# To my Jane

*O, know, sweet love, I always write of you,*
*And you and love are still my argument;*
*So all my best is dressing old words new,*
*Spending again what is already spent:*
*For as the sun is daily new and old,*
*So is my love still telling what is told.*

# INTRODUCTION AND WHAT'S NEW

*Scope of this book*

There are three themes to this book:
(1) Taxation of foreign domiciliaries
(2) Taxation of non-residents on UK assets; and
(3) Taxation of UK residents on foreign assets.
To attempt to cover all these topics is ambitious, and this book is in danger of bursting, particularly because often foreign aspects can only sensibly be discussed in a wider context. But one cannot address the first topic without the second and third: in taxation, as in life, everything is connected to everything else. I hope as a result that the book will help with all offshore aspect of UK tax issues.

Thus what started as a book on foreign domiciliaries has become a book on offshore taxation. I have revised the title accordingly.

*The year 2010/11 in review*

It is only a year since the last edition but the pace of tax reform is frenetic.

HMRC have issued a new version of HMRC6 (residence) and guidance on trustee residence (25 pages). They have ceased to give rulings on domicile. Their new statement on interaction of GWR and excluded property settlements vindicates the views expressed in the earlier editions of this book.

The most important development of the year, as far as this work is concerned, is the European Commission action requiring the UK to amend the transfer of asset rules and s.13 TCGA to make them EU law compliant. Reform is inevitable though it is not likely to come any time soon.

Another positive development is the author's success in establishing the principle that HMRC skeleton arguments should be disclosed on request.[1] Justice should be seen to be done by exposing the arguments to public scrutiny. This should also lead to greater understanding of HMRC's position and consistency of practice.

*The state of UK tax legislation*

The chancellor stated in the Budget speech 2011 "our tax code has become so complex that it recently overtook India to become the longest in the world.."[2] Since then Parliament has added an additional 400 pages in the FA 2011.. Set against that, the Office of Tax Simplification has achieved little, and as matters stand it is unrealistic to hope for much.[3]

These have been bad times for tax policy. The CIOT expresses itself strongly: "the way tax law is developed and effected in the UK is deeply flawed."[4] Two recent publications shed a good deal of light on what has gone wrong with tax legislation in recent years. Firstly, Demos:

> The centralisation of [tax policy-making power] is a particular problem because of the lack of institutional accountability of the Treasury on taxation policy and the lack of accountability of chancellors themselves in matters of taxation. ... The concept of checks and balances in tax policy is nonexistent.
>
> ... the current relationship between the Treasury and HMRC was 'very dysfunctional', had 'almost gone as wrong as it could have gone'...
>
> At the moment, pursuing a career only in tax policy is not valued within the Treasury hierarchy. Officials pass through the tax teams rather than making tax policy a career choice. ... High turnover results in a lack of experience in the tax section and little institutional memory...
>
> ... There are traditional areas that are ring-fenced as not for consultation,

1 *R v HMRC ex p. Kessler* (unreported); see*/www.kessler.co.uk/FoI.*

2 The comment is probably based on CIOT, "The Making of Tax Law" (June 2010) para 3.3, *www.tax.org.uk/attach.pl/9328/10960/CIOT_tax_law_Jun10.pdf*. It is hard to empirically assess a claim that the UK has the longest tax code in the world, but there seem to be no other serious contenders for that title.

3 "[The OTS] cannot be an effective solution to the problem of over-complication without the Treasury allowing it a far more fundamental role." Ussher and Walford, *National Treasure* (Demos, 2011) accessible *www.demos.co.uk/files/National_treasure_-_web.pdf?1299511925*.

4 Letter from CIOT to George Osborne, 19 May 2010 *www.tax.org.uk/showarticle.pl?id=9279*

> including tax rates and anti-avoidance measures. ...
> ... 'at the moment [anti-avoidance] works like a drive-by shooting. You might hit your objective but you also hit a lot of other people.'
> At present, policies are frequently changed without understanding the impact the policy has initially had in practice.[5]

Along with a decision not to consult is a government policy which is not so much deaf to the views of the tax profession as vociferous in their rejection. The Director of the HMRC Tax Avoidance Group 2004-2009 records:

> ... I was never happier than when a new tax avoidance initiative was greeted with howls of protest from the tax avoidance quarter.[6]

This confirms what anyone could have inferred from a variety of provisions, that preventing avoidance - a term which HMRC do not construe narrowly or technically - has been a priority that trumps all other policy considerations such as certainty, workability and the rule of law; and listening to the tax avoidance quarter - a term which includes STEP, the CIOT, and any practitioner who said what HMRC did not want to hear - has been ruled out.

The consequences of a decade or so of that policy can be seen in seeking to state the law, as this book seeks to do, or in seeking to understand the law, as you the reader will do now.

*Panaceas to improve the tax system*

There is one route and one route only to a good tax system: sound tax policy devised by those with a sound understanding of the current tax system; a leisurely timetable of consultation and legislative drafting; and the 10 tax tenets of the ICEAW.

That is not an easy prescription, and it is tempting to look for an easier solution. Recent attempts include the tax law rewrite and (perhaps) the HMRC charter.

The 2010/11 edition of this work did not have much time for the charter:

---

5 Ussher and Walford, *National Treasure* (Demos, 2011) accessible *www.demos.co.uk/files/National_treasure_-_web.pdf?1299511925*.

6 Tailby, "Some reflections on Tax Avoidance" [2011] PCB 41.

> HMRC have published a charter called (absurdly) "Your Charter".[7]
> Dicey's comment on constitutions also applies to charters:
>
> > ... any knowledge of history suffices to show that foreign constitutionalists have, while occupied in defining rights, given insufficient attention to the absolute necessity for the provision of adequate remedies by which the rights they proclaimed might be enforced. ...[8]
>
> An unenforceable charter is a cross between a PR exercise and a sermon.

I have not noticed any significant references to the charter since its publication, and "Your charter" died even sooner than the taxpayer's charter produced by John Major in 1990 (which was never, as far as I recall, publically withdrawn).

As to the Rewrite, last year I wrote:

> Parliament have passed the final two Bills from the Tax Law Rewrite project: CTA 2010 (which should not have been given the same title as CTA 2009) and TIOPA. This brings the 14 year project to an end, and it can now be seen to be a disappointment which has not met its founders hopes of a substantially improved tax system.[9]

The MORI review of the rewritten income tax legislation confirms that this is a widely held view.[10]

The big idea on the agenda for the forthcoming year - not a new one - is a GAAR. Comment will have to wait for the publication of the report of the General Anti Avoidance Rule Study Group, promised October 2011.

*Thanks ...*

I am very grateful to my colleagues Robert Venables QC and Stephen Brandon QC for discussions on many aspects of tax. I owe a great debt to Jane Hunt who works patiently on an intractable manuscript thoughout the year, and to Shabaz Ahmed and Shaoai Wang, who undertook the

7 Presumably "Taxpayers charter" was rejected because HMRC do not currently like to use the word "taxpayer".

8 Introduction to the Study of the Law of the Constitution, Dicey, (LF ed.) (1915) part II, The Rule of Law, chapter 4.

9 "... it would have been better to put the effort into simplifying the system rather than just the wording. The Institute believes that bringing the Rewrite to a close is correct." (CIOT, 20 Nov 2009.)

10 See *www.hmrc.gov.uk/research/report104.pdf*. See too 31.1 (Offshore funds – Introduction).

daunting task of proofreading.

*... and request for help*

Comments from readers would be of the greatest value and interest to the author. In the 9th edition of this work I said it has taken 2 years to complete a *preliminary* analysis of the provisions in what the House of Lords Economic Select Affairs Committee called the "absolute shambles" of the FA 2008. Now, 3 years after introduction of 2008 rules I am still making new discoveries and do not believe that a full analysis could ever be written.

The pleasure in writing this book consists in the interest of the questions which it raises and the success which it may have achieved in answering them. It seeks to state the law as at 1 August 2011.

## OBTAINING FURTHER ADVICE - AND DISCLAIMER

*Further advice*

If you want advice on which you are legally entitled to rely you can obtain it - but not from this work.

In particular, you may instruct the author to advise. I enjoy writing, but spend most of my time giving independent specialist professional advice in private client matters especially areas covered in this work. For further details see *www.kessler.co.uk*.

*TFD online*

TFD Online is an online version of this book and more. It can be used:
(1) to search the text of this book or to access it online.
(2) to see if the book has been updated
(3) to correct or contribute to the book

TFD Online is a free service to individuals and firms who have purchased the current edition of this work. It is moderated by Amanda Hardy, a member of Tax Chambers, 15 Old Square, Lincoln's Inn.

TFD Online is accessible on *www.foreigndomiciliaries.co.uk*. The authorisation code is in the inside cover of this volume.

*Disclaimer*

The CIOT issued new guidance on professional conduct in relation to taxation in 2011. It is a sign of the times that the CIOT issue *professional guidance* with a disclaimer:

> While every care has been taken in the preparation of this guidance the Chartered Institute of Taxation, the Association of Taxation Technicians and all those involved in the preparation and approval of this guidance do not accept any responsibility for any loss occasioned by reliance on this

guidance.[1]

Similarly, the views contained in this book are put forward for consideration only and are not to be relied upon. Neither the publisher nor the author accept any responsibility for any loss to any person arising as a result of any action taken or refrained from in reliance of this work.

## *A note to the lay reader*

This book is not intended as a self-help guide, and is addressed to tax practitioners, but it is readable for a lay person. Initiation in these matters must often be by the taxpayer. If you wish to research this subject in depth, and so take more control of your own tax affairs, read on. But for implementation you will need to find professionals to advise you. Self-help guides extol "the benefit of bypassing expensive lawyers"; but the bypass may prove the more expensive route in the long run.

CHAPTER ONE

# FOREIGN DOMICILE: TAX POLICY AND REFORMS

## 1.1 Introduction

The topics of this chapter are:

(1) The policy arguments for and against a lighter fiscal regime for foreign domiciliaries (or some similar class of footloose individuals)[1]

(2) A history of foreign domicile tax reforms

(3) An assessment of the 2008 reforms

The chapter concludes with a glance into the future.

## 1.2 Economic arguments

All UK residents have a choice where to reside, but foreign domiciled individuals are in general less securely attached to the UK. The economic argument claims that if their tax burden was as great as that of a UK domiciliary, fewer would choose to live in the UK, and overall the UK economy would lose:

(1) directly, from tax paid by the foreign domiciliaries (including VAT); and

(2) indirectly, from investment and expenditure in the UK which is more

---

1 Also, UK firms competing for expertise in the international labour market will find recruitment easier if the tax regime for foreign employees is lighter. Some potential employees would not choose, or could not afford, to come if the UK tried to tax them as it does its own domiciliaries.
For discussion on policy issues, see 'Residence and Domicile: Response to Background Paper' (STEP, 16 June 2003); 'Reviewing the Residence and Domicile Rules' (CIOT, 1 August, 2003); PBRN18 (Residence & Domicile Review), CIOT, 20 November 2007; all accessible on *www.kessler.co.uk*.

likely to be made by UK residents.

Similarly, UK firms competing for expertise in the international labour market will find recruitment easier if the tax regime for foreign employees is lighter. Some potential employees would not choose, or could not afford, to come if the UK tried to tax them as it does its own domiciliaries.

### 1.2.1 *Assessing the strength of foreign tax competition*

The argument requires an assessment of the strength of international tax competition.

In principle there are many low-tax or preferential tax regimes to which wealthy individuals can move. Switzerland, for instance, has a lump sum taxation regime for non-Swiss citizens specifically targeted for this purpose.[2]

In assessing the tax competitiveness of the UK relative to other countries, several points must be borne in mind.

Effective low tax may be achieved in other countries by relaxing legal provisions at administrative level, in a non-transparent way.

One paragraph summaries of other countries tax systems are bound to be misleading.

The terms of statutory tax law are only one aspect of tax competition. Compliance costs are important. The quality of tax administration is important. An OECD study lists six desiderata: a developed legal system, confidentiality, impartiality, proportionality, responsiveness [I am not sure what is meant by that] and competence. They add:

> Frequent changes in legislation, particularly where there has been an absence of consultation, can have an adverse impact on the taxpayers and

---

2 Though this is currently politically controversial and it was abolished in Zurich in January 2010.
The OECD study "Engaging with High Net Worth Individuals on Tax Compliance" para 34 (May 2009) singles out Ireland, France, the Netherlands and the UK for what it terms "preferential regimes for specifically defined groups of taxpayers"; see http://www.oecd.org/document/5/0,3746,en_2649_33749_42902277_1_1_1_1,00.html

their advisers trust in the tax system.[3]

But there are others: can a tax authority subject an individual to an expensive and intrusive tax investigation without any evidence to justify doing so? Certainty is very important. Perception matters as much as reality. By many of these measures, the UK scores poorly.[4]

In the 6th and earlier editions of this book, I said:

---

3 "Engaging with High Net Worth Individuals on Tax Compliance" (May 2009) para 208 and 243; see *http://www.oecd.org/document/5/0,3746,en_2649_33749_42902277_1_1_1_1,00.html*.

4 Not just in foreign domicile taxation. See, for instance, KPMG, *Taxation & the Competitiveness of UK Funds* (October, 2006):

> "For all fund types, the UK tax regime is viewed less favourably than those of Ireland and Luxembourg ...The negative perception of the UK tax regime is driven more by uncertainty than by any specific factor. ...A key feature of [structured] products is that promoters must be as certain as possible of the tax analysis for investors over a period of five years and more, and hence the uncertainty of the UK regime in this area makes the UK an unsuitable domicile location. Accordingly, most firms look immediately overseas when establishing these products. ... The most common concern with the UK tax regime is not a specific tax measure that can be fixed by a change in legislation. Rather, it is the overall management of the UK tax regime, characterised by the pace of change and the style of consultation... The majority of participants made strong calls for certainty and stability, regarding the lack of these as a key adverse factor of the UK tax regime. ...The lack of constructive consultation has led to an increasing number of surprising changes to the regulations and a number of proposed changes that were reversed after further prolonged consultation. ... Comments on derivatives caused uncertainty by questioning the appropriateness of an accounts based regime that was introduced just two years before, and the suggestion that QIS would not benefit from the established regime for authorised funds, significantly slowed development of UK based QIS. As one participant commented: 'By this stage Ireland and Guernsey were laughing.' ...There is also a view among participants that HMRC is focused on targeting avoidance rather than creating an environment to support industry development and growth. ...
>
> "The UK tax system undergoes constant change, or threat thereof, which results in ongoing uncertainty as to the tax treatment of funds and investors on assets totalling many billions. The UK Revenue can overturn arrangements without consultation albeit of very many years standing and is not seen to be working with the industry for the benefit of UK Plc, quite the reverse. This approach is very much at odds with that in other territories."

> The UK tax system is largely[5] based on the rule of law rather than informal practice and discretion.

To the extent this is true it is something to boast of,[6] and a feature which makes the UK an attractive choice for anyone choosing where to reside. However, it is far less the case than formerly, due to:

(1) over-wide, over-complex, or wholly vague anti-avoidance provisions mitigated by informal practice, discretion or oversight.[7]
(2) an increasing use of retrospective legislation.[8]

### 1.2.2 *Attitudes to the economic argument*

The debate about international tax competition is very long standing.[9]

Most though not all commentators would accept that the economic argument is a powerful consideration.

Where the UK faces tax competition, those making the law sometimes acknowledge it expressly:

> The [investment manager] exemption enables non-residents to appoint UK-based investment managers without the risk of UK taxation and is one of the key components of the UK's continuing attraction for investment managers.[10]

---

5 But see 9.23 (Forward tax agreements).

6 Blackstone agrees: Commentaries (1765) vol 2 chap 37 ("a country like this, which boasts of being governed in all respects by law and not by will...").

7 Examples include the POA rules (2004); restrictions on allowable losses (2007); the ITA remittance rules (2008).

8 Examples include the IHT reforms (2006); the ITA remittance rules (2008).

9 See the evidence of Lord Vestey to the 1920 Royal Commission, accessible *www.kessler.co.uk*.

10 SP 1/01. Another example is the IHT exemption for OEICs and AUTs:

> "Overseas investors are in theory liable to inheritance tax on their OEIC and AUT holdings, because they are regarded as being situated in the UK for tax purposes on the investors' death. Competing centres do not charge tax in parallel circumstances. Removing the potential inheritance tax charge will help UK managers compete on an equal footing with overseas fund providers."

Press Release 16 October 2002 (OEICs and AUTs) para 6. The text continues (inaccurately):

> "This very rarely generates any significant yield, because UK assets still have to exceed the inheritance tax threshold ... before any tax is due. But it is a deterrent in marketing terms".

The present coalition government seems well aware of the point, at least in relation to companies:

> In recent years too many businesses have left the UK amid concerns over tax competitiveness. It's time to reverse this trend.[11]

However what will be the overall economic effect of any reform is almost always hard to predict; ascertaining the effect of reforms after they are made is scarcely less difficult.

Those opposed to the consequences of this line of argument deride it as a "fiscal race to the bottom" but more sober commentators recognise that the UK could not act alone, as if there were no such thing as international tax competition.

### 1.2.3 *EU and international law aspects*

The freedom of the UK to enter into tax competition against other countries is subject to certain constraints of EU and international law and politics. International fiscal co-operation in this area at present operates only to a limited extent, but it has made some progress in a (non-binding) EU code of conduct on business taxation[12] and may in the future become a more important aspect of tax policy.

---

I suspect that the true reason that the old IHT rule raised little IHT was rather different, namely that no-one (if properly advised and wishing to comply with UK tax rules) would invest more than the IHT threshold in AUTs or OEICs. Undetectable non-compliance must also be reckoned with. But that does not affect the point made here.

Another example:

> "The location of ownership, flagging (registration) and management activities is very 'footloose', since it can easily be transferred from one country to another. This makes it vital to have regard to the fiscal regimes in other countries if we want to maintain a successful shipping industry in the UK. The modern armoury in the battle for success invariably includes a virtually tax-exempt fiscal regime." (Independent Enquiry into a Tonnage Tax, Lord Alexander, HM Treasury 1999.)

Another example is the exemptions granted to sports performers: see s.68 FA 2006 (Olympic Games 2012 ); sch. 20 FA 2010 (Champions League 2011). These events would not be held in the UK in the absence of a tax exemption.

11 Corporate Tax Reform: delivering a more competitive system, HM Treasury, November 2010.

12 *http://ec.europa.eu/taxation_customs/taxation/company_tax/harmful_tax_practices/index_en.htm*

The EC has expressed disapproval of the remittance basis:

> The Commission does not advocate remittance base taxation, as it may lead to double non-taxation.[13]

That expression of disapproval does not seem to have had any effect on UK domestic politics.

Since tax competition extends beyond the EU, and there is (to say the least) limited enthusiasm for increasing EU powers in relation to tax, those hoping for reform tend to look to the OECD.[14]

### 1.2.4 *"Customers" of HMRC*

It does not seem to me to be wholly coincidental that the change of terminology from taxpayers to "customers" of HMRC has come at a time which has seen a substantial increase in HMRC's powers and in its desire to use them to impose civil and criminal penalties.[15]

In the 2010/11 edition of this work I concluded:

> Where there is tax competition, the term "customer", which HMRC have (controversially) applied to taxpayers since 2001[16] is slightly less

13 László Kovács (EU Taxation and Customs Commissioner) IP/07/445 (30 March 2007).

14 Eg Jeffrey Sachs "Stop this race to the bottom on corporate tax" Financial Times, March 28 2011.

15 "The Department expects the new [civil] penalty regime to result in higher penalties as the minimum penalty for deliberate evasion and concealment is 50%. The Department should track the level of penalties imposed to ensure that it is applying the new regime rigorously." "We're going to significantly increase the number of criminal investigators and the number of prosecutions we're going to carry forward". House of Commons Committee of Public Accounts, "HM Revenue & Customs: Managing civil tax investigations" (March 2011) *www.publications.parliament.uk/pa/cm201011/cmselect/cmpubacc/765/765.pdf.*

16 A press release at the time provided: (14/06/01) "M and C Saatchi, a leading advertising agency, has been appointed by the IR to rebrand the department. Branding and design consultants, Corporate Edge, will also be working with the IR and M and C Saatchi to 'create a customer driven department.'"
In 2003 Sir Nicholas Montagu (then Chairman of the Board of Inland Revenue) said that the reason for the change was to remind Revenue staff that the needs of the consumer of public services should be considered first: see "The Customer is always right" Tax Advisor February 2003.

> inapt. UK resident foreign domiciliaries are in principle more free than other taxpayers to take their "custom" elsewhere.

As far as I am aware, no other Revenue department in the world has adopted this terminology. It will not cease to give rise to derision as long as the current generation of tax practitioners remain in practice.[17] It is conceivable that the terminology will last until a future generation sees nothing to laugh at in expressions such as *"penalties designed to change customer behaviour"*[18] but I think that unlikely.

The present Archbishop of Canterbury sees the issue in a wider context, and his objections to the terminology are more profound:

> The language of customer and provider has wormed its way into practically all areas of our social life, even education and healthcare, and we forget that it is a metaphor when we call a student, a patient or a traveller a "customer". The implication is that the most basic relation between one human being and another or one group and another is that of the carefully calibrated exchange of material resources; the most basic kind of assessment we can make about the actions of another, from the trader to the nurse to the politician, is the evaluation of how much they can increase my liberty to negotiate favorable deals and maximize my resources.[19]

## 1.3 Fairness

The other consideration in the assessment of foreign domicile taxation is fairness.

---

17 See eg Cameron, "Customer Service?" *Taxation* 10 Apr 2008, p.361: "It never ceases to amaze me that HMRC have adopted the word 'customer' to describe the taxpaying public. A customer is someone who chooses to patronise a business." Andy Wells agrees: "I will never be a "customer" of HMRC. This disregard for the English language irks just about every tax professional I come across..." *Taxation* 4 June 2009, p.549. Similarly Anthony Thomas, president of CIOT: "HMRC now refer to taxpayers as customers, but they do not treat them as customers"; "We need Trust", Taxation (2 June 2011) p.7.

18 *www.hmrc.gov.uk/e-learning/New_Penalties_Awareness/Inaccuracy_Pen_ext/HTML/Inaccuracy_Pen_ext_106.html*

19 Williams, "Knowing our Limits" in Williams and Elliott (ed), *Crisis and Recovery* 2010, p.20.

### 1.3.1 *What is fairness?*

The starting point for any serious discussion of fairness in tax is economists terminology:

(1) horizontal equity, the view that people who are relevantly equal should pay the same amount of tax.

(2) vertical equity, the view that people who are relevantly different should pay different amounts of tax, which leads to the (more or less) accepted view that fair taxation should be progressive rather than regressive.

Economists have developed these concepts with considerable sophistication[20] but their limitations are painfully exposed when one tries to apply them in a real life context, such as an assessment of the fairness of the taxation of foreign domiciliaries. The concept of horizontal equity is not so much a definition of fairness as an approach to identifying the issues in any serious discussion of fairness. In deciding whether one group (foreign domiciliaries, say) is fairly taxed, one needs to identify another group by way of comparison (UK domiciliaries, say) and ask if they are relevantly equal.

### 1.3.2 *Is a distinction between UK and foreign domiciliaries fair?*

In the author's view, domicile is in general a useful and practical measure of UK linkage, and to regard UK and foreign domiciled residents as completely equivalent is facile. Or put the other way, foreign domicile does constitute a significantly weaker UK link than UK domicile. Accordingly conferring a lighter UK tax regime on foreign domiciliaries, such as a remittance basis, is indeed fair. This is especially so bearing in mind that mere residence does not require a very close connection to the

---

20 For a starting point, see Kaplow,"Horizontal Equity: Measures in Search of a Principle" National Tax Journal 42, no. 2 (1989): 139-55 accessible *http://ntj.tax.org/wwtax/ntjrec.nsf/A4CE18763C5BB9608525686C00686DAC/$FILE/v42n2139.pdf*
Musgrave "Horizontal Equity Once More" National Tax Journal 43, no. 2 (1990): 113-23 accessible *http://ntj.tax.org/wwtax/ntjrec.nsf/0/a42168feab9541ff8525686c00686dca/$FILE/v43n2113.pdf*

UK – merely passing the 183 or 91 day tests or (under HMRC 6) having vaguer and more remote connections.

Further, a foreign domiciliary may not have had a fair opportunity to arrange their affairs with UK tax in mind; for instance creating settlements from which they were excluded.

Another consideration is the impracticality (both for taxpayers and HMRC) of untangling ownership of assets, especially in family ownership arrangements which are common in third world countries.

This view is not universally held. Some maintain that any distinction (for IT or CGT) between UK residents based on domicile is unfair. The two are relevantly equal.

It is difficult to see how the dispute between the rival views can be judged, or what either side could do or say to convince the other. The concept of fairness is insufficiently precise to resolve the dispute. Or one might say that it comes down to a matter of impression, which is to say the same thing.

Many of those who advocate this view most strongly are not tax practitioners, and I think would be surprised to find how little is required to be UK resident: their views may based on a paradigm of a foreign domiciliary who is a very long-term UK resident.

It also has to be said that in political debate, much depth of analysis is not to be expected; assessment of fairness is visceral, and sensitive ears might sometimes detect elements of class or wealth hostility and xenophobia.

### 1.3.3 *Is a remittance basis fair?*

Of course, even if it is accepted that it is fair to tax foreign domiciliaries less than UK domiciliaries, the question of what constitutes a fair reduction is a separate issue. The 2008 reforms accepted the principle of a distinction (which is why they did not go far enough for some commentators) but significantly reduced the extent of the tax reduction by making the remittance basis less attractive.

The remittance basis of taxation is in effect a form of qualified non-taxation. In assessing its fairness it is relevant to compare different groups of foreign domiciliaries:

(1) *Short-term residents* who are:
  (a) wealthy individuals, who can elect for the remittance basis and are able to retain significant foreign income/gains abroad, and
  (b) less wealthy individuals for whom the remittance basis is not

attractive since they cannot afford to retain foreign income/gains abroad.

(2) *Long-term residents*

(a) ultra-wealthy individuals, who can elect for the remittance basis and are able to retain significant foreign income/gains abroad, and

(b) less wealthy individuals for whom the remittance basis does not justify the £30k.

The effective rate of tax under the remittance basis approximately declines with income and in that sense it can be described as regressive taxation. If one accepts that taxation ought in principle to be progressive, which has been a broad feature of UK taxation then there is the basis for an argument that the remittance basis is unfair.

What effect have the 2008 reforms had in this area? So far as they have decreased the attractiveness of the remittance basis by withdrawal of personal reliefs as a cost of the remittance basis they have decreased the unfairness.

So far as they have introduced the £30k remittance basis charge, the reforms have targeted the benefit of the remittance basis at a small number of ultra-wealthy individuals. That may make some sense under the economic argument, but from a fairness point of view it is difficult to justify.

## 1.4 Suitability of domicile as a fiscal test

The domicile concept is not ideally framed to identify the "footloose" individuals, whose UK links are less, and for whom a lighter tax regime is appropriate on fairness or economic arguments. The adhesive quality of a domicile of origin, and the restrictive rules for the acquisition of a domicile of choice, allow some fortunate individuals to enjoy foreign domicile tax treatment, despite very close UK links and only tenuous, historical and fortuitous links to their domicile of origin. To the extent that they do so the current tax system fails both on economic and fairness criteria.

In considering this objection to domicile, however, one should bear in mind that no perfect criteria exists: the question is not whether domicile always produces the right answer, but whether one can do significantly better with other concepts.

Other concepts are sometimes used:

(1) Long term residence, of which UK tax uses a variety of tests:

   - (a) IHT deemed domicile rule: 17 years residence.
   - (b) Long-term residence rules: 8 years residence.
   - (c) Temporary non-residence rules: 4/7 years residence and 5 years absence.
   - (d) Ordinary residence (vague but like a 3 year residence test)

(2) Citizenship (not much used in UK domestic tax law but used in some IHT DTAs and in the OECD model treaty.

These are all alternative ways to make the distinction between UK residents with strong and weaker UK links; whether they would serve better than a domicile test is very doubtful.

## 1.5 Approaches to reform of foreign domiciliary taxation

It is helpful to distinguish different ways of altering the tax system for foreign domiciliaries:

(1) Alter the definition of domicile for general purposes and so restrict the class who qualify for foreign domicile tax treatment.
(2) Alter the definition of foreign domicile for some or all tax purposes.
(3) Alter tax laws applying to all foreign domiciliaries.
(4) Identify subclasses of foreign domiciliaries with close UK links so as to tax them more heavily.

One can of course achieve the same end result by more than one technique. There is a lot to be said for approach (4) both on economic and fairness grounds.

## 1.6 History of reform of foreign domicile taxation[21]

### 1.6.1 *1974-2002*

The 1974 Finance Bill included a provision (clause 18) that an individual ordinarily resident in the UK for five out of the preceding six years of assessment should be deemed UK domiciled for IT and CGT purposes. This was withdrawn from the Bill.[22]

In 1987 the Law Commission published recommendations for minor

21 See too 9.4 (History of the remittance basis).

22 For an account of the lobbying behind this, see Barnett, *Inside The Treasury* (1982) p.28–9.

reforms of the general law of domicile[23] but despite initial acceptance by the Government, there was no change in the law. In 1996 the proposals were formally abandoned.[24]

The 1988 Consultative Document (Residence in the UK) made radical proposals. The remittance basis would be abolished. Those resident here for less than seven out of 14 years (and, perhaps, who are also not UK domiciled) would qualify for a new "intermediate basis" of taxation. This would require disclosure of worldwide income in order to tax it at an effective rate of 2% or less. This almost unworkable proposal was sensibly abandoned.

In the first edition of this work (2001) I said:

> It seems more likely than not that, apart from tinkering changes, the present regime will continue for the foreseeable future. But "the major distinguishing feature of the British tax system is its instability".[25] There is also the possibility of EU pressure for reform. If what has been a backwater acquires political prominence, perhaps due to no more than a campaign by a single newspaper, there will certainly be major changes.

### 1.6.2 *2003 background paper on residence and domicile*

In 2002 a newspaper campaign emerged[26] which pressed the Blair Government into action, or at least into the appearance of action. The Budget of April 2003 delivered a "background paper" called "Reviewing

---

23 Law Com. No. 168 *The Law of Domicile*, accessible *www.scotlawcom.gov.uk/download_file/view/228/*

24 According to Hansard HC, 16 Jan 1996 Col 487:
"The Government have decided not to take forward these reforms on the basis that, although they are desirable in themselves, they do not contain sufficient practical benefit to outweigh the risks of proceeding with them and to justify disturbing the present long established body of case law on this subject."
This was the right reason for the right decision. However, the true reason for the decision may well have been pressure of the foreign domicile lobby: see "Rules for Determining Domicile", Law Reform Commission of Hong Kong (2005) para 4.28 accessible *www.hkreform.gov.hk*.

25 This was noted in Steinmo, *Taxation and Democracy*, (1993) p.44 but the instability has markedly increased since then.

26 See for instance, *The Sunday Times*, 1 March 2002; *The Guardian*, 11 and 12 April 2002.

the Residence and Domicile Rules as they affect Taxation".[27] This was a facile document[28] but it may be unfair to criticise its (unnamed) authors. Their instructions may have been to be uncontroversial; by saying nothing, there was nothing in the document to which anyone of any political view could object.

Nothing then happened from 2003 to 2008 except an often repeated statement that:

> The review of the residence and domicile rules ... is ongoing.[29]

It is clear that the review of foreign domicile tax did not follow the normal course of consultation, decision and implementation. In the absence of a frank explanation of what went on, it is tempting to speculate. The likely explanation is that the Blair Government wanted to do nothing, but prevaricated to avoid an announcement which would have lead to a furore from those in favour of reform.[30] Blair resigned in June 2007. A change of power led to an unannounced U-turn from that unannounced policy.

## 1.7 2008 reforms: assessment

The 2003 background paper on domicile recited the principles that taxation of foreign domiciliaries:

> [1] should be fair;
> [2] should support the competitiveness of the UK economy; and

27 See *www.kessler.co.uk*

28 It contained an outline of the law (a rehash of IR20) and one paragraph summaries of the law of 29 other countries (of insufficient detail to be of any use and generally said to be misleading). The paper did not consider any proposals or their possible impact. It (consciously?) ignored every earlier discussion of reform: the Royal Commissions of 1920 and 1955, the 1936 Codification Committee, the 1974 Finance Bill, the 1987 Law Commission Report and the 1988 Consultation Paper.
For an account of the decline in quality of Government white and green papers, see Forster, *British Government in Crisis* (2005), p.134.

29 The history is set out in more detail in the 9th edition of this work para 1.3.2. The last outing of (by then extremely tired) statement was Hansard 12 July 2007 Col 1605 by which time almost no-one believed it, but by then it was possibly true.

30 See Oborne, *The Rise of Political Lying* (2005).

[3] should be clear and easy to operate.[31]

It seems reasonable to assess the 2008 reforms by these criteria.

The 2008 reforms increased the tax burden on foreign domiciliaries in three main ways:

(1) The £30k remittance basis charge for long-term residents
(2) The withdrawal of personal allowances for all remittance basis claimants
(3) The extension of anti-avoidance provisions to remittance basis taxpayers (in particular, the ITA remittance basis, the s.720, s.13 and s.87 remittance bases, and the AIP remittance basis).

### 1.7.1 *Clear and easy to operate*

It will be evident to anyone who skims this book that by this criteria the 2008 rules are an abject failure. The rules are unclear, often difficult and sometimes impossible to operate. In these respects they are unquestionably worse than the pre-2008 rules. The terms of the 2012 review suggest that this is tacitly accepted.

Government policy normally requires an impact assessment.[32] None was carried out in relation to any of the 2008 reforms. Many features of the reforms could not have survived if it had been.

### 1.7.2 *Competitiveness of the UK economy*

On one side of the account is the gain of more tax paid by foreign domiciliaries. On the other is:

(1) Tax and investment lost from individuals who leave the UK, and those who (because of the reforms) decide not to come.
(2) The loss to the economy that the new rules in many cases prevent investment in the UK and prevent use of UK services (to a much greater extent that is necessary from the concept of a remittance basis).

In the 2008/09 edition of this work my initial assessment was as follows:

31 The paper might have cited Adam Smith *The Wealth of Nations* (1776) Book 5 chapter 2, accessible *www.bibliomania.com/2/1/65/112/frameset.html*
The paper did not point out (though Adam Smith did) that these objectives are to a substantial extent irreconcilable.

