned" in s.81(1), but that refers (it is considered) to trust 3. The domicile of A at the time A made trust A2 is not relevant.

Thus if trustees of an excluded property trust transfer property to a non-excluded property trust made by the same settlor, they have fallen into a trap: foreign situate transferred property ceases to be excluded property.[32] But they can extricate themselves from the trap if the trustees of trust A2 transfer the property back to trust A1; or if they transfer it on to trust A3 (if A3 is a trust made when the settlor is not UK domiciled).

### 55.9.4 *Transfer from trust made by A to trust made by B*

Suppose:

(1) A gives property ("A's fund") to a settlement ("real trust A").

(2) B gives property ("B's fund") to a separate settlement ("trust B").

(3) The trustees of real trust A transfer A's fund to trust B.

32 If this was unforeseen, the transfer might well be invalid under the rule in *Hastings-Bass*.

For general IHT purposes, A's fund is regarded as in a notional trust and may be excluded property if A was not UK domiciled when real trust A was made. At first sight the position for the purposes of RP trust tax seems to be different:

(1) A's fund is treated as remaining comprised in real trust A (applying the same settlement fiction); and
(2) foreign situate property in A's fund can only be excluded property if:
    (a) A is foreign domiciled at the time real trust A was made; and
    (b) B is foreign domiciled at the time trust B was made

    (applying the s.81 excluded property rule).

There is a better view. On these facts the separate settlements fiction of s.44(2) applies. A's fund is treated for IHT as if it were transferred to a separate notional trust. The same settlement fiction applies as if there is a transfer from real trust A to the separate notional trust deemed to be made by A at the time (I think) of real trust A. So, for RP trust tax purposes, A's fund may be excluded property if A is not UK domiciled at the time A made trust A. That is, the s.82 rule does not add anything to the general excluded property rule. The domicile of B is irrelevant. That gives a fair result and is consistent with what I take to be the purpose of s.82; see below.

A similar result applies if the trustees of trust A transfer A's fund to a company held by trust B.

### 55.9.5 *B transfers equitable interest to another settlement*

The position is different if:

(1) A gives property ("A's fund") to a settlement ("trust A").
(2) B has an equitable interest under trust A (perhaps a reversionary or contingent right to trust capital).
(3) B assigns B's equitable interest to a separate settlement ("trust B").
(4) Trust B becomes entitled to A's fund (perhaps because the reversionary interest falls into possession or the contingency is satisfied).

B is in principle the settlor of trust B for general tax purposes. The position for the purposes of RP trust taxation is that:

(1) A's fund is treated as remaining in trust A (applying the same settlement fiction); and
(2) A's fund can only be RP excluded property if:
    (a) A is foreign domiciled at the time that trust A was made, and

(b) B is foreign domiciled at the time trust B was made (applying the s.82 rule).

It would be possible to avoid these consequences if the trustees of trust B sell the equitable interest before it falls into possession, or if they transfer it to a company.

### 55.9.6 *Purpose of section s.81 excluded property rule*

What is the purpose of the s.81 excluded property rule? It often happens that an artificial deeming rule which closes up one avoidance scheme can be exploited for another. The same settlement fiction is an example. Dymond explains what might be done in the absence of the s.81 excluded property rule. Suppose:

(1) A, who is domiciled outside the UK, settles foreign property on discretionary trusts for a short period with remainder to A absolutely.
(2) B, who is UK domiciled, buys A's reversion and settles it on discretionary trusts.[33]

Under general IHT law, B would in principle be the settlor of trust B, which would be within the scope of IHT in the ususal way. However applying the same settlement fiction, A would be the settlor and (because of A's domicile) B's trust would be an excluded property trust!

Section 82 counteracts this scheme. If my analysis is right,[34] then s.82 works, though it does not produce the fair result in every case. Suppose the facts were reversed:

(1) A, who is domiciled in the UK, settles foreign property on discretionary trusts for a short period with remainder to A absolutely.
(2) B, who is foreign domiciled, buys A's reversion and settles it on discretionary trusts.

There is no obvious fairness here in the rule that B's trust should be within the scope of IHT but the example is somewhat contrived and perhaps it does not much matter.

An incidental result is to restrict or prevent tax advantages on a transfer from trust A1 to A2 where A was UK domiciled when A made trust A1 but foreign domiciled at the time A made trust A2.[35]

---

33 *Dymond's Capital Taxes*, 19.810. These are the facts considered in 55.9.5 (B transfers equitable interest to another settlement).

34 See 55.9.4 (Transfer from trust made by A to trust made by B).

35 See 55.9.2 (Transfer from trust made by A to another trust made by A).

### 55.9.7 *Section 81 transitional rules*

Section 81(2)(3) IHTA sets out three transitional rules:

> (2) Subsection (1) above shall not apply where the property ceased to be comprised in the first settlement before 10 December 1981; but where property ceased to be comprised in one settlement before 10 December 1981 and after 26 March 1974 and, by the same disposition, became comprised in another settlement, it shall for the purposes of this Chapter be treated as remaining comprised in the first settlement.
> (3) Subsection (1) above shall not apply where a reversionary interest in the property expectant on the termination of a qualifying interest in possession subsisting under the first settlement was settled on the trusts of the other settlement before 10 December 1981.

## 55.10 Pension benefits

Lastly, for completeness, there is a special rule for pension benefits. Section 151(5) IHTA provides:

> Where
> [a] a benefit has become payable under
>   [i] a registered pension scheme
>   [ii] a qualifying non-UK pension scheme or
>   [iii] a section 615(3) scheme, and
> [b] the benefit becomes comprised in a settlement made by a person other than the person entitled to the benefit,
> the settlement shall for the purposes of this Act be treated as made by the person so entitled.

This is not discussed here.

CHAPTER FIFTY SIX

# IHT DEDUCTION FOR DEBTS

## 56.1 IHT deduction for debts – Introduction

This chapter is concerned with IHT deductions for debts.[1] One could write a short book on this important and misunderstood topic. This chapter sets out basic principles and their application to foreign domiciliaries. There is some fascinating material in the IHT Manual which is not discussed here.

## 56.2 Liability of individual

Section 5(3) IHTA provides the authority for deducting an individual's liabilities (or so one might think):

> In determining the value of a person's estate at any time his liabilities at that time shall be taken into account, except as otherwise provided by this Act.

In *Green v IRC* the judge regarded s.5(3) IHTA as merely confirming a

---

1 It may also be necessary to consider other issues:
(1) Whether the benefit of debt is a UK situate asset, relevant for CGT and IHT position of the owner of the debt; see 70.1 (Concepts of situs).
(2) Whether interest on the debt has a UK source, relevant for:
(a) the recipient of the interest who may suffer UK income tax; and
(b) the payor, who may be required to deduct tax.
See 17.1 (Interest).
(3) Effect of the debt on the POA charges, see 66.17 (Excluded liability rule).
Consistent with the patchwork nature of UK tax law, different (though overlapping) considerations apply in these contexts.

deduction, not authorising it,[2] but that does not ultimately matter.[3]

The general rule has seven exceptions. The first is in s.5(5) IHTA which provides:

> Except in the case of a liability imposed by law, a liability incurred by a transferor shall be taken into account only to the extent that it was incurred for a consideration in money or money's worth.

This does not often apply, because liabilities are normally incurred for full consideration.[4] In particular, if an individual borrows money, the liability to repay the lender is in principle outside the scope of s.5(5), because it is a debt incurred for full consideration. By contrast, if an individual gratuitously covenants to pay money to a person, their liability to pay under that covenant is not taken into account for IHT.

Section 162(1) IHTA provides a second, self-explanatory exception:

> A liability in respect of which there is a right to reimbursement shall be taken into account only to the extent (if any) that reimbursement cannot reasonably be expected to be obtained.

The third exception, mentioned only for completeness, relates to "any liability arising under or in connection with a policy of life insurance"; see s.103(7) FA 1986. The fourth exception applies if the debt is trust

---

2 [2005] STC 288 "... the property of the deceased ... is his personal estate net of his liabilities. In other words, it is at that stage that the liabilities are dealt with. It is not necessary for section 5(3) to provide for a second time that the debts are to be deducted in arriving at the value of the deceased's property (or estate) and in my view it is not really doing that. It is in part confirmatory, but in the main it is intended to provide a qualification or qualifications to the principle that debts are deductible– the meat of the subsection is in the closing words 'except as otherwise provided by this Act'. One finds provisions in the Act which qualify that right in sections 5(4), 5(5) and 162. Its confirmatory nature is supported by the use of the phrase 'taken into account', which is more general than 'shall be deducted'. I accept that the nature of section 5(3) would be clearer without the comma, but nevertheless it seems to me to be clear enough."

3 The judge construed the section this way in order to reach his (sensible) conclusion that an individual's debt is not allowable against trust funds. However, there were other ways to reach that result.

4 For a discussion of the meaning of "consideration" in tax legislation, see Kessler & Brown, *Taxation of Charities and Non-Profit Organisations* (8th ed., 2011), para 22.4 (Meaning of 'consideration').

property to which the debtor is treated as entitled as life tenant.[5] The fifth exception applies if the debt is property to which the debtor is treated as entitled under the GWR rules.[6] The sixth (arguable) exception relates to liabilities on non-residents overdrawn foreign currency bank accounts.[7]

A liability is in principle deductible even though it is owed to a connected person. But in this case s.103 FA 1986 will sometimes apply.

## 56.3 Section 103 FA 1986

The last and most important restriction on deducting debts for IHT is the anti-avoidance provision in s.103 FA 1986. This applies (in short) where an individual owes a debt to a person to whom they have previously made a gift.

The section was described in *McDougal v IRC* 31 ATC 153 as "intricate and involved in expression". The reader who studies this chapter will agree! But if one works patiently through it a few times the meaning becomes clearer; contrast the less convoluted but hopelessly vague wording of s.102.

Section 103 must be split up into separate parts in order to distil the sense:

> **Treatment of certain debts and incumbrances**
> (1) Subject to subsection (2) below, if, in determining the value of a person's estate immediately before his death, account would be taken, apart from this subsection, of a liability consisting of
> [i] a debt incurred by him or
> [ii] an incumbrance created by a disposition made by him,
> that liability shall be subject to abatement to an extent ...

Thus, subject to certain defences, s.103(1) disallows the deduction for the liability to a certain extent. The section then goes on to specify the extent of the disallowance:

> ... to an extent proportionate to the value of any of the consideration given for the debt or incumbrance which consisted of—

5 See 53.10 (Debt owed by estate IP trust to life tenant.
6 See 56.7.3 (Debt owed by settlor to settlor-interested discretionary trust).
7 See 53.17.3 (Overdrawn account).

(a) property derived from the deceased; or
(b) consideration (not being property derived from the deceased) given by any person who was at any time entitled to, or amongst whose resources there was at any time included, any property derived from the deceased.

Thus s.103(1) works like this:
(1) One needs to identify the consideration given for the liability.
(2) One asks to what extent the consideration consists of the type of consideration described in s.103(1)(a) and (b).
(3) To that extent the liability is in principle disallowed. (There are defences. I will come to those later.)

### 56.3.1 *Section 103(1)(a) disallowance*

One needs first of all to ascertain whether the consideration for the liability was "property derived from the deceased". If so, the liability is disallowed under s.103(1)(a). The liability is wholly disallowed if all the consideration is "property derived from the deceased" or partly disallowed if the consideration is partly "property derived from the deceased".

The expression "property derived from the deceased" is given a commonsense definition in s.103(3):

> In subsections (1) and (2) above "property derived from the deceased" means, subject to subsection (4) below,
> [a] any property which was the subject matter of a disposition made by the deceased, either by himself alone or in concert or by arrangement with any other person or
> [b] which represented any of the subject matter of such a disposition, whether directly or indirectly, and whether by virtue of one or more intermediate dispositions.

The IHT Manual gives this simple example:

> **28365 How Section 103 FA 1986 applies when the consideration is 'property derived from the deceased'?** [March 2009]
> *Example*
> On 19 March 1987 A gives his brother B £25,000.

> On 25 April 1987 A borrows back from B £25,000.[8]
> On 7 April 1994 A dies.
> Without the legislation A's estate contains the original £25,000. But if the money were still owing when A died the debt might be claimed as a deduction against his estate. And the PET in 1987 is exempt as more than seven years have elapsed.
> The legislation disallows the deduction for IHT purposes ...

The IHT Manual explains "property derived from the deceased":

> **28367 Definition of 'property derived from the deceased' for Section 103 FA 1986 purposes** [March 2009]
> ... In practice, income from property given absolutely by the deceased is treated as falling outside the above definition [contained in s.103(3)]. But where the deceased settled the property, the definition includes income payable under the disposition.
> You should treat money raised by the sale or mortgage of property derived from the deceased as though it was property derived from the deceased.

### 56.3.2 *Section 103(1)(b) disallowance*

Assuming one passes unscathed past the s.103(1)(a) disallowance, the journey takes us to s.103(1)(b). One must identify the person who gave the consideration for the liability. One then asks whether this is a person:

> who was at any time entitled to, or amongst whose resources there was at any time included, any property derived from the deceased.

If so, the liability is disallowed under s.103(1)(b). In principle the liability is wholly disallowed.[9] The IHT Manual gives this simple example:

> **28366 How Section 103 FA 1986 applies when there is 'consideration given by any person whose resources at any time included property derived from the deceased'?** [March 2009]

8 [Author's Note] It is assumed that this £25,000 is, or represents, the £25,000 given to B.

9 Unless the consideration for the debt is given by more than one person (very unusual); but see below on defences to the s.103(1)(b) disallowance.

*... Example*
On 19 March 1987 A gives his brother B a parcel of land worth £25,000.
On 25 April 1987 A borrows £25,000 from B.
On 7 April 1994 A dies, at which time B retains the land which is non-income producing.[10]
The PET has dropped out of cumulation so that no claim arises on the death. As the consideration for the debt was not derived from the deceased s.103(1)(a) FA 1986 would be ineffective.[11] But this arrangement is caught by s.103(1)(b) FA 1986 and the liability is not an allowable deduction for IHT purposes.

### 56.3.3 *Section 103(2) defences to section 103(1)(b)*

Section 103(2) offers defences to the s.103(1)(b) disallowance.[12] This provides:

> If, in a case where the whole or a part of the consideration given for a debt or incumbrance consisted of such consideration as is mentioned in subsection (1)(b) above, it is shown that
> [a] the value of the consideration given, or of that part thereof, as the case may be, exceeded
> [b] that which could have been rendered available by application of all the property derived from the deceased,
> [c] other than such (if any) of that property—
> (a) as is included in the consideration given, or
> (b) as to which it is shown that the disposition of which it, or the property which it represented, was the subject matter was not made with reference to, or with a view to enabling or facilitating, the giving of the consideration or the recoupment in any manner of the cost thereof,
> no abatement shall be made under subsection (1) above in respect of the excess.

It is helpful to consider this as three distinct defences.

10 But whether the land is income producing is not directly relevant.
11 [Author's Note] It is assumed that the £25,000 which B lends to A does not represent the land.
12 Section 103(2) does not override the s.103(1)(a) disallowance.

### 56.3.4 *Section 103(2)[b] defence*

"The s.103(2)[b] defence" is my term for the defence given by the words of s.103(2) down to the end of s.103(2)[b], ie ignoring s.103(2)[c]. The IHT Manual gives a simple example:

> **28369 - Allowing part of a debt under s.103(2) FA 1986** [March 2009]
> Even if an arrangement (IHTM28366) is caught by s.103(1)(b) FA 1986, a deduction may be allowed for part of the debt. The debt will not be reduced to the extent that the value of the consideration given by the [lender][13] exceeded what would have been made possible had the lender applied all the property derived from the deceased.
> *Example*
> A gives his son B shares worth £20,000.
> B lends A, out of his separate resources, £25,000 at a time when the shares were worth £17,000.
> A dies and a deduction of £25,000 is claimed.
> The value in point is the realisable value at the time the debt was created. So the liability is reduced by £17,000 leaving £8,000 as a valid deduction.

The s.103(2)[b] defence allows a deduction (overriding the s.103(1)(b) disallowance) to the extent that the debt exceeds the value of the property derived from the deceased. That is obviously fair.

### 56.3.5 *Section 103(2)[c](a) defence*

The next defence is the extension of s.103(2)[b] by s.103(2)[c](a). This prevents double counting with the s.103(1)(a) disallowance. The IHT Manual gives an example at 28369 [March 2009]:

> **28369 Allowing part of a debt under Section 103(2) FA 1986** [March 2009]
> ... *Example*
> A gives shares worth £15,000 to B
> 18 months later B sells half the shares back to A for £7,500 – which is not paid but left as a debt repayable on demand.

13 The IHT Manual erroneously reads: "deceased".

> B lends A £12,000 entirely from his own resources.
> A dies owing B £19,500 [ie both debts remain outstanding].

The £7,500 debt is disallowed under s.103(1)(a). The reason is that the consideration for the £7,500 debt (the shares) is property derived from the deceased. The Manual correctly makes this point, though it uses a sloppy paraphrase of the statutory language:

> The debt of £7,500 is clearly referable to the earlier gift of shares – and falls within s.103(1)(a) FA 1986. This liability is not deductible.

The Manual then turns to the £12,000 debt:

> Were it not for the provisions of s.103(2)(a) FA 1986 it would be possible to take into account that £7,500 in considering the debt of £12,000. The result would be that the entire debt of £12,000 would be non-deductible, meaning that the whole of the claimed £19,500 would be disallowed. But because under s.103(1)(b) FA 1986 half the value of the shares is included in the consideration given for the debt there remains an excess of £4,500. This figure of £4,500 for the allowable debt is arrived at by calculating the resources available to B against the second loan of £12,000 as £7,500, being the original gift of shares less the £7,500 disallowed. So the balance of £4,500 is deductible without restriction because under s.103(2)(a) FA 1986[14] this amount is the excess consideration.

### 56.3.6 *Section 103(2)[c](b) defence*

The s.103(2)[c](b) defence is the extension of s.103(2)[b] by sub-para [c](b). The Manual does not give an example of a defence within s.103(2)[c](b); though this is perhaps the most important of the three. The result in the s.103(1)(b) examples in the IHT Manual would be different if the gift from A to B was not made (in short) with a view to enabling B to lend to A.

### 56.3.7 *Section 103(4) defence*

Section 103(4) provides an important defence to the s.103(1)(a) and (b)

14 The Manual wrongly refers to s.103(2)(a) IHTA 1984.

disallowances:

> If
> [a] the disposition first-mentioned in subsection (3) above[15] was not a transfer of value and
> [b] it is shown that the disposition was not part of associated operations which included—
> (a) a disposition by the deceased, either alone or in concert or by arrangement with any other person, otherwise than for full consideration in money or money's worth paid to the deceased for his own use or benefit; or
> (b) a disposition by any other person operating to reduce the value of the property of the deceased,
>
> that first-mentioned disposition shall be left out of account for the purposes of subsections (1) to (3) above.

Suppose:
(1) S (not UK domiciled) transfers excluded property (ie non-UK situate property) to a trust.
(2) S borrows from the trustees and retains or spends the sum borrowed.
At first sight, the debt is disallowed as the consideration is property derived from the deceased, S. However, the s.103(4) defence applies. The disposition to the trust is disregarded, because it is the disposition first-mentioned in s.103(3)[a] and:
[a] the disposition is not a transfer of value;
[b] the disposition is a simple gift. It is not part of associated operations within s.103(4)[b](a) or (b).
Thus a debt to an excluded property trust is not usually disallowed under s.103. The same applies if the gift is to a trust where the settlor has a estate IP (eg a gift to an IP trust before 22 March 2006) because such a gift is not a transfer of value.

Suppose:
(1) The trustees lend to the settlor, S.
(2) S gives the borrowed money to a trust.
In this case the deduction for the debt is disallowed. The s.103(4) defence does not apply. Condition [a] is satisfied but condition [b] is not, because

15 That is, the disposition made by the deceased. See 56.3.1 (Section 103(1)(a) disallowance).

the gift to the trust is an associated operation.

### 56.3.8 *Section 103(5) deemed PET*

Section 103(5) FA 1986 provides:

> If, before a person's death but on or after 18 March 1986, money or money's worth, is paid or applied by him—
> (a) in or towards the satisfaction or discharge of a debt or incumbrance in the case of which subsection (1) above would have effect on his death if the debt or incumbrance had not been satisfied or discharged, or
> (b) in reduction of a debt or incumbrance in the case of which that subsection has effect on his death,
> the [IHTA] shall have effect as if, at the time of the payment or application, the person concerned had made a transfer of value equal to the money or money's worth and that transfer were a potentially exempt transfer.

There is no express exemption for a foreign domiciliary. However, the principle of territorial limitation requires that some exemption is implied. The best solution is that the deemed PET should be regarded as not only "equal to the money or money's worth" but made out of the money or money's worth. Thus, if the individual is not UK domiciled at the time they repay the debt, *and* the debt is repaid out of excluded property, then no tax charge arises. This would be broadly consistent with the similar provision in section 102(4) FA 1986.[16]

### 56.3.9 *Assignment of debts*

Suppose:
(1) A borrows from a bank.
(2) B purchases the debt from the commercial lender for its market value.
It is suggested that the purchase price paid by B to the bank is "consideration given for the debt". So A's liability is disallowed if the purchase price which B pays to the bank is property derived from A. Otherwise the section is easy to avoid.

---

16 See 54.14 (GWR PET charge).

Conversely if A's debt is disallowable because it is made in consideration of property derived from A, it continues to be disallowed even if the debt is sold to a third party. In other words, "consideration for the debt" means the consideration for the creation of the debt but also includes consideration for the assignment of the debt.

### 56.3.10 *Pre-1986 transitional rules*

Section 103(6) FA 1986 provides:

> Any reference in this section to a debt incurred is a reference to a debt incurred on or after 18 March 1986 and any reference to an incumbrance created by a disposition is a reference to an incumbrance created by a disposition made on or after that date …

This cannot often apply now.

## 56.4 The amount of deduction for a debt

Section 162(2) IHTA provides:

> Subject to subsection (3) below, where a liability falls to be discharged after the time at which it is to be taken into account it shall be valued as at the time at which it is to be taken into account.

This only states expressly what one would have expected in any event.

## 56.5 Deduction for debt of foreign domiciled individual

A UK domiciled individual will not usually mind whether a deduction for their liabilities is set against UK or foreign property as it is usually all subject to IHT.

Suppose a foreign domiciled person with a liability that is deductible for IHT has:

(1) UK situate (non-excluded) property; and

(2) excluded property.

From which property is the deduction for the debt made? If it is made from the excluded property the deduction is wasted.

### 56.5.1 *Debt is incumbrance*

Section 162(4) IHTA provides:

> A liability which is an incumbrance on any property shall, so far as possible, be taken to reduce the value of that property.

If a liability is an incumbrance on both UK and non-UK assets there must be an apportionment. If the incumbrance on the UK assets has priority, then the deduction should be against that property first.

If it is desired to secure a liability on non-UK property (but to keep the IHT deduction against UK property), a back-to-back guarantee may be a solution. That is:

(1) T borrows from a third party ("the primary liability").
(2) T's primary liability is guaranteed by a bank.
(3) Under the terms of the guarantee, T is required to reimburse the bank if the guarantee is called upon ("the second liability"). This second liability is secured on foreign assets.

Section 162(4) will not apply to the primary liability, which can in principle be deducted from UK property. But watch *Furniss v Dawson*.

Conversely, if on those facts the second liability is secured on UK property, the primary liability is not secured on that property and the deduction is not set against that property.

Note the need to comply with the Bills of Sale Acts if securing loans on chattels.

### 56.5.2 *Debt not an incumbrance*

Section 162(5) IHTA provides:

> Where a liability taken into account is a liability to a person resident outside the UK which neither—
> (a) falls to be discharged in the UK, nor
> (b) is an incumbrance on property in the UK,
> it shall, so far as possible, be taken to reduce the value of property outside the UK.

This identifies three connecting factors. Where a debt is not an incumbrance on any property, there are two connecting factors and four possibilities:

| **Case No.** | **1** | **2** | **3** | **4** |
|---|---|---|---|---|
| Liability to UK resident | No | No | Yes | Yes |
| Discharge out of the UK | No | Yes | No | Yes |

Section 162(5) tells us the answer to Case 1: the debt is set against non-UK property. There is nothing about Cases 2 to 4. However, the implication is that in Cases 2 to 4 the debt reduces the value of the property in the UK.

What is the priority between s.162(4) and (5)? It is considered that (4) is applied first. A liability which is an incumbrance on any property is so far as possible to be taken to reduce the value of that property. Only if it is not an incumbrance on any property, or if the amount of the liability exceeds the value of the property, does one apply the rules in s.162(5). The IHT Manual shows that HMRC accept this:

> **28395 Deducting liabilities where there is excluded property**
> You will see cases where there is excluded property in the estate and deductions may be properly payable out of both excluded and other property. In this situation, provided the debts are to UK creditors, you may allow a deduction in full against the non-excluded property.
> But, in view of s.162(4) IHTA 1984 this does not apply to debts that are charged on excluded property.

### 56.5.3 *Where does debt fall to be discharged?*

In outline, the place where a liability falls to be discharged is that specified in the contract, or (if not specified) the residence of the creditor.[17] The IHT Manual shows that HMRC broadly accept this:

> **28396 Deducting UK debts when there is both UK and foreign property in the estate**
> If the deceased's estate includes both UK and foreign assets you should first deduct any UK debts against the UK assets and the deficiency, if

17 See *Chitty on Contracts*, (30th ed, 2010) para 21-054 (Place of payment). Further consideration is needed for a contract not governed by English law.

any, against the foreign assets. Debts are UK debts if one of the following applies

- *they are owed to creditors resident solely in the UK*
- they are charged on property in the UK, or
- *they are contracted to be paid in the UK. ...*

(Emphasis added)

A debt which is set against UK property (but which is not charged on specific property) will be set against UK property rateably. Some of the deduction will be wasted if the individual owns UK property outside the scope of IHT: property qualifying for APR or BPR, UK AUTs or OEICs, or FOTRA securities.

### 56.5.4 *Conclusion*

It should be possible to arrange that a debt of a foreign domiciliary is in principle fully deductible against non-excluded property. This can be done without making the debt UK situate but it may give interest on the debt a UK source for income tax.

## 56.6 Individual[18] borrows and acquires excluded property

Suppose F is not UK domiciled and owns UK situate property worth £1m. F faces an IHT charge on that amount on F's death.

F borrows £1m charged on the UK property and deposits that sum outside the UK ("the offshore deposit").

The value of their UK situate property is reduced by £1m and the value of their excluded property is increased by £1m. No IHT liability arises on the death of F.[19]

This may be useful "deathbed" planning since it avoids liability to IHT even if F dies immediately after it has been carried out. It also avoids the need for a CGT disposal (and the opportunity for a CGT-free uplift on death is preserved).

Of course, the debt must not be charged on the offshore deposit. There could in principle be a back-to-back loan to minimise interest charges.

Technically the proposal cannot be faulted. Will the *Ramsay* principle

18 See also 56.11 (Trustees borrow and acquire excluded property).

19 Except so far as property prices rise.

apply? The risk varies depending on exactly how the arrangement is set up.

## 56.7 Debt owed by individual to trust

### 56.7.1 *Debt owed by non-settlor life tenant to trust*

Suppose the life tenant (not the settlor) owes a debt to trustees of an estate IP trust (as happens when a pre-2006 IP trust lends money to the life tenant). At first sight, the position seems to be:

(1) The life tenant can claim a deduction for the burden of the debt on their death.

(2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the life tenant.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. Where the benefit of the debt is excluded property (ie foreign domiciled settlor at the time the settlement was made and the debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

(1) a deduction for the burden of the debt in the estate of the life tenant; and

(2) no IHT on the benefit of the debt, being excluded property.

Robert Venables QC disagrees. He cites s.49(1) IHTA and Lord Asquith's familiar dictum in *East End Dwellings v Finsbury Borough Council* [1952] AC 109[20] and continues:

> If one applies Lord Asquith's dictum, what is deemed to happen when the settlor[21] in fact borrows money from the trustees? As he is deemed to own the money before it is borrowed, he cannot borrow it from himself. The transfer of the money to himself is a non-event for inheritance tax purposes. His estate is subject to no debt, as a man cannot owe a debt to himself. The question of any such debt being treated as non-deductible in computing the value of his estate for

20 These are set out in 53.11 (Estate IP trust) and 54.11.1 (Construction of deeming provisions) respectively.

21 Venables is considering the position of a settlor life tenant, but the same applies to a non-settlor life tenant.

> inheritance tax purposes therefore does not arise. Conversely, however, the settled property does not include the right to sue the settlor for the money borrowed, as a man cannot have a right against himself.[22]

I respectfully agree. The effect of s.49(1) is therefore to disallow the deduction for the debt.

A practical solution may be to arrange that the debt is not due to the trustees, but to a company owned by the trustees. Alternatively, perhaps, arrange that the debtor beneficiary ceases to be life tenant.

### 56.7.2 *Debt owed by life tenant settlor to estate IP trust*

Suppose the life tenant settlor owes a debt to trustees of an estate IP trust (as happens when a pre-2006 IP trust lends money to the life tenant settlor). At first sight, the general position seems to be:

(1) The settlor can claim a deduction for the burden of the debt on their death.

(2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the life tenant.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral. There are however two special cases.

If the benefit of the debt is excluded property, at first glance the result is a mismatch which could benefit the settlor (deduction for the burden of the debt, no charge on the benefit of the debt).[23]

If the deduction for the debt is disallowed under s.103[24] the result is a mismatch which would favour HMRC (no deduction for the burden of the debt, but a charge on the benefit of the debt, unless it is excluded property).

However on the view set out in para 56.7.1 (Debt owed by non-settlor life tenant to trust), the burden of the debt and the asset of the trust cancel each other out and both are ignored for IHT purposes. This is a sensible

---

22 Robert Venables QC, "An IHT Trap for Settlors of Non-UK Resident Trusts", OTPR, vol 4, issue 3, p.165.

23 This might happen if the settlor was not UK domiciled, but needed the deduction for the debt as their property was UK situate.

24 But this would not often apply to excluded property trusts or to trusts where the settlor has an initial estate IP: see 56.3.7 (Section 103(4) defence).

result, which fits the purpose of the legislation. In practice HMRC appear to accept this.

### 56.7.3 *Debt owed by settlor to settlor-interested discretionary trust*

Suppose the settlor ("S") owes a debt to trustees of a discretionary trust (as happens when a discretionary trust lends money to the settlor).
At first sight, the position seems to be:
(1) The settlor can claim a deduction for the burden of the debt on their death.
(2) The benefit of the debt is an asset of the trust fund, and therefore part of the estate of the settlor under the GWR rules.
These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. Where the benefit of the debt is excluded property (ie foreign domiciled settlor at the time the settlement was made and the debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:
(1) a deduction for the burden of the debt in the estate of the settlor;[25] and
(2) no IHT on the benefit of the debt, being excluded property.
It is considered that the debt is disallowed under s.102(3) FA 1986. Under this section the benefit of the debt is treated as property to which the settlor was beneficially entitled on their death. The analysis is therefore the same as where the settlor is a life tenant, see above. This is so whether the GWR debt is UK situate or foreign situate.[26]

## 56.8 Debts to and from trusts

Do not confuse two situations:
(1) The situation where an individual owes a debt to trustees (eg the trustees have lent money to the individual). Here:
  (a) the individual may be entitled to an IHT deduction for the burden of the debt in their estate;
  (b) the trustees have an asset, the benefit of the debt (which may or may not be excluded property).

---

25 Since s.103 does not usually apply: see (Section 103(4) defence).

26 As to whether the GWR debt is subject to IHT under the GWR rules, see 54.10 (GWR over debt owed by the deceased).

(2) The reverse situation where trustees owe a debt to another person (eg an individual has lent to the trustees). Here:
   (a) the individual owns an asset in their estate, the benefit of the debt, which may or may not be excluded property;
   (b) the trustees or beneficiaries may be entitled to an IHT deduction for the burden of the debt on the trust property.

The issue of deduction for debts of trustees raises entirely different questions to which we now turn.

## 56.9 Deduction for debts of trustees

It is clear that trust liabilities are in principle deductible for IHT purposes, although there is no provision which states this expressly, which has caused some confusion.

Let us consider first the position where the trustees have borrowed funds and an estate interest in possession terminates during the lifetime of the life tenant. There is of course a transfer of value and the value transferred is:

> equal to the value of the property *in which his interest subsisted*.
> (Section 52(1) IHTA, emphasis added)

What is "the property in which their interest subsists"? In my view it is not the settled property; it is the property subject to the trustees' lien.[27] For the trustees' lien takes priority over the interest of the life tenant. The trustees' lien is a lien over both income and capital of the trust fund. The value of property is its market value. Market value of property subject to a lien will be the net value, the value after deducting the value of the lien. In this valuation exercise we are not strictly claiming a "deduction" for the lien. We are simply ascertaining what property will fetch in the market.

For the same reason, trustees debts are deductible when an estate IP terminates on the death of the life tenant and in computing ten-year and

27 Where a trustee has incurred a liability as trustee, they may in principle reimburse himself out of the trust fund. For this purpose the trustee has a lien over the trust fund. One exception is where the trustee has committed a breach of trust. In the discussion here, it is assumed that is not the case.

exit charges.[28]

This is the correct reason why trustee liabilities are allowable.[29]

Section 103(1) FA 1986 provides:

> ... if, in determining the value of a person's estate immediately before his death, account would be taken, apart from this subsection, of a liability consisting of a debt *incurred by him* or an incumbrance created by a disposition *made by him*, that liability shall be subject to abatement.

This does not apply to debts of trustees as we are not concerned with a debt or disposition made by the individual.

56.9.1 *Against which trust property is deduction set?*

Where a trust has a UK domiciled settlor one may not usually mind whether a deduction for a trust debt is set against UK or foreign property as it is all subject to IHT. Where it does matter (eg where a trust with a foreign domiciled settlor has UK and excluded property) the principles are as follows:

(1) If the liability is an incumbrance on specific trust property, the deduction is set against that property: s.162(4) IHTA.[30]
(2) If the liability is not an incumbrance on specific trust property, it is under general trust law principles an incumbrance on the trust fund as a whole and deducted from the trust assets *pro rata*. The place of

---

28 Section 65(5) IHTA assumes liabilities are deductible, though it is not necessary to rely on this.

29 In *Green v IRC* [2005] STC 288 at [12] the judge took a short cut to reach the same destination:

> "... s.49 IHTA [deems] the deceased to be beneficially entitled to 'the property' in which his life interest subsists. It does not say 'net property' (i.e. the value of the property net of trust liabilities) but that is what it must mean, and the parties to this appeal both agree that in practice that is the effect the Revenue gives to the section."

The point is discussed in detail in the 3rd ed of this book para 27.9 but it is not necessary to set this out now that *Green v IRC* has confirmed the principle that trustee debts are deductible for IHT.

On HMRC practice see for instance IHT Manual 10541 (deduction for trustees' costs).

30 If under the terms of the trust a liability is payable out of certain property it is for this purpose a incumbrance on that property.

payment and residence of creditor are not relevant, and s.162(5) IHTA does not apply.

## 56.10 Debt owed by estate IP trust to life tenant

Suppose trustees of an estate IP trust owe a debt to the life tenant (as happens when a life tenant lends to a pre-2006 IP trust). At first sight, the position seems to be:

(1) The trust can claim a deduction for the burden of the debt on the death.

(2) The benefit of the debt is part of the estate of the life tenant.

These two factors, the deduction and the asset, normally cancel each other out and the position ends up at neutral.

There is however one exceptional case. Where the benefit of the debt is excluded property (ie foreign domiciled life tenant and the debt not UK situate) then at first sight the result is a mismatch which benefits the taxpayer:

(1) a deduction for the burden of the debt in the trust;[31] and

(2) no IHT on the benefit of the debt, being excluded property.

It is considered that s.49 IHTA does not disallow the debt.

## 56.11 Trustees[32] borrow and acquire excluded property

### 56.11.1 *Foreign domiciled settlor; trust owns non-excluded property*

Suppose L is the life tenant under an estate IP trust made by a foreign domiciled settlor. The trust owns UK situate property. The trust property is not excluded property. The trustees face an IHT charge on the death of L.

The trustees may borrow, charge the borrowing on the UK property, and invest the borrowed funds outside the UK. In principle, the value of the UK situate property is reduced by the borrowing. The value of excluded property is increased. The IHT liability on the death of L is reduced accordingly.[33]

---

31 Of course in most cases the trust property is excluded property so there is no need for the deduction, but that is not necessarily the case: the trust may hold UK property.

32 See also 56.6 (Individual borrows and acquires excluded property).

33 Except so far as property prices increase.

Alternatively, the sum borrowed may be advanced to a (foreign domiciled) beneficiary. Schedule 4B TCGA needs consideration.[34]

### 56.11.2 *UK domiciled settlor but foreign domiciled beneficiary*

Suppose L is the life tenant under an estate IP trust made by a UK domiciled settlor. The trust property is not excluded property. L is not UK domiciled.

The trustees could solve this problem by transferring the trust property to L absolutely, but this may be impractical, and may have a substantial CGT cost.

The trustees borrow and advance that sum to L, who invests it in excluded property. Alternatively, if L is not ordinarily resident, the trustees may borrow themselves and invest in FOTRA securities.

In principle, the value of the trust property is reduced by the borrowing. The borrowed funds are excluded property. The IHT liability on the death of L is reduced accordingly.

These examples may be useful "deathbed" planning since IHT is avoided even if L dies immediately after it has been carried out. Will the *Ramsay* principle apply? It depends how the arrangement is carried out. More care is needed than for equivalent planning by an individual.

## 56.12 Funeral expenses

Section 172 IHTA provides:

> In determining the value of a person's estate immediately before his death, allowance shall be made for reasonable funeral expenses.

The IHT Manual provides:

> **10376 Overseas funerals of non-domiciled deceased** [April 2010]
> You should allow overseas funeral expenses as a deduction against the UK estate, even if the deceased was not domiciled in the UK for IHT purposes.
> Although s.162(5) IHTA 1984 might seem to justify the deduction of such expenses from the non-UK estate, that sub-section cannot apply as

34 See 46.1 (Borrowing by non-resident trustees).

funeral expenses are not a liability for the purposes of s.5 IHTA 1984 or s.162 IHTA 1984.

## 56.13 Deduction for foreign taxes

Foreign inheritance taxes and similar taxes may be available as a credit to set against IHT: see 63.1 (Foreign IHT credit relief). Such taxes are not deductible for IHT purposes under s.5(3) as they arise on the death and IHT is charged immediately before the death.

Unpaid foreign taxes which accrue during a person's lifetime are in principle deductible. They are liabilities imposed by law.

The IHT Manual provides:

> **28100 Foreign taxes**
> Special rules (IHTM27000) apply to foreign taxes that are similar in nature to inheritance tax (IHT). These may in some cases be set against the IHT liability. For other types of foreign taxes the general rule is that they can normally only be deducted from the value of property in the country that imposes the tax. This is because the taxes are unenforceable in other countries, *Government of India v Taylor* [1955] AC 491.

The proposition that foreign taxes are unenforceable in other countries now needs to be qualified because under international treaties foreign taxes often are enforceable in other countries. So far as foreign taxes are unenforceable and unpaid it seems right in principle that there should be no deduction and a court would be expected to reach that conclusion even though there is no express provision to that effect. But it is difficult to see why the deduction should be against property in the country concerned: it should be against non UK property generally, under s.162(5) IHTA, unless the foreign tax legislation imposes an incumbrance (which does not seem likely).

### 56.13.1 *Irish tax liabilities*

The IHT Manual provides:

> **28101 Deduction for tax debts in the Republic of Ireland**
> If the deceased died owing tax in the Republic of Ireland, you should allow a deduction against the free estate for any tax that has actually been paid to the Irish authorities provided the deceased
> - was domiciled in the United Kingdom, and

> • had no assets in the Republic of Ireland.
>
> Where, in these circumstances, the deceased also has assets in a third country, you should apportion the tax debts.
>
> If a deduction is claimed for any 'Probate Tax' paid in the Republic of Ireland, you must refer the matter to TG (IHTM01081) for advice. This tax, which is paid by the executors or administrators of an estate, is not covered by our Double Taxation Convention with the Republic of Ireland.

### 56.13.2 *Canadian income tax liabilities deducted for IHT*

The IHT Manual explains the Canadian tax background:

> **28102. Canadian income tax**
>
> Under Canadian law, the estate of an individual is deemed to have been disposed of immediately before his death. Income tax is charged on any resulting gains. If, under the (Income Tax) Double Taxation Agreement the deceased was resident in Canada, the charge applies to all property wherever situate. But if the deceased was resident in the UK the charge applies only to Canadian immovable property and to certain business property.

(There was a similar charge to CGT in the UK between 1965 and 1971. The UK abolished the CGT charge on death; Canada abolished its Estate Duty instead, a wiser decision). ESC F18 provides:

> 1. Under IHTA 1984 s 5(3) a person's liabilities at the time of death are taken into account in arriving at the value of their estate for the purposes of IHT. The Board of Inland Revenue will by concession regard this provision as applying to income tax in Canada charged on a deemed disposal immediately before death, even though the liability may not in strictness have arisen until the person had died.
>
> 2. Where there is an IHT charge on a deceased person's world-wide estate, and income tax in Canada is charged on deemed gains which are attributable to assets forming part of that estate, the Canadian tax will rank as a deduction in arriving at the value of the estate for IHT purposes. The Canadian tax will normally be treated as reducing the value of assets outside the UK whether those assets are liable to IHT or not; but if the Canadian tax exceeds the value of those assets, the excess will be set off against the value of the UK assets.

### 56.13.3 *Foreign tax on UK situate shares*

The IHT Manual provides:

> **27201. Procedure for relief by concession on shares**
> Occasionally shares in a company, although situated in some part of the UK by UK law, are also treated as liable to tax in a foreign country on the grounds, for example, that the company carries on business there. In this circumstance, by concession the amount of foreign tax is allowed as a deduction against the value of the shares. This concession operates whether the company is incorporated in the UK or elsewhere.
> The concession applies in the same way where the obligation to pay foreign tax on death falls upon the company and the company has the right to be reimbursed by the personal representatives of the deceased shareholder before it registers a transfer of the shares.
> The concession does not apply to cases covered by the statutory reliefs provided for by Section 158 IHTA 1984 and Section 159 IHTA 1984. Nor does it apply to shares that become liable to the foreign tax by reason of the operation of a Double Taxation Convention to which the UK is not a party.

I would have thought in this situation s.158 or 159 relief would normally apply, and in other cases relief would be available by law and not by concession. I would be interested if any reader can identify the foreign taxes to which this paragraph is applicable.

CHAPTER FIFTY SEVEN

# IHT PLANNING BEFORE AND AFTER A CHANGE OF DOMICILE

## 57.1 IHT planning in anticipation of acquiring UK domicile

The basic strategy for the foreign domiciliary is to transfer their assets to a trust. If the settlor has a foreign domicile when at the time the trust is made, settled property can be excluded property and will retain that status indefinitely, even if the settlor later become domiciled here. This has been common practice since 1975, and HMRC accept it.

### 57.1.1 *Time limit*

The opportunity, once missed, cannot be regained so it is desirable to ascertain the exact moment when a UK domicile is acquired. There are three possibilities:

(1) The individual who has decided to make a permanent home in the UK will acquire a UK domicile as soon as they arrive here. Such an individual must carry out the tax planning before setting foot in this country.

(2) The individual who arrives here to take up residence without such an intention will acquire a UK domicile if and when they later form the intention to live here permanently. They must carry out the tax planning before their mind is made up, ie while their long-term intentions remain unclear.

(3) The individual who arrives and remains residing in the UK without deciding to live here permanently will acquire a deemed UK domicile after 15 to 17 years' residence here: see 52.2 (Deemed UK domicile). This is the long-stop deadline for the IHT planning, although limited planning opportunities remain available for the deemed domiciliary:

see 52.7 (Tax planning for the deemed domiciliary).

### 57.1.2 *Form of trust*

A life interest trust will normally be suitable, ie :

(1) income is to be paid to the settlor for life;

(2) subject thereto the trust fund held on discretionary trusts for the benefit of the family of the settlor.

Trust income will belong to the life tenant but (if not UK domiciled) they may mandate the trustees to retain the income and add it to capital. This may be useful to avoid relevant income: see 27.16 (Is income of life tenant relevant income?).

A simple discretionary settlement is a possible alternative.

## 57.2 IHT planning: trust with foreign domiciled settlor

There are two general points. The first is to avoid UK situate property, at least at the time when it matters: see 53.20 (IHT planning for individual).

Trust property in a settlement created by a true foreign domiciliary can remain effectively free of IHT so long as the trust continues to exist. The trustees should be reluctant to appoint trust capital to a beneficiary who is or may become UK domiciled; that property may cease to be excluded property. On the contrary, if necessary, steps should be taken to extend its life by exercising powers of appointment or advancement.

If a UK domiciled beneficiary has substantial assets in their own estate then it may be worth adopting a policy of gradually spending their own assets while allowing their trust fund to accumulate or invest for capital growth. It may be attractive for the beneficiary to purchase an income tax efficient annuity.

## 57.3 Trust with UK domiciled settlor who later acquires foreign domicile

What is the best form of tax planning where a settlor has made a settlement while UK domiciled and later acquires a foreign domicile? If nothing is done the trust property cannot be excluded property.

A good solution is to transfer the trust property back to the settlor. That may be impractical if the settlor is not a beneficiary and commercial or foreign tax or UK CGT considerations make this course unattractive.

In such a case, a second-best but workable solution may be:

(1) the settlor creates a new trust; and

(2) the trustees of the old trust transfer the trust property to the new trust.

See 55.8 (Transfer from trust made by A to another trust made by A).

A third-best solution involves loans: see 56.11 (Trustees borrow and acquire excluded property).

CHAPTER FIFTY EIGHT

# IHT ON DEATH: WILLS AND IOVs

## 58.1 IHT spouse exemption on death of a foreign domiciliary

Section 18 IHTA provides:

> (1) A transfer of value is an exempt transfer to the extent that the value transferred is
> [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,
> [b] so far as the value transferred is not so attributable, to the extent that that estate is increased.[1]

I refer to this as "**the IHT spouse exemption**".[2]

Suppose:

(1) H (not UK domiciled) dies leaving an estate which consists of:
  (a) UK property (not excluded property), and
  (b) foreign situate property (which is excluded property).

(2) Part of H's estate passes[3] to H's widow W.

This raises the interesting question of the interaction of the excluded property rules and the IHT spouse exemption. Sections 4 and 5 IHTA provide:

---

1 I add for completeness that ss.18(3) and 56 contain anti-avoidance provisions rarely in point and not discussed here. There is a full discussion on the (almost) identical charity provisions in Kessler & Brown, *Taxation of Charities and Non-Profit Organisations*, (8 ed., 2011). For the restriction for foreign domiciled spouses, see 64.2 (Restricted IHT spouse exemption for foreign domiciled spouse).

2 References to spouse, marriage, and widow/ers here include a civil partner, civil partnership and a surviving civil partner. See Appendix 1.2 (Meaning of spouse) and 1.3 (Meaning of "civil partner").

3 By will, by survivorship or by the relevant succession law; this makes no difference.

> **4 Transfers on death**
> (1) On the death of any person tax shall be charged as if, immediately before his death, he had made a transfer of value and the value transferred by it had been equal to the value of his estate immediately before his death. ...
> **5 Meaning of estate**
> (1) For the purposes of this Act a person's estate is the aggregate of all the property to which he is beneficially entitled, except that ...
> (b) the estate of a person immediately before his death does not include excluded property or a foreign-owned work of art which is situated in the United Kingdom for one or more of the purposes of public display, cleaning and restoration (and for no other purpose).

The following propositions are clear:
(1) IHT is charged as if H made a transfer of value ("the deemed transfer of value").
(2) The estate of H immediately before H's death did not include H's excluded property.
(3) The value transferred by the deemed transfer of value is equal to the value of H's estate (which is the value of the UK situate property).

Suppose, first, that on the death of H only H's foreign situate (excluded) property passes to H's spouse. Does the spouse exemption apply? Section 18(1) IHTA provides:

> A transfer of value is an exempt transfer to the extent that the value transferred is
> [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner or,
> [b] so far as the value transferred is not so attributable, to the extent that that estate is increased.[4]

The deemed transfer of value is not exempt under s.18(1)[a]. There is "property which becomes comprised in the estate of the spouse". However, the value transferred is not attributable to that property. That leaves the exemption in s.18(1)[b]. A transfer of value is an exempt transfer to the extent that the estate of the spouse is increased. The estate

4 In the case considered here the restriction in s.18(2) does not apply since H (the transferor) is not domiciled in the UK.

of the spouse is increased on the death of H.[5] It is therefore considered that the spouse exemption does apply on a plain reading of the words.[6] Is this result so absurd that the courts should not adopt a plain reading? I do not see why it should be regarded as absurd. If W is UK domiciled the application of the spouse exemption on the death of H is reasonable, because W's estate is increased and the property W receives will be subject to tax on the death of W. It might be said to be anomalous because a simple lifetime gift of excluded property by H to H's spouse would not be a transfer of value, so it would not qualify as an exempt transfer under the IHT spouse exemption. But of course in such a case the spouse exemption is not needed.[7] If the contrary view were adopted, then the practical consequence should not be to raise more funds for HMRC, but only to pose a trap for taxpayers and their advisors.

Now suppose H leaves W a pecuniary legacy. The IHT Manual provides:

> **11013 Quantifying the exemption** [October 2007]
> *... Example ...*
> Where the will of a person domiciled (IHTM13000) abroad disposes of his UK estate and some or all of his world estate, exemption for pecuniary legacies (IHTM12082) should be given against the UK estate in the proportion which that bears to the world estate, and not wholly against the UK estate. Where you have difficulty in obtaining details of the world estate, or where the official practice meets resistance, you should refer the case to TG.

This is correct in relation to charities. The IHT charity exemption is more narrowly worded. But for spouses, it is not consistent with the words of s.18(1)[b]. It is suggested that the spouse exemption applies to the full extent of the pecuniary legacy. It makes no difference whether the pecuniary legacy is subsequently paid out of UK or foreign situate property.

---

5 This is the case even if the property is excluded property in the estate of W (which will be the case if W was not UK domiciled). Excluded property is "property" for IHT and (except immediately before death) a person's estate includes their excluded property.

6 Exemption is given to the extent of the value of the property given to W.

7 The end result is consistent with the exemption for funeral expenses, which are set against UK property alone; see 56.12 (Funeral expenses).

Chapter 3 Part 2 IHTA (Allocation of Exemptions) does not shed much light on the issue. Section 36 IHTA provides that these rules apply where (*inter alia*) s.18 IHTA applies:

> in relation to a transfer of value but the transfer is not wholly exempt …

In the circumstances we are envisaging, the transfer will be "wholly exempt" if the value given to the spouse equals the value of the UK situate property. What happens if the value given to the spouse is less than the value of the UK situate property so the transfer is not wholly exempt? Let us assume that what the spouse receives is a "specific gift" as defined in s.42(1). Section 38(1) IHTA provides that:

> Such part of the value transferred shall be attributable to specific gifts as corresponds to the value of the gifts …

This confirms the view taken above.

## 58.2 Will drafting – General approach

There has always been considerable scope for tax saving through an appropriately drafted will. On disclosure rules on death, see 75.10 (Reporting on death of foreign domiciled individual).

### 58.2.1 *UK domiciled testator: foreign domiciled beneficiaries*

Here the testator should in principle give their estate to beneficiaries absolutely so that the property may qualify as excluded property in their hands. A short-term discretionary will trust within s.144 IHTA is just as good from a tax viewpoint, and allows additional flexibility.

### 58.2.2 *Foreign domiciled testator: UK domiciled beneficiaries*

From an IHT viewpoint, the will should in principle provide that the estate is held on trust for the beneficiaries so that trust property situated outside the UK will remain excluded property.

### 58.2.3 *Gift to spouse by will: foreign domiciled testator and foreign domiciled spouse*

Where a foreign domiciled testator has non-excluded property and excluded property, and the spouse is foreign domiciled so the IHT spouse exemption is fully available, the safe course will be:

(1) to give the non-excluded property to:
  (a) the spouse; or
  (b) a trust where the spouse has an interest in possession (better where the spouse is UK domiciled).

(2) to give excluded property to other persons.

A pecuniary legacy to the spouse should be charged on non-excluded property. Watch the drafting.

This course should avoid a dispute with HMRC. However, it is not necessary.

### 58.2.4 *Gift to spouse by will: UK domiciled testator and foreign domiciled spouse*

Where a UK domiciled testator has a foreign domiciled spouse, the usual IHT spouse/civil partner exemption does not apply (ignoring the small £55k allowance). The choice for the will lies between a discretionary will trust or an absolute gift to the foreign domiciled spouse. Which is better? Either way, there is a charge to IHT on the death of the testator. But if the property is given to the spouse, it is outside the scope of IHT thereafter, so long as it is not UK situate. If the property is given to a will trust, it remains within the scope of IHT, it is not excluded property, as the will trust has a UK domiciled settlor. So at first sight, the absolute gift seems better. Having said that, if property goes into the discretionary will trust and out to the spouse again within two years, the IHT position is just the same as a direct gift: s.144 IHTA 1984. And it may be desired to pass the property to others, perhaps giving it to the next generation (particularly if not UK domiciled). Also when the testator makes the will, one would not usually know the domicile position at the time of the death. If the spouse/civil partner lives long enough, she may become deemed UK domiciled for IHT purposes. All things considered, the discretionary will trust seems the more flexible and safer course for the will, in a routine case. In most cases, the will trust is likely to be wound up within two years. But the only cost is the cost of the deed of appointment.

### 58.2.5 *Charitable gift by will*

Where a foreign domiciled testator has non-excluded property and excluded property, the correct strategy will be:

(1) to give the non-excluded property to UK charities or EU charities which qualify for UK tax relief[8];

(2) to give excluded property to other persons.

A pecuniary legacy to the charity should be charged on non-excluded property.

## 58.3 Instruments of variation ("IOVs")

The IHT Manual provides:

> **35094 Redirection of excluded property** [June 2006]
> Another scheme (see also IHTM35093) where the taxpayers seek to take advantage of the provisions of s.142 IHTA 1984 without there being a bona fide variation is where the estate contains excluded property (IHTM04251) such as government securities.
> The deceased, domiciled (IHTM13000) outside the UK, may leave property in this country to chargeable beneficiaries and excluded property to the spouse or civil partner (IHTM11032). An IoV may then be used for the spouse's or civil partner's entitlement to be switched from excluded property to the ordinary UK estate without any change in the amount the spouse or civil partner receives.
> You should refer cases of this type immediately above to TG (IHTM01081) without making any preliminary enquiries provided the basic facts are clear.

I do not understand in what sense it could be said that this is not a "bona fide variation".[9] Section 142(5) IHTA expressly envisages an IOV relating to excluded property.

A variation of this kind cannot sensibly be challenged if properly carried out. If the author's view of the spouse exemption is right, however, an

8 See Kessler & Brown, *Taxation of Charities and Non-Profit Organisation* (8th ed., 2011).

9 It would be different if there was an arrangement under which the spouse later swapped the UK property for the excluded property.

IOV would not be necessary. It may nevertheless be desirable as a useful precaution where a will has not been drafted in the manner recommended above.

CHAPTER FIFTY NINE

# Double Inheritance Taxation - Introduction

## 59.1 International estate and inheritance taxes

Many states (though by no means all) impose tax on the transfer of wealth occurring on death. These taxes may be divided into two types:
(1) The taxable person may be the deceased or his/her estate.
(2) The taxable persons may be the beneficiaries of the estate (the heirs).
In international tax terminology, type (1) is called an estate tax and type (2) is called an inheritance tax. Under this terminology IHT is strictly an estate tax and its title "inheritance tax" is a misnomer. However no confusion arises as long as one remembers that and I use the term "inheritance taxes" to include both types.

Jurisdiction to charge inheritance tax (as for income tax) is normally based one of two criteria:

(1) personal nexus to the state: domicile, residence or nationality or the deceased or of the beneficiary;
(2) situs of assets (a source rule).

These wide and differing criteria are the cause of double inheritance taxation:

(1) **Residence-source conflict** when
    (a) State A imposes tax on the deceased (estate tax) or the heir (inheritance tax) because of their personal nexus to the state (residence, domicile or nationality),
    (b) State B imposes tax because the assets are situate in that state.

  A residence-source conflict will result in the double taxation of the assets situate in state B.

(2) **Residence-residence conflict** when more than one state imposes tax on the same person because of their residence, domicile or nationality. A residence- residence conflict will typically result in double taxation on worldwide assets.

(3) **Source-source conflict** where state A regards an asset as situate in state A and state B regards the asset as situate in state B, because they have different rules determining situs. Here the conflict results in double taxation on the dual situate assets.

For a general discussion of the problems, see Study on Inheritance Taxes in EU Member States and Possible Mechanisms to Resolve Problems of Double Inheritance Taxation in the EU.[1]

## 59.2 Incorporation of IHT DTAs into UK law

International treaties (including DTAs) do not automatically become part of UK law, but must be incorporated into UK law by statute. Accordingly, s.158(1) IHTA provides:

> If Her Majesty by Order in Council declares—
> (a) that arrangements specified in the Order have been made with the government of any territory outside the UK with a view to affording relief from double taxation in relation to capital transfer tax payable under the laws of the UK and any tax imposed under the laws of that territory which is of a similar character or is chargeable on or by reference to death or gifts inter vivos, and
> (b) that it is expedient that those arrangements should have effect,
> the arrangements shall, notwithstanding anything in this Act, have effect
> [i] so far as they provide for relief from capital transfer tax, or
> [ii] for determining the place where any property is to be treated as situated for the purposes of the tax.

Under s.158(1)[ii] a DTA could in theory *increase* the scope of IHT, by providing that property which is not UK situate on general principles is to be regarded as UK situate. However in practice DTAs do not do this.

## 59.3 IHT double taxation treaties

In the following three chapters I consider

(1) the pre-CTT IHT DTAs (India, Pakistan, Italy and France. )

---

1 Copenhagen Economics commissioned by the European Commission, Directorate-General for Taxation and Customs Union, Aug 2010. *http://ec.europa.eu/taxation_customs/resources/documents/common/consultations/tax/2010/08/inheritance_taxes_report_2010_08_26_en.pdf*

(2) the USA IHT treaty
(3) foreign IHT credit relief
I hope to deal with the other treaties in future editions.

### 59.3.1 *The OECD model*

The OECD approved the Estate and Inheritance Draft Model Convention in 1966. This model was revised in 1982 (Model Double Taxation Convention on Estates and Inheritances and on Gifts). It is therefore somewhat outdated.

## 59.4 EU law aspects

The ECJ have ruled that the EU Treaty does not oblige Member States to eliminate double inheritance taxation which arises from the exercise of fiscal sovereignty by Member States.[2] However the European Commission are looking at this area, and say:

> ... the significant differences in the civil and tax legislation of the Member States in the field of inheritances can potentially result in double, or even multiple, taxation by several Member States in the case of cross-border inheritances. ... it is clear that international double taxation is an obstacle to crossborder activity and investment within the EU.

Accordingly, some major changes can be expected in this area in a few years time.[3]

2 Case C-67/08 *Block*.

3 Possible approaches to tackling cross-border inheritance tax obstacles within the EU, Consultation paper June 2010 accessible *http://ec.europa.eu/taxation_customs/common/consultations/tax/2010_06_inheritance_en.htm*

CHAPTER SIXTY

# IHT DTAs: India, Pakistan, Italy, France

## 60.1 IHT double tax treaties – Introduction

In recent times the UK has had three death/gift taxes:
Estate Duty: 1894 - 1974
Capital Transfer Tax: 1974 - 1986
Inheritance Tax: 1986 -

In this chapter I consider the four IHT double tax treaties which were made before the introduction of CTT. I refer to these as "**the India, Pakistan, Italy and France IHT DTAs**"[1] or together as "**the pre-CTT DTAs**". These treaties are important to those who are deemed domiciled in the UK, but treaty-domiciled in India, Pakistan, Italy or France.

I comment only on the UK aspects of the treaties. Foreign law advice will also be needed in any case where a treaty applies. The provisions

1 For some reason DTAs do not have short titles. The full titles are:
(1) Agreement between the Government of the United Kingdom and the Government of India for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons [SI 1956 No. 998]
(2) Agreement between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of Pakistan for the avoidance of double taxation and the prevention of fiscal evasion with respect to duties on the estates of deceased persons [SI 1957 No. 1522]
(3) Convention between the United Kingdom of Great Britain and Northern Ireland and France for the Avoidance of Double Taxation with respect to Duties on the Estates of Deceased Persons [SI 1963 No. 1319]
(4) Convention between the Government of the United Kingdom of Great Britain and Northern Ireland and the Government of the Italian Republic for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Duties on the Estates of deceased persons [SI 1968 No. 304].

relating to exchange of information are not discussed.

The four pre-CTT DTAs are similar but not identical and the many small differences can be important. This does make a coherent exposition rather difficult. It is surprising that no standard model form was adopted, but there it is. It does make one appreciate the tremendous value of the OECD model IT/CGT convention.

## 60.2 Application of pre-CTT DTAs to IHT

India IHT DTA Art. I provides:

> The duties which are the subject of the present Agreement are
> (a) In India, the estate duty imposed under the Estate Duty Act, 1953, and
> (b) In the UK, the estate duty imposed in Great Britain.

Article II (1) provides commonsense definitions of India, Great Britain, UK, territory, and duty, which need not be set out here.

Although the treaty refers to Great Britain, it also applies in Northern Ireland.[2]

The treaty refers to UK estate duty but it is extended to IHT by s.158(6) IHTA:

> Where arrangements with the government of any territory outside the UK are specified under any Order in Council which—
> (a) was made, or has effect as made, under section 54 of the Finance (No 2) Act 1945 or section 2 of the Finance Act (Northern Ireland) 1946, and
> (b) had effect immediately before the passing of this Act,
> the Order shall, notwithstanding the repeal of that section by the Finance Act 1975 remain in force and have effect as if any provision made by those arrangements in relation to estate duty extended to capital transfer

2 India IHT DTA Art. X provides: "The present Agreement shall apply in relation to the estate duty imposed in Northern Ireland as it applies in relation to the estate duty in Great Britain, but shall be separately terminable in respect of Northern Ireland by the same procedure as is laid down in Article XII." This was because Northern Ireland was from 1921 a separate unit for estate duty purposes.

> tax[3] chargeable by virtue of section 4 above; ...[4]

The Pakistan, Italy and France IHT DTAs are substantially the same: see Arts. I and II of each DTA.

## 60.3 Treaty IHT exemption

Each treaty provides an IHT exemption in slightly different terms.
India IHT DTA Art. III(3) provides:

> [a] Duty shall not be imposed in Great Britain on the death of a person who was not domiciled at the time of his death in any part of Great Britain but was domiciled in some part of India on any property situated outside Great Britain :
>
> [b] Provided that nothing in this paragraph shall prevent the imposition of duty in Great Britain on any property which passes under a disposition or devolution regulated by the law of some part of Great Britain.

Italy IHT DTA Art. V(2) provides:

> Where duty is imposed in the territory of one Contracting Party on the death of a person who at the time of his death was not domiciled in any part of that territory but was domiciled in some part of the territory of the other Contracting Party, no account shall be taken, in determining the amount or rate of such duty, of property situated outside the former territory, provided that this paragraph shall not apply to duty imposed in the territory of a Contracting Party on property passing under a settlement governed by its law.

France IHT DTA Art. V(1) provides:

3 The reference to CTT has effect as a reference to IHT: s.100 FA 1986.

4 The Italy treaty adds:

> "The present Convention shall also apply to any other duties of a substantially similar character to the duties referred to in para (1) above which may be imposed in Great Britain or Italy subsequently to the date of signature of the present Convention."

This is also in the France and Pakistan DTAs. It is missing from the India treaty but it makes no difference as s.158 does the same work.

> Where a person was at the time of his death domiciled in some part of France duty shall not be imposed in Great Britain on any property which neither is situated in Great Britain, nor passes under a disposition or devolution regulated by the law of some part of Great Britain; and, in determining the amount or rate of duty payable in Great Britain, such property shall be disregarded.

I refer to this as "**treaty IHT exemption**".

The exemption applies to duty imposed on a death.[5] That includes the charge which applies on property in the individual's free estate, property in an estate IP trust, and property within the GWR charge on death.

The Pakistan DTA contains an amusing error. Pakistan DTA Art.V(2) provides:

> (2) Where a person at the time of his death was domiciled in some part of Pakistan and was not domiciled in some part of Great Britain, duty shall not be imposed in Great Britain on any property which for the purposes of duty passes or is deemed to pass on his death unless that property—
> (a) is situated in Pakistan [*sic*], or
> (b) passes under a disposition or devolution regulated by the law of some part of Great Britain;
> and, in determining the amount or rate of duty payable in Great Britain, property not falling within sub-para (a) or (b) shall be disregarded.

There is clearly a typographical error here and the word "Pakistan" in (a) should read "Great Britain".[6] It is considered that the error can be

5 This is stated expressly in the India, Pakistan and Italy IHT DTAs. In the France IHT DTA it is not stated expressly but is clearly implied.

6 I am grateful to Simon McKie for drawing this point to my attention.
The same mistake is made in Art V(1):

> "Where a person at the time of his death was domiciled in some part of Great Britain and was not domiciled in some part of Pakistan, duty shall not be imposed in Pakistan on any property which for the purposes of duty passes or is deemed to pass on his death unless that property—
> (a) is situated in Great Britain [*sic*], or
> (b) is settled property of which the deceased was life tenant where the settlor was domiciled in some part of Pakistan at the time that the settlement took effect, or
> (c) passes under a devolution regulated by the law of some part of Pakistan and in determining the amount or rate of duty payable in Pakistan, property falling within (a), (b), or (c) shall be disregarded.

corrected as a matter of construction under the slip rule. HMRC practice is (rightly) not to take this point.[7]

### 60.3.1 *Failed PETs*

What about the charge on a lifetime PET which becomes a chargeable transfer because the transferor dies within 7 years, known as a "**failed PET**"? The treaties must be considered separately, since the wording of each treaty IHT exemption varies.

India and Italy IHT DTAs provide exemption from duty *on the death*. In the case of a failed PET, the IHT charge is on the lifetime transfer of value. Strictly, the charge is not "on the death", even though it is only on the occasion of death that the transfer becomes chargeable. However a purposive construction is appropriate. The relief would have applied to the estate duty charge on lifetime gifts within 7 years of death. In substance the charge on failed PETs is a charge on death. This is a strong argument, for treaties are not interpreted strictly or literally. A relief for a charge "on" the death means a relief for a charge which becomes payable *at the time of* the death.[8]

In France, the IHT exemption does seem to apply to a failed PET since the words "on the death" are not present, and the point does not arise.

In Pakistan the case for IHT exemption seems somewhat weaker since it is a very loose construction to say that the charge on a failed PET is a charge on property which "passes or is deemed to pass" on a death (the terminology is from Estate Duty legislation where it had a somewhat technical meaning). Nevertheless the purposive argument is still arguable.

However there is a serious difficulty. Section 158(6) IHTA provides that the treaties have effect only in relation to IHT "chargeable by virtue of s.4 IHTA". The IHT charge on a failed PET is not under s.4, so the treaty does not have effect in relation to that charge. It is considered, therefore,

---

and, in determining the amount or rate of duty payable in Great Britain, property not falling within sub-para (a) or (b) shall be disregarded."

In some published versions the error has been corrected, but I am not aware of any authority for that. The original is accessible on *www.kessler.co.uk*.

7 Private correspondence.

8 Further support can be found from the area of transferable nil-rate bands. This relief increase the nil-rate band "for the purposes of the charge to tax *on the death* of the survivor"; see s.8A(3) IHTA. HMRC accept that this relief applies to the charge on a failed PET.

that although the terms of the treaties of France (relatively clearly), India and Italy (reasonably clearly) and Pakistan (arguably) do provide relief for a failed PET, this does not help the taxpayer, because UK domestic law (in breach of the treaty obligations) does not do so.

The conclusion is that there is no treaty relief for a failed PET. This is odd, perhaps absurd. But the treaties give rise to many other anomalies. There is no relief on ten-year charges on trusts. There is clearly no relief on a lifetime chargeable transfer which is not a PET, such as a straightforward gift to a trust.[9]

### 60.3.2 *Planning*

This raises tricky planning choices for a person who qualifies for IHT treaty exemption. One strategy is for an elderly individual *not* to make any gifts, to retain property until death. The lifetime gift may be taxable and the death estate tax free. But the risk of that approach is that by the time of the death the treaty may have been repealed. The lifetime gift may be better—if the donor survives seven, or at least three years.

Sometimes one spouse is and the other is not within the scope of the treaty. In that case inter-spouse gifts (or will trusts conferring an IP on the appropriate spouse) will bring the property within the scope of the treaty.

## 60.4 Domicile requirement of treaty IHT exemption

### 60.4.1 *Individual not UK domiciled*

A requirement for IHT exemption in the India and Pakistan DTAs is that the individual must not be domiciled in the UK. For this purpose the deemed domicile rule does not apply. Section 267(2) IHTA provides:

> Subsection (1) above [deemed domicile rule] ... shall not affect the interpretation of any such provision as is mentioned in section 158(6) above [pre-CTT treaties].

The reason is that estate duty had no equivalent of the deemed domicile rule. The subsequent application of a deemed domicile rule to the treaties

9 It appears from an incoherent passage in the IHTM para 13024 that HMRC agree.

would have raised a number of difficulties.[10] The obvious solution was to keep the treaties free from the deemed domicile rule.

IHT exemption in the Italy IHT DTA also has the requirement that the individual is not domiciled in the UK. However, this treaty has a tie-breaker for an individual who is both domiciled in the UK and treaty-domiciled in Italy. If Italy wins under the tie-breaker, it is clear that the individual is regarded as not UK domiciled. So the requirement to be non-UK domiciled adds nothing.

IHT exemption in the France IHT DTA (which also has a domicile tie-breaker) does not include the requirement that the individual is not domiciled in the UK. Since the Italy IHT DTA (1968) came well after the France IHT DTA (1963) it is strange that the Italy wording did not copy the France one. But there it is.

### 60.4.2 *Domicile in treaty state*

The requirement for IHT exemption in each treaty is that the individual must be domiciled in the treaty state. But "domicile" here has a non-standard meaning so I refer to it as "**treaty-domicile**".

### 60.4.3 *Treaty-domicile: India and Pakistan*

India IHT DTA Art. II(2) provides:

> For the purposes of the present Agreement, the question whether a deceased person was at the time of his death domiciled in any part of the territory of one of the Contracting Governments shall be determined in accordance with the law in force in that territory.

Pakistan is differently worded but the same in substance. Pakistan DTA Art. II(2) provides:

---

10 It is an interesting question whether it would have been a breach of the treaties. Even if not a technical breach, the treaty countries could reasonably have objected. Deemed domiciled individuals would have suffered double taxation. An alternative would have been to renegotiate existing treaties (introducing new rules at least for treaties which lacked a tie-breaker) but presumably that was thought to be impractical or too much trouble.

> For the purposes of the present Agreement, the question whether a deceased person was at the time of his death domiciled in any part of Great Britain or in any part of Pakistan shall be determined in accordance with the law in force in Great Britain and Pakistan respectively.

Thus the individual must be domiciled in India/Pakistan under Indian/Pakistani law. One should not assume that Indian/Pakistani law of domicile is the same as in the UK.[11]

### 60.4.4 *Treaty-domicile: Italy and France*

Italy IHT DTA Art. II(2) repeats the India IHT DTA but goes on to add a tie-breaker clause:

> (a) For the purposes of the present Convention, the question whether a deceased person was domiciled at the time of his death in any part of the territory of one of the Contracting Parties shall be determined in accordance with the law in force in that territory.
> (b) Where by reason of the provisions of the preceding paragraph a deceased person is deemed to be domiciled in the territory of each of the Contracting Parties, then this case shall be solved in accordance with the following rules:
>     (i) he shall be deemed to be domiciled in the territory of the Contracting Party in which he had a permanent home available to him at the time of his death; if he had a permanent home available to him in the territory of each of the Contracting Parties he shall be deemed to be domiciled in the territory of the Contracting Party with which his personal and economic relations were closest (centre of vital interests);

It is not often necessary to look beyond this point but, for completeness, the DTA continues.

---

11 Note the view of *Dymond's Death Duties* (15th edition 1973):

> "The Indian (and Pakistan) law (contained in the [Indian] Succession Act 1925) is basically similar to British law but somewhat less stringent in its requirements, ie. the conception of 'domicile' is a little nearer to that of 'residence'."

For further references see the Trusts Discussion Forum under the thread *Does India have a concept of 'domicile'?* (May 2011).

(ii) if the Contracting Party in whose territory he had his centre of vital interests cannot be determined, or if he had not a permanent home available to him in the territory of either Contracting Party, he shall be deemed to be domiciled in the territory of the Contracting Party in which he had an habitual abode;

(iii) if he had an habitual abode in the territory of each of the Contracting Parties, or in the territory of neither, he shall be deemed to be domiciled in that of which he was a national;

(iv) if he was a national of both territories or of neither of them, the taxation authorities of the Contracting Parties shall determine the question by mutual agreement.

The tie-breaker wording follows the tie-breaker in the OECD Model Convention definition of residence, Art. 4(2) and reference should be made to the OECD Commentary.[12] France is the same as Italy: France IHT DTA Art. II(3). A key question is what is required for a person to be domiciled in Italy under Italian law.

## 60.5 Treaty-situs

The next requirement of treaty IHT exemption is that the property must not be situate in the UK. For this purpose the DTAs contain situs rules. It is therefore necessary to distinguish between ordinary IHT situs and what I shall call "**treaty-situs**". The rules are those recommended in a report on Double Taxation prepared for the League of Nations in 1923 by Professors Bruins and Seligman and our own Sir Josiah (later, Lord) Stamp, and the report is worth reading as it give the background. Many of the rules repeat the usual IHT situs rules but some are different.

### 60.5.1 *Treaty-situs: India, Pakistan, Italy*

India IHT DTA Art. IV(1) provides:

> Subject to para (2) of this Article, where a person was at the time of his death domiciled in any part of the territory of one of the Contracting Governments, ...

12 See 5.6 (Tie-breaker tests for individuals).

This is the case we are considering.

> ... the situs of any property *which for the purposes of duty passes or is deemed to pass on his death* shall, for the purposes of the imposition of duty and of the credit to be allowed under Art. VI, be determined exclusively in accordance with the rules in Art. V of the present Agreement.

However there is a condition in Art. IV(2):

> Para (1) of this Article shall apply if, and only if, apart from the said Art. V—
> (a) duty would be imposed on the property under the law of each of the Contracting Governments; or
> (b) duty would be imposed on the property under the law of one of the Contracting Governments and would, but for some specific exemption, also be imposed thereon under the law of the other Contracting Government.

This condition will never be satisfied under the Indian treaty, since estate duty in India was repealed in 1985. (Significantly, about the same time, the Thatcher Government was drawing the teeth of CTT, though the UK did not follow India all the way to abolition.) So the treaty situs rules in the India IHT DTA will never apply.

Pakistan is the same: Pakistan IHT DTA Art. III. Pakistan's estate duty was abolished in 1979. One wonders why the treaties have survived more than three decades after losing their *raison d'être.*

Italy and France are substantially the same.[13] They omit the phrase italicised above, but those words add nothing.

The Italy treaty situs rules ceased to apply in 2001 because Italy abolished its succession duty and estate duty (*imposta sull'asse ereditario globale*) – a Berlusconi reform. However, in November 2006 the Prodi Government reintroduced a succession tax.

### 60.5.2 *Treaty-situs: France and Italy*

France retains its duty on successions on death, so the treaty situs rules are

13 Italy IHT DTA Art. III.

relevant. I here set out the rules in the French Treaty Art. 4 highlighting in italic those significantly different from IHT-situs:

The rules referred to in paragraph 1 of Article III are :

(a) land shall be deemed to be situated at the place where it is located; rights or interests (otherwise than by way of security) which constitute immovable property shall be deemed to be situated at the place where the land to which they relate is located; the question whether rights or interests constitute immovable property shall be determined in accordance with the law of the place where the land to which they relate is located;

(b) tangible movable property (other than such property for which specific provision is hereinafter made) and rights or interests (otherwise than by way of security) therein shall be deemed to be situated at the place where it is located at the time of the deceased person's death or, *if in transitu, at the place of destination*; and bank or currency notes or other forms of currency recognised as legal tender in the place of issue shall be treated as tangible movable property for the purpose of this subparagraph;

(c) debts, secured or unsecured, excluding those for which specific provision is made in this Article, *but including debentures and debenture stock issued by a company, bills of exchange, promissory notes and cheques shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(d) *securities issued by any government, county council, département, municipality or other public authority shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(e) *shares or stock in a company (including any such property held by a nominee, whether the beneficial ownership is evidenced by scrip certificates or otherwise) shall be deemed to be situated at the place where the company was incorporated*;

(f) *moneys payable under a policy of assurance or insurance shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(g) an interest in a partnership, which term includes a société en nom collectif, a société en commandite simple and a société civile under French law, shall be deemed to be situated at the place where the business is principally carried on; and in the case of a société civile immobilière this shall be where the land developed in accordance with the objects of the société is located;

(h) goodwill as a trade, business or professional asset shall be deemed to be situated at the place where the trade, business or profession to which it pertains is carried on;

(i) ships and aircraft and shares thereof shall be deemed to be situated at the place of registration of the ship or aircraft;

(j) patents, trade marks, designs, copyright, and rights or licences to use any patent, trade mark, design or copyrighted material shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death;

(k) *rights or causes of action ex-delicto*[14] *surviving for the benefit of the estate of a deceased person shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(l) *judgment debts shall be deemed to be situated at the place where the deceased person was domiciled at the time of his death*;

(m) *any other right or interest shall be deemed to be situated at the place determined by the law in force in the territory of the Contracting Party where the deceased person was not domiciled at the date of his death.*

## 60.6 Proper law

Treaty IHT exemption in India, Pakistan and France does not apply to property which passes under a disposition or devolution regulated by the law of some part of Great Britain.

Italy is not quite the same. The restriction is that the exemption does not apply to property passing under a *settlement* with a UK law (so the exemption could apply in Italy to property passing under a UK law will, but not elsewhere).

This follows estate duty principles, where the territorial limits of the tax depended partly on domicile and situs (as IHT) but also on whether the proper law of the disposition or devolution under which the property passes was a law of the UK. The requirement makes little sense for the IHT regime, but logic is not to be expected when estate duty treaties are left unamended to apply to IHT.

This is a complex topic, with many cases to consider. For a discussion, see the scholarly *Dymond's Death Duties*, (15th edition, 1973) pp 1286–1312 and Parkinson, "A disposition or devolution regulated by the law of some part of Great Britain: the Proviso to the Limitation of Taxing Rights in the IHT Treateies with France, India and Pakistan" [2011] PCB 126.

Where relief is lost because an English law will applies, the problem could in principle be resolved by an IoV, though the drafting would require some care.

## 60.7 Transferable nil rate bands and IHT DT reliefs

Section 8A IHTA provides

14 ie torts, not contractual rights.

**8A Transfer of unused nil-rate band between spouses and civil partners**
(1) This section applies where—
(a) immediately before the death of a person (a "deceased person"), the deceased person had a spouse or civil partner ("the survivor"), and
(b) the deceased person had unused nil-rate band on death.

Section 8A(2) IHTA defines "unused nil rate band on death":

> A person has unused nil-rate band on death if—
> M > VT
> where—
> M is the maximum amount that could be transferred by a chargeable transfer made (under section 4 above) on the person's death if it were to be wholly chargeable to tax at the rate of nil per cent. (assuming, if necessary, that the value of the person's estate were sufficient but otherwise having regard to the circumstances of the person); and
> VT is the value actually transferred by the chargeable transfer so made (or nil if no chargeable transfer is so made).

The availability of a transferable nil rate band depends on whether there was a chargeable transfer on the death of the first spouse. Assuming there would be a chargeable transfer (but for IHT DTA relief) does the availability of DTA relief alter the position? The IHTM para 43025 provides:

> **Transferable Nil Rate Band: interaction of ability to transfer unused nil rate band with double taxation agreements, double taxation relief and successive charges relief** [August 2009]
> The extent to which an estate is chargeable to tax may be governed by a double taxation agreement [IHTM27161], or a liability to tax may be reduced to nil by double taxation relief [IHTM27181] or successive charges relief [IHTM22041].
> [1] Where, under the terms of a double taxation agreement, an asset is not subject to tax, then if this means that the chargeable estate is below the nil rate band, the amount unused is available for transfer.
> [2] However, where there is a liability to tax that is reduced to nil by either double taxation relief or successive charges relief, the nil rate band remains fully used. We do not repay any "excess" relief and there is no provision to convert "excess" relief into unused nil rate band.

Unilateral IHT credit relief takes the form of a credit against IHT. It falls within [2]. Where that relief applies there is still a chargeable transfer so that transferrable NRB relief does not become available.

The India France and Pakistan IHT DTAs provide that "duty shall not be imposed" on certain property. The USA DTA provides that certain property "shall not be taxable" in the UK. These reliefs fall within [1]. It is not obvious that this prevents there being a chargeable transfer but it might be said to follow from a commonsense reading. Treaties are not to be construed technically. HMRC read the legislation in this way, so that the transferable nil rate band is available to the surviving spouse.

The Italy IHT DTA provides that "No account shall be taken, in determining the amount or rate of duty" on death, in relation to certain property. It is considered that the effect is the same as the other pre-CTT DTAs.

## 60.8 Claims for treaty IHT exemption

A claim is required for foreign IHT credit relief or for a refund of tax.[15] There is no requirement to make a formal claim for treaty IHT exemption. However if an IHT account is in principle required on a death,[16] a treaty saying that tax "shall not be imposed" or property "shall not be taxable" (as most of the pre-CTT DTAs or the US IHT DTAs) does not override this requirement. The same applies to the differently worded exemption in the Italy IHT DTA ("no account shall be taken in determining the amount or rate of duty...").

Similarly, for a deemed domiciled individual, the US treaty does not override the duty to disclose a lifetime chargeable transfer or the making of a non-resident settlement.[17]

So the usual returns should be made with a claim for DTA relief.

## 60.9 Deductions

Article V(1) Italy IHT DTA provides:

> In determining the amount on which duty is to be computed, permitted

15 See 63.9 (Claims for foreign IHT credit relief).
16 See 75.10 (Reporting on death of foreign domiciled individual).
17 See 75.9 (IHT reporting requirement on creation of settlement).

> deductions shall be allowed in accordance with the law in force in the territory in which the duty is imposed.

This seems unnecessary. Perhaps there were Estate Duty reasons for it? I would be grateful to any reader who could explain.

Identical wording is found in the Pakistan Treaty art 5(3) and also in some post-CTT DTAs, eg USA IHT art.8(1). There is no equivalent in other treaties but the omission does not matter.

CHAPTER SIXTY ONE

# IHT DTA: USA

## 61.1 USA IHT treaty – Introduction

This chapter considers the USA IHT Treaty.[1]

For some reason DTAs do not have short titles. I use the expression "**USA IHT DTA**" (or, for short, just DTA) to refer to the DTA dated 19 October 1978 officially called "the Convention between the Government of the USA and the Government of the UK for the avoidance of double taxation and the prevention of fiscal evasion with respect to taxes on estates of deceased persons and on gifts".

I comment only on the UK aspects of the treaty. Separate US advice will be needed in any case where the treaty applies.

### 61.1.1 *Cross references*

Issues and wording which the USA IHT DTA has in common with other treaties are discussed elsewhere. For credit for US tax, see 63.8 (USA DTA: Credit for foreign IHT). For the interaction of the USA IHT DTA and transferable nil rate bands, see 60.7 (Transferable nil rate bands and IHT DT reliefs). For claims and disclosure issues see 60.8 (Claims for treaty IHT exemption) and 63.9 (Claims for foreign IHT credit relief).

## 61.2 Scope

Article 1 USA IHT DTA provides:

> This Convention shall apply to any person who is within the scope of a tax which is the subject of this Convention.

1 The text is accessible on *http://uniset.ca/misc/us-uk_esttax.html*

Thus the DTA applies to trustees as well as to individuals, even if the trustees are not themselves US treaty-domiciled.

## 61.3 Taxes covered

Article 2 USA IHT DTA provides:

> (1) The existing taxes to which this Convention shall apply are:
> (a) in the US: the Federal gift tax and the Federal estate tax, including the tax on generation-skipping transfers; and
> (b) in the UK: the capital transfer tax.
> (2) This Convention shall also apply to any identical or substantially similar taxes which are imposed by a Contracting State after the date of signature of the Convention in addition to, or in place of, the existing taxes. The competent authorities of the Contracting States shall notify each other of any changes which have been made in their respective taxation laws.

The DTA applies to IHT which is "substantially similar" to CTT.

### 61.3.1 *"Tax"*

Article 3(f) USA IHT DTA provides:

> the term "tax" means:
> (i) the Federal gift tax or the Federal estate tax, including the tax on generation-skipping transfers, imposed in the US, or
> (ii) the capital transfer tax imposed in the UK, or
> (iii) any other tax imposed by a Contracting State to which this Convention applies by virtue of the provisions of para (2) of Article 2, as the context requires.

## 61.4 Definitions

The DTA provides commonsense definitions of the following terms, which are not set out here: US; UK; Enterprise; Competent Authority; Contracting State.

### 61.4.1 *"National"*

Article 3(e) USA IHT DTA provides:

> the term "nationals" means:
> (i) in relation to the US, US citizens, and
> (ii) in relation to the UK any citizen of the UK and Colonies, or any British subject not possessing that citizenship or the citizenship of any other Commonwealth country or territory, provided in either case he had the right of abode in the UK at the time of the death or a transfer.

### 61.4.2 *"Decedent"*

The DTA uses the term "decedent" which is an Americanism for "deceased".

### 61.4.3 *Undefined terms*

Article 3(2) USA IHT DTA provides:

> As regards the application of the Convention by a Contracting State, any term not otherwise defined shall, unless the context otherwise requires and subject to the provisions of Article 11 (Mutual Agreement Procedure), have the meaning which it has under the laws of that Contracting State relating to the taxes which are the subject of the Convention.

## 61.5 Treaty-domicile

For present purposes there are three types of domicile:
(1) domicile in the ordinary UK law sense (**"UK law domicile"**);
(2) deemed UK domicile for IHT (**"deemed UK domicile"**);
(3) domicile for the purposes of the treaty (**"treaty-domicile"**).
The definition of treaty-domicile is distinctly non-standard. Article 4(1) USA IHT DTA provides:

> For the purposes of this Convention an individual was domiciled:
> (a) in the US:

> [i] if he was a resident (domiciliary) thereof or
> [ii] if he was a national thereof and had been a resident (domiciliary) thereof at any time during the preceding three years

The definition of resident (domiciliary) is crucial: this is a matter of US law.[2]

Article 4(1) USA IHT DTA provides:

> For the purposes of this Convention an individual was domiciled: ...
> (b) in the UK:
> [i] if he was domiciled in the UK in accordance with the law of the UK [ie if UK law domiciled]
> [ii] or is treated as so domiciled for the purpose of a tax which is the subject of this Convention [i.e. if deemed UK domiciled].

Next come a series of tie-breakers to deal with persons who under (1)(a) and (b) would be treaty-domiciled in both jurisdictions:

> (2) Where by reason of the provisions of para (1) an individual was at any time domiciled in both Contracting States, and
> (a) was a national of the UK but not of the US, and
> (b) had not been resident in the US for Federal income tax purposes in seven or more of the ten taxable years ending with the year in which that time falls,
> he shall be deemed to be domiciled in the UK at that time.
> (3) Where by reason of the provisions of para (1) an individual was at any time domiciled in both Contracting States, and
> (a) was a national of the US but not of the UK, and
> (b) had not been resident in the UK in seven or more of the ten income tax years of assessment ending with the year in which that time falls,
> he shall be deemed to be domiciled in the US at that time.
> For the purposes of this paragraph, the question of whether a person was so resident shall be determined as for income tax purposes but without regard to any dwelling-house available to him in the UK for his use.

2 The term "resident" for estate tax is defined in Treasury Reg: 20.0-1(b). For gift tax see Treasury Reg: 25.2501-1(b).

The last sentence is based on wording formerly in the IHT deemed domicile rule, see 52.2.5 (Meaning of "residence" for 17-year residence rule).

Where these tie-breakers fail to break the tie, we turn to Art. 4(4):

> Where by reason of the provisions of para (1) an individual was domiciled in both Contracting States, then, subject to the provisions of paras (2) and (3), his status shall be determined as follows:
> (a) the individual shall be deemed to be domiciled in the Contracting State in which he had a permanent home available to him. If he had a permanent home available to him in both Contracting States, or in neither Contracting State, he shall be deemed to be domiciled in the Contracting State with which his personal and economic relations were closest (centre of vital interests);
> (b) if the Contracting State in which the individual's centre of vital interests was located cannot be determined, he shall be deemed to be domiciled in the Contracting State in which he had an habitual abode;
> (c) if the individual had an habitual abode in both Contracting States or in neither of them, he shall be deemed to be domiciled in the Contracting State of which he was a national; and
> (d) if the individual was a national of both Contracting States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

This is the standard OECD Model wording: see 5.6 (Tie-breaker tests for individuals).

### 61.5.1 *Resident of possession of the US*

Article 5(5) USA IHT DTA relates to nationality and treaty-domicile:

> An individual who was a resident (domiciliary) of a possession of the US and who became a citizen of the US solely by reason of his
> (a) being a citizen of such possession, or
> (b) birth or residence within such possession,
> shall be considered as neither domiciled in nor a national of the US for the purposes of this Convention.

I understand that the possessions of the US are mainly uninhabited islands[3] so few (if any) individuals are affected by this provision.

## 61.6 IHT exemptions for individuals

Article 5 USA IHT DTA provides two exemptions for individuals. Article 5(1) provides:

> (a) [i] Subject to the provisions of Articles 6 (Immovable Property (Real Property)) and 7 (Business Property of a Permanent Establishment and Assets Pertaining to a Fixed Base Used for the Performance of Independent Personal Services) and the following paragraphs of this Article,
> [ii] if the decedent or transferor was domiciled in one of the Contracting States at the time of the death or transfer, property shall not be taxable in the other State.
> (b) Sub-para (a) shall not apply if at the time of the death or transfer the decedent or transferor was a national of that other State.

This can confer IHT exemption. To qualify for IHT exemption under Art. 5(1) the individual must be:
(1) treaty-domiciled in the USA and
(2) not a UK national.
Article 5(2) USA IHT DTA provides:

> Subject to the provisions of the said Articles 6 and 7, if at the time of the death or transfer the decedent or transferor
> [a] was domiciled in neither Contracting State and
> [b] was a national of one Contracting State (but not of both),
> property which is taxable in the Contracting State of which he was a national shall not be taxable in the other Contracting State.

Can this confer IHT exemption? In order to need and qualify for IHT exemption under art. 5(2):
(1) the individual must be:
 (a) treaty-domiciled in neither state (so in particular not UK domiciled or deemed domiciled) and

3 Howland Island; Baker Island; Jarvis Island; Navassa Island; Johnston Atoll; Midway Islands; Palmyra Atoll; Wake Islands; Guantanamo Bay; Kingman Reef.

(b) a US national and not a UK national

(2) property must be taxable in the UK (or no relief is needed) so it must be UK situate.

(3) the property must be taxable in the USA.

This is just possible. Condition (1) is possible because a US national is not necessarily treaty-domiciled in the USA. If such an individual held UK situate property, it would be exempt from IHT under Art. 5(2) provided it was taxable in the USA. In practice though this will be rare.

These two exemptions applies to charges on death and on lifetime gifts. The exemptions even apply to UK situate property (so long as the property is not land or a permanent establishment).

## 61.7 IHT exemption for trusts

Article 5(4) USA IHT DTA provides:

> [a] Paras (1) and (2) shall not apply in the UK to property comprised in a settlement;
>
> [b] but, subject to the provisions of the said Articles 6 and 7, tax shall not be imposed in the UK on such property if at the time when the settlement was made the settlor was domiciled in the US and was not a national of the UK.

Article 5(4)[b] provides exemption from:

(1) IHT 10 year and exit charges;

(2) the charge on the death of an individual with an estate IP;

(3) GWR lifetime and death charges.

The exemption applies to UK situate property (so long as the property is not land or a permanent establishment).

It is an interesting question whether a common form grantor trust is a settlement for this purpose: it is (I think) a settlement for US purposes but not for IHT purposes.[4] It is also an interesting question whether or to what extent UK rules determining when a settlement is made (and who is the settlor) apply for the purposes of this relief.

---

4 See 72.11 (American revocable trusts (grantor trusts)).

## 61.8 Requirement to pay foreign tax

Article 5(5) USA IHT DTA provides:

> If by reason of the preceding paragraphs of this Article
> [a] any property would be taxable only in one Contracting State and
> [b] tax, though chargeable, is not paid (otherwise than as a result of a specific exemption, deduction, exclusion, credit or allowance) in that State,
> tax may be imposed by reference to that property in the other Contracting State notwithstanding those paragraphs.

The IHT Manual provides:

> **27177. Certification of disclosure and tax enforcement procedure with the USA** [October 2007]
> Before we give up our rights to tax property in accordance with Article 5(1) of the DTC with the USA, we require the US authorities to certify that disclosure has been made to them and that payment of any appropriate tax has been made or will be enforced. This is because Article 5(5) of the DTC withdraws this restriction and allows us to tax the property if the USA is unable to enforce its right to tax. Conversely, we also need to certify to the above if the US authorities must give up their right to tax property.
> Cases in which para (1) operates to exclude some UK property from the charge to IHT and which are, or but for that exclusion would be, taxpaying should not be closed until the US authorities have certified on Form 742 that disclosure has been made to them and that payment of any appropriate tax has been made or will be enforced.
> This requirement should be explained to the taxpayer and 2 prints of Form 742 issued to them. Attention should be directed to the appropriate paragraphs of the form, which the taxpayer is required to complete. In particular where by reason of the Convention the UK is giving up its taxing rights, only para 1 is in point, and paras 2 to 7 are not appropriate. On receipt of a correct and duly certified form the case may be closed: any error or difficulty should be referred to TG.
> Where the USA gives up the right to tax property under Article 5(1), US form 706 CE will be forwarded to this Office in duplicate for certification.
> After checking (it is important that the forms themselves should not be marked in any way) they and the file should be sent with a note of any error or omission to TG for the issue of the appropriate certificate.

## 61.9 Dual-situate assets

Article 5(6) USA IHT DTA provides:

> If at the time of the death or transfer
> [a] the decedent or transferor was domiciled in neither Contracting State and
> [b] each State would regard any property as situated in its territory and
> [c] in consequence tax would be imposed in both States,
> the competent authorities of the Contracting States shall determine the situs of the property by mutual agreement.

This is not relevant if IHT exemption or US tax exemption applies. It is a different technique from dealing with the problem of dual-situate assets from that adopted in the pre-CTT treaties, which set out their own treaty-situs rules (as did the previous US estate duty treaty.)

## 61.10 Immovable property

Article 6 USA IHT DTA provides:

> (1) Immovable property (real property) may be taxed in the Contracting State in which such property is situated.
> (2) The term "immovable property" shall be defined in accordance with the law of the Contracting State in which the property in question is situated, provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships, boats, and aircraft shall not be regarded as immovable property.
> (3) The provisions of paras (1) and (2) shall also apply to immovable property of an enterprise and to immovable property used for the performance of independent personal services.

This is what one would expect.

## 61.11 Business property

Article 7(1) USA IHT DTA provides:

> Except for assets referred to in Article 6 (Immovable Property (Real Property)) assets forming part of the business property of a permanent establishment of an enterprise may be taxed in the Contracting State in which the permanent establishment is situated.

I do not set out the lengthy provisions relating to permanent establishment here, since this will rarely arise.

## 61.12 Deductions

On this topic, see 60.9 (deductions).

## 61.13 Extension of IHT spouse exemption

Under domestic IHT law, the usual IHT spouse exemption is restricted when the transferor is UK domiciled and the spouse is foreign domiciled. Article 8 restricts this restriction. There are separate provisions for absolute transfers and for transfers to a trust under which the spouse has an IP. There is no relief for the situation where H has an interest in possession and on H's death W acquires an interest in possession (where the IHT spouse exemption is sometimes available under s.49D IHTA 1984).

Civil partners are not mentioned (of course). One might perhaps construe spouse widely to include "civil partner" but only if US tax law changes to treat civil partners exactly like spouses (which seems unlikely).

### 61.13.1 *Relief for absolute inter-spouse transfers*

Article 8(3) USA IHT DTA provides:

> Property which passes to the spouse from a decedent or transferor who was domiciled in or a national of the US and which may be taxed in the UK shall, where
> (a) the transferor's spouse was not domiciled in the UK but the transfer would have been wholly exempt had the spouse been so domiciled, and
> (b) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention,
>
> be exempt from tax in the UK to the extent of 50 per cent of the value transferred, calculated as a value on which no tax is payable and after

taking account of all exemptions except those for transfers between spouses.

In order for this to be needed and to apply the following conditions must be satisfied:
The transferor is:
(a) Treaty-domiciled in the US or a US national.
(b) UK law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under IHT domestic law).
The transferee (spouse) is:
(a) not treaty-domiciled in the UK.-
(b) not UK law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under IHT domestic law).
This relief applies on death and on lifetime transfers.

61.13.2 *Transfer to settlement under which spouse has IP*

Article 8(4) USA IHT DTA provides:

> (a) Property which on the death of a decedent domiciled in the UK became comprised in a settlement shall, if the personal representatives and the trustees of every settlement in which the decedent had an interest in possession immediately before death so elect and subject to sub-para (b), be exempt from tax in the UK to the extent of 50 per cent of the value transferred (calculated as in para (3)) on the death of the decedent if:
> (i) under the settlement, the spouse of the decedent was entitled to an immediate interest in possession,
> (ii) the spouse was domiciled in or a national of the US,
> (iii) the transfer would have been wholly exempt had the spouse been domiciled in the UK, and
> (iv) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention.
> (b) Where the spouse of the decedent becomes absolutely and indefeasibly entitled to any of the settled property at any time after the decedent's death, the election shall, as regards that property, be deemed never to have been made and tax shall be payable as if on the death such property had been given to the spouse absolutely and indefeasibly.

In order for this to be needed and to apply the following conditions must be satisfied:

The transferor is:

(a) Treaty-domiciled in the UK.
(b) UK law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under domestic law).

The transferee (spouse) is:

(a) treaty-domiciled in the US or a national of the US.
(b) not UK law domiciled or deemed UK domiciled (or else the IHT spouse exemption is not restricted under domestic law).

In addition:

(1) An election is required.
(2) The spouse must be entitled to an immediate IP (this probably rules out relying on s.144 IHTA (discretionary will trusts)).
(3) This relief only applies on the death of the transferor.

## 61.14 Non-discrimination

Article 10(1)(a) USA IHT DTA provides:

> Subject to the provisions of sub-para (b), nationals of a Contracting State shall not be subjected in the other State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which nationals of that other State in the same circumstances are or may be subjected.

This would extend IHT Agricultural property relief to US agricultural property, which could be relevant to companies holding agricultural land but the point will not often arise.

Article 10 continues:

> (2) The taxation on a permanent establishment which an enterprise of a Contracting State has in the other Contracting State shall not be less favourably levied in that other State than the taxation levied on enterprises of that other State carrying on the same activities.
> (3) Nothing contained in this Article shall be construed as obliging either Contracting State to grant to individuals not domiciled in that Contracting State any personal allowances, reliefs and reductions for taxation purposes which are granted to individuals so domiciled.
> (4) Enterprises of a Contracting State, the capital of which is wholly or

partly owned or controlled, directly or indirectly, by one or more residents of the other Contracting State, shall not be subjected in the first-mentioned Contracting State to any taxation or any requirement connected therewith which is other or more burdensome than the taxation and connected requirements to which other similar enterprises of the first-mentioned State are or may be subjected.
(5) The provisions of this Article shall apply to taxes which are the subject of this Convention.

## 61.15 Other articles

The following articles of the USA IHT DTA are not discussed here:

Article 11: mutual agreement procedure.
Article 12: exchange of information.
Article 13: diplomatic and consular officials.
Article 14: entry into force.
Article 15: termination.

CHAPTER SIXTY TWO

# IHT DTA: SWITZERLAND

## 62.1 Swiss IHT treaty – Introduction

This chapter considers the Swiss IHT Treaty[1] found in S.I. 1994 No 3214.

For some reason DTAs do not have short titles. I use the expression "**Swiss IHT DTA**" (or, for short, just DTA) to refer to the DTA called "the Convention between the United Kingdom of Great Britain and Northern Ireland and the Swiss Federation for the avoidance of double taxation with respect to taxes on estates and inheritances".

I comment only on the UK (IHT) aspects of the treaty. Separate Swiss advice will be needed in any case where the treaty applies.

For the interaction of the DTA and transferable nil rate bands, see 60.7 (Transferable nil rate bands and IHT DT reliefs). For claims and disclosure issues see 60.8 (Claims for treaty IHT exemption) and 63.9 (Claims for foreign IHT credit relief).

## 62.2 Scope

Article 1 Swiss IHT DTA provides:

> This Convention shall apply:
> (a) to estates and inheritances where the deceased was domiciled, at the time of his death, in one or both of the Contracting States; and
> (b) to property comprised in a settlement made by a person who was domiciled, at the time the settlement was made, in one or both of the Contracting States.

---

1 Accessible on *http://www.legislation.gov.uk/uksi/1994/3214/schedule/made*

## 62.3 Taxes covered

Article 2(1) Swiss IHT DTA provides:

> (1) The existing taxes to which this Convention shall apply are:
> (a) in the UK, the inheritance tax, insofar as it applies to the estate of a deceased person (hereinafter referred to as "UK tax");
> (b) in Switzerland, the cantonal and communal taxes imposed on estates and inheritances (hereinafter referred to as "Swiss tax").

Thus there is no relief for IHT on lifetime gifts or for 10 year and exit charges on trusts. There is relief for trusts conferring an estate interest in possession.

## 62.4 Definitions

The DTA provides commonsense definitions of the following terms, which are not set out here: UK; Switzerland; Contracting State; Enterprise; Competent Authority; tax.

### 62.4.1 *"National"*

Article 3(g) Swiss IHT DTA provides:

> (g) the term "national" means:
> (i) in relation to the UK, any British citizen or any British subject not possessing the citizenship of any other Commonwealth country or territory, provided he has the right of abode in the UK and any legal person, partnership, association or other entity deriving its status as such from the law in force in the UK;
> (ii) in relation to Switzerland, any Swiss citizen and any legal person, partnership, association or other entity deriving its status as such from the law in force in Switzerland;

### 62.4.2 *Undefined terms*

Article 3(2) Swiss IHT DTA provides:

> As regards the application of the Convention by a Contracting State, any

term not defined therein shall, unless the context otherwise requires, have the meaning which it has under the law of that State concerning the taxes to which the Convention applies.

## 62.5 Treaty-domicile

The definition of treaty-domicile is non-standard. Article 4(1) Swiss IHT DTA provides:

> For the purposes of this Convention, a deceased person was domiciled:
> (a) in the UK if he was domiciled in the UK in accordance with the law of the UK or is treated as so domiciled for the purposes of a tax which is the subject of the Convention;

That applies to a person who is UK law domiciled and one who is deemed UK domiciled. The treaty continues:

> For the purposes of this Convention, a deceased person was domiciled:
> (b) in Switzerland if he was domiciled or was resident in Switzerland in accordance with the law of Switzerland or if he was a Swiss national and Swiss civil law requires his succession to be ruled in Switzerland.

I assume this means:

> For the purposes of this Convention, a deceased person was domiciled:
> (b) in Switzerland if
> [i] he was domiciled *in Switzerland in accordance with the law of Switzerland* or
> [ii] was resident in Switzerland in accordance with the law of Switzerland or
> [iii] if he was a Swiss national and Swiss civil law requires his succession to be ruled in Switzerland.

That is, the words "and Swiss civil law requires his succession to be ruled in Switzerland" govern only [iii].

The treaty adds:

> However, a deceased person shall be deemed not to be domiciled in one of the States if that State imposes tax only by reference to property situated in that State.

I do not see how this could apply, but it does not matter.

The definition of domiciled/resident in Switzerland in accordance with the law of Switzerland is crucial: this is a matter of Swiss law. The 1993 Protocol clarifies which Swiss law applies.[2]

Next come a series of tie-breakers to deal with persons who under (1) would be domiciled in both jurisdictions:

> (2) Where by reason of the provisions of paragraph (1) of this Article a deceased person was domiciled in both States, then, subject to the provisions of the attached Protocol, his status shall be determined as follows:
> (a) he shall be deemed to have been domiciled in the State in which he had a permanent home available to him; if he had a permanent home available to him in both States, he shall be deemed to have been domiciled in the State with which his personal and economic relations were closer (centre of vital interests);
> (b) if the State in which he had his centre of vital interests cannot be determined, or if he did not have a permanent home available to him in either State, he shall be deemed to have been domiciled in the State in which he had an habitual abode;
> (c) if he had an habitual abode in both States or in neither of them, he shall be deemed to have been domiciled in the State of which he was a national;
> (d) if he was a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

This is standard OECD Model wording: see 5.6 (Tie-breaker tests for individuals).

The 1993 Protocol provides:

> (1) With reference to Article 4:
> An individual who was a national of one of the Contracting States without being a national of the other Contracting State and who was domiciled in the State of which he was a national immediately before coming to the other State shall not be domiciled in the other State for the purposes of this Convention if:
> (a) he was temporarily present in that other State by reason only of his

2 It provides: "The reference to Swiss civil law concerns chapter 6 of the loi fédérale sur le droit international privé of 18th December 1987."

employment or was a spouse or other dependent of a person temporarily in that other State for such purpose; and
(b) that individual had retained the domicile of the State of which he was a national; and
(c) that individual had no intention of becoming a permanent resident of the other Contracting State.

This could help a Swiss national who is a long term employee in the UK as it could confer better treaty relief even after they become deemed UK domiciled, but that will not often arise. It could similarly hinder a UK national who is an employee in Switzerland as it could prevent them claiming relief.

### 62.5.1 *Types of domicile*

When dealing with treaties it is always necessary to distinguish between three different concepts of domicile:
(1) domicile in the domestic English law sense (**"UK law domicile"**);
(2) deemed UK domicile for IHT ("**deemed UK domicile**");
(3) domicile for the purposes of the treaty ("**treaty-domicile**").
The Swiss IHT DTA is unusual as it distinguishes between persons:
(1) domiciled in UK/Switzerland under paragraph (1) of Article 4 "solely in one of the Contracting States" whom I call **"solely UK/Swiss domiciled"**. Someone who is "solely Swiss domiciled" cannot be UK law domiciled or deemed UK domiciled for IHT purposes.
(2) domiciled in UK/Switzerland under paragraph (2) of Article 4 whom I call **"tiebreaker UK/Swiss domiciled"**. Someone who is tiebreaker Swiss domiciled is UK law domiciled or deemed UK domiciled but treaty-domiciled in Switzerland because of the tiebreaker clause in the treaty.

## 62.6 IHT exemption

There are special rules for immovable property and permanent establishments (articles 5 and 6 discussed below ) and ships and aircraft (article 7 not discussed here.)

Subject to that, Article 8 Swiss IHT DTA provides various exemptions for individuals.

### 62.6.1 *UK situate property of solely Swiss domiciliary*

Article 8(1) provides:

> (1) Subject to the following provisions of this Convention:
> (a) property not dealt with in Articles 5, 6 and 7 which is situated in either Contracting State and forms part of the estate of a person:
> (i) domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States shall, subject to paragraph (2) of this Article, be taxable only in that latter Contracting State;

Thus UK situate property of a solely Swiss domiciliary qualifies for treaty exemption on death even though not of course excluded property. To this rule there are four exceptions. Firstly property covered by articles 5, 6, 7 (land, PEs ships and aircraft). Secondly, shares in UK incorporated companies, as article 8(2) provides:

> Shares in a company incorporated in the UK which form part of the estate of a person domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in Switzerland at the time of his death may also be taxed in the UK.

There is not much left for this treaty exemption to apply to, though it could be relevant (eg to UK situate debentures). From a planning point of view it is not generally important since it is usually possible for a solely Swiss domiciliary to avoid IHT by avoiding UK situate property but it could be useful for, say, UK situate chattels.

### 62.6.2 *Swiss situate property of tiebreaker Swiss domiciliary*

Article 8(1) provides:

> (1) Subject to the following provisions of this Convention:
> (a) property not dealt with in Articles 5, 6 and 7 which is situated in either Contracting State and forms part of the estate of a person ...
> (ii) domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States shall, subject to paragraph (3) of this Article, be taxable only in the Contracting State in which it is situated;

Thus in principle Swiss situate property of a tiebreaker Swiss domiciliary qualifies for treaty IHT exemption on death even though not of course excluded property (because the individual is UK law domiciled or deemed domiciled for IHT purposes). However five wide exceptions greatly restrict the scope of the rule. The first four are the exceptions mentioned above: property covered by articles 5, 6, 7 and 8(2) (UK land, PEs, ships and aircraft, and shares in UK companies.) Lastly, article 8(3) provides:

> Any property which is situated in Switzerland and which would be taxable only in Switzerland under paragraph (1)(a)(ii) of this Article may also be taxed in the UK if the deceased was:
> (a) by virtue of the provisions of paragraph (2) of Article 4 domiciled in the UK at the time of his death; or
> (b) by virtue of those provisions domiciled in Switzerland at the time of his death but:
> (i) had been domiciled [ie treaty-domiciled] in the UK at any time within the five years preceding his death; and
> (ii) was at that time a national of the UK without being a national of Switzerland.

Thus a person who is a UK national[3] cannot take advantage of this treaty IHT exemption until they have been treaty-domiciled in Switzerland for 5 years. A UK national cannot avoid IHT by becoming treaty-domiciled in Switzerland shortly before death. However a non-UK national who is UK law domiciled or deemed domiciled could in principle do so.

### 62.6.3 *Property outside UK and Switzerland*

I refer to property outside the UK and Switzerland as **"third country property."**
Article 8(1)(b) provides

> (1) Subject to the following provisions of this Convention:
> (b) property not dealt with in Articles 5, 6 and 7 which is not situated in either Contracting State and forms part of the estate of a person:
> (i) domiciled by virtue of the provisions of paragraph (1) of Article 4 solely in one of the Contracting States shall be taxable only in that Contracting State;

3 Unless also a Swiss national, ie a dual national.

(ii) domiciled by virtue of the provisions of paragraph (1) of Article 4 in both Contracting States shall, subject to paragraph (4) of this Article, be taxable only in the Contracting State in which, under paragraph (2) of Article 4, the deceased was domiciled at the time of his death.

Art.8(1)(b)(i) is not relevant for IHT since non UK situate property of a solely Swiss domiciliary is excluded property in any event. However art.8(1)(b)(ii) is important.

However in principle third country property of a tiebreaker Swiss domiciliary qualifies for treaty IHT exemption on death even though not of course excluded property (because the individual is UK law domiciled or deemed domiciled for IHT purposes). However five wide exceptions greatly restrict the scope of the rule. The first four are the exceptions mentioned above: property covered by articles 5, 6, 7 and 8(2) (UK land, PEs, ships and aircraft, and shares in UK companies.) Lastly, article 8(4) provides a rule equivalent to article 8(3):

(4) Any property which is not situated in either Contracting State and which would be taxable only in Switzerland under paragraph (1)(b)(ii) of this Article may also be taxed in the UK if the deceased:
(a) had been domiciled in the UK at any time within the five years preceding his death; and
(b) was at that time a national of the UK without being a national of Switzerland.

Thus a person who is a UK national[4] cannot take advantage of this treaty IHT exemption until they have been treaty-domiciled in Switzerland for 5 years. A UK national cannot avoid IHT by becoming treaty-domiciled in Switzerland shortly before death. However a non-UK national who is UK law domiciled or deemed domiciled could in principle do so.

### 62.6.4 *Situs rule*

The 1993 Protocol provides:

(3) With reference to Article 8:

4 Unless also a Swiss national, ie a dual national.

> The situs of any property dealt with in that Article shall be determined by the law of the UK in effect at the date of entry into force of this Convention.

## 62.7 Extension of IHT spouse exemption

Under domestic IHT law, the usual IHT spouse exemption is restricted when the transferor is UK domiciled and the spouse is foreign domiciled. Article 10(2) restricts this restriction:

> (2) Property which passes to the spouse from a deceased person who was domiciled in or a national of Switzerland and which may be taxed in the UK shall, where:
> (a) the spouse was not domiciled in the UK but the transfer would have been wholly exempt had the spouse been so domiciled, and
> (b) a greater exemption for transfers between spouses would not have been given under the law of the UK apart from this Convention,
> be exempt from tax in the UK to the extent of 50 per cent of the value transferred, calculated as a value on which no tax is payable and after taking account of all exemptions except those for transfers between spouses.

Civil partners are not mentioned (as the treaty was made before the introduction of civil partnerships). One might construe spouse widely to include "civil partner" particularly if Swiss tax law treats civil partners like spouses.

## 62.8 Immovable property

Article 5 Swiss IHT DTA provides:

> (1) Immovable property which forms part of the estate of a person domiciled in a Contracting State and which is situated in the other Contracting State may be taxed in that other State.
> (2)The term "immovable property" shall have the meaning which it has under the law of the Contracting State in which the property in question is situated provided always that debts secured by mortgage or otherwise shall not be regarded as immovable property. The term shall in any case include property accessory to immovable property, livestock and equipment used in agriculture and forestry, rights to which the provisions of general law respecting landed property apply, an interest

> in the proceeds of sale of land which is held on trust for sale, usufruct of immovable property and rights to variable or fixed payments as consideration for the working of, or the right to work, mineral deposits, sources and other natural resources; ships and aircraft shall not be regarded as immovable property.
> (3) The provisions of paragraphs (1) and (2) of this Article shall also apply to immovable property of an enterprise and to immovable property used for the performance of professional services or other activities of an independent character.

This is fairly standard form.

## 62.9 Business property

Article 6(1) USA IHT DTA provides:

> (1) Except for assets referred to in Articles 5 and 7 and in paragraph (2) of Article 8, movable property of an enterprise which forms part of the estate of a person domiciled in a Contracting State which is the business property of a permanent establishment situated in the other Contracting State, may be taxed in that other State.

This is standard form. I do not set out the lengthy provisions relating to permanent establishment here, since this will rarely arise.

## 62.10 Other articles

The following articles of the Swiss IHT DTA are standard forms and not discussed here:

Article 11: non-discrimination
Article 12: mutual agreement procedure.
Article 13: exchange of information.
Article 14: diplomatic and consular officials.
Article 15: entry into force.
Article 16: termination.

CHAPTER SIXTY THREE

# FOREIGN IHT CREDIT RELIEF

## 63.1 Foreign IHT credit - Introduction

"**Foreign IHT credit relief**" arises where foreign tax is set against UK IHT. This may be "**DTA IHT credit**" where a DTA confers a credit or "**Unilateral IHT credit**" where UK tax law (not a DTA) confers a credit.

In this chapter I first consider unilateral IHT credit and then five IHT DTAs: the four pre-CTT DTAs and the USA IHT DTA.

For the interaction of unilateral relief and transferable nil rate bands, see 60.7 (Transferable nil rate bands and IHT DT reliefs). For deduction for foreign IHT (as opposed to credit) see 56.13 (Deduction for foreign taxes). For interaction with concession for UK situate property, see 56.13.3 (Foreign tax on UK situate shares).

## 63.2 Unilateral IHT credit

Unilateral IHT credit is important as the UK does not have many IHT DTAs. Section 159(1) IHTA provides:

> Where the Board are satisfied that in any territory outside the UK (an "overseas territory") any amount of tax imposed by reason of any disposition or other event is attributable to the value of any property, then, if—
> (a) that tax is of a character similar to that of capital transfer tax or is chargeable on or by reference to death or gifts inter vivos, and
> (b) any capital transfer tax chargeable by reference to the same disposition or other event is also attributable to the value of that property,
>
> they shall allow a credit in respect of that amount ("the overseas tax") against that capital transfer tax in accordance with the following provisions.

Statute calls this "unilateral relief" but I prefer the term "**unilateral foreign IHT credit**" (or foreign IHT credit relief) which seems clearer. I refer to the foreign tax (which statute calls "the overseas tax" as "**foreign IHT**".

Unilateral relief is based on the international understanding that the state where an asset is located has the primary right of taxation and the state whose claim to tax depends on a personal nexus (residence or, as in the UK, domicile) should provide unilateral relief for double taxation.

The IHT Manual provides:

> **27185 Introduction** [October 2007]
> ... Under Section 159 IHTA 1984, credit can be allowed not only on death but also in respect of lifetime dispositions where some type of gift tax is charged in the foreign country. The basic conditions to be satisfied in connection with a lifetime or death transfer are that both Inheritance Tax and overseas tax must be chargeable by reference to the same event and attributable to the value of the same property, and that the foreign tax is similar in character to IHT. In cases of doubt, you must take advice from TG.

## 63.3 Requirement to pay foreign IHT

The requirement that the foreign IHT must actually be paid is slipped into the definition of "tax imposed". Section 159(6) IHTA provides:

> In this section references to tax imposed in an overseas territory are references to tax chargeable under the law of that territory and paid by the person liable to pay it.

The IHT Manual provides:

> **27185. Introduction** [October 2007]
> ... Before relief can be finalised, the taxpayer must produce evidence of payment of the foreign tax in the form of the assessment of foreign tax (or other document showing details of the property charged) and the official receipt.
> Once you decide on the amount of relief available this should be entered in the 'reliefs against tax' box in the appropriate 'raising an assessment' COMPASS screen. If necessary, the relief must be apportioned between the instalment and non-instalment option property assessments. (See IHTM31189)

## 63.4 Use of foreign IHT credit

Credit is only set against "that capital transfer tax" ie tax attributable to the value of the same property as is subject to the foreign IHT.

The IHT Manual provides:

> **27185. Introduction** [October 2007]
> ... The relief cannot exceed the amount of Inheritance Tax charged with respect to the particular item of property....
> No IHT can be treated as imposed on property comprised in a transfer, which by some provision is made wholly exempt from the tax. Where a transfer is partly exempt, any tax charged will be attributed to the chargeable part of the transfer of value. Thus any wholly exempt property cannot be regarded as taxed in both countries and any credit will be restricted accordingly.
> Where Quick Succession Relief (IHTM22041) is allowed, the amount of IHT attributable to the property is the net amount after allowing the relief.

## 63.5 Amount of credit

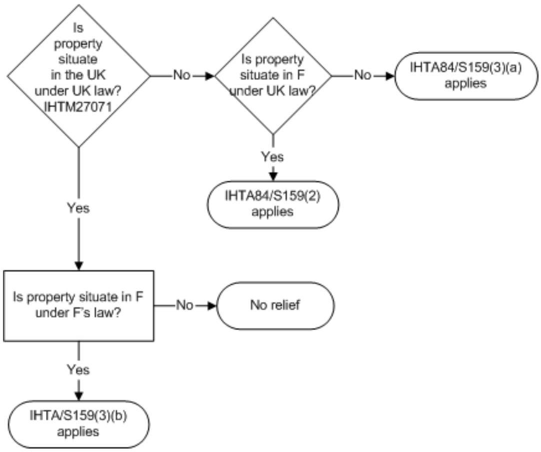
The rules determining the amount of IHT credit differ depending on

(1) situs of property under UK law and

(2) situs of property under the foreign law.

The IHT Manual provides:

> **27185. Introduction** [October 2007]
> ... Because of the terms of Section 159(2), (3) and (4) IHTA 1984 it is necessary to consider the situs (IHTM27071) of property according to UK law and, possibly, according to a foreign law when allowing a credit for foreign tax. You must raise any questions necessary to establish the situs as soon as it seems likely that a Section 159 IHTA 1984 credit will be claimed.
> The amount of the credit allowed under Section 159 IHTA 1984 is the Sterling equivalent of the foreign tax paid (converted using the exchange rate on the date of payment) so far as that tax is attributable to the foreign property on which IHT has been paid. Any part of the sum paid to the foreign Revenue authorities representing interest or penalties should be excluded, as should any part of the foreign tax that is attributable to income accruing since the date of the transfer. ... SAV (Foreign) will provide the exchange rate required...
> **27186 Procedure chart**



The reader is invited to consider whether flow charts like these are helpful.

### 63.5.1 *Situs in overseas territory*

Section 159(2) IHTA provides:

> Where the property is situated in the overseas territory and not in the UK, the credit shall be of an amount equal to the overseas tax.

The IHT Manual provides:

> **27187. Relief under Section 159(2) IHTA 1984** [January 2010]
> Where the property concerned is situate (under UK law) in the foreign country, relief is due under Section 159(2) IHTA 1984 and the credit due is equal to the foreign tax paid.
> In practice, the credit cannot exceed the IHT attributable to the property concerned.

More accurately, the *credit* (as defined) can exceed the IHT attributable to the property, but this credit is only set against the IHT attributable to the property, so the amount of the relief is the lesser of the credit and that IHT. The IHT Manual goes on to give an example:

> *Example*
> B died in September 2002, leaving an apartment in Spain valued at £50,000. B's total estate amounts to £300,000 (there were no lifetime gifts), with total IHT payable of £20,000.

> The Spanish authorities charge tax equivalent to Sterling £4,000 on the apartment on B's death.
> The IHT payable on the apartment is:
> £50,000 × (£20,000/£300,000) = £3,333.33
> Accordingly, the double taxation credit due under Section 159(2) IHTA 1984 is restricted to £3,333.33.

The effect of the credit is that the total tax paid is the higher of the UK and the foreign IHT rates.

### 63.5.2 *Situs in third country or dual situate property*

Section 159(3) IHTA provides:

> Where the property—
> (a) is situated neither in the UK nor in the overseas territory, or
> (b) is situated both in the UK and in the overseas territory,
> the credit shall be of an amount calculated in accordance with the following formula—
>
> $$\frac{A}{A+B} \times C$$
>
> where
> A is the amount of the capital transfer tax,
> B is the overseas tax and
> C is whichever of A and B is the smaller.

The IHT Manual provides:

> **27188. Relief under Section 159(3) and Section 159(4) IHTA 1984**
> [Sept 2008]
> Relief is due under Section 159(3) IHTA 1984 where the UK and another foreign country tax the same property and that property is situate:
>
> - neither in the UK nor in the foreign country, or
> - both in the UK and in the foreign country.
>
> Where relief is due under Section 159(3) IHTA 1984, it is given on a split credit basis and will be less than the foreign tax paid. [The Manual sets out the formula in s.159(3) and continues:]
> *Example 1*
> Country X and the UK tax an item of property which is situate neither in Country X or UK.

Country X charges tax of £40
UK charges IHT of £60
The credit is: $60/(60 + 40) \times (40) = £24$

HMRC IHT Customer Guide gives two examples of unilateral relief calculations:[1]

**Example 1**
Ann is domiciled in Ruritania, but is also treated as domiciled in the UK. She makes a gift of property situated in Utopia.

| Item | Amount |
|---|---|
| UK inheritance tax (A) | £3,000 |
| Ruritanian inheritance tax (B) | £1,000 |
| C is the smaller of A and B | £1,000 |

Credit against UK IHT is £3,000 / (£3,000 + £1,000) X £1,000 = £750

| | |
|---|---|
| **Net UK tax** | **£2,250** |

**Example 2**
Tom is domiciled in Utopia but holds shares in a Ruritanian company, which maintains a duplicate share register in the UK. Under UK law we regard the shares as situated in the UK, but Ruritanian law regards them as situated in Ruritania. Tom dies (but his estate is not liable to Utopian tax).

| Item | Amount |
|---|---|
| UK inheritance tax (A) | £1,000 |
| Ruritanian inheritance tax (B) | £4,000 |
| C is the smaller of A and B | £1,000 |

Credit against UK IHT is £1,000 / (£1,000 + £4,000) X £1,000 = £200

| | |
|---|---|
| **Net UK tax** | **£800** |

This may not be fully adequate to eliminate double taxation. Where an IHT DTA applies a more generous form of credit may apply.