32 *www.berr.gov.uk/files/file44544.pdf*

> Overall it seems to me implausible that the reforms will make a positive contribution to the UK economy. One can test the matter this way. If a wealthy individual, a beneficiary of offshore trusts created by himself or his family, asked for advice on the desirability of choosing the UK as a residence, what would one say? Even now the individual could still do worse; and if enough advance planning and restructuring is possible, the problems may be ameliorated, at an administrative cost. Thus tax may still not prevent an individual from coming to the UK if he wants to sufficiently. Also, the old cliché about the tax tail and the commercial dog still holds good. But all this is a far cry from the pre-2008 position, where one would simply respond that the UK was clearly a desirable place to reside.

This view is now supported by a number of surveys.

A KPMG survey found that as a result of the 2008 changes, 24% of foreign domiciliaries were planning to leave the UK within two years, with an additional 24% hoping that the rules will be changed and looking to review their position in the medium term. More than nine out of ten said that the changes had damaged the UK's competitiveness.[33]

A Knight Frank survey found that up to 7% of foreign domiciliaries left UK in the months following the tax announcements and a further 31% were planning or actively considering departure.[34]

Stonehage research suggests that the changes will produce an initial tax gain diminishing to a tax loss beginning from a date between 2014 and 2018.[35]

My own anecdotal experience - consistent with the above - is of a number of individuals who decide - I think wisely - not to come to the UK because of the uncertainties relating to taxation.

It is of course difficult if not impossible to disentangle the 2008 reforms from other disincentives to coming to the UK, such as the increase in income tax rates to 50%, the enormous uncertainties caused by the transfer of asset abroad changes in 2005, and corporation tax changes.

Corporate departures from the UK have been widely publicised; they include WPP, Shire, Regus, Henderson, Charter, Beazley, Brit Insurance, UBM, Shore Capital, Informa and Aureos Capital. Individual departures from the UK are not readily identifiable, and losses from those who decide

33 March 2009, accessible *www.kpmg.co.uk/news/docs/NomDoms_FinanceAct2008_Access3.pdf*

34 *www.knightfrank.com* Press Release, 20 June 2009.

35 "Non Doms and the UK Economy", March 2010, accessible *www.stonehage.com*.

not to come are almost totally unmeasurable.

HMRC offer the following statistics:

| | Non-doms | Tax paid | RBC payers | | Total RBC paid |
|---|---|---|---|---|---|
| | *Total no* | *Total £billion* | *Average per person* | | |
| 2004-05 | 110,000 | 3.3 | £30,000 | | |
| 2005-06 | 111,000 | 4 | £36,036 | | |
| 2006-07 | 117,000 | 5 | £42,735 | | |
| 2007-08 | 140,000 | 6.9 | £49,286 | | |
| 2008-09 | 123,000 | 5.9 | £47,967 | 5400 | £162m |

The figures are interesting but it is impossible to draw any economic conclusions from them.

### 1.7.3 *Fairness of 2008 reforms*

The FA 2008 contained a wide ranging package of reforms and any short assessment of its fairness must necessarily be limited to its main features.

The £30k remittance basis charge distinguishes between short term and long-term residents, and taxes the latter more heavily, the connecting factor here being an 8/10 year residence test. One cannot categorise that distinction as unfair.

On the other hand, among long-term foreign domiciliaries, the charge distinguishes between the extremely wealthy (to whom the remittance basis is still attractive) and others (to whom it is not). This offends against the principle of vertical equity, which suggests that people with higher incomes should pay more tax. That is not fair, though it is an unfairness arising directly out of a decision to maximise the economic advantage by targeting the remittance basis to the wealthiest.

The withdrawal of personal allowances as a quid pro quo of a remittance basis is not unfair (though it comes at a cost in terms of complexity).

Of perhaps greater importance is the other aspects of a package of reforms which affect all foreign domiciliaries, not just long-term residents.

The new and wider ITA remittance basis is not unfair, except for the wilder reaches of the relevant person definition and the supposed rule (probably ignored in practice) that the taxable amount remitted may exceed the value of the asset remitted.

The extended 2008 anti-avoidance rules can work unfairly but complete fairness is impossible to achieve in this area.

The transitional rules are another matter. The rules are retroactive in that their impact on individuals depends on income and gains arising before 2008, and unfair in that they impose tax on those income/gains in a manner that no-one before 2008 would have anticipated. These rules are unquestionably and grievously unfair.

All in all, the 2008 reform may be given some limited marks for fairness. This is not to say that the pre-2008 rules should be regarded as unfair: the concept of fairness (especially if viewed through the lense of practicality) is so vague that a very wide range of tax policies may all be categorised as "fair".

Some of the hardest hit are long-term UK resident US citizens, who pay
(1) US tax on a citizenship basis and
(2) substantially greater UK tax liabilities under the 2008 regime.
with only treaty relief to mitigate double taxation, as far as it goes.
That is unfair, but the reason is not that UK unfairly taxes its long-term residents, but that the US (I think, uniquely in the world) imposes US tax on non-resident citizens, so all its non-residents face the burden of double taxation: US tax and tax in their country of residence (subject in part to treaty relief).

### 1.7.4 *Process of implementation*

The manner in which the FA 2008 was introduced deserves to be recorded.

On 18 January 2008, 26 pages of draft clauses were published whose unwritten message to wealthy non-residents was broadly: *do not come to the UK if possible; if you must, do not under any circumstances invest any money here*. The clauses were officially described as work in progress, but this was unfit for publication.

HMRC presumably agreed. On 27 March the Finance Bill was published, containing 54 pages of legislation. The FB clauses bore almost no resemblance to the January draft. One consequence is that the professional time and clients' money spent considering the old clauses was almost entirely wasted. That certainly cost many £millions. Another consequence was that the profession had nine frantic days to scramble around before the end of the tax year. Because of the absence of sensible transitional reliefs, large amounts of tax depended on decisions and actions taken in those days. Sensible consideration of difficult and important matters was rendered impossible.

On the date of publication the Treasury announced that the Finance Bill was incomplete and amendments covering almost every aspect of the rules[36] would be made in the course of progress of the Finance Bill.[37] Thirty pages of amendments duly emerged in mid June – far too late in the Finance Bill timetable to give them any serious consideration. Forty eight more Report Stage amendments were published on 26 June. The report stage and third reading (after which no further amendments could be made) were held on 1 and 2 July 2008. John Avery Jones notes that "Report Stage amendments are usually a disaster."[38]

As a result, the final legislation poses problems which will occupy practitioners and HMRC for many years, but it is also noteworthy that during the first three months of 2008/09 taxpayers could not know what laws governed transactions which they might wish to carry out, or what record keeping would be required of them.

The former editor of *Taxation* is blunt:

> The standard of strategic policy making at the Treasury has been unacceptably poor in recent years, but this must surely have been one of its lowest ebbs ever.[39]

The CIOT say:

> when corners are cut, especially under time pressures, there can be serious deficiencies.

and their example to illustrate the point is the non-domicile rules in the FA 2008.[40]

---

36 Explanatory notes to Schedule 7, para 36 (mixed funds); para 47 (s.87 charge); para 52 (non-resident trusts); para 74 (Schedule 4C); para 91 (TAA provisions; para 106 (works of art); para 107 (employment related securities).

37 In the 2008/09 edition I said:
"This is a new development in tax legislation. While from time to time inadequately drafted clauses have always been found in Finance Bills, this is as far as I am aware the first time that the Government has had to announce that fact at the time of publication of the Finance Bill."
It seems however to be a trend as there are similar examples in the FA 2009.

38 See "Taxing Foreign Income from Pitt to the Tax Law Rewrite—The Decline of the Remittance Basis", John Avery Jones in *Studies in the History of Tax Law* (Vol 1 2004) accessible on *www.kessler.co.uk*.

39 *Taxation* 12 June 2008 Vol 161 No. 4160 p.627 (Malcolm Gunn).

40 The Making of Tax Law, para 3.2, CIOT, June 2010
*www.tax.org.uk/resources/CIOT/Documents/2010/09/themakingoftaxlaw.pdf*

The House of Lords Economic Affairs Committee comment in measured language:

> Our private sector witnesses would not have used words like "a real shambles" if they did not feel strongly about this. ...
> 176. We recommend that, if they have not already done so, HMT and HMRC should carry out a full review of the reasons why there were so many difficulties in the development of this policy initiative. They should ensure that the lessons are learned so that these problems do not emerge in other initiatives.
> 177. We also recommend that if another policy initiative gets to the point where the legislation cannot be finalised for inclusion in the Finance Bill, that initiative should not be included in the Bill, or, if feasible, the part which is not finalised should not be included. We cannot support the approach of the Finance Bill's still being subject to much amendment at the time it is published, particularly when the proposals come into effect from the beginning of the tax year, as in this case. [41]

No review has been carried out.

Does it now matter? Readers may think it pointless to cry "foul" in a game which has no referee, and whose result has now been declared. But I think the story deserves to be recorded as what a working party lead by Lord Howe described as "an object lesson in how not to legislate".[42]

The charity tax reforms of the F(No.1)A 2010 suggests that no lesson has been learned. There are some signs that the present coalition government would like to be less cavalier in enacting tax legislation. Whether the government can ensure that this happens remains to be seen.

## 1.8 The future

The announcement of policy changes a year ahead of implementation, to allow for consultation, is a welcome development. The 2011 Budget contains two such announcements which affect the themes of this book.

The June 2010 budget provided:

---

41 Select Committee on Economic Affairs, 2nd Report of Session 2007–08, The Finance Bill 2008 *www.publications.parliament.uk/pa/ld200708/ldselect/ldeconaf/117/117i.pdf.*

42 Making Taxes Simpler - The final report of a Working Party chaired by Lord Howe of Aberavon (July 2008) *www.tax-news.com/asp/res/makingtaxessimpler.pdf.*

> 1.98 As announced in the Coalition Agreement, the Government will review the taxation of non-domiciled individuals. This will assess whether changes can be made to the current rules to ensure that nondomiciled individuals make a fair contribution to reducing the deficit, in return for greater certainty and stability for those bringing skills and investment to the UK.

Of course just as in the review over period 2003-2008, the outcome of any review will turn primarily on the views and political power of those carrying out and ultimately implementing the review. The result of this review appears in the 2011 budget:

> **3.7 Review of non-domicile taxation —** At the June Budget 2010, the Government confirmed that it would review the taxation of non-domiciled individuals. There is currently a beneficial tax regime for non-domiciles regardless of how long they have been resident in the UK. However, the rules mean that foreign income and gains are taxed if they are brought to the UK and this is a disincentive to inward investment. The Government will introduce the following reforms:
> • remove the tax charge when non-domiciles remit foreign income or capital gains to the UK for the purpose of commercial investment in UK businesses;
> • simplify some aspects of the current tax rules for non-domiciles to remove undue administrative burdens; and
> • increase the existing £30,000 annual charge to £50,000 for non-domiciles who have been UK resident for 12 or more years and who wish to retain access to the beneficial tax regime (the remittance basis). The £30,000 charge will be retained for those who have been resident for at least seven of the past nine years and fewer than 12 years.
> The Government will be consulting on the detail of this measure. It will issue a consultation document in June. The Government intends to implement these reforms from April 2012.[43]

The other important change on the horizon is a statutory residence test.

43 HMRC "Overview of Tax Legislation and Rates" (23 March 2011).
The Budget 2011 predicts that these reforms will have the following effect:

| *Year* | 2011/12 | 2012/3 | 2013/14 | 2014/15 | 2015/16 |
|---|---|---|---|---|---|
| *Yield* | £0 | £0 | £110m | £70m | £50m |

I find it difficult to see how these figures could be derived and doubt if they should be taken seriously.

## 1.9 Stability?

Alistair Darling (then Chancellor of the Exchequer) said in his budget speech 2008:

> There will be no further changes to this regime [for foreign domiciliaries] for the rest of this Parliament or the next.[44]

This was only lip-service to the desideratum of stability and no-one seriously believed it.[45] In the 2008/09 edition of this work I said:

> The statement is constitutionally wrong, as Parliament cannot bind its successor. But leaving aside (if one can) constitutional fundamentals, it would be rash to rely on it. On the contrary, I predict that further tinkering (at least) is likely as the effect of the present rules gradually becomes evident.

The FA 2009 did just that, with more tinkering in the F(no.1) A 2010 and a rewrite of the offshore fund rules.

The 2011 budget has another promise of stability:

> There will be no other substantive changes to these rules for the remainder of this Parliament.[46]

---

44 *www.hm-treasury.gov.uk/budget/budget_08/bud_bud08_speech.cfm*.

45 The House of Lords Economic Affairs Committee said:
"227. In his Budget Statement, the Chancellor promised that the rules in this area would not be substantially revised for the rest of this or the next Parliament. We do not take this to mean that there will not be legislation in coming Finance Bills to address defects in the current legislation. We think it inevitable that, given the evident pressure under which this legislation was produced, there will be such defects." 2nd Report of Session 2007–08, The Finance Bill 2008
*www.publications.parliament.uk/pa/ld200708/ldselect/ldeconaf/117/117i.pdf*.
In the Consultation Document "Modernising Powers, Deterrents and Safeguards: Tackling Offshore Tax Evasion" 9 December 2009 para 4.43 HMRC tactfully misquoted the then Chancellor, saying "At Budget 2008, the Chancellor of the Exchequer gave a commitment that there would be no *significant* changes to the *policy underlying* the remittance basis for the lifetime of that Parliament and the next."

46 HMRC "Overview of Tax Legislation and Rates" (23 March 2011) para 3.7.

The coalition government (correctly) does not promise to bind the next Parliament. The promised period of stability is therefore for three years, from 2012 (assuming the proposed 2012 changes are enacted on schedule) until 2015 (assuming Parliament lasts the full 5 year period).

CHAPTER TWO

# DOMICILE

## 2.1 Why does domicile matter?

Domicile is fundamental for many tax purposes, of which the most important are:
(1) The remittance basis for IT and CGT.
(2) IHT on foreign situate assets.

Domicile is also important for many non-tax purposes including aspects of family law jurisdiction and succession law.

The RDR Manual has lengthy guidance. For discussion of the general law of domicile, see Dicey and Morris, *Conflict of Laws*, (14th edition, 2006) ("*Dicey*"); this is the book that HMRC and the courts most often cite. For an important reminder of the need for legal realism in this area, see Fawcett, "Result Selection in Domicile Cases" (1985) OJLS vol 5 p.378.[1]

For IHT deemed domicile, see 52.1 (Deemed domicile for IHT).

## 2.2 The concept of domicile

Domicile is a concept of private international law. The rules are laid down by common law, but modified by statute. These rules apply for tax purposes except so far as modified by tax law.

The law in Scotland is (almost) the same as England, and indeed the leading case of *Udny v Udny* is a Scottish case. The law in Northern Ireland is the same as England.

---

1 Concluding that the policy of not allowing individuals with a UK domicile of origin to escape UK taxes is influential in determining the result in domicile cases. Accessible *www.ojls.oxfordjournals.org/content/5/3/378.full.pdf*.

"Domicile" has a technical meaning in UK law and should not be confused with:

(1) "Domicile" in civil law jurisdictions.[2]

(2) "Domicile" in EU regulations and international treaties (where a definition generally overrides the UK law sense of domicile).

(3) "Domicile" in ordinary English usage.[3]

Everyone has one and only one domicile. The expression "**non-domiciled**" is in a literal sense inapt, because everyone is domiciled somewhere. It is, however, an acceptable and convenient abbreviation (in context) for non-UK domiciled (just as "non-resident" means, in context, non-UK resident).

A person must be domiciled in a single legal jurisdiction. The expression "**UK domiciled**" is in a literal sense inapt because a person must be domiciled in England, Scotland or Northern Ireland. It is, however, universally used to describe someone who is domiciled in England, Scotland or Northern Ireland.[4] For tax purposes it makes no difference where in the UK one is domiciled, though for general law purposes that may be important.

## 2.3 Domicile of origin

Dicey states:

> Rule 9 – (1) Every person receives at birth a domicile of origin:
> (a) A legitimate child born during the lifetime of his father has his domicile of origin in the country in which his father was domiciled at the time of his birth;

---

2 Article 102 of the French Civil Code provides: "Le domicile de tout Francais est au lieu où il a son principal établissement" (The *domicile* of a French person is where he has his main establishment).

3 e.g. in the lines from Walt Disney's *Lady and the Tramp*:
"Now we lookin' over our new domicile
If we like we stay for maybe quite a while"(!)

4 Section 721(3) ITEPA (somewhat pedantically) states this expressly:
"Any reference in this Act to being domiciled in the UK is to be read as a reference to being domiciled in any part of the UK."
The tax law rewrite team must have realised this was unnecessary as (quite correctly) they did not put an equivalent clause in any subsequent rewrite legislation. Section 721(3) ought to be repealed as otiose.

> (b) A legitimate child not born during the lifetime of his father, or an illegitimate child, has his domicile of origin in the country in which his mother was domiciled at the time of his birth; ...
> (2) A domicile of origin may be changed as a result of adoption, but not otherwise.[5]

This is one of the few areas of English law where legitimacy still matters. The position in Scotland is slightly different: see 2.13 (Child's domicile of dependency).

## 2.4 Domicile of choice

Dicey states:

> Rule 10 – Every independent person can acquire a domicile of choice by the combination of residence and intention of permanent or indefinite residence, but not otherwise.[6]

I shall consider "residence" and "intention" separately.

### 2.4.1 *"Residence"*

"Residence" here means "residence as an inhabitant" which is something more than "presence as a traveller".[7] This is not necessarily the same as residence for tax purposes but in practice it ought to come to the same thing, since tax residence is supposed to represent the ordinary meaning of the word residence. If at all possible it would be best to avoid having two concepts of residence, one for tax and one for domicile.

Assuming a person resides as an inhabitant, there is no minimum period of residence required: residence commences immediately on arrival if the

---

5 Dicey & Morris, *Conflict of Laws* (14th ed.., 2006), para 6R-025.

6 Dicey & Morris, *Conflict of Laws* (14th ed., 2006), para 6R-033.

7 In the case of acquisition of a domicile of choice, the precise definition of residence is never a real issue, because a person acquiring a domicile of choice in a country must *ex hypothesi* have the intention to reside there permanently; so if they are present in the country at all, they must be "resident as an inhabitant" and not "present as a traveller". But the point is relevant for abandonment of domicile of choice.

intention is to stay.[8]

### 2.4.2 *"Permanent or indefinite" residence*

"Permanent" residence is straightforward but the concept of "indefinite" residence needs comment.

"Indefinite" (in short) requires that the individual intends to reside in a country "until the end of his days". It seems to me that "indefinite" is an unfortunate word to use because in its normal sense it is used to describe any period whose duration is not known exactly, even a short period. For instance the duration of a strike is indefinite;[9] so is the duration of a contract of employment. That is not the meaning here. However there is no single English word which neatly encapsulates the intended meaning. "Unlimited" is sometimes used and is more apt, but this too needs clarification. *IRC v Bullock* 51 TC 522 commented on the classic statement that a domicile of choice is acquired when:

> a man fixes voluntarily his sole or chief residence in a particular place with an intention of continuing to reside there for an *unlimited* time.[10]

Buckley LJ said at p.540:

> I accept that statement ... with this qualification only that the expression "unlimited time" requires some further definition. A man might remove to another country because he had obtained employment there without knowing how long that employment would continue but without intending to reside there after he ceased to be employed. His prospective residence in a foreign country would be indefinite but would not be unlimited in the relevant sense. On the other hand, ... I do not think that it is necessary to show that the intention to make a

8 *Fasbender v AG* [1922] 2 Ch 850 at p.858; *Bell v Kennedy* (1868) LR 1 Sc & Div 307 at p.320.

9 This is self-evident, but if authority is needed, see *Howard E. Perry v. British Railways Board* [1980] 1 WLR 1375 at p.1380 which described the period of a strike as "clearly ... indefinite. It may be short, or it may be long; but it is plainly uncertain." The Law Commission made the same point in *Private International Law* Law Com 186 para 5.12: "'Indefinitely' by itself is insufficient: it could, on one view, cover an intention to live in a country for a short time for some temporary purpose, for example a short holiday of indefinite duration."

10 *Udny v Udny* (1869) LR 1 Sc & Div App 441 at p.458. (Emphasis added.)

> home in the new country is irrevocable or that the person whose intention is under consideration believes that for reasons of health or otherwise he will have no opportunity to change his mind.

And crucially:

> In my judgment, the true test is whether he intends to make his home in the new country until the end of his days unless and until something happens to make him change his mind.[11]

The requirement to intend to reside somewhere "indefinitely" is very strict. In *IRC v Bullock* 51 TC 522 the taxpayer resided in England for 40 years but hoped to return home to Nova Scotia (to which his wife objected) should he survive her or persuade her to change her mind. This contingency had sufficient substance to represent a real determination to return home rather than a vague hope or aspiration. Mr Bullock did not acquire a UK domicile of choice but retained his domicile of origin.[12]

This may be contrasted with *Furse v IRC* where the taxpayer intended to live in England for the rest of his life except that he would return to America in the event that he were to become physically incapable of taking an active interest in his UK farm. This was held to be too insubstantial:

> That contingency is altogether indefinite. It has no precision at all. A man's idea of an active physical life is likely to contract with the years. At the age of 80, after 40 years in England, the testator was still living at West Hoathly and, although he had been ill, he had no firm plans at all for leaving England.
>
> The testator's expressed intention, it seems to me, depended entirely on his own assessment of whether an ill-defined event had occurred. I think it really amounted to no more than saying, 'I will leave England when I feel I want to leave England'. That is substantially the same as Buckley LJ's example of the man who says he will leave 'when I've had enough of it'.[13]

---

11 This test was reaffirmed in *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [10] to [15].

12 There are many examples of long periods of UK residence without acquiring a UK domicile: *Buswell v IRC* 49 TC 334; *Cyganik v Agulian* [2006] ITELR 762; *Ramsay v Liverpool Royal Infirmary* [1930] AC 588 (36 years); *Winans v AG* [1904] AC 287 (37 years).

13 [1980] STC 596 at p.604.

Accordingly Mr Furse acquired a domicile of choice in England. Again:

> If a man intends to return to the land of his birth upon a clearly foreseen and reasonably anticipated contingency, e.g., the end of his job, the intention required by law is lacking; but, if he has in mind only a vague possibility, such as making a fortune (a modern example might be winning a football pool), or some sentiment about dying in the land of his fathers, such a state of mind is consistent with the intention required by law.[14]

Tax may be relevant to intention. For instance if a Swedish tax exile remains in the UK, intending to return home if and when Sweden's tax regime is relaxed, they would not acquire a domicile of choice here. Likewise if an individual intended to remain in the UK only so long as UK tax law continues to allow a remittance basis, they would not acquire a domicile of choice here.

### 2.4.3 *Proof of intention*

In the event of a dispute the court must determine what is or was the individual's intention. In order to do so the court will have regard to every factor which might shed light on the individual's intention – except registration and voting as an overseas elector (which will be ignored in a tax appeal unless the taxpayer wishes otherwise).[15]

The burden of proof lies on HMRC to show that an individual has acquired a UK domicile of choice. The courts regard the acquisition of a domicile of choice as a serious matter which is to be found only on clear and compelling evidence.[16] However, "the importance of onus of proof is easily exaggerated. While the burden of proof always exists, few

---

14 [1980] STC 596 at p.604.

15 See s.200 FA 1996; the section was (unhelpfully) rewritten for IT purposes in s.835B ITA 2007. This unprincipled provision was intended to encourage UK expatriates to vote without imperiling their claim to be non-UK domiciled: it did not help the Government in the 1997 election. (In practice if voting was not mentioned in evidence, a judge might make a quiet inference that the individual did do so.)

16 But just how "clear and compelling" the evidence needs to be depends on the facts of the case in point: *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [84] to [96].

substantial cases turn upon it and in making their factual findings the judge is usually expressing their considered judgment as to what in truth occurred".[17] If that is right, the reform often proposed of amending the burden of proof in domicile cases will have no practical effect.

## 2.5 Retaining foreign domicile of origin while UK resident

Suppose an individual with a foreign domicile of origin comes to the UK and wishes to retain their foreign domicile. The concern is not to acquire a UK domicile of choice.

The primary advice to be given is clear: the individual may live in the UK as long as they wish from year to year but should not form the intention to settle here permanently. Unless they do so, the essential condition for the acquisition of a new domicile will not be satisfied.

However, the individual should not be content with this mental step unless their stay here is short or fixed term. They should also take such appropriate steps to broadcast the absence of any intention of residing here permanently and to manifest an intention to return elsewhere in due course. This is important because the court will decide for itself the true intention of the individual and will be influenced by the way that the individual conducts their affairs while in the UK.

The individual should if possible retain ties with their country of origin. There are many ways by which they might do so and they need not adopt them all. Possibilities for consideration include regular and extended visits home; local business interests, bank accounts and investments; membership of local social, political and religious organisations. The individual should make a will taking effect under local law.[18] The will should include a declaration that the individual intends to return home in due course or the circumstances in which that is to occur. The will might if appropriate express a desire to be buried in that country. The declaration should be drafted in accordance with the individual's specific circumstances; a standard form declaration of domicile is inadequate.[19]

---

17 Bingham, "The Judge as Juror", *Current Legal Problems* (1985) p.2; reprinted in *The Business of Judging*, (2000) p.2 (good holiday reading).

18 A separate UK will may also be appropriate to deal with UK property.

19 For an example of a simple declaration rightly disregarded, see *Reddington v MacInnes* [2002] ScotCS 46 accessible *www.bailii.org*. (If those drafting the will had considered domicile more carefully, the litigation might have been avoided.) For

Conversely, the individual's social and business commitments in the UK should be minimised. The purchase of a home in this country might indicate a greater degree of permanence than rented accommodation, but purchasing a property may imply nothing more than an intention of medium-term residence. The development of other long-term commitments to the community, such as changing one's name (or its spelling) to accord with UK usage, are to be avoided.

The purchase of a burial plot provides some indication of an intention to be buried in that country. If that is the country of residence it might indicate an intention to remain in that country for the rest of the individual's life. If the burial plot is in the country of origin it provides some evidence of an intention to return home in due course. However, this is not necessarily a matter which carries much weight and if done at the suggestion of a tax advisor, it carries no weight at all.

The assembling of evidence of an intention to return to the country of origin, while obviously helpful, is not strictly necessary and in some cases will be unnecessary, maybe even inappropriate. The retention of the foreign domicile of origin is not dependent on establishing a positive intention to return home; rather, it is determined negatively by the absence of an intention to stay in the UK. An intention to move from the UK, whether to the country of origin or somewhere else, would be enough to enable the domicile of origin to be retained.

### 2.5.1 *Involvement in politics*

The general rule is that involvement in UK politics is compatible with a non-UK domicile though it is a factor to be taken into account in ascertaining domicile. However, MPs and members of the House of Lords are deemed UK resident and domiciled[20] and the position of other foreign domiciled politicians is politically fraught.[21]

The rule that only a UK resident and domiciled person may make a gift

---

precedents, see Kessler & Sartin, *Drafting Trusts & Will Trusts* (10th edn, 2010) para 18.23 (Best form of will for foreign domiciled testator).

20 See App2.1 (Tax status of MPs and members of the House of Lords).

21 This has been the case at least since the 1920's where the peerage given to Lord Vestey (who had been a tax exile) gave rise to some debate: see "*Vestey: Royal Commission evidence and ensuing debate*" accessible in the TFD archive *www.kessler.co.uk*.

(above a nominal amount) to a political party[22] is a further restriction on the rights of non-residents and foreign domiciliaries to engage in UK politics.

## 2.6 Acquisition of foreign domicile of choice

The domicile rules are favourable to foreign domiciliaries since they may stay many years in this country without acquiring a UK domicile and becoming exposed to the concomitant tax burden. But the rules are correspondingly unfavourable to the individual who wishes to replace their UK domicile of origin by the acquisition of a foreign domicile of choice. Such a person must not only reside in that other country; they must maintain and manifest their intention to remain resident there permanently.

An individual cannot shed their UK domicile of origin without acquiring a domicile of choice in another territory; it is not enough to intend to leave the UK permanently, never to return. The domicile of origin is not lost by abandonment but by replacement. Departure from the UK must therefore be accompanied by permanent residence in the chosen territory. If any time is spent in the UK, the UK must not be the chief residence

The acquisition of a foreign domicile which is motivated purely by tax considerations is possible in theory but may be difficult in practice as the intention to live in the territory may prove to be insufficiently firm. Sir Charles Clore is an example:

> ... Sir Charles was ... unhappy in Monaco and often said that he would really like to return to England permanently and accept the tax consequences. [A witness] asked him why he had decided to go there when all his interests were elsewhere. Sir Charles said that he did not know and that he was thinking of changing his mind and returning to live in England... he did not feel at home in Monaco.[23]

On those facts the Court found that Clore did not acquire a domicile of choice in Monaco.

In order to acquire a domicile of choice in a jurisdiction, one must *want*

22 Section 54 Political Parties, Elections and Referendums Act 2000 (as amended by the Political Parties and Elections Act 2009).

23 *Re Clore (No. 2)* [1984] STC 609 at p.615.

to live there. If a UK domiciliary has plans of a business or personal nature which lead them to want to settle abroad, then acquiring a foreign domicile may be feasible. Links with the UK must be kept to a minimum, particularly at first, and the facts must be clear. Fawcett concluded in 1985 that an unspoken policy of not allowing individuals with a UK domicile of origin to escape UK taxes was influential in determining the result in domicile cases[24] and subsequent cases suggest this is still true.[25]

## 2.7 Loss of domicile of choice

Dicey states:

> Rule 13 – (1) A person abandons a domicile of choice in a country by ceasing to reside there and by ceasing to intend to reside there permanently or indefinitely, and not otherwise.

For the meaning of "reside" and "indefinitely" see 2.4 (Domicile of choice). Dicey continues:

> (2) When a domicile of choice is abandoned, either
> (i) a new domicile of choice is acquired; or
> (ii) the domicile of origin revives.[26]

The concern of a person who has a UK domicile of origin but has acquired a foreign domicile of choice is that they may lose their domicile of choice. They must:

(1) maintain their residence in the country of domicile of choice; or
(2) maintain the intention to reside there permanently; or
(3) acquire a new foreign domicile of choice.

## 2.8 Dual residence and domicile

The tests of residence and intention to reside are straightforward if a

---

24 "Result Selection in Domicile Cases" (1985) OJLS vol 5 p.378. Accessible *www.ojls.oxfordjournals.org/content/5/3/378.full.pdf.*

25 Cases in which an apparently strong claim of a UK domiciliary to acquire a foreign domicile of choice failed include: Portland; Gaines-cooper.

26 *Conflict of Laws*, 14th ed., paras 6R-033 and 6R-074.

person resides (and intends to reside) in only one country. What if the person resides (or intends to reside) in more than one country? Increased mobility makes this a greater problem than in the past.

### 2.8.1 *Acquisition of domicile of choice by dual resident*

In *Udny v Udny* Lord Westbury said that a domicile of choice is acquired when:

> a man fixes voluntarily his sole *or chief* residence in a particular place, with an intention of continuing to reside there for an unlimited time.[27]

If a person resides in a number of countries, it is considered that they acquire a domicile of choice in country A if and only if:

(1) country A is their chief residence; and
(2) their intention is permanently to reside in country A as their chief residence.

*Plummer v IRC* 60 TC 452 comments on the *Udny* dictum. Hoffmann J said:

> ... a person who retains a residence in his domicile of origin can acquire a domicile of choice in a new country only if the residence established in that country is his chief residence. [Counsel for the taxpayer] submitted that a person whose presence in a new country is sufficient to amount to residence may, notwithstanding that his chief residence remains in his domicile of origin, acquire a domicile of choice by evincing an intention to continue to reside permanently in the new country. I think that this submission is inconsistent with the passage which I have quoted from Lord Westbury and which has always been treated as an authoritative statement of the circumstances in which a domicile of choice may be acquired.

This should not be controversial.[28]

---

27 (1869) LR 1 Sc & Div App 441 at p.458. (Emphasis added.)

28 "It is possible for a person to have two homes, each in a different territory. In that event, the relevant enquiry is which of the two homes is the chief residence": *Re Shaffer* [2004] WTLR 457 at [11]. The same point is made in *IRC v Bullock* 51 TC 522 at p.539F where the expression used is "principal home". The concept is similar to the OECD tie-breaker test of "centre of vital interests."

## 2.8.2 *Loss of domicile of choice by dual resident*

The judge continued:

> Rule 13(1) of Dicey and Morris, if read literally, appears to go too far. This says that:
>
> > "A person abandons a domicile of choice in a country by ceasing to reside there and by ceasing to intend to reside there permanently or indefinitely, and not otherwise."
>
> These words might suggest that a domicile of choice (and presumably a fortiori a domicile of origin) cannot be lost unless the person in question has ceased altogether to reside there. I do not think that the rule was framed with dual residence in mind. At any rate, it seems to me that *Udny v Udny* (1869) LR 1 Sc & Div App 441 shows that loss of a domicile of *origin or choice* is not inconsistent with retention of a place of residence in that country if the chief residence has been established elsewhere.
>
> (Emphasis added)

This passage is obiter and has caused confusion. One needs to consider domicile of origin and domicile of choice separately:

(1) *Loss of domicile of origin.* The only way to "lose" a domicile of origin is to acquire a domicile of choice. This passage (so far as it concerns a domicile of origin) is correctly stating the point made at 2.8.1 (Acquisition of domicile of choice by dual resident).

(2) *Loss of domicile of choice.* There are two ways to "lose" a domicile of choice:
   (a) by acquiring a new domicile of choice;
   (b) by abandonment without acquiring a new domicile of choice.

The judge here is considering acquisition of a new domicile of choice.[29] The passage (so far as it relates to a domicile of choice replaced by a new domicile of choice) correctly states the point made at 2.8.1 (Acquisition of domicile of choice by dual resident) above.

---

In *IRC v Duchess of Portland* 54 TC 648, Nourse J said that the test was, in which of the two countries did the individual reside "as an inhabitant". That comes to the same thing, but to ask which of the two countries is the chief or principal residence is a much clearer and more direct way to approach the question.

29 Hence the words at the end of the passage ("if the chief residence has been established elsewhere").

What is the test for abandonment of a domicile of choice (without acquiring a new domicile) in a dual residence context? It is considered that Hoffmann is correct to say that T abandons his domicile of choice where:

(1) T acquires a domicile of choice in country A.

(2) T continues to reside in country A but

  (a) they cease to reside there as their chief residence; and

  (b) they cease to intend to reside there as their chief residence.

(3) T does not acquire a domicile of choice elsewhere.

This is consistent with the test of acquisition of domicile: see 2.8.1 (Acquisition of domicile of choice by dual resident).