### 63.5.3 *Property taxed in more than one overseas territory*

Section 159(4) IHTA provides:

> Where tax is imposed in two or more overseas territories in respect of

1 *www.hmrc.gov.uk/cto/customerguide/page20.htm#15.*

property which—
(a) is situated neither in the UK nor in any of those territories, or
(b) is situated both in the UK and in each of those territories,
subsection (3) above shall apply as if, in the formula there set out, B were the aggregate of the overseas tax imposed in each of those territories and
C were the aggregate of all, except the largest, of A and the overseas tax imposed in each of them. ...

The IHT Manual provides an example:

**27188 Relief under Section 159(3) IHTA 1984 and Section 159(4)**
[September 2008]
*Example 2*
Each of Country X, Country Y and the UK tax an item of property which is not situate in Country X, Country Y nor the UK.
Country X charges £40
Country Y charges £20
UK charges IHT of £60
The credit is 60/(60+40+20) X (40 + 20) = £30

### 63.5.4 *Interaction of s.159(2)(3)*

Section 159(5) IHTA deals with the interaction of the two reliefs:

Where credit is allowed under subsection (2) above or section 158 above in respect of overseas tax imposed in one overseas territory, any credit under subsection (3) above in respect of overseas tax imposed in another shall be calculated as if the capital transfer tax were reduced by the credit allowed under subsection (2) or section 158; and where, in the case of any overseas territory mentioned in subsection (3) or (4) above, credit is allowed against the overseas tax for tax charged in a territory in which the property is situated, the overseas tax shall be treated for the purposes of those provisions as reduced by the credit.

The IHT Manual provides:

**27188 Relief under Section 159(3) IHTA 1984 and Section 159(4)**
[September 2008]
... If relief is due under Section 159(3)(a) IHTA 1984 or Section 159(4)(a) IHTA 1984, Section 159(5) IHTA 1984 must be considered

when calculating the foreign tax paid (B in the formulas above). If the foreign country has allowed a credit against its tax for tax paid in another foreign country, please refer to TG.
Where relief is due under Section 159(3)(b) IHTA 1984 or Section 159(4)(b) IHTA 1984, above, the foreign tax at B is simply the gross amount paid – no account need be taken of any credit for tax paid in another country.
**27189. Procedure when both Section 159(2) and Section 159(3) IHTA 1984 apply**
It may happen that relief is due under both Section 159(2) IHTA 1984 – or convention relief under Section 158 IHTA 1984 – and under Section 159(3) IHTA 1984.
If this is the case, Section 159(5) states that the credit allowed under Section 159(3) must be calculated on the basis that A in the formula (the Inheritance Tax paid) is the net amount of Inheritance Tax after allowing the credit under Section 158 or Section 159(2)
…

### 63.5.5 *Interaction of unilateral IHT credit relief and DTA credit relief*

Section 159(7) IHTA provides:

> Where relief can be given both under this section and under section 158 above [double tax treaties], relief shall be given under whichever section provides the greater relief.

The IHT Manual provides:

> **27200. Procedure when both forms of relief apply**
> Unilateral relief and relief under a DTC are **not** mutually exclusive. Where both reliefs are prima facie due with reference to the same item of property, relief is restricted by Section 159(7) IHTA 1984 to whichever is the greater. In practice, where the amount of credit is the same under either basis, the credit should be treated as Convention relief.
> In cases where, either;
> (a) both reliefs are due, but the unilateral relief appears the greater or
> (b) the interaction of the two reliefs gives rise to undue difficulty
> you must refer the case to TG (IHTM01081). In Scotland, your Team Leader should be consulted in cases of difficulty.

> **Unilateral relief may be given for a State tax in addition to unilateral or Convention relief in respect of tax levied by the country of which the State forms part.**
> *Example*
> Deceased, a British citizen, dies domiciled in the UK. His estate includes an apartment in New York, stocks and shares in US Companies and a New York bank account.
> The world-wide estate will be subject to UK tax, but US Federal Estate Tax will (because of the terms of the DTC) be payable only on the immovable property in the USA. The UK will give credit for the US tax under the DTC.
> NY State will also charge State Estate Tax on the movable assets situate there and the UK will give unilateral relief for this tax.
> But the total unilateral and convention credit cannot exceed the amount of UK IHT payable on the property concerned.

63.5.6 *Concession for Canada Estate Duty?*

The IHT Manual provides:

> **27186 Procedure Chart**
> Relief should be given under Section 159(2) IHTA 1984 rather than Section 159(3)(a) where tax is paid, under an agreement between the provinces concerned, in Quebec or Ontario on shares which by UK law are situate in the other province. This applies also to a similar arrangement between Quebec and British Columbia.

Canada abolished estate duty in 1972. This passage is therefore 40 years out of date! For the current Canadian position, see 56.13.2 (Canadian income tax liabilities deducted for IHT). However it illustrates an approach which may perhaps be applied to federal estate duties in other federal jurisdictions, if there are any.

## 63.6 Planning

The rule is in short that the relief is the lesser of (1) foreign IHT and (2) UK IHT attributable to the same property. This requires careful planning to maximise the benefit of the relief.

Suppose T owns land in country X which on T's death will bear IHT in country X. If T makes a chargeable gift of the land (eg a gift by will to T's children) then the foreign IHT credit is available. If T makes an exempt gift (eg to T's spouse or to charity) the foreign IHT credit is lost. Foreign jurisdictions do not normally allow death duty exemption on the grounds that a gift is made to a UK charity. (In some cases EU member states may allow relief.) For instance, suppose T wishes to makes a will giving foreign property to a UK charity. The gift may bear foreign death duties which are set against UK IHT so the effective IHT burden is reduced or eliminated.[2] It would be better:

(1) to give the foreign property to beneficiaries who are chargeable under UK law.
(2) to give other (perhaps UK) property to the UK charity which would otherwise bear inheritance tax at the full rate.

In some cases the matter could be put right by a deed of variation.

## 63.7 DTA IHT credit: pre-CTT DTAs

Article VI of the UK/France IHT DTA provides:

> Where one Contracting Party imposes duty on the death of a person who was domiciled in its territory at the time of his death on any property which, under the present Convention, is situated in the territory of the other Contracting Party, the former Party shall allow against so much of its duty, ascertained in accordance with its law, as is attributable to that property a credit (not exceeding the amount of the duty so attributable) equal to so much of the duty imposed by the other Contracting Party as is attributable to such property.

Similarly, art.VI of the UK/Italy IHT DTA provides:

> (1) Where one Contracting Party imposes duty on any property which is not situated in its territory but is situated in the territory of the other Contracting Party, the former Party shall allow against so much of its duty (as otherwise computed) as is attributable to that property a credit (not exceeding the amount of the duty so attributable) equal to so much of the duty imposed in the territory of the other Contracting Party as is attributable to such property.
> (2) For the purposes of this Article, the amount of the duty of a

2 The position may be complicated further by foreign rules which make the rate of death duty depend on the relationship of the beneficiary to the deceased; forced heirship rules may also need to be considered.

> Contracting Party attributable to any property shall be ascertained after taking into account any credit, allowance or relief, or any remission or reduction of duty other than in respect of duty payable in the territory of the other Contracting Party

This does not add much to the unilateral IHT credit otherwise available under domestic law but it would be relevant for an asset which is UK situate under domestic situs rules but not UK situate under treaty situs rules.

India and Pakistan DTAs have similar articles but since these countries do not impose IHT, the articles have no effect.

## 63.8 USA DTA: Credit for foreign IHT

Article 9 USA IHT DTA provides:

> (2) Where under this Convention the UK may impose tax with respect to any property other than property which the UK is entitled to tax in accordance with the said Article 6 or 7 (that is, where the decedent or transferor was domiciled in or a national of the UK), then, except in the cases to which para (3) applies, double taxation shall be avoided in the following manner:
> (a) Where the US imposes tax with respect to property in accordance with the said Article 6 or 7, the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.
> (b) Where the US imposes tax with respect to property not referred to in sub-para (a) and the decedent or transferor was a national of the UK and was domiciled in the US at the time of the death or transfer, the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property.
> (3) Where both Contracting States impose tax on the same event with respect to property which under the law of the US would be regarded as property held in a trust or trust equivalent and under the law of the UK would be regarded as property comprised in a settlement, double taxation shall be avoided in the following manner:
> (a) Where a Contracting State imposes tax with respect to property in accordance with the said Article 6 or 7, the other Contracting State shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the first- mentioned Contracting State with respect to that property.
> (b) Where the US imposes tax with respect to property which is not taxable in accordance with the said Article 6 or 7 then
> (i) where the event giving rise to a liability to tax was a generation-skipping transfer and the deemed transferor was domiciled in the US

at the time of that event,

(ii) where the event giving rise to a liability to tax was the exercise or lapse of a power of appointment and the holder of the power was domiciled in the US at the time of that event, or

(iii) where (i) or (ii) does not apply and the settlor or grantor was domiciled in the US at the time when the tax is imposed,

the UK shall credit against the tax calculated according to its law with respect to that property an amount equal to the tax paid in the US with respect to that property. ...

(4) The credits allowed by a Contracting State according to the provisions of paras (1), (2) and (3) shall not take into account amounts of such taxes not levied by reason of a credit otherwise allowed by the other Contracting State. No credit shall be finally allowed under those paragraphs until the tax (reduced by any credit allowable with respect thereto) for which the credit is allowable has been paid. Any credit allowed under those paragraphs shall not, however, exceed the part of the tax paid in a Contracting State (as computed before the credit is given but reduced by any credit for other tax) which is attributable to the property with respect to which the credit is given.[3]

## The IHT Manual provides:

**27170. USA** [October 2007]

Where a DT credit is due you may give a provisional allowance but the case must not be closed until the payment has been certified by the US authorities on Form 742.

You must send the taxpayer two prints of form 742 ask them to complete the forms and send them to the US authorities at the address given on the form. One of these copies is certified and returned to this office and the other is retained by the US authorities. The certified form must be checked and the appropriate credit allowed. If you have any difficulty applying the DTC or calculating the tax attributable to the property please seek advice from TG.

- The credit given cannot exceed the amount of tax payable in the UK on the property concerned.

*Certification of IHT paid for the US authorities*

The US form 706 CE is forwarded to this Office in duplicate for certification. After checking (it is important that the forms themselves should not be marked in any way) they and the file must be sent with a note of any error or omission to TG. If the case is closed TG arranges for one copy to be certified and sent with a schedule of any necessary amendments to the US authorities; the other copy is filed. The taxpayer is informed that the certificate has been sent and is provided with a copy of any amending schedule.

Where a certificate of tax paid cannot be issued on application because the amount of tax has not been finalised and paid, an explanation must be given to

---

3 Art 9(5) deals with claims; see 63.9 (Claims for foreign IHT credit relief).

the taxpayer together with a reminder that it is open to them to lodge a provisional claim for a credit with the US authorities (there is a time limit – Article 9). When the case is ready for certification the application is referred with the file to TG to issue the certificate.
If there is any adjustment of tax after a certificate has been issued the file must again be referred to TG for the issue of an amending certificate.

## 63.9 Claims for foreign IHT credit relief

There is no domestic law provision requiring a claim for unilateral IHT credit relief or for IHT DTA relief(unlike the position for IT and CGT where a claim is required by statute). However the treaties assume that a claim is to be made for a credit or a refund of tax and so by implication impose a claim requirement in these cases. The wording varies between treaties.
Article VII India IHT DTA provides:

> 1. Any claim for a credit or for a refund of duty founded on the provisions of the present Agreement shall be made within six years from the date of the death of the deceased person in respect of whose estate the claim is made, or, in the case of a reversionary interest where payment of duty is deferred until the date on which the interest falls into possession, within six years from that date.
> 2. Any such refund shall be made without payment of interest on the amount so refunded.

Article VII Pakistan IHT DTA is the same. Article VII France IHT DTA provides:

> 1. Any claim for a credit or for a refund of duty founded on the provisions of the present Convention shall be made within five years from the date of the death of the deceased person in respect of whose estate the claim is made, or, where the event causing duty to be payable occurs at some later date, within five years from that date.
> 2. Any such refund shall be made without payment of interest on the amount so refunded.

Article VII Italy IHT DTA is the same but lacks para 2.
Article 9(5) USA IHT DTA provides:

> Any claim for a credit or for a refund of tax founded on the provisions

of the present Convention shall be made within six years from the date of the event giving rise to a liability to tax or, where later, within one year from the last date on which tax for which credit is given is due. The competent authority may, in appropriate circumstances, extend this time where the final determination of the taxes which are the subject of the claim for credit is delayed.

CHAPTER SIXTY FOUR

# UK DOMICILIARY MARRIED TO FOREIGN DOMICILIARY

## 64.1 UK domiciliary married to foreign domiciliary – Introduction

This chapter considers the position of a UK domiciled individual who is married to a foreign domiciled spouse.[1] It is necessary to consider the various taxes separately.

## 64.2 Restricted IHT spouse exemption for foreign domiciled spouse

Section 18(1) IHTA normally provides complete exemption for transfers between spouses.[2] Section 18(2) imposes an important exception:

> If, immediately before the transfer, the transferor but not the transferor's spouse or civil partner is domiciled in the UK the value in respect of which the transfer is exempt (calculated as a value on which no tax is chargeable) shall not exceed £55,000 less any amount previously taken into account for the purposes of the exemption conferred by this section.

So where:
(1) the transferor is UK domiciled (or deemed UK domiciled), and
(2) the transferee (the spouse of the transferor) is foreign domiciled

---

1 References to "spouse", "marriage", and "widow/ers" include a civil partner, civil partnership and a surviving civil partner. See App 1.2 (Meaning of spouse) and App 1.3 (Civil partners).

2 For the interaction of the IHT spouse exemption and excluded property rules, see 58.1 (IHT spouse exemption on death of a foreign domiciliary).

the exemption is restricted to £55,000 only.[3] While it is generally true that a foreign domicile is a passport to tax saving, this is one circumstance in which a foreign domicile is a serious drawback.

This restriction does not apply the other way round, where the foreign domiciled individual makes a transfer to their UK domiciled spouse. (Nor should it apply in those circumstances because such a transfer brings assets which would have been outside the realm of IHT within its scope.)

The restriction does not apply where both spouses are not domiciled in the UK.

The restriction may be modified by double tax treaties if a spouse is domiciled in an appropriate treaty country.

Transfers which do not qualify for the spouse exemption will be PETs unless some other exemption is in point.

One solution to this problem may be to wait until the foreign domiciled spouse becomes deemed UK domiciled.[4]

Where the foreign domiciled spouse is a citizen of another member state, the discrimination is unlawful in EU law. The government justify the discrimination on the grounds of the "potential avoidance risk".[5] But that is not sufficient to justify discrimination.

### 64.2.1 *Interaction of £55,000 spouse exemption and other exemptions*

An inter-spouse gift within the £55,000 limit is *not* a PET. Section 3A(1A)(b) IHTA provides that a PET is a transfer of value "which, apart

---

3 The IHT Manual states:

"**11033 Spouse/civil partners domiciled outside UK** [October 2007]

The £55,000 limit applies to

- the value before grossing (IHTM26121)
- the cumulative total of all transfers to a spouse, or spouses, or civil partner domiciled outside the UK. So you should take into account the amounts allowed under earlier transfers in which the IHTA84/S18 (2) limitation applied in considering whether the £55,000 is exceeded
- transfers on or after 9 March 1982. For transfers before that date the limit was lower, and you should refer to the Taxes Acts 1982 Edition held in the library

Where the £55,000 limit is exceeded, you should allocate the exemption in the manner which is most favourable to the spouse or civil partner. Factors you should bear in mind include the incidence of tax and the availability of business relief (IHTM24131), agricultural relief (IHTM24001) or other reliefs."

4 See 52.2 (Deemed UK domicile)

5 Public Bill Committee debate on Finance Bill, Hansard 13 May 2008 col.181.

from this section, would be a chargeable transfer".[6] So if one spouse makes a gift to the other, that gift uses up the lifetime £55,000 limit even though the gift is made more than seven years from the death and would otherwise qualify as an exempt transfer, as a PET.

The position is different for a gift of excluded property.[7] Such a gift is not a transfer of value at all and therefore it is not a transfer which qualifies for the spouse exemption and does not use up the £55,000 exemption.

The position is less clear for a transfer (outside s.11) which qualifies for the annual or normal expenditure exemptions. Such a transfer is an exempt transfer under those exemptions: does it also use up the £55,000 limit for inter-spouse gifts? There is no clear answer in the legislation but it is suggested that these transfers do not use up the £55,000 limit. That would seem to better fit the scheme of the legislation.

See 58.1 (IHT spouse exemption on death of a foreign domiciliary); 58.2 (Will drafting - general approach); and 54.8 (GWR spouse exemption).

## 64.3 Spouse or widow of settlor becomes entitled to settled property

The termination of an estate interest in possession (during the life of the life tenant) is a transfer of value under s.52 IHTA. Section 53(4) IHTA provides:

> Tax shall not be chargeable under s.52 above if on the occasion when the interest comes to an end—
> (a) the settlor's spouse or civil partner, or
> (b) where the settlor has died less than two years earlier, the settlor's widow or widower or surviving civil partner,
>
> becomes beneficially entitled to the settled property and is domiciled in the UK.[8]

This relief only applies if the spouse is UK domiciled. The restriction on s.53(4) relief is broadly consistent with the restriction to the spouse

6 Transfers before 22 March 2006 are governed by s.3A(1) IHTA but the wording on this point is the same.

7 Likewise a gift within s.11 IHTA; see 64.4 (Disposition for maintenance of spouse and other exemptions).

8 Section 53 goes on to set out some exceptions not discussed here.

exemption considered above (and indeed this or something similar is necessary to prevent avoidance of the restriction on s.18 relief).

Section 54(2) IHTA sets out similar rules for the termination of an estate interest in possession on the death of the life tenant.

## 64.4 Disposition for maintenance of spouse and other exemptions

Where the IHT spouse exemption does not apply, another exemption may sometimes fill the gap. An inter-spouse gift may qualify for relief under s.11(1) IHTA:

> A disposition is not a transfer of value if it is made by one party to a marriage[9] or civil partnership in favour of the other party ... and is—
> (a) for the maintenance of the other party ...[10]

This should normally[11] apply, in particular, to the common case where an individual gives a half share in the family home to their spouse. The most basic requirement of "maintenance" is to have a secure roof over one's head.[12] In *Phizackerley v IRC*[13] the Special Commissioners correctly stated that the normal reason for such a gift is to give the donee spouse security in her own home. Unfortunately he concluded that it was not "for the maintenance" of the other party, it was to give the other party security. With respect, this can hardly be right, because "security" and "maintenance" are not alternatives. It is because the gift gives the spouse security that it is for her maintenance. But it will now be necessary to appeal to the High Court to establish this point.

9 "Marriage" is defined to include a former marriage in certain cases: s.11(6) IHTA.

10 I mention for completeness the further relief in s.11(3) which overlaps with s.11(1). In practice an inter-spouse gift which qualifies under s.11(3) will also qualify under s.11(1).

11 It would be different if the purpose of the gift was not to provide for the spouse but some other purpose, such as IHT planning.

12 Lump sum payments can constitute "maintenance". Contrast s.2(1)(b) Inheritance (Provision for Family and Dependants) Act 1975 (formerly s.1(4) Inheritance (Family Provision) Act 1938) which states that lump sum payments may constitute "maintenance" for the purpose of the Act. This is also assumed in Sch 15 para 10(1)(d) FA 2004 (which takes gifts within s.11 out of the pre-owned assets rules).

13 [2007] STC (SCD) 328.

A gift which is within s.11 IHTA (Disposition for family maintenance) is outside the scope of the GWR rules. For such a disposition is not a transfer of value; so it is deemed not to reduce the transferor's estate: s.3 IHTA. So by implication it must be treated as not being a "disposal by way of gift". (Any other conclusion would lead to absurd results. For a disposition between spouses within s.11 is not a transfer of value, and so not within the IHT spouse exemption, and so would come within the GWR rules even if both spouses were UK domiciled.)[14]

The normal expenditure exemption (s.21 IHTA) may also be in point. Gifts which qualify for this exemption are still within the reservation of benefit rule.

## 64.5 Transferable nil-rate band

The IHT Manual provides:

> **43042 Domicile of first spouse or civil partner to die** [August 2009]
> Every person, UK domiciled or not, is entitled to the full nil rate band that can be set against their estate that is subject to IHT.
> The availability of TRNB on the estate of the first to die of a non domiciled spouse or civil partner is calculated only by reference to property that is potentially subject to an UK IHT charge. For a non domiciled spouse or civil partner, **VT** [IHTM43020] will be calculated only by reference to their estate in the UK. Assets held outside the UK, by a person not domiciled, or deemed domiciled in the UK, regardless of the devolution of those assets are not taken into account when calculating the available unused nil rate band.
> Thus where the survivor dies in the UK and their spouse or civil partner, who held no UK assets, died abroad leaving all their all overseas assets to their children, none of the nil rate band was used on the first death and the personal representatives of the survivor may claim to transfer 100% of the nil rate band to the estate of the survivor.
> *Example*[15]
> Abdul [died] domiciled abroad. His only asset situated in the UK was a US dollar account containing US$250,000. He left this and the remainder of his

14 If my view were wrong the further anomaly would arise that gifts of qualifying investments to charity would fall within the scope of GWR, because such gifts fall within s.12 IHTA and not s.102(5)(d) FA 1986; but it is not necessary to pursue that here.

15 The HMRC example, as is the current trend, contains several facts which are wholly irrelevant to the tax position and which only serve to make it harder to identify the relevant points. The following footnotes identify these.

estate to his son, Jamil who lives in the UK.[16] After the death, his wife, Soroya, moved to the UK to live with Jamil and died domiciled in the UK.[17]

The assets situated outside the UK are not liable to IHT. The US dollar account is left out of account [IHTM04380] in determining Abdul's estate at death. So although whole estate passed to Jamil, no property was chargeable to IHT, leaving the nil rate available for transfer in full on Soroya's death..

**IHTM43043 - Domicile: calculation where the domicile of the survivor at the first death is outside the UK** [August 2009]

On the death of the first spouse or civil partner, exemption for assets passing to the surviving spouse or civil partner may be limited to £55,000 in accordance with s8(2) IHTA if the surviving spouse or civil partner was not domiciled or deemed domiciled in the UK. [IHTM11033]

If the entire estate passed to the surviving spouse or civil partner, anything over £55,000 is a chargeable legacy. Where the net estate is above the nil rate band plus £55,000 there will be no nil rate band to transfer, as illustrated below.

**Example**

Susan died in 2002/03. She left an estate worth £450,000 all to her husband Lars who is domiciled in Sweden.

**Unused nil rate band calculation**

**M** = £250,000

**VT** = £395,000 (Estate of £450,000 less limited spouse exemption of £55,000)

**M** is not greater than **VT**, so there is nothing to transfer.

Where the net estate is less than the nil rate band plus £55,000, there will still be an amount of nil rate band available to transfer. This example shows how both the amount that the net estate is below the nil rate band, and limited spouse exemption combine to produce the amount of nil rate band available to transfer.

**Example**

Charles died in 2002/03. He left an estate worth £200,000 all to his wife Helga who is domiciled in Sweden.

**Unused nil rate band calculation**

**M** = £250,000

**VT** = £145,000 (Estate of £200,000 less limited spouse exemption of £55,000)

**M** is greater than **VT** by £105,000

**Transferable nil rate band calculation**

**E** =£105,000

**NRBMD** = £250,000 so

(105,000 ÷ 250,000) × 100 = 42.0000%

On Helga's death, the nil rate band on her death would be uprated by 42%. This approach will be appropriate on the death of the survivor when either

- they remain domiciled abroad and their UK assets exceed the single nil rate band, or

16 Where the son lives, and where he is domiciled (which might not be the same) are completely irrelevant to the example.

17 Where the widow lives and where she dies domiciled, are irrelevant to the example.

- between the first death and their own, they became domiciled, or deemed domiciled in the UK.

## 64.6 Inter-spouse gift of 100% BPR or APR property

This section considers a gift of property qualifying for 100% business or agricultural property relief from a UK domiciled individual to their non-UK domiciled spouse. It is necessary to consider IHT on the gift and the gift with reservation rules. For convenience I refer to "business property" but similar rules govern agricultural property.

### 64.6.1 *IHT on the gift*

In the normal case of a gift of property qualifying for 100% BPR, the value transferred by the gift is nil. However, s.113A IHTA provides:

> **Transfers within seven years before death of transferor**
> (1) Where any part of the value transferred by a potentially exempt transfer which proves to be a chargeable transfer would (apart from this section) be reduced in accordance with the preceding provisions of this Chapter, it shall not be so reduced unless the conditions in subsection (3) are satisfied.

The conditions which must be satisfied are set out in subsection (3):

> The conditions referred to in subsections (1) and (2) above are—
> (a) that the original property was owned by the transferee throughout the period beginning with the date of the chargeable transfer and ending with the death of the transferor; and
> (b) except to the extent that the original property consists of shares or securities to which subsection (3A) below applies that, in relation to a notional transfer of value made by the transferee immediately before the death, the original property would (apart from s.106 above) be relevant business property.

In brief, BPR is lost unless the property is retained by the donee for seven years. (There is an exception for replacement property which is not discussed here.)

### 64.6.2 *GWR on the gift if the donor survives seven years*

What about GWR? The position varies according to whether or not the donor survives seven years from the gift.

If the donor does survive seven years then s.113A has no application. By subsection (1) it applies to a PET *which proves to be a chargeable transfer*. If the donor survives seven years then the PET does not "prove to be a chargeable transfer". Accordingly the value transferred by the gift remains at nil. The gift therefore normally qualifies as an exempt transfer under:

(1) s.20 IHTA (small gifts); or
(2) s.18 IHTA (IHT spouse exemption).

The gift therefore falls outside the scope of the GWR rules by virtue of s.102(5) FA 1986.

The principle applies to:

(1) outright gifts of 100% BPR property whether or not to spouses;
(2) gifts to trusts under which the spouse has an interest in possession even if such gifts are not "outright gifts" (but consider s.102(5A)).

It does not matter that the property is sold or disposed of by the donee within the seven years as long as the donor has survived seven years. Section 113A(7A) IHTA provides:

> The provisions of this Chapter for the reduction of value transferred shall be disregarded in any determination for the purposes of this section of whether there is a potentially exempt or chargeable transfer in any case.

This is irrelevant because the disregard is only for the purposes of s.113A, not for the purposes of ss.18, 20 IHTA and s.102 FA 1986.

### 64.6.3 *GWR if donor dies within seven years*

The position is different if the donor dies within seven years. Suppose:

(1) H (UK domiciled) gives 100% BPR property to W (foreign domiciled);
(2) H dies within seven years;
(3) The conditions in s.113A(3) are not satisfied (for instance the property

has been sold[18] or disposed of by the donee).

In that case the value transferred is *not* reduced: s.113A(1). It is considered that the disallowance of BPR applies for all purposes of IHT. So the gift falls outside the protection of ss.18 and 20 IHTA (assuming the value transferred exceeds the limits of £55,000 and £250 respectively) and the GWR provisions can in principle apply.

It is impossible to believe anybody actually thought through these rules at the time the legislation was enacted. But these are the consequences of the words used and the result, if a little complicated, is relatively sensible.

## 64.7 Divorce settlement where IHT spouse exemption not available

Suppose:

(1) H transfers assets to W in order to settle a divorce claim, and

(2) The disposition falls outside the IHT spouse exemption.[19]

No IHT charge arises. First, the disposition is not a transfer of value, if made under court order.[20] Secondly, s.10 IHTA provides:

> **Dispositions not intended to confer gratuitous benefit**
> (1) A disposition is not a transfer of value if it is shown that it was not intended, and was not made in a transaction intended, to confer any gratuitous benefit on any person and either—
> (a) that it was made in a transaction at arm's length between persons not connected with each other, or
> (b) that it was such as might be expected to be made in a transaction at arm's length between persons not connected with each other.

H does not normally intend to confer any "gratuitous benefit" on W. (Assume the divorce settlement is negotiated at arm's length.) Accordingly the disposition falls within s.10 IHTA and is not a transfer of value for IHT purposes.

There is a theoretical HMRC argument that the condition in s.10(1)(b) IHTA is not satisfied. The argument would be that a divorce settlement cannot be "such as might be expected to be made in a transaction at arm's

---

18 Though there is a possibility of reinvestment relief in this case: see s.113B IHTA.

19 This may be because H is UK domiciled and W is not; or because the transfer is made after the marriage is dissolved.

20 See *McCutcheon on IHT*, 5th ed, para 2.35. Relief may also be available under s.11 IHTA; see 64.4 (Disposition for maintenance of spouse and other exemptions).

length between persons not connected with each other" since persons not connected with each other would not be in a divorce situation. In my view this argument is not correct. It is the old question of how far one carries the fiction of a deeming provision. The argument carries it too far because it reaches a conclusion which does not fit in with the scheme of the IHTA. IHT Manual (while not explicit) suggests that HMRC do not take the point.[21]

## 64.8 Joint accounts

### 64.8.1 *Introduction*

This section considers a joint bank or building society account held by two account holders. I refer to money in the account as "account money".

There is an important distinction between:

(1) an account on which either account holder can draw a cheque;

(2) an account on which both account holders must sign a cheque.

This book only considers the first type of account. For remittance aspects see 10.40 (Joint accounts).

### 64.8.2 *The property law background*

First of all one must ascertain the rights of the account holders. It would need a chapter to analyse the relevant case law.[22] In outline, three distinct questions arise, and the possible answers to them are as follows:

(1) *Beneficial ownership of the account money while in the account*. The possibilities are:

 (a) Entitlement in equal shares (the most common case)

---

21 IHTM 4165 [September 2008]: "Dispositions made on divorce or dissolution of a civil partnership (IHTM11032) for the benefit of a former spouse or civil partner, whether under a Court Order or as a result of arm's length negotiations, are normally within s.10 IHTA 1984."

22 For a summary see *Dymond's Capital Taxes*, para 10.400 and "Cohabitation: the financial consequences of relationship breakdown" Law Com No 307, July 2007, para A.46, accessible *www.lawcom.gov.uk/docs/lc307.pdf*.
Further consideration is needed for an account not governed by English law (but an English court will assume English law principles apply in the absence of evidence to the contrary). English law principles apply in Ireland: *Lynch v Burke* ITR Vol 5 p.271.

(b) Entitlement in proportion to contributions and withdrawals[23]
(c) One account holder beneficially entitled to the whole.

(2) *Beneficial ownership of money withdrawn from the account* (or assets purchased with that money). The possibilities are:
(a) Individual who withdraws funds becomes beneficial owner (the most common case)[24] or
(b) Same as beneficial ownership of the account money (as to which see above).

(3) *Beneficial ownership of account money on death of an account holder.* The possibilities are:
(a) The survivor is beneficially entitled by survivorship.
(b) The deceased owner's share (as to which see (1) above) passes under their will or intestacy.

The answer to one of these three questions does not determine the answers to the others. For instance, account money may belong beneficially to one of the account holders, eg H and W may hold as nominees for H. Such an account may be held on terms that:

---

23 In practice the court will assume this is not the case unless there is evidence, such as appropriate records kept by the account holders. John Avery Jones gives cogent reasons for rejecting this analysis for the parent/child account in *Sillars v IRC* [2004] STC (SCD) 180, at [11].

24 See *Re Bishop* [1965] Ch 450 at p.456:

> "Where a husband and wife open a joint account at a bank on terms that cheques may be drawn on the account by either of them, then, in my judgment, in the absence of facts or circumstances which indicate that the account was intended, or was kept, for some specific or limited purpose, each spouse can draw upon it not only for the benefit of both spouses but for his or her own benefit. Each spouse, in drawing money out of the account, is to be treated as doing so with the authority of the other and, in my judgment, if one of the spouses purchases a chattel for his own benefit or an investment in his or her own name, that chattel or investment belongs to the person in whose name it is purchased or invested: for in such a case there is, in my judgment, no equity in the other spouse to displace the legal ownership of the one in whose name the investment is purchased. What is purchased is not to be regarded as purchased out of a fund belonging to the spouses in the proportions in which they contribute to the account or in equal proportions, but out of a pool or fund of which they were, at law and in equity, joint tenants. It also follows that if one of the spouses draws on the account to make a purchase in the joint names of the spouses, the property purchased, since it is purchased in joint names, is, prima facie, joint property and there is no equity to displace the joint legal ownership. There is, in my judgment, no room for any presumption which would constitute the joint holders as trustees for the parties in equal or some other shares."

(a) on the death of H, the account money passes to W by survivorship;[25] or
(b) the account money may pass under the will of H.

The permutations are almost endless. Note that joint tenancy/tenancy in common is not a comprehensive categorisation since those two terms alone are insufficient to determine the answers to the three questions which may arise.

The property law questions depend on the intention of the account holders. In practice spouses and cohabitees generally operate joint accounts without giving any consideration to the ownership of the money, except a general desire to share assets. A search for intention is unrealistic, and the fallback position is that:

(1) Account money is beneficially owned in equal shares.
(2) Withdrawals belong to the account holder who withdraws the funds.
(3) Beneficial ownership passes by survivorship.

I refer to this as a "**common form account**".

The circumstances in which parent/child joint accounts arise are different so the rights of the account holders tend to be materially different. For instance, the terms of the account may be that:

(a) One account holder ("P") may withdraw up to the whole amount of P's benefit and the others may make no withdrawal at all during P's lifetime.
(b) The balance may pass to the survivor by survivorship.

In this case the fund is in the estate of P for IHT purposes: s.5(2) IHTA.[26] The funds are not in the estate of the other holders during the life of P: their rights have no substantial value. The following analysis applies to a common form account.

### 64.8.3 *Account money in estate of both account holders*

In strict law the *whole* of the account money is in the estate of both account holders, under s.5(2) IHTA which provides:

> A person who has a general power which enables him, or would if he

---

25 As in the parent/child joint account *O'Neill v IRC* 1998 STC (SCD) 110; the apparent breach of the Wills Act 1837, and the possibility that this is a settlement for IHT, are tacitly ignored.

26 This was found to be the case on the facts in *Sillars v IRC* [2004] STC (SCD) 180.

> were sui juris enable him, to dispose of any property other than settled property, ... shall be treated as beneficially entitled to the property ... and for this purpose "general power" means a power or authority enabling the person by whom it is exercisable to appoint or dispose of property as he thinks fit.[27]

Beneficial ownership is therefore irrelevant and GWR is irrelevant on death of an account holder.

### 64.8.4 *Payment into joint account by one account holder*

Payment into the joint account by an account holder is not a transfer of value because the estate of the payor is not decreased. HMRC agree. The IHT Manual provides:

> **15043 Lifetime gifts arising out of a transfer of an account into joint names** [October 2007]
> Where A places money in a joint account (IHTM15042) in the names of A and B as joint tenants (IHTM15082) and retains the right to withdraw the whole of it, as a general rule there will not be a lifetime transfer (IHTM15060) at the time the money is paid into the account.

Payment into the joint account by an account holder is not a GWR. HMRC do not accept that[28] but in practice GWR does not often matter.

---

27 This was accepted without discussion in the Court of Appeal in *IRC v Melville* 74 TC 372 at [36]:

"... the inheritance tax regime produces instances of double taxation which are not limited to the circumstances specified in s 48. A clear example is one falling within s 5(2) of the Act, the very common case of a joint bank account which permits any holder to draw on that account. The same property, the moneys in the account, is under s 5(2) taxable on the death of each holder. The Revenue in practice do not strictly enforce that provision and treat each holder as beneficially entitled only to the proportion of monies in the account which he has contributed".

28 IHT Manual is garbled; so far as relevant it provides:

"**15061 Gifts with reservation** [September 2009]
An example of a joint ownership arrangements involving a GWR is ... if ... A transfers ... a joint money account into joint beneficial ownership of himself and his son, and then A either

- receives (or has the right to receive) all the ... interest for his own benefit or
- has the right to withdraw all the money in the joint account for his own benefit."

Presumably the manual means to say that there is a GWR if A transfers *his money*

### 64.8.5 *Death of an account holder*

Either account holder is strictly subject to IHT on death on the whole of the account money (subject to exemptions such as the spouse exemption). This rule results in double taxation which is undone by concession. The IHT Manual provides:

> **15042 Joint money accounts** [November 2009]
> Application of the inheritance tax provisions (IHTM15012) to joint accounts can be particularly difficult. In practice
> - you should normally regard each account holder as beneficially entitled (IHTM15011) to the proportion of the account which is attributable to his contributions. Thus, if the deceased provided the whole of the money, the whole of the account at death should be included in the IHT 200 (IHTM10021)
> - in calculating this proportion you should assume that the drawings out by each should be set as far as possible against his own contributions, notwithstanding the rule in *Clayton's Case* [1816] 1 Mer 572
> - it may be appropriate to enquire about any withdrawals made at the deceased's expense by the other joint owner(s) as these are likely to be lifetime transfers (IHTM15043). Look particularly critically at joint accounts opened shortly before death.
> - it is common for each joint owner to have an unrestricted right to withdraw any part of the amount standing to the credit of the account and retain the withdrawal for his or her own use (for example, see *Re Bishop* [1965] Ch 450). *You should not use this right of withdrawal to claim tax (for example, by reference to the definition of 'property' in s.272 IHTA or the 'general power' provision in s.5(2) IHTA) on a share of the account greater than that which results from the practice outlined above.*
>
> When raising a claim based on the deceased's contributions you should note that the true legal position is far from clear and, accordingly, it is vital to establish the facts and any relevant documents, e.g. application forms, withdrawal mandates, passbooks, terms and conditions of account

---

into a joint account and has the right to withdraw all the money. This view is supported by *Sillars v IRC* [2004] STC (SCD) 180 (where the taxpayer was not represented by counsel). But it is considered that a payment into an account of this kind is not a disposal by way of gift. If it were a GWR, many difficulties arise which the Tribunal did not consider in *Sillars*. On the death of A, however, since the property is in the estate of the individual, it does not matter whether payment into the account was a GWR.

etc. before considering the legal and equitable rules. Where the account holder has a joint account governed by Scots Law see IHTM15051 and IHTM15054.

### 64.8.6 *Spouse exemption on death of account holder.*

There are two possibilities:
(1) The account holders may not qualify for the spouse exemption because
  (a) They are married but one is, and one is not, UK domiciled.[29] (This scenario is relevant to the subject of this book, but one cannot examine it in isolation from the others.)
  (b) They are cohabitees.
  (c) There is some other unmarried relationship, such as parent and child.
(2) The account holders may qualify for the IHT spouse exemption.

In the second case, the IHT spouse exemption may apply to the transfer of value on the death of an account holder. HMRC agree. The Manual passage continues:

> Refer to TG (IHTM01081) any case in which the parties dispute the claim. However, there is no need to refer if the deceased's interest passes to an exempt beneficiary, such as a surviving spouse or civil partner (IHTM11032). You should also avoid questions and arguments on this subject unless the amount of tax at stake is substantial.

This is correct, though it needs a slightly purposive construction to say that property "becomes comprised" in the estate of the surviving spouse when the property is already in that estate.

### 64.8.7 *One account holder pays in and other withdraws*

Suppose:
(1) A transfers A's money into the joint account held by A and B and
(2) B withdraws that money into B's own name,

A's estate is reduced at stage (2). A does not make a transfer of value at stage (2) within the normal definition, as that requires a disposition and A

29 In this section I ignore the limited £55k spouse exemption.

does not make a disposition.

One might think that A makes a transfer of value by omission under s.3(3) IHTA. This provides:

> Where the value of a person's estate is diminished, and the value—
> (a) of another person's estate, or
> (b) of any settled property, other than settled property treated by s.49(1) below as property to which a person is beneficially entitled,
> is increased by the first-mentioned person's omission to exercise a right, he shall be treated for the purposes of this section as having made a disposition at the time (or latest time) when he could have exercised the right, unless it is shown that the omission was not deliberate.

But the value of the estate of the account holder who withdraws the funds is not increased so the conditions of s.3(3) are not satisfied.

However, s.272 IHTA provides a wider definition of "disposition":

> "disposition" includes a disposition effected by associated operations;

It is considered that A makes a disposition (and hence a transfer of value) by associated operations at stage (2). Section 268(3) IHTA provides:

> Where a transfer of value is made by associated operations carried out at different times it shall be treated as made at the time of the last of them; but where any one or more of the earlier operations also constitute a transfer of value made by the same transferor, the value transferred by the earlier operations shall be treated as reducing the value transferred by all the operations taken together, except to the extent that the transfer constituted by the earlier operations but not that made by all the operations taken together is exempt under s.18 above.

"Associated operation" is defined in s.268(1) IHTA. This provides (so far as relevant):

> (1) In this Act "associated operations" means ... any two or more operations of any kind, being—
> (a) operations which affect the same property, or one of which affects some property and the other or others of which affect property which represents, whether directly or indirectly, that property, or income arising from that property, or any property representing accumulations of any such income, or

(b) any two operations of which one is effected with reference to the other, or with a view to enabling the other to be effected or facilitating its being effected, and any further operation having a like relation to any of those two, and so on,

whether those operations are effected by the same person or different persons, and whether or not they are simultaneous; and "operation" includes an omission.

The associated operations are:
(1) A's payment into the account.[30]
(2) B's withdrawal from the account.
HMRC agree. The IHT Manual provides:

> **15043 Lifetime gifts arising out of a transfer of an account into joint names** [October 2007]
> Where A places money in a joint account (IHTM15042) in the names of A and B as joint tenants (IHTM15082) and retains the right to withdraw the whole of it, as a general rule there will not be a lifetime transfer (IHTM15060) at the time the money is paid into the account. *But if any part is subsequently withdrawn for the benefit of B, the other joint owner, there may be a transfer at that time.*
> Refer to TG any case where
> - there is such a withdrawal
> - it is claimed that there was an immediate gift when the money was paid into the joint account
> - there is evidence that an immediate gift was intended, or
> - the position is more complicated, for example where withdrawals need both signatures
>
> **(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**

### 64.8.8 *Spouse exemption on lifetime withdrawal*

The IHT spouse exemption may apply to the transfer of value on the lifetime withdrawal by an account holder. Since HMRC accept the application of the spouse exemption on death, they must also accept its application during the lifetime of the account holders.

30 It might be argued that the associated operation is A's omission to withdraw from the account; it makes no difference if this is the case.

The exemption does not of course apply when one spouse is and the other is not UK domiciled because the IHT spouse exemption is restricted. The transfer of value takes place when the funds are withdrawn from the account so that is the point where the conditions for the spouse exemption need to be satisfied. For instance if:
(1) Year 1: H makes a payment into the joint account
(2) Year 2: W makes a payment from the joint account
The IHT exemption applies if the conditions for the exemption are satisfied in Year 2. It does not matter whether or not they are satisfied in Year 1.

### 64.8.9 *One account holder pays in and same account holder withdraws*

Suppose:
(1) A transfers A's money into the joint account held by A and B and
(2) A withdraws that money into B's own name.
A does not make a transfer of value. What about B? V's estate is reduced at stage (2). But it is considered that B makes no transfer of value. It might be said that B makes a transfer of value by associated operations, the operation being B's omission, but that would not be consistent with the policy of s.3(3) IHTA. This can be rationalised by saying that although B makes an omission, which is an associated operation, B does not make a transfer of value by associated operations.

### 64.8.10 *Third party pays into account*

The discussion above assumes that the account money is provided by one or both account holders.

Suppose:
(1) A third party transfers their money into a joint account held by A and B and
(2) A dies.
In strictness A is taxed on the whole account, but by concession it appears that A is taxed on half. The IHT Manual provides:

> **15042 Joint money accounts** [November 2009]
> You should modify this approach where this is necessary to give effect to the realities of the situation.
> *Example*

> A, B and C share a joint account. They all contribute to it. A dies and his proportion of the account accrues by survivorship to B and C. After A's death, the entitlement of B and C should take into account A's contributions.
> **(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**

Presumably this means that afterA's death, B and C are each regarded as entitled to (1) their own contributions to the account and (2) half of the contribution of A.

Suppose:

(1) A third party transfers their money into a joint account held by A and B and

(2) A withdraws that money into A's own name.

It is suggested that B does not make a transfer of value. It might be said that there is a transfer of value by associated operations, the operation being the omission by the first account holder, but that would only be the case if the two steps formed part of an arrangement; any other view would not be consistent with the policy of s.3(3) IHTA.

### 64.8.11 *Payment out of account by way of gift*

If B draws on the account to make a gift to a third party donee, B has made a transfer of value.

If A had paid the account money into the joint account A has also made a transfer of value by associated operations at the time of B's withdrawal.[31] But that is not the case if B, or a third party, has provided the funds.

### 64.8.12 *Planning implications*

The best way to avoid the difficulties described in this section is that substantial sums should not be put in joint accounts at all (except where the account holders qualify for the full IHT spouse exemption). An

31 It is considered that there is no transfer of value under s.3(3) IHTA because although the estate of the third party donee is increased, it is not increased by any failure to exercise a right. But since there is a transfer of value by associated operations, this does not matter.

alternative might be to use a joint account but to specify carefully the terms on which the account is held, but in practice it would be easier to use separate accounts. However in practice joint accounts will frequently be used, and (as the frequent references in the manual to withheld text suggest) this is an area with many anomalies and therefore scope for tax planning.

## 64.9 Scottish joint account

The IHT Manual provides:

> **15050. Special destinations and proof of donation**
> If two or more persons purchase an asset jointly there may be a contractual agreement between them which determines how the property devolves on death.
> - If the title is just in their joint names, such as to A and B, they own an equal share which passes to their executors (IHTM05012) on their deaths and is part of their free estate.
> - But if the title is to A and B and the survivor and they have paid equally for the asset, the survivor will be entitled to the whole on the death of the first to die (*Perrett's Trs v Perrett* [1909] 46 SLR 453). This is known as special (or survivorship) destination.
>
> Both parties do, however, have the right to dispose of their shares in life (*Steele v Caldwell* [1979] SLT 228), which will defeat the operation of the special destination.
> If the price was not provided equally, it is a question of the donor's intention whether he has conferred an immediate beneficial interest (IHTM15011) on the other party. Such a donor can revoke the survivorship destination, explicitly, by will (IHTM12040) under s.30 Succession (Scotland) Act 1964. But the donee may not do the same to defeat the donor's right to the whole of the asset.
> If the whole of a joint asset was provided by one party he retains ownership of the whole till he delivers title, or, by intimation, indicates an intention to make an immediate gift to the other joint owner.
> - Proof of gift requires both intention and delivery. 'Intention' does not require writing as proof and delivery may be actual or constructive, for example by intimation to the donee or his agent.
> - If there is no immediate gift (by intention and delivery) the asset remains part of the provider's estate and will only pass to the other under the survivorship destination on his death, in the absence of any explicit testamentary revocation conforming to s 30 Succession (Scotland) Act 1964.
>
> **15051. Joint money accounts** [October 2007]
> The terms in which bank accounts and deposit receipts are held do not of themselves indicate the extent of common ownership (IHTM15093) nor do they imply the existence of a special destination (IHTM15054). The terms of a deposit receipt do not have a testamentary effect. The extent of each owner's interest will be a question of fact depending on

- the extent of their identifiable contributions, and
- if contributions are unequal whether there can successfully be established donation (IHTM15050) by the greater contributor to the other, or alternatively, whether the asset was held in joint names merely for administrative convenience

You should resist any suggestion by parties that the terms in which such monies are held can effect either a lifetime gift – or pass the property to a survivor, unless there is other supporting evidence. Any cases of difficulty should be referred to TG.

**15052. Land** [August 2006]

The title to heritage is proof of its ownership, and the owners interests in it – unless there is evidence to the contrary, normally by way of written document. If there is no special destination (IHTM15050) and there is equal provision of the price, each co-owner can dispose of his own share as part of his estate and there is no accretion among them.

If spouses or civil partners (IHTM11032) are the joint owners you should keep the 'related property' (IHTM09731) provisions in view (S.161 IHTA 1984).

If it is claimed the beneficial interests (IHTM15011) vary from those indicated by the title and the absence of gift is claimed, strong proof is required of parties intentions such as a contemporaneous writing. In cases of difficulty refer to TG (IHTM01081).

**15053. Which law to apply to joint investments owned by someone domiciled in Scotland** [October 2007]

Scottish law applies to shares of a company registered in Scotland. If the IHT 200 (IHT10021) or other account does not indicate whether a company is Scottish or not, ICES (IHT01023) will be able to provide this information. If the taxpayer is of Scots domicile (IHT13000) a joint holding in Government Stock may be regarded as subject to Scots law (*Cunningham's Trs v Cunningham* [1924] SLT 502).

**15054. Joint money accounts and special destination** [June 2006]

Under Scots Law where Bank or Building Society Accounts are held in joint names and the survivor the special (or survivorship) destination (IHTM15050) does not by itself pass the ownership of the money in the account to the survivor. An Account with a Bank or Building Society is not a document of title as it is not a Deed of Trust in terms of the Blank Bonds and Trusts Act 1696. Rather it is a contract between the Bank and the customer which regulates the conditions on which the Account is to be operated and is for administrative convenience only. See for example *Cairns v Davidson* 1913 SC 1054.

The result is therefore that the question of the ownership of the funds in the Account falls to be determined according to the ordinary principles of ownership. The owner of the funds deposited in the Account remains the owner unless and until some transfer of ownership has occurred.

***Example***

Where a Husband and Wife open an Account, governed by Scots law, in their joint names and the survivor and the Husband has provided the whole funds then on his death survived by his Wife:

- In the absence of some act of transfer of ownership to the Wife (e.g. a separate Deed of Gift) the whole Account should be included in the IHT 200

- If under the terms of the deceased's Will/Intestacy the Account passes to (say) the children then Inheritance Tax will prima facie be payable
- If under the terms of the Will/Intestacy the Account passes to the spouse or civil partner (IHTM11032) then exemption under S.18 IHTA 1984 will be appropriate

This applies to all Bank/Building Society Accounts governed by Scots Law. It will apply therefore to taxpayers living in England Wales and NI who have an Account which is governed by Scots Law.

I would appreciate the view of Scottish readers as to whether this is entirely correct. See too the discussion in the Trusts Discussion Forum May 2007 under the thread "Scottish bank accounts".

## 64.10 Associated operations on inter-spouse gift

The IHT Manual provides:

**14833 Gifts between spouses or civil partner** [September 2009]
Where property
- given unconditionally by one spouse or civil partner to the other is
- subsequently transferred by the latter to a third party,

you cannot use the associated operations provisions to attribute the transfer to the first spouse or civil partner.
The Chief Secretary to the Treasury assured Parliament that this would be HMRC's practice, and it was publicised in a Press Release dated 8 April 1975.
However, where the transfer between spouses or civil partners is part of a more complex series of transactions which taken together are the means whereby one of them makes a disposition to a third party, it may be more appropriate to use the associated operations to allocate the transfer(s) to the correct transferor.

## 64.11 IHT planning for mixed marriage

### 64.11.1 *Simple gift to foreign domiciled spouse*

A simple and obvious short- and medium-term course is:

(1) the UK domiciled spouse should give assets to their foreign domiciled spouse absolutely;

(2) the foreign domiciled spouse keeps the assets in a form where they are not UK situate, so they remain excluded property.

The gift may be a PET but that may not in practice be a serious concern. If the reservation of benefits rule applies, however, this effectively neutralises any tax saving. Indeed it may make the position worse. See 54.17 (IHT spouse exemption defence to GWR death charge). This often makes simple gifts impractical.

### 64.11.2 *Gift to foreign domiciled spouse, followed by settlement by spouse*

A more sophisticated option is:

(1) the UK domiciled spouse gives assets to their foreign domiciled spouse; and

(2) the foreign domiciled spouse subsequently gives the assets to a settlement.

In principle the property in the settlement may be excluded property. One advantage of this is if the donee spouse later becomes UK domiciled: see 57.1 (IHT planning in anticipation of acquiring UK domicile). Another advantage is CGT planning. A third advantage is that this should avoid the gifts with reservation rule.[32] Of course this strategy only works if the UK domiciled spouse is not a settlor: see 69.33 (Planning to create trust with foreign domiciled settlor).

## 64.12 CGT spouse exemption

Section 58(1) TCGA provides:

> If, in any year of assessment,
> (a) an individual is living with his spouse or civil partner, and
> (b) one of them disposes of an asset to the other,
> both shall be treated as if the asset was acquired from the one making the disposal for a consideration of such amount as would secure that on the disposal neither a gain nor a loss would accrue to the one making the disposal.

I refer to this as "**the CGT spouse exemption**". This exemption applies regardless of the domicile of the spouses. It applies to sales at market

---

32 See 54.13 (Gift to foreign domiciled donee who creates a settlement).

value as well as gifts.

The relief does not apply to (1) unmarried couples or (2) married couples living apart. Section 58(2) contains (usually) immaterial exceptions which are not discussed here.

## 64.13 CGT planning for mixed marriage

### 64.13.1 *Asset yielding a gain*

Suppose the UK domiciled spouse owns an asset which will give rise to a gain on a disposal. A simple and obvious course is:

(1) The UK domiciled spouse transfers[33] the asset to their foreign domiciled spouse.

(2) The foreign domiciled spouse may be in a position to sell the asset without CGT: see 43.1 (Capital Gains Tax of individuals).

Watch *Furniss v Dawson*!

### 64.13.2 *Non-resident spouse*

The relief applies regardless of residence, so similar planning points arise if one spouse is UK resident and the other is not. CG Manual accepted this:

> **22300 NR spouse or NR civil partner** [June 2008]
> ... There is no longer any authority to treat a non-resident spouse as separated from a resident spouse merely because of their residence status. Similarly a non-resident civil partner may not be treated as separated from a resident civil partner merely because of their residence status. So the possibility of passing assets outside the UK tax net remains.

This paragraph has been quietly deleted[34] but the law is unchanged.

33 The transfer may be a gift or a sale at market value. The latter avoids the IHT problems discussed at 64.2 (Restriction on IHT spouse exemption for foreign domiciled spouse) and 54.8 (GWR spouse exemption) but take care on implementation, especially s.58(2) TCGA. In the case of a sale the spouse will need independent legal advice.

34 Probably in June 2008 when para 22300 was amended, or perhaps subsequently but by July 2009.

## 64.14 Income tax planning for mixed marriage

A simple and obvious course is:

(1) the UK domiciled spouse should give assets to their foreign domiciled spouse absolutely; and

(2) the foreign domiciled spouse invests in property giving rise to foreign investment income which is not remitted.

The inter-spouse gift, strictly, satisfies the transfer of asset conditions. The transferor would then fall within s.720 ITA since they have "power to enjoy" their wife's income. This is because s.714(4) ITA provides:

> (4) In this Chapter references to individuals include their spouses or civil partners.

However, RI 201 provides relief:[35]

> Unless transactions are part of a wider arrangement, Revenue practice is not to seek to assess a UK domiciled individual on the income of a non-UK domiciled spouse, where that income arises from a transfer of assets by that spouse and would be outside the charge to tax under s 739 ICTA by virtue of the provisions of s 743(3) ICTA.

The gift would also be a "settlement" for the purposes of s.624 ITTOIA. However, s.626 ITTOIA normally provides relief:

> **626 Exception for outright gifts between spouses or civil partners**
> (1) The rule in s.624(1) does not apply in respect of an outright gift—
> (a) of property from which income arises,
> (b) made by one spouse to the other or one civil partner to the other, and
> (c) meeting conditions A and B.
> (2) Condition A is that the gift carries a right to the whole of the income.
> (3) Condition B is that the property is not wholly or substantially a right to income.
> (4) A gift is not an outright gift for the purposes of this section if—
> (a) it is subject to conditions, or
> (b) there are any circumstances in which the property, or any related

35 This is perhaps a concession but the better view is that the inter-spouse transfer is tax mitigation not tax avoidance so the motive defence applies. Tax Bulletin 81 states (obviously) that the same practice applies to civil partners.

property[36]—

(i)is payable to the giver,

(ii) is applicable for the benefit of the giver, or

(iii) will, or may become, so payable or applicable.

36 s.626(5) ITTOIA provides that:

> "'Related property' has the same meaning in this section as in s.625."

So we turn to s.625(5) which provides:

> "In this section 'related property', in relation to any property, means income from that property or any other property directly or indirectly representing proceeds of, or of income from, that property or income from it."

CHAPTER SIXTY FIVE

# THE FAMILY HOME AND ITS CHATTELS

## 65.1 Home owned by foreign domiciliary

There are several ways to arrange the ownership of a UK family home for a foreign domiciled individual. The first possibility is that the individual should own the property directly. This has the attraction of simplicity. Also, some UK banks are said to be unwilling to lend to offshore companies. This may also be necessary, or at least desirable, in order to secure that the owner of a long lease acquires the right to enfranchisement.

The main disadvantage is that the property is in the individual's estate and in principle within the scope of IHT on his death. One possible method to mitigate this problem is to provide by will that the property should pass to the individual's surviving spouse, or to a trust under which she has an interest in possession. That normally postpones IHT until the occasion of the death of the survivor of the individual and his spouse.[1]

The risk of IHT may quite simply be covered by insurance. Watch that the insurance policy is not subject to IHT on the death of the individual. Perhaps arrange that the policy is not UK situate[2] (so the policy is excluded property) or transfer the policy to a trust (under which the individual is excluded). The amount to be insured will need to be reviewed from time to time in line with house inflation and possible changes in the rate of IHT.

It should be possible to transfer the property to a company so as to acquire excluded property status, even at very short notice, if the death of the owner became imminent. There is a SDLT charge. So in practice the IHT risk is limited to the risk of the sudden death of the individual (or the sudden joint deaths of individual and spouse).

---

1 See 54.17 (IHT spouse exemption defence to GWR death charge).

2 See 70.19 (Insurance policy).

There will be no CGT on the sale of property if main private residence relief applies. If the individual has another residence inside or outside the UK, it may be appropriate to make an election under s.222 TCGA.

There is in principle a taxable remittance, if the purchase price is paid out of foreign income or chargeable gains within the scope of the remittance basis.

Similar points apply to chattels in the home except there is no CGT exemption, apart from the exemption for chattels under £6,000: s.262 TCGA.

## 65.2 Home owned by estate IP trust

This avoids the need for an English grant of probate after the death of the individual.

The IHT position is broadly the same as absolute ownership by the foreign domiciled individual. This course is only practical, however, for estate IPs where:

(1) the life tenant is the settlor; or
(2) the settlor is dead; or
(3) the settlor has no interest in the settlement; or
(4) the settlor can be excluded from a sub-fund (which will hold the UK home); or
(5) the settlement was made before 18 March 1986.

Otherwise HMRC may argue that there is a charge on the death of the settlor under the GWR rules.[3]

The use of a non-resident trust involves a capital payment received in the UK, giving a possible s.87 charge if chargeable gains accrue to the trust. Chargeable gains may arise on a disposal of the house, if the private residence exemption is not fully available, for instance if:

(1) the grounds exceed the "permitted area"; or
(2) there is another private residence which qualifies for the relief; or
(3) in relation to chattels which do not qualify for exemption.

3 See 54.7 (Gift of excluded property).

## 65.3 Home owned by discretionary trust

In principle a discretionary trust or non-estate IP trust could hold the UK home between ten year anniversaries. This might be a convenient short or medium term way to hold a family home. This course is only practical, however, where:
(1) the settlor is dead; or
(2) the settlor has no interest in the settlement; or
(3) the settlor can be excluded from a sub-fund (which will hold the UK home); or
(4) the settlement was made before 18 March 1986.
Otherwise HMRC may argue that there is a charge on the death of the settlor under the GWR rules.[4]

## 65.4 Loan secured on property

It clearly makes IHT sense for any existing loans to be secured on the UK property. It is also possible to borrow in order to mitigate IHT.[5] Commercial borrowing is likely to be an expensive solution to the IHT problem but borrowing from a friendly trust may be practical.

## 65.5 Home owned by non-resident company

### 65.5.1 *IHT advantages and sham*

For inheritance tax, the obvious course is for the UK home of a foreign domiciliary to be owned beneficially by a foreign company. The shares in the company are not UK situate, and qualify as excluded property for IHT. The company would usually be held by an offshore trust.

An argument that an arrangement of this kind was a sham was rejected in *Skyparks v Marks* [2001] WTLR 607. But sham is a question of fact in each case. In some badly created structures the taxpayer may wish to argue that the company is a sham (or at least that it holds its assets as nominee) to avoid a benefit in kind charge.

---

4 See 54.7 (Gift of excluded property).
5 See 56.1 (IHT deduction for debts).

### 65.5.2 *Ownership by non-resident company: CGT*

The company will not be subject to CGT or corporation tax on chargeable gains provided it is not resident.

If the company is owned by an individual, the gains will be treated as accruing to the individual under s.13 TCGA.[6]

If the company is held by a trust, the gains would be treated as accruing to the trust, and so be s.2(2) amounts for s.87 purposes.

## 65.6 Home owned by company: benefit in kind charge

The charge on living accommodation is to be found in ss.97 and 102 ITEPA:

> **97 Living accommodation to which this Chapter applies**
> (1) This Chapter applies to living accommodation provided for—
> (a) an employee, or
> (b) a member of an employee's family or household,
> by reason of the employment.
> ...
> **102 Benefit of living accommodation treated as earnings**
> (1) If living accommodation to which this Chapter applies is provided in any period—
> (a) which consists of the whole or part of a tax year, and
> (b) throughout which the employee holds the employment,
> the cash equivalent of the benefit of the accommodation is to be treated as earnings from the employment for that year.
> (2) In this Chapter that period is referred to as "the taxable period".

The EI Manual contains much interesting material on these provisions which cannot be set out here for lack of space.

## 65.7 "Family" and "household"

### 65.7.1 *"Family"*

Section 721(4) ITEPA defines "family":

---

6 See 47.24 (Private residence relief).

> For the purposes of this Act the following are members of a person's family—
> (a) the person's spouse or civil partner,
> (b) the person's children and their spouses or civil partners,
> (c) the person's parents, and
> (d) the person's dependants.

Illegitimate children do not count as "children"; see s.721(6) ITEPA.[7] This is anomalous by contemporary standards but it will not often be relevant and the parent of illegitimate children is not likely to complain. Stepchildren are also excluded, as are parents-in-law. They will however still qualify as family if they are dependants.

### 65.7.2 *"Household"*

Section 721(5) ITEPA provides:

> For the purposes of this Act the following are members of a person's family or household—
> (a) members of the person's family,
> (b) the person's domestic staff, and
> (c) the person's guests.

## 65.8 "By reason of the employment"

The expression "by reason of the employment" is extended by s.97(2) ITEPA so it does not mean "by reason of the employment" at all:

> Living accommodation provided for any of those persons by the employer is to be regarded as provided by reason of the employment ...[8]

Thus:

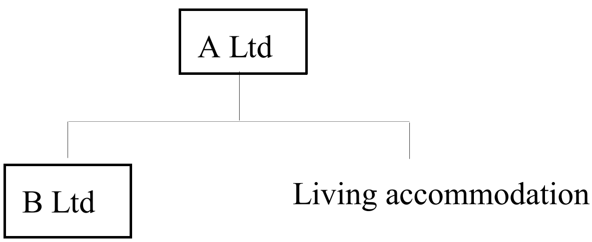
---

7 In Scots law there are no illegitimate children so this does not apply to Scots domiciled individuals: s.21 Family Law (Scotland) Act 2006.

8 The subsection continues:
"unless—
(a) the employer is an individual, and
(b) the provision is made in the normal course of the employer's domestic, family or personal relationships."
The exception is not relevant here.

(1) Where the accommodation is provided by the employer, one does not ask whether it is actually provided by reason of employment: it is deemed to be so provided.
(2) Where accommodation is provided by another, the living accommodation charge only applies if the accommodation is actually provided by the employer.

Suppose a company A owns living accommodation (occupied by T) and holds the shares in B Ltd:



If T is an employee of A Ltd T is in principle taxable on the living accommodation. The fact that the property is not provided by reason of the employment is irrelevant as the deeming provision in s.97(2) applies. If T is only an employee of B Ltd T is only taxed if T actually occupies the property by reason of T's employment.

B Ltd is (by definition) a person involved in providing the accommodation[9] but B Ltd is not deemed to provide the accommodation.

## 65.9 Accommodation available but not used

EIM provides:

> **11405 Living accommodation: meaning of provided: the legislation**
> ...
> Provided is not defined in the legislation and its meaning has not been considered by the courts in relation to a charge under s.145 ICTA 1988. (s.145 has now become part of Part 3 Chapter 5 ITEPA 2003). The word provided must be given its ordinary dictionary meaning of supplied or furnished with a thing.
> In some cases provided will mean available for use whereas in others it will mean actually used (see EIM11406 for more detail). The meaning

9 See 65.13.1 (Person involved in providing the accommodation).

of provided is often an issue in the case of provided holiday living accommodation.

**11406 Living accommodation: Meaning of provided: Practical considerations**

For details of the relevance of the word "provided" in living accommodation cases see EIM11405.

In deciding in a particular case whether provided means available for use, or means actually used, the following questions should be asked.

- Who can use the living accommodation? We accept that if living accommodation is genuinely available for use by more people than could actually use it at any one time then provided only means the periods actually used. For example if five unrelated employees were allowed to use an employer owned two bedroom holiday villa we would only seek a provided living accommodation charge on each employee for the period in which that employee actually used the villa.
- Why was the living accommodation bought or rented and how has it been used since acquisition? If the living accommodation was bought as holiday accommodation for a director and family, provided is likely to mean available for use. By contrast if it was bought as a genuine letting business by the employer and has been let out commercially then provided will only mean the periods of actual use by the employee.

For examples illustrating these points see example EIM11421 onwards.

EIM 11421 to 11423 provides three examples:

**11421. Living accommodation: Meaning of provided: Example 1** [March 2007]

[Example 1 is as follows:]

A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company. *The employer advises that the sole reason the property was bought was as a holiday home for the husband and wife. It has only been used by them as a holiday home.*

[Emphasis added to show how example 1 differs from the others]

We would argue in this case that provided is equivalent to available for use. Assuming that the flat was habitable for the whole of the year we would seek a benefit under Part 3 Chapter 5 measured on availability for the whole of the year. The employer may argue that the husband and wife work full time and that this prevents them using the flat for more than the 4 weeks in the year of actual use and so they are effectively only provided with it for 4 weeks. We do not accept that argument.

If the cost of the accommodation exceeds £75,000, then the amount of the cash equivalent would be calculated in accordance with s.106 ITEPA 2003 (see EIM11472). As the annual value is based on the open market rental, under ESC A91b the Inland Revenue restricts the cash equivalent of the benefit to step 1 of s.106. This would mean that the cash equivalent for the tax year would be £15,600 (£500 × 26 + £100 × 26). Under s.108 that would be split between the husband and wife in whatever way was just and reasonable, presumably half each in this case (see EIM11472).

**11422. Living accommodation: Meaning of provided: Example 2** [March 2007]

[Example 2 is as follows:]

A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company. *The company bought the property to let as a commercial letting business. They have employed professional agents to let the property and have managed to let the property for 12 weeks of the year in addition to the period it was used by the husband and wife directors.*

[Emphasis added to show how example 2 differs from the others]

In this case we would accept that provided is equivalent to actual use.

If the cost of the accommodation exceeds £75,000, then the amount of the cash equivalent would be calculated in accordance with s.106 ITEPA 2003 (see EIM11472). As the annual value is based on the open market rental, under ESC A91b the Inland Revenue restricts the cash equivalent of the benefit to step 1 of s.106. This would mean that the cash equivalent for the tax year would be £1,200 (£15,600 × 4/52). Under s.108 ITEPA 2003 that would be split between the husband and wife in whatever way was just and reasonable, presumably half each in this case (see EIM11472).

You may ask why the s.105 ITEPA 2003 charge is not £1,600 (being 3 weeks at £500 in the skiing season and 1 week at £100 outside the season). The answer is that the wording of s.105(3) requires us to look at a proportion of the annual rent rather than the rent for the actual weeks it was used.

**11423. Living accommodation: Meaning of provided: Example 3** [March 2007]

[Example 3 is as follows:]

A UK company purchases a flat in a French ski resort for £200,000. It is agreed that a market rental for the property would be £500 per week during the 6 month skiing season and £100 per week during the rest of the year. A husband and wife who are both directors of the company use the flat for holidays with their children for 3 weeks during the ski season and one week in the rest of the year. Their children are neither employees nor directors of the company. *The employer*

> *says that the property was bought to let commercially and for the use of other employees of the company. In fact there have been no commercial lettings during the year and it has only been used for one week of the year by an employee of the company who was the director's secretary.*
> [Emphasis added to show how example 3 differs from the others]
> This is a case where in practice we would seek to test whether what the employer was telling us was correct. For example, what if any evidence is there of attempts to let the property commercially or to advise other employees of the company of its availability for use by them? Based on that evidence it is then a matter of judgement whether in reality the sole reason the property was bought was as a holiday home for the husband and wife directors, in which case the tax consequences would be as in example EIM11421. Or it may be that genuine attempts have been made to let the property commercially and make it available for use by other employees of the company, in which case the tax consequences in example EIM11422 will follow.

## 65.10 Shadow directors

The House of Lords decided in *R v Dimsey & Allen* 74 TC 263 that the benefit in kind provisions apply to shadow directors.[10] The reasoning continues to apply under ITEPA. The charge is unfair to a shadow director who does no work for the company. Income tax should be a tax on income. This is a tax on nothing.[11]

EI Manual states:

> **11413 Living accommodation: Avoidance area: Shadow directors**
> A person in accordance with whose directions or instructions the directors of a company are accustomed to act is deemed to be a director of that company by s.67(1) ITEPA. Where such a person (known as a shadow director) is provided with living accommodation by the company the individual will be within Part 3 Chapter 5 ITEPA in the same way as if the individual had held a formal appointment as a director. ...
> Many shadow directors are individuals who, although not domiciled in

10 This reversed an unreported Special Commissioners' decision that the provisions did not apply to shadow directors (or even properly appointed directors) unless they were actually employees. That decision remains relevant to penalty and negligence issues relating to periods before the decision in *Dimsey & Allen*.

11 The problem did not unduly concern the House of Lords because of the countering unfairness to HMRC of the case where the services of a shadow director were as valuable as a full-time employee. It appears that two equal wrongs made a right to tax.

> the UK, have come to work and reside here. In order to avoid a possible charge to inheritance tax, which could be imposed if such an individual died whilst working in the UK, an arrangement is made to set up an offshore company that owns the UK property in which the individual lives. Where the individual is a shadow director of that offshore company s.97(2) ITEPA deems the UK property to be provided to the shadow director by reason of the deemed employment.

In practice taxpayers (if they have considered the matter at all) generally seem to have taken the view on their facts that they are not shadow directors. HMRC have themselves had to identify the cases suitable for investigation. But in the author's experience even cases that HMRC have identified are not often pursued with much gusto. Perhaps (this is surmise) HMRC "officially" take the point to deter IHT planning, but at the same time don't bother much about it in practice because of the unfairness of the charge. If so, the tactic (while contrary to the rule of law) works up to a point. Taxpayers cannot afford to plan on the assumption that HMRC's benign neglect of the provisions will apply to them.

## 65.11 Who is a shadow director?

Section 67(1) ITEPA provides:

> In the benefits code "director" ... includes any person in accordance with whose directions or instructions the directors of the company (as defined above) are accustomed to act.

Such a person is referred to as a "shadow director".[12]

In *Secretary of State for Trade and Industry v Deverell* Morritt LJ comments on this in numbered paragraphs:[13]

> (1) The definition of a shadow director is to be construed in the normal

12 A note on terminology. This useful and now familiar label was first used in the Companies Act 1980. The wording of the concept behind the label goes back to the Companies (Particulars as to Directors) Act 1917.

13 [2001] Ch 340 at p.354. *cf.* Kerr LJ's comment on "quotable pontific paragraphs, preferably numbered" in his readable memoir *As Far as I Remember*, Hart Publishing, (2006) p.285.

> way to give effect to the parliamentary intention ascertainable from the mischief to be dealt with and the words used. In particular, as the purpose of the Act is the protection of the public and as the definition is used in other legislative contexts, it should not be strictly construed because it also has quasi-penal consequences in the context of the Company Directors Disqualification Act 1986.

This suggests that the comments in *Deverell* will apply in all contexts where the standard definition of "shadow director" is used, including tax contexts. It is difficult to argue that the "shadow director" concept should have a different meaning in a tax context than in the director disqualification context of *Deverell*. But *Deverell* is considering "shadow directorship" in the context of a commercial trading company. The position of a relatively quiescent property holding company is different.

> ... (2) The purpose of the legislation is to identify those, other than professional advisers, with real influence in the corporate affairs of the company.

This paraphrase does not take us very far because it only raises the question as to what is meant by "real[14] influence".

> But it is not necessary that such influence should be exercised over the whole field of its corporate activities. ...

This is uncontentious. The income tax charge could apply where a trust held a company holding both a home and investments, even though the "shadow director" did not give "instructions" relating to the investments but only to the home.

> (3) Whether any particular communication from the alleged shadow director, whether by words or conduct, is to be classified as a direction or instruction must be objectively ascertained by the court in the light of all the evidence.

Obviously.

---

14 The dangerous and beguiling word "real" is normally an indicator of vague if not sloppy legal analysis.

> In that connection I do not accept that it is necessary to prove the understanding or expectation of either giver or receiver. In many, if not most, cases it will suffice to prove the communication and its consequence. Evidence of such understanding or expectation may be relevant but it cannot be conclusive.

This is extraordinary. "Directions or instructions" are a subset of "communications" and the feature that distinguishes them is that a person giving instructions expects them to be followed and the person receiving them understands this.

> Certainly the label attached by either or both parties then or thereafter cannot be more than a factor in considering whether the communication came within the statutory description of direction or instruction.

This at least is correct.

> (4) Non-professional advice may come within that statutory description. The proviso excepting advice given in a professional capacity[15] appears to assume that advice generally is or may be included.

This is equally extraordinary, for the concept of "directions or instructions" is the antithesis of the concept of "advice". The distinguishing feature is that the former is mandatory and the other is not. Of course, one may slide into the other. For instance, if a solicitor advises a company that a particular act is required by law, that failure to act would be a criminal offence, and that if the company broke the law the solicitor would refuse to act, such advice may arguably be characterised as a direction or an instruction. Since the proviso excepting advice given in a professional capacity can be taken to refer only to this situation it does not shed any light on the general meaning of "shadow director". The

15 See s.67(2) ITEPA:

> "... a person is not to be regarded as a person in accordance with whose directions or instructions the directors of the company are accustomed to act merely because the directors act on advice given by that person in a professional capacity."

inference from the proviso excepting advice is invalidly drawn.[16]

> Moreover the concepts of "direction" and "instruction" do not exclude the concept of "advice" for all three share the common feature of "guidance".

The less said about this line of reasoning the better.

> (5) It will, no doubt, be sufficient to show that in the face of "directions or instructions" from the alleged shadow director the properly appointed directors or some of them cast themselves in a subservient role or surrendered their respective discretions. But I do not consider that it is necessary to do so in all cases. Such a requirement would be to put a gloss on the statutory requirement that the board are "accustomed to act" "in accordance with" such directions or instructions. It appears to me that Judge Cooke, in looking for the additional ingredient of a subservient role or the surrender of discretion by the board, imposed a qualification beyond that justified by the statutory language.

If the statutory language were: "in accordance with whose *wishes* the directors were accustomed to act" this would be a fair comment. But the expression "directions or instructions" shows that the position must be one where the shadow director commands and the properly appointed directors obey.

The points made in the passage are wholly negative. That is, in determining the issue of "shadow directorship":

(1) The understanding or expectation of the parties is *not* conclusive.
(2) The label attached by the parties is *not* conclusive.

---

16 The Court of Appeal overlooked the explanation in *Gore-Browne on Companies* Jordans Ltd, (1997), para 25.4.2:

> "The saving for professional advice might appear, at first sight, to support a wider interpretation of the definition, for the saving would be unnecessary unless a wider meaning were given to that definition. There are two possible explanations. The first, and probably correct, explanation is that the saving appears as a result of pressure from the relevant professions to ensure that no attempt can be made even to argue that their activities are, as such, within the scope of shadow director provisions in company legislation. The second is that it is intended to deal with the case where professional advice is obtained from a person who happens to be a member of the company and, as an 'insider', potentially a shadow director."

(3) The fact that the communication is "advice" is *not* conclusive (except in the case of professional advice).
(4) The fact that the properly appointed directors surrender their discretions or act in a "subservient" role is *not* essential.

This does not answer the question: how *does* one identify a shadow director? The mere fact that there is a stream of communications from the individual to the company, which is acted on by the company, is not conclusive. The author regularly sends "communications" to the internet bookshop Amazon, and Amazon act on those communications without fail. Yet the author is not a shadow director of Amazon. The author regularly sends directions (a cheque is a direction) to his bank and Barclays act on those directions without fail. Yet the author is not a shadow director of Barclays Bank. In the 4th edition of this work I therefore concluded:

> that one can expect some back-tracking, refinement or qualification from the Courts in cases they regard as more meritorious than that of Mr. Deverell.

This has now been confirmed by *Ultraframe v Fielding*:[17]

> 1267 ... In my judgment, where the alleged shadow director is also a creditor of the company, he is entitled to protect his own interests as creditor without necessarily becoming a shadow director.
> 1268 [Counsel] submitted that it is critical to distinguish the position of a lender (whether or not also a shareholder) from that of a director. A lender is entitled to keep a close eye on what is done with his money, and to impose conditions on his support for the company. This does not mean he is running the company or is emasculating the powers of the directors, even if (given their situation) the directors feel that they have little practical choice but to accede to his requests. Similarly with customers who may, because of their buying power, be able effectively to dictate conditions to their suppliers (or the other way around). In other words a position of influence (even a position of strong influence) is not necessarily a fiduciary position. To find otherwise would place a wholly unfair and unnatural burden on men of business. In broad terms, I accept this submission.

17 [2005] EWHC 1638, [2007] WTLR 835.

The approach which applies to a creditor of the company also applies to a beneficiary of a trust which holds the company: they are entitled to "protect his own interests … without necessarily becoming a shadow director … In other words a position of influence (even a position of strong influence) is not necessarily a fiduciary position [ie is not necessarily a shadow directorship]."

HMRC sometimes argue that where someone resides in a property held by a company which is held by a trust of which that person is a beneficiary, it is (at least) highly likely that that person must be a shadow director.[18] This is unjustified for the reason set out in *Ultraframe*.

Suppose a person treats the property owned by the company as their own and has no dealings with the directors: they just ignore them. They do nothing (except perhaps charge their fees). In such a case the company may be a sham (or nomineeship). Whether or not that is so, the individual is not a shadow director. They give no instructions.

A non-resident person may be a "shadow director".

### 65.11.1 *When is an agent of a company a shadow director?*

HMRC accepted that the activities of an agent appointed by trustees to manage the day to day affairs of a trust are not normally relevant in determining the place of general administration (formerly relevant for the purposes of CGT trust residence).[19] It is suggested that a similar principle applies in the context of shadow directorship. An agency agreement under which the occupier of a property is responsible for routine maintenance matters on behalf of the company would not make the individual a "shadow director" as long as the decision to enter into contract was properly made by the directors and the directors properly supervise the work of the individual. This should not be difficult if the directors understand their duties are to all beneficiaries of the trust (not just to the settlor) and if the individual occupier of the property also understands this. It would be different if the agency agreement covered matters not usually delegated by an investment company to an agent.

---

18 Note that there is no support for this view in the HMRC Manuals. Employment Income Manual 11413 states correctly that *where* an individual residing in property is a shadow director, there is a benefit-in-kind charge. It conspicuously does *not* state that the mere fact of occupation makes a shadow directorship "highly likely".

19 See the 5th edition of this book, para 5.6.2.

### 65.11.2 *Arranging that an occupier is not a shadow director*

Suppose an existing company purchases a home on the open market for a UK resident foreign domiciliary. The choice of a home is a personal one and the individual would normally have to give a "communication" to the company which HMRC may regard as "directions or instructions". So it would normally be difficult to ensure that the individual was not a shadow director (at least applying *Deverell* at face value).

The position is different if:

(1) trustees purchase property directly, and
(2) the trustees transfer the property to a foreign company on their own initiative and without reference to the occupier.

The trustees may reason that if the life tenant dies (or on a ten year anniversary), the UK property would not be excluded property and a charge to inheritance tax would arise – the liability for which would fall on the trust fund. In discharge of their fiduciary duty they could transfer the property to a foreign company to create excluded property and protect the trust from the liability. The point is that the occupier has *not* instructed or even requested the company to purchase the property for them.[20] SDLT makes this expensive but the variant idea of assigning a contract entered into by the trustees may be practical.

It would be best if the directors and trustees were separate persons. All communications should be through the trustees and not the directors of the company. If the foreign domiciliary desires to sell and, perhaps, purchase another property,they should communicate their wishes to the trustees. Then:

(1) The trustees could put the company into liquidation. The liquidator would sell the property.
(2) Alternatively, the trustees may sell the company. That has stamp duty advantages, and should be attractive for a purchaser who is a foreign domiciled individual or non-resident trust.

The procedure may then be repeated for a new purchase. In these circumstances it would continue to be difficult for HMRC even to argue that the occupier was a shadow director.

20 I am grateful to Peter Vaines for this suggestion.

## 65.12 The cash equivalent: ss.105 and 106 computations

The charge is on the "cash equivalent". Section 103 ITEPA provides:

> **Method of calculating cash equivalent**
> (1) The cash equivalent is calculated—
> (a) under s.105 if the cost of providing the living accommodation does not exceed £75,000; and
> (b) under s.106 if the cost of providing the living accommodation exceeds £75,000.

Thus there are two methods of calculating the cash equivalent, here called a s.105 computation and a s.106 computation. This is for historical reasons, the s.106 computation having been introduced by the FA 1983 to supplement the ancestor of s.105. This structure makes the law twice as complicated as it need be.

## 65.13 Cost of providing accommodation

One needs to know the "cost of providing living accommodation":
(1) in order to decide between the s.105 and s.106 computation;
(2) in order to make the s.106 computation (if applicable, as it usually is).
This expression is defined in s.104:

> **General[21] rule for calculating cost of providing accommodation**
> For any tax year the cost of providing living accommodation is given by the formula A + I – P

In short, *A* is **A**cquisition cost, *I* is **I**mprovement cost, and *P* is **P**ayment of reimbursement. In full detail:

> *A* is any expenditure incurred in acquiring the estate or interest in the property held by a person involved in providing the accommodation,
> *I* is any expenditure incurred on improvements to the property which has been incurred before the tax year in question by a person involved in providing the accommodation, and
> *P* is so much of any payment or payments made by the employee to a person involved in providing the accommodation as represents—

21 For the exception see 65.16 (Revaluation of cost in cases of delayed occupation).

(a) reimbursement of A or I, or
(b) consideration for the grant to the employee of a tenancy or sub-tenancy of the property.

I consider reimbursement further in 65.20 (Property purchase financed by the foreign domiciliary).

### 65.13.1 *Person involved in providing the accommodation*

Section 112 ITEPA provides the wide definition:

> For the purposes of this Chapter "person involved in providing the accommodation" means any of the following—
> (a) the person providing the accommodation;
> (b) the employee's employer (if not within para (a));
> (c) any person, other than the employee, who is connected[22] with a person within para (a) or (b).

This defined phrase is only used in the definition of "cost of providing living accommodation".[23] ITEPA EN explains:

> 412. This definition makes it clear that it is necessary to look beyond the employer and the apparent owner of an interest in the accommodation. This is anti-avoidance legislation to counter schemes which depress the cost to the employer by using intermediate owners of interests.

## 65.14 Accommodation costing £75,000 or less: section 105 computation

Section 105 applies where the cost of providing accommodation does not exceed £75,000. This was a meaningful figure when the legislation was introduced in 1983 but inflation, the Chancellor's friend, has whittled away the real value of this limit so it must be exceptional now to find a purchase of less than £75,000. One might think the s.105 computation was a dead letter and one can turn directly to s.106. But s.106 refers back

22 Section 718 ITEPA provides:
"Section 993 of ITA 2007 (how to tell whether persons are connected) applies for the purposes of this Act."

23 See 65.13 (Cost of providing accommodation) and 65.16 (Revaluation of cost in cases of delayed occupation).

to s.105 so one needs to make the s.105 computation even in a s.106 case.

Section 105 ITEPA provides:

> **Cash equivalent: cost of accommodation not over £75,000**
> (1) The cash equivalent is to be calculated under this section if the cost of providing the living accommodation does not exceed £75,000.
> (2) The cash equivalent is the difference between—
> (a) the rental value of the accommodation for the taxable period, and
> (b) any sum made good by the employee to the person at whose cost the accommodation is provided that is properly attributable to its provision.

The key concepts are "rental value of the accommodation" and "making good" and I deal with these in turn.

65.14.1 "*Rental value of the accommodation*"

As from 22 April 2009, s.105 ITEPA provides:

> (3) The "rental value of the accommodation" for the taxable period is (subject to subsections (4) and (4A) the rent which would have been payable for that period if the property had been let to the employee at an annual rent equal to the annual value. ...
> (4) Subsection (4A) applies where—
> (a) a rental amount is payable by the person ("P") at whose cost the accommodation is provided in respect of the whole or part of the taxable period ("the relevant period"), and
> (b) the amount so payable is payable at an annual rate greater than the annual value.
> (4A) Where this subsection applies—
> (a) subsection (3) does not apply to the relevant period, and
> (b) instead the "rental value of the accommodation" for the relevant period is the rental amount payable by P in respect of the relevant period.
> (4B) A reference in subsection (4) or (4A) to a rental amount payable by P in respect of the relevant period is to the sum of—
> (a) any rent for the period payable by P, and
> (b) any amount attributed to the period in respect of a lease premium (see sections 105A and 105B)
> (5) If the rental value of the accommodation for the taxable period does not exceed any sum made good by the employee as mentioned in

subsection (2)(b), the cash equivalent is nil.

The key expression is "annual value". This is defined in s.110 ITEPA but it is not usually necessary to refer to that for UK property. ITEPA Explanatory Note states:

> 404. [Section 110] does not affect the Inland Revenue practice of using the gross rateable value as a proxy for "annual value". That practice will continue. The main use of this section is to provide guidance on how to arrive at the annual value of properties for which rent is not paid and in practice is only needed in cases where no gross rateable value can be found.[24]

The EI Manual provides:

> **11434 Living accommodation: Meaning of annual value for United Kingdom properties**
> The amount of annual value for UK properties is set out in the table below.

| Country | When first valued | Annual value to take |
|---|---|---|
| England & Wales | All cases | The 1973 gross rating value |
| Northern Ireland | All cases | The 1976 gross rating value |
| Scotland | | 100/270 × the 1985 gross rating value |
| Anywhere in the UK | No gross rating value set | Ask the appropriate District Valuer to confirm any estimated figure provided by the employer that you want to check.[25] |

24 Likewise the EN at Change 23:
"These provisions [ss.110 and 207 ITEPA] will clarify how to find annual values in respect of those properties for which the practice of using gross rateable values or a proxy for them is inapplicable – for example overseas properties. In the case of both these and other properties, all the current practices used in quantifying the cash equivalent of the benefit of living accommodation will continue."

25 The Manual continues:
"If no such estimate is provided or the estimate is not acceptable the District Valuer will provide a (not negotiated) figure. If the taxpayer does not accept that figure the District Valuer will try to agree a figure with the taxpayer. For the procedure for referring to the District Valuer see EI Manual 11437."

> For the formula to convert a net rating value figure to a gross rating value figure see EI Manual 11438.

Thus for most purposes the s.105 computation is rateable value less sums "made good" to the employer. That is usually a trivial amount which has no relation to the value of the benefit of the living accommodation. It is a substantial amount in two cases:
(1) where the company employer pays a market rent for the property;
(2) where the property is not UK situate (and so there is no rateable value).

This practice (which is concession not law) exists for historical reasons. It is not surprising the Tax Law Rewrite did not think it appropriate to express all this in ITEPA. The rules are incoherent.

### 65.14.2 *"Making good": meaning*

The EI Manual provides:

> **21120 The benefits code: What is meant by "making good"** [June 2006]
> "Making good" simply means giving something in return for the benefit. What is being made good is the expense incurred by the employer or other person providing the benefit. It follows that in order to make good that expense the employee will give money, or something that can be measured in money. Usually the employee will "make good":
> - by a direct payment or
> - by deduction from salary or
> - by a suitable debit to the employee's current account in the employer's books and records.
>
> Any of these methods is acceptable.
> The giving of services by the employee, or anything that is not measured in money terms is not "making good", see *Stones v Hall* (60 TC 737).
> **(This text has been withheld because of exemptions in the Freedom**

> **of Information Act 2000)**[26]
> As regards "making good" by waiver of remuneration see EI Manual 21122.

It is clearly "making good" if:
(1) the company pays the costs of maintenance and insurance; and
(2) the individual reimburses the company by a cash payment.
Does the employee make good the cost if they pay the cost of maintenance and insurance directly? Section 110 ITEPA envisages that this expenditure will be paid by the employer. In addition, the maintenance of the building is probably not a "sum" made good. EIM Manual is equivocal:

> **11439. Living accommodation: annual value of UK property: Employee responsible for repairs or insurance.** [June 2006]
> ...
> An employee may be responsible for the cost of repairs or insurance under the terms of his or her lease or employment. *(This text has been withheld because of exemptions in the Freedom of Information Act 2000.)*[27] As regards the discharge of the employee's pecuniary liability in respect of such items *see* EIM00520.

Note that the payment of a sum "making good" may constitute taxable property income of the company which receives it. The IHT and CGT implications may also need to be considered, but the sums involved are not usually significant.

### 65.14.3 *Making good: timing*

EIM provides:

---

26 [Author's Note] The "text withheld" announcement was added in June 2006. Previously the Manual stated "In any case where the taxpayer argues that an interest-free loan has been made to this employer specifically to make good the cost or value of a benefit, make a submission to Personal Tax (Technical), Solihull." That instruction probably survives in the withheld text.

27 The text formerly read:
"If an employee claims an adjustment to the annual value (derived from the table in EI Manual 11434) because the facts of an employee's case are not those envisaged by s.110 ITEPA, make a full report to Personal Tax (Technical), Solihull."
It seems a safe bet that that passage survives in the withheld text.

**21121. The benefits code: When must making good take place?**
The legislation does not set a time limit on the "making good". This will usually happen shortly after the expense is incurred by the person providing the benefit. But you need not object to a belated "making good" if it is done within a reasonable time of the employee becoming aware that the chargeable benefit can be reduced, in whole or in part, by reimbursing the expense incurred by the provider.
What constitutes a "reasonable time" will depend on the facts of the case. Do not allow a deduction for "making good" which takes place after a charge to tax on the benefit concerned has become final and conclusive.

## 65.15 Accommodation over £75,000: section 106 computation

Section 106 ITEPA provides:

**Cash equivalent: cost of accommodation over £75,000**
(1) The cash equivalent is calculated under this section if the cost of providing the living accommodation exceeds £75,000.
(2) To calculate the cash equivalent—
*Step 1* Calculate the amount that would be the cash equivalent if s.105 applied (cash equivalent: cost of accommodation not over £75,000).

See 65.14 (Accommodation costing £75,000 or less: section 105 computation).

*Step 2* Calculate the following amount ("the additional yearly rent")—
ORI × (C – £75,000)

In short, *ORI* is **O**fficial **R**ate of **I**nterest; *C* is **C**ost. In full detail:

ORI is the official rate of interest in force for the purposes of Chapter 7 of this Part (taxable benefits: loans) on 6 April in the tax year, and
C is the cost of providing the accommodation calculated—
(a) in accordance with s.104 (general rule for calculating cost of accommodation),[28] or
(b) in a case where s.107 applies (special rule for calculating cost of

28 See 65.13 (Cost of providing accommodation).

> providing accommodation), in accordance with that section instead.[29]

The label "additional yearly rent" is misleading: the "additional yearly rent" calculated in this way will not bear a close relationship with any actual market rent.

> *Step 3* Calculate the rent which would have been payable for the taxable period if the property had been let to the employee at the additional yearly rent calculated under step 2.

This step reduces the "additional *yearly* rent" to that for the "taxable period" (defined in s.102(2)).

> *Step 4* Calculate the cash equivalent by—
> (a) adding together the amounts calculated under steps 1 and 3, and
> (b) (if allowed by subsection (3)) subtracting from that total the excess rent paid by the employee.
> (3) In step 4—
> (a) para (b) only applies if, in respect of the taxable period, the rent paid by the employee in respect of the accommodation to the person providing it exceeds the rental value of the accommodation for that period as set out in s.105(3) or (4)(b), as applicable, and
> (b) "the excess rent" means the total amount of that excess.

In short, the charge is (1) the s.105 computation (rateable value) and (2) (official rate of interest on purchase price less £75,000) less rent.

This works (more or less) where the s.105 computation is based on the nominal amount of rateable value. It gives double taxation where the s.105 computation is based on actual market rental value. ESC A91 gives relief here:

> *Living accommodation provided by reason of employment*
> This concession applies to living accommodation treated as earnings under ITEPA 2003 Part 3, Chapter 5. Where ITEPA 2003 s.106 applies and the cash equivalent of the benefit of the accommodation is calculated by reference to the annual rent the property might fetch on the open market, the Inland Revenue will disregard "the additional

29 See 65.16 (Revaluation of cost in cases of delayed occupation).

yearly rent". If "the additional yearly rent" is disregarded then the amount of "the excess rent" is deemed to be nil.[30]

## 65.16 Revaluation of cost in cases of delayed occupation

Normally the s.106 computation is based on the employer's acquisition cost (ie historic cost). Market value of the property later is not relevant. This rule could favour the taxpayer or HMRC, but as time passes it is likely to favour the taxpayer. In one case only there is an adjustment to market value. Section 107 ITEPA provides:

> **Special rule for calculating cost of providing accommodation**
> (1) This section contains a special rule for calculating the cost of providing living accommodation which—
> (a) operates for the purposes of step 2 of s.106(2) (calculating the additional yearly rent), and
> (b) accordingly only operates where the cost of provision for the purposes of s.106(1) (as calculated under s.104) exceeds £75,000.

In practice condition (b) will almost always be satisfied (except perhaps for property purchased many years ago).

> (2) This section applies if, throughout the period of 6 years ending with the date when the employee first occupied the accommodation ("the initial date"), an estate or interest in the property was held by a person involved in providing the accommodation.
> It does not matter whether it was the same estate, interest or person throughout.

In short, this condition is that the property has been owned by the company for six years before the employee moves in.

> (3) For any tax year the cost of providing the living accommodation for the purposes mentioned in subsection (1)(a) is given by the formula—
> $$MV + I - P$$

In short, *MV* is **M**arket **V**alue; *I* is **I**mprovement cost; *P* is **P**ayments in

30 I do not understand the point of the last sentence, for if the additional yearly rent is disregarded, the "excess rent" is irrelevant.

return. In full detail:

> MV is the price which the property might reasonably be expected to have fetched on a sale in the open market with vacant possession as at the initial date,
> I is any expenditure incurred on improvements to the property which has been incurred during the period—
> (a) beginning with the initial date, and
> (b) ending with the day before the beginning of the tax year, by a person involved in providing the accommodation, and
> P is so much of any payment or payments made by the employee to a person involved in providing the accommodation as represents—
> (a) reimbursement (up to an amount not exceeding MV) of any expenditure incurred in acquiring the estate or interest in the property held on the initial date,
> (b) reimbursement of I, or
> (c) consideration for the grant to the employee of a tenancy or sub-tenancy of the property.

This may arise where:
(1) a foreign domiciliary (or trust) purchases a company holding a property acquired more than six years previously;
(2) an individual then occupies the property and becomes a shadow director.
Next is an anti-avoidance provision to block an obvious scheme to devalue MV:

> (4) In estimating MV no reduction is to be made for an option in respect of the property held by—
> (a) the employee,
> (b) a person connected with the employee, or
> (c) a person involved in providing the accommodation.

Lastly, for completeness, there is transitional relief where the employee first occupied the property before 31 March 1983: para 21 Sch.7 ITEPA.

## 65.17 Accommodation provided for more than one employee

Section 108 ITEPA provides:

> **Cash equivalent: accommodation provided for more than one employee**
> (1) If, for the whole or part of a tax year, the same living accommodation is provided for more than one employee at the same time, the total of the cash equivalents for all of the employees is to be limited to the amount that would be the cash equivalent if the accommodation was provided for one employee.
> (2) The cash equivalent for each of the employees is to be such part of that amount as is just and reasonable.

EIM provides at 11411:

> **11411 - Living accommodation: provided to more than one employee in the same period: practical points**
> The following is an example of how s.108 ITEPA 2003 works.
> An employer provides a ten room house for the shared use of three unrelated employees. Each employee has sole use of a bedroom and shared use of the other seven rooms. Without s.108 the cash equivalent of the benefit of the living accommodation provided to each employee would be 80% of the whole house. However s.108 limits the sum of the charges on the three of them to one full charge on the whole house. If there are no special factors each employee will be chargeable on the cash equivalent of a benefit of 33.3% of the cash equivalent for the whole house.
> Section 108 is not relevant in some family situations. For example a husband and wife both work for the same employer and live together in a house provided by their employer. The husband's job is the one that has accommodation provided with it and the wife's does not. The true construction here is that the living accommodation is only provided by the employer to the husband and the wife lives in it with her husband as part of normal domestic arrangements. So the full living accommodation charge would be on the husband with no charge on the wife.
> By contrast for an example of s.108 being relevant in a family situation see example EIM11421.

## 65.18 Ways to avoid benefit in kind

Ways to avoid the entire benefit in kind charge are (in short):

(1) to ensure that the occupier is
  - (a) not an officer (ie not a director or company secretary, which is straightforward);

   (b) not an employee (which should be straightforward); and
   (c) not a "shadow director"; or
(2) not to use a company; or
(3) to reimburse the company for its expenditure.

## 65.19 Reimbursement as solution to IT charge

Reimbursement of "A" and "I" will solve the s.106 charge if it reduces the "cost of providing the accommodation" to nil (or at least to below £75,000). It does not avoid the s.105 charge (but that may be trivial or avoided by "making good" or arranging that the individual is not a shadow director).

### 65.19.1 *Who makes the reimbursement?*

Reimbursement is only deductible if it is made by the employee. For example, if
(1) a company purchases property;
(2) an individual (F) reimburses the cost;
(3) another individual (G) comes to occupy the property (and is a shadow director);

then F's reimbursement will not reduce the s.106 computation for G. Again, if a member of the family or household of the shadow director occupies the property, and that member of the family or household reimburses the company, that reimbursement will not reduce the s.106 computation for the shadow director. In practice this is not likely to happen often.

The IHT and CGT implications of making the reimbursement need to be considered.

## 65.20 Property purchase financed by the foreign domiciliary

Sometimes a company structure is set up specifically for the purpose of purchasing the home. That is, there is an arrangement under which:
(1) The individual agrees in principle to purchase a property.
(2) The individual:
   (a) lends the purchase price to a company, or
   (b) transfers the purchase price to a trust which lends the purchase price to a wholly owned company.

(3) The company makes the purchase.

This section considers whether an arrangement of this kind offers a defence to the benefit in kind charge.

### 65.20.1 *"Making good" and s.105 computation*

The s.105 computation allows a deduction for:

> any sum made good by the employee to the person at whose cost the accommodation is provided that is properly attributable to its provision.

The taxpayer would have to show that the interest forgone on the interest-free loan from the individual (directly or indirectly to the company):

(1) is a "sum", and

(2) "makes good" the provision of the accommodation.[31]

Whether the interest forgone "makes good" the provision of accommodation is a question of fact. Assuming the reason the interest is forgone is to enable the company to provide the accommodation, this condition should be satisfied.

Whether the interest forgone is a "sum" is a question of law; it is suggested that the word should not be construed strictly or technically, and an amount of interest forgone may be a "sum". See 65.14.2 ("Making good": meaning).

### 65.20.2 *Loan to company as defence to section 106 computation*

Sums "made good" are not deductible as such in the s.106 computation. Rent is deductible in a s.106 computation but the interest forgone on an interest-free loan is not rent. No-one suggests that the company would be taxable on the interest forgone as property income!

It has been suggested that a company financed by an interest-free loan has not incurred expenditure. If this is so then it is a complete answer to the s.106 charge because the figure *A* in the formula for the cost of providing accommodation is reduced to zero. The suggestion is raised in Stephen Brandon QC's *Taxation of Non-UK Resident Companies and their Shareholders*, Key Haven Publications, paras 5.3.3.8 to 5.3.3.15

31 It is assumed that the interest forgone exceeds the annual or rateable value of the accommodation, which will normally be the case.

citing *Wicks v Firth* [1983] STC 25 at 31:

> The scholarships were provided at the cost of ICI and not at the cost of the Trustees because the Trustees with moneys supplied by ICI were only performing fiduciary duties …

However (as Stephen Brandon QC recognises), it is a step from this to argue that a company which is not performing fiduciary duties does not incur expenditure. If the house is in the accounts of the company as an asset, how could it have acquired that asset without "incurring expenditure"? Suppose the boot were on the other foot: a company lent money interest-free to a shadow director to finance his own purchase. Would anyone accept that the company had provided the accommodation purchased by the individual? This is an argument to take *in extremis*.

### 65.20.3 *Reimbursement by the individual*

In computing the "cost" of providing the accommodation one may deduct payments representing reimbursement. This deduction would reduce the s.106 computation.[32] However, the interest forgone on the loan is not "reimbursement". In addition, it is also not a "payment".

### 65.20.4 *Release of loan*

A possible solution would be for the individual to release the debt which is due to them from the company.

Statute requires a "payment" representing a reimbursement. It is a moot point whether the release of the debt would be a "payment". One should take the cautious view that it may not be. The matter should be dealt with as follows:

(1) The individual transfers the funds to the company. They should be received in the company's bank account. This should be accompanied by a letter to the company saying: "I have today procured the payment of £X to your account. This is reimbursement for the expenditure you have incurred in acquiring [the property]. However, I require repayment of the debt due to me of £X."

32 See 65.19 (Reimbursement as solution to IT charge).

(2) The company may then use its funds to repay its debt due to the individual.

Although this is a circular transaction (the payment being matched by immediate repayment) that does not nullify it for tax purposes: compare *MacNiven v Westmoreland* [2001] STC 237.

If the company incurs additional improvement expenditure in the future, this should be matched by further reimbursements so the total cost of providing the living accommodation (A+I–P) remains less than £75,000.

The reimbursement of the company is not a transfer of value for IHT purposes if the individual is (or is treated as) the beneficial owner of the company. For the same reason the reimbursement is not a disposal by way of gift and so is outside the scope of s.102 FA 1986 (gifts with reservation).

The effect of the gift (the reimbursement) is to increase the value of the shares of the company without any corresponding rise in the CGT base cost. So the gift increases the chargeable gain on the disposal. This should not matter so long as the law remains in its current form.

### 65.20.5 *Reimbursement: timing*

When must reimbursement be made? It is considered that the time limit is the same as for "making good". Reimbursement must be done within a reasonable time of the taxpayer becoming aware that the benefit in kind charge can be reduced by reimbursement.[33] In practice HMRC accept this.

## 65.21 Co-ownership defence to living accommodation charge

This section considers the position where an individual owns a share in the property jointly with the company.

Co-ownership raises similar but not identical issues for all provisions which charge tax on benefits, such as s.87 TCGA, s.731 ITA, s.203 ITEPA, and IHT gift with reservation rules as well as the living accommodation charge. The discussion here is limited to the case where an individual and a company are co-owners. Similar but not identical issues arise with these provisions where an individual and a trust are co-owners.

33 See 65.14.3 (Making good: timing)

### 65.21.1 *The land law position*[34]

The starting point is to ascertain the rights of the co-owners as a matter of land law. Co-owned land in England and Wales is always held on trust. The person(s) holding legal title to the land are here called "the trust-of-land trustees".[35] The position is governed by the Trusts of Land and Appointment of Trustees Act 1996.[36] Section 12(1) TLATA provides:

> A beneficiary who is beneficially entitled to an interest in possession in land subject to a trust of land is entitled by reason of his interest to occupy the land at any time if at that time—
> (a) the purposes of the trust include making the land available for his occupation (or for the occupation of beneficiaries of a class of which he is a member or of beneficiaries in general), or
> (b) the land is held by the trustees so as to be so available.

Prior to 1997, a co-owner of land had a right to occupy that land, in the absence of any contrary indication or agreement with the other co-owners:

> It has been well established law ... that a tenant-in-common under a trust for sale has the right to occupy the whole property without payment of rent ...[37]

This co-ownership right has been superseded and replaced by s.12 TLATA. In *IRC v Eversden*, Lightman J explained:

---

34 I am grateful to Charles Harpum for his assistance on this section.

35 (The term used in the legislation is "the trustees of land".) The company may be the (or one of the) trust-of-land trustees; it makes little practical difference and no difference at all for tax. (If the company is not a trustee it can apply to court to require the trustees to exercise their powers.) The shares in the company may also be held on trust but that trust is not relevant here.

36 Further consideration is needed for:
(1) Land outside England and Wales.
(2) Jointly owned chattels.
(3) Periods before 1 January 1997, when the TLATA took effect, but that will not now normally be relevant.
I would be grateful to any reader who could inform me of the position in Scotland.

37 *IRC v Lloyds Private Banking* [1998] STC 559 at p.561; likewise *City of London Building Society v Flegg* [1988] AC 54 at 81.

> On and after 1 January 1997 when the TLATA came into force, a tenant in common in equity ... was no longer automatically entitled ... to occupation of the property purchased. Section 12 of the TLATA provided that he should only become so entitled if one of two alternative conditions were satisfied…[38]

He then set out s.12(1).

While arguments might be advanced to the contrary this analysis should be followed, because it is a clear and workable rule. Otherwise it would be necessary to consider the pre-1997 law and try to work out the combined effect of that when read with s.12.[39]

In the following discussion, the entitlement to occupy land conferred by s.12(1) is called the "statutory occupation right".

The individual will obviously have a statutory occupation right to occupy the property under s.12 because:

(1) they are a beneficiary under the trust-of-land.
(2) they are beneficially entitled to an interest in possession in the land.
(3) Both conditions (a) and (b) of s.12(1) are satisfied:[40]
    (a) the purposes of the trust-of-land include making the land

---

38 [2002] STC 1109 at [24] reported 75 TC 340 under the name *IRC v Greenstock's Executors*.

39 Barnsley "Co-owner rights to occupy land" [1998] CLJ 123 is a minority view; contrast Roger Smith, *Plural Ownership* Oxford University Press (2005) p.136.
This conclusion is not affected by *Re Byford* [2003] EWHC 1267; [2004] 1 P&CR 159. In this case the co-owners were a wife and her former husband's trustee in bankruptcy. The issue was the relative size of their shares. The wife claimed a larger share because she had paid the mortgage since her husband's bankruptcy. The issue is not covered by any provision in TLATA. So the common law principles (known as "equitable accounting") applied. The general principle of equitable accounting is that one co-owner cannot take the benefit of an increase in the value of the property without making an allowance for what has been expended by the other in order to obtain it. Thus the wife had credit for her payments of mortgage capital and improvement expenditure. She wanted credit for interest payments, but it was held that she must set against that credit the benefit of occupation (the wife had occupied the property and the trustee in bankruptcy of course had not occupied). There is nothing in this which affects rights of occupation or other rights under ss.12, 13 TLATA; though note Helen Conway's criticism in [2003] *The Conveyancer* 533.

40 Though it would suffice if only one of the conditions of s.12(1) were satisfied.
Section 12(2) provides: "Subsection (1) does not confer on a beneficiary a right to occupy land if it is either unavailable or unsuitable for occupation by him." This will not apply here.

available for their occupation; and

(b) the land is held by the trust for land trustees so as to be available for the purpose.

The company does not have a statutory occupation right. It does not meet the conditions of s.12(1). No third person would have a statutory occupation right even if the company sold or sub-let their interest under the trust-of-land to that person. The third person would not satisfy conditions (a) or (b) of s.12(1).[41]

The trust-of-land trustees have various powers, but they do not have power to override the individual's occupation right or to require them to pay an occupation rent. This is fundamental so I set out the provisions in detail.

Section 13(1) TLATA provides:

> Where two or more beneficiaries are (or apart from this subsection would be) entitled under s.12 to occupy land, the trustees of land [ie the trust-of-land trustees] may exclude or restrict the entitlement of any one or more (but not all) of them.

The trust-of-land trustees cannot under s.13(1) override the individual's statutory occupation right because it is not the case that "two or more beneficiaries are … entitled under s.12 to occupy land".

Section 13(6) TLATA provides:

> Where the entitlement of any beneficiary to occupy land under s.12 has been excluded or restricted, the conditions which may be imposed on any other beneficiary under subsection (3) include, in particular, conditions requiring him to—
> (a) make payments by way of compensation to the beneficiary whose entitlement has been excluded or restricted, or
> (b) forgo any payment or other benefit to which he would otherwise be entitled under the trust so as to benefit that beneficiary.

The trust-of-land trustees cannot require the individual to pay compensation (an occupation rent) to the company under s.13(6) because the company has no statutory occupation right: s.13(6) assumes that compensation can only be required in a case where:

41 Also s.12(2) TLATA would probably apply, though it is not necessary to rely on that.

(1) a co-owner had such a right; and
(2) the right was excluded or restricted (which can only be done under s.13(1)).

Section 13(3) TLATA provides another power:

> (3) The trustees of land [ie the trust-of-land trustees] may from time to time impose reasonable conditions on any beneficiary in relation to his occupation of land by reason of his entitlement under s.12.
>
> …
>
> (5) The conditions which may be imposed on a beneficiary under subsection (3) include, in particular, conditions requiring him—
> (a) to pay any outgoings or expenses in respect of the land, or
> (b) to assume any other obligation in relation to the land or to any activity which is or is proposed to be conducted there.

The trust-of-land trustees can do little under s.13(3) except to require the individual to pay outgoings.[42]

It is reasonably clear that ss.12–14 TLATA are a comprehensive code and there is no common law right to an occupation rent except in a case of ouster.

The trust-of-land trustees also have power to sell the property but the court has discretion either to prevent or to require a sale.[43] The question here is whether the court would require a sale of the property if the individual did not want a sale but the company did. In my opinion a court would not do so, unless either the individual no longer wished/ceased to occupy the property, or the company had a good reason for a sale, eg it was insolvent. Section 15(1) TLATA provides:

> The matters to which the court is to have regard in determining an application for an order under s.14 include—
> (a) the intentions of the person or persons (if any) who created the trust,
> (b) the purposes for which the property subject to the trust is held,
> (c) the welfare of any minor who occupies or might reasonably be expected to occupy any land subject to the trust as his home, and

42 In particular, the trust-of-land trustees cannot use this power to require the individual to pay an occupation rent, as that must be done under s.13(6) or not at all. Otherwise s.13(6) would be entirely otiose. There is a further restriction in s.13(7) but that is not so important here.

43 Sections 6, 14 TLATA.

(d) the interests of any secured creditor of any beneficiary.

None of these factors would support a sale.[44]

In short, the company, although co-owner, can do almost nothing while the individual remains in occupation, except require them to pay the outgoings.

Since this is the case, then the fact that the company does nothing, and the individual remains in occupation, does not mean that the company has provided accommodation, or conferred a benefit, in the years in which the individual occupies. This is because the individual has the right of occupation independently of anything the company does or can do.

In *IRC v Eversden*[45] the settlor gave a trustee co-owner a 95% share in a house, the settlor retaining 5%. The settlor continued to occupy. It was held that the trustee had not provided a benefit as the settlor was entitled to occupy. This took place before the TLATA 1996 but the position would be the same under the TLATA.

The matter is made more complicated by *Christensen v Vasili* 76 TC 116. This concerned a co-owned car. The question was whether there was a tax charge under (what is now) s.144 ITEPA which applies where a car is "made available" to an employee. The Special Commissioner held that the car was not made available:

> As co-owners the employer and employee each have the right to use the car, but they each have that right because they are each owners, not because one has "made available" the car to the other.[46]

This conclusion was with respect plainly right. Unfortunately it was flatly

---

44 An individual's position is even stronger if they have more than a 50% share, as s.11(1) TLATA normally gives them further support. This provides:

"The trustees of land shall in the exercise of any function relating to land subject to the trust—

(a) so far as practicable, consult the beneficiaries of full age and beneficially entitled to an interest in possession in the land, and

(b) so far as consistent with the general interest of the trust, give effect to the wishes of those beneficiaries, or (in case of dispute) of the majority (according to the value of their combined interests)."

See too s.15(3) TLATA which requires a court to have regard to the beneficiary with a majority share. But it is not necessary to rely on this.

45 [2002] STC 1109 reported 75 TC 340 under the name *IRC v Greenstock's Executors*.

46 76 TC 116 at p.124, para 22.

if unconvincingly rejected in the High Court:

> In their ordinary sense, the question "who made the car available to Mr. Vasili?" must be answered in the sense that his employer did so ...[47]

It is suggested that *Vasili* must be distinguished from the normal co-ownership situation because:

(1) in *Vasili* both employer and employee were entitled to possession of the car: in the co-ownership situation considered here the company is not entitled to occupation;

(2) in *Vasili* the car belonged to the employer before he sold a 5% share to the employee. In that sense the employer made the car available. The position would have been different if the car had been purchased in those shares from the outset.

It is unfortunate that *Eversden* was not cited in *Vasili* since the two cases are difficult to reconcile.

### 65.21.2 *Employment-related benefit*

It might be argued that the company co-owner provides a benefit other than living accommodation:

(1) If the company is the trustee, by not exercising its powers of sale (or to require the individual co-owner to pay an occupation rent); or

(2) If the company is not sole trustee, by consenting to the trustees not exercising those powers.

There is normally no benefit here because the trustees have no such powers. If there were a benefit, the value of the benefit is "the expense incurred in or in connection with the provision of the benefit". The company incurs no expense, so the value of the benefit for tax purposes is nil.[48]

If the company incurs costs of maintenance, that is an employment related benefit.

47 76 TC 116 at p.131, para 13.

48 It is considered that this particular benefit does not "consist of an asset being placed at the disposal of the employee" so the valuation is not in accordance with s.205 ITEPA.

### 65.21.3 *Benefit provided by company entering into co-ownership arrangement*

It follows that the company provides a significant benefit to the individual when and if it uses its funds to acquire a share as co-owner (unless it pays a discounted price for the share). Could this benefit be taxable?[49]

In *IRC v Eversden (Greenstock's Executors)* trustees purchased a 95% share in a house ("Meadows"), and the settlor purchased 5%. The judge said:

> Under the agreement with the trustees (providing as it did for the settlor to pay 5% of the purchase price of Meadows and acquire in consequence a right of occupation) *the trustees conferred on the settlor the right to occupy Meadows for an indefinite period rent free*.[50]
> (Emphasis added)

This took place before the TLATA 1996, but the position would be the same now.

In a case where the company provides its funds towards a joint purchase of a new property, and the individual holds as co-owner, the company has provided a benefit of indefinite rent-free occupation; more accurately the benefit is giving the individual the opportunity to acquire a right to indefinite rent-free occupation at a "knockdown price". The benefit is provided at the time the company completes the contract to purchase the land as co-owner.

The benefit would in principle be chargeable in co-ownership cases under s.87 TCGA or s.731 ITA. Since there are no express valuation rules the charge would be on the market value, which would have to be ascertained as best as one can in the light of the circumstances.

For employment income purposes the position is different. It is arguable that:

(1) The benefit is not the provision of living accommodation.
(2) The value of the benefit for IT purposes is nil because:

---

49 This issue does not arise where the company receives its share of the land gratuitously.

50 75 TC 340, [2002] STC at p.1129. The point was rightly not appealed. Prior to purchasing Meadows another house in joint ownership had been sold. The position for Meadows would be different if the sale of the first house had been conditional on the purchase of Meadows (the new one), that is, if the settlor only agreed to join in the sale of the first if the trustee agreed to join in the purchase of Meadows.

(a) The company incurs no expense in connection with its provision. (The purchase price is not such an expense, because the money going out is matched by a property share coming in.)
(b) The special valuation rules of ss.205, 206 ITEPA do not apply.

65.21.4 *The HMRC view*

The EI Manual provides at 11414:

> **Living accommodation: Avoidance area: Co-ownership cases**
> [April 2007]
> In these cases the employer and employee co-own the living accommodation. The usual arrangement is that the employer and employee own the property as tenants in common through a trust.
> A tenant in common has a legal right to use 100% of the property 100% of the time even though a tenant in common may only own a much smaller interest in the property (say 30%). It is argued against us in such a case that the employee's rights to use the living accommodation come from the employee's legal rights as a tenant-in-common. So it is argued that no living accommodation has been provided by reason of the employment.
> There are arguments to support a benefit charge within Part 3 Chapter 5 ITEPA in these cases and the strength of those arguments will depend on the facts of the case. PAYE Technical for any case in which you want to argue the point.[51] Your submission should include a copy of any trust deed under which the land is held.

It is interesting to note that HMRC accept that there is not always a charge in co-ownership cases: "it depends on the facts of the case". That is consistent with the view taken here.

In the context of s.87 TCGA, the current HMRC view is that there is an annual benefit which is the difference between:
(1) the rental value of the property in question; and
(2) the hypothetical rental value of a hypothetical property of a value equal to the proportionate value of the taxpayer's share in the property, ie if the taxpayer holds a 50% share, one looks to the rental

51 *Sic*. Presumably a phrase such as "Please submit your papers to ..." was accidentally omitted from the start of this sentence.

value of a property worth 50% of the actual property.[52]

But this view is very difficult to defend.

## 65.22 Other defences to BiK charge

### 65.22.1 *The caretaker's defence*

Section 99 ITEPA provides:

> **Accommodation provided for performance of duties**
> (1) This Chapter does not apply to living accommodation provided for an employee if it is necessary for the proper performance of the employee's duties that the employee should reside in it.
> (2) This Chapter does not apply to living accommodation provided for an employee if—
> (a) it is provided for the better performance of the duties of the employment, and
> (b) the employment is one of the kinds of employment in the case of which it is customary for employers to provide living accommodation for employees.

It has been suggested that one can use this to avoid the charge. The idea is to enter into a contract whereby the individual who is to occupy the property does so as caretaker for the company. This does not work. While it may normally be necessary or customary for a caretaker to reside in accommodation, a person does not become a "caretaker" just by being labelled as such. If the individual is occupying an extremely valuable property with only nominal caretaking duties, this is not the same "type of employment" as a normal caretaker. The EI Manual rightly provides:

> **11342 Living accommodation exemption: Necessary for proper performance of the duties: Types of employee** [May 2010]
> Part 3 Chapter 5 ITEPA does not apply to living accommodation provided for an employee if it is necessary for the proper performance of the duties that the employee live in the accommodation provided (see EI Manual 11341).
> The following types of employee may be accepted as being within the exemption:

---

52 Private correspondence.

> ...
> Caretakers living on the premises. This only covers those with a genuine full time caretaking job. ...

### 65.22.2 *Payment of rent*

The payment of rent will count as "making good" for the s.105 computation and reduce the s.106 computation. However, this proposal raises the problems of IT on the rent. Also, to reduce the s.106 computation to zero, the rent may have to exceed the market rent, especially for very valuable properties.[53]

### 65.22.3 *Lease premiums*

The FA 2009 inserts the long and complex provisions of s. 105A, 105B ITEPA, which I hope to consider in a future edition.

The EIM suggests an argument that premiums should sometimes be treated as rent. This was discussed in detail in the 2008/09 edition of this work, but I expect that HMRC will generally abandon that point now (if indeed they ever took it seriously).

## 65.23 Foreign homes relief

Section 100A(1) ITEPA provides a relief which I call "**foreign homes relief**":

> This Chapter does not apply to living accommodation outside the UK provided by a company for a director or other officer of the company ("D") or a member of D's family or household if—
> (a) the company is wholly owned by D or D and other individuals (and no interest in the company is partnership property), and
> (b) the company has been the holding company of the property at all times after the relevant time.

I refer to the company providing the property as "**the provider company**". I refer to the condition in (1)(a) as"**the wholly owned condition**" and the

53 By contrast a market rent for the use of chattels will prevent there being a "benefit" for the purposes of the benefit in kind charge on chattels.

condition in (1)(b) as "**the holding company condition**". Thus the relief applies where:

(1) The provider company provides accommodation for a director[54] of the provider company ("D") or a member of D's family or household. If the accommodation is provided for an employee who is not a director (or a member of a director's family or household) of the provider company the relief will not apply. In practice that is not likely to matter.

(2) The provider company meets the wholly owned condition.

(3) The provider company meets the holding company condition.

### 65.23.1 *Wholly owned condition*

The relief does not apply if any shares in the provider company are held by a trust or partnership, or if some of the shares are held by a company. The position for 100% subsidiaries is considered below.

### 65.23.2 *Holding company condition*

Before considering the definition of "holding company of the property" it is necessary to set out a subsidiary definition. Section 100A(4) ITEPA defines "relevant interest in the property":

> "Relevant interest in the property" means an interest under the law of any territory that confers (or would but for any inferior interest confer) a right to exclusive possession of the property at all times or at certain times.

We can now turn to the definition of "holding company" of the property. Section 100A(2) ITEPA provides:

> The company is "the holding company of the property" when—
> (a) it owns a relevant interest in the property,
> (b) its main or only asset is that interest, and
> (c) the only activities undertaken by it are ones that are incidental to its ownership of that interest.

54 Or other officer; for brevity references to "directors" in this section include other officers.

### 65.23.3 *Subsidiary holding company*

Suppose the property is held via a subsidiary company thus:

*Parent company ("P")*

|

*Subsidiary Co ("S")*

|

*Property*

S is in principle the holding company of the property but it does not meet the wholly owned condition. P is not the holding company of the property within s. 100A(2). However s. 100A(3) ITEPA provides:

> The company is also "the holding company of the property" when—
> (a) a company ("the subsidiary") which is wholly owned by the company [*ie the parent company]* meets the conditions in paras (a) to (c) of subsection (2),
> (b) the company's [*ie the parent company's]* main or only asset is its interest in the subsidiary, and
> (c) the only activities undertaken by the company *[ie the parent company]* are ones that are incidental to its ownership of that interest.

Thus P also qualifies as "the holding company of the property." Strictly this does not help as P is not the company providing the accommodation but in practice the relief is clearly intended to apply here.

### 65.23.4 *"The relevant time"*

Section 100A(5)(6) ITEPA defines "relevant time":

> (5) "The relevant time" is the time the company first owned a relevant interest in the property; but this is subject to subsection (6).
> (6) If—
> (a) none of D's interest in the company was acquired directly or indirectly from a person connected with D, and
> (b) the company owned a relevant interest in the property at the time D first acquired an interest in the company,
> "the relevant time" is the time D first acquired such an interest.

### 65.23.5 *Exceptions*

Section 100B ITEPA sets out three wide exceptions to this narrow relief:

> (1) Section 100A(1) does not apply if subsection (2), (3) or (4) applies.

The first two exceptions concern connected[55] companies:

> (2) This subsection applies if—
> (a) the company's interest in the property was acquired[56] (directly or indirectly) from a connected company at an undervalue, or
> (b) the company's interest in the property derives from an interest[57] that was so acquired.
> (3) This subsection applies if, at any time after the relevant time—
> (a) expenditure in respect of the property has been incurred (directly or indirectly) by a connected company, or
> (b) any borrowing of the company (directly or indirectly) from a connected company has been outstanding (but see subsection (7). ...
> (7) For the purposes of subsection (3)(b), no account is to be taken of—
> (a) any borrowing at a commercial rate, or
> (b) any borrowing which results in D being treated under Chapter 7 (taxable benefits: loans) as receiving earnings.

Lastly there is an all-purpose tax motive restriction:

> (4) This subsection applies if the living accommodation is provided in

---

55 "Connected" is very widely defined in s.100B(9) ITEPA:
"In this section 'connected company' means—
(a) a company connected with D, with a member of D's family or with an employer of D, or
(b) a company connected with such a company."

56 Section 100B(5) ITEPA provides a commonsense definition:
"In subsection (2), references to the acquisition of an interest include the grant of an interest."

57 Section 100B(6) ITEPA provides a commonsense definition:
"For the purposes of that subsection [subsection (2)], an interest is acquired at an undervalue if the total consideration for it is less than that which might reasonably have been expected to be obtained on a disposal of the interest on the open market; and 'consideration' here means consideration provided at any time (and, for example, includes payments by way of rent)."

pursuance of an arrangement[58] the main purpose, or one of the main purposes, of which is the avoidance of tax or national insurance contributions.

### 65.23.6 *Commentary*

Foreign homes relief would serve as a case study for what has gone wrong with tax reform in recent years. Almost every restriction on this relief is anomalous. Why should there be a relief for a company owning land and not for chattels? Yachts and aeroplanes are generally held through companies. Why should the relief apply to companies held by individuals and not by trusts? We need rationalisation and simplification, not yet another narrowly targeted relief. But there it is.

## 65.24 Benefit in kind: remittance basis taxpayer

This section deals with the position of a remittance basis taxpayer who is an employee, director or shadow director and receives the benefit in kind of living accommodation.

A specified amount (the cash equivalent) "is treated as earnings from the employment". I refer to this as "BiK earnings".

### 65.24.1 *Are BiK earnings "chargeable overseas earnings"?*

BiK earnings qualify as "chargeable overseas earnings" if (in short) the duties of the employment are performed wholly outside the UK.[59] Thus one has to ascertain:

(1) what the duties are;
(2) where they are performed.

To ascertain the duties of an employee or formally appointed director is straightforward. To ascertain the duties of a shadow director is problematic. A shadow director has no positive "duties" in the normal sense of the word.

---

58 Section 100B(8) ITEPA provides an unnecessary definition (this seems now to be in the Parliamentary drafter's handbook):

> "In subsection (4) 'arrangement' includes any scheme, agreement or understanding, whether or not enforceable."

59 See 12.11 (Chargeable overseas earnings).

It might be argued that a shadow director has no "duties" within the meaning of s.23 ITEPA. The consequence would be anomalous.[60] I think a court is not likely to accept this. If a shadow director is deemed to have an employment, it follows that they should be deemed to have some "duties".

The harder question is: exactly what are the (deemed) "duties" of the "employment" of a shadow director? The duties may be regarded as the instructions or directions which they give to the properly appointed directors.

Another possible view is that everything that the shadow director does for the company (or its assets) is regarded as part of their (deemed) "duties"; or alternatively everything they do if:

(1) they act with the consent of the formally appointed directors; or
(2) their actions concern matters which would (apart from them) be the responsibility of the actual directors.

Whichever of these is correct, where a company holds a UK dwelling house, it would be difficult in practice for a UK resident foreign domiciled individual to ensure that all his "duties" are performed outside the UK. However, it should be possible in other cases, eg where the BiK consists of non-UK situate accommodation or chattels, or for the BiK of employment-related loans. It may help to have a contract of employment which sets out the duties (all of which are to be performed abroad).

### 65.24.2 *Are BiK earnings remitted to the UK?*

If BiK earnings are "chargeable overseas earnings", they are taxable only if remitted to the UK.

If the accommodation is not in the UK then the BiK earnings are not on any view remitted here.

If the accommodation is in the UK, common sense suggests that there ought to be a charge. But there is a sound technical argument that the deemed earnings cannot be remitted because they do not exist. The tax charge arises only if the earnings are remitted. The property (or the benefit of its occupation) is not the same as the earnings.

HMRC may not agree. The EI Manual provides:

---

60 (1) Benefits in kind of a UK resident foreign domiciled shadow director would never qualify as chargeable overseas earnings.
(2) Benefits in kind of a non-resident shadow director would never be subject to tax.

**20508 Expense payments to and benefits provided for a director or employee whose earnings are taxable on remittance**
The earnings of a director or employee, except in an excluded employment (EI Manual 20007), who is chargeable on remittances to the UK under either s.22 or s.26 ITEPA include
- expenses payments remitted to the UK
- expenses paid in the UK
- *benefits provided or enjoyed in the UK (for example, a motorbike available for use in the UK)...*

**40303 Meaning of "remitted to the United Kingdom": benefits in kind and UK-linked debts**[61]
*Benefits in kind*
The definition of "remitted to the United Kingdom" in Section 809L ITA 2007 (see EIM40302) includes general earnings brought to, received in or used in and enjoyed in the United Kingdom in a form other than money. The benefits code as defined by Section 63(1) ITEPA 2003 provides a number of examples of earnings that are capable of satisfying the definition including taxable benefits arising from the provision of:
* *living accommodation*
* loans
* cars available for private use.

This view was doubtful before 2008, but it is even harder to defend under the ITA remittance basis because where there is deemed income or gains, the statute specifically deals with the issue by deeming some assets to be derived from those income or gains.

## 65.25 Benefits in kind: non-resident individual

This section deals with the position of a non-resident individual who is an employee, director or shadow director and receives benefits in kind. Earnings are taxable only in respect of duties performed in the UK.[62] Thus one must ascertain:
(1) what the duties are;
(2) whether the earnings are in respect of the duties;

---

61 I am not sure when this text was updated, though it was in place by August 2009. The term "UK-linked debts" is out of date after the 2008 reforms, but it does not matter.
62 See 12.16 (Non-resident employee).

(3) where the duties are performed.

The question of what (if any) are the "duties" of a shadow director is discussed in the above paragraph. I conclude there are no real duties but there are deemed duties. Are the earnings "in respect of" the deemed duties? It is tentatively suggested that the answer is "no". Certainly if there were no deemed duties there would be no earnings, but that is not enough. The benefit of living accommodation (which the earnings represent) would arise independently of the deemed duties. There is no income tax avoidance possibility here, because in the sort of case where substantial services were provided by a shadow director (as valuable as an actual director) then the earnings could be in respect of the duties.[63]

If I am wrong on "in respect of", but all the "duties" are performed outside the UK, the non-resident shadow director is not subject to tax under the benefit in kind provisions. If some of them are performed here, there is an apportionment. The difficulty of apportionment is immense, which suggests that my interpretation of "in respect of" is the correct one. This conclusion is also consistent with the POA non-residence exemption (though consistency between different tax codes does not count for much).

In practice, so far as the author is aware, HMRC do not assess non-resident individuals on benefits in kind. Of course, in many cases, collection of tax would be problematic. But it is significant that EI Manual para 11413 refers only to UK residents.

## 65.26 DTA defence to BiK charge

This section considers whether DTAs may provide a defence to the BiK charge.

It is assumed in this section that although the individual is UK resident,[64] they are treaty-resident in another state ("the foreign state") under the DTA tie-breaker rules. A DTA may well be of assistance in these circumstances.

It is assumed that the foreign state has a DTA with an article in the form of Art. 15 of the OECD Model Treaty; of course the individual treaty will need to be reviewed.

Article 15 provides two reliefs for a person who is treaty-resident in a

63 See *R v Dimsey & Allen* [2002] 1 AC 509 at [19].

64 Otherwise there is no BiK problem.

foreign state and it is necessary to consider them separately.

65.26.1 *Article 15(1)*

Article 15(1) provides:

> 1. Subject to the provisions of Articles 16, 18 and 19,[65] salaries, wages and other similar remuneration derived by a resident of a Contracting State in respect of an employment shall be taxable only in that State unless the employment is exercised in the other Contracting State. If the employment is so exercised, such remuneration as is derived therefrom may be taxed in that other State.

To follow this one must bear in mind which Contracting State is which. It is easier to follow if rewritten with the UK in mind, thus:

> 1. ... salaries, wages and other similar remuneration derived by a resident of a *foreign* Contracting State in respect of an employment shall be taxable only in that *foreign* State unless the employment is exercised in *the UK* [the other Contracting State]. If the employment is so exercised *in the UK*, such remuneration as is derived therefrom may be taxed in *the UK* [that other State].

To qualify for relief under Art. 15(1) the following conditions must be met.

There must be an employment. A shadow directorship is an employment for UK tax purposes, and it is considered that it counts as an employment for treaty purposes.

The BiK charge must be a tax on "salaries, wages and other similar remuneration." This is the case. The OECD Model Commentary para 2.1 provides:

> Member countries have generally understood the term "salaries, wages and other similar remuneration" to include benefits in kind received in respect of an employment (e.g. stock-options, the use of a residence or automobile, health or life insurance coverage and club memberships).

The BiK must be in respect of the employment: it is considered that this

65 None of the three exceptions in Arts. 16, 18 or 19 is likely to be in point.

condition is satisfied.

Lastly, the employment must be exercised wholly in the foreign State (in which case full relief is applicable) or at least partly in the foreign state (in which partial relief applies). This is more problematic and in typical cases assuming the employment is exercised at all, it will be exercised at least partly in the UK. If that is the case only partial relief is available under article 15(1).

65.26.2 *Article 15(2)*

If relief is not available under Art.15(1) we turn to Art.15(2). For convenience I set it out as it applies to the UK:

> 2. Notwithstanding the provisions of para 1, remuneration derived by a resident of a *foreign* Contracting State in respect of an employment exercised in *the UK [*the other Contracting State*]* shall be taxable only in the *foreign [*first-mentioned*]* State if:
> a) the recipient is present in *the UK [*the other State*]* for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and
> b) the remuneration is paid by, or on behalf of, an employer who is not a resident of *the UK [*the other State*]*, and
> c) the remuneration is not borne by a permanent establishment which the employer has in *the UK [*the other State*]*.

In principle this can offer exemption from the charge on benefits in kind, even if the employment is exercised wholly or partly in the UK. The three conditions in (a) to (c) must be met.

> *(a) the recipient is present in the UK for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned*

Whether this condition is met depends on the facts.

> *(b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the UK*

The employer is of course the company owning the property. The employer will not in principle be UK resident. In fact the BiK is not in the strict sense "paid" but it is suggested that the word should not be strictly construed and this requirement is satisfied.

> *(c) the remuneration is not borne by a permanent establishment which the employer has in the UK.*

This condition will be met, since the company will not have a permanent establishment (the UK home is not a permanent establishment as defined).

Accordingly individuals who are treaty-resident in a contracting state and present in the UK for less than 183 days can qualify for DTA relief under Art. 15(2).

## 65.27 Other planning possibilities using companies

More complex possibilities involve:
(1) acquiring a property,
(2) granting (say) a ten-year lease to trustees or to the individual, and
(3) transferring the freehold reversion to a company. Watch SDLT.
The living accommodation charge would not apply, because the company would not be providing living accommodation. Similar arrangements can be carried out with options. In practice, arrangements of this complexity would not often be needed.

## 65.28 Dealing with companies at risk of IT charge

Many company structures have been set up in the past. The risk of a living accommodation charge depends on the facts of every case, but in practice it is often a serious concern. What can be done?

### 65.28.1 *Planning involving winding-up of the company*

If practical, the safest course is to extract the property from the company so as to put an end to the charge (or risk of a charge) under the benefit in kind rules. One way to do this for trusts, where the occupier has a recognised interest in possession, is to liquidate the company.

The liquidation may give rise to a capital gain which may rule out this course. The property will be in the estate of the life tenant for IHT purposes but in practice that may not be too much of a problem: see 65.1 (Home owned by foreign domiciliary). Another company structure may be entered into later, as set out above.

Another possibility might be for a company to sell the property to the trust, the purchase price remaining outstanding as a loan. In principle the loan is deductible from the value of the property, thus substantially reducing any IHT exposure. See 56.9 (Deduction for debts of trustees). Watch SDLT. CGT may rule out this course.

Another possibility may be to reimburse the company for the cost of providing the accommodation. Watch the CGT implications.

### 65.28.2 *Planning not involving winding up the company*

CGT may make it impractical to wind up the company. In that case take stringent steps to ensure that the individual is not a shadow director.

## 65.29 Dealing with living accommodation enquiries in practice

In practice, as *Al Fayed v Advocate General* frankly reports,[66] shadow directorship arguments before the decision in *R v Dimsey & Allen* were "settled by horse trading as opposed to on any strict statutory basis". It is likely that this will continue to be the case. Except for companies which were very carefully set up and run, HMRC will at least be able to exact a sum equal to the cost of litigating the issue before the Tax Tribunal or beyond.

## 65.30 Living accommodation charge: commentary

Anyone who has followed the text to this point will agree that the law in this area is seriously defective. It is unnecessarily complicated, rests to a large part on formal and informal concessions, and is sometimes so very unfair that HMRC themselves do not seem to exert themselves to act in accordance with the law as correctly set out in their own Manuals. The following reforms would solve these problems:

(1) Abolish the s.105 charge and extend s.106 to cover the first £75,000 of acquisition cost. All the concessions would then drop away.
(2) It would be fair to charge a little less than ORI rates, since residential market rents are less than the official rate of interest.

---

66 [2002] STC 910 para 44.

(3) The application of the charge to shadow directors who do no real work for the company is a nonsense. Given the widespread use of holding companies to hold wealth, *Dimsey & Allen* is arguably one of the worst tax decisions made by the House of Lords in recent times. Simply to abolish the charge (reversing *R v Dimsey & Allen*) would go too far the other way, since it is fair that a shadow director who receives what is in reality remuneration from a company should be charged. The solution is to restrict the rule that any benefit from an employer is deemed to be "by reason of employment". The deeming should not apply to a shadow director (whose connection with the company may be tenuous). That would strike the right balance.

The present BiK rules are being used by HMRC as a raid on ill-advised taxpayers or as a weapon to discourage IHT planning (placing homes in companies for IHT reasons). The latter is not the purpose for which the BiK rules were designed, and it is not surprising that they do not do this job well.

## 65.31 Section 731 charge

One should arrange, if possible, that any trust or company holding the home and chattels has no relevant income within s.731. Otherwise the use of the property would be a benefit giving rise to an income tax charge on the occupier.[67] This only applies if the benefit is not otherwise chargeable to income tax. If there is a shadow director charge, there is no charge under s.731. One possibility is to arrange that the amount of the shadow director charge is a small one (eg by a reimbursement of the company's expenditure). Whatever the charge is, it will avoid a taxable benefit under s.731.

## 65.32 Transfer pricing and non-resident company holding family home

The transfer pricing provisions (in short) deem transactions between persons under common control to be at arm's length prices. HMRC accept that transfer pricing applies only to transactions between two

---

67 See 27.4.4 (Interest-free loan and enjoyment of asset in kind).

"enterprises".[68] Where a non-resident company controlled by foreign

---

68 Accepting the argument of Robert Venables QC in 8 OTR 165. See INTM 432090:
"**432090. The affected persons: Enterprises** [April 2010]
Paragraph 1(1) Schedule 28AA ICTA 1988 refers to provision made or imposed between any two (connected) persons, suggesting a broad scope for the schedule, as the term persons includes bodies corporate, partnerships and individuals. However, paragraph 1(2) and (3) require the actual provision to be compared with the arm's length provision that would have been made between independent enterprises.
Paragraph 2 requires the schedule to be construed in accordance with the OECD model convention, as interpreted by the OECD transfer pricing guidelines. Article 9 of the convention sets out the arm's length principle by reference to conditions made or imposed between enterprises. Article 3 defines enterprise as 'the carrying on of any business'.
This suggests that Schedule 28AA should be applied only where both parties are enterprises, but that this term should be interpreted broadly. The term encompasses more than trading activity, but a natural interpretation implies an intention to make profit or gain, or to undertake activity in a businesslike or commercial way.
In most situations where Schedule 28AA potentially applies there is likely to be little doubt that both the parties to a provision are enterprises. Situations where this may be less clear include the potential application of the schedule to individuals and to charities. It is clear that both individuals and charities can act in a way that would cause them to be regarded as enterprises. This conclusion will follow whenever a trade is being carried on or in other cases where activity is carried on in an organised way with a view to profit or gain. The nature of the activity and whether it carries a commercial flavour will also be relevant.
It is necessary to consider whether a particular provision to which Schedule 28AA potentially applies is one made between two enterprises. Hence it is possible that different conclusions will follow for different provisions made by the same person–some transactions may be made in a capacity unrelated to an enterprise that is being carried on while others may be made in the context of the enterprise.
Examples –Individuals:

- Participation in the management or control of a company does not in itself constitute the carrying on an enterprise. It follows that the office of director, or other employment by a controlled company would not normally constitute a provision made between two enterprises.
- And if a company provides residential accommodation rent free to a participant who just makes personal use of it as their home, transfer pricing rules would not generally apply (though other tax rules, eg relating to employee benefit or distributions, might well be relevant).
- Similarly, holding investments in a close investment holding company would not constitute an enterprise for the purpose of considering provisions made between the company and the individual.
- Holding properties for rent in general does constitute an enterprise. However, if an individual holds property principally for private purposes, incidental letting activity that is intended to offset costs rather than to generate income is not likely to constitute an enterprise.
- Lending to connected companies may or may not constitute an enterprise. If the activity is undertaken in a businesslike way with a view to generating gains on shares in the company, this is like to be represent a form of enterprise. On the other hand, isolated loans where the intention is to provide long term funding for a family business may well not be made in the context of an enterprise.
- Where an individual is carrying on an enterprise, it follows that the SME exemption will

trustees provides accommodation in the UK for the use of a beneficiary rent free, no charge to tax arises since the individual is not an enterprise. Tax Bulletin 46 (April 2000) provides:

> **Will a charge be imputed on a non-resident landlord providing rent-free residential accommodation within the UK to a UK individual who is a participant?**
> It will not be Inland Revenue practice to impute a charge under Sch 28AA in these circumstances.

International Manual provides:

> **432090 Schedule 28AA - how it works: The affected persons - enterprises** [April 2010]
> *Examples - Individuals*
> ...If a company provides residential accommodation rent free to a participant who just makes personal use of it as their home, transfer pricing rules would not *generally* apply (though other tax rules, eg relating to employee benefit or distributions, might well be relevant).
> (Emphasis added)

I do not understand why the text says "generally". The provisions could apply in the (unusual) case where the individual is using the accommodation in an enterprise, but that is not "just personal use".

## 65.33 SDLT on living accommodation charge

Para 12 Sch 4 FA 2003 provides:

> (1) Where a land transaction is entered into by reason of the purchaser's employment, or that of a person connected with him, then—
> (a) if the transaction gives rise to a charge to tax under Chapter 5 of Part 3 of the ITEPA (taxable benefits: living accommodation) and—
> (i) no rent is payable by the purchaser, or

---

potentially apply, provided the employment and financial limits are met. These limits will apply on an aggregate basis, including the individual and all connected businesses, including those carried on by controlled companies."

> (ii) the rent payable by the purchaser is less than the cash equivalent of the benefit calculated under s.105 or 106 of that Act,
>
> there shall be taken to be payable by the purchaser as rent an amount equal to the cash equivalent chargeable under those sections;
>
> (b) if the transaction would give rise to a charge under that Chapter but for s.99 of that Act (accommodation provided for performance of duties), the consideration for the transaction is the actual consideration (if any); ...

This will not usually affect a foreign domiciliary who occupies a UK home through a company, even if the foreign domiciliary is a shadow director and within the BiK provisions. The reasons are:

(1) The acquisition of a licence (as opposed to a lease) is not a land transaction. The distinction between lease and licence is fraught but usually the individual will occupy under licence and not a lease.

(2) Even if the shadow director acquires a lease, they will not usually do so by reason of their employment. The extended definition in the BiK code[69] does not apply here.

## 65.34 Chattels held by companies

Chattels situate in the UK may be placed in a company for the same reasons as the family home: to make them excluded property. This raises IT problems similar but not identical to the living accommodation charge.

### 65.34.1 *The charge*

The charge is in s.203(1) ITEPA:

> The cash equivalent of an employment-related benefit is to be treated as earnings from the employment for the tax year in which it is provided.

The key expressions are "employment-related benefit" and "cash equivalent".

69 See 65.8 ("By reason of the employment").

### 65.34.2 *Employment-related benefit*

This is defined in s.201(2) ITEPA:

> In this Chapter—
> "benefit" means a benefit[70] or facility of any kind;

There is no benefit – and so no charge – if full consideration is paid for the use of chattels. This is so even if the amount paid is less than the "cash equivalent" as it usually will be; contrast the living accommodation charge. HMRC accept this.[71] EI Manual provides:

> **21002 What is meant by a "benefit"**
> However, something (other than a loan where special provisions apply, see EIM26101 and EIM26111) which is a "fair bargain" (EIM21004) between the employer and the employee is not a "benefit".

Section 201(2) continues:

> "employment-related benefit" means a benefit, other than an excluded benefit,[72] which is provided in a tax year—
> (a) for an employee, or
> (b) for a member of an employee's family or household,
> by reason of the employment.[73]

### 65.34.3 *"Cash equivalent" etc*

This is defined in s.203(2) ITEPA:

> The cash equivalent of an employment-related benefit is the cost of the benefit less any part of that cost made good[74] by the employee to the persons providing the benefit.

---

70 For the meaning of "benefit" see 27.4 (Benefit).

71 HMRC do not argue that the word "facility" applies to a facility which is not a benefit in the ordinary sense. Thus s.201(2) is a non-definition of benefit (it only says that "benefit" means benefit); but non-definitions are quite common in tax legislation.

72 "Excluded benefit" is defined in s.202.

73 For the definitions of expressions used here see 12.2.1 ("Employer", "employee" and "employment").

74 "Made good" is discussed at 65.14.2 ("Making good": meaning).

This takes us to the elaborate definition of "cost of the benefit". The starting point is s.204 ITEPA:

> **Cost of the benefit: basic rule**
> The cost of an employment-related benefit is the expense incurred in or in connection with provision of the benefit (including a proper proportion of any expense relating partly to provision of the benefit and partly to other matters).

There are two exceptions to this basic rule:
(1) asset made available without transfer;
(2) transfer of used or depreciated asset.
Point (2) is not discussed here. The rule in (1) is in s.205 ITEPA:

> **Cost of the benefit: asset made available without transfer**
> (1) The cost of an employment-related benefit ("the taxable benefit") is determined in accordance with this section if—
> (a) the benefit consists in—
> (i) an asset being placed at the disposal of the employee, or at the disposal of a member of the employee's family or household, for the employee's or member's use, or
> (ii) an asset being used wholly or partly for the purposes of the employee or a member of the employee's family or household, and
> (b) there is no transfer of the property in the asset.
> (2) The cost of the taxable benefit is the higher of—
> (a) the annual value of the use of the asset, and
> (b) the annual amount of the sums, if any, paid by those providing the benefit by way of rent or hire charge for the asset,
> together with the amount of any additional expense.

This takes us to the definition of "annual value":

> (3) For the purposes of subsection (2), the annual value of the use of an asset is—
> (a) in the case of land, its annual rental value;[75]
> (b) in any other case, 20% of the market value[76] of the asset at the time

75 "Annual rental value" is defined in s.207 ITEPA. This charge only applies to land other than living accommodation, so in practice it is not important.
76 "Market value" is defined in a commonsense way in s.208 ITEPA.

when those providing the taxable benefit first applied the asset in the provision of an employment-related benefit (whether or not the person provided with that benefit is also the person provided with the taxable benefit). ...[77]

(4) In this section "additional expense" means the expense incurred in or in connection with provision of the taxable benefit (including a proper proportion of any expense relating partly to provision of the benefit and partly to other matters), other than—

(a) the expense of acquiring or producing the asset incurred by the person to whom the asset belongs, and

(b) any rent or hire charge payable for the asset by those providing the asset.[78]

### 65.34.4 *Asset available but not used*

EI Manual provides:

> **21631 Cash equivalent of assets placed at the disposal of a director or employee** [May 2010]
> Note that a tax charge may arise if the asset is available for the use of the director or employee. Whether or not it is used is immaterial. This is because the legislation refers to the benefit as being an asset "placed at the disposal of" the employee. Assets commonly placed at the disposal of directors and employees to which the rule applies are yachts, aircraft, paintings, furniture, TV sets and video machines.

This is correct. The EI Manual gives examples:

> **21633. Assets placed at the disposal of a director or employee: Example**
> The following example shows how the chargeable benefit relating to a yacht is calculated. It would apply to all other assets except cars, vans, land and buildings.
> *Facts*
> On 6 April a company buys a yacht on the open market for £25,000.

---

77 There is transitional relief where those providing the taxable benefit first applied the asset in the provision of an employment-related benefit before 6 April 1980.

78 EIM states at 21631:

"This will include expenditure on running costs and could include expenditure on alterations or improvements, repairs, maintenance, etc depending on whether it was incurred for the purpose of providing the benefit. It would not include interest paid on a loan to acquire the asset."

It immediately makes this available for the sole use of a director and his family throughout the tax year.

In the same year the company spends £2,400 on insurance, fuel, maintenance, servicing and mooring charges for the yacht. It also pays £4,500 interest on a loan obtained to purchase the yacht.

The company requires the director to pay £1,500 a year for the use of the yacht.

*Calculation of the benefit*

The amount chargeable on the director for the benefit from the yacht being made available for his and his family's use is:

| | £ |
|---|---|
| "Annual value of the use of" the yacht: 20% of its market value of £25,000 | 5,000 |
| Running costs borne by the employer | 2,400 |
| | 7,400 |
| Less "made good" by the director | 1,500 |
| Amount of the benefit | 5,900 |

*Notes on the example*

Note that in the example the "market value" of the yacht is taken as £25,000 as this was the open market price paid by the company immediately before it was first applied as a benefit.[79]

If the company had leased the yacht for £6,000 a year from 6 April, £6,000 would have been substituted for the "annual value of the use of the yacht" of £5,000 shown above (see EIM21630 and EIM21632).

If, exceptionally, the company had leased the yacht for less than the "annual value" of £5,000, the lease rent would have been disregarded. The calculation would have remained as shown in the example above, based on the annual value of £5,000.

The interest paid on the loan to buy the yacht does not enter into the benefit calculation.

**21634 Particular benefits: Assets placed at the disposal of a director or employee: Asset unavailable for part of a year** [May 2010]

Where an asset is not available for part of a year the annual value of its use has to be apportioned (s.204 ITEPA 2003).

For instance, if in the example at EIM21633 the yacht is only made available to the director from 6 October, the chargeable benefit is:

- one half (6/12 months) of the annual value of its use plus
- expenditure on the asset by the person providing it from 6 October to the following 5 April less
- any amount made good by the director (see EIM21120).

**21635 Particular benefits: Assets placed at the disposal of a director or employee: Asset also used in the business or by other employees**

An apportionment of the full amount of a benefit is required if an asset is made available to two or more directors and employees or is provided partly to the

79 [Author's Note] This would not be correct if the yacht was purchased new, as market value would be the secondhand value, which is lower.

employee as a benefit and is also used partly by the employer in its business (see EIM21200).

For example, if a yacht is made available to two directors and they agree that its availability is shared equally by them, apportion one half of the benefit to each of them. Similarly if the yacht is used partly for business purposes, such as hiring to customers, a proper proportion of the full annual value of its use would not be chargeable.

**21636 Particular benefits: Assets placed at the disposal of a director or employee: Asset used by the employee partly for private purposes and partly for work purposes**

When an asset is available for the private use of a director or employee but it also has to be used in the performance of his duties, the director or employee may be able to get relief for the work use. This is accomplished by treating the value of the benefit as if it were expenditure so that the business proportion can qualify for deduction under s.336 to 338 ITEPA 2003 (see EIM31620 onwards). Note that a deduction will not be due if the private and business use of the asset is concurrent, such as a suit of ordinary clothes worn at work (see EIM31660). Only if the use of the asset is at some times exclusively for business, such as a fax machine provided to the employee at home partly for work use, will a part deduction be due (see EIM31661). See example EIM31617.

**21637 Particular benefits: Assets placed at the disposal of a director or employee: Assets used partly for private purposes and partly for work purposes: Mixed use benefit; Background to example in EIM21638** [August 2006]

See EIM21638 for an example of the interaction between:

- the calculation of the cash equivalent of a benefit where an asset is placed at the disposal of a director or employee (s.205(1)(a)(i) ITEPA 2003) and
- making an apportionment of that benefit where it is available to a director and for "other matters" (s.204 ITEPA 2003).

Where a benefit is provided partly for the use of a director or employee and partly for "other matters" the cost of the benefit must be apportioned (see EIM21200) between the different uses.

**Note that an asset placed at the disposal of a director or employee represents a benefit (s.205(1)(a)(i)) regardless of the use, if any, to which the director or employee puts the asset. But see EIM21631 for details relating to the two alternative measures of charge and when to apply one or the other.**

**If the asset is used wholly for business purposes, this does not prevent the provision of the asset representing a benefit.** If the business use satisfies the terms of s.365(1) ITEPA 2003, the director or employee will be entitled to a deduction equivalent to the full amount of the benefit, leaving no amount chargeable to tax. **But this is not the same as there being no benefit.** A benefit has been provided but because of the deduction for business use, the chargeable amount has been reduced to nil.

**If the benefit is used by a director or employee for private purposes and for business purposes, the business use is not an "other matter" which can be included in the amount of the benefit to be apportioned under Section 204**

**ITEPA 2003.** The full amount of the mixed use of the benefit is chargeable to tax, subject to a deduction under s.365(1) ITEPA 2003 for any business use that meets the conditions of s.336 to 338 ITEPA 2003 (see EIM21210).

On the other hand, use of the asset by other employees, or by the employer company (for example, for transporting goods or customers), or hire to third parties, are "other matters" to be taken into account in an apportionment.

There are no hard and fast rules for calculating the proportion of cost attributable to different uses but the end result should produce an apportionment that is reasonable in the light of the facts of the case and the statutory context in s.204 (see EIM21200).

See the example at EIM21638.

**21638 Particular benefits: Assets placed at the disposal of a director or employee: Assets used partly for private purposes and partly for work: Example** [May 2010]

For some background information relevant to this example see EIM21637.

*Facts*

- On 6 June a company purchases a 10 seater aircraft for £800,000,
- the principal shareholder of the company and managing director (MD) holds a pilot's licence,
- the plane is kept at an airfield near to both the company premises and the MD's home. It is available to the MD to use at all times – sometimes, at weekends, he decides on the spur of the moment to take a flight on the plane. The plane is not available to any other director or employee unless given specific permission,
- the company incurs costs on the plane of £20,000 for the 9 months from 6 June to 5 April for landing fees, fuel, insurance, etc.,
- when he uses the plane for private purposes the MD reimburses the company £100 per day as a contribution towards the employer's costs.
- Inspection of the logbook for the period 6 June to 5 April (274 days) shows use as follows:
  1. 10 days – by the MD for travel to business meetings
  2. 20 days – by the company (using an outside pilot hired by the day) to deliver sensitive documents to customers in remote locations
  3. 10 days – commercial hire to third parties at £2,000 per day
  4. 10 days – another director of the company wishes to learn to fly and uses the plane for flying lessons with an instructor
  5. 60 days – private use by the MD.

*What is the amount of the benefit chargeable on the MD?*

Section 205(2)(a) ITEPA 2003 determines that when an asset is placed at the disposal of a director or employee (see EIM21631), the amount of the cash equivalent of the benefit is the annual value (s.205(3)(b)) plus additional expenses.

| | |
|---|---|
| Annual value of plane (£800,000 × 9/12 × 20%) | £120,000 |
| Additional expenses | £20,000 |
| Total amount of the benefit | £140,000 |

As the plane is made available for several different purposes, if any of those purposes amounts to an "other matter" (s.204), an apportionment of the benefit may be due. Use by the MD, whether for business or private purposes, is not an "other matter". But use by other employees, or use by the company, are "other matters" – 2, 3 and 4 above which amount to 40 days in total.

The amount of the benefit is based on the 274 days in the year when the plane was available for use. On 40 days it was used for "other matters" and the benefit must be apportioned accordingly. On the remaining 234 days it was entirely at the disposal of the director to use as and when he wished. If the plane was not available to the director, or not solely available to him, on all these days, the calculation of the benefit could be different (see EIM21639(. the calculation of the benefit must be:

- apportioned to take account of these other matters and
- reduced by any amount made good by the MD to the employer.

| | |
|---|---|
| Total amount of the benefit | £140,000 |
| Less proportion for "other matters" (40/274) | £20,438 |
| Benefit after apportionment | £119,562 |
| Less made good by MD (£100 × 60) | £6,000 |
| Amount of the benefit chargeable | £113,562 |

Finally, if the director's use of the plane satisfies the terms of s.336 ITEPA 2003 he will be due a deduction under s.365(1) for the amount of expenses on business purposes that could have been deducted if incurred by him. This figure may be quantified based on the facts of the case. In this instance the MD used the plane for a total of 70 days in the year, 10 days for business and 60 days for private purposes. A reasonable basis for calculating the deduction due under s.365(1) may be 10/70 of the chargeable benefit – 10/70 × 113,562 = 16,223.

| | |
|---|---|
| Less deduction for business use (10/70 days) | £16,223 |
| Amount chargeable on MD | £97,339 |

Note it is necessary to use judgement and common sense when determining the amount that would have been deductible for expenses under s.365(1).

In this case a deduction of approximately £1,600 per day has been allowed for the MD's travel to business meetings. This may seem a large amount but if the alternative is for the company to hire a similar plane for the day at the commercial rate of £2,000, for which the MD paid himself and was later reimbursed by the company, he would be entitled to a deduction for this amount. Apart from extreme cases, it is better not to become involved in a debate concerning what form of transport (and at what cost) is suitable for the director to use to attend meetings.

The other director who uses the plane for flying lessons will also be chargeable on a benefit based on his 10 days private use of the plane.

## 65.34.5 *Conveyancing issues for chattels*

The Bills of Sale Act 1878 (in short) applies where a person makes a transfer of goods (a "Bill of Sale" is widely defined) and retains possession of the goods. This could apply on a transfer to a trust or to a company. The transfer is void as against the trustees in bankruptcy of the transferor unless the Bill of Sale is registered in a public register. This is to prevent fraud on creditors. However, it really does not matter if a transfer of chattels is void as against a trustee in bankruptcy, in the event that the individual became bankrupt. After all, every gift and transaction at an undervalue can in principle be set aside by a trustee in bankruptcy for two years, under s.339 Insolvency Act 1986, but no-one suggests that has significant tax implications for solvent taxpayers. Thus it is not necessary to register the transfer of the chattels (the "Bill of Sale") under the Act.

## 65.35 "Person providing benefit"

This is defined in s.209 ITEPA:

> **Meaning of "persons providing benefit"**
> For the purposes of this Chapter the persons providing a benefit are the person or persons at whose cost the benefit is provided.

CHAPTER SIXTY SIX

# PRE-OWNED ASSETS

## 66.1 Pre-owned assets – Introduction

This chapter considers the provisions in Schedule 15 FA 2004 ("**POA provisions**"). A full discussion of this topic needs a book to itself.[1] The supplementary regulations (whose title is so long it cannot sensibly be used)[2] are referred to as "**the 2005 POA Regulations**".

The HMRC website gives guidance ("**Website POA Guidance**").[3]

"**The CIOT Statement**" gives HMRC answers to a number of questions raised by CIOT, STEP and LITRG.[4]

The label "pre-owned assets" is convenient but inaccurate since the charge may apply to property not previously owned by the taxpayer.

---

1 And indeed such a book has been written: Chamberlain & Whitehouse, *Pre-Owned Assets and Estate Planning* (3rd ed, 2009).

2 The Charge to Income Tax by Reference to Enjoyment of Property Previously Owned Regulations 2005.

3 Accessible *www.hmrc.gov.uk/poa/index.htm*. Rather discouragingly, the website (accessed November 2010) states:

> "The guidance notes reflect the current law and do not take account of any proposals contained in the 2006 Finance Bill. As soon as any changes proposed by the bill become law we will review the guidance to see if, and to what extent, amendments need to be made."

This neglect reflects the fact that HMRC are not seriously interested in administering or enforcing the POA provisions, except in relation to some specific IHT avoidance schemes at which they were aimed; of course that may change at any time without notice.

4 Accessible:http://www.step.org/resources/policy_and_technical/uk_policy/2006/pre-owned_assets_-_responses.aspx?link=contentMiddle. The current version of the statement is dated 31 August 2006; earlier versions were dated 13 October 2005 and 13 March 2006. The process of amendments has left a tangle and it would be better if this statement (and indeed all such statements) were replaced by guidance in a HMRC Manual or equivalent.

The provisions impose three charges to income tax which I call:

(1) "**The POA land charge**".

(2) "**The POA chattel charge**".

(3) "**The POA intangible property charge**".

Land, chattel and intangible property are given commonsense definitions.[5]

## 66.2 Human rights

The Parliamentary Joint Committee on Human Rights considered the POA provisions to be HR compliant except (intriguingly) in relation to the spouse exemptions (which deny relief to cohabitees).[6] This may not be the last word on the subject but the prospect of a successful appeal on human rights grounds seems slender.

## 66.3 POA land charge

Para 3(1) Sch 15 FA 2004 provides:

> This paragraph applies where—
> (a) an individual ("the chargeable person") occupies any land ("the relevant land"), whether alone or together with other persons, and
> (b) the disposal condition or the contribution condition is met as respects the land.

In the discussion below the "chargeable person" is called "T" and the land T occupies is called "land occupied by T" (rather than "the relevant land").

"Occupation" is a legal concept extensively discussed in rating cases. Website POA Guidance makes some general observations on the meaning of occupation at 4.6.

## 66.4 The disposal conditions

Para 3(2) Sch 15 FA 2004 provides:

> The disposal condition is that—

---

5 Para 1 Sch 15 FA 2004.

6 *www.publications.parliament.uk/pa/jt200304/jtselect/jtrights/93/9305.htm.*

(a) at any time after 17 March 1986 the chargeable person owned an interest—
 (i) in the relevant land, or
 (ii) in other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the relevant land, and

(b) the chargeable person has disposed[7] of all, or part of, his interest in the relevant land or the other property, otherwise than by an excluded transaction.

This is best regarded as two conditions depending on whether (a) (i) or (ii) applies. I call them disposal conditions (i) and (ii). Only one of them needs to be satisfied for the "disposal condition" to be met.

### 66.4.1 *Disposal condition (i)*

The essence of disposal condition (i) is that:

(a) T owned an interest in the land occupied by him.... and
(b) T has disposed of all, or part of, his interest in the land ...

Disposal condition (i) is aimed at IHT avoidance arrangements (*Eversden*, *Ingram* and double trust schemes) which would not normally be carried out by foreign domiciled individuals. It might, however, apply in many other situations, eg if a foreign domiciliary transferred their house to a trust or company.

What if T enters into a contract to purchase land and then assigns that contract to a trust or company? The contract is an interest in land. However, on completion the contract ceases to exist. That will normally be before the valuation date. Since the asset cannot be valued on the valuation date, it is tentatively suggested that disposal condition (1) does not apply in this situation.

The disposal condition is satisfied by a disposal of land for full consideration. However, in such a case the exclusion for arm's length transactions may apply.

7 "Disposal" is defined in para 3(4) Sch 15 FA 2004.

### 66.4.2 *Disposal condition (ii)*

The essence of disposal condition (ii) is that:

> (a) T owned ... other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the land occupied by T, and
> (b) T has disposed of all, or part of, his interest in the ... other property ...

Disposal condition (ii) is probably intended to deal with the situation where:
(1) T disposes of land to A.
(2) A sells the land and uses the proceeds to purchase other land occupied by T.
However, it may apply where:
(1) T disposes of any property (not land or cash) to A; and
(2) A disposes of that property and uses the proceeds to purchase land occupied by T.
This overlaps with the contribution conditions. The overlap matters because the excluded transaction defences to the contribution and disposal conditions are not the same.

## 66.5 The contribution conditions

Para 3(3) Sch 15 FA 2004 provides:

> The contribution condition is that at any time after 17 March 1986 the chargeable person has directly or indirectly provided, otherwise than by an excluded transaction, any of the consideration given by another person for the acquisition of—
> (a) an interest in the relevant land, or
> (b) an interest in any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of an interest in the relevant land.

This is best regarded as two conditions, depending on whether (a) or (b) applies. I call them contribution conditions (a) and (b). Only one of them need be satisfied for the "contribution condition" to be met.

### 66.5.1 *Contribution condition (a)*

The essence of contribution condition (a) is that:

> T has directly or indirectly provided…any of the consideration given by another person for the acquisition of ... the land occupied by T …

This envisages that:
(1) "another person" (which may be a company or trustee) acquires for consideration land occupied by T; and
(2) T has provided that consideration directly or indirectly.

### 66.5.2 *Contribution condition (b)*

The essence of contribution condition (b) is that:

> T has directly or indirectly provided … any of the consideration given by another person for the acquisition of … any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of ... the land occupied by T.

This applies where:
(1) "another person" ("A") acquires "other property" for consideration.
(2) T has provided that consideration directly or indirectly.
(3) A disposes of the other property.
(4) The proceeds are (directly or indirectly) applied by "another person" (presumably either A himself or another person, "B") towards the acquisition of the land occupied by T.

The drafter may be considering a situation where:
(a) T transfers funds to A who purchases a property; and
(b) A sells that property and uses the proceeds to buy another property occupied by T.

**or**

(a) T transfers funds to A (eg trustees);
(b) A transfers the funds to B (eg a company held by A);
(c) B uses the funds to purchase a property occupied by T.

In both those cases I would have said that T had indirectly provided consideration given for the land and contribution condition (a) was already satisfied. I cannot think of a situation which falls within condition (b) and which does not fall within condition (a). But it does not much matter.

### 66.5.3 *Purpose of contribution conditions*

It is hard to see the purpose of the contribution conditions. *Ingram*, *Eversden* and double trust schemes would be caught by the disposal conditions. Perhaps it was meant to catch schemes set up on the occasion of purchase of a new property where the settlor would provide cash to a trust. But this was never done in the past; it would have been better to frame more targeted anti-avoidance provisions than this blunderbuss approach.

## 66.6 "Provide"

"Providing" is the fundamental concept in the contribution conditions and it is not an easy one. Some guidance can be found in cases on the meaning of "settlor" where the statutory language is similar.[8]

It is considered that "provide" implies an element of bounty. So if T lends money on arm's length terms to A, who uses the money lent to buy the property, T has not "provided" the consideration and the contribution condition is not satisfied.

What if T lends interest-free to A, who uses the money lent to buy the property? At first sight T has provided the consideration. But it might be argued that A provides the consideration himself (by A's promise to repay T) and that T provides nothing.[9] In practice HMRC now[10] accept this.

---

8 Some guidance ought to be found from comparable wording in Stamp Duty and SDLT group relief. Unfortunately the SD/SDLT position is even more obscure than the POA: s.27 FA 1967; SP 3/98; para 2(2) Sch 7 FA 2003; Tax Bulletin 70.

9 One might say that T has provided the interest foregone on the loan, but interest foregone does not exist, and it is difficult to see how one could provide something which does not exist.

10 This reverses the view taken in the CIOT Statement:

> "6.2 The meaning of the 'provision' of 'consideration' in the context of the contribution condition needs to be clarified. On the basis of the case law the word provided suggests some element of bounty.
>
> On this basis our view is that if there is a transfer of Whiteacre by A (or another asset) to his son at full market value which is then sold by son and the sale proceeds used to purchase Blackacre for A to occupy this is a breach of the disposal but not the contribution condition because it lacks the necessary element of bounty.
>
> Similarly the provision of a loan on commercial terms by A to his son to enable son to purchase a house which A then occupies in our view does not fall within the contribution condition.
>
> ***Question 32***

Website POA Guidance provides at 1.2.1:

> HMRC do not regard the contribution condition set out in Schedule 15, para 3(3) as being met where a lender resides in property purchased by another with money loaned to him by the lender. Our view is that since the outstanding debt will form part of his estate for IHT purposes,
> [1] it would not be reasonable to consider that the loan falls within the contribution condition
> [2] [and therefore not reasonably attributable to the consideration (Sch 15, para 4(2)(c)],[11]
> even where the loan was interest free. It follows that the 'lender', in such an arrangement, would not be caught by a charge under Schedule

---

Do HMRC agree with this analysis?

**HMRC answer to question 32**

In our view, it is arguable that the contribution condition does not depend on a degree of bounty for its application. If, on the contrary, a degree of bounty was necessary, might not the operation of the contribution condition provisions in paras 3(3) and 6(3) of Schedule 15 be circumvented by the relatively simple expedient of A, in your example, providing the wherewithal for the purchase of a house by his son by way of a loan, ostensibly on commercial terms, which is then left outstanding indefinitely?

Having said that, we have considered further the sort of case where a loan is made **and operated** on commercial terms eg a commercial rate of interest is specified and paid and there are provisions for repayment of the loan over the sort of period one would expect to find in a truly commercial loan. Having regard to paras 4(2)(c) or 7(2)(c) of Schedule 15, the chargeable amount would depend on the value of DV in R (or N)×DV/V: that's to say on 'such part of the value of the land/chattel as can reasonably be attributed to the consideration provided by the chargeable person'. In the case where the loan is on truly commercial terms and conducted in a truly commercial way, we would accept that the attributable amount is nil or de minimis. In determining 'reasonable attribution' for the purposes of para 4(2)(c), it is the terms on which the loan is made and operated that are relevant, as indicated above. In that context, the period over which the loan is repaid as well as whether a commercial rate of interest is charged is relevant.

Thus, where an interest-free loan is repaid over a typical 'commercial' period, it would be reasonable to regard the interest foregone as attributable to the consideration provided by the chargeable person. In cases where the principal of the loan was left outstanding indefinitely, such principal could reasonably be regarded as attributable to the consideration provided."

11 Words in square brackets are original. [2] refers to the rule which restricts the charge to "such part of the value of the land which is reasonably attributable to the consideration provided by T" see 66.26.4 (The proportion (DV ÷ V). But if, as HMRC accept, the lender has not provided the consideration, the point in [2] does not arise (unless the lender has provided some consideration and made a loan too).

15.

What if

(1) T lends interest-free to A,
(2) A purchases the property, and
(3) T later releases the loan or makes a gift to A which A uses to repay the loan (which comes to the same thing)?

Alternatively, more simply, what if:

(1) A purchases the property
(2) T makes a gift to A, or reimburses A for the expense (without being obliged to do so).

If T has not provided the consideration at the time that A purchases the property, T cannot provide it later. However if the steps form part of a single arrangement, it can probably be said that A has provided the consideration indirectly, even if slightly belatedly.

What if T subscribes for shares on arm's length terms? Probably T has provided funds to the company

### 66.6.1 *Arrangements involving third parties*

The position becomes more complex where more than two persons are involved.

Suppose T provides funds to A, an individual, who gives them to B, an individual, and B purchases the property. It is suggested that T has not provided the consideration if the "clean break" test is satisfied.[12]

Suppose T provides funds to a trust, who lend them to a company owned by the trust, which purchases the property. It is suggested that T has provided the consideration because the "clean break" test is not satisfied.

What if T gives funds to A and A borrows from a third party on the security of those funds, and uses the borrowed funds to buy the property? It is considered that T has not provided the consideration. If T provides fund X to a company or trust, which borrows fund Y from a third party, and the company or trust uses both funds to acquire the property, then T has provided fund X but not fund Y.

Traditional IHT planning for a foreign domiciliary's residence will often satisfy the contribution condition, for instance where:

(1) an individual gives to a trust which purchases the home (without a

12 See 69.4.1 (When is A an indirect settlor?).

company);
(2) a foreign domiciliary gifts funds to a trust which lends interest-free to the company which acquires the home.

In most cases one exemption or another will apply but it is possible to fall between the gaps.

### 66.6.2 *Provision of funds for purpose of acquisition*

What is the position if T provides funds but not for the purpose of the acquisition of the land? Suppose:

(1) In 1987 T created a trust. At the time T had no plans to move to the UK.
(2) In 2005 the trustees finance by interest-free loan a company which purchases a property which T occupies.

The foreign domiciled individual has directly provided the property for the purposes of the trust. They are probably to be regarded as having indirectly provided the consideration given for the acquisition of the land under the principle in *Muir v Muir*.[13] So contribution condition (a) is satisfied.

But if T gives funds to A, an individual, and A later uses those funds to buy a property, it is suggested that T has not provided the consideration, unless the two steps form a single arrangement.

### 66.6.3 *Guarantees*

Para 17 Sch 15 FA 2004 provides:

> Where a person ("A") acts as guarantor in respect of a loan made to another person ("B") by a third party in connection with B's acquisition of any property, the mere giving of the guarantee is not to be regarded as the provision by A of consideration for B's acquisition of the property.

It is suggested that this applies even if A provides security for A's guarantee or deposits funds with a bank as a back-to-back loan.

---

13 [1943] AC 468. This is consistent with para 10(2)(c) Sch 15 FA 2004 which envisages a seven-year gap between the provisions of funds and the occupation of the land. But the contrary view is arguable.

What if:

(1) B borrows to purchase property (perhaps with a guarantee by T); and

(2) T later gives funds to B who repays?

If the steps are independent, it is considered that T has not provided the consideration. If, however, the steps form part of a single arrangement, it is suggested that T can be said to have provided the consideration indirectly.

### 66.6.4 *Secondhand company*

The contribution condition will not be satisfied where:

(1) A has provided funds to a company to purchase a house.

(2) A sells the company to B who occupies the house.

B has not provided the funds for the purchase (unless the two steps form a single arrangement): see 25.8.1 (Purchase of secondhand company by individual).

## 66.7 POA chattel charge

Para 6 Sch 15 FA 2004 provides:

> (1) This paragraph applies where—
> (a) an individual ("the chargeable person") is in possession of, or has the use of, a chattel, whether alone or together with other persons, and
> (b) the disposal condition or the contribution condition is met as respects the chattel.
> (2) The disposal condition is that—
> (a) at any time after 17 March 1986 the chargeable person had (whether alone or jointly with others) owned—
> (i) the chattel, or
> (ii) any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of the chattel, and
> (b) the chargeable person disposed[14] of all or part of his interest in the chattel or other property otherwise than by an excluded transaction.

14 "Disposal" is further defined in para 6(4) Sch 15 FA 2004.

(3) The contribution condition is that at any time after 17 March 1986 the chargeable person had directly or indirectly provided, otherwise than by an excluded transaction, any of the consideration given by another person for the acquisition of—
(a) the chattel, or
(b) any other property the proceeds of the disposal of which were (directly or indirectly) applied by another person towards the acquisition of the chattel

This follows the form of the POA land charge.

## 66.8 POA intangible property charge

Para 8 Sch 15 FA 2004 provides:

(1) This paragraph applies where—
(a) the terms of a settlement,[15] as they affect any property comprised in the settlement, are such that any income arising from the property would be treated by virtue of section 624 of ITTOIA (income arising under settlement where settlor retains an interest) as income of a person ("the chargeable person") who is for the purposes of Chapter 5 of Part 5 of that Act the settlor,
(b) any such income would be so treated even if section 625(1) of ITTOIA (settlor's retained interest) did not include any reference to the spouse or civil partner of the settlor, and
(c) that property includes any property as respects which the condition in sub-para (2) is met ("the relevant property").
(2) The condition mentioned in sub-para (1)(c) is that the property is intangible property which is or represents property which the chargeable person settled, or added to the settlement, after 17 March 1986.

In common form settlor-interested discretionary trusts the GWR exemption will apply.

If S lends on favourable terms to a settlement from which S is excluded,

15 "Settlement" here has the IHT meaning, not the settlement-arrangement meaning: para 1 Sch 15 FA 2004. See 69.2 (Definitions of "settlement").

s.624 applies[16] but para 8 does not apply.[17]

In common form trusts where the settlor has an IP, the GWR exemption (or for an estate IP, the estate exemption) will apply.

Accordingly, the POA intangible property charge will not usually affect foreign domiciliaries.

The charge does not apply to intangible property held by a company held by a trust, since that is not property comprised in a settlement, and not caught by s.624, but the shares in the company will be intangible property (except perhaps bearer shares?).

The charge is intended to catch *Eversden* schemes marketed by life insurance companies (which will not normally have been carried out by foreign domiciliaries). But it is much wider than that. It applies (in short) to (almost) any settlor-interested trust unless GWR also applies. If A creates a trust to A for life remainder to B absolutely, or to B for life remainder to A absolutely, the charge applies. However, if there is a power of appointment in favour of A, the charge does not apply as in this case there is a GWR. There is no sense in this. Since s.102ZA FA 1986 stops the *Eversden* schemes, the intangible property charge is an anti-avoidance provision that has lost its purpose[18] and only remains as clutter in the tax system which will occasionally trap the unwary (if anyone notices or cares).

## 66.9 Excluded transactions

A disposal of property by an excluded transaction is ignored for the disposal conditions; and the provision of property by an excluded transaction is ignored for the contribution conditions. Para 10(1) Sch 15 FA 2004 defines "excluded transaction" for the disposal conditions and para 10(2) Sch 15 FA 2004 defines the phrase for the contribution conditions. Each sub-paragraph contains five categories of excluded transaction, making 10 in all. Simplicity was evidently not an important consideration to the drafter of the POA rules.

Excluded transactions are not a defence to the POA intangible property charge.

---

16 See 24.3.2 ("Settlor-interested" for IT purposes).

17 Because s.624 only applies because of the loan and not because of the terms of the settlement (in the IHT sense).

18 Except for arrangements made before 22 March 2006.

## 66.10 Excluded transactions: disposal conditions

### 66.10.1 *Arm's length transactions*

Para 10(1) Sch 15 FA 2004 provides:

> For the purposes of ... [the disposal condition], the disposal of any property is an "excluded transaction" in relation to any person ("the chargeable person") if—
> (a) it was a disposal of his whole interest in the property, except for any right expressly reserved by him over the property, either—
> (i) by a transaction made at arm's length with a person not connected with him, or
> (ii) by a transaction such as might be expected to be made at arm's length between persons not connected with each other.

There is no equivalent of this category of excluded transaction for the purposes of the contribution conditions. The reason is that a disposal at arm's length is not likely to amount to "providing" consideration.

This is extended to part disposals by reg. 5(1) of the 2005 POA Regulations:

> Para 3 (land) and para 6 (chattels) do not apply to a person in relation to a disposal of part of an interest in any property if—
> (a) the disposal was by a transaction made at arm's length with a person not connected with him;
> (b) the disposal was by a transaction such as might be expected to be made at arm's length between persons not connected with each other, and
> (i) the disposal was for a consideration not in money or in the form of readily convertible assets[19], or
> (ii) the disposal was made before 7 March 2005.

One might think the word "not" is included accidentally in reg.5(1)(b)(i) but it was deliberate. A written ministerial statement of Hansard 7 March 2005 provides:

> We do not in general think it is appropriate to provide exemption for

19 Defined in reg.5(2).

> sales of a part interest which are made otherwise than at arm's length. If one member of a family needs to raise cash, and another member of the family is willing and able to provide it, there are other and more straightforward ways of structuring this than adopting the form of an equity release transaction.

Very few readers will find that satisfactory. But there it is. The statement continues:

> The point was however made in consultation that some intra-family part disposals can arise from patterns of behaviour adopted for good family or business reasons, for example where a child moves in to care for an aged parent and acquires an equitable interest in their shared home as a corollary of that, or where younger members of a family take over the active role in a family partnership, and in doing so acquire an interest from the partners who preceded them.

What is notable is that the drafter seems to have assumed that these are "transactions such as might be expected to be made at arm's length between persons not connected with each other".

The Website POA Guidance states (Appendix 1):

> If Miss B acquired her interest in the property by way of an equitable arrangement rather than for cash – for example, she had given up work to care for Mr A on the understanding that she would receive a share of the property in return – the income tax charge will not apply: Regulation 5
>
> In considering whether the conditions were satisfied, we would need information about how the essential elements of the transaction had been arrived at. We do recognise that there is a substantial body of case law dealing with the circumstances in which an interest in a house is acquired in consequence of a person acting to his detriment. The Ministerial Statement had these sorts of situations in mind and we would interpret Regulation 5 accordingly. In particular, we accept that the requirement that "the disposal was by a transaction such as might be expected to be made at arm's length between persons not connected with each other" would be interpreted with such cases in mind. Where the parties had sought separate advice and acted upon it or had obtained a court order confirming the property entitlement, that would reinforce the claim that the conditions were satisfied. But we would not expect parties to such an arrangement to have done this. We recognise that

> detriment that the acquirer can demonstrate he has suffered can provide consideration for the acquisition of the interest and prevent the transaction from being gratuitous.

It is straining credulity to describe this as a transaction that may have been expected to have been made at arm's length. But the legislation was not intended to catch this, and HMRC avoid the problem by informal concession dressed up as a statement of practice.

### 66.10.2 *Spouse exclusions*

The second and third categories of excluded transaction are in para 10(1)(b) and (c) Sch 15 FA 2004:

> (b) the property was transferred to his spouse or civil partner (or where the transfer has been ordered by a court, to his former spouse or civil partner),
> (c) it was a disposal by way of gift (or, where the transfer is for the benefit of his former spouse or civil partner, in accordance with a court order), by virtue of which the property became settled property in which his spouse or civil partner or former spouse or civil partner is beneficially entitled to an interest in possession.[20]

This applies whether or not the IHT spouse exemption applies on the transfer. The transfer to the spouse need not be by way of gift; but a disposal to a trust under which a spouse has an interest in possession must be by way of gift if the disposal is to be an excluded transaction. Perhaps the reason is to stop some variants of the double trust scheme, which involves a sale of a house to an interest in possession trust for consideration.

---

20 This is restricted by para 10(3) Sch 15 FA 2004:

> "A disposal is not an excluded transaction by virtue of sub-para (1)(c) or (2)(b), if the interest in possession of the spouse or civil partner or former spouse or civil partner has come to an end otherwise than on the death of the spouse or civil partner or former spouse or civil partner."

HMRC Website Guidance provides at 1.3.1:

> "In cases where the spouse or civil partner or former spouse or civil partner has become absolutely entitled to the property, we would accept that the benefit of the exclusion is not lost."

### 66.10.3 *Disposition for maintenance of family*

The fourth category of excluded transaction is in para 10(1)(d) Sch 15 FA 2004:

> the disposal was a disposition falling within section 11 of IHTA (dispositions for maintenance of family).

### 66.10.4 *Annual exemption and small gifts*

The fifth category of excluded transaction is in para 10(1)(e) Sch 15 FA 2004:

> the disposal is an outright gift[21] to an individual and is for the purposes of IHTA a transfer of value that is wholly exempt by virtue of section 19 (annual exemption) or section 20 (small gifts).

This will include substantial gifts which qualify for 100% BPR or APR.

## 66.11 Excluded transactions: contribution conditions

### 66.11.1 *Four exclusions*

Para 10(2) Sch 15 FA 2004 provides:

> For the purposes of ... (the contribution condition) the provision by a person ("the chargeable person") of consideration for another's acquisition of any property is an "excluded transaction" in relation to the chargeable person if—
> (a) the other person was his spouse or civil partner (or, where the transfer has been ordered by the court, his former spouse or civil partner),
> (b) on its acquisition the property became settled property in which his spouse or civil partner or former spouse or civil partner is beneficially entitled to an interest in possession.

These are the equivalent of the exclusions discussed above, see 66.10.2 (Spouse exclusions). The spouse trust exclusion here is wider than the

21 See 66.12 (Meaning of "outright gift").

spouse trust exclusion for the disposal condition, as the words "by way of gift" do not appear. The last two exclusions in para 10(2) Sch 15 FA 2004 are:

> (d) the provision of the consideration is a disposition falling within section 11 of IHTA (dispositions for maintenance of family), or
> (e) the provision of the consideration is an outright gift to an individual and is for the purposes of IHTA a transfer of value that is wholly exempt by virtue of section 19 (annual exemption) or section 20 (small gifts).

These are the equivalent of 66.10.3 (Disposition for maintenance of family) and 66.10.4 (Annual exemption and small gifts).

### 66.11.2 *Outright gift of money*

The remaining exclusion is in para 10(2)(c) Sch 15 FA 2004 where:

> (c) the provision of the consideration constituted an outright gift[22] of money (in sterling or any other currency) by the chargeable person to the other person and was made at least seven years before the earliest date on which the chargeable person met the condition in para 3(1)(a)[23] or, as the case may be, 6(1)(a).[24]

Para (c) applies only to the contribution conditions.

The exemption only applies to gifts of money. I am unable to see any reason for that. Website POA Guidance provides at 1.3.1:

> As the earliest date the conditions can be met is 6 April 2005, any provision of consideration by way of an outright gift of cash made before 6 April 1998 will be an excluded transaction.

## 66.12 Meaning of "outright gift"

The expression "outright gift" is used in three of the ten categories of excluded transaction:

---

22 See 66.12 (Meaning of "outright gift").
23 ie occupies the relevant land.
24 ie has possession of the chattels.

(1) Outright gifts to individuals within s.19 (annual exemption) or s.20 (small gifts) are excluded transactions for the disposal and contribution conditions.[25]
(2) Outright gifts of money (whether or not to an individual) are excluded for the disposal condition.[26]

"Outright gift" is not defined.[27] Clearly a loan and a subscription for shares is not an outright gift. It is suggested that a gift to a trust from which the settlor is excluded is in principle an outright gift.

It is tentatively suggested that a gift to an irrevocable discretionary trust of which the donor is merely a discretionary beneficiary is an outright gift. It must be envisaged that the donor occupies the land given or the exclusion will not apply.

## 66.13 Exemptions from charge

Para 11 Sch 15 FA 2004 provides a set of exemptions from the POA charges which (in my terminology) are as follows:
(1) Estate exemptions.
(2) GWR exemptions.
(3) Para 11(5)(b) Sch 15 FA 2004 exemptions (charities and other specialist areas) not discussed here.
(4) Para 11(5)(c) Sch 15 FA 2004 exemption (jointly occupied property) not discussed here.
(5) Full consideration exemption.

## 66.14 "Relevant property"

A key concept in para 11 Sch 15 FA 2004 is "relevant property" defined in para 11(9) Sch 15 FA 2004. The expression has three possible meanings.

In relation to the POA land and chattel charges, "relevant property" means:

> (i) where the disposal condition ... is met, the property disposed of,

---

25 See 66.10.4 (Annual exemption and small gifts); 66.11.1 (Four exclusions).
26 See 66.11.2 (Outright gift of money).
27 The term "outright gift" is partially defined in s.626 ITTOIA; see 64.14 (Income tax planning for mixed marriage), but that definition does not apply here.

> (ii) where the contribution condition ... is met, the property representing the consideration directly or indirectly provided.

In a contribution condition case, the relevant property is the property representing the consideration directly or indirectly provided. Since "provided" is a difficult concept,[28] this is also difficult.

If T gives money to A, who uses it to buy a house, the house represents the consideration provided.

What if T subscribes for shares in A Ltd which purchases the house. Is it the shares or the house which represent the property provided? It is suggested that the relevant property is the house, but the shares may be derived property: see below.

What if T lends money to A interest-free, who purchases a house? Is it the house or the benefit of the loan which represents the consideration provided? In this case HMRC accept that T does not provide the consideration so the contribution condition is not satisfied; but if it mattered, it is suggested that the relevant property is the house and the loan may be derived property.

In relation to the POA intangible property charge, "relevant property" has the meaning given in para 8 Sch 15 FA 2004 (roughly, the settled property).[29]

## 66.15 Estate exemptions

### 66.15.1 *Full estate exemption*

Para 11(1) Sch 15 FA 2004 provides that the POA charges:

> do not apply to a person at a time when his estate for the purposes of IHTA includes—
> (a) the relevant property, or
> (b) other property—
> (i) which derives its value from the relevant property, and
> (ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property.

28 See 66.6 ("Provide").
29 See 66.8 (POA intangible property charge).

I refer to this as "**the estate exemption**" (or "the **full** estate exemption" if necessary to distinguish it from the partial exemption discussed below).

If T transfers funds to a trust under which T has an estate interest in possession, the estate exemption will apply. Transfers on or after 22 March 2006 will not normally give rise to an estate IP, so the exemption is of less importance to post 2006 trusts.

### 66.15.2 *Partial estate exemption*

Para 11(2) Sch 15 FA 2004 provides:

> Where the estate for the purposes of IHTA of a person to whom para 3, 6 or 8 applies includes property—
> (a) which derives its value from the relevant property, and
> (b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property,
> the appropriate rental value in para 4, the appropriate amount in para 7 or the chargeable amount in para 9 (as the case may be) is to be reduced by such proportion as is reasonable to take account of the inclusion of the property in his estate.

I refer to this as "**the partial estate exemption**".

The concluding words "such proportion as is reasonable to take into account of the inclusion of the property in his estate" are somewhat incoherent. One can speak of "a proportion of a property", but not of "a proportion of an inclusion". Presumably it means: "such proportion as is reasonable to take into account of the property which is included in his estate".

## 66.16 Derived property

In the following discussion:

(1) "**Fully derived property**" is property falling within para 11(1)(b) Sch 15 FA 2004.[30] That is:

> property—
> (i) which derives its value from the relevant property, and
> (ii) whose value, so far as attributable to the relevant property, is not

30 In para 11 Sch 15 FA 2004 this is simply called "derived property".

substantially less than the value of the relevant property.

(2) "**Partly derived property**" is property falling within para 11(2) Sch 15 FA 2004. That is property:

(a) which derives its value from the relevant property, and
(b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property.

Thus there are three steps to decide whether property is "derived property":
(1) Is its value derived from the relevant property (the house)? If so:
(2) Ascertain how far its value is attributable to the house.
(3) Is that value (the value attributable to the house) "substantially[31] less" than the value of the house?

66.16.1 *Derived property: shares*

Suppose T subscribes for shares in a company which buys a house and has no other assets. The shares are fully derived property since:
(1) the shares derive their value from the house (the relevant property); and
(2) the value of the shares is attributable to the house; and
(3) that value is not substantially less than the value of the house.
Suppose the company owns a house and other assets. The context shows that the shares are still to be regarded as fully derived property since:
(1) they derive their value from the house;
(2) their value is to some extent attributable to the house;
(3) their value to that extent is not substantially less than the value of the house.
One might question whether it is the case that the shares derive their value

31 "Substantially" is, obviously, not a precise word. The Website POA Guidance states at 4.7:

> "The term 'substantially less' is not defined by the legalisation but by analogy with the CGT taper relief rules we would regard a reduction of value of less than 20% as not substantially less for the purposes of this Schedule. [Author's Note: see RI 228.] If the circumstances of a particular case suggest that the 'substantially less' provision should be triggered by a reduction of more or less than 20%, it will be judged on its individual merits."

from the house. They derive their value in part from the house and in part from other assets. However, the context shows that that satisfies the condition of para 11(1)(b)(i) Sch 15 FA 2004. Otherwise the condition in para 11(1)(b)(ii) Sch 15 FA 2004 is never satisfied.

Suppose the company owns only the house and is subject to a substantial debt. The shares are not fully derived property as their value is substantially less than the house. The shares are partly derived property.

Suppose the company owns the house and other assets, and is subject to a debt. It is suggested that the shares are fully derived property so long as the amount of the debt is less than the value of the other assets.

The estate exemption applies so long as T retains the shares in T's estate. If T gifts half the shares to T's spouse the estate exemption ceases to apply and POA land charge is due (but with some relief under the partial estate exemption). HMRC agree. Website POA Guidance provides at 1.3.2:

> For example if Mr B transfers his house to a company wholly owned by him, then provided there are no loans to the company one can say that the value attributable to the company is not less than the value of the house. But if Mr B gave the house to a company which was owned 25% by his wife then the value of the 75% shares he holds would be substantially less than the value of the house...

### 66.16.2 *Derived property: benefit of loan*

Suppose T lends interest-free to a company which purchases the house and has no other assets. Initially the loan is fully derived property as the shares have no value. The loan derives its value from the house as, if the loan is called in, it could only be paid by the company:

(1) selling the house and using the proceeds of sale, or
(2) borrowing on the strength of the house (in the sense that no lender would lend if the company did not hold the house) and repaying out of that loan.

Can HMRC argue that:

(1) the loan derives its value from the contractual undertaking that obliges the company to repay; and so
(2) the loan does not derive its value from the underlying property (the house).

Point (1) is correct but point (2) does not follow and is not correct. It is the existence of the house which gives value to the contractual obligation to repay.

If the value of the house increases substantially, the shares and loan (taken together) are fully derived property and taken separately they are partly-derived property.

Unfortunately HMRC disagree. The CIOT Statement provides:

> 6.3 Clarification is requested on the position where a house is owned by a company but the company is funded by way of loan. The concern is over paras 11(1)(b) and 11(3)(b).
>
> **Example 9**
>
> [1] B owns 100 £1 shares in X Limited and otherwise funds it by shareholder loan.
>
> [2] (Or the house is owned by a company held within an interest in possession trust for B and again the funding for the purchase comes by way of loan from trustees to company.)
>
> X Limited buys the house in which B lives. B *prima facie* falls within the para 3 charge.

In fact HMRC accept that case [1] does not fall within the POA land charge because the interest free loan is not providing consideration.[32] The CIOT Statement continues:

> It would appear that para 11(1) protects him. The shares are not themselves property which derive much value from the house because they are worth substantially less than the house (see para 11(1)(b)(ii)) but the shares and the loan together are comprised in B's estate and between them indirectly derive their value from the house. On that basis para 11(1) does offer full protection.
>
> **Question 33**
>
> Do HMRC agree with this analysis or do they consider that the loan derives its value from the contractual undertakings that oblige the borrowing company to repay?
>
> It would be odd if there is a POA problem when the company is funded by way of loan but not if it is funded by way of share capital.
>
> *HMRC*
>
> In our view, the loan, albeit an asset of B's estate, is not property that derives its value from the relevant property. However, our response to

32 See 66.6 ("Provide"). Over time HMRC have softened their stance on a number of POA issues by amending their website POA guidance. One drawback of CIOT/STEP statements of this kind is that they are not susceptible to the same process of reflection and informal easy amendment.

> Q32 above would no doubt be applicable here in appropriate circumstances.[33]

This is plainly wrong and I would be surprised if HMRC tried to defend it if seriously challenged.[34] Website POA Guidance qualifies this view if the loan is charged on the land:

> 1.3.2 ... For example if Mr B transfers his house to a company wholly owned by him, then provided there are no loans to the company one can say that the value attributable to the company is not less than the value of the house. ... If he has lent money to the company and the company holds the house we take the view that the company's value is less than the house unless (possibly) the loan is charged on the house.

The last sentence confuses the value of the loan with the value of the company.

The position is more complicated if T lends to a company which purchases the house and has other assets. Suppose, for example, the company's assets and liabilities consist of a house worth £1m, investments of £1m, and a debt of £1m. It is still plainly the case that the benefit of the debt and the shares taken together are fully derived property. It is suggested that if the debt is charged on the house it derives its value from the house, and if it is not charged then it does not do so (but the shares do derive their value from the house).

What if T lends to a trust which purchases a house? If the loan is on limited recourse terms[35] the loan is fully derived property. It is suggested that the same applies even if the trustees are personally liable for the loan.

### 66.16.3 *Derived property: equitable interests*

If T transfers property to a trust for A for life, remainder to T, T has a reversionary interest which is derived property. The interest is part of T's estate so the full (or partial) estate exemptions apply (depending on whether the value of the reversionary interest is equal to 80% or more of the value of the trust fund).

---

33 See 66.6 ("Provide").

34 But one could avoid the issue by avoiding loans, eg subscribe for redeemable shares, which are commercially equivalent to loans.

35 ie the trustees' liability to repay is restricted to the trust assets or their value.

It T transfers property to a trust for T for life, remainder to A, T's life interest is derived property but it does not form part of T's estate (after 2006) so the estate exemption does not apply.

## 66.17 Excluded liability rule

Para 11(6) Sch 15 FA 2004 provides a restriction on the estate exemptions:

> Where at any time the value of a person's estate for the purposes of IHTA is reduced by an excluded liability affecting any property...

I call this "**the excluded liability rule**". The effect of the rule if it applies is:

> ... that property is not to be treated for the purposes of sub-para (1) or (2) as comprised in his estate except to the extent that the value of the property exceeds the amount of the excluded liability.

The excluded liability rule only applies for the purposes of the estate and partial estate exemptions. The question of to what extent debts may limit the GWR exemption is discussed at 54.16 (GWR property subject to debt).

### 66.17.1 *"Excluded liability"*

The term "excluded liability" is defined in para 11(7) Sch 15 FA 2004:

> For the purposes of sub-para (6) a liability is an excluded liability if—
> (a) the creation of the liability, and
> (b) any transaction
>     [i] by virtue of which the person's estate came to include
>         [A] the relevant property or
>         [B] property which derives its value from the relevant property or
>     [ii] by virtue of which the value of property in his estate came to be derived from the relevant property,
> were associated operations, as defined by section 268 of IHTA.

I am unable to think of any liability affecting property which is not associated with the transaction within (b). The definition of associated operations is extremely wide. On a number of occasions where anti-avoidance provisions use the concept of "associated operations" restrictions have been read in by implication. The most recent is *Reynaud v IRC* [1999] STC (SCD) 185. This concerned a gift of shares followed by a sale of those shares, two associated operations. The case considered the definition of "transfer of value". That term includes "a disposition effected by associated operations" which reduces the value of an estate. The Special Commissioners held that associated operations were only relevant if they were part of a scheme contributing to the reduction of the estate. See the decision at [17]. However, the decision was not based on the definition of associated operations. On the contrary, it was accepted that operations which do not form part of a scheme could nevertheless be associated. It was the concept of "*disposition effected by associated operations*" which was held to refer only to operations which formed part of a scheme. That is, the restriction was implied by the context of s.3(3) IHTA, not by the words of s.268.

One could argue that the context of para 11(7) Sch 15 FA 2004 implies a restriction that only associated operations forming part of a scheme are relevant for the definition of excluded liability. This would have to be a purposive construction since the words are not in fact there in para 11(7) Sch 15 FA 2004. But we know that the purpose of para 11(7) Sch 15 FA 2004 is to *catch* double trust plans. The effect of this construction would be to *defeat* the intention of the legislation. The argument asks the Courts to frustrate the actual intention of the legislation. So the argument is unlikely to succeed.

### 66.17.2 *"Affecting" property*

The rule only applies to a liability which "affects" property. It is suggested that a liability of an individual or company does not affect property of the individual or company unless secured on that property. A liability of a company does not affect the shares of the company (even if it may reduce their value). A liability of a trust does affect the trust property since the trustees have a lien over the trust fund to meet the liability.

## 66.18 Value of estate "reduced" by liability

The excluded liability rule only applies if the value of a person's estate is "reduced" by a liability. In what circumstances does a liability reduce the value of an estate? Plainly it does not do so if it is disallowed for IHT.[36]

### 66.18.1 *Trustees borrow from trust company*

What if trustees owe a debt to a company held by the trust? It is considered that the debt does not reduce the life tenant's estate since the benefit of the debt increases the value of the company's shares: the two cancel each other out. (In addition, the GWR exemption will usually apply.)

### 66.18.2 *Bank borrowing*

What if T (or trustees of a trust in which T has an estate IP) borrow money from a bank or third party? It is considered that T's estate is not "reduced" by the liability, since T's estate is not reduced by the transaction: the liability is matched by the receipt of the borrowed money. Otherwise the excluded liability rule would apply whenever anyone borrows on the security of T's house, which would be absurd.[37]

### 66.18.3 *Company borrows from individual*

Suppose T lends to a company (owned by T) which purchases the property. The liability is an excluded liability as defined, but so long as T retains the benefit of the debt the excluded liability rule does not apply because the debt does not reduce T's estate. What if T gives away the debt? The excluded liability rule does not apply unless the debt is secured because the debt does not affect the property.

### 66.18.4 *Double trust schemes*

The excluded liability rule was intended to catch double trust schemes. Suppose:

(1) T sells T's home to a trust under which T has an interest in possession

---

36 See 56.2 (Liability of individual).

37 Admittedly s.162(5) IHTA applies and uses the word "reduced" in connection with the same liability. But the question is not whether the value of an *asset* is reduced, but whether the value of the *estate* is reduced.

in return for a debt.

At this point the excluded liability rule does not apply. The liability is an excluded liability as defined.[38] However, the benefit of the debt is in T's estate. It is considered that the value of T's estate is not "reduced" by the liability.

(2) T gives the benefit of the debt to T's children or to a trust for their benefit.

Is the value of T's estate is now reduced by the liability? One can argue that it is reduced by the gift of the debt, not by the liability. But a purposive construction suggests that this cannot be right.

The provision works as intended.

### 66.18.5 *HMRC view*

The CIOT Statement provides:

> 2.5 A common scenario (both for foreign and UK domiciliaries) is where cash is settled into an interest in possession trust for the donor life tenant. The trustees then buy a house for the donor to live in using the gifted cash plus third party barrowings. Although not a home loan scheme, the legislation appears to affect such arrangements.
>
> **Example 4**
>
> E settles cash of £200,000 into an interest in possession trust for himself in 2003. The trustees purchase a property worth £500,000, borrowing £300,000 from a bank. There are other assets in the trust which can fund the interest but the borrowing is secured on the house which E then occupies.
>
> In these circumstances, one would not expect a POA charge. There is no inheritance tax scheme since the property is part of E's estate and the borrowing is not internal. One would argue that E's estate still includes the house and therefore protection is available under para 11(1). The difficulty is that on one view the loan is an excluded liability within para 11(7) reducing E's estate, albeit it is a loan on commercial terms with a bank.
>
> We would argue that the relevant property for the purposes of para 11 is simply the value of the property net of the commercial borrowing. As this is part of E's estate there is no POA charge.

38 The transaction by which the person's estate included the house was its purchase not the sale to the trust. The creation of the liability is an associated operation because it affects the same property even if the purchase was many years earlier.

**Question 13**
Is the above analysis correct?
**HMRC**
We agree with your analysis in para 2.5.

It is quite correct that one would not expect a POA charge, as there is no IHT saving. However, what is the correct analysis of the provisions in this situation? The loan is clearly an excluded liability. It is quite wrong to say that the *property* for the purposes of para 11 Sch 15 FA 2004 is its *value* net of the liability, because that confuses two entirely different things: property and the value of property. It is also wrong to say that the asset for the purposes of para 11 Sch 15 FA 2004 is the asset net of the liability; if one said that, the legislation would not work at all. The best solution is to say that the liability does not reduce the estate of the individual, E, because E's estate is increased by the proceeds of the loan (as well as being reduced by the liability; the two cancel each other out).

## 66.19 Reverter to settlor restriction

The FA 2004 introduced a restriction to the estate and GWR exemptions:

> (11) Sub-para (12) applies where at any time—
> (a) the relevant property has ceased to be comprised in a person's estate for the purposes of IHTA 1984, or
> (b) he has directly or indirectly provided any consideration for the acquisition of the relevant property,
> and at any subsequent time the relevant property or any derived[39] property is comprised in his estate for the purposes of IHTA 1984 as a result of section 49(1) of that Act (treatment of interests in possession).
> (12) Where this sub-paragraph applies, the relevant property and any derived property—
> (a) are not to be treated for the purposes of sub-paras (1) and (2) as comprised in his estate at that subsequent time, and
> (b) are not to be treated as falling within sub-para (5) in relation to him at that subsequent time.

I refer to this (somewhat inaccurately) as the "**reverter to settlor**

39 Para 11(13) Sch 15 FA 2004 defines "derived property" in terms which repeat the wording of para 11(1)(b) Sch 15 FA 2004 verbatim.

**restriction**". The effect of para 11(12) Sch 15 FA 2004 is to disapply the estate exemptions and the GWR exemption.

EN FB 2006 explains:

> 17. [The POA] income tax charge was designed to discourage disposals done in a contrived way to avoid IHT. The income tax charge does not therefore apply when the original owner has the property back in their estate for IHT purposes (para 11(1) Schedule 15 – for example, because it has been given back to them), or when it is treated as back in their estate (para 11(5) – for example, because the original transaction is caught by the IHT "gift with reservation" rules).

After this loose and colloquial explanation, the EN continues:

> 18. There is a mismatch between this relief and an existing IHT exemption for the settled property in "reverter-to-settlor" trusts. The property in such a trust is treated as part of the trust beneficiary's estate for IHT purposes, but it is not actually charged when their interest ends.
> 19. In particular, section 54(1) IHTA provides that, when a person who is beneficially entitled to an interest in possession in settled property dies while the settlor is still living, and the property reverts to the settlor, its value is left out of account in determining the value of the person's estate. [The EN summarises ss.53 and 54 IHTA and continues:]
> 20. This can be used to side-step both IHT and the pre-owned asset income tax charge. For example:
> - B owns an asset, say a house, which he wants to carry on using. B gives it to S, who would otherwise inherit on B's death;
> - S then settles an interest in possession in the house back on B for life, with the condition that it reverts to S on B's death;[40]
> - for IHT purposes, B is therefore treated as owning the house by virtue of section 49 IHTA and so para 11(1) Schedule 15 disapplies the "pre-owned asset" charge;
> - however, although the house is part of B's estate for IHT purposes, there is no IHT charge on B's death by virtue of the exemption in section 54(1) IHTA.
>
> 21. This clause is aimed at blocking such avoidance by ensuring that the income tax exemption does not apply where the property in question (or any derived property) is back in the chargeable person's estate for IHT purposes by virtue of their being beneficially entitled to an interest in

40 Author's Note: This is not of course generally possible after 22 March 2006.

> possession in it.
> 22. However, the clause also provides that, if the chargeable person does not wish to be subject to the income tax charge, they can elect (like other former owners otherwise liable to the "pre-owned asset" charge) that the property should fall back into their estate for IHT purposes. Thus the clause ensures an effective IHT charge in these circumstances by providing that the exemptions in sections 53(3), 53(4) and 54 IHTA will not apply.

Unfortunately there is only a passing resemblance between the terms of para 11(11) Sch 15 FA 2004 and the EN. The reverter to settlor restriction applies wherever a person has an estate in property if:

(1) relevant property has ceased to be comprised in a person's estate; or
(2) they have directly or indirectly provided any consideration for the acquisition of the relevant property.

I refer to this as the "trigger conditions". Trigger condition (2) is a paraphrase of the contribution condition. So wherever the contribution condition applies, the estate exemption is disapplied. For instance, suppose:

(1) T transfers cash to an IP settlement (before 22 March 2006); and
(2) the trustees acquire a UK residence.

The reverter to settlor restriction applies (even though the reverter to settlor exemption does not apply!) so it appears that the POA charge applies. But HMRC do not agree. Published correspondence between STEP and CIOT provides:

> **STEP letter**
> The potential difficulty with paras 11(11) and 11(12) is that they do not distinguish between reverter to settler trusts and <u>any</u> trust set up between March 1986 and 22 March 2006 where the settlor has a qualifying interest in possession and would in that event be subject to inheritance tax on his death.
> These difficulties arise because paras 11(11) and 11(12) catch not only those transactions where land has been given away and ceased to be comprised in the settlor's estate and then comes back into his estate (condition a above). They also catch transactions where a settlor contributed funds or property to a trust and the trust (or an underlying company) has then used those funds or property representing them to buy the relevant property i.e. the land now occupied (condition b above). There is nothing in the words about "any subsequent time" which suggests that under (b) the property had first to cease to be comprised in his estate before being caught by this provision. Indeed if that was the case the words in (a) would be redundant.
> Are the following cases caught by POAT from 5 December 2005 (the date the change came into effect):

1. In 1987, A sets up an interest in possession trust for himself into which he gifts his house. If the house is still held by the trustees now there is no POAT charge because nothing has left his estate. However assume that the house has since been sold but he retains an interest in possession. The trust holds a mixture of investments and another house that A occupies. Is para 11(11)(b) satisfied on the basis that A has provided consideration for the acquisition of the land which land has subsequently become comprised in his estate. ...
2. B is a foreign domiciliary who before 22 March 2006 set up a discretionary trust into which he transferred cash. He remains a beneficiary of the trust. The trust then funds a company which buys a house or possibly holds UK investments (and B will pay income tax under [s720 ITA] in respect of any UK income). The trust was before 22 March 2006 converted into an interest in possession trust. If there are any UK intangibles or UK property occupied by A which are held by the trustees within the interest in possession structure he is now subject to POAT. Even if one reads "subsequent time" to mean some time must elapse between the date when the gift is made and the date the property comes back into B's estate this would still not protect B in this example because the trust was originally discretionary.
3. In June 2006, C, a disabled person, sets up a trust for himself that qualifies as a disabled person's interest within s89B IHTA. C puts in cash and the trustees invest in equities or a house that C occupies. C will pay POAT. ...

**HMRC response**

As I understand your concern, it is that the new para 11(11)(b) in Schedule 15 FA 2004 will catch someone who has settled, say, cash on interest in possession trusts for themselves (either before 22 March 2006, or afterwards if it is a "disabled person's interest") and subsequently occupies property bought by the trustees; or where the property they settled initially has been sold and replaced by other property, while the settlor has retained their interest in possession.

The new paragraph refers to the chargeable person "directly or indirectly [providing] any consideration for the acquisition of the relevant property", and goes on to require that, "at any subsequent time", the relevant property is comprised in the settlor's IHT estate by virtue of their having an interest in possession in it.

In our view, the words "at any subsequent time" should be read as meaning that a POA charge will arise where the consideration leaves the donor's estate, as a result of which that estate is reduced, and later property acquired with such consideration becomes comprised in it again because of their interest in possession. This is consistent with the reasons for Schedule 15.

We do not, therefore, consider that there will be a charge in the scenarios numbered 1 and 3 in your letters, because the assets transferred into trust and any derived assets have always been in the settlor's estate for IHT purposes. We believe that also applies if, in your second scenario, B set up an interest in possession trust from the outset before Budget Day. The taxpayer should self-assess on the basis that no POAT is due and there is therefore no need to put anything about POAT on the tax return or for him to make the election where the settlor has retained an interest in possession throughout and settled the cash or property directly into trust himself (rather than through any other funding vehicle such as another trust). This is because no POAT charge arises under s80 FA 2006.

In summary we do not consider that s.80 FA 2006 has any implications for:

- a settlement of cash on interest in possession trusts for onself made before 22 March 2006, or made by a disabled person on or after that date, after which the trustees purchase a property in which the settlor resides; or
- the settlement of a house in the same way, which is subsequently sold by the trustees and replaced by other investments or another property.

That remains our view, on the basis that the words "at any subsequent time" mean that new para 11(11)(b) Schedule 15 FA 2004 will only be relevant where:

- the consideration in question leaves the donor's estate, as a result of which that estate is reduced; and
- later, property acquired with such consideration becomes comprised in the estate once more by virtue of an interest in possession.

We do not agree that this interpretation makes para 11(11)(a) redundant, since that relates to cases where the disposal condition is met and para 11(11)(b) to cases where the contribution condition is met.

We accept that a POA charge may arise where someone set up a discretionary trust that has subsequently been converted into an interest in possession trust for the benefit of the settlor. (Scenario 2 in your example). However, it remains possible in those circumstances to elect out of the charge. So, take the following example:

- H settles a property on discretionary trusts before 22 March 2006;
- also before that date, the trust is converted into an interest in possession trust for H's benefic, with remainder to his wife, W;
- A POA charge therefore arises because of s.80 FA 2006 but H elects.

As we see it, the effects of the election are:

- the chargeable proportion of the property will be treated as subject to a reservation, but only so far as H is not beneficially entitled to an interest in possession in the property (*para 21(2)(b)(i), Schedule 15 FA 2004*) – i.e. not at all;
- section 102(3) and (4) FA 1986 will apply, but only so far as H is not beneficially entitled to an interest in possession in the property (*para 21(2)(b)(ii)*) – i.e. not at all; and
- the reverter-to-settlor exemptions in s.53(3) and (4) and s.54 IHTA will not apply to the actual interest in possession (*para 21(2)(b)(iii)*).

We do not, therefore, consider that the election affects the availability of spouse exemption on H's interest in possession on his death – or on its termination during his lifetime. That is because, as we have just noted, the election will not cause s.102(3) and (4) FA 86 to apply because of H's interest in possession, so there will be no deemed PET.

## 66.20 GWR exemptions

### 66.20.1 *Full GWR exemption*

Para 11(3) and (5) Sch 15 FA 2004 provide:

> (3) Paras 3, 6 and 8 do not apply to a person at a time when—
> (a) the relevant property, or
> (b) any other property—
> (i) which derives its value from the relevant property, and
> (ii) whose value, so far as attributable to the relevant property, is not substantially less than the value of the relevant property,
>
> falls within sub-para (5) in relation to him.
>
> ...
>
> (5) Property falls within this sub-paragraph in relation to a person at a time when it—
> (a) would fall to be treated by virtue of any provision of Part 5 of the 1986 Act (inheritance tax) as property which in relation to him is property subject to a reservation,
> (b) would fall to be so treated but for any of paras (d) to (i) of subsection (5) of section 102 of the 1986 Act (certain cases where disposal by way of gift is an exempt transfer for purposes of inheritance tax),
> (c) would fall to be so treated but for subsection (4) of section 102B of the 1986 Act (gifts with reservation: share of interest in land), or would have fallen to be so treated but for that subsection if the disposal by way of gift of an undivided share of an interest in land had been made on or after 9 March 1999, or
> (d) would fall to be so treated but for section 102C(3) of, and para 6 of Schedule 20 to, the 1986 Act (exclusion of benefit).

In short, the POA charges do not apply to property subject to a reservation. (“**GWR property**”).

I refer to this as “**the full GWR exemption**”.

The question of whether property is GWR property (subject to a reservation) is considered at 54.2 (Terminology).[41]

41 For this purpose para 11(8) Sch 15 FA 2004 tinkers with the GWR tracing rules: “In determining whether any property falls within sub-para (5)(b), (c) or (d) in a case where the contribution condition in para 3(3) or 6(3) is met, para 2(2)(b) of Schedule 20 [FA 1986] (exclusion of gifts of money) is to be disregarded.”

Note that property may be GWR property even though it is excluded property. Suppose:

(1) T transfers funds to a discretionary trust under which T is a beneficiary (a GWR).[42]
(2) The trustees lend the funds to a company which purchases a house occupied by T.

The shares and the benefit of the loan are derived property, and are subject to a reservation. This is so even if they are excluded property. So the GWR exemption applies.

A complication arises if T becomes UK domiciled: see 66.25 (Former foreign domiciliary).

### 66.20.2 *Partial GWR exemption*

Para 11(4) Sch 15 FA 2004 provides:

> Where any property which falls within sub-para (5) in relation to a person includes property—
> (a) which derives its value from the relevant property, and
> (b) whose value, so far as attributable to the relevant property, is substantially less than the value of the relevant property,
> the appropriate rental value in para 4, the appropriate amount in para 7 or the chargeable amount in para 9 (as the case may be) is to be reduced by such proportion as is reasonable to take account of that fact.

I refer to this as the "**partial GWR exemption**". It is the equivalent of the partial estate exemption discussed above (except that the words at the end of the subsection are grammatical).

## 66.21 Full consideration exemption

The full consideration exemption in para 11(5)(d) Sch 15 FA 2004 applies where (in my paraphrase) the relevant property or derived property:

> would fall to be treated as property subject to a reservation but for s.102C(3) and Schedule 20 para 6 FA 1986.

---

The Website POA Guidance gives an example at 4.2.

42 The position is the same for a non-estate IP trust if T is the object of a wide power of appointment (so there is a GWR).

There are two exemptions here:[43]

(1) where the GWR rule would apply but for s.102C(3) FA 1986; and
(2) where the GWR rule would apply but for para 6 Sch. 20 FA 1986.

Section 102C is not discussed here. Para 6(1) Sch 20 FA 1986 provides two exemptions to the GWR rule. The first is:

> In determining whether any property which is disposed of by way of gift is enjoyed to the entire exclusion, or virtually to the entire exclusion, of the donor and of any benefit to him by contract or otherwise—
> (a) in the case of property which is an interest in land or a chattel, retention or assumption by the donor of actual occupation of the land or actual enjoyment of an incorporeal right over the land, or actual possession of the chattel shall be disregarded if it is for full consideration in money or money's worth ...

I call this the "**full consideration exemption**". This is particularly important in relation to chattels because full consideration would be much less than the deemed income charge. As to the meaning of "full consideration" see RI 55 and the published IR letter of 18 May 1987. At present HMRC argue that the industry standard 1% guideline as the market rent for chattels is too low.

The full consideration exemption only applies if there would otherwise be a GWR. If an individual has carried out an *Eversden* scheme, they will not qualify for the full consideration exemption even if they pay full consideration for use of the land (though the rent paid will reduce the quantum of the POA charge).

The second exemption in para 6(1)(b) Sch 20 is less likely to be important in practice.

## 66.22 Partnerships

Website POA Guidance provides:

> The treatment of a share of a partnership interest for Schedule 15

43 Another possible reading is that the exemption only applies if s.102C(3) and Sch 20 para 6 both apply, ie it is not enough that Sch 20 para 6 applies if s.102C(3) does not. But a close reading of s.102C shows that s.102C(3) and para 6 Sch 15 FA 2004 are alternatives. They cannot both apply. *Hansard* confirms this (if it were necessary): HC 7 July 2004 col.881, 900. The Website POA Guidance agrees.

> purposes follows that applied for IHT purposes. In other words, we do not regard the partnership interest as transparent, and the disposal of a share is unlikely to give rise to a Schedule 15 charge in any circumstances.

This is not a view which bears much examination. If a partnership holds land, a partnership interest is an interest in land, and a disposal of that interest meets the disposal condition.[44] But the legislation was not intended to catch partnerships and HMRC avoid the problem by informal concession dressed up as a statement of practice.

## 66.23 Non-resident taxpayer

Para 12(1) Sch 15 FA 2004 provides:

> This Schedule does not apply in relation to any person for any year of assessment during which he is not resident in the UK.

This is straightforward.

## 66.24 UK resident foreign domiciliary

Para 12(2) Sch 15 FA 2004 provides:

> Where in any year of assessment a person is resident in the UK but is domiciled[45] outside the UK, this Schedule does not apply to him unless the property falling within para 3(1)(a), 6(1)(a) or 8(1)(c) is situated in the UK.

This provides three exemptions:
(1) exemption to POA land charge where T occupies non-UK situate land;

---

44 Contrast the original HMRC guidance (so called "Technical Guidance" 2004) which took the correct (if worrying) line that the POA rules in principle apply "if C, an existing partner, brings his son D into partnership"; see the 6th edition of this work, para 43.10.1.

45 "Domiciled" is defined in para 12(4) Sch 15 FA 2004:
" For the purposes of this paragraph, a person is to be treated as domiciled in the UK at any time only if he would be so treated for the purposes of IHTA."

(2) exemption to POA chattel charge where T uses non-UK situate chattels; or
(3) exemption to POA intangible property charge where intangible property is not UK situate.[46]

Para 12 Sch 15 FA 2004 does not provide exemption where T transfers assets to a non-UK company which holds UK land occupied by T. But the GWR or estate exemption will usually apply.

## 66.25 Former foreign domiciliary

Para 12(3) Sch 15 FA 2004 provides:

> In the application of this Schedule to a person who was at any time domiciled[47] outside the UK, no regard is to be had to any property which is for the purposes of IHTA excluded property in relation to him[48] by virtue of section 48(3)(a) of that Act.[49]

The words "was at any time domiciled outside the UK" refer to a person who was formerly foreign domiciled but who has become UK domiciled. The words do not refer to a person who was and remains foreign domiciled. (The words in isolation could, taken literally, apply in such a case, but the word *was* in para 12(3) Sch 15 FA 2004 is to be contrasted with *is* in para 12(2) Sch 15 FA 2004.)

Suppose:

(1) T (not UK domiciled) creates a discretionary trust of which T is a beneficiary;
(2) The trust holds:
    (a) Non-UK investments.
    (b) A company holding UK property occupied by T.

At this point, the conditions for the POA intangible property charge and the POA land charge are satisfied but the GWR exemption provides relief

---

46 The exemption (anonymously) does not apply to exempt gilts and AUTs or OEICs which may be excluded property but which are UK situate.

47 See above footnote.

48 The words "in relation to him" are misconceived. Property is excluded property or not excluded; but it cannot be excluded property "in relation to" any particular beneficiary. It is considered that these words should simply be disregarded.

49 The exemption (anonymously) does not apply to exempt gilts and AUTs or OEICs which may be excluded property, but not under s.48(3)(a) IHTA.

in both cases.

(3) Suppose T becomes UK deemed domiciled (or actually domiciled). At first sight T ceases to enjoy the benefit of the GWR and estate exemptions as the trust property is excluded property, so "no regard" is to be had to it.

(1) In relation to the investments, there is still no POA intangible property charge, since the investments are excluded property, so no regard is to be had to them either.

(2) However, the land is not excluded property, so the POA land charge seems to apply.[50] This was certainly not foreseen at the time the legislation was passed. It is suggested that para 12(3) Sch 15 FA 2004 is, like a deeming provision, to be construed to have effect so far as intended but it was not intended to disapply the GWR and estate exemptions. The modern purposive approach to construction of tax statutes may on this occasion assist the taxpayer. The 17 March 1986 POA start date supports this view. That date shows that the object of the rules is to prevent GWR avoidance, not other kinds of IHT mitigation.

HMRC agree with this view. The CIOT Statement provides at para 7:

> Para 12(3) states that no regard is to be had to excluded property. In a case where a trust settled by a foreign domiciliary owns a UK house through a foreign registered company the shares in the company (and any loan to the company) are excluded property. Concern has been expressed that since para 12(3) says that no regard is to be had to these assets, this in turn means that the shares and loan have to be ignored in applying para 11 and in particular cannot be taken into account in determining whether there is derived property which is in the taxpayer's estate or GWR property in relation to him (which the shares and loans otherwise are). We think that this argument is misconceived but it has been advanced.
>
> **Question 42**
>
> Can HMRC confirm that they agree para 12(3) does not operate in this way and that para 11 can still work to protect the UK house or underlying assets owned by the offshore company in these circumstances?

50 A further tax charge would arise if (as some have argued) T is also caught by the GWR rules on his death; see 54.12 (GWR death charge: excluded property rules for settled property).

> *HMRC*
> We agree with what you say in para 7.1 about the interaction between paras 12(3) and 11.

Website POA Guidance provides at 4.1:

> Para 12(3) of the schedule provides that if any property situated outside the UK became comprised in a settlement when the person settling the property was domiciled outside the UK it will not be subject to the charge. Even if that person becomes domiciled in the UK at a later date this property will remain excluded from the charge.
> Para 12(3) provides that a charge under this Schedule shall not arise in relation to property regarded as excluded by virtue of section 48(3) IHTA'84. We do not regard this provision as having an impact on para 11 in determining whether there is derived property in the taxpayer's estate, or GWR property in relation to him (see foreign domiciliary example in appendix).

## 66.26 Quantum of charge – land

We find the usual cascade of definitions. Para 3(5) Sch 15 FA 2004 provides:

> Where this paragraph applies to a person in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 4 is to be treated as income of his chargeable to income tax.

### 66.26.1 *The chargeable amount and deductible expenses*

One therefore turns to para 4 Sch 15 FA 2004 to find the quantum of the charge. Para 4(1) Sch 15 FA 2004 provides:

> For any taxable period[51] the chargeable amount in relation to the relevant land is
> [a] the appropriate rental value ... less

51 "Taxable period" is defined in a commonsense way in para 4(6) Sch 15 FA 2004:
"In this paragraph—
'the taxable period' means the year of assessment, or part of a year of assessment, during which para 3 applies to the chargeable person."

[b] the amount of any payments which, in pursuance of any legal obligation, are made by the chargeable person during the period to the owner of the relevant land in respect of the occupation of the land by the chargeable person.

To obtain a deduction requires good paperwork:
(1) a legal obligation; and
(2) payment to the owner of the relevant land.
This is straightforward in an *Eversden* scheme, but who is the "owner" of the land in an *Ingram* scheme (where there is a lease owned by T and a reversion owned by others)? Who is owner of the land in a double trust scheme (where the land is held by trustees)?

66.26.2 *"The appropriate rental value"*

This is defined in para 4(2) Sch 15 FA 2004. This provides:

The appropriate rental value is $R \times (DV \div V)$

In short, R is the **R**ental value; V is the capital **V**alue. DV ÷ V is (in a sense) the chargeable part of that value. **DV** stands, perhaps, for Disposal Value.

66.26.3 *"Rental value"*

R is the rental value of the relevant land for the taxable period. "Rental value" is defined in the same manner as the income tax benefit in kind rule: it means the "annual value". The "annual value" is in turn defined in para 5 Sch 15 FA 2004. That is copied from s.110 ITEPA, except that s.110(3), (4) are omitted. It is here called "the POA Annual Value". The POA Annual Value is defined as the rent which will be payable *on the assumption that the landlord (rather than the tenant) pays for all repairs and insurance*. The normal market rent will be lower than the POA Annual Value, because market practice is that the *tenant* pays the cost of repairs and insurance. The difference between POA annual value and normal market rent will vary from one property to another. The difference would be greater with large properties which are expensive to maintain and insure. In relation to other benefits in kind provisions, such as s.87 and s.731, beneficiaries have sometimes been given the benefit of living accommodation on terms that they are responsible for maintenance and insurance. If the maintenance and insurance cost is substantial, they argue that the value of the benefit is small or sometimes even nil. It was perhaps to avoid these arguments that the legislation was framed in this way. It seems extraordinary if one thinks that the legislation is intended to charge income tax on a benefit in kind. However, the object of the legislation is really to penalise taxpayers who have carried out some IHT planning schemes and so it does make sense.

The wording is derived from rating legislation. There is a substantial amount of case law, and to research this the reader should refer to rating law textbooks.

The reader will recall that the annual value for benefit in kind purposes is by concession taken to be the rateable value.[52] There is no reason to think that this concession will be applied for the POA Annual Value. POA Annual Value is (in short) slightly above market rental value.

### 66.26.4 *The proportion (DV ÷ V)*

The key expression is DV. Para 4(2) Sch 15 FA 2004 provides:

> DV is—
> (a) in a case falling within para 3(2)(a)(i),[53]
> [i] the value as at the valuation date of the interest in the relevant land that was disposed of as mentioned in para 3(2)(b) by the chargeable person or,
> [ii] where the disposal was a non-exempt sale, the appropriate proportion of that value,
> (b) in a case falling within para 3(2)(a)(ii),[54]
> [i] such part of the value of the relevant land at the valuation date as can reasonably be attributed to the property originally disposed of by the chargeable person or,
> [ii] where the original disposal was a non-exempt sale, to the appropriate proportion of that property, and
> (c) in a case falling within para 3(3),[55] such part of the value of the relevant land at the valuation date as can reasonably be attributed to the consideration provided by the chargeable person, and
> V is the value of the relevant land at the valuation date.

52 See 65.14.1 (“Rental value of the accommodation”).
53 ie disposal condition (i), see 66.4.1 (Disposal condition (i)).
54 ie disposal condition (ii), see 66.4.2 (Disposal condition (ii)).
55 ie the contribution condition, see 66.5 (The contribution conditions).

The drafter does not deal with a case falling within the disposal and the contribution condition, eg if the individual disposes of an interest in a contract to purchase land to another person and also provides the purchase price.

### 66.26.5 *(DV÷V) and the valuation date*

The valuation date is determined by the 2005 POA Regulations. The Consultation Document "Taxation of Pre-Owned Assets: Further Consultation" 16 August 2004 explains:

> 5. In the case of land, the "cash equivalent" of enjoyment in a particular tax year is derived from market rental that would be paid for use of the land over the "taxable period" (that is, the tax year or any shorter period for which the asset is "caught" by Schedule 15). This figure is then scaled down, in cases where the taxpayer's "stake" in the caught asset is less than 100 per cent, in the proportion DV/V, where V is the value of the whole asset on the "valuation date" for the year, and DV is the value reasonably attributable to the taxpayer on that date. In many cases, however, we would expect that taxpayers and their advisors will be able to establish the ratio DV/V from the surrounding circumstances without necessarily establishing the absolute amount of V or DV.

### 66.26.6 *Non-exempt sale*

Para 4(4) Sch 15 FA 2004 provides a relief for a "non-exempt" sale. Para 4(4) Sch 15 FA 2004 begins with the definition of this term:

> The disposal by the chargeable person of an interest in land is a "non-exempt sale" if (although not an excluded transaction) it was a sale of his whole interest in the property for a consideration paid in money in sterling or any other currency;

The label ("non-exempt sale") is chosen, presumably, because the sale is not an excluded transaction. (Perhaps "non-excluded sale" would have been clearer.)

The relief is given by the method of re-defining "the appropriate proportion" to a smaller amount. Para 4(4) Sch 15 FA 2004 continues:

> and, in relation to a non-exempt sale, "the appropriate proportion" is

$(MV–P) \div MV$
where—
MV is the value of the interest in land at the time of the sale;
P is the amount paid.

This will not often apply as a sale for full value will usually be an excluded transaction and a sale at an undervalue will probably qualify for the GWR exemption.

## 66.27 Quantum of charge – chattels

Para 6(5) Sch 15 FA 2004 provides:

> Where this paragraph applies to a person in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 7 is to be treated as income of his chargeable to income tax.

### 66.27.1 *The chargeable amount*

Para 7(1) Sch 15 FA 2004 provides:

> For any taxable period the chargeable amount in relation to any chattel is
> [a] the appropriate amount (as determined under sub-para (2)),
> [b] less the amount of any payments which, in pursuance of any legal obligation, are made by the chargeable person during the period to the owner of the chattel in respect of the possession or use of the chattel by the chargeable person.

This follows the format of the POA land charge.

### 66.27.2 *The appropriate amount*

Para 7(2) Sch 15 FA 2004 provides:

> The appropriate amount is $N \times (DV \div V)$

In short, N is **N**otional interest. DV and V are similar to the POA land charge. In detail:

N is the amount of the interest that would be payable for the taxable period[56] if interest were payable at the prescribed rate on an amount equal to the value of the chattel [at][57] the valuation date,

DV is—

(a) in a case falling within para 6(2)(a)(i),

[i] the value as at the valuation date of the interest in the chattel that was disposed of as mentioned in para 6(2)(b) by the chargeable person or,

[ii] where the disposal was a non-exempt sale,[58] the appropriate proportion of that value,

(b) in a case falling within para 6(2)(a)(ii),

[i] such part of the value of the chattel at the valuation date as can reasonably be attributed to the property originally disposed of by the chargeable person or,

[ii] where the original disposal was a non-exempt sale, to the appropriate proportion of that property, and

(c) in a case falling within para 6(3), such part of the value of the chattel at the valuation date as can reasonably be attributed to the consideration provided by the chargeable person, and

V is the value of the chattel at the valuation date.

## 66.28 Quantum of charge – intangible property

Para 8(3) Sch 15 FA 2004 provides:

> Where this paragraph applies in respect of the whole or part of a year of assessment, an amount equal to the chargeable amount determined under para 9 is to be treated as income of the chargeable person chargeable to income tax.

### 66.28.1 *The chargeable amount*

Para 9(1) Sch 15 FA 2004 provides:

---

56 Para 7(5) Sch 15 FA 2004 provides that "the taxable period" means the year of assessment, or part of a year of assessment, during which para 6 Sch 15 FA 2004 applies to the chargeable person.

57 The statute erroneously reads "as".

58 Non-exempt sale is defined in para 7(3) Sch 15 FA 2004 following the form of the POA land charge: see 66.26.6 (Non-exempt sale).

> For any taxable period the chargeable amount in relation to the relevant property is N minus T

In short, **N** is **N**otional income; **T** is **T**ax payable. In more detail:

> N is the amount of the interest that would be payable for the taxable period[59] if interest were payable at the prescribed rate on an amount equal to the value of the relevant property at the valuation date, and
>
> T is the amount of any income tax or capital gains tax payable by the chargeable person in respect of the taxable period by virtue of any of the following provisions—
> (a) section 461 [ITTOIA],
> (b) section 624 [ITTOIA],
> (c) sections 720 to 730 [ITA],
> (d) section 77 [TCGA], and
> (e) section 86 [TCGA],
> so far as the tax is attributable to the relevant property.

Setting notional income against tax is penal and bizarre, but then, the POA charge is penal and bizarre.

There is no provision for carry forward or back if T exceeds N (but that will be rare).

If foreign income is unremitted and no tax is paid because of the s.624 remittance basis, it is considered that the amount of T is nil.

### 66.28.2 *The valuation date*

Para 9 Sch 15 FA 2004 continues:

> (2) Regulations may, in relation to any valuation date, provide for a valuation of the relevant property by reference to an earlier valuation date to apply subject to any prescribed adjustments.
> (3) In this paragraph—
> ...
> "the valuation date", in relation to a year of assessment, means such date as may be prescribed.

---

59 Para 9(3) Sch 15 FA 2004 provides:

> "'the taxable period' means the year of assessment, or part of a year of assessment, during which para 8 applies to the chargeable person".

The date is prescribed in the 2005 POA Regulations.

## 66.29 Overlap of land and intangible property charges

Para 18 Sch 15 FA 2004 provides:

> *Persons chargeable under different provisions by reference to same property*
> (1) Where, in any year of assessment, a person ("the chargeable person") is (apart from this paragraph) chargeable to income tax both—
> (a) under para 3 (land) or para 6 (chattels) by reason of his occupation of any land or his possession or use of any chattel, and
> (b) under para 8 (intangible property) by reference to any intangible property which derives its value (whether in whole or part) from the land or the chattel,
> he is to be charged to income tax under whichever provision produces the higher chargeable amount in relation to him.
> (2) Where sub-para (1) applies, only the amount under the paragraph under which he is chargeable is to be taken into account in relation to the chargeable person for the purposes of para 13(2).

## 66.30 Interaction with benefit in kind charge

Para 19 Sch 15 FA 2004 provides:

> Where, in any year of assessment, a person is (apart from this paragraph) chargeable, in respect of his occupation of any land or his possession or use of any chattel, to income tax both—
> (a) under this Schedule, and
> (b) under Part 3 of ITEPA,
> the provisions of that Part shall have priority and he shall not be chargeable to income tax under this Schedule, except to the extent that the amount chargeable under this Schedule exceeds the amount to be treated as earnings under that Part.

## 66.31 *De minimis* exemption

The Press Release announcing the POA regime promised "a substantial *de minimis* exemption" (*sic*). This turns out to be £5,000 per annum. Para 13 Sch 15 FA 2004 provides:

> (1) This paragraph applies where, in relation to any person who would (apart from this para) be chargeable under this Schedule for any year of assessment, the aggregate of the amounts specified in sub-para (2) in respect of that year does not exceed £5,000.
> (2) Those amounts are—
> (a) in relation to any land to which para 3 applies in respect of him, the appropriate rental value as determined under para 4(2),
> (b) in relation to any chattel to which para 6 applies in respect of him, the appropriate amount as determined under para 7(2), and
> (c) in relation to any intangible property to which para 8 applies in respect of him, the chargeable amount determined under para 9.
> (3) Where this para applies, the person is not chargeable for that year of assessment under any of the following provisions—
> (a) para 3(5) (land),
> (b) para 6(5) (chattels), or
> (c) para 8(3) (intangible property).

This is significant if annual value is (contrary to my expectation) construed by concession to mean rateable value. It could also be significant where husband and wife entered into IHT planning arrangements jointly, since each have their own separate allowance. The exception applies to the "appropriate rental value", so deductible expenses are not relevant. Another problem here is that the £5,000 limit must be satisfied every year. It is not likely that the "substantial" £5,000 figure will be raised in line with inflation. The *de minimis* limit is not time apportioned so the full £5,000 can be set against a much shorter period of deemed income.

It is therefore necessary to ascertain "the appropriate rental value". That takes us to para 4(2) Sch 15 FA 2004:

> The appropriate rental value is R×(DV/V) where
> R is the rental value of the relevant land *for the taxable period*

The "taxable period" is defined in para 4(6) Sch 15 FA 2004:

> "the taxable period" means the year of assessment, or part of a year of assessment, during which para 3 applies to the chargeable person.

Thus it seems clear that if para 3 Sch 15 FA 2004 only applies for part of the year, the taxable period is reduced, so R is reduced, so the "appropriate rental value" is reduced and so (carrying the chain to the end) the *de* *minimis* exemption may apply. Note that the estate exemption in para 11(1) Sch 15 FA 2004 disapplies para 3 Sch 15 FA 2004: see para 11(1) Sch 15 FA 2004.

## 66.32 Election out of POA regime

One can elect out of the POA charges at an IHT cost. Para 21 Sch 15 FA 2004 deals with the POA land and chattels charges. Para 22 Sch 15 FA 2004 deals with intangible property. They are not quite the same but for reasons of space I shall only cover the former.

### 66.32.1 *Conditions for election*

Para 21(1) Sch 15 FA 2004 provides

> This paragraph applies where—
> (a) a person ("the chargeable person") would (apart from this paragraph) be chargeable under para 3 (land) or para 6 (chattels) for any year of assessment ("the initial year") by reference to his enjoyment[60] of any property ("the relevant property"), and
> (b) he has not been chargeable under the paragraph in question in respect of any previous year of assessment by reference to his enjoyment of the relevant property, or of any other property for which the relevant property has been substituted.

If an election is made by mistake (because the POA charge does not in fact apply) it has no effect.

### 66.32.2 *Effect of election*

Para 21(2) Sch 15 FA 2004 provides:

> The chargeable person may elect in accordance with para 23 that—
> (a) the preceding provisions of this Schedule shall not apply to him

60 "Enjoyment" is defined in para 21(4) Sch 15 FA 2004:
"For the purposes of this paragraph a person 'enjoys' property if—
(a) in the case of an interest in land, he occupies the land, and
(b) in the case of an interest in a chattel, he is in possession of, or has the use of, the chattel."

> during the initial year and subsequent years of assessment by reference to his enjoyment of the relevant property or of any property which may be substituted for the relevant property ...

This disapplies Schedule 15. The price is in sub-para (b):

> ..., but
> (b) so long as the chargeable person continues to enjoy the relevant property or any property which is substituted for the relevant property—
> (i) the chargeable proportion of the property is to be treated for the purposes of Part 5 of FA 1986 (in relation to the chargeable person) as property subject to a reservation, but only so far as the chargeable person is not beneficially entitled to an interest in possession in the property,
> (ii) section 102(3) and (4) of that Act shall apply, but only so far as the chargeable person is not beneficially entitled to an interest in possession in the property, and
> (iii) if the chargeable person is beneficially entitled to an interest in possession in the property, sections 53(3) and (4) and 54 of IHTA 1984 (which deal with cases of property reverting to the settlor etc) shall not apply in relation to the chargeable proportion of the property.

Suppose a former foreign domiciliary makes an election in relation to a discretionary trust of which they are a beneficiary and the property is excluded property. How does s.102(3) apply? See 54.12 (GWR death charge: excluded property rules for settled property).

### 66.32.3 *The chargeable proportion*

This takes us to the definition of "chargeable proportion" in para 21(3) Sch 15 FA 2004:

> In this paragraph, "the chargeable proportion", in relation to any property, means DV ÷ V
> where DV and V are to be read in accordance with para 4(2) or 7(2), as the case requires, but as if—
> (a) any reference in para 4(2) or 7(2) to the valuation date were a reference—
> (i) in the case of property falling within subsection (3) of section

102 of the Finance Act 1986, to the date of the death of the chargeable person, and
(ii) in the case of property falling within subsection (4) of that section, to the date on which the property ceases to be treated as property subject to a reservation, and
(iii) in the case of property in which the chargeable person is beneficially entitled to an interest in possession, to the date of his death or if his interest comes to an end on an earlier date) that earlier date, and
(b) the transactions to be taken into account in calculating DV included transactions after the time when the election takes effect as well as transactions before that time.

I do not see the purpose or effect of para 21(3)(b) Sch 15 FA 2004. How does this work in the case of an *Ingram* scheme?

66.32.4 *Time limit for election*

Para 23(3) Sch 15 FA 2004 provides:

> The election must be made on or before—
> (a) the relevant filing date, or
> (b) such later date as an officer of Revenue and Customs may, in a particular case, allow..

The key expression is "relevant filing date" which is defined in para 23(1) Sch 15 FA 2004:

> "the relevant filing date" means 31 January in the year of assessment that immediately follows the initial year within the meaning of para 21 or (as the case requires) para 22.

Time runs from when the Schedule begins to apply. Normally that will be 6 April 2005,[61] because in the future no-one will deliberately enter into arrangements caught by the Schedule. But where a person is non-resident or domiciled, the Schedule may not begin to apply until a later time when they become UK resident or domiciled, and in such a case time for the

61 Or 6 April 2007 for those caught by the reverter to settlor restriction in the FA 2006; see 66.19 (Reverter to settlor restriction).

election starts at that later time; a sensible rule. The Website POA Guidance discusses when a late election is accepted at 3.4.

### 66.32.5 *Revocation of election*

Para 23(5) Sch 15 FA 2004 provides:

> The election may be withdrawn or amended, during the life of the chargeable person, at any time on or before the relevant filing date.

This will only be useful in very exceptional circumstances.

### 66.32.6 *Retrospective effect of election*

Para 23(6) Sch 15 FA 2004 provides:

> Subject to sub-para (5), the election takes effect for the purposes of inheritance tax from the beginning of the initial year within the meaning of para 21 or (as the case requires) para 22 or, if later, the date on which the chargeable person would (but for the election) have first become chargeable under this Schedule by reference to the property to which the election relates.

## 66.33 Election and *Eversden* schemes

If a client has lost their appetite for IHT planning, it would be better to unwind an *Eversden* scheme than to elect. Unwinding an *Eversden* scheme is straightforward.

By contrast, unwinding double trust schemes needs considerable care. Watch out for Fraud on a Power.

## 66.34 Election in case of double trust schemes

Suppose:

(1) The client ("H") has entered into a double trust plan: H has sold H's home to a trust (before 22 March 2006) ("the property settlement") in return for a debt, and given away the debt.

(2) Under the terms of the property settlement, income is paid to H for life, and then for H's widow ("W") after H's death.

(3) Suppose first of all that the home has not increased in value, so that

the net value of the trust fund of the property settlement is nil.
(4) A POA election has been made.
(5) H is survived by W.

66.34.1 *Effect of election*

The chargeable proportion (here = the whole) of the property:

> is to be treated for the purposes of Part 5 of FA 1986 (in relation to the chargeable person) as property subject to a reservation.

So it is treated as property to which H is beneficially entitled.

However, H is already entitled to the property as H has an interest in possession in it. The property is subject to the debt. Is this taken into account in valuing the estate of H on H's death? If so the debt scheme still works! In *IRC v Ayrshire Employers Mutual Insurance Association* 27 TC 331 the House of Lords notoriously said that the legislation had "misfired". But the modern approach of the Courts is to make sure that legislation does not "misfire" if they can. Indeed this approach is not so modern, and in 1965 Lord Diplock criticised the *Ayrshire* decision:

> If the Courts can identify the target of Parliamentary legislation their proper function is to see that it is hit: not merely to record that it has been missed.

66.34.2 *Spouse exemption on death of H*

The IHT spouse exemption provides that the transfer of value deemed to be made on the death of H:

> ... is an exempt transfer to the extent that the value transferred is
> [a] attributable to property which becomes comprised in the estate of the transferor's spouse or civil partner; or
> [b] so far as the value transferred is not so attributable, to the extent that that estate is increased.
>
> See s.18(1) IHTA 1984.

H does not qualify for exemption within [b]. We have to argue that the value transferred is "attributable to property" (the home) "which becomes comprised in the estate of the spouse or civil partner".

Does it? Only subject to the debt. The Revenue may reply that "property" in s.49(1) IHTA means net property and this is supported by *Green v IRC*:

> Section 49(1) IHTA 1984 [deems] the deceased to be beneficially entitled to "the property" in which his life interest subsists. It does not say "net property" (i.e. the value of the property net of trust liabilities) but that is what it must mean, and the parties to this appeal both agree that in practice that is the effect the Revenue gives to the section.

On the facts of the above example, no net property becomes comprised in the estate of the spouse. A purposive construction supports that view. It does not make sense for the spouse exemption to apply there.

The spouse exemption would apply to the extent that the value of the property exceeds the debt.

If the debt were released, the problem disappears and it is clear that the spouse exemption would apply.

## 66.35 Unwinding existing structures

What is to be done when an existing structure falls within the POA land charge?

Do nothing and pay the tax? A suitable option where the client has a short life expectancy. Mitigate the charge by arranging that maintenance costs are deductible: see 66.26.1 (The chargeable amount and deductible expenses).

Elect out of the POA regime? Generally unattractive: you have the IHT charge on death usually without CGT uplift or spouse exemption on death.[62] Consider it if IHT is a long term problem (middle-aged clients). Perhaps a future Conservative government will scrap these rules in a decade or so's time?

It may be sensible to elect and retain the structure where:

(1) IHT is not a problem (eg insurance is inexpensive);
(2) Shadow directorship is not a problem (expect an investigation to follow the election); and
(3) A sale of the company is envisaged in the short or medium term. See

62 See 54.17 (IHT spouse exemption defence to GWR death charge).

66.6.4 (Secondhand company).

In most cases shadow directorship may be a problem; it will usually be better to liquidate the company if IHT, CGT and SDLT issues permit.

Best solution is usually unwinding, or reorganising so as to fall within the estate exemption.

## 66.36 Is existing scheme validly created?

In *Wolff v Wolff* [2004] STC 1633, a husband and wife entered into a reversionary lease of the property in favour of their daughters for 125 years starting from 2017. Subsequently, they became aware that from 2017 they had no right to stay in the property and were at the mercy of the owners of the lease! The lease was set aside for mistake.

## 66.37 Commentary

What is the nature of the POA charges? Although the tax charge is imposed under the Income Tax Acts, it is not an income tax (in the sense that it is not a tax on income or in any way relating to income). To put it another way, the provisions impose an income tax charge on income which does not exist. Once it is accepted that income tax should not be charged on an individual who occupies their own property[63] then it is anomalous to charge income tax on the benefit of occupation through a trust or company. And since the POA intangible property charge applies even if the property also produces taxed income, it is obviously not income which Schedule 15 is seeking to tax.

The POA charge might be seen as an erratic *ersatz* annual IHT charge on property which has slipped through the IHT net. However, the quantum of the charge is penal (compared to IHT rates).

The true nature of the POA charge is that it is a penalty for carrying out IHT planning (and not unwinding it). Hardly anyone is seriously expected to pay it. The object is to force taxpayers (by electing or unwinding) to bring themselves back into the IHT net.[64] The POA rules take the clothes or label of a tax, but – looking beyond the label to the contents – they are not a tax as that word is normally understood. It is well established that

63 See Kay and King, *The British Tax System*, Clarendon Press (5th ed., 1990), p.80.

64 And to stop similar arrangements being made in the future.

a fee, levy or toll may in fact be a tax by another name.[65] Likewise provisions wearing the clothes or label of a tax do not necessarily constitute a tax. This point may be relevant to construction because the principle of construction that penalty provisions are to be strictly construed may have more force than the principle that clear words are required to impose a tax.

One controversial aspect of the provisions is that they are retrospective in effect. (One should avoid semantic – indeed Orwellian – debate about the meaning of "retrospective" and look at the effect.) Retrospective legislation is pernicious when it entails liability for conduct which would have been different if the agent had known of the terms of the retrospective law. The POA rules are unashamedly targeted at taxpayers who have made the following arrangements since 1986:

(1) *Eversden*[66] schemes;
(2) *Ingram*[67] and similar shearing schemes;
(3) "double trust" schemes.