### 2.8.3 *Which is the "chief" residence?*

The next question is exactly how one ascertains which of two competing residences is the chief one. There is guidance in *Plummer v IRC* 60 TC 452. Here, Miss Plummer had a domicile of origin in England. She intended to live in Guernsey, but was studying at university in London, so she spent only some weekends and holidays in Guernsey. In all, two-thirds of her time was spent in England and one-third in Guernsey. It was held that England remained her chief residence but the test was not just a matter of counting days:

> [Counsel for the taxpayer] submitted that the commissioners paid no regard to anything except the relative amounts of time which the taxpayer spent in England and Guernsey during the years in question. They ignored the quality of her presence in each country: the fact that she was in England solely for the purpose of education and in Guernsey because it was her family home. I do not think that this is a fair reading of the commissioners' decision. They set out at length the taxpayer's ties with Guernsey and her reasons for remaining in England. In deciding whether the house in St. Peter Port had become her chief residence, they said:
>
> > "We accept the [taxpayer's] evidence that she likes Guernsey and enjoys the amenities of the island when she is there, quite apart from enjoying the company of her family ... We do not underestimate the part which Guernsey plays in her thinking.."

> Nevertheless they said that these considerations did not outweigh the fact that the taxpayer had resided for the greater part of the year in England and that there had been no "break in the pattern" which would justify a finding that she had ceased to have her chief residence in England. She had not, to use the language of Lord Hatherley in *Udny v Udny*, LR 1 Sc & Div 441, settled in Guernsey.
> I think that this was a conclusion to which the commissioners were on the evidence entitled to come. I go further and say that in my judgment it was the right conclusion. If the taxpayer had in 1980 broken altogether with England and settled in Guernsey like her mother and sister and then, even after a relatively short interval, returned to England for study, the quality of her presence here might have been such as to prevent a revival of her domicile of origin. But the fact is that she has not yet settled in Guernsey, and the reasons why she has been unable to do so are in my view irrelevant. When there is no competing place of continuing residence, settlement may be established by presence for a very short time; even for a single day. But an inference of settlement from a short stay is difficult to draw when the person in question divides his physical presence between two countries at a time. To treat the house in Guernsey as her chief residence simply because it is the sole residence of her mother and sister would in my view be attributing to her a kind of quasi-dependent domicile for which there is no legal justification. And the fact that the taxpayer may intend to settle in Guernsey after her education and training are completed and then to remain permanently is not sufficient to give her a proleptic domicile of choice.[30]

## 2.9 Presence in UK because of illness

In *Moorhouse v Lord*, Lord Kingsdown said:

> Take the case of a man labouring under a mortal disease. He is informed by his physicians that his life may be prolonged for a few months by a change to a warmer climate and that at all events his

30 Likewise *Barlow Clowes International v Henwood* [2008] EWCA Civ 577 at [104]: "[The] test of chief residence ... cannot simply be a reference to the main home in terms of size or amenities. Nor can it be a reference to the home in which the subject spends the most time. The court has to look at the quality of the residence in order to decide in which country the subject has an intention to reside permanently."

> sufferings may be mitigated by such a change. Is it to be said that if he goes out to Madeira he cannot do that without losing his character as an English subject, without losing his right to the intervention of the English laws as to the transmission of property after his death, and the construction of his testamentary instruments. My lords, I apprehend that such a proposition is revolting to common sense, and the common feelings of humanity.[31]

Someone who comes to or stays in the UK for medical treatment will not become domiciled here. This is so even if the individual comes or stays for treatment of a final illness and knows that they will not recover to return home. This is so even if the individual has a UK domicile of origin, acquires a foreign domicile of choice, and returns here only for medical treatment.

However, that applies only to one who stays here purely for medical treatment or palliative care.[32] If, say, an individual comes to England who is housebound and needs long-term care, or because the weather in Bournemouth is better for their health than Falkirk,[33] the individual may acquire an English domicile; it depends of course on intention in each case.

## 2.10 Domicile and citizenship

### 2.10.1 *Retention of existing citizenship*

In *IRC v Bullock*, the court said:

> Domicile is distinct from citizenship. The fact that the taxpayer chose to retain his Canadian citizenship and not to acquire UK citizenship would not be inconsistent with his having acquired a domicile in the UK, but his adherence to his Canadian citizenship is, in my opinion, one

---

31 (1863) 10 HLC 272 at p.292. In *Udny v Udny* (1869) 1 LR Sc & Div 441, Lord Westbury said at p.458:

"There must be a residence freely chosen, and not prescribed or dictated by any external necessity, such as ... the relief from illness ..."

32 Citation of Tax Tribunal or Special Commissioners' decisions on domicile is not generally appropriate, as there are more than enough cases of higher authority. However, *Allen v HMRC* [2005] STC (SCD) 614 offers a convenient illustration.

33 As in *Reddington v MacInnes* [2002] ScotCS 46.

> of the circumstances properly to be taken into consideration in deciding whether he acquired a UK domicile.[34]

Similarly, in *Gaines-Cooper* the Commissioners noted that the taxpayer retained British citizenship, and did not apply for citizenship in the Seychelles.[35] Perhaps more significantly, his wife applied for British citizenship.

2.10.2 *Change of citizenship*

Similarly the House of Lords have said:

> Naturalisation is one thing; change of domicile is another: it is not the law either that a change of domicile is a condition of naturalisation, or that naturalisation involves necessarily a change of domicile.[36]

This is correct. However when British citizenship is acquired, it is necessary to look in a little detail at the circumstances of the case.

2.10.3 *Acquisition of British citizenship where home must be in the UK*

The current legislation is the British Nationality Act 1981. In order for a person to become a British citizen under this Act, it is often a requirement that:

> his intentions are such that, in the event of a certificate of naturalisation as a British citizen being granted to him, his home or (if he has more than one) his principal home will be in the UK.[37]

A person whose intention is that *their home will be in the UK* will generally acquire a UK domicile of choice. Although conceptually the requirement that ones "home is in the UK" is distinct from, and might fall

---

34 51 TC 522 at p.540. The point was also made in *Udny v Udny* 1 Sc & Div 441 at p.452: "The question of naturalization and of allegiance is distinct from that of domicile;" similarly at p.457.

35 *Gaines-Cooper v HMRC* [2008] STC 1665 at [141].

36 *Wahl v Attorney-General* (1932) 147 LT 382; [1938] All ER 922 at p.926 accessible *www.kessler.co.uk*.

37 See Sch 1 British Nationality Act 1981.

short of, an "intention to reside in the UK permanently or indefinitely" (in the domicile sense) the gap is exiguous and for practical purposes someone who has the one intention will have the other.

There are exceptions where a person who is naturalised on the basis that they intend their home to be in the UK may nevertheless not acquire a UK domicile of choice:

(1) In *F v IRC*[38] the individual lied in his naturalisation application; in the circumstances he did not acquire a UK domicile of choice.

(2) A person who intends to their home to be in the UK might not have decided whether to reside in England, Scotland or Northern Ireland: one cannot acquire a UK domicile of choice unless and until one intends to reside in one specific jurisdiction. However, in practice this will rarely if ever arise, since a person who intends their home to be in the UK (and by the time that they have made an application for naturalisation) will normally have decided where in the UK that home is to be.

A naturalised citizen may of course later change their intention and lose their domicile of choice in the UK.

### 2.10.4 *Acquisition of British citizenship where home need not be in the UK*

In some cases an applicant for naturalisation is not required to intend that their home will be in the UK. This was the case under the pre-1981 law and is sometimes the case under the present law.[39] In these cases it is strictly speaking consistent to say that the individual, though a naturalised citizen, may not necessarily have acquired a UK domicile of choice. However the fact of naturalisation still tends to suggest that the individual has formed the intention to live in the UK permanently: the issue is one for the Tribunal to decide in the light of all the facts.

The case law in this area needs some care as a cursory reading will

---

38 [2000] STC (SCD) 1.

39 A full discussion of naturalisation law is not possible here, but one alternative requirement is that the person intends, in the event of naturalisation, "to enter into, or continue in,

[a] Crown service under the government of the UK, or

[b] service under an international organisation of which the UK or Her Majesty's government therein is a member, or

[c] service in the employment of a company or association established in the UK."

See Sch 1 British Nationality Act 1981.

mislead.

*Wahl v Attorney-General* concerned an individual naturalised under the Naturalization Act 1870. Naturalisation then required an intention to reside in the UK. However in his application he went further and declared that he intended to reside permanently in the UK and had no intention of permanently leaving the UK. The House of Lords somewhat implausibly[40] found nevertheless that he did not intend to make his home in the UK and did not acquire a UK domicile of choice. But that was a finding of fact (not law) which depended on all the facts of the case.[41]

The point was reargued in *Steiner v IRC* concerning an individual naturalised under the British Nationality and Status of Aliens Act 1914. Here the naturalisation requirement was merely "to reside in His Majesty's dominions" but the individual went further and stated in his application that he intended "to reside *permanently* in His Majesty's dominions" (which, in the context, meant England). The Court rightly brushed *Wahl* aside:

> The Special Commissioners attached some importance to the declaration associated with the naturalisation application, and so do I ... I bear in mind, of course, the views expressed in the House of Lords in *Wahl v Attorney-General*. But the significance of such matters must be judged in the context of any particular case and the background against which the application for naturalisation and the statements therewith is to be viewed. ... I think it would be quite wrong for this Court to dismiss the view of the Special Commissioners ...

And again:

> Now, it is true that in *Wahl v Attorney-General* a similar application and a statement in somewhat similar terms were regarded by the majority of the House of Lords as not affording any strong evidence of intention to reside permanently in England; but Lord Macmillan, in a dissenting speech, was of opinion that considerable weight should be attached to these matters, and Lord Atkin, who was one of the majority, said, at page 385: "I am far from saying that an application for naturalisation is not a

40 (1932) 147 LT 382; [1938] All ER 922 accessible *www.kessler.co.uk*. Lord Macmillan dissented and the failure of the mainstream law reports to report the case may be taken as tacit disapproval.

41 Nowadays the Supreme Court would not concern itself with issues of fact.

> matter to be carefully considered as part of the evidence in a case of domicile"; and the opinion of Lord Atkin was entirely concurred in by Lord Dunedin. In those circumstances, it appears to me that the Special Commissioners acted entirely properly in taking into account the fact of the application for naturalisation, to which they indicated that they did not attach great weight, and further in taking into account the statement made as to the applicant's intentions as to residence.[42]

### 2.10.5 *Commentary*

Naturalisation involves entering into a reciprocal relationship by which an individual offers loyalty to the state in exchange for protection.[43] It is suggested that there should be a rule that naturalised citizens are deemed to be UK domiciled for UK tax purposes. On this point tax exemption for foreign domiciliaries could without difficulty be better targeted. Of course this would only affect the minority of naturalised citizens (I do not know how small but there are apparently some[44]) who are not UK domiciled under general principles.

This would also reverse the unsatisfactory result in *F* (who was held not UK domiciled because he lied about his intentions in his naturalisation application).[45]

## 2.11 Refugees, illegal immigrants and temporary visas

Refugees may be forced to sever most of their links with their country of origin. But while that may show they had no intention to return to their country of origin, it would not, by itself, show that they had acquired an intention to reside in the UK permanently.

A person in a country illegally may become domiciled there, though the illegality is a factor in deciding whether they have a genuine intention of remaining there.[46]

---

46 *Mark v Mark* [2006] AC 98.

In *Barlow Clowes International v Henwood*:

> He was not able to live there on a permanent basis without the permission of the Mauritian government. His residence was ... in that sense precarious. This does not make it impossible for him to acquire a domicile of choice in Mauritius but makes it less likely that he did so.[47]

## 2.12 Married women

### 2.12.1 *Marriage after 1 January 1974*

Until 1 January 1974, a married woman had the domicile of her husband (a "domicile of dependency"). However, s.1 Domicile and Matrimonial Proceedings Act 1973 now provides:

> (1) Subject to subsection (2) below, the domicile of a married woman as at any time after the coming into force of this section shall, instead of being the same as her husband's by virtue only of marriage, be ascertained by reference to the same factors as in the case of any other individual capable of having an independent domicile. ...
> (3) This section extends to England and Wales, Scotland and Northern Ireland.

Although a wife does not automatically acquire the domicile of her husband, the decision to marry and set up a home in the UK may be evidence of an intention to reside in the UK permanently, but of course that depends on all the facts.[48]

### 2.12.2 *Marriage existing on 1 January 1974*

The position of women who married before 1 January 1974 is more complex. Section 1(2) Domicile and Matrimonial Proceedings Act 1973 provides:

---

47 [2008] EWCA Civ 577 at [119].

48 This is obvious but if authority is needed, see *Cyganik v Agulian* 8 ITELR 762 at [46]. Likewise the fact that T's spouse is UK resident may tend to suggest that T has not acquired a foreign domicile of choice; see (if authority is needed) *Gaines-Cooper v HMRC* [2008] STC 1665 at [46] [47].

> Where immediately before this section came into force a woman was married and then had her husband's domicile by dependence, she is to be treated as retaining that domicile (as a domicile of choice, if it is not also her domicile of origin) unless and until it is changed by acquisition or revival of another domicile either on or after the coming into force of this section.

In *IRC v Duchess of Portland* 54 TC 648, the duchess married before 1974 and so acquired a domicile of dependency. She resided in the UK but never intended to reside in the UK permanently. After 1974 she continued to reside in the UK. She therefore retained her former domicile of dependency ("as a domicile of choice"). That domicile could only be abandoned by ceasing to intend to reside in the UK permanently (which she did) *and* ceasing to reside in the UK (which she did not).

In Ireland the wife's domicile of dependency was held unconstitutional[49] and it is an interesting question whether the English transitional provision is consistent with the Human Rights Act 1998. In practice the issue may never arise.

### 2.12.3 *Marriage ended before 1 January 1974*

In *Re Wallach*[50] a widow died five days after the death of her husband. The judge held that a married woman retained her domicile of dependency when the marriage ceased, unless and until she changed it (by abandonment or by acquisition of a new domicile of choice).

It has been said that the test for abandonment of a domicile of dependency is more lenient than the test for abandonment of a domicile of choice.[51] However, it is submitted that the *test* is the same: the individual must (1) cease to reside in the place of domicile of dependency and (2) cease to intend to reside there permanently. However, in the case of a domicile of dependency the individual may never have intended to reside there permanently, so requirement (2) may in practice be easier to satisfy. The test is more lenient in that the onus of proof is more easily satisfied.

49 *JW v JW* (1992) 4 Irish Tax Reports p.437.
50 [1950] All ER 199.
51 *IRC v Duchess of Portland* 54 TC 648 at p.655.

### 2.12.4 *Woman a US national*

The US/UK DTA[52] undoes the domicile of dependency for a woman who is a US national. Article 4(6) of the treaty provides:

> A marriage before January 1st, 1974 between a woman who is a United States national and a man domiciled within the UK shall be deemed to have taken place on January 1st, 1974 for the purpose of determining her domicile for UK tax purposes, on or after the date on which this Convention first has effect in relation to her.

As far as I am aware, the US Treaty is the only one which does this. The IRS comment:

> under UK law, a female US citizen who married a UK domiciliary male before January 1, 1974, does not have the same opportunity to prove a domicile outside the UK as does a male US citizen who married a UK domiciliary female before January 1, 1974. Paragraph 6 of the Convention equalizes the treatment of male and female US citizens in this situation.[53]

Perhaps this reflects a cultural difference, a greater sensitivity to gender equality issues in the US. This rule does not however apply where a *UK* woman marries a *US* man before 1 January 1974. In that case the woman keeps her domicile of dependency. In this situation a woman is in a better position than a man.

## 2.13 Child's domicile of dependency

The domicile of children is not usually important during their minority. However if a child acquires a domicile of dependency during their minority that domicile will continue until lost by abandonment or by acquisition of a new domicile of choice, so the issue occasionally arises well after a child has become an adult.

---

52 The USA IHT DTA does not contain the same rule.

53 Department of the Treasury Technical Explanation of the Convention.

### 2.13.1 *Child's domicile in England and Northern Ireland*

Dicey states:

> Subject to [s.4 Domicile and Matrimonial Proceedings Act 1973 discussed below] the domicile of an unmarried child under sixteen is determined as follows:
> (1) the domicile of a legitimate child is, during the lifetime of his father, the same as, and changes with, the domicile of his father;
> (2) the domicile of a legitimated child is, from the time at which the legitimation takes effect, during the lifetime of his father, the same as, and changes with, the domicile of his father;
> (3) the domicile of an illegitimate child and of a child whose father is dead is, in general, the same as, and changes with, the domicile of his mother;
> (4) the domicile of a legitimate or legitimated child without living parents, or of an illegitimate child without a living mother, probably cannot be changed;
> (5) the domicile of an adopted child is determined as if he were the legitimate child of the adoptive parent or parents.[54]

Section 4 Domicile and Matrimonial Proceedings Act 1973 provides:

> **Dependent domicile of child not living with his father**.
> (1) Subsection (2) of this section shall have effect with respect to the dependent domicile of a child as at any time after the coming into force of this section when his father and mother are alive but living apart.
> (2) The child's domicile as at that time shall be that of his mother if—
> (a) he then has his home with her and has no home with his father; or
> (b) he has at any time had her domicile by virtue of paragraph (a) above and has not since had a home with his father.
> (3) As at any time after the coming into force of this section, the domicile of a child whose mother is dead shall be that which she last had before she died if at her death he had her domicile by virtue of subsection (2) above and he has not since had a home with his father.
> (4) Nothing in this section prejudices any existing rule of law as to the cases in which a child's domicile is regarded as being, by dependence, that of his mother.
> (5) In this section, "child" means a person incapable of having an

54 Conflict of Laws, 14th ed, para 6R-090.

independent domicile.
(6) This section extends to England and Wales, Scotland[55] and Northern Ireland.

### 2.13.2 *Child's domicile in Scotland*

The position is different in Scotland. Section 22 Family Law (Scotland) Act 2006 provides:

> **Domicile of persons under 16**
> (1) Subsection (2) applies where—
> (a) the parents of a child are domiciled in the same country as each other; and
> (b) the child has a home with a parent or a home (or homes) with both of them.
> (2) The child shall be domiciled in the same country as the child's parents.
> (3) Where subsection (2) does not apply, the child shall be domiciled in the country with which the child has for the time being the closest connection.
> (4) In this section, "child" means a person under 16 years of age.

Scots law (like most countries but not, yet, England) has abolished the status of illegitimacy and this provision reflects that principle.

It is an interesting, important and unresolved question whether this reform of the law of domicile applies for the purposes of taxation. It is considered that it does not, since the Scottish Parliament has (with immaterial exceptions) no jurisdiction in relation to taxation. It might be argued that a reform of the general law, which merely has an incidental consequential effect on taxation, is within the power of the Scottish Parliament.[56] But then what is the position of a person who is UK domiciled under English law principles but not under Scots law (or vice versa)? Probably the tax position would depend on whether the case were litigated before a Scots or an English Tribunal; or else some system of

55 Schedule 3 Family Law (Scotland) Act 2006 repeals this section in relation to Scotland. However see below on whether this has effect for the purposes of taxation.
56 Note that when the Scottish Parliament amended the Scots law of charity, it provided that the new law did not apply for taxation purposes: see Kessler & Brown, *Taxation of Charities and Non-Profit Organisations*, (8th ed., 2011), para 2.17 (Scots law definition of charity).

priority would need to be devised as a judicial ad hoc solution. Neither is satisfactory. Admittedly, the same problem could in theory have arisen even before the 2006 Scots law, but in practice it probably never did.

The RDR manual para RDRM22120 assumes that the Scottish provision does have effect for tax purposes. It is possible to envisage circumstances where a taxpayer may wish to argue the opposite, but perhaps fortunately, that will not often arise.

## 2.14 Republic of Ireland/Northern Ireland

Para 8 Government of Ireland (Adoption of Enactments) (No. 1) Order, 1922 provides:

> For the purpose of determining the domicile of any person, Northern Ireland shall be deemed always to have been a separate part of the UK.

In *Re M*[57] the question arose concerning a person's domicile prior to the partition of Ireland in 1922. A person who lived all their life in what is now Northern Ireland was held to be domiciled in the part of the divided territory in which they had resided.

## 2.15 HMRC rulings and domicile investigations

There is no statutory rulings procedure.[58] HMRC formerly provided an informal rulings service but that was cut back in HMRC Brief 17/09 and abolished in HMRC Brief 34/10. The official reason for the change of practice was as follows:

> The publication of our new guidance on domicile, plus the fact that from 2008-09 onwards a claim to the remittance basis is no longer mandatory, and must be made on a year by year basis where an individual has unremitted foreign income or gains of £2,000 or more arising in the tax year, mean that HMRC will no longer accept initial non-domicile claims on form DOM 1 or form P86. Form DOM 1 is being withdrawn

---

57 [1937] NI 159. This was followed in *Re P* [1945] Ir Jur Rep 17.

58 The ruling procedure for ordinary residence and domicile in ss.42 and 43 ITEPA and s.9(2) TCGA was repealed in 2008. It is a matter of speculation, but perhaps the decision to withdraw the informal residence and domicile rulings procedure had already been made at that stage (though not implemented until a year later).

> completely. It will be replaced by the new comprehensive domicile guidance mentioned above that will allow the vast majority of people to self assess their own domicile status.

The true reason was no doubt that the former rulings procedure was judged not to be efficient use of limited HMRC resources.

Domicile rulings are obtainable on a death. The form is IHT401 (Domicile outside the UK). IHTM 13011 explains the HMRC practice on receipt of this form.

### 2.15.1 *Effect of old HMRC rulings*

HMRC Brief 17/09 provides:

> Where an individual has already submitted a form DOM 1 or P86 and obtained an initial view from HMRC about their domicile status it will be unusual for us to open an enquiry into domicile status in the few years after that, unless new information becomes available that indicates our initial view was incorrect or there has been a change in circumstances. However with the passage of time, circumstances and intentions change and so that initial view from HMRC can become less and less useful as an indicator of domicile status. For example if an individual had advised HMRC on their arrival in England a decade or so ago that they planned to leave the UK after five years but had since married, had a family and decided to make England their permanent home then they will have adopted a domicile of choice within the UK.
>
> **Domicile and Inheritance Tax**
>
> ... As is currently the case, where HMRC has expressed an opinion on the domicile status of a settlor for Inheritance Tax purposes we will not normally seek to reconsider that opinion unless new information becomes available that indicates our initial opinion was incorrect or there has been a material change in the circumstances of the settlor. However, when we make a decision it applies only to the date of the transaction concerned. So if circumstances change, the individual returns to the UK for example, that individual's domicile may need to be considered again at another point in time. Domicile is not a static thing, it can change as people's circumstances and intentions change.
>
> ... Where HMRC has expressed a view on an individual's domicile status for income tax or capital gains tax purposes, as a result of an enquiry, then that view will also apply for Inheritance Tax purposes at that time. Likewise a HMRC view expressed for Inheritance Tax purposes,

following a Part VIII IHTA enquiry, will also apply for income tax and capital gains purposes at that time. However, it is important to remember that each decision on domicile will be made at a certain point in time, if circumstances have changed since the time of the relevant decision, the domicile of the taxpayer may also have changed.

### 2.15.2 *When will HMRC make domicile enquiries*?

In the absence of a ruling, the usual enquiry system applies. HMRC Brief 17/09 provides:

> **Enquiries into domicile status**
> For 2008-09 and later years, in order to make a valid claim to the remittance basis individuals will be required to state on their Self Assessment tax return the grounds for their entitlement by stating either that they are not domiciled in the UK or that they are not ordinarily resident in the UK (or both). The new domicile guidance will help individuals decide their domicile status, supported as appropriate by any professional advice they may obtain. As a result, if HMRC decides to enquire into an individual's domicile status this will be by way of a section 9A TMA enquiry into their Self Assessment tax return. (Alternatively in appropriate cases HMRC may enquire into an individual's domicile status by way of a Part VIII IHTA enquiry into an Inheritance Tax return.) Where a claim to the remittance basis is not challenged for that year it does not mean HMRC necessarily accepts the individual's domicile is outside the UK and does not prevent HMRC from later opening an enquiry to consider the domicile status of the individual in relation to that, or any earlier year.

HMRC Brief 34/10 provides:

> In future HMRC will consider opening an enquiry where domicile could be an issue, or making a determination of Inheritance Tax in such cases, only where there is a significant risk of loss of UK tax.
> The significance of the risk will be assessed by HMRC using a wide range of factors. The factors will depend very much on the individual case but will include, for example:
> - a review of the information available to HMRC about the individual on HMRC databases
> - whether there is a significant amount of tax (all taxes and duties not just Inheritance Tax) at risk
>
> HMRC does not consider it appropriate to state an amount of tax that

would be considered significant, as the amount of tax at stake is only one factor.[59] It should be borne in mind that HMRC will take into account the potential costs involved in pursuing an enquiry, and also those of potential litigation should the enquiry not result in agreement between HMRC and the individual; clearly such costs can be substantial.
Where HMRC does open an Inheritance Tax enquiry in any of these cases, it will keep the factors in view and may stop the enquiry at any stage if it considers the continuation of the enquiry is not cost effective. The outcome of such an enquiry may be that HMRC does not consider it appropriate to make a determination of the Inheritance Tax.
Individuals should also bear in mind that enquiries into domicile involve a detailed inquiry into all of the relevant facts and HMRC is likely to require considerable personal information and extensive documentary evidence about the taxpayer and the taxpayer's close family.

### 2.15.3 *How HMRC investigates domicile*

HMRC Brief 17/09 provides:

> Enquiries aimed at establishing an individual's domicile are, by their very nature, examinations of an individual's background, lifestyle, habits and intentions, possibly over the course of a lifetime. Consequently, any such enquiries conducted by HMRC will, where necessary, extend to areas of individuals' and their families' affairs that may not normally be regarded as relevant to their UK tax position. As a result of some feedback from customers on such domicile enquiries our new domicile guidance includes a section starting at paragraph 49600 [now the RDR Manual 23070] which explains the nature of a domicile enquiry and the sorts of questions an individual will need to answer as part of that enquiry.

The RDR Manual provides:

> **RDRM23080 - Domicile: Enquiries into domicile status: Schedule of useful information and documents**
> The list below shows the types of information that might be requested during an enquiry. It should not be regarded as either prescriptive or comprehensive, and the individual may offer other relevant information or evidence for consideration too.

59 [Authors footnote] This is obviously less than frank; the true (and perfectly proper) reason to withhold this information must be to prevent fraud.

Any information request should be tailored to the particulars of the individual's claim, and their present circumstances. It is always important to think about the relevance of particular items of information to the detailed subject matter of each enquiry. An information request need not be limited only to the items listed here, nor will all items listed necessarily be appropriate in all cases. It may not be possible for some individuals to provide some of the items on the list, even if they would be useful to an understanding of their domicile status. Given the inevitable passage of time in many cases, HMRC and the individual may need to consider how best the facts can be checked and tested.

**Information**

Date of birth.

Full name at birth.

Parents' full names, including mother's maiden name, and places of birth.

Place of birth, identifying the relevant law territory.

Background to the place of birth, if this was not in the same territory as the parental home at the time.

Details of any name changes, and where, if at all, such changes were registered.

Nationality (citizenship) at birth, including an explanation of its basis where this is not obvious from the context.

Details of any changes in or additions to the nationality (citizenship) at birth, with explanations of the relevant background.

Family background, including marital status of parents during the period of derived domicile.

Information about any adoption proceedings.

If parents were not living together at any time during the period of derived domicile, an explanation of the background to this matter and how parental responsibilities were exercised.

Information about relationships entered into by parents following their separation during the period of derived domicile.

Details of siblings

List of places of residence from birth to the time of the enquiry, including home addresses.

An explanation of the reason for residence at each place on the list.

Details of legal rights of residence in respect of each place and a summary of any visas, permits or other official documents required.

Summary of educational background, including places of education, periods of attendance and qualifications obtained.

Details of military service.

Details of governmental or diplomatic service.

Summary of employment and/or business history.

Explanation of employment and/or business plans, including anticipated retirement, and any arrangements that are in place in respect of these matters.

A detailed summary of properties that have been available for use other than as short-term holiday lettings. This should include the addresses of all the properties, a description of them, details of their ownership, the periods during which the properties have been available, and an explanation of how they have been used when not occupied by the individual.

Details of all marriages, civil partnerships, separations and divorces, including information relating to other relationships involving long-term cohabitation. These should cover the full names of any relevant parties, their dates, places of birth and nationalities, the periods during which the relationships existed, the dates of any formal acts or ceremonies, information relating to the domicile of the other parties, and explanations of any periods during which the parties to the relationship did not live together.

Information about transfers of property, including those between spouses or civil partners.

A summary of the names, dates of birth and nationalities of the children of the individual.

Details of where any children were educated.

The current locations of any children and the relevant background.

Information relating to the exercise of political rights in any territory, as either a voter or a representative.

Membership of any political parties, or participation in campaigns or lobbying groups, and the extent of any activities.

Details of professional qualifications, membership of professional bodies and active participation in these, including offices held.

Summary of membership of clubs, societies, associations, organisations and other bodies, and details of the level of participation in these.

Information about any representative activities undertaken on behalf of a country, territory, or any political, territorial or other sub-division thereof.

The location of personal papers and any items of financial, sentimental or other value. If such items are moveable, the place where they are usually kept and details of any insurance policies in respect of them.

Details of any wills, including an explanation of the law by which the will is intended to be construed and upon which it relies for its formal validity.

Summary of any deeds, declarations, covenants and similar documents created, including those relating to dependants.

Information relating to any legal proceedings or other matters in which domicile was relevant, either as a basis for any action or as an evidential point.

Locations of members of the extended family, including a description of the relationship between the individuals.

Details of religious, cultural and social connections, including the degree of religious observation, the level of participation in social and cultural life, and ability to speak, read and write relevant languages.

Information about charitable and voluntary activities, including the foundation of charitable trusts, donations to charities and good causes, and active participation in the administration or fund-raising activities of third-sector organisations.

Summary of professional and personal advisers, including their locations and details of the nature and extent of the services that they provide.

An explanation of the individual's intentions for the future. What plans have been made? What contingencies have been taken into account? What would cause a change of residence? What provision has been made for the future? What has the individual actually done that provides evidence for the answers to these questions?

A summary of any connections not specifically mentioned above that the individual has with various territories. When did these begin and precisely what form have they taken over the years? How much time has the individual spent in each territory during the relevant period? What was the reason for such presence?

**49620**

The list in this paragraph deals with the types of documentary evidence that might be requested during an enquiry.

In some cases it might be necessary to request applications and other documents relating to the acquisition, loss or withdrawal of the items listed below.

Birth certificates
Adoption papers
Registrations of name changes
Marriage certificates
Civil Partnership certificates
Passports and identification documents
Social security documents
Applications for nationality (citizenship)
Documents renouncing nationality (citizenship)
Visas, residence permits, work permits and similar documents
Driving, firearms and other licences
Practising certificates and authorisations from professional or regulatory bodies
School records and reports
Examination certificates
Military service records
Employment contracts
Business accounts, reports and planning documents
Conveyances, leases, tenancy agreements and other documents relevant to the ownership, occupation or use of property
Mortgage and loan agreements
Health insurance policies
Property, motor and other insurance policies
Life assurance policies
Documents relating to savings, retirement and pension plans
Wills, expressions of wishes, deeds of covenant and other legal documents
Personal financial records, including bank account and credit card statements and documents relating to investments
Documents confirming membership of or participation in organisations and activities
Personal correspondence, photographs or electronic records relating to an individual's background, lifestyle and intentions

This is a daunting list, but forewarned is forearmed.

## 2.16 Domicile of company

The domicile of a company is where it is registered, which is the place of incorporation.[60] Domicile of a company is only rarely significant for tax or any other purpose.

60 *Gasque v IRC* 23 TC 209; Dicey & Morris *Conflict of Laws*, 14th ed, para 30-002.

CHAPTER THREE

# RESIDENCE OF INDIVIDUALS

## 3.1 Why do residence and ordinary residence matter?

Residence is fundamental to the territorial limitations of income tax and CGT. It is not possible to give a full list but the most important are:
(1) Income tax on foreign income is limited to UK residents.
(2) Income tax on certain UK source income is limited for non-residents.
(3) Capital gains tax is limited to UK residents.[1]
Ordinary residence does not matter as much as residence. The main differences (all advantages) for an individual who is resident but not ordinarily resident in the UK (compared to one who is resident *and* ordinarily resident) are as follows:
(1) The transfer of assets abroad provisions do not apply.[2]
(2) Different employment income rules apply.[3]
(3) The RFI remittance basis applies even if UK domiciled.[4]
(4) Different NIC rules apply.[5]
(5) FOTRA securities qualify for IT and IHT exemptions.[6]
Residence is also important for non-tax purposes, such as jurisdiction.

### 3.1.1 *Cross references*

This chapter considers residence of individuals: see too 4.1 (Residence of trustees); 5.1 (Treaty-residence); 36.8 (Residence of partnership); 67.3

Residence of companies is a subject which deserves to be addressed in length and depth. I omit it here as it is well covered elsewhere.[7]

For MPs and members of the House of Lords, see App. 2.1 (Residence and domicile of MPs and members of the House of Lords). For visiting forces, see App. 3.1 (Residence of visiting forces).

## 3.2 The concepts of residence and ordinary residence

### 3.2.1 *Residence is a status*

The concept of "residence" is distinct from physical presence. A person may be UK resident at a time when not present in the UK (eg if absent on a day trip abroad). A person may be present in the UK without being UK resident. Residence is a legal status; contrast physical presence, which is not a status, just a simple physical fact.

### 3.2.2 *Residence during part of tax year*

The concept of "residence" is used in tax statutes in slightly different ways:

(1) Sometimes it is used to describe a status which one has (or does not have) at a particular moment of time.[8]

(2) Sometimes it is used to describe a status which one has (or does not have) during a period of time. The period need not coincide with a

---

7 For HMRC views see SP 1/90 and the International Tax Handbook chapters 3 and 4. For an important statement of judicial views, see Chadwick, "Control of Special Purpose Vehicles" [2007] Jersey & Guernsey Law Review 153 accessible *www.jerseylaw.je/Publications/jerseylawreview*. For general studies, see Couzin, *Corporate Residence and International Taxation* (2002); Brandon *Taxation of Non-UK Companies and their Shareholders* (2$^{nd}$ ed, 2002) and for historical perspective, see John Avery Jones "Jurisdiction to Tax Companies" in Tiley (ed.) *Studies in the History of Tax Law* (Vol 4, 2010) accessible *www.kessler.co.uk.*

8 For a non-tax example see s.4(1) Representation of the People Act 1983:

> "A person is entitled to be registered in the register of parliamentary electors for any constituency ... if *on the relevant date* he (a) is resident in the constituency ...".

For a tax example see 6.16.1 (Section 13).

tax year.[9]

I have considered whether the term is ever used to describe a status which one must have (or not have) specifically for the period of a tax year. Under this usage one could not cease to have the status of resident during a tax year: residence could only change at the beginning or end of a tax year. But I think this is not the case. There is of course a rule that someone who is resident in part of a tax year is strictly subject to income tax and GCT on income and gains arising in any part of the tax year, and the individual in this situation is sometimes said to be "resident *for* the tax year" (the language used in ESC A11).[10] But this does not mean that the individual has the status of resident throughout the year.[11] For instance, ESC A11 goes on to refer to "the period of residence here during the year" it is obviously using the word "residence" to describe a status which changes during a tax year.

If it matters (in practice the issue does not often raise difficulties) the context must determine which sense is meant. Sometimes the context makes it clear, eg s.13 TCGA applies if a person is resident at the time when the gain accrues to the company. Sometimes the context provides at least an inference, eg the CGT exit charge (which applies when the taxpayer ceases to be UK resident) applies at the time that the individual actually leaves, not at the end of the tax year.[12]

---

9 For a non-tax example see s.4(2) Representation of the People Act 1983:

> "A person is not entitled to be registered in the register of parliamentary electors for any constituency in Northern Ireland unless ... he has been resident in Northern Ireland *during the whole of the period of three months ending on the relevant date*."

10 See 6.2.1 ("Residing in the UK in a tax year" and similar expressions).

11 See *Smallwood v HMRC* in the High Court [2009] STC 1222 at [31]:

> "The UK tax provisions set out above create certain tax consequences for gains in a given year if [taxpayers] are resident here for part of the year. Where they apply, residence in part of the year gives rise to a charge to tax on gains made in another part of the year, but they do not do so by deeming the residence to be for any period longer than the actual period of residence. They do so simply by defining the gains by reference to the period in which they arise."

The same applies for income tax, though the provisions are not so clearly drafted. The High Court decision was reversed on appeal but that does not affect this point.

12 See 7.2 (Clawback of holdover relief on emigration of individual), 7.4 (Exit charge for trusts), and 7.8 (Emigration of individual trader); presumably the usage of s.2 TCGA applies generally for CGT.

### 3.2.3 *Ordinary residence during part of tax year*

Ordinary residence, like residence, is a legal status. Once again, the expression could be used in two different ways:

(1) to describe a status which one has (or does not have) at a particular moment of time, or during a period of time which need not coincide with a tax year.

(2) describe a status which one must have (or not have) specifically for a tax year. Under this usage one could not cease to be ordinarily resident during a tax year. Ordinary residence could only change at the beginning or end of a tax year.

But usage (1) is the normal meaning, and usage (2) would require a clear context to make it apply. It is considered that "ordinary residence", in an income tax or CGT context, is (in the absence of special context) a status which may change during a tax year. It is not a status which has to last an entire tax year.[13]

### 3.2.4 *The source of the concepts*

Given the centrality of the concept, it is surprising that there is nothing like a definition of "residence" in the legislation. Several statutory provisions impinge on the subject and residence has been discussed in a number of decisions by the courts. HMRC6 is also important, supplemented by other HMRC statements.

There is no statutory guidance on the meaning of "ordinary residence". Like simple residence, the meaning has been discussed in the case law and HMRC6 is important in practice.

This chapter first considers the statutory provisions, then the case law and then HMRC6.

We need terminology for the statutory rules (for which statute does not provide a label) and I coin the following terms:

**Temporary UK purpose rule**: s.831(1)-(3) ITA
**183-day rule**: s.831(4)(5) ITA
**Occasional residence abroad rule**: s.829 ITA.

---

13 Thus in *Genovese v HMRC* [2009] STC (SCD) 373 the taxpayer was held to be resident throughout 2001/02 but became ordinarily resident on 1 October 2002.

I refer to the three rules together as **"the statutory residence rules"**.

## 3.3 Temporary UK purpose and 183-day rules

### 3.3.1 *Temporary UK purpose rule*

Section 831(1) ITA provides:

> Subsection (2) applies in relation to an individual if—
> (a) the individual is in the UK
> [i] for some temporary purpose only and
> [ii] with no view[14] to establishing the individual's residence in the UK, and
> (b) during the tax year in question the individual spends (in total) less than 183 days in the UK...[15]

If these conditions are satisfied, one turns to s.831(2):

> Apply the following rules in determining the individual's liability for income tax.

Two rules now follow:

> *Rule 1*
> In relation to pension or social security income arising from a source outside the UK, treat the individual as non-UK resident for the purposes of the following ...

Rule 1 goes on to specify an exotic set of provisions in inordinate detail.[16]

---

14 ITA EN para 2477 states:
"Subsection (1)(a) refers only to 'view' and omits reference to 'intent' on the basis that 'view' is wider than 'intent' or 'intention'."
But it is considered that these words all mean the same thing.

15 A further paragraph follows: "In determining whether an individual is within para (a) ignore any living accommodation available in the UK for the individual's use." I deal with this paragraph at 3.6 (Accommodation in the UK).

16 "(a) Chapter 4 of Part 9 of ITEPA 2003 (tax on foreign pensions),
(b) Chapter 5A of that Part (tax on pensions under registered pension schemes) but only if the income is an annuity under a registered pension scheme within para 1(1)(f) of Schedule 36 to FA 2004,
(c) Chapter 10 of that Part (tax on employment-related annuities),

> *Rule 2*
> In relation to income arising from a source outside the UK, treat the individual as non-UK resident for the purposes of any charge under a provision mentioned in section 830(2) of ITTOIA 2005 (which contains a list of provisions under which relevant foreign income is charged).[17]

The two rules have the same effect (in relation to the income to which they apply): they treat the individual as non-resident for certain purposes. I refer to them together as "**the temporary UK purpose rule**". That label does not quite correctly summarise the conditions of s.831(1), no label could do so.

The rule is vague because of the word "temporary". The words in s.831(1)(a)[ii] ("and with no view to establishing the individual's residence in the UK") should, I suggest, be regarded as a paraphrase or explanation of "for some temporary purpose only". The additional words do not clarify the matter at all. A definition or explanation of residence cannot be helpful if it uses the word "residence" without explanation, as happens here.

The rule, however vague, is consistent with the natural meaning of residence since someone in the UK for a merely temporary purpose (whatever that means) would not be said to be resident in the ordinary sense (whatever that is).

Section 832 ITA provides the identical rule (set out in full) for the

---

(d) Chapter 15 of that Part (tax on voluntary annual payments),
(e) section 647 of ITEPA 2003 (meaning of 'foreign residence condition') but only in its application for the purposes of section 651 of that Act (which provides an exemption for tax under Chapter 14 of Part 9 of that Act), and
(f) Chapter 6 of Part 10 of ITEPA 2003 (taxable foreign benefits).

See sections 566 and 657 of ITEPA 2003 for the definitions of 'pension income' and 'social security income'."

For completeness, s.831(3) ITA provides:

"Para (e) of Rule 1 in subsection (2) applies only if—
(a) the individual makes a claim as mentioned in section 647(3)(a) of ITEPA 2003, and
(b) the Commissioners are satisfied that subsection (2) of this section applies in relation to the individual."

But all this is academic as the application of rule 1 never makes any difference in practice.

17 For completeness, the rule adds: "In this rule 'income' does not include income chargeable as a result of section 844 of ITTOIA 2005 (unremittable income: income charged on withdrawal of relief after source ceases)." But this is also academic.

purposes of Chapters 4 and 5 Part 2 ITEPA (employment income). Note that the temporary UK purpose rule only applies for certain income tax purposes, and the question of residence may arise for other income tax purposes.[18]

### 3.3.2 *183-day rule*

Section 831(4) ITA provides:

> Subsection (5) applies in relation to an individual if subsection (2) would have applied in relation to the individual but for subsection (1)(b).

This convoluted wording is rather more difficult to follow now it is rewritten in plain English than it was before the 2007 rewrite. The reader who patiently works through the labyrinth will conclude that subsection (5) applies if:

(a) the individual is in the UK
  [i] for some temporary purpose only and
  [ii] with no view to establishing the individual's residence in the UK, and
(b) in the tax year in question the individual spends in total 183 or more days in the UK.

If these conditions are satisfied, one turns to subsection (5):

> Apply the rules set out in subsection (2) in determining the individual's liability for income tax.
> But—
> (a) instead of treating the individual as non-UK resident in relation to the income and for the purposes mentioned in those rules, treat the individual as UK resident, and
> (b) ignore subsection (3).

Amended as subsection (5) requires, the rules in subsection (2) are:

18 For instance, residence may be relevant for the purpose of non-residents income tax relief; see 37.1 (Non-residents income tax relief).

*Rule 1*
In relation to pension or social security income arising from a source outside the UK, treat the individual as UK resident for the purposes of the following ... [the list is set out in the footnote above].

*Rule 2*
In relation to income arising from a source outside the UK, treat the individual as UK resident for the purposes of any charge under a provision mentioned in section 830(2) of ITTOIA 2005.

The two rules have the same effect (in relation to the income to which they apply): they treat the individual as UK resident for certain purposes. I refer to this as "**the 183-day rule**", though once again, that label does not quite correctly summarise the conditions of s.831(4).

The rule is relatively precise, since it is easy to count the 183 days. It is also consistent with the natural meaning of residence since someone who spends 183 days in the UK can in the normal sense of the word be said to be resident here. Like the temporary UK purpose rule, it is extended for (some) employment income purposes by s.832 ITA, but it applies only for certain IT purposes.

### 3.3.3 *Temporary purpose and 183-day rules: comments*

The two rules only cover some of the possible permutations of fact:

| **Name of rule** | **Temporary UK purpose** | **183 UK days** | **Resident** |
|---|---|---|---|
| Temporary UK purpose rule | Yes | No | No |
| 182-day rule | Yes | Yes | Yes |

What if a person is *not* in the UK for a temporary purpose? The section is silent. Presumably such a person:

(1) is in the UK for a permanent purpose, in which case they are resident; or
(2) is not in the UK at all (or in the UK, but not for any purpose?) in which case they are not resident.

## 3.4 Occasional residence abroad rule

Section 829 ITA provides:

> **Residence of individuals temporarily abroad**
> (1) This section applies if—
> (a) an individual has left the UK for the purpose only of occasional residence abroad, and
> (b) at the time of leaving the individual was both UK resident and ordinarily UK resident.
> (2) Treat the individual as UK resident for the purpose of determining the individual's liability for income tax for any tax year during the whole or a part of which the individual remains outside the UK for the purpose only of occasional residence abroad.

I call this the "**occasional residence abroad rule**".

"Occasional residence abroad" is hopelessly vague in the modern world. But the rule, however vague, is consistent with the natural meaning of "residence" since someone leaving for occasional residence abroad (whatever that is) would not be said to be UK resident in the ordinary sense (whatever that is).

In addition, the occasional residence abroad rule only covers one of several possible permutations of fact. What if the individual has left the UK for the purpose of occasional residence abroad (whatever that means) and before they left they were resident and not ordinarily resident, or they were not resident at all? The statute is silent. But presumably the individual would be regarded as non-resident.

This rule applies "for the purpose of determining the individual's liability for income tax". If one can identify other purposes the rule would not apply to it. The collection of tax from a UK representative of a non-resident individual would be an example, but the point is academic.

## 3.5 Statutory residence rules and natural meaning of "residence"

If the temporary UK purpose rule applies, the individual is treated as non UK resident (for certain IT purposes). If the 183-day rule applies, the individual is treated as UK resident (for certain IT purposes). If the occasional residence abroad rule applies, the individual is treated as UK resident for the purposes of determining the individual's liability for IT (but not for other purposes, such as rules relating to collection of tax). The statutory residence rules are irrelevant for ordinary residence.

If this is taken literally, it creates an absurdly complicated situation. There are at least three classes of individual:

| **Case No.** | **UK resident (general meaning)** | **Temporary UK purpose** | **183 days in UK abroad** | **Occasional residence** | **Status for most IT purposes** | **Status for other IT purposes** |
|---|---|---|---|---|---|---|
| 1 | Y | Y | N | | Non-resident | Resident |
| 2 | N | | Y | | Resident | Non-resident |
| 3 | N | | | Y | Resident | Non-resident |

The only solution to this problem is to downplay the importance of the statutory residence rules. One could say that the sections should be regarded as laying down rules which apply for income tax generally. Then the enormously detailed list in s.831(2) specifying types of income which are affected is unnecessary and inappropriate. There is a hint of this approach in the former Inspectors Manual para 43 which provided:

> In practice, however, ICTA, s 336 [now s.831 ITA] is applied to other Schedules and cases as its language has an "illustrative value" (see Rowlatt, J, in *Lysaght v CIR* 13 TC 511 at p.515) on all questions of residence.

But no distinction is drawn between residence for IT purposes and residence for NIC or jurisdiction purposes even though the latter have no equivalent statutory provisions. So the better view is that the statutory rules only state what would in any event be the normal meaning of residence. Then the statutory rules are entirely otiose.

If that is right, there is little point in considering separately "residence" in its ordinary meaning and then the statutory residence rules, as if they were separate and independent sets of rules.

In *Reed v Clark*, 58 TC 528, Nicholls J observes (at page 550 B):

> Despite the long history of the statutory provision now reproduced as s 49, [now s.829 ITA, the occasional residence abroad rule] the researches of very experienced Counsel have not revealed any reported decision in which a claim to tax has succeeded only by virtue of that provision. ...

The judge concluded that there was "little scope in practice" for the operation of the occasional residence abroad rule. There was no case where any of the statutory rules mattered from the inception of income tax until *Reed v Clark* in 1985; as far as I am aware there has been no case since then. It seems safe to say that such a case will never be.

## 3.6 Accommodation in the UK

### 3.6.1 *The supposed available accommodation rule*

It was formerly the official HMRC view that:

> Individuals are regarded as resident in the UK for tax purposes for a year, if they have accommodation available for their use and are present here at any time in the year.[19]

This is called "the available accommodation rule". John Avery Jones states tactfully that "it is difficult to see how the available accommodation rule ever arose".[20] More bluntly, the rule did not exist.[21] The supposed

---

19 Press Release 16 March 1993 [1993] STI 468. Likewise IR20 (1983 version) para 14:

> If you go abroad permanently but have accommodation available for your use in the UK, you will be treated as resident here for any tax year in which you visit the UK. The length of the visit does not matter. ...
> A visitor who has accommodation available here will be regarded as resident for any year in which he comes to the UK, however short his visit may be...

20 [1993] BTR 286.

21 The rule was inconsistent with the case law: see 3.8 (Case law on residence). In *Gaines-Cooper v HMRC* [2007] STC (SCD) 23 at [165] the Special Commissioners rightly said:

> "In general availability of accommodation is *a factor to be borne in mind* in deciding if a person is resident here ...".

The rule was expressly rejected in *High Tech International v Deripaska* [2006] EWHC 3276 [2007] EMLR 15 at [25]; *Cherney v Deripaska* [2007] EWHC 965 (Com) [2007] ILR 49 at [45]; and *Yugraneft v Abramovich* [2008] EWHC 2613 (Comm) at [487]

> "Purchases of expensive property in England which, in the case of a man of ordinary wealth, would suggest settlement here, may have no such significance to someone for whom money is no object. Mr Abramovich's use of the Lowndes Square property ... does not indicate that ... it was his usual or settled place of abode. It was not then the place in which, even for limited periods, he habitually and normally resided for a settled purpose. It was a place to which he came when visiting London...".

How, then, did HMRC ever come to hold that the rule existed? I guess that the rule was abolished by statute, in two stages.

### 3.6.2 *Full-time workers abroad*

From 1956, the supposed rule was abolished for those who worked full-time abroad. Section 830 ITA provides:

> (1) This section applies for income tax purposes if an individual works full-time in one or both of—
> (a) a foreign trade, and
> (b) a foreign employment.
> (2) In determining whether the individual is UK resident ignore any living accommodation available in the UK for the individual's use.

Section 830 then elucidates the terms used in subsection (1):

> (3) A trade is foreign if no part of it is carried on in the UK.
> (4) An employment is foreign if all of its duties are performed outside the UK.
> (5) An employment is also foreign if in the tax year in question—
> (a) the duties of the employment are in substance performed outside the UK, and
> (b) the only duties of the employment performed in the UK are duties which are merely incidental to the duties of the employment performed outside the UK in the year.
> (6) In this section—
> "employment" includes an office, and
> "trade" includes profession and vocation.[22]

Section 830(2) requires a total disregard of available accommodation. It

---

origins of the rule goes back to the late 19th or early 20th century, before home ownership became widespread. In those days the purchase of accommodation was an unusual and significant commitment, for the usual course was to rent or stay in a hotel, so it would generally be reasonable to regard anyone who made that commitment as UK resident. The change of home ownership patterns later made the rule a wholly inappropriate test for residence, but HMRC continued to propound it even after its rationale disappeared and was forgotten.

22 This uses terminology discussed elsewhere: if s.830(2) mattered, see 12.13 (Where are duties performed: incidental duties); and 3.25.1 (Meaning of "work full-time abroad").

disapplies the available accommodation rule and disregards the accommodation for all purposes.

### 3.6.3 *Partial disregard of accommodation*

In 1993 this disregard was extended. The drafting is opaque. Section 831(1)[A] ITA sets out the temporary UK purpose rule, discussed above:

> [A] Subsection (2) applies in relation to an individual if—
> (a) the individual is in the UK for some temporary purpose only and with no view to establishing the individual's residence in the UK, and
> (b) in the tax year in question the individual spends (in total) less than 183 days in the UK.

This is then qualified by s.831(1)[B]:

> [B] In determining whether an individual is within para (a) ignore any living accommodation available in the UK for the individual's use.

So one disregards available accommodation for the temporary UK purpose rule. But one does have regard to it for other purposes.[23] One purpose where one has regard to it is the occasional residence abroad rule.[24] Perhaps there are others. If this book is right that the temporary UK purpose rule is of nil or negligible importance, this was not the right way for Parliament to go about making the desired reform.

HMRC6 para 2.2 provides that one relevant factor in determining UK residence is:

> Property ties include a house or apartment that you own or lease, or property held primarily for investment but that also provides you with accommodation when you are in the UK. A house or apartment provided

---

23 Except for full-time workers abroad.

24 This was HMRC's intention when enacting the original legislation. Press Release [1993] STI 468 para 5:

> "Similarly, where an individual leaves the UK, the retention of a home here will continue to be a factor in considering whether he or she has left the UK permanently."

See too John Avery Jones [1993] BTR 286 and Philip Baker OTPR Vol 3 p.143.

> for your use for the duration of your time in the UK as part of an employment package is 'available accommodation' and is a tie to the UK.

This is consistent with s.831(1)[B] ITA because the statutory disregard applies for the temporary UK purpose rule and not the occasional residence abroad rule. However, the former available accommodation rule has been abandoned: it is no longer suggested that one day's presence and accommodation is sufficient to amount to UK residence.[25]

## 3.7 CGT statutory residence rules

Section 9(1) TCGA provides:

> In this Act "resident" and "ordinarily resident" have the same meanings as in the Income Tax Acts.

The drafter was understandably unsure whether this would incorporate the 183-day and temporary UK purpose rules which (supposedly) apply only to some types of income, so s.9(3)(4) TCGA provides CGT rules to the same effect:

> (3) Subject to sections 10(1) and 10A, an individual who is in the UK for some temporary purpose only and not with any view or intent to establish his residence in the UK shall be charged[26] to capital gains tax on chargeable gains accruing in any year of assessment if and only if the individual spends (in total) at least 183 days in the UK.
> (4) The question whether for the purposes of subsection (3) above an individual is in the UK for some temporary purpose only and not with any view or intent to establish his residence there shall be decided without regard to any living accommodation available in the UK for his

25 See 3.37 (Longer-term visitors). This was HMRC's intention when enacting the legislation was similar but somewhat more precise. Press Release [1993] STI 468 para 5:

> "There will be no change in the practice of treating as resident and ordinarily resident an individual who comes to and remains in the UK where he or she owns or acquires on a lease of 3 years or more accommodation in this country."

See too John Avery Jones [1993] BTR 286 and Philip Baker OTPR Vol 3 p.143.

26 The IT rules use the word 'treated'; the CGT equivalent uses the word 'charged' but the end result is the same.

use.

There is no express CGT equivalent for the IT occasional residence abroad rule, but that arguably is incorporated into CGT by s.9(1) TCGA. However in *Hankinson* [2009] UKFTT 384 at [40] the argument was not raised, and the Tribunal considered that the occasional residence abroad rule did not apply for CGT:

> s 334 [ICTA now the occasional residence abroad rule] relates only to income tax. Section 9(1) TCGA 1992 does not in terms extend the application of s 334 to capital gains tax; s 9(1) simply adopts for capital gains tax purposes the meanings which the expressions "resident" and "ordinarily resident" have in the Income Tax Acts. [chargeability to CGT] therefore depends on the presence or absence of residence and/or ordinary residence examined under common law principles.

If this book is right that the occasional residence rule is of nil or negligible importance, it does not matter; if not, we would have the undesirable position that a person might be resident for IT purposes but not for CGT.

## 3.8 Case law on residence

A person who does not meet the 183-day rule may still be resident here, but in what circumstances? Since the statutory provisions do not give a clear answer we turn next to the case law. Tax residence case law is voluminous (the existence of voluminous case law is itself a sign that the law is in disarray). Case law on "residence" in non-tax statutes is also relevant, as it applies the "ordinary" meaning of residence and follows the principles of the leading tax cases.[27]

The leading cases are *Levene v IRC* and *Lysaght v IRC* 13 TC 486 and 511. They reflect conditions of life in the 1920s but are still the basis for modern decisions.

There have been two recent attempts to summarise the case law. The

27 Under the Civil Jurisdiction and Judgments Order 2001 (SI 2001/3929) jurisdiction depends (in part) on residence. See *Yugraneft v Abramovich* [2008] EWHC 2613 (Comm) at [461]: "... the courts have sought to give the word [residence] the same 'ordinary' meaning in both tax cases (such as *Levene*) and jurisdiction cases (such as *Abbas*). It makes sense to do so. Resident for jurisdiction purposes but not resident for tax purposes is a distinction to be avoided if possible."

first identifies eight points:

> [1] the concept of residence is not defined in the legislation; the word therefore should be given its natural and ordinary meaning (*Levene*).
> [2] The words "residence" and "to reside" mean "to dwell permanently or for a considerable time, to have one's settled or usual abode, to live in or at a particular place" (*Levene*).
> [3] the question whether a person is or is not resident in the UK is a question of fact for the Special Commissioners (*Zorab*).
> [4] no duration is prescribed by statute and it is necessary to take into account all the facts of the case; the duration of an individual's presence in the UK and the regularity and frequency of visits are facts to be taken into account;
> [5] also, birth, family and business ties, the nature of visits and the connections with this country, may all be relevant (*Zorab*; *Brown*).
> [6] in general the availability of living accommodation in the UK is a factor to be borne in mind in deciding if a person is resident here (*Cooper*) (although that is now subject to [s.831(1)[B] ITA]).
> [7] the fact that an individual has a home elsewhere is not decisive, because a person may be dual resident (*Cooper* and *Levene*). However it may be a relevant factor (particularly if the home elsewhere is much more important).
> [8] there is a difference between the case where a British subject has established residence in the UK and then has absences from it (*Levene*) and the case where a person has never been resident in the UK at all (*Zorab*).

The second summary of case law identifies 13 points. Some relate to ordinary residence and some are covered by the above, but the following are worth noting separately:

> (iv) Residence in a place connotes some degree of permanence, some degree of continuity or some expectation of continuity: *Fox v Stirk* [1970] 2 QB 463; *Goodwin v Curtis* 70 TC 478;
> (v) However, short but regular periods of physical presence may amount to residence, especially if they stem from performance of a continuous obligation (such as business obligations) and the sequence of visits excludes the elements of chance and of occasion: *Lysaght v IRC* 13 TC 511...
> (xi) Although residence must be voluntarily adopted, a residence dictated by the exigencies of business will count as voluntary residence: *Lysaght v IRC* 13 TC 511;

(xii) The purpose, while settled, may be for a limited period; and the relevant purposes may include education, business or profession as well as a love of a place: *R v Barnet LBC ex p Shah* [1983] 2 AC 309;
(xiii) Where a person has had his sole residence in the UK he is unlikely to be held to have ceased to reside in the UK (or to have "left" the UK) unless there has been a definite break in his pattern of life: *Re Combe* 17 TC 405.

Some of these considerations are similar to that part of the OECD model treaty definition of treaty-residence, under which an individual with a home in two states is deemed to be treaty-resident in the state with which their personal and economic relations are closer (centre of vital interests); though this does not much help to resolve any practical issues of residence as that formula is almost equally imprecise.

I deal with these points separately.

### 3.8.1 *Residence has its natural meaning*

[1] the concept of residence is not defined in the legislation; the word therefore should be given its natural and ordinary meaning (*Levene*).

It is an interesting question whether the UK courts have really succeeded in (what is said to be) the aim of identifying and applying the "natural and ordinary meaning" of the word residence. It is difficult (perhaps impossible) to assess the issue objectively, but I think the general public would be surprised how little was needed to constitute UK residence. This was also the view of the Canadian Supreme Court.[28]

### 3.8.2 *Settled or usual abode*

[2] The words "residence" and "to reside" mean "to dwell permanently or for a considerable time, to have one's settled or usual abode, to live in

28 *Thomson v. Minister of National Revenue,* [1946] SCR. 209 at p.221, 224: ... *"Cooper v. Cadwaladar...* is the case of an American citizen living in the United States, who owned shooting rights in Scotland, where he spent a few months annually, and who was held liable in Scotland for income tax. I feel quite confident that no Canadian court, in similar circumstances, would hold that such a person... is a "resident" ... "it must, I think, be said that the language of "plain men" was stretched to the breaking point to encompass the facts that had been found by the Commissioners [in *Lysaght v IRC*] to be residence..."

or at a particular place" (*Levene*).

Viscount Cave said in 13 TC at 505:

> My Lords, the word "reside" is a familiar English word and is defined in the Oxford English Dictionary as meaning "to dwell permanently or for a considerable time, to have one's settled or[29] usual abode, to live in or at a particular place".

There follows a comment on (presumably short) absences:

> In most cases there is no difficulty in determining where a man has his settled or usual abode, and if that is ascertained he is not the less resident there because from time to time he leaves it for the purpose of business or pleasure.[30]

Similarly:

> (iv) Residence in a place connotes some degree of permanence, some degree of continuity or some expectation of continuity: *Fox v Stirk* [1970] 2 QB 463; *Goodwin v Curtis* 70 TC 478;
> (v) However, short but regular periods of physical presence may amount to residence, especially if they stem from performance of a continuous obligation (such as business obligations) and the sequence of visits excludes the elements of chance and of occasion: *Lysaght v IRC* 13 TC 511...

### 3.8.3 *Purpose*

> (xii) The purpose, while settled, may be for a limited period; and the relevant purposes may include education, business or

29 *Yugraneft v Abramovich* [2008] EWHC 2613 (Comm) at [451] comments on the phrase "settled **or** usual place of abode": " I do not, however, read the decision of the court as using those adjectives antithetically, but rather as differently nuanced ways of saying much the same thing. This appears particularly so given that the court regarded the phrase as connoting some degree of permanence or continuity."

30 For a more recent restatement of the principle, see *Grace v HMRC* [2009] STC 213 at [6]: "Physical presence in a particular place does not necessarily amount to residence in that place where, for example, a person's physical presence there is no more than a stop gap measure: *Goodwin v Curtis* (1998) 70 TC 478, 510."

profession as well as a love of a place: *R v Barnet LBC ex p Shah* [1983] 2 AC 309;

### 3.8.4 *No home or establishment*

Viscount Cave goes on to consider those who have no permanent home but live in hotels:

> The above cases are comparatively simple, but more difficult questions arise when the person sought to be charged has no home or establishment in any country but lives his life in hotels or at the houses of his friends. If such a man spends the whole of the year in hotels in the UK, then he is held to reside in this country; for it is not necessary for that purpose that he should continue to live in one place in this country but only that he should reside in the UK.
> But probably the most difficult case is that of a wanderer who, having no home in any country, spends a part only of his time in hotels in the UK and the remaining and greater part of his time in hotels abroad. In such cases the question is one of fact and degree, and must be determined on all the circumstances of the case (*Reid v IRC*, 10 TC 673). If for instance such a man is a foreigner who has never resided in this country, there may be great difficulty in holding that he is resident here. But if he is a British subject the Commissioners are entitled to take into account all the facts of the case.

To live permanently in hotels was, I think, not unusual in the 1920s. It does not happen much now, but nowadays a house may be "not in the nature of home but a substitute for hotels".[31]

### *3.8.5 Question of fact*

> [3] the question whether a person is or is not resident in the UK is a

31 *Cherney v Deripaska* [2007] EWCH 965 at [45] "The 'quality' of the use of the house is, I think, equally important. In many ways its use by Mr Deripaska resembles that of a private hotel. It is infrequent, intermittent, and generally fleeting. The house has the character of continuity and permanence; its use does not. It cannot, I think, in any normal sense of those words, be described as a 'settled or usual place of abode' of Mr Deripaska."
Similarly, *Grace v HMRC* [2009] STC 213, Special Commissioners at [40]. This will need review when the decision is final.

question of fact for the Special Commissioners (*Zorab*).[32]

## 3.9 *Duration, regularity and frequency of visits*

[4] no duration is prescribed by statute[33] and it is necessary to take into account all the facts of the case; the duration of an individual's presence in the UK and the regularity and frequency of visits are facts to be taken into account;

Similarly in *Lysaught:*

> My Lords, I think it is the shortness of the aggregate time during which Mr. Lysaght is here that constitutes the principal, though by no means the only point in his favour, but the question of a longer or a shorter time, like other questions of degree, is one peculiarly for the Commissioners. I do not say that time might not he so short, or again so long, as to make it right to hold, no matter what other evidence there was, that, as the case might be, there was either no evidence of residence or that the evidence was all one way in favour of it, but these questions are not before us.[34]

Similarly in *Reid*:

> In the *Wemyss* case, as here, one of the parties maintained that the element of time was so important. as to dwarf all the others into insignificance; but I think the Lord Advocate rightly contended that the facts of the relation between a person's life and the place in which part of it is spent may contain elements of quality, connected with the person's mode of life, and so on, which are equally relevant for

32 This point is made in many cases, eg *Lysaght v IRC* 13 TC 511 at p.534, 536.

33 Likewise *Reid v IRC* 10 TC 673 at p.678:

"… the relation between a person and a place which is predicated by saying that a person 'resides' there includes inter alia the element of time, duration, or permanence, [but] that element – essential and important as it is – is not the sole criterion. … one of the parties maintained that the element of time was so important as to dwarf all the others into insignificance; but I think the Lord Advocate rightly contended that the facts of the relation between a person's life and the place in which part of it is spent may contain elements of quality, connected with the person's mode of life, and so on, which are equally relevant for consideration as the element of time, or the durability of the relation."

34 Viscount Sumner in Lysaught v IRC at p528.

consideration as the element of time, or the durability of the relation.[35]

### 3.10 *Birth, family and business ties*

[5] also, birth, family and business ties, the nature of visits and the connections with this country, may all be relevant (*Zorab*; *Brown*).

### 3.11 *Living accommodation*

[6] in general the availability of living accommodation in the UK is a factor to be borne in mind in deciding if a person is resident here (*Cooper*) (although that is now subject to [s.831(1)[B] ITA]).[36]

### 3.12 *Dual residence and foreign home*

[7] the fact that an individual has a home elsewhere is not decisive, because a person may be dual resident (*Cooper* and *Levene*).

However it may be a relevant factor (particularly if the home elsewhere is much more important).[37]

Viscount Cave considered dual residence in *Levine*:

> But a man may reside in more than one place. Just as a man may have two homes – one in London and the other in the country – so he may have a home abroad and a home in the UK, and in that case he is held to reside in both places and to be chargeable with tax in this country. Thus, in *Cooper v Cadwalader* (5 TC 101) an American resident in New York who had taken a house in Scotland which was at any time available for his occupation, was held to be resident there, although in fact he had only occupied the house for two months during the year; and to the same

---

35 Reid v IRC 10 TC at p.679.

36 See 3.6 (Accommodation in the UK).

37 In *Gaines-Cooper* the Special Commissioners took a different view: “the fact that an individual has a home elsewhere is of no consequence.” But that view was tactfully (and correctly) rejected in *Grace v HMRC* in the Court of Appeal at [8]: “the proposition that a home elsewhere is of no consequence is not to be understood as meaning that the other home is entirely irrelevant to the necessary enquiry[!]. That would be inconsistent with the obligation to take into account all the facts of the case.”

effect is the case of *Loewenstein v de Salis* (10 TC 424).

### 3.13 *Difference between arrivers and leavers*

> [8] there is a difference between the case where a British subject has established residence in the UK and then has absences from it (*Levene*) and the case where a person has never been resident in the UK at all (*Zorab*).[38]

### 3.14 *Definite break*

> (xiii) Where a person has had his sole residence in the UK he is unlikely to be held to have ceased to reside in the UK (or to have "left" the UK) unless there has been a definite break in his pattern of life: *Re Combe* 17 TC 405.

### 3.14.1 *Presence must be voluntary*

> (xi) Although residence must be voluntarily adopted, a residence dictated by the exigencies of business will count as voluntary residence: *Lysaght v IRC* 13 TC 511.

The "voluntary" requirement does not have much practical role to play, as it only concerns imprisoned, kidnapped or shipwrecked taxpayers.[39]

## 3.15 Case law: ordinary residence

There are no statutory provisions on ordinary residence so case law is all we have. Since the statutory provisions on residence are entirely unhelpful, this is no bad thing.

---

38 This passage (apart from [7]) is a quote from *Gaines-Cooper v HMRC* [2007] STC (SCD) 23 at [165]. That passage was an almost verbatim quote from *Shepherd v IRC* 78 TC 389 at [58] (Special Commissioner). The references are to *Levene v IRC* 13 TC 486; *IRC v Zorab* 11 TC 289; *Bayard Brown v Burt* 5 TC 667; *Cooper v Cadwalader* 5 TC 101.

39 "The residence must be voluntarily adopted. Enforced presence by reason of kidnapping or imprisonment, or a Robinson Crusoe existence on a desert island with no opportunity of escape, may be so overwhelming a factor as to negative the will to be where one is." *Shah* at p.344.

The leading case is *R v Barnet LBC ex p Shah.*[40] This is not a tax case but the expression "ordinary residence" has its natural and ordinary meaning which is the same in tax and non-tax contexts.[41]

In *Shah* the House of Lords noted that ordinary residence was distinct from domicile and rejected a "real home" test (which was similar to a domicile test).