Those that carried out *Ingram* schemes were particularly unfairly treated. They entered into a package with an IHT advantage (generally) at a significant CGT cost. Parliament removed the benefit and left them with the cost.

In 2004 I said:

> This is unprecedented in the UK tax system, which has traditionally allowed taxpayers to plan their affairs more securely on the basis of the law of the day. One may approve of this as an attack on tax avoidance, or disapprove as contrary to the rule of law. Views may divide on party political lines.

Since 2004, however, retrospective tax legislation has become a matter of routine, having been applied to a somewhat arbitrary selection of tax avoidance cases and or simply as second thoughts to (what the need for retrospective legislation shows to be) ill thought out legislation.

Foreign domiciliary IHT planning using companies to avoid IHT on UK land or chattels were not a target of the POA rules; my guess is that any effect on former foreign domiciliaries is entirely accidental; no-one at all

65 *Re a By-law of the Auckland City Council* [1924] NZLR 907 at p.911.
66 *IRC v Eversden (Greenstock's Executors)* 75 TC 340.
67 *Ingram v IRC* [1999] STC 37.

had worked it out as the provisions were frantically amended and re-amended.

No doubt the POA rules bring some revenue for the Government, though how much is a matter of speculation. Set against the tax raised (whatever it is) and the blow against tax avoidance (however one values or regards that) there are some entries to make on the debit side: the POA rules impose significant costs of compliance and tax planning (for they require taxpayers to incur professional fees in order to rearrange their affairs). They impose the unquantifiable burden of complexity and uncertainty which (combined with unfairness) will lead to an equally unquantifiable loss of taxpayer goodwill. One cannot put a value on that goodwill, but it is essential to successful tax administration.

Back in 2004, everyone who understood and cared about the UK tax system was aghast at the conception, enactment process and administration of the POA provisions.[68] Looking back with hindsight it can be seen that the provisions were not an aberration. They are the natural result of a fiscal policy with one and only one priority, the attack on tax avoidance, set against which any other *desiderata* of a tax system counted for very little and views of practitioners counted for nothing at all. The interesting question now is to what extent this approach will continue under the new government. Only time will tell.

68 "The anti-avoidance Pre-Owned Assets regime ... is: retrospective in its effect, disproportionate to the mischief at which it is purportedly aimed, contrary to taxpayers' legitimate expectations, and arbitrary ... ."
CIOT and ICAEW Tax Faculty (October 2004).

CHAPTER SIXTY SEVEN

# ESTATES OF DECEASED PERSONS - CGT

## 67.1 Succession law background

On the death of a person domiciled in England and Wales ("**the deceased**") their property passes to their personal representatives ("**PRs**").[1] The PRs pay the debts of the estate, including taxes. Provided that there are sufficient assets available, they pay pecuniary legacies and transfer property which the deceased has specifically gifted. Finally, they transfer the residue of the estate to the residuary legatees. These transfers are normally done by means of an "assent". Thus on completion of the administration, the residuary legatee becomes entitled to the assets of the estate, and any income which the PRs have not expended in the course of administration. It is possible for PRs to assent specific assets before completion of administration.

During the period of administration, the PRs alone are said to be entitled to the assets which are comprised in the estate. The beneficiaries of the estate have the right to compel due administration of the estate, but it has been repeatedly held by courts of the highest authority that the beneficiaries have no legal or equitable interest in the assets of the estate.[2] Special taxation rules apply during this period of administration. The interplay of the rules produces some curious results where the deceased or a beneficiary is a remittance basis taxpayer or non-resident. There can sometimes be considerable scope for tax planning.

I consider CGT and in the following chapter income tax.

The starting point is that PRs are "persons" (though not "individuals")

---

1 Further consideration is needed if a foreign law applies: see 67.11 (Succession governed by foreign law).

2 *Lord Sudeley v Attorney-General* [1897] AC 11; this (rather odd) principle was re-affirmed in *CSD v Livingston* [1965] AC 694.

so they are in principle subject to IT and CGT.

Similar issues arise where charities are beneficiaries of estates, as to which see Kessler & Brown, *Taxation of Charities and Non-Profit Organisations,* (8th ed., 2011) Chapters 31 and 32 (Estates of deceased persons).

### 67.1.1 *When is administration of estate completed?*

How long does the administration period last? This is a question of succession law, not tax law, but it often arises in tax contexts, including income tax, CGT, and estate duty, and has given rise to a substantial case law.

In *IRC v Aubrey Smith* 15 TC 661 Lord Hanworth MR said at p.672:

> In Lord Sudeley's case, [1897] AC at page 15, Lord Halsbury, then Lord Chancellor, says this:
>
> > The thing that the legatee was entitled to was one-fourth share of a residuary estate, consisting, it may be, of many things; and I think it was fallacious on the part of [counsel] to say that the residue was very nearly ascertained, because the question is not only of amount – although I think that of itself would not be sufficient if it were only of amount – but it is a question of substance as well as a question of amount. It is uncertain until the residuary estate has been ascertained of what it will consist:
>
> –and on a further page he says this:
>
> > Until the thing has been ascertained, until the trust fund has been constituted, the thing of which the trustees are the trustees has not been ascertained. Whether you treat them, therefore, as trustees or executors, the same consideration arises. Now, if the only thing that the legatee is entitled to is the fourth share of an ascertained residuary estate, I say that to my mind it is impossible to maintain that the character of any part of that estate can be ascertained so as to make it possess a specific locality until that has happened; it is a condition precedent to know what the residuary estate is, and until that has been ascertained you cannot tell of what it will "consist."
>
> .... I read all those passages because they appear quite clearly to lay down that until the fact is ascertained, or can or ought to be inferred, that the residue has become defined so that the aliquot portion passing to the beneficiary can also be defined, the beneficiary has not, until that time, a definite interest in the sum which will ultimately fall to him. Whatever be the contentions of the Respondent, it appears to me as Lord

> Haldane said in the case I first cited that it is largely a question of fact.
> ...
> What has to be determined here ... is: Is it clear that the portion of each of the sons is ascertained, or has been ascertained, or is capable of ascertainment, and that ascertainment has been assented to by the executor-trustees?

The important points which emerge from the case law are that PRs continue to hold an asset as PRs until:

(1) they "assent" an asset to a beneficiary; or
(2) the administration of the estate is complete (at which point there is an implied assent). For this purpose:
    (a) The estate must be completely ascertained. It remains in the course of administration even though this work is nearly done.
    (b) The fact that debts of the deceased remain unascertained or unpaid is a relevant factor but not decisive.
    (c) The fact that the PRs regard themselves as still administering the estate (producing "estate accounts" and not trust accounts) is a relevant factor but not decisive.
    (d) In a marginal case the issue is said to be one of fact and there seems to be a fairly broad "grey area" in which the courts will not interfere with a decision of the Tax Tribunal.

The CG Manual (published 7/94) provides:

> **30700 Period of administration**
> The period during which the PRs are settling the estate is called a period of administration. The period starts with the death of the deceased person. The date on which it ends is a question of fact which is often difficult to resolve. During this period the liability for Capital Gains Tax on sales of assets from the estate falls on the personal representatives unless they have taken specific steps to vest the ownership of the assets involved in legatees in advance of the sale, see CG30910.
> **30701 Attitude of courts**
> On questions of when administration is complete the Courts look for a construction of the law that leads to an early conclusion of administration. The leading case in this respect is *IRC v Aubrey Smith* 15 TC 661.
> **30702 Period of administration: Attitude of courts**
> In his judgement Lord Hanworth MR set out a principle of general application when he said, at the bottom of page 675, top of page 676
>
> > 'The question is, in all cases: has the administration of the Estate reached a point of ripeness at which you can infer an assent, at which you can infer that the residuary estate has been ascertained and that it is outstanding and

not handed over merely for some other reason'.

**30703 Period of administration Courts: attitude**

On this basis we would normally argue that the period of administration ends when residue has been ascertained, see CG30780+.

**30710 Extended period of administration**

There are some exceptional cases where all the figures are apparently available to enable residue to be ascertained but it has to be accepted that the period of administration is continuing.

**30711 Difficulty in distributing assets**

One example is where distributing shares in accordance with legatees' fractional entitlements to residue would result in one legatee receiving a majority shareholding whilst the other legatees would only receive minority holdings. Because of the disparity in values between majority and minority holdings it may be necessary for the personal representatives to apply the rule from *Lloyd's Bank v Duker* [1987] 3 All ER 193. This would require them to sell these shares rather than distributing them in specie.

The period of administration would continue in such a case until the shares were sold and the Capital Gains Tax liability arising to the personal representatives was quantified.

The rule referred to above is of fairly limited application. The fact that a majority shareholding would be broken into minority holdings on distribution should not be accepted as preventing distribution of shares and thus the ending of the period of administration. Nor should minor valuation differences between minority shareholdings passing to the legatees be accepted as covered by the rule in the *Duker* case.

**30712 Litigation**

The period of administration may also be extended where the distribution of the estate is being challenged. The personal representatives may be unable to distribute the estate pending the outcome of litigation.

**30720 Confusion over terminology**

Even where ascertainment of residue marks the end of the administration period for Capital Gains Tax purposes, assets may remain in the hands of the personal representatives after that date. They may have to carry out administrative acts regarding transfer of assets to legatees. In some cases they may sell assets. If so they will be doing this as bare trustees for the legatees. Personal representatives and their agents sometimes regard these acts as forming part of the period of administration. This may lead to confusion when references are made to the period of administration.

**30721 Confusion over terminology**

Because of the possible confusion it is important to establish precisely what is meant when a reference is made to a period of administration. From the Inland Revenue's side we can try to avoid this confusion for the majority of cases by referring to events as falling before or after residue has been ascertained rather than simply referring to the period of administration.

**30780 Necessary to establish if residue ascertained**

There are a number of circumstances where it is important to establish whether residue has been ascertained, see CG30700, because it significantly affects the amount of Capital Gains Tax payable. Depending on the circumstances, the personal representatives and legatees may be arguing for residue having been ascertained at an early date or at a late date.

**30781 Early date**

Claims are sometimes made that administration has ceased and residue has been ascertained at an early date where disposal of assets have been made and the legatee under the will or intestacy is

- a charity that is exempt from tax or
- a taxpayer or taxpayers with unused annual exemption(s) that could be used to cover the whole or part of the gains arising.

**30782 Early date**

In the case of an intestacy the second of these categories may also be seen. The question of gifts to charity however will only arise in cases of intestacy if there has been a subsequent variation of the devolution of the estate since no charity will otherwise qualify as a legatee.

**30783 Early date**

Applying the rule that assets remain vested in the personal representatives until residue has been ascertained unless specific steps have been taken to vest the assets in advance of ascertainment of residue usually defeats unwarranted claims in this area.

**30790 Late date**

In contrast to the cases described in CG30781+ claims that there has been an extended period of administration are sometimes made when

- the legatee would be liable at the higher rate of tax as opposed to the basic rate applying for personal representatives, [This does not apply from 2008]
- the legatee has used his or her annual exemption against other gains but the personal representatives have unused annual exemption which could be set against the gains (although obviously there is little tax at stake in cases in this latter category).

**30791 Late date**

In considering such claims obtain the facts to establish precisely when residue was ascertained. In this context see also CG30840.

**30800 How residue is ascertained**

In order to ascertain residue the personal representatives must identify all the assets and liabilities of the estate. They then need to quantify these.

**30801 How residue is ascertained**

In the case of taxation liabilities this process will, in the first instance, involve agreeing with the Inspector the Income Tax and Capital Gains Tax positions to the date of death. If any income arises to the personal representatives or if they realise any chargeable gains during the period of administration they will also need to agree their liabilities relating to this period.

**30802 How residue is ascertained** [January 2010]

As far as Inheritance Tax is concerned the personal representatives will need to agree with CAR - IHT (formerly the Capital Taxes Office) whether any liability arises and if so in what amount. When seeking a grant of probate or letters of administration (or, in Scotland, a confirmation) the personal representatives have to supply CAR - IHT with a provisional computation of the Inheritance Tax due.

CAR - IHT will review this and, where necessary, check valuations. When it is either agreed there is no liability to Inheritance Tax or the amount has been quantified CAR - IHT will issue a clearance certificate. We would not normally accept that residue had been ascertained at a date before the date of issue of a clearance certificate.

**30810 Providing funds**

When the assets and liabilities have been quantified the personal representatives have to consider how they can pay

- the estate's liabilities and
- any pecuniary legacies provided for in the will.

**30811 Providing funds**

If they do not have sufficient liquid funds they will have to sell assets in order to raise funds. (Occasionally they may agree with legatees entitled to pecuniary legacies that the legatee should accept an asset in satisfaction or part satisfaction of the pecuniary legacy).

**30812 Providing funds**

Disposing of assets may give rise to further Capital Gains Tax liabilities which have to be agreed before residue can be ascertained.

**30813 Providing funds**

Residue is only ascertained when the personal representatives have both established the net worth of the estate and provided the liquid funds to pay liabilities and pecuniary legacies. Once that point is reached residue is ascertained and it is irrelevant that the assets have not been distributed.

**30820 Executor's year**

For estates in England and Wales, the personal representatives cannot be compelled to distribute the assets of the estate until at least one year has elapsed from the date of death (Section 44 Administration of Estates Act 1925). This is commonly referred to as the executor's year.

**30821 Executor's year**

When dealing with a dispute about whether a disposal was by personal representatives in that capacity or in their capacity as bare trustees for legatees we would not normally contend that the disposal was on behalf of the legatees if it took place during the executor's year.

**30822 Executor's year**

Although personal representatives cannot be compelled to distribute assets during the executor's year there is no bar to them doing so. In a simple estate they may have ascertained residue well before the year ends. If there is evidence that they have done and have then distributed assets to the legatees we can accept that the liability relating to disposals during that year but after the date assets were distributed does lie with legatees.

**30830 Scotland**

In Scotland the rule is that the personal representatives are entitled to distribute the estate after six months from the deceased's death if they have provided funds for payment of all the estate debts and made reasonable enquiries for claims.

**30840 Claims of prolonged administration**

When personal representatives claim that administration has continued for a prolonged period and either

- this will significantly affect the tax payable, see CG30781or
- there are likely to be collection difficulties making it vital to ensure that assessments are made on the correct person the claim should be critically examined.

**30841 Claims of prolonged administration**

Unless it is an exceptional case where there are good reasons for accepting that the period of administration must be extended beyond the date residue is ascertained, see CG30710 – CG30712, you should seek the full facts to enable you to determine when residue became ascertainable. You should then argue that the beneficial ownership of the assets vested in the legatees at that date. As stated in CG30701 the attitude of the Courts is to look for an interpretation that allows administration to be completed at an early date.

**30850 Unquantified debts**

One claim that is sometimes met is that there is an unquantified debt preventing residue being ascertained. This may not be sufficient to prevent the administration period being treated as at an end. Such a situation was considered in *IRC v Sir Aubrey Smith* 15 TC 661. Lord Hanworth commented at page 674

> For my own part I think the question of a mortgage debt or any other debt must take its proper place in perspective. It may be in some cases that that is a factor from which a strong inference may be drawn. It may be on the other hand that the device of leaving a debt unpaid is resorted to in order to pretend that the residue of the estate has not been ascertained and is not ascertainable. If such a device were resorted to in any case it ought to be held ineffective'.

**30851 Unquantified debts**

When a Solicitor or other professional person is employed by the personal representatives to deal with the administration of the estate, his or her fees will be one of the estate's debts. Sometimes when personal representatives wish to extend the period of administration they arrange that the Solicitor, etc, does not submit a bill in respect of at least some part of his or her fees. They then argue that this has prevented ascertainment of residue and has caused the period of administration to be extended. Any such claim should be resisted on the basis of the above quotation. It should be contended that the information to quantify the bill must be in the Solicitor's records and that administration should therefore be considered to have ended.

### 67.1.2 *Importance of assents*

PRs transfer assets to beneficiaries by means of an "assent". The assent is fundamental, since a sale after an assent to a non-resident or a remittance basis taxpayer may in broad terms be free of CGT and a sale before assent may not. (Conversely a sale by non-resident PRs or PRs with losses may be CGT free and a sale after an asset may be taxable.)

An assent of land in England and Wales must be in writing. An assent of other property may be oral or implied by conduct. No formal written assent is required if (say) shares are simply transferred to the name of a beneficiary by stock transfer form. If a portfolio of shares is registered in the names of PRs (or their nominees), and the legatee wants them to be sold, it may be administratively convenient if an assent is made under which the PRs (or their nominees) become nominees for the legatee. Then the shares can be sold without CGT and without the formality of a transfer of legal title to the legatee.

## 67.2 Meaning of "PRs" for CGT

Section 288 TCGA provides:

> "personal representatives" has the same meaning as in the Corporation Tax Acts (see section 1119 of CTA 2010);

Se we turn to s.1119 CTA 2010 which provides a commonsense definition:

> "personal representatives", in relation to a person who has died, means—
> (a) in the UK, persons responsible for administering the estate of the deceased, and
> (b) in a territory outside the UK, those persons having functions under its law equivalent to those of administering the estate of the deceased.

This is the same as the Income Tax definition.[3]

## 67.3 Residence and domicile of PRs for CGT

Section 62(3) TCGA provides:

> In relation to property forming part of the estate of a deceased person
> [a] the PRs shall for the purposes of this Act be treated as being a single and continuing body of persons (distinct from the persons who may from time to time be the PRs), and

3 See 68.1.1 (Meaning of PRs for IT). If we had a taxes-act-wide definition the repetition would not have been necessary. However it is an improvement on the position before 2009, where there were different definitions of "PRs" for IT and for CGT.

[b] that body shall be treated as having the deceased's residence, ordinary residence, and domicile at the date of death.

The residence and domicile of the PRs in their private capacity is irrelevant. The definition of "residence" for PRs is different for IT.[4]

## 67.4 Acquisition by PRs

Section 62(1) TCGA provides:

> For the purposes of this Act the assets of which a deceased person was competent to dispose—
> (a) shall be deemed to be acquired on his death by the personal representatives or other person on whom they devolve for a consideration equal to their market value at the date of the death, but
> (b) shall not be deemed to be disposed of by him on his death (whether or not they were the subject of a testamentary disposition).

This is the so-called tax-free uplift on death.

## 67.5 Transfer from PRs to beneficiaries

### 67.5.1 *Transfer from PRs to legatee*

Section 62(4) TCGA provides:

> On a person acquiring any asset as legatee (as defined in section 64)—
> (a) no chargeable gain shall accrue to the personal representatives, and
> (b) the legatee shall be treated as if the personal representatives' acquisition of the asset had been his acquisition of it.

Section 64(2) TCGA defines legatee:

> In this Act, unless the context otherwise requires,
> [a] "legatee" includes any person taking under a testamentary disposition or on an intestacy or partial intestacy, whether he takes beneficially or as trustee, and

4 See 68.2 (Residence of PRs for IT).

[b] a person taking under a donatio mortis causa shall be treated (except for the purposes of section 62) as a legatee and his acquisition as made at the time of the donor's death.

### 67.5.2 *Appropriation of assets to beneficiary*

Section 64(3) TCGA provides:

> For the purposes of the definition of "legatee" above, and of any reference in this Act to a person acquiring an asset "as legatee", property taken under a testamentary disposition or on an intestacy or partial intestacy includes any asset appropriated by the personal representatives in or towards satisfaction of a pecuniary legacy or any other interest or share in the property devolving under the disposition or intestacy.

Thus, if PRs appropriate assets in satisfaction of a pecuniary legacy, the beneficiary acquires as legatee. This is so even if the appropriation needs the consent of the beneficiary.[5]

If the PRs had no power of appropriation, then an "appropriation" could be authorised only on the basis that it was in fact a sale of the asset to a beneficiary coupled with a payment of the legacy by way of set-off. In that case, the beneficiary would acquire as purchaser and not as legatee. Fortunately, PRs will generally have a power of appropriation: see s.41 Administration of Estates Act 1925.

---

5 Although for stamp duty purposes that the transfer of the asset to a legatee amounted to a conveyance on sale where the consent of the legatee is required: *Jopling v IRC* [1940] 2 KB 282. CCAB Statement June 1967 provided:

> "The Revenue stated that in their view [TCGA s.62(4)] does not apply in all cases where assets are transferred to beneficiaries in specie. Where assets are appointed by personal representatives to satisfy a legacy in circumstances where such appropriation requires the legatee's consent, ie where the personal representatives do not have (whether by the terms of the will or under the Administration of Estates Act 1925 s.41) powers of appropriation without consent, the Revenue are advised that the acquisition of the asset has a contractual basis and is not strictly an acquisition qua legatee. In practice, however, the disposal of appropriated assets by the personal representatives to a legatee in these circumstances is not treated as an occasion of charge on the personal representatives provided that both they and the legatee agree that the legatee should be treated as acquiring the assets concerned as legatee for the purposes of [TCGA s.62(4)]."

This was written before the enactment of what is now s.64(3) TCGA (by the FA 1969). This brought the law into line with what was formerly HMRC practice.

### 67.5.3 *Appointment to beneficiary by executors under overriding powers*

Where executors exercise a power to appoint trust property to a beneficiary, that beneficiary takes under the appointment "as legatee". This follows from the trust law principle that, for the purposes of the rules relating to perpetuities, where trustees exercise a power of appointment, the deed of appointment is read back into the original trust instrument. It is treated as coming into operation at the date of the instrument that creates the power.[6] This rule has been applied for tax purposes, in a different context, in *Chinn v Collins* the exercise of a power of appointment merely "fills in a blank in the original settlement which left blank how the final distribution of a trust asset was to be made".[7]

Quite apart from that, the beneficiary would take as "legatee" in the general sense of the expression. The definition in s.64(2) is inclusive and not a comprehensive definition. The reason that the beneficiaries take as legatee is that they acquire under an assent. They acquire from the PRs acting in their capacity as PRs.

This conclusion is consistent with the general scheme of the TCGA. A person who acquires under an appropriation acquires "as legatee". It would be anomalous if a person who acquired under an appointment would not. (A power of appropriation is sometimes regarded as a dispositive power: *Re Freeston* [1978] Ch 741, though I would not regard that as an essential point.)

In CG Manual 31432–3 (although one might quibble with the language used) it seems that HMRC accept that an appointee acquires as legatee.

## 67.6 Deceased not UK resident

If the deceased was not UK resident at the time of their death (regardless of domicile) the PRs are in principle outside the scope of CGT. The estate is therefore a CGT free vehicle. In principle, it would be desirable to arrange that gains accrue to PRs. If the PRs assent assets to UK residents who sell the assets, the gain on the disposal is chargeable in full or on the remittance basis. If the PRs assent assets to non-resident trustees, who sell the assets, the gain is a s.2(2) amount. (By contrast, assets with losses

---

6 *Muir v Muir* [1943] AC 468; *Pilkington v IRC* 40 TC 416 at 441.

7 54 TC 311 at p.357.

should be transferred *in specie*.) It is also desirable to extend the administration period as long as possible.

### 67.6.1 *Is an estate a "settlement" within s.87 TCGA?*

Could gains accruing to non-resident PRs be s.2(2) amounts for the purposes of s.87 TCGA? That could only be the case if a deceased's estate is a "settlement" for the purposes of s.87. Section 97(7) TCGA provides:

> "settlement" has the meaning given by s.620 of ITTOIA ...

In this book this is called the "**settlement-arrangement**" definition of settlement.[8]

In *IRC v Buchanan* 37 TC 366 at p.374, Lord Goddard said:

> I do not think for a minute that a will of a testator comes within section 20[9] at all; it is not a settlement to which the Act applies.

Lord Goddard did not actually say that a will is not a settlement-arrangement but if that is what he meant, the comment was *obiter* and surprising. One might have thought that a deceased's estate is a "settlement" in the sense of "arrangement". There is an element of bounty in that the deceased decides who should benefit (or by not making a will, decides that the intestacy rules should apply). However, Lord Goddard's comment was loyally followed.[10] Accordingly CG Manual is right to provide:

> **14590 Connected persons: Trustees** [August 2009]
> A will trust cannot be a Settlement for these purposes [for the purposes of the settlement-arrangement definition].

For this reason a deceased's estate is not a "settlement" within s.87.

---

8 See 69.2.1 (Terminology) and 69.2.3 (Settlement-arrangement definition of "settlement").

9 Section 20 FA 1943, the predecessor of s.644 ITTOIA.

10 *Willingdale v Islington Green Investment Co* 48 TC 547 at p.556. (The point was not argued on appeal.)

This is in fact the sensible result. The scheme of s.87 is designed with trusts in mind and would not work well if extended to estates. An assent by PRs in favour of a beneficiary is not (without a stretch) a capital payment. If, as is common, a will left legacies to (UK resident) legatees, and the residue on trust, it would be odd if the legatees were subject to CGT under s.87 by reference to gains accruing to the trust. Similarly suppose a testator left their estate for such of their children as attain the age of 30, and at the time of death one child has and one has not reached that age. The executors would transfer half of the estate to the older child and (on completion of administration) hold the other half on trust for the younger child until it reached the vesting age. It would be odd if the older child were subject to CGT under s.87 by reference to gains accruing to the younger child's share of the trust.

Section 87(6) TCGA provides:

> For the purposes of this section a settlement arising under a will or intestacy shall be treated as made by the testator or intestate at the time of death.

The wording makes more sense if one remembers that it goes back[11] to a time when "settlement" for s.86 purposes meant CGT settlement. Thus there would be no doubt that a will trust was a settlement. However there would be doubt as to who was the settlor and when the settlement was made. These matters are resolved by (what is now) s.87(6). This is still needed since the identity of the settlor is relevant for s.87, though the relevance is now for transitional relief only.

Another effect of the provision now is to make it clear that a will trust is a settlement for the purposes of s.87.

Returning to the case above of a will trust for children at the age of 30: If one child is over 30, and receives its half share during the administration period, there is (at the time) no settlement and no capital payment, and s.87(6) does not retrospectively alter the position. If the trust fund is entirely distributed, no settlement ever comes into existence and s.87 does not operate. Similarly, suppose a discretionary will trust makes a distribution to a beneficiary during the administration period. There is (at the time) no settlement and no capital payment, and again it is considered that s.87(6) does not retrospectively alter the position. That is not the

11 The wording was previously in s.s.97(7) TCGA but moved in the 2006 reforms.

purpose of the deeming provision.

## 67.7 Gains accruing to non-resident company held by non-resident PRs

Suppose:
(1) PRs hold a non-resident company.
(2) The company disposes of an asset and realises a gain, which I call "the company gain".

### 67.7.1 *Position of company and PRs*

The company is not subject to tax on the company gain because it is not UK resident. The PRs are participators. But if they are not UK resident, they are not treated as if the company gain had accrued to them. The condition in s.13(2)[a] TCGA is not satisfied.

### 67.7.2 *Position of legatee*

Assume that under the terms of the will the shares pass to a legatee. Is it possible that the legatee should be treated as if the company gain accrued to the legatee, so that:
(1) a UK resident legatee would be subject to tax on the gain under s.13(2) TCGA; or
(2) a non-resident trust legatee would be treated as receiving a s.2(2) amount under s.13(10) TCGA?

The first question is whether, at the time the gain accrues to the company (while the estate is still in the course of administration) the legatee is a participator. Section 13(12) TCGA provides:

> In this section "participator", in relation to a company, has the meaning given by section 454 of CTA 2010.

A legatee is a participator under this definition.[12]

However s.13(3) TCGA (identifying the part of the chargeable gain which is deemed to accrue to the participator) provides:

---

12 See 73.15.4 (Personal representatives and beneficiaries of estates).

> That part shall be equal to the proportion of the gain that corresponds to the extent of the participator's *interest* as a participator in the company.

*Sudeley* and *Livingston*[13] decided that residuary[14] beneficiaries of an estate have no legal or equitable interest in the assets of the estate. They have the right to enforce its proper administration but that right is not properly described as an "interest" in the assets. It is therefore considered that during the course of administration the legatee does not have an "interest" as a participator.[15] Thus it does not matter that they are participators because nothing can be attributed to them under s.13.

The context can show that the word "interest" is to be understood in a loose or non-technical sense, in which case it might include the rights of a beneficiary in an estate. But there is no reason here to say the word is used loosely or non-technically. My conclusion is supported by the fact that it is not clear what would be the "just and reasonable" apportionment of the gain as between UK resident PRs and legatees. Also if the will creates a will trust, the trust does not come into existence until completion of the administration of the estate.

That is not the end of the matter. Normally, on the completion of the administration of the estate the PRs will assent to the vesting of the shares to the legatee. What is the position of the legatee then?

---

13 See 67.1 (Succession law background).

14 There is however no difference between residuary beneficiaries and specific legatees. The origin of the principle that a residuary legatee has no "interest" in the estate is historical: until the mid 19th century, estates were administered in the ecclesiastical courts and not the Chancery courts. That reasoning would apply to a specific legatee as to a residuary legatee.

15 See *Willingdale v Islington Green Investment Co* 48 TC 547 at p.562D.
"The expressions used in s.13(3) are partially defined in s.13(13):
In this section—
(a) references to a person's interest as a participator in a company are references to the interest in the company which is represented by all the factors by reference to which he falls to be treated as such a participator; and
(b) references to the extent of such an interest are references to the proportion of the interests as participators of all the participators in the company (including any who are not resident or ordinarily resident in the UK) which on a just and reasonable apportionment is represented by that interest.
Section 13(13)(a) does not turn the legatee's right into an "interest" if it is not already an interest.

The legatee is treated as having acquired the shares on the death.[16] Does it follow that the legatee is treated as if they had an interest in the shares, for the purposes of s.13 TCGA, so the legatee is after all treated as if the company gain accrued to them? It is the old question of how far one carries through the deeming.[17] In principle, one carries the deeming all the way and this does follow. However, several difficulties then arise:

(1) Suppose the PRs were UK resident. They would have been taxed in the first instance on the company gain under s.13 TCGA. There is nothing to give them relief on their subsequently assenting the company to a legatee. (Section 62(4)(b) TCGA states that the *legatee* shall be treated as if the PRs acquisition had been theirs. It makes no comment about the position of the PRs. The approach of the House of Lords in *R v Dimsey & Allen* was that relief in this situation should not be implied.)

(2) Another problem would arise if the PRs receive a dividend from the company, before distributing the shares to a legatee. The legatee would receive the shares but may not receive any funds representing the gain so it would not be fair that the company gain should be treated as accruing to them. The relief under s.13(5A) TCGA would not work properly.

(3) There would be an anomalous distinction between:
   (a) an assent of the shares (s.13 applies to the legatee); and
   (b) sale (or liquidation) of the company and assent of the proceeds to the legatee (s.13 TCGA does not apply).

For these reasons it is suggested that the deeming of s.62(4)(b) TCGA does not extend to deem the legatee to receive the company gains under s.13. This construction is also consistent with the limited view of the deeming provision taken in *Marshall* v *Kerr* 67 TC 56.

## 67.8 Deceased UK resident

If the deceased was UK resident and domiciled, the PRs are UK resident and domiciled, and so subject to CGT on all chargeable gains (less losses).

16 See 67.5.1 (Transfer from PRs to legatee).

17 See 54.11.1 (Construction of deeming provisions).

### 67.8.1 *Deceased UK resident not UK domiciled*

Suppose at the time of their death the deceased was UK resident but foreign domiciled. The PRs are treated as UK resident but not UK domiciled. CG Manual provides:

> **30660 Remittance basis not in administration period**
> If the deceased was resident and/or ordinarily resident but not domiciled in the UK before his or her death, then on disposing of assets outside the UK he or she would have benefited from the application of the remittance basis in Section 12 TCGA ... . Although the PRs have the same residence and domicile status as the deceased had, if they realise chargeable gains from disposals of assets situated outside the UK but do not remit those gains to the UK immediately they cannot benefit from this treatment. This is because the remittance basis applies only to individuals but Section 65(2) says that the body of PRs is not to be treated as an individual.

This remains valid after the 2008 reforms. At first sight this seems surprising, but on reflection, it is not absurd to draw a distinction between:
(1) a UK resident foreign domiciled individual, taxed on the remittance basis, and
(2) the PRs of that individual, taxed on an arising basis.
A remittance basis makes less sense for PRs whose role is generally short term.[18]

Of course, if the PRs are actually outside the UK, especially if they are outside the EU, HMRC may not, in practice, be able to recover the tax.

DTR is in principle available to treaty non-resident PRs which may solve this problem.

---

18 It has been argued that the HMRC view is wrong. The argument was largely based on a supposed anomalous position of PRs. Following the 2008 reforms, the anomalies work the other way (for if the remittance basis applied, it would be anomalous that PRs did not pay the £30k remittance basis charge). The argument would require the word "individual" in s.12(1) TCGA to be construed so as to include PRs, which is quite contrary to general statutory usage. So I do not think the argument now merits serious attention (but readers can find further discussion in the 2008/09 edition of this work).

## 67.9 CGT planning for UK resident PRs

If PRs sell assets in the course of administration, then any gain will be subject to CGT, even though the net proceeds of sale will in due course pass to a remittance basis taxpayer. If, by contrast, PRs transfer an asset *in specie* to a legatee to whom it has been bequeathed, whether specifically or as part of residue, then the PRs will not realise any chargeable gain but the base cost of the recipient beneficiary will be that of the PRs.[19] Where the legatee is a remittance basis taxpayer (or a non-UK resident, or a charity), they will often be able to dispose of the asset free of CGT.

It is thus a fundamental principle of CGT planning that PRs should generally avoid, wherever possible, making disposals of assets which pass under the will to remittance basis taxpayers, non-residents or charities, if a gain (less losses) arises on the disposal.

Suppose that a remittance basis taxpayer is entitled to a pecuniary legacy of £1,000,000 under a will. The estate holds a foreign situate asset which had a value of £600,000 at the date of the death of the deceased and which is now worth £1,000,000. If the PRs sell the asset in order to pay the legacy, they will be liable to CGT. This liability can be avoided by the PRs agreeing to transfer the property to the legatee in satisfaction of their pecuniary legacy.

Suppose the PRs inherit an asset belonging to the deceased which is the subject matter of a specific gift in their will; that they then sell the asset, the sale giving rise to a charge to CGT, and that they subsequently transfer the whole or part of the proceeds of sale to the specific legatee. The common law doctrine of relation back does not apply here. This doctrine would appear to operate only where an asset owned by the deceased is subsequently vested in the legatee. In any case, the express provisions of the statutory code deal so comprehensively with the situation that any application of the doctrine of relation back to CGT is by necessary implication excluded. So if there is such a sale, the PRs bear the CGT and transferring the proceeds of sale to the remittance basis taxpayer does not confer any exemption.

It may be necessary to sell some assets to pay liabilities of the PRs, and it may be that the assets available for sale will give rise to a chargeable gain.

---

19 See 67.5 (Transfer from PRs to beneficiaries).

One solution is as follows:

(1) The PRs assent the asset to the beneficiary subject to a charge for their liabilities under s.36(10) Administration of Estates Act 1925.
(2) The beneficiary then sells the asset: any gain on the sale accrues to the beneficiary: s.26(2) TCGA.
(3) Under the charge the proceeds are used to pay the PRs' liability.

## 67.10 CGT planning by IoV

Where there is more than one residuary legatee and some are remittance basis taxpayers, non-residents or charities, it would often make sense for assets with inherent capital gains to be transferred to them rather than to UK resident and domiciled individuals. This can often be done by means of an appropriation under s.41 Administration of Estates Act 1925, but (depending on the terms of the will) an instrument of variation may be necessary. The variation must be made within two years of the death of the deceased.

The basic strategy should be to redirect foreign assets of the estate with inherent capital gains to the remittance basis taxpayer. UK resident and domiciled beneficiaries would instead receive cash or assets without inherent gains. The remittance basis taxpayer might in due course realise the gains free of tax. There would be an overall tax saving, which could be shared between the remittance basis taxpayer and the other beneficiaries by negotiation, or which could be allowed to accrue entirely to the remittance basis taxpayer if the other beneficiaries were so minded.

## 67.11 Succession governed by foreign law

Further consideration is needed if the succession is governed by a foreign law. Section 62(1) TCGA provides:

> For the purposes of this Act the assets of which a deceased person was competent to dispose—
> (a) shall be deemed to be acquired on his death by the personal representatives *or other person on whom they devolve* for a consideration equal to their market value at the date of the death...

Under civil law jurisdictions property devolves directly on the beneficiary without the intervention of PRs during an administration period. *Bentley* *v Pike* 53 TC 590 concerned the position under German law (the deceased having died intestate owning a share of land in Germany). The evidence showed:

> ... the principle of *Universalsukzession* ... means that on the death of a person, his or her entire property passes immediately and automatically to his or her heirs. ... No distinction is made between movable and immovable property: on the death of the deceased person both types of property are automatically and without any interval in time or any further outward action of any kind vested in the heirs, whoever they may be, no matter whether they are known or whether it is necessary to take steps to ascertain their identity.

In these circumstances, the ownership of the property devolved on the beneficiary immediately on the death. The gain on the subsequent sale of the property therefore accrued to the beneficiary and not to the German equivalent of Prs.

CHAPTER SIXTY EIGHT

# ESTATES OF DECEASED PERSONS: INCOME TAX

## 68.1 Income taxation of estates: introduction

This chapter considers the income taxation of personal representatives and beneficiaries of estates of deceased persons. A full discussion needs a book to itself. I try to focus on matters closest to the themes of this book, but that can only be done in the context of a more general discussion of the rules.

I do not consider the equivalent provisions applicable for corporation tax which would apply to UK corporate beneficiaries.

For the succession law background, see 67.1 (Succession law background).

### 68.1.1 *Meaning of "PRs" for income tax*

Section 989 ITA provides a commonsense definition of PRs:

> The following definitions apply for the purposes of the Income Tax Acts—
> "personal representatives" in relation to a person who has died, means—
> (a) in the UK, persons responsible for administering the estate of the deceased, and
> (b) in a territory outside the UK, those persons having functions under its law equivalent to those of administering the estate of the deceased.

There is no rule that PRs are a single and continuing body of persons separate from the persons who are actually the PRs. This is anomalous, for such a rule applies to PRs for CGT and applies to trustees for both taxes.[1] However it will not often matter.

## 68.2 Residence of PRs for income tax

PRs are UK resident for income tax if they are all UK resident in their personal capacity. They are non-resident if they are all non-resident in their personal capacity. HMRC agree. Form SA 906(Notes) 2011 (Notes on form SA 906 Trust and Estate Non-residence 2010/11) provides:

> ***Deciding the personal representatives' residence status for Income Tax purposes***
> You can find out the personal representatives' residence status for Income Tax purposes by working through Questions 4 to 6.
> 4. Were **all** the personal representatives resident in the UK throughout the year to 5 April 2011?
> If 'YES', the personal representatives as a whole are resident in the UK for Income Tax purposes. Tick box 6.1 [Resident in the UK for Income Tax purposes]. Go to Question 7.
> If 'NO', go to Question 5.
> 5. Were **all** the personal representatives not resident in the UK throughout the year to 5 April 2011?
> If 'YES', the personal representatives as a whole are not resident in the UK for Income Tax purposes. Tick box 6.2 [Not resident in the UK for Income Tax purposes.] Please also complete boxes 6.7 to 6.12 as appropriate. Go to Question 7.
> If 'NO', go to Question 6 [mixed resident PRs].[2]

The position where an estate has both resident and non-resident PRs is governed by s.834 ITA:

> (1) This section applies for income tax purposes if the personal representatives of a deceased person ("D") include one or more persons who are UK resident and one or more persons who are non-UK resident.
> (2) If the following condition is met, the person or persons who are non-UK resident are treated, in their capacity as personal representatives, as UK resident.
> (3) The condition is that when D died D was UK resident, ordinarily UK

1 See 67.2 (Meaning of "PRs" for CGT).

2 Accessible *www.hmrc.gov.uk/worksheets/sa906-notes.pdf.*

> resident or domiciled in the UK.
> (4) If that condition is not met, the person or persons who are UK resident are treated, in their capacity as personal representatives, as non-UK resident.

Thus it is possible to arrange that PRs are not UK resident for income tax purposes. All of the PRs must be non-resident in their private capacities, (except in the case of a non-resident, non-ordinarily resident, non-domiciled testator where only one PR need be non-resident).

There are no statutory rules for domicile but the domicile of PRs will not often matter for IT purposes.

The position is different for CGT.[3]

## 68.3 Income taxation of PRs

PRs are "persons" and so pay income tax at the basic or dividend ordinary rate on the income of the estate if:
(1) the PRs are UK resident, or
(2) the income has a UK source.

### 68.3.1 *Foreign domiciled testator*

Form SA 906(Notes) 2011 (Notes on form SA 906 Trust and Estate Non-residence 2010/11) provides under the heading "Personal representatives: application to Income Tax":

> [1] If the personal representatives are resident in the UK, their taxable income will depend on the domicile of the deceased, whose estate is being administered, at the date of death.
> [2] If the deceased was domiciled in the UK, then the personal representatives will be taxable in the normal way on both UK and overseas income.
> [3] If the deceased was domiciled outside the UK, they will only be taxable on UK income. In such circumstances, you should not include such income. Please also tick box 6.6.[4]

---

3 See 67.3 (Residence and domicile of PRs for CGT).

4 Accessible *www.hmrc.gov.uk/worksheets/sa906-notes.pdf.* The reference is to box 6.6 in form SA106 (Trust and Estate Non-residence) which reads: "Tick box 6.6 if the deceased whose estate is being administered was domiciled outside the UK at the date

Point [3] is not right as a matter of law. UK resident PRs are as a matter of law liable to income tax on foreign income regardless of the domicile of the deceased. (Domicile of the deceased is sometimes relevant to the separate question of whether PRs are UK resident, but it is possible for a foreign domiciled deceased to have UK resident PRs.)

One is nevertheless entitled (perhaps bound) to assume that HMRC mean what they say, in a document as formal as guidance notes to a tax return, unless it is clear that there has been a blunder, ie unless it is clear that they cannot really mean what the sentence appears to say. HMRC clearly do mean what they say as they say it more than once and have said it for many years.[5]

There is therefore an informal concessionary practice. A concession is logical where the beneficiary of the estate is non-resident since income tax paid on foreign income would be reclaimed later when the income is paid to the beneficiary. The concession does raise a puzzle where the beneficiary is UK resident and the income is paid to the beneficiary: one might think that the foreign income should not be taken into account in computing the beneficiary's estate income, but that must be too good to be true. I think the effect of the concession should be to treat the PRs as non-resident for IT purposes and that should be followed through for payments made by the PRs (who therefore constitute a foreign estate). Thus a payment of the income to a UK resident beneficiary is taxable under the estate income regime, but a payment to a non-resident (or treaty non-resident) is not.

## 68.4 Income from specific legacy

If the PRs assent to the asset and its income vesting in the beneficiary, something rather peculiar happens. The beneficiary is deemed to have been the owner of the asset since the death. This rule – the doctrine of relation back – operates for income tax purposes: *IRC v Hawley* 13 TC 327. Thus, the beneficiary will, retrospectively, be treated as having

---

of death".

5 The point has been made in the equivalent notes going back at least to the 2005 notes. Similar wording is found in form SA904(Notes) (Notes on form SA904 Trust and Estate Foreign 2009/10) under the heading "Special circumstances – Personal representatives."

received the income year by year as it arose and the PRs will be treated as if they had not received it. The PRs may have paid UK tax. This will retrospectively be treated as being paid by the PRs on behalf of the beneficiary. Thus a beneficiary who is a remittance basis taxpayer can reclaim tax paid by UK resident PRs on unremitted foreign income. A non-resident beneficiary can also reclaim tax (it is not necessary to rely on ESC A14).

TSE Manual provides:

> **7490 Beneficiaries of estates: legacies** [January 2008]
> *Tax rules for specific legacies.*
> A legacy may take the form of an asset that does not produce income – for example a picture or a piece of jewellery. The beneficiary does not receive income and has no tax liability in respect of the legacy.
> Other assets can produce income – for example a bank account, shareholding or land. The general rule is that the beneficiary is entitled to the income arising to that asset from the death of the deceased person. Sometimes however the personal representatives may by law be entitled to use the income for some other purpose.
> If the beneficiary gets the income it should be treated as his income for the year in which it arises. The authority for this is *IRC v Hawley* 13 TC 327. The beneficiary cannot however be taxed on or given repayment on income that he did not receive.

## 68.5 Income from residuary estate

In order to appreciate the law it is helpful to understand its history. In *R v Special Commissioners, ex p. Dr Barnado's Homes* 7 TC 646, the residuary legatee was a charity. Income arose to the PRs during the period of administration on which the PRs paid income tax. The residuary legatee was not entitled to the income of the residuary estate as it arose during the period of administration, so it could not at that time reclaim income tax paid. Instead it sought to recover the tax when it actually received the income, on completion of administration. The House of Lords held that although the sum received by the charity represented (or was derived from) the PR's income, it was received by the charity as a capital receipt (like accumulated income of a trust). The payment on the completion of administration did not confer retrospective title on the residuary legatee to such income as income. So income tax paid by the PRs could never be recovered by the charity. The doctrine of relation back was not extended to gifts of residue. That was a victory for the Revenue, who were no doubt unperturbed about the unfairness to the charity. But subsequently, predictably, individual residuary legatees successfully contended that they were not liable to super-tax (which became surtax in 1927 and is now higher rate tax) on the income of a residuary estate arising during the administration period.[6] The Revenue then realised they had made a rod for their own back. Legislation was therefore brought in which is now to be found in Chapter 6 Part 5 ITTOIA.

## 68.6 Absolute/limited/discretionary interest in residue

The legislation distinguishes absolute/limited/discretionary interests in residue.

### 68.6.1 *Absolute interest in residue*

Section 650(1) ITTOIA provides a fairly commonsense definition:

> A person has an absolute interest in the whole or part of the residue of an estate for the purposes of this Chapter if—
> (a) the capital of the residue or that part is properly payable to the person, or
> (b) it would be so payable, if the residue had been ascertained.

### 68.6.2 *Limited interest in residue*

Section 650(2) ITTOIA provides a fairly commonsense definition:

> A person has a limited interest in the whole or part of the residue of an estate during any period for the purposes of this Chapter if—
> (a) the person does not have an absolute interest in it, and
> (b) the income from it would be properly payable to the person if the residue had been ascertained at the beginning of that period.

In practice the usual example of a limited interest is a life interest.

---

6 eg *Corbett v IRC* 21 TC 449. There are several income tax cases on the issue of whether administration was completed.

### 68.6.3 *Discretionary interest in residue*

Section 650(3) ITTOIA provides a fairly commonsense definition:

> A person has a discretionary interest in the whole or part of the residue of an estate for the purposes of this Chapter if—
> (a) a discretion may be exercised in the person's favour, and
> (b) on its exercise in the person's favour any of the income of the residue during the whole or part of the administration period (see section 653) would be properly payable to the person if the residue had been ascertained at the beginning of that period.

Section 650(4), (6) ITTOIA defines "properly payable" and s. 650(5) deals with the situation where PRs have an interest in another estate.

## 68.7 "UK estate" and "foreign estate"

The legislation distinguishes "UK estates" and "foreign estates". The distinction matters for two purposes:
(1) Computation of the basic amount.
(2) Source of income (relevant to remittance basis taxpayers and non-residents).
These terms are defined in s.651(1) ITTOIA:

> "UK estate", in relation to a tax year, means an estate[7] which meets conditions A and B, or condition C, for that year, and
> "foreign estate", in relation to a tax year, means an estate which is not a UK estate in relation to that year.

I refer below to "**UK estate conditions A to C**" to distinguish them from the myriad other conditions in ITTOIA. Unfortunately these conditions are in a tangle. An estate may be a UK estate in one year and a foreign estate in another year. The question must be addressed each year.

---

7 Section 649(2) ITTOIA provides a commonsense definition of "estate":
In this Chapter—
"estate" means the estate of a deceased person (whether a UK estate or a foreign estate).

### 68.7.1 *UK estate conditions A and B*

Section 651 ITTOIA provides:

> (2) Condition A is that all the income of the estate either—
> (a) has borne UK income tax by deduction, or
> (b) is income in respect of which the personal representatives are directly assessable to UK income tax for the tax year.
> (3) Condition B is that none of the income of the estate is income for which the personal representatives are not liable to UK income tax for the tax year because they are not UK resident or not ordinarily UK resident.

If the PRs are UK resident, condition A is satisfied (they are directly assessable to IT) and condition B is satisfied[8] so the estate is a UK estate.

If the PRs are UK resident but the testator was foreign domiciled, it appears that the estate is by concession treated as a foreign estate.[9]

If the PRs are non-resident, and have some foreign source income:
(a) condition A is not satisfied (some of their income is not taxable)
(b) it does not matter whether condition B is satisfied
(c) condition C is not satisfied
so the estate is not a UK estate.

If the PRs are non-resident but have only UK source taxable income, condition A is satisfied (they are assessable) and condition B is satisfied (no foreign income) so the estate is a UK estate.

If the PRs are non resident and have some UK income which qualifies for exemption (eg gilts) the estate is a foreign estate.

It is easy to procure that an estate with non-resident PRs qualifies as a

---

8 It takes more than one reading to comprehend the triple negative in condition B (the source legislation was clearer before the ITTOIA rewrite). Suppose PRs are not UK resident and receive foreign source income. The position is that condition B is not satisfied because:
(1) The PRs are not liable to IT on that income
(2) The reason they are not liable is that they are not UK resident: had they been UK resident, they would have been liable.
(3) Thus it is not the case that "none of the income of the estate is income for which the personal representatives are not liable to UK income tax for the tax year because they are not UK resident".
The same applies if non ordinarily resident PRs receive income from exempt gilts.

9 See 68.3.1 (Foreign domiciled testator).

"foreign estate" by arranging that there is some foreign income or FOTRA securities.

### 68.7.2 *Disregarded income and condition C*

Section 651(4) ITTOIA provides:

> For the purposes of conditions A and B sums within section 680(3) or (4) (sums treated as bearing tax) are ignored.

The list of disregards in s.680 ITTOIA is as follows:

> (3) The following sums are treated as bearing income tax at the dividend ordinary rate—
> (a) a sum charged under Chapter 3 of Part 4 (dividends etc. from UK resident companies etc.), or
> (b) a sum that is part of the aggregate income of the estate because of falling within—
> (i) section 664(2)(c) (stock dividends), or
> (ii) section 664(2)(d) (release of loan to participator in close company where debt due from personal representatives).
> (4) A sum that is part of the aggregate income of the estate because of falling within section 664(2)(e) (gains from life insurance contracts etc) is treated as bearing income tax at the basic rate.

It is convenient to have a term to describe these categories of income, so I call it "**disregarded income**".
Why is this income disregarded? Prior to 1996, s.233(1) ICTA 1988 (repealed) provided:

> *Where in any year of assessment the income of any person, not being a company resident in the UK, includes a distribution in respect of which that person is not entitled to a tax credit*
> *(a) no assessment shall be made on that person in respect of income tax at the basic rate on the amount or value of the distribution ...*

Thus non-resident PRs who received dividend income would not be assessable and so would count as a foreign estate.
Section 651(5) ITTOIA provides:

Condition C is that the aggregate income of the estate for the tax year consists only of sums within section 680(3) or (4).

## 68.8 "Payment"

The legislation uses the word "payment" but (like "capital payment" for s.87) this is widely defined. Section 681 ITTOIA provides:

> (1) For the purposes of this Chapter—
> (a) a transfer of assets, or
> (b) the appropriation of assets by personal representatives to themselves,
> is treated as the payment of an amount equal to the assets' value at the date of transfer or appropriation.
> (2) The set off or release of a debt is treated for the purposes of this Chapter as the payment of an amount equal to it.
> (3) If at the end of the administration period—
> (a) there is an obligation to transfer assets to any person, or
> (b) personal representatives are entitled to appropriate assets to themselves,
> an amount equal to the assets' value at that time is treated as payable then for the purposes of this Chapter.
> (4) If at the end of the administration period—
> (a) there is an obligation to release or set off a debt owed by any person, or
> (b) personal representatives are entitled to release or set off a debt in their own favour,
> a sum equal to the debt is treated as payable then for the purposes of this Chapter.

## 68.9 Charge to tax on estate income

Beneficiaries are subject to tax on estate income. There are essentially three parts to the legislation:
(1) The charge to tax on estate income.
(2) The definition of when estate income arises.
(3) The quantification of the amount of estate income.
Section 649(1) ITTOIA provides the charge to tax:

> Income tax is charged on estate income.

## 68.10 Estate income

Estate income is a label which brings in different rules for the different types of interest in residue. Section 649(2) ITTOIA provides a referential definition:

> (2) In this Chapter—
> "estate income" means the income treated under this Chapter as arising from an absolute, limited or discretionary interest in the whole or part of the residue of an estate ...
> (3) Estate income is treated as income for income tax purposes.
> (4) If different parts of an estate are subject to different residuary dispositions, those parts are treated for the purposes of this Chapter as if they were separate estates.

The circumstances in which estate income is treated as arising depend on the type of interest in residue. These are set out in ss.652–655 ITTOIA. These provisions state *when* estate income is treated as arising. The question of the *amount* of estate income is addressed separately.

### 68.10.1 *When estate income arises: absolute interest in residue*

Section 652 ITTOIA provides:

> (1) Income is treated as arising in a tax year from a person's absolute interest in the whole or part of the residue of an estate if—
> (a) the person has an assumed income entitlement for the tax year in respect of the interest (see sections 665 to 670), and
> (b) condition A or B is met.
> (2) Condition A is that a payment is made in respect of the interest in the tax year and before the end of the administration period (see section 653).
> (3) Condition B is that the tax year is the final tax year (see section 653).
> (4) Income treated as arising as a result of this section is estate income for the purposes of this Chapter.

The key term here is "assumed income entitlement;" see 68.14 (Assumed income entitlement).

For completeness, s.653 ITTOIA provides commonsense definitions of "administration period" and "final tax year":

> (1) In this Chapter "the administration period", in relation to the estate of a deceased person, means the period beginning with the deceased's death and ending with the completion of the administration of the estate.
> (2) In the application of subsection (1) to Scotland, the reference to the completion of the administration is to be taken as a reference to the date at which, after discharge of, or provision for, liabilities falling to be met out of the deceased's estate, the free balance held in trust for the residuary legatees or for the persons with the right to the intestate estate has been ascertained.
> (3) In this Chapter "the final tax year" means the tax year in which the administration period ends.

### 68.10.2 *When estate income arises: limited interest in residue*

Section 654 ITTOIA provides:

> (1) Income is treated as arising in a tax year from a person's limited interest in the whole or part of the residue of an estate in cases A, B and C.
> (2) Case A is where—
> (a) the interest has not ceased before the beginning of the tax year, and
> (b) a sum is paid in respect of the interest in that year and before the end of the administration period.
> (3) Case B is where—
> (a) the tax year is the final tax year,
> (b) the interest has not ceased before the beginning of that year, and
> (c) a sum remains payable in respect of the interest at the end of the administration period.
> (4) Case C is where—
> (a) the tax year is a year before the final tax year,
> (b) the interest ceases in the tax year, and
> (c) a sum is paid in respect of the interest in a later tax year but before the end of the administration period, or remains payable in respect of it at the end of that period. ...
> (6) Income treated as arising as a result of this section or section 674 is estate income for the purposes of this Chapter.

### 68.10.3 *When estate income arises: discretionary interest in residue*

Section 655 ITTOIA provides:

> (1) Income is treated as arising in a tax year from a person's discretionary interest in the whole or part of the residue of an estate if a payment is made in the tax year in exercise of the discretion in that person's favour.
> (2) Income treated as arising as a result of this section is estate income for the purposes of this Chapter.

## 68.11 Amount of estate income

There are two aspects to the rules: quantifying the "basic amount", and grossing up.

### 68.11.1 *UK estate*

Section 656(1) ITTOIA provides:

> In the case of a UK estate, tax is charged under section 649 on the amount of estate income treated as arising in the tax year.

Section 656 defines the amount of estate income:

> (2) That amount is the basic amount of that income for the tax year (see subsection (4)) grossed up by reference to the applicable rate for that year (see section 663).
> (3) The gross amount is treated as having borne income tax at that rate.

The applicable rate is not discussed here. The key term is the "basic amount" of estate income. Section 656(4) ITTOIA provides four referential definitions.

> In this Chapter "the basic amount", in relation to estate income, has the meaning given by—
> (a) section 660 (basic amount of estate income: absolute interests),
> (b) section 661 (basic amount of estate income: limited interests),
> (c) section 662 (basic amount of estate income: discretionary interests), and
> (d) section 675 (basic amount of estate income: successive limited interests).

### 68.11.2 *Foreign estate*

Section 657(1) ITTOIA provides:

> In the case of a foreign estate, tax is charged under section 649 on the full[10] amount of estate income treated as arising in the tax year.

The section goes on to specify the amount:

> (2) That amount depends on whether the estate income arising in the tax year is paid from sums within section 680(3) or (4) (sums treated as bearing income tax).
> (3) So far as the estate income is paid from such sums, that amount is the basic amount of that income for the tax year grossed up by reference to the applicable rate for that year (see section 663).
> (4) That gross amount is treated as having borne income tax at that rate.
> (5) So far as the estate income is not paid from sums within section 680(3) or (4), the amount of estate income treated as arising in the tax year is the basic amount of that income for that year.

The difference between UK and foreign estates is that in the latter case there is no grossing up.

## 68.12 Person liable

Section 659 ITTOIA identifies the person liable:

> (1) If the estate income is from a person's absolute interest or limited interest, that person is liable for any tax charged under section 649 unless subsection (3) or (4) provides that another person is liable.
> (2) If the estate income is from a discretionary interest, the person in whose favour the discretion is exercised in making the payment in question is liable for any tax charged under section 649.

That seems self-evident. Subsection (3)(4) (not set out here) deal with successive interests. We turn at last to the key concept "basic amount".

---

10 Section 657 refers to the "full amount" and s.656 refers only to the "amount", but the word "full" is clearly otiose: there is no difference in meaning.

## 68.13 "Basic amount of estate income"

The quantum of the "basic amount of estate income" depends on the type of interest in residue, ie whether there is an absolute, limited or discretionary interest.

### 68.13.1 *Basic amount of estate income: absolute interest*

Section 660 ITTOIA provides:

> (1) The basic amount of estate income relating to a person's absolute interest in the whole or part of the residue of an estate for a tax year before the final tax year is the lower of—
> (a) the total of all sums paid in the tax year in respect of that interest, and
> (b) the amount of the person's assumed income entitlement for the tax year in respect of it.
> (2) The basic amount for the final tax year is equal to the amount of the person's assumed income entitlement for that year in respect of that interest.

The next key term is "assumed income entitlement".

### 68.13.2 *Basic amount of estate income: limited interest*

Section 661(1) ITTOIA provides:

> (1) The basic amount of estate income relating to a person's limited interest in the whole or part of the residue of an estate for a tax year is the total of the sums within section 654(2)(b), (3)(c) and (4)(c) for that year.

### 68.13.3 *Basic amount of estate income: discretionary interest*

Section 662 ITTOIA provides:

> The basic amount of estate income relating to a person's discretionary interest in the whole or part of the residue of an estate for a tax year is the total of the payments made in the tax year in exercise of the discretion in favour of the person.

### 68.13.4 *HMRC practice*

These rules are too complicated and in practice no-one takes much notice of them. The TSEM provides:

> **7655. Statutory - conventional basis of taxation [February 2009]**
> ***The statutory basis***
> The statutory basis is provided in ITTOIA/Ss654, 656 and 661. This requires all sums paid during or payable on completion of the administration period to be taxed over the course of the administration period. The amounts are allocated to tax years as follows:-
> 1. where
>    - the interest has not ceased before the beginning of the tax year
>    - the administration period continues after the end of the tax year
>
>    then the amount is the sum paid in the tax year
> 2. where
>    - the interest has not ceased before the beginning of the tax year
>    - the administration period ends in the tax year
>
>    then the amount is the total of any sum paid in the tax year before the end of the administration period plus any amount still due to the beneficiary at the end of the administration period
> 3. where
>    - the interest ceases in the tax year
>    - the administration period continues after the end of the tax year
>
>    then the amount is the total of any sum paid in the tax year plus any amount still due when the interest ceases
>
> The amounts allocated to each year are then deemed to be the net income of the beneficiary for that year. The amount concerned is grossed at the applicable rate...
> ***The conventional basis***
> The beneficiary is treated as if he had been entitled to the income of the estate (or an appropriate part of the estate) as and when the income arose to the personal representatives. The basis applies for all purposes including repayments.
> It is unlikely that there will be cases where it is worthwhile insisting on the statutory basis. If the beneficiary asks for the statutory basis to be applied, you should ask for a computation on that basis. If you have any problems with such a computation, ask HMRC Trusts Edinburgh for advice.

## 68.14 Assumed income entitlement

The key term "assumed income entitlement" is relevant to computation of the basic amount. For absolute interests, this is (in brief) calculated as follows.

First one calculates the "aggregate income of the estate". This has a broadly commonsense definition in s.664 ITTOIA:

> (1) For the purposes of this Chapter the aggregate income of the estate for a tax year is
> [a] the total of the income and amounts specified in subsection (2), but
> [b] excluding the income specified in subsection (5).
> (2) The income and amounts are—
> (a) the income of the deceased's personal representatives in that capacity which is charged to UK income tax for the tax year,
> (b) the income of the deceased's personal representatives in that capacity on which such tax would have been charged for the tax year if—
> (i) it was income of a UK resident who was ordinarily UK resident, and
> (ii) it was income from a source in the UK,[11]
> (c) any amount of income treated as arising to the personal representatives under section 410(4) (stock dividends) that would be charged to income tax under Chapter 5 of Part 4 if income arising to personal representatives were so charged (see section 411),
> (d) in a case where section 419(2) applies (release of loans to participator in close company: loans and advances to persons who die), the amount that would be charged to income tax under Chapter 6 of Part 4 apart from that section, and
> (e) any amount that would have been treated as income of the personal representatives in that capacity under section 466 if the condition in section 466(2) had been met (gains from contracts for life insurance).
> (3) In calculating the amount of the income within subsection (2)(a), any allowable deductions are to be taken into account.
> (4) In calculating the amount of the income within subsection (2)(b), any deductions which would be allowable if the income had been charged to UK income tax are to be deducted from the full amount of

11 I cannot see the point in (ii). If it is income of a UK resident, why does the source matter?

the income actually arising in the tax year.

Section 664(5) identifies income not included in "estate income":

> The excluded income is—
> (a) income to which any person is or may become entitled under a specific disposition[12], and
> (b) income from property devolving on the personal representatives otherwise than as assets for payment of the deceased's debts.

Armed with the figure for the aggregate income of the estate, one next computes "the residuary income of the estate". This brings in rules for allowable deductions. Section 666(1) ITTOIA provides:

> For the purposes of this Chapter the residuary income of an estate for a tax year is
> [1] the aggregate income of the estate for that year, less
> [2] the allowable estate deductions for that year.
> This is subject to section 669 (reduction in residuary income: inheritance tax on accrued income).

Section 666(2) ITTOIA identifies the deductions:

> The allowable estate deductions for a tax year are—
> (a) all interest paid in that year by the personal representatives in that capacity (but see section 233 of IHTA 1984: exclusion of interest on unpaid inheritance tax),
> (b) all annual payments for that year which are properly payable out of residue,
> (c) all payments made in that year in respect of expenses incurred by the personal representatives in that capacity in the management of the assets of the estate, and

12 Defined in subsection (6): "In subsection (5)(a) 'specific disposition' means a gift of specific property under a will, including—
(a) the disposition of personal chattels by section 46 of the Administration of Estates Act 1925 (c 23) (succession on intestacy), and
(b) any disposition which under the law of another country has a similar effect to a gift of specific property by will under the law of England and Wales,
but excluding real property included in a residuary gift made by will by a specific or general description of it or, in Scotland, heritable estate included in such a gift."

> (d) any excess deductions from the previous tax year.[13]
> This is subject to subsections (3) to (5).

Subsections (3) - (5) have some commonsense rules:

> (3) No sum is to be treated as an allowable estate deduction if it is allowable in calculating the aggregate income of the estate.
> (4) No sum is to be counted twice as an allowable estate deduction.
> (5) Payments in respect of expenses are only allowable estate deductions if they are properly chargeable to income (ignoring any specific direction in a will).

In short, one deducts "allowable estate deductions" to obtain the "residuary income of the estate."

Armed with the figure for the residuary income of the estate, we are at last in a position to compute the assumed income entitlement. Section 665 ITTOIA provides:

> (1) Whether a person has an assumed income entitlement for a tax year in respect of an absolute interest in the whole or part of the residue of an estate depends on the results of the following steps.
> *Step 1* Find the amount of the person's share of the residuary income of the estate that is attributable to that interest for that tax year and each previous tax year during which the person had that interest (see sections 666 to 669).
> *Step 2* If the estate is a UK estate in relation to any tax year for which an amount has been found under step 1, deduct from that amount income tax on that amount at the applicable rate for that year (see section 670).
> *Step 3* Add together the amounts found under step 1 after making any deductions necessary under step 2.
> *Step 4* Add together the basic amounts relating to the person's absolute interest in respect of which the person was liable for income tax for all previous tax years (or would have been so liable if the person had been a person liable for income tax for those years).

---

13 This is defined in s.666(6):

> "In this section 'excess deductions from the previous tax year' means so much of the allowable deductions for the previous tax year as exceeded the aggregate income of the estate for that year."

This allows unused expenses to be carried forward.

(2) For the purposes of this Chapter the person has an assumed income entitlement for the tax year if the amount resulting from step 3 exceeds the amount resulting from step 4.
(3) The assumed income entitlement is equal to the excess.
(4) [This deals with successive interests].

## 68.15 Beneficiary a trustee of a discretionary trust

Section 483 ITA provides:

> (1) This section applies if, during or at the end of the administration period for an estate—
> (a) the personal representatives pay the trustees of a settlement a sum representing income of the personal representatives, and
> (b) if this Chapter had applied to personal representatives, income tax would have been charged on that income at the dividend trust rate or at the trust rate.
> (2) The sum is treated as—
> (a) being paid as income, and
> (b) having borne income tax at the applicable rate.

Lastly we have some definitions by reference (which would have been unnecessary had there been taxes-act-wide definitions):

> (3) In this section—
> "administration period" has the meaning given by section 653 of ITTOIA 2005, and
> "the applicable rate" means the rate referred to in section 663(1) of ITTOIA 2005 (the applicable rate for grossing up basic amounts of estate income).

The drafter has failed to incorporate the extended definition of "payment" but perhaps that may be implied.

## 68.16 Beneficiary a remittance basis taxpayer

Section 658 ITTOIA brings in the remittance basis:

> (1) The charge to tax under section 649 on the amount of income arising in a tax year is subject to Part 8 (foreign income: special rules).
> (2) For the purposes of section 830(1) (meaning of "relevant foreign

income") amounts charged to tax under section 649—

(a) are treated as arising from a source outside the UK if the estate is a foreign estate, and

(b) are treated as not arising from such a source if the estate is a UK estate.

The section uses the words "treated as" because the income (being fictional income) does not have a source.[14]

If a beneficiary is a remittance basis taxpayer, it is important to ensure that the estate is a "foreign estate" and not a "UK estate" because the remittance basis only applies to a foreign estate.

Since the estate income is deemed income, not real income, it cannot be remitted. There is no rule that the PRs income or the beneficiary's actual receipts are is deemed to be derived from the estate income.

## 68.17 Non-resident beneficiary of UK estate: DTA relief

International Manual provides:

> **367510 Claims by beneficiaries of a UK estate** [June 2004]
> A distribution made to a beneficiary of income received by a UK estate during its administration period is considered to be a source of income in its own right.
> Where a beneficiary receives a distribution of income that has arisen during the administration of a UK estate, that beneficiary may be entitled to relief on the income under a Double Taxation treaty. Relief will be available in one of two ways:
> • Other Income article: where an other income article of a treaty does not exclude income paid out of a UK estate, that income is considered as other income. ...
> The beneficiary is entitled to full relief from the total tax deemed to have been paid on the income.
> • Extra Statutory Concession A14: where it is not possible to relieve the income under an other income article, Extra Statutory Concession A14 allows us to look through to the underlying sources of income received by an estate and allow relief as if the beneficiary owned the sources of income in their own right.[15] ...

14 See 16.4.2 (Location of source of income when there is no source).

15 See 68.18 (Non-resident beneficiary of UK estate: concessionary relief).

International Manual para 367530 sets out a list of countries where relief is available under the Other Income article on distributions made by UK estates. For this list see 22.11.1 (DTAs with OECD model "other income" article).

> **367540 How to give relief by 'looking through'** [July 2005]
> A repayment claim will be supported by an R185 (Estate Income) (or an R185E) tax certificate prepared by the personal representative(s) showing the rate(s) at which the sources of income have been taxed.
> It should be possible to identify the sources of income from the R185 (Estate Income). If so, you should apply relief at the treaty rate for the type of income. It may not be possible to identify the sources of income on an R185E; if so you will need to find out what they are. Remember that you will have to open an SA enquiry to ask for the information you need. See INTM331200 for guidance on how to open an enquiry. You should ask the claimant or their representative for a breakdown of the underlying sources of income arising to the estate.
> (This text has been withheld because of exemptions in the Freedom of Information Act 2000)

## 68.18 Non-resident beneficiary of UK estate: concessionary relief

ESC A14 provides:

> **A14 Deceased person's estate: residuary income received during the administration period**
> A beneficiary who for a year of assessment is not resident or not ordinarily resident in the UK, and is deemed under ITTOIA ss.657, 658(2) and 830(1) to have received income from a UK estate in that year, may claim to have their tax liability on that income from the estate adjusted to what it would be if such income had arisen to them directly and as a result they—
> [1] could claim relief under TA 1988 s.278 (claim to personal reliefs by certain non residents); or
> [2] could claim entitlement to exemption in respect of FOTRA Securities issued in accordance with ITTOIA s.714; or
> [3] could claim relief under the terms of a double taxation agreement; or
> [4] would not have been chargeable to income tax.

The ESC goes on to specify the conditions for the relief.

> Relief or exemption, as appropriate, will be granted to the beneficiary only if the personal representatives of the estate—
> – have made estate returns for each and every year for which they are required, and
> – have paid all tax due and any interest, surcharges and penalties arising, and
> – keep available for inspection any relevant tax certificates, together with copies of the estate accounts for all years of the period of administration showing details of all sources of estate income and payments made to beneficiaries.
>
> Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary is deemed to have received the income.
>
> No tax will be repayable to the beneficiary in respect of income they are deemed to have received where the basic amount of estate income, if received by a UK resident beneficiary of an estate, is paid sums within ss.657(3), (4) and 680(3), (4) ITTOIA.

This is the equivalent of ESC B18 for trusts.[16]

## 68.19 Non-resident beneficiary of foreign estate

Section 577 ITTOIA provides the necessary exemption for non-residents:

> (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
> (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK...

The wording is the same as the equivalent exemption for savings and investment income, in part 4 ITTOIA; for a discussion see 16.4 (Why does location of source matter?).

## 68.20 Time limits for claims and assessments

Section 682 ITTOIA provides:

16 See 22.9 (Discretionary trusts treated as transparent to allow beneficiaries reliefs).

(1) This subsection applies if after the administration period ends it is apparent that a person is liable for income tax on estate income for any tax year who previously appeared not to be so liable or to be liable for tax on a lesser amount.
(2) If subsection (1) applies—
(a) the person may be assessed and taxed for the tax year, and
(b) any relief or additional relief to which the person may be entitled for the tax year is to be allowed if a claim is made.
(3) This subsection applies if after the administration period ends it is apparent that a person who previously appeared to be liable for income tax on estate income for any tax year is not so liable or is liable for tax on a lesser amount.
(4) If subsection (3) applies—
(a) all necessary adjustments and repayments of income tax for the tax year are to be made, and
(b) if the person has been allowed relief which exceeds the relief that could have been given by reference to the amount actually charged for the tax year, income tax is charged on the person for that year under this subsection on the excess.
(4A) The excess charged under subsection (4)(b) is treated as an amount of income for income tax purposes, except so far as it represents a tax reduction given effect at Step 6 of the calculation in section 23 of ITA 2007.
(5) An assessment or adjustment made for the purposes of this Chapter or a claim made as a result of this Chapter may be made after the end of the period otherwise allowed if it is made on or before the third anniversary of the normal self-assessment filing date for the tax year in which the administration period ends.

International Manual provides:

**367560 Statutory time limit for claims by beneficiaries** [April 2004]
It is possible that a beneficiary may receive a distribution from an estate which includes income received by the personal representative outside the normal statutory time limit. However, Section 700(3) ICTA 1988 allows beneficiaries until 3 years from 31 January following the year in which administration was completed to make their claims. This means that a beneficiary is not prevented from claiming relief from UK tax because of the time taken to complete the administration of the estate.
For example, a death occurs during 1994/95. In the normal course of events, the time limit for a beneficiary to claim on administration period income arising in that year would have expired on 5 April 2001.

However, if the administration of the estate is not completed until 2002/03 the time limit is extended and the beneficiary has until 31 January 2007 to make the claim.

CHAPTER SIXTY NINE

# WHO IS THE SETTLOR?

## 69.1 Why does it matter who is the settlor?

The identity of the settlor(s) of a settlement is relevant for many tax purposes. It is not practical to compile a full list, but the rules include the following:

(1) Rules taxing a settlor on trust income and gains.[1]

(2) Rules taxing trustees (or beneficiaries) if the settlor is UK domiciled or resident. The tax status of the settlor is an appropriate connecting factor for the taxation trustees and beneficiaries. The most important example is the IHT excluded property rule.[2] So the question of the identity of the settlor often arises in matters concerning foreign domiciliaries.

(3) Connected person rules, which apply if a person is connected with a settlor.

(4) Reverter to settlor rules.[3]

Subsidiary questions may also arise:

- Where a settlement has two settlors, what property each settlor has provided.
- Whether a settlor provides additional property
- When a person provides property.

The person named as “the settlor” in the trust document is not necessarily a settlor, or the only settlor, for tax purposes.[4]

---

1 See 24.1 (Settlor-interested trusts) and 44.2 (Fundamental s.86 conditions).

2 See 53.1 (Excluded property for IHT).

3 See s.54 IHTA.

4 On nominal settlors see Kessler & Sartin, *Drafting Trusts and Will Trusts*, (10th ed., 2010) para 10.14.

## 69.2 Definitions of "settlement"

Before discussing "settlor" we need to discuss "settlement".

For most purposes the words "settlement" and "trust" are interchangeable,[5] though when referring to statutory provisions it is clearer to use the statutory terminology.

### 69.2.1 *Terminology*

There are three different definitions of "settlement". We need labels to distinguish them, and I use the following terms:

(1) *Classic settlements*

(a) ***Standard IT/CGT definition of "settlement"***
This definition applies in the Income Tax Acts and TCGA unless the context otherwise requires. In some cases the context does "otherwise require" because the settlement-arrangement definition is applied. I cannot think of any other case where the context would "otherwise require".

(b) ***IHT definition***: the definition for IHT purposes.
For present purposes (identifying the settlor) the IHT definition is effectively the same as the standard IT/CGT definition, there is no need to distinguish between them.

I use the term "**classic settlement**" to describe a trust which is a settlement within the standard IT/CGT and IHT definitions.[6]

(2) ***Settlement-arrangement***
This is the definition which applies for the purposes of the IT settlement provisions. It is also applied in various other contexts. In earlier editions I called this the IT definition but that terminology became inappropriate following the introduction of the standard IT/CGT definition in 2006; also the settlement-arrangement definition is adopted for several purposes for CGT.

Equipped with this terminology we can now consider the various definitions of "settlement".

---

5 See Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010) p. *lvii* (Terminology).

6 This terminology is from Lord Walker's speech in *Jones v Garnett* 78 TC 1.

### 69.2.2 *Standard IT/CGT definition of settlement*

Section 466 ITA provides:

> **466 Meaning of "settled property" etc**
> (1) This section applies for the purposes of the Income Tax Acts, except so far as, in those Acts, the context otherwise requires.
> (2) "Settled property" means any property held in trust other than property excluded by subsection (3)...
> (4) References, however expressed, to property comprised in a settlement are references to settled property.[7]

This is formally a definition of "settled property" not "settlement" but, as subs.(4) illustrates, the definition also governs the meaning of the word "settlement".

The exemption in s.466(3) relates to nominees or bare trustees, see 72.4 (Nomineeships).

### 69.2.3 *Settlement-arrangement definition of settlement*

Section 620(1) ITTOIA provides:

> In this Chapter "settlement" includes[8] any disposition, trust, covenant, agreement, arrangement or transfer of assets...

In *Jones v Garnett*, Lord Hoffmann explains:

> Not every transfer of property is a settlement for the purposes of [the settlement-arrangement definition]. There has to be an "element of bounty" in the transaction. This old-fashioned phrase, apparently derived from the judgment of Plowman J in *IRC v Leiner* 41 TC 589 and approved by the House of Lords in *IRC v Plummer* [1980] AC 896, conjuring up the image of Lady Bountiful in *The Beaux' Stratagem*, is perhaps not the happiest way of describing a provision for a spouse or

---

7 The legislation is set out in full in ITA and TCGA, but there are no significant differences, so I give the text of ITA only. The CGT equivalent is in ss.60, 68 TCGA 1992.

8 The context shows this is an exhaustive definition, ie the word "includes" really means "means".

> minor children. ... It is nevertheless exactly the kind of thing at which the anti-avoidance provisions are aimed. In *Chinn v Hochstrasser* [1981] AC 533 Lord Roskill cautioned against treating the word "bounty" as if it had been included in the statute. It seems to me that the general effect of the cases is that, under the arrangement, the settlor must provide a benefit which would not have been provided in a transaction at arms' length.[9]

The term "bounty" was criticised by Lady Hale in the same case, but it is likely to continue in use as a technical term. It is short, accurate, and memorable if archaic.[10]

The bounty requirement is not quite the same as a "commercial" requirement, but the concepts overlap. In *IRC v Levy* the judge stated that "a commercial transaction devoid of any element of bounty is not within the definition". In that case an interest-free loan to a company wholly owned by the lender was held to be a *simple case of a commercial transaction devoid of any element of bounty* and hence not a settlement-arrangement.[11]

By contrast, the standard IT/CGT and IHT definitions of "settlement" do not include a bounty requirement.

Is an estate of a deceased person, or a trust under a will or intestacy a settlement-arrangement? This question does not arise for the purposes of the IT settlement provisions. Even if it is a settlement-arrangement the settlor, that is, testator (being dead) will not be subject to tax. The settlement-arrangement definition is used in other contexts where the issue

9 78 TC 1 at [7]. HMRC agree. TSE Manual:

> "**4110 Restrictions to the definition of settlement** [February 2011]
>
> ...A purely commercial transaction at arms length is outside the meaning of 'settlement'.
>
> Settlement must include an element of bounty, as decided in the tax case of *IRC v Plummer* (54 TC 1). Bounty is the provision of value without any corresponding quid pro quo, usually a gift or a transfer at less than full value."

10 Lord Neuberger agreed in Jones v Garnett 78 TC 1 at [76]:

> "The word 'bounty' rings slightly uncomfortably, at least to my ears. ... However, in the light of the judicial decisions on these provisions, it seems to me that the law is now tolerably clear and sensible, and, particularly given the need for clarity and the room for difficulties in this area, it would be inappropriate to risk introducing uncertainty or new complications by redefining the principles, even if only linguistically."

11 56 TC 68 at p.87.

does arise: see 67.6.1 (Is an estate a "settlement" within s.87 TCGA?).

### 69.2.4 *IHT definition of settlement*

The IHT definition of "settlement" is different again. However for the purposes of this chapter (who is the settlor) it is equivalent to the standard IT/CGT definition.[12]

## 69.3 Definitions of "settlor"

### 69.3.1 *Terminology*

There are four different definitions of "settlor". We need labels to distinguish them, and I use the following terms:

(1) ***The standard IT/CGT definition of settlor***. This definition applies in the Income Tax Acts and TCGA "unless the context otherwise requires". In some cases the context does "otherwise require" because there is a separate definition of settlor. I cannot think of any other case where the context would "otherwise require". The standard IT/CGT definition does not apply for the IT settlement provisions or for s.86 TCGA, so it is not usually very important.

(2) ***The settlement-arrangement definition of settlor***. This is the definition which applies for the purposes of the IT settlement provisions. It is applied by reference in various other contexts.

(3) ***The CGT s.86 definition of settlor****:* the definition for the purposes of s.86 TCGA.

(4) ***The IHT definition of settlor****:* the definition for the purposes of IHT.

Equipped with this terminology we can now consider the various definitions of settlor.

### 69.3.2 *Standard IT/CGT definition of settlor*

Section 467(1) ITA provides:[13]

---

12 The differences matter for issues relating to categorisation of foreign institutions; the IHT definition is discussed in 72.2 (Definition of "IHT-settlement".

13 The legislation is set out in full in ITA and TCGA, but there are no significant differences, so I give the text of ITA only. The CGT equivalent here is s.68A TCGA.

> In the Income Tax Acts (except where the context otherwise requires) "settlor", in relation to a settlement, means the person, or any of the persons, who has made the settlement.

Section 467 ITA sets out various circumstances in which a person is treated as having made a settlement:

> (3) A person ("S") is treated for the purposes of the Income Tax Acts as having made a settlement if—
> (a) S has made or entered into the settlement (directly or indirectly), ...

There are four possibilities here:
(1) S is treated as having made a settlement if S has made the settlement directly. This is a tautology.
(2) S is treated as having made a settlement if S has made a settlement indirectly. I am unable to see how one can make a settlement indirectly.
(3) and (4) S is treated as making a settlement if S has entered into it (directly or indirectly). These words have been lifted from the context of the settlement-arrangement definitions of settlement and are not apt here. I conclude that s.467(3)(a) achieves nothing, but it does no harm. One might take from it a general intent that "making a settlement" is not to be construed narrowly.

Section 467 ITA continues:

> (3) A person ("S") is treated for the purposes of the Income Tax Acts as having made a settlement if ...
> (b) the settled property, or property from which the settled property derives, is or includes property within subsection (4).
> (4) Property is within this subsection if—
> (a) the settlement arose on S's death (whether by S's will, on S's intestacy or in any other way), and
> (b) immediately before S's death, the property was property of S—
> (i) which was disposable property (see section 468), or
> (ii) which represented S's severable share in any property to which S was beneficially entitled as joint tenant.

This is necessary because an intestate does not "make or enter into" the trusts arising on intestacy; and it might perhaps be argued that a testator does not "make or enter into" the trusts arising under their will.[14]

Section 467 continues:

> (5) In particular, S is treated for the purposes of the Income Tax Acts as having made a settlement if—
> (a) S has provided property for the purposes of the settlement (directly or indirectly), or
> (b) S has undertaken to do that.
> (6) If a person ("A") makes or enters into a settlement in accordance with reciprocal arrangements with another person ("B")—
> (a) B is treated for the purposes of the Income Tax Acts as having made the settlement, and
> (b) A is not to be treated for the purposes of the Income Tax Acts as having made the settlement just because of the reciprocal arrangements.

So far this definition of settlor is almost the same as the settlement-arrangement definition, the only difference is that the wording is recast in accordance with the conventions of plain English drafting and will trusts are included.

### 69.3.3 *Settlement-arrangement definition of settlor*

Section 620 ITTOIA provides the settlement-arrangement definition:

> (1) In this Chapter ...
> "settlor", in relation to a settlement, means any person by whom the settlement was made.
> (2) A person is treated for the purposes of this Chapter as having made a settlement if the person has made or entered into the settlement directly or indirectly.
> (3) A person is, in particular, treated as having made a settlement if the person—
> (a) has provided funds directly or indirectly for the purpose of the settlement,
> (b) has undertaken to provide funds directly or indirectly for the purpose of the settlement, or
> (c) has made a reciprocal arrangement with another person for the other

14 See 67.6.1 (Is an estate a "settlement" within s.87 TCGA?).

person to make or enter into the settlement.

One can identify five parts of the definition. A person is a settlor if and only[15] if they have:
(1) made the settlement directly or indirectly;
(2) "entered into"[16] the settlement directly or indirectly;
(3) provided funds directly or indirectly for the purpose of the settlement;
(4) undertaken to provide funds directly or indirectly for the purpose of the settlement;[17] or
(5) made a reciprocal arrangement with another person to make or enter into the settlement.

### 69.3.4 *IHT definition of settlor*

Section 44(1) IHTA provides the IHT definition:

> In this Act "settlor", in relation to a settlement, includes[18] any person by whom the settlement was made directly or indirectly, and in particular (but without prejudice to the generality of the preceding words) includes

15 "Means" in s.620(1) is the term used for an exhaustive definition. The context shows that the words "is treated as" in s.620(2)(3) also constitute an exhaustive (not inclusive) definition.

16 The words "entered into" are not found in the CGT s.86 or IHT definitions of "settlor". The reason is that (in the context of the settlement-arrangement definition) the word "settlement" includes an agreement or arrangement. One is said to "enter into" an agreement or arrangement even though it is not normal usage to say that one "enters into" a settlement (in the classic sense).
The drafter of the standard IT/CGT definition did not realise this, so they included the words infelicitously, though no harm is done.

17 In practice HMRC may ignore this. TSE Manual formerly provides at 4120: "In practice if someone has undertaken to provide funds, but actually does not, we would not seek to apply s.624 or s.629 ITTOIA." The passage was quietly deleted in February 2011, but with no announcement of a change of practice. Undertakings to provide funds are not found in practice so this has no practical relevance. The IHT and CGT s.86 definitions omits this, presumably it was thought to be unnecessary. The drafter of the standard IT/CGT definition included the words; if they had thought about this they would probably have omitted them, but no harm is done.

18 The IHT definition (unlike the other definitions) uses the non-exhaustive "includes". Perhaps the drafter of the IHT provision had in mind a case where a person was the "settlor" of a settlement in the natural sense of the word but was not within the IHT definition. I cannot think of such a case.

> any person who has provided funds directly or indirectly for the purpose of or in connection with the settlement or has made with any other person a reciprocal arrangement for that other person to make the settlement.

The IHT definition expands "for the purpose of the settlement" into "for the purpose of *or in connection with* the settlement". It is considered that the words make no difference, for if something is provided "in connection with" a settlement it must be provided "for the purposes of" the settlement; one must bear in mind that "purpose" does not need to be a very focussed or intense purpose.[19] The attraction of this view is that it makes the "who is the settlor" area of tax law more coherent if (so far as possible) the same test applies for all the taxes.[20]

There are specific IHT provisions which may affect the identity of the settlement and settlor for IHT. So sometimes a person who is the actual settlor in the general sense is not regarded as the settlor for IHT. This chapter considers the general sense of settlor; for the IHT provisions see 55.1 (Transfers between trusts).

### 69.3.5 *CGT s.86 definition of settlor*

TCGA Schedule 5 paras 7, 8 provide the CGT s.86 definition:

> *Meaning of "settlor"*
> 7 For the purposes of section 86 and this Schedule, a person is a settlor in relation to a settlement if the settled property consists of or includes property originating from him.
> *Meaning of "originating"*
> 8– (1) References in section 86 and this Schedule to property originating from a person are references to—

---

19 See 69.24 (Purpose: minor settlor).

20 Why then did the drafter use a different form of words, if they wanted the same result? Perhaps the reason is that "settlement" for IHT is narrower than settlement-arrangement. The drafter may have considered cases where it may have been argued that A is a settlor of a settlement-arrangement (providing property for the purpose of the *arrangement*) but A is not a settlor for IHT purposes (not providing for the purposes of the IHT settlement). For instance in *Crossland v Hawkins* the taxpayer would have accepted that he was the settlor of the "arrangement" but (unsuccessfully) denied being the settlor of the classic settlement. To anticipate such arguments the drafter added the words "or in connection with".

> (a) property provided by that person;
> (b) property representing property falling within para (a) above;
> (c) so much of any property representing both property falling within para (a) above and other property as, on a just apportionment, can be taken to represent property so falling.
>
> ...
>
> (3) Where a person who is a settlor in relation to a settlement makes reciprocal arrangements with another person for the provision of property or income, for the purposes of this paragraph—
> (a) property or income provided by the other person in pursuance of the arrangements shall be treated as provided by the settlor, but
> (b) property or income provided by the settlor in pursuance of the arrangements shall be treated as provided by the other person (and not by the settlor).
>
> ...
>
> (6) For the purposes of this paragraph references to property representing other property include references to property representing accumulated income from that other property.
> (7) For the purposes of this paragraph property or income is provided by a person if it is provided directly or indirectly by the person.

The CGT s.86 definition does not have the words "for the purpose of the settlement". Instead what is provided must be the "settled property". This is slightly narrower. What is provided must necessarily be for the purpose of the settlement (or it would not become settled property).

Very similar to this definition is para 9(3) sch 5 TCGA, which sets out one of the conditions for a "qualifying settlement" (in short, a settlement which falls within the scope of s.86 TCGA as extended in 1998):

> The first condition is that on or after 19th March 1991 property or income is provided directly or indirectly for the purposes of the settlement;[21]

HMRC guidance on para 9(3) (which is quite extensive) is therefore

21 For completeness, the provision continues:
"(a) otherwise than under a transaction entered into at arm's length, and
(b) otherwise than in pursuance of a liability incurred by any person before that date but if the settlement's expenses relating to administration and taxation for a year of assessment exceed its income for the year, property or income provided towards meeting those expenses shall be ignored for the purposes of this condition if the value of the property or income so provided does not exceed the difference between the amount of those expenses and the amount of the settlement's income for the year."
But that is not relevant for the purposes of this chapter.

relevant to the definitions of settlor more generally.

### 69.3.6 *Person ceasing to be settlor*

Section 469 ITA provides for someone to cease to be a settlor:

> **Person ceasing to be a settlor**
> (1) A person ("S") who is a settlor in relation to a settlement ceases to be so when the following condition is met.
> (2) The condition is that—
> (a) no property of which S is the settlor[22] is comprised in the settlement,
> (b) S has not undertaken to provide property (directly or indirectly) for the purposes of the settlement in the future, and
> (c) S has not made reciprocal arrangements with another person for that other person to enter into the settlement in the future.[23]

This section is not expressed to apply only to the standard IT/CGT definition of settlor, so it is considered that it also applies to the settlement-arrangement definition.

This has no equivalent in the IHT definition of "settlor", though (if it mattered) it might, perhaps, be implied.

The CG manual provides:

> **33245 Settlor: from 6 April 2006: Basic principles** [November 2009]
> [The Manual paraphrases s.469 ITA and continues:] For example A and B execute a deed of variation under which property left to them by their father's will is resettled on behalf of their children. Broadly speaking

22 Section 467(2) ITA provides a commonsense definition of this expression:
"In the Income Tax Acts (except where the context otherwise requires) a person is a settlor of property if—
(a) the property is settled property because of—
(i) the person's having made the settlement, or
(ii) an event which leads to the person being treated by this Chapter as having made the settlement, or
(b) the property derives from settled property within paragraph (a)."
This expression is defined for the purposes of the IT Acts, but it is only used here in s.469 apart from the (unimportant) IoV provisions.
The CGT equivalent is s.68A(1)(b) TCGA.

23 The CGT equivalent is s.68A(6) TCGA.

half the income and capital is held for the children of A and the other half for the children of B. From the time the variation is made, A and B are settlors of the settlement (see CG 33248). In due course the share relating to A's children has been wholly distributed. In this case we should say that A was no longer a settlor.

### 69.3.7 *Relevance of case law and HMRC statements*

In keeping with the patchwork nature of UK tax law, the three definitions of settlor are based on a common framework but they each have slight differences to the others. The settlement-arrangement definition originated in 1936 and is the ancestor of the other definitions. In IHT there has been a little tidying up of the settlement-arrangement definition; the CGT s.86 definition is perhaps an attempt to extract its essence. There is a single concept underlying all the definitions which also represents the normal meaning of "settlor" in trust law.[24] In most cases the differences in wording between the definitions do not matter.

Cases on one statutory provision will generally be relevant to them all. Similarly, HMRC statements made in connection with one provision are generally applicable to the other provisions.

There is also a link between the concept of bounty which is a requirement of a settlement-arrangement and the concept of providing property for the purposes of a settlement, so cases discussing "settlement-arrangement" can also be relevant to the question of who is the settlor.[25]

There are circumstances where a person is a settlor of a settlement-arrangement but not the settlor of the classic settlement but this is not because of differences in the definitions of "settlor": it is because the of differences in the definitions of "settlement".[26]

### 69.3.8 *Two settlors*

A trust may have two settlors in various circumstances:

(1) A provides property and B provides other property.

(2) A provides property and B has "made" or "entered into" the

---

24 Contrast the definition in Article 1 Trusts (Jersey) Law 1984 ("a person who provides trust property or makes a testamentary disposition on trust or to a trust").

25 See 69.2.3 (Settlement-arrangement definition of "settlement").

26 See 69.9 (Assignment or surrender of equitable interest).

settlement without providing property.

(3) Possibly, if A provides property directly and B provides the same property indirectly.[27]

The consequences are discussed in 24.8 (Two or more settlors**);** 44.12 (Two settlors for CGT s.86 charge); 55.4 (The separate settlements fiction).

### 69.3.9 *Tainting*

It does not generally matter if a person provides a trivial amount of property to a trust (whether the settlor adding to the trust or a third person adding to a trust made by another.) But occasionally penal tax rules apply if even trivial value is added. This is known as "**tainting**" a trust.

The most common examples are:

(1) A post-1991 provision of funds to a pre-1991 trust may lose the benefit of 1991 transitional relief for s.86 TCGA: Schedule 5 para 9(3).

(2) A provisions of funds by a UK domiciled person will lose the benefit of 1998 transitional relief for s.87.[28]

(3) A provision of funds by a UK-linked person may lose a beneficial mixed resident trustee rule for trustee residence.[29]

In these cases, the question of when funds are provided may also arise.

### 69.3.10 *Commentary*

Three definitions of "settlement" seems complicated, but there are material differences between them and each definition is appropriate in its own context. However, four definitions of "settlor" is extravagant, for there is little difference between them.

A rational tax system would have one standard definition of settlor, which would apply for all taxes. Until 2006 we had a number of definitions of settlor in different contexts, which had developed piecemeal as the tax system evolved. The FA 2006 introduced the standard IT/CGT definition but only applied it for some (not all) purposes of IT and CGT. It has therefore increased the number of definitions of "settlor" and made

27 See 69.4 (Gift from A to B followed by gift to trust by B)

28 See 45.21 (1998 transitional relief).

29 See 4.7 (Trustee residence condition C).

a complex situation rather more complex. This is particularly curious because the authors of the proposals were emphatic that the two former definitions of trustee residence (a CGT and an IT definition) should be replaced by a single definition. We live in bad times for UK tax policy, but eventually, perhaps, someone will tidy up this mess. It would not be very hard to introduce a single definition.

## 69.4 Gift from A to B followed by gift to trust by B

Suppose:
(1) A gives property to B unconditionally;[30] and
(2) B gives the same[31] property to a trust.
Two "settlor" questions arise:[32]
(1) In what circumstances does one say that the A is the settlor of the trust, having provided the property indirectly? That is, what is the meaning of "providing indirectly"?
(2) If A is the settlor (having provided property indirectly), can one say that B is not a settlor, perhaps on the grounds that A is the "real" settlor?
One might expect to find guidance to these questions in *Hatton v IRC*.[33] The facts were as follows:
(1) Mrs Cole ("the mother") made a settlement ("the first settlement") conferring on her daughter Mrs Hatton a valuable equitable interest.
(2) The daughter transferred her interest to a new settlement ("the second settlement").

30 It is different if the gift from A to B is made on terms which require B to transfer the property to the trust. It is also different if *Furniss v Dawson* applies. In those cases, clearly:
(1) A would be the settlor,
(2) B would not be a settlor.
It is also different if the gift from A to B is made by instrument of variation: see (Trust made by instrument of variation).
31 Similar points arise if B gives other property (not the property given by A) if this is part of the arrangement between A and B.
32 Other issues may also arise. If A is a beneficiary of the trust, A's gift to B may become a gift with reservation: see 54.5.2 (Gift from A to B followed by gift to trust by B). Note that even if A is a settlor of the discretionary trust, A has not made a chargeable transfer and no IHT is payable by A on the gift to the trust by B.
33 67 TC 759. For another aspect of this decision see 69.25 (Purpose: advisers and agents of settlor).

So this was in essence a case of a gift to B followed by gift to trust by B. It is important to note the background facts:

> Once the first settlement had been executed ... it was a virtual certainty that the second would be made on the following day provided that [the mother] was then still living.[34]

### 69.4.1 *When is A an indirect settlor?*

The Special Commissioners found:

> [the mother] was a settlor of the second settlement having directly or indirectly provided the only funds which were subjected to it.[35]

Chadwick J held (67 TC at 789):

> The Special Commissioners ... held that [the mother] was properly to be treated as a settlor of the second settlement on the ground that, by making the first settlement, [the mother] was a person who had provided funds directly or indirectly for the purpose of or in connection with the second settlement; and so, in relation to the second settlement, fell within the definition [of settlor]. In my view, they were entitled to reach that conclusion on the facts.

*Hatton* represents a relatively clear case of providing funds indirectly because the two gifts (from A to B and from B to the trust) were part of a pre-planned scheme and it was a "virtual certainty" that the second gift would follow the first. Are these essential requirements? The Special Commissioners, and the court, did not address this crucial point.

It is clearly not sufficient that B's funds are historically derived from A. Something more is required, but what? It might be said that all paraphrases are suspect and the court must return to the words of the statute. But when the words are so vague, some gloss is necessary to

---

34 67 TC at 771. The Special Commissioners added:

> [The daughter] was content to leave the details to [the mother's advisers]. There was no real likelihood that she would reject the suggestion that she should make the second settlement when Mr Willcox [her adviser] put it to her.

> But nothing turns on that.

35 At p.768G.

avoid hopeless uncertainty. At first sight, the concept of a "clean break" seems a useful one for determining whether property is provided indirectly. That is, if there is a clean break between A's gift and B's gift, A has not provided property indirectly. But "clean break" is only a metaphor which itself needs elucidation. It is not much more than a colourful label. It is suggested that A is a settlor (having provided property indirectly) only if (like *Hatton*) there is an arrangement under which:

(1) A makes a gift of property to B, and intends that B should promptly make the gift to the trust.
(2) B gives the property to a trust in fulfilment of the wishes of A.
(3) It is virtually certain that B's gift will be made.

Of course, this formulation will not solve all problems, since the questions may arise as to whether there is an "arrangement", what is A's intention and whether B makes a gift in fulfilment of A's wishes. But this is perhaps the best that can be done. It is consistent with the "conscious association" comments in *Fitzwilliam*.[36] It might be said that this is too narrow a test and it favours the taxpayer as it allows tax planning of the kind considered in 69.33 (Planning to create trust with foreign domiciled settlor). However, the planning is not all that easy! No looser test can be applied without considerable uncertainty. Moreover (see below), the consequences of A being an indirect settlor is that B is not a settlor; this strongly suggests a narrower test is appropriate for if B is a genuinely independent agent B should be the settlor.

### 69.4.2 *If A is indirect settlor, is B also the settlor?*

In *Hatton* the Special Commissioners held that the daughter did not provide the funds for the second settlement.[37] The reason was, it appears, that the mother had provided the funds indirectly and this excluded the possibility that the daughter had provided them.

Chadwick J held on the appeal that it was immaterial (for the purposes of the IHT provisions being considered) whether the daughter was also a

36 See 69.6 (Appointment from old trust to B followed by gift to new trust by B).

37 Page 768 at H. Confusingly, the Special Commissioners also say that the daughter *was* a settlor within the IHT definition. The reason, presumably, is that, although she did not provide property, she was a person by whom the second settlement was made. But nothing turns on that.

settlor of the settlement.[38] The general tenor of the judge's comments seems to have been that the daughter was a settlor. His comments on this point were ambiguous[39] and, in our system of precedent, it is wrong to carefully weigh up ambiguous *obiter dicta* in order to extract a view.

Approaching the matter as one of principle, untrammelled by authority, it is respectfully suggested that the Special Commissioners' approach is to be preferred. While as a matter of logic it is possible for A to provide property indirectly, and B to provide it directly, the legislation is framed on the basis that trust property can have only one "provider". This is clearly the case for the IT and CGT settlement provisions.[40] It is suggested that the IHT definition should be construed consistently. If property is provided indirectly by A, it should not be regarded as provided by B at all.

### 69.4.3 *HMRC views*

TSEM 4300 [April 2010] provides:

> **Example 15– children –indirect gift of shares from parent**
> Mr J owns all 100 issued £1 shares in J Limited. Mr J is the sole company director and is the person responsible for making all the company's profits because of his knowledge, expertise and hard work. On starting up the company, Mr J allowed his mother to subscribe £40 for 40% of the shares but *shortly afterwards* she gifted them to her grandchildren. The circumstances are such that the decision to issue 40 shares at par is a bounteous arrangement (as were the shares in *Jones v Garnett*).

This is essentially a case of:
(1) A gift from Mr J to the grandmother; and
(2) A gift from the grandmother to the grandchildren.
The Manual's tax analysis is as follows:

> The true settlor here is Mr J *rather than the children's grandmother.*

---

38 Page 791 at B.

39 The conclusion that the mother was a settlor "did not lead, necessarily, to the further conclusion that [the daughter] was not also a settlor". See p.791 at B.

40 Otherwise there would be double taxation, for under s.644(1) ITTOIA, A and B would both be taxed in full on the income, which cannot be correct. Likewise for CGT: para 9 Sch 5 TCGA.

> Section 629 therefore applies and attributes the dividends received by the children to Mr J for tax purposes.

The words in italics suggest that HMRC accept the views set out above.

## 69.5 Trust created by B at request of A

> Suppose that a man owing a debt of honour or of gratitude to a friend, without any legal obligation proposed to discharge it by paying £1,000 to the friend, and that the latter asks that the sum be paid not to him but to the trustees of a settlement, which is done. The payment of the money to the trustees would obviously be a provision of funds for the settlement. On a purely objective view the payer could be said to have made that provision, but I think that the friend should properly be regarded as the person making this provision. It would be just as if the money had been first paid to him and then paid by him to the trustees. *The payer would have acted at his behest.*[41]

This *obiter* comment is right if (as Buckley LJ assumes) the payer agrees (albeit without legal obligation) to make the payment at the direction of the friend so that the friend has *de facto* (though not *de jure*) power of disposition of the funds. The situation is different if a father proposed to make a gift to his son, and the son merely *asks* that the sum be paid to trustees of a settlement for himself and his family. For a father will feel moral obligations to his grandchildren as well as to his son; the father has no (even non-binding) obligation to make a payment to his son; the son has no *de facto* power of disposition over the funds; in such circumstances the father (not the son) is the settlor. The son has not provided funds even indirectly.

If A asks B to transfer a nominal sum as an initial trust fund, and B does so, not because B wishes to benefit the beneficiaries by the payment, but because A has asked B to, as a favour to A, then applying this principle, A is the (indirect) settlor.

## 69.6 Appointment from old trust to B followed by gift to new trust by B

*Fitzwilliam v IRC* 67 TC 614 concerned an arrangement under which:

41 *Mills v IRC* 49 TC at 387 (Buckley LJ).

(1) Trustees of a will trust exercised their power of appointment ("step 3") to confer a valuable equitable interest on Lady Hastings.
(2) Lady Hastings transferred this interest to a new trust a few days later ("step 5").

So this was a relatively simple case of an appointment from the will trust to B followed by a gift to a new trust by B. The question was who was the settlor of the new trust: Lady Hastings or the testator of the will trust (or both). Lord Keith said:

> The argument for the Crown is that, by virtue of the appointment contained in step 3, property was provided to Lady Hastings directly or indirectly for the purpose of or in connection with the settlement which Lady Hastings later made under step 5. The person who provided that property is said to be Earl Fitzwilliam [the testator], because the appointment by the trustees falls to be read back into his will, under the principle of *Muir v Muir* [1943] AC 468 and *Pilkington v IRC* [1964] AC 612. These cases decided that for the purposes of the Scottish rule against successive liferents and the English rule against perpetuities the exercise of a power of appointment must be written into the instrument creating the power. Earl Fitzwilliam is, therefore, to be treated as the settlor so far as concerns the trust purposes contained in the appointment made by his trustees under step 3, but he cannot reasonably be regarded as having provided property directly or indirectly for the purpose of or in connection with the settlement made by Lady Hastings under step 5.
>
> The words "for the purpose of or in connection with" connote that there must *at least be a conscious association of the provider of the funds* with the settlement in question. It is clearly not sufficient that the settled funds should historically have been derived from the provider of them. If it were otherwise anyone who gave funds unconditionally to another which that other later settled would fall to be treated as the settlor or as a settlor of the funds. It is clear that in the present situation there cannot possibly have been any conscious association of Earl Fitzwilliam with Lady Hastings' settlement.

*(Fitzwilliam v IRC* 67 TC at 732, emphasis added)

It seems therefore that if:

(1) a trust ("trust A") exists and A is its settlor;
(2) there is an arrangement under which:
    (a) the trustees of trust A appoint trust property to B;
    (b) B gives the property to a separate trust ("trust B");

B will be the settlor of trust B, and A will not be a settlor, unless the creation of trust B is envisaged by A at the time that trust A is made.

The "conscious association" test is an understandable and generally helpful paraphrase of the statutory words (though of course it does not solve much as the question may arise as to what is a "conscious association". Further, Lord Keith said there must *at least* be a conscious association, suggesting that it is a necessary, but may not be a sufficient, condition). The application of the conscious association test in the context of an appointment followed by a gift really is surprising, but the House of Lords have spoken. The matter is for most practical purposes ended – unless and until the House of Lords speak again. For implications for tax planning, see 69.33 (Planning to create settlement with foreign domiciled settlor).

## 69.7 Transfer from trust A to trust B by exercise of trustees' power

This section considers the general sense of settlor. Special rules apply for IHT: see 55.1 (Transfers between trusts – Introduction).

### 69.7.1 *Transfer from trust A to new trust created by trustees*

Suppose:

(1) Trustees of a trust made by A ("Trust A") have power to transfer to a new trust.

(2) The trustees transfer the trust fund to new trustees to hold on the terms of a newly created trust, Trust B. All the funds of Trust B are derived from Trust A.

Who is the settlor (in the general sense) of Trust B? The trustees of Trust A cannot be the "settlor" as they have merely exercised a fiduciary power. So either A is the settlor or there is no settlor.[42] The answer is that A is the settlor of Trust B. In *Eilbeck v Rawling* 54 TC 101:

(1) a Gibraltar settlement ("Trust A") made by "Settlor A" held £600,000;

(2) a Jersey settlement ("Trust B") made by "Settlor B" held £100;

(3) £315,000 was transferred from Trust A to Trust B by exercise of the trustees' powers.

---

42 If at the time of the creation of Trust A, the transfer to Trust B is already in contemplation, then A is the settlor of Trust B. It is here assumed that the transfer was not in contemplation at the time of the creation of Trust A.

Buckley LJ said at p.161:

> The donee of a special power of appointment is charged with the exercise of a personal discretion which he cannot delegate. When he exercises that discretion in making an appointment, he acts as the delegate of the settlor. What the donee does in exercise of a special power of appointment is done vicariously by the settlor. It is also settled law of long standing that, for the purposes of the rule against perpetuities, when a special power is exercised, the limitations created under it are to be written into the instrument which created the power. This association of the interests arising under an appointment in the exercise of a special power with the settlement conferring that power is not, in my opinion, confined to the rule against perpetuities. If one asks who was the settlor of the £315,000 appointed by the appointment of 27 March 1975, the only possible answer is [Settlor A] the settlor of the £600,000 comprised in the Gibraltar settlement [Trust A]. The taxpayer's brother [Settlor B] did not settle[43] the £315,000; he settled only £100. The Gibraltar trustee [the trustees of Trust A] did not settle the £315,000; it was not the Gibraltar trustee's to settle, and making the appointment the Gibraltar trustee was only exercising a fiduciary power conferred on him by the Gibraltar settlor [Settlor A], whose delegate he was as donee of the power. The exercise of the power had, in my opinion, precisely the same effect as if the Gibraltar trustee had appointed the £315,000 in favour of the Jersey trustee to be held upon trusts identical with the trusts of the Jersey settlement [Trust B] but set out in extenso in the appointment without reference to the Jersey settlement. If the appointment had taken that form, there could, I think, be no doubt that the trusts so appointed would be trusts taking effect under the Gibraltar settlement.

The House of Lords approved this reasoning on appeal.[44]

---

43 Buckley is using the word "settle" as a paraphrase of the statutory word "provide".

44 It may be objected that this is not consistent with *Fitzwilliam*: see 69.6 (Appointment from old trust to B followed by gift to new trust by B). There is no "conscious association" between A and Trust B. However, *Fitzwilliam* was a case where the Court found that an individual beneficiary who assigned an asset to the new trust was the "settlor". The beneficiary displaced the testator from being a settlor by their independent act. There is no equivalent here.
The alternative conclusion that Trust B has no settlor for general tax purposes would have the result, attractive to taxpayers but absurd, that A might escape CGT on trust income and gains under the settlement provisions. The property in Trust B could be

HMRC agree. The CG Manual provides:

> **33241 Settlor** [November 2009]
> Where trustees exercise a special power of appointment, or power of advancement, in such a way as to create a new settlement, see CG33800+, the settlor of the new settlement is the person who was the settlor of the old one. See, for example, *Pilkington v IRC*, 40 TC 416, p.442[45] and *Chinn v Collins*, 54 TC 311, p.351H.

The same point is made again at 34802.

It is considered that the same applies to a transfer for less than full consideration made in exercise of trustees dispositive powers, eg an interest-free loan from trust A to trust B.

### 69.7.2 *Transfer from trust A to existing trust made by B*

Suppose:

(1) A transfers property ("A's fund") to a trust ("trust A"). The trustees have the standard power to transfer property to another trust.

(2) B transfers property ("B's fund") to a separate trust ("trust B").

(3) The trustees of trust A transfer A's fund to trust B.

Trust B now has two settlors: A has provided A's fund indirectly, and B has provided B's fund directly.

### 69.7.3 *IT and CGT rule*

Section 470 ITA provides:[46]

> **Transfers between settlements**
> (1) Section 471 applies in relation to a transfer of property[47] from the

---

excluded property, as one could not say that "the settlor" was domiciled in the UK at the time that the settlement was made! That can hardly be right.

If (which is doubtful) further authority is needed, see *Trennary v West* [2005] STC 214 at [49].

45 [Author's note] See 69.12.2 (Power of advancement).

46 The CGT equivalent is s.68B TCGA.

47 The expression "transfer of property" is defined in s.470(3) ITA:

"(3) In this section 'transfer of property' means—

(a) a disposal of property by the trustees of settlement 1, and

trustees of one settlement ("settlement 1") to the trustees of another settlement ("settlement 2") if the transfer—
(a) is not for full consideration,
(b) is not by way of a bargain made at arm's length, and
(c) is not excluded by subsection (2).

Section 470(2) ITA sets out three exceptions:

A transfer of property is excluded for the purposes of subsection (1) if—
(a) it occurs only because of the assignment by a beneficiary under settlement 1 of an interest in that settlement to the trustees of settlement 2,
(b) it occurs only because of the exercise of a general power of appointment, or
(c) section 473(4) applies in relation to it.[48]

In short, s.741 applies on a transfer between trusts by exercise of a trustee's power.

This takes us to s.471 ITA:

**Identification of settlor following transfer covered by section 470**
(1) If there is a transfer of property in relation to which this section applies, then the following subsections apply for the purposes of the Income Tax Acts, except so far as, in those Acts, the context otherwise requires.
(2) The settlor (or each settlor) of the property disposed of by the trustees of settlement 1 ("the disposed property") is treated from the time of the disposal as having made settlement 2.
(3) If there is more than one settlor of the disposed property, each of them is treated in relation to settlement 2 as the settlor of a proportionate part of the property acquired by the trustees of settlement 2 on the disposal.
(4) So far as the disposed property—

---

(b) the acquisition by the trustees of settlement 2 of—
(i) property disposed of by the trustees of settlement 1, or
(ii) property created by the disposal.
(4) For the purposes of subsection (3) there is an acquisition or disposal of property if there would be an acquisition or disposal of property for the purposes of TCGA 1992."

48 For this exception see (IT and CGT – IoVs from 6 April 2006).

(a) was provided for the purposes of settlement 1, or
(b) was derived from property so provided,
the property acquired by the trustees of settlement 2 on the disposal is treated from the time of the disposal as having been provided for the purposes of settlement 2.
(5) If as a result of subsection (4), property ("the transferred property") is treated as having been provided for the purposes of settlement 2—
(a) the person who provided the disposed property, or the property from which it was derived, for the purposes of settlement 1 is treated as having provided the transferred property for the purposes of settlement 2, and
(b) if more than one person provided the disposed property, or the property from which it was derived, for the purposes of settlement 1, each of them is treated as having provided a proportionate part of the transferred property for the purposes of settlement 2.

This applies for IT and CGT purposes. But it is considered that this only codifies the general law position, so there is no difference here between IT/CGT and IHT. HMRC agree. The CG Manual provides:

**33247 Settlor: from 6 April 2006: Transfer between settlements** [November 2009]
This section is concerned with the situation where the trustees of Settlement 1 ["S1"] transfer property to the trustees of Settlement 2 ["S2"], including cases where property is created by Settlement 1 on behalf of Settlement 2, such as the grant of a lease by the trustees of Settlement 1 to the trustees of Settlement 2.
Unless the transfer is for full consideration, or by way of a bargain at arm's length Section 68B TCGA applies. The reason for having these two alternatives is to allow for the possibility that Settlement 1 and Settlement 2 are connected persons (so that any transaction between them is not at arm's length by virtue of Section 18 TCGA 1992), and Settlement 1 sells an asset to Settlement 2 for its full market value. In such a case we do not want section 18 to cause section 68B to apply.
It is not unusual for trustees to appoint or advance assets to a newly created trust. See for example *Hart v Briscoe* 52 TC 53. Courts have said, see for example *Chinn v Collins* 54 TC 311, that the trustees in such a situation are perfecting the settlor's original gift in settlement. Therefore in such a case section 68B has the effect that it is the original settlor of Settlement 1 who is the settlor of Settlement 2. The property is treated as having been provided for the purposes of Settlement 2.
However there are three specific cases which are excluded.

> [1] A beneficiary, B, of Settlement 1 may transfer to Settlement 2 his interest in Settlement 1. In this case it is B who is the settlor (or an additional settlor) of Settlement 2.
> [2] Under the terms of Settlement 1 D may have a general power of appointment. If so D is the settlor (or additional settlor) of Settlement 2.
> [3] If section 68C(6) applies (see CG 33248).
> It is not considered that section 68B effected any change in the law.

## 69.8 Disclaimer

TSEM states at 1840:

> The person disclaiming is not a "settlor" within [the settlement-arrangement definition] (TSEM4120). Subsequent trusts that result from the disclaimer retain their original settlor.

A disclaimer, if possible, may be preferable to a surrender or assignment. The distinction between a disclaimer and a surrender/assignment is therefore important. This raises questions of trust law which cannot be fully discussed here, but for a broad outline see TSEM para 1840 [January 2008]:

> A person uses a true disclaimer to refuse a gift due under a trust. Effectively the person steps aside. This allows subsequent provisions of the trust to take effect.
> A disclaimer can relate to
> - capital
> - income
> - both.
>
> A disclaimer has retrospective effect. It applies from the date that the entitlement arose. There may be a lapse of time between the entitlement arising and the disclaimer. This is not conclusive evidence that the deed cannot be a true disclaimer. ...
> The person making a disclaimer may still benefit from another part of the trust income or capital. This is irrelevant. If that person seeks to impose new trusts, the deed is not a disclaimer. It is an assignment (TSEM1845).

It sometimes happens that a will creates a trust but a spouse or child has forced heirship rights (in Scotland known as legitim and elsewhere, legitime) which if exercised would override the trust. A disclaimer of those rights does not make the spouse or child a settlor. This is consistent with the policy of s.142 IHTA which provides that the disclaimer is (in short) not subject to IHT. The same would apply in England to a person who chose not to exercise rights under the Inheritance (Provision for Family and Dependants) Act 1975.

## 69.9 Assignment or surrender of equitable interest

A person who assigns an equitable interest under Trust A to Trust B is the settlor of Trust B but does not of course become the settlor of Trust A.

If a person surrenders an equitable interest under Trust A there is no "Trust B". In that case, that person is the settlor for the settlement-arrangement definition[49] so far as they have provided the income, but they are not a settlor of Trust A for the IHT definition, the CGT s.86 definition, or the standard IT/CGT definition. Similarly if a person assigns an equitable interest to another individual.

HMRC agree: CG Manual 33242 provides:

> **Settlor: Up to 5 April 2006** [November 2009]
> Normally the same person was the settlor for both Income Tax and CGT. But this is not the case where a person has assigned a right to income. Such an assignment could not have affected the identity of the settlor for CGT purposes.

The CG Manual also provides:

> **34801. Meaning of settlor** [August 2007]
> In general if HMRC Trusts Head Office Bootle or Edinburgh, or their predecessors Financial Intermediaries and Claims Office or Claims Branch have advised or ruled that a person is the settlor for Part XV ICTA 1988 or Part 5 Chapter 5 ITTOIA2005 purposes then the same person should be regarded as the settlor for the purposes of these provisions. In exceptional cases, eg the assignment of a life interest, a person may have settled a right to income under an existing settlement without thereby creating a new settlement for CGT purposes. Although the Income Tax Settlements Legislation may apply as regards that income, that person is not thereby a settlor of the main settlement.

49 *IRC v Buchanan* 37 TC 362.

The position is similar to a variation of trust by beneficiaries; see below.

## 69.10 Variation or resettlement by beneficiaries

### 69.10.1 *Trust law background*

Beneficiaries who are adult and absolutely entitled to trust property[50] may:
(1) create a new settlement ("a resettlement") or
(2) (with the consent of the trustees) vary the terms of an existing settlement ("a variation").[51]

The distinction between a variation and a resettlement is crucial, but careful drafting will normally achieve whichever is desired.

HMRC agree. The CG Manual provides:

> **Variations of trusts**
> **37880. By agreement**
> If all the beneficiaries of the trust are 18 or over and agree, they may bring it to an end and share out between themselves (and others) the trust property. (There is an exception to this rule in Scotland in that a person with an alimentary liferent cannot exercise consent in this way.) In these circumstances there is a deemed

50 If there are minor and unborn beneficiaries, a variation can similarly be made with the consent of the court under the VTA 1958.

51 See s.1(1) VTA 1958 which assumes that beneficiaries have power to vary a trust:

> "Where property...is held on trusts arising...under any will, settlement or other disposition, the court may if it thinks fit by order approve on behalf of [unborn or unascertained beneficiaries] any arrangement ... *varying* or revoking all or any of the trusts, or enlarging the powers of the trustees of managing or administering any of the property subject to the trusts. ..."

This assumes that the Court only approves on behalf of unborn or unascertained beneficiaries, and adult beneficiaries can make a variation without the approval of the Court. See *Re Holt* [1969] 1 Ch 100 at p.120:

> "Under an arrangement approved by the court [under the Variation of Trusts Act 1958] the trusts may be brought wholly to an end. On the other hand, they may be varied; and there is no limit, other than the discretion of the court and the agreement of the parties, to the variation which may be made. Any variation owes its authority not to anything in the initial settlement but to the statute and the consent of the adults coming, as it were, ab extra. *This certainly seems to be so in any case not within the Act where a variation or resettlement is made under the doctrine of Saunders v. Vautier by all the adults joining together*; and I cannot see any real difference in principle in a case where the court exercises its jurisdiction on behalf of the infants under the Act of 1958."

disposal by the trustees of the whole of the settled property under TCGA 1992, s.71(1).

**37881.**

It is also possible, with the consent of the trustees, to vary the terms of the trust. There are all kinds of variation possible. Some property may pass absolutely to beneficiaries or existing separate settlements. Clearly this must involve disposals under TCGA 1992,s. 71(1). Other property is held on the same trusts as before and/or on different trusts.

**37882.**

In such circumstances it is necessary to consider, in the light of the principles set out in the preceding paragraphs and also CG33290-33304, what the correct analysis is. The alternatives are

[1] mere variation of the terms of the existing settlement

[2] continuation of the old settlement as regards part of the property, with the remainder being held on one or more new settlements

[3] termination of the old settlement in its entirety being replaced by one or more new settlements. This last is an unlikely analysis unless a significant part of the property is being distributed absolutely. In such circumstances it may be helpful to refer to *Ewart v Taylor* where one reason for the court holding that a new settlement had come into existence was that it was part of a scheme for winding up the old settlement. See 57 TC 401 at 468, Section I.

...

**37883. Under Variation of Trusts Act**

The trusts of an existing settlement may be varied (in particular when the interests of unborn or minor beneficiaries are involved) by way of an Arrangement agreed between those parties of full age and approved by a Court Order under the Variation of Trusts Act 1958 (in Scotland Section 1 Trusts (Scotland) Act 1961) on behalf of those unable to give consent.

**37884.**

If so the principles of CG37880 –CG37882 apply. The degree of variation may exceptionally be such as to involve the termination of the original settlement in whole or in part and the creation of a new settlement. The fact that the courts may only consent to variation of the trusts does not prevent this. (If so then consideration must be given to the identity of the settlor, see CG37900.) A variation may also cause a beneficiary to become absolutely entitled to assets as against the trustees. ...

**37886. Instrument of variation of will or intestacy** [August 2007]

It is quite common for instruments of variation of wills or intestacies to be executed within two years of the testator's (or intestate's) death. In England & Wales the usual form of the instrument is a deed. The general guidance is at IHTM35011+ and guidance on CGT at CG31600+. If an instrument of variation creates a continuing trust which replaces absolute interests in the original will, and there is no statement of intent in the deed or before 1 August 2002 no election, under Section 62(7) TCGA 1992, or its predecessor Section 49(7) CGTA 1979, the person who gives up the absolute interest in favour of the trustees is to be regarded as the settlor for the purposes of the annual exempt amount and Section 77 TCGA 1992. His personal position is considered at CG32000+, assuming the variation is gratuitous.

This is obviously correct. The Manual then turns to our situation:

**37887.** [August 2007]
If, however, in a case where there is no such election or statement of intent, the will or intestacy provided for property to be held subject to trusts, and these trusts are varied or replaced by the deed of variation, then there are two questions to be answered.
a. Is there a new separate settlement?
b. If so, who is the settlor of that settlement?
If there are only minor variations clearly there is no new settlement and the deceased remains the settlor. Minor variations would include for instance changes in the administrative powers of the trustees, or the provision of an ultimate gift over, that is, a provision saying to whom the property is to pass if the trusts fail, or the appropriation of property to particular funds within the settlement. Otherwise it is necessary to determine whether there is a new settlement in accordance with the principles explained at CG37882, and see CG37889. If there is a new settlement then the identity of the settlor should be determined in accordance with CG37900. ...
**37889.** [August 2007]
One situation which is quite common is where there is a life interest trust for the spouse of the deceased. For Inheritance Tax reasons this is partly varied so that there is a discretionary trust up to the amount of the Inheritance Tax nil rate band. In such a case, where the spouse continues to be a beneficiary of the new discretionary trust, it would often be appropriate to regard this, except for the purposes of Inheritance Tax, as little more than a cosmetic arrangement, particularly if the broad intention is that the bulk of the income should be paid to the spouse. So this would be regarded for Capital Gains Tax purposes as a variation of the original will trust, and not as giving rise to a new separate settlement. The deceased remains the settlor.

Para 37889 is correct though not for the reason given (which does not bear any examination) but for the reason given in 69.9 (Assignment or surrender of equitable interest).