What is the test? A number of dicta were approved, saying more or less the same thing in different words:

> I think that [ordinary residence] connotes residence in a place with some degree of continuity and apart from accidental or temporary absences.[42]

> "Ordinarily resident" refers to a man's abode in a particular place or country which he has adopted voluntarily and for settled purposes as part of the regular order of his life for the time being, whether of short or long duration.[43]

The important requirement is the residence must have the degree of continuity, or in other words, it must be "for settled purposes." What does that mean?

> There must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the "propositus" intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose of living where one does has a sufficient degree of continuity to be properly described as settled.[44]

---

40 [1983] 2 AC 309. The case is noteworthy for the fact that oral argument over the two words "ordinarily resident" lasted 9 days.

41 *Shah* at p.340.

42 *Shah* at p.341 citing Viscount Sumner in *Lysaght v IRC* 13 TC 511 at p.528

43 *R v Barnet LBC ex p. Shah* [1983] 2 AC 309 at p.343. This passage has often been cited with approval.

44 *Shah* at p.344.

### 3.15.1 *Accommodation*

*Turberville* at [9] notes that accommodation held long term is consistent with being non-ordinarily resident:

> We consider the retention of the house and flat in the UK as fairly neutral; he had retained these (or predecessor properties) throughout the time he was working abroad.

Accommodation is however a relevant factor in deciding whether a person is "settled".

### 3.15.2 *Minimum period before acquiring ordinary residence*

One would have thought that if a person settled in a country, they became ordinarily resident immediately. This is the view expressed in IR 20 and HMRC6.

In *Tuczka v HMRC* [2011] UKUT 113 (TCC) however the Upper Tribunal suggested that there was a minimum time (though the minimum is not very long):

> 12. ...After referring also to the dicta in the tax cases, Lord Slynn concluded that it was "plain that as a matter of ordinary language a person is not habitually resident in any country unless he has taken up residence and lived there for a period." Lord Slynn continued (at 1942G-1943B):
>
>> "It seems to me impossible to accept the argument at one time advanced that a person who has never been here before who says on landing, "I intend to settle in the United Kingdom" and who is fully believed is automatically a person who is habitually resident here. Nor is it enough to say I am going to live at X or with Y. He must show residence in fact for a period which shows that the residence has become "habitual" and, as I see it, will or is likely to continue to be habitual...
>>
>> The requisite period is not a fixed period. It may be longer where there are doubts. It may be short (as the House accepted in In *re S (A Minor) (Custody: Habitual Residence)* [1998] A.C. 750, my speech at p. 763A, and *In re F (A Minor) (Child Abduction)* [1992] 1 FLR 548, 555, where Butler-Sloss L.J. said: "A month can be ... an appreciable period of time")."
>
> 13. Even assuming for the purpose of argument that "habitually" and

> "ordinarily" mean the same thing, we do not regard *Nessa* as in any way departing from Lord Scarman's clear rejection of any requirement to establish an intention to reside permanently or for an indefinite period. All that *Nessa* established in that regard is that a person would not qualify as "habitually resident" immediately on arrival, save in a case where he resumed his previous habitual residence. Some period of time is therefore needed to establish "habitual residence". But the fact that this period need not be long can be seen not only from Lord Slynn's reference to the observation of Butler Sloss LJ quoted above but from the resolution of the Nessa case itself. The House of Lords upheld the decision of the Court of Appeal that the case be remitted for rehearing before a social security appeal tribunal to determine whether the claimant had established habitual residence by the date of the initial tribunal hearing (ie, 6 December 1994, and thus less than four months after her arrival in the United Kingdom) or "even earlier": see at 1943D.

This overlooks the fact that the question of ordinary residence is determined with an element of hindsight: see 3.16 (The relevant period of investigation). It is considered that there is no minimum period.

### 3.15.3 *Intention*

In *Shah,* Lord Scarman said:

> There are two, and no more than two, respects in which the mind of the "propositus" is important in determining ordinary residence. The residence must be voluntarily adopted. Enforced presence by reason of kidnapping or imprisonment, or a Robinson Crusoe existence on a desert island with no opportunity of escape, may be so overwhelming a factor as to negative the will to be where one is.

I have already discussed "voluntarily." The speech continues:

> And there must be a degree of settled purpose. The purpose may be one; or there may be several. It may be specific or general. All that the law requires is that there is a settled purpose. This is not to say that the "propositus" intends to stay where he is indefinitely; indeed his purpose, while settled, may be for a limited period. Education, business or profession, employment, health, family, or merely love of the place spring to mind as common reasons for a choice of regular abode. And there may well be many others. All that is necessary is that the purpose

> of living where one does has a sufficient degree of continuity to be properly described as settled. The legal advantage of adopting the natural and ordinary meaning, as accepted by the House of Lords in 1928 and recognised by Lord Denning M.R. in this case, is that it results in the proof of ordinary residence, which is ultimately a question of fact, depending more upon the evidence of matters susceptible of objective proof than upon evidence as to state of mind. Templeman L.J. emphasised in the Court of Appeal the need for a simple test for local education authorities to apply: and I agree with him. The ordinary and natural meaning of the words supplies one. For if there be proved a regular, habitual mode of life in a particular place, the continuity of which has persisted despite temporary absences, ordinary residence is established provided only it is adopted voluntarily and for a settled purpose.

In *Tuczka v HMRC* [2010] UKFTT 53 the tribunal said:

> The test requires objective examination of immediately past events, and not intention or expectation for the future ([1983] 2 AC 309 at 345).

It is considered that the concept of being "settled" necessarily requires an examination of intention or expectation for the future.

### 3.15.4 *Acquiring UK ordinary residence*

In *Tuczka v HMRC* [2011] UKUT 113 (TCC) the taxpayer came to the UK to work and intended to stay 33 months (2.5 years). There were other facts which suggested he was settled, in particular that his girlfriend came to join him.

It was argued that an intention to reside here for that period was too short to constitute a "settled purpose". The argument was rejected. Even a period of just over one year could be sufficient.[45]

### 3.15.5 *Losing UK ordinary residence*

In *Turberville v HMRC* [2010] UKFTT 69 the taxpayer left the UK in July 2001 to work abroad. The taxpayer remained ordinarily resident until July

45 At [17] citing relying on *Reed v Clark* quoted at [15]; but *Clark* was not considering ordinary residence of the taxpayer (which was not an issue).

2001 even though he had formed the intention to leave earlier, in February 2001:

> 8. In relation to 2001-02, while it was clear in February 2001 that he would go to Dallas in July 2001 we do not consider that this changes the quality of his residence between 6 April 2001 and 30 June 2001, which was a continuation of his residence during the previous four tax years. Although it was then known that such residence would cease about 1 July 2001 it was nevertheless part of his residence for settled purposes and the fact that the Appellant's state of mind was such that he would be leaving the UK at around that time does not, until his actual departure, alter the position.

In July 2001 the taxpayer ceased to be ordinarily resident, though since he was ordinarily resident during part of the tax year 2001/02, he was described as ordinarily resident "for" that year.

In October 2001 the taxpayer unexpectedly lost his job, but remained non-ordinarily resident. The judgment at [8] continues:

> From the date of actual departure, we consider that in deciding whether there was then a distinct break one should look at the position as it was in July 2001 without the benefit of hindsight. The three-year employment contract coupled with his expenditure on furnishing the apartment rented by his employer point to a distinct break.

In the absence of purchase of accommodation, three years has traditionally been regarded as the period of residence which is sufficient to amount to settled.

### 3.15.6 *Habitual residence and ordinary residence compared*

"Habitual residence" is a concept often used in non-tax legislation (the term is never found in tax legislation).

If the concept was the same as "ordinary residence" then cases which gave clear guidance on habitual residence might be valuable for tax. Unfortunately this line of enquiry leads nowhere.

It is considered that the terms habitual residence and ordinary residence should be regarded as synonymous and the House of Lords have so held.[46] The natural meaning of the two expressions is the same (or at least, equally vague in each case) and there is really no place or need for two separate concepts. However the point was not fully argued and the case law is not entirely consistent. Some cases suggest that habitual residence is "something more than" ordinary residence,[47] though that "something more" is elusive. It has also been said that the concepts merely share a "common core of meaning".[48]

In any case, the authorities on "habitual residence" do not provide a clear definition of the term.[49]

### 3.15.7 *Residence and ordinary residence compared*

*Tuczka* has significantly reduced the difference between residence and ordinary residence or (if one prefers) it shows that the difference is not as great as had generally been thought:

> [18] Nor is it correct to suggest that a finding that Dr Tuczka was ordinarily resident in the United Kingdom in the tax year 1998-99 erodes a fundamental distinction between the concepts of residence and ordinary residence. The distinction is not as wide or as basic as the present appellant seeks to suggest. Hence, in *Levene*, Viscount Cave LC stated at p507:
>
> > "The expression "ordinary residence" is found in the Income Tax Act of 1806 and occurs again and again in the later Income Tax Acts, where it is contrasted with the usual or occasional or temporary residence; and I think that it connotes residence in a place with some degree of continuity and apart from accidental or temporary absences. So understood, the expression differs little in meaning from the word "residence" as used in the Acts..."

Unless the courts step back from this, HMRC6 is more generous than the law on the subject, a state of affairs which may not survive the next edition of HMRC6 (but statutory reform is likely to address the issue.)

46 *Mark v Mark* [2006] 1 AC 98 at [33].

47 *Cruse v Chittum* [1974] 2 All ER 940 at p.943.

48 *Nessa v Chief Adjudication Officer* [1999] 1WLR 1937 at p.1941.

49 Habitual residence is a question of fact to be determined by the circumstances of each case: *Re M* [1993] 1 FLR 495.

## 3.16 The relevant period of investigation

In *Levene* Viscount Sumner said:

> It is suggested that the Commissioners misdirected themselves in point of law, because they took into account, with regard to the earlier years, conduct which only occurred subsequently. I agree that the taxpayer's chargeability in each year of charge constitutes a separate issue, even though several years are included in one appeal, but I do not think any error of law is committed if the facts applicable to the whole of the time are found in one continuous story. Light may be thrown on the purpose with which the first departure from the UK took place, by looking at his proceedings in a series of subsequent years. They go to show method and system and so remove doubt which might be entertained if the years were examined in isolation from one another.[50]

This was followed in *Hankinson v HMRC*:

> We accept that the present case involves the consideration of liability in respect only of one year of assessment. However, we consider that the approach referred to by Viscount Sumner, of taking more than one year's circumstances into account, is of assistance in reviewing a case where the liability in question arises by reference to a single year of assessment. There is a degree of artificiality in confining the examination to that single year where (as will almost always be the position, and was the case here) departure from the UK is likely to have occurred during the latter part of the preceding year of assessment. Further, it is clear from such cases as the decision of the Special Commissioners in *Gaines-Cooper* [2007] STC (SCD) 23, in particular at paragraph 166, that cultural, family and social connections over a longer period are relevant to the question whether an individual is resident for tax purposes in the UK, and similarly to the question whether he is ordinarily resident in the UK.[51]

The consequence is that residence disputes become enormously lengthy and expensive. *Hankinson,* for instance, took 10 days before the tax tribunal. The reader is invited to speculate as to the costs of that appeal, or any appeal, and whether a system which requires such costs is

---

50 13 TC 486 at p.501.
51 [2009] UKFTT 384 at [31]

defensible.

## 3.17 Tax reason for becoming non-resident

In *Reed v Clark* the taxpayer had carefully organised his year abroad to reduce his tax liability but that was irrelevant:

> Residence abroad for a carefully chosen limited period of work there ... is no less residence abroad for that period because the major reason for it was the avoidance[52] of tax. Likewise with ordinary residence.[53]

## 3.18 Commentary: Assessment of case law tests

The case law is bluntly but accurately summarised by Malcolm Gunn:

> Residence is a question of fact. There are very few rules. Cases are decided as and when they arise, and without much reference to any other previous decision. The decisions might well conflict with each other but that's just tough luck and there is nothing anybody can do about it.[54]

Viscount Sumner made the point judicially in *Levine*:

> The words "resident in the UK", "ordinarily" or otherwise, and the words "leaving the UK for the purpose only of occasional residence abroad", simple as they look, guide the subject remarkably little as to the

---

52 Nowadays one should use the term "mitigation" rather than "avoidance" here, see 29.7 ("Avoidance", "mitigation", "tax reduction", "evasion": introduction). Contrast the Special Commissioner in *Shepherd v IRC* 78 TC 389 at [62]: "Although the Appellant's intention in going to Cyprus was to *mitigate* tax, I do not regard that as a relevant factor in deciding whether he was resident in the UK."

53 58 TC 528 at p.556.

54 *Taxation*, 3 December 1992, Vol 130, p.234. Lord Clyde made the same point in *Reid v IRC* 10 TC 673: "The expression 'resident in the UK' and the qualification of that expression implied in the word 'ordinarily' so resident are just about as wide and general and difficult to define with positive precision as any that could have been used. The result is to make the question of law become (as it were) so attenuated, and the field occupied by the questions of fact become so enlarged as to make it difficult to say that a decision arrived at by the Commissioners with respect to a particular state of facts held proved by them, is wrong."

> limits within which he must pay and beyond which he is free. This is the more likely to be a subject of grievance and to provoke a sense of injustice when, as is now the case, the facility of communications, the fluid and restless character of social habits, and the pressure of taxation have made these intricate and doubtful questions of residence important and urgent in a manner undreamt of by Mr. Pitt, Mr. Addington or even Sir Robert Peel. The Legislature has, however, left the language of the Acts substantially as it was in their days, nor can I confidently say that the decided cases have always illuminated matters. In substance persons are chargeable or exempt, as the case may be, according as they are deemed by this body of Commissioners or that to be resident or the reverse, whatever resident may mean in the particular circumstances of each case. The tribunal thus provided is neither bound by the findings of other similar tribunals in other cases nor is it open to review, so long as it commits no palpable error of law, and the Legislature practically transfers to it the function of imposing taxes on individuals, since it empowers them in terms so general that no one can be certainly advised in advance whether he must pay or can escape payment.[55]

This is recognised in other contexts. In *Sifton v Sifton* a beneficiary had an interest under a trust "so long as she shall continue to reside in Canada". The condition was void for uncertainty!

> The majority of the Court of Appeal have found themselves unable to give any more precise direction than that the appellant may leave Canada for a limited period and for a purely temporary purpose, without being able to define either the word "limited" or the word "temporary." … the questions [in short, when would the appellant be resident in Canada?] do not at present admit of categorical answers. … . But if the appellant's interest under the will is to be forfeited upon her "ceasing to reside in Canada," she has a right to have those questions categorically answered; and inasmuch as they cannot be so answered, the words... are void for uncertainty.[56]

## 3.19 Dual residence/dual ordinary residence

HMRC6 para 1 provides:

---

55 *Levene v IRC* 13 TC 486 at p.502.

56 [1938] AC 656 at p.665.

> Even if you are resident (or ordinarily resident) in another country you may also be resident (or ordinarily resident) in the UK. This is sometimes referred to as dual residence.[57]

Similarly HMRC6 para 8 provides:

> You will **not** cease to be resident in the UK simply because you become resident elsewhere. You can become resident in another country and remain resident in the UK.

This is soundly based on case law: see 3.8 (Case law on residence). Similarly for ordinary residence. HMRC6 provides:

> 3.2 ... You can be ordinarily resident in the UK and, at the same time, be ordinarily resident in another country

This is soundly based on comments in *Shah*.[58]

## 3.20 Ordinary resident but not resident

A question arises whether an individual can be ordinarily resident in the UK but not resident. The natural meaning of the words suggests not, and *Levene* seems to confirm this:

> I find it difficult to imagine a case in which a man while not resident here is yet ordinarily resident here.[59]

However, the CGT legislation is clearly drafted on the basis that this is possible. Section 2(1) TCGA provides:

> ... a person shall be chargeable to CGT in respect of chargeable gains

---

57 Similarly, EIM para 42820 provides:
"An individual can be resident and ordinarily resident in more than one country at the same time. The fact that an individual might prove to be resident or ordinarily resident elsewhere does not mean that they will be neither resident nor ordinarily resident in the UK."

58 *R v Barnet LBC ex p. Shah* [1983] 2 AC at p.342; the point had already been made in *Reid v IRC* 10 TC 673 at p.680, 682.

59 13 TC 485 at p.507. Likewise Viscount Sumner in *Lysaght v IRC* 13 TC 511 at p.518 clearly assumes that one must be resident in order to be ordinarily resident.

> accruing to him in a year of assessment during any part of which he is resident in the UK, *or* during which he is ordinarily resident in the UK.

The drafter of these words (often copied into other contexts) clearly assumed it was possible to be ordinarily resident but not resident. This is supported by *Gaines-Cooper v HMRC*:

> 190. ...We are also of the view that the appellant would still be ordinarily resident in the UK even if there were an occasional year when he was not resident here.[60]

In *Grace v HMRC*[61] the Special Commissioner reached a compromise view. It is possible to be ordinarily resident and non-resident, but it does not happen much if at all in practice:

> If an individual is not resident in the UK, then it is difficult to find that he is ordinarily resident here.[62]

### 3.20.1 *HMRC view(s)*

HMRC6 provides at para 3.2:

> It is also possible (but unusual[63]) to be not resident in the UK but remain ordinarily resident here.[64]

---

60 [2007] STC (SCD) 23 at [190].

61 [2009] STC 213 Special Commissioners at [48].

62 This will need to be reviewed when the decision is final, but the High Court appeal did not consider this point.

63 This is different from the 2009 version of HMRC6 which provided:
"In *exceptional* circumstances you may be not resident but still ordinarily resident in the UK. *This is very rare*."
Presumably HMRC now wish to be able to argue that some of their non-resident customers are ordinarily resident, and did not want HMRC6 to be cited against them.

64 HMRC6 makes the same point at 3.1: "Even if you are not resident in the UK, you may be ordinarily resident, ...".
SA109 Notes 2008 formerly provided:
"Were you resident in the UK in the year to 5 April 2008?
If 'NO', you are not ordinarily resident in the UK. Put 'X' in box 2. [Box 2 states that the individual is not ordinarily resident]."
In 2009 the form changed. SA109 Notes 2009 provides:
Were you resident in the UK in the year to 5 April 2009? Yes No

The only case which HMRC cite is that of a person who spends a year travelling abroad, as to which see 3.28 (Year travelling abroad).

Similarly, the Residence Consultation Paper refers to "the very few people who are ordinarily resident but not resident".[65]

If (which I doubt) it did arise in practice that a person was non-resident but ordinarily resident in the UK, it would play havoc with the system of foreign tax credit relief. The individual would not usually be subject to income tax as that usually requires residence. But CGT is charged on an individual who is ordinarily resident even though not resident. The INT Manual points out the difficulty and (perhaps) coyly suggests that the matter is dealt with by quiet concession:

> **169050. Not resident but ordinarily resident** [January 2011]
> A person who is not resident in the UK is chargeable to Capital Gains Tax on chargeable gains accruing to him in a year of assessment if he is ordinarily resident in the UK (Section 2 TCGA 1992). Strictly, no foreign tax credit relief is due (either under a treaty or unilaterally), because the person concerned is not resident in the UK. If a claim to tax credit relief is made in these circumstances, the case should be submitted to the Offshore Personal Tax Team (part of Charity, Assets & Residence).

## 3.21 HMRC practice before 2008/09: IR20

### 3.21.1 *Practice prior to 1936*

The topic of residence was considered by the Income Tax Codification Committee (1936), a committee including all the leading UK tax figures of the day. The Committee criticised the statute law. It was "remarkable" that the Income Tax Acts afforded no greater assistance in the solution of the problem than the statutory residence rules (now in ss 829–832 ITA 2007) which are "of limited application". Nothing has changed.

The Committee also criticised the case law: "Nor are the decisions of the

> If 'No', you are *likely* to be not ordinarily resident in the UK. Put 'X' in box 2. [Box 2 states that the individual is not ordinarily resident so the instruction which made sense before does not make altogether good sense.]

In SA109 notes 2010 the guidance was removed altogether; this can now be seen as an anticipation of the HMRC6 change of view.

65 HM Treasury, *Statutory Definition of Tax Residence: a Consultation* (June 2011) para 6.28.

Courts very helpful." Nothing has changed there either. The two House of Lords cases which governed the position back then (*Lysaght*, *Levine*) continue to do so now. Residence is now, as it was then, "a question of fact, on which the decision of the Commissioners before whom the matter comes on appeal is final unless the Courts decide that there was no evidence on which the Commissioners could properly have come to the conclusion at which they arrived". The Committee concluded:

> the present state of affairs, under which an enquirer can only be told that the question whether he is resident or not is a question of fact for the Commissioners but that by the study of the effect of a large body of case law he *may* [emphasis added] be able to make an intelligent forecast of their decision, is intolerable and should not be allowed to continue.[66]

### 3.21.2 *Practice from 1936 to 2008/09*

The situation did not continue, though the change was not the one that the Committee asked for. The Committee reported that in the 1930s "no one subject which arises in the application of the Income Tax Acts has been more prolific of dispute than the question of the meaning of residence in the UK". This was "in no way surprising" given the state of the law. However, immediately after (no doubt as a result of) the Codification Committee report, the position in this respect changed completely. For sixty years – from 1936 until *Shepherd v IRC* in 2006 – there were virtually no reported cases on residence, the only important exception being *Reed v Clark*. The topic of residence ceased to be "prolific of dispute". The reason was that the Revenue published guidance provided most of the bright line guidance which was needed, although the general tax law did not. From 1977 – 2009 the guidance was in IR20, though the basis of that guidance was already formulated in 1936 and is set out in the Codification Committee report.

In the 2007/08 edition of this work I noted some objections to the practice set out in IR20:

> The first set of objections is constitutional ... The rules in IR20 – if they are worth the paper they are written on – are best regarded as tertiary legislation. Although IR20 purports to state the law on residence, it has

66 Income Tax Codification Committee Report Cmd.5131 pp.34–39.

> only a tenuous connection with the law declared by Parliament and applied in the Courts. IR20 was issued without statutory authority. One consequence of this is that IR20 has been issued without the parliamentary scrutiny which tax legislation should receive. Nor have the rules ever been subject to public consultation. Another consequence is that appeals to the Courts are made very difficult. ... All in all, the current state of affairs (one cannot properly call it the current state of the law) is fit only for a banana republic.

The 1955 Royal Commission noted this was "unsatisfactory" and recommended reform.[67] The ill-fated 1988 Consultation Document (Residence in the UK) made proposals. More recently, STEP called for reform[68] and so did the CIOT ("the law determining whether an individual is resident in the UK is a mess").[69] The House of Lords Economic Affairs Committee agreed.[70]

HMRC argued that they are not bound by the terms of IR20 even for the years before its revocation in 2009/10 but wisely dropped the argument before the Court of Appeal and the binding nature of IR20 (so far as it contains unqualified statements) is now established. The Court of Appeal expressed itself strongly:

> [IR20] is the language of assurance, which the Revenue, in the interests

67 Royal Commission on Income Tax, Final Report, Cmd 9474 Chapter 14. The whole section on residence is worth reading and accessible on *www.kessler.co.uk*.

70 Select Committee on Economic Affairs, 2nd Report of Session 2007–08, The Finance Bill 2008, accessible
*www.publications.parliament.uk/pa/ld200708/ldselect/ldeconaf/117/117i.pdf*:
"223. We were unable to glean from officials why legislation was not included in this year's package. They did not present the case for inclusion or against. It is disappointing that officials were less than forthcoming on this important issue.
224. We recognise that it will not be possible to include a comprehensive statutory definition of UK residence in this year's Bill.
225. However, we think this is something which should be taken forward as rapidly as possible so that Ministers are able to come to a view in good time before next year's Bill. We therefore recommend that HMT and HMRC should consult with the professional bodies over the coming months, building on the work which was done in 2003."

of fair dealing, has bound itself to honour.[71]

### 3.21.3 *The end of IR20 from 6 April 2009*

IR20 was summarily revoked on 31 March 2009, with effect from 6 April 2009, thus giving six days' notice of the new rules in HMRC6.

HMRC6 makes it clear that IR20 is dead and buried. Para 1 provides:

> This guidance replaces the IR20. ... Any practices associated with the IR20 – whether overtly expressed or not – will not apply from 6 April 2009, unless provided for outside the IR20...

HMRC6 does not specify the practices which are withdrawn. HMRC Brief 17/09 mentions "for example HMRC Brief 1/07, TB52, SP A10, SP 3/81, SP 2/91, SP 17/91." However the latter four SPs are still included in the HMRC list of SPs at 15 Feb 2011[72] so it is unclear whether they are withdrawn or not.

There was no transitional relief for those who might have been relying on IR20 in arranging their affairs for 2009/10. In this manner, a fundamental change to the scope of UK taxation was carried out without consultation, without parliamentary sanction, and without public discussion of any kind.[73] This would not have been possible or even conceivable if the law had been on a proper statutory basis. One lesson to be learned is that constitutional fundamentals *do* matter.

The repeal of IR20 has led to an explosion of tax litigation.[74] We have

---

71 *R on the Application of Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [25]. The matter will need to be reviewed when the case is final but the position is not likely to change.

72 Statements of Practice Issued up to 15 February 2011, accessible *www.hmrc.gov.uk/practitioners/sop.pdf*.

73 One cannot count the consultation issued on 15 September 2008. This gave no indication that major changes were to be made, and implied the opposite ("We recognise that the time has come for a complete rewrite to reflect changing circumstances such as increased international mobility since the IR20 was first written. We want our replacement guidance to reflect a style which meets our current guidelines, is engaging for our customers and meets the highest standards of customer service...we are not inviting comments on the legislation, HMRC policy or practice on residence and domicile issues ...").

74 Including since the publication of HMRC6: *Gaines-Cooper, Davies, Grace, Genovese, Turbeville, Tuczka, Karim*, *Farquhar*.

returned to the pre-1936 position where "no one subject which arises in the application of the Income Tax Acts is more prolific of dispute than the question of the meaning of residence in the UK". Of course anyone familiar with the Codification Committee report would find this "in no way surprising".

## 3.22 HMRC6

HMRC6 was published on 31 March 2009.[75] I refer to that as **"the 2009 version of HMRC6"**. In the 2009/10 edition of this work I predicted:

> HMRC6 shows some signs of being a document prepared in haste. I infer that a decision was made to bring it out on 31 March because it could not have been published after 6 April if it was to take effect from 2009/10. One foreseeable development is a revised version of HMRC6.

This proved to be correct and a revised version was published February 2010. I refer to that as **"the 2010 version of HMRC6"**. In this manner, significant changes to the scope of UK taxation were made for the second time, without consultation or public discussion (though these changes were not on the same scale as the year before).

References in this book are to the 2010 version unless otherwise stated.

HMRC6 provides:

> [1] HM Revenue & Customs does not consider that the latest revisions have altered the current position in most cases.
> [2] However you can continue to use the wording in the previous version of HMRC6 for any tax liability that arises before 5 April 2011.[76]

Point [1] correctly recognises that there are some significant changes in the new HMRC6. A track change version is available on *www.kessler.co.uk*.

---

75 What was published was a draft and not a final version. Quite soon afterwards HMRC quietly replaced it with a revised version, more neatly laid out and with many stylistic improvements but no changes of substance as far as I could see. There was no public announcement but it seems that this was done by 17 April 2009. I infer that the unfinished draft had to be published as it needed to be in place before 6 April 2009.

76 Page 1 (there is no para no).

HMRC say:

> The guidance [HMRC6] is aimed at unrepresented individuals.[77]

There are in fact two aspects of HMRC6 (as there were for IR20). The first is a (relatively) brief guide to taxation generally. This is for unrepresented individuals, and professionals will not find it of interest. The second is a guide to residence and ordinary residence. This is vital to professionals (as was IR20) for at present it is the closest there is to an HMRC guide to the meaning of these terms. Further guidance was promised but that will probably be overtaken by statutory reform.

### 3.22.1 *HMRC6: who determines the issue of residence*

HMRC6 para 2 provides:

> It is important that you understand what *we* mean by "resident in the UK" because this will determine what UK tax you have to pay.

Constitutionally, the question is what *Parliament* means by "residence" and not what HMRC mean. The (unnamed) authors of HMRC6 may think the distinction pedantic. The rule of law requires a system where taxpayers or their advisors can work out for themselves whether they are resident. Is this so obvious that it goes without saying?

### 3.22.2 *Is HMRC6 binding?*

One of the issues in *Davies and Gaines-Cooper* was whether IR20 is binding, ie, whether HMRC are free to disregard its content. It appears that HMRC wished to put themselves completely free to argue against HMRC6. HMRC6 section 1 provides:

> This guidance outlines our (HM Revenue & Customs) application and interpretation of legislation and case law. The material is provided for your guidance. It sets out the main factors that are taken into account based on the rulings of the courts. Whether any section of this general

---

77 Replacement Guidance on Residence and Domicile – Feedback published 31 March 2009 accessible *www.hmrc.gov.uk/cnr/feedback.pdf*.

> guidance is applicable to you depends on your particular facts, as each set of circumstances will be different. It also seeks to give practical examples of what the relevant law means; these are only illustrative examples.
>
> Any practices described in this guidance are subject to periodic review and may subsequently be altered or withdrawn. If practices were to be changed or revoked this would not normally be done so retrospectively....
>
> This guidance will tell you the main factors to take into account when deciding your residence, ordinary residence and domicile status, and the potential consequences for your UK tax position. It is general guidance which is designed to help you reach a decision yourself. Depending on your circumstances this might not be straightforward and our guidance may not cover all of the issues which affect you.

I infer that the wording was drafted with one eye firmly on possible successor litigation to *Davies and Gaines-Cooper* even though HMRC6 contains far less clear guidance than IR20. However in the Court of Appeal HMRC lost so heavily on the issue that it is considered that where unqualified statements in HMRC6 do occur, they are binding on HMRC notwithstanding all the disclaimers:

> [IR20] sets out a limited number of specific situations in which a taxpayer will be treated as non-resident. If a taxpayer falls within the situation described by the Revenue, the Revenue has given an assurance that it will treat the taxpayer in accordance with the terms of the guidance. If a taxpayer comes, for example, within the terms of 2.2, the Revenue has given an assurance that it will treat that taxpayer as not resident and not ordinarily resident. It will not be permitted to resile from that assurance, unless and until it announces that it proposes, for the future, to alter the circumstances in which it will accept non-resident status.[78]

When HMRC argued in *Gaines-Cooper* that they were free to change their published practice retrospectively, the Court of Appeal were rightly outraged. The HMRC response is now to say that they would not "normally" do so. That should still be a matter of public concern; but

78 *R on the Application of Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [17]. The matter will need to be reviewed when the case is final but the position is not likely to change.

there it is.

### 3.22.3 *HMRC6: types of residence*

HMRC6 divides residence into various categories. Leaving aside the 183 day rule, the primary distinction is between:
(1) those leaving the UK ("leavers"); and
(2) those coming to the UK ("arrivers").
These are subdivided as follows:
(1) *Leaving the UK* is divided into three understandable categories:
 (a) full-time workers abroad;
 (b) permanent or indefinite leavers;
 (c) the "year settled abroad" category.
(2) *Coming to the UK* is divided in a more confusing way:
 (a) the three years in the UK practice;
 (b) remaining two years in the UK practice;
 (c) visitors to the UK.

### 3.22.4 *HMRC6: connections to the UK*

HMRC6 para 2.2 provides:

> You can also be resident in the UK if you are present here for fewer than 183 days in a tax year. This will depend on how often and how long you are here, the purpose and pattern of your presence and your connections to the UK. These might include the location of your family, your property, your work life and your social connections.

The passage goes on to list relevant connections but starts with a disclaimer:

> The following are examples, but they are not a complete list. These and any other relevant factors must all be considered together to give a complete picture.

The list is as follows:

> • Family ties include having a spouse, civil partner, children or other family members you are close to, in the UK.
> • Social ties include membership of clubs and societies and events that

you regularly attend or host. It also includes any regular recreational engagement, such as returning each year for an annual sporting season.
• Business ties include owning or being a director of a business based in the UK, or having employment, including self-employment, in the UK. Regular employment duties in the UK are a tie and you need to consider the extent, frequency and nature of those duties. It does not matter if the duties themselves are not taxed, for example because of a DTA.
• Property ties include a house or apartment that you own or lease, or property held primarily for investment but that also provides you with accommodation when you are in the UK. A house or apartment provided for your use for the duration of your time in the UK as part of an employment package is 'available accommodation' and is a tie to the UK.
• If you think you may just be visiting the UK then part 7 will help you consider the pattern of your visits, but you must also consider the purpose of those visits. For instance, a short term one-off employment assignment to complete a project for a foreign employer might not in itself make you resident. But if you repeatedly come to the UK for regular business meetings then your visits have a non-temporary purpose. You need to look at the frequency of those visits alongside your other ties to the UK.

If the nature and degree of your ties to the UK show that it is usual for you to live in the UK, you are resident in the UK. It does not matter whether you live here for employment, leisure, or just because you like being in the UK.

## 3.23 The 183-day rule

HMRC6 adopts the 183 day rule:

> 2.2 ... The only occasion when the number of days that you are physically present in the UK will determine your residence status is when you are here for 183 days or more during a tax year. If you are here for 183 days or more in a tax year, you are resident in the UK. **There are no exceptions to this.**

This has a sound basis in the statutory 183-day rule.[79]

79 See 3.3 (Temporary UK purpose and 183-day rules).

## 3.24 Short absences

HMRC6 para 8.1 formerly provided:

> *If you normally live in the UK and go abroad for short periods – for example on holidays and business trips – you will continue to be resident here. This type of short absence from the country does not affect your UK residence and ordinary residence position.*

This was obviously correct. It had a sound basis either in the ordinary meaning of "residence"[80] or perhaps in the occasional residence abroad rule. The 2010 version of HMRC6 extends the point beyond short absences:

> **8.2 Leaving the UK for shorter periods of time**
> You will still be treated as resident in the UK if any periods of time you spend outside the UK are for occasional residence abroad only. Occasional residence means you have no settled purpose for a continuing absence from the UK. 'Occasional' does not mean that your absence must be isolated or of short duration. A series of business trips abroad is an example of periods of occasional residence abroad.
> If you normally live in the UK and go abroad regularly, for example on extended holidays, you will continue to be resident here. This type of absence does not stop you being resident and ordinarily resident in the UK, because you have not made a definite break from the UK.

## 3.25 Full-time work abroad

HMRC6 para 8.5 provides:

> **8.5 Leaving the UK to work abroad as an employee**
> If you are leaving the UK to work abroad full-time, you will only become not resident and not ordinarily resident from the day after the day of your departure, as long as:
> • you are leaving to work abroad under a contract of employment for at least a whole tax year
> • you have actually physically left the UK to begin your employment abroad and not, for example, to have a holiday until you begin your

80 See the passage from *Levene* set out at 3.8 (Case law on residence).

> employment
> • you will be absent from the UK for at least a whole tax year
> • your visits to the UK after you have left to begin your overseas employment will
> - total less than 183 days in any tax year, and
> - average less than 91 days a tax year...

I refer to this as "**the full-time work abroad practice**". The main points of this practice have survived from IR20 though some details have changed.

One change concerns holidays. According to HMRC6, if the employee goes on holiday before work starts, they are still UK resident until work starts. I find that bizarre.

In *Davies and Gaines-Cooper*, the taxpayer left the UK in March 2001 but did not start full-time employment abroad until after 6 April. The Court of Appeal said:

> In my view, properly construed, [IR20] 2.2 does not entitle a person to non-resident status, for capital gains tax purposes, unless he leaves to work full-time either before or by the start of a tax year, in the instant case by 6 April 2001. To come within 2.2, a taxpayer must leave for and remain in full-time employment throughout the relevant tax year. Full-time employment throughout any subsequent tax years does not affect the date when a taxpayer first attained non-resident status; that date is determined by reference to the date the taxpayer left to work full-time abroad.[81]

This interpretation is surprising (it is worth noting that it never occurred to the inspector of taxes who dealt with the case) but there it is. The same will apply to the HMRC6 para 8.5 which is similarly worded. The Court did more helpfully state:

> In [IR20] 2.2, it is not enough that the taxpayer has left the UK, he must have left to work full-time. Absence is not sufficient, it must be absence whilst engaged on full-time employment for at least a whole tax year. No more is, however, required. The absence need be neither permanent nor indefinite. Accordingly, ... there is no requirement, under 2.2, for a

81 *R on the Application of Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [33]. The matter will need to be reviewed when the case is final.

> taxpayer to demonstrate that he has severed family and social ties within the UK. The Revenue accepts that the taxpayer need do no more than establish that he has left the UK for full-time employment abroad, and that the employment has continued throughout the relevant tax year. There is no need to be concerned with any persisting social or family ties in the UK, unless those ties themselves cast doubt on whether the employment is genuinely full-time.[82]

The same will apply to HMRC6.

### 3.25.1 *Meaning of "work full-time abroad"*

There are two requirements here: the work must be:
(1) "full-time" and
(2) "abroad".
The term "full-time" is explained in HMRC6 para 8.5:

> What we mean by *full-time employment*:
> UK tax law does not give a definition of *full time employment*. The decision on whether or not you are employed abroad full-time will depend on the particular circumstances of your case. If you say that you are working abroad full time, we would expect you to be able to show that your employment:
> • has a standard pattern of hours which can be compared to a typical UK working week or
> • if your employment does not have a formal structure or fixed number of working days, it can, by looking at the local conditions and practices of the particular occupation, be compared to similar full-time employment in the country where you are working.

The former IR20 added:

> If you have several part-time jobs overseas at the same time, we may be able to treat this as full-time employment. That might be so if, for example, you have several appointments with the same employer or group of companies, and perhaps also where you have simultaneous employment and self-employment overseas. But if you have a main

---

82 *R on the Application of Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [33]. The matter will need to be reviewed when the case is final but this is not likely to change.

> employment abroad and some unconnected occupation in the UK at the same time, we will consider whether the extent of the UK activities was consistent with the overseas employment being full-time.[83]

This is not in HMRC6. I wonder if the omission is deliberate. There is no indication either way.

In the 2010/11 edition of this work I said:

> There is no guidance as to the requirement that the work is "abroad". It is suggested that the work must be substantially done abroad and any UK work (other than incidental duties) would have the result that the condition of full-time work abroad is not satisfied. This would be consistent with other areas of tax law.[84]

The minutes of the Joint Expatriate Forum record:

> 6.5 HMRC were asked whether, if their position on FTWA changed, such changes would apply retrospectively. HMRC explained that generally changes were made prospectively, but in this case it is not entirely clear what the practice had been in the past, so they were unable to make a definitive statement before settling their legal advice.[85]

HMRC have issued the following guidance:

> HMRC accept that it has a practice whereby non residence can be demonstrated by working abroad full time even though some of the duties carried on in the UK are substantive. Although this is not in accordance with the definition of full time work at section 830 Income Tax Act 2007, HMRC's guidance on ceasing to be UK resident covers a wider range of issues than that section.
> How much work can be carried on in the UK depends upon the facts and circumstances relevant to each individual. However HMRC will generally accept that working in the UK for fewer than 10 days in a year will not by itself prevent an individual claiming they have made a break with the UK because they are working full time abroad. If more days than this are worked in the UK, whether an individual is working full

---

83 RI 40 comments further on the meaning of "full-time".

84 See 12.13 (Where are duties performed: incidental duties).

85 Joint Expatriate Forum on Tax and Nics: 10 February 2011 *www.hmrc.gov.uk/consultations/expat-mins-feb2011.pdf*

> time abroad will depend upon their particular circumstances.
> Given that
> (a) Residence is a long term issue affecting the entirety of a tax year and individuals and companies will have planned actions on the basis of HMRC guidance, and
> (b) The government has announced that it will consult on a statutory residence test to codify the rules on residence
> HMRC can confirm that for 2011/12 this practice will continue. It will however, be reviewed for future years having regard to the outcome of the consultation on a statutory residence test.[86]

### 3.25.2 *Working abroad and home for weekends*

In *Davies and Gaines-Cooper* the Court of Appeal say:

> long distance commuters, who work full-time abroad, but return at week-ends, providing their presence remains less than the number of days specified, are treated as not resident and not ordinarily resident.... advisers received explicit assurances that the Revenue's approach to mobile workers would not be applied to such commuters; they would continue to be regarded as coming within 2.2.[87]

In the HMRC view these commuters are different from mobile workers, though the distinction is far from clear.

### 3.25.3 *Return to the UK after working abroad*

HMRC6 para 8.6 provides:

> **8.6 Returning to the UK after working abroad**
> If you were not resident and not ordinarily resident when you were working abroad and you return to the UK when your employment ends, you will be not resident and not ordinarily resident in the UK until the day **before** you return to the UK. You will become resident and ordinarily resident on the day you return to the UK unless you can show

---

86 *www.ion.icaew.com/TaxFaculty/22023* [2011] STI 1498.

87 *R on the Application of Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [54] and [71]. The correspondence should of course have been made public but no doubt it could be obtained on a FOI application. The matter will need to be reviewed when the case is final.

> that your return was simply a short visit to the UK between two periods of full-time employment abroad. ...

What if the employee has a holiday before return to the UK? Clearly the individual is not UK resident if the contract of employment continues (ie contractual holiday entitlement). Otherwise the statement does not cover the situation expressly, but it is suggested that UK residence does not arise until actual return to the UK.

### 3.25.4 *Changes to employment while abroad*

HMRC6 para 8.7 provides:

> **8.7 Changes to your employment when abroad**
> If your circumstances change while you are abroad, for example there is a break in full-time employment, you might no longer meet the requirements of paragraph 8.5 and so remain resident and ordinarily resident in the UK. You must tell us about such changes by contacting your tax office.
> You must also tell us when you return to the UK at the end of an overseas employment, even if you are planning to go abroad again to work under a new contract of employment. You must do this even though you see your return to the UK as temporary and for a very short period. You should tell us this information by contacting your tax office.

Notwithstanding the peremptory terms of this paragraph, there is no obligation to disclose anything to HMRC unless the individual becomes UK resident.

### 3.25.5 *Self-employment abroad*

HMRC6 para 8.8 provides:

> **8.8 Leaving the UK to become self-employed abroad**
> If you are leaving the UK to work abroad for yourself in a trade, profession or vocation, then as long as your working circumstances are similar to those outlined in paragraph 8.5, you will be taxed in the same way.

### 3.25.6 *Partly employed and partly self-employed*

A published HMRC letter of 10 July 1979 provided:

> ... where an employee left the UK on 4 April 1979 and did not return until 6 April 1980 and was on a full-time service contract during that period, he would be regarded as not resident and not ordinarily resident in the UK throughout the year 1979–80.
> However this practice would not be extended to a taxpayer who was only partly in employment and partly self-employed during a similar period. In such circumstances the normal rules for determining an individual's residence status would apply and on the basis that no visits were made during the intervening period, the taxpayer would be regarded as not resident but ordinarily resident for the year 1979–80 in these circumstances.

I find this bizarre, and consider that a court is not likely to draw a distinction between those working full-time in either employment or self-employment, and those partly employed and partly self-employed. The former IR20 para 2.5[88] watered this down to a "perhaps". Now there is no guidance at all.

### 3.25.7 *Accompanying spouse concession: ESC A78*

ESC A78 provides:

> 1 The residence and ordinary residence status of a husband and wife is determined independently but the circumstances of one spouse may, in certain situations, be taken into account when determining the residence status of the other. This can apply when one spouse goes abroad for full-time employment, or to work full-time in a trade, profession or vocation, and is regarded as not resident and not ordinarily resident from the day following departure to the day before return. The following concession applies where an individual in this position is accompanied, or later joined, by his or her spouse who is not in full-time employment (or working full-time in a trade, profession or vocation) abroad.

---

88 Set out in 3.25.1 (Meaning of "work full-time abroad").

> 2 Where the accompanying spouse is abroad for a complete tax year and interim visits to this country do not amount to—
> – 183 days or more in any tax year; or
> – an average of 91 days or more in a tax year (the average is taken over the period of absence up to a maximum of four years);
>
> then the accompanying spouse's liability to UK tax which is affected by residence, for the years of departure and return at the beginning and end of the period spent abroad, will be determined by reference to the period of his or her residence here during the year.

The concession (like all concessions) applies to civil partners.[89] HMRC6 para 8.9 provides:

> **8.9 Leaving the UK with your spouse or partner**
> When your husband, wife or civil partner leaves the UK to work abroad within the terms of paragraphs 8.5 or 8.8, you are able to receive the same tax treatment if you accompany or later join them abroad. This treatment is by concession (extra-statutory concession A78) and means that even when you yourself are not in full-time employment abroad, you will also be not resident and not ordinarily resident in the UK from the day after your
> departure. This treatment will apply as long as:
> • you will be absent from the UK for at least a whole tax year, and
> • your visits to the UK after you have left
> – total less than 183 days in any tax year, and
> – average less than 91 days a tax year. This average is taken over the period of absence up to a maximum of four years – see 8.5 which will show you how to work out this average....[90]
> You will remain not resident and not ordinarily resident in the UK until the day **before** you return to the UK. You become resident and ordinarily resident on the day you return to the UK.

---

89 HMRC stated in their online list of ESCs:
"The Government's commitment is that, for all tax purposes, same-sex couples who form a civil partnership will be treated the same as married couples.
As part of this commitment to tax parity, from 5 December 2005 all Extra Statutory Concessions or Statements of Practice should be taken as extended to apply equally to civil partners and married couples."

90 The omitted passage is discussed elsewhere; see 3.32 (Calculating annual average visits: illness & exceptional circumstances).

## 3.26 Seafarers

*Rogers v Inland Revenue*[91] concerned a master mariner. Captain Rogers had a house in Fife where his wife and children resided. He had no home in any other country, but in the year 1878/79 he was entirely absent from the UK while in command of his ship. In fact he was away for much more than one calendar year as he left in July 1877. Captain Rogers was held to be resident here:

> Every sailor has a residence on land, … and the question is, Where is this man's residence? The answer undoubtedly is that his residence is in Great Britain. He has no other residence, and a man must have a residence somewhere.

(The ship was not regarded as a residence.)

The view that one can spend all year outside the UK and still be UK resident is supported by s.829(2) ITA.[92]

However, HMRC practice is now quite different. The full-time work abroad practice is applied to sailors. EI Manual provides:

> **70230 Tax treatment of seafarers: Residence status: Employment outside UK territorial waters**
> A seafarer will normally be regarded as not resident and not ordinarily resident in the UK from the day following departure to the day preceding return where he or she:
> - has been ordinarily resident in the UK and leaves the UK to take up full-time employment on a ship and
> - the absence from the UK and the period of service includes a complete tax year and
> - leave spent in the UK totals less than 183 days in any tax year and averages less than 91 days for each tax year (the average is taken over a period of absence up to a maximum of 4 years).
>
> However, this will not include seafarers whose employment arrangements consist of frequent and regular voyages to and from the UK.

91 1 TC 225, referred to with approval in *Levene* and *Lysaght* 13 TC at pp.223, 244.

92 "Treat the individual as UK resident for the purpose of determining the individual's liability for income tax for any tax year during the *whole or* a part of which the individual remains outside the UK for the purpose only of occasional residence abroad." (Emphasis added)

## 3.27 Year settled abroad

Dave Clark left the UK on 3 April 1978 and returned on 2 May 1979. I shall call that time **"the year settled abroad"**. He was UK resident before and after the year settled abroad, and UK domiciled at all times.

During the year settled abroad he spent virtually the whole time in or around Los Angeles. The taxpayer worked in Los Angeles. Presumably he did not work full-time so he did not fall within the scope of the full-time work abroad practice. For the first ten weeks of his stay he lived in a house lent by a friend and thereafter in a house rented by his company. He retained a leasehold flat in Mayfair (also held by a company). He wisely spent no time in the UK at all.

It was held that the only possible conclusion from these facts was that he was not UK resident in the year settled abroad.[93]

HMRC relied on *Rogers v Inland Revenue*.[94] The taxpayer argued that these cases were confined to wanderers with no place of residence except a base in the UK from which they started and to which they returned. It was different if a taxpayer establishes a home in another country. The court did not expressly accept this formulation, and declined "to define in the abstract circumstances in which it would or would not be open to Commissioners as the fact finding tribunal to conclude that a person physically absent for a whole year nonetheless resides here. Circumstances of particular cases vary widely, and each case must depend on its own facts". But the taxpayer's formulation seems soundly based. It was therefore relevant to the decision that Dave Clark was not merely out of the UK for the year: he lived in a new home, mostly in one fixed place of abode, and he worked from there. Los Angeles was his "headquarters".

The second string to HMRC's bow was the occasional residence abroad rule. It was argued that Dave Clark had left the UK for the purpose of "occasional residence". On this point the Judge held that "occasional" residence was the opposite of "ordinary residence". He said that Mr Clark was indeed "ordinarily resident" in America. Accordingly he had not left the UK for "occasional residence" abroad.

---

93 *Reed v Clark* 58 TC 528.

94 See 3.26 (Seafarers). A court may be less sympathetic to HMRC in a similar case now that HMRC are known to ignore *Rogers* in practice.

It follows that a person who:

(1) wishes to leave the UK for a period of one tax year;

(2) does not work full-time abroad, so does not come within the scope of the full-time work abroad practice

may acquire non-residence by a "year settled abroad". I refer to this as "**year settled abroad**" non-residence, though "non-full-time worker's year settled abroad" would be more accurate. The individual should ideally spend no time whatsoever in the UK in the relevant tax year.[95] He should acquire a "base" in his new place of residence. Although Dave Clark worked (part-time), it is considered that the position would be the same had he not worked. Although Dave Clark had a single place of residence, it is considered that the position would be the same if he had more than one, as long as they were "bases" or "headquarters".

## 3.28 Year travelling abroad

### 3.28.1 *Position before 2011/12*

The 2009 version of HMRC6 provided at 1.5.15:

> *You can be ordinarily resident in the UK but not resident. For example, if you normally live in the UK but, during a tax year, you have gone abroad for a long holiday and you do not set foot in the UK in the tax year. This is very rare.*

This concerns individuals who:

(1) do not work full-time abroad (so do not fall within the full-time work abroad practice); and

(2) do not have a base abroad (so do not fall within the "year settled abroad" rule in *Reed v Clark*).

That is, individuals who leave the UK to wander the world for a year without coming back to the UK at any time in that year. Backpacking gap-yearers may fall into this category, or those on a leisurely world cruise. In practice, as HMRC say, this does not arise often, but it is not unknown.

There are two points in the HMRC6 statement, that a traveller who is not

95 In practice a few days in the UK should not make any difference. But it is impossible to say where the dividing line comes.

present at any time in a tax year:
(1) is not UK resident but
(2) is UK ordinarily resident.
I first consider point (1), residence. HMRC form SA109 Notes 2010 (Residence, remittance basis etc notes for 2009/10) makes the same point:

> Put an 'X' in box 1 [claiming non-residence] if you were not present in the UK at any time during the year ended 5 April 2010.

As far as residence is concerned, this is I think an informal concession, as it is reasonably clear from *Reed v Clark* that an individual who is absent for a year is only non-resident if they have a *base* in their new place of residence. The statements are perfectly clear.[96] Nevertheless there is a risk that HMRC may refuse to follow their published guidance, especially if there is an element of tax planning or tax avoidance. It is an interesting question to what extent the Courts might require HMRC to follow their guidance.

As far as ordinary residence is concerned, there are some doubts whether a person can be non-resident but ordinarily resident,[97] but since the strict analysis here is that the traveller remains UK resident they are no doubt also ordinarily resident.

### 3.28.2 *Position from 2011/12*

This passages set out above are not found in the 2010 version of HMRC6 or in HMRC form SA109 Notes for 2010/11.

HMRC6 provides:

> **8.3 Complete absence from the UK**
> Residence is connected to physical presence. If you live outside the UK for a complete tax year and do not set foot in the UK you will not be resident in the UK for that tax year, unless your absence from the UK is for the purpose of occasional residence abroad only. For example, if your absence was for a one-off year long holiday after which your residence in the UK resumed its previous pattern, you would remain UK resident during your absence.

---

96 Indeed the practice goes back to at least 1979; see 3.25.6 (Partly employed and partly self-employed).

97 See 3.20 (Ordinary resident but not resident).

> If you became not resident simply because of a complete absence from the UK, it is unlikely that your presence in the UK on your return is for a temporary purpose only if any of your UK ties remained throughout your period of absence. You would most likely become resident again on your return.

HMRC have changed their practice as regards residence and now wish to take the point that if "you have gone abroad for a long holiday and you do not set foot in the UK in the tax year" then you remain UK resident.

3.28.3 *Ordinary residence*

HMRC6 para 3.2 provides:

> It is also possible (but unusual) to be not resident in the UK but remain ordinarily resident here. If you normally live in the UK you might become not resident solely for one tax year. As you would usually be resident in the UK and this is where you have your normal home, family ties and other social connections, you might still be ordinarily resident here.

Similarly HMRC6 para 8.3:

> Even when you are absent for a whole tax year and so become not resident, you might remain ordinarily resident in the UK. You will need to consider the pattern of your residence over a number of years and the purpose and pattern of any ordinary residence abroad.

Thus regardless of residence, HMRC still argue for ordinary residence in this case.

## 3.29 Leaving the UK permanently or indefinitely

For at least six decades HMRC operated a 91-day test. In short – I omit refinements which do not affect the position in general – what a UK resident formerly had to do to lose UK resident status under IR20 was to average under 91 days in the UK over the four-year period. HMRC withdrew this practice in Business Brief 1/2007.[98] HMRC seek to change

98 This was later set out as an appendix in the May 2008 version of IR20.

their practice retrospectively. In *Davies and Gaines-Cooper* HMRC succeeded on the grounds that the relevant passage in IR20 as a matter of construction only applied if the taxpayer "has severed his ties to the extent that his previous social and family ties in the UK are no longer retained."[99] That construction is bizarre and it remains to be seen what will happen on appeal.

Whatever the position as to the past, from 2009/10 the 91-day test is no longer decisive. HMRC6 provides:

> 1.2 .. Your status is determined by the facts of your particular case. It is **not** simply a question of the number of days you spend in the country.
> 2.2 There are many different factors which will determine whether you are resident in the UK. With one exception [the 183-day rule], it is not simply a question of the number of days you are physically present in the UK during a tax year, although this is an important consideration.

So we need to consider when a UK resident person loses UK resident status other than under the full-time work abroad rule (or the year settled abroad rule). HMRC6 para 8.1 provides some terminology. Firstly, there is a commonsense definition of "permanently":

> Leaving the UK 'permanently' means that you are leaving the country to live abroad and will not return here to live.

Next there is a definition of "indefinitely":

> Leaving 'indefinitely' means that you are leaving to live abroad for a long time (at least three years) but you think that you might eventually return to live here, although you do not currently have plans to do so.

This is a change from the 2009 version of HMRC6, which provided:

> *By leaving "indefinitely" we mean that you are leaving to live abroad for a long time (at least three years) but you acknowledge that you might eventually return to live here.*

In the 2009/10 edition I criticised this wording as a slightly odd use of

99 *R on the Application of Davies and Gaines-Cooper v HMRC* [2010] STC 860 at [40] - [48].

"indefinitely" ("long-term" would be nearer the mark) though not too confusing. The new definition changes the definition to accord with the natural meaning of the word indefinitely. But HMRC should have kept the definition and changed the label to long-term. For instance, an individual who goes for a 5 year posting has "plans" to return to the UK so taken literally they do not leave "indefinitely" in the 2011 sense of the word.

3.29.1 *Definite break*

HMRC6 places considerable emphasis on requirement of a "definite break". This is a new feature: the expression which occurs 8 times in the text of the 2010 version is not found at all in the 2009 version. The 2010 version provides:

> 8.1 ... The act of leaving the UK does not necessarily make you not resident and not ordinarily resident. You must also make a definite break from the UK and any remaining ties you have with the UK must be consistent with not being resident here. If you say that you are no longer resident and ordinarily resident in the UK, we might ask you to give some evidence to show that you have left the UK permanently or indefinitely and that there has been a clear change in the pattern of your life. For example, we would expect you to show that when you left the UK you had acquired accommodation abroad to live in as a permanent home. If you still have property in the UK which you can use after you leave, we might want you to explain how retaining that property is consistent with leaving the UK....
>
> **8.2 Leaving the UK for shorter periods of time**
>
> [This passage is considered at 3.24 (Short absences).]
>
> **8.2.1 Evidence of a definite break**
>
> If you do not make a definite break and cut your UK ties then you remain resident in the UK. You could also be dual resident – that is resident in the UK and another country.
>
> You might not have evidence of a definite break from the UK for some time after you leave the UK. In this situation you will need to review your residence status later to confirm whether you have become not resident, and when this happened.
>
> For example, if you have travelled in and out of the UK fairly frequently, the exact timing of the end of your residence here could be difficult to establish. You should therefore keep evidence relating to your lifestyle before and after the date on which you think you ceased to be resident.

> If the circumstances of your life change gradually, then you will become not resident only when you have sufficiently reduced your ties to the UK and are more than occasionally resident abroad.
> The evidence that you will be able to show that you have made a definite break will depend on the extent of your UK ties initially. If you had few initial connections with the UK you will have less evidence to show you have made a definite break.
> In those circumstances strong ties to another country, including a home and settled purpose for your presence there throughout a complete tax year, would be more of a factor in deciding if you have left the UK permanently or indefinitely.

## 3.30 Days of arrival and departure

It is important to know whether days or arrival or departure count as UK residence days for the purposes of the 183 day test (which is statutory) and it may be important to know for the purposes of the 91 day test.

Section 831 ITA provides:

> (1A) In determining whether an individual is within subsection (1)(b) treat a day as a day spent by the individual in the UK if (and only if) the individual is present in the UK at the end of the day.
> (1B) But in determining that issue do not treat as a day spent by the individual in the UK any day on which the individual arrives in the UK as a passenger if–
> (a) the individual departs from the UK on the next day, and
> (b) during the time between arrival and departure the individual does not engage in activities that are to a substantial extent unrelated to the individual's passage through the UK.[100]

Section 832(1A)(1B) ITA provides the same rule for employment income, and s.9(5)(6) TCGA provide the same rule for CGT.

When is a person "present in the UK"? I would have said a person is "present" once a boat reaches UK territorial sea[101] or once a plane flies over the territorial sea. But HMRC take a different view:

---

100 For completeness, the 8th edition of this work para 3.20 contains a critique of misleading comments in EN FB 2008 on this provision, but this material is now omitted as it is not now of practical importance.

101 See App. 1.1.4 (Territorial sea).

> The published answer [from HMRC] confirmed that "the point of arrival in the UK will be when, an aircraft lands, a train arrives at the first station in the UK, a boat docks at the quayside or drops anchor in territorial waters". HMRC were asked to confirm that similar rules applied to determine the time of departure. HMRC confirmed that the departure rules were consistent with those described for arrival ie "the point of departure from the UK will be when, an aircraft takes off, a train leaves the last station in the UK, a boat leaves the quayside or its anchorage point in territorial waters".[102]

That time is certainly easier to ascertain.

3.30.1 *Transit passenger*

Under s.831(1B)(b) ITA a day of arrival can only be disregarded even though the individual is present at midnight, if

> during the time between arrival and departure the individual does not engage in activities that are to a substantial extent unrelated to the individual's passage through the UK.

This is vague, but it will not often need to be considered. HMRC6 para 2.3 provides a gloss:

> So if you attend a business meeting, visit a property you own, arrange to meet people socially or attend social activities, you must count that day as a day of presence if you are in the UK at the end of the day.
> *Example*
> You are resident of the Isle of Man and travel to the UK as part of a journey to the USA. You have to stay overnight in the UK before catching a flight to the USA the following day. Your being in the UK for that one night would not count as a day of presence in the UK. But, if you were to carry out an activity such as attending a business meeting, visiting the theatre or visiting family before catching the flight to the USA, the exception would not apply and the night spent in the UK would be counted as a day of presence.

---

102 Joint Forum on Expatriates Tax and NICs Note of Meeting 18 September 2008 accessible *www.hmrc.gov.uk/consultations/expat-mins-180908.htm*

EN FB 2008 provides some unexceptionable examples:

> *Example 1* – Peter works for the Jersey arm of HSBC and is travelling from Jersey to Frankfurt. He flies from Jersey to Gatwick and will catch his onward flight the next day to Frankfurt from London City airport. He travels from Gatwick to Canary Wharf for a meeting with several other HSBC colleagues before staying overnight in a nearby hotel.
> The meeting with colleagues is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.
> *Example 2* – John works for the Jersey arm of HSBC and is travelling from Jersey to Frankfurt via Gatwick and London City airport. In lobby of his hotel near London City Airport, he unexpectedly spots another colleague who has just arrived from Paris. They have a couple of pints together and their conversation covers a number of business-related issues. [John][103] then travels to London City airport to catch his onward connection.
> This meeting was not planned and therefore it can be considered that John's activities in the UK substantially related to completing travel to a foreign destination. The transit passenger provisions will apply.
> *Example 3* – Shirley lives in Guernsey and is travelling to New Zealand by way of Gatwick and Heathrow. She has planned to spend most of the day with her daughter and grandchildren, who live in Crawley and will also spend the night there before travelling to Heathrow for her onward flight.
> Her visit is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.
> *Example 4* – Phil lives in Guernsey and is travelling to New Zealand by way of Gatwick and Heathrow. His flight from Guernsey is delayed by fog and he arrives too late to make his onward connection to New Zealand that day. His son had already arranged to meet him at Gatwick and drive him to Heathrow, now he drives him to a hotel near Heathrow instead where Phil will stay overnight before catching his rearranged flight. At the hotel they have a snack together.
> These activities are substantially related to completing travel to a foreign destination – Phil would have eaten in the hotel even if he had been unaccompanied. The transit passenger provisions will apply.
> *Example 5* – George lives in the Isle of Man and is flying to New York on business via Manchester. He has made an appointment with a consultant orthopaedic surgeon based in Manchester to carry out a number of tests. He will stay in the clinic overnight before travelling on to New York the following afternoon.
> The appointment is not an activity substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.
> *Example 6* – George lives in Jersey and is travelling to Stavanger. He does not fly and travels to the UK by ferry before continuing to London by train. He stays overnight at a West End hotel, having prearranged dinner and a trip to the theatre

103 The original erroneously reads: Peter.

with friends. The next day he travels to Newcastle by train, where he boards a ferry to Stavanger. His activities in the UK are not substantially related to completing travel to a foreign destination. The transit passenger provisions will not apply.

If the individual arrives in the UK and leaves on the *same* day, that day will not count even though work or other matters are done in between. The individual does not need to rely on the transit passenger exemption.

3.30.2 *Transitional aspects*

The transitional issues were overlooked at the time of the FA 2008, but HMRC dealt with this in the December 2008 Qs and As:

> **Day counting**
> **Q** For determining residence in 2008-2009, do I need to count one of the arrival-departure days for each visit during the previous three tax years (2007-2008, 2006-2007, 2005-2006) or does the old rule for counting (excluding departure - arrival) apply for those years?
> **A** For 2007-08 and before, the old day counting practice (excluding days of arrival and departure) will continue to apply. For 2008-09, the new practice (counting days where the individual is present at the end of the day) will be applied. So when calculating periods of residence that straddle both sets of practice, individuals will have to take into account both of the day counting practices. You should therefore exclude days of arrival and departure for 2005-06, 2006-07 and 2007-08.

From 2009/10 this is only relevant for the limited areas where the 91 day test remains important.

## 3.31 Method of calculating 91 day average

HMRC6 provides:

> **8.5 Leaving the UK to work abroad as an employee**
> ... To calculate your annual average visits to the UK:
> $$\frac{\text{Total days visiting UK}}{\text{Tax years you have visited (in days)}} \times 365 = \text{annual average visits}$$

After a disclaimer which does not seem to rate the intelligence of the reader very highly[104] the text continues with a straightforward example:

> If you were to leave the UK on 20 May 2008 to work full-time abroad and you visit the UK for:
> 79 days in the tax year 2008–09 (320 days in the remainder of the tax year)
> 91 days in the tax year 2009–10 (365 days in the tax year)
> 98 days in the tax year 2010–11 (365 days in the tax year)
> 79 days in the tax year 2011–12 (366 days in the tax year)
>
> The average of your visits would be:
> 2008–09 — 79÷320×365 = 90.1 therefore treated as not resident from 21 May 2008
> (subject to split year treatment applying)
> 2009–10 — (79+91)÷(320+365)×365 = 90.6 therefore not resident
> 2010–11 — (79+91+98)÷(320+365+365)×365 = 93.2 therefore resident
> 2011–12 — (79+91+98+79)÷(320+365+365+366)×365 = 89.4 therefore not resident
>
> The calculation of average visits for the year 2012–13 will not include the visits or relevant days for the year of departure. The rolling period of four years is maintained by excluding the oldest year at each annual review.
> ...[105]
> **If you do not meet all of these conditions, you will remain resident and ordinarily resident in the UK unless paragraph 8.1 applies to you.**
> **If your employment comes to an end and you do not return to the UK it will be necessary to consider if you continue to be not resident and not ordinarily resident in the UK.**

### 3.31.1 *Day counting in the case law*

In *Gaines-Cooper v HMRC* [2007] STC (SCD) 23 the Special Commissioners adopted figures which:

---

104 **"This is for illustrative purposes and any calculation you make would be based upon your own circumstances – the date that you actually left the UK and the days that you have visited the UK in the period."** Bold font is original.

105 The omitted passage is discussed elsewhere; see 3.32 (Calculating annual average visits: illness & exceptional circumstances).

(1) counted days of arrival and departure as one day's presence (contrary to former IR20 principles) if the taxpayer stayed overnight;
(2) counted days spent in the UK due to illness (contrary to IR20 principles).

It is considered that (apart from the 183 day test) the correct approach in law would be to take into account all days of arrival and departure, but with less weight than full days. But the *Gaines-Cooper* approach amounts to more or less the same.

## 3.32 Calculating annual average visits: illness & exceptional circumstances

HMRC6 provides much guidance on calculating 91 day average visits, but from 2009/10 the average is not nearly as important as formerly. It is no longer decisive as to residence, it is merely one factor. Nevertheless I will set out the passages here. HMRC6 provides:

> 8.5 ... Any days you spend in the UK because of exceptional circumstances beyond your control, for example an illness which prevents you from travelling, are not normally counted for this purpose.[106]

This recognises that a person may spend up to 182 days present in the UK if necessary for medical care and still be non-resident. The practice is merciful to the non-resident and helpful to the private medical industry, except for long term patients.

Notwithstanding the use of the word "normally", the only situation I can envisage where the practice would not apply is in cases of abuse, eg if a UK resident individual "left" the UK knowing they would need to return shortly for medical treatment.

Of course the practice would not apply if the illness was mild and did not actually cause the individual to stay here. The decision to stay must be "beyond your control", a matter of compulsion rather than choice.

The former IR20 provided:

> *Any days spent in the UK because of exceptional circumstances beyond your control, for example the illness of yourself or a member of your*

106 The same passage is found in HMRC6 para 8.9. For completeness: a similar practice is recorded in SP 2/91 but it appears from Business Brief 17/09 that this SP has now been withdrawn.

*immediate family, are not normally counted for this purpose.*

The practice recognised that a person may need to spend time in the UK because of the illness of immediate family. (Remaining in the UK because of the illness of one's family is strictly a matter of choice but "beyond your control" was obviously be taken realistically rather than literally.)

It is considered that illness of immediate family can still qualify as exceptional circumstances. Any other view is offensive to humanity, and, certainly, if HMRC wished to change their view it should have been stated expressly rather than left to be inferred.

This practice is applied to the non-statutory 91-day rule (if one can call it a rule) but it is not applied for the 183-day rule. There is perhaps a reason for this distinction: the 183-day rule is statutory, so to disregard days of illness or exceptional circumstances would have to be classified as a concession, not simply as an HMRC practice. But the 183-day rule can therefore operate rather harshly.

3.32.1 *Volcanic Ash: disruption to air travel 2010/11*

HMRC say:

> HMRC confirmed that, where individuals had planned to leave the UK but were genuinely prevented from doing so because of the recent travel disruption caused by the Eyjafjallajoekull volcano eruption, they would treat the situation as an exceptional circumstance and therefore covered by existing guidance in paragraph 2.2 of [the 2009 version of] HMRC6. This meant that any additional days spent in the UK purely as a consequence of this disruption may be disregarded when considering whether an individual is resident in the UK.
>
> However, where an individual is present in the UK for 183 days or more in the year, including any days spent here because of exceptional circumstances, including this travel disruption, then they will be resident in the UK for that year.
>
> HMRC also confirmed that individuals who wished to claim that any days spent in the UK were due to exceptional circumstances should keep sufficient evidence to support their claim as they would for similar

claims.[107]

### 3.32.2 *Unrest in Middle East*

HMRC say:

> For those individuals who are evacuated from Egypt, Libya and Tunisia due to the current political situation, this situation would be treated as an exceptional circumstance and therefore covered by existing guidance in HMRC6. This will remain the case for the period that the FCO advice for the country they are leaving is in place.... Exceptional circumstances will only apply for the period individuals were advised by the Foreign and Commonwealth Office to leave Egypt, Libya and Tunisia and the week thereafter.
> The relevant periods and areas where an FCO advisory to leave has been, or is currently, in force are:
> Egypt – For the period 29 January to 15 February 2011 those in Cairo, Alexandria and Suez were advised to leave.
> Libya – Since 20 February 2011 the FCO have advised those who could to leave, this advisory remains in place.
> Tunisia – For the period 15 January to 20 January 2011 the advisory was in place.
> At the present time there are no restrictions on travel to Egypt or Tunisia.[108]

## 3.33 Coming to the UK

The reader will recall that those coming to the UK are divided into the following categories:

(1) the three years in the UK practice;
(2) visitors to the UK, not within (1), a category divided into:
    (a) short-term visitors:
        (i) indecisive visitors;
        (ii) intentional visitors;
    (b) longer-term visitors.