### 69.10.2 *Tax consequences of resettlement*

A resettlement (unlike a variation) involves a disposal for CGT, and may lose the benefit of IHT relief for transitional serial interests. It also changes the settlor. The CG Manual provides:

> **37900. Identity of settlor**
> Where there is a variation of a trust of the kind described in CG37880+ [variation by beneficiaries] it is necessary to identify the settlor. If the conclusion taken is that there are no new settlements then for CGT purposes the identity of the settlor is unaffected. However if in effect interests in income have passed from one person to another, the former may well be the settlor of an arrangement for Income Tax purposes.
> **37901. Identity of settlor** [August 2007]
> If however one or more new settlements have come into existence, then the settlors of those settlements are one or more of the parties to the variation. The question should be tackled on a practical basis by determining where each beneficiary's share has gone. ...
> **37903. Example** [August 2007]
> Under a settlement made by X, A and B are each entitled to half the income. On A's death his son P gets half absolutely. On B's death her daughter Q gets half absolutely. The values of their respective interests are, say:
>
> | | |
> |---|---|
> | A's life interest | £60,000 [30% total value] |
> | P's remainder | £40,000 [20% total value] |
> | B's life interest | £75,000 [37.5% total value] |
> | Q's remainder | £25,000 [12.5% total value] |
>
> Under the variation, which is considered to terminate the old settlement:
> A takes 30% of the property.
> 20% goes to a new accumulation and maintenance settlement for P's children.
> B takes 25% of the property.
> The rest [25%] is held for Q for life with remainder to Q's son R.
> P should be regarded as the settlor, for the purpose of the annual exempt amount, of the accumulation and maintenance settlement, because this is how his share has been dealt with.
> B and Q equally should be regarded as the settlors of the other settlement. ...

## 69.11 Variation under Variation of Trusts Act 1958

Where a court approves a variation of trust on behalf of a minor beneficiary, under the VTA, it is considered that the minor beneficiary does not become a settlor. The reason is that the court in giving its approval does not merely act on behalf of the minor: the court has a wider role.[52] The position is analogous to trustees exercising a power of advancement.[53] But HMRC do not agree. CG Manual para 37902 provides:

> **Minor as settlor** [August 2007]
> It is considered that where a court has given consent on behalf of a minor, that minor can be a settlor. The authority lies in *Yates v Starkey*, 32 TC 38, where it was held that a person could be a settlor under compulsion, and *Mills v IRC*, 49 TC 367, where it was held that a minor with very little involvement in the transactions could be the settlor because she provided the property.

Neither of these cases justifies the HMRC view.

## 69.12 Exercise of power of appointment or advancement

### 69.12.1 *Special power of appointment*

The exercise of a special power of appointment does not make the appointor a settlor.[54]

### 69.12.2 *Power of advancement*

Where trustees have a power of advancement (that is, a power to apply trust property for the benefit of a beneficiary) they may use that power to

---

52 *Re Steed* [1960] 1 Ch 407; *Re Remnant* [1970] Ch 560. Further consideration is needed if foreign trust laws apply.

53 This view is consistent with the fact that where a Court approves a variation on behalf of an unborn beneficiary, that beneficiary clearly does not become a settlor.

54 This is self-evident, but if authority is needed, see the quotations set out in 69.7.1 (Transfer from trust A to new trust created by trustees).

transfer trust property to a new trust.[55] The consent of that beneficiary is not needed and therefore that beneficiary is not the settlor of the new trusts.

*Pilkington v IRC* concerned a proposal to transfer property to a new settlement by exercise of a power of advancement in favour of a Miss Penelope. Lord Radcliffe said:

> When one asks what person can be regarded as the settlor of Miss Penelope's proposed settlement, I do not see how it is possible to say that she is herself or that the trustees are. She is the passive recipient of the benefit extracted for her from the original trusts; the trustees are merely exercising a fiduciary power in arranging for the desired limitations. It is not their property that constitutes the funds of Miss Penelope's settlement: it is the property subject to trusts by the will of the testator and passed over into the new settlement through the instrumentality of a power which by Statute is made appendant to those trusts.[56]

HMRC agree: see CG 33241 set out in 69.7 (Transfer from trust A to trust B by exercise of trustees' power).

### 69.12.3 *General power of appointment*

A general power of appointment (whether testamentary or not) may be used:
(1) in a manner which creates a new settlement, or
(2) in a manner which merely varies an existing settlement.[57]
In case (1) the appointor is the settlor of the new settlement. In case (2) it is considered that the appointor is not in principle the settlor, but is in the same position as a person who consents to the exercise of a power.

## 69.13 Consent to exercise of power

A trust sometimes provides that the trustees can only exercise a power of appointment with the consent of a particular beneficiary (typically the life

55 See Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010) para 11.11 (Power of advancement used to create new trusts).
56 *Pilkington v IRC* 40 TC 416 at p.442.
57 The position is analogous to 69.10 (Variation or resettlement by beneficiaries).

tenant). If the power of consent is wholly personal (ie proprietary),[58] this raises some intriguing questions. An exposition is made more difficult by the variety of possible circumstances and taxes. In outline the position is as follows:

(1) A gratuitous consent to an appointment which terminates the consentor's interest in trust income probably makes the consentor the settlor, for the purposes of the settlement-arrangement definition. The consentor has provided income for the purpose of the settlement-arrangement because they have effectively given up their right to the income by their consent.[59]

(2) For similar reasons a gratuitous consent to an appointment which terminates the consentor's contingent interest in trust capital probably makes the consentor the settlor, for the purposes of standard IT/CGT and IHT[60] definitions from the time that the contingency is satisfied.

---

58 On this terminology and powers of consent generally see Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010) para 7.33 (Nature of powers of consent).

59 The position is analogous to a person who assigns or surrenders their life interest. The analogy is not exact. In one case the arrangement consists of the assignment alone. In the other case the arrangement consists of the consent and the exercise of the trustees' power of appointment. So in a sense there is an arrangement with two settlors: (i) the consentor and (ii) the (actual) settlor of the classic settlement who conferred the power of appointment on the trustees. But HMRC (or the actual settlor) may plausibly argue that the consentor (not the actual settlor) is taxable under the Settlement Provisions in these circumstances. They may take support from *Braybrooke v Att-Gen* 9 HLC 149 at p.165, accessible on *www.commonlii.org*. (A case on the Succession Duty Act 1853 whose provisions are analogous to the settlement provisions. Since Succession Duty was only abolished in 1949, the drafter of the original settlement provisions doubtless had it in mind.) The ground of the decision in *Braybrooke* was:

> "that, although the estate of the son arose under a joint power of appointment made by his father and himself, and although therefore the father was in a sense one of the settlors, yet he was not a settlor from whom the interest or any part of the interest of the son, in his character of successor, was derived. And the decision shews that, in order to ascertain who is the settlor 'from whom the interest of the successor is derived,' we must inquire, not who are the parties by whose conveyance the estate has been created, but who is the conveying party out of whose estate the interest in question has been derived." See *Att-Gen. v Charlton* (1877) 2 Ex. D. 398 at p.417.

60 It is arguable that the consentor is not a settlor for IHT because the power of consent is a settlement power and so not property for IHT purposes. It is the old question of how far one carries through the deeming provisions. The better view is that one does not carry the deeming that far.

The consentor has provided capital for the purposes of the settlement because they have effectively given up their right to the capital by virtue of their consent.

(3) By contrast, the giving of the consent to an appointment does not make the consentor a settlor (for any purpose) if:
 (a) the consentor had no interest in the trust immediately before giving the consent; or
 (b) the appointment leaves the interest of the consentor in the trust unaffected.[61]

 In these cases the consentor has not provided any property by their consent.

(4) The giving of a consent is probably not a disposal for CGT[62] of:
 (a) the right to consent (even if it is extinguished); or
 (b) the consentor's interest in the trust (even if that is extinguished).

 The contrary is arguable but it would not normally matter.[63]

(5) The giving of the consent is probably not a "disposal" for the purposes of the gift with reservation rule[64] and indeed it is likely that the power of consent is a "settlement power" and so not property for IHT: see s.272 IHTA.

---

61 This is fairly clear from first principles, but some support can be found in two cases. In *Braybrooke* (see above fn) a tenant in tail exercised his power to dispose of the lands entailed, with the consent of the protector. The protector was not the creator of the disposition: "It cannot be argued that a person whose consent is apparently necessary to a disposition, makes that disposition." In *Mills v IRC* the father's consent was apparently thought necessary for Hayley Mills to enter into the arrangements: see 49 TC 367 at p.403. This did not prevent Hayley being a settlor.

62 Under general principles or by virtue of s.24 TCGA (extinction of an asset constituting a disposal).

63 It will matter if the usual CGT exemption on the disposal of an equitable interest does not apply (eg offshore trusts). It could matter if the conditions of TCGA Sch. 4A are satisfied, but that would be unusual.

64 See *Baird v Baird* [1990] 2 AC 548 at 557 [the exercise of a power of appointment] "disposes of no property of the appointor". HMRC agreed. The old CTO Advanced Instruction Manual E.91 provided:

> "Nor should you regard the giving of a consent by a limited owner to the exercise of the power of advancement as the making of a disposition."

This passage does not seem to be in the current IHT Manual. This is one of a number of important statements (deliberately?) culled in the transition from the old to the new Manual. There is no reason to think that HMRC have changed their view.

HMRC do not appear to take any of these points at present; but there is cause for caution. The practical conclusion is that it is in principle better not to make a power of appointment subject to the consent of the life tenant (or any other beneficiary).

## 69.14 Provision of property for company held by trust

HMRC take the view that provision of property to a company wholly owned by a trust is in principle provision of property for the purpose of the trust, and so makes the provider a settlor. SP 5/92 provides:

> 16 The condition in TCGA Sch 5 para 9(3)[65] may be satisfied where property or income is provided to a company in which the trustees are participators.[66]

This is supported by *obiter dicta* in *Crossland v Hawkins* 39 TC at p.506 followed by Goulding J in *IRC v Mills* 49 TC at p.337. It is correct for the standard IT/CGT definition, the settlement-arrangement definition and the IHT definition.

However, for the CGT s.86 definition, the question is not whether a person has provided property for the purpose of the settlement. The question is whether a person has provided *settled* property. So long as the property provided remains property of the company, not property of the trust, this condition is not satisfied.[67]

---

65 The condition is that property is provided directly or indirectly for the purposes of the settlement; see 69.3.5 (CGT s.86 definition of settlor).

66 The SP continues with an exception:

> "Where, however, the transaction is carried out with the sole object of leaving funds within the company for the company's purposes and it can be shown that any indirect benefit to the trust is merely incidental to that object, the transaction is disregarded for the purposes of para 9(3).
>
> 17 Examples of transactions which may be so disregarded are—
> – where another shareholder waives an entitlement to all or part of a dividend; or
> – where a director restricts withdrawals of remuneration voted,
> in order to assist the company's cash flow, and no payments are made, directly or indirectly, to the trustees as a result of this. All relevant factors will be considered in determining whether it is appropriate to apply this practice in a particular case."

67 This view, expressed in earlier editions of this work, is now supported by *Coombes v HMRC* [2008] STC 2984.

### 69.14.1 *Transactions with wholly owned companies*

SP 5/92 para 18 provides:

> In general, transactions between trustees and companies which they, directly or indirectly, wholly own, or between such companies, are outside the scope of TCGA 1992 Sch 5 para 9(3).[68]

This is right. There can be no element of bounty so a wholly owned company cannot "provide" property to its owner, just as shareholders cannot "provide" property to their company.

## 69.15 Provision of services

### 69.15.1 *Services envisaged when settlement made*

In two cases:
(1) a third party created a trust which held a company; and
(2) well-known actors (Jack Hawkins, Hayley Mills) provided services to the company at a substantial undervalue. The company made profits and paid dividends to the trustees.

In both cases there was clearly a settlement; the question was who was the settlor. It was held that the actor was the settlor.[69]

Viscount Dilhorne in *IRC v Mills* 49 TC at 408 considered two situations:
(1) Employees of a company held by trustees contribute by their labour to the profits of the company, and so increase the company's dividends and the income of the settlement.
(2) A stockbroker who gives well founded advice to trustees of a settlement increases the value and income of the settlement.

One might have said that these were not settlors because they provide no

68 The SP sets out a commonsense definition of "wholly owned" and continues with a qualification:
> "This approach may not, however, be taken where, on the facts of a particular case, it appears that the transaction has been entered into solely or mainly for the purposes of obtaining a UK tax advantage."

69 *Crossland v Hawkins* 37 TC 493 approved *Jones v Garnett* 78 TC 1; *IRC v Mills* 49 TC 367. More accurately, the actor was one of the settlors but the contribution by the person who created the trust was ignored as insignificant.

bounty but what if they do act with gratuitous intent? Viscount Dilhorne did not rely on the bounty point:

> The difference between those cases, on the one hand, and *Crossland v Hawkins* and this case [*Mills*], on the other, is that in *Crossland v Hawkins* and in this case funds which ordinarily would have been received by Mr. Hawkins and by Miss Mills for their acting were diverted to companies which were channels for their transmission to trustees. It is not the provision of services but of funds which comes within the section.

The distinction is not between provision of services and provision of funds, because the actors did provide services; the key feature is the provision of services which yields funds *which would otherwise be received by the provider*. It is considered that the test should be whether one can identify funds which:

(1) would (in the absence of the settlement) have been received by the individual, but
(2) were diverted to the trust.

The settlement provisions do not work unless one can *identify* the funds which are provided by the settlor. In Viscount Dilhorne's examples of employees and stockbrokers, this condition is not met.

Suppose:

(1) an individual has an opportunity of purchasing land, or shares in a private company;
(2) they allow the trust to take up the offer by advising the trust and not pursuing the opportunity themselves;
(3) had the trust not taken up the offer they would have done so.

In this case the individual is a settlor if one can distinguish the return from the trust's investment from the profit from the advice. A clear case being where the trust only invested a nominal amount in the project. But if the trust provides substantial funds for the development, one cannot identify any money as coming specifically from the adviser. One should not apportion the profits between the adviser's contribution (advice) and the settlement's contribution (finance). It is impractical to do so as there is no sufficiently clear answer to how the apportionment should be made. If that is right, the *Mills* and *Hawkins* line of cases is effectively restricted to "one-man companies" with no substantial capital (as was the case in both *Mills* and *Hawkins*). Tax Bulletin 64 Example 9 suggests that

HMRC agree. The example (slightly rephrased) is as follows:

> Mr. J owns 60 of the 100 issued £1 shares in J Limited. Mr. J is the sole company director *and* is the person responsible for making *all* the company's profits because of his knowledge, expertise and hard work. The remaining 40 shares are held by the children of Mr. J and were originally owned by their grandmother who had subscribed for them at par when the company was set up but shortly afterwards had gifted them to her grandchildren. Dividends are paid.

(Emphasis added.) HMRC say:

> [S.629 ITTOIA] applies and attributes the dividends received by the children to Mr. J for tax purposes. Since Mr. J
> [1] is the person *responsible for making the company's profits* and
> [2] decides on the level of dividends paid,[70]
> it is Mr. J who is the settlor rather than the children's grandmother. The legislation could apply in a similar way if the children had subscribed for shares themselves with money received from a third party or even from bank accounts in their own names.

Suppose a stockbroker who is well disposed to the trust (perhaps a beneficiary) gives free investment advice to trustees to invest in quoted (easily obtainable) investments, and the trust profits from acting on their advice. There is an element of bounty but the stockbroker has not provided funds and is not the settlor. One cannot identify funds which would ordinarily have been received by the stockbroker. On the contrary, the stockbroker was free (if they had the resources) to make the same investments as those they recommended to the trustees. This is a clear case.

Suppose a property developer who is well disposed to the trust gives free property market advice to trustees, and the trustees invest in land successfully because of the advice. The developer has not provided property and is not the settlor. One cannot identify funds which would ordinarily have been received by them.

Suppose a director of a company held on trust seems reasonably well remunerated but HMRC argue that their remuneration is insufficient.

70 It is hard to see the relevance of [2].

Even if HMRC are right, the individual is not the settlor, because one cannot identify funds which would have been received by the director.

*Mills* and *Hawkins* were cases where it was intended from the outset that the settlor should provide services at an undervalue. In those cases the settlor contracted to provide services. In *Jones v Garnett*, it was likewise anticipated from the outset that Mr. Jones would provide his services at an undervalue. Here there was no contract, but that made no difference:

> It was the *expectation* of such events and the hope of profit which, together with the absence of any risk attached to the children's ownership of the shares, gives the "element of bounty" to the arrangement constituted by the allotment. What subsequently actually happened was not part of the arrangement.[71]

69.15.2 *Services not envisaged when settlement made*

What is the position if:

(1) a company is up and running and well established;

(2) an individual ("T") *subsequently* provides services at an undervalue (to benefit shareholders).

The question may arise in three circumstances:

(1) shares may be held by a spouse or minor children;

(2) shares may be held by a trust:

  (a) of which some other person is the settlor;

  (b) of which T is the settlor.

In case (1) there is (or may be) no settlement-arrangement before T begins to provide T's services. The question is whether a settlement-arrangement comes into existence.

In case (2) there is a settlement already. The question in 2(a) is whether T becomes the settlor. In case 2(b) T is already the settlor. The question is whether they provide further property (which might taint the settlement).[72] Of course, all the questions are related and they come down to the same question: does T gratuitously provide property for the

71 *Jones v Garnett* 78 TC 1 at [22]. Likewise Lord Walker at [50]: "A plan which existed when the structure was established."

72 See 69.3.9 (Tainting).

purposes of the settlement?[73] It is suggested that the answer is, strictly, yes, if one can identify the funds that T has provided: see above. But it appears that HMRC do not take the point. In *Jones v Garnett*, Lord Neuberger envisages a case (1) situation (share held by Mr and Mrs Jones but no settlement-arrangement):

> On that basis, I find it also very hard to see why Mr Jones's decision each year not to take anything like a full salary, thereby increasing substantially the dividend payable to his wife, does not involve an element of bounty. Neither [Counsel for HMRC] (no doubt reflecting the Revenue's policy) nor [Counsel for the taxpayer] (as it would involve his clients losing on this issue) was prepared to adopt this approach. Although it appears to me to be logically attractive, it would be inconvenient in practice, in that it would be difficult to administer, and it might well produce unfair, even arbitrary, results.[74]

### 69.15.3 *Services provided for full consideration*

In *Mills* in the Court of Appeal, Buckley LJ noted other circumstances why a person who provides services to a trust or company may not be providing property:

(1) A person does not provide funds for a settlement if:
  (a) they are entirely ignorant of the settlement (which would generally be the case for employees of a company held by a trust), or
  (b) they do not have the view of advancing the interests of the trust.

(2) A person does not provide funds for a settlement if they do so for reward in the ordinary course of their professional business.

No-one would suggest that these persons providing their services to the company or trust should be regarded as settlors and the only question is why not? It is suggested that the correct reason is because there is no element of bounty.

---

73 See *Jones v Garnett* 78 TC 1 at [83]:

> "... the definition of settlement in [s.620 ITTOIA] and of the settlor in [s.620 ITTOIA] are closely connected, and it appears to me to be perfectly proper to rely upon observations as to what can be taken into account when considering who is a settlor, when deciding whether there is a settlement."

74 See *Jones v Garnett* 78 TC 1 at [89].

### 69.15.4 *What is the arrangement?*

In *Jones v Garnett* Mr. Jones worked for a company held equally by himself and his wife. Lord Hoffmann gave "settlement-arrangement" a somewhat limited meaning:

> [HMRC's] second argument is that the transfer of the share [to Mrs Jones] was not the whole of the arrangement, which included the provision of services by Mr Jones, the dividend policy and so forth. Again, I think that would be inconsistent with the argument by which the revenue have, in my opinion, succeeded on the first point. The transfer of the share was in my opinion the essence of the arrangement. The expectation of other future events [i.e. provision of services by Mr Jones] gave that transfer the necessary element of bounty but the events themselves did not form part of the arrangement.[75]

## 69.16 Interest-free or back-to-back loan

A person who lends interest-free (or on favourable terms) is in principle[76] a settlor. HMRC agree. SP 5/92 para 22 provides:

> A loan made, directly or indirectly to a relevant settlement after 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest is regarded as a provision of funds for the purposes of TCGA 1992 Sch 5 para 9(3). This is the case whether the loan is for a fixed period or repayable on demand.[77]

---

75 78 TC 1 at [29]. Lord Walker said the same at [54] stressing the absence of a contract of employment.

76 It is assumed that the loan is made with gratuitous intent. The position is different if the loan (though on favourable terms) is made without any gratuitous intent, which is conceivable, for instance, in the case of a loan by a life tenant.

77 As to whether an interest-free loan makes the trust a settlor-interested trust, see 24.3.2 ("Settlor-interested" for IT purposes).
SP 5/92 para 19-21 deal with the CGT implications of loans to trusts before 19 March 1991. This is not now important but is set out here for completeness:

> "19 A fixed-period loan made, directly or indirectly, to a relevant settlement prior to 19 March 1991 on non-commercial terms, eg at a low or nil rate of interest is, generally, regarded as a provision of property in pursuance of a liability incurred before 19 March 1991, provided the loan remains outstanding on the same terms. As such, it falls within the terms of TCGA 1992 Sch 5 para 9(3)(b) and the first condition set out in para 9(3) is not met.

Likewise Tax Bulletin 8 provides:

> Our view is that a person making a loan to the trustees on better than commercial terms is ... a settlor and transferor and within the provisions of [Chapter 5 Part 5 ITTOIA] or [s.727 ITA].

The same applies to a back-to-back loan. In *IRC v Wachtel*:
(1) the trustees borrowed from a bank, and
(2) an individual guaranteed the trustee loan and deposited funds equal to the trustee borrowing with the bank. The trustees paid only 1% interest on their loan.

The individual was rightly held to be a settlor.[78]

While a person who lends interest-free is in principle a settlor, what is the property provided, and when is it provided? It is considered that the property provided is the money lent, and property derived from that. It is provided at the time that the interest free loan is made. If the money lent is spent on expenses, there is no property derived from the loan and the lender ceases to be a settlor.

Suppose:
(1) A settlor while abroad lends money to a trust with mixed resident trustees. The loan is interest-free and repayable on demand.
(2) The settlor later comes to the UK and deliberately leaves the loan outstanding.[79]

HMRC may contend that the settlor has provided property by deliberately leaving the loan outstanding but it is tentatively suggested that this is not

---

> 20 There would, however, be a direct or indirect provision of property for the purposes of the settlement where a fixed-period loan falls to be repaid after 18 March 1991 but repayment is not made and so becomes a repayable on demand loan.
>
> 21 An extra-statutory concession D41 ... sets out the position in the case of non-commercial, repayable on demand, loans for the purposes of applying TCGA 1992 Sch 5 para 9(3)."

78 46 TC 543 at p.555.

79 If the loan is to a company held by the trust, then even if the settlor does provide property by leaving the loan outstanding it did not matter for the CGT rules before 6 April 2007 as the settlor has not provided settled property (so long as company assets are not transferred to the trust). But from 2007 this argument does not apply because the question is not whether the settlor provides settled property, it is whether the settlor provides property for the purposes of the settlement. See 69.14 (Provision of property for company held by trust).

the case: what is the "property" which the settlor has provided? It is not the interest foregone, as that does not exist. Thus the trust continues to be non-resident.

## 69.17 Indemnities

SP 5/92 provides:

> 34 An indemnity given by the new trustees to retiring trustees is not considered as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).

This is right because there is no element of bounty. (Also the benefit of the indemnity is held by the *former* trustees so it is not property comprised in the settlement.)

> Other types of indemnity are considered in light of the facts of a particular case.

The standard form indemnity given by a beneficiary who receives trust capital is not the provision of funds, it is made in consideration of the trustees not exercising their trustee lien.

## 69.18 Guarantees

SP 5/92 continues:

> 35 The giving of a guarantee is regarded as an indirect provision of funds under the terms of TCGA 1992 Sch 5 para 9(3).[80]

---

80 SP 5/92 goes on to deal with the CGT implications of guarantees to trusts before 19 March 1991. This is not now important but is set out here for completeness:
"Payment of an obligation under a guarantee given before 9 March 1991 is, in general, regarded as a payment in pursuance of a liability incurred before 19 March 1991 and within para 9(3)(b). This may not, however, apply where-
- the contingent liability under the guarantee cannot be quantified with a sufficient degree of accuracy, eg where the guarantee is open-ended or the contingency is remote; or
- the guarantor does not take reasonable steps to pursue his rights against the debtor."

## 69.19 Repayment of loan made by trustees

SP 5/92 para 23 provides:

> The repayment of any loan made, directly or indirectly, to any person by the trustees is not generally regarded as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3). This does not, however, apply where
> [1] more is repaid than is due under the original terms of the loan or,
> [2] in the case of loans made after 19 March 1991, where the interest charged under the terms of the loan exceeds a commercial rate.

This is clearly correct (apart from point [2] but in practice that is not likely to arise). There is no element of bounty.

## 69.20 Sale or share issue at undervalue

A sale to a trust at a conscious undervalue is the provision of property and the seller is a settlor. Likewise a person is a settlor if they hold all the shares in a company and consents to the company issuing new shares to a trust at a conscious undervalue.[81] The TSE Manual correctly states at 4120 [January 2008]:

> ***Example 1***
> X is the director and owns all the 150 issued ordinary £1 shares of X Ltd. X Ltd issues 100 new ordinary £1 shares which are acquired for £100 by the X Family Trust. The trust has been established for the benefit of X's family by his father, X Senior, who created the trust by settling cash of £100. Shortly after the issue of the new shares, a dividend of £100 per share is declared and paid and the trust receives dividends of £10,000. X controlled the arrangement for the issue of the shares at par followed by the dividend. X is therefore the true settlor of the settlement from which income of £10,000 arose. The original settlement of £100 by X Senior is usually disregarded on de minimis grounds.

A sale at market value is not the provision of property. HMRC agree. the

81 This proposition is self evident but if authority is needed, see *Crossland v Hawkins* 39 TC 493 at pp.506–507.

CG Manual provides:

> **34891. Multiple settlors**
> Where property is acquired as a result of an arms length transaction the third party is not to be regarded as providing property for the purposes of the settlement, thereby becoming a settlor. Instead the property is regarded as representing the cash previously held.

A bargain at arm's length (at a price regarded by both sides as market value) is not the provision of property even if the parties have mistaken the value and the property is sold at an undervalue.[82]

If values are uncertain the solution may be a market value adjustment clause. SP 5/92 provides:

> 13 Solely for the purposes of TCGA 1992 Sch 5 para 9(3)(a), a provision in the document governing the transaction for an appropriate adjustment to the consideration where the value agreed by the Revenue differs from the original consideration arrived at by an independent valuer and specified in the sale document is, in general, regarded as falling within the terms of the above definition of an arm's length transaction. The arm's length value of the transaction is to be determined in accordance with the principles set out in para 12 above. This will usually correspond to the value for capital gains tax purposes except, for example, where TCGA 1992 s 19 would apply.
> 14 It would also be necessary for the terms of the contract to provide for compensating interest at a commercial rate to be paid in either direction once the arm's length value is determined. For this purpose, the official rate of interest for ICTA 1988 s 160 purposes will usually be regarded as equivalent to a commercial rate of interest, although a different rate may be accepted as so equivalent if the circumstances of a particular case warrant this treatment.
> 15 This practice is, however, subject to the consideration passing on sale being realistically based, ie on a third party valuation by a qualified valuer, all the other terms of the transaction being at arm's length and the compensating interest being timeously paid. The position in a particular case depends on all the facts and circumstances.

82 This is consistent with the principles that a settlement-arrangement must have an element of bounty: see 69.2.3 (Settlement-arrangement definition of "settlement"), and that arm's length sales confer no "benefit": see 27.4.1 (Arm's length transaction).

## 69.21 Failure to exercise right of reimbursement

SP 5/92 para 24 provides:

> [1] Failure, by or on behalf of any relevant person, to exercise statutory rights to reimbursement e.g. under [s.646 ITTOIA], may be regarded as the provision of funds for the purposes of the settlement under TCGA 1992 Sch 5 para 9(3).[83]

Point [1] only applies to a failure to exercise rights which is both deliberate and gratuitous (ie with an element of bounty). This is the reason for the exceptional case which para 24 then addresses:

> [2] The settlement could remain outside the terms of para 9(3) where the exercise of the right to reimbursement is unsuccessful, provided it could be shown that there had been a genuine attempt to enforce rights to reimbursement.

The exception is stingily worded (here as in several other points, SP 5/92 gives the impression that it was intended to make life as difficult as possible for offshore trusts). It is not necessary to show "a genuine attempt to enforce rights to reimbursement". It is sufficient to show that such rights are not enforceable, or that a decision not to obtain reimbursement is a commercial one or that enforcement would not be cost-effective.

---

83 For completeness, Tax Bulletin 8 correctly qualifies this:

> "Para 24 of the Statement of Practice [5/92] points out that failure to exercise statutory rights to reimbursement against non-resident trustees may be regarded as the provision of funds for the purposes of the settlement under para 9(3) of Schedule 5, TCGA 1992. This will not, however, apply in respect of a settlor's non-exercise of statutory rights to reimbursement out of the trust income account where the settlor has a life interest in all the assets of the trust. In such circumstances, failure to exercise the right to reimbursement would, effectively, not add funds to the trust since all income would, in any ease, either be paid to the settlor under the terms of the trust deed or be used to meet expenses chargeable against income.
> But even in such cases the settlor may have rights to reimbursement out of the trust capital account, eg in relation to accrued income charges, which if not exercised will be regarded as the provision of funds."

For other issues relating to reimbursement, see 27.4.10 (Reimbursement of tax under statutory indemnity) and 27.21 (Relevant income used to pay expenses)

## 69.22 Payment of administrative expenses

SP 5/92 specifies two cases where payment of capital expenses out of a life tenant's income does not make the life tenant a settlor:

> 29 An expense on capital account paid out of trust income is not treated as a provision of income by a beneficiary for the purposes of TCGA 1992 Sch 5 para 9(3) provided that either—
> [1] the trust deed permits payment of capital expenses from income and the beneficiary is entitled only to net income after such payments;[84] or
> [2] the trustees borrow money from the income account which is subsequently restored, along with interest over the period of the loan. The appropriate rate of interest is considered to be that which a Court of Equity would order on the replacement of trust income.[85]

The question, more analytically, is whether the life tenant has provided intentional and gratuitous benefit to the trust. Clearly, in the two cases mentioned, the life tenant does not do this and so does not become a settlor.

Where a trust has no income, someone (typically a beneficiary) may voluntarily pay the expenses. In this case there may also be no gratuitous element. It may be in the beneficiary's interest to make the payment. Subject to that, the SP tacitly suggests that the intentional and gratuitous

---

84 For completeness, Tax Bulletin 8 expands on this:
"Para 29 of the Statement of Practice concerns, inter alia, trust deeds which permit capital expenses to be paid out of the income account. Neither the existence nor the exercise of this power would cause the trust to lose an interest in possession status for IHT purposes."

85 For completeness, Tax Bulletin 8 expands on this. The bulletin sets out para 29[2] and continues:
"The appropriate rate of interest is considered to be equal to the rate payable on the Basic Account administered by the Court Office of the Supreme Courts of Justice. Such interest will constitute taxable income in the hands of the income beneficiary (either when it is credited in the case of a life tenant, or when it is paid or applied for the benefit of a discretionary beneficiary). It may also be treated as 'relevant income' for [s.731 ITA] purposes.
Income beneficiaries will only be liable on the net amount of income available after deduction of any income which has been applied to meet expenses on capital account. Only when the income account is made good will that income become taxable on the beneficiary."

payment of trustees' expenses *does* make the payor a settlor. But this is not correct. First, in some cases, the payment of expenses may be a provision of services to the trust rather than the provision of property.[86] Secondly, if a non-settlor pays trustees expenses, or pays a sum to the trustees which are immediately consumed in payment of expenses "no property of which S is the settlor" is comprised in the settlement, so the payor of expenses is not the settlor.[87]

HMRC agree. The STEP/CIOT questions[88] consider the IHT problems that arise when:

(1) a person (after 2006) adds property to an estate IP trust and
(2) the property is spent on trust expenses.

> **Question 37(2)**
> ... if an addition of cash was made which was then spent by the trustees and HMRC regard this addition as within the relevant property regime (eg an addition to pay expenses or improve properties), how would the proportion of the settled property subject to the new rules be calculated? Would a valuation be needed of the property before and after the improvement?
> **HMRC Answer**
> If a payment of cash was made and then spent immediately on, say, a tax liability or another administration expense, then that short period will be the extent of its time as "relevant property" and there will be no question of having to consider what proportion of the existing settled property represents it going forward.
> If a payment was made towards the improvement of a property, then this would appear to require "with" and "without" valuations when there is a chargeable event.[89]

---

86 See 69.15 (Provision of services).

87 See 69.3.6 (Person ceasing to be settlor).

88 Accessible at http://www.step.org/pdf/3October2008versionSch20FA2006letter.pdf

89 The question goes on to ask: In HMRC's view, do all subsequent post Budget additions need to be kept physically segregated? HMRC say no, which is just as well as money spent can hardly be regarded as segregated:
"It is clearly up to trustees to decide whether to keep post-Budget additions separate from the rest of the trust fund. We think that it may be sensible to do so—or, at least, to keep good records of additions. (The trustees of discretionary trusts already need to do this, of course, in order for the 10-year anniversary value of each addition to be identified correctly in light of the relief in s 66(2) IHTA for property that has not been 'relevant property' for a full 10-year period)."

*Note added 6 August 2008: HMRC have indicated that they are actively reconsidering this response with a view to producing further guidance shortly.*[90]

## 69.23 Trust retains life tenant's income

SP 5/92 para 33 provides:

> A life tenant is not regarded as having provided income or property for the purposes of the settlement merely because there is an administrative delay in paying out the income that has vested in that beneficiary. If, however, the beneficiary directs the trustees to retain this income on the terms of the settlement, this is regarded as a provision of funds within TCGA 1992 Sch 5 para 9(3).

This is fairly obvious.

## 69.24 Purpose: minor settlor

In *Mills v IRC* 49 TC 367, the funds of the settlement were derived from acting work of Hayley Mills, then aged 14. She was supposedly[91] unaware of the settlement to which at her direction her earnings were paid. The argument was that she had not provided funds for the *purpose* of the settlement. Viscount Dilhorne said:

> [1] I do not agree with Lord Denning MR that the word "purpose" in this section connotes a mental element or with Buckley LJ that there must be a motivating intention. I do not myself think that it assists to consider whether the question he posed is to be answered

90 No such guidance has been produced, presumably the issues have been filed as too difficult.

91 The actual evidence recorded that she was "not very interested", which is not the same. The case should have been decided on the simple factual basis that Hayley Mills *did* intend to provide funds for the purpose of the settlement, even if she did not trouble to think very much about it. The judge made this point at p.378:

> "The case was put on a factual assumption that Hayley Mills did not subjectively intend to provide funds. This was factually incorrect, and not even conceivable, because it was completely inconsistent with the view that the contract she signed was valid. If Hayley had not thought about it at all, the contract which she signed would be void under the rule *non est factum*."

> objectively or subjectively. I do not consider it incumbent, in order to establish that a person is a settlor as having provided funds for the purpose of a settlement, to show that there was any element of mens rea.
> [2] Where it is shown that funds have been provided for a settlement a very strong inference is to be drawn that they were provided for that purpose,
> [3] an inference which will be rebutted if it is established that they were provided for another purpose.

It is difficult to see what point this sloppy passage is trying to make.[92] It is not that purpose is irrelevant: see [3]. That seems to contradict the sentence at [1], but it is obviously right. "Purpose" and "provide" inescapably connote a mental element. The best explanation of this passage is that it is considering the situation like the facts in *Mills* where Hayley Mills *did* intend to provide funds for the purpose of her trust (as shown by her signing a contract which had that effect) but she took almost no interest in the matter. That is, the comment is restricted to the facts of that particular case.

The legislation sometimes refers to purpose of the settlement (in the singular) and sometimes purposes (in the plural) but there is no distinction.[93]

## 69.25 Purpose: advisers and agents of settlor[94]

It is considered that in ascertaining purpose one may have regard not only to the mind of the settlor, but also the mind of those acting for him or her. Agency principles may be applied. See *Crossland v Hawkins* 39 TC 439 at p.508:

> The mere fact that he did not concern himself with some of the 'steps' in the legal machinery involved does not make it any the less his arrangement within the section. A man does not avoid the incidence of section 397 [now s.629 ITTOIA (income paid to unmarried minor

92 Dilhorne, who took a third in law, was "not in the highest flight of English lawyers" (DNB).

93 "The statute seems to me to use the word 'purpose' and 'purposes' indiscriminately"; *Crossland v Hawkins* 39 TC 493 at p.507.

94 See 29.15 (Purpose: advisors and agents of transferor).

> children of settlor)] by merely being absent from and leaving to his solicitors and accountants certain parts of the legal machinery if he is aware of the proposals for an 'arrangement' or a settlement and actively forwards them by personally carrying out and assisting in the vital parts in which his performance and co-operation are necessary. Nor can he avoid liability by merely giving his solicitors carte blanche to effect some scheme for the benefit of his family and refusing to concern himself with its precise form.

On this analysis many apparent difficulties fall away.

In *Mills*, the father acted on behalf of the daughter.[95] The purpose of the father was to provide the daughter's funds for the purpose of the settlement. That suffices to make the daughter the settlor if she had no purpose of her own. Likewise in *Hatton*[96] the purposes of Mrs Cole's attorney was to provide funds for the settlement, and this purpose should be regarded as the purpose of Mrs Cole.

## 69.26 Settlement made by court for person lacking capacity

The court has power to make a settlement for a person lacking capacity "on his behalf". It is considered that the person lacking capacity is the settlor.[97] The Court of Protection agree:

> Trusts set up by an order of the Court of Protection will take the form of a settlement, with the patient being the settlor. ... in the case of trusts set up by an order of the Court of Protection, provision can be made for income to be accumulated, if appropriate, for the lifetime of the patient as section 164(1)(a) Law of Property Act 1925 applies.[98]

## 69.27 Settlement made by compromise of claim of minor or person lacking capacity

Parties to litigation may make a settlement under a compromise on behalf

95 See 49 TC 367 at pp.382 and 385.

96 See 69.4 (Gift from A to B followed by gift to trust by B).

97 Sections 16, 18(h) Mental Capacity Act 2005. The tax position is the same for settlements made under the Mental Health Act 1983.

98 Court of Protection Practice Note, 15 November 1996, para 4.

of a claimant who is a minor or person lacking capacity.[99] The Court of Protection say:

> An award of damages can be settled, by consent, in trust for the patient as part of the terms of compromise of the action between the plaintiff and the defendant, with the approval of the High Court, in circumstances where the award never becomes the absolute property of the patient.
> Trusts set up following an order of the High Court can only be done in the form of a declaration of trust by the trustees ... . The period over which income can be accumulated by the trustees is restricted to 21 years.[100]

This assumes that the minor/person lacking capacity is not a settlor for trust law purposes. The first sentence (which is probably the basis for the conclusion) is unsound. While the *award* never becomes the absolute property of the patient, the award represents the claim, which is the property of the claimant.[101]

But HMRC accept in practice that there is no settlor.[102] It would follow that the trust fund is excluded property, eg if it is an AUT, an OEIC, or not UK situate.

## 69.28 Trust under Criminal Injuries Compensation Scheme

An award under the Criminal Injuries Compensation Scheme may be transferred to a trust.[103] The applicant under the Criminal Injuries Compensation Scheme is not the settlor of such a trust.[104] That is

---

99 See Kessler & Sartin, *Drafting Trusts & Will Trusts*, (10th ed., 2010) Chapter 26 (Trusts of damages).

100 Court of Protection Practice Note on the settlement of personal injury awards to patients, 15 November 1996, paras 2 and 4; set out in the White Book (Civil Procedure) para 6B-119.

101 *Zim Properties v Proctor* 58 TC 371.

102 Private correspondence.

103 Para 50 Criminal Injuries Compensation Scheme 2001.

104 The drafter of Part 2 Chapter 4 FA 2005 assumed this, though one needs to dig a little into the provisions to see why this is so:
(1) CICS trusts are within the provisions: s. 35 FA 2005.
(2) Settlor-interested trusts are outside the scope of the provisions: see s.25(3) and 30 FA 2005. (In relation to CGT this was clearer before s. 77 TCGA was

consistent with the position under the VTA. However, HMRC have apparently expressed the view that the claimant is the settlor, and in practice this view may well favour the taxpayer (as s.624 ITTOIA reduces the IT charge if the settlor is not a higher rate taxpayer).

## 69.29 Trust made in divorce settlement

In *Harvey v Sivyer* 58 TC 569 a separated husband made payments to his minor children under a deed of separation. The payments were not voluntary; they were pursuant to an obligation to maintain the children and contained no element of bounty.[105] The taxpayer argued that for this reason that there was no "settlement" within the settlement-arrangement definition. The argument was rejected and the taxpayer was held to be the settlor. The judge tentatively reconciled his decision with the bounty requirement because "the natural relationship between parent and young child was one of such deep affection and concern that there must always be an element of bounty by the parent, even when the provision is on the face of things made under compulsion".[106] This is romantic nonsense, as any family lawyer will attest. The better way to justify the decision is to note that the bounty requirement is not statutory, and not to be applied unthinkingly. The Court of Appeal noted in an earlier case, "if the legislature had set a limit to the extent to which a taxpayer may divest himself for tax purposes of income by voluntary means, I see no reason why the same principle should not be applied to income of which the taxpayer is compulsorarily divested".[107] So this is simply an exception to the bounty requirement. On this analysis, *Harvey v Sivyer* was correctly decided, though not for the right reasons.

---

repealed in 2008).

(3) The claimant under the CICS would always be a beneficiary, so if he was the settlor the trust would be settlor-interested.

So the drafter must have assumed that the claimant was not the settlor, or the provisions made no sense.

105 58 TC 569 at p.572.

106 58 TC 569 at p.577.

107 *Yates v Starkey* 32 TC 38 at p.53.

## 69.30 Trust made by instrument of variation

### 69.30.1 *The usual situation*

Suppose:

(1) B inherits property absolutely from the estate of a deceased, D.

(2) B varies the will so as to create a settlement of that property; and s.142 IHTA and s.62 TCGA apply.

B is clearly the settlor in the general sense: see 69.4 (Gift from A to B followed by gift to trust by B).

### 69.30.2 *Settlor for IHT*

For inheritance tax purposes, the effect of s.142 IHTA is probably to override the general sense; the settlor is D and not B. HMRC agree. (The contrary view is arguable but it will not usually be in the taxpayer's interest to argue it.) IHT Manual provides:

> **35151 - IHT implications of an Instrument of Variation: effect of coming within s.142**
> When a variation satisfies the requirements of s.142(1) IHTA and there is a valid election or, on or after 1 August 2002, a valid statement of intent
> - the variation is not a transfer of value, and
> - the IHTA applies as if the deceased had effected the variation
>
> Consequently, for example ...
> [1] if a variation sets up a non-interest in possession trust, the deceased is treated as the settlor, and
> [2] the GWR rules in s.102 FA 1986 cannot apply to a disposition which is accepted as a variation within s.142(1) IHTA.
> This is because the effect of s.142(1) IHTA is that the deceased is treated as the donor.

Point [1] states that the deceased is the settlor if a variation sets up a non-interest in possession trust. The same rule must in principle apply if the variation sets up an interest in possession trust (but with the added complication of the s.80 IHTA rules, if applicable). Likewise Tax Bulletin 15 provides:

> Our view is that, as the relevant IHT legislation differs from the CGT

provisions which were considered in *Marshall v Kerr*, that decision has no application to IHT. Variations which meet all the statutory conditions will continue to be treated for IHT purposes as having been made by the deceased.

### 69.30.3 *Settlor for IT: variation before 6 April 2006*

B is the settlor for IT purposes in the case of variations made before 6 April 2006.

### 69.30.4 *Settlor for CGT: variation before 6 April 2006*

The identity of the settlor for CGT is an unresolved question.[108] The issue is whether s.62 TCGA overrides the general sense of settlor. The House of Lords held in *Marshall v Kerr* 67 TC 56 that for CGT the settlor is the beneficiary making the variation, not the testator. However, the reasoning relies entirely on the fact that the beneficiary settled a share in an unadministered estate. The position is therefore different if:

(1) the IOV is made after administration of the estate has been completed; or
(2) the will or intestacy is governed by the law of a jurisdiction (such as a civil law jurisdiction) which (unlike common law jurisdictions) does not recognise personal representatives and an administration period; or
(3) the disposition varied is a joint tenancy (because, as in (2), there is no administration period in respect of property passing by survivorship).

In the following discussion cases (1) to (3) above are called "non-administration" cases, and cases where the estate was in administration (like *Marshall v Kerr*) are called "administration cases".

The reasoning of the House of Lords suggests that the law is as follows:

(1) In administration cases; if the IOV is made before 31 July 1978 (the passing of the FA 1978) the beneficiary is the settlor: that, at least, is clear from *Marshall v Kerr*.
(2) In non-administration cases whenever the IOV is made, it is considered that the deceased is the settlor.
(3) In administration cases after 31 July 1978, it is suggested that the deceased is the settlor. *Marshall v Kerr* has been reversed by (what

108 See "*Marshall v Kerr* Revisited", *Taxation*, 3 May 2001 (Christopher Sokol QC).

is now) s.62(9) TCGA: this subsection was not in force in the tax years relevant to *Marshall v Kerr*.

To distinguish between administration and non-administration cases is highly anomalous, so this view of s.62(9) TCGA brings welcome consistency into the law. It also brings CGT into line with IHT.

It appears to be the HMRC view that the beneficiary is the settlor even in cases (2) and (3). CG Manual 37888 [August 2007] provides:

> The Revenue had always considered that Section 62(7) was concerned with computational matters only, and had no effect on the question whether a new settlement had come into existence or the identity of the settlor. The majority of the House of Lords, in Marshall v Kerr, 67TC56, preferred slightly different reasoning in holding that a residuary legatee, who had executed an instrument of variation so that her 50 per cent share of the estate was settled, was the settlor for the purposes of Section 87 TCGA 1992 (charge on beneficiaries of non-resident settlements). It may be noted that the case was concerned with the pre-1978 version of the relevant legislation and it is considered that the Revenue's arguments in that case are stronger under the later legislation.
>
> Where the instrument was executed before 6 April 2006 this decision should be applied for the purposes of Section 77 TCGA 1992 & Section 86 TCGA 1992 (charge on settlors of certain settlements) and TCGA 1992/SCH1 (annual exempt amount for trustees).
>
> Where the instrument was executed on or after 6 April 2006 and notice is given under Section 62(7) Section 68C TCGA 1992 applies with these consequences.
>
> - Where under the will or intestacy property was to pass absolutely to an individual, and a variation is executed settling that property (or property deriving from that property), then the person to whom the property would have passed is the settlor with regard to that property.
> - Where under the will or intestacy property was to be settled, but the variation is such that a new settlement is created (see CG37887) then the deceased is the settlor.
> - Where under the will or intestacy property was to be settled, but the variation is minor, then the deceased would be the settlor without the new legislation in FA 2006 and therefore this case is not provided for

specifically.[109]

The author has been expecting further litigation on this aspect since 1994, but it has not happened yet. In view of the 2006 reforms, HMRC may not dispute the position for variations before 6 April 2006.

69.30.5 *IT and CGT – IoVs from 6 April 2006*

Section 472 ITA provides:[110]

> (1) This section applies if—
> (a) a disposition of property following a person's death is varied, and
> (b) section 62(6) of TCGA 1992 applies in relation to the variation.
> (2) [i] If property becomes settled property because of the variation
> [ii] and would not, but for the variation, have become settled property),
> a person within subsection (3) is treated for the purposes of the Income Tax Acts (except where the context otherwise requires)—
> (a) as having made the settlement, and
> (b) as having provided the property for the purposes of the settlement.
> (3) The persons within this subsection are—
> (a) a person who immediately before the variation was entitled to the property, or to property from which it derived, absolutely as legatee,[111]

109 Likewise TSEM 1815 [January 2008]:
"The settlor of a trust created by a deed is not the deceased, unless it's a disclaimer (TSEM1840). It is the person who was entitled to the gift that has now gone into trust. The gift can be capital or income or both. The case of *Marshall v Kerr* (67 TC 56) is relevant. There may be more than one settlor."

110 The CGT equivalent is s.68C TCGA.

111 Section 472 provides:
"(4) For the purposes of subsection (3)—
(a) 'legatee' includes a person taking property—
(i) under a testamentary disposition or on an intestacy or partial intestacy, whether beneficially or as trustee, or
(ii) under a donatio mortis causa, and
(b) a person who is a legatee as a result of para (a)(ii) is treated as acquiring the property when the donor dies.
(5) For the purposes of subsection (4)(a) property taken under a testamentary disposition or on an intestacy or partial intestacy includes any property appropriated by the personal representatives in or towards satisfaction of—

(b) a person who immediately before the variation would have been so entitled if that person had not been an infant or otherwise lacking legal capacity,
(c) a person who, but for the variation, would have become so entitled, and
(d) a person who, but for the variation, would have become so entitled if that person had not been an infant or otherwise lacking legal capacity.

Section 472 (and its CGT equivalent, s.68C TCGA) applies in the usual situation, where a beneficiary absolutely entitled to property under a will varies the will so as to create a settlement. Section 68C TCGA enacts the HMRC view that the beneficiary is the settlor for CGT. Section 472 confirms (which no-one ever doubted) that the beneficiary is the settlor for IT.

This applies not just for the standard IT/CGT definition, but for all purposes of IT and CGT. Although the drafter adds the words except "where the context otherwise requires", I cannot think of a case where the context would "otherwise require"; and I expect the drafter has copied without much thought the wording used (appropriately) in s.467 ITA.

Section 473 ITA provides:

(1) This section applies if—
(a) a disposition of property following the death of a person ("D") is varied, and
(b) section 62(6) of TCGA 1992 applies in relation to the variation.
(2) If—
(a) property would have become comprised in a settlement within subsection (3), but
(b) as a result of the variation, the property, or property derived from it becomes comprised in another settlement,
D is treated for the purposes of the Income Tax Acts (except where the context otherwise requires) as having made the other settlement.
(3) A settlement is within this subsection if—
(a) it arose on D's death (whether by D's will or on D's intestacy or in any other way), or

---

(a) a pecuniary legacy, or
(b) any other interest or share in the property devolving under the disposition or intestacy."

(b) it was in existence immediately before D's death (whether or not D was a settlor in relation to it).
(4) If—
(a) immediately before the variation property is comprised in a settlement and is property of which D is a settlor, and
(b) immediately after the variation the property, or property derived from it, becomes comprised in another settlement,
D is treated for the purposes of the Income Tax Acts (except where the context otherwise requires) as having made the other settlement.
(5) A settlement treated as made by D as a result of this section is treated for the purposes of the Income Tax Acts as made by D immediately before D's death.
(6) But subsection (5) does not apply in relation to a settlement which arose on D's death.

Section 473 applies in the highly unusual situation where property settled by will is re-settled by beneficiaries.[112] Here the opposite rule is enacted: the beneficiaries are *not* settlors for IT or CGT.

Where s.472 applies, s.472(2) imposes two rules:
(a) the beneficiary ("B") is deemed to have made the settlement;
(b) B is deemed to have provided the property for the purposes of the settlement.

By contrast, where s.473 applies, we only have rule (a): the deceased is deemed to have made the settlement. By implication, rule (b) must also apply: the deceased must be deemed to have provided the property.

### 69.30.6 *Commentary*

What is the reason for s.473? Perhaps because it can be hard to identify settlors on variations of settlements. Perhaps because, if the will actually settled the property, there is little need or scope for tax planning by IOVs. In practice s.473 is not important. It appears to be dead letter tax law (not the only dead letter tax law enacted under the banner of trust modernisation). Does it matter to have on the statute book complex provisions that never apply and no-one need take notice of? I think it does, and maybe some day some reformer will sweep it away, and bring CGT and IHT into alignment. The IHT rule is a sensible one, for it fits the

112 See 69.10 (Variation or resettlement by beneficiaries).

object of the IOV rules, which is to allow beneficiaries to avoid the tax unfairnesses of badly drafted wills.

## 69.31 Pension trusts and employee trusts

### 69.31.1 *Is a pension trust or employee trust a settlement?*

Employers generally create employee trusts and pension trusts for wholly commercial reasons. There is normally no element of bounty on the part of the employer. Nor is there any element of bounty on the part of the employee, who is not in a position to negotiate or reject the arrangements. Such a trust is here called "**a commercial trust**".

A commercial trust is a settlement under the classic settlement definition. However, a commercial trust is not a settlement under the settlement-arrangement definition.[113]

HMRC agree. CG Manual 14596 provides:

> **Pension funds**
> ... It is considered that for the purposes of Income Tax[114] a pension fund, certainly an approved one, is not a settlement, because of the absence of 'bounty'; (see *Berry v Warnett*, 55 TC 92 for a discussion of the bounty test). Accordingly transfers of assets to Pension Funds are not connected persons transactions and there is no restriction of availability of losses under section 18(3) TCGA 1992.

### 69.31.2 *Who is the settlor of a commercial trust?*

Since a commercial trust is not a settlement-arrangement, the question of who is the settlor does not arise when the settlement-arrangement definition of settlement is applicable. However the question arises as to who is the settlor of the commercial trust where the classic definition of settlement is applicable.

The answer depends on which definition of settlor applies. Let us look first at the standard IT/CGT definition and the IHT definition of settlor.

---

113 Because of the bounty requirement; see 69.2.3 (Settlement-arrangement definition of "settlement").

114 The author means, for the purposes of the settlement-arrangement definition of "settlement."

Under these definitions "settlor" includes (1) the person who provides property and (2) the person who makes the settlement. It is considered that the position is as follows:

(1) "Providing" property requires an element of bounty, and no-one can be said to "provide" property to a commercial trust.
(2) To "make" (or perhaps to "enter into") a settlement does not require an element of bounty.

HMRC agree. The CG manual provides:

> **33245. Settlor: from 6 April 2006: Basic principles** [November 2009]
> ...Basically under Section 68A(1) to (3) [TCGA] a person is a settlor if:
> [1] he made or entered into the settlement. This describes the person who has had the deed drawn up on his behalf. The property may come from elsewhere; or the transfer of property to the settlement may be without 'bounty'(see next bullet),
> [2] he has provided property for the purposes of the settlement. On the basis of *IRC v Leiner* 41 TC 589 these words are regarded as applying only where there is 'bounty'. See CG35021 on 'bounty',
> [3] the property is settled as a result of his will or intestacy.

The employer normally "makes" a commercial trust (normally the employer is a party to the trust deed and the deed is drawn on his behalf) and so the employer is a settlor under the standard IT/CGT definition and the IHT definition. HMRC agree. CG Manual provides:

> **33240 Settlor: Up to 5 April 2006** [November 2009][115]
> ... There is no judicial guidance on the precise meaning of "made" and "entered into" although they have been present in the Income Tax legislation for many years. They would appear to be descriptive of anyone who can reasonably be described as settlor in accordance with the relevant legislation but also anyone who has created a settlement as a formality or put property into a settlement other than for full consideration....
> Because a person who has 'made' or 'entered into' a settlement is within

115 This passage is considering Sch 1 TCGA before the 2006 amendments. At that time the Sch 1 applied a classic definition of settlement (so an employee trust was a settlement), and it applied the settlement-arrangement definition of settlor (so someone who made or entered into a settlement was a settlor). The point made here therefore applies to the standard IT/CGT and IHT definitions of settlor which contain similar wording.

> the definition of settlor it is not considered necessary for 'bounty' to have been provided. Therefore employee trusts have a settlor. See CG33580 and CG35020+. ...
> **33580. Trusts for employees [June 2003]**
> Except where specific rules provide otherwise, trusts set up for the benefit of employees are subject to the normal rules relating to settled property. For the purposes of determining the annual exempt amount the settlor is the person who made or entered into the settlement, generally the employer. ... In addition any individual or company which adds property to the settlement is also a settlor. ...

The CGT s.86 definition of "settlor" is different and does *not* include the person who makes or enters into a settlement. So the employer is not a settlor for the purposes of s.86. HMRC appear to agree. This can be inferred from comments in the CG Manual on s.77 TCGA. That section was repealed in 2008 but the comments are relevant because the definition of settlor for s.77 was (in short) the same as for s.86 TCGA. The CG Manual provides:

> **34804 Corporate Settlors** [August 2007]:
> Companies frequently create settlements. These are generally settlements for employees, see CG35020, or other commercial arrangements, see CG35023. Such settlements are usually excluded from TCGA Section 77 because of the bounty test.

More analytically, a commercial settlement was a "settlement" for the purposes of s.77 (which applied the classic definition, not the settlement-arrangement definition). However s.77 did not apply because the company was not within the s.77 definition of settlor. The CG Manual provides:

> **33580. Trusts for employees** [June 2003]
> ... CG35020+ shows that in many circumstances the employer is not the settlor for TCGA 1992 Section 77.

Similarly:

> **35020. Settlor trusts: Share option schemes: Trusts for employees**
> There is nothing in Section 77 itself to prevent it being applied to a

company.[116] In particular, where a company has set up a settlement for its employees, the deed may provide that if all the trusts fail, the property may revert to the company. The most common cases are share option schemes and unapproved pension schemes. In the latter case it can also be argued that the employees themselves are also settlors.

The Revenue Booklet entitled 'The tax treatment of Top-Up Pension Schemes', Para 2.7.5, states:

> 'The 'benefit to settlor' rules in [s.624] and [TCGA 1992, Sections 77 – 79] can apply to top-up pension schemes. But this is not likely to be the case where the structure and operation of a scheme are broadly similar to an approved pension scheme.'

**35021. Settlor trusts: Share option schemes: Trusts for employees**

The legal basis of this is that a person is a settlor under Section 79 to the extent that that person has provided property for the purposes of the settlement. The courts have indicated in dealing with similarly worded Income Tax legislation that this means that is necessary for the settlor to have provided 'bounty', and that a commercial transaction does not normally contain bounty. Therefore if a settlement can fairly be regarded as part of an employer's normal commercial arrangements for the remuneration of his employees, neither the employer nor the employees should be regarded as settlors.

**35022. Settlor trusts: Share option schemes: Trusts for employees**

The absence of approval for a share option scheme or a top-up pension scheme does not prevent it from being 'normal'. Cases should only be challenged if the benefits are provided for a very small number of employees, particularly directors and/or shareholders.

**35023. Settlor trusts: Other commercial arrangements**

In exceptional circumstances trusts may be set up for commercial reasons other than to benefit employees. In general Section 77 should not be applied to genuine commercial arrangements, where the main beneficiaries are members of the public, and it is not intended that funds should revert to the person setting up the trust. On the other hand it is possible that the main beneficiary is the settlor, in which case the application of Section 77 should be contended for.

### 69.31.3 *Could employees be settlors of employee trust?*

CG Manual para 35020 states in relation to unapproved pension schemes:

116 This sentence is debatable but the issue is now of historic interest only.

> ... it can also be argued that the employees themselves are also settlors.

Similarly, the comment that employers and employees are not settlors is said in the passage set out above to apply only to "normal commercial arrangements".

Why are employees not settlors in normal cases? There may be two reasons:

(1) The employee may not have provided anything as they normally gave up no rights when the employer made the transfer to the trust. The trust is created at the discretion of the employer and these employees play no part in it.
(2) Common form employee trusts benefit a wide class of beneficiaries, so one may not be able to identify any particular part of the trust fund as provided by any particular employee (even if it is the case that a class of employees have jointly provided the trust property). That would preclude any charge to tax on any employee.

Employees may be settlors where these factors are both absent.

The TSE Manual provides:

> **TSEM5355 - Trusts for particular purposes: employment - related trusts - summary for FURBS/EFRBS - non-resident trustees** [Jan 2011]
> **...The Settlements Legislation**
> **Information** The Settlements legislation in Chapter 5 Part 5 ITTOIA will not apply if the scheme is operating on normal commercial lines as part of an employment package. But in certain circumstances you may consider whether the Settlements legislation applies to charge the FURBS/EFRBS trust's income and gains on a director.
> **Action** The Settlements legislation provisions can apply if the trust is apparently not genuinely to provide retirement benefits and/or the beneficiary of the trust has directly or indirectly provided funds for the settlement (see TSEM4120). Apply the following guidelines when examining trust returns and accounts and liaise with the tax office for the company and the employment income tax office, or submit to HMRC Trusts & Estates Technical Edinburgh, as necessary. .
> The Settlements legislation will not apply where only the employer makes contributions - unless the contributions are
> made by a close company which the member controls and
> unrealistically large by normal commercial standards.
> For example, if there is only one director who is also the sole shareholder of the employing company, and substantial contributions are

> made into the FURBS/EFRBS, you may consider whether the Settlements legislation applies to treat the director/shareholder as the settlor. If you think this may be the case, you must liaise with the tax office for the company. They will consider whether to deny a deduction for the contributions.
> The Settlements legislation will not apply if the member makes contributions and these are reasonable compared with the member's salary. However, if the member makes any contributions, refer the case to the Divisional Technical Adviser.
> If you consider the Settlements legislation may apply, submit your papers to HMRC Trusts & Estates Technical Edinburgh

### 69.31.4 *Trust of pension scheme death benefits*

The IHT Manual provides:

> **17125. The identity of the settlor**
> The settlor in relation to a discretionary trust created over death benefits (IHTM17030) when the member first joined the scheme is the member themselves.
> The settlor is considered to be the member even in the case of a non contributory scheme. The reason for this is that pension benefits and rights are the product of sums paid into the pension fund by the employer as deferred or delayed remuneration for the employee's current work (see *Parry v Cleaver* [1970] AC 1 and *The Halcyon Skies* [1976] 2 WLR 514).

This is obviously correct if the member has a general power of appointment over the death benefit and creates the trust by exercise of that power.

It is not clear if HMRC mean to say that the member is the settlor in other cases but if they do their view is very doubtful. The two non-tax cases cited by the IHT manual do not shed much light on the issue. If the member was not the settlor of the pension trust before the transfer to the death benefit trust, how can they become the settlor? The transfer from a pension trust to the trust of the death benefit does not alter the identity of the settlor.[117]

117 See 69.7 (Transfer from trust A to trust B by exercise of trustees' power).

## 69.32 Trust made by company: are shareholders settlors?

The position here is again made more complicated by the differences between the definitions of settlor.

### 69.32.1 *Trust made by company: s.86 definition of settlor*

The s.86 definition of settlor is unique in that it makes express provision to treat shareholders and other participators as settlors where a company is a settlor.

Para 8(4) sch 5 TCGA provides:

> For the purposes of this paragraph—
> (a) where property is provided by a qualifying company controlled by one person alone at the time it is provided, that person shall be taken to provide it;
> (b) where property is provided by a qualifying company controlled by 2 or more persons (taking each one separately) at the time it is provided, those persons shall be taken to provide the property and each one shall be taken to provide an equal share of it;
> (c) where property is provided by a qualifying company controlled by 2 or more persons (taking them together) at the time it is provided, the persons who are participators in the company at the time it is provided shall be taken to provide it and each one shall be taken to provide so much of it as is attributed to him on the basis of a just apportionment;
> but where a person would be taken to provide less than one-twentieth of any property by virtue of paragraph (c) above and apart from this provision, he shall not be taken to provide any of it by virtue of that paragraph.

Para 8(5) sch 5 TCGA defines "qualifying company":

> For the purposes of sub-paragraph (4) above a qualifying company is a close company or a company which would be a close company if it were resident in the UK.

The definition of control is a slightly cut back version of the ultra-wide definition. Para 8(8) sch 5 TCGA provides:

> For the purposes of this paragraph the question whether a company is controlled by a person or persons shall be construed in accordance with sections 450 and 451 of CTA 2010; but in deciding that question for those purposes no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010 if he is not a participator[118] in the company.

Why does the s.86 definition have this provision which is not found in any other definition of settlor? The answer may be that it is there specifically because the s.86 definition is narrower than the others, as discussed above, lacking the rule that someone who makes a settlement is a settlor.

If para 8 applies (so that a participator is "taken to provide" the trust property) it is considered that the company should be taken not to provide the property, ie, it is not the settlor.

### 69.32.2 *Trust made by company: other definitions of settlor*

Where a company makes a settlement, the individual controlling shareholder(s) will be settlor(s) if they can be said to provide property indirectly.[119] In relation to companies with only one or two shareholders, this may well be the case if there is an element of bounty, though it depends on the facts. The CG Manual para 34804 [August 2007] provides:

> Companies frequently create settlements. These are generally settlements for employees, see CG35020, or other commercial arrangements, see CG35023. Such settlements are usually excluded from Section 77 TCGA 1992 because of the bounty test. Exceptionally it may be appropriate to argue that TCGA Section 77 applies to the particular settlement. *Although there is no specific provision comparable to TCGA Schedule 5 Para 8(4), nevertheless it may be appropriate in such a case to consider whether the property entering the settlement has been provided indirectly by the shareholders, both for the purposes of TCGA Section 77 and for the purposes of Section 619 ITTOIA [the settlement-arrangement definition].*
> (Emphasis added)

---

118 Para 8(9) sch 5 TCGA provides the common form definition of participator: "In this paragraph 'participator' has the meaning given by section 454 of CTA 2010."

119 Contrast 26.3.2 (Transfer procured by individual).

## 69.33 Planning to create trust with foreign domiciled settlor

The "who is the settlor" question may arise in a tax planning context where it is desired to create a foreign domiciled trust by transferring property to a foreign domiciled settlor. These arrangements are always challenging and sometimes impossible to carry out in practice, for it depends ultimately on intention, and that cannot be manufactured to suit the circumstances.

*Example 1*

(1) H (UK domiciled) gives property to H's wife W (not UK domiciled); and

(2) W gives it to a trust.

Who is the settlor: H or W or both?

The success of schemes involving a transfer to a foreign domiciliary who creates a settlement depends on how the transaction is carried out. Does W have a genuine and wholly independent role?[120] It is suggested that W should retain the property for at least one year; that no decision be made as to whether or not to create a settlement at the time of the gift from H to W; *a fortiori* no decision should be made on the terms of the trust; and W should receive independent legal[121] advice on any proposed gift to a settlement.

*Example 2*

(1) Trustees of a trust (with a UK domiciled settlor) appoint property to a beneficiary ("B") (not UK domiciled); and

(2) B gives the property to a new trust.

In principle, the settlor of the new trust will be B, not the settlor of the old trust.[122] But it is different if B is acting at the behest of the settlor.[123]

Watch the trust law rule of fraud on a power, and *Furniss v Dawson*. It would be better if the terms of the new settlement are different from the terms of the old. For an (almost unbelievable) example of botched execution of this scheme, see *Anker-Petersen v Christensen* [2002] WTLR 313.

---

120 See 69.4 (Gift from A to B followed by gift to trust by B).

121 W may also need tax advice, but what matters here is that W has independent advice on the property law aspects of the gift.

122 See 69.6 (Appointment from old trust to B followed by gift to new trust by B).

123 See 69.5 (Trust created by B at request of A).

CHAPTER SEVENTY

# SITUS OF ASSETS FOR IHT

## 70.1 Concepts of situs

Situs[1] of assets is relevant for many tax and some non-tax purposes, of which the most important are IHT excluded property and the CGT remittance basis.[2]

Situs (like domicile) is in origin a concept of private international law (or conflict of law) which has been adopted for tax purposes. The rules are laid down by the common law. The common law rules apply for tax, except so far as modified by specific rules in tax legislation.

IHT situs is almost entirely based on the common law rules. These are discussed in this chapter. Some IHT double tax treaties override the usual IHT situs rules.[3]

CGT has statutory situs rules which cover most situations, and the common law is only needed to fill in a few gaps. So CGT situs is best regarded as a separate subject, though in a few cases the common law/IHT principles still apply for CGT. Situs for CGT is discussed in the next chapter.

The rules which determine the location of a source of income for income

---

1 A note on terminology. The IHTA and TCGA generally refer to the "situation" of assets though the heading to s.275 TCGA refers to "location". Section 59 Stamp Act 1891 (repealed) used the term "locally situate". The concept in each case is the same. "Situs" has become adopted into legal English usage and should not be written in italics.

2 Other tax issues where situs may arise include (1) the ITA remittance basis and (2) foreign IHT and CGT credit relief. In most cases the issue is whether or not the asset is situated in the UK, and if outside the UK it does not matter where. However in cases of foreign IHT and CGT credit relief, it may be necessary to identify the state where assets are situated.

3 See 60.5 (Treaty situs).

tax purposes are different from situs.[4] For instance, dividends from UK situate shares may be foreign source income and vice versa; interest from a foreign situate debt may be UK source income and vice versa. Situs only occasionally matters for IT, but where it does, the common law rules discussed in this chapter will apply.

Strictly one should not refer to situs in the abstract, but to situs for a specific purpose (CGT, IHT, or whatever) but context may supply the reference, and in this situs means situs as determined by the common law rules which apply for IHT purposes.

### 70.1.1 *Commentary*

The situs of land and chattels seems obvious (but occasionally the law does not adopt the obvious solution). For intangible assets (shares, debts, etc.), the law must choose connecting factors to link the asset to a jurisdiction. There is a large choice of possible connecting factors, and the selection of the determining factor must sometimes be arbitrary.[5] One might think that it would not matter much what the rule was, as long as there is some rule and its application is clear. But the desirable rule (at least from the HMRC viewpoint) is one which minimises the scope for tax planning. The common law rules do not achieve that, and so this is an area of law with many anomalies. The common law situs rules are not well suited to serve as a territorial limitation for tax. It is not surprising

---

4 See 16.4 (Why does location of source matter?).

5 In *R v Williams* [1942] AC 549 the Privy Council said:

> Shares in a company are "things in action" which have in a sense no real situs, but it is now settled law that for the purposes of taxation ... they must be treated as having a situs which may be merely of a fictional nature.

Similarly, in *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.119 the situs rules were described as "legal fictions". It is of course true that an asset with no corporeal existence, such as a debt or other chose in action, has no material position in the material world. Nevertheless a better analysis is to say that "situs" (of a chose in action) is a metaphorical term describing an abstract concept. The situs of a chose in action is not "fictional", but perfectly "real" (or at least as real as concepts such as "residence" or "domicile" or indeed "chose in action") though the concept may be described as "technical" or (if one prefers a pejorative term) "artificial". Lawyers are entitled to use ordinary words in special senses and to call a situs (of a chose in action) a "fiction" is inapt and misleading. See J.H. Baker, *The Law's Two Bodies* (2001), Lecture 2 ("Legal Fictions"); Neil MacCormick, *Institutions of Law* (2007), p.136.

that the role of situs in private international law has decreased, and very few of the common law rules apply to CGT.

Amendment of the IHT rules is however difficult because of the problem of double inheritance taxation. To the extent that different states adopt the same common law situs rules, they effectively prevent double taxation which otherwise arises if state A regards an asset as situate in state A for IHT purposes and state B regards the same asset as situate in state B. That was perhaps why in 1974 CTT (now IHT) adopted the common law situs rules and not the CGT statutory situs rules. The disparities between CGT and IHT situs are not accidental.[6]

Two reforms would improve the position:

(1) Treat all assets other than UK land and securities as non-UK situate for the purposes of excluded property rules. That would be a simplification and it is most unlikely that the IHT charge on such assets of foreign domiciliaries brings in any significant tax. The abolition of stamp duty on UK situate property (other than securities) is a precedent.

(2) A counterside would be to introduce a charge on UK private residences held via non-resident close companies.[7] Rules analogous to the relevant property 10 year and exit charges would not work. Rules treating the shares of property companies as if they were UK situate are not practical. The rough and ready but workable solution is an entry charge on acquisition by such a company, avoidable by an election that the company should be regarded as transparent for IHT. The precedents are the 1.5% SDRT entry charge and the election out of the POA charge. The SDLT regime would provide the administrative structure for enforcement. Double taxation aspects would need consideration but would not be insoluble.

## 70.2 Every asset has one situs

Under the common law rules, every asset is situate in one jurisdiction[8] and

---

6 It could of course arise that state A regards an asset as situate in state A for CGT purposes and state B regards the same asset as situate in state B; however that is less likely to cause problems in practice, because (among other reasons) a DTA following the OECD model convention will normally determine which state imposes CGT.

7 To be EU compliant the same rules would have to apply to UK resident close companies, but in practice such companies do not usually acquire a UK residence.

8 *English Scottish and Australian Bank v IRC* [1932] AC 238.

only in one jurisdiction. In *R v Williams* [1942] AC 541 at p.559 the Privy Council said:

> Property, whether movable or immovable, can ...[9] have only one local situation.[10]

This rule is self evidently necessary since the purpose of situs rules in private international law is to resolve conflicts of jurisdiction, and one purpose in tax is to avoid double taxation. It is also implicit in the word situs: the physical fact that a physical object (above the level of quantum physics) can be situate in only one place. I stress this as some old cases considered assets could be dual situate. They no longer represent the law.

## 70.3 Situs of shares: general principle

In *Brassard v Smith* [1925] AC 371 the Privy Council said:

> This is, in their Lordships' opinion, the true test. Where could the shares be effectively dealt with?

In *R v Williams* [1942] AC 541, the Privy Council approved this passage and said:

> It may be useful here to make some general remarks on the meaning and effect of the principle laid down in *Brassard v Smith* and in the *Erie Beach* case. The first observation is that the phrase used in laying down the principle clearly means "where the shares can be effectively dealt with as between the shareholder and the company, so that the transferee will become legally entitled to all the rights of a member," e.g., the right of attending meetings and voting and of receiving dividends. If the phrase only meant "effectively dealt with as between transferor and transferee of shares," the test would obviously be almost completely

9 The omitted words are "... for the purposes of determining situs as among the different provinces of Canada in relation to the incidence of a tax imposed by a provincial law upon property transmitted owing to death". These words do not qualify the general principle as there is only one common law situs concept and (subject to statute) that applies for all purposes.

10 Likewise *Laidlay v Lord Advocate* (1890) 15 App Cas 468 at p.483: "locality cannot be both England and India—the choice has to be made between the two".

> useless, since the rights of a shareholder as between himself and a transferee can, speaking generally, effectively be transferred in any part of the world.

These cases concerned registered shares, but the comments (cited in the IHT Manual at 27122) are not so restricted and apply to bearer shares also.

The question which follows from this test is: How to identify the place where shares can be dealt with?

## 70.4 Situs of registered shares

### 70.4.1 *Place-of-register rule*[11]

The IHT Manual provides:

> **27121 Usual location**
> For the purposes of Inheritance Tax an inscribed[12] and registered security[13] (a shareholding in a Company for example) is located at the place where the title of ownership must be registered – see *Att Gen v Higgins*.[14]...
> It makes no difference that the business of the company is totally administered outside the country in which the register is kept: see *Baelz v Public Trustee* [1926] Ch 863.

I call this "**the place-of-register rule**".[15] This is a straightforward application of the general principle that shares are situate where they can be dealt with.

It is necessary for completeness to mention *Macmillan v Bishopsgate Trust (No. 3)* [1996] 1 WLR 387. This concerned a company incorporated and with its share register in New York. Auld LJ adopted the place-of-register rule: see p.411E. Alarmingly, Aldous LJ stated without

11 See Robert Venables QC, "The Situs of Registered Shares", PTPR Vol 9 p.115.

12 Author's footnote: "Inscribed" securities are those whose legal owners are inscribed in a register; the term is, as far as I can see, only an old-fashioned synonym of "registered".

13 Author's footnote: "Securities" here includes shares as well as debt securities.

14 (1857) 2 H & N 339 accessible on *www.kessler.co.uk*. This was approved in *AG v Winans (No. 2)* [1910] AC 27.

15 A "register" is only a record of stockholders and their assignees: see *Ramsay v IRC* 54 TC 101 at p.133.

discussion that the situs is the place of incorporation: p.423F. Staughton LJ inclined to the same view but expressed himself more cautiously: p.405E. However, this was a case where the court did not have to decide between place-of-register and place of incorporation as rival situs rules. The court's attention was not on the point and the relevant cases were not discussed. In the circumstances, it is suggested that no weight whatsoever should be given to these dicta. The IHT Manual tactfully ignores this case. Thus the majority of the Court of Appeal have accidentally introduced into the law if not an uncertainty at least an inconsistency which needs to be explained away. But there it is.

### 70.4.2 *Overseas branch register*

Multiple registers raise a problem for a place-of-register rule. If there is only one register applicable to the shares in question, that is where the shares can be dealt with. The IHT Manual provides:

> **27122 Branch registers**
> If a company has more than one register, and any changes must be recorded on one of the registers, the relevant securities are situate in the place where that register is required by law to be kept – not in the place of the head office of the company.

This requires an examination of company law to identify which of the two registers is applicable. The IHT Manual summarises the company law background:

> **27124 Overseas branch registers of UK companies**
> Under UK law a share cannot, at one and the same time, be registered on more than one register.
> The rule applies even as regards overseas branch registers (these are branch registers of members resident in the country to which the register relates). Under [s.132 CA 2006], a company that maintains an overseas branch register has to keep a duplicate thereof at the place where its principal register is kept.
> And "no transaction with respect to any shares registered in an overseas branch register shall, during continuance of the registration, be registered in any other register" – see [s.133 CA 2006].
> Shares on the overseas branch register of a UK company are therefore situated, for Inheritance Tax purposes, in the country where the register

> is kept.
> Under [s.129 CA 2006] a company may maintain an overseas branch register. The countries and territories in which overseas branch registers may be kept are specified in [s.129 CA 2006]. [S.129 CA 2006] enable[s] the provisions as to overseas branch registers to be extended by Order in Council to countries within the jurisdiction, or under the protection, of the Crown.

This view is confirmed by s.133(3) CA 2006:

> An instrument of transfer of a share registered in an overseas branch register—
> (a) is regarded as a transfer of property situated outside the UK.

### 70.4.3 *Transfer office*

Another solution may be that the company has only one register and merely a "transfer office" elsewhere:

> **27125 - Duplicate or multiple registers of non-UK companies** [October 2007]
> Some overseas company laws allow a shareholder to use duplicate (or multiple) share registers to record the transfer of their securities.
> The South African Companies Act, for example, authorises South African companies to maintain branch registers in any foreign country. Shares can be transferred on any register, but no transfer of shares passing on death can be registered in the UK until any death duty claimed by South Africa on the shares has been paid.
> Remember that some registers merely record information about transfer of securities without providing the legal basis for the transfer. These registers do not affect the locality of the security (IHTM27071)
> Details of transfer arrangements given in the Stock Exchange Year-Book[16] do not always make the position clear and, if necessary, you must ask the taxpayer to explain.

16 Author's note: The Stock Exchange Official Year Book has long ceased publication; it was first published in 1876 and the most recent edition I have been able to trace was 1994.

### 70.4.4 *Two effective registers*

If that fails one must look for another territorial connection:

> **27125 - Duplicate or multiple registers of non-UK companies** [October 2007]
> Where there are many registers the register upon which the shares would normally be dealt with in the ordinary course of business is the register that determines the locality of the security – see *Treasurer of Ontario v Aberdein* [1947] AC 24.

But which is the register which would normally be used? The Manual explains:

> If the share certificates are here, one of the alternative registers is here, and transfers can be effected here the shares will normally be regarded as legally situate here (*Re Clark, McKechnie v Clark* [1904] Ch 294).

*R v Williams* [1942] AC 541 is another example: the location of a (signed and endorsed) share certificate acting as a tie-breaker between two competing jurisdictions (each with a share register).[17] The Manual continues:

> This is only an assumption and as such can be rebutted by the particular circumstances of the case (see *Standard Chartered Bank Ltd v IRC* [1978] 1 WLR 1160). But if tax is offered on shares in a foreign company with transfer facilities in the UK, you can assume that the register here is the one on which the shares would normally be dealt with in the ordinary course of business.

### 70.4.5 *Company without "register" (in true sense)*

The IHT Manual provides:

---

17 IHT Manual para 27150 [October 2007]:
"If the company has more than one register on which the holding could be effectively transferred, and the share certificates are found at the material time at a place where a register is located, the holding is for Inheritance Tax purposes situated at that place – see *R v Williams* [1942] AC 541. Cases where none of the effective registers is located where the certificates are found must be referred to TG or your Team Leader, in Scotland."

**27123 Effectiveness of register**
If shares are entered on a list, which could be called a register, but the register does not affect the legal holding of the security, the place where the list is situated does not affect the locality of the security.
In *Erie Beach Co Ltd v Att Gen for Ontario* [1930] AC 161, certain shares (on the view that they could, under the Ontario Companies Act, be effectively dealt with only in Ontario) were held to be situated in that province for the purposes of Ontario Succession Duty, notwithstanding that they had in fact been entered on a "register" opened elsewhere.
It was explained however, in *R v Williams*, that the *Erie Beach* decision was based on the finding that the particular shares in question could be dealt with effectively in Ontario only. It is not an authority for holding that any company subject to the Ontario Companies Act is precluded from establishing registers outside Ontario on which effective transfers can be made, and Ontario companies like other Canadian companies may establish branch registers kept by "transfer agents" which are equivalent to duplicate or multiple registers (IHTM27125).

### 70.4.6 *Register of share transfers*

The IHT Manual provides:

**27127 Transfer agencies**
Many companies incorporated under Canadian law keep a register, or branch register, of **transfers kept by one of the company's duly appointed "transfer agents", not a register of shareholders as with UK companies**.
When we ask ourselves "where could the shares be effectively dealt with" (*Brassard v Smith*), we must find out where the company has established transfer agents to operate a register, or branch register, of transfers. There usually is more than one such transfer agent with whom it is open to a shareholder to transfer his holding, regardless of where the relevant share certificate was issued; some (but relatively few) companies have such transfer agents in the UK. These equally available transfer arrangements in various places are said to be "interchangeable", and for the purposes of locality in relation to Inheritance Tax can be taken as equivalent to duplicate or multiple registers (IHTM27125).
This applies to shares registered in the name of the taxpayer or his nominee (including marking names), and applies whether or not the share certificates are endorsed in blank (*Treasurer of Ontario v Aberdein* [1947] AC 24). This will apply whether the company in question was incorporated under Canadian dominion or provincial law.

### 70.4.7 *Miscellaneous*

The IHT Manual provides:

**27128 Branch registers of British Colombian and Newfoundland companies**
Branch registers can be kept outside the provinces so the location of the branch register will determine the locality of any shares registered thereon.
In certain circumstances shares registered on a branch register in the name of a **deceased** member can be transferred only on a duplicate register kept at the registered office of the company. This restriction does not affect locality for Inheritance Tax purposes on the deceased's death.

**27129 - Canadian companies: Nova Scotia companies**
Every company incorporated under the laws of Nova Scotia must keep a duplicate of any branch register kept outside the province at its registered office in the province. As regards transfers inter vivos, a distinction is understood to arise between:

1. Companies incorporated under the Nova Scotia Companies Acts, in which case a transfer inter vivos on a branch register appears to be valid and effectual in itself. Accordingly if the securities are registered on a branch register in the UK they must be treated as situated in the UK.
2. Companies incorporated under other Acts, in which case no transfer on a branch register is effectual until entered in the principal register. On that footing, registered securities may be regarded as situated in Nova Scotia, even though they may be registered on a branch register in the UK.

This restriction does not affect locality for Inheritance Tax purposes on the deceased's death.

## 70.5 Registered debt securities

The rules for debt securities[18] are, in general, the same as for registered shares; the passage from the IHT Manual set out above refers to securities, generally meaning both shares and debt securities.

18 I use the term "debt securities" to mean securities which are not shares.

### 70.5.1 *Place-of-register rule v specialty rule*

Shares are not "specialties" so the specialty rule cannot apply to them.[19] A debenture may be a specialty so the question arises as to the priority between the place-of-register rule and the specialty rule. The IHT Manual provides:

> **27079 Bonds and debentures under seal**
> Debentures if under seal, are specialty debts, locally situated where the document is found. So, also, are debts due from the Crown, or under a statute, whether under seal or under hand, and even when they are secured by registered bonds.

Thus for debentures the specialty rule overrides the place-of-register rule. For HMRC views as to which securities are "specialties", see 70.13.3 (Situs of specialty).

## 70.6 Securities of international organisations

For convenience this section deals with CGT situs as well as IHT situs, as the rules are the same.

### 70.6.1 *Designated organisations*

Section 126 FA 1984 provides power to designate:

> (1) Where—
> (a) the UK or any of the Communities is a member of an international organisation; and
> (b) the agreement under which it became a member provides for exemption from tax in relation to the organisation, of the kind for which provision is made by this section;
> the Treasury may, by order made by statutory instrument, designate that organisation for the purposes of this section....
> (4) The Treasury may, by order made by statutory instrument, designate any of the Communities or the European Investment Bank for the purposes of this section, and references in subsections (2) and (3) above to an organisation designated for the purposes of this section include

19 See 70.13 (Specialty obligation).

references to a body so designated by virtue of this subsection.

Section 126(2)(3) set out the consequences of designation:

(2) Where an organisation has been so designated, the provisions mentioned in subsection (3) below shall, with the exception of any which may be excluded by the designation order, apply in relation to that organisation.
(3) The provisions are—
(b) any security issued by the organisation shall be taken, for the purposes of capital transfer tax to be situated outside the UK;

The IHT Manual provides:

**27141List of non-UK situs organisations** [October 2007]
Unless in bearer form and situated physically in the UK[20] securities issued by the following organisations are effectively outside the charge to IHT where:
1. they form part of the estate of a person domiciled outside the UK; or
2. they are comprised in a settlement and the settlor was not domiciled in the UK at the time the settlement was made, namely:
[a] the International Monetary Fund: The Bretton Woods Agreement Order in Council, 1946 ((SR & O) 1946 No 36)
[b] the International Bank for Reconstruction and Development[21]: The Bretton Woods Agreement, as above
[c] the International Finance Corporation: The International Finance Corporation Order, 1955 (SI 1955 No 1954)
[d] the International Development Association: The International Development Association Order, 1960 (SI 1960 No 1383)

This list of organisations may not be exhaustive if you receive a claim for exemption in respect of a security issued by any other international body refer the papers to TG or your Team Leader (Scotland).

The following organisations have been so designated.
1. The Asian Development Bank: The International Organisations (Tax Exempt Securities) Order 1984 (SI1984/1215) made on 2 August 1984
2. The African Development Bank: The International Organisations (Tax Exempt Securities) (No 2) Order 1984 (SI1984/1634) made on 22 October 1984
3. The European Community; The European Coal and Steel Community; The European Atomic Energy Community; The European Investment Bank: The European Communities (Tax Exempt Securities) Order 1985 (SI 1985 No 1172)

20 I do not understand the basis for this exception, but in practice the point may never arise.
21 [Author's footnote] More commonly known as the World Bank.

made on 25 July 1985 in respect of a. and d.
4. The European Bank for Reconstruction and Development: The International Organisations (Tax Exempt Securities) Order 1991 (SI1991/1202) made on 16 May 1991.
Accordingly any security issued by the above mentioned organisations automatically has a foreign situs for IHT where the event occurred on or after the date of the order.

## Section 265 TCGA provides:

(1) Where—
(a) the UK or any of the Communities is a member of an international organisation; and
(b) the agreement under which it became a member provides for exemption from tax, in relation to the organisation, of the kind for which provision is made by this section;
the Treasury may by order designate that organisation for the purposes of this section.
(2) The Treasury may by order designate any of the Communities or the European Investment Bank for the purposes of this section.
(3) Where an organisation has been designated for the purposes of this section, then any security issued by the organisation shall be taken, for the purposes of this Act, to be situated outside the UK.

## The CG Manual provides:

**12440 Types of asset (2): Shares and securities etc** [November 2009]
*Securities of International/European Organisations*
Special rules are provided for dealing with securities issued by certain designated international organisations.
Section 265 TCGA 1992 allows the Treasury to designate for special treatment certain organisations whose membership includes the UK or any of the Communities of which the UK is a member. Once such an organisation has been designated any securities issued by it are deemed for the purposes of Capital Gains Tax to be located outside the UK. The list of organisations that have been designated under this provision is as follows.
- International Bank for Reconstruction and Development
- Asian Development Bank
- African Development Bank
- The European Economic Community

### 70.6.2 *Inter-American Development Bank and OECD support fund*

Section 131 FA 1976 provides:

> (1) The following provisions of this section shall have effect on the UK's becoming a member of the Inter-American Development Bank ("the Bank").
> (2) A security issued by the Inter-American Development Bank shall be taken for the purposes of capital transfer tax … to be situated outside the UK.

Section 266 TCGA provides a corresponding CGT exemption:

> A security issued by the Inter-American Development Bank shall be taken for the purposes of this Act to be situated outside the UK.

Section 4 OECD Support Fund Act 1975 provides:

> (1) A person not resident in the UK shall not be liable to income tax in respect of income from any security issued by the support fund established by the Agreement if he would not be liable but for the fact that—
> (a) the security or income is issued, made payable or paid in the UK or in sterling; or
> (b) the support fund maintains an office or other place of business in the UK;
> and such a security shall be taken for the purposes of capital transfer tax and capital gains tax to be situated outside the UK.

## 70.7 Bearer documents

The place-of-register rule cannot apply to bearer shares as there is no register of shareholders.

### 70.7.1 *Bearer shares*

The general principle is that the shares are situate where they can be legally transferred: see 70.3 (Situs of shares: general principle). Applying this rule it is clear that bearer shares are situate where the certificate is held.

### 70.7.2 *Bearer debt securities*

The leading case is *Att Gen v Bouwens*.[22] This concerned foreign bearer bonds which were marketable in England and it was not necessary to do any act outside England in order to transfer them. Lord Abinger said at p.192:

> No ordinary[23] in England could perform any act of administration within his diocese, with respect to debts due from persons resident abroad, or with respect to shares or interests in foreign funds payable abroad, and incapable of being transferred here; and therefore no duty would be payable on the probate or letters of administration in respect of such effects. But, on the other hand, it is clear that the ordinary could administer all chattels within his jurisdiction; and if an instrument is created of a chattel nature, capable of being transferred by acts done here, and sold for money here, there is no reason why the ordinary or his appointee should not administer that species of property. Such an instrument is in effect a saleable chattel, and follows the nature of other chattels as to the jurisdiction to grant probate.

The situs of bearer debt securities is where the document is to be found. Dicey agrees.[24] HMRC also agree. The IHT Manual provides:

> **27076 Bearer securities**[25]
> A security which is represented by a document of title, the property in which passes by delivery, is locally situated, for Inheritance Tax purposes, in the place where that document is found at the material time. *Att Gen v Bouwens*,[26] *Winans v Att Gen* [1910] AC 27.

---

22 (1838) 4 M & W 171 accessible *www.commonlii.org*. This was approved in *Att Gen v Winans (No. 2)* [1910] AC 27.

23 Situs governed the jurisdiction of the Ordinary (an ecclesiastical office). The jurisdiction passed to the Court of Probate in 1857, and to the Chancery Division in 1875, but nothing turns on that.

24 *The Conflict of Laws* (14th ed, 2006), para 22-044. But for a dissenting view, see 70.11 (Letter of allotment of shares).

25 This passage applies to both shares and debt securities.

26 (1838) 4 M & W 171 accessible *www.kessler.co.uk*.

### 70.7.3 *Eurobonds*

HMRC have commented specifically on the situs of Eurobonds in a passage which I mention for completeness but which adds nothing to the general principles:

> We have also explained that, in the Revenue's view, the *situs* for IHT purposes of Eurobonds and similar fungibles in any issue depends on the terms of that issue and, in particular, where under those terms the bondholder's rights to or rights of action for property exist. Those rights will be determined by reference to general, not Revenue, law principles. So where title to the rights under an issue passes by delivery, the *situs* for IHT purposes of such rights is where the instrument of title is physically.[27]

## 70.8 Intermediaries and depositories

### 70.8.1 *The securities law background*

In order to determine situs of an asset one must of course identify the asset and its legal nature. The Law Commission explain:

> 2.7 ...immobilisation entails depositing securities in paper form with a depository linked to a settlement system so that they are held indirectly. Where a new issue of securities is immobilised from the outset, the entire issue will be typically constituted by a single 'global' or 'jumbo' certificate which remains in the vaults of the depository.[28] The

---

27 [1994] PCB 139. For completeness, the passage concludes:
"There is little we can add to the foregoing guidance. In particular we cannot offer any undertaking about the likely future IHT liability which may arise in respect of rights to particular Eurobond issues currently extant or which may be issued in future. However, in order to be as helpful as possible, we can say that where a Eurobond issue satisfies the terms and conditions of section 124 ICTA 1988, the Revenue will treat for IHT purposes the rights and interests of the beneficiary-investors in such issues as rights to and interests in a bearer security."
A eurobond within s.124 (now repealed) had to be a bearer security, so this does not take matters much further.

28 Footnote original: Interests in the global note may be exchangeable for definitive certificates, so that the investor can acquire a direct relationship with the issuer. Usually, however, the global note is intended to be permanently immobilised and cannot be split into definitive certificates other than in extreme circumstances, such

depository (or its nominee) becomes the owner of the securities either by registering the securities in its name with the issuer (in the case of registered securities) or by physical possession of the global certificate (in the case of bearer securities).

2.8 Participants in the settlement system keep interests in the immobilised securities by holding an account with the securities depository. These account holders are able to transfer and pledge their interests in the securities through book entries on the depository's books rather than by re-registration or by delivery of the underlying securities. Following the computerisation of settlement systems in the late twentieth century, the depository's 'books' that record ownership are now electronic records....

2.11 Recording investors' interests in securities as electronic bytes of information enables these interests to be transferred with ease from one account holder to another simply by a credit and debit in the computerised accounts of an intermediary. As long as the legal system recognises this as a valid transfer of an interest in securities, traditional formalities associated with the transfer of underlying securities (for example, the execution of stock transfer forms and the issuance of new certificates) can be avoided. Greater transferability of securities enhances liquidity and consequently their value.

**Pooled Accounts**

2.17 ... Where an intermediary holds fungible securities for more than one investor it will typically pool these securities in a single client account. To do so, the intermediary opens an account with the issuer or intermediary above it in its own name and records in its own books each individual investor's allocation in the pooled account. In most legal systems, the only reference to an investor's specific allocation is made in its intermediary's accounts and not in the accounts of any higher-tier intermediary or in the register of the issuer...

**Central Securities Depositories in indirect holding systems**

2.19 The efficiencies generated by intermediation led the Group of Thirty to recommend in 1989 that each domestic market should establish a central securities depository (CSD) to hold both physical and dematerialised securities in the relevant market. Immobilisation of securities is therefore centralised in a single depository (or through a nominee of the CSD). An indirect holding system based on the immobilisation of securities in a domestic CSD is the most common

as the failure of a bond trustee to act on the instructions of the investors upon a default.

model in advanced countries[29] and there are about thirty systems operating in this manner in Europe alone. As we explain below, the UK does not operate a centralised depository for domestic securities in this way.

National CSDs do not usually raise issues for situs as the situs of the register of the CSD is usually the same as the situs of the underlying assets. However the issue does arise for international CSDs and other intermediaries.

2.20 In addition to national CSDs, Euroclear in Brussels and Clearstream in Luxembourg operate as international central securities depositories (ICSDs). ICSDs were originally established to manage clearing and settlement of Eurobonds for which there was no supporting market infrastructure. Since their creation over thirty years ago, the business of ICSDs has expanded to also cover most domestic and internationally traded securities. Euroclear and Clearstream maintain links to CSD counterparts in all the significant domestic financial markets, facilitating cross-border securities trading, clearing and settlement...[30]

The Law Commission then turn to the legal analysis. This is complicated by the variety of jurisdictions which may be involved. I concentrate on Belgium and Luxembourg as they are the homes of Euroclear and Clearstream. The Law Commission say:

**LEGAL ANALYSIS OF INTERMEDIATED SECURITIES**

2.24 Intermediation has had a substantial effect in transforming the legal nature of investor's rights in securities. In the UK and elsewhere, the traditional analysis of an investor's rights arising from its direct relationship with an issuer and based on its physical possession of securities or by an entry in the issuer's register no longer reflects the reality of the market place....

2.31 Belgium[31] and Luxembourg[32] are each home to major ICSDs

29 Footnote original: In America, the Depository Trust and Clearing Corporation has custody, through its nominee Cede & Co, of between 60% to 80% of all publicly traded securities in the US. In 1999, this amounted to securities worth $23 trillion.

30 Law Com., *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008).

31 Footnote original: Belgian Royal Decree No. 62, as co-ordinated by Royal Decree of 27 January 2004.

32 Footnote original: Luxembourg Law of 1 August 2001 on the circulation of securities and other fungible instruments, Articles 6.7 and 15.

(Euroclear and Clearstream respectively) and both have recently clarified their respective securities laws. Investors that hold securities through an intermediary in an omnibus account are treated as having a co-ownership right in the pool of fungible securities, exercisable only against the intermediary. Should the intermediary fall insolvent, the investor is given a right of revendication, that is to say, a claim for the return of property enforceable against the intermediary and its creditors...

**Direct enforcement versus indirect enforcement**

2.35 In all common law jurisdictions (such as the UK and the US) and a number of civil law countries (for example Belgium and Luxembourg), an investor that holds through an intermediary is unable to exercise the rights it may have in the underlying securities directly against the issuer of those securities.[33] The investor can only enjoy the fruits of its investment by enforcing its rights against its intermediary. Furthermore, the investor will be generally prohibited from making a claim against securities held in the account of a higher tier intermediary but must rely on the contractual and fiduciary obligations of its own intermediary to pursue such claims....

2.49 The effect of commingling securities in a pooled account is generally to preclude the continuing existence of direct property rights of individual owners in the specific securities held prior to commingling...

LEGAL PROTECTION BASED ON CO-OWNERSHIP

2.51 In a number of EU Member States, account holders are given proprietary rights (or the equivalent protection) by treating their interests in a commingled account as co-ownership (or co-proprietary) interests in a fungible pool.

2.52 In Belgium[34] and Luxembourg,[35] statute converts what would otherwise be a mere contractual claim against the intermediary into an intangible co-ownership right in a pool of fungible book-entry securities held by the intermediary.[36]

A note on terminology. It is apparent from the above that the terms "depository" and "intermediary" may be used synonymously. I prefer the word **"intermediary"** as an asset may be held through a number of

33 Footnote original: Unless the issuer permits otherwise by contract or provisions in a deed poll or trust deed.

34 Footnote original: Belgium Royal Decree No 62, Article 2.

35 Footonte original: [Luxembourg] Securities Act 2001, Article 7.

36 Law Com. *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008).

intermediaries and "depository" only seems apt for the first of the chain.

I use the word **"investor"** to describe the ultimate holder of the securities through one or more intermediaries. I refer to the investors assets as **"intermediated securities"** but without prejudging the issue of whether those assets are properly described as securities in the normal sense of that rather vague word. I refer to the asset held by the ultimate depository as **"the underlying security."**

### 70.8.2 *Situs*

There are no relevant statutory provisions, so the common law rules apply for IHT.

The relevant principle is that an asset is situate where it can be dealt with. An intermediated security is dealt with (ie transferred) in the jurisdiction of the intermediary. That is the jurisdiction where litigation over the transfer of the intermediated security would normally take place. So that is the situs of the intermediated security; the situs of the underlying asset is irrelevant.

It might be argued that since a simple bare trust or nomineeship is transparent for IHT situs[37] the situs of the investor's asset, the intermediated security, must be that of the underlying security. It is in principle correct the underlying security is held on trust, though of course that does depend on the documentation and law involved. However that trust not a simple bare trust since it allows pooling and change of title is effected by registration; in fact it is not properly described as a bare trust in the strictest sense of that expression.

Dicey agrees:

> ... the general principle is that the *situs* of a chose in action is where it is recoverable or may be enforced. ... Furthermore, there is an analogy between immobilised securities and registered securities (which are normally regarded as situated where the register is located). Accordingly, the *situs* of immobilised securities should be regarded as the place where the depository is established and where it keeps the database in which the entitlements of the depositors are recorded.[38]

---

37 See 70.25 (Interest under bare trust or nomineeship).

38 14th ed para 22-043. This view is enthusiastically supported by Benjamin, *Interests in Securities* (2000), Chap 7. See too an interesting posting to the Trusts Discussion Forum V2 # 74 (Peter Cushen).

This is also supported by Canadian authority:

> The place where the central securities depository control account is located could [and should] be considered the situs of "dematerialized" securities. In a multi-tiered holding system, the account would be situated at the financial investment intermediary on whose books the interest of the debtor appears. This is the place where the record that determines title is to be found.[39]

The Law Commission agree:

> 21.6 The concentration of the investor's interests into one account *with a single situs* can also greatly simplify conflicts of laws issues. This is of particular benefit to lenders wishing to take security over a portfolio of securities. Provided that the choice of law rules applied to the different intermediated securities are clear, the lender need only concern itself with the perfection requirements of the jurisdiction in which the account is located rather than the requirements of each of the jurisdictions applicable to the various underlying securities.[40]

Thus there is a substantial difference between the situs of the intermediated security (the asset held by the investor) and the situs of the underlying securities. However such differences are not surprising since, as the Law Commission say, "Intermediation has had a substantial effect in transforming the legal nature of investor's rights in securities." Investors may ignore the difference between intermediated securities and underlying securities, but if so they may be surprised on the insolvency of an intermediary, as actually happened in the case of Lehman Brothers.

### 70.8.3 *HMRC view*

HMRC take a different view. The IHT Manual provides:

---

39 *Re Bloom* [2004] BCSC 70, 27 BCLR (4th) 176, accessible *www.canlii.org*.

40 Law Com. *The UNIDROIT Convention on Substantive Rules regarding Intermediated Securities Further Updated Advice to HM Treasury* (May 2008). *http://www.justice.gov.uk/lawcommission/docs/intermediated_securities_advice_May2008.pdf*

> **27077 Eurobonds and American depository receipts**
> The situs of securities dealt with through computerised clearing systems (e.g. Euroclear; CEDEL [which became Clearstream in 2002]) is regarded as determined by the terms of issue of the particular security.
> ...

That is, HMRC regard clearing systems as transparent for situs; what matters is the situs of the underlying security. Another HMRC statement makes the same point:

> ... where a financial institution or other intermediary has purchased Eurobonds or similar fungibles through Euroclear or Cedel [now Clearstream] on behalf of a client-investor, the Revenue will treat the financial institution or intermediary as the nominee or agent of the client-investor, unless the terms of the particular issue prescribed otherwise. So, save in the excepted circumstances, the Revenue will look through the intermediary and treat the beneficiary-investor as owning the underlying Eurobonds or similar fungibles.[41]

The CG Manual discusses the issue under the heading "depository receipts". The Manual first discusses the securities law background and practice:

> **50240 Depository receipts** [April 2010]
> You may come across assets referred to as Depository Receipts (DRs). The commonest are American Depository Receipts (ADRs).
> DRs are used as substitute instruments indicating ownership of securities such as shares. Although DRs may be owned by anyone, they are designed primarily to enable investors to hold and deal in shares of companies located in countries other than their own. Such activities might otherwise be inhibited by difficulties in transferring original share certificates from one country to another. The investors hold or trade the DRs rather than the share certificates themselves.
> A person holding shares for which DRs are available can convert them into DR form by depositing the share certificates with a local branch of a depository (a financial institution such as a bank). The depository issues a DR. This document certifies that the depository, or an appointed custodian in the country of the underlying shares, holds the share certificates and that the owner of the DR is entitled to the share

41 [1994] PCB 139.

> certificates on surrender of the DR. The precise detail of the arrangements may vary, but the holder of a DR will generally retain the rights attaching to ownership of shares, such as voting rights, and will receive via the depository any dividends on the shares, converted into the investors' local currency, or US Dollars for an ADR.
> The holder of shares in DR form may at any time cancel the arrangement by asking for delivery of the share certificates in respect of their underlying shares, and surrendering the DRs at a local branch of the depository.

A depository receipt is a form of intermediated security. The CG Manual continues:

> **50241 Depository receipts: Tax analysis** [April 2010]
> For capital gains purposes[42] the holder of the DR has two separate chargeable assets, namely
> [1] a beneficial interest in the underlying shares, and
> [2] the DR (being the document evidencing title, and comprising a number of rights as against the depository).

It is in principle[43] correct that the holder of a DR has a beneficial interest in the underlying shares and rights against the depository. It does not follow that these should be regarded as two separate assets. A DR should be regarded as a matter of general law as one asset and not two. Admittedly a DR confers a bundle of different rights, but that is also true of a share, a unit in a unit trust, an equitable interest, and most other types of property which are nevertheless regarded as single items of property and not as two or more distinct items. However, it does not matter as the Manual goes on to effectively ignore its two-asset analysis. In the view of the Manual, the only asset which matters is the beneficial interest in the underlying share:

> A disposal of shares in DR form is therefore in strictness a disposal of two separate assets. In general, however, the value of a DR may be expected to track closely that of the underlying shares. So the

42 Author's note: whether the holder of a DR has one or two assets is a question of general property law; it is not strictly correct to ask if a person has two assets "for CGT purposes". But nothing turns on that.

43 Though this strictly depends on the relevant law and documentation.

> consideration on any disposal may relate entirely, or almost entirely, to the shares themselves. In practice therefore you may not need to make any apportionment of base cost, or consideration received, on a disposal of shares in DR form.

Conversion to and from DR form is neutral for CGT:

> **50241. Depository receipts: Tax analysis** [April 2010]
> ... If a person 'converts' shares into DR form, there is no change in their ownership of the underlying shares, but they have acquired a second asset, the DR itself. If a person 'converts' their DR back into the underlying shares, there is again no change in their ownership of the shares, but there will have been a disposal of the separate DR asset. Normal TCGA principles would apply to this disposal. Normally there will be no chargeable gain on such an event.

This conclusion is not controversial, whatever the jurisprudential nature of a DR.

The CG Manual then turns to consider situs:

> **50243. Tax analysis – situation of assets** [April 2010]
> Although the DR itself may be issued outside the UK, you should not accept any suggestion that a disposal of shares in a UK registered company held in DR form by a non-domiciled person should give rise to chargeable gains only on a remittance basis, see CG25300+. It is to be expected that the great majority, or all, of any consideration on such a disposal will be attributable to the disposal of the beneficial interest in the shares themselves. The shares are, under Section 275(1)(e) TCGA, assets located in the UK, see CG12451, so the remittance basis will not apply.

There is a certain common sense in the HMRC view that situs is determined by the situs of the underlying asset. However, situs is not a matter of common sense, and that view cannot stand against the authorities set out above. So as a statement of the common law situs rules, this is not correct. (The CG Manual passage is correct for CGT purposes as specific CGT provisions reverse the common law rule; I consider that elsewhere.)[44]

It must be frustrating for HMRC to see a significant part of the economy

44 See 71.9 (Intermediaries and depositories).

taken out of the scope of IHT by means of clearing systems and depository receipts. Though in practice the loss of tax will be nil or next to nil, for well advised foreign domiciliaries will not hold UK situate investments, above the nil rate band, and for non-residents, IHT on such assets is largely uncollectable. Indeed the current law could aid the UK economy by encouraging UK investment, or at least it could do so if HMRC acknowledged it.

## 70.9 CREST

The Law Commission explain the securities law background:

> 2.21 Investment securities constituted under English, Scots and Northern Irish law can take either certificated or dematerialised ('uncertificated') form. CREST is the main securities settlement system in the UK and settles securities in uncertificated form. Unlike system operators in most national settlement systems, CREST does not hold domestically issued securities[45] as a central securities depository for account holders. CREST has no proprietary rights in the securities and is not treated as 'holding' these securities from the issuer on behalf of its participants. Rather, the CREST member is treated as holding directly from the issuer. This CREST member alone is entitled to exercise voting, dividend and other rights attaching to the shares and may do so directly against the issuer.
> 2.22 Instead, it is the register operated by CREST which, in the case of UK securities, is actually constituted by statute[46] as the sole legal record of entitlement to the securities. Although the issuer will maintain a regularly reconciled record of what is held in CREST for corporate events purposes, it is the CREST register that confers legal title and which determines the person or entity named in the register as the shareholder for company law purposes.

Thus holding a security through CREST (rather than in certified form)

45 Footnote original: That is, in the UK, Republic of Ireland, Isle of Man, Guernsey and Jersey.

46 Footnote original: For UK companies it is the entry in the CREST register that confers legal title on the owner: Uncertificated Securities Regulations 2001, SI 2001 No 3755 reg 24. For Irish, Manx, Guernsey and Jersey securities, the pre-2001 system still operates. Settlement is through CREST but legal title is transferred when the entry is made in the issuer's register.

does not make any difference as to situs.

## 70.10 Share certificate endorsed in blank

The IHT Manual explains the background law and practice as follows:

> **27150 Share certificates endorsed in blank** [October 2007]
> Certificates of many American and Canadian railroads and of certain other companies have a printed form of transfer and/or power of attorney endorsed, which enables the certificates, when the form is signed by the registered holder of the shares, to be transferred by delivery.
> It is common practice for such certificates to be "endorsed in blank", i.e. for the endorsement to be signed by the registered owner as transferor, the name of the transferee being left blank.
> Dividends are paid by the company to the registered owner, and if these shares have in fact changed hands by delivery, the beneficial owner for the time being recovers his dividends from the registered owner.
> Usually the shares are registered in the name of a recognised broker, bank, discount house, etc, known in England as a "good Marking Name" or, in America, as a "Street Name". This helps to make sure that the purchaser receives their dividends with minimum of trouble and risk.
> A list of good Marking Names recognised by the London Stock Exchange is printed in the Stock Exchange Official Year Book.[47]
> However the beneficial owner can have them registered in their own name, or in the name of some nominee other than a good Marking Name.

I doubt if this is still current practice, but set out the HMRC comments for completeness:

> The local situation of shares for Inheritance Tax purposes is determined as followings:
> [a] If the registered owner is a good Marking Name, the shares are situated where the register is kept, not where the certificates are found. ...[48]

47 Author's note: The Stock Exchange Official Year Book has long ceased publication; it was first published in 1876 and the most recent edition I have been able to trace was 1994.

48 Omitted text set out at 70.4.2 (Overseas branch register).

> [b] If the registered owner is the beneficial owner himself, or a nominee of the beneficial owner, or, in the case of settled property, the trustees of the settlement or their nominees, the rules are as at (a) above.[49]

The HMRC view is that one ignores the fact a share transfer form has been endorsed in blank. This is right, because the endorsed certificate does not alter the place where registered shares are dealt with as between shareholder and company: see 70.3 (Situs of shares: general principle). At this point the Manual becomes confused:

> [d] If the registered owner is neither a good Marking Name, the beneficial owner, nor any other of the persons named at (b) above, and the certificates are physically present in the UK at the material time, the shares are locally situated in the UK for Inheritance Tax purposes, (*Stern v The Queen* [1896] 1 QB 211).

I find it hard to see how [d] can apply: the registered owner will always be one of the persons named at [b] (beneficial owner or a nominee).

> Certificates of this kind, not containing any express obligation or promise, are not specialty debts – see the *Williams* case at [1942] AC 556.

That is correct.

## 70.11 Letter of allotment of shares

A letter of allotment confers the right to an issue of shares. The letter is normally transferable by delivery, just like a bearer security. One would have thought that the bearer security rule would apply. However, in *Young v Phillips* 58 TC 232 a letter of allotment in respect of a company

---

49 The Manual continues:

> "[c] In such cases it is considered that the legal and only title of the holder consists in his registration as owner. By bringing the certificates to the UK he is in a position to create, in a purchaser, an equitable interest in the shares which would be situated here, but until he does so the beneficial interest has not been severed from the legal interest so as to have a different locality."

This is garbled, or muddled and wrong.

with UK registered shares was held to be situate in the UK, not where the letter of allotment was held. This case concerned the common law rules before s.275A TCGA and is still relevant for situs for IHT, and for CGT in the case of foreign incorporated companies. Nicholls J cited the passage in *Att Gen v Bouwens* set out above[50] and said:

> From this it is apparent that for an instrument to be treated as analogous to a chattel for situs purposes more is required of it than mere transferability of title by delivery. A simple contract debt owed by a foreign debtor to a person resident in England and evidenced by a promissory note might be, and normally would be, freely and effectively transferable in England, but such a debt has as its situs the country where the debtor resides, not the place where the creditor lives or currently holds the promissory note. What is required is that in practice the value of the instrument can be realised by a sale of the instrument for money in the country where the instrument is found: the reason being that if an instrument in England could be so sold, the ordinary could properly and effectively administer that asset by selling it here, there being no need in such a case to have recourse to where the foreign debtor lived. When so saleable an instrument is in practice realisable in the same way as a saleable, valuable chattel, and hence, for situs purposes, it falls to be treated in the same way. ...

This approach requires an investigation into whether a market exists. The judge said:

> In the instant case there are no grounds for concluding that in practice the value of the letters of allotment, *which were issued with a life-span of a little over two months*, could have been realised by a sale of those documents for money wherever they were to be found. The Special Commissioners pointed out that no evidence had been led before them to prove that there existed a market in letters of allotment of shares in private companies. Having regard to the fact that shares in private companies may not be the subject of a public issue, they expressed themselves as being far from prepared to assume the existence of such a market. With that approach I agree. And it is to be noted that the "sales" of the letters of allotment which did take place in Sark were not arm's length transactions but were to purchasers wholly under the control of the vendors, and they had been prearranged even before the letters of allotment were issued. Accordingly,

50 See 70.7 (Bearer documents).

> applying the principles I have mentioned to the facts of this case, the renounceable letters of allotment in the UK companies do not fall to be treated as saleable chattels, realisable where they might be found from time to time. They are documents evidencing rights against UK companies, which rights were enforceable in the UK.
> (Emphasis added)

The requirement for "marketability" is not well founded in the cases, nor does it make good sense. A buyer could be found for any valuable asset in any community where private property exists and one buyer makes a market.[51] Whether a market exists is a question of fact, so application of the marketability test will result in assets moving from one jurisdiction to another as markets come and go. It seems conceivable that there was no market in Sark (population 600). But with improved communications markets are no longer local to jurisdictions, as was assumed in *Young v Phillips*. An asset can be sold anywhere.

It seems that *Young v Phillips* stretched the law in order to defeat a tax avoidance scheme, and in doing so has left something of a mess.

The CG Manual provides:

> **12440 Types of asset (2): Shares and securities etc** [November 2009]
> *Letters of allotment*
> Letters of allotment should be treated as located in the country where the company issuing the letters is registered. In the case of Young v Phillips 58 TC 232 bonus shares were issued in respect of registered shares located in the UK. The issue was made in letter of allotment form. The letters were then taken to the Channel Islands and disposed of there. It was held that the letters of allotment were located in the UK because they evidenced rights which were properly enforceable only in the UK.

Thus in the HMRC view *Young v Phillips* is relevant to letters of allotment only, it has no relevance to the situs of bearer debt securities or shares which are governed by cases of much higher authority. It is suggested that

51 This is self-evident, but for an illustration see *FGP v Union of India* 2004 (168) Excise Law Times 289 (Supreme Court of India) accessible *www.kessler.co.uk*. Contrast the sophisticated definition of "asset for which there is a liquid market" in ICAEW Tech 7/03 para 19 (Guidance on the determination of realised profits and losses in the context of distributions under the CA 1985).

the reasoning should be restricted to short life assets (such as the letters of allotment in that case which, it was stressed, had a life of only two months).

Even letters of allotment may be situate where the letter is situate, if there is a "market" there.

## 70.12 Simple contract debt

The basic principles are well established:

> As to the locality of many descriptions of effects, household and moveable goods, for instance, there never could be any dispute; but to prevent conflicting jurisdictions between different ordinaries, with respect to choses in action and titles to property, it was established as law, that judgment debts were assets, for the purposes of jurisdiction, where the judgment is recorded; leases, where the land lies; specialty debts, where the instrument happens to be; and simple contract debts, where the debtor resides ...[52]

The IHT Manual provides:

> **27091 Debts: contractual**
> In English law, a **simple**[53] **contract** debt is situated where the debtor resides: *Att Gen v Bouwens*;[54] *English, Scottish and Australian Bank Ltd v IRC* [1932] AC 238.

I call this **"the place-of-debtor rule"**. It can be traced back to Elizabethan times.[55]

A winding-up order against the debtor does not affect the situs of the debt,[56] but judgment against the debtor (turning the debt into a judgment debt) does do so.[57]

---

52 *Att Gen v Bouwens* (1838) 4 M & W 171 accessible *www.commonlii.org*.

53 [Author's note] A "simple" contract is one which is not a specialty. Different rules apply to judgment debts and bank accounts: see below.

54 (1838) 4 M & W 171 accessible on *www.kessler.co.uk*.

55 *English Scottish & Australian Bank v IRC* [1932] AC 238 at p.248.

56 *Wight v Eckhardt* [2004] 1 AC 147. In practice this issue will not usually arise.

57 See 70.16 (Judgment debt).

### 70.12.1 *Meaning of "residence" and dual resident debtor*

In order to apply the place of debtor rule one needs to determine where the debtor resides. For this purpose the test of residence for a company is not the usual test (management and control) but where the company carries on business:

> Now, when you are dealing with a corporation, you are dealing again with a legal notion, and you have to examine the question where the debt can be said to be situate. It appears to me plain that a corporation according to our law is deemed to reside for the purposes of suit in the place where it carries on business in its own name ...[58]

The *rule* has a certain logic, for situs of a simple debt is (or at least, in the past broadly was) decided by reference to jurisdiction, and jurisdiction over a company depends (or at least, in the past broadly depended) on its place of business and not its tax-residence.[59]

The *terminology* used in the rule is inapt, and it would be better if some other word were used, rather than using (or rather, misusing) the word "residence" in this non-standard meaning. But the terminology having arisen for historic reasons, there is not much to be done about it. It does not matter too much as long as one remembers that "residence" here has this non-standard meaning, in relation to companies. In practice it is rare for there to be any difference between tax-residence and residence under this test.

Where the debtor is dual resident, the place-of-debtor rule does not provide a solution. A tie-breaker is need, and the solution adopted in *New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101 is, where the debt was payable.

### 70.12.2 *Place-of-debtor rule v. jurisdiction where debt enforced*

Many cases simply state the place-of-debtor rule without giving any reason for it. There is no reason why the rule should have a reason, as any rule is bound to be arbitrary and any clear rule is better than none.

---

58 *New York Life Insurance v Public Trustee* [1924] 2 Ch 101 at p.120 followed *Kwok Chi Leung Karl v CED* [1988] STC 728 at p.733.

59 See Dicey *Conflict of Laws* (14th ed., 2006), para 14-059 and 30-007.

Some cases offer the reason that (1) the debt is situate where it can be enforced, and (2) it is enforced where the debtor resides.[60] However the background law (that is, conflict of law or private international law) has moved on considerably since *New York Life Insurance* was decided in 1924. It is now largely governed by international conventions, under which it is only very approximately correct to say that residence of the debtor is the test of jurisdiction, even though in many cases the end result is the same.[61] This raises a difficulty where the debtor resides in one jurisdiction but the debt is enforceable in another. Do we continue to apply the historic residence tests, or do we say the debt is situate where it is enforceable, ignoring the place that the debtor resides? *Raiffeisen Zentralbank v Five Star Trading* [2001] QB 825 notes the difficulty:

> [36] In the case of intangible property, English law has, for various purposes (e.g. inheritance), traditionally allocated to it a situs at the place of the debtor's residence. This is on the basis that the debtor is there directly subject to the coercive power of the courts to enforce the obligation. The location of a right of action in this or any way is, however, evidently artificial. Parenthetically, I add that "coercive power" would itself appear to be an unstable international concept, capable of widely differing interpretation ...
> [37] Modern conditions underline the artificiality of selecting supposed control at the debtor's residence as an appropriate basis for characterisation or choice of the relevant law to determine questions regarding the validity or effect as against the debtor of an assignment. Jurisdiction may be grounded on consent and various other bases apart from residence. Obligations are commonly enforced today not against the person, but against assets. Debtors often trade or hold some or even

60 *New York Life Insurance v Public Trustee* [1924] 2 Ch 101. It has also been suggested that the reason for the rule is that the debtor's place of residence is where the assets used to satisfy the debt will most probably be found: *New York Life Insurance* at p.114 following *Commissioner of Stamp v Hope*. But it would be better to say the rule has (and needs) no reason than to give such a slender reason as this, for where a debtor is resident in country A, but his assets are in country B, no-one suggests his debt is situate in country B.

61 The background private international law is discussed in slightly more detail in connection with the location of the source of interest, where HMRC suggest similar issues arise: see 17.4.5 (Impact of modern private international law). A full discussion of the background law would need a book to itself (which is another good reason for not using jurisdiction for the purposes of tax law).

> all of their assets overseas. Proceedings are as a result often begun and enforced against debtors in countries other than that of their residence, as in this case. The move towards single legal markets, like those involving countries party to the Brussels and Lugano Conventions, makes judgments readily exportable between countries.

It is considered that although jurisdiction was the historic reason for adopting the place-of-debtor rule, now the rule has been chosen, one should continue to look to residence, regardless of where the debt would be enforced. So a debt is situate where the debtor resides even though enforceable elsewhere, eg under an exclusive jurisdiction clause. Although the historic reason for the place-of-debtor rule no longer holds much if any validity, the rule is as good as any other. Well-established precedents are not overturned merely because their historic reason has become unsound. So it is considered that the law is settled.

## 70.13 Specialty obligation

### 70.13.1 *Meaning of "specialty"*

"Specialty" is an opaque technical term whose meaning can only be ascertained from the case law. Four categories of asset are "specialties":

(1) The paradigm example of a specialty is a debt due under a deed.
(2) The term also applies to deeds which create or record obligations which are not debts.[62] A life policy, contract for deferred annuity, capital redemption policy and the like are specialties if made by deed. Shares are not specialties.[63]
(3) The term also includes a debt incurred under a statute, whether or not it is a debt under a deed.[64]
(4) Certain debts are by statute given the nature of a specialty debt.[65]

---

62 In *Aiken v Steward Wrightson Agency* [1995] 1 WLR 1281 the term was applied to a contract by deed to provide services (and an action for breach of that contract was held to be an action "upon a specialty" so as to qualify for a 12-year limitation period).

63 *R v Williams* [1942] AC 541.

64 *Royal Trust Co v AG for Alberta* [1930] AC 144.

65 eg s.14(2) CA 1985: "Money payable by a member to the company under the memorandum or articles is a debt due from him to the company, and in England and Wales is of the nature of a specialty debt."

For a document to be a "deed" in English law it was formerly a requirement that the document must be sealed. The requirements under the Law of Property (Miscellaneous Provisions) Act 1989 are now that the deed must be signed, witnessed, delivered, and must "make it clear on its face that it is intended to be a deed". These rules govern the meaning of "specialty". So a seal is not now required for an English law document to be a "specialty".[66] No particular form is necessary to be a "specialty" beyond the formalities of a deed.

As a shorthand, a deed was formerly referred to as a document "under seal" and a non-deed as a document "under hand". This usage is now out of date but it is still found in HMRC Manuals.

### 70.13.2 *Documents governed by foreign law*

Authority is scant, but it is suggested that the position depends on whether the foreign law has a concept of a "deed" (and a "specialty").

A document governed by foreign law which recognises the concept of deeds is a specialty if it is executed in accordance with the local law requirements of a deed. In the Isle of Man, for instance, a seal was never required except for corporations, though for a document to be a deed the parties must intend it to be a deed.[67]

A document governed by a foreign law which does not recognise the concept of deeds will be a specialty if it is executed in accordance with the English law requirements of a deed.[68]

### 70.13.3 *Situs of specialty*

The IHT Manual provides:

> **27091 Contractual**
> A specialty debt is situated where the instrument happens to be.

---

66 The Law Commission took this view in Working Paper No. 85 (1985) and Report No. 253, para 2.12.44.

67 *Aall Trust & Banking Corporation v Samuel McCormick* 2 OFLR 85, Butterworths Offshore Service Cases, Vol 2, p.479.

68 *Alliance Bank of Simla v Carey* (1880) 5 CPD 429.

I call this "**the specialty rule**".[69] This rule (like the place-of-debtor rule) can be traced back to Elizabethan times.[70] So a debt due from a UK resident can be made non-UK situate for IHT by drafting the debt as a specialty and keeping the document offshore. Conversely a debt, policies, and other specialities can be made UK situate for IHT by bringing the deed here.

The specialty rule requires one to ascertain whether a debt is a specialty, and the IHT Manual offers a little guidance:

> **27079 Bonds and debentures under seal**
> Debentures if under seal, are specialty debts, locally situated where the document is found. So, also, are debts due from the Crown, or under a statute, whether under seal or under hand, and even when they are secured by registered bonds.
> Most UK government securities (e.g. Treasury Loan, Exchequer Stock, War Loan) are registered, so that their locality is determined by the place of registration. However, some bonds issued by the UK government (containing an express obligation to pay) are governed by the general rule that a debt due from the Crown is a specialty debt, situated where the document evidencing the obligation is physically found.
> In *Royal Trust Co v Att Gen for Alberta* [1930] AC 144, the decision related to registered bonds of the Dominion of Canada and their situation for the purpose of Alberta death duties.
> **27080. Treasury Bills, British Savings Bonds, National Savings Income Bonds** [June 2005]
> Securities falling within the specialty rule includes [sic] Treasury Bills and British Savings Bonds. (IHTM27078)
> Although no actual bonds are in existence holders receive a bond book or, in some cases, a certificate. When the person beneficially entitled to these bonds is domiciled outside the UK, the bonds are regarded for Inheritance Tax purposes as situated outside the UK at any time that the bond book or certificate is situated outside the UK.
> National Savings Income Bonds, however, are securities registered on the National Savings Stock Register and as such are situate in the UK.
> **(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**

---

69 *Att Gen v Bouwens* (1838) 4 M & W 171 accessible on *www.kessler.co.uk*. This was approved in *AG v Winans (No. 2)* [1910] AC 27; *Comr of Stamps (New South Wales) v Hope* [1891] AC 476.

70 *English Scottish & Australian Bank v IRC* [1932] AC 238 at p.248.

Perhaps the withheld text states how HMRC check that bonds are not omitted from IHT account. The Manual continues:

> **27091 Contractual**
> ... Corporation mortgages, issued by local authorities under seal, and Northern Irish Land Bonds, are examples of specialties, situated where the instrument is located. (Corporation mortgages should not be confused with Corporation stock, which is far more common and which is a registered security situated where the register is kept.)

This rule overrides the place-of-register rule: see 70.4 (Situs of registered shares).

### 70.13.4 *Scottish specialty*

The IHT Manual continues:

> **27092 Debts in Scotland**
> In Scotland, the rule that a debt is situated where the debtor resides applies alike to specialty (IHTM27078) debts and to those due on simple contract. For Inheritance Tax purposes debts due from persons resident in Scotland are regarded as locally situated there. If any difficulty arises in applying this rule, refer the case to TG (IHTM01081).
> Any case where a Scottish instrument under seal is outside the UK and the locality of the asset determines whether or not an allowance under s.159 IHTA is admissible must also be referred to TG for consideration.
> This direction relates to specialty debts generally. It covers, for example,
> [1] mortgages under seal,
> [2] policies under seal, and
> [3] covenant debts, and
> [4] also applies to debts due from the Crown, or due under a statute.

I find the comments relating to Scotland somewhat surprising and would be grateful to any reader who could direct me to relevant Scots authority.

### 70.13.5 *Reason for the specialty rule and future developments*

What is the reason for the specialty rule? In *R v Williams* [1942] AC at 555 the Privy Council offer this explanation:

> Such an obligation [a specialty debt] was for centuries treated as very different from an ordinary debt. Indeed, the act of creating a specialty by deed was at one time possible only to men of the highest rank. Unlike debt, it was enforced by an action of covenant[71]: Holdsworth, *A History of English Law*, 3rd ed., vol. iii., p. 417. The deed itself was the foundation of the action, the original debt, if any, being merged. The terms of the deed were conclusive. Specialty debts till recent [?] times conferred special rights. They used to rank in the administration of the estate of a deceased person in priority to simple contract debts;[72] and, unlike such debts, were enforceable against the real estate.[73] They were said to be "of a higher nature" than debts by contract. It is, therefore, not surprising that specialty debts by deed were treated from an early date as bona notabilia [i.e. assets situate] where the deeds were found at the time of the death, unlike ordinary debts which were said "to follow the person of debtor".

In this reasoning the conclusion does not follow from the premises, and in any case the premises have long ceased to be valid in English law. The rhetorical language (not for the first time) conceals a weakness in the reasoning. One might conclude that the specialty rule has no good reason but *Commissioner of Stamps v Hope* [1891] AC 476 offers a better explanation:

> ... the distinction drawn and well settled has been and is whether it is a debt by contract or a debt by specialty. In the former case, the debt being merely a chose in action – money to be recovered from the debtor and nothing more – could have no other local existence than the personal residence of the debtor, where the assets to satisfy it would presumably be, and it was held therefore to be bona notabilia [i.e. assets situate] within the area of the local jurisdiction within which he resided; but this residence is of course of a changeable and fleeting nature, and depending upon the movements of the debtor, and inasmuch as a debt under seal or specialty had a species of corporeal existence by which its locality might be reduced to a certainty ... it was settled in very early days that such a debt was bona notabilia where it was "conspicuous," i.e. within the jurisdiction within which the specialty was found at the time of death: see *Wentworth on the Office of Executors*, ed. 1763, pp. 45, 47,

71 This rule was abolished by the Civil Procedure Act 1833.

72 This rule was abolished by the Administration of Estates Act 1869.

73 This rule was abolished by the Administration of Estates Act 1833.

60(1).

The reason for the rule is not that the specialty has a "species of corporeal existence".[74] The reason is that the specialty rule is certain and easier to apply than a place-of-debtor rule. There is a little sense in that.

The Supreme Court could sweep these dusty cobwebs away. But in tax cases the point should not often arise as HMRC should not argue the point against their own Manuals. It will not normally be in the interest of a taxpayer to argue against the specialty rule, as a well-advised taxpayer will keep their specialties outside the UK. So the courts are not likely to have to examine the issue (though it could arise in non-tax litigation or in Scotland or the Privy Council). The courts have shown themselves prepared to amend long established common law rules, such as the rule that there is no recovery for payments made under a mistake of law. But they have done so when the old law not only lacks a logical basis but is also conducive to injustice. That is not the case here. Well-established rules are not overturned merely because the underlying principle is logically unsound. Moreover, situs is a question of international law and it is "of great importance that some fixed common principles should guide the Courts in every country on international questions. In questions of international law we should not depart from any settled decisions, nor lay down any doctrine inconsistent with them."[75] So it is considered that the rule will remain even if challenged in the Supreme Court. It should be abolished (if at all) by Parliament.[76]

## 70.14 Debt secured on land

### 70.14.1 *Specialty debt charged on land*

In the case of a specialty debt charged on land, the choice lies between the location of the land and the specialty rule (location of deed).

---

74 That is either tautologous (if "having a species of corporeal existence" means "situate where the deed itself is situate") or metaphysical (if "having a species of corporeal existence" means anything more than "situate where the deed is situate"). It is not, after all, the case that transfer of the deed brings about a transfer of the debt or right to which the deed relates.

75 *Udny v Udny* 1 Sc.&Div. 441 at p.452.

76 It is interesting to note that the specialty rule was disapplied for probate duty: s.39 Revenue Act 1862 and it does not usually apply for CGT.

Let us look at the matter as one of principle. Is the rule that situs depends on location of the land a sensible or workable rule? It is not, for the following reasons:

(1) One debt may be charged on land in two different countries. A secured debt confers a bundle of different rights, including:
    (a) right to sue on the covenant;
    (b) right to sell if the debt is unpaid;
    (c) right to foreclose if the debt is unpaid.
    However, this bundle is a single asset. It cannot be situate in both countries.
(2) The rule becomes absurd if a large debt happens to be secured on an asset of small value. Would one say a £100m debt is situate in Jersey if it is secured on a property there worth £100,000? But obviously one cannot have a rule where the situs depends on relative values of the debt and the security which may fluctuate enormously from time to time.
(3) It has never been suggested that a debt charged on (say) shares is situate where the shares are situate but there is no good reason to distinguish between shares and land.

The only sensible rule therefore is to apply the specialty rule and ignore the fact that the debt is secured.

The case law is complicated. The law got off on the right footing with *Commissioner of Stamps v Hope* [1891] AC 476. Here the debt was a specialty secured on land in New South Wales. The deed was held in Victoria. The question was situs for the purpose of probate duty and the Privy Council held that the debt was situate in Victoria.

Only three years later the Privy Council muddied the waters in *Walsh v The Queen* [1894] AC 144. Here there were a variety of debts, some secured on property in and out of Queensland. It was held that the debt should be regarded as being in Queensland up to the value of the property there. The best explanation of this case is that it did not concern the common law situs rule. The case turned on the specific statute (the Queensland Dividend Duty Act 1890) which (by implication) operated an entirely different situs rule. This explains why the earlier case of *Commissioner of Stamps v Hope* was not referred to in the judgment of the Privy Council.

*Payne v R* [1902] AC 552 concerned a specialty debt charged on land in Victoria. The deed was in New South Wales. The Privy Council held at p.560 (without citing authority or any discussion) that a mortgage debt was a specialty debt in New South Wales and a simple contract debt in Victoria. That is obviously wrong. They also held the asset was situate in Victoria *and* New South Wales, which (although followed in *Henty v The Queen* [1896] AC 567) is not now the law.[77] The comments must be dismissed as now overruled or *per incuriam*.

*Toronto General Trust Corporation v The King* [1919] AC 679 is an exceptional case that proves the existence of the general rule. Here a mortgage debt was represented by two duplicate deeds, one in Ottawa and one in Alberta. In such a case one cannot apply the rule that the debt is situate where the deed is situate, so it is sensible to fall back on the simple contract rule. But had there been only one deed, it is plain that the debt would have been situate where the deed was.

A comment of the Special Commissioner in *Hafton Properties v McHugh* also supports this view.[78]

Dicey notes that a mortgage debt is normally a specialty and continues:[79]

> [1] A mortgage of land confers an interest in land and will be held situate where the land is situate,[80]
> [2] but where it is necessary (e.g. for taxation purposes) to distinguish between the situs of the mortgagee's interest in land and that of the mortgagor's personal obligation to repay, then the latter (if in the form of a specialty) will be held situate where the deed is situate from time to time.[81] …
> [3] In the conflict of laws the distinction between the interest in land and the personal obligation is not normally made for the purposes of situs, and the asset is regarded as a unity which is situate in the country where the land lies.[82]

---

77 See 70.2 (Every asset has one situs).

78 "... the debt was a mortgage debt. Such a debt is regarded for private international law purposes (at any rate) as a speciality debt, the situs of which is to be found where the mortgage deed is to be found;" 59 TC 420 at p.426.

79 Dicey, *Conflict of Laws*,(14th ed, 2006), para 22-035.

80 [Dicey's footnote] *Re Hoyles* [1911] 1 Ch 179.

81 [Dicey's footnote] See *Walsh v The Queen* [1894] AC 144; *Payne v R* [1902] AC 552. Also *Henty v The Queen* [1896] AC 567.

82 [Dicey's footnote] *Re Hoyles* [1911] 1 Ch 179; *Dicey* para 22–012; c.f. Falconbridge, *Selected Essays on the Conflict of Laws*, (2nd ed. 1954) pp.573–580 for an acute discussion of the problem raised in this paragraph.

Dicey's view at [1] and [3] is that the location of the land prevails. With respect, this overlooks the authorities cited above. The case cited, *Re Hoyles*, does not support Dicey. It shows that for the purposes of succession law a mortgage debt is dealt with according to the law of the land. However, it does not follow from this that the debt should be regarded as situate in that country for the purpose of the situs rules and situs as such is nowhere discussed in *Re Hoyles*. The suggestion at [2] is that tax law may distinguish between the mortgagee's interest in land and the mortgagees's right to payment. But the distinction is an almost impossible one, and nowhere drawn in tax law (apart from *Walsh*, not a situs case).

The IHT Manual passage cited above[83] suggests that the HMRC view is (like mine) that the specialty prevails, not the location of the land.

### 70.14.2 *Simple debt charged on land*

In the case of a simple debt charged on land (not made by deed) the choice lies between:

(1) The location of the land.

(2) The simple debt rule (situs is residence of debtor).

The arguments of principle suggest that the simple debt rule prevails. This conclusion is also supported by the passage from *Raiffeisen* cited in 70.12 (Simple contract debt). This conclusion is consistent with the position for specialty debts secured on land.

## 70.15 Debt under letter of credit

The IHT Manual provides:

> **27091 Contractual**
> A debt under a letter of credit has been held to be situated in the place where it is in fact payable against documents (*Power Curber International v National Bank of Kuwait* [1981] 3 All ER 607).

83 70.13.3 (Situs of specialty); note the references to mortgages in the quotation from the IHT Manual.

## 70.16 Judgment debt

A judgment debt is situate where the judgment is recorded.[84] Obtaining judgment may therefore have the effect of changing situs, for better or worse.

## 70.17 Bank account

The IHT Manual provides:

> **27093 Debts: Bank accounts** [October 2007]
> A bank account is a debt, and under general law is situated at the branch of the bank where the account is kept: *R v Lovitt* [1912] AC 212.[85]
> This general law rule may be modified for IHT purposes by a Double Taxation Convention ...

This is not a special rule for bank accounts: it is an application of the general rule that, in the case of a company carrying business in two places, a simple debt is situate where payable; see 70.12.1 (Meaning of "residence" and dual resident debtor).

UK bank accounts may qualify for IHT relief.[86] Guidance on what constitutes a branch of a bank can be found in the discussion of branch and PE.[87]

## 70.18 Building society account

A standard form building society account is not a debt, it is an interest in the society, so corporation situs rules rather than debt rules should be applied.

The IHT Manual provides:

---

84 *AG v Bouwens* (1838) 4 M & W 171 accessible on *www.commonlii.org*.
85 In the Law Reports the name of this case is: *The King v Lovitt.*
86 See 53.17 (Non-residents foreign currency bank accounts).
87 See 74.2 (Meaning of permanent establishment); 74.11 (Meaning of "branch or agency").

**27151[Bank or][88] building society accounts in Channel Islands and Isle of Man**
Any case in which it is claimed that an account with a UK Building Society must be treated as situated in the Channel Islands or the Isle of Man, and therefore as exempt from IHT, must be referred to TG (IHTM01081), your Team Leader must be consulted in Scotland.

## 70.19 Insurance policy

For the purpose of common law situs rules a policy is treated in the same way as a debt, so the place-of-debtor and specialty rules apply.[89] The IHT Manual correctly provides:

**27101 Policy monies: general rule**
When the policy is under hand the policy monies are situated where the debtor (company) is resident (generally the head office of the company)
...
**27102 Payment made at place other than Head Office**
Where under the terms of the policy, payment is to be made at some place other than the residence of the head office the monies are deemed to be situated at the place of payment (*New York Life Insurance Co v Public Trustee* [1924] 2 Ch 101).
**27103 Policy issued at branch office**
If[90] a policy is issued by, or through, a branch office of a UK company, outside the UK, and no reference is made in the terms of the policy as to the place where the policy monies are to be paid.
Policy monies are to be treated as situated in the country of the branch office provided that the whole course of business in relation to the policy had been transacted in that country.
The "whole course of business" connotes the happening of all the following events in the country of the branch office:
- that the policy is issued to a resident in that country from the branch in that country

88 The reference to a "bank" in the heading seems to be erroneous since the text only relates to building societies.
89 *New York Life Assurance Co v Public Trustee* [1924] 2 Ch 101.
90 The text has gone wrong here: The previous Manual read: "A further type of case is one in which the policy *etc*"; and that is clearly the meaning. Probably the first two paragraphs are intended to form one sentence.

> - that the holder of the policy remains resident and retains the policy there, pays the premiums to the branch there, and dies there
> - that representation to his estate is taken there and the money collected there.
>
> With regard to condition (b) if at the date of the life assured's death, the policy is in the UK at the Assurance Company's head office and the life assured has assigned the policy to the assurance company as security for a loan, do not assume that the policy was situated in the UK without considering the other circumstances surrounding the policy.
>
> Divergence in detail (for example, discontinuous residence) would not necessarily lead to a different conclusion. However if any of the conditions is not fulfilled, or where the locality of the policy has to be determined before the policy holder's death, each case must be considered on its own facts. Any such case must be referred to TG (IHTM01081).
>
> Where a policy under hand in terms provides for payment **either at its head office or** at a branch office, and the "whole course of business", in the sense indicated above, takes place in the country of the branch office, the monies are also treated as locally situated in that country.

Some of para 27103 is doubtful but the practice will normally favour the taxpayer so the issues will not often arise.

### 70.19.1 *Policy made by deed*

The IHT Manual correctly provides:

> **27104 Policies under seal**
>
> Policies under seal are specialty debts (IHTM27078).

This is correct. It requires one to investigate whether policies are specialties. The IHT Manual gives a little guidance:

> Most Lloyds policies are embossed with a seal but they are not specialties unless additionally they bear the witnessed personal signature of the General Manager of Lloyds Policy Signing Office.

On IHT treatment of UK situate policies see 30.12 (IHT on policy held by foreign domiciliary).

## 70.20 Land

The IHT Manual provides:

> **27074 Land and interest in land** [October 2007]
> Immovable property is situated where it is actually located, but you must note that in the case of some types of interest either in land or relating to land, different legal systems may take opposing views as to whether they constitute movable or immovable property.
> These differences are resolved (under Private International Law, and also by specific provision in Double Taxation Conventions where these apply) by the adoption of the view taken by the law of the country in which the land itself is situated: *Johnstone v Baker* (1817) 4 Madd 474; *Macdonald v Macdonald* [1932] SLT (HL) 381.
> Land is usually classed as immovable property, and so is generally governed by the law of the country in which the immovables are situated. This issue of devolution may be especially significant here when ascertaining the exemption of foreign property that may or may not pass to a surviving spouse or civil partner (IHTM11032).

## 70.21 Chattels

The rule is what one would expect. The IHT Manual provides:

> **27075 Chattels**
> Chattels are situated where they happen to be at the relevant time.[91]

It is suggested that this applies even where:
(1) a chattel is moved out of the UK;
(2) the chattel is transferred to another person or trust;
(3) the chattel is returned to the UK.
The temporary removal of the asset at the time of the disposal cannot be ignored, for tax purposes, even if the time spent out of the UK is short.

## 70.22 Ships and aircraft

The IHT Manual provides:

---

91 The text is found twice: IHT Manual paras 21047 and 27075. For a concession on works of art see 53.18 (Works of art).

> **27073 Ships**
> A ship on the high seas is deemed to be situated at its port of registry but when it comes within territorial waters this artificial situs is displaced by the actual situs: *Trustees Executors & Agency Co Ltd v IRC* [1973] Ch 254.

The situs of aircraft for IHT is, surprisingly, undecided. The choice lies between the chattel rule, the ship rule and the place of registration. In *Kuwait Airways v Iraqi Airways (Nos 4 & 5)* [!] [2002] 2 AC 833 no attempt was made even to argue for place of registration. It is suggested that the ship rule is the most sensible solution.

See now *Dornoch v Westminster International* [2009] EWHC 889.

## 70.23 Goodwill and intellectual property

Goodwill is situate where the trade or profession is carried on (see *IRC v Muller* [1901] AC 217).

For intellectual property, see *Forster's Australia Ltd v CIT* 302 ITR 289 (AAR) 10 ITLR 939.

Because of IHT business property relief, these issues will not often arise.

## 70.24 Property subject to contract of sale

An interest in English land subject to a contract of sale is still situated in the UK: *Re Clore, IRC v Stype Investments* [1982] STC 625. It is suggested that a contract of sale does not affect situs.

## 70.25 Interest under bare trust or nomineeship[92]

The interest of a beneficial owner in property held by a nominee or bare trustee is situate where the underlying asset is situate: a nomineeship or bare trust is transparent for situs. In *Re Clore, IRC v Stype Investments* land in England (the Guy's estate was held by a Jersey nominee(Stype Investments):

> Immediately after the conveyance of the Guy's estate to Stype

92 For present purposes the terms "bare trust" and "nomineeship" are used synonomously.

> Investments and the execution of the declaration of trust which acknowledged that the Guy's estate would "continue to remain in the beneficial ownership of Sir Charles," the Guy's estate belonged in equity to Sir Charles in fee simple and his interest constituted property situate in England. Stype Investments was entitled to be paid any outgoings or charges in respect of the estate, but this entitlement did not affect the nature, quality or situation of the interest of Sir Charles in the estate.[93]

For unit trusts see 35.5 (Situs of unit) and 70.8 (Intermediaries and depositories).

## 70.26 Equitable interest under a substantive[94] trust

The situs of an equitable interest under a substantive trust is not often relevant for IHT, but it may matter, eg where a reversionary interest is not excluded property for IHT.

There are many connecting factors which might be used to attribute a situs to an equitable interest, and the courts have not had to consider all possible permutations. *Favorke v Steinkopff* 1922] 1 Ch 174 concerned an English law will trust, with English trustees, but German situate property; the equitable interests of an annuitant, life tenant and remaindermen were held to be situate in England. It is suggested that an equitable interest is normally situate where the trustees are resident. If the trustees are resident in different jurisdictions, situs would be determined by an exclusive jurisdiction clause if there is one, or failing that, by the proper law.[95]

There is a sound basis to say that situs of the assets of the trust fund is not relevant to the situs of the equitable interest. If the trust assets are situate in different jurisdictions it would be impossible to ascertain the situs of the equitable interest (if the equitable interest is regarded as a single asset). An equitable interest such as a life or reversionary interest should not be regarded as several separate interests in as many assets as are held by the trustees. Such an equitable interest is generally regarded as one asset and not as many assets as there are items of trust property.

Where the equitable interest is a power of revocation the position is even

93 [1982] STC 625 at p.633-4.

94 By "substantive" I mean a trust other than a bare trust (nomineeship) or unit trust.

95 For a contrary view see Harris, *The Hague Trusts Convention*, (2002), Chapter 9 (Situs of equitable interests).

clearer. Where the equitable interest is an annuity, it would often be impossible to locate the annuity by reference to the situs of the trust assets, because one cannot identify any particular trust asset and say that asset is (to any fixed extent) the source of the annuity.

## 70.27 Unadministered estate of deceased person

The IHT Manual provides:

> **27072 Unadminstered estates or shares therein**
> In general a person who takes an absolute interest as a residuary legatee, under English law and many other legal systems,[96] is entitled, not to the assets **in specie of the testator, but to a chose in action**, enforceable against the executors.
> This means the executors must administer the estate and transfer the clear residue, or a share thereof, as the case may be to the beneficiary.
> The same rule applies in the case of intestacy.
> This is a similar rule to the **ius crediti** to which a Scots beneficiary is entitled.

The "chose in action" is situate where it is enforced, ie where the executors are. The situs of the assets of the estate is not relevant. See *CSD v Livingston* [1965] AC 694. The IHT Manual continues:

> For IHT however, the deceased is treated as having a direct interest (in the whole or a share, as the case may be) in the net assets of the testator's (or intestate's) residuary estate. See IHTM22031[97]
> Consequently you must, in such a case, consider separately the situs of each of the underlying assets.
> For example, the excluded property provisions in s.6(2) IHTA may apply to qualifying securities included in the unadministered estate (IHTM04260)

## 70.28 Situs of partnership share

The situs of a partnership share may not matter for IHT, because of BPR,

---

96 Author's Note: Further consideration will be required for jurisdictions other than England and Wales, especially civil law jurisdictions.

97 See s.91 IHTA.

but the issue will sometimes arise.

An interest in a partnership is an asset (a chose in action) distinct from the assets of the partnership. It has its own situs distinct from the situs of the partnership assets. HMRC agree. The HMRC website POA guidance provides at Appendix 1:

> For IHT purposes ... we do not regard the partnership interest as transparent.

There are several factors that the court might have used to determine situs. In practice the situs of an interest in a general[98] partnership is the place where the partnership business is carried on.[99] This is not necessarily the place where the partners reside: there is no concept here of carrying on business by tacit oversight.[100] The same applies to a limited partnership.

### 70.28.1 *Situs of LLP*

A LLP is a body corporate and its situs for private international law will be determined by using the rules applying to companies. For IHT purposes, however, s.267A IHTA provides:

> For the purposes of this Act and any other enactments relating to inheritance tax—
> (a) property to which a limited liability partnership is entitled, or which it occupies or uses, shall be treated as property to which its members are entitled, or which they occupy or use, as partners,
> (b) any business carried on by a limited liability partnership shall be treated as carried on in partnership by its members,
> (c) incorporation, change in membership or dissolution of a limited liability partnership shall be treated as formation, alteration or dissolution of a partnership, and

98 That is, a partnership which is not a limited liability partnership.

99 See *Laidlay v Lord Advocate* (1890) 15 App Cas 482, followed *Commissioner of Stamp Duty v Salting* [1907] AC 449. Since *Laidlay* is a Scottish case, the law of England and Scotland on this point must be taken to be the same. In a case where it is not clear where the partnership business is carried on, it would be logical to adopt the partnership residence test of control and management. Further consideration would be needed if the partnership is not governed by UK law.

100 See 13.3 (Trading income of UK resident).

(d) any transfer of value made by or to a limited liability partnership shall be treated as made by or to its members in partnership (and not by or to the limited liability partnership as such).

This deems the LLP's property to be property to which its members are entitled *as partners*. It does not deem the partners to be entitled to the assets, but puts a LLP in the same position as a conventional partnership. An obscure passage in the IHT Manual para 25094[101] [October 2007] suggests that HMRC may not have reached this view, but it seems clear enough.

## 70.29 Situs of pension and death benefits

Death in service benefits payable in respect of service under the Crown, local authorities or overseas governments are generally payable at discretion and so not liable to IHT. However the situs does matter in the exceptional case where the benefit is an asset in the estate of the deceased.

Section 153(2) IHTA provides:

(2) For the purposes of this Act—
(a) a pension paid under the authority of a scheme made under section 2 of the Overseas Pensions Act 1973 which
  [i] is constituted by the Pensions (India, Pakistan and Burma) Act 1955 or
  [ii] is certified by the Secretary of State for the purposes of this section to correspond to the said Act of 1955
  shall be treated as if it had been paid by the Government of India or the Government of Pakistan (according as the arrangements in pursuance of which the pension was first paid under the said Act of 1955 were made with the one or the other Government);
(b) a pension paid out of any fund established in the UK by the Government of any country which, at the time when the fund was

101 Para 25094 provides:
**Limited liability partnerships** [October 2007]
... A further change is that an interest in a LLP is deemed to be an interest in each and every asset of the partnership, while an interest in a traditional partnership is a 'chose in action', valued by reference to the net underlying assets of the business. This may require you to consider issues of situs of property. In cases of doubt refer to Technical Group (TG) (IHTM01081) for advice."

established, was, or formed part of, a colony, protectorate, protected state or UK trust territory shall, if the fund was established for the sole purpose of providing pensions, whether contributory or not, payable in respect of service under the Government be treated as if it had been paid by the Government by which the fund was established;

(c) a pension paid out of the Central African Pension Fund established by section 24 of the Federation of Rhodesia and Nyasaland (Dissolution) Order in Council 1963 shall be treated as if it had been paid by the Government of a territory outside the UK; and

(d) so much of any pension paid to or in respect of any person under—

(i) the scheme which by virtue of subsection (3) of section 2 of the Overseas Pensions Act 1973 is constituted under that section by section 2 or subsection (2) of section 4 of the Overseas Service Act 1958 or

(ii) such other scheme made under section 2 of the Overseas Pensions Act 1973 as is certified by the Secretary of State for the purposes of the Taxes Act to correspond to section 2 or subsection (2) of section 4 of the Overseas Service Act 1958

as is certified by the Secretary of State to be attributable to service under the Government of an overseas territory shall be treated as if it had been paid by the Government of that territory.

(3) ... for the purposes of subsection (2) above—

(a) “pension” includes a gratuity and any sum payable on or in respect of death, and a return of contributions with or without interest thereon or any other addition thereto;

(b) “UK trust territory” means a territory administered by the Government of the UK under the trusteeship system of the United Nations;

(c) “overseas territory” means any country or territory outside the UK;

(d) references to the Government of any such country or territory as is mentioned in paragraph (b) or (d) of that subsection include a Government constituted for two or more such countries or territories and any authority established for the purpose of providing or administering services which are common to, or relate to matters of common interest to, two or more such countries or territories.

(4) If, by reason of Her Majesty's Government in the UK having assumed responsibility for a pension, allowance or gratuity within the meaning of section 1 of the Overseas Pensions Act 1973 payments in respect of it are made under that section, this section shall apply in relation to the pension, allowance or gratuity, exclusive of so much (if any) of it as is paid by virtue of the application to it of any provisions of the Pensions

> (Increase) Act 1971 or any enactment repealed by that Act, as if it continued to be paid by the Government or other body or fund which had responsibility for it before that responsibility was assumed by Her Majesty's Government in the UK.

The important effect of this is that the pension (defined to include a death benefit) is not UK situate if it is treated as payable by a foreign government. The IHT Manual provides:

> **17132 Crown, local authorities and overseas governments** [October 2007]
> ... The following table is therefore for general guidance only and is not intended to be exhaustive.
> *Overseas Service :* Sums payable on death to personal representatives by way of return of subscriptions under the regulations of
> • the Indian Military Widows and Orphans Fund;
> • the Superior Services (India) Family Pension Fund
> • the Indian Military Service Family Pensions Fund; and
> • the Indian Civil Service family pension fund
> Lump sum payable on death to personal representatives under a scheme constituted under the Pensions (India, Pakistan and Burma) Act 1955 or a corresponding scheme (a foreign asset by virtue of Section 153(2)(a)
> *Whether payment included in estate:* Yes if the deceased died domiciled (IHTM13000) in the UK (excluded property under Section 6(1) IHTA 1984 if not so domiciled)
> Benefits payable to personal representatives as of right on death of a Colonial Government servant (a foreign asset by virtue of Section 153(2)(b))
> *Whether payment included in estate:* Yes if the deceased died domiciled in the UK (excluded property under Section 6(1) IHTA 1984 if not so domiciled)
> Benefits payable under s 1 Overseas Pensions Act 1973 other than 'statutory increases' thereof (a foreign asset by virtue of Section 153(4) and Section 153(2)(b))
> *Whether payment included in estate:* Yes if the deceased died domiciled in the UK (excluded property under s 6(1) if not so domiciled)
> Benefits payable out of the Central African Pension Fund (a foreign asset by virtue of Section 153(2)(c))
> *Whether payment included in estate:* Yes if the deceased died domiciled in the UK (excluded property under s 6(1) if not so domiciled)
> Lump sum payable on death to personal representatives as of right under scheme constituted under the Overseas service Act 1958, or a

corresponding scheme (a foreign asset by virtue of Section 153(2)(d))
*Whether payment included in estate:* Yes if the deceased died domiciled in the UK (excluded property under s 6(1) if not so domiciled)...

CHAPTER SEVENTY ONE

# SITUS OF ASSETS FOR CGT

## 71.1 Situs of assets for CGT – Introduction

This chapter deals with situs of assets for CGT. Strictly one should not refer to situs in the abstract, but to situs for a specific purpose (CGT , IHT, or whatever) but in practice where the context is clear it is sufficient to refer to situs, and in this chapter references to situs means situs for CGT purposes.

For a general introduction to situs, see 70.1 (Concepts of situs). For situs of partnership assets, see 36.6 (Transparency of partnership for CGT). See too 35.5.2 (Situs of unit for CGT); 70.6 (Securities of international organisations).

## 71.2 Meaning of "shares" and "debentures"

The CGT situs rules make specific provision for shares and debentures, so it is necessary to consider the meaning of these terms.

The meaning of debenture is particularly important, because there is an significant distinction for CGT situs between:

(1) debts which are not debentures, whose situs is generally the residence of the creditor;[1]

(2) debts which are debentures, whose situs is:
    (a) UK if issued by UK incorporated company, or
    (b) if registered and issued by a non-UK incorporated company, the place of the register.

There are two statutory provisions which relate to the definitions but they are of very limited scope. It is convenient to mention them first to clear them out of the way.

---

1 See 71.10 (Debt situs rule).

### 71.2.1 *Company with no share capital*

Section 275(2)(a) TCGA provides:

> In subsection (1) above—
> (a) in paras (d), (da) and (e), the references to shares or debentures, in relation to a company that has no share capital, include any interests in the company possessed by members of the company, ...

In UK company law the only type of company with no share capital is a company limited by guarantee. There are also foreign entities which are classified as companies for tax purposes which have no share capital, but I cannot think of any to which s.275(2)(a) is likely to be significant.

So far as it concerns *shares* the rule makes sense up to a point. In short, the rule is that "shares" includes the interest of members of a guarantee company. The only puzzle is why the rule is needed. In practice the situs of interests in guarantee companies will rarely if ever arise. A provision of this kind is quite common in tax.[2] The rule was enacted in other areas to prevent avoidance and perhaps the drafter put it in here without much thought as to whether it was actually needed.

I do not understand why the statutory provision refers to *debentures* and suspect the drafter may be under a misapprehension here. A debenture is a right against the company, not an interest in the company. Whether the company has a share capital is (in the absence of the definition) highly relevant in deciding whether an asset is a "share" but it is wholly irrelevant in deciding whether an asset is a "debenture". I would be grateful to any reader who could offer an explanation. In practice it does no harm.

### 71.2.2 *Securities issued by non-company*

Section 275(2)(b) TCGA provides:

> in paras (d) and (e), the references to debentures, in relation to a person other than a company, include securities.

This assumes that (in the absence of this definition) securities issued by

2 There are too many to list; see for instance s.135(4)(5) TCGA.

a non-company would not be, or may not be, debentures. I think that is doubtful. The term "debenture" is normally used in the context of companies, but the concept is not restricted to companies.[3]

Section 275(1)(d) refers to debentures issued by a government authority.[4] Treasury gilts, though "securities" are not normally called "debentures" so perhaps the provision is useful to avoid doubt..

Similarly, other non-companies, such as trusts or individuals, can in theory create "securities" and if such assets might not be regarded as "debentures" then this provision could be needed (though in practice this does not happen).

While unnecessary, this provision does no harm.

### 71.2.3 *Change from "securities" to "debentures" in 2005*

Before 2005 the legislation referred to "securities" where it now has the word "debentures." HMRC explained the reason for the change:

> The scope of the existing rules in s 275 which apply in relation to securities will be extended so that they apply in relation to debentures - this means, for example, that ... all registered debentures (rather than just those which are securities) of a company which is not incorporated in the UK will be treated as being situated where they are registered ...[5]

HMRC were concerned that there might be a debenture which was not a security. I think that is doubtful. I would have thought that any debenture must necessarily be a security.[6]

The reform raises the question of whether an asset could be a security but not a debenture; if there were such an asset the effect of the 2005 reform was to take it outside the scope of the statutory situs rules, which was not intended! The better view is that any registered debt security is a

---

3 See Gower and Davies, *Principles of Modern Company Law* (7th ed 2003), p.806: "The word "debenture" is not restricted to securities of companies or bodies corporate. Clubs not infrequently issue debentures and the name may even be applied to bonds issued by an individual; eg to those issued by the Tichborne Claimant..." This passage is not in the current edition but the point is sound.

4 See 71.4 (Municipal and government securities).

5 BN 36, 16 March 2005.

6 See s.738 CA 2006: "In the Companies Acts "debenture" includes debenture stock, bonds and any other securities of a company..."

debenture so this problem does not arise.

If that is correct, the substitution of "debentures" for "securities" in 2005 was misconceived, but it did no harm.

### 71.2.4 *Meaning of "debenture"*

In the absence of applicable statutory guidance, the word "debentures" should be given its normal meaning. It is a wide and somewhat vague term:

> If we begin by asking what the word "debenture" means, apart from any definition, the reply must be that it has no precise meaning. Chitty J. observed in the case of *Levy v. Abercorris Slate and Slab Co.*,[7] that the word "means a document which either creates a debt or acknowledges it, and any document which fulfills either of these conditions is a debenture." ... Sir Nathaniel Lindley had previously stated simply, "What the correct meaning of 'debenture' is I do not know": *British India Steam Navigation Co. v. IRC*.[8] In *Lemon v. Austin Friars Investment Trust*[9], the same ignorance was professed in the Court of Appeal. Warrington LJ in particular, after observing that it had been said "by a wiser man than himself" that it was impossible to give an exhaustive definition of the word "debenture," went on to remark that he did not propose to incur the reproach of venturing where wise men fear to tread. The textbooks are agreed at least in this that no accurate definition of the word can be found.[10]

Company law draws a distinction between an ordinary debenture and debenture stock:

> Debenture stock is merely borrowed capital consolidated into one mass for the sake of convenience. Instead of each lender having a separate bond or mortgage, he has a certificate entitling him to a certain sum, being a portion of one large loan; and generally debenture stock differs from a debenture in form rather than in substance.[11]

---

7 (1887) 37 Ch D 260.

8 (1881) 7 QBD 165.

9 [1926] 1 Ch 1.

10 *Knightsbridge Estates Trust v Byrne* [1940] 1 AC 613 at p.621.

11 *Re Herring* [1908] 2 Ch 493 at p.497.

No-one doubts that debenture stock is within the general meaning of "debentures".

In the following discussion, I use the word **"securities"** to mean either shares or debentures.

## 71.3 Co-owned assets

Section 275C TCGA provides:

> (1) This section applies for determining for the purposes of this Act—
> (a) the situation of an interest (see subsection (4)) in an asset, or
> (b) whether the situation of an interest in an asset is in the UK.[12]

"Interest" is normally a wide term, but s.275C(4) defines it narrowly:

> In this section "interest", in relation to an asset, means an interest as a co-owner of the asset (whether the asset is owned jointly or in common and whether or not the interests of the co-owners are equal).

Thus we are concerned here with co-ownership interests, or shares of assets. Section 275C applies to co-owned assets of all kinds but the most important cases are co-owned securities.

Section 275C goes on to lay down two rules which govern situs of co-ownership interests:

> (2) The situation of the interest in the asset shall be taken to be the same as the situation of the asset, as determined in accordance with subsection (3) below.
> (3) The situation of the asset for the purposes of subsection (2) above shall be determined on the assumption that the asset is wholly-owned by the person holding the interest in the asset.

I refer to these as **"the co-ownership situs rules"**.

At first sight it is hard to see the point of these rules. If an asset is situate in a jurisdiction, one would expect a share in the asset to be situate in the same place and a statutory provision to that effect seems unnecessary.

However, s.275 stipulates the situs of shares, debentures, debts, etc and

12 Paragraph (b) is otiose since the matter is fully covered by (a); but it does not matter.

it might be argued that a person who owns a co-ownership interest in a share, debenture, debt, etc does not own a share, debenture, debt, etc; so it might be argued that these statutory situs rules do not apply to co-ownership interests. Hence s.275C(2) has a role to play.

Section 275C(3) is needed where situs depends on the residence of the owner and the asset is co-owned. For instance, if a debt or a ship is jointly owned by two persons, one UK resident and one non-resident, the interest of the UK resident is regarded as UK situate and the interest of the non-resident is regarded as non-UK situate.

## 71.4 Municipal and government securities

Section 275(1)(d) TCGA provides:

> shares or debentures[13] issued by any municipal or governmental authority, or by any body created by such an authority, are situated in the country of that authority.

The CG Manual provides:

> **12440 Location of assets: Shares and securities** [November 2009]
> [The Manual sets out s.275(1)(c) and continues:] This applies to shares and securities issued by such bodies whether they are in registered form or in bearer form.

## 71.5 Securities of UK incorporated company

Section 275(1)(da) TCGA provides:

> Subject to para (d) above, shares in or debentures of a company incorporated in any part of the UK are situated in the UK.

This rule prevents CGT remittance basis planning for UK incorporated companies by use of bearer shares and foreign share registers. That was common practice before 2005. The spur to the 2005 reform was probably *Chandrasekaran v Deloitte & Touche* [2004] EWHC 1378 which discussed and raised the awareness of this planning.

---

13 For the meaning of “debentures” see 71.2.2 (Securities issued by non-company).

## 71.6 Registered securities: non-UK company

Section 275(1)(e) TCGA provides:

> subject to paras (d) and (da) above, registered shares or debentures are situated where they are registered and, if registered in more than one register, where the principal register is situated.

This applies to shares and debentures of foreign incorporated companies but not UK incorporated companies. It (more or less) restates the common law rules.[14]

The CG Manual provides:

> **12440 Types of asset (2): Shares and securities etc** [November 2009]
> *Shares and securities*
> ...Registered shares and securities[15] other than those dealt with in the previous two paragraphs are situated where they are registered. This will normally be in the country where the company was incorporated. If they are registered on more than one register then they are located where the principal register is located, Section 275(1)(e) TCGA 1992. Which register is the principal register is a question of fact.

## 71.7 Bearer shares

Bearer shares of non-UK incorporated companies are governed by the common law rule.[16] They are situate where the document is situate.

## 71.8 Bearer debentures: non-UK company

What is the position for bearer debentures? Unless one of the statutory situs rules applies, the common law rule will apply and the debenture will be situate where the document is situate. Two statutory rules need consideration: the debt situs rule and the UK-law rule.

---

14 See 70.4 (Situs of registered shares).

15 Following the 2005 reforms, the reference to securities should strictly read "debentures" as that is now the statutory term. But it makes no difference.

16 See 70.7 (Bearer documents).

### 71.8.1 *Does debt situs rule apply to bearer debentures?*

Section 275(1)(c) TCGA (the debt situs rule) provides:

> subject to the following provisions of this subsection, a debt, secured or unsecured, is situated in the UK if and only if the creditor is resident in the UK.[17]

Debenture stock is not a debt[18] so the debt situs rule does not apply to debenture stock.[19]

An ordinary debenture (not debenture stock) is a debt in the normal sense of the word. At first sight it seems that the debt situs rule applies, so a bearer debenture is situate where the creditor is resident. If that were right the situs of the document of a bearer debenture would never determine situs. However it is considered that the context of s.275, the reference to a debt in the debt situs rule means a simple debt and not a debenture. The debt situs rule does not apply to any debentures.

HMRC agree. The CG Manual provides:

> **CG12440 Types of asset (2): Shares and securities etc** [November 2009]
> *Shares and securities*
> ... The Companies Acts allow companies to issue 'share warrants to bearer' or 'stock warrants to bearer' provided the company's Articles of Association allow it. These are commonly called bearer shares and securities. The name of the owner of such bearer securities is not recorded in the register of the company. They can be sold without any necessity to notify the company. The holder of the warrant is entitled to receive payment of dividends and, provided certain conditions are complied with, to vote at general meetings.
> The location of bearer securities issued by any body other than

---

17 See 71.10 (Ordinary debt)

18 For the meaning of "debenture stock" see 71.2.4 (Meaning of "debenture"). A person who holds debenture stock is not a creditor: *Re Dunderland Iron Ore* [1909] 1 Ch 446. So the asset is not a "debt".

19 Against this, it might be argued that the co-ownership situs rule applies so the situs of the debenture stock is the situs of the underlying debenture. But it is considered that (1) the co-ownership situs rule does not apply in this case and (2) even if it does, the situs of the underlying debenture is not governed by the debt situs rule as the underlying debenture is not a debt for the purposes of that rule.

- a municipal or governmental authority or
- any body created by such an authority, or
- a company incorporated in the UK

is not covered by a specific capital gains rule. Therefore it has to be decided in accordance with general law, see CG12420-CG12421. General law provides that such securities are located where the certificate is located. As for chattels, the location can change if the certificate is moved in or out of the UK.

### 71.8.2 *Does UK-law rule apply to bearer securities?*

A debenture is an intangible asset and if it is "subject to UK law" (as widely defined) then in principle it appears that the UK-law rule applies, and the debenture will be UK situate.[20]

The CG Manual does not refer to the UK-law rule. One might argue that the reference to an intangible asset in s.275A means intangible assets other than debentures, in which case a debenture of a foreign incorporated company is not UK situate even if it is subject to UK law. This appears to be the HMRC view since the manual passage above says that the location of bearer securities "is not covered by a specific capital gains rule".

### 71.8.3 *Planning implications*

Remittance basis taxpayers will generally avoid investing in debentures which are UK situate for CGT purposes. Non-UK incorporated companies who issue debentures and want their investors to include remittance basis taxpayers will in principle wish to ensure that their debentures should not be UK situate for CGT purposes.

To achieve this:

(1) The debenture could be registered and the register kept outside the UK; in that case the position is clear.
(2) The debenture could be a bearer instrument and
    (a) kept outside the UK and
    (b) not "subject to UK law" (as defined) though that may not be necessary.

20 See 71.13.2 (The UK-law rule).

### 71.8.4 *Commentary*

The combination of statutory and common law rules for securities of non-UK incorporated companies is intricate and sometimes impractical. It has never been thought through. It is suggested that the rule should be that *all* securities are situate in the place of incorporation of the company. That would be logical, and a simplification, with no loss of tax.

## 71.9 Intermediaries and depositories

The starting point is to understand the securities law background and the common law situs rules; see 70.8 (Intermediaries and depositories) where I conclude (contrary to the HMRC view) that the situs of intermediated securities[21] under the common law situs rule is that of the intermediary on whose books the interest of the investor appears. This is the place where the record that determines title is to be found. The situs of the underlying security does not matter.

In the absence of a statutory provision, the same rule will apply for CGT. Six statutory provisions need consideration: the co-ownership situs rules, s.60 TCGA, the UK-law rule, and three rules dealing with securities in s.275(1)(d)(da)(e).

### 71.9.1 *Intermediated securities of non-UK companies*

The reader will recall that s.275(1)(e) TCGA provides:

> subject to paras (d) [government securities] and (da) [UK incorporated companies] above, registered shares or debentures are situated where they are registered and, if registered in more than one register, where the principal register is situated.[22]

In this paragraph I assume we are not concerned with government securities or UK incorporated companies within paras (d) or (da).

I first consider debentures and then shares.

As far as debentures are concerned, there are two questions:

21 For the terminology - "intermediated securities" "depository" "intermediary" "investor" "the underlying security" - see 70.8 (Intermediaries and depositories).

22 See 71.6 (Registered securities: non-UK company).

(1) are intermediated debentures (the interests held by investors) properly described as "debentures" within the meaning of 275(1)(e)?
(2) if so are intermediated debentures "registered" debentures?

Since debenture stock count as "debentures"[23] it seems reasonably clear that the intermediated debentures are properly described as "debentures".

Intermediated debentures are registered in the sense that the investors interests are recorded on the intermediary's register.[24] At first sight one might think that the register referred to in s.275(1)(d) must be a register kept by the company which issued the debentures. However a company does not have to keep a register of its debenture holders (unlike a shareholder register). The distinguishing feature of a register is that it determines or provides evidence of ownership.[25] So it is considered that intermediated debentures are "registered" on the intermediary's register. It follows that:

(1) If the underlying debenture is not registered, the intermediary's register is the only register, and the investors interests are situate where the intermediary's register is situated.
(2) If the underlying debenture is registered, there are two registers:
    (a) The company's register of the underlying debenture (which will record the intermediary as the registered holder).
    (b) The intermediary's register of the intermediated debenture (which will record the investor as the registered holder).

It is considered that the company's register does not come into the picture, since the asset which the investor owns is the intermediated debenture and not the underlying debenture. But even if that is not correct, the intermediary's register should be regarded as the principal register so that is the one which governs situs.

For these reasons, an intermediated debenture of a non-UK incorporated company is situate where the intermediary keeps its register.

In practice it does not often matter whether the situs of an intermediated debenture (of a non-UK incorporated company) is in the place of the

---

23 See 71.2.4 (Meaning of "debenture").

24 Benjamin, "Interests in Securities" (2000) para 2.91: "Interests in securities [Intermediated securities] may properly be characterised as a form of registered securities, even where the underlying securities are in bearer form."

25 The intermediary's register is not open to inspection, unlike a register under s.744 Companies Act 2006, but open access is not an essential feature of a register, and there is no reason to expect foreign law to apply English company rule principles.

intermediary's register or the situs of the underlying debenture. Either way, the asset will not usually be UK situate. But it could matter, for instance, if the debenture is a bearer debenture and the document is in the UK. In such a case it is sensible to look to the intermediary's register rather than to the place of the document of the underlying debenture, since an investor could not be expected to know where the document of the underlying debenture is situated.

The same applies when the underlying security is shares in a non-UK incorporated company, rather than debentures.

### 71.9.2 *Securities of UK incorporated companies*

It is considered that intermediated securities of UK incorporated companies are properly described as shares or debentures and so fall within the rules in s.275(1)(d) TCGA. If that is correct, the registered securities rule in 275(1)(e) does not apply: it does not matter whether the securities are regarded as registered. Intermediated securities of UK incorporated companies are UK situate.

### 71.9.3 *Municipal and government securities*

For the same reason, intermediated securities of government or municipal authorities are situated in the authority concerned: s.275(1)(d) TCGA.

### 71.9.4 *Another view*

In the case of co-ownership interests the co-ownership situs rules[26] provide:

> (2) The situation of the interest in the asset shall be taken to be the same as the situation of the asset, as determined in accordance with subsection (3) below.
> (3) The situation of the asset for the purposes of subsection (2) above shall be determined on the assumption that the asset is wholly-owned by the person holding the interest in the asset.

Do investors hold interests in the underlying securities as co-owners

26 See 71.3 (Co-ownership interests).

(within the meaning of the co-ownership rule)? That depends on the terms of the agreement with the intermediary but it is likely to be the case.[27] If so, it appears at first sight that these rules override the common law situs rule, so the situs of the investor's interest for CGT is that of the underlying security.

Section 60(1) TCGA provides another route to the same destination:

> In relation to property held by a person
> [a] as nominee for another person, or
> [b] as trustee
> [i] for another person absolutely entitled[28] as against the trustee,
> [ii] or for any person who would be so entitled but for being an infant or other person under disability
> [iii] (or for 2 or more persons who are or would be jointly so entitled),
> this Act shall apply as if the property were vested in, and the acts of the nominee or trustee in relation to the property were the acts of, the person or persons for whom he is the nominee or trustee ....

Does the intermediary hold for the investors as bare trustee (within the s.60 sense of that expression)? That depends on the terms of the agreement with the intermediary but it is likely to be the case. If so, it appears at first sight that the effect of s.60 TCGA is to treat the investors as co-owners of the underlying security, so the situs of the investor's interest is that of the underlying security.

It is considered however that these deeming provisions do not alter the fact that the investor's intermediated securities are "registered" so that s.275(1)(e) continues to apply. This also overrides the UK-law rule[29] even if the underlying security was subject to UK law, or if the intermediary arrangement was subject to UK law.

### 71.9.5 *Conclusion*

The CG Manual passage set out in 70.8.3 (HMRC view) concluded that the situs of an intermediated security for CGT purposes is that of the underlying security rather than that of the intermediary's register. That is

27 See 70.8.1 (The securities law background).

28 Section 60(2) TCGA defines "absolutely entitled" but need not be set out here.

29 See 71.13 (Intangible assets).

correct for securities of UK incorporated companies. It is considered that situs of securities of non-UK companies depends on the place of the intermediary's register. That could be different from the situs of the underlying security, though circumstances in which the difference matters will be rare.

## 71.10 Debt situs rule

A debt is in some cases a chargeable asset for CGT, so its situs may be relevant for CGT. Section 275(1)(c) TCGA provides:

> subject to the following provisions of this subsection, a debt, secured or unsecured, is situated in the UK if and only if the creditor is resident in the UK.

I refer to this as **"the debt situs rule"**. This reverses the common law rule (under which a simple debt is situate where the *debtor* is situate).

A debt is UK situate if the creditor is dual-resident.

This provision overrides the UK-law rule and common law rules such as the specialty rule and the bearer security rule. However, it is subject to the rules relating to:

(1) debentures;
(2) judgment debts;
(3) bank accounts.

The debt situs rule (if applicable) generally[30] disapplies the CGT remittance basis because a debt owned by a remittance basis taxpayer is deemed UK situate so the gain from the debt is taxed on an arising basis.

## 71.11 Judgment debt

Section 275(1)(k) TCGA provides:

> a judgment debt is situated where the judgment is recorded.

The CG Manual explains:

30 An exception is if the individual disposes of the debt while temporarily non-resident.

> **12430 Types of asset (1): Land, tangible property and debts** [November 2009]
> *Types of asset (1): Land, tangible property and debts [November 2009]*
> Judgment debts, that is, debts created by the judgments, decrees, etc, of courts of record, are located where the judgment is recorded, Section 275(1)(k) TCGA 1992.

Obtaining judgment may have the effect of changing situs.

71.11.1 *Commentary*

It is considered that there is no point in a separate rule for judgment debts, and s.275(1)(k) should be repealed. That would be a small but worthwhile simplification. The statutory rule is based on the common law rule, but that is no reason to retain it.

## 71.12 Bank account

A foreign currency bank account is normally a chargeable asset for CGT.[31] The question therefore arises as to the situs of the asset. Section 275(1)(l) TCGA provides:

> a debt which—
> (i) is owed by a bank, and
> (ii) is not in sterling, and
> (iii) is represented by a sum standing to the credit of an account in the bank of an individual who is not domiciled in the UK,
> is situated in the UK if and only if
> [a] that individual is resident in the UK and
> [b] the branch or other place of business of the bank at which the account is maintained is itself situated in the UK.

In short, for UK resident foreign domiciled individuals, the situs of a foreign currency account is the situs of the branch.

This restates the common law rule for bank accounts; it is needed because without this provision the situs of the account would be the residence of the creditor (ie the account holder).

---

31 See 49.11 (Foreign currency bank account).

In cases where the conditions (i), (ii) and (iii) are not all satisfied, the usual CGT debt rule applies. The moral is that a foreign domiciled UK resident individual should keep foreign currency in non-UK bank accounts.

Section 275(1)(l) only applies to individuals bank accounts. However the situs of a bank account held by a trust or a company does usually matter for CGT.[32]

## 71.13 UK-law rule

Section 275A(1) TCGA provides:

> This section applies for the purpose of determining whether the situation of an intangible asset ("asset A") is in the UK if the situation of asset A is not otherwise determined (see section 275B(1)).

Section 275B(1) TCGA provides a commonsense explanation of "not otherwise determined":

> For the purposes of section 275A, the situation of an asset is not otherwise determined if, apart from that section, this Act does not make any provision for determining—
> (a) the situation of the asset, or
> (b) whether the situation of the asset is in the UK.

Thus all the rules in s.275 TCGA have priority to this rule.

### 71.13.1 *Meaning of "intangible asset"*

Section 275A(2) TCGA provides a commonsense definition of "intangible asset":

---

32 If it did matter, the usual CGT debt rule would apply so all accounts held by a non-resident trust or non-resident company would be non-UK situate, as situs would depend on residence of the account holder. This means that UK services relating to the account qualify for foreign services relief under s.809W ITA. That could be important for a bank account held by a non-resident close company, which is a relevant person, but in practice the point will rarely if ever arise as such a company would not normally use a UK account.

> In this section “intangible asset” means—
> (a) intangible or incorporeal property and includes a thing in action, or
> (b) anything that under the law of a country or territory outside the UK corresponds or is similar to intangible or incorporeal property or a thing in action.

This includes policies and bonds, futures and options.

### 71.13.2 *The UK-law rule*

Section 275A(3) TCGA provides:

> If asset A is subject to UK law (see section 275B(2)) at the time it is created, it shall be taken for the purposes of this Act to be situated in the UK at all times.

I refer to this as “**the UK-law rule**”.

The expression “subject to UK law” is widely defined in s.275B(2):

> For the purposes of section 275A, an intangible asset is subject to UK law at a particular time if any right or interest which comprises or forms part of the asset is, at that time,—
> (a) governed by, or otherwise subject to, or
> (b) enforceable under,
> the law of any part of the UK.

## 71.14 Futures and options

### 71.14.1 *Definitions of “future” and “option”*

Section 275B(3) TCGA provides:

> In section 275A—
> "future" has the meaning given by section 581 of CTA 2009, and
> "option" has the meaning given by section 580 of that Act.

So we turn to s.580 CTA 2009 for the definition of option:

> (1) In this Part "option" includes a warrant.
> (2) References in this Part to an option do not include a contract whose

terms—

(a) provide—

(i) that, after setting off their obligations to each other under the contract, a cash payment is to be made by one party to the other in respect of the excess, if any, or

(ii) that each party is liable to make to the other party a cash payment in respect of all that party's obligations to the other under the contract, and

(b) do not provide for the delivery of any property.

(3) Subsection (2) does not prevent an option whose underlying subject matter is currency from being an option.

Section 710 CTA 2009 defines a “warrant”:

In this Part [Part 7]

“warrant” means an instrument which entitles the holder to subscribe for—

(a) shares in a company, or

(b) assets representing a loan relationship of a company,

whether or not the shares or assets exist or are identifiable.

Section 581 CTA 2009 defines a “future”:

(1) In this Part "future" means a contract for the sale of property under which delivery is to be made—

(a) at a future date agreed when the contract is made, and

(b) at a price so agreed,

but this is subject to subsection (3).

(2) For the purposes of subsection (1)(b), a price is agreed when the contract is made even if—

(a) the price is left to be determined by reference to the price at which a contract is to be entered into on a market or exchange or could be entered into at a time and place specified in the contract, or

(b) in a case where the contract is expressed to be by reference to a standard lot and quality, provision is made for a variation in the price to take account of any variation in quantity or quality on delivery.

(3) References in this Part to a future do not include a contract whose terms—

(a) provide—

(i) that, after setting off their obligations to each other under the contract, a cash payment is to be made by one party to the other in respect of the excess, if any, or

(ii) that each party is liable to make to the other party a cash payment in respect of all that party's obligations to the other under the contract, and

(b) do not provide for the delivery of any property.

(4) Subsection (3) does not prevent a future whose underlying subject matter is currency from being a future.

Sections 580(2),(3) and 581(3),(4) contain identical exclusions. This excludes futures and options, such as financial futures over the FTSE 100 index, which are settled in cash, rather than by delivery of the underlying subject matter.

I surmise that the purpose of the rules relating to futures and options is to prevent avoidance by shifting value from UK incorporated companies (UK situate for CGT) into futures and options which might (but for these rules) be situate outside the UK. That explains why financial futures are not affected by these rules. But if that is right, s.580(3) and 591(4), bringing currency options within the rules, make no sense.

### 71.14.2 *"Underlying subject matter"*

This expression is given a commonsense definition by s.275B(4) TCGA:

For the purposes of section 275A—

(a) the underlying subject matter of a future is the property which, if the future were to run to delivery, would fall to be delivered at the date and price agreed when the contract is made, and

(b) the underlying subject matter of an option is the property which would fall to be delivered if the option were exercised.

### 71.14.3 *Underlying subject matter in existence*

If a future/option is subject to UK law when created, it is UK situate under the UK-law rule. Special rules apply to a foreign law future/option. The drafting makes some formal gestures to the conventions of plain English legal drafting, but its structure is so convoluted that one wonders whether the drafter was trying to make a point about it (or perhaps a joke).

Section 275A(4) TCGA provides:

Subsections (5) to (9) below have effect if asset A—

> (a) is a future or option (see section 275B(3)), and
> (b) is not subject to UK law at the time it is created.

The rule is in s.275A(6) TCGA:

> That rule is that where, in the case of any intangible asset,—
> (a) the asset is a future or option,[33]
> (b) the underlying subject matter (see section 275B(4)) of the asset consists of or includes an asset which is an intangible asset, and
> (c) either—
> (i)[A] that intangible asset is subject to UK law at the time it is created and,
> [B] on the assumption that there were no rights or interests in or over that asset, the situation of that asset would not be otherwise determined, or
> (ii) that intangible asset is treated by this subsection as being so subject [ie subject to UK law] at that time,
> the intangible asset mentioned in para (a) above [i.e. the future or option] is to be treated for the purposes of subsection (5) above and this subsection as being so subject at the time it is created.

This triggers s.275A(5) TCGA:

> If, as a result of the application of the rule in subsection (6) below in relation to asset A or any other asset or assets, asset A falls to be treated as being subject to UK law at the time it is created, it shall be taken for the purposes of this Act to be situated in the UK at all times.

Thus a foreign law future/option over a UK law underlying intangible asset is itself UK situate.
EN FB 2005 explains the point of s.275A(6)(c)(ii):

> These rules apply recursively. In any case where there is a "nested sequence" of futures or options in which the underlying subject matter of each contract in the sequence consists of or includes the next contract in the sequence, subsection (5) has effect to provide that the first contract is taken for TCGA purposes to be situated in the UK at all times if the [relevant] requirements ... are met in relation to any of the

33 This is otiose, since it repeats s.275A(4)(a); but it does not matter.

contracts in the sequence.

One might think that s.275A(6)(c)(i)[B] leaves a gap where the situs of the underlying subject matter *would* be otherwise determined. However, that gap is filled by s.275A(8)(b)(i)[B]:

> (7) If—
> (a) asset A is not taken to be situated in the UK by virtue of subsection (5) above, and
> (b) as a result of the application of the rule in subsection (8) below in relation to asset A or any other asset or assets, asset A falls to be treated as being situated in the UK at any time,
>
> it shall be taken for the purposes of this Act to be situated in the UK at that time.
> (8) That rule is that where, in the case of any intangible asset,—
> (a) the asset is a future or option, and
> (b) the underlying subject matter of the asset consists of or includes an asset—
> (i) which is, by virtue of
> [A] subsection (9) below or of
> [B] any provision of this Act apart from this section,
> situated in the UK at any time, or
> (ii) which is treated by this subsection as being so situated [ie UK situate] at any time,
>
> the intangible asset mentioned in para (a) above is to be treated for the purposes of subsection (7) above and this subsection as being so situated at that time.

Thus a foreign law option over a UK situate share or debenture is UK situate.

### 71.14.4 *Underlying subject matter unissued shares or debentures*

Section 275A(9) TCGA makes provision for the case where the underlying subject matter is unissued shares or debentures:

> Where—
> (a) the underlying subject matter of a future or option consists of or includes shares or debentures issued by a company incorporated in any part of the UK, but
> (b) at the time the future or option is created, those shares or debentures

> have not been issued,
>
> the underlying subject matter of the future or option, so far as consisting of or including those shares or debentures, is to be taken, for the purposes of subsection (8) above, to consist of or include an asset which is situated in the UK at all times.

## 71.15 Insurance policy

The situs of policies rarely matters for CGT, because of the relief for policies. UK policies will be UK situate under the UK-law rule and for others the common law rule will apply.[34]

## 71.16 Land

Section 275(1)(a) TCGA provides:

> the situation of rights or interests (otherwise than by way of security) in or over immovable property is that of the immovable property.

The CG Manual provides:

> **12430 Types of asset (1): Land, tangible property and debts** [November 2009]
>
> *Land and buildings (Section 275(1)(a) TCGA 1992)*
>
> Land and buildings are located in the country where they are found. This applies to all rights and interests in the land and buildings. It will therefore apply to leases of land, tenancies etc.

## 71.17 Chattels

Section 275(1)(b) TCGA provides:

> subject to the following provisions of this subsection, the situation of rights or interests (otherwise than by way of security) in or over tangible movable property is that of the tangible movable property.

The CG Manual provides:

34 A policy is not a debt for the purposes of the CGT debt situs rule.

> **12430 Types of asset (1): Land, tangible property and debts** [November 2009]
> *Chattels (Section 275(1)(b) TCGA 1992)*
> Items of tangible moveable property (chattels) are located where they are found at any point in time. This applies to all rights and interests over such assets also. Therefore a lease of a chattel can change from being located in the UK to being located elsewhere if the chattel is removed from the UK to another country.

For the position of temporarily exported chattels, see 70.21 (Chattels).

## 71.18 Ships and aircraft

Section 275(1)(f) TCGA provides:

> a ship or aircraft is situated in the UK if and only if the owner is then resident in the UK, and an interest or right in or over a ship or aircraft is situated in the UK if and only if the person entitled to the interest or right is resident in the UK.

The CG Manual provides:

> **12430. Types of asset (1): Land, tangible property and debts** [November 2009]
> *Ships and aircraft (Section 275(1)(f) TCGA 1992*)
> ... Contrary to the general rules of international law,[35] for capital gains purposes the location of a ship or aircraft does not depend on its country of registration. Instead the ship or aircraft is located in the UK if and only if the owner is resident in the UK. Similarly any interest or right in or over the ship or aircraft is located in the UK if and only if the owner of the interest or right is resident in the UK.

This generally[36] disapplies the CGT remittance basis since a ship/aircraft owned by a remittance basis taxpayer is deemed UK situate and the gain taxed on an arising basis. If the individual holds the ship/aircraft through a non-resident company the asset is treated as not UK situate which has

---

35 The Manual's view (that under international law ships and aircraft are situate where registered) is erroneous: see 70.22 (Ships and aircraft).

36 An exception is if the individual disposes of the asset while temporarily non-resident.

two advantages:
(1) The s.13 remittance basis is available on a disposal by the company.
(2) Relief is available under s.809W ITA for services relating to the asset.

## 71.19 Goodwill

Section 275(1)(g) TCGA provides:

> the situation of good-will as a trade, business or professional asset is at the place where the trade, business or profession is carried on.

The CG Manual provides:

> **12450 Types of asset (3): Intangible assets - goodwill, patents, trademarks etc** [January 2010]
> *Goodwill (Section 275(1)(g) TCGA 1992)*
> Goodwill which is an asset of a trade, profession or vocation is located where the trade, profession or vocation is carried on. If the trade etc is carried on in more than one country part of the goodwill appropriate to the part of the trade etc carried on in any one country should be treated as located in that country.

## 71.20 Interest under bare trust or nomineeship

The interest of a beneficial owner in property held by a nominee or bare trustee is situate where the underlying asset is situate: s.60 TCGA reinforces the common law rule on this point.[37]

For unit trusts see 35.5.2 (Situs of unit for CGT).

## 71.21 Equitable interest under a substantive trust

The situs of an equitable interest under a substantive trust only rarely matters for CGT because of the exemption for equitable interests. However it may matter, eg in the case of a purchased interest or an interest in a non-resident trust.

If the trust is "subject to UK law" (as defined) the interest will be situate in the UK. This clearly includes the case of a trust with a UK governing

37 See 70.25 (Interest under bare trust or nomineeship).

law; it may arguably apply to any trust with UK trustees. In other cases the common law rules will apply.

## 71.22 Intellectual property

Section 275(1)(h) TCGA provides:

> patents, trade marks, registered designs and corresponding rights are situated where they are registered, and if registered in more than one register, where each register is situated, and licences or other rights in respect of any such rights are situated in the UK if they or any right derived from them are exercisable in the UK,

A different solution must be found for copyright, since such rights do not need registration. Section 275(1)(j) TCGA provides:

> copyright, design right, franchises, and corresponding rights, and licences or other rights in respect of any such rights, are situated in the UK if they or any right derived from them are exercisable in the UK.

"Corresponding rights" has a commonsense definition in s.275(3) TCGA:

> In subsection (1) above, in each of paras (h) and (j), "corresponding rights" means any rights under the law of a country or territory outside the UK that correspond or are similar to those within that paragraph.

This will not often concern remittance basis taxpayers. It is important for non-residents carrying on a trade in the UK through a permanent establishment, who are (in short) subject to CGT on UK situate trading assets.

It seems at first sight that intellectual property is (uniquely) capable of being situate for CGT purposes in more than one jurisdiction. But it is considered that intellectual property exercisable in a number of jurisdictions should be regarded as a number of separate assets, one situate in each jurisdiction. The CG Manual provides:

> **12450 Types of asset (3): Intangible assets - goodwill, patents, trademarks etc** [January 2010]
> *Copyright, design rights, franchises etc (Section 275(1)(j) TCGA 1992)*
> • Copyright, design rights and franchises

- Any rights or licences to use
  – any copyright work
  – any design in which design rights subsist

are situated in the UK if they or any right derived from them are exercisable in the UK.

## 71.23 Unadministered estate of deceased person

If the estate is subject to UK law, it is UK situate for CGT. Other estates are governed by the common law rule.[38]

38 See 70.27 (Unadministered estate of deceased person).

CHAPTER SEVENTY TWO

# TAXATION OF FOREIGN ENTITIES

## 72.1 Introduction

UK tax law categorises entities (in short) as companies, partnerships or trusts.[1] With more or less difficulty (depending on the similarity of the law of the country concerned) it is necessary to shoehorn foreign entities into these categories; or more accurately, it is necessary to decide whether references to companies, trusts, partnerships, etc in any particular statutory provision include some particular foreign entity. Similarly, it is necessary to decide whether terms such as "share capital" or "interest in possession" are apt to include rights in or under foreign entities (or indeed whether individuals have any "right or interest" in a foreign entity at all).

*Memec v IRC* explains the general approach:

> When an English tribunal has to apply the provisions of an UK taxing statute to some transaction, arrangement or entity which is governed by a foreign system of law, the tribunal must take account of the rules of that foreign system (properly proved if not admitted) in order to determine the nature and characteristics of the transaction, arrangement or entity. But having informed itself in this way, the tribunal must then apply the taxing statute as part of English law.[2]

---

1 And lastly, PRs but PRs are not discussed in this chapter.

2 71 TC 77 at p.92. Most OECD countries adopt the same approach:

> "11. In most [OECD] Member countries, as a matter of principle, tax laws apply on the basis of the legal relationship deriving from other branches of the law. Thus the tax laws of these countries, when referring to partnerships, will, absent special tax definitions, refer to those entities that constitute partnerships according to domestic civil or commercial law.
>
> 12. Difficulties often arise, however, where income is derived by an entity organised under the laws of another jurisdiction. In that case, the entity will have to be classified for purposes of the application of the tax laws of the country

Thus in order to say whether a reference to (say) a trust or trustee in any particular statutory provision include some particular foreign entity or person, one must ask some fundamental questions:

(1) What are the determinative characteristics of a trust or trustee (within the meaning of the section), a question of UK law; and
(2) Does the foreign entity or person have those characteristics, a question of the foreign law.

Similar issues arise in the application of DTAs to foreign (and UK) entities, for instance, whether an entity is a "person" for the purpose of a DTA. Similar issues arise in non-tax contexts.[3]

So far as the matter raises issues of foreign law I necessarily rely on secondary material. I would be interested in comments from readers with foreign law expertise if views expressed in this chapter need correction or

---

where the income is derived, regardless of whether or not that classification is compatible with the civil or commercial law system of the jurisdiction from which the entity derives its legal status.

13. For example, if the tax system of a country recognises only individuals, companies and partnerships (but not trusts) as taxpayers and provides for a different tax treatment for these three types of taxpayers, that country will have to 'force' foreign entities in one or the other of these categories (with more or less difficulty depending on the similarity of the civil and commercial law of the countries concerned) for purposes of applying its tax system to domestic income derived by these foreign entities.

14. In doing so, the practice of most countries is to adopt the same approach as the one they apply in a purely domestic context. They will therefore apply their domestic tax classification to foreign entities on the basis of the foreign law's legal characteristics of the entity. In the previous example, the country, for the purposes of taxing the domestic income of a trust established under the law of a foreign jurisdiction, will typically examine the legal characteristics of the trust as they derive from the trust law of the foreign jurisdiction in order to determine whom it should tax and whether that person should be taxed as an individual, company or partnership, which are the only categories recognised under its tax law."

See OECD, "The Application of the OECD Model Tax Convention to Partnerships" (1999) accessible (at a small charge) from *www.oecd.org*; J Avery Jones "Characterisation of Other States' Partnerships for Income Tax", [2002] BTR 375 is essential reading in this area.

3 See for instance s.1208 Companies Act 2006: "partnership" means—
(a) a partnership within the Partnership Act 1890, or
(b) a limited partnership registered under the Limited Partnerships Act 1907,
or a firm or entity of a similar character formed under the law of a country or territory outside the UK".

expansion, and in particular if they disagree with HMRC official views.

A full discussion of the deeply intriguing issues raised in this chapter would require a book to itself.

HMRC published their views in Tax Bulletin 83 (also called RI 279) but the HMRC website now states that this statement is "superseded by INTM180000". Accordingly the quotes are taken from the International Manual.

### 72.1.1 *"Transparent" and "opaque"*

UK tax law categorises entities as transparent or opaque.[4] The International Manual explains this terminology:

> **180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes** [November 2010]
> ... Entities are described [in the official list set out below] as either fiscally "transparent" or "opaque" solely for the purposes of deciding how a member is to be taxed on the income they derive from their interest in the entity. In the case of a "transparent" entity the member is regarded as being entitled to a share in the underlying income of the entity as it arises and is charged to tax in the UK on their share of the profits on that basis. But, in the case of an "opaque" entity the member generally is taxed only on the distributions made by the entity.

The terminology is also used for CGT (eg a partnership is transparent for CGT); and for IHT (eg a partnership is not transparent for IHT). Indeed, one should strictly not use the term "transparent" without specifying a tax, because an entity may be transparent for one tax and not for another, but the term is used most often with IT in mind.

Classification of an entity as transparent ought logically to entail that the entity is regarded as not entitled to the income/gains (since its members, or those who own or have an interest in the entity, are regarded as so entitled). For instance, a partnership is transparent and income accrues to the partners and not to the partnership. Perhaps illogically, this is not always the case. For instance, despite the undoubted fact that an IP trust is transparent, the trustees may still be taxable on the trust income;

4 A note on terminology. The term sometimes used is "fiscally transparent" (or "fiscally opaque") but that is synonymous with "transparent" (or "opaque").

likewise a settlor-interested trust within s.624. That rule favours HMRC (by offering an alternative person liable for the tax) but in the case of DT exemptions, it may favour the taxpayer (by offering an alternative route to DT relief).

Thus classification as transparent or opaque does not necessarily answer all the tax questions which may arise in relation to an entity; but it is normally enough.[5]

The International Manual continues:

> It should be noted that the expressions "transparent" and "opaque" are not interchangeable with "partnership" and "company" or "body corporate". For example, a fiscally transparent entity is not necessarily a partnership. Likewise an UK company is a "body corporate" and is opaque for the purposes of UK tax on income, but a fiscally opaque entity is not necessarily a "body corporate" or a "company" for UK tax purposes.

Although the expressions are not interchangeable, the issues overlap. A transparent entity is not necessarily a partnership[6] but a partnership is always transparent for IT and CGT.[7]

The International Manual explains HMRC's approach to categorising an entity as transparent or opaque:

> **180010. Factors to consider in classifying a foreign entity for UK tax purposes** [April 2009]
> ... When considering the classification of a foreign entity (i.e. whether it is either opaque or transparent) for UK tax purposes, due regard is given to the approach of the Court of Appeal in the case of *Memec plc v IRC* (71 TC 77) and the line of case law that precedes it. In particular, the following matters should be considered:

---

5 The Tax Tribunal expressed doubts about the terminology in *Swift v HMRC* [2010] UKFTT 88 at [18]:
"The issue is whether the UK tax is 'computed by reference to the same profits or income' or whether he is taxable on the equivalent of a dividend. Asking whether SP LLC is transparent or opaque may be another way of asking the same question but we consider that it is preferable to apply the words of the Treaty."
It is considered that the labels transparent/opaque are nevertheless useful shorthand.

6 For instance, an IP trust is also transparent: see 23.1 (Taxation of Life Tenant).

7 See 36.3 (Transparency of partnership for IT); 36.6 (Transparency of partnership for CGT).

> (a) Does the foreign entity have a legal existence separate from that of the persons who have an interest in it?
> (b) Does the entity issue share capital or something else, which serves the same function as share capital?
> (c) Is the business carried on by the entity itself or jointly by the persons who have an interest in it that is separate and distinct from the entity?
> (d) Are the persons who have an interest in the entity entitled to share in its profits as they arise; or does the amount of profits to which they are entitled depend on a decision of the entity or its members, after the period in which the profits have arisen, to make a distribution of its profits.
> (e) Who is responsible for debts incurred as a result of the carrying on of the business: the entity or the persons who have an interest in it?
> (f) Do the assets used for carrying on the business belong beneficially to the entity or to the persons who have an interest in it?
>
> Some of those factors may point in one direction; others may point in another. An overall conclusion is reached from looking at all the factors together, though some have more significance than others. Particular attention is paid to factors c. and d.
>
> In considering these factors we look at the foreign commercial law under which the entity is formed and at the internal constitution of the entity. ... The conclusion that is reached is then used in considering the relevant piece of UK tax law.[8]

72.1.2 *Significance of classification in foreign law*

HMRC say in the International Manual passage cited above::

> How the entity is classified for tax purposes in any other country is not relevant.

If the foreign tax law is sufficiently similar to UK law, it is considered that the foreign law classification ought to be relevant, though not of course decisive; but in practice that condition is not often satisfied.

8 This passage is also set out in INT Manual 180010. I deal with the omitted sentence in the following paragraph.

## 72.2 Definition of "IHT-settlement"

It was noted above that UK tax law categorises entities as companies, partnerships and trusts. "Partnership" is in general undefined, and the definition of "company" (discussed below) is fairly standard. However quite different definitions of trusts are used in different taxes.

I discuss terminology in more detail in 69.2.1 (terminology); in summary:

"**IHT-settlement**" means a settlement within the IHT definition

**"Standard IT/CGT settlement"** is a settlement within the standard IT/CGT definition.

**"Settlement-arrangement"** is a settlement within s.620 ITTOIA, which applies for the purposes of the IT settlement provisions and many other purposes of which the most important is s.87 TCGA**.**

The terms trust and settlement are used interchangeably.

Because the definitions are different, it is a mistake to ask if an entity is a trust "for tax purposes". One must ask if it is a trust for IT/CGT, or for IHT purposes or if it is a settlement-arrangement. An entity may be a trust within one, or two, or all three definitions.

I discuss the IT/CGT and settlement-arrangement definitions elsewhere.[9] Section 43(2) IHTA provides the IHT definition:

> "Settlement" means any disposition or dispositions of property, whether effected by instrument, by parol or by operation of law, or partly in one way and partly in another, whereby the property is for the time being—
> (a) held in trust for persons in succession or for any person subject to a contingency, or
> (b) held by trustees on trust to accumulate the whole or part of any income of the property or with power to make payments out of that income at the discretion of the trustees or some other person, with or without power to accumulate surplus income, or
> (c) charged or burdened (otherwise than for full consideration in money or money's worth paid for his own use or benefit to the person making the disposition) with the payment of any annuity or other periodical payment payable for a life or any other limited or terminable period,
> [d] or would be so held or charged or burdened if the disposition or

9 See 69.2 (Definition of "settlement").

dispositions were regulated by the law of any part of the UK;

[e] or whereby, under the law of any other country, the administration of the property is for the time being governed by provisions equivalent in effect to those which would apply if the property were so held, charged or burdened.

### 72.2.1 *Limb [d]: would be so held if disposition were regulated by UK law*

This limb is present for historic reasons only. The estate duty definition of "settlement" in s.22(1)(i) FA 1894 formerly provided (so far as relevant):

> The expression 'settlement' means any instrument, whether relating to real property or personal property, which is a settlement within the meaning of the Settled Land Act, 1925, or if it related to real property would be a settlement within the meaning of that Act

Dick Taverne, then Financial Secretary to the Treasury, explained the problem posed by this definition:

> The definition is primarily by reference to the Settled Land Act 1925, but it brings in property other than settled land by references to instruments which if related to real properly in England and Wales would be a settlement within the meaning of the Act. We now see that it is arguable that we have done no more than equate an English settlement of personalty with one of realty and that we have not caught foreign settlements.[10]

Hence s.36(5) FA 1969 extended the definition:

> In the enactments relating to estate duty—
> (a) the expression 'settlement'— (i) for the avoidance of doubt is hereby declared to include—
> (aa) any disposition whereby property is held by trustees on trust to accumulate the whole or part of any income of that property or with a power for the trustees to make payments out of that income at the discretion of the trustees or some other person with or without a power to accumulate surplus income; and

10 Hansard Standing Committee F, 24 June 1969, col 721.

> *(bb) any disposition regulated by the law of a territory outside Great Britain which would constitute a settlement within the meaning of section 22(1)(i) of the Finance Act 1894 if it had been regulated by the law of England or, as the case may require, of Scotland;*

The words now in s.43(2)[d] IHTA are derived from s.36(5)(i)(bb) FA 1969. Now, the definition of settlement for IHT is not by reference to the SLA 1925 and applies to UK and foreign law trusts, so the words in s.36(5)(i)(bb) FA 1969 were not needed. The drafter of the current definition possibly did not notice, but probably thought the words desirable to preclude an argument that "trust" in s.43 meant a trust governed by a UK law. That argument would not have been very convincing but given the history of the provisions might not have been self-evidently wrong.

Limb [d] therefore has no practical effect.

### 72.2.2 *Limb [e]: governed by provisions equivalent in effect to a trust*

The standard IT/CGT definition has no equivalent of s.43(2)[e]. So while the IT/CGT definition requires that property is held "in trust" it is (in short) sufficient for IHT that the property is governed by provisions which are equivalent in effect.

The statute refers to the *administration* of the property being governed by provisions equivalent in effect. Trust law draws a distinction between administrative and dispositive provisions, but the context here shows that this is referring to all the provisions which govern the use of the property, and not just administrative provisions in the strict sense.

Two difficulties lie in the short phrase "equivalent in effect":

(1) Equivalent *in effect* presumably requires effective (or substantive) rather than exact equivalence, but where does one draw the line?

(2) Trusts can have the effect as entails, usufructs, wills, corporations, charges by way of security over assets, and so on, though they are none of those things. A trust is a flexible, protean institution which can have markedly different effects.

In deciding whether a foreign institution is equivalent in effect to a trust, a court should have regard to the context - is it appropriate in the scheme of IHT that an entity should be subject to IHT in the same manner as a trust? This consideration supports the view taken below that a foundation (stiftung) is an IHT-settlement but a usufruct is not.

## 72.3 Meaning of "company"

Section 1121(1) CTA 2010 provides the definition for the corporation tax acts:

> In the Corporation Tax Acts "company" means any body corporate or unincorporated association, but does not include a partnership, a local authority or a local authority association.[11]

Section 992(1) ITA provides the identical definition for the income tax acts. Section 288 TCGA provides a similar definition for the TCGA:

> "company" includes any body corporate or unincorporated association but does not include a partnership, and shall be construed in accordance with section 99;

The IHTA does not provide a definition of "company" but the definition of close company in the close company rules incorporates the CTA definition. Section 102(1) IHTA provides:

> (1) In this Part of this Act—
> 'close company' means a company within the meaning of the Corporation Tax Acts which is (or would be if resident in the UK) a close company for the purposes of those Acts;

## 72.4 Nomineeships

### 72.4.1 *Definition(s) of nomineeship*

I use the term "**nomineeship**" to mean the situation where property falls within s.466(3) ITA, that is, property if:

> (a) it is held by a person as nominee for another person,
> (b) it is held by a person as trustee for another person who is absolutely entitled to the property as against the trustee, or
> (c) it is held by a person as trustee for another person who would be

---

11 This is subject to some minor (unnecessarily complicated) exceptions but those need not be considered here.

> absolutely entitled[12] to the property as against the trustee if that other person were not an infant or otherwise lacking legal capacity.

The phrase "absolutely entitled to property as against a trustee" is defined in s.466(5) ITA:

> A person is absolutely entitled to property as against a trustee if the person has the exclusive right to direct how the property is to be dealt with (subject to the trustees' right to use the property for the payment of duty, taxes, costs or other outgoings).

### 72.4.2 *Tax treatment of nomineeship*

A nomineeship is transparent for CGT,[13] for IT and for IHT.

If an entity is a nomineeship then:

(1) It is not an IT/CGT settlement (even if property is held on trust): s.466(3) ITA.

(2) It is not an IHT-settlement as the property is not held on trust for persons in succession (or governed by provisions equivalent in effect).

(3) A nomineeship may be a settlement-arrangement; however it is not within s.87 TCGA as gains do not accrue to the trustees.

The question of whether a trust is a nomineeship or a substantive trust (ie not a nomineeship) is therefore of some importance. Of course a foreign law entity may be classified as a nomineeship, just as an English law entity may constitute a nomineeship and the question arises more for foreign law entities than for English law ones (because in English law cases the answer is usually obvious.)

### 72.4.3 *Testamentary/non testamentary dispositions*

In order to understand the law here it is helpful to begin with the distinction which English law (and foreign laws which adopt English law principles) draw between:

(1) testamentary dispositions;

---

12 The term "absolutely entitled" is defined in s.466(6) ITA:
"References to a person who is or would be so entitled include references to two or more persons who are or would be jointly absolutely entitled as against the trustee."

13 Section 60 TCGA.

(2) non-testamentary dispositions (here called "lifetime dispositions").

The distinction matters for many reasons. The most important are:

(1) Different (stricter) formalities apply to testamentary dispositions.[14]

(2) A testamentary disposition takes effect on death. A lifetime disposition takes effect before death, normally when executed.

(3) A testamentary disposition is revocable until death. A lifetime disposition is only revocable if this is expressly stated, and even if it is revocable, circumstances which revoke a testamentary disposition (eg making a new will in common form, or marriage) may not revoke a lifetime disposition.

Statute law recognises the distinction[15] but gives no guidance on it. There is a certain amount of (mainly antique) case law. A disposition is testamentary if it is the intention of the writer of the document "that death was the event that was to give effect to it".[16]

A lifetime disposition may confer a life interest on the settlor and also a power of revocation. In *Thompson v Browne*[17] the Master of the Rolls referred to an earlier decision, *Attorney-General v Jones,* and commented:

> If there be anything in that decision to support the notion, that where a person by deed settles property to his own use during his life, and after his decease for the benefit of other persons, a power of revocation reserved in such a deed alters the character of the instrument, and renders it testamentary, … I can only say that, if this were law, a great number of transactions of which the validity has never been doubted

---

14 If a foreign entity were a testamentary disposition under English law, it might be valid under foreign law even though it would not satisfy English law formalities. The grantor trust may then be void in English law, lacking the formalities required for a valid will; but it may be saved by the Wills Act 1963. If the entity is void in English law but valid in foreign law, the applicable conflicts principles must be applied to see which legal system has priority.

15 Section 1 Wills Act 1837 merely says that the term "will" includes a testamentary disposition.

16 *Milnes v Foden* (1890) 15 PD 105 at 107; or (which comes to the same thing) "that it is dependent on the death for its vigour and effect"; *Cock v Cooke* (1866) 1 P&D 241 at 243. If the document calls itself a will, the intention is usually obvious, but it is not necessary to use the word "will". For instance, a conveyance "not to take effect until after my decease" is obviously testamentary: *In the Goods of Morgan* (1866) 1 P&D 214.

17 (1835) 3 My & K 32.

would be liable to be impeached.[18]

The beneficiaries of a lifetime trust have an equitable interest from the date of the gift. They could in theory take proceedings in the event of a breach of trust. However in practice this may be a theoretical possibility only. The difference is then essentially one of form and not one of substance. There is no economic difference between a lifetime disposition of this kind and a will. In cases of this kind it could be harder to construe the document and determine whether the intention of the writer is:

(1) to confer a present future interest or
(2) that death is the event which gives effect to the document.

Since it makes no real (economic) difference, the writer of the document may not have formed a clear intention on the point, and even if they have, they may not have expressed that intention clearly in the document. In these cases the form of the document is an important guide to construction. If the document takes the form of a will, (ie describing itself as a will and executed with the formalities of a will) the intention of the writer must be that it is testamentary. If it takes the form of a lifetime settlement (ie describing itself as such and executed as a deed), the intention of the writer must be that it is a lifetime disposition. Of course the form of the document is not decisive. The context may show otherwise. However, the form certainly gives some guidance and in the absence of contrary indications it must be determinative.

### 72.4.4 *Nominteeship/substantive trusts*

With this in mind we can turn to the distinction between nomineeships (or bare trusts, I use the terms as synonyms) and substantive trusts. English law (and foreign laws which adopt English law principles) draw a distinction between:

(1) trusts where a single beneficiary is absolutely entitled (here called "bare trusts"); and
(2) non-bare trusts (here called "substantive trusts").

Whether a trust is a bare trust or substantive is a question of construction. The bare/substantive trusts distinction is conceptually distinct from the testamentary/non-testamentary disposition distinction. In the latter case

18 The point is also stated in *Baird v Baird* [1990] 2 AC 548 at p.556.

there would normally be someone who is intended to benefit after the death of the writer of the document, but the question is whether they are intended to benefit immediately or on death. However, in practice, factors which might tend to show that the intention of the writer of the document is testamentary might also show that their intention was to create a bare trust rather than a substantive trust, so the two distinctions substantially overlap.

A document is a valid lifetime gift if it confers any interest (including a mere present future interest of no economic value) on any beneficiary (other than the settlor) during the settlor's lifetime.

Lewin on Trusts says:

> The reservation by the settlor of large beneficial powers and interests may leave the lifetime trusts declared in favour of others so squeletic[19] as to be considered illusory. If a power of revocation is also reserved, this can turn a settlement into a will.[20]

Lewin's tentative suggestion is that a trust may purport to confer some interest on other beneficiaries, but if that interest is insufficiently large or important it does not count. I refer to this as a *de minimis* principle. The term sometimes used is "illusory trusts".

This is not correct. It is not consistent with the principle set out above. The question is the intention of the writer of the document. The question is not whether an interest declared in favour of others is so small it should be disregarded. That would be to cease to look for the intention of the writer of the document, but to impose some other requirement on the document altogether.

Secondly, a *de minimis* test is too vague. A reversionary interest subject to the settlor's power of revocation is not so small it should be disregarded: see above. But as noted such an interest may have a nil economic value and the lifetime settlement in substance has the same effect as a will. How does one distinguish between revocable reversionary interests, which are valid, and (even) less significant interests (which are not)? Unless one knows what is too small an interest (and different views on that would be possible) it will be impossible to say whether documents

19 This word is not in the OED, but one of the authors of Lewin tells me it means: skeletal.

20 18th ed, 2008, para. 1-14

are valid or invalid.

The suggested *de minimis* principle is contrary to the authorities. The relevant cases are concerned with the distinction between testamentary dispositions and lifetime trusts. The cases are relevant because they do tend to contradict Lewin's proposed *de minimis* principle (which is not put forward as a principle of construction at all, but a rule of law). Thus in *Corlet v Isle of Man Bank Limited* [1937] 3 DLR 163, and *Anderson v Patton* [1948] 2 DLR 202 lifetime trusts which conferred what one might regard as minimal future revocable interests on beneficiaries other than the settlor, were both held to be valid. The latter case concerned a document reciting:

> received from A $5,000 which I am to hold in trust for A and which I am to pay out as instructed to X and Y if anything should happen to A. The money will be returned if A should demand it.

The Court held by a majority that even this was a valid trust. One can see the force of the minority view that this was actually intended to be testamentary. But the important point is that neither side looked at the matter as being determined by whether or not the interest given away was "squeletic".

## 72.5 Sham under foreign entities

The English law conception of "sham" has no application to foreign law entities. Whether or not a foreign entity is void as a sham depends on the foreign law of sham, or some similar doctrine, if the foreign law has one.

## 72.6 Foundation (*Stiftung*)[21]

This section is concerned with non-charitable foundations which are found in Liechtenstein, Jersey, the Bahamas and many civil law jurisdictions. I focus on Liechtenstein foundations (*Stiftungen*) though I refer at points to Jersey foundations. Foundation jurisdictions differ widely on points of detail, but I am not aware of any differences that matter for the purposes

---

21 On this topic see Venables, *The Taxation of Foundations* (2010); Easun, "Trusts & Foundations", ITPA Journal Vol 5, No. 3; Baker "Beneficiaries of Trusts and Foundations" accessible *www.taxbar.com/gitc.html*.

of this section.

The word "foundation" is sometimes used in the UK as a name for a charity (eg "the British Heart Foundation") but the word has no specific technical meaning in English law. In the USA "private foundation" is a technical term used to describe a specific category of charities and NPOs, in short, those which receive their funds from one person and which are regarded as donor-controlled.[22] I am not concerned with charitable foundations here.[23]

### 72.6.1 *Is a foundation an IT/CGT settlement, or a company?*

A Liechtenstein foundation normally has legal personality. Biedermann explains:

> Since, in most cases, the Liechtenstein foundation has legal personality, it is subject to the general provisions concerning legal persons and it has a corporate structure with a board of foundation. The *in rem* aspect of the beneficial rights under trusts, i.e. non-reachability of trust property by creditors of the trustee, is not necessary for foundations, since the foundation has its own personality. The beneficial rights under a foundation may be less strong, because there is no specific tracing possibility *vis-à-vis mala fide* purchasers and volunteers. However, this deficiency is overcome by the public faith principle, since anyone dealing with a foundation has to look at the objects and competence clause of a foundation in order to know whether a board of foundation is entitled to *e.g.* sell some specific foundation property.[24]

On the evidence of this passage it is considered that property in a foundation is not held "in trust". An essential (or almost essential)[25] characteristic of a trust is that "the assets constitute a separate fund and are

---

22 See US Internal Revenue Code § 509 (Private foundation defined).

23 For the question of whether foreign charities qualify for UK charity tax reliefs, see Kessler & Brown, *Taxation of Charities and Non-profit Organisations* (8th ed, 2011), chapter 2 (Definitions of Charity).

24 Biedermann, "Foundations vs Trusts" [1993] PCB 283.

25 It is hard to make any comment about trusts without qualification. A charitable trustee incorporated under s.50 Charities Act 1993 might not constitute a separate fund. But that is an anomalous and unusual case and perhaps itself not a "trust" in the ordinary sense.

not a part of the trustee's own estate".[26] A foundation does not have this characteristic. So it is not an IT/CGT settlement. There are of course other significant differences between a Liechtenstein foundation and a trust, in particular the beneficiaries of a foundation have different and somewhat weaker rights. But the failure to meet what the Hague Convention on the law applicable to Trusts identifies as a defining characteristic is crucial.

Since a foundation is a body corporate, it is a company for UK tax purposes. This is consistent with the comment in the OECD commentary on the Model Treaty that a foundation is a body corporate for tax purposes.[27] A foundation is therefore subject to UK corporation tax on its income and gains if UK resident and subject to income tax if non-resident. The test of residence is the company test of central management and control.

A foundation is usually a close company as:

(1) The members of the board are directors.
(2) The members of the board are participators.
(3) The foundation is under the control of directors who are participators.

However this depends on the constitution of the foundation.

A foundation is a settlement-arrangement[28] so it is a "settlement" for the purposes of s.87 TCGA; see too 45.2 ("Settlement" and "trustee").

As to whether a foundation is within s.13 TCGA, see 47.7 (Foundations).

### 72.6.2 *Is a foundation an IHT-settlement?*

Foundation property is normally held "for persons in succession" or "held

26 See Article 2 Hague Convention on the Law applicable to Trusts and on their Recognition. *Lewin on Trusts* (18th ed., 2008) regards the Hague Convention definition as "generally applicable": para 1-01. See too Hayton "Principles of European Trust Law" p.23 in *Modern International Developments in Trust Law* 1999, ed. Hayton ("While many mainland European jurisdictions have the functional equivalent of a charitable purpose trust in the guise of a foundation which has legal personality, we deliberately rejected extending our [conception of] trust to cover such functions. It is because a trust is not a company, not a corporate person, but a segregated fund owned by trustees, that different rules from those for companies developed for trusts.")

27 OECD Commentary on article 3(3): " ... the term 'person' includes any entity that, although not incorporated, is treated as a body corporate for tax purposes. Thus, e.g. a foundation (*fondation, Stiftung*) may fall within the meaning of the term 'person'."

28 Assuming (as will generally be the case) that the bounty test is satisfied.

with power to make payments out of the income". The question is whether a foundation is "governed by provisions equivalent in effect" to a trust. This raises a question of Liechtenstein law as to the effect of a foundation. Lorenz says:

> It now appears that the Liechtenstein Supreme Court has used Liechtenstein trust law as a basis for the development of a coherent pattern of principles applicable to all types of Liechtenstein asset planning devices, in particular foundations and establishments, and not just the trust …
> … the internal design of foundations will increasingly come to resemble that of trusts, and that disputes relating to foundations will increasingly be resolved by applying principles of trust law.[29]

Biedermann says:

> Operationally speaking, there is no difference between a family foundation and a family trust.[30]

HMRC say:

> In case of family foundations, business activity is not permitted. Accordingly, while a foundation has its own legal personality, its essence and purpose is to preserve and maintain assets for the beneficiaries, as is that of a trust.[31]

On the basis of this evidence it is considered that a foundation is "equivalent in effect" to a trust and is therefore an IHT-settlement. (The contrary argument would focus on the word "equivalent", and state that since there are undoubtedly some differences, the two are not equivalent.

---

29 *Disputes involving Trusts*, edited by Ledim Vogt, published by C H Beck, 1999, p.213.

30 Biedermann, "Foundations vs Trusts" [1993] PCB 283. Noseda makes a similar point: "The Foundations (Jersey) Law 2009: A Civilian Perspective" [2010] The Jersey & Guernsey Law Review 48 at [13].

31 Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters, 11 August 2009 *www.hmrc.gov.uk/international/joint-declaration-lich.pdf*.

The expression "equivalent in effect" is looking at the broad substance rather than absolute equivalence but where to draw the line is hard to tell.)

It is sometimes argued that a foundation cannot be an IHT-settlement if beneficiaries of the foundation have no enforceable rights and no interest in foundation property. But beneficiaries of a charitable trust have no rights and no interests in the trust property, and a charitable trust is clearly an IHT-settlement. All that matters is that there is some legal mechanism which recognises their rights and prevents the board of a foundation treating the foundation property as their own.

### 72.6.3 *Is a foundation an interest in possession settlement for IHT purposes?*

Since a foundation is an IHT settlement, the question may arise whether a beneficiary's interest under the settlement is an interest in possession. (This question does not often matter for IHT for foundations made after 2006.)

This raises two issues: what exactly is the test for an "interest in possession", a question of UK law; and whether any particular interest meets those requirements (a matter of applying Liechtenstein law to the document in question).

It is arguable a beneficiary of a foundation cannot have an interest in possession. "Interest in possession" is a term of English trust law, a foundation is not a trust, so the beneficiary's interest cannot be an IP. This view is supported by s.46 IHTA which expressly extends the definition of IP to Scottish entities which confer rights somewhat less than those of a life tenant of an English law trust. However the better view is that where "settlement" is given an extended meaning, the meaning of related terms such as interest in possession should be given a comparable extended meaning. Thus a beneficiary has an IP if they have the right to the income of the foundation as it arises. It might follow from this view that s.46 IHTA is otiose, but that is not a very strong objection.

Whether that requirement is met depends on the drafting (construed in accordance with Liechtenstein law). At the borderline the distinction between IP and non-IP trusts is one of form rather than substance, and not appropriate to a foundation which is not even a trust, but merely equivalent in effect. In such cases one can only answer the question on the basis of "doing the best one can" and with the benefit of appropriate foreign law advice.

### 68.6.4 *Is a foundation transparent for IT purposes; nature of foundation distributions for IT*

The taxation of a UK resident beneficiary on a distribution from a foundation raises interesting and unexplored questions. It is suggested that one should apply trust law principles by analogy rather than company law principles even though a foundation is a company and not an IT/CGT trust.

If that is right, the position depends on the drafting of the power which the foundation uses to make or authorise the distribution.[32] If the receipt is classified as income, it is classified as an annual payment, like a trust distribution. Where the terms of the foundation require distributions to a beneficiary, the distributions are income and the question is whether the foundation are classified as transparent under *Baker/Garland* principles

If the receipt is classified as capital the position is more straightforward as the usual s.731 and s.87 rules will apply.

### 72.6.4 *HMRC view*

HMRC say:

> ... foundations ("Stiftungen") [are] to be characterised, recognised and treated as *trusts* for UK tax purposes.[33]

---

32 See 22.8 (Payment from discretionary trust: income or capital?).

33 Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters, 11 August 2009 *www.hmrc.gov.uk/international/joint-declaration-lich.pdf*. This is subject to a disclaimer and qualification:

> "The Government of the Principality of Liechtenstein has considered and agreed with HMRC the following written guidance and consistent approach on characterisation, recognition and treatment of legal entities and fiduciary relationships for purposes related to the MOU, provided that provisions under Liechtenstein and UK law remain the same as currently as related to such characterisation, recognition, and treatment.
>
> For avoidance of doubt, nothing contained herein is to affect the ability of affected persons to rely on UK law or practice permitting alternative characterisation, recognition and treatment. The parties further recognise that the ultimate UK taxation consequences for UK taxpayers will depend on the particular facts as is the case where UK or other common law entities or fiduciary relationships, such as trusts, are involved."

TDSI guidance notes[34] para 2.3 provide:

> **Anstalts & Stiftungs** [March 2010]
> [1] Anstalts and Stiftungs are Liechtenstein business entities which are fiscally opaque. ...
> [2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit should be considered to belong to the settlor[35] and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.
> [3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust ... and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

Point [3] assumes that a foundation can be transparent for IT which contradicts point [1].

HMRC do not refer to any statutory provisions but are clearly saying that in their view foundations are trusts for all tax purposes. It is true that HMRC recognise that there may be special circumstances but in the absence of special circumstances, if it suits the foundation to take the view that the foundation is a trust for all tax purposes, including the IT/CGT definition, it could properly do so. That might be relevant, for instance, to obtain the benefit of ESC B18, or if a taxpayer wished to argue that a foundation was an interest in possession trust and transparent for income tax purposes.

## 72.7 Liechtenstein *Anstalt* (Establishment)

Liechtenstein Companies House explains the nature of an anstalt.[36]

TDSI guidance notes[37] para 2.3 provide:

---

34 *www.hmrc.gov.uk/tdsi/guidance-notes.pdf.* For TDSI (tax deduction scheme for interest) see 17.11 (Withholding tax on interest from deposit-takers).

35 [Author's footnote] It is assumed that the foundation is a settlor-interested trust.

36 *www.llv.li/pdf-llv-gboera-merkblatt_zur_neueintragung_einer_anstalt.pdf*

37 Accessible *www.hmrc.gov.uk/tdsi/guidance-notes.pdf.* For TDSI (tax deduction scheme for interest) see 17.11 (Withholding tax on interest from deposit-takers).

> **Anstalts & Stiftungs**
> Anstalts ... are Liechtenstein business entities which are fiscally opaque. The current HMRC view is that Anstalts should all be dealt with as if they are companies. For TDSI, this means that Anstalts should receive gross interest.

Despite this statement, and classification in the official list as "opaque", HMRC practice has not always been consistent.[38] The Liechtenstein disclosure facility takes a different approach:

> 1) An establishment ("Anstalt") in Liechtenstein to be characterised, recognised, and treated for UK tax purposes as follows:
> a) An establishment that according to its articles is permitted to undertake a business activity ("*nach kaufmännischer Art geführtes Gewerbe*"), and therefore is obliged to have an audit, to be characterised, recognised, and treated for UK tax purposes as a *company.*
> b) An establishment that according to its articles is *not* permitted to undertake a business activity ("*nach kaufmännischer Art geführtes Gewerbe*"), and therefore is *not* obliged to have an audit, to be characterised, recognised, and treated for UK tax purposes as follows:
>    i) *An establishment with founder's rights or shares* to be characterised, recognised and treated as a *company*.
>    ii) *An establishment with no founder's rights or shares* to be characterised, recognised and treated as a *trust.*
>
>    For avoidance of doubt, in case of an establishment with founder's rights as used above, the founder (settlor) with founder's rights has full powers to decide upon who the beneficiaries are and to change the beneficiaries, and such powers are transferrable.[39]

## 72.8 Liechtenstein Treuunternehmen

The Liechtenstein disclosure facility records the HMRC view:

---

38 Private correspondence.

39 Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters Signed on 11 August 2009 *www.hmrc.gov.uk/international/joint-declaration-lich.pdf*. This statement is subject to a disclaimer and qualifications set out at 72.6.4 (HMRC view).

> 2) A trust enterprise ("Treuunternehmen") in Liechtenstein to be characterised, recognised, and treated for UK tax purposes in an analogous way as an establishment.[40]

This is controversial.

## 72.9 Liechtenstein Treuhandschaften

HMRC say:

> Trusts ("Treuhandschaften") ... [are] to be characterised, recognised and treated as *trusts* for UK tax purposes.[41]

## 72.10 Other Liechtenstein entities

The Liechtenstein disclosure facility provides:

> 1) The European Union harmonised company forms, such as "Aktiengesellschaft" or "AG"; "Gesellschaft mit beschränkter Haftung" or "GmbH"; "Societas Europaea" or "SE", to be characterised, recognised and treated as a *company* for UK tax purposes.
> 2) Entities formed as "Kommanditgesellschaft" or "KG" or "Kollektivgesellschaft" to be characterised, recognised and treated as a *partnership* for UK tax purposes.

## 72.11 American revocable trusts (grantor trusts)

Revocable trusts are commonly used in the US for estate planning.[42] With an American settlor these are almost always grantor trusts (a US income tax concept) and transparent for US tax purposes as to income and capital gains, though with non-US settlors they are only transparent in limited

40 See above footnote.

41 Joint Declaration by the Government of the Principality of Liechtenstein and HMRC Concerning the Memorandum of Understanding Relating to Cooperation in Tax Matters, 11 August 2009 *www.hmrc.gov.uk/international/joint-declaration-lich.pdf*. This statement is subject to a disclaimer and qualifications set out at 72.6.4 (HMRC view).

42 I am grateful to Ian Watson for his comments on this section. For other US trusts, see Von E. Sanborn, "US tax classification of trusts", (2005) TQR Vol 3 issue 2 p.16 accessible to STEP members on *www.step.org*.

circumstances.

The classification of a US revocable trust turns on the nature of the rights conferred by the trust, which depends on the drafting and proper law of the trust.[43] Only general comments are possible here.

Under a common form revocable trust, the settlor (the synonymous terms grantor, trustor, creator or donor are often used in American trust documentation) is sole trustee, the trust is revocable and the income and capital is paid to the settlor on demand. Section 603 of the America Uniform Trust Code[44] provides:

> While a trust is revocable [and the settlor has capacity to revoke the trust],[45] rights of the beneficiaries are subject to the control of, and the duties of the trustee are owed exclusively to, the settlor.

A US revocable trust of this kind is not an IT/CGT settlement as the property is not held "in trust". This seems paradoxical, but the fact that American lawyers describe something as a trust does not mean that it is a trust within the meaning of the word as used in UK statutes. In English law, "there is an irreducible core of obligations owed by the trustees to the beneficiaries and enforceable by them which is fundamental to the concept of a trust. If the beneficiaries have no rights enforceable against the trustees there are no trusts."[46] Any rights which purport to be granted under the US revocable trust during the lifetime of the settlor (or at least while the settlor is mentally competent) are illusory (unassignable and unenforceable).

If the settlor is not the sole trustee, there is a trust; but if (in the words of the Uniform Trust Code) "the duties of the trustee are owed exclusively

43 Each US state is a separate common law jurisdiction, with its own trust law, ultimately derived from English law but with statutory and case law variations.

44 Accessible *www.nccusl.org*. The uniform code project is an attempt to standardise US law. Adoption of uniform codes is far from universal, however, and each state adopting them may do so with variations. Some state statutes (eg, California Probate Code section 15800) impose rules almost identical in effect to UPC section 603, though independently of the uniform code project.

45 Square brackets in original, as the wording is intended to be optional.

46 *Armitage v Nurse* [1998] Ch 241 at p.253. Likewise Hague Convention art.2 ("A trust has the following characteristics ... (c) the trustee has the power and the duty, *in respect of which he is accountable,* to manage, employ or dispose of the assets in accordance with the terms of the trust ..."

to the settlor" it is considered that the US revocable trust is a bare trust for CGT as the settlor is absolutely entitled as against the trustee.[47]

A US revocable trust of this kind is similarly not an IHT-settlement, since:

(1) if the settlor is sole trustee there is no trust;

(2) if the settlor is not sole trustee there is only a bare trust.

The property is not held in trust for persons in succession. The better view is that a US revocable trust is also not equivalent in effect to a trust for persons in succession. The element of succession is that of a will. In other words, a US revocable trust is in English law a nomineeship or testamentary disposition.[48] This view was adopted in *BQ v DQ*.[49]

Depending on the wording, the US revocable trust may become a settlement (for IHT and IT/CGT) if the settlor loses mental capacity. This could of course have significant UK tax consequences.

One could if desired draft a trust which meets the US requirements to be a grantor trust and which is a settlement for IT/CGT and IHT purposes. It would need to be one where the trustees owed duties to beneficiaries other than just the settlor.

## 72.12 Legal life interest (Northern Ireland)

Legal life interests (Northern Ireland) and proper liferents (Scotland) are rare in practice, but I discuss them here because (aside from the intrinsic interest of the questions which arise) that sheds some light on the treatment of civil law usufructs.

The CG Manual provides:

> **31303 Northern Ireland**
> The land law of Northern Ireland, except where there is specific legislation to the contrary, is basically the same as the pre-1925 law of England & Wales. Accordingly it is possible to have a legal interest 'limited for life'. Under Section 43(5) IHTA 1984 in such a situation the property is deemed to be settled property.

---

47 See s.60 TCGA.

48 See 72.4 (Nomineeships). Underhill & Hayton agree: *Law Relating to Trusts & Trustees* (17th ed 2006), para 4.8 fn1.

49 Supreme Court of Bermuda [2011] WTLR 373; 2011] TLI 23 accessible *www.gov.bm*.

This is correct. Section 43(5) IHTA provides:

> In the application of this Act to Northern Ireland this section shall have effect as if references to property held in trust for persons included references to property standing limited to persons...

The Manual continues:

> There was no comparable provision for CGT until Section 63A TCGA 1992 was enacted in FA 2006 with effect from 6 April 2006. Under this provision where a person with a legal interest limited for life dies, a person who acquires in fee simple or fee tail in possession as a consequence of the former person's death is deemed to acquire all the assets forming part of the property at market value at death. This does not apply to land in Ireland outside Northern Ireland.

Section 63A TCGA provides:

> (1) The provisions of this Act, so far as relating to the consequences of the death of a person to whom property in Northern Ireland stands limited for life ("the deceased"), shall have effect subject to the provisions of this section.
> (2) A person who acquires property in fee simple absolute or fee tail in possession as a consequence of the deceased's death shall be deemed to have acquired all the assets forming part of the property at the date of the deceased's death for a consideration equal to their market value at that date.

This confers a tax free uplift on death[50] but does not make the legal life interest into a settlement for IT/CGT purposes. Thus if the life tenant and the remainderman sell their interests:

(1) the relief in s.76 TCGA does not apply.
(2) the life tenant may qualify for CGT private residence relief but the remainderman will not qualify (unless they occupy the property as their main private residence, which would not be usual). The relief in s.225 TCGA will not apply.

---

50 This applies even if the life interest is not an estate IP: the drafter of the 2006 reforms overlooked Northern Ireland life interests.

In practice, if private residence relief applies, it is better to create a classic settlement and not a legal life interest because then the property can be sold during the lifetime of the life tenant free of CGT.

## 72.13 Proper liferent (Scotland)

The CG Manual helpfully explains the Scots law background:

> **31301 Scottish proper liferents** [August 2007]
> In Scotland the expression 'liferent' is used to describe the situation where the income from particular property is to be paid to a person, the liferenter, for a specified period, generally his or her lifetime. At the end of the period the property will generally pass to a person known as the fiar.
> There are two ways in which a liferent can be set up. In the first case, where the interest is known as an improper liferent, the property is vested in trustees who administer the property and pay the income to the liferenter. In general the trustees have the power to sell the property in question and replace it by other property, whether land and buildings or other assets. On the death of the liferenter the provisions of s.72, s.73 and s.74 TCGA apply as appropriate. See CG36450+.

An improper liferent appears to be a classic settlement, and its tax treatment is straightforward. We are concerned with proper liferents. The Manual continues:

> In the second case, the title to heritable property (land and/or buildings) is held by the liferenter. In this situation he or she is a proper liferenter. A proper liferenter cannot dispose of a greater title than his own. He cannot dispose of the property in his will. On his death the property passes to the fiar.
> Where property in Scotland passes to a person for life under a will, and there is no suggestion that it is to be held by trustees, he has a proper liferent.

The Manual goes on to consider the CGT treatment:

> A proper liferent does not make the relevant property settled property [for CGT]. Section 43(4)(c) IHTA 1984 provides that it is settled property for IHT purposes. TCGA does not go so far, but Section 63 provides that the person entitled to possession on the death of a proper

liferenter shall be deemed to have acquired all the assets forming part of the property at their market value at death.

Section 63 TCGA provides:

> (1) The provisions of this Act, so far as relating to the consequences of the death of a proper liferenter of any property, shall have effect subject to the provisions of this section.
> (2) On the death of any such liferenter the person (if any) who, on the death of the liferenter, becomes entitled to possession of the property as fiar[51] shall be deemed to have acquired all the assets forming part of the property at the date of the deceased's death for a consideration equal to their market value at that date.

The Manual concludes:

> The disposal or termination of a proper liferent may qualify for private residence relief under section 222 TCGA as it is an interest in land.

As in Northern Ireland, this confers a tax free uplift on death[52] but it does not make the proper liferent a settlement for CGT purposes. Thus if the liferenter and the remainderman sell their interests:

(1) The relief in s.76 TCGA does not apply.
(2) The liferenter may qualify for CGT private residence relief but the remainderman will not qualify (unless they occupy the property as their main private residence, which would not be usual). The relief in s.225 TCGA will not apply.

In practice, if CGT private residence relief applies, it is better to create a classic settlement and not a proper liferent, because then the property can be sold during the lifetime of the liferenter free of CGT.

The IHT Manual provides:

> **16071 Introduction** [June 2007]
> The original view was that a proper liferenter was beneficially entitled to the property which was the subject of the liferent and that a proper liferent was a "settlement" within the meaning of [s.43 IHTA 1984]

51 Some databases erroneously read "heir".
52 This applies even if the liferent is not an estate IP: the drafter of the 2006 reforms overlooked Scottish liferents.

with the result that the liferenter fell to be treated as beneficially entitled to the settled property.

However the Board were advised that a proper liferenter was beneficially entitled only to his right to the liferent and not to the property itself so that on the death of a proper liferenter the liferenter was beneficially entitled to the liferent and not to the capital in which it subsisted. It follows that on the death of the liferenter the value to be placed on the proper liferent was nil.

**16072. IHT position** [June 2007]

Section 93 FA 1980 brought proper liferents into line with the settled property regime of the [IHTA] ... [The Manual then summarises the legislative provisions referred to below].

Section 43(4) IHTA provides:

In relation to Scotland "settlement" also includes...

(c) any deed creating or reserving a proper liferent of any property whether heritable or moveable (the property from time to time subject to the proper liferent being treated as the property comprised in the settlement);

and for the purposes of this subsection "deed" includes any disposition, arrangement, contract, resolution, instrument or writing.

Sections 46, 47 IHTA provide:

**46 Interest in possession: Scotland**

In the application of this Act to Scotland,

[1] [a] any reference to an interest in possession in settled property is a reference to an interest of any kind under a settlement by virtue of which
  - [i] the person in right of that interest is entitled to the enjoyment of the property or
  - [ii] would be so entitled if the property were capable of enjoyment,

[b] including an interest of an assignee under an assignation of an interest of any kind (other than a reversionary interest) in property subject to a proper liferent;

[2] and the person in right of such an interest at any time shall be deemed to be entitled to a corresponding interest in the whole or any part of the property comprised in the settlement.

**47 Reversionary interest**

In this Act "reversionary interest" means

> [a] a future interest under a settlement, whether it is vested or contingent (including an interest expectant on the termination of an interest in possession which, by virtue of section 50 below, is treated as subsisting in part of any property) and
> [b] in relation to Scotland includes an interest in the fee of property subject to a proper liferent.

Lastly, for completeness, s. 142(7) IHTA provides that for the purposes of s. 142 IHTA (deeds of variation):

> In the application of subsection (4) above to Scotland, property which is subject to a proper liferent shall be deemed to be held in trust for the liferenter.

## 72.14 Usufructs

### 72.14.1 *The property law background*

A discussion of the law(s) of usufructs[53] is not possible here. In outline, Article 578 of the French Code Civil provides:

> An usufruct is the right to enjoy property belonging to another, as if its owner, at the expense of preserving that property.[54]

The owner of the right is called "**the usufructuary**" and the owner of the property subject to the right is here called "**the encumbered owner**". (I think this is a clearer term than "bare owner" which would be a more literal translation of the French term *nu-propriétaire*.)

### 72.14.2 *Is a usufruct an IT/CGT settlement?*

The CG Manual provides:

---

53 I do not distinguish here between usufructs under different civil law jurisdictions, though it is possible that there are material differences; I would be grateful for the comments of any reader with expertise in these areas.

54 *L'usufruit est le droit de jouir des choses dont un autre a la propriété, comme le propriétaire lui-même, mais à la charge d'en conserver la substance.* The Code Civil is accessible in French on *www.legifrance.gouv.fr*.

> **31305 Other interests** [August 2007]
> ... A usufruct governed by French law would be regarded as a non-trust arrangement as it is broadly similar to a Scottish proper liferent.

This is clearly right. Thus if the usufructuary and the encumbered owner sell their interests:

(1) The relief in s.76 TCGA does not apply.
(2) The usufructuary may qualify for CGT private residence relief but the encumbered owner will not qualify (unless they occupy the property, which would be unusual). The relief in s.225 TCGA will not apply.

There is no CGT uplift on the death of the usufructuary.

It is not possible to avoid this problem by creating a classic settlement instead of a usufruct, because civil law systems do not usually recognise trusts; even if a trust is theoretically possible, it is probably not practical for tax reasons or because it raises too many uncertainties.

The result is a CGT discrimination against usufructs. If the usufruct is in an EU jurisdiction, this discrimination is very difficult to justify, and it is suggested that an uplift on death should be available under EU law principles, and, arguably, private residence relief on a sale during the lifetime of the usufructuary.

If an individual creates a usufruct under which they retain an interest, this is a part disposal for CGT purposes as s.70 TCGA (transfers into settlement) does not apply.

### 72.14.3 *Is a usufruct an IHT-settlement?*

Is a usufruct governed by provisions equivalent in effect to a classic life interest settlement, and so a settlement within the IHT definition? There is an element of succession, but there are major differences. A usufruct is more like a lease for life or a legal life interest than a classic settlement. Overall it is sufficiently unlike a settlement that it is suggested that the two should not be regarded as equivalent in effect, so it is not an IHT-settlement.[55] It has no settled property and no trustees.[56]

---

55 This issue does not arise for proper liferents (Scotland) or legal life interests (Northern Ireland) since the last paragraph of the definition dealing with provisions “equivalent in effect” only applies to non-UK legal systems.

56 See too 45.2 ("Settlement" and "trustee").

If a usufruct is an IHT-settlement, there could be charges to IHT on the creation of the usufruct, on ten-year anniversaries[57] and on the death of the usufructuary, though the property will often qualify as excluded property (depending of course on the domicile of the settlor and, if a spouse, the domicile of the usufructuary). DTA relief will sometimes be available. Pre-owned assets would also need consideration.

On the other hand, if the usufruct is an IHT-settlement, the interest of the encumbered owner is a reversionary interest and so in principle excluded property, which is helpful to the taxpayer if the encumbered owner is UK domiciled. So depending on the circumstances it will sometimes be in the taxpayers' interest to argue the issue one way and sometimes the other; and the same applies for HMRC.

A common case is where an owner of property creates a usufruct under which they are the usufructary and a child is the encumbered owner. If the usufruct is an IHT-settlement, and the owner is UK domiciled, then:

(1) the owner makes a transfer of value equal to the value of the property[58] but
(2) the gift is a PET so far as attributable to the child's reversionary interest.[59]

That is so absurd as to make one question whether the analysis that a usufruct is an IHT-settlement can be correct.

In practice I expect that (if the issue is considered at all) a taxpayer takes whichever view suits them better and indeed in this toss-a-coin area, and in the absence of HMRC guidance, a taxpayer is entitled to do that. HMRC might adopt whichever view suits them better, or whichever view the taxpayer adopts or even perhaps whichever view leads to a fair result on the facts of the case. It appears that HMRC have on occasion accepted the view that a usufruct is an IHT-settlement[60] but one cannot infer guidance from specific instances.

57 Though a usufruct created on death will qualify as an IPDI.

58 See s. 3(1) IHTA; the value of the usufructuary's interest is disregarded as an interest in possession in settled property: s.5(1)(a)(ii) IHTA.

59 See s.3A(1)(c) and 3A(2)(a) IHTA. The encumbered owner's interest is excluded property but nevertheless forms part of their estate

60 McCutcheon on Inheritance Tax, 5th edition para 32.60.

## 72.15 Société civile and société en nom collectif

The former ITH provided:

**304. Company and partnership distinguished**
A company, therefore, acts for itself and not as agent or representative of its members. When profits arise they arise to the company and not to the shareholders. The shareholders have no right to them as profit. The rights of the shareholders include the right to a dividend when formally declared. In a partnership, on the other hand, each partner is the agent of the other partners. The profits arise to each partner according to the provisions of the partnership agreement. It is the existence of that agency relationship which distinguishes a partnership from a company. It is broadly true to say that a partnership does not have, as a company does, distinct legal persona but the presence of legal persona is not in itself conclusive. In Scotland a partnership is a distinct legal entity but there is, at the same time, an agency relationship between the firm and its members and between its members. That agency relationship is the hallmark of partnership and characterises the Scots partnership as a partnership rather than as a company. Considerations of this sort are important when dealing with some unfamiliar European company cum partnership creations. The French Société Civile is one such body and the Société en nom Collectif is another. Broadly speaking we regard the first as a company the second as a partnership. Both have legal personality but in the former case the profits arise to the body itself and in the latter case we take the view that the profits arise to the partners. There is more about how we decide which category is appropriate in chapter 16 (ITH1672–ITH1675). ...
**1673. Establish facts**
The first stage is one of factual enquiry and in relation to any appeal procedure is a matter for the Appeal Commissioners. It can be a difficult stage – even for trained Revenue lawyers. Experts have been known to differ and in a case about these bodies *Dreyfus v IRC* 14 TC 560 we think the Commissioners came to a wrong decision and we do not follow the Courts ruling. The case involved a French SNC and the Courts said it was a company, being guided by the Commissioners' finding of fact about foreign law. We – after listening to expert advice – think it analogous to a partnership. This question of foreign law is difficult. Where the foreign law is a common law it will often share basic concepts with English law and that eases things a little. But if the foreign law is a civil law – a written code of law – the chances of a communications gap developing between a foreign expert adviser and

an English lawyer seeking his advice are much greater.

There are no hard and fast rules governing this question of foreign law; every association has to be considered separately and in the light of its Articles of Association or equivalent code. We look for indicators as to whether the Association carries on the business itself or whether the participators do so jointly; and whether the profits accrue directly to the participators or whether they accrue to the Association which then distributes them to the participators. These conclusions should then help us decide whether the members of the Association are carrying on a trade, profession or vocation solely or in partnerships and, if so, whether the income is immediately derived by the member from the carrying on of that trade.

### 72.15.1 *Société civile immobilière*

The Employment Income Manual provides:

> **11371 Homes outside the United Kingdom owned through a company: General background** [December 2008]
>
> ...Meaning of company
>
> Company is defined in section 992 ITA 2007 as any body corporate or unincorporated association other than a partnership, a local authority or a local authority association. This wide definition is not restricted to companies registered in the UK and includes a number of entities formed under foreign law through which individuals may acquire homes outside the UK. Such entities will generally be classified as opaque for UK tax purposes. Examples include the ownership of a home in France through a "Societe Civile Immobiliere" (SCI) or in the United States through a Limited Liability Company (LLC).