---

107 Minutes of Joint Expatriate Forum on Tax and NICS, 26 May 2010 *www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf*.

108 *www.ion.icaew.com/TaxFaculty/21604*.

HMRC6 para 7 begins with the following general comments:

> If you come to live here permanently or to work here for an extended period, or with no particular end date, you will become resident in the UK. But not everyone who comes to the UK becomes resident here. For example, those who are in the UK on holiday or for a short period of work will generally (!) not become resident in the UK.
> In most cases it will be clear whether you become resident or not, but sometimes it needs careful consideration of a number of factors. These include:
> • whether you have been resident in the UK before
> • how many days you spend here
> • the pattern of your presence in the UK or absence from it over a period of years
> • whether your purpose for being in the UK is settled or temporary
> • your family, social and work ties to the UK
> • your accommodation arrangements.

## 3.34 The three years in the UK practice

HMRC6 provides:

> **7.2 When you come to the UK permanently, indefinitely, or to live or work for three years or more**
> [1] If your home has been abroad and you have come to the UK to live here permanently or indefinitely, you will be resident and ordinarily resident from the date you arrive.[109]
> [2] You will also be resident and ordinarily resident from the date you arrive if you have come to the UK to remain here for three years or more. This is because you are not simply visiting but have settled in the UK for the time being.

Para [1] refers to those who "come to live here". Para [2] refers to those who "come to remain here". Perhaps this means the same thing, so para

109 A sidenote adds: 'From the date you arrive' means from the beginning of the tax year, but you will not normally be charged tax for the period up to your arrival in the UK.

[2] covers just about everyone in para [1].[110] Perhaps there is a difference in nuance, ie someone who comes to live in the UK permanently is resident even if they do not "remain" in the UK. In practice this is not likely to matter.

The heading "Coming to the UK permanently or indefinitely" is not an accurate label. I refer to this as "**the three years in the UK practice**".

> If you have previously been resident in the UK and are returning after a period abroad, you will need to consider whether or not your absence from the UK was a period of non-residence. You may not have been entitled to the split-year treatment. If you were not resident you may have been 'temporarily not resident' and this might affect your liability to UK tax when you become resident in the UK again.
> Whether or not you have lived here before, if you have come to the UK to live or work permanently, indefinitely, or for three years or more, you should tell us immediately so that you can make sure that you are paying the correct amount of tax as soon as possible.

Notwithstanding the peremptory terms of this paragraph, there is no obligation to disclose anything to HMRC unless the individual becomes UK resident and even then no obligation to do so "immediately". The paragraph continues.

> • If you work for an employer in the UK, they will give you the forms you need to complete for us and will deduct tax from your earnings on our behalf under PAYE – see part 6. The forms might include form P46.
> • If you have been seconded to work in the UK while employed by a foreign employer, they should give you the form P46 (Expat) to complete. We will send you any other forms you need.
> • If you are going to work for yourself – that is, as a self-employed person –
> you can find out what you need to do if you go to www.hmrc.gov.uk or you can phone our Self-employed Helpline. The helpline will be able to give you the advice you need to make sure that you pay the right amount of UK tax at the right time.
> • If you have come to the UK to live (permanently or indefinitely or for three years or more) but do not intend to work here, you must tell us if

110 Since anyone within [1] (who intends to come to the UK to live here permanently) will usually be within [2] (they intend to come and remain here for three years or more).

you have any taxable income and/or gains.

### 3.34.1 *Meaning of "remain"*

HMRC6 para 7.2 formerly provided:

> *When we say "remain" in the UK we meant that you are here on a continuing basis - the only trips you make outside the UK are when you go abroad for holidays or short business trips.*

This was an odd use of the word "remain". "Stay full-time in the UK" would be a more accurate expression.

The current version of HMRC6 has deleted this passage but does not provide any explanation of the meaning of "remain".

A person who "comes and remains" in the UK will satisfy the 183-day rule and a person who "comes to live here" will do so too. So the practical relevance of the three years in the UK practice is:

(1) to establish residence in the year of arrival (because the 183-day rule will not be satisfied by someone who arrives after about September);
(2) to establish residence in the year of departure (because the 183-day rule will not be satisfied by someone who leaves before September); and
(3) to establish ordinary residence.

## 3.35 Remaining in the UK for two years

The 2010 version of HMRC6 is quite different from the 2009 version. Para 7.4 provides:

> **7.4 When you come to the UK temporarily**
> If you are simply visiting the UK, then you might not be resident. But you are not simply visiting the UK if you have a purpose for being here which is not temporary. The nature and extent of your connections to the UK may indicate that your purpose in the UK is not temporary.

The term "visit" is vague. Whether someone was a "visitor" mattered under the 2009 version of HMRC6 and the former IR20, since a visitor was (subject to specific exceptions) classified as non-resident. Since now it is only the case that a visitor "might not" be UK resident the question of whether someone is a visitor is no longer so crucial. The 2009 version of

HMRC6 used the term "visit" in a slightly defined and somewhat technical or artificial sense, which is not in the 2010 version, but that does not matter any more.

Para 7.4 continues:

> ...If you remain in the UK for a period that spans two tax years and are resident in the second year then you will need to consider whether you were also resident in the first tax year. This will depend on all the facts. It is possible that after you first come to the UK your circumstances change and you are going to live here permanently or indefinitely, or you are going to remain here for three years or more from the date of your arrival. In such a situation, you will become resident and ordinarily resident in the UK and you should read paragraph 7.7. If your circumstances change and you become resident in the UK, you should tell us as soon as possible to make sure that you are paying the correct amount of tax.

HMRC6 para 7.7.1 provides:

> **7.7.1 Residence**
> [1] ...If you remain in the UK for a period that spans two tax years and are resident in the second year then you will need to consider whether you were also resident in the first tax year. This will depend on all the facts.

It is difficult to see how the guidance could be more vague or unhelpful if it tried. The passage continues:

> [2] If you have come to the UK and will be remaining here for at least two years but for not more than three years, you will be resident from the date of your arrival (even if you are here for fewer than 183 days in the first tax year). This does not necessarily mean that you will also be ordinarily resident.

The category within point [2] ("remaining 2 years") overlaps unhappily with the three years in the UK practice. A person who intends to remain three years is in the "three years in the UK category". A person who only intends to remain two years is in category [2].

A person who "remains" in the UK for two whole years will be present in the UK during three tax years.[111] During the middle tax year the person will satisfy the 183-day rule. The relevance of the remaining-2-years category is to establish residence in the tax years of arrival and departure if the 183-day rule is not satisfied in those years.

The 2009 version of HMRC6 made it clear that the purpose of the distinction between the two practices is that a person who falls within the remaining-2-years category is resident but not ordinarily resident. A person within the three years in the UK practice is resident and ordinarily resident. The 2010 version removes the clarity by saying that the person who remains 2 years is not "necessarily" ordinarily resident. It gives no further guidance. Perhaps the authors contemplated a further extension of the concept of ordinarily residence, but in practice this should be overtaken by statutory reform.

## 3.36 Visitors

### 3.36.1 *One-off visit*

HMRC6 para 7.5 provides:

> If you are making a one-off visit to the UK and leave before you have been here for 183 days in a tax year and you do not intend to return, you will not usually be resident or ordinarily resident in the UK.

The word "usually" was added in the 2010 version of HMRC 6, which adds to the vagueness and detracts from the usefulness of the passage. There is no guidance as to what takes the matter out of the "usual". The point is to ensure that the taxpayer cannot rely on the passage if HMRC do not wish to follow it, but in practice no doubt that will happen rarely if at all.

### 3.36.2 *Repeated visits*

HRMC 6 para 7.5 continues:

> But, if you are going to make a number of separate visits to the UK you need to consider whether this will make you resident and/or ordinarily

---

111 Unless the person arrives on 6 April and leaves two years later on 5 April.

> resident here. It does not matter whether the visits are for the same purpose or different purposes, or varying lengths of time.
> If you are making a number of separate visits, part 2 explains that you need to look at the pattern and regularity of your visits. The length of time required to establish a pattern will depend on your circumstances but after three[112] years it will usually be possible to judge the pattern that has emerged.
> [1] You may not know how long you will continue to visit when you first arrive in the UK. If, after three[113] complete tax years, a pattern has emerged that these visits total more than 91 days on average and your visits continue, then you will become resident and ordinarily resident in the UK from the start of the next tax year.

I refer to those within [1] as "**indecisive visitors**". "Indecisive visitors" is not an entirely accurate label for this category of UK residence, but "those who come regularly for more than 90 days average over a four-year period without knowing that they will do so at the outset" is something of a mouthful. According to HMRC6 a 91 day test operates in this context. This is not reconcilable with their emphatic statement that residence is not just a matter of counting days, and it is clearly wrong in law,[114] but it is a workable rule of thumb which has survived from IR20. HMRC have no objection to a workable rule of thumb which favours the Revenue.

HMRC6 continues:

> But there are situations where you might become resident and ordinarily resident in the UK before you have been visiting for four years, for example:
> • where you know, when you start visiting the UK that your visits here will be for an average of 91 days or more per tax year. In these cases, you will be resident and ordinarily resident from 6 April of the tax year in which you first start making your visits.
> • when you realise after starting to visit the UK regularly that your visits are going to be for an average of 91 days or more. In these cases you will be resident and ordinarily resident from 6 April of that tax year.
> • when your circumstances change so that your purpose for being in the UK is no longer temporary.

112 There is a significant change in the 2010 version of HMRC6 which has changed the figure from four years to three.

113 See above fn.

114 See 3.8 (case law on residence).

> It is possible that after you first come to the UK to visit, or after you have made a number of visits here, your circumstances change so that you are going to live here permanently or indefinitely, or are going to remain here for three years or more from the date of your first arrival. If this is the case, you will become resident and ordinarily resident in the UK and should read paragraph 7.7.
> If your circumstances change and you become resident in the UK you should tell us as soon as possible so that you can make sure that you are paying the correct amount of tax.

I refer to those who fall in this category as "**intentional visitors**".

A change from the former IR20 is that the text now reads "might" whereas IR20 formerly stated that intentional visitors "would" become UK resident. I wonder if this is really what HMRC meant to say. If one takes "might" literally, there is no guidance of when a visitor would or would not be UK resident. Another change is that "intend" is replaced by the word "know" but in the present context I think that comes to the same thing.

Perhaps the changes are due to a problem of the former IR20 identified in the 7th edition of this work:

> This category (intentional visitors) seems again to have the status of provisional and uncertain residence. Suppose T intends to average more than 90 days here over five years, and in year 1 he spends 99 days here; T may think he is UK resident in year 1 but he cannot be sure. If in year 4 T unexpectedly changes his intention and leaves the UK, he retrospectively finds that he is not resident in years 1, 2 and 3 after all![115]

115 For completeness, the text continued:
"But possibly one is only expected to calculate the days here up to the year in question, not over a longer average? In practice no problems seem to arise, perhaps because:
(1) taxpayers take the view that 'intention' requires a firm, fixed and irrevocable intention and in practice few if any form such an intention (unless they fall within the three years in the UK practice or satisfy the 183-day rule).
(2) HMRC cannot usually know what a person's intention of future residence is even if (which is rare) the person himself knows. A rule based on subjective intention is in practice unenforceable and so unworkable."

Perhaps the reason for this change is the emphatic statements elsewhere in HMRC6 on the non-decisive nature of a day count test.[116]

### 3.36.3 *Does a year with no day in UK restart the clock?*

The former Inspectors Manual provided at para 45:

> An individual should be regarded as becoming resident if he visits the UK year after year so that his visits become in effect part of his habit of life and are annual visits for a substantial period or periods of time. Normally, an average annual period or periods amounting to 91 days or more should be regarded as substantial and the visits as becoming habitual after four years, *provided that there has been a visit in each of the four years*; such an individual should be regarded as resident for and from the fifth year.
> (Emphasis added)

There has been no announcement of a change of practice on this point but one might infer that HMRC practice has changed.

Suppose:

(1) Year 1: T spends a relatively short period in the UK (say 30 days).
(2) Years 2–3: T spends much longer in the UK (say 160 days).

Suppose in year 1 T intends to spend the longer periods in years 2–4. Taking HMRC6 literally, T is resident in year 1 (assuming T's intention is carried out). But it is considered that unless T resides a sufficient period in year 1, T should not be regarded as resident in that year even if T expects to average 91 days. Where the line is to be drawn is unclear.

### 3.36.4 *Knowing that visits will average more than 91 days*

The 2010 version of HMRC6 replaces "intend" with "know".

What if someone comes to the UK on a visitor's visa, applies for a visa to remain in the UK, but is not sure whether the visa will be obtained?

---

116 HMRC6 para 2.2 provides:
"There are many different factors which will determine whether you are resident in the UK during a tax year. **With one exception [the 183-day test], it is not simply a question of the number of days you are physically present in the UK during a tax year although this is an important consideration.**"

Such a person ,might "intend" to remain in the UK[117] but they do not "know" that they will remain in the UK.

## 3.37 Calculating annual average visits for visitors rules

The method of computation for the visitors rules is slightly different from the method used for those leaving the UK.
HMRC6 provides:

> **7.6 How to calculate your average days in the UK**
> Calculating your annual average days in the UK is a useful indication of the extent of your connection to the UK. It may also indicate if – when you have visited the UK frequently – you have become resident here.
> If you need to calculate your annual average days in the UK, you do so like this:
>
> $$\frac{\text{Total days in the UK}}{\text{Relevant tax years (in days)}} \times 365 = \text{annual average visits}$$
>
> The annual average is calculated over the number of years you have been visiting the UK, up to four years after which only the last four years are included in the average. (But if the pattern of your visits varies substantially year by year, it might be appropriate to look at the periods with different patterns separately and to calculate average days in the UK for each distinct period).

The text continues with a straightforward example though with a specific disclaimer before it[118] and a general disclaimer after it:

> **Example**
> If you arrived in the UK on 20 May 2008 and were in the UK for:
> 79 days in the tax year 2008–09 (320 days in the remainder of the tax year)

---

117 This is consistent with the rule that an illegal immigrant may be UK domiciled: see 2.11 (Refugees, illegal immigrants and temporary visas). See Michael Bratman, "Intention, Plans, and Practical Reason", CSLI Publications, (1999), pp.37, 38, accessible *www.kessler.co.uk*.

118 "This is for illustrative purposes only and any calculation you make would be based upon your own circumstances – the day that you actually started to visit the UK and the days that you have been here in the period."

91 days in the tax year 2009–10 (365 days in the tax year)
98 days in the tax year 2010–11 (365 days in the tax year)
79 days in the tax year 2011–12 (366 days in the tax year)
The average of your visits would be:
2008–09 — 79÷320 × 365 = 90.1
2009–10 — (79+91)÷(320+365) × 365 = 90.6
2010–11 — (79+91+98)÷(320+365+365) × 365 = 93.2
2011–12 — (79+91+98+79)÷(320+365+365+366) × 365 = 89.4

This is the general practice, but it will not necessarily be appropriate in all cases. If you spend very significant amounts of the year travelling internationally, you should keep a record both of the days you were present in the UK and of those days where you are here at midnight. Both will be factors when looking at the pattern and purpose of your visits.

## 3.38 Ordinary residence

HMRC6 provides:

**3.2 What does ordinary residence mean?**
Ordinary residence is different from 'residence'. The word 'ordinary' indicates that your residence in the UK is typical for you and not casual. It is important not to confuse ordinary residence with domicile (see part 4).
If you have always lived in the UK then you are ordinarily resident here. When you come to the UK you do not have to intend to remain in the UK permanently or indefinitely in order to be ordinarily resident here. It is enough that your residence has all the following attributes.
• Your presence here has a settled purpose. This might be for only a limited period, but has enough continuity to be properly described as settled.
Business, employment and family can all provide a settled purpose, but this list is not exhaustive.
• Your presence in the UK forms part of the regular and habitual mode of your life **for the time being**. This can include temporary absences from the UK. For example if you come to live in the UK for three years or more then you will have established a regular and habitual mode of life here from the start.
• You have come to the UK voluntarily. The fact that you chose to come to the UK at the request of your employer rather than seek another job does not make your presence here involuntary.

> The pattern of your presence, both in the UK and overseas, is an important factor when you are deciding if you are ordinarily resident in the UK. You will also need to take into account your reasons for being in, coming to, or leaving the UK and your lifestyle and habits. Parts 7 and 8 will help you with this, as they explain the considerations for those coming to and departing from the UK.
> ....

HMRC6 para 3.3 gives two examples. After the usual four disclaimers[119] they are:

> ***Example 1 (Sarah)***
> S is a British citizen who has lived in the UK most of her life. She has homes in London, California and France and has spent substantial amounts of time at her other homes or travelling on business.
> The opportunity arises for S to travel more on business, especially in North America and she therefore spends less time in the UK and more time in her California home. S's partner and their children are based in the UK and the family spends the summer together in France. During the year ended 5 April 2010 S is present in the UK at the end of 43 days, although she typically arrives in the UK in the morning and leaves in the evening so many of the days she is in the UK do not get counted for the 183 day test.
> S's 'end of day' counts for the years ended 5 April 2011, 5 April 2012 and 5 April 2013 are 85, 110 and 90 respectively. The average for the four years to 5 April 2013 is just under 82 days.
> Although S has been present in the UK at the end of the day for an average of less than three months during the four years under review, she has remained resident and ordinarily resident here. This is because her presence in the UK in all years shows a pattern indicating residence here and that such residence is 'ordinary' for her. There is nothing casual about her residence – S has a home and family in the UK to which she returns whenever she wishes and her business allows. S's residence in the UK continues. Her presence in the UK is an integral part of the regular pattern of her life. The precise amount of time that S spends in

119 "These examples are only illustrative. You will need to consider all the facts in your own case, including the purpose of any previous visits, any emerging patterns and your total and average day counts. It is not possible to cover every eventuality in this guidance and you may like to contact us or take professional advice if your circumstances are not obviously covered in this part of the guidance. If any of the facts in the examples are changed then the status of the individuals might change."

the UK does not affect this fundamental point.

S has been and remains resident and ordinarily resident in the UK. It is possible that S is resident in France or the USA for the purposes of French or US federal and state income taxes. This does not affect her residence in the UK. If she is dual resident for any period it might be necessary to decide where S is treaty resident for the purposes of the relevant Double Taxation Agreement.

The next example is a straightforward case of non-ordinarily residence.

***Example 2 (Juan)***

J is a Spanish citizen and is seconded by his Spanish employer to work on a project in the UK for approximately nine months from early June 2009. J's wife and family remain in Spain and he returns there to visit them every two weeks. He takes two weeks holiday in August 2009 which he spends outside the UK and another two weeks at Christmas which he spends in Spain with his family.

When he first arrives in the UK, J stays in hotels but he then takes a six-month lease on an apartment here that he extends for two months in early 2010. The project is completed and J returns to Spain in mid-March 2010.

J has spent more than 183 days in the UK. He is resident for the year ended 5 April 2010 but he is not ordinarily resident.

J takes up a new employment in Spain in July 2010. His new employer seconds him to their UK business to resolve a crisis in the business. His wife and family again remain in Spain, but he is not able to visit them very often and they visit him in the UK once a month. Between early September 2010 and 5 April 2011 J spends over 183 nights in the UK, either in a company flat or in various hotels. His secondment ends and he returns to Spain at the end of May 2011.

J is resident in the UK for the year ended 5 April 2011 but he is not ordinarily resident here.

His residence in the UK does not yet have a sufficiently settled purpose; it is still not 'ordinary' for him.

### 3.38.1 *Ordinary residence: arrivers*

HMRC6 provides:

**7.7.2 Ordinary residence**

Your ordinary residence status may affect what UK tax you have to pay and this status may change while you remain in the UK.

... Generally, you become ordinarily resident in the UK when it becomes normal ('ordinary') for you to be resident in the UK. Sometimes it is clear that you become ordinarily resident as soon as you arrive in the UK, but sometimes ordinary residence is established only after you have been here for a while. If you come to the UK for less than three years, you might not be ordinarily resident here but there are many factors to consider. You should read part 3 of this guidance which explains what is meant by 'ordinarily resident in the UK'.

If your circumstances change after you first arrive in the UK, it is possible that your ordinary residence status might change as a result.

**7.7.3 Ordinary residence when you arrive**

If you have come to the UK for a settled purpose, for example to live or work in the UK for three years or more, you will be ordinarily resident from when you first arrive.

If you own or acquire accommodation on a long-term lease of three years or more in the year you arrive this is an indication that your presence in the UK forms part of the regular and habitual mode of your life for the time being. Such a mode of life means you are ordinarily resident from when you arrive. But the ownership of accommodation by itself will not make you ordinarily resident provided you dispose of it and leave the UK within three years of your arrival.

You can still be ordinarily resident in the UK even if you leave within three years, for example if your purpose for being here was settled when you first came here.

**7.7.4 Ordinary residence after arrival**

If you do not have a settled purpose on arrival you can still become ordinarily resident. You will become ordinarily resident with effect from the start of the tax year in which:

• you first have a settled purpose

• you decide to stay here for three years or more from the date of your arrival

• you remained for more than three years from the date of your arrival.

Factors that indicate you have made a decision to stay in the UK for more than three years include acquiring a lease on accommodation or accepting an employment contract lasting more than three years from the date of your arrival.

As explained above, if you have remained for more than three years from the date of your arrival you will be ordinarily resident here from the start of the tax year in which the third anniversary falls. While this applies to the vast majority of cases, there could be exceptions, where particular facts – that you would need to support with evidence – might indicate the contrary. For example, if you marginally overstayed a three-year period

> and then left the UK, perhaps because a project you were working on over-ran or a house purchase fell through, you might still be not ordinarily resident for the duration of your stay. (If you later return to the UK and become resident again, within two years of having left, you are very likely to become ordinarily resident on your return.)
> In very unusual circumstances you may be resident in the UK for three years or more but remain not ordinarily resident. If this is the case, you will need to demonstrate that your residence in the UK is not 'ordinary' for you and that you have no settled purpose here. The circumstances in which this would apply and when you will become ordinarily resident will be taken on the facts of each case. You may wish to take professional advice if you think this applies to you.
> If you are ordinarily resident in the UK, leave and return within two years, you will usually be ordinarily resident from the date of your return.

Para 7.8 HMRC6 gives three examples. After the standard disclaimers,[120] it provides:

> **7.8.1 Example 1 – Ordinary residence when you have remained in the UK for three years or more**
> When you arrived in the UK on 6 June 2009, in the tax year 2009–10, you did not think that you would be staying here for three years or more. Since then you have not bought any accommodation here or leased any accommodation for three years or more. The accommodation you have used has been on short-term leases.
> On 7 June 2012 (tax year 2012–13) you are still in the UK. This is three years and a day since you first arrived here.
> You will be ordinarily resident in the UK from 6 April 2012. This is because you have now been in the UK for a long enough period of time for your being here to be considered 'ordinary' for you. 6 April 2012 is the start of the tax year 2012–13 in which the third anniversary of your arrival in the UK occurred.
>
> **7.8.2 Example 2 – Ordinary residence when your circumstances change and you remain in the UK for longer than originally planned**

120 "These are illustrative examples to support the guidance outlined in 7.7.4. The examples are not exhaustive or definitive but will help you understand your ordinary residence status when you have come to the UK. Your ordinary residence in the UK will be based on your individual circumstances."

When you arrived in the UK on 6 June 2009 you came on a fixed term appointment for a period of 18 months and did not think that you would be staying here for more than three years. In October 2010 you accepted a two year extension to your employment contract. You are contracted to remain in the UK until the end of 2012 which will be more than three years from the date you arrived here.

You will be ordinarily resident in the UK from 6 April 2010. This is because you are now going to be in the UK for a longer period than you first thought and the period is now long enough for your being here to be considered 'ordinary' for you. 6 April 2010 is the start of the tax year in which you made the decision to remain in the UK for longer than you originally planned.

If you had decided in December 2009 – in the same tax year as you arrived here, that you would be remaining in the UK until 2015 you would be ordinarily resident from 6 June 2009 which is the date you arrived in the UK. This is because – although you did not think you would be staying when you first arrived – you have decided to stay within the same tax year. The period for which you are now going to be here is long enough for your presence in the UK to be considered 'ordinary' for you.

**7.8.3 Example 3 – Ordinary residence when you buy or lease accommodation for three years or more**

When you arrived in the UK on 6 June 2009 you did not think that you would be staying here for three years or more. In May 2010 you buy a house in the UK to live in.

You will be ordinarily resident in the UK from 6 April 2010. This is because buying the house here shows that your being in the UK is now 'ordinary' for you. 6 April 2010 is the start of the tax year in which you bought the house.

*but*

If buying the house was the only reason you were ordinarily resident, and you sold the house and left the UK before 6 June 2012, you would be able to say that you were not ordinarily resident for the period you were here. The period of ownership was sufficiently short not to be classed as for a settled purpose of living in the UK.

HMRC say:

HMRC said that the recent First Tier Tribunal decision in the *Tuczka* case confirmed their interpretation of guidance on ordinary residence, building on the decision last year in *Genovese* which confirmed their interpretation of IR20 and SP 17/91 on the same matter. This meant that individuals originally intending to leave the UK within three years would be ordinarily resident from the beginning of the year in which that intention changed. At what point the decision was made to remain in the UK would always be a question of fact. The Tribunal decision in Turberville also confirmed HMRC's published position. HMRC were asked whether a work permit constituted an indicator of an intention to work permanently in the UK. HMRC replied that it would be one of a series of facts about an individual's circumstances which needed to be considered in their entirety. HMRC stressed that guidance could not be read as if it were legislation: it cannot provide a definitive answer to every situation which might arise in practice, but instead seeks to deal with the most common cases. Whether a taxpayer's circumstances fit within these common cases will be determined by the facts. ... HMRC were asked for clarification of paragraph 7.7.3 of HMRC6 (ordinary residence in the year of arrival in the UK). They explained that it sought to make clear that an individual's circumstances could change twice within three years and that there could be no guarantee that residence in the UK for less than three years will in all cases result in a not ordinarily resident status. For instance, a trainee could be offered a permanent job in the UK which they hadn't anticipated after completing a one year placement in the UK, only to be made redundant 20 months later at which point they depart from the UK. The final paragraph of 7.7.3 makes clear that such situations might be unusual, and residence status will always depend on the actual facts of each case.[121]

## 3.39 Students

HMRC6 provides one special rule for ordinary residence of students. Para 7.3 provides:

> [1] If your home has been abroad and you have come to the UK for less than two years for a period of study or education, you might not be resident in the UK (see paragraphs 7.4 and 7.5).

We then come to the point:

121 Joint expatriate Forum on tax and NICS: 26 May 2010 *www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf.*

> [2] If you have come to the UK for more than two years but less than four years for study or education, you will be resident in the UK while you are here. But you will **not** usually be ordinarily resident if:
> • you do not own or buy accommodation here
> • you do not acquire accommodation here on a lease of three years or more
> • when you leave the UK you do not plan to return here regularly for visits which average 91 days or more in a tax year (to calculate your average visits to the UK – see paragraph 7.6).

The word "usually" was added in the 2010 version of HMRC 6, which once again adds to the vagueness and detracts from the usefulness of the passage. There is no guidance as to what takes the matter out of the "usual". The point is to ensure that the taxpayer cannot rely on the passage if HMRC do not wish to follow it, but in practice no doubt that will happen rarely if at all.

It seems odd that a person here for three years to study is not ordinarily resident, but anyone else who is here for three years is ordinarily resident. Why do HMRC say this? I suspect that the practice may have a long history. The Education Act 1962 conferred student grants on those who were ordinarily resident in the UK. The Department of Education took the view that those who came to the UK to study did not become ordinarily resident (in order to deprive them of the right to a grant.) This was held to be wrong in *Shah*[122] which held that a student who comes to the UK to study comes for a settled purpose and so is ordinarily resident. The statement in HMRC6 (which presumably derives from the earlier practice, not reviewed since *Shah*) cannot possibly be defended. But it probably does not matter very often and taxpayers are not likely to complain.

DTAs often make special provision for students and will need individual consideration.[123]

---

122 See 3.15 (Case law: ordinary residence).

123 The OECD Model Convention art.20 provides:
"Payments which a student or business apprentice who is or was immediately before visiting a Contracting State a resident of the other Contracting State and who is present in the first-mentioned State solely for the purpose of his education or training receives for the purpose of his maintenance, education or training shall not be taxed in that State, provided that such payments arise from sources outside that State."

## 3.40 Diplomats, UN/EU officials

HMRC TDSI Guidance Notes provide:

> **4.44 Diplomats**
> ... The rules for determining whether someone is resident or ordinarily resident in the UK apply to members of a Diplomatic Mission in the same way as they apply to everyone else. ...
> **4.45 United Nations**
> The salaries of United Nations workers are usually exempt from income tax but whether or not they are resident or ordinarily resident in the UK is decided in the usual way. ...
> **4.46 European Community (EC) Officials**
> ... A brief outline of the residence status of officials of the European Community is
>
> - an individual who was NOR in the UK, but was ordinarily resident in another member state before taking up such employment and who is working in a member state will remain NOR in the UK,
> - an individual who was not ordinarily resident in any member state before taking up such employment will have his/her residence status determined according to the normal rules, or
> - an individual who takes up employment as an official of the EC and who works outside the EC, will have his/her residence status determined according to the normal rules
>
> An individual who was ordinarily resident in the UK before taking up employment as an official of the EC, and who works in a member state will remain ordinarily resident in the UK....

## 3.41 HMRC forms, rulings and certificates

### 3.41.1 *P85 (leaving the UK)*

The introduction to form P85 provides:

> Use this form to claim tax relief or a repayment of tax if:
>
> - you have lived or worked in the UK
> - you are leaving the UK, and
> - you may not be coming back or you don't know when you're coming back or,
> - you are leaving the UK to work full-time abroad for at least a complete tax year.

> Do not fill this form in if:
> • you normally live in the UK and are going abroad for short periods, for example on holiday or a business trip
> • you have completed, or are required to complete a Self Assessment tax return for the tax year that you leave the UK (unless you are leaving the UK to work full-time abroad for at least a complete tax year for a UK based employer).

The RDR Manual provides:

> **10115. Form P85** [March 2011]
> When you know that an individual is leaving, or has left the UK
> • issue form P85
> Keep the completed form as a permanent note.
> You are not likely to dispose of the liabilities of a departing taxpayer immediately or without continuing correspondence.
> Keep personal records as file cases whilst liability is under review.
> If the individual is within self assessment
> The form P85 should be rejected if there is a continuing source of UK income. You should advise the customer that as he has a continuing UK source of income the SA Return issued at the end of the tax year should be completed in the normal way.
> Providing the taxpayer has left the UK and all sources of UK income have ceased, the completed form P85 can be accepted as a request for an early settlement and an in-year return should be issued. (Refer to PAYE90020).
> However, if the taxpayer is leaving to work full time abroad for a UK employer for a period of at least a complete tax year, the form P85 can be completed to enable the taxpayer to receive a code NT. If a form P85 has not been received before the Return for the tax year of departure is issued, the following action may need to be taken
> • issue the form P85 after the Return for the year of departure is received as part of a formal enquiry into the Return
> • do not close the enquiry until you are sure that all the queries and action which are necessary after receipt of the completed form have been taken (particularly not before you have received advice on residence where the case needs to be sent to CAR, PTI Advisory, Residence & Domicile Technical Team, Bootle.

There was formerly a form P85(S) for non UK citizens. HMRC say:

> From 30 November 2010 the form P85(S) should no longer be used.

Individuals claiming a tax refund on leaving the UK to work or live abroad, following the completion of a work assignment, should complete the form P85 (Leaving the UK – getting your tax right).

### 3.41.2 *Form P86 (arrival in the UK)*

HMRC form P86 (arrival in the UK) is now withdrawn. The RDR manual provides:

> **RDRM10215 - Residence: Coming to the UK: Form P86**
> Since 1 June 2010 the form P86 has been withdrawn and new arrivals to the UK will be integrated into HMRC processes by existing means
> • Form P46 or P46(Expat) for new employees
> • CWF1 for newly self employed, or
> • SA1 registration process for customers who are not self employed but who need to complete a tax return
> Please refer to BGN 044/10 for further information (also refer to EIM42890 and PAYE81750).

### 3.41.3 *Form P46(expat)*

Form P46 is for new employees. Form P46(expat) is the version for employees seconded to the UK. The 04/10 version provides:

> Only fill in this form if you have been seconded to work in the UK.
> For the purposes of this form only, a seconded employee includes:
> • individuals working wholly or partly in the UK for a UK resident employer on assignment whilst remaining employed by an overseas employer
> • individuals assigned to work wholly or partly in the UK at a recognised branch of their overseas employer's business
> • all individuals included by an employer within a dedicated expatriate scheme
> • all individuals included by an employer within an expatriate modified PAYE scheme.

HMRC say:

> The form P46 (Expat) has been designed specifically for use with inward assignee employees. HMRC procedures meant that without this special form, notification of commencement would be mis-directed within HMRC which could

> then lead to further difficulties for both customers and HMRC alike. It was essential that employers bringing inward assignees to the UK use form P46 (Expat) to notify commencement and indeed HMRC would no longer be able to accept forms P86 in lieu of a P46 (Expat).To do so would override fixed HMRC procedures and may generate penalties for employers. Accordingly, HMRC would no longer accept forms P86 or 64-8 as notification of a new employee where no P46 (Expat) was received and CAR Expats would return such forms where the P46 (Expat) was absent.
>
> HMRC accepted that there may be cases where no PAYE obligation existed. In these circumstances, advisers can write to CAR Expats setting out the relevant circumstances and an SA record will be set up for the individual taxpayers.
>
> Attention was drawn to recent publicity surrounding the SA1 process and in particular the need for National Insurance numbers to be quoted in this connection. HMRC is looking at the procedures in so far as they relate to inward expatriates and is seeking to identify some individuals for whom an annual SA Return may not be required. This work is on-going but feedback will be provided to the Forum as soon as any is available. In the meantime, the SA1 process need not be followed for inward expatriates; CAR Expats will continue to issue an SA Return from receipt of the P46 (Expat).
>
> HMRC confirmed that the national process related to the setting up of UTRs does not involve automatic notification to agents of the UTR created. However, in CAR Expats there will be automatic notification to agents of the UTRs where forms 64-8 have been submitted. Agents can also gain access to UTR information through the Gateway but HMRC can no longer handle requests for UTRs to be entered on to lists. It was recognised that there was some confusion around agents' codes which could lead to difficulties but HMRC felt that this was a simple thing for agents to resolve. CAR Expats was no longer resourced to handle requests for the entry of UTR details on lists provided by agents and, accordingly, would no longer be prepared to do so. Agents should therefore ensure that timely and accurate information was provided to HMRC in the first place to ensure that they were advised of the UTR on its creation and that they use the Gateway to gain access to UTRs belonging to their clients.[124]

Where s.828A ITEPA applies, an appropriate letter should be submitted with form 46(expat) to prevent issue of an SA return: see 12.30.9 (Administration: avoiding issue of SA return).