The view that a SCI is a company for UK tax purposes is controversial.[61] A société civile is classified as a partnership in the UK/France IHT DTA.[62] The introduction of benefit in kind foreign homes relief and the subsequent UK/France DTA have made the issue somewhat less important but it still matters.

---

61 See Frimston and Urquhart "La Vie en France" Taxation, 13 Jun 2002 (Vol 149, Issue 3861), p.296.

62 See 60.5.2 (Treaty situs rules: France and Italy). See too John Avery Jones "Characterisation of Other States' Partnerships for Income Tax", [2002] BTR at p.425.

The issue arose in *Joseph Carter v Baird* 72 TC 303 where a company sold land and purchased a SCI. The company claimed roll-over relief which only applied on a purchase of land. The company failed since it acquired an interest in the SCI and not land. Unfortunately the question of whether an SCI was transparent for CGT was not argued and the necessary expert evidence was not put to the general commissioners. (The litigant appeared in person and was not represented by counsel). The case therefore has no authority at all, and on another occasion there is nothing to stop a taxpayer putting forward the argument for transparency, properly supported by evidence.

## 72.16 Jersey general and limited partnerships

A Jersey general partnership is transparent.[63] It is considered that a Jersey limited partnership is transparent. It is similar to a Guernsey limited partnership which HMRC classify as transparent in the official list.

## 72.17 Foreign limited liability partnership

References to a LLP in UK legislation are references to UK incorporated LLP (unless the context otherwise requires.)[64] It is considered that the statutory rules which (generally) make a UK LLP transparent for IT and CGT do not apply to a foreign LLP.
HMRC agree. Business Income Manual provides:

> **72145Limited Liability Partnership: International aspects** [January 2006]
> *UK branches of overseas LLPs*
> The tax treatment of a UK branch of an overseas LLP, and the members of such a LLP, depends on how the foreign entity is regarded for the purposes of the UK taxation provisions. Where the foreign LLP is regarded as a 'body corporate' for the purposes of the UK Taxes Acts the profits of the UK branch will be chargeable to CT. On the other hand if it is regarded as a partnership then members are separately liable to tax

63 *Padmore v IRC* 62 TC 352; see Jersey Law Commission "The Jersey Law of Partnership" (consultation paper, 2008) para 21.12 ("Viewed as a whole, in fact the law of partnership of [England and Jersey is] essentially the same...").
64 See 36.7.1 (Definition of LLP).

> on their share of the branch's profits under the existing legislation for partnerships rather than under the LLP Act. The latter Act only applies to UK registered LLPs.

HMRC classify a Jersey LLP as opaque in the official list. This is controvertial.[65] However the issue is at present academic because (partly as a result of the HMRC view and partly due to burdensome Jersey law requirements) no Jersey LLP has yet been registered.

## 72.18 Hindu undivided property

The CG Manual provides:

> **31305 Other interests** [August 2007]
> ... a case involving Hindu Undivided Property would be regarded as a discretionary trust rather than an unincorporated association.

## 72.19 Japanese tokkin

HMRC regard a tokkin as transparent. The INTM provides:

> **355160 Claims by Japanese "Tokkin" funds** [July 2005]
> 'Tokkin' is an abbreviation of 'tokutei kinsen', and means 'designated monetary trust'.
> Cash or other assets for this type of fund are deposited by the investor(s) with a trustee who manages them on behalf of the investor(s), and in accordance with his/her/their instructions. The tokkin is set up and managed under the terms of a written agreement between the parties, drawn up under Law No 62 of 21/4/1922 of Japan.
> Because the Dividends and Interest Articles of the convention provide for relief **only to the beneficial owner** (INTM332000) of the income, claims in respect of income paid to tokkin funds **must** be made by the beneficial owner of the tokkin (the 'investor(s)'above), and **cannot** validly be made by the tokkin's manager.

---

65 Walker "Limited Liability Partnerships: True Partnerships" [1998] JLR 1 argues that a Jersey limited liability partnership is a partnership in the ordinary sense of the word. In *R v IRC ex p. Bishopp* 72 TC 322 the Court was asked but refused to express a view on that. On the transparency of partnerships generally, see 36.3 (Transparency of partnership for IT) and 36.6 (Transparency of partnership for CGT).

So if you see a claim or supporting voucher which makes any reference to tokkin, you should ensure that you consider only claims made by the beneficial owner, that is, the **original investor**, in respect of his/her/their share in the tokkin.
There is no reason why a single investor should not own **all** the funds in a tokkin, but you should make certain that your claim has been made by the beneficial owner and not by the trustee, or an investment manager.
The original investors/beneficial owners may be either individuals or companies.
But it should be clear in either case that **no** relief can be due to the tokkin **itself**.

## 72.20 Dutch bewind

Kortmann and Verhagen say:

> The *bewind* cannot be characterised as a trust in the sense of Article 1 of the Principles. A trust in the sense of the Principles only exists in situations where the trustee legally owns the assets to be managed, which is not so in the case of *bewind*. In the case of *bewind* the beneficiary is legal owner of the assets to be managed. There are, however, restrictions on the beneficiary's right to dispose of the assets placed under *bewind*. Either the legal owner cannot dispose of these assets at all, or he can only do so subject to the *bewind*. The *bewindvoerder*, as the administrator is usually called, acts in the case of *bewind* only as agent for the owner of the assets (the beneficiary). Because the assets to be managed are not legally owned by the *bewindvoerder*, the assets remain unaffected by the bankruptcy of the *bewindvoerder*.[66]

On this basis it is considered that a bewind is a nomineeship.[67]

---

66 Hayton, Kortmann and Verhagen, *Principles of European Trust Law, Law of Business and Finance* Vol 1,(1999) p.199. Similarly Gretton "Trusts Without Equity" (2000) 49 Int'l & Comp. L.Q. 599: "Though it functions as a trust, the *bewind* is not a trust, for a simple reason: the location of legal title is the reverse of the trust."

67 See 72.4 (Nomineeships).

## 72.21 Netherlands Fonds voor gemene rekening (closed funds for mutual account)

In 2010 the UK and the Netherlands reached the following agreement regarding the application of the UK/Netherlands DTA to investors in closed funds for mutual account *fonds voor gemene rekening* ("closed FGR"):

> This Agreement applies to closed FGRs formed in conformity with the Decree of 11 January 2007, CPP2006/1870M, Dutch. Gov. Gaz. No 15, 2007. A closed FGR can act as a pooled investment vehicle for the assets of pension funds and other investors. The closed FGR invests these assets on behalf of those investors.
>
> The competent authorities of the Netherlands and the UK agree that a closed FGR[68] is fiscally transparent.
>
> A closed FGR can also consist of several closed FGRs as described in par. 4 of the Decree of 11 January 2007, CPP2006/1870M, Dutch. Gov. Gaz. No 15, 2007. Such an umbrella fund is also fiscally transparent.
>
> Since a closed FGR is fiscally transparent, all income and gains derived by the fund from the fund assets are allocated to the investors in the closed FGR in proportion to their participations in the fund.
>
> *Request for application of the benefits of a Convention on behalf of the participants*
>
> A closed FGR which is established in the Netherlands and which receives income arising in the UK may itself, represented by its fund manager or its depository, in lieu of and instead of the investors in the closed FGR, claim the benefits of an agreement for the avoidance of double taxation to which the UK is a party and which is applicable to those investors on behalf of those investors in the closed FGR.
>
> Such claims may be subject to enquiry and, where requested, a fund manager or depository shall provide relevant information which may include a schedule of investors and allocated income relevant to a claim.
>
> A closed FGR may not make a claim for benefits on behalf of any investor in the closed FGR if the investor has itself made a claim for benefits in respect of the same income. If a closed FGR intends to make a claim for benefits on behalf of an investor, the fund manager or its depositary should clearly communicate this to the investor to avoid duplicate claims in respect of the same income.

68 [Footnote original] Various translations of 'Fonds voor Gemene Rekening' are possible, such as 'fund for mutual account' or 'fund for joint account'.

This Agreement shall be subject to regular review.

## 72.22 US limited liability company

### 72.22.1 *Transparency*

TG IT manual provides:

> **DT19853A United States of America: United States limited liability companies**
> Generally speaking, United States federal income tax is charged on the profits of LLCs on the basis that they are fiscally transparent, ie tax is imposed on the members of the LLC and not on the LLC itself.
> However, for the purposes of UK tax we have taken the view in relation to those LLCs that we have so far considered that they should be regarded as taxable entities and not as fiscally transparent. Accordingly we tax a UK member of a LLC by reference to distributions of profits made by the LLC and not by reference to the income of the LLC as it arises.

In *Swift v HMRC*[69] a Delaware LLC was held to be transparent. HMRC say:

> HMRC has appealed the decision and intends, for the time being, to continue with its current general practices in relation to US LLCs. If, however, any member of a US LLC feels that the UK treatment of a particular LLC should be reviewed in the light of the decision of the Tribunal, they should write to [HMRC contact] setting out fully why they believe that to be the case.[70]

Tax Bulletin 29 also contained a concession but the problem is now dealt with in the 2001 treaty, see 50.20 (US/UK DTA). Also see 72.25.3 (Ordinary share capital: Delaware LLC).

---

69 [2010] UKFTT 88. The Tribunal noted at [17] that its decision concerned only this particular Delaware LLC, and since there is wide freedom to contract the terms of a Delaware LLC, it may not be of general application. However I understand that the LLC did not in fact have any particularly unusual features.

70 "Swift v HMRC: UK tax treatment of a US LLC" 20 May 2010 *www.hmrc.gov.uk/international/swift-v-hmrc.htm*.

## 72.22.2 *Capital contribution: company law background*

Capital contributions are a common method for Delaware companies to raise additional capital. The CG Manual explains the company law background:

> **43500 General** [April 2009]
> The company law provisions of some foreign jurisdictions, notably the USA, provide for the making of capital contributions to companies. A capital contribution is a contribution to the equity capital of a company, but is not made in exchange for shares issued to the contributor and it does not constitute a separate asset in its own right. See INTM503050 where any equity function arguments are raised.
> An overseas company receiving a capital contribution may treat it in a number of ways, depending on the law of the foreign jurisdiction concerned and the conditions attaching to the payment. These may give the company a choice whether to designate the contribution as 'surplus' or as 'capital'. Amounts designated as 'surplus' may be available for distribution to shareholders, subject to solvency requirements. Amounts designated as 'capital' may only be repayable by way of a capital reduction. A company's balance sheet will generally show capital contributions made to it as an item of shareholders' funds separate from paid up share capital. Capital contributions may be described, for example, as 'additional paid in capital'.
> Capital contributions are not recognised under UK company law and if a payment is not made as part of the terms of issue of shares, it is possible it is either a loan or a gift. If a UK taxpayer contends that a sum paid to an overseas company is a capital contribution rather than a loan or gift, evidence to support that contention should be sought.
> For example if a UK company suggests a payment to an overseas affiliate is a capital contribution rather than a loan or gift there should be evidence of the appropriate treatment in the company accounts. If however there is a possibility that the money can be repaid, it is likely to be a debt within the loan relationships regime, see CTM51200. It is therefore necessary to examine all the circumstances surrounding the money transfer before coming to any conclusion as to what the nature of the payment is. If however agreement cannot be reached as to the nature of the payment and therefore the tax consequences (see CG43501 and CG43502 below), the decision lies with the Tribunals and the Courts.
> Occasionally a capital contribution may be made to a UK company. As capital contributions are not a concept formally recognised within UK company law, a contribution received by a UK company should be

reported within distributable reserves either as a gift or possibly a donation. If however it can be repaid in any circumstances it should be considered as a loan falling within the loan relationships regime.

The International Manual also makes some comments:

> **503050 Issues affecting equity function cases** [March 2007]
> ... *Capital contributions*
> The company law provisions of some foreign jurisdictions, notably the USA, allow for the making of capital contributions to companies. A capital contribution is a contribution to the equity capital of a company. It is not a loan and creates no obligation to transfer economic benefit to the maker of the contribution.
> In the UK there is no company law provision regarding capital contributions. If a UK company receives a capital contribution it is normally reported within shareholders' funds. If it makes a capital contribution it will normally be included in the accounts as an added cost of investment in a subsidiary.
> If a UK company contends that a sum paid to an overseas affiliate is a capital contribution rather than a loan, HM Revenue & Customs can only accept the contention if there is evidence supporting it. For example, there should be a written agreement that a capital contribution has been made rather than a loan, and evidence of the appropriate treatment in the company accounts. If there is a possibility that the money can be repaid, it is a 'money debt' under the loan relationships legislation. It is necessary to examine all the circumstances surrounding the money transfer before making a decision. From HMRC's point of view, the amount contributed should not be distributable.

In *Fenston v HMRC* [2007] STC (SCD) the position was explained as follows:

> ... assuming that at all relevant times the assets of the Company exceeded its liabilities, ... as a result of the Contributions, the state of the Company's stock changed in the sense that the amount of funds distributable with respect to the Shares as a dividend or upon liquidation was increased by the amount of the Contributions.
> Under Delaware law, the funds available for payment of dividends, if and when declared by a corporation's board of directors, are payable out of "surplus". 8 Del. C.§ 170. "Surplus" is defined in relation to "capital". "Capital" with respect to no par stock, such as the Shares, is defined as that portion of the consideration received by a corporation for the issued

shares of its capital stock that the directors determine to be capital, or if no such determination is made, the amount of consideration received. 8 Del. C. § 154. The excess, if any, at any given time, of the net assets of the corporation over the amount so determined to be capital shall be "surplus". 8 Del. C. § 154. "Net assets" means the amount by which total assets exceed total liabilities. 8 Del. C. § 154. Therefore, the "surplus" of a corporation is an amount equal to the total assets of the corporation, minus the total liabilities of the corporation, minus the capital of corporation, minus the total liabilities of the corporation, minus the capital of the corporation (as just described). Here, the Contributions increased the Company's net assets, and thus its surplus, thus increasing the amount of funds the Company could lawfully have distributed to the trustees (as stockholders) as a dividend.

With respect to entitlement to distributions on dissolution, when a corporation dissolves, its assets are held in trust for the benefit of creditors, and if creditors are paid in full, the stockholders. Accordingly, when a corporation dissolves it must first pay or provide for its creditors, both fixed and contingent, in full before any distribution can be made to stockholders. However, once creditors are paid or provided for, any residual assets are to be distributed to the corporation's stockholders. 8 Del. C. § 281. As described above, the Contributions increased the Company's total assets. If the Company had been dissolved immediately after such Contributions had been made (which the trustees, as the sole stockholders, could have done pursuant to Section 275(c) of the General Corporation Law, 8 Del. C. § 275(c), then the amounts the trustees (as stockholders) would have been entitled to receive as stockholders upon dissolution with respect to the Shares would [have] been increased by the amount of the Contributions assuming, in each case, that amounts would remain for distribution to the stockholders following the payment in full of the Company's creditors.

Therefore, the Contributions would have increased the amounts that could have been distributed with respect to the Shares either as a dividend or as a liquidating distribution.'

### 72.22.3 *Capital contribution: tax analysis*

The CG Manual then turns to the tax analysis:

**43501 Made under terms of share issue**

A shareholder may make a capital contribution to a company at the same time as the shareholder acquires shares in the company. If the capital contribution is made as part of the terms of issue of the shares, then the capital contribution should be accepted as consideration given wholly and exclusively for the acquisition of the shares within TCGA 1992, Section 38(1)(a). If a capital contribution is made as part of the terms of a share issue which is treated as a reorganisation for capital gains purposes, then the capital contribution should be accepted as consideration given for the new holding for the purposes of TCGA 1992, Section 128(1). The amount of the capital gains deduction will remain subject to the other general rules, such as TCGA 1992, Section 17 and TCGA 1992, Section 128(2), see CG14530+ and CG51840+-

So far the law is fair. However the Manual continues:

**43502. Other contributions not allowable** [November 2007]
Where shares are disposed of in a company to which a capital contribution has been paid a claim may be made for a deduction in respect of that contribution in the capital gain computation. The claim will normally be for the contribution to be allowable as enhancement expenditure under Section 38(1)(b)TCGA 1992.
Although a capital contribution will typically affect the value of the shares in the company to which the contribution is made, it does not represent either
[1] expenditure on the shares,[71] or
[2] expenditure reflected in the state or nature of the shares at the time of their disposal.
The Special Commissioners decision in the case of The Trustees of the F. D. Fenston Will Trusts v HMRC (SpC589/07) confirmed that a capital contribution which is not made as part of the terms for the issue of shares is not, in the absence of anything to indicate that the rights and privileges attaching to the shares have been enhanced, an allowable deduction within Section 38 TCGA 1992 when shares in the company are disposed of. In particular, the capital contribution does not represent enhancement expenditure within Section 38(1)(b)TCGA 1992.
In applying this decision it may be argued there are circumstances were the tax result will be distorted if the amount of tax payable takes account of value realised, directly or indirectly, by a shareholder from a capital contribution, but the capital contribution itself is not reflected in allowable expenditure for capital gains purposes. Below are some

71 Author's footnote: Point [1] is wrong and directly contradicted by the decision in *Fenston* but it would be sufficient if HMRC are right on point [2].

examples where such distortion may be alleged.[72]

[1] A capital contribution is returned by a company to its shareholders as a dividend or distribution and they are taxed on the distribution but the shareholder will have had no deduction for the contribution. Our view is that a dividend or distribution is paid out of the surplus of the company so therefore is not a direct return of the capital contribution paid by the shareholder (in which case it is probably a loan). The nature of the receipt is changed when a dividend or distribution is made in comparison with the time when the capital contribution was paid.

[2] A capital contribution is retained by the company at a time when there is a sale of shares in the company. The contribution may be reflected in an increased consideration for the disposal of the shares but a capital gains deduction will not be given.

[3] There is similar scope for distortions where a capital contribution is followed by a share exchange, reconstruction or amalgamation treated as a share reorganisation for capital gains purposes, see CG52500+. This is then followed by a disposal of the new holding for an amount which reflects the capital contribution made to the company in which the original shares were held, and the capital contribution is not allowable expenditure on the original shares.

In these last two cases, unless the capital contribution resulted in a change in the rights and privileges attaching to the shares, and that change is reflected in the nature of the shares at the time of their disposal, it is not an allowable deduction within Section 38(1)(b)TCGA 1992 when those shares in the company, or replacement shares in that or a different company acquired by virtue of a share reorganisation are disposed of.

Section 38(1)(b) TCGA allows a deduction for:

> the amount of any expenditure wholly and exclusively incurred on the asset by him or on his behalf for the purpose of enhancing the value of the asset, being expenditure reflected in the state or nature of the asset at the time of the disposal ...

In *Fenston*, the Special Commissioners correctly held that the capital contribution was expenditure "on the asset for the purpose of enhancing the value of the asset." Unfortunately they held that the expenditure was

72 Author's footnote: "Distortion" is a euphemism for unfairness, and "alleged" is tendentious since the unfairness of [2] and [3] is obvious and undeniable.

not reflected in the state or nature of the asset at the time of the disposal:

> 23 ... [1] Further, 'state and nature' for these purposes must be something other than merely the value of the asset—otherwise this phrase would add nothing to the immediately preceding words.
> [2] In this case the capital contributions did not result in any increase in the number of shares in issue, or result in any change in the rights or restrictions attaching to the shares. The only effect of the capital contributions was to increase the surplus of the company—which would increase the amount available for distribution to shareholders, and therefore presumably the value of the shares. We do not consider this sufficient for the expenditure on the capital contributions to be reflected in the state and nature of the shares, either at the time the expenditure was incurred or at any time subsequently.

Point [1] is wrong[73] and point [2] is not in the least convincing. It is considered that the decision ought not to be followed, though a taxpayer who challenges it risks litigating to the Court of Appeal.

The CG manual discusses the possibility of relief under the last part of s.38(1)(b) TCGA which allows a deduction for "expenditure wholly and exclusively incurred by them in establishing, preserving or defending his title to, or to a right over, the asset."

> There may also be cases where companies call on their shareholders to provide further capital to meet a specified purpose, in circumstances where a shareholder who fails to provide the additional funds may lose the entitlement to the shares held. In this situation, depending on the particular facts, the shareholder may be able to establish that the additional payment represents expenditure on preserving or defending the title to the shares within the terms of Section 38(1)(b)TCGA 1992.

### 72.22.4 *Planning implications*

The tax planning advice is that companies should if possible be funded by

---

73 The words "reflected in the state or nature of the asset" are needed to cover this situation: suppose T spends £x on a kitchen inT's home. 15 years later the kitchen is replaced by a new kitchen. The £x was "incurred on the asset for the purpose of enhancing the value of the asset" but was not "reflected in the state or nature of the asset" at the time of disposal. In this case it is sensible to disallow the capital expenditure in a CGT computation.

subscriptions for shares or loans, and not by capital contributions, because the expense of the capital contributions will in most cases be disallowed for CGT purposes (or else the taxpayer will have to litigate to a high level to obtain them).

The HMRC view that “If there is a possibility that the money can be repaid, it is likely to be a debt” mitigates some of the unfairness of the treatment of capital contributions by reducing the number of occasions where a transaction is categorised as a capital contribution.

### 72.22.5 *Commentary: fairness and the tax system*

*Fenston* raises an interesting question of policy, leaving aside the narrower legal question of whether it was rightly decided by the Tribunal. Assuming this was an issue where two views of a legal provision were possible, it was a case where one view lead to a fair and sensible result - tax on an economic gain. The other view lead to a patently unfair result. There can be no doubt about that.

(1) Adopting the traditional view summarised in the slogan that “there is no equity in a taxing statute” a tax administration would be expected to take any point. The only criterion is the prospect of success in a court:

> The Inland Revenue is not slow - *and quite rightly* - to take every advantage which is open to it under the taxing statutes for the purpose of depleting the taxpayer's pocket. And the taxpayer is, in like manner, entitled to be astute to prevent, so far as he honestly can, the depletion of his means by the Revenue.[74]

(2) The more modern view pays much more regard to fairness and “the right amount of tax.” On this view the appeal should not have been taken, and the decision to take the appeal is greatly to be regretted. One might perhaps adopt the view that fairness applies in favour of HMRC but not the taxpayer; but no-one has had the temerity to

74 *Ayrshire Pullman Motor Services v IRC* 14 TC 794. (The passage is well known for its statement that immediately preceded this: “No man in this country is under the smallest obligation, moral or other, so to arrange his legal relations to his business or to his property as to enable the Inland Revenue to put the largest possible shovel into his stores.”)

advocate that.

Of course the consequence of unfair taxation may be to some extent to increase the tax yield, but unfair tax law has an intangible cost in that it brings the UK tax system into disrepute. There seems no prospect of legislative reform, indeed such reform would difficult to draft. This is another reason for hoping that an appeal will eventually overturn *Fenston:* that would restore credibility to the UK tax system. But there it is.

## 72.23 HMRC official list of transparent and opaque entities

The International Manual provides:

> **180020 Considerations when using the List of Classifications of Foreign Entities for UK tax purposes** [November 2010]
> A list of foreign entities where we have been asked our view on the question of transparency/opacity is set out in INTM180030.

I refer to this as "**the HMRC official list**".

> It should be noted that the list only gives our general view as to the treatment of the specified foreign entity. In a particular case regard may also need to be had to:
> (a) The specific terms of the UK taxation provision under which the matter requires to be considered:
> (b) The provisions of any legislation, articles of association, by-laws, agreement or other document governing the entity's creation, continued existence and management, and;
> (c) The terms of any relevant Double Taxation Agreement.
> It should also be borne in mind that in relation to the classifications set out on the list:
> In some instances HMRCs view was given many years ago, and there may have been significant changes in the relevant foreign law which may mean that a different conclusion as to the status of that entity might now be reached. Changes in foreign law after the publication of this article may be significant for the same reason. ...
> Where clarification is sought in relation to a foreign entity we will attempt to give a view in particular cases in line with Code of Practice 10.

An OECD Report[75] sets out a helpful list of entities of OECD countries giving their main characteristics. I here set out a combination of three lists: the TB 83 list in full, together with the additional references in the version of that list in INT Manual 180030 [November 2010].[76] I add the English translation from the OECD list, and the reader who needs basic information about an entity in that list should turn to the OECD report.

| **Country and name of entity** | **UK tax treatment & date last considered** | **Translation** *OECD list unless marked* * |

## 72.24 Stamp Taxes Manual body corporate list

The Stamp Taxes Manual offers another list (with some overlap) addressing the question of whether a foreign entity is a body corporate:

> **6.124 Foreign Companies**
> Some foreign companies have been accepted as falling within the term 'body corporate' for the purposes of the intra group relief. The following is a list of examples of foreign bodies accepted by us as falling within the definition of "body corporate" for Section 42 [FA 1930] and Section 151 [FA 1995] purposes:–

Although the list is expressed to be for the purposes of two specific provisions, there is no special definition of "body corporate" in those sections; if an entity is an entity for those purposes, it is a body corporate

---

99 See 72.22 (US limited liability company).

(and normally a company) for tax purposes generally.

## 72.25 Share capital

### 72.25.1 *Significance of ordinary share capital*

If an entity issues ordinary share capital, it may be a "75% subsidiary" for tax purposes. It follows that it is possible for the entity to qualify for CGT and IT group reliefs, and to benefit from CGT reliefs for share exchanges.

### 72.25.2 *When does a body have ordinary share capital?*

HMRC Brief 87/09[105] provides:

**Corporation Tax: Meaning of Ordinary Share Capital**
HM Revenue & Customs (HMRC) have been asked to provide a list of foreign entities that they consider to have 'Ordinary Share Capital' for the purposes of TA 1988, s 832. Unfortunately as each case will have its own particular set of facts it is not feasible for an exhaustive list to be created, nor, in the context of considering legal systems other than the UK's, that are subject to change, would it be practical to do so.
Set out below is HMRC's interpretation of TA 1988 s 832 and information that, it is hoped, will be useful to companies and advisors, as well as officers within HMRC, in deciding whether a particular non-UK entity has 'Ordinary Share Capital' for the purposes of TA 1988 s 832. Also included below are some details of our position on two of the most often queried foreign entities, the Delaware LLC and the German GmbH.
Please note, this brief only seeks to consider the meaning of 'Ordinary Share Capital' for the purposes of TA 1988 s 832. Specifically, it does not cover the classification of a foreign entity for UK tax purposes (whether it is 'transparent' or 'opaque'). Information on that topic is contained in Tax Bulletin 83 published in June 2006.
The reader should also note that the Companies Act 2006 received Royal Assent on 8

103 HMRC original erroneously reads: commandit.
104 "A verein" is a misprint but I do not know what is intended.
105 12 January 2010. An earlier version appeared in HMRC Brief 54/07.

November 2006 and the Government has announced its intention to commence all parts of the act by 31 October 2008. The DBERR has published an implementation timetable according to which the relevant sections of Part 17, A Company's Share Capital, will come into force on 1 October 2008. This article will be reviewed in due course to ensure it takes account of any necessary amendments due to legislative changes.

**Definition**

Ordinary share capital is defined in TA 1988 s 832 as follows:

" 'ordinary share capital', in relation to a company, means all the issued share capital (by whatever name called) of the company, other than capital the holders of which have a right to a dividend at a fixed rate but have no other right to share in the profits of the company;"

This definition therefore includes all of the issued share capital of a company, apart from capital carrying a right to a dividend at a fixed rate only. The bracketed wording 'by whatever name called' should not be overlooked as it is important to note that companies often categorise share capital into shares bearing different names, eg A Ordinary; B Ordinary, for purposes which may be of no relevance to the application of the definition above.

**Characteristics of issued share capital in a UK company—general principles**

**UK companies**

Ordinarily, references to a company will be understood to mean a limited liability company. Limited liability companies are so called because the liability of each shareholder for the company's debts and other liabilities is limited to the amount which remains unpaid on his shares. There are two types of limited liability company in the UK, public and private. The main difference between these types of company is that a public company can apply to be listed and offer its shares to the public in order to raise capital. There are, however, other types of less commonly used company forms: unlimited companies, with or without share capital, and companies limited by guarantee.

In the latter case the members' liability is limited to amounts they undertake to contribute in the event of a winding up; the amount of this maximum liability of each of the members will be set out in the 'guarantee clause' of the company's memorandum. The total commitment of the members, taken together, is known as the 'guarantee fund'; this fund only comes into existence on a winding up. In practice, this form of vehicle is usually unsuitable for most businesses but is often used, for example, by charities.

Companies limited by guarantee incorporated on or after 22 December 1980 cannot also have a share capital (Section 1(4) Companies Act 1985). Companies limited by guarantee incorporated before that date may, however, also have share capital.

In 1999 the Special Commissioners considered the status of 'founders' deposits' with a company limited by guarantee in the case South Shore Mutual Insurance Co Ltd v Blair [1999] STC (SCD) 296. They came to the conclusion that the deposits were not issued share capital; the company did not, in fact, have any authorised share capital and, as a consequence, could not have issued share capital. Although the decision is not binding authority, the case contains a useful review of some of the authorities about share capital.

**Shares in UK companies**

A company limited by shares is currently required to stipulate the maximum share capital the company may issue and the number and nominal value of the shares into which it is divided, its 'authorised share capital', in a document called the company's memorandum of association (section 2(5)(a), Companies Act 1985).

Note: The reader should note that the Companies Act 2006 abolishes the requirement for a company to have an authorised share capital by the repeal of section 2(5)(a). This should take effect from 1 October 2008. The new act nonetheless requires that, on formation, a company with a share capital will be required to submit a statement of capital and initial shareholdings to the Registrar at Companies House.

The memorandum is one of two essential documents that must be filed at Companies House on incorporation, the second is the company's articles of association; these documents together set out provisions governing the manner in which the company will operate. The amount of authorised share capital set out in the company's memorandum may be later increased by an ordinary resolution of the shareholders (requiring a simple majority of the vote).

The company's assets are owned by the company itself, not by the shareholders individually, although in turn the shareholders together have ownership of the company. The shares express the shareholders' proprietary relationship with the company.

In principle, shares are transferable, but in practice there are often restrictions on transfer, found in the company's articles of association.

The principal rights that usually attach to a share are rights to dividends declared, a right to vote and a right to share in the company's assets in a winding up. The principal responsibility that attaches to a share is to pay what is due on the share. The rights and duties are all subject to the memorandum and articles of association.

For a company limited by shares, the share capital must be stated in a fixed amount. In Ooregum Gold Mining Co of India v Roper [1892] AC 125 Lord Halsbury said:

> "The capital is fixed and certain, and every creditor is entitled to look at that capital as his security."

A share certificate is prima facie evidence of ownership of a share. However, it does not, of itself, constitute ownership of the share and is not essential to demonstrate that share capital has been issued. In order to be a member of a company, under the Companies Act, a person must be entered in the company's register of members. See s 22, Companies Act 1985 (s 112 Companies Act 2006). The decision in National Westminster Bank plc v IRC ([1994] STC 580), confirms this position, ie the 'issue' of share capital is only complete when members are recorded in the company's register of members.

**Characteristics of issued share capital in a body incorporated in another country—relevant factors**

When looking at whether a body incorporated under the law of another country, it is self evident that UK company law is not directly applicable. In Ryall v The Du Bois Co Ltd 18 TC431, Lord Hanworth M.R. said:

'a share in a foreign company may be something different from and, indeed, is almost necessarily different from, a share as we know it in an incorporated company.'

Slesser L.J. said

'We have to consider what would be analogous to stocks and shares in Germany in dealing with what is a company, and allowing for differences of law in that country'.

Slesser L.J.'s comments were given in the statutory context of whether foreign income was income from stocks and shares for the purposes of Case V Schedule D. However we consider them as authority for proceeding by analogy in deciding whether the capital of a foreign company can be considered as 'issued share capital'.

A number of factors are relevant in deciding whether or not a foreign 'company' has 'issued share capital'.

Firstly the body concerned must have a legal personality separate and distinct from that of its members, able to carry on business and owning its assets in its own right, in the same way as a UK company. If that characteristic is absent the members cannot have the type of proprietorial interest which is characteristic of holders of issued share capital of a company incorporated under the laws of the UK.

If the body concerned possesses a separate legal personality, as described above, the following factors will then become relevant to the question of whether a member's interest in such company is analogous to an interest in 'issued share capital' as understood in the UK:

• whether the member's interest is like shares (that is, a portion of the fixed capital of the corporate body) or like debt (that is, money owed by the body corporate to the members)

• whether any subscription for the members' interests is payable

• whether the subscription payable for the 'shares' remains the member's property or whether it becomes the property of company

• what proprietary rights, such as rights to participate in control by voting, rights to receive a dividend out of the company's profits and rights to share in a distribution out of the company's assets in the event of a winding up, attach to the member's interests and what responsibilities, such as a responsibility to pay up on the 'share' if called, attach to the member

• whether the member's interest can be legally evidenced in accordance with local laws; for example, by being registered in a company-held document, or with a public authority, or by a certificate or similar document

• whether the member's interest is denominated in a stated fixed value

• whether the member's interest forms a fixed and certain amount of capital, or a part of that, to which creditors can look as security

• whether the non-UK law concerned requires amounts subscribed to be allocated to capital of the company which is fixed capital, and the extent to which subscriptions are so allocated

• whether the member's interests is capable of transfer and if so whether such a transfer would be similar to a transfer of a portion of the capital of the company, with attendant proprietary rights, rather than similar to a transfer of money or a loan account; and

• any other factors which point to the member's interests being 'issued' and having the character of ordinary share capital.

The background information a company or its advisers are likely to want to consider includes the following documentation:

• The corporate law of the foreign country which governs the body in question.

• Whatever general commentaries are available on the legal and commercial status of the body in question.

• The documents establishing the body, and any other documents which regulate its activities, especially those which deal with subscription for capital and those which govern what happens to the profits and assets of the body.

The accounts that show the state of affairs of the body, in particular the balance sheet, may be helpful in showing whether, and to what extent, money subscribed or otherwise provided by the members of the body is allocated to a fixed amount of permanent capital or whether it is loan debt.

In deciding whether the body has issued share capital, it is not necessary for every factor to be present, but there should be a preponderance of indicators pointing to there being issued share capital. Different weight may need to be given to the various factors. For instance it would be of considerable importance if the member's interest had the character of debt. However restrictions on transfer of a member's interest would be of lesser importance. It is by no means uncommon for there to be restrictions on transfer of shares in a UK company.

### 72.25.3 *Ordinary share capital: Delaware LLC*

HMRC Brief 87/09 provides:

> **Delaware Limited Liability Companies**
>
> ... Section 18–702c of the Delaware Limited Liability Act provides that:
>
> > 'Unless otherwise provided in a limited liability company agreement, a member's interest in a limited liability company may be evidenced by a certificate of limited liability company interest issued by the limited liability company.'
>
> If a DLLC issues 'shares' in this way and the other factors relating to the company suggest that it has share capital then we will accept that these 'shares' may be regarded as 'ordinary share capital' for the purpose of Section 832 ICTA 1988.
>
> It should be noted that not all DLLCs issue share certificates but they may still have 'ordinary share capital'. Regard must be had to the particular terms of the agreement by which the LLC has been created. In any case of doubt or difficulty regarding the status of the share certificates HMRC will advise in particular cases in line with Code of Practice 10. The contact point is ...
>
> Other States within the United States of America have comparable legislation to Delaware. Where it can be shown that a particular State has legislation analogous to the Delaware legislation with which we are familiar, HMRC would expect to be able to provide advice in line with that for DLLCs.

In *Swift v HMRC* [2010] UKFTT 88 the Tribunal found that the membership interest in a Delaware LLC was not similar to share capital but something more similar to partnership capital of an English partnership. The interest would not have been ordinary share capital. However HMRC do not intend to take any notice of that, at least for now:

> HMRC similarly intends to continue its general practice in this respect

in relation to US LLC's.[106]

Taxpayers are not likely to complain about that.

### 72.25.4 *Ordinary share capital: German GmbH*

HMRC Brief 87/09 provides:

> A Gesellschaft mit beschränkter Haftung (GmbH) in Germany, literally a 'company with limited liability', is an entity of a very similar kind to a UK private limited liability company. An Aktiengesellschaft (AG), sometimes called a 'joint stock company' may be considered more akin to a UK public limited liability company (plc) as its stock may be listed.
> Under German law, the capital of a GmbH is not divided up into small units. However, a GmbH has a fixed amount of capital (Stammkapital) which corresponds to the maximum amount of share capital that the company may issue, similarly to a UK limited liability company's 'authorised share capital'. The amounts originally contributed (Stammeinlagen) by the members (Gesellschafter) will also be noted, just as in the UK the initial subscriber shares will be noted in the memorandum of a limited liability company.
> Article 5 of the German GmbH law sets out a minimum amount of Stammkapital (authorised share capital) as EUR 25,000, and the minimum amount of Stammeinlage (original contribution/subscription) of each Gesellschafter (member) at EUR 100.
> Based upon GmbH cases HMRC have previously considered, the amounts of Stammeinlage subscribed by the members may normally be regarded as issued share capital for the purposes of the Taxes Acts.

106 "Swift v HMRC: UK tax treatment of a US LLC" 20 May 2010 *www.hmrc.gov.uk/international/swift-v-hmrc.htm*. The position will need to be reviewed when the decision is final.

CHAPTER SEVENTY THREE

# CONTROL, CONNECTED, CLOSE AND RELATED EXPRESSIONS

## 73.1 Introduction

This chapter considers definitions of the following terms:

- control;
- associate;
- connected person;
- participator;
- loan creditor;
- close company.

The definitions interlink but need to be considered separately.

## 73.2 Control – Introduction

Control of a company is a concept used so often in tax legislation that it is impossible to write a full list. The concept is important in particular in the definitions of close company and connected person.

There are two main definitions of control in the Taxes Acts (as well as numerous specialist definitions not considered here). The legislation does not have terminology to describe them, so I coin the following terminology:

(1) "**Control in the ultra-wide sense**"- the definition in s.450 CTA 2010.
(2) "**Control in the strict sense**" - the definition in s.995 ITA.

Section 989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts—
> "control", in relation to the control of a body corporate or a partnership, is to be read in accordance with section 995,

Thus for IT the strict sense is the default meaning, though in practice the ultra-wide sense is more common.

By contrast, s.288(1) TCGA provides:

> In this Act, unless the context otherwise requires—
> "control" shall be construed in accordance with sections 450 and 451 of CTA 2010;

Thus for CGT the ultra-wide sense is the default meaning.

For IHT, s.269 IHTA provides yet another definition of control. Such is the patchwork nature of UK taxation. The IHT definition is not discussed here as it does not arise in the IHT issues closest to the themes of this book.

## 73.3 Control in strict sense

Section 995 ITA provides:

> (1) This section has effect for the purposes of the provisions of the Income Tax Acts which apply this section.
> (2) In relation to a body corporate ("company A"), "control" means the power of a person ("P") to secure—
> (a) by means of the holding of shares or the possession of voting power in relation to that or any other body corporate, or
> (b) as a result of any powers conferred by the articles of association or other document regulating that or any other body corporate,
> that the affairs of company A are conducted in accordance with P's wishes.
> (3) In relation to a partnership, "control" means the right to a share of more than half the assets, or of more than half the income, of the partnership.

For corporation tax the equivalent definition is in s.1124 CTA 2010.

## 73.4 Control in ultra-wide sense

### 73.4.1 *Five heads of definition of control*

Section 450 CTA 2010 provides:

(1) This section applies for the purpose of this Part.
(2) A person ("P") is treated as having control of a company ("C") if P—
(a) exercises,
(b) is able to exercise,[1] or
(c) is entitled to acquire,
direct or indirect control over C's affairs.
(3) In particular, P is treated as having control of C if P possesses or is entitled to acquire—
(a) the greater part of the share capital or issued share capital of C,
(b) the greater part of the voting power in C,
(c) so much of the issued share capital of C as would, on the assumption that the whole of the income of C were distributed among the participators, entitle P to receive the greater part of the amount so distributed, or
(d) such rights as would entitle P, in the event of the winding up of C or in any other circumstances, to receive the greater part of the assets of C which would then be available for distribution among the participators.

Section 450(2) refers to a person who is *able to exercise* or is entitled to acquire control; s.450(3) refers to a person who *possesses* or is entitled to acquire certain rights; but there is no difference in meaning. Presumably the drafter felt that the correct legal terminology is that one *exercises* control but one *possesses* rights.

The CT Manual identifies the five heads of control:

**60210 Control: Definition**
Control is defined under several headings:
[1] Control over the affairs of the company (see CTM60220).
[2] Control through voting power (see (a) of CTM60220).
[3] Control through share capital or through issued share capital (see (b) of CTM60220).
[4] Control over income of the company (see (c) of CTM60220).
[5] Control over assets of the company (see (d) of CTM60220).

In *R v IRC ex p. Newfields Developments* 73 TC 532 Lord Hoffmann said:

---

1 Section 450(2)(a) is otiose for any person within (a), who *exercises* control, must also be within (b), *able to exercise* control. But it does not matter.

> [10] It will be seen that although this definition starts in subs (2) with a concept of control which reflects its meaning in ordinary speech ('a person shall be taken to have control of a company if he exercises, or is able to exercise or is entitled to acquire, direct or indirect control over the company's affairs'), that fairly simple notion is enormously widened by subsequent subsections. ...
> [11]… The effect of those cumulative definitions is that for the purpose of deciding whether a person 'shall be taken to have control of a company' under s 416(2), it may be necessary to attribute to him the rights and powers of persons over whom he may in real life have little or no power of control. Plainly the intention of the legislature was to spread the net very wide.''

### 73.4.2 *Control over a company's affairs*

*P is treated as having control C if P—*
*(a) exercises,*
*(b) is able to exercise, or*
*(c) is entitled to acquire,*
*direct or indirect control over C's affairs.*

The CT Manual provides:

> **60220 Control: Over the company's affairs**
> The House of Lords' judgment in the case of *R v IRC ex parte Newfields Developments Ltd* 73 TC 532 makes it clear that Section 416(2) ICTA 1988 approaches the question of control of a company from two angles. It begins with the proposition in the opening words of Section 416(2) that a person has control of a company if he or she exercises or is able to exercise or is entitled to acquire control, whether direct or indirect, over the company's affairs. That is a test of actual control, reflecting its meaning in ordinary speech.
> As regards the level at which control is exercised, the judgment in *Steele v EVC International NV* 69 TC 88 confirms that what is required is control at the participator or general meeting level, not at administrative or board level.

SP 1/01 provides:

> 54. Where the establishment of a connected person's relationship depends on the question of whether a person falls to be regarded as having control of a company's affairs within the terms of s 416(2) ICTA

1988, it is not considered that a person's ability (whether de facto or de jure) to appoint the majority of the Board of directors will itself constitute control of the company's affairs—unless, that is, the Board exercises powers which would normally be exercised by the shareholders at a general meeting.

### 73.4.3 *Shares*

> *P is treated as having control of C if P possesses or is entitled to acquire ... (a) the greater part of the share capital or issued share capital of C.*

This is straightforward.

### 73.4.4 *Votes*

> *P is treated as having control of C if P possesses or is entitled to acquire ... (b) the greater part of the voting power in C.*

This is otiose, since a person with the greater part of the votes has control under s.450(2) CTA 2010: they are able to exercise control over the company's affairs.

### 73.4.5 *Right to income*

> *P is treated as having control of C if P possesses or is entitled to acquire ... (c) so much of the issued share capital of C as would, on the assumption that the whole of the income of C were distributed among the participators, entitle P to receive the greater part of the amount so distributed.*

The CT Manual provides:

> **60240. Control: Summary**
> ... The test in (c) of CTM60220 depends on the dividend rights of the issued capital and will be mainly of interest where shares with no voting rights carry the right to a high dividend.

But this is not the only case. The life tenant of an IP trust holding a majority of the shares in a company in principle has control of the company under this head.

### 73.4.6 *Right to capital*

> *P is treated as having control of C if P possesses or is entitled to acquire ... such rights as would entitle P, in the event of the winding up of C or in any other circumstances, to receive the greater part of the assets of C which would then be available for distribution among the participators.*

The CT Manual provides:

> **60230. Control: Right to receive most assets**
> Control under (d) of CTM60220 exists where a person or persons have a right to receive the greater part of the assets then available for distribution among participators, in any circumstances, (for example, on redemption of redeemable share capital or on repayment of loans to the company) but also, specifically, on a winding up of the company.
> 'Participators' for this purpose includes loan creditors (unlike (c) of CTM60220). As regards the definition of loan creditors, see CTM60130. If a loan creditor is an open company, see CTM60300.
> The test under Section 416(2)(c) ICTA 1988 only applies to the assets that would come to a participator in that capacity. In the case of a bank, for example, no regard would be had to any assets that would come to it in respect of loans made in the ordinary course of its banking business, because it is not deemed to be a loan creditor (and, hence it is not a participator) in respect of such loans by virtue of Section 417(9) ICTA 1988.
> **60240. Control: Summary**
> ...3. The test in CTM60230 will normally be of interest only where loan creditors are participators (see CTM60130) or there exist special rights to participate in the assets available for distribution in a winding-up or in any other circumstances for example, on redemption of redeemable share capital.

But this is not the only case. If trustees hold a company on trust for A for life, remainder to B absolutely, then B has control under this head: for B will in the future be entitled to the assets of the company. If trustees hold a company on trust for B contingently (eg on attaining the age of 25, if B is under 25) then B does not have control under this head.

### 73.4.7 *"Entitled to acquire"*

Section 451 CTA 2010 provides:

> (1) This section applies for the purposes of section 450.
> (2) A person is treated as entitled to acquire anything which the person—
> (a) is entitled to acquire at a future date, or
> (b) will at a future date be entitled to acquire.

The INT Manual comments on identical wording in the CFC legislation, s. 749B ICTA:

> **210050 'Entitled to acquire' and 'entitled to secure'**
> The terms 'entitled to acquire' and 'entitled to secure' in (a), (b) and (c) of INTM210040 apply both where a person is presently entitled to acquire or secure an asset at a future date and where a person will at a future date be entitled to acquire or secure that asset. They do not extend to situations where, in an entirely arm's length transaction, one party temporarily has future rights over the other's property, for instance, in the period between exchange of contracts and completion of a sale of land.
> A person whose entitlement to acquire or secure is contingent on a default of any person, including the controlled foreign company in question, will not be treated as having an interest in the controlled foreign company, unless that default has occurred.
> So, for example, a person will have an interest in a controlled foreign company if, by means of a contractual right or some other arrangement, he can
> - require a shareholder to transfer shares to him, or
> - secure the issue to him of unissued share capital of the company, or
> - secure that if a distribution is made by the company he has a share in the distribution or premium.
>
> A person will not have an interest in a controlled foreign company solely by virtue of rights over the income or assets of the company which are exercisable on the default of any person. Thus the contingent rights of banks, trade creditors, etc. to acquire some or all of the company's assets in the event of a default would not amount to an interest in the company in advance of the default.

See too 73.15.5 ("Entitled to do").

## 73.5 "Nominees"

Section 451(3) CTA 2010 provides:

> If a person—
> (a) possesses any rights or powers on behalf of another person (A), or
> (b) may be required to exercise any rights or powers on A's direction or behalf,
> those rights or powers are to be attributed to A.

It is self-evident that the powers of a nominee should be attributed to its principal. The section is in fact wider than that, since the cases where "A may be required to exercise rights at the direction of B" extend beyond the case where A is a nominee for B in the strict sense of nominee. However the subsection is otiose, for if A may be required to exercise rights on the direction of B, or on behalf of B, then these are rights which B possesses or is entitled to acquire, so the rights would be taken into account in any event in the test of control.

## 73.6 Meaning of "associate"

Section 448(1) CTA 2010 provides:

> In this Part "associate", in relation to a person ("P"), means—
> (a) any relative or partner of P,
> (b) the trustees of any settlement in relation to which P is a settlor,
> (c) the trustees of any settlement in relation to which any relative of P (living or dead) is or was a settlor,
> (d) if P has an interest in any shares or obligations of a company which are subject to any trust, the trustees of any settlement concerned,
> (e) if P—
> (i) is a company, and
> (ii) has an interest in any shares or obligations of a company which are subject to any trust,
> any other company which has an interest in those shares or obligations,
> (f) if P has an interest in any shares or obligations of a company which are part of the estate of a deceased person, the personal representatives of the deceased, or
> (g) if P—
> (i) is a company, and

(ii) has an interest in any shares or obligations of a company which are part of the estate of a deceased person,

any other company which has an interest in those shares or obligations.

Section 448(2) CTA 2010 defines relative:

> In this section, "relative" means—
> (a) a spouse or civil partner,
> (b) a parent or remoter forebear,
> (c) a child or remoter issue, or
> (d) a brother or sister.

Contrast the definition of relative in the definition of connected person, under which a spouse is not a relative;[2] but one can get to the same result with either definition.

### 73.6.1 *Partners as associates*

The modern use of partnerships as investment vehicles has made the definition of "associate" absurdly wide, because investment partnerships have vast numbers of partners, and indeed partners do not know who their fellow partners are. This has been recognised on a piecemeal basis[3] but the root of the problem, which is the definition of associate and connected person, has not been addressed.

## 73.7 Attribution of rights of associates and controlled companies

Section 451(4) CTA 2010 provides that for the purposes of the definition of control in the ultra-wide sense:

---

2 See 73.10 (Connection with family members).

3 For instance, in s.27 CTA 2010:

> "(2) In the application of section 451 (meaning of 'control': rights to be attributed) for the purposes of the determination, the references in section 451(4) and (5) to an associate of a person ("P") include a partner of the person only if the condition in subsection (3) below is met.
> (3) The condition is that tax planning arrangements which—
> (a) involve P and the partner, and
> (b) secure a relevant tax advantage,
> have at any time had effect in relation to the taxpayer company."

> There may also be attributed to a person all the rights and powers—
> (a) of any company of which the person has, or the person and associates of the person have, control,
> (b) of any two or more companies within paragraph (a),
> (c) of any associate of the person, or
> (d) of any two or more associates of the person.[4]
> (5) The rights and powers which may be attributed under subsection (4)—
> (a) include those attributed to a company or associate under subsection (3) [nominees], but
> (b) do not include those attributed to an associate under subsection (4).

This uses the word "may" but here that means "shall". Section 451(6) provides:

> Such attributions are to be made under subsection (4) as will result in a company being treated as under the control of 5 or fewer participators if it can be so treated.

I refer to this as "**the attribution rule**". This rule does not apply for the purposes of the definition of participator (that is, the fact that A is an associate of a participator does not mean that A is a participator).

### 73.7.1 *Commentary*

This attribution rule - more than any other - is what makes the s.450 definition of control ultra-wide. It is so wide that the word "control" is not apt to describe the concept ("some loose association" would be nearer the mark). It is confusing to depart from statutory terminology, but where the ultra-wide sense of control is used, the actualities demand quotation marks. For instance:

(1) A has "control" of a company owned by a relative (say, a sister in law) even though A has no beneficial interest in the company, and, of course, no right to know that the relative owns the company or anything about the company.
(2) A has "control" of a company owned by a trust of which a relative is a settlor, even though A is not a beneficiary and has no right to know

4 Para (b) and (d) must be otiose, but it does not matter.

that the trust had been made, let alone to know anything about the trust or its property. Indeed the relative need not be the settlor but only *a* settlor, so the rule would apply if (say) a sister in law provides a nominal amount of property to a trust.

(3) A partner has "control" of a company owned by a partnership even if it is an investment partnership with large numbers of unconnected partners.

This has three noteworthy consequences.

The first is practical: it is not possible for a person to know whether they control a company, or to draw up a list of all companies which they control. In practice there is substantial innocent non-compliance and selective or arbitrary enforcement, where HMRC sufficiently dislike a taxpayer to make enquiries not normally made.

The second point is presentational but nevertheless important: anti-avoidance provisions which refer to control may appear to the non-tax specialist to be reasonable because control seems a sensible limiting factor; but they generally operate unreasonably widely (because the meaning of *control* is so wide).

Thirdly, this leads to complexity. On occasions where the difficulty caused by the extravagance of the definition has come to be recognised, the definition of control[5] is then restricted.[6] However this is only done on a piecemeal basis, where taxpayer lobbying has for some reason given rise to governmental action. So the result is a complexity which would not arise if a more restrained definition of control had been adopted in the first place.

The same difficulties apply to provisions using the term "connected person" (since that term uses the concept of "control" in the ultra-wide sense).[7]

## 73.8 Control by two or more persons together

Section 450(5) CTA 2010 provides:

---

5 or some concept in which the word control is used, such as associate or connected person.

6 For instance, ss.27, 29, 30 CTA 2010.

7 See for instance the Substantial Donors to Charity Consultation Responses Document, 2 January 2009 para 3.12, [2009] STI 65, where charities describe the connected persons rule as it applies in that context as an "impossible requirement", a "substantial administrative burden" and a "compliance nightmare".

> If two or more persons together satisfy any of the conditions in subsections (2) and (3), they are treated as having control of C.

For instance, if A and B each hold 50% of a company, then A and B together have control. Why does it matter? This does not mean that A (alone) has control or that B (alone) has control. It matters for the following purposes:

(1) Two companies are connected if (in short) they are under the control of the same (or connected) persons.[8]

(2) Two companies are associated (for the purposes of small companies relief) if (in short) both are under the control of the same persons.

So it is often necessary to identify the persons who together control a company.

The CT Manual provides:

> **60250 Control: In multiple**
> More than one person or one group of persons may 'control' a company. For example, one person may have the greater part of the voting power, while two people hold the greater part of the issued share capital and a group of three people are entitled to the greater part of the assets in a winding up. All three combinations of people can be taken to have control of the company at the same time.
> If say three persons, A, B and C, each hold one third of the shares in a company, and they are not connected in any way which would allow the rights and powers of one to be attributed to another, then control is held by A and B, or B and C, or A and C but not A, B and C together.
> This is because in determining whether companies are 'associated companies', you should only consider 'minimum' controlling combinations. You should disregard combinations containing superfluous members. For example, a company controlled by the unconnected persons A, B and C, but not by any one or two of them alone should not be regarded as associated with any company controlled by one of them alone (as in the first subparagraph above) or by any two of them (as in the second subparagraph above). (See also CTM03730 for an example of this.)
> However deciding on the 'minimum' controlling combination for any of the tests set out at ICTA 1988/416(2)(a) to (c) does not mean you have to establish the smallest controlling combination of each company

8 See 73.13 (Connection with company).

> when determining whether companies are associated companies.
> In his High Court judgment in *R v IRC ex parte Newfields Developments Ltd* (73 TC 532 at page 541B) Moses J said that Section 416 [ICTA] had to be exercised for the statutory purposes for which it was conferred:
> "In the context of Section 13 [ICTA], that purpose is to ascertain whether, in the instant case, two companies are under the control of the same person pursuant to Section 13(4). That is the statutory question. If it is possible to answer that in the affirmative, by exercising the power of attribution, in my judgment, that power must be exercised. Conversely, if that question, namely, are the two companies under the control of the same person, can only be answered in the affirmative by refraining from the exercise of the power, then the power should not be exercised".
> So in the first sub-paragraph above, you may be able to determine that two companies are associated because the three people who together have an entitlement to the greater part of the assets in a winding up also together hold the greater part of the voting power in another company. In that case you would take this group as controlling the company and not the single or two person combinations. As this example shows, the identical controlling combination does not need to be established by the same test in each company.

This passage is written in the context of (what is now) s.25(4) CTA 2010 which provides:

> For the purposes of this Part, a company is an associated company of another at any time when—
> (a) one of the two has control of the other, or
> (b) both are under the control of the same person or persons.

The same approach would apply to the definition of connected person: see 73.13 (Connection with company).

## 73.9 Connected person

### 73.9.1 *Definitions of connected person*

There are separate definitions for the separate taxes.

"Connected person" is defined for CGT in s.286 TCGA. Section 286(1) TCGA provides:

> [a] Any question whether a person is connected with another shall for the purposes of this Act be determined in accordance with the following subsections of this section ...

For IT, s.993 ITA provides:

> **993 Meaning of "connected" persons**
> (1) This section has effect for the purposes of the provisions of the Income Tax Acts which apply this section.

So for IT this definition applies only if expressly incorporated: it is not an ITA-wide definition.

IHT adopts the CGT definition of "connected person" with a little tinkering.[9]

The CT position is more complicated. The definition is in s.1122 CTA 2010 which is similar to s.993 ITA. Section 1122(1) CTA 2010 provides:

> This section has effect for the purposes of the provisions of the Corporation Tax Acts which apply this section (or to which this section is applied).

However s.1176(1) CTA 2010 incorporates this definition for the purposes of the CTA 2010:

> Section 1122 (how to tell whether persons are connected) applies for the purposes of this Act unless otherwise indicated (whether expressly or by implication).

Thus the CT definition applies for the CTA 2009 if expressly incorporated but applies for the CTA 2010 unless disapplied.

This section considers the CGT and IT definitions but what is said about IT is generally applicable to CT. The IT definition is substantially the same as the CGT definition but the drafting is improved in some respects.

---

9 Section 270 IHTA provides:
"For the purposes of this Act any question whether a person is connected with another shall be determined as, for the purposes of the 1992 Act] it falls to be determined under section 286 of that Act, but as if in that section 'relative' included uncle, aunt, nephew and niece and 'settlement', 'settlor' and 'trustee' had the same meanings as in this Act."

Where they are the same, I give the text of the TCGA and the IT provision in footnotes.

There are many other definitions elsewhere, sometimes the same[10] and sometimes entirely different.

It is a pity that the tax law rewrite did not tidy up this mess; the opportunity is now lost. However the definition considered here can be considered the standard definition.

### 73.9.2 *Definition in outline*

The definition of connected person has five parts:
(1) Family members
(2) Trustees
(3) Companies held by trusts
(4) Partnerships
(5) Companies generally

### 73.9.3 *Reciprocity of connection*

Section 286(1) TCGA continues:

> [b] (any provision that one person is connected with another being taken to mean that they are connected with one another).

The effect of s.286(1)[b] is that "connected" is a reflexive relationship: if A is connected with B then B is connected with A. Section 994(4) ITA is more clearly drafted for IT:

> If any provision of section 993 provides that a person ("A") is connected with another person ("B"), it also follows that B is connected with A.

## 73.10 Connection with family members

Section 286(2) TCGA provides:

> A person is connected with an individual if that person is
> [a] the individual's spouse or civil partner,

---

10 eg s.933 CTA 2010.

[b] or is a relative,
[c] or the spouse or civil partner of a relative,
  [i] of the individual or
  [ii] of the individual's spouse or civil partner.[11]

The CG Manual unpacks this definition:

> **14580 Connected persons** [August 2009]
> A person is connected with an individual if that person is
> [1] the individual's spouse or civil partner
> [2] a relative of the individual
> [3] the spouse or civil partner of a relative of the individual
> [4] a relative of the individual's spouse or civil partner
> [5] the spouse or civil partner of a relative of the individual's spouse or civil partner.

Section 286(8) TCGA provides:

> In this section "relative" means brother, sister, ancestor or lineal descendant.

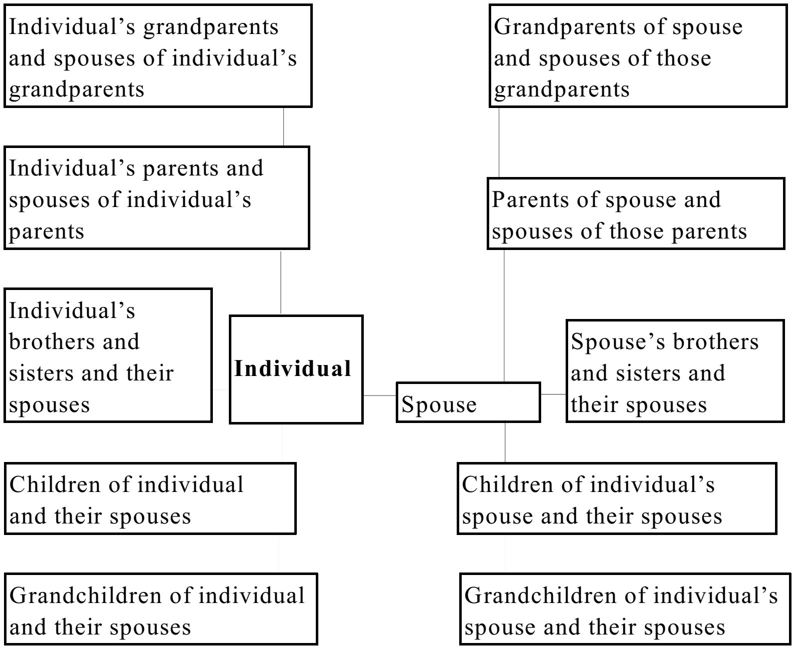
The CG Manual provides:

> **14580. Connected persons** [August 2009]
> ... The term 'relative' does not cover all family relationships. In particular, it does not include nephews, nieces, uncles and aunts.
> **14583. Connected persons: Relatives** [August 2009]
> The following diagram illustrates the provisions of Section 286(2) TCGA 1992. All of the people in the diagram are connected with the individual. They are not all connected with each other[12]

---

11 For IT, s.993(2) provides similarly:
"An individual ("A") is connected with another individual ("B") if—
(a) A is B's spouse or civil partner,
(b) A is a relative of B,
(c) A is the spouse or civil partner of a relative of B,
(d) A is a relative of B's spouse or civil partner, or
(e) A is the spouse or civil partner of a relative of B's spouse or civil partner."

12 In this diagram "spouse" includes civil partner.



> All the persons in the diagram are connected with the individual. Excluded are the widows or widowers, or surviving civil partners, of deceased persons, or relatives of a deceased spouse or of a deceased civil partner unless connection can be established by a route not involving the deceased. A dissolution of a civil partnership or a divorce can similarly lead to persons in addition to the former civil partner or spouse ceasing to be connected with the individual.

Readers are invited to speculate whether this diagram is or is not a useful aid to comprehension.

For the definition of control for IHT purposes, "relative" also includes an aunt, uncle, nephew and niece. See s.270 IHTA. A two dimensional diagram could not do justice to that.

## 73.11 Connection with trustees

### 73.11.1 *Settlors and settlor-connected persons*

Section 286(3) TCGA provides:

> A person, in his capacity as trustee of a settlement, is connected with-
> (a) any individual who in relation to the settlement is a settlor,
> (b) any person who is connected with such an individual ... [13]

The CG Manual provides:

> **14590. Connected persons: Trustees** [August 2009]
> ... The trustees are no longer connected to the persons connected to the settlor after the settlor has died.

More accurately, trustees are not connected with family members or other persons who would have been connected with the settlor when the settlor was alive.[14]

The CG Manual provides:

> **14590. Connected persons: Trustees** [August 2009]
> [1] A settlor is considered to be connected with the trustee at the moment when property is put into the settlement.
> [2] For the purposes of determining whether a trustee is connected with an individual, the identity of the trustee is irrelevant. So, for example, if the trustee is the wife or civil partner of the individual, he or she is only connected in his or her capacity as trustee if the case is within one of the three cases in CG14590.

Point [2] is correct since trustees are regarded as distinct from the persons who are actually the trustees.

The CG manual provides:

> **14590. Connected persons: Trustees** [August 2009]
> Although under the tests outlined an individual is not connected with particular trustees, this may not prevent him or her from being connected with a company controlled by the trustees.

---

13 For IT, s.993 ITA provides similarly:

> (3) A person, in the capacity as trustee of a settlement, is connected with—
> (a) any individual who is a settlor in relation to the settlement,
> (b) any person connected with such an individual ...

14 Contrast the definition of associates. See 73.6 (Meaning of "associate").

This is correct: see 73.13 (Connection with company). The Manual continues:

> Under ICTA 1988, S 417, a beneficiary of a trust can be attributed with the rights and powers of trustees. In such circumstances he or she may control the company through the tests in ICTA 1988, S 416 and ICTA 1988, S 417 and hence be connected under TCGA 1992, S 286.

There is no general rule that the rights of trustees are attributed to beneficiaries. However the attribution will often be made on the grounds that the beneficiaries are relatives of the settlor[15] or (sometimes) that they possess the rights to income or capital.[16]

Suppose:

(1) A creates a trust (trust A) and

(2) B (who is connected with A, eg a spouse) creates a trust (trust B).

A is connected with the trustees of trust A (A is the settlor). A is connected with the trustees of trust B (a connected person is the settlor). However the trustees of trust A are not connected with the trustees of trust B. For the position if the trusts own companies, see 73.13.10 (Connected trusts owning separate companies).

For completeness: s.286(3)(d)(e) TCGA deal with sub-fund settlements.[17] Since these settlements are (virtually) never found in practice, this is dead-letter law which need not be considered even in a work which seeks to be comprehensive.

Trustees are not connected with a corporate settlor.

### 73.11.2 *Company connected with trustees*

Section 286(3) TCGA provides:

> A person, in his capacity as trustee of a settlement, is connected with ...

15 See 73.7 (Attribution of rights of associates and controlled companies).

16 See 73.4.5 (Right to income); 73.4.6 (Right to capital).

17 (d) if the settlement is the principal settlement in relation to one or more sub-fund settlements, the trustees of the sub-fund settlements, and

(e) if the settlement is a sub-fund settlement in relation to a principal settlement, the trustees of any other sub-fund settlements in relation to the principal settlement.

(c) any body corporate[18] which is connected with that settlement,

This takes us to s.286(3A) TCGA which provides:

> For the purpose of subsection (3) above a body corporate is connected with a settlement if-
> (a) it is a close company (or only not a close company because it is not resident in the UK) and the participators include the trustees of the settlement; or
> (b) it is controlled (within the meaning of section 1124 of the Corporation Tax Act 2010) by a company falling within paragraph (a) above.

It is confusing that the drafter used the expression "connected with a settlement" since in that expression the term "connected" is not used in the normal CGT sense of connected persons. But it does not matter.

The IT equivalent is more clearly drafted. Section 993(3) ITA provides:

> A person, in the capacity as trustee of a settlement, is connected with ...
> (c) any close company whose participators include the trustees of the settlement,
> (d) any non-UK resident company which, if it were UK resident, would be a close company whose participators include the trustees of the settlement,
> (e) any body corporate controlled (within the meaning of section 995) by a company within paragraph (c) or (d)

Thus trustees are connected with any close company in which they have any interest, no matter how small, but non-trustees are connected only if there is some element of "control".

### 73.11.3 *Meaning of settlement and trustee*

Section 286(3ZA) TCGA defines "settlement":

> For the purpose of subsection (3) above-

18 I do not know why the subsection refers to body corporate rather than company, but I don't think it makes any difference.

(a) "settlement" has the same meaning as in section 620 of ITTOIA 2005

One wonders why the decision was made in 2006 to disapply the standard IT/CGT definition of settlement and apply the settlement-arrangement definition instead. (Contrast the definition of associate.) Perhaps non-corporate employers complained that a transfer by them to a pension fund was (before 2006) a connected person transaction whereas a transfer by a company to a pension fund was not. Now a transfer to a pension fund is not a connected person as the transferor is not in principle connected with the pension trust.[19] But that is speculation as no reason was ever provided. A consequence is that will trusts are not settlements for the purposes of the connected persons rules, which is odd. Had a reason for the change been given, the issue might have been more fully discussed. But there it is.

Section 286(3ZA)(b) TCGA defines "trustee":

> "trustee", in relation to a settlement in relation to which there would be no trustees apart from this paragraph, means any person in whom the settled property or its management is for the time being vested.

For the definition of control for IHT purposes, "settlement" "settlor" and "trustee" have their IHTA meanings: s.270 IHTA.

## 73.12 Connection with partnership

Section 286(4) TCGA provides:

> Except in relation to acquisitions or disposals of partnership assets pursuant to bona fide commercial arrangements, a person is connected with
> [a] any person with whom he is in partnership,
> [b] and with
> [i] the spouse or civil partner
> [ii] or a relative

19 See 69.31.1 (Is a pension trust or employee trust a settlement?)

of any individual with whom he is in partnership.[20]

For the difficulties this causes, see 73.6.1 (Partners as associates).

## 73.13 Connection with company

Apart from the rule connecting trustees with companies, s.286 TCGA provides two ways by which a company may be connected with another person:
(1) company and person with control;
(2) company and persons acting together to exercise control.
In addition there are two ways by which a company may be connected with another company (an "inter-company connection"):
(1) 2 companies with common control;
(2) 2 companies with groups of connected controllers;
For completeness: the usual definition of company is disapplied for the purposes of s. 993 and 994 ITA (though not for CGT purposes).[21] So s. 994 needs to provide its own definition of company,[22] but since the definition is the same as the standard definition, this drafting quirk makes no difference. Perhaps some day someone will tidy up this mess, but it does not matter.

Since "control" has the ultra-wide sense, this head of the definition of connected person is also ultra-wide and no-one can draw a complete list

---

20 For IT, s.993 (4) ITA provides similarly:
"A person who is a partner in a partnership is connected with—
(a) any partner in the partnership,
(b) the spouse or civil partner of any individual who is a partner in the partnership, and
(c) a relative of any individual who is a partner in the partnership.
But this subsection does not apply in relation to acquisitions or disposals of assets of the partnership pursuant to genuine commercial arrangements."

21 See 72.3 (Meaning of "company")

22 Section 994 ITA provides:
"(1) In section 993 and this section—
'company' includes any body corporate or unincorporated association, but does not include a partnership (and see also subsection (2)),...
(2) For the purposes of section 993—
(a) a unit trust scheme is treated as if it were a company, and
(b) the rights of the unit holders are treated as if they were shares in the company."

of all the companies with which they are connected.

### 73.13.1 *Inter-company connection: one person controls two companies*

Section 286(5)(a) TCGA provides:

> A company is connected with another company-
> (a) if the same person has control of both...

### 73.13.2 *Inter-company connection: connected persons control two companies*

Section 286(5)(a) TCGA provides:

> A company is connected with another company-
> (a) if .. [i]a person has control of one and
> [ii] [A] persons connected with him, or
> [B] he and persons connected with him,
> have control of the other,

If two persons ("X" and "Y") are associates, this is not needed because the rights of X are attributed to Y.[23] For instance, suppose:
(1) X and Y are relatives or partners, and
(2) X owns X Ltd and Y owns Y Ltd.
X controls X Ltd and also "controls" Y Ltd, so this provision is not needed. The same person has "control" of both companies. This provision is only relevant in a case where two persons are connected but not "associates".

### 73.13.3 *One group controls two companies*

Section 286(5)(b) TCGA provides:

> A company is connected with another company...
> (b) if
> [i] a group of 2 or more persons has control of each company, and
> [ii] the groups either
> [A]consist of the same persons or

23 See 73.7 (Attribution of rights of associates and controlled companies).

[B] could be regarded as consisting of the same persons by treating (in one or more cases) a member of either group as replaced by a person with whom he is connected.

The group may be vast and does not need any common purpose or identity. In *Kellogg Brown v HMRC* [2010] STC 925, two quoted companies each with over 16,000 shareholders were connected by a somewhat unimaginative construction of this head, since there was sufficient overlap between the two groups.

### 73.13.4 *Person controls a company*

Section 286(6) TCGA provides:

A company is connected with another person, if
[a] that person has control of it ...

### 73.13.5 *Connected persons control a company*

Section 286(6) TCGA provides:

A company is connected with another person, if ...
[b] if that person and persons connected with him together have control of it.[24]

---

24 For IT, s.993 ITA provides similarly:
(5) A company is connected with another company if—
(a) the same person has control of both companies,
(b) a person ("A") has control of one company and persons connected with A have control of the other company,
(c) A has control of one company and A together with persons connected with A have control of the other company, or
(d) a group of two or more persons has control of both companies and the groups either consist of the same persons or could be so regarded if (in one or more cases) a member of either group were replaced by a person with whom the member is connected.
(6) A company is connected with another person ("A") if—
(a) A has control of the company, or
(b) A together with persons connected with A have control of the company.

If two persons ("X" and "Y") are associates, this is not needed because the rights of X are attributed to Y.[25] For instance, suppose:
(1) X and Y are relatives or partners.
(2) X owns 30% of A Ltd and Y owns 30% of A Ltd.
X "controls" A Ltd so this provision is not needed. It is only relevant in a case where two persons are connected but not "associates".

Suppose
(1) A and B are connected persons but not associates.
(2) B controls X Ltd and A has no interest in X Ltd.
It is considered that A is connected to X Ltd. It might be argued that A and B do not *together* have control, but various anomalies would arise, and that is reading too much into the word *together*.

### 73.13.6 *Persons acting together to exercise control*

Section 286(7) TCGA provides:

> Any 2 or more persons acting together to secure or exercise control of a company shall be treated in relation to that company as connected with one another and with any person acting on the directions of any of them to secure or exercise control of the company.[26]

For the purposes of discussion I abbreviate "secure or exercise control" to "exercise control".

The CG Manual quotes s.286(7) and then comments on the phrase "acting together to exercise control":

> **14622 Companies: 2 or more persons acting together to control** [August 2009]

---

25 See 73.7 (Attribution of rights of associates and controlled companies).

26 For IT, s.993(7) ITA provides similarly:
"In relation to a company, any two or more persons acting together to secure or exercise control of the company are connected with—
(a) one another, and
(b) any person acting on the directions of any of them to secure or exercise control of the company."

> ... For this subsection to operate it is not sufficient for the persons to have control of the company, the persons do have to act in some way to control the company. However, for example, exercising control could mean refraining from voting in a particular way and so enabling another person to win a vote, as well as by actually voting.

The CG Manual then considers the position of directors:

> **14623. Directors of a company** [August 2009]
> Directors of a company are not necessarily connected persons in relation to transactions between themselves. Whether or not one of them controls the company or two or more together control the company, they are not connected persons unless they are 'relatives', see CG14581, or partners, see CG14610.

That is correct. The manual then explains what it means to be connected "in relation to the company:

> TCGA 1992, S 286(7) makes two or more directors connected persons only in relation to transactions with the company.

(This sentence assumes that the directors are acting together to exercise control at shareholder level.)

For examples where person have been held to be acting together to exercise control, see *Foulser v Mac Dougall* [2007] STC 973; *Steele v EVC International* 69 TC 88.

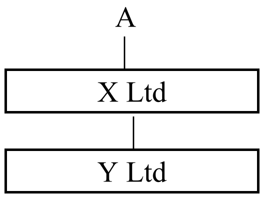
### 73.13.7 *Personal representatives*

The definition of control does not mention PRs (unlike the definition of "associates"). PRs cannot be connected with individuals or trustees. PRs may be connected with a company. They are "persons" so they are connected if (inter alia) they have control of the company or if they act with others to exercise control.

### 73.13.8 *Example 1: chain of wholly owned companies*

In actual cases, many different rules may find some role.

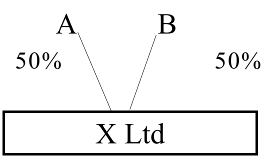
Suppose a straightforward chain of companies thus:



A controls X Ltd and so is connected with it.
A controls Y Ltd (either as he controls it indirectly in the general sense or because the rights of X Ltd are attributed to A.) So A is connected to Y Ltd.

73.13.9 *Example 2: unconnected persons jointly own a company*

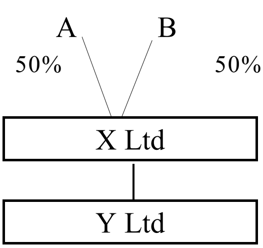
Suppose individuals A and B (who are not otherwise connected) each own 50% of X Ltd.



If A and B are not acting together to exercise control then they are not connected with each other or to X Ltd.

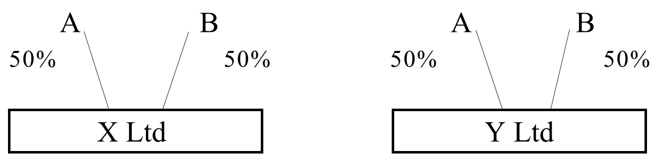
Suppose A and B are acting together to exercise control (as is likely to be the case). In that case they are "treated in relation to that company as connected with one another." A and B are also connected with the company. However, A does not control the company.

Suppose X Ltd has a subsidiary thus:



It is considered that A is connected to Y Ltd since A and persons connected to A (ie X Ltd) together control Y Ltd.[27]

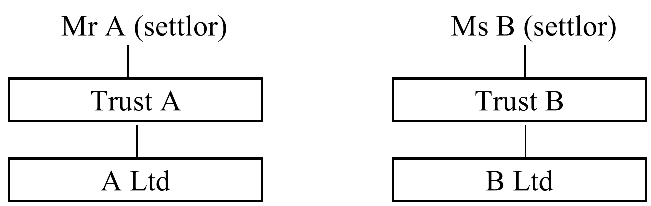
Of course, A and B together control X Ltd. Suppose A and B own two companies thus:



X Ltd and Y Ltd are connected with each other.

73.13.10 *Example 3: Connected trusts own separate companies*

Suppose:
(1) A creates a trust (trust A) which owns a company (A Ltd) and
(2) B (who is a relative or spouse of A) creates a trust (trust B) which owns a company (B Ltd), thus:



The analysis is as follows:
(1) A is connected with Trust A (because A is the settlor).
(2) A has "control" of A Ltd (the trustees of trust A are associates of A, because A is the settlor; so their rights are attributed to him).
(3) A is connected with A Ltd (because of that control).
(4) A is connected with the trustees of trust B (because a connected person is the settlor).
(5) A has "control" of B Ltd (the trustees of trust B are associates of A because a relative is the settlor; so their rights are attributed to him).
(6) A is connected with B Ltd (because of that control).

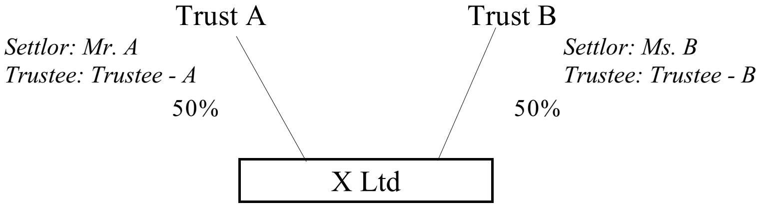
27 See 73.13.5 (Connected persons control a company).

(7) A Ltd is connected with B Ltd (because A has "control" of both). The trustees of trust A are not connected with the trustees of trust B but that does not stop their companies from being connected. Note that it is not necessarily possible for A Ltd or the trustees of trust A to know that A Ltd is connected with B Ltd.

What if A and B have died? If there is any person alive who is a relative of A and B, as defined, the relative has control of both companies and so A Ltd and B Ltd are still connected. But if A and B have no relatives (as defined) then the two companies are not in principle connected.

73.13.11 *Example 4: Unconnected trusts jointly own a company*

Suppose individuals Mr A and Ms B (who are not otherwise connected) are settlors of trusts which each own 50% of X Ltd. The trustees are Trustee-A and Trustee-B.



If none of Mr A, Ms B, Trustee-A and Trustee-B are acting together to exercise control then none of Mr A, Mr B, Trustee-A, Trustee-B or X Ltd are connected.

Suppose Mr A, Ms B, Trustee-A and Trustee-B are all acting together to exercise control (as is likely to be the case). In that case they are "treated in relation to that company as connected with one another." Mr A is also connected with the company. They would similarly be connected with a subsidiary of the company. Mr A does not control the company.

## 73.14 Why does it matter who is a participator?

The term "participator" is used throughout the Taxes Acts, and it is not practical to give a full list. For the purposes of this book the term is particularly important in the following contexts:

(1) The definition of "relevant person" for the ITA remittance basis.
(2) Section 13 TCGA (non-resident company gains attributed to participators).
(3) The test of whether trustees control a company.[28]
(4) The definition of "close company".

## 73.15 Definition of participator

Section 454(1) CTA 2010 provides a general statement:

> For the purposes of this Part, "participator", in relation to a company, means a person having a share or interest in the capital or income of the company.

However s.454(2) CTA 2010 goes on to list five categories of participator which are so wide that it is difficult to think of a case falling within (1) which is not within (2):

> In particular, "participator" includes—
> (a) a person who possesses, or is entitled to acquire, share capital or voting rights in the company,
> (b) a loan creditor of the company,
> (c) a person who possesses a right to receive or participate in
> [i] distributions[29] of the company or
> [ii] any amounts payable by the company (in cash or in kind) to loan creditors by way of premium on redemption,
> (d) a person who is entitled to acquire such a right as is mentioned in paragraph (c), and
> (e) a person who is entitled to secure that income or assets (whether present or future) of the company will be applied directly or indirectly for the person's benefit.

This definition is expressed to apply for the purposes of Part 10 CTA 2010, but it should be a taxes-act-wide definition. When the word participator is used in connection with close companies, the definition is almost

28 See 73.11.2 (Company connected with trustees).
29 Section 454(4) CTA 2010 defines "distribution": "In subsection (2) 'distribution' is to be construed without regard to section 1000(2) (extended definition of distribution for close companies)."

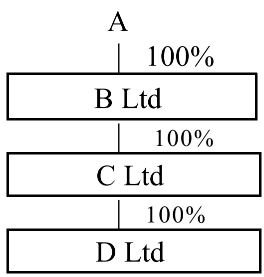
always incorporated and where there is no definition it must be implied.

Occasionally the definition is adopted with changes: s.454(6) CTA 2010 anticipates this:

> This section does not affect any provision of this Part requiring a participator in one company to be treated as being also a participator in another company.

### 73.15.1 *Chain of wholly owned companies*

Suppose a chain of wholly owned companies:

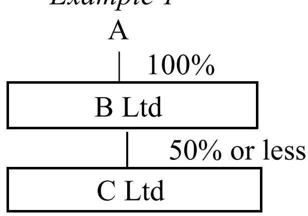


C Ltd is obviously a participator in D Ltd. But A and B Ltd are also participators in D Ltd, under s.454(2)(e) CTA 2010.[30] This is so wherever the companies are resident.

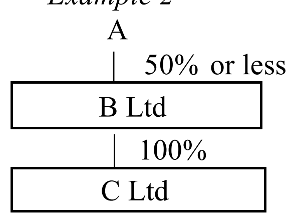
### 73.15.2 *Chain of partly owned companies*

Suppose a chain of partly owned companies which do not confer control, such as:

*Example 1*



*Example 2*



30 This view is not universally held.

A is a participator in B Ltd. A does not control C Ltd[31] and it is considered that A is not a participator in C Ltd. It might be argued that the rights of a minority shareholder are such that A is a participator within s.454(2)(e) - ie that A has the right to secure that the income of C Ltd is applied for A's benefit. I refer to this as the wide view. But this is very doubtful and in practice it appears that HMRC do not take the wide view. Section 455(5) CTA 2010 provides a wider than standard definition of "participator":

> If a company (C) controls[32] another company (D), a participator in C is to be treated for the purposes of this section as being also a participator in D.[33]

This applies in a few specific circumstances, in particular:
(1) For the definition of relevant person in the ITA remittance basis.[34]
(1) For s.1064 CTA 2010 (extended meaning of "distribution" for close companies.)
(2) For s.455 CTA 2010 (loans to participators).
The CT Manual provides:

> **60110 Participator: Extended meaning of**
> ... If, for example, Company B holds all the issued share capital of Company T and Company T makes a loan to W, a shareholder in Company B, that loan is within [s.455 CTA 2010] since W as well as being a participator in Company B is deemed also to be a participator in Company T.

This example is essentially example 2 above. It assumes that the wide view is not correct; that is why the extended definition of "participator" is needed.

### 73.15.3 *Trustees and beneficiaries*

Suppose trustees hold a share or interest in a company. The trustees are

31 In the absence of special facts, eg provisions in the company articles or shareholder agreements.
32 The ultra-wide definition of "control" applies: see 73.4 (Control in ultra-wide sense).
33 This provision is also found in s.459(4) CTA 2010.
34 See 10.4.1 ("Participator").

participators under s.454(1) CTA 2010. A person holding a share or interest as trustee is not a participator in their personal capacity since trustees are (at least for IT and CGT purposes) deemed to be a separate person.[35] Beneficiaries of the trust, other than merely discretionary beneficiaries, are also clearly participators under s.454(1) since they too have an interest in the trust property. HMRC agree. The CT Manual provides:

> **60160. 'Interested in'**
> The words 'interested in' have a wide meaning and, for example, where shares are held by trustees, the trustees, the beneficiaries and the remainderman (if any) of the trust are interested in the shares. Where shares are held by trustees under a will for persons in succession, the life tenant and the remainderman, as well as the trustees, are interested in the shares. (See, in this connection, *IRC v Park Investments Ltd* 43 TC 200, particularly the judgment of Danckwerts LJ at page 225, *IRC v Tring Investments Ltd* 22 TC 679, and *Alexander Drew and Sons Ltd v IRC* 17 TC 140.)

As to whether a person holding as nominee is a participator in their private capacity, see *Bramwell on Corporation Tax* (looseleaf) para A.11.1.16.

What about beneficiaries of a discretionary trust? The question is whether they have an "interest" in the company. The general rule is that the word "interest" is ambiguous and may or may not be taken to include the rights of a discretionary beneficiary: the context must decide the question; see *Leedale v Lewis* 56 TC 501. The difficulty is that the concept of participator is used in many contexts, and the definition section itself does not offer much context. *Bramwell on Corporation Tax* takes the view that beneficiaries of a discretionary trust are participators, and for practical purposes it would be safest to proceed on the basis that that may well be correct.

### 73.15.4 *Personal representatives and beneficiaries of estates*

Suppose PRs hold shares in a company. The PRs are participators under s.454(1) CTA 2010. A person holding shares as PR is also a participator

35 *Bibby v IRC* 29 TC 167 is no longer applicable to trustees except, possibly, for IHT.

in their private capacity, for IT purposes,[36] but not for CGT purposes as for CGT the PRs are deemed to be a separate person.

Beneficiaries of the estate are not participators under s.454(1) since they do not have a legal or equitable "interest" (in the strict sense) in the assets of the estate. However they are participators under s.454(2)(a)(c)(d) by virtue of their right to compel administration of the estate.

The CT Manual provides:

> **60160. 'Interested in'**
> ...The executors or administrators are interested in the assets of a deceased person's estate during the period of administration (*Willingale v Islington Green Investment Co* 48 TC 547). The beneficiaries should be regarded as interested in any assets of the estate from which they may benefit.

### 73.15.5 *"Entitled to do"*

Section 454(3) CTA 2010 provides:

> For the purposes of subsection (2), a person is treated as entitled to do anything which the person—
> (a) is entitled to do at a future date, or
> (b) will at a future date be entitled to do.

The CT Manual provides:

> **60120. Entitled to acquire or secure**
> The words 'entitled to acquire' and 'entitled to secure' introduce the concept of a potential participator. So, for example, a person is a participator if, by means of a contractual right or by rights arising under a trust deed, they can:
> - require a shareholder to transfer shares to that person, or
> - secure the issue to that person of unissued capital of the company, or
> - secure that if the company makes a distribution or if a loan is redeemed by the company at a premium, that person has a share in the distribution or the premium.

Similarly, a person is a participator if by means of a contractual right or

36 *Bibby v IRC* 29 TC 167.

some other arrangement they can secure that income or assets of the company will be applied directly or indirectly for their benefit. See too 73.4.7 ("Entitled to acquire").

## 73.16 Loan Creditor

### 73.16.1 *Why does it matter who is a loan creditor?*

The expression is used too often to set out a full list, but in particular:
(1) A loan creditor is a participator.
(2) The expression is used in the definition of close company.

### 73.16.2 *Definition of loan creditor*

Section 453 CTA 2010 provides:

> (1) For the purposes of this Part, "loan creditor", in relation to a company, means a creditor—
> (a) in respect of any debt within subsection (2), or
> (b) in respect of any redeemable loan capital issued by the company.
> But this is subject to subsection (4).
> (2) Debt is within this subsection if it is incurred by the company—
> (a) for any money borrowed or capital assets acquired by the company,
> (b) for any right to receive income created in favour of the company, or
> (c) for consideration the value of which to the company was (at the time when the debt was incurred) substantially less than the amount of the debt (including any premium on the debt).

The CT Manual paraphrases this provision and continues:

> **60130. Loan creditor**
> A person is not a participator merely because he or she is a normal trade creditor of the company.
> As the normal debenture issued by a company is redeemable, debenture holders are participators.
> Payments to be made under a hire purchase agreement would not normally be regarded as part of the company's loan capital. This is because under the usual hire purchase agreement there will be no debt for capital assets acquired by the company. The terms of the typical agreement make it clear that the assets remain in the ownership of the

hire company until the final instalment is paid. The payments not made in order to acquire a capital asset, but rather they are rent for the use of the asset.

An example of a sum owing in the circumstances described in [s.453(2)(b)] is where a person contracts to make annual payments to the company, in return for a capital sum due at some later date. The capital sum is treated as loan capital of the company and the person will be a participator.

... It should be borne in mind that [s.1000 CTA 2010] provides that the interest etc on certain loans is a distribution. As regards such loans, the creditor is in any case a participator as he or she 'possesses a right to receive or participate in distributions of the company' (see [s.454(2)(c)]).

73.16.3 *Interest in debt*

Section 453(3) CTA 2010 provides:

(3) A person who—
(a) is not the creditor in respect of any debt or loan capital to which subsection (1) applies, but
(b) has a beneficial interest in that debt or loan capital,
is, to the extent of that interest, treated for the purposes of this Part as a loan creditor in respect of that debt or loan capital (but this is subject to subsection (4)).

The words "to the extent of that interest" are not well expressed, since a person either is or is not a loan creditor. One cannot be a loan creditor "to an extent". But it does not matter.

73.16.4 *Bank creditor*

Section 453(4) CTA 2010 provides:

A person carrying on a business of banking is not treated as a loan creditor in respect of any debt or loan capital incurred or issued by the company for money lent by the person to the company in the ordinary course of that business.

The CT Manual provides:

**60130. Loan creditor**
*Banking business*
[The manual summarises the provision and continues:] There is no statutory definition of what constitutes carrying on a banking business (the definition of bank in Section 840A ICTA 1988 does not apply to Section 417 ICTA 1988) so we rely instead on the common characteristics of banking established in the (non-tax) case of *United Dominions Trust Ltd v Kirkwood* 1966 2 QB 431 and endorsed in *Hafton Properties Ltd v McHugh* 59 TC 420.
If you have any queries on whether a person is carrying on a business of banking, or whether a loan is made in the ordinary course of that business, please consult CT&VAT (Technical).

## 73.17 Close company - Introduction

"Close" company is a concept used so often in tax legislation that it is impossible to write a full list. For the purposes of this book, the concept is important in particular in the definitions of relevant person (for remittances); connected person, and for the application of s.13 TCGA.

"Close company" is one of the most elaborately defined expressions in the taxes acts, and that is really saying something. There are two main tests of close, the control test and the winding up test.

The definition in the CTA is for the purposes of the corporation tax acts. This is extended to income tax by s. 989 ITA:

> The following definitions apply for the purposes of the Income Tax Acts—
> "close company" is to be read in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439 of that Act)

The definition is extended to CGT by s.288(1) TCGA:

> In this Act, unless the context otherwise requires—
> "close company" shall be construed in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439)

## 73.18 Control test

Section 439(1) CTA 2010 provides:

> For the purposes of the Corporation Tax Acts, a "close company" is a company in relation to which condition A or B is met.

I refer to **"close company conditions A and B"** to avoid confusion with the myriad other conditions in the CTA.

### 73.18.1 *Close company condition A: Control of five or fewer participators*

Section 439(1) CTA 2010 provides:

> Condition A is that the company is under the control—
> (a) of 5 or fewer participators, or
> (b) of participators who are directors

Control has the ultra-wide sense.

### 73.18.2 *Control of participators who are directors*

This takes us to the idiosyncratic definition of director in s.452 CTA 2010:

> (1) In this Part, "director", in relation to a company, includes—
> (a) a person occupying the position of director of the company, by whatever name called,
> (b) a person in accordance with whose directions or instructions the directors of the company are accustomed to act, and
> (c) a person within subsection (2).

(1)(a)(b) are standard form; but (c) leads to a distinctly non-standard extension:

> (2) A person (P) is within this subsection if P—
> (a) is a manager of the company or otherwise concerned in the management of the company's trade or business, and
> (b) is—
> (i) the beneficial owner of, or
> (ii) directly or indirectly able to control,
> at least 20% of the ordinary share capital of the company.
> (3) For the purposes of subsection (2)(b), P is treated as owning or controlling (as the case may be) what any associate of P owns or controls.

A company controlled by director-participators is a close company, even if the number of director-participators exceeds five. Directors have "control" of a company if (*inter alia*) they exercise direct or indirect control over the company's affairs. This is puzzling as (under standard articles)[37] company law directors manage the business of the company, and may exercise all the powers of the company. In one sense, directors always control their company. It cannot be that every company whose directors happen to be participators is made a close company under this part of the definition. The answer is that "control" here means control at shareholder level, the ability to pass an ordinary resolution in general meeting. Directors do not "control" a company, in the relevant sense, unless they control the company at that level.[38]

It follows that a charitable company is normally close if its directors constitute all or a majority of the members of the company.[39]

As to whether a foundation is a close company, see

The CT Manual gives some examples:[40]

> **60420 Examples**
>
> The examples refer to companies having shares that are not dealt in or quoted on a stock exchange.
>
> *Example 1*
>
> Company X has 1,000 issued shares of £1 held as below.

| | |
|---|---|
| Trustees of A's settlement | 449 |
| Mrs A (settlor) | 60 |
| Ten other shareholders | 491 |
| Total issued ordinary shares | 1,000 |

> The ten shareholders are not associated with each other or with A or Mrs A and

37 Table A paragraph 70.

38 *Steele v EVC International* 69 TC 88 at p.127. See Venables, *The Taxation of Foundations* (2010) para E2.1.4.3 (Direct or Indirect Control over the Company's Affairs).

39 For example, an Oxford college (a body corporate) may be a close company, since:
(1) Its fellows may be "participators", if they possess voting rights in the body corporate.
(2) Its fellows manage the business of the body corporate, so they are (in principle) "directors".
(3) Its fellows control the body corporate, at shareholder level (or more accurately, at corporate member level).
It appears that HMRC do not take this point in practice.

40 In these examples I omit internal Manual cross references and alter the formatting for increased clarity.

no one of them holds more than 50 shares.
The trustees of A's settlement are associates of Mrs A by virtue of Section 417(3)(b) ICTA 1988, and their rights and powers may be attributed to Mrs A who therefore controls the company.
Company X is therefore a close company.

This is correct, but it is not necessary to rely on the associates rule. The company would be close even if Mrs A were not the settlor since it is under the control of two (less than five) persons. The Manual continues:

*Example 2*
The £1 issued shares in a trading company are owned as follows.

| | |
|---|---|
| **Ordinary shares** | |
| Directors | |
| A | 4 |
| B (cousin of A) | 4 |
| Others | |
| 12 individuals equally, none of whom is a nominee associate, etc, of any other shareholder | 4,992 |
| Total issued ordinary shares | 5,000 |
| **5% preference shares** | |
| A (see above) | 5,000 |
| **Total nominal and issued capital** | 10,000 |

There are no loan creditors ranking as participators or members.
Control by reference to possession of the greater part of the issued share capital (Section 416(2)(a) ICTA 1988).
The company is a close company because A possesses more than half the issued capital.
*Example 3*
The issued ordinary shares in a trading company carry one vote each but the 'A' ordinary shares do not confer voting rights. The shareholders are as below.

| | Ordinary | 'A' ordinary |
|---|---|---|
| A | 280 | |
| Wife of A | 100 | |
| B (brother of A) | 10 | |
| Trustees of A's settlement | 40 | |
| Company X (controlled by A) | 80 | |
| | 510 | |
| Mrs C (daughter of B) | 20 | |
| 10 other equal holdings | 470 | 500 |
| Total issued shares | 1,000 | 500 |

The shares carry equal rights to dividend. A's wife has made a loan of £20,000 to the company at 5% interest. There is no share premium account or other comparable account.
Control by voting rights (Section 416(2)(a) ICTA 1988).

> The associates of A are:
> 1. his wife and his brother, (Section 417(3)(a) and (4) ICTA 1988, and
> 2. the trustees of A's settlement, (Section 417(3)(b) ICTA 1988.
>
> The rights and powers attributable to A are:
> a. the rights and powers of his associates Section 416(6) ICTA 1988, and
> b. the rights and powers of Company X Section 416(6) ICTA 1988.
>
> As a total of 510 votes are thus possessed by A or attributable to him, the company is a close company controlled by one person.

This is correct, but it is not necessary to rely on the associates rule. The company would be close even if none of the shareholders were associates, since it is under the control of five participators. A's wife's loan is wholly irrelevant and it is difficult to see why the example mentions it.

> Alternatively control by holding the greater part of the issued share capital, (Section 416(2)(a) ICTA 1988, - any eight of the other equal holdings will control the company by holding the greater part of the issued share capital.

I do not understand this comment. Perhaps the text of the example is corrupt.

> ***Example 4***
>
> The authorised and issued share capital of Company X is £1,000 in the form of 1,000 ordinary shares of £1 each, held as below.

| | |
|---|---|
| A | 200 |
| B | 100 |
| C | 50 |
| D | 50 |
| E | 40 |
| Company Y | 99 |
| Other shareholders | 461 |
| Total issued ordinary shares | 1000 |

> A, B and C are directors.
>
> The issued capital of Company Y, is £100 in the form of 100 ordinary shares of £1 each, held by:

| | |
|---|---|
| F (son of E) | 60 |
| G | 40 |
| Total issued shares | 100 |

> The shareholders in Company X, other than Company Y, are all individuals and none are related or otherwise associated. No 'other shareholder' holds more than 50 shares.
>
> Control - the rights in the shares held by Company Y in Company X may be attributed to F who controls that company (Section 416(6) ICTA 1988).
>
> F is an associate of E but the rights attributed to F cannot be further attributed to E (Section 416(6) ICTA 1988).

No group of five participators or fewer can control Company X, nor do the director/participators control, and nor would the winding up test be of assistance here.

Company X is not a close company.

***Example 5***

The facts are the same as in Example 4 except that F is the holder of one share in Company X.

Control rights can be attributed to F as below.

| | |
|---|---|
| Shares held in own right | 1 |
| Shares held by E (an associate) | 40 |
| Shares held by Company Y (controlled by F) | 99 |
| | 140 |

Thus A, B, C, D and F hold (or have attributed to them) the rights in 540 shares and control the company.

Company X is a close company.

This example neatly illustrates the arbitrary nature of the rules. At the margin, there is obviously some scope for tax planning.

***Example 6***

Company X has authorised capital of £5,000 in £1 ordinary shares of which £3,000 is issued as below.

| | |
|---|---|
| A | 150 |
| B | 150 |
| C | 150 |
| D | 250 |
| E | 250 |
| F | 250 |
| 20 other shareholders (no one holder having over 100 shares) | 1800 |
| Total issued ordinary shares | 3000 |

The 20 other shareholders are individuals and none of the shareholders is an associate of any other. A, B and C are the directors. They each enter into a service agreement providing that they are to remain directors[41] for five years from 1 January 1992, and that on 31 December 1996, they shall each have the right to purchase 500 £1 shares in the company at par.

Control - A, B and C each exercises or is entitled to acquire rights in 650 shares (Section 416(2)(a) ICTA 1988 and Section 416(4) ICTA 1988).

Thus A, B, C, D and E (or A, B, C, D and F, or A, B, C, E and F) together constitute a group which is 'able to exercise or is entitled to acquire, control' of the company (with 2,450 shares out of 4,500, i.e. the 3,000 issued plus the 1,500 to be issued to the directors).

The company is a close company from 1 January 1992.

41 The right to remain directors is irrelevant to the tax analysis.

***Example 7***

The authorised and issued capital of an investment company is £33,000 and is owned equally by eleven individuals who are not associated. The loan creditors are:

| | |
|---|---|
| A (director and shareholder) | £35,000 |
| B (not a shareholder) | £13,500 |

Neither A nor B is a bank. B is not an associate of a director.
In a winding up, the value of the net assets distributable among members, including loan creditors, would be £120,000 as below.

| | | |
|---|---|---|
| Deposits with local authorities | | £30,000 |
| Market value of quoted investments (representing the remainder of the assets) | | £110,000 |
| | | £140,000 |
| Deduct sundry creditors | | |
| Management expenses | £300 | |
| Bank overdraft | £19,700 | £20,000 |
| Value of net assets | | £120,000 |

Control - the company cannot be shown to be controlled by five or fewer participators under Section 416(2)(a) or (b) ICTA 1988. In a liquidation, the assets would, however, be distributed as below.

| | |
|---|---|
| A as loan creditor | £35,000 |
| B loan creditor | £13,500 |
| Shareholders (£6,500 each) | £71,500 |
| Value of net assets | £120,000 |

More than half of this sum would be received by three persons, that is:

| | |
|---|---|
| A (£35,000 plus £6,500) | £41,500 |
| B | £13,500 |
| Any shareholder other than A | £6,500 |
| Distribution to three persons | £61,500 |

The company is therefore a close company by reference to Section 416(2)(c) ICTA 1988 because the inclusion of loan creditors as participators shows that it is controlled by three participators.

## 73.19 Close company condition B: winding-up test

Condition B provides for a case where the participators have rights which do not confer control. Section 439(3) CTA 2010 provides:

(3) Condition B is that 5 or fewer participators, or participators who are directors, together possess or are entitled to acquire—

(a) such rights as would, in the event of the winding up of the company ("the relevant company") on the basis set out in section 440, entitle them to receive the greater part of the assets of the relevant company which would then be available for distribution among the participators, or

(b) such rights as would, in that event, so entitle them if there were disregarded any rights which any of them or any other person has as a loan creditor (in relation to the relevant company or any other company).

The CT Manual provides:

**60320 Rights in a winding-up**

The tests so far considered in determining whether a company is a close company have depended on the question of control. With effect from 1 April 1989 there is a further test, in which control is irrelevant, based on rights in a winding-up. It is in Section 414(2) to (2D) ICTA 1988 and provides that a company ('the relevant company') is close if five or fewer participators, or participators who are directors, together possess or are entitled to acquire such rights as would, in the event of the winding-up of the company, entitle them to receive the greater part of the company's assets then available for distribution among the participators. By reason of Section 416(6) ICTA 1988 there is attributed to any participator all the rights of his associates.

This test is applied first on the basis that loan creditors are included as participators and then on the basis that they are disregarded. The company is close if it satisfies the test on either basis.

Section 440 CTA 2010 sets out the basis of the notional winding-up:

(1) This section applies for the purposes of section 439(3).

(2) In the notional winding up of the relevant company, the part of the assets available for distribution among the participators which any person is entitled to receive is the aggregate of—

(a) any part of those assets which the person would be entitled to receive in the event of the winding up of the relevant company, and

(b) any part of those assets which the person would be entitled to receive if—

(i) any other company which is a participator in the relevant company and is entitled to receive any assets in the notional winding up were also wound up on the basis set out in this section, and

(ii) the part of the assets of the relevant company to which the other company is entitled were distributed among the participators in the other company in proportion to their respective entitlement to the assets of the other company available for distribution among the participators.

(3) In the application of subsection (2)—

(a) to the notional winding up of the other company mentioned in paragraph (b) of that subsection, and

(b) to any further notional winding up required by that paragraph (or by any further application of that paragraph),

references to "the relevant company" are to be read as references to the company concerned.

Section 441 CTA 2010 provides:

(1) The following provisions apply for the purpose of determining whether under subsection (3) of section 439 five or fewer participators, or participators who are directors, together possess or are entitled to acquire rights such as are mentioned in paragraph (a) or (b) of that subsection.

(2) A person is to be treated as a participator in or director of the relevant company if the person is a participator in or director of any other company which would be entitled to receive assets in the notional winding up of the relevant company on the basis set out in section 440.

(3) No account is to be taken of a participator which is a company unless the company possesses or is entitled to acquire the rights in a fiduciary or representative capacity.

(4) But subsection (3) does not apply for the purposes of section 440.

CT Manual provides:

**60320 Rights in a winding-up**

If in the course of the deemed winding-up of the relevant company assets would be received by a participator which is a company, we proceed on the basis that the corporate participator is itself wound-up and that the assets it received from the winding-up of the relevant company are distributed to its own participators in proportion to their respective entitlement to the assets of that corporate participator. If in the course of that deemed winding-up assets would be received by a

further company the process is repeated. The process continues to be repeated until all of the assets of the relevant company are distributed to individuals (with the exception referred to below). The effect is that we 'look through' all participators which are companies.
The exception to this looking through is any company whose rights are possessed purely in a fiduciary or representative capacity. These stand with the individual participators in determining whether five or fewer participators would be entitled to receive the greater part of the assets available for distribution.
For the purposes of this test, then, the assets of the relevant company which would be distributed to any participator are the sum of what he would receive directly from the winding-up of that company plus what he would receive indirectly through the winding-up of participators which are companies.
For the purposes of this provision a person is treated as a participator in the relevant company if he is a participator in any company itself entitled to receive assets, directly or indirectly, in the winding-up of the relevant company.

## 73.20 Exceptions to close company test

### 73.20.1 *Non-resident company*

Section 442 CTA 2010 sets out three exceptions to the general rule:

> A company is not to be treated as a close company if—
> (a) it is non-UK resident

The rule that a non-resident company is not a close company is in practice often disapplied. As a matter of drafting technique, this is most often done by referring to a company "which would be close if UK resident"; sometimes the definition of close company is expanded to include a non-resident company. In this book I refer to such a company as **"a non-resident close company"**.

### 73.20.2 *Industrial & provident society or building society*

For completeness: s.442 CTA 2010 provides:

> A company is not to be treated as a close company if ...

(b) it is a registered industrial and provident society, or
(c) it is a building society.

### 73.20.3 *Company controlled by the Crown*

Section 443 CTA 2010 provides:

> (1) A company is not to be treated as a close company as a result of section 439(2) if it is controlled by or on behalf of the Crown.
> (2) A company is "controlled by or on behalf of the Crown", for the purposes of this section, if it is under the control of the Crown or of persons acting on behalf of the Crown, independently of any other person.
> (3) But a company is not controlled by or on behalf of the Crown, for the purposes of this section, if it is a close company as a result of being under the control of persons acting independently of the Crown.

EN CTA 2010 provides:

> 1340. The [words *as a result of section 439(2)*] leave it open for a company controlled by or on behalf of the Crown to be a close company if condition B in section 439(3) is met. Section 439(3) is based on section 414(2) of ICTA.
> 1341. The italicised words also leave it open for a company controlled by or on behalf of the Crown to be a close company if condition A in section 439(2) is satisfied by reference to persons acting independently of the Crown. See subsection (3).
> 1342. In short, section 414(1)(c) of ICTA is a qualified exception to section 414(1) of that Act but not an exception to section 414(2) of that Act.

The CT Manual provides:

> **60270 Control: By the Crown**
> A company is to be treated as controlled by or on behalf of the Crown (and therefore not a close company) if, and only if, it is by any of the control tests under the control of the Crown or of persons acting on behalf of the Crown, independently of any other person. If, however, it can be shown that under some other control test:
> - five or fewer participators, or
> - participators who are directors,

control the company and those participators (or director/participators) act independently of the Crown, the company is a close company.

The Crown for this purpose includes any Minister, Government Department or other person acting on behalf of the Crown.

**60280. Control: Overseas governments and local authorities**

A company should not be treated as a close company if the only persons who can be taken to have control of that company are any of the following:

- Overseas governments.
- The Crown Agents for Overseas Governments and Administrations.
- Local authorities or local authority associations exempt from tax under Section 519 ICTA 1988 (see CTM40850 onwards).

Nor should a company be treated as a close company if the only persons who can be taken to have control of that company are any of the above together with:

- a company or companies resident in the UK which are not close, or
- an overseas company or companies which, if resident in the UK, would not be close.

### 73.20.4 *Control by open company*

The next, important, exception concern companies controlled by open (ie non-close) companies. Section 444 CTA 2010 provides:

> (1) A company is not to be treated as a close company if condition A or B is met.
> (2) Condition A is that the company—
> (a) is controlled by one or more companies none of which is a close company, and
> (b) cannot be treated as a close company except by taking, as one of the 5 or fewer participators requisite for its being so treated, a company which is not a close company.
> (3) Condition B is that the company—
> (a) would not be a close company were it not for paragraph (a) of section 439(3) or paragraph (d) of section 450(3), and
> (b) would not be a close company if the references in those paragraphs to participators did not include loan creditors which are companies other than close companies.
> (4) References in subsections (2) and (3) to a close company include a company which, if UK resident, would be a close company.

The CT Manual provides:

**60290 Control: By another company**

A company is not to be treated as a close company where:

- the company is controlled ... by an open company, or by two or more open companies, and
- it cannot be treated as a close company ... except by including an open company in the group of five or fewer participators.

A company is also not to be treated as a close company where:

- the company can only be shown to be close under the control test in Section 416(2)(c) ICTA 1988 (entitlement to receive the greater part of the assets in a winding-up, etc), and
- the company would not be close under the control test if the reference to 'participators' in Section 416(2)(c) excluded loan creditors who are open companies.

Where, in considering the above, you have to take into account a company not resident in the UK, the non-resident company is to be treated as a close company if, were it resident in the UK, it would be such a company.

**60300 Open company loan creditor**

A company is not to be treated as a close company if:

i) it is only close by virtue of the control test in Section 416(2)(c) ICTA 1988 (see CTM60220) or the 'winding-up' test in Section 414(2)(a) ICTA 1988 (see CTM60320), and

ii) it would not be close if, for the purposes of those tests, open companies were not regarded as participators in respect of their interests in the company as loan creditors.

In arriving at the amount available for distribution among the participators, any amount due to an open company as a loan creditor (including any amount due to it as a holder of loan capital) may be disregarded if the result is that the company ceases to be close (Section 414(5)(b) ICTA 1988).

If the open company loan creditor also holds shares in the company, it will remain a participator in respect of that holding and any amount which would be distributed to it in respect of those shares should be taken into account for the purposes of Section 416(2)(c) and Section 414(2)(a).

## 73.21 Pension schemes

Section 445 CTA 2010 provides:

(1) If shares in a company ("C") are held on trust for a registered pension scheme, the persons holding the shares are to be treated, for the

purposes of section 444(2) and (3)—
(a) as the beneficial owners of the shares, and
(b) in that capacity, as a company which is not a close company.
(2) But subsection (1) does not apply if the scheme is established wholly or mainly for the benefit of—
(a) directors, employees, past directors or past employees of a company within subsection (3), or
(b) dependants of an individual within paragraph (a).
(3) The companies within this subsection are—
(a) C,
(b) an associated company of C,
(c) a company which is under the control of—
(i) a director of C,
(ii) an associate of a director of C, or
(iii) two or more persons each of whom is such a director or associate, and
(d) a close company.

The CT Manual summarises this and provides:

**60290 Control: By another company**
The broad effect of the above conditions is that the fund or scheme must be one established for the benefit of employees, etc, of an unrelated company which is not close. A joint fund for the benefit of employees of two or more companies is not disqualified if the majority of the beneficiaries are or were employees of qualifying companies or are dependants of such employees.

## 73.22 Quoted company exemption

Section 446 CTA 2010 provides:

(1) A company is not to be treated as a close company at a particular time if—
(a) shares in the company carrying at least 35% of the voting power in the company have been allotted unconditionally to, or acquired unconditionally by, and are at that time beneficially held by, the public, and
(b) any such shares have within the preceding 12 months been the subject of dealings on a recognised stock exchange, and the shares have within those 12 months been listed on such an exchange.
(2) But subsection (1) does not apply to a company at any time when the

total percentage of the voting power in the company possessed by all of the company's principal members exceeds 85%.

(3) For the purposes of this section, a person is a principal member of a company if the person possesses a percentage of the voting power in the company of more than 5% (but see subsection (4)).

(4) If there are more than 5 persons within subsection (3), a person is a principal member of the company only if—

(a) the person is one of the 5 persons who possess the greatest percentages, or

(b) in a case where there are no such 5 persons because two or more persons possess equal percentages of the voting power in the company, the person is one of the 6 or more persons (including those two or more who possess equal percentages) who possess the greatest percentages.

(5) In determining for the purposes of this section the voting power which a person possesses, there is to be attributed to the person any voting power which would be attributed to the person if section 451(3) to (6) applied for the purposes of this section.

(6) In this section "shares"—

(a) include stock, but

(b) do not include shares entitled to a fixed rate of dividend, whether with or without a further right to participate in profits.

The CT Manual provides:

**60310 35% or more voting power held by public**

... The total voting power for the purpose of (i) and (ii) above is that of all the issued shares (or stock) including that of shares, etc, entitled to a fixed dividend, etc, which are excluded under (i) above in determining the voting power in the hands of the public. ...

1. Where the company holding the shares loses its beneficial interest on commencement of winding-up (see CTM36125) you should not normally contend that a company which was not close before the commencement of that winding-up, thereby becomes a close company.
2. Shares beneficially held by an authorised unit trust (see CTM48200 onwards) are to be regarded as beneficially held by a company which is not a close company unless five or fewer persons hold more than half of the units issued by the trust. In determining the number of units held by a person, there should be attributed to him or her any units held by his or her associates (see CTM60150) or by his or her nominees or by any company (or companies) of which he/she has, or he/she and his associates have, control.

### 73.22.1 *"Held by the public"*

Section 447 defines "shares beneficially held by the public":

> (1) For the purposes of section 446, shares in a company (C) are beneficially held by the public if they are—
> (a) beneficially held by a UK resident company which is not a close company, or by a non-UK resident company which would not be a close company if it were UK resident,
> (b) held on trust for a registered pension scheme, or
> (c) not comprised in a principal member's holding.
> (2) But shares are not beneficially held by the public if they are held—
> (a) by a director of C,
> (b) by an associate of such a director,
> (c) by a company which is under the control of one or more persons each of whom is such a director or associate,
> (d) by an associated company of C, or
> (e) as part of a fund the capital or income of which is applicable or applied wholly or mainly for the benefit of any of individuals within subsection (3).
> (3) Those individuals are—
> (a) employees, directors, past employees or past directors of C or of any company within subsection (2)(c) or (d), and
> (b) dependants of any individuals within paragraph (a).
> (4) The reference in section 446(1) to shares which have been allotted unconditionally to, or acquired unconditionally by, the public is to be read in accordance with subsections (1) to (3).
> (5) For the purposes of subsection (1), a principal member's holding consists of the shares which carry the voting power possessed by him.
> (6) The reference in subsection (2) to shares held by any person includes shares the rights or powers attached to which would be attributed to the person if section 451(3) applied for the purposes of that subsection.
> (7) Subsections (3) to (5) of section 446 (meaning of "principal member" and determination of voting power possessed) apply for the purposes of this section as they apply for the purposes of that section.
> (8) In this section, "shares" includes stock.

The CT Manual par 60310 provides:

> Where a company in [s.315(5)(b)(c)] above loses its beneficial interest in the shares, etc, on commencement of winding-up (see CTM36125)

you should not normally accept that a company which was close before the commencement of that winding-up, thereby ceases to be close. ... For the purpose of (b)(iii) above, shares held in accordance with (b)(i) or (ii) above are deemed to be beneficially held by the public (provided that they are not excluded by (c) above) even if they are comprised in a principal member's holding.

The CT Manual para 60420 provides two simple examples of the quoted company exemption:

**60420 Examples**
*Example 8*
The issued ordinary capital of a trading company (other issued capital having no voting rights) is held as below.

| | |
|---|---|
| Company A (not a close company) | 280 |
| Company B (a close company) | 270 |
| Company C (not a close company) | 230 |
| D (director) | 40 |
| E (director) | 30 |
| F (an individual) | 30 |
| 20 others | 120 |
| Total issued ordinary shares | 1,000 |

Control - the requirements of Section 414(5)(a)(i) ICTA 1988 are regarded as satisfied because, upon one combination of shareholdings, control is in the hands of Company A and Company C, even though by other combinations a controlling group which includes only one of those companies may be established. The company is not a close company if the requirements of Section 414(5)(a)(ii) ICTA 1988 are also satisfied, that is, if none of the control tests enables control by five or fewer participators to be established without including a non-close company among those participators, and the company is not controlled by its directors and cannot be shown to be close on the [or][42] winding up test without including a non-close company among the five or fewer participators (see, however, Example 9 below).
*Example 9*
The ordinary shares are held as in Example 8. G, an individual, holds redeemable loan stock and would receive in a winding-up more than half of the assets available for distribution among the participators.
Control - as G is in control of the company by reference to Section

42 This word is in the original but seems to be a typographical error.

416(2)(c) ICTA 1988, the requirements of Section 414(5)(b) ICTA 1988 are not met and, irrespective of the control by open companies, the company is a close company.

CHAPTER SEVENTY FOUR

# PERMANENT ESTABLISHMENT AND BRANCH/AGENCY

## 74.1 Why does permanent establishment matter?

It is not practical to set out a complete list of the significance of PE for tax, but the following are the most important.

In the absence of a PE, a non-resident company trading in the UK is subject to income tax on its income. A company trading through a PE is subject to corporation tax. Section 5 CTA 2009 provides:

> (1) A UK resident company is chargeable to corporation tax on all its profits wherever arising.
> (2) A non-UK resident company is within the charge to corporation tax only if it carries on a trade in the UK through a permanent establishment in the UK.[1]

In the absence of a PE, a non-resident company is not subject to CGT. A company trading in the UK through a PE is subject to corporation tax on its chargeable gains. Section 10B TCGA provides:

> (1) Subject to any exceptions provided by this Act, the chargeable profits for the purposes of corporation tax of a company not resident in the UK but carrying on a trade[2] in the UK through a permanent establishment there include chargeable gains accruing to the company on the disposal of—
> (a) assets situated in the UK and used in or for the purposes of the trade at or before the time the gain accrued, or

1 The drafting is based on article 7 of the OECD Model Convention.
2 For completeness, s.10B(4) TCGA defines "trade" to include an office, but in practice this will not often be significant.

> (b) assets situated in the UK and used or held for the purposes of the permanent establishment at or before the time the gain accrued or acquired for use by or for the purposes of the permanent establishment.
>
> (2) Subsection (1) does not apply unless the disposal is made at a time when the company is carrying on a trade in the UK through a permanent establishment there. ...

PE is relevant for double tax treaties. In particular, art. 7(1) OECD model treaty provides:

> The profits of an enterprise of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein. If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other State but only so much of them as is attributable to that permanent establishment.

Last but not least, PE of a corporate trustee is relevant to trust residence.

If a non-resident *individual* or trustee is carrying on a trade in the UK, their UK tax position is not affected whether or not they are carrying on their trade through a PE but the PE may be relevant for a DTA and will normally constitute a branch or agency.

PE and branch/agency (or very similar concepts) are also relevant for many non-tax purposes, such as civil jurisdiction.

### 74.1.1 *Carrying on business through a branch or agency*

The statutory provisions refer to a company carrying on a trade through a branch or agency, so one might think that there are two distinct questions:
(1) whether a PE exists
(2) whether the company is carrying on business through the PE.
However PE is defined as a fixed place of business through which the business of the company is carried on; so if a company owns (say) an office building which it does not use (or which it does not use for its business) then strictly the office building is not a PE at all.

### 74.1.2 *Extent of profits chargeable through PE*

Section 5(3) CTA 2009 identifies the amount on which CT is charged:

> A non-UK resident company which carries on a trade in the UK through a permanent establishment in the UK is chargeable to corporation tax on all its profits wherever arising that are chargeable profits as defined in section 19 (profits attributable to its permanent establishment in the UK)...

Section 19 CTA 2009 defines "chargeable profits":

> (1) This section applies if a non-UK resident company carries on a trade in the UK through a permanent establishment in the UK.
> (2) The company's chargeable profits are its profits that are—
> (a) of a type mentioned in subsection (3), and
> (b) attributable to the permanent establishment in accordance with sections 20 to 32.
> (3) The types of profits referred to in subsection (2)(a) are—
> (a) trading income arising directly or indirectly through or from the establishment,
> (b) income from property or rights used by, or held by or for, the establishment, and
> (c) chargeable gains falling within section 10B of TCGA 1992 (non-resident company with UK permanent establishment)—
> (i) as a result of assets being used in or for the purposes of the trade carried on by the company through the establishment, or
> (ii) as a result of assets being used or held for the purposes of the establishment or being acquired for use by or for the purposes of the establishment.

The question of how profits are attributed to a PE is not discussed here.

## 74.2 Meaning(s) of "permanent establishment"

The definition(s) of PE need a long book to itself.[3] This chapter is a relatively brief introduction.

The term "permanent establishment" is used in different places with different definitions. It is strictly necessary to distinguish between:

3 For further reading, there is a bibliography in Reimer, Urban and Schmid (ed), *Permanent Establishments* (2011), para 1.3. See too IFA, *Is there a Permanent Establishment?* Cahiers du Droit International, (Vol 94a, 2009); [2006] BTR at p.722.

(1) "**UK law PE**" (which the INT Manual calls domestic law PE), defined in s.1141 CTA 2010.
(2) "**OECD Model PE**" defined in the OECD Model. The INT Manual calls this "treaty PE" but I prefer the term "OECD Model PE" because different treaties have different definitions.[4]

There are two parts to the definition of PE: (a) fixed place of business and (b) agency PE. It is best to consider them separately.

For investment manager/broker PEs, see 39.1 (Investment manager exemptions - Introduction).

### 74.2.1 *Scope of UK law definition*

Section 1141 CTA 2010 provides:

> For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if ...

Thus this definition applies only for the purposes of the corporation tax acts.

For CGT, s.288 TCGA provides:

> In this Act, unless the context otherwise requires—
> "permanent establishment", in relation to a company, is to be read in accordance with Chapter 2 of Part 24 of CTA 2010;

Similarly, for IT, s.989 ITA provides:

> The following definitions apply for the purposes of the Income Tax Acts—
> "permanent establishment", in relation to a company, is to be read in accordance with Chapter 2 of Part 24 of CTA 2010...

If we had a taxes-act-wide definition this cross referencing would not be necessary.

The statutory definition does not apply in relation to a non-company. If it were ever used in that context it would (subject to context) bear its

4 For instance, see 74.9 (PE in pre-OECD Model treaties).

normal meaning. If the view expressed here is right that domestic law PE should be construed to have the same meaning as OECD law PE, that would be the meaning to apply here too. But perhaps the term is only used in relation to companies, in which case the issue does not arise.

## 74.3 Fixed place of business

Section 1141 CTA 2010 provides:

> For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if (and only if)—
> (a) it has a fixed place of business there through which the business of the company is wholly or partly carried on ...

OECD Model PE is substantially the same as UK law PE. Article 5(1) provides:

> For the purposes of this Convention, the term "permanent establishment" means a fixed place of business through which the business of an enterprise is wholly or partly carried on.

INTM para 264060 discusses UK law PE but that merely repeats and refers to the INTM discussion of OECD Model PE:

> **266050 Fixed place of business permanent establishment** [November 2004]
> [The manual refers to model treaty Article 5(1) and continues:]
> This definition therefore contains the following essential features, all of which must be present:
> a. there must be a geographic place of business, possibly premises or a site, although it can, in certain circumstances, be machinery or equipment.
> b. the place of business must be fixed, that is, have a certain degree of permanence, and
> c. the non-resident's business must be carried on through this fixed place of business, normally by the personnel of the enterprise.
>
> It is possible for an enterprise to have more than one fixed place of business permanent establishment if it carries on business activities from more than one place for the necessary duration of time.

The INTM then goes on to consider these three conditions in more detail.

### 74.3.1 *Geographic condition*

INTM para 266060 provides:

> **Fixed place of business permanent establishment – Geographic condition** [November 2004]
> The words used in article 5(1) make it clear that there is a geographical condition within the fixed place of business treaty permanent establishment definition. There must be a distinct place of business being used for carrying on the business of the enterprise. The place could be premises, facilities, plant or machinery or even a site or installation. But equally the place of business could consist only of a space where premises are not necessarily required for the activities concerned. For example, a street vendor or market barrow enterprise could meet the geographic place condition where the business was carried out from appreciably one place whereas a French travelling salesman arriving in the UK and trading his French produce from door to door before returning to France would not meet the geographic condition and there would be no fixed place of business in the UK. For guidance on the scope for automated machinery to constitute a permanent establishment see INTM266090.
> A place of business of one enterprise could be situated in the business premises of a second enterprise, including possibly an affiliated company, if some space were put at the disposal of the first enterprise. In considering whether a place of business is 'at the disposal of' an enterprise it makes no difference whether that enterprise's use is exclusive or shared, whether the enterprise owns, rents or even occupies a place illegally. As an example of when premises would be considered to be 'at the disposal of an enterprise', a travelling salesman would not be considered to have the premises of each of his prospective customers at his disposal, but a parent company using an office in the headquarters of a subsidiary company to oversee that subsidiary for a period would have had that office space at its disposal. Other examples can be found in the commentary to Article 5.

### 74.3.2 *Degree of permanency*

INTM para 266070 provides:

> **Fixed place of business permanent establishment – Time condition – Degree of permanence of activities** [November 2004]
> The words used in article 5(1) make it clear that there is a time or degree of permanence condition inherent within the term 'fixed place of business' but it is not necessary that equipment or plant be physically fixed to the ground before it could constitute 'a fixed place of business'. There is no certain rule on the period that must pass before a place of business becomes 'fixed' and this can often depend on the nature of the activities. But it is immaterial how long an enterprise operates in another Country if it does not do so at a distinct place.

Since the place of business must be fixed, it also follows that a PE can be deemed to exist only if the place of business has a certain degree of permanency, i.e. if it is not of a purely temporary nature. A place of business may, however, constitute a PE even though it exists, in practice, only for a very short period of time. It is sometimes difficult to determine whether this is the case. Whilst the practices of the different Member States of the OECD are not necessarily consistent in so far as time requirements are concerned, experience has shown that PEs have normally not been considered to exist in situations where a business has been carried on in a country through a place of business that was maintained for less than six months. Conversely practice shows that there were many cases where a PE has been considered to exist where the place of business was maintained for a period longer than six months. One exception to the six month yardstick has been where the activities were of a recurrent nature; in such cases, each period of time during which the place is used needs to be considered in combination with the number of times during which that place is used (which may extend over a period of years). Another exception has been made where activities constituted a business that was carried on exclusively in that country; in this situation, the business may have short duration because of its nature but since it is wholly carried out in that country, its connection with that country is stronger. Temporary interruptions of business activities do not cause a PE to cease to exist.

Where a place of business which was, at the outset, designed to be used for such a short period of time that it would not have constituted a PE but it is in fact maintained for such a period that it can no longer be considered as a temporary one, it becomes a fixed place of business and [as brought out at para 6.3 of the commentary to model treaty article 5(1)] can thus retrospectively be a PE. A place of business can also constitute a PE from its inception even though it existed, in practice, for a very short period of time, if as a consequence of special circumstances, e.g. death of the taxpayer, investment failure etc, it was prematurely terminated.

A PE begins to exist as soon as the enterprise commences to carry on business through a fixed place of business. A period of preparation, as distinct from the real business activities, should not be treated as the business being carried out. The PE ceases to exist with the disposal of the fixed place of business or with the cessation of any activity through it.

A single place of business will generally be considered to exist where, in light of the nature of the business, a particular location within which the activities are moved may be identified as constituting a coherent whole commercially and geographically with respect to the business. For example, the market stall mentioned already if it moved position within a market area. Similarly, a painter who undertook under a single contract to paint a multi-occupied estate would have a single place of business and the duration of his activities at that place would be gauged accordingly. But if the painter entered into individual contracts with unrelated occupants of premises on an estate his activities should be considered separately rather than as a coherent whole.

## 74.3.3 *Personnel condition*

INTM para 266080 provides:

> **Fixed place of business permanent establishment – Personnel condition** [November 2004]
> For a fixed place of business to constitute a PE the business of the enterprise must have been carried on through that place, i.e. persons working in the business must have worked from that place. Those persons could be employees, the entrepreneur or proprietor themselves or any other persons receiving instructions from the enterprise e.g. self-employed consultants.

It would follow that property let out to third parties is not a PE.

> **266090. Fixed place of business permanent establishment – Automated equipment** [November 2004]
> Where the business of an enterprise is carried out through automated machinery a PE may nevertheless exist if personnel are required to set up, operate, control or maintain such equipment. Whether or not gaming or vending machines and the like set up by a foreign enterprise in another State constitute a PE thus depends on whether or not the enterprise carries on a business activity besides the initial setting up of the machines. A PE does not exist if an enterprise merely sets up a machine and then leases it to another enterprise but it could if the first enterprise also operated and maintained the machine for its own account. This also applies if the machine is operated and maintained by an agent dependent (INTM266150) on the enterprise.
> **266100. Fixed place of business permanent establishment – E-commerce/ E-tailers/servers/internet trading** [November 2004]
> The development of e-commerce places a strain on the traditional definition of a PE in cases where the computer equipment is positioned in one territory whilst the enterprise has no personnel active in the business in that territory. The UK does not concur with other OECD Member States on whether a server of itself can constitute a fixed place of business permanent establishment. Accordingly the UK has made an observation to that effect in the commentary to the model treaty Article 5(1).
> In the UK, we take the view that a server either alone or together with web sites could not as such constitute a PE of a business that is conducting e-commerce through a web site on the server. We take that view regardless of whether the server is owned, rented or otherwise at the disposal of the business. This view was stated within Press Release 84/00 published on 11 April 2000.
> Other OECD Member States take the view that a server, as distinct from mere web sites (which cannot fulfil the geographic situs condition) could constitute a PE where the equipment is in fact fixed, i.e. that in fact it is not moved and is located at a specific location for a sufficient duration to indeed become fixed (INTM266050).

### 74.3.4 *Items specifically included as PE*

Section 1141(2) CTA 2010 provides a list of items which constitute a PE. The first seven are:

> For this purpose a "fixed place of business" includes (without prejudice to the generality of that expression)—
> (a) a place of management,
> (b) a branch,[5]
> (c) an office,
> (d) a factory,
> (e) a workshop,
> (f) an installation or structure for the exploration of natural resources,[6]
> (g) a mine, an oil or gas well, a quarry or any other place of extraction of natural resources; ...

This is based on OECD Model Art 5(2). The INTM para 266110 [November 2004] sets out a précis of the article and continues:

> The wording of article 5(2)[7] make it clear that this is not an exhaustive list of the places that could be a permanent establishment.

Obviously. The INTM continues:

> Furthermore, it is clear that, to be a treaty permanent establishment, any of these types of places would also need to have the general attributes of a fixed place of business, i.e. the geographic, period of duration and personnel conditions.

The point was less clear and it is helpful to see it in writing.

### 74.3.5 *Building site, construction or installation project*

This is the eighth item in the list in s.1141(2) CTA 2010:

> For this purpose a "fixed place of business" includes (without prejudice

---

5 See 74.11.2 (Meaning of "branch or agency").
6 This is not in the OECD Model definition.
7 The text erroneously reads: 5(1).

> to the generality of that expression)— ...
> (h) a building site or construction or installation project.

The OECD Model moves this item into a paragraph of its own, and the wording is not quite the same. Article 5(3) provides:

> A building site or construction or installation project constitutes a permanent establishment only if it lasts more than twelve months.

This item, like the first seven in the list, is only a PE if it also meets the geographic, time and personnel conditions.

The INTM para 266130 provides:

> **Fixed place of business permanent establishment – Building sites or construction or installation projects** [March 2007]
> The model treaty article 5 includes specific provisions in para 3 that a building site or construction or installation project constitutes a treaty permanent establishment only where it lasts more than 12 months. The commentary makes it clear that this includes also the construction of roads, bridges or canals, the renovation (involving more than mere maintenance or redecoration) of buildings, roads, bridges or canals, the laying of pipes-lines and excavating and dredging. Additionally, the term 'installation project' is not restricted to an installation related to a construction project; it also includes the installation of new equipment, such as a complex machine, in an existing building or outdoors.
> The OECD member states have made this type of activity the subject of a specific rule because of the frequency with which it caused difficulties of interpretation. And, for clarity in the model treaty, 12 months duration has been taken to be a sufficient indication that the activity is a fixed place of business permanent establishment. Of course particular treaties may vary from the model in this respect and indeed different durations are included in many of the UK's treaties all of which can be referred to in full at DT2150 onwards. The UK domestic charging provisions in [s.1142(2)(h) CTA 2010] define permanent establishment (see INTM264050) in a way that specifically includes all building sites or construction or installation projects without duration qualification. Although initially this may [!] appear inconsistent you should remember that the treaty provisions will override the domestic legislation. In that way, any duration specified in any applicable treaty within which the site will become a permanent establishment will be the duration that applies.
> If the non-resident is involved (directly or indirectly through subcontractors) in more than one site or project, each should be considered as a potential permanent establishment separately from the others. The 12 months or other duration test applies to each site or project. A site or project should be regarded as a single potential permanent establishment even if it is based on several contracts provided that it forms a coherent whole commercially and geographically. If it

appears that a single site or project has been fragmented to avoid the appearance of being a PE the facts of the original tendering should be investigated.
A site or project exists from when the contractor begins work, including any preparatory work, in the country where the construction etc. is to be established. It continues to exist until the work is completed or permanently abandoned. Temporary discontinuation, seasonal or other temporary interruptions should be ignored.

## 74.4 Agency PE

Section 1141 CTA 2010 provides:

> For the purposes of the Corporation Tax Acts a company has a permanent establishment in a territory if (and only if) ...
> (b) an agent acting on behalf of the company has and habitually exercises there authority *to do business on behalf of the company*.

OECD Model PE is different. Article 5(5) provides:

> [a] Notwithstanding the provisions of paras 1 and 2, where a person — other than an agent of an independent status to whom para 6 applies — is acting on behalf of an enterprise and has, and habitually exercises, in a Contracting State an authority *to conclude contracts in the name of the enterprise*, that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities which that person undertakes for the enterprise,
> [b] unless the activities of such person are limited to those mentioned in para 4 which, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph.[8]

I refer to this as "**agency PE**" though the term "dependent agency PE" is sometimes used.

### 74.4.1 *Distinctions between OECD and domestic law PE*

Dawn Primarolo (then Paymaster General) explained why the wording of domestic law PE differs from OECD law PE:

8 See 74.7 (PE: preparatory and auxiliary activities).

**Dawn Primarolo**: ... the wording used in clause 147(1)(b) [FB 2003 now s.1142 CTA 2010] to define "dependent agent" varies from the exact wording in article 5(5) of the OECD model tax convention. Instead, it is based on guidance given in the commentary on article 5, which can be found in paragraphs 31 to 45, because article 5 refers to an agent who has the authority to conclude contracts in the name of the enterprise.

However, the OECD commentary on article 5 makes it clear that that phrase is not necessarily to be taken at face value. For instance, it covers contracts in the name of an enterprise, contracts binding on the enterprise but not in its name, and contracts recognised by the agent but signed by some other person, while excluding contracts that do not relate to the business proper of the enterprise, although concluded by the agent. The area is very complicated and there is an interaction between the commentary and the article itself.

UK legislation cannot be directly interpreted by reference to the commentary,[9] so the phrase used in clause 147 is intended to encapsulate the current OECD interpretation in respect of dependent agents. That would not have been achieved if the wording in article 5(5) were copied directly into UK domestic law.

**Mr. Burnett:** The Paymaster General will recall that one of the arguments used by me, the hon. Member for Eddisbury and one or two others who spoke on the matter was that the Inland Revenue confirmed that the reference to an agent in clause 147 is restricted to those persons who contractually can and do bind their principals and not to persons acting in some other representative capacity falling short of having such authority. The Paymaster General is obviously well aware of *Pepper v. Hart* and the reliance people may put on what she says in Committee. I would welcome her comments on that point raised by the Law Society.

**Dawn Primarolo:** I was coming to that important point, which was outlined in a letter to the Law Society and the Chartered Institute of Taxation on 8 May.

I was trying to explain that the article wording must be read in parallel with the commentary. The commentary needed to be part of the description that went into UK legislation in order to make that clear. In drafting the legislation, the importance of maintaining certainty on international understanding and practice on the OECD guidelines and model conventions while understanding how the commentary affects their operation was one of the major points, which was continually made

9 This is not correct, but fortunately no-one present reminded Ms Primarolo of (what is now) s.164 TIOPA (Application of OECD principles).

> to the Revenue and me. That is how we chose the clause's wording. Amendment No. 101 seeks to add to the definition of dependent agent used in clause 147(1)(b). It would mean that an agent would be a dependent agent of a foreign company as long as they had the authority to enter into arrangements on its behalf and had entered into contractually binding arrangements with it. That may not have been the amendment's intended effect, but I ask the Committee to reject it nevertheless. The suggested addition is unnecessary and the language used in clause 147(1)(b) already reflects the current OECD position on dependent agents. As such, no further clarification or definition is required.... The Bill does not extend the charge to tax on non-resident companies and there is no less certainty for an agent of a non-resident company on whether they are within the charge to corporation tax. The rules are set out in the OECD treaty and commentary and in UK law, which has had and will have specific rules to facilitate foreign investment in the City.[10]

Similarly, the INTM para 264050 provides:

> **Permanent establishment – Domestic law definition** [March 2007]
> The definition of domestic law permanent establishment is at [s.1141 CTA 2010]. This is similar to and has the same broad effect as the OECD model treaty article 5 definition of permanent establishment which is an important factor bearing in mind that treaty law takes precedence over domestic law. So it is unlikely that the application of a treaty that followed the model article 5 would cause any variance to the UK domestic charge to tax on a non-resident trading in the UK through a permanent establishment as defined under domestic law. Because of the similarities of wording and effect between PE under domestic law and under the OECD model treaty the guidance on interpretation of treaty PE at INTM266000 is understandably substantially applicable to domestic law PE as well.
> A lot of our interpretation of treaty PE is based on the Commentary to Article 5 of the OECD Model Treaty (INTM266030). Although the Commentary is not imported into UK domestic law the UK has contributed to and agreed the content except in specific instances where the UK has put on record either an observation or a reservation to a specific section of the Commentary. So, where the wording of the UK domestic law PE provisions are the same as those used in the OECD Model Treaty Article 5 then the commentary interpretation on those words will apply to those provisions and this guidance will contain cross-references into the guidance on treaty PE at INTM266000. If the

10 House of Commons Standing Committee B, accessible *www.publications.parliament.uk/pa/cm200203/cmstand/b/st030520/pm/part1/30520s06.htm*

> Commentary interpretation of PE were to materially vary through periodic update or amendment the changes would have to be accepted by the UK Parliament before they could be taken to apply also to interpretation of UK domestic law PE.

The simpler way to achieve the intention would have been to incorporate the OECD definition by reference, but it is considered that the UK law definition has reached that destination, even though by an less satisfactory route.[11] EN CTA 2010 agrees:

> 3253. This Chapter determines what constitutes a permanent establishment in a territory of a company which is not resident in that territory. ...
> 3254. The determination is in line with various internationally recognised characteristics commonly used in the UK's double tax agreements.

### 74.4.2 *OECD model agency PE*

The OECD Commentary provides:

> 31. It is a generally accepted principle that an enterprise should be treated as having a permanent establishment in a State if there is under certain conditions a person acting for it, even though the enterprise may not have a fixed place of business in that State within the meaning of paragraphs 1 and 2. [Article 5(5)] intends to give that State the right to tax in such cases. Thus paragraph 5 stipulates the conditions under which an enterprise is deemed to have a permanent establishment in respect of any activity of a person acting for it. The paragraph was redrafted in the 1977 Model Convention to clarify the intention of the corresponding provision of the 1963 Draft Convention without altering its substance apart from an extension of the excepted activities of the person.

The commentary then turns to the phrase *authority to conclude contracts in the name of the enterprise* which is at the heart of OECD model agency PE:

> 32. Persons whose activities may create a permanent establishment for the enterprise are so-called dependent agents i.e. persons, whether employees or not, who are not independent agents falling under para 6. Such persons may be either

11 If that is right, it answers the concerns expressed in Nias, "Taxation of non-resident companies and the meaning of agent" [2003] BTR 468.

individuals or companies. It would not have been in the interest of international economic relations to provide that the maintenance of any dependent person would lead to a permanent establishment for the enterprise. Such treatment is to be limited to persons who in view of the scope of their authority or the nature of their activity involve the enterprise to a particular extent in business activities in the State concerned. Therefore, para 5 proceeds on the basis that only persons having the authority to conclude contracts can lead to a permanent establishment for the enterprise maintaining them. In such a case the person has sufficient authority to bind the enterprise's participation in the business activities in the State concerned. The use of the term "permanent establishment" in this context presupposes, of course, that that person makes use of this authority repeatedly and not merely in isolated cases.

The commentary turns to the phrase *in the name of the enterprise*:

32.1 Also, the phrase "authority to conclude contracts in the name of the enterprise" does not confine the application of the paragraph to an agent who enters into contracts literally in the name of the enterprise; the paragraph applies equally to an agent who concludes contracts which are binding on the enterprise even if those contracts are not actually in the name of the enterprise.

The commentary turns to the phrase *authority to conclude contracts:*

Lack of active involvement by an enterprise in transactions may be indicative of a grant of authority to an agent. For example, an agent may be considered to possess actual authority to conclude contracts where he solicits and receives (but does not formally finalise) orders which are sent directly to a warehouse from which goods are delivered and where the foreign enterprise routinely approves the transactions.

33. The authority to conclude contracts must cover contracts relating to operations which constitute the business proper of the enterprise. It would be irrelevant, for instance, if the person has authority to engage employees for the enterprise to assist that person's activity for the enterprise or if the person were authorised to conclude, in the name of the enterprise, similar contracts relating to internal operations only.

It seems to me that "agent" can be used in three broad senses:

(1) A person who can *legally* enter into contracts which bind their principal

(2) A person who can *effectively decide whether* to enter into a contractual relationship which binds their principal and any further step to create a contract is a commercial formality or "rubber stamping".

(3) In a looser, colloquial sense, an intermediary, spokesperson, or

representative (who lacks that power).[12]

The meaning here is meaning (2). If in practice the agent can commercially give a commitment, they will be regarded as an agent even if they lack formal authority so that any contract strictly needs to be endorsed by the principal as a formality.[13]

The commentary then turns to the requirement that the authority must be exercised in the state concerned. What about arranging that the negotiating work is done by the agent in a state, but the contract is signed elsewhere? This does not work:

> Moreover the authority has to be habitually exercised in the other State; whether or not this is the case should be determined on the basis of the commercial realities of the situation. A person who is authorised to negotiate all elements and details of a contract in a way binding on the enterprise can be said to exercise this authority "in the State", even if the contract is signed by another person in the State in which the enterprise is situated or if the first person has not formally been given a power of representation. The mere fact, however, that a person has attended or even participated in negotiations in a State between an enterprise and a client will not be sufficient, by itself, to conclude that the person has exercised in that State an authority to conclude contracts in the name of the enterprise. The fact that a person has attended or even participated in such negotiations could, however, be a relevant factor in determining the exact functions performed by that person on behalf of the enterprise.

The article 5(4) exemption (auxiliary & preparatory work, etc)[14] applies to agents:

> Since, by virtue of paragraph 4, the maintenance of a fixed place of business solely for purposes listed in that paragraph is deemed not to constitute a permanent establishment, a person whose activities are restricted to such purposes does not create a permanent establishment either.

---

12 "The use of the word 'agent' in any mercantile transaction is, of itself, wholly uninformative of the legal relationship between the parties and the use of the words 'independent agent' takes the matter no further. Either is consistent with a self-employed person acting either as a true agent who puts his principal into a contractual relationship with a third party or with such a person acting as a principal." See *Potter v CE* [1985] STC 45 at p.51 cited with approval in *Umbro International v HMRC* [2009] STC 1345 at [29].

13 The point has been decided the same way in relation to branch/agency: see 74.11.5 (Difference between branch/agency and PE).

14 See 74.7 (PE: preparatory and auxiliary activities).

The commentary comments on "habitually" (which echoes the requirement of "degree of permanency" for a place of business PE):

> 33.1 The requirement that an agent must "habitually" exercise an authority to conclude contracts reflects the underlying principle in Article 5 that the presence which an enterprise maintains in a Contracting State should be more than merely transitory if the enterprise is to be regarded as maintaining a permanent establishment, and thus a taxable presence, in that State. The extent and frequency of activity necessary to conclude that the agent is "habitually exercising" contracting authority will depend on the nature of the contracts and the business of the principal. It is not possible to lay down a precise frequency test. Nonetheless, the same sorts of factors considered in para 6 would be relevant in making that determination.

And lastly two general points:

> 34. Where the requirements set out in paragraph 5 are met, a permanent establishment of the enterprise exists to the extent that the person acts for the latter, i.e. not only to the extent that such a person exercises the authority to conclude contracts in the name of the enterprise.
> 35. Under paragraph 5, only those persons who meet the specific conditions may create a permanent establishment; all other persons are excluded. It should be borne in mind, however, that paragraph 5 simply provides an alternative test of whether an enterprise has a permanent establishment in a State. If it can be shown that the enterprise has a permanent establishment within the meaning of paragraphs 1 and 2 (subject to the provisions of paragraph 4), it is not necessary to show that the person in charge is one who would fall under paragraph 5.

The INTM provides:

> **266160. UK common law – Variance with civil law** [March 2007]
> The majority of European countries have civil law codes whereas the UK has a common law code. Any matters of interpretation of undefined terms used in article 5 or any other article of a treaty should be interpreted in the UK under UK law or at least common meaning. The civil law concept of agency is different from that under common law in that civil law will not usually regard the actions of an agent as though they were the actions of the principal. Civil law separates the relationship between the principal and the agent on the one hand and that between the agent and the third party (including a customer) on the other. Thus civil law countries do not, as the UK does, necessarily see the presence of the non-resident principal in the actions of the resident agent. In the UK, under common law, we interpret any actions carried out by an agent as having been performed for the principal and binding the principal in the same way as though they had carried out those actions themselves. For example, a contract arranged

by an agent in the UK to deliver goods owned by a foreign principal to a customer would be treated for UK tax purposes as though the foreign principal themselves had contracted in the UK for the delivery. This is the case, regardless of whether the contract is written in the name of the principal or in the name of the agent (commentary to model treaty article 5(5), para 32.1 of July 2005 version).

The former ITH provided:

**851.** Treaties following the example of the OECD Model are influenced by the civil law concept of agency. Para 5 of Article 5 of the Model deems an agent to be a permanent establishment if the agent has and habitually exercises an authority to conclude contracts in the name of the enterprise of the treaty partner state, unless the agent is an agent of independent status within para 6. There are two pointers here to civil law influence. One is 'contracts in the name of the enterprise', the other is 'agent of independent status'.

**852. In the name of principal**

The making of contracts in the name of the principal would be regarded by civil law countries as a characteristic of a dependent agent whereas contracts made in the agent's own name would be characteristic of independent status (though the wording of the Article does not preclude the possibility of independent status even if the contracts are in the name of the 'enterprise'). In our law, if the contracts are made on behalf of and with the authority of the principal the relationship of the agent to the principal is not affected by whether the contract is made in the name of the principal or in the agent's own name. So agents, who in all other respects would be dependent agents according to the OECD Model, could in our law make contracts in their own name. We would not wish such agents to be regarded as agents of independent status under a treaty and therefore resist the literal meaning of 'in the name of' and argue that the words should be interpreted as 'on behalf of', which is an acceptable translation of the words 'au nom de' which appear in the French version of the Model Convention. The commentary on Article 5 of the 1992 Model included a note of our view at para 45 and in 1994 a sentence was added to the commentary itself at para 32 confirming that this is now the accepted interpretation.

The INTM discussion of OECD Model PE at 266140 [March 2007] is a lightly adapted version of the OECD commentary, so is not set out here.

### 74.4.3 *USA DTA*

Article 6(5) UK/US DTA provides a definition of agency PE very similar to the OECD model.[15]

The US Department of the Treasury Technical Explanation of the Convention[16] provides:

> The OECD Model uses the term "in the name of that enterprise" rather than "binding on the enterprise". There is no substantive difference. As indicated in paragraph 32 to the OECD Commentary on Article 5, paragraph 5 of the Article is intended to encompass a person who "concludes contracts which are binding on the enterprise, even if those contracts are not actually in the name of the enterprise".
> The contracts referred to in paragraph 5 are those relating to the essential business operations of the enterprise rather than ancillary activities. For example, if the agent has no authority to conclude contracts in the name of the enterprise with its customers for the sale of the goods produced by the enterprise, but it can enter into service contracts in the name of the enterprise for the enterprise's business equipment used in the agent's office, this contracting authority would not fall within the scope of the paragraph, even if exercised regularly.

## 74.5 Independent agent

Section 1142(1) CTA 2010 provides:

> A company is not regarded as having a permanent establishment in a territory by reason of the fact that it carries on business there through an agent of independent status acting in the ordinary course of the agent's business.

The OECD Model is slightly differently worded, but the differences do not seem material. Article 5(6) provides:

---

15 "Notwithstanding the provisions of paragraphs 1 and 2 of this Article, where a person—other than an agent of an independent status to whom paragraph 6 of this Article applies—is acting on behalf of an enterprise and has and habitually exercises in a Contracting State an authority *to conclude contracts that are binding on the enterprise,* that enterprise shall be deemed to have a permanent establishment in that State in respect of any activities that the person undertakes for the enterprise, unless the activities of such person are limited to those mentioned in paragraph 4 of this Article that, if exercised through a fixed place of business, would not make this fixed place of business a permanent establishment under the provisions of that paragraph."

16 Accessible *www.irs.gov/pub/irs-trty/temod006.pdf*

> An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent or any other agent of an independent status, provided that such persons are acting in the ordinary course of their business.

The OECD Commentary summarises:

> 36. Where an enterprise of a Contracting State carries on business dealings through a broker, general commission agent or any other agent of an independent status, it cannot be taxed in the other Contracting State in respect of those dealings if the agent is acting in the ordinary course of his business (cf. paragraph 32 above). Although it stands to reason that such an agent, representing a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise, paragraph 6 has been inserted in the Article for the sake of clarity and emphasis.

The view that the independent agent exception is only inserted for the avoidance of doubt is important in contexts (such as pre-OECD model treaties) where the exception is not found.

> 37. A person will come within the scope of paragraph 6, i.e. he will not constitute a permanent establishment of the enterprise on whose behalf he acts only if
> a) he is independent of the enterprise both legally and economically, and
> b) he acts in the ordinary course of his business when acting on behalf of the enterprise.

The requirements of independent status and “ordinary course of business” overlap slightly but it is best to consider them separately.

## 74.5.1 *Independent status*

The OECD comment on “independent status”:

> 38. Whether a person is independent of the enterprise represented depends on the extent of the obligations which this person has vis-a-vis the enterprise. Where the person’s commercial activities for the enterprise are subject to detailed instructions or to comprehensive control by it, such person cannot be regarded

as independent of the enterprise. Another important criterion will be whether the entrepreneurial risk has to be borne by the person or by the enterprise the person represents.
38.1 In relation to the test of legal dependence, it should be noted that the control which a parent company exercises over its subsidiary in its capacity as shareholder is not relevant in a consideration of the dependence or otherwise of the subsidiary in its capacity as an agent for the parent. This is consistent with the rule in paragraph 7 of Article 5. But, as paragraph 41 of the Commentary indicates, the subsidiary may be considered a dependent agent of its parent by application of the same tests which are applied to unrelated companies.
38.2 The following considerations should be borne in mind when determining whether an agent may be considered to be independent.
38.3 An independent agent will typically be responsible to his principal for the results of his work but not subject to significant control with respect to the manner in which that work is carried out. He will not be subject to detailed instructions from the principal as to the conduct of the work. The fact that the principal is relying on the special skill and knowledge of the agent is an indication of independence.
38.4 Limitations on the scale of business which may be conducted by the agent clearly affect the scope of the agent's authority. However such limitations are not relevant to dependency which is determined by consideration of the extent to which the agent exercises freedom in the conduct of business on behalf of the principal within the scope of the authority conferred by the agreement.
38.5 It may be a feature of the operation of an agreement that an agent will provide substantial information to a principal in connection with the business conducted under the agreement. This is not in itself a sufficient criterion for determination that the agent is dependent unless the information is provided in the course of seeking approval from the principal for the manner in which the business is to be conducted. The provision of information which is simply intended to ensure the smooth running of the agreement and continued good relations with the principal is not a sign of dependence.
38.6 Another factor to be considered in determining independent status is the number of principals represented by the agent. Independent status is less likely if the activities of the agent are performed wholly or almost wholly on behalf of only one enterprise over the lifetime of the business or a long period of time. However, this fact is not by itself determinative. All the facts and circumstances must be taken into account to determine whether the agent's activities constitute an autonomous business conducted by him in which he bears risk and receives reward through the use of his entrepreneurial skills and knowledge. Where an agent acts for a number of principals in the ordinary course of his business and none of these is predominant in terms of the business carried on by the agent legal dependence may exist if the principals act in concert to control the acts of the agent in the course of his business on their behalf.

The INTM comments at para 264080:

**Independent agents do not create a permanent establishment** [March 2007] [The INTM summarises s.1142(1) and continues:] Whether an agent is of independent status is tested by reference to the legal, financial and commercial characteristics of the particular business relationship between the non-resident and the agent. If the relationship between them is the same as a relationship between independent businesses dealing with each other at arms length then the agent will be ‘an independent agent’. For example, an agent who acted for other independent unconnected businesses on the same terms as those under which he acted for the non-resident could be an ‘independent agent’ and it would be clear that the agent had been acting in the ordinary course of his business if his activities were repeated for various unconnected customers. Dependent or independent status does not turn on the shareholding relationship between principal and agent. The fact that an agent is a subsidiary company does not necessarily make it a dependent agent.[17] However, a subsidiary company will constitute a domestic law agency PE of its parent company in the same way as any other agent of the parent company if independence by reference to the factors detailed in the guidance that follows cannot be demonstrated.

Whether an agent acts in the ordinary course of their own business is something that should be considered by reference to the behavioural facts as opposed to intentions not followed through in business performance. Matters relevant would include (but not necessarily be limited to) the number of unrelated principals that the agent acted for and the extent of the business activities customarily carried out by independent agents in the specific business sector concerned.

Assuming they did act in the ordinary course of their own business, in general, an agent would be independent and would not constitute an agency PE of the foreign enterprise for which it acts where it is independent of the principal enterprise both legally and economically. The perspective of application of this test is with relevance to the business conducted by the agent for the principal rather than, for example, any shareholding relationship between the principal and agent. Other relevant factors of independence may include:

- the extent of the obligations which the agent has vis-à-vis the non-resident;
- whether the agent is subject to detailed instructions or comprehensive control;
- whether the agent bears the entrepreneurial risk for the business that the agent carries out for the non-resident;
- the degree of reliance on the agent’s special skill and knowledge by the principal in the business done, and
- Whether there is reference by the agent to the principal for approval of the manner in which the business is to be conducted.

There will undoubtedly be circumstances where, whether deliberately or not, the relationship between a non resident and a UK agent is obscure or even where the declared terms of that relationship are very different from the actual terms. In such cases there is no substitute for detailed enquiry into the relationship to see whether it falls within the category of dependent or independent agent.

17 See 74.6 (Controlled companies and group companies).

INTM discusses the OECD Model wording. It partly duplicates the text of the discussion on domestic law agency PE. The other parts provide:

> **266150. Agent of independent status – Article 5(6)** [March 2007]
> ... The work done by an agent, where that work was all done for one non-resident client, is unlikely to be viewed as the conduct of his 'own business' but more likely that of the non-resident's business. An exception to that view might be where the concentration on one client was an unusual occurrence within a settled continuous trade involving several clients. ...

## 74.5.2 *"Ordinary course of business"*

The OECD comment on "ordinary course of business:"

> 38.7 Persons cannot be said to act in the ordinary course of their own business if, in place of the enterprise, such persons perform activities which, economically, belong to the sphere of the enterprise rather than to that of their own business operations. Where, for example, a commission agent not only sells the goods or merchandise of the enterprise in his own name but also habitually acts, in relation to that enterprise, as a permanent agent having an authority to conclude contracts, he would be deemed in respect of this particular activity to be a permanent establishment, since he is thus acting outside the ordinary course of his own trade or business (namely that of a commission agent), unless his activities are limited to those mentioned at the end of paragraph 5.
> 38.8 In deciding whether or not particular activities fall within or outside the ordinary course of business of an agent, one would examine the business activities customarily carried out within the agent's trade as a broker, commission agent or other independent agent rather than the other business activities carried out by that agent. Whilst the comparison normally should be made with the activities customary to the agent's trade, other complementary tests may in certain circumstances be used concurrently or alternatively, for example where the agent's activities do not relate to a common trade.
> 39. [This deals with insurance companies and is not discussed here].

## 74.5.3 *USA DTA*

Article 4(6) UK/US DTA is similar to the OECD model.[18]

The US Department of the Treasury Technical Explanation of the

18 "An enterprise shall not be deemed to have a permanent establishment in a Contracting State merely because it carries on business in that State through a broker, general commission agent, or any other agent of an independent status, provided that such person is acting in the ordinary course of his business as an independent agent."

Convention[19] provides:

> Whether the agent and the enterprise are independent is a factual determination. Among the questions to be considered are the extent to which the agent operates on the basis of instructions from the enterprise. An agent that is subject to detailed instructions regarding the conduct of its operations or comprehensive control by the enterprise is not legally independent.
>
> In determining whether the agent is economically independent, a relevant factor is the extent to which the agent bears business risk. Business risk refers primarily to risk of loss. An independent agent typically bears risk of loss from its own activities. In the absence of other factors that would establish dependence, an agent that shares business risk with the enterprise, or has its own business risk, is economically independent because its business activities are not integrated with those of the principal. Conversely, an agent that bears little or no risk from the activities it performs is not economically independent and therefore is not described in paragraph
>
> Another relevant factor in determining whether an agent is economically independent is whether the agent has an exclusive or nearly exclusive relationship with the principal. Such a relationship may indicate that the principal has economic control over the agent. A number of principals acting in concert also may have economic control over an agent. The limited scope of the agent's activities and the agent's dependence on a single source of income may indicate that the agent lacks economic independence. It should be borne in mind, however, that exclusivity is not in itself a conclusive test; an agent may be economically independent notwithstanding an exclusive relationship with the principal if it has the capacity to diversify and acquire other clients without substantial modifications to its current business and without substantial harm to its business profits. Thus, exclusivity should be viewed merely as a pointer to further investigation of the relationship between the principal and the agent. Each case must be addressed on the basis of its own facts and circumstances.

### 74.5.4 *Broker and general commission agents*

The precise meanings of broker and general commission agent in the OECD Model PE definition do not greatly matter since both terms are

19 Accessible *www.ustreas.gov/offices/tax-policy/library/teus-uk.pdf*

subsumed into "other agent of independent status".

For completeness, "broker" is discussed at 39.5.2 ("Broker"). The former ITH explained "general commission agent" in a passage too amusing to omit:

> **935. General commission agent**
> ... Although the words general commission agent appear in the legislation, nobody really knows what a general commission agent is and textbooks on agency make no reference to such a character; the expression is indeed used in our Double Taxation Agreements but it is not a term that our treaty partners are familiar with. They say it has no particular meaning for them and think that it is there because the British were rather insistent about it.
> **936. London Produce case**
> The one case to which we most often turn for guidance on who may or may not be a general commission agent is the London Produce case [*Fleming v London Produce Co Ltd* 44 TC 582]. The London Produce company acted as agents in importing meat from New Zealand and selling it for commission on the London market. 95 per cent of its business was carried out for one principal. It claimed to be a general commission agent.
> Megarry J enjoyed himself with the expression saying that he found it puzzling and unidentified. He wondered whether he might get at a meaning by looking at the words general, commission and agent separately and then adding the constituent parts together. He felt, however, that that was not a good idea because one could not arrive at the meaning of a particular high office by adding together the separate words lord, privy and seal. He came to the conclusion that a general commission agent must have broker-like qualities as it is included in the term 'broker' in the Section and that it is someone who holds himself out as being ready to work for clients generally. In his view Section 82(1) [TMA] (then Section 373(1) ITA 1952) could not be relevant if 'in substance what is done is that (the non-resident) carries on business within the UK through the medium of an agent who is virtually a sole agent running the entire business for him and merely sending him remittances on request'. London Produce lost the case.
> The only other case is the earlier one of *Boyd v Stephen* [10 TC 698] (concerned with bacon) when Rowlatt rather summarily dismissed the suggestion that the agents were general commission agents on the grounds that they did much more than such an agent would normally do. What the words are probably getting at is somebody like an import commission agent. That is someone, probably more common in 1915, who, acting for a non-resident producer, will sell goods through a broker on the market in return for a commission. It is unlikely that the authors of the Section had in mind the smaller domestic markets such as meat and bacon.

## 74.6 Controlled companies and group companies

Article 5(7) OECD Model provides:

> The fact that a company which is a resident of a Contracting State controls or is controlled by a company which is a resident of the other Contracting State, or which carries on business in that other State (whether through a permanent establishment or otherwise), shall not of itself constitute either company a permanent establishment of the other.

The OECD commentary provides:

> 40. It is generally accepted that the existence of a subsidiary company does not, of itself, constitute that subsidiary company a permanent establishment of its parent company. This follows from the principle that, for the purpose of taxation, such a subsidiary company constitutes an independent legal entity. Even the fact that the trade or business is carried on by the subsidiary company is managed by the parent company does not constitute the subsidiary company a permanent establishment of the parent company.
> 41. A parent company may, however, be found, under the rules of paragraphs 1 or 5 of the Article, to have a permanent establishment in a State where a subsidiary has a place of business. Thus, any space or premises belonging to the subsidiary that is at the disposal of the parent company (see paragraphs 4, 5 and 6 above) and that constitutes a fixed place of business through which the parent carries on its own business will constitute a permanent establishment of the parent under paragraph 1, subject to paragraph 3 and 4 of the Article (see for instance, the example in paragraph 4.3 above). Also, under paragraph 5, a parent will be deemed to have a permanent establishment in a State in respect of any activities that its subsidiary undertakes for it if the subsidiary has, and habitually exercises, in that State an authority to conclude contracts in the name of the parent (see paragraphs 32, 33 and 34 above), unless these activities are limited to those referred to in paragraph 4 of the Article or unless the subsidiary acts in the ordinary course of its business as an independent agent to which paragraph 6 of the Article applies.
> 41.1 The same principles apply to any company forming part of a multinational group so that such a company may be found to have a permanent establishment in a State where it has at its disposal (see paragraphs 4, 5 and 6 above) and uses premises belonging to another company of the group, or if the former company is deemed to have a permanent establishment under paragraph 5 of the Article(see paragraphs 32, 33 and 34 above). The determination of the existence of a permanent establishment under the rules of paragraphs 1 or 5 of the Article must, however, be done separately for each company of the group. Thus, the existence in one State of a permanent establishment of one company of

> the group will not have any relevance as to whether another company of the group has itself a permanent establishment in that State.
>
> 42. Whilst premises belonging to a company that is a member of a multinational group can be put at the disposal of another company of the group and may, subject to the other conditions of Article 5, constitute a permanent establishment of that other company if the business of that other company is carried on through that place, it is important to distinguish that case from the frequent situation where a company that is a member of a multinational group provides services (e.g. management services) to another company of the group as part of its own business carried on in premises that are not those of that other company and using its own personnel. In that case, the place where those services are provided is not at the disposal of the latter company and it is not the business of that company that is carried on through that place. That place cannot, therefore, be considered to be a permanent establishment of the company to which the services are provided. Indeed, the fact that a company's own activities at a given location may provide an economic benefit to the business of another company does not mean that the latter company carries on its business through that location: clearly, a company that merely purchases parts produced or services supplied by another company in a different country would not have a permanent establishment because of that, even though it may benefit from the manufacturing of these parts or the supplying of these services.

There is no equivalent of art 7(5) in UK domestic law PE, but it is considered that the same rules should be implied.

## 74.7 PE: preparatory and auxiliary activities

Section 1143 CTA 2010 provides:

> (1) If the condition in subsection (2) is met, a company is not regarded as having a permanent establishment in a territory by reason of the fact that—
> (a) a fixed place of business is maintained there for the purpose of carrying on activities for the company, or
> (b) an agent carries on activities there for and on behalf of the company.
>
> (2) The condition is that, in relation to the business of the company as a whole, the activities carried on are only of a preparatory or auxiliary character.
>
> (3) For this purpose "activities of a preparatory or auxiliary character" include (without prejudice to the generality of that expression)—

(a) the use of facilities for the purpose of storage, display or delivery of goods or merchandise belonging to the company,
(b) the maintenance of a stock of goods or merchandise belonging to the company for the purpose of storage, display or delivery,
(c) the maintenance of a stock of goods or merchandise belonging to the company for the purpose of processing by another person, and
(d) purchasing goods or merchandise, or collecting information, for the company.

This is a slight rewrite of OECD Model but the differences in wording do not seem significant.

INTM para 264050 discusses this, but need not be set out as it only refers to (and repeats some material from) the INTM discussion of OECD Model PE:

> **266120 Fixed place of business permanent establishment – Activities specifically excluded from the definition of permanent establishment** [March 2007]
> Model treaty Article 5(4) lists certain activities that are not to be treated as permanent establishments even if they are carried on through a fixed place of business.

The Manual sets out a précis of the article and continues:

> In deciding whether or not a fixed place of business of a non-resident enterprise is used for activities of a preparatory or auxiliary nature, consider the following factors:
> a. Are the services it performs so remote from the actual realisation of profits by the enterprise that it would be difficult to allocate any part of the profit to the fixed place of business? If they are, then the fixed place of business will not be a permanent establishment. The benchmark to gauge the activities against are those of the trade as a whole entity. So, for example, if the UK activities are no different to the essence of the trade, e.g. the UK personnel collect market research information and the non-resident company's main trade is concerned with market research, then the activities in the UK would not be preparatory or auxiliary and there could be a permanent establishment in the UK.

An example is a research division of a trading or manufacturing company.

> b. Does the activity of the fixed place of business form an essential and significant part of the enterprise as a whole?

This sentence is from the OECD commentary but with respect it cannot be a correct or helpful test since all the activities specified as auxiliary are significant and some of them are essential.

> A fixed place of business whose general purpose is identical to the general purpose of the enterprise is not used for activities of a preparatory or auxiliary nature. Examples of this are fixed places of business used for the purpose of managing an enterprise, or where a fixed place of business is maintained to supply spare parts of machinery supplied by the enterprise to customers and to service such machinery.
> Note that the exclusion of activities of a preparatory or auxiliary nature from the definition of a permanent establishment only applies if these activities are solely for the non-resident enterprise. If the activities are performed not only for the enterprise but also for other enterprises, including other companies in the same group, then the fixed place of business will not be within the scope of the exclusion.

I find the last paragraph rather surprising though it is in the OECD Commentary. The OECD Commentary explains the reason for the exemption for collecting information:

> The reference to the collection of information in subpara d) is intended to include the case of the newspaper bureau which has no purpose other than to act as one of many "tentacles" of the parent body; to exempt such a bureau is to do no more than to extend the concept of "mere purchase".

## 74.8 Alternative finance arrangements

Section 1144 CTA 2010 deals with alternative finance arrangements, and is not discussed here.

## 74.9 PE in pre-OECD Model treaties

Article 2(1) of the UK/Jersey DTA provides a different definition of PE:

> The term "permanent establishment", when used with respect to an enterprise of one of the territories, means a branch, management or other fixed place of business, but does not include an agency unless the agent has, and habitually exercises, a general authority to negotiate and conclude contracts on behalf of such enterprise or has a stock of merchandise from which he regularly fills orders on its behalf.

Guernsey and the Isle of Man are the same. This wording is based on s.17 FA 1930.

To what extent is this different from OECD Model PE? It is suggested that the Courts ought to have regard to the general international law understanding of PE (that is, OECD Model PE) and construe it in the same way. Notwithstanding the multiplicity of definitions, a multiplicity of concepts should be avoided or minimised so far as possible. Otherwise we will never know much about the meaning of this definition as there is will not be the litigation to answer all the puzzles which could arise.

It would be a significant simplification if the old-style treaties could be amended to adopt standard OECD model wording, though, obviously, that cannot be achieved by the UK unilaterally, and the point is not likely to have much priority in the agendas of tax simplification or treaty negotiation.

## 74.10 Why does branch/agency matter?

It is not possible to give a full list, but a branch/agency is important to an individual or trust for the following purposes:

(1) The branch/agency gives rise to a liability to CGT: see 43.8 (Non-resident traders with UK branch).
(2) IT and CGT may be collected from the branch/agency.[20]
(3) The branch/agency may affect the residence of non-corporate trustees.

Lastly, the branch or agency is likely to be a PE, which is relevant for DTAs.

Branch/agency is not relevant to companies. In theory one can envisage a situation where a non-resident company does not have a UK PE but does have a UK branch or agency, and such a company would be within the scope of CGT under s.10 TCGA. In practice, this does not happen, or if it does, no-one takes any notice.[21]

---

20 See 38.1 (Collection of tax from UK representatives).

21 See for instance the HMRC trustee residence guidance which states conveniently (if not strictly accurately):
"This is in line with section 10B Taxation of Chargeable Gains Act 1992 *which has the effect that an overseas company is not taxed on the gains made by a UK branch or agency, but only on those made by a permanent establishment here*." (Emphasis added).

## 74.11 Meaning of "branch or agency"

### 74.11.1 *The statutory (non-)definition*

Section 10(6) TCGA provides:

> In this Act, unless the context otherwise requires,
> [a] "branch or agency" means any factorship, agency, receivership, branch or management, but
> [b] does not include any person within the exemptions in section 82 of the Management Act (general agents and brokers).

For the purposes of UK representatives rules[22] the term is likewise defined to mean "any factorship, agency, receivership, branch or management". The definition here does not include the restriction for general agents and brokers but these categories are taken out of the UK representative rules by other provisions.

The definition in s.10(6)[a] TCGA is completely useless, since it incorporates both words being defined, merely adding three further obscure or archaic terms which seem to mean "agent" if they mean anything.[23] The INTM expresses the same point more tactfully:

> **264090. Branch or agency – Statutory definition and practical recognition of a branch** [March 2007]
> ...
> There is a statutory definition of 'branch or agency' at Section 834(1) ICTA

22 See 38.1 (Collection of tax from UK representatives).

23 The former ITH explained at 842:

> "Factorship and receivership are forms of agency and so, usually, would 'management' be. The former two categories are found in the 1842 machinery provisions, 'Management' was added in 1915 but has acquired more modern associations with the growth in the use of managers such as project managers and investment managers."

To be fair, it was not intended to be a definition as such, but simply as an abbreviation, to avoid the more cumbersome wording of, e.g. s.370 ITA 1952:

> "A non-resident person shall be assessable and chargeable in respect of any profits or gains arising, whether directly or indirectly, through or from any factorship, agency, receivership, branch or management, and shall be so assessable and chargeable in the name of the factor, agent, receiver, branch or manager."

1988 thus – "any factorship, agency, receivership, branch or management".[24] This is not particularly helpful so we must look for authority elsewhere including case law.

### 74.11.2 *Meaning of "branch"*

The former ITH stated at para 842:

> There is very little guidance on the meaning of 'branch'. We have been advised that the presence of a principal (in the case of a sole trader or partnership) or of employees on a more or less regular basis is likely to be an essential ingredient of a branch (though employees may also be agents).

That repeats the personnel condition in the definition of PE. The INTM discusses the meaning of branch at para 264090 [March 2007]:

> Most people recognise a branch of a foreign business when they see one and the impression given to the public is helpful in deciding whether or not a branch exists. For example there are many branches of foreign banks that trade on the High Streets of many towns and cities in the UK. We know this, whether we bank with these branches or not, because the name of the foreign bank will be displayed across the shop front of the UK branch. The personnel running the UK branch will be carrying on the part of the foreign bank's trade that takes place in the UK. This amounts to the UK presence of the foreign bank's trade, i.e. a branch of its trade. That's an easy example in part because banks actually call themselves branches but it is worth stressing that whatever terminology is used it is the activities carried on in the UK in relation to the foreign enterprise's overall business activities that are most relevant in deciding whether the UK activities are a branch of the foreign business.

### 74.11.3 *Meaning of "agency"*

The INTM continues:

> **264100. Agency – Common law concept** [November 2004]
> Practical experience will have introduced all of us to the idea of agency.

24 [Author's Note.] The reference should be s.126(8) FA 1995. However, the definition there is the same, so it does not matter.

We do not always deal directly with the principal because we sometimes deal with an intermediary or agent. The agent represents the principal in accordance with the terms of the agreement in place between them. That agreement may be oral or in writing and in legal terms is called the agent's authority. In representing the principal the agent may bring about a legal relationship between that principal and a third party. Typically the agent may conclude a contract on the principal's behalf with a third party – the common situation is that of the UK agent who makes a contract with an UK third party to sell some goods on behalf of a foreign principal.

The English common law concept of agency is sometimes described by legal writers as the doctrine of identity. This conveys the concept that the agent is the alter ego of the principal. In the act of the agent we see directly the act of the principal; we regard what the agent does for the principal in just the same way as we would have regarded the same act if the principal had been here and had done it. If a contract for sale were made in the UK it would follow that a non-resident making a contract here through an agent would be trading here. Thus our domestic law concept of trading within the UK by non-residents and our common law concept of agency are intimately linked although the word agent appears nowhere in the income tax charging legislation. This contrasts with the legal position under civil law, which is detailed in the guidance at INTM266160.

### 74.11.4 *Exception for general agents*

Section 10(6)[b] TCGA provides that branch or agency:

> does not include any person within the exemptions in section 82 of the Management Act (general agents and brokers).

The reference is to s.82 TMA 1970 which was repealed in 1995! This provided:

> [a] Nothing in this Part of this Act shall render a non-resident person chargeable in the name of a broker or in the name of an agent not being an authorised person carrying on the regular agency of the non-resident person, in respect of profits or gains arising from sales or transactions carried out through such a broker or agent:
>
> [b] Provided that where sales or transactions are carried out on behalf of a non-resident person through a broker in the ordinary course of his business as such and the broker

(a) is a person carrying on bona fide the business of a broker in the UK, and
(b) receives in respect of the business of the non-resident person which is transacted through him remuneration at a rate not less than that customary in the class of business in question,

then, notwithstanding that the broker is a person who acts regularly for the non-resident person as such broker, the non-resident person shall not be chargeable in the name of that broker in respect of profits or gains arising from those sales or transactions.

In this subsection, "broker" includes a general commission agent.

There are two exceptions here. The exception at [a] applies only to cases where there is no regular agency.[25] This is similar to the rule that casual agents do not constitute an agency PE.[26] The exception at [b] is similar to the broker exemption. There is no statutory exemption for investment managers or other independent agents. This is, I think, an oversight. It is considered that the exemption (or something like it) should be held to be implied.[27] As far as investment managers are concerned, in practice it does not matter much, as individuals or trusts are not likely to be trading in securities (and if they were, I do not expect that anyone would take any notice).

### 74.11.5 *Difference between branch/agency and PE*?

It is considered that "branch" should have (more or less) the same meaning as place of business PE, and "agency" should have (more or less) the same meaning as agency PE, so the composite expression has a very similar meaning to PE.

---

25 The phrase "not being an authorised person carrying on the regular agency of the non-resident person" governs "broker" as well as "agent", ie the section means:
"Nothing in this Part of this Act shall render a non-resident person chargeable
[I] in the name of a broker *not being an authorised person carrying on the regular agency of the non-resident person*, or
[ii] in the name of an agent not being an authorised person carrying on the regular agency of the non-resident person,
in respect of profits or gains arising from sales or transactions carried out through such a broker or agent..."

26 See 38.5 (Agents not treated as UK representatives).

27 See 74.5 (Independent agent) citing the OECD Model commentary:
"... it stands to reason that such an agent, representing a separate enterprise, cannot constitute a permanent establishment of the foreign enterprise, paragraph 6 has been inserted in the Article for the sake of clarity and emphasis."

HMRC agree. The SALF Manual provides:

> **704 UK representatives of non-residents chargeable under Case I and II Schedule D** [February 2011]
> *Definition of UK representative*
> Branch or agency has the statutory definition at Section 126(8) FA 1995 of 'Any factorship, agency, receivership, branch or management' but it is interpreted on broadly equal lines to 'permanent establishment'...[28]

In *Brackett v Chater*,[29] the Special Commissioners treated the term "branch or agency" as composite phrase containing a single concept. They did not think it correct to consider separately whether there was a branch, and whether there was an agent. The difficulty with this approach is that it is far from clear what the single concept is, if it is distinct from the concepts of branch, agency or PE. (The statutory definition, as noted, does not help.) The Special Commissioners' solution is to ignore the wording altogether.[30] It is not necessary to go that far, even when dealing with these 19th century fossils, and at a time when more emphasis is placed on a purposive approach. What might be said is that the two concepts can overlap and a branch will often constitute an agency. It may not be necessary to decide whether a person is a branch or an agent, as long as they are clearly one or the other.

The Special Commissioners continued:

> Mr. Brackett represents Drishane in this country and is in sole charge of the day to day conduct of the trading operations other than the formation of contracts. It is not straining language, in our opinion, to say that by entrusting those operations to his care Drishane has established at least a branch in this country. Alternatively Mr. Brackett can properly be described as the manager of those operations, because he personifies them. Nor can we accede to Mr. Brackett's argument that it is

28 Similarly the HMRC trustee residence guidance: "The examples all relate to non-UK resident companies that are trustees. The same principles would apply for other non-UK resident persons who are trustees (and for whom the relevant UK-based entity would be a branch or agency rather than a permanent establishment)."

29 60 TC 134 & 639, at p.646.

30 "It would, in our view, be perverse to hold that Drishane, which was effectively trading only in this country, through Mr. Brackett, is not within the charge to tax because of some semantic difficulty in fitting its arrangements with him to the wording of the definition of a branch or agency."

> inappropriate to assess him as "agent for Drishane" because he does not have the status of an agent under the general law. The definition of "branch or agency" in s 118 Taxes Management Act adds that "branch or agent" shall be construed accordingly. We take that to mean that the term "agent" is used as the cognate noun to describe a person who represents a branch or agency. Mr. Brackett is undoubtedly the personification of the branch or management of Drishane's business in this country and is, in our opinion, properly assessed as "agent for Drishane" on the authority of s 79.

This conclusion does follow from the finding of fact in the first sentence, though the only support it received in the High Court was that the decision was one which the Special Commissioners were entitled to reach. The judge agreed that the word "agent" need not be an agent in the contract sense of a person empowered to enter into contracts on behalf of a principal.

### 74.11.6 *Can you trade in the UK without a branch/agency or PE?*

In *Brackett v Chater* the judge said:

> ... I find it difficult to imagine how a non-resident company which carries on a trade with any degree of continuity in the UK can do so otherwise than through a "branch or agency" as defined in the Taxes Management Act 1970.[31]

This is *obiter*, but given the breadth of the expression it seems right as a general rule but not as an absolute rule. This applies to a PE as well as to a branch/agency.

The former ITH at 846 took the view that trading in the UK without a branch or agency was rare:

> Although such cases are rare it is possible for a non-resident individual to trade here other than through a branch or agency. A non-resident individual might come to this country for a short time so as not to become resident and carry on an itinerant trade. There would in such a situation be no branch and no agency. It is rather more difficult to imagine situations of that sort where the person concerned is a company.

31 60 TC 134 at p.149.

> But notwithstanding the judge's comments in the *Brackett* case there may be cases where the UK activities of a non-resident company are divided between various persons in such a way that, although the activities amount to trading here, no one person or group of persons can be identified as a branch or agency through which the trade is carried on.

### 74.11.7 *Commentary: let's abolish branch/agency*

The FA 2003 replaced "branch or agency" with "PE" for the purposes of corporation tax. A press release explained the reason:

> The rules also alter our current terminology so that in future we tax "permanent establishments", (a term recognised internationally and used in our double taxation agreements), rather than "branches". The new rules are to be interpreted in accordance with OECD guidelines, to ensure that the UK is in accord with international consensus that reflects UK agreement. If internationally agreed changes are made in the future, then any new guidance can be included to assist in the interpretation of the UK rules, if the UK government decides it wishes to adopt them.[32]

This was a good reason to change corporation tax, and it is an equally good reason to bring IT and CGT into line. We do not need both concepts. The term PE should be extended to replace "branch or agency" altogether. This would be a worthwhile and trouble-free simplification in the law. It would make no difference whatsoever in practice, because in practice the two terms come to much the same thing, and no-one takes any notice of such differences as there may be, but it would remove some puzzles and complexity in the law.

32 REV BN 25 para 8 (17 April 2002).

CHAPTER SEVENTY FIVE

# DISCLOSURE AND COMPLIANCE

## 75.1 Standards of disclosure and mistake

### 75.1.1 *Standards of care: culpability of mistakes*

It is helpful first to define some terminology and draw some distinctions. Errors may be classified by certain standards:

"**An honest error**" is one where the maker meets the standard of honesty.

"**A non-careless error**" is one where the maker meets the standard of reasonable care.

"**A reasonable-excuse error**" is one for which the maker has a reasonable excuse. This is similar to a non-careless error, but perhaps it reflects a higher standard: it is perhaps possible to envisage an error which is not careless but for which one still cannot find a reasonable excuse. But the difference (if any) is only a matter of nuance and for most purposes they are the same.

The minimum level of care required is that of reasonable care, ie if there is a mistake in a return (or any other document given to HMRC) the error is honest and non-careless.

### 75.1.2 *Standards of disclosure*

Taxpayers disclosure may be classified by various standards:

"**Minimum disclosure**" – the minimum required by statute.

"**Above-minimum disclosure**" meeting some higher standard above that minimum. This is a (deliberately) loose expression since (in the absence of context) a variety of standards might be applied. One particular standard (discussed below) I call "**Veltema-disclosure**" but there can be other standards.

"**Full disclosure**" (in the absence of context) is not an apt expression, and

I prefer to avoid it, because one cannot disclose *everything*: that is not practical. Indeed even to try would swamp HMRC with information so they could not identify what is relevant. HMRC are themselves aware of this. SP 1/06 provides:

> 9. A taxpayer can further restrict the opportunity for discovery [assessments] by providing enough information for an HMRC officer to realise within the enquiry period that the self-assessment is insufficient. However taxpayers are encouraged to submit the minimum necessary to make disclosure of an insufficiency. The Veltema judgement does not require the provision of enough information to quantify the effect on the assessment. Information will not be treated as being made available where the total amount supplied is so extensive that an officer 'could not have been reasonably expected to be aware' of the significance of particular information and the officer's attention has not been drawn to it by the taxpayer or taxpayer's representative.

## 75.2 Self-assessment tax return: minimum disclosure

This section discusses general principles. See also 29.45 (Tax return: disclosure of motive defence).

A tax return is a series of questions, and the statutory duty of taxpayers (and advisers) is simply to answer them. The answers should be honest and non-careless. That is, one cannot necessarily avoid errors, but any errors in the return should be honest and non-careless.

The standard of honesty is the ordinary standard of reasonable and honest people.[1] In practice debate normally focuses on neglect.

---

1 But what is that standard? It ultimately depends on the view of the judge or jury as finders of fact. Did Pepys reflect those standards when he wrote in his diary for 10 December 1660:

> "This afternoon there was a Couple of men with me, with a book in each of their hands, demanding money for polemony; and I overlooked the book and saw myself set down *Samuel Pepys, gent.,* 10*s* for himself and for his servants 2*s*. Which I did presently pay without any dispute; but I fear I shall not escape so, and therefore I have long ago laid by 10*l:* for them; but I think I am not bound to discover myself"?

The point of the entry is that he was liable to pay £10 under the Act (12 Car. II c.9) as an esquire. Pepys' good fortune continued under the next poll tax: The entry of 20 March 1667 reads:

> "I ... assessed by the late Pole-bill, where I am rated at an Esquire; and for my office, all will come to about 50*l* – but not more then I expected, nor so much by

## 75.3 Carelessness

### 75.3.1 *Significance of carelessness*

Carelessness is relevant to time limits of assessment and to penalties.

As far as time limits are concerned, it is convenient to read s.34(1) and 36(1) TMA together:

> **34(1)** Subject to the following provisions of this Act, and to any other provisions of the Taxes Acts allowing a longer period in any particular class of case, an assessment to income tax or capital gains tax may be made at any time not more than 4 years after the end of the year of assessment to which it relates. ...
> **36(1)** An assessment on a person in a case involving a loss of income tax or capital gains tax brought about carelessly by the person may be made at any time not more than 6 years after the end of the year of assessment to which it relates (subject to subsection (1A) and any other provision of the Taxes Acts allowing a longer period)....
> (1B) In subsections (1) and (1A), references to a loss brought about by the person who is the subject of the assessment include a loss brought about by another person acting on behalf of that person.

In short, there is normally an (approximately) 4-year limit on assessments. In the case of carelessness, assessments may be made up to 6 years, and in other specified cases up to 20 years.

The taxpayer may be subject to penalties if they are guilty of carelessness. In penalty matters the carelessness must (in short) be personal carelessness of the taxpayer, not of their agents (though it is of course possible for both taxpayer and agent to be guilty of carelessness).[2]

### 75.3.2 *Meaning of "carelessness"*

A note on terminology. Enquiry Manual correctly provides:

> **5125 Culpability: Neglect, Negligence and Negligent Conduct** [August 2009]
> The terms are interchangeable.

a great deal as I ought to be for all my offices – so I shall be glad to escape so."

2 Para 18(3) Sch 24 FA 2007.

Modern drafting uses the word "careless", defined to mean "failure to take reasonable care".[3] This is just a Plain English synonym of "negligence" or "neglect". HMRC agree. Compliance Handbook provides:

> **53400. What is careless behaviour?** [November 2010]
> The 6-year time limit applies where income tax, capital gains tax or corporation tax has been under-assessed or over-repaid due to the careless behaviour of
> - the person, see CH51600, or
> - a person acting on their behalf, see CH53200.
>
> "Careless" means a failure to take reasonable care in relation to your tax affairs.
> Carelessness can be likened to the longstanding concept in general law of "negligence".
> In the 1856 case of *Blyth v Birmingham Waterworks Co*,[4] Baron Alderson said
>
> > Negligence is the omission to do something which a reasonable man, guided upon those considerations which ordinarily regulate the conduct of human affairs, would do, or doing something which a prudent and reasonable man would not do. The defendants might be liable for negligence, if, unintentionally, they omitted to do that which a prudent and reasonable person would have done, or did that which a person taking reasonable care would not have done.
>
> There is no question of whether or not the person intended to make the inaccuracy or fail to comply with the obligation. If they did that would be deliberate, see CH53700. It is simply a question of examining what the person did or failed to do and asking whether a prudent and reasonable person taking reasonable care would have done that or failed to do that in those circumstances.
> Repeated inaccuracies may form part of a pattern of behaviour which suggests a lack of care by a person in developing adequate systems for the recording of transactions or preparing tax returns. Similarly, repeated failures in relation to the relevant obligations in CH53900 to CH54100 inclusive may suggest a lack of care. It is, however, important to keep a sense of proportion. For example, repetition of the same inaccuracy would not always, of itself, indicate a failure to take reasonable care.
> People do make mistakes. We do not expect perfection. We are simply

---

3 See s.29(4) and s.118 TMA as amended; similarly the penalty provisions in Sch 24 FA 2007.

4 (1856) 11 Ex 781, p784.

> seeking to establish whether the person has given the care and attention that could be expected from a reasonable person taking reasonable care in similar circumstances....

This definition will do as well as any other.

The question must be decided in the light of the position as it was at the relevant time without the benefit of hindsight. The fact that a view later turns out to be mistaken does not show that it was careless to form that view. Otherwise any judge whose decision is reversed on appeal would be guilty of carelessness and how often does that happen! The onus of proof generally rests on HMRC to prove carelessness. An allegation of carelessness is a serious one and it should not be lightly made. I stress these points because HMRC ignore them and allege neglect as a matter of course, whenever carelessness is necessary to justify out of time assessments.[5]

Depending on which statutory provision is in point, it may be necessary to ascertain:

(1) whether the taxpayer is guilty of carelessness; or
(2) whether the taxpayer's agent is guilty of carelessness.

### 75.3.3 *The standard of care: taxpayers*

A taxpayer who is not an expert in taxation must leave technical tax issues to their professional advisers. When tax law is complicated a properly represented taxpayer cannot be expected to identify their advisers mistakes. So where there are technical errors of law, the issue is normally whether the taxpayer's professional advisers have been guilty of carelessness. HMRC agree (if grudgingly):

> A taxpayer who
> [1] goes to an ostensibly competent professional adviser,
> [2] provides a full and accurate account of the facts,
> [3] checks that advice to the limit of his or her ability and competence,

5 See eg International Manual which contains this revealing and extraordinary statement:

> "**268520 Assessing time limits** [February 2008]
> … If we come to the reasonable conclusion that there is a PE, or that the company is resident in the UK, prima facie there has been negligent conduct in the failure to notify."

[4] and then follows the agent's advice (or signs the return prepared on that basis)

has not been negligent. He or she has taken reasonable care. If it turns out that the agent has made a careless error in giving the advice or in preparing the tax return the taxpayer who has taken reasonable care will not be penalised.[6]

This wording is somewhat overfavourable to HMRC, at [2] and [3] which (depending on what nuance one puts on the expressions used) do seem to exceed a requirement of reasonable care. But the basic point made is correct.

An interesting question is what the taxpayer should do if their advisers disagree. A safe course then (if the amounts involved make this reasonable) is to seek the advice of counsel, or more senior counsel, or a QC, but what is to be done if two tax QCs disagree or if the amounts do not justify that expense? It is suggested that the correct course is as follows:

(1) The individual must ask himself whether one view or the other is obviously or glaringly wrong. However it is not to be expected that this will often provide a solution.
(2) Subject to that, the individual can in principle follow whichever view suits them, provided that the person whose advice is adopted is suitably experienced, has seen the contrary advice and maintains their view. Then (even if the practitioner whose view is adopted turns out to be wrong) any error is non-careless and a reasonable-excuse error.

### 75.3.4 *The standard of care: tax practitioners*

The question then is what reasonable tax practitioners should do in advising or completing a tax return for a client. The standard of care is that to be expected of a reasonable practitioner.[7]

A solicitor or accountant is entitled to rely on advice given by an

---

6 "Modernising Powers, Deterrents and Safeguards: Working with Tax Agents" 22 April 2009, accessible *www.hmrc.gov.uk/budget2009/tax-agent-6440.pdf*

7 Of course, the adviser's duty is not merely (merely?) to understand the law. He/she must explain it, record it in writing, and identify the risk factors to the client. Is this so obvious that it is unnecessary to say? It is not: *Chandrasekaran v Deloitte & Touche Wealth Management* [2004] EWHC 1378 at [72].

appropriate expert counsel (provided it is not obviously or glaringly wrong). A person who acts in this way is not careless.[8] This rule applies in the completion of a tax return. So where counsel has advised, HMRC would normally need to allege that counsel is guilty of carelessness in order to make an out of time assessment.

What should a practitioner do if the law is so unclear that they are unable to form a view? Common examples include residence and the source of interest: in many cases the only honest answer to the question of how a court would decide is "I don't know" or "toss a coin". In such cases the proper course is to complete the tax return on whichever view best suits the client.

A trickier question is where professional views differ between view A and view B, the practitioner prefers view A, but view B suits the client. It is suggested the practitioner can advise the client to fill in their return on view B. Take, for example, the old chestnut problem of GWR and trusts. In my view there is no IHT charge on the death of a deemed domiciled individual who has a GWR in an excluded property trusts. Some practitioners (I think, a minority) take the view that there is a charge. Should they really advise their clients to complete the return on that basis? I would have thought not. If that were wrong, then the best advice one could give would be to change advisers, which can hardly be right.

## 75.4 Significance of reasonable excuse

It is not possible to give a full list. The most important is s.59C TMA which imposes a 5% surcharge on tax paid more than 28 days late and another 5% on tax paid more than 6 months late. It is not a requirement that the taxpayer or their agent be guilty of carelessness. (This is no doubt why the term used is "surcharge" and not "penalty".) Instead there is a defence for a taxpayer with a "reasonable excuse".

## 75.5 Advantages of above-minimum disclosure

This section considers whether a tax return should contain more than the

---

8 *Locke v Camberwell Health Authority* [1991] 2 Med LR 249 accessible *www.kessler.co.uk*.

minimum disclosure of answering the questions asked. The "white box" section of a tax return "Any other information" is designed for this purpose, or material may of course be put in a covering letter.

Any such disclosure is strictly voluntary. Everyone who is responsible for completing tax returns has to ask questions and decide on the answers. If an answer is reached, there is in general no obligation to disclose this process of reasoning to HMRC. Failure to do so does not render answers in the return (even if they turn out to be wrong) to be dishonest or careless errors.

The CIOT used to say that expressly:

> *In the preparation of a tax return, there is no duty to provide more information to the tax authorities than the return requires simply because some pieces of information known to the member might support a different tax treatment from that which the member, after due consideration of all the information available to him, honestly considers to be the tax treatment.*[9]

That continues to be the law, and the CIOT have not changed their view, but in the 2011 version of the code they no longer have the confidence to express it in clear and uncompromising terms:

> A tax return must contain at least the minimum information required by law.[10]

That sentence is a truism, and not in any meaningful sense guidance, for the question is to identify the information which is "required by law". However one can infer from what follows that the CIOT view has not changed, as the passage goes on to identify reasons for *voluntary* disclosure:

---

9 CIOT, *Professional Conduct in Relation to Taxation* (2004), para 3.10.
The Keith Committee recommended that taxpayers' doubts should be disclosed to HMRC but the recommendation was rightly rejected as impractical: see Committee on Enforcement Powers of Revenue Departments (1983) Cmnd 8822 para 7.3.6 and HMRC consultation papers "The Inland Revenue and the Taxpayer" and "Keith: Further Proposals" (1988).

10 CIOT, *Professional Conduct in Relation to Taxation* (4 Jan 2011), para 3.9 [2011] STI p.215, accessible *www.tax.org.uk*.

> In general it is likely to be in a client's own interests to ensure that factors relevant to his tax liability are adequately disclosed to HMRC ... In addition, it may be desirable to make fuller disclosure than is strictly necessary.[11]

The fact that there is a possibility that the courts might disagree with an adviser's view does not in itself require any disclosure. The law could not sensibly take any other view, as that possibility almost always exists, even if the law seems clear: decisions such as *Rysaffe* and *Grimm v Newman* (happily corrected on appeal) and *Phizackerley* (not appealed) illustrate the uncertainties – or (which comes to the same thing) the lottery element in litigation.

The same of course applies both ways. When HMRC assess tax to the best of their judgement, they disclose what tax they consider due, but not their reasoning.

Voluntary disclosure (in the words of the CIOT, "fuller disclosure than is strictly necessary") may be desirable for any one or more of the following reasons:

(1) It may curtail HMRC's enquiry period.
(2) It may facilitate good relations with HMRC.
(3) It may help avoid allegations of misconduct, which might later arise if the view taken turns out to be in error, and tax is due:
    (a) Allegations of dishonesty (based on a suspicion that the taxpayer might be relying on HMRC not finding out the facts).
    (b) Allegations of carelessness.
    (c) Allegations of no reasonable excuse.

## 75.6 Voluntary disclosure to curtail enquiry period

### 75.6.1 *IT and CGT enquiry*

HMRC usually have 12 months in which to begin an enquiry into a tax return. However, s.29 TMA provides an extension of time in certain cases:

---

11 CIOT, *Professional Conduct in Relation to Taxation* (4 Jan 2011), para 3.10, 3.11 [2011] STI p.215, accessible *www.tax.org.uk*.

> (1) If an officer of the Board or the Board discover, as regards any person (the taxpayer) and a year of assessment—
> (a) that any income which ought to have been assessed to income tax, or chargeable gains which ought to have been assessed to capital gains tax, have not been assessed, ….
> the officer or, as the case may be, the Board may, subject to subsections (2) and (3) below, make an assessment in the amount, or the further amount, which ought in his or their opinion to be charged in order to make good to the Crown the loss of tax. ….
> (3) Where the taxpayer has made and delivered a return under section 8 or 8A of this Act in respect of the relevant year of assessment, he shall not be assessed under subsection (1) above—
> (a) in respect of the year of assessment mentioned in that subsection; and
> (b) in the same capacity as that in which he made and delivered the return,
> unless one of the two conditions mentioned below is fulfilled.
> (4) The first condition is that the situation mentioned in subsection (1) above was brought about carelessly or deliberately by the taxpayer or a person acting on his behalf.

The first condition will not be satisfied in the absence of fraud or carelessness. That takes us to the second condition:

> (5) The second condition is that at the time when an officer of the Board—
> (a) ceased to be entitled to give notice of his intention to enquire into the taxpayer's return under section 8 or 8A of this Act in respect of the relevant year of assessment; or
> (b) informed the taxpayer that he had completed his enquiries into that return,
> the officer could not have been reasonably expected, on the basis of the information made available[12] to him before that time, to be aware of the

---

12 Section 29(6) TMA provides:
"For the purposes of subsection (5) above, information is made available to an officer of the Board if—
(a) it is contained in the taxpayer's return under section 8 or 8A of this Act in respect of the relevant year of assessment (the return), or in any accounts, statements or documents accompanying the return;
(b) it is contained in any claim made as regards the relevant year of assessment by

situation mentioned in subsection (1) above.

The advantage of voluntary disclosure is that HMRC cannot (after the one-year period has passed) make any further enquiries into the return. If a taxpayer wants security that the matter is closed after one year, therefore, it would be necessary to disclose relevant facts. I refer to disclosure which meets the requirements of s.29(5) as "***Veltema*-disclosure**".

Taxpayers are entitled to weigh up the advantages of *Veltema*-disclosure (curtailing the enquiry period) against the disadvantages (possible costs).

### 75.6.2 *Veltema standard of disclosure*[13]

The Enquiry Manual provides:

> **3260 Discovery in SA years - Made Available** [August 2009]
>
> ...
>
> In *Langham v Veltema* 76 TC 259, Auld LJ considered two issues relating to s 29(6).
>
> The first issue was 'whether awareness or inference of actual insufficiency is required to negative the condition, or would awareness that it was questionable do'.
>
> The second issue was 'what is the relevant information before the Inspector on the basis of which he could be said to have been reasonably expected to be aware of an insufficiency'.
>
> ***First issue***
>
> In addressing this Auld LJ concluded:

---

the taxpayer acting in the same capacity as that in which he made the return, or in any accounts, statements or documents accompanying any such claim;

(c) it is contained in any documents, accounts or particulars which, for the purposes of any enquiries into the return or any such claim by an officer of the Board, are produced or furnished by the taxpayer to the officer; or

(d) it is information the existence of which, and the relevance of which as regards the situation mentioned in subsection (1) above—

(i) could reasonably be expected to be inferred by an officer of the Board from information falling within paras (a) to (c) above; or

(ii) are notified in writing by the taxpayer to an officer of the Board."

13 See Keith Gordon, "Discovery Assessments– The Consequences of the Decision in *Corbally v Stourton*" 12 PTPR 45.

> '.. it is plain from the wording of the statutory test in s 29(5) that it is concerned ... with what he could have been reasonably expected to be aware of. It speaks of an Inspector's objective awareness, from the information made available to him by the taxpayer, of 'the situation' mentioned in s 29(1), namely an actual insufficiency in the assessment. ...
> It is a mark of the way in which the subsection provides an objective test of awareness of insufficiency, expressed as a negative condition in the form that an officer 'could not have been reasonably expected ... to be aware of the insufficiency. It also allows as s 29(6) expressly does, for constructive awareness of insufficiency, that is, for something less than an awareness of an insufficiency, in the form of an inference of insufficiency '.

***Second issue***

Auld LJ considered:

> 'It seems to me that the key to the scheme is that the Inspector is to be shut out from making a discovery assessment under the section only when the taxpayer or his representatives, in making an honest and accurate return or in responding to a Section 9A enquiry, have clearly alerted him to the insufficiency of the assessment in question.'

There is more HMRC guidance in SP 1/06. This comments on valuation and accountancy issues (not discussed here) and then provides:

***Taking a Different View***

18. It is open to a taxpayer properly informed or advised to adopt a different view of the law from that published as HMRC's view. To protect against a discovery assessment after the enquiry period, the return or accompanying documents would have to indicate that a different view had been adopted. This might be done by comments to the effect that the taxpayer has not followed HMRC guidance on the issue or that no adjustment has been made to take account of it. This would offer an opportunity to HMRC to take up the return for enquiry. It is not necessary to provide all the documentation that HMRC might need to quantify that insufficiency if an enquiry into the Return is made.

19. Provided the point at issue is clearly identified and the stance adopted is not wholly unreasonable, the existence of an under-assessment or insufficiency is demonstrated by the statement that a different view of the law has been followed. In these circumstances the taxpayer achieves finality if no enquiry is opened within the statutory time limit.

In *R v HMRC ex p Pattullo*[14] the taxpayer entered into a CGT tax avoidance scheme. In his return he put the following:

> Capital Redemption Contract
> 1. On 24 February 2004 I settled an interest in possession trust with £6,000.
> 2. The trust is called 'The Pattullo 2004 Life Interest Settlement'.
> 3. I had borrowed on commercial terms a sum of £2,665,000 from Investec Bank UK Limited and settled this amount into the trust.
> 4. The trustees 'Nexus Trustee Company Limited' used the funds to acquire a number of capital redemption contracts to me on 4 March 2004.
> 5. I surrendered the Capital redemption contracts on 8 March 2004 and received redemption proceeds of £2,600,000.
> 6. This has given rise to a capital loss as a consequence of Section 37(1) TCGA 1992 amounting to £2,665,000.

I would have thought this made it obvious to any competent inspector exactly what had happened. However the Court of Session held that this did not reach the Veltema standard. Lord Bannatyne said:

> [114] ...the white space does not contain the following:
> 1. A statement that Mr Pattullo was a participant in the CRC Mark II tax avoidance scheme.
> 2. A statement that the petitioner and his advisers had adopted a different view of the law from that published as HMRC's namely: they had taken a view in respect of the tax treatment of Capital Redemption Contracts which is the opposite of that taken by HMRC Capital Gains Tax Manual at CG69004 dated 2 September 2003 (production 7/3) is not contained within the white space.[15] ...

The judge erroneously continues:

> The necessity to make such a declaration in order to comply with the duty to clearly alert has been held to exist in *HMRC v Household Estate Agents Ltd* where it was held as follows:

14 [2009] CSOH 137. Note incidentally that the Latin tag *ex parte* which has been rejected in English law usage seems to have survived in Scotland.

15 This may be factually incorrect, the judge does not set out the relevant text of the Manual, but that does not affect the point of principle.

> "Taxpayers who adopt a different view of the law from that published as HMRC's can protect against a discovery assessment after the enquiry period. The return and accounts would have to indicate that a different view had been adopted by entering comments to the effect that they did not follow HMRC guidance on the issue or that no adjustment had been made to take account of it."

This is a reference to a paragraph in the Special Commissioners decision. The paragraph merely records a submission made by HMRC, which did not form any part of the Commissioners decision in favour of the taxpayer.[16]

> 3. There is no explanation as to how Mr Pattullo contends that Section 37 operates in order to produce the capital loss.
> 4. The details other than the basics of the transactions which have been entered into are not contained within the white space.

The judge wisely does not seek to identify what details were missing.

> 5. There is no indication of any doubt in the disclosure that the petitioner is entitled to the loss. I accept ... that the taxpayer does not require in order to clearly alert to say there is an insufficiency as of course that is not his position. However, in circumstances such as this a reference to doubt or as I have said to the fact that it is, a position contrary to HMRC's would be necessary to comply with the duty incumbent upon him.
> In the absence of information of the type as above described an inspector of the skill and knowledge as I have earlier defined it could not in my judgment have been aware of actual insufficiency. ...

The judge does not say whether it is generally necessary to indicate a doubt. It is suggested that this should not be necessary except in special cases. There must always be a doubt when there is a white box disclosure, for if there is no doubt, what is the point of disclosure?

One can, I think, expect some back-tracking, refinement or qualification from the Courts for taxpayers they regard as more meritorious than Mr. Pattullo.

---

16 78 TC 705 at [10]. For completeness, the Commissioners decision was reversed on other grounds on appeal.

### 75.6.3 *IHT: voluntary disclosure to curtail enquiry*

The IHT rules are differently worded (and much more concise) but the standard of disclosure is similar. A certificate of discharge discharges "all persons from any further claim for the tax on the value transferred by the chargeable transfer concerned". See s.239(3) IHTA. However, s.239(4) provides:

> A certificate under this section shall not discharge any person from tax in case of fraud or failure to disclose material facts. ...

## 75.7 Above-minimum disclosure for sake of good relations with HMRC

CIOT Professional Conduct in Relation to Taxation used to provide:

> *It may be in the client's best interest to furnish more information than he is strictly required to do because this is likely to lead to a more reasonable approach by the tax authorities, thereby saving money and time in the long run ...*

In the 2010/11 edition of this work I commented:

> The CIOT are tentative (note the *may*) and the validity of the point is not easy to assess: it may vary from client to client[17] and from time to time. It seems to me that the only tangible incentive for above-minimum disclosure is to curtail the enquiry period, and obtaining "a more reasonable approach by the tax authorities" is uncertain, unquantifiable, unenforceable and ultimately chimerical. But readers who deal directly with HMRC on a daily basis will be in a better position than I am to form a view on this issue, and this is (understandably) an attitude that HMRC wish to encourage.[18]

---

17 The trade-off may be different for large businesses who have a "client relationship manager", where HMRC expressly offer the carrot of "far fewer interventions" in return for behaviour which meets the HMRC low risk criteria; and, conversely, the stick of "more intensive scrutiny" for "high risk customers": see HMRC Approach to Compliance Risk Management for Large Business, March 2007, accessible *www.hmrc.gov.uk/budget2007/large-business-riskman.pdf.*

18 See comments on the "enhanced relationship" in the OECD Study into the Role of Tax Intermediaries, 2008, *www.oecd.org/dataoecd/28/34/39882938.pdf* and the OECD's "Engaging with High Net Worth Individuals on Tax Compliance" (May

The CIOT may agree, since in 2011 they watered down this passage which now reads:

> In general it is likely to be in a client's own interests to ensure that factors relevant to his tax liability are adequately disclosed to HMRC because:
> • His relationship with HMRC is more likely to be on a satisfactory footing if he can demonstrate good faith in his dealings with them ...[19]

This debate should be seen in the context of a broader fundamental controversy concerning the relationship between the Revenue and the taxpayer. The traditional view has been that:
(1) The relationship is adversarial: the interests of HMRC and taxpayer are distinct.
(2) The relationship should be characterised by adherence to legal rules (substantive tax rules determining the amount of tax due supplemented by procedural rules such as courtesy, honesty and efficiency).
A rival (and more recent[20]) view is the opposite:
(1) The relationship should be a mutual one, taxpayer and state working together in harmony towards a common goal, to ascertain the proper amount of tax.
(2) The proper amount of tax is defined only partly in legal rules but also discernable from a more insubstantial spirit of the rules.[21] (Perhaps HMRC

---

2009); *www.oecd.org/dataoecd/5/25/42798312.pdf.*

19 CIOT, *Professional Conduct in Relation to Taxation* (4 Jan 2011), para 3.10, 3.11 [2011] STI p.215, accessible *www.tax.org.uk.*

20 It is difficult to identify a specific date when this school of thought emerged, but I think it reflects a change of administration around the beginning of the second term of the Labour Government (2001). Contrast the discussion on the term "compliant" in 39.6.4 (Investment manager condition E: customary remuneration).

21 The prime example is the Code of Practice on Taxation for Banks, December 2009 which prescribes that banks should "not undertake tax planning that aims to achieve a tax result that is contrary to the intentions of Parliament; ... not engage in tax planning other than that which supports genuine commercial activity... Remuneration packages for bank employees ... should be structured so that the bank reasonably believes that the proper amounts of tax and national insurance contributions are paid... Relationships with HMRC should be transparent and constructive, based on mutual trust [adding with jarring realism: "wherever possible"]. The features of this relationship should include disclosing fully the significant uncertainties in relation to tax matters... engaging in a co-operative, supportive and professional manner in all interactions ... working collaboratively...."

consider themselves the arbiter of this spirit, or perhaps no arbiter is needed: since the point is not governed by law, the question can be fudged.)[22]

The controversy raises empirical questions of whether HMRC and taxpayers actually regard the later model as their relationship, or pretend to do so, and political and moral questions of whether they should do so, or the extent to which they should do so. These are important questions. They are not legal questions[23] and they lie beyond the scope of this book, but they will not go away. For a recent restatement of the traditional view, see the first speech of Anthony Thomas, president of the CIOT:

> We need to return to the "healthy tension" between HMRC and the tax profession that existed ten to 20 years ago: no special relationships, no cosy conferences; no favours, deals and understandings; no inside tracks and private access. ... Senior tax officials did not subject directors, businesses and the professions to the kind of lectures one would expect from a politician. The job of civil servants is, and always has been, to apply the rule of law in an even handed manner.[24]

## 75.8 Above-minimum disclosure to avoid allegation of misconduct

Disclosure may be sensible to avoid allegations of misconduct, which might later arise if the view taken turns out to be in error, and tax is due: that is, allegations of dishonesty, carelessness or absence of "reasonable excuse". Cases where disclosure is needed for this reason are rare, but examples are:

(1) Where the taxpayer has carried out a complex, artificial, and aggressive tax avoidance scheme. In such a case (even though it is reasonably considered the scheme should succeed) full disclosure of the transactions should be made so HMRC have a proper opportunity to review the matter. In practice such cases will generally be caught by the tax avoidance scheme disclosure rules so the issue of disclosure

---

22 HMRC say: "Any disagreements arising under the Code will be dealt with using existing processes." See "A Code of Practice on Taxation for Banks - Consultation Response Document" December 9, 2009.

23 HMRC rightly say (under the heading "The Rule of Law"): The Code is not law. See "A Code of Practice on Taxation for Banks - Consultation Response Document" December 9, 2009.

24 "We need Trust", Taxation (2 June 2011) p.7.

on a tax return does not arise.

(2) Where the taxpayer is taking a view which is contrary to a HMRC view which has been formally published in a SP or RI. The same applies if the HMRC view is clearly known from more informal sources, such as the HMRC Manuals, or informally published correspondence, unless the HMRC view expressed is fairly clearly wrong.

(3) Where the adviser is following a view in the profession which they themselves do not share.

That should be regarded as best practice rather than a requirement.

## 75.9 IHT reporting requirement on creation of settlement

Section 218(1) IHTA provides:

> Where any person, in the course of a trade or profession carried on by him, other than the profession of a barrister,[25] has been concerned with the making of a settlement and knows or has reason to believe—
> (a) that the settlor was domiciled in the UK, and
> (b) that the trustees of the settlement are not or will not be resident in the UK,
> he shall, within three months of the making of the settlement, make a return to the Board stating the names and addresses of the settlor and of the trustees of the settlement.

The duty of disclosure rests on a person ("the practitioner") acting in the course of their trade or profession. The duty rests on the firm or company acting and not directly on its employees.

Barristers are exempt. The reason must be that they will usually be instructed by others who are subject to the duty.

The practitioner must be concerned with the making of a settlement. This would include not only solicitors who might draft the settlement but other advisers who advise in relation to the creation of a settlement, even if the actual execution of the settlement were delegated to foreign advisers.

The practitioner might advise on the matter generally, leaving the client to take whatever action they wish in light of the advice, perhaps in

---

25 Section 272 IHTA provides: "barrister" includes a member of the Faculty of Advocates.

conjunction with the trustees; in such circumstances they are probably not "concerned with the making of a settlement"; this presupposes the settlement had been established. What if the client had decided against a non-resident settlement after all or wanted to think about it? The practitioner may not know what the client eventually decided to do. The obligation under s.218 must be restricted to those who are able to provide the relevant information.

The practitioner must know or have reason to believe that the settlor is domiciled in the UK. A settlement may have more than one settlor.[26] Suppose one settlor is domiciled in the UK but the other is not. Does the reporting requirement arise? On a literal construction one could not say "the settlor" is UK domiciled and the reporting requirement would not arise. A purposive construction suggests that the duty does arise. That is the better view at least if the foreign domiciled settlor only provides a nominal amount. A practitioner should err on the side of caution.

A question also arises about the time when the settlor's domicile is relevant. Section 218 merely says that it applies if the settlor *was* domiciled in the UK. Does this mean domiciled in the UK at the time the settlement was made? Or does it mean that the settlor had at any time been domiciled in the UK? Context and common sense dictate that the provision is referring to the domicile of the settlor at the time the settlement was made because that is the date that matters for IHT.

IHT Manual para 42993 [April 2010] correctly provides:

> **42993 Section 218 notices** [April 2010]
> ***Where settlor is a company***
> A s.218 notice is still required because s.218 refers to settlors domiciled in the UK
> - 'settlor' in relation to a settlement includes any person by whom the settlement was made (s.44 IHTA)
> - In terms of the Interpretation Act 1889 Rule 19 'the expression person shall, unless the contrary appears, include any body of persons corporate or unincorporate'[27]

26 "Settlor" for this purpose has the usual IHT meaning: see 69.1 (Who is the settlor?). The separate settlements fiction does not apply for this purpose: see 55.4 (The separate settlements fiction).

27 The text is 30 years out of date, since the reference should now be to Sch. 1 Interpretation Act 1978, but the point is still valid.

- In general a company is domiciled where it is registered – *Gasque v IRC* [1940] 2 KB 80.

So where a non-UK resident [Employee Benefit Trust] is established by a company registered in the UK a s.218 notice is mandatory.

The person must know or have reason to believe that the trustees of the settlement are not or will not be resident in the UK

In marginal cases the practitioner may be placed in difficulty. It may be necessary in some cases to disclose the creation of the settlement to HMRC out of caution.

There is no requirement under s.218 to notify the amount or nature of the settled property. However, HMRC have power in s.219 IHTA to require information to be provided by "any person" and they would know from the notification to whom further enquiries could be directed.

Sch. 5A TCGA imposes overlapping reporting requirements relating to non-resident settlements. But s.218 IHTA is wider in some respects. It applies to settlements which are not necessarily non-resident under the CGT rule.[28] Thirdly, the CGT duty is imposed on the settlor. The IHT duty is on the professional advisers.

For the position where IHT DTA relief applies see 63.9 (Claims for foreign IHT credit relief).

### 75.9.1 *Non-resident practitioner*

It is suggested that no duty will arise on foreign practitioners who have no UK connection; the usual territorial limitation must apply: see *Clark v Oceanic* 56 TC 183. At first sight the requirement that the settlor is domiciled in the UK is sufficient to meet the territorial requirement so that no further territorial limitations should be implied. But the domicile connection may be a faint one. Suppose an individual leaves the UK in 2000 and settles in the USA, and in 2003 he makes a settlement. The individual may still be deemed domiciled in the UK, but it is not realistic to expect the US practitioner to file a s.218 return (particularly having regard to the fact that the USA IHT DTA provides some IHT exemption).

---

28 For IHT Trust residence, see 4.14 (Trustee residence for IHT). This is quite different from the IT/CGT definition.

### 75.9.2 *Penalty for failure to disclose*

Failure to make the return gives rise only to a nominal penalty.[29] More seriously, the practitioner faces criminal liability for fraud on HMRC or conspiracy to defraud if:

(1) the practitioner dishonestly fails to disclose in breach of the duty to do so; or
(2) any person dishonestly agreed with another practitioner or a client that there shall be no disclosure in breach of the duty to do so.

### 75.9.3 *The future*

A consultation paper was published 9 December 2009.[30] I predict substantially increased penalties for HMRC's customers and their advisors will arrive in due course.

## 75.10 Reporting on death of foreign domiciled individual

I consider here the reporting duty of personal representatives on the death of an individual not domiciled in the UK. The legislation draws a distinction between:

(1) "**excepted estates**"; and
(2) "**ordinary estates**"; I use this term to describe an estate which is not an "excepted estate".

For the position where IHT DTA relief applies see 63.9 (Claims for foreign IHT credit relief).

### 75.10.1 *Ordinary estates*

Section 216(1) IHTA provides (so far as relevant):

> Except as otherwise provided by this section or by regulations under section 256 below, the personal representatives of a deceased person ... shall deliver to the Board an account specifying to the best of his knowledge and belief all appropriate property...and the value of that property.

29 Section 245A(1) IHTA 1984.
30 "Modernising Powers, Deterrents and Safeguards: Tackling Offshore Tax Evasion".

"Appropriate property" is defined in s.216(3) IHTA which provides (so far as relevant):

> Subject to subsections (3A) and (3B) below,[31] where an account is to be delivered by personal representatives ... the appropriate property is—
> (a) [i] all property which formed part of the deceased's estate immediately before his death
> [ii] (or would do apart from s.151A(3)(b) or 151C(3)(b) above),
> [iii] other than property which would not, apart from section 102(3) of the Finance Act 1986, form part of his estate; and
> (b) all property to which was attributable the value transferred by any chargeable transfers made by the deceased within seven years of his death.

Excluded property does not form part of a person's estate immediate before death, so there is no statutory duty to disclose details of excluded property in a person's estate on death. Nevertheless Question 22 of HMRC form IHT 401 asks:

> Did the deceased leave any assets outside the UK? If yes give approximate value.

There is no legal duty to supply this information.[32] But refusal to answer the question may give rise to further enquiries.

There is no statutory duty to disclose details of gifts of excluded property which the deceased made before death. (The gifts do not fall within s. 216(3)(b) IHTA since a gift of excluded property is not a transfer of value.) However the IHT Account (form IHT 400 April 2010) Question 30 provides:

> **Gifts and other Transfers of Value:** Did the deceased make any lifetime gifts or other transfers of value on or after 18 March 1986?

---

31 Subsections (3A) and (3B) are not relevant here.

32 HMRC form D2 (Notes, 12/05) tacitly recognised this:

"*If the deceased was domiciled outside the UK when they died, any assets they owned abroad will not be liable to inheritance tax. Even so, you can help us to deal with this estate more quickly if you can give us a rough idea of the value of all of the deceased's estate outside the UK.*"

I have not found a similar comment in the current forms which were revised in 2008.

It is considered that the reference in the question to "gifts" means gifts which are transfers of value so that it is proper to answer "no" even if the deceased made gifts of excluded property. The guidance in IHT 400 Notes (April 2010) shows that the question is not read literally:

> **Gifts and other transfers of value**
> You can enter 'No' and do not need to provide any details if the only gifts made by the deceased were:
> - to their husband, wife or civil partner and spouse or civil partner exemption applies
> - outright gifts to any individual which do not exceed £250 in any one year. (These will be covered by the small gifts exemption.)
> - outright gifts to any individual of money or listed stocks and shares that are wholly covered by the annual exemption
> - outright gifts made regularly from income that did not exceed £3,000 in total each year.
>
> These exemptions are detailed on page 72 of this guide. If the deceased had made any other gifts or 'transfers of value' since 18 March 1986, including transfers into trust, payment of insurance premiums for the benefit of another person, advances out of a trust fund or any assets that were taken out of a trust before death, you must fill in Schedule IHT403 *Gifts and other transfers of value*. In general, a 'transfer of value' is any transaction where the deceased did not receive full value in exchange.

Question 45 IHT 400 provides:

> **Assets held in trust**: Did the deceased have any right to benefit from any assets held in trust (including the right to receive assets held in a trust at some future date)? No/Yes – Use Schedule IHT418.

The word "right" only includes fixed interests, it is not apt to describe discretionary trusts. But it appears that "right to benefit" here is used (confusingly) to mean a right to an estate interest in possession. IHT 400 Notes (April 2010) provides:

> ***Schedule IHT418 Assets held in trust***
> You must complete Schedule IHT418 if the deceased had an interest in possession and the trust is one of the following.
> - A trust that was set up before 22 March 2006 from which the deceased was entitled to benefit.

- An immediate post-death interest.
- A disabled person's interest.
- A transitional serial interest.

This would include an excluded property trust where the deceased had an estate interest in possession. In such a case the answer to Question 45 is, "yes". However only limited information needs to be disclosed in form IHT 418. IHT 400 Notes (April 2010) provides:

> **Foreign trusts** If the deceased had a right to benefit from settled property where the assets are overseas and the person who set up the trust was domiciled outside the UK when the trust was created, please answer questions 2 to 5 only.

75.10.2 *Excepted estates*

The IHT (Delivery of Accounts) (Excepted Estates) Regulations 2004 provides different rules for so-called "excepted estates". Regulation 4(1) provides:

> An excepted estate means the estate of a person immediately before his death in the circumstances prescribed by paras (2), (3) or (5).

Thus there are three categories of excepted estate. The first two apply to a person who dies domiciled in the UK.[33] The third applies where:

> (a) the person died on or after 6 April 2004;
> (b) that person was never domiciled in the UK or treated as domiciled in the UK by section 267 [IHTA];
> (ba) that person was not a person by reason of whose death one of the

33 It is doubtful whether a person who is deemed domiciled qualifies under these categories. Reg. 4(5)(b) distinguishes between someone domiciled and someone treated as domiciled in the UK. However, it would be absurd if the estate of a deemed UK domiciliary can never be an excepted estate so it is suggested that the reference to "domiciled in the UK" includes someone deemed domiciled for IHT purposes. But HMRC may disagree. IHT Manual 6020 states that a deemed domiciliary's estate cannot qualify as an excepted estate regardless of the value. The Manual is out of date (as it often is) and is here considering the 2002 Regulations, but the point is the same.

alternatively secured pension fund provisions[34] applies; and

(c) the value of that person's estate situated in the UK is wholly attributable to cash[35] or quoted shares or securities passing under his will or intestacy or by survivorship in a beneficial joint tenancy or, in Scotland, by survivorship in a special destination, the gross value of which does not exceed £150,000.[36]

However, while a so-called excepted estate is not required to put in an account *under s.216 IHTA* it is required to deliver more or less the same information set out in reg.6(2):

> The information specified for the purpose of para (1) is—
> (a) the following details in relation to the deceased—
> (i) full name;
> (ii) date of death;
> (iii) marital or civil partnership status;
> (iv) occupation;
> (v) any surviving spouse or civil partner, parent, brother or sister;
> (vi) the number of surviving children, step-children, adopted children or grandchildren;
> (vii) national insurance number, tax district and tax reference;
> (viii) if the deceased was not domiciled in the UK at his date of death, his domicile and address;
> (b) details of all property to which the deceased was beneficially entitled and the value of that property;
> (c) details of any specified transfers, specified exempt transfers and the value of those transfers;
> (d) the liabilities of the estate; and
> (e) any spouse, civil partner or charity transfers and the value of those transfers.

34 Reg 4(9) provides:
"In this regulation 'the alternatively secured pension fund provisions' means the following sections of the 1984 Act—
(a) section 151A (person dying with alternatively secured pension fund);
(b) section 151B (relevant dependant with pension fund inherited from member over 75); and
(c) section 151C (dependant dying with other pension fund)."

35 IHT Manual 6018 shows that HMRC sensibly construe "cash" widely, so as to include a bank account.

36 See reg.4(5).

It is considered that there is no obligation to give information about excluded property. This is a purposive construction, because, strictly, excluded property is "property to which the deceased was beneficially entitled" even though it does not form part of their estate for IHT purposes immediately before their death. However, it is absurd to say that there is an obligation on excepted estates to disclose excluded property, when there is no such obligation on ordinary estates. In practice the relevant form (IHT 207) does not ask about non-UK property.

### 75.10.3 *Territorial limitations*

The statutory provisions (as recast in 2004) utterly fail to provide any territorial limitation on the duty to disclose. They merely provide two regimes of disclosure, one for ordinary estates and one for excepted estates. The Courts must devise some territorial limitation, as they have on occasion done elsewhere: *Clark v Oceanic* 56 TC 183. The question is, what should it be? It is suggested that no duty applies to foreign personal representatives of excepted estates. But disclosure in one form or another will be required in all cases where the personal representatives need a UK grant of probate.

### 75.10.4 *Commentary*

The 2004 Regulations impose a significant burden on (primarily) small estates which would not formerly have had to provide these details. Whether this is a necessary burden is a matter on which views may differ. However, the chutzpah in the explanatory notes still deserves to be recorded:

> 7. **Impact**
> 7.1 These Regulations do not impose new costs on business or charities.

### 75.10.5 *Conclusion*

Disclosure is required for an excepted estate even though no tax is payable on the death (eg because the property falls within the nil rate band). How well observed this requirement is in practice is another matter. However, if a foreign domiciled individual wishes to ensure that their personal representatives are under no duty to put in UK returns on their death, they must not have any UK situate property at the time of their death and should appoint foreign executors. Then there is no duty to disclose the assets of the estate.

## 75.11 Proceeds of Crime Act 2002 and disclosure of tax avoidance schemes

These topics require books to themselves and are outside the scope of this book.

APPENDIX ONE

# SOME COMMON STATUTORY TERMS

## App. 1 Introduction

This appendix considers some ubiquitous statutory terms: United Kingdom, Spouse and Civil Partner.

## App. 1.1 "United Kingdom" and related expressions

### App. 1.1.1 *"United Kingdom"*

Interpretation Act 1978 Sch 1 provides that "United Kingdom" means Great Britain and Northern Ireland.

The Isle of Man and the Channel Islands do not form part of the UK.

### App. 1.1.2 *"Great Britain"*

"Great Britain" means England, Wales and Scotland: s.1 Union with Scotland Act 1706 provides:

> That the two Kingdoms of England and Scotland shall upon the First day of May which shall be in the year One thousand seven hundred and seven and forever after be united into one Kingdom by the name of Great Britain …

### App. 1.1.3 *"England"*

The definition of "England" is not usually an issue for tax. However, for completeness, para 5(a) Sch 2 Interpretation Act 1978 provides:

> in any Act passed before 1st April 1974, a reference to England includes

> Berwick upon Tweed and Monmouthshire and, in the case of an Act passed before the Welsh Language Act 1967, Wales.

### App. 1.1.4 *Territorial sea*

"Territorial sea" extends 12 nautical miles from shore, further defined in the United Nations Convention on the Law of the Sea.

Section 1013 ITA provides:

> The territorial sea of the UK is treated for the purposes of the Income Tax Acts as part of the UK.

Section 276 TCGA and s.830 ICTA make the same point for CGT and corporation tax. Section 172 SSCBA makes the same point for NIC.

There is no equivalent provision in the IHT legislation so the territorial sea is not part of the UK for IHT purposes (though this will not often be important).

## App. 1.2 Meaning of "spouse"

The word "spouse" is used frequently in tax legislation so its meaning is important. The IHT Manual provides:

> **11032 Spouse or civil partner exemption: definition of spouse and civil partner** [February 2006]
> The IHT legislation does not define "spouse" or "civil partner" so the general law applies. Consequently, the exemption applies to transfers between persons who are lawfully married to each other at the time of the transfer and to transfers between persons who are registered as civil partners of each other at the time of the transfer.
> Spouses include
> - persons who are validly married but separated
> - parties to a valid polygamous marriage.[1] The marriage confers the s.18 IHTA exemption on all the spouses' benefits which qualify under

1 See CG Manual:
> **22070 Definitions** [March 2006]
> A polygamous marriage may be recognised as valid in UK law if it was valid in the country in which the ceremony occurred and, broadly, it was contracted by persons domiciled in that country.

IHTA84/S18. Where the IHTA84/S18 (2) limit applies because of the spouses' foreign domicile (IHTM11033), the total exemption (including any similar lifetime exemptions) may not exceed the IHTA84/S18 (2) limit.

The following are not spouses

- persons who are living together but not lawfully married, however long the relationship may have lasted (England, Wales and Northern Ireland)
- In Scotland the only form of irregular marriage now recognised by Scots law is that by cohabitation with habit and repute. Basically this arises where a man and woman cohabit together at bed and board as husband and wife and behave towards each other as such for a considerable length of time so as to produce a general belief in the society and neighbourhood in which they live, and among their friends and relatives that they are married. They are then presumed to be so in fact although it is impossible to state with any precision a place and a time when they exchanged the consent which is essential for marriage. If it is claimed that this common law style of marriage entitles the parties to the exemption under IHTA84/S.18(1) in either a death or lifetime situation you should refer the file to TG (IHTM1081).[2]
  **(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**
- parties to a bigamous marriage
- persons who were formerly lawfully married but divorced before the date of death/transfer

The argument that discrimination between married and unmarried couples is in breach of Art. 14 ECHR (Prohibition of discrimination) has failed, though only narrowly.[3]

## App. 1.3 Meaning of "civil partner"

Schedule 1 Interpretation Act 1978 provides:

---

2 [Author's Note] Marriage by cohabitation with habit and repute was abolished by the Family Law (Scotland) Act 2005, but it remains for couples whose cohabitation began before commencement.

3 *Holland v IRC* [2003] STC (SCD) 43; *Burden v UK* [2007] STC 252.

> "Civil partnership" means a civil partnership which exists under or by virtue of the Civil Partnership Act 2004 (and any reference to a civil partner is to be read accordingly).

This takes us to s.1(1) Civil Partnership Act 2004 which provides:

> A civil partnership is a relationship between two people of the same sex ("civil partners")—
> (a) which is formed when they register as civil partners of each other—
> (i) in England or Wales (under Part 2),
> (ii) in Scotland (under Part 3),
> (iii) in Northern Ireland (under Part 4), or
> (iv) outside the United Kingdom under an Order in Council made under Chapter 1 of Part 5 (registration at British consulates etc. or by armed forces personnel), or
> (b) which they are treated under Chapter 2 of Part 5 as having formed (at the time determined under that Chapter) by virtue of having registered an overseas relationship. ...

Thus there are two types of civil partnership: those made under UK law, and overseas relationships.

App. 1.3.1 *Overseas relationships treated as civil partnerships*

Section 212(1) CPA 2004 provides:

> For the purposes of this Act an overseas relationship is a relationship which—
> (a) is either
> [i] a specified relationship or
> [ii] a relationship which meets the general conditions, and
> (b) is registered (whether before or after the passing of this Act) with a responsible authority in a country or territory outside the United Kingdom ...

Thus there are two types of overseas relationships: specified ones, or those not specified which meet the general conditions.

Section 213 and schedule 20 CPA 2004 defines "specified relationships":

| Country or territory | Description |
|---|---|
| Andorra | unió estable de parella |
| Australia: Tasmania | significant relationship |
| Belgium | cohabitation légale, wettelijke samenwoning or gesetzliches zusammenwohnen" |
| Belgium | marriage |
| Canada | marriage |
| Canada: Nova Scotia | domestic partnership |
| Canada: Quebec | union civile or as civil union |
| Denmark | registreret partnerskab |
| Finland | rekisteröity parisuhde or as registrerad partnerskap |
| France | pacte civile de solidarité |
| Germany | Lebenspartnerschaft |
| Iceland | staðfesta samvist |
| Luxembourg | partenariat enregistré or eingetragene partnerschaft |
| Netherlands | geregistreerde partnerschap |
| Netherlands | marriage |
| New Zealand | civil union |
| Norway | registrert partnerskap |
| Spain | marriage |
| Sweden | registrerat partnerskap |
| USA: California | domestic partnership |
| USA: Connecticut | civil union |
| USA: Maine | domestic partnership |
| USA: Massachusetts | marriage |
| USA: New Jersey | domestic partnership |
| USA: Vermont | civil union |

Section 214 CPA 2004 explains the "general conditions":

> The general conditions are that, under the relevant law—
> (a) the relationship may not be entered into if either of the parties is already a party to a relationship of that kind or lawfully married,
> (b) the relationship is of indeterminate duration, and
> (c) the effect of entering into it is that the parties are—
> (i) treated as a couple either generally or for specified purposes, or
> (ii) treated as married.

I understand this includes:

- USA: Hawaii
- Switzerland: Cantons of Genève and Zurich.

I would be interested if a reader could identify a website which provides up to date lists of the general conditions.

### App. 1.3.2 *Pre-2000 civil partnerships under foreign law: transitional rules*

Section 215 CPA 2004 provides:

> **215 Overseas relationships treated as civil partnerships: the general rule**
>
> (1) Two people are to be treated as having formed a civil partnership as a result of having registered an overseas relationship if, under the relevant law, they—
>
> (a) had capacity to enter into the relationship, and
>
> (b) met all requirements necessary to ensure the formal validity of the relationship.
>
> (2) Subject to subsection (3), the time when they are to be treated as having formed the civil partnership is the time when the overseas relationship is registered (under the relevant law) as having been entered into.
>
> (3) If the overseas relationship is registered (under the relevant law) as having been entered into before this section comes into force, the time when they are to be treated as having formed a civil partnership is the time when this section comes into force.

Civil partners with existing overseas relationships became civil partners in England law without doing anything more.

For most tax purposes, the position of civil partners is the same as spouses. It is clumsy to say "spouse or civil partner", or "marriage or civil partnership". So in this book (unless otherwise indicated) the word "spouse" includes civil partners; the word "marriage" includes civil partnerships; and widow/er includes a surviving civil partner.

In strict language (and in contexts other than tax, strict language may be the norm) these terms are not so widely construed, and "spouse" will not include civil partner, etc.

APPENDIX TWO

# MEMBERS OF PARLIAMENT

## App. 2.1 Residence & domicile of MPs and members of House of Lords

Section 41 Constitutional Reform and Governance Act 2010 provides special rules for MPs and members of the House of Lords ("MLs"):

> (1) Subsection (2) applies if a person is for any part of a tax year[1]—
> (a) a member of the House of Commons, or
> (b) a member of the House of Lords.[2]
> (2) The person is to be treated for the purposes of the taxes listed in subsection (3) as resident, ordinarily resident and domiciled in the UK for the whole of that tax year.
> (3) The taxes are—
> (a) income tax,
> (b) capital gains tax, and
> (c) inheritance tax.

In practise this means MPs and MLs are deemed UK resident and

---

1 IHT does not use the concept of tax years, so s.41(9) CRGA 2010 provides:
"In this section, in relation to inheritance tax—
(a) 'tax year' means a year beginning on 6 April and ending on the following 5 April, and
(b) 'the tax year 2010-11' means the tax year beginning on 6 April 2010."

2 Section 41(5)(10) CRGA 2010 defines ML:
For the purposes of this section and section 42 a person is a member of the House of Lords if the person is entitled to receive writs of summons to attend that House....
(10) In determining for the purposes of this section and section 42 whether a person is entitled to receive writs of summons to attend the House of Lords, ignore—
(a) section 2 of the Forfeiture Act 1870;
(b) sections 426A and 427 of the Insolvency Act 1986.

domiciled for almost all tax purposes, though minor taxes such as NICs slip through the net. EN CRGA provides:

> 269. The section provides that MPs and peers are deemed ROD [resident ordinarily resident and domiciled] for the whole of each tax year in which they are a member of either House (including those tax years in which they are a member for only part of the year). This means that they will be deemed ROD from the start of the tax year in which they become a member of that House and to the end of the tax year in which they cease to be a member.

DT relief may apply where a treaty has a suitable tie-breaker.

Section 41(4) CRGA 2010 defines when a person becomes or ceases to be a MP or a ML:

> For the purposes of this section a person—
> (a) becomes a member of the House of Commons when (having been elected to that House) the person makes and subscribes the oath required by the Parliamentary Oaths Act 1866 (or the corresponding affirmation), and
> (b) ceases to be a member of that House when—
> (i) the Parliament to which the person was elected is dissolved, or
> (ii) the person's seat is otherwise vacated.

Since a person will know the exact date when they become an MP or ML, they will have an opportunity for pre-appointment planning. Note that when a person ceases to be a ML or MP, they will continue to be deemed IHT domiciled for another three or four years. Sinn Fein MPs do not take their seats at Westminster so happily escape deemed UK residence and domicile.

Section 41(6) CRGA 2010 excludes judges[3] and bishops (the section is after all only a *political* exercise). This level of micro-detail cannot sensibly be covered even in this book which seeks to be comprehensive: it would be surprising if there are more than one or two individuals concerned (if indeed there are any at all).

3 This makes sense, as a ML who holds a disqualifying judicial office is disqualified from sitting or voting in the House of Lords: s.137(7) Constitutional Reform Act 2005.

## App. 2.2 Members of the European Parliament

The rules do not apply to MEPs. EN CRGA 2010 para 275 discusses the position of a MEP who is also a member of the House of Lords but as far as I am aware no-one falls in this category.

## App. 2.3 Commentary

The Financial Secretary to the Treasury (Stephen Timms) said:

> This is how the vast majority of the UK population is taxed, so it seems right to me ... that MPs and Members of the House of Lords should be taxed on that basis and should not have access to the remittance basis. It is helpful that there is now clear, albeit rather belated, cross-party support for action, following the Conservative's change of position to supporting the principle that MPs and Members of the House of Lords should be required to pay tax in full on their overseas income, gains and assets.[4]

A great deal more could be said about the policy issues relating to these provisions. They were not debated in Parliament: the clauses were a late amendment to the CRGA, which was enacted in a breathless ping pong procedure just before the dissolution of Parliament. But the context of the rules is wholly political - the scrabble for public approval and to knock the opposition - so it would be unrealistic to expect cool and considered reflection. The debate is long-standing.[5]

---

4 Hansard, 5 Jan 2010, Column 52WH.

5 There was a comparable debate in relation to Lord Vestey who (though resident and domiciled when ennobled) had shortly before been a tax exile: see the TFD archive on *www.kessler.co.uk*.

APPENDIX THREE

# VISITING FORCES

## App. 3.1 The treaty background

The taxation of visiting forces is based on article X of the Agreement Between the Parties to the North Atlantic Treaty Regarding the Status of Their Forces dated 19 June 1951. This provides:

> 1. [a] Where the legal incidence of any form of taxation in the receiving State depends upon residence or domicile, periods during which a member of a force or civilian component is in the territory of that State by reason solely of his being a member of such force or civilian component shall not be considered as periods of residence therein, or as creating a change of residence or domicile, for the purposes of such taxation.

A period of residence would not normally create a change of domicile (except for IHT deemed domicile) but the drafter also had in mind civil law conceptions of domicile which is a concept more like habitual residence. The article continues:

> [b] Members of a force or civilian component shall be exempt from taxation in the receiving State on the salary and emoluments paid to them as such members by the sending State or on any tangible movable property the presence of which in the receiving State is due solely to their temporary presence there.
> 2. Nothing in this Article shall prevent taxation of a member of a force or civilian component with respect to any profitable enterprise, other than his employment as such member, in which he may engage in the receiving State, and, except as regards his salary and emoluments and the tangible movable property referred to in paragraph I, nothing in this Article shall prevent taxation to which, even if regarded as having his residence or domicile outside the territory of the receiving State, such a

member is liable under the law of that State.
3. Nothing in this Article shall apply to 'duty' as defined in paragraph 12 of Article XI [customs duties and other taxes payable on importation or exportation].
4. For the purposes of this Article the term 'member of a force' shall not include any person who is a national of the receiving State.

## App. 3.2 Residence for IT and CGT

Section 833 ITA provides:

(1) This section applies to an individual who—
(a) is a member of a visiting force of a designated country or of a civilian component of such a force,
(b) is in the UK, but only because of being a member of the force or the civilian component, and
(c) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.
(2) For the purposes of subsection (1)—
(a) members of the armed forces of a designated country who are attached to a designated allied headquarters[1] are treated as a visiting force of that country, and
(b) whether an individual is a member of a civilian component of such a force is to be determined accordingly.
(3) This section also applies to an individual who—
(a) is of a category for the time being agreed between Her Majesty's Government in the UK and the other members of the North Atlantic Council,
(b) is employed by a designated allied headquarters,
(c) is in the UK, but only because of being employed by the designated allied headquarters, and
(d) is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen....
(6) Subsections (1) to (3) are to be interpreted as if—
(a) they were in Part 1 of the Visiting Forces Act 1952, and

---

1 Defined in subsection (7):
" In this section—
"allied headquarters" means an international military headquarters established under the North Atlantic Treaty, and
"designated" means designated for the purpose in question by or under an Order in Council made for giving effect to an international agreement."

(b) references in that Act to a country to which a provision of that Act applies were references to a designated country.

I refer to a person within (1) as visiting forces. Section 833 continues:

> (4) If this section applies to an individual throughout a period, the period is not treated for income tax purposes as—
> (a) a period of residence in the UK, or
> (b) creating a change of the individual's residence or domicile.

Section 833(5) ITA contains an exception:

> Subsection (4) does not affect the operation of section 56 or 460 of this Act (residence etc of claimants) in relation to an individual for any tax year.

EN ITA explains:

> 2498. Subsection (5) ensures that an individual to whom this section applies has the benefit of the personal reliefs to which the individual would be entitled if resident in the UK. Such reliefs will, accordingly, be available in calculating the individual's liability to UK income tax on such income as, for example, UK bank interest, dividends from UK resident companies and UK-based earnings which are not exempt under section 303 of ITEPA.

Section 11(1) TCGA extends the rule to CGT:

> If section 833 of ITA 2007 (visiting forces and staff of designated allied headquarters) applies to an individual throughout a period, the period is not treated for capital gains tax purposes as—
> (a) a period of residence in the UK, or
> (b) creating a change of the individual's residence or domicile.

HMRC TDSI Guidance Notes provide:

> **4.47 Visiting armed forces**
> Members of visiting armed forces are treated as NOR ... but the residence status of their spouses is determined according to the normal rules.
> A person is a member of a visiting force if he or she is a member of the armed forces of Belgium, Greece, Norway, Germany, France, Canada, Italy, Portugal, Netherlands, United States, Denmark, Luxembourg, Turkey, and is based in the

UK, or attached to:

Allied Command Atlantic Headquarters; Channel Command; The Channel Committee; Eastern Atlantic Area Command; Supreme Headquarters Allied Forces Europe; North Atlantic Treaty Organisation.

**4.48 Civilian component of visiting armed forces**

Members of the civilian components of visiting forces are treated as NOR if they have come to the UK solely because they are a member of such a force. A person is a member of a civilian component of a visiting force if his or her passport contains

- an uncancelled entry made by or on behalf of the sending country stating that the bearer is a member of a civilian component of a visiting force of that country, and
- an uncancelled recognition stamp of the UK Home Office.

Employees of foreign contractors hired in the UK are not members of the civilian component of a visiting force. Their residence status is determined according to the normal rules ....

## App. 3.3 Employment income

Section 303 ITEPA provides:

(1) No liability to income tax arises in respect of earnings if—

(a) they are paid by the government of a designated country to a member of a visiting force of that country or of a civilian component of such a force, and

(b) that person is not a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen.

(2) [*This is a definition provision identical to s.833(2) set out above]*

(3) No liability to income tax arises in respect of earnings if they are paid by a designated allied headquarters to an employee of a category for the time being agreed between Her Majesty's government in the UK and the other members of the North Atlantic Council.

(4) But where the employee is a British citizen, a British overseas territories citizen, a British National (Overseas) or a British Overseas citizen, subsection (3) only applies if it is necessary for it to do so to give effect to an agreement between parties to the North Atlantic Treaty.

(5) & (6) [*These are definition provisions identical to s.833(6)(7) set out above]*.

## App. 3.4 Excluded property

Section 155(1) IHTA provides

> Section 6(4) above applies to—
> (a) the emoluments paid by the Government of any designated country to a member of a visiting force of that country, not being a British citizen, a British Dependent Territories citizen, a British National (Overseas) or a British Overseas citizen, and
> (b) any tangible movable property the presence of which in the UK is due solely to the presence in the UK of such a person while serving as a member of the force.

This takes us to s.6(4) which provides:

> Property to which this subsection applies by virtue of section 155(1) below is excluded property.

In short, emoluments and tangible movable property of visiting forces qualify as excluded property for IHT purposes.

## App. 3.5 Deemed domicile

Section 155(2) IHTA provides

> A period during which any such member of a visiting force as is referred to in subsection (1) above is in the UK by reason solely of his being such a member shall not be treated for the purposes of this Act as a period of residence in the UK or as creating a change of his residence or domicile.

Thus (in short) visiting forces do not become deemed domiciled even if they reside 17 or more years in the UK (but in practice I expect that hardly ever happens). It is considered that the relief does not apply to members of visiting forces who are British citizens (etc) even though on a literal reading one might say that such persons are "referred to" in s.155(1).

APPENDIX FOUR

# STUDENTS

## 4.1 Introduction

In general a student is taxed in the same way as any other individual. There is a special rule for ordinary residence; see 3.39 (Students).

## 4.2 DT relief

Article 20 OECD Model Convention provides:

> Payments which a student or business apprentice who is or was immediately[1] before visiting a Contracting State a resident of the other Contracting State and who is present in the first-mentioned State solely for the purpose of his education or training receives for the purpose of his maintenance, education or training shall not be taxed in that State, provided that such payments arise from sources outside that State.

The OECD commentary provides:

> 3. The Article covers only payments received for the purpose of the recipient's maintenance, education or training. It does not, therefore, apply to a payment, or any part thereof, that is remuneration for services rendered by the recipient and which is covered by Article 15 (or by Article 7 in the case of independent services). Where the recipient's training involves work experience, however, there is a need to distinguish between a payment for services and a payment for the recipient's

---

1 The OECD commentary provides: "2. The word "immediately" was inserted in the 1977 Model Convention in order to make clear that the Article does not cover a person who has once been a resident of a Contracting State but has subsequently moved his residence to a third State before visiting the other Contracting State."

maintenance, education or training. The fact that the amount paid is similar to that paid to persons who provide similar services and are not students or business apprentices would generally indicate that the payment is a remuneration for services. Also, payments for maintenance, education or training should not exceed the level of expenses that are likely to be incurred to ensure the recipient's maintenance, education or training.

4 For the purpose of the Article, payments that are made by or on behalf of a resident of a Contracting State or that are borne by a permanent establishment which a person has in that State are not considered to arise from sources outside that State.

DTR manual provides:

**1930 Visiting students and apprentices**

Most double taxation agreements provide that students and business apprentices who visit the UK solely for the purpose of their education or training and who, immediately before coming here, were residents of the other country shall be exempt from UK tax on payments which they receive from outside the UK for their maintenance, education or training. Some agreements also provide that certain remuneration which a student or business apprentice receives from employment in this country shall be exempt from UK tax. Various limitations are imposed in particular agreements, often relating to monetary limits, the student's need to supplement grant income, or the type of employment. In every case when an agreement provides an exemption of this type, details of any limitations are given in Part IV of this volume.

Claims for exemption under a students'Article are dealt with in the District which, but for the agreement, would have dealt with any tax on such payments or remuneration. In examining claims, refer to the relevant double taxation agreement to ensure that the conditions for exemption are fulfilled. The following notes give some guidance on matters to be taken into account in considering whether exemption is due

(a) The exemption does not extend to income or capital gains derived by a student or business apprentice from his own investments or from trust income to which he is absolutely entitled.
(b) Whether payments or remuneration are for the student's etc. maintenance, education or training, or for supplementing his resources, or are reasonably necessary, is a question of fact and the onus is on the claimant to provide the evidence. The figures quoted in Statement of Practice SP4/86 (see SE1314) can be used as a guide. Where the payments or remuneration seem to be unreasonably high,

refer the case to Personal Tax Division (Schedule E), Sapphire House, Solihull.

(c) If the payments or remuneration exceed the amount needed for the student's etc. maintenance, education or training, the whole amount is taxable and not merely the excess.

(d) Where the Article provides that remuneration is to be exempted up to a certain monetary limit and the student or business apprentice is resident in the UK under UK domestic law, that amount is additional to the personal allowances available under UK law. For example, if the monetary limit in the agreement is 1,000 and the claimant is entitled to a personal allowance in the relevant year of 3,445, earnings of 4,445 or less will be exempt.