### 3.41.4 *Rulings*

HMRC will not give residence rulings. The International Manual provides:

124 Notes of the Joint Expatriate Forum 15 October 2009 *www.hmrc.gov.uk/consultations/expat-mins-151009.htm*.

**162040. Determination of UK residence - individuals** [January 2011]
An individual's residence status is determined in accordance with the principles set out at IM25 onwards, and for years up to and including 1995-96, rulings were provided routinely by the Centre for Non-Residents, Bootle.
For years from 1996-97, individuals within Self Assessment are able to certify their own residence status on their SA tax return. Residence 'rulings' as such will no longer be provided as a matter of course by the Centre for Non-Residents. Officers who are required to certify that an individual is UK resident for the purposes of a treaty claim should act upon any relevant information provided by the taxpayer for example on forms P85 or P86 or on the most recent SA tax return, but the provision of a certificate on that basis does not amount to the making of a formal determination of residence status. It remains open to Officers, in appropriate cases, to enquire into an individual's residence status as part of an enquiry into a SA tax return once it has been received.

## 3.42 Scotland Act 2011

HMRC say:

10.1 ... the Scotland Bill ... devolved a number of powers to the Scottish Parliament, including the power to set a Scottish rate of income tax. This would mean that Scottish taxpayers would pay an element of tax on their non-savings income direct to the Scottish Parliament at a rate to be determined. The tax would be first implemented in the tax year following the 2015 election.
10.2 This would entail significant changes to PAYE and SA systems and processes but HMRC stressed that the long lead-in times would enable them to be resolved before implementation. They also stressed that only the power to set the rate of tax was being devolved and that all other aspects of the tax system were reserved matters. This meant that there would be no impact on issues such as double taxation agreements and the remittance basis.
10.3 An individual will always be a Scottish taxpayer for a full tax year in which his sole or main residence is in Scotland. HMRC stressed, however, that split year treatment under ESC A11 would continue to be available to Scottish taxpayers entering or leaving the UK in the same way as it would for any other UK-resident taxpayer.[125]

125 Joint Expatriate Forum on Tax and NICs: 10 Feb 2011 Meeting Note.

The Scotland Act 2011 introduces a definition of "Scottish taxpayer" in a new s.80D Scotland Act 1998. This definition is different from common law residence and distinct from the proposed statutory residence test. I hope to consider it in a future edition of this work.

## 3.43 Commentary: the future of residence

In the 2010/11 edition of this work I said that "The urgent need for a statutory definition of residence will be obvious to anyone who has read this chapter"[126] and "the pressure for a proper statutory definition of residence is likely to prove irresistible." The Residence Consultation Paper proposing a statutory residence test is discussed in the next chapter.

126 See in particular 3.18 (Commentary: Assessment of case law tests).

CHAPTER 3A

# RESIDENCE OF INDIVIDUALS FROM 2012/13

## 3A.1 Residence from 2012/13 - Introduction

In June 2011 HMRC published a consultation paper entitled Statutory Definition of Tax Residence (**“the Residence Consultation Paper”**).[1] This proposes a new statutory residence test.

Subject no doubt to minor changes, this is likely to become law from 2011/12. Most of the problems raised by the current (non)definition of residence will be swept away, thus carrying out the reform recommended by the Consolidation Committee in 1936.

This chapter discusses the consultation paper.

## 3A.2 Scope of new statutory residence test

The Residence Consultation Paper provides at 3.10:

- [The SRT] will define tax residence for individuals and it will not cover the residence of companies;
- it will apply for the purposes of income tax, capital gains tax and inheritance tax;
- it will not apply for non-tax purposes or other Government services where residence is separately defined, such as National Insurance Contributions[2]; and
- the new statutory definition will supersede all existing legislation, case law and guidance for tax years following its introduction.

---

1 Accessible *www.hm-treasury.gov.uk/d/consult_condoc_statutory_residence.pdf*

2 In fact there is no definition of residence for NIC purposes.

## 3A.3 Outline of statutory residence test

The Residence Consultation Paper provides:

> 3.11 To enable the SRT to provide both for those with straightforward affairs and those whose tax residence position is more complicated, the Government proposes that the test will have three parts:
> - Part A contains conclusive non-residence factors that would be sufficient in themselves to make an individual not resident.
> - Part B contains conclusive residence factors that would be sufficient in themselves to make an individual resident.
> - Part C contains other connection factors and day counting rules which will only need to be considered by those whose residence status is not determined by Part A or Part B.
>
> 3.12 In using the test, an individual will need to consider which part of the test is applicable to their personal circumstances:
> - If an individual satisfies any of the conditions at Part A for a tax year they will definitely be not resident in that tax year.
> - If Part A does not apply but the individual satisfies any of the conditions in Part B, they will definitely be resident in that tax year.
> - If none of the conditions at Part A or Part B are satisfied, the individual should consider Part C.
>
> 3.13 In the rare situations where an individual satisfies one of the conditions in both Part A and Part B, for example someone whose only home is in the UK but who spends very few days in the UK in a particular tax year, Part A will take precedence and the individual will definitely be not resident in that year.

## 3A.4 Conclusive non-residence (part A)

The Residence Consultation Paper provides:

> **Part A: conclusive non-residence**
> 3.15 In some circumstances an individual should have certainty that they are not tax resident in the UK without having to take account of the connections they have with the UK. This is particularly the case when they are present in the UK for only a small number of days in a tax year.
> 3.16 In addition, as under the current rules, the Government believes a UK resident individual who leaves the UK to work abroad full-time should be non-resident for the duration of this work irrespective of the connections with the UK they leave behind, subject to certain conditions. This provision is important to employers and business as it significantly

reduces administration relating to employees being sent abroad.

3.17 Therefore, Part A of the test will conclusively determine that an individual is not resident in the UK for a tax year if they fall under any of the following conditions, namely they:

[1] were not resident in the UK in all of the previous three tax years and they are present in the UK for fewer than 45 days in the current tax year; or

[2] were resident in the UK in one or more of the previous three tax years and they are present in the UK for fewer than 10 days in the current tax year; or

[3] leave the UK to carry out full-time work abroad, provided they are present in the UK for fewer than 90 days in the tax year and no more than 20 days are spent working in the UK in the tax year...

3.19 An individual who does not fall within Part A would not necessarily be UK resident. They would instead need to consider Part B or Part C of the test...

## 3A.5 Conclusive residence (part B)

The Residence Consultation Paper provides:

**Part B: conclusive residence**

3.20 There are a large number of people who are clearly tax resident in the UK because they:

- spend almost all their time in the UK;
- work exclusively or predominantly in the UK; or
- have their home in the UK and base their life and family here.

3.21 The SRT should provide a clear answer for such individuals, including those who come to the UK part way through the tax year. The purpose of Part B is to provide certainty for this group, including the many expatriate employees who come from abroad to work on posts in the UK.

3.22 Provided Part A of the test does not apply, an individual will be conclusively resident for the tax year under Part B if they meet any of the following conditions, namely they:

[1] are present in the UK for 183 days or more in a tax year; or

[2] have only one home and that home is in the UK (or have two or more homes and all of these are in the UK); or

[3] carry out full-time work in the UK. ...

3.24 The Government considers that these factors are simple to apply and would provide certainty for many individuals as well as for employers who bring employees to the UK on secondment.

3.25 An individual who does not meet any of the conditions in Part B would not necessarily be non-resident; instead they would need to consider Part C of the test.
3.26 As outlined in paragraph 3.13 in cases where an individual satisfies a condition in both Part A and Part B, the individual would be non-resident.

## 3A.6 Non-conclusive cases: Part C

The Residence Consultation Paper provides:

3.27 Part C would apply only to those individuals whose residence status is not determined by Part A or Part B and, therefore, whose circumstances are less straightforward.
3.28 Part C reflects the principle that the more time someone spends in the UK, the fewer connections they can have with the UK if they want to be non-resident. It also incorporates the principle that residence status should adhere more to those who are already resident than to those who are not currently resident.
3.29 Under Part C an individual would simply need to compare the number of days they spend in the UK against a small number of clearly defined connection factors. Individuals who know how many days they spend in the UK and how many relevant connection factors they have would find it straightforward to assess whether they are resident.
3.30 The Government proposes that the following connection factors should be relevant to an individual's residence status, but only when linked to the amount of time the person spends in the UK. These factors are defined in detail in Chapter 4:

- **Family** – the individual's spouse or civil partner or common law equivalent (provided the individual is not separated from them) or minor children are resident in the UK;
- **Accommodation** – the individual has accessible accommodation in the UK and makes use of it during the tax year (subject to exclusions for some types of accommodation);
- **Substantive work in the UK** – the individual does substantive work in the UK (but does not work in the UK full-time);
- **UK presence in previous year** – the individual spent 90 days or more in the UK in either of the previous two tax years;
- **More time in the UK than in other countries** – the individual spends more days in the UK in the tax year than in any other single country.

3.31 All of these factors are a strong indication of where the centre of a person's life is and all are relevant under current case law. Including these factors provides clarity on the residence status of individuals who 'leave' the UK but keep their family and home here; these situations account for much of the uncertainty in the current rules.

3.32 These connection factors would be combined with days spent in the UK into a "scale" to determine whether the individual is resident or not.

3.33 It is proposed to have separate "scales" for arrivers and leavers, reflecting the principle that it should be harder for leavers to relinquish residence than for new arrivers to acquire it. These are described in detail below.

## 3A.7 Non-conclusive cases: arrivers

### 3A.7.1 *Connecting factors for arrivers*

The Residence Consultation Paper provides:

**(i) Individuals not resident in all of the previous three tax years (arrivers)**

3.34 If the individual was not resident in all of the three tax years preceding the year under consideration, the following connection factors may be relevant to their residence status, if they occur at any point in the tax year, namely the individual:

[1]has a UK resident **family**;
[2]has substantive UK **employment** (including **self-employment**);
[3]as accessible **accommodation** in the UK;
[4]spent **90 days or more** in the UK in either of the previous two tax years.

3.35 The way these connection factors are combined with days spent in the UK to determine residence status is as follows:

### 3A.7.2 *Interaction of day test with arrivers connecting factors*

The Residence Consultation Paper provides:

| **Days spent in UK** | **Impact of connection factors on residence status** |
|---|---|
| Fewer than 45 days | Always non-resident |
| 45 – 89 days | Resident if individual has **4 factors** (otherwise not resident) |
| 90 – 119 days | Resident if individual has **3 factors or more** (otherwise not resident) |
| 120 – 182 days | Resident if individual has **2 factors or more** (otherwise not resident) |
| 183 days or more | Always resident |

## 3A.8 Continuing significance of old residence law

The Residence Consultation Paper provides:

> 3.56 The current rules will continue to apply for the assessment of tax liability in tax years prior to the introduction of the statutory test, including 2011-12. It is not proposed to allow individuals to apply the new definition retrospectively to calculate tax for prior years.
> 3.57 As set out in the proposed framework, the application of some elements of the test for years after the introduction of the new definition would depend on whether or not an individual was resident in previous tax years. In particular, an individual would need to know whether they had been resident in any of the previous three years to decide which element of Part C to use. The Government has considered whether there is a case for introducing a transitional rule enabling individuals to elect to apply the new statutory definition of residence to prior years in these specific situations. However, despite the uncertainty of the current rules, the individual will have needed to know what their residence status was in prior years to determine their tax status in the UK and many will have filed a Self Assessment (SA) tax return for those years declaring either that they were resident or not resident. It therefore does not propose to offer such a transitional rule but would welcome views on this point.

Because of the distinction between leavers and arrivers, the existing law will continue be directly relevant to determine whether a person is a leaver or an arriver:
**2012/13:** position depends on residence in 2008/09, 2009/10, 2010/11 (applying old residence definition)
**2013/14:** position depends on residence in 2009/10, 2010/11 (applying old residence definition)
**2014/15:** position depends on residence in 2010/11 (old law directly applicable)
By **2015/16** the position will depends on residence in 2012/13 - 2014/5, applying the new law; but the residence position in those years will apply the old law. Thus it will take decades before the old law is completely obsolete, but the number of cases in which it matters will become small by 2015 and will diminish each year thereafter.

## 3A.9 Non-conclusive cases: leavers

### 3A.9.1 *Connecting factors for leavers*

The Residence Consultation Paper provides:

> **(ii) Individuals resident in one or more of the previous three tax years (leavers)**
> 3.36 If the individual was resident in one or more of the three tax years immediately preceding the tax year under consideration, the following connection factors may be relevant to their residence status, if they occur at any point in the tax year, namely the individual:
> [1] has a UK resident **family**;
> [2] has substantive UK **employment** (including **self-employment**);
> [3] has accessible **accommodation** in the UK;
> [4] spent **90 days** or more in the UK in either of the previous two tax years;
> [5] spends **more days in the UK** in the tax year than in any other single country.

Factor 5 (more time in UK than another country) applies to leavers but not to arrivers. Presumably the object is that HMRC can notify tax authorities of the country where the individual spends most time, to see if tax should be paid there.

The definition of "country" is crucial, and the question will sometimes arise as to what constitutes a single country. If an individual spends time in different states of a federal country, such as the USA, then the time counts as spent in one country. But some constitutional research will occasionally be necessary. Are Spain and Majorca one country? Or Guernsey, Alderney and Sark? Or are they separate countries?

### 3A.9.2 *Interaction of day test with leavers connecting factors*

The Residence Consultation Paper provides:

> 3.37 The way these connection factors are combined with days spent in the UK to determine residence status is as follows:

| Days spent in UK | Impact of connection factors on residence status |
|---|---|
| Fewer than 10 days | Always non-resident |
| 10 - 44 days | Resident if individual has **4 factors or more** (otherwise not resident) |
| 45 – 89 days | Resident if individual has **3 factors or more** (otherwise not resident) |
| 90 – 119 days | Resident if individual has **2 factors or more** (otherwise not resident) |
| 120 – 182 days | Resident if individual has **1 factor or more** (otherwise not resident) |
| 183 days or more | Always resident |

## 3A.10 "Full-time work abroad"

The Residence Consultation Paper provides:

> 4.1 ... These definitions are not final and there will be scope to refine them, if appropriate, when legislation is drafted.
> **Full-time work abroad**
> 4.2 A person has full-time work abroad (FTWA) if they leave the UK to perform work abroad and are:
> - employed abroad under one or more contracts of employment (including consecutive employments) or hold offices which have combined total hours of 35 hours per week or more; or
> - carrying on one or more trades or professions wholly abroad where 35 hours of work per week or more is undertaken on average.
>
> 4.3 In either of these cases the work must be carried out for at least one full tax year if it is to be classed as full-time work abroad.
> 4.4 When a person is working full-time abroad, no more than 20 working days can be performed in the UK in any one tax year. This limit will be reduced pro rata if the individual is treated as being not resident for part of a year under the split year rules.
> 4.5 The person must be present in the UK for fewer than 90 days. This limit will be reduced pro rata if the individual is treated as being not resident for part of a year under the split year rules.
> 4.6 Individuals who do not meet all the criteria for full-time work abroad, for example if they have more than 20 working days in the UK, will not necessarily be resident; they may still be non-resident under Part C.

## 3A.11 "Working day"

The Residence Consultation Paper provides:

> 4.7 A working day is any day on which three hours or more of work is carried out.
> 4.8 If an individual carries out fewer than three hours of work, the day will not count towards the threshold of 20 working days for the purposes of FTWA.
> 4.9 Even if an individual is not present in the UK at the end of the day, they will still be treated as working in the UK on that day if they have worked in the UK for three hours or more.
> 4.10 Where individuals work in the UK for less than three hours on a particular day, they would be expected to have sufficient records to demonstrate this fact.

## 3A.12 "Day present in the UK"

The Residence Consultation Paper provides:

> 4.16 There will be no change to the definition of what is meant by a 'day' or 'presence in the UK'. A person will be treated as being in the UK on any day where they are in the UK at midnight at the end of that day.
> 4.17 The current rules for individuals travelling through the UK as a passenger where they are in the UK at the end of any day will also be retained. This will mean that a day will not count as a day of UK presence if they arrive in the UK as a passenger, they depart from the UK on the next day and during their time in the UK they do not engage in any activity substantially unrelated to their passage through the UK.

## 3A.13 "Home"

The Residence Consultation Paper provides:

> 4.12 If a person has only one home and that is in the UK or they have more than one home and all of these are in the UK, this will constitute an 'only home'.
> 4.13 Residential accommodation is not treated as an individual's home if that accommodation is being advertised for sale or let and the individual lives in another residence.
> 4.14 A person is working full-time in the UK if they are:
>
> - employed in the UK under one or more contracts of employment (including consecutive employments) or hold offices with total combined contracted hours of 35 hours per week or more; or

> - carrying on one or more trades or professions in the UK where 35 hours of work per week or more is undertaken on average.
>
> 4.15 The work must be carried out in the UK over a continuous period of more than 9 months (excluding short breaks such as illness or holidays) and not more than 25% of the duties can be undertaken outside of the UK within that period.

## 3A.14 "Family in the UK"

The Residence Consultation Paper provides:

> 4.19 An individual has family in the UK in a tax year if either of the following applies:
>
> - the individual's spouse, civil partner or common law equivalent is resident in the UK in that tax year or any part of that tax year. This does not include a spouse, civil partner or common law equivalent if they are separated from the individual under a court order or a separation agreement or where the separation is likely to be permanent; or
> - the individual has children under the age of 18 who are resident in the UK and the individual spends time with those children (one to one or with others present), or lives with them, for all or part of 60 days or more during the tax year. It would not matter whether these days were spent with the child in the UK or elsewhere.
>
> 4.20 A child will not be treated as being resident in the UK for these purposes if their residence is mainly caused by time spent at a UK educational establishment. This will be when the child spends fewer than 60 days in the UK not present at the educational establishment and the child's main home is not in the UK.

## 3A.15 "Accommodation"

The Residence Consultation Paper provides:

> 4.21 An individual has UK accommodation if residential property:
>
> - is accessible to be used by them as a place of residence; and
> - is used by them or their family in the year as a place of residence. Family has the same meaning as in paragraphs 4.19 and 4.20.
>
> 4.22 The following categories of accommodation are not included as UK accommodation:
>
> - accommodation provided by an individual's employer where the accommodation is also accessible to, and used by, other employees

of that employer who are not connected to the individual. For example, premises owned or rented by the company that is used by all employees visiting the country while on company business;
- any accommodation held on a lease of six months or less, except where there are consecutive leases taking place. For example, if an individual moves from house A, with a six month lease to house B with a six month lease, and there are fewer than six weeks between leaving one house and living in the other, they will be considered to have UK accommodation;
- accommodation accessible to a child of the individual under the age of 18 where that accommodation is provided in relation to the child being a student at a UK educational establishment;
- short-term accommodation in hotels; and
- lodging with relatives, where staying in the home of a relative is for a temporary short-term visit only.

## 3A.16 "Substantive employment/self employment"

The Residence Consultation Paper provides:

> 4.23 An individual has substantive employment or self-employment in the UK if they work in the UK for 40 or more days in the tax year.
> 4.24 The definition of a working day is any day on which more than three hours of work is undertaken. This includes any day where the person is not in the UK at the end of that day.

## 3A.17 Transitional rules

The Residence Consultation Paper provides:

> 3.55 The SRT will provide a complete set of rules for determining whether a person is tax resident in the UK or not. It is intended that these will broadly recreate the outcome of the current residence rules and, therefore, it is not envisaged that there will be any need to provide transitional rules to cover any change in residence status for individuals between the old rules and the new ones.

## 3A.18 Ordinary residence

The Residence Consultation Paper provides:

6.16 The Government's proposed definition is that individuals who are resident in the UK should also be treated as ordinarily resident unless they have been non-resident in the UK in all of the previous five tax years. If they meet this condition, they may be not ordinarily resident. The status of being not ordinarily resident should be available in the tax year in which the individual arrives in the UK and for a maximum of two full tax years following the tax year of arrival.

6.17 The Government does not propose that everyone who comes to the UK for the first time or after a long period of absence should be entitled to be not ordinarily resident. In particular, it should not be possible for those who are coming to the UK permanently to be not ordinarily resident. This is the case under the current rules and the Government would like to preserve this feature as far as possible. Therefore, notwithstanding the individual's residence status in the previous five years, there will be exclusions from being not ordinarily resident if the individual:

- is resident in the UK on the basis that their only home is in the UK; or
- has more than one home and all of their homes are in the UK.

6.18 The Government is also considering whether any statutory definition of ordinary residence should be limited to non-domiciled taxpayers ("non-domiciles") only. Currently it is possible to be UK domiciled but also to be not ordinarily resident. However, very few individuals receive beneficial tax treatment purely as a result of being not ordinarily resident: fewer than 300 in 2008-09.

6.19 It would not be viable to recreate the current subjective definition of ordinary residence in statute. As a result, it is likely that some individuals who are currently ordinarily resident on the basis that they are coming to the UK permanently, would be not ordinarily resident under a statutory definition. This would pose a risk to the Exchequer in the case of domiciled individuals because they could gain access to the general remittance basis and overseas workday relief where they currently do not.

6.20 Therefore, the Government's preference is that it should only be possible for non-domiciled individuals to be not ordinarily resident.

## 3A.19 Reform of ordinary residence

The concept of ordinary residence is relatively unimportant for tax purposes and there have been calls for its abolition.[3] Abolition would be a gain in simplicity and few would be affected by the change. That is not enough to justify the abolition of ordinary residence: one would need to go through every occasion where ordinary residence mattered and ask whether the change was justified.

In the 2010/11 edition of this work I concluded:

> It is suggested that a useful distinction can be drawn between those resident for a year or two and those resident for three or more years, and ordinary residence (if clearly defined) does have a useful role to play in a fair tax system.

This is only correct if one adopts the understanding of what is ordinarily residence which was in the former IR20 and the 2009 version of HMRC6, and which broadly survives (with less clarity) in the 2010 version. If one adopts the view in *Tuczka*[4] that "the expression differs little in meaning from the word residence" then there is indeed no point in having two concepts and ordinary residence should be abolished where possible.

In some cases, ordinary residence is enshrined in international agreements or in existing Government undertakings (eg the promise not to tax non-ordinary residents on FOTRA securities) and that could not easily be abolished.

The Residence Consultation Paper provides:

> **Option for reforming ordinary residence**
> 6.21 The Government is considering two main options for the reform of ordinary residence and seeks views on the merits of these options.
> **Option 1: abolish ordinary residence for all tax purposes except overseas workday relief**
> 6.22 This option would abolish the concept of ordinary residence as a general concept for determining tax liability and access to the remittance basis.
> 6.23 The concept of overseas workday relief would be retained and the definition of 'not ordinarily resident' for this purpose would be put on

---

3 David Jeffrey, *Taxation*, (2001, p.254); STEP response to 2003 Background Paper on Residence & Domicile accessible *www.kessler.co.uk*. Ordinary residence is also unsatisfactorily vague but (like residence) that could quite easily be put right by a statutory definition.

4 See 3.15.7 (Residence and ordinary residence compared).

a statutory footing using the definition proposed in paragraphs 6.16 to 6.17.

6.24 This would mean that, for most purposes, individuals would simply have to determine whether they were resident and/or domiciled in the UK.

6.25 This would be a significant simplification. Individuals would no longer have to consider whether they were also not ordinarily resident and could concentrate on one simplified **26** definition of residence. It would also allow the many other references to ordinary residence in tax legislation, most of which are consequential, to be removed or replaced by a reference to residence.

6.26 It should be stressed that this option would not affect other legislative instances of ordinary residence outside tax legislation. For instance, ordinary residence is separately defined for the purposes of liability to National Insurance Contributions and it is not proposed to amend this.

6.27 Under this option the 300 individuals who are currently domiciled but not ordinarily resident and claim the remittance basis would lose access to the remittance basis for foreign investment income. There would be no impact on the ability of non-domiciled taxpayers to claim the remittance basis.

6.28 There would also be an impact on some individuals in other circumstances:

- individuals who are currently resident and not ordinarily resident would become liable to any charges that will apply under the transfer of assets legislation, provided the other provisions of that legislation applied; and
- the very few people who are not resident but ordinarily resident would no longer be liable to some tax charges such as CGT.

CHAPTER FOUR

# RESIDENCE OF TRUSTEES

## 4.1 Trustee residence – Introduction

Trustee[1] residence (like individual residence) is fundamental to the territorial limitations of IT and CGT.

There is one main definition of trustee residence, which is the same for IT and CGT.[2] The IT and CGT provisions are differently worded, but the effect of the rules is the same. In this chapter I set out both sets of provisions.[3]

The current rules adopt proposals originally made in the Trusts Consultative Document (1991) Chapter 10.[4] This is worth reading as it explains the background to the current rules.

The law before 2007/08 provided that a UK professional trustee of a trust with a non-resident, non-domiciled settlor was regarded as non-resident. This sensible provision allowed UK professional trustees to act without attempting to tax them. The object was to allow the UK to compete on equal tax terms with foreign trustees. The rule also helped keep administrative expenses down. The reason given for its abolition was that the Department of Trade and Industry had advised the rule breached EU

1 Strictly, one should refer to the residence of trustees, not the residence of a trust, but in practice the two expressions are used synonymously.

2 For IHT see 4.14 (Trustee residence for IHT).

3 Under the FA 2006, the wording was exactly the same (though the provisions were set out twice, once in ICTA and again in TCGA). But ITA repealed the ICTA provisions and recast them in its own plain English style. If (as the professional bodies asked at the time) the 2006 reform had been put back to 2007, this complication would have been avoided. But there it is.

4 Accessible *www.kessler.co.uk*.

restrictions on State Aid.[5]

Different rules apply to PRs.[6]

For the position where trustees change residence during a year, see 6.15 (Income tax on trustees).

## 4.2 Who are the trustees?

One needs first of all to identify the trustees.

Trustee is not usually defined for IT and CGT purposes and the identity of trustees of a classic settlement is a matter of trust law.

What if there has been an invalid appointment of new trustees, and the trust property has been transferred to the invalidly-appointed trustees? Trust law distinguishes between:

(1) a validly appointed trustee, and
(2) an invalidly appointed trustee who is not the proper owner and administrator of the trust assets, but who is of course subject to the duty to transfer the trust fund to the correct trustees, and may become a trustee *de son tort.*

What confuses matters is that the term "trustee" is sometimes (but not always) used to describe someone in category (2).[7] But it is considered that such a person is not a "trustee" for tax purposes.[8]

For the question whether a protector may be a trustee, see 4.13 (UK protector and trustee residence). For the identity of trustees of a

---

5 There are strong arguments against that view of EU law, and indeed the former UK rule still applies in Ireland. However HMRC refused to disclose the DTI advice which makes it impossible to assess the validity of the advice which HMRC said they received. One might speculate as to whether this was a true reason or an excuse. Following an application under the Freedom of Information Act, the Information Tribunal "urged" HMRC to disclose their reasons (which were "bald and substantially unexplained.") Unfortunately the Tribunal did not order HMRC to do so and HMRC disregarded the urging of the Information Tribunal as non-binding. So it remains a matter of speculation. For the freedom of information aspects, see *www.kessler.co.uk/FoI.*

6 See 67.3 (Residence and domicile of PRs for CGT) and 68.2 (Residence of PRs for IT)

7 See R.C. Nolan's learned article "Equitable Property" [2006] LQR 232.

8 For CGT this is clearer as an invalidly appointed trustee would be a nominee within s.60 TCGA, but the same would apply for IT. In *Jasmine Trustees v Wells & Hind* [2007] STC 660 it was held that invalidly appointed trustees were "trustees" but were not "trustees of the settlement", which is another route to the same destination.

settlement-arrangement which is not a classic trust, see 45.2 ("Settlement" and "trustee").

## 4.3 Trustees treated as single and distinct person

Section 474(1) ITA provides:[9]

> For the purposes of the Income Tax Acts (except where the context otherwise requires), the trustees of a settlement are together treated as if they were a single person (distinct from the persons who are the trustees of the settlement from time to time).

EN CTA 2010 Annex 1 change 3 explains this deeming provision:

> Section 474(1) of ITA (which applies also for corporation tax purposes - see section 1169 of this Act) substitutes a notional person for the trustees. That notional person is not a company and so cannot be an associated company [for the purposes of s.25 CTA 2010]. It follows that [the former] ESC C9 is not needed to prevent a trustee company and a company which it controls from being treated as associated. Similarly, if section 474(1) of ITA treats the trustees of two settlements as separate notional person, the concession is not needed to prevent two companies controlled by different settlements from being treated as associated [even if the trustees are actually the same person].

Section 69(1) TCGA provides the equivalent rule for CGT:

> For the purposes of this Act the trustees of a settlement shall, unless the context otherwise requires, together be treated as if they were a single person (distinct from the persons who are trustees of the settlement from time to time).

## 4.4 Trustee residence for income tax and CGT

Section 475 ITA provides:

> (1) This section applies for income tax purposes and explains how to work out, in relation to the trustees of a settlement—

---

9 The CGT equivalent is s.69(1)(3) TCGA.

> (a) whether or not the single person mentioned in section 474(1) is UK resident, and
> (b) whether or not that person is ordinarily UK resident.
> (2) If at a time either condition A or condition B is met, then at that time the single person is both UK resident and ordinarily UK resident.
> (3) If at a time neither condition A nor condition B is met, then at that time the single person is both non-UK resident and not ordinarily UK resident.

Similarly, s.69(2) TCGA provides:

> The deemed person referred to in subsection (1) shall be treated for the purposes of this Act as resident and ordinarily resident in the UK at any time when a condition in subsection (2A) or (2B) is satisfied.

There are therefore two circumstances in which trustees are UK resident: Condition A and Condition B. In the CGT legislation these are called Condition 1 and Condition 2. I refer to them as "**trustee residence conditions A and B**", to avoid confusion with the myriad of other conditions in ITA.

Since the same rules govern trustee-residence and trustee-ordinary residence, I generally refer just to "trustee-residence" and leave trustee-ordinary residence to be understood.

## 4.5 Trustee residence condition A: all trustees UK resident

Section 475(4) ITA provides:

> Condition A is met at a time if, at that time, all the persons who are trustees of the settlement are UK resident.

Similarly for CGT, s.69(2A) TCGA provides:

> Condition 1 is that all the trustees are resident in the UK.

One must identify the trustees' actual place of residence in their personal capacities, applying the tests of individual/corporate residence to each individual or corporate trustee. If all the trustees are UK resident, the trust is UK resident; conversely if all the trustees are not resident in the UK, then the trust is non-resident.

## 4.6 Trustee residence condition B: mixed resident trustees

Condition B deals with the position of trustees of mixed residence. Section 475(5) ITA provides:

> Condition B is met at a time if at that time—
> (a) at least one person who is a trustee of the settlement is UK resident and at least one such person is non-UK resident, and
> (b) a settlor in relation to the settlement meets condition C (see section 476).

I refer to condition C as "**trustee residence condition C**".

Similarly for CGT, s.69 TCGA provides:

> (2B) Condition 2 is that:
> (a) at least one trustee is resident in the UK,
> (b) at least one is not resident in the UK, and
> (c) a settlor in relation to the settlement was resident, ordinarily resident or domiciled in the UK at a time which is a relevant time in relation to him.
> (2C) In subsection (2B)(c) 'relevant time' in relation to a settlor—
> (a) means where the settlement arose on the settlor's death (whether by will, intestacy or otherwise), the time immediately before his death, and
> (b) in any other case, a time when the settlor made the settlement (or was treated for the purposes of this Act as making the settlement).

## 4.7 Trustee residence condition C

Condition C corresponds to the CGT relevant time rule. Section 476 ITA provides:

> **How to work out whether settlor meets condition C**
> (1) This section applies for the purpose of working out whether a settlor ("S") in relation to a settlement meets condition C at a time.

Section 476(2) ITA deals with testamentary trusts:

> If—
> (a) the settlement arose on S's death (whether by S's will, on S's intestacy or in any other way), and

> (b) immediately before S's death, S was UK resident, ordinarily UK resident or domiciled in the UK,
>
> then S meets condition C from the time of S's death until S ceases to be a settlor in relation to the settlement.

Section 476(3) ITA deals with lifetime trusts:

> If—
>
> (a) the settlement is not within subsection (2)(a), and
>
> (b) at a time when S made the settlement (or is treated for the purposes of the Income Tax Acts as making the settlement), S was UK resident, ordinarily UK resident or domiciled in the UK,
>
> then S meets condition C from that time until S ceases to be a settlor in relation to the settlement.

For the purposes of discussion it is convenient to have some terminology and I coin the following terms:

(1) A "**UK-linked settlor**" is one within Condition C, i.e. (in short) who is resident, ordinarily resident or domiciled in the UK when they made the settlement.

(2) A "**UK-linked trust**" is one where the settlor (or a settlor) was UK-linked when they made the settlement.

(3) A trust has "**mixed resident trustees**" if some trustees are UK resident and some are not.

Thus (in my terminology) a trust with mixed resident trustees is UK resident if it is a UK-linked trust; conversely it is non-resident if it is not a UK-linked trust.

### 4.7.1 *Identifying settlor and date of provision: tainting*

In trusts with mixed resident trustees, it is necessary to identify the settlor(s)[10] and to ascertain when the settlor(s) provide trust property.

A trust whose settlor is not UK-linked may have some UK trustees (as long as they are not the sole trustees). In that case, however, one must take care that no *other* UK-linked person provides even a nominal amount of funds because that will make them co-settlors and the trust UK resident.

10 See 69.1 (Who is the settlor?).

This is known as "tainting" the trust.[11]

Suppose:

(1) Year 1: the settlor makes a trust when not UK resident;

(2) Year 2: the *same* settlor comes to the UK and adds property to the settlement.

It is arguable that the time that S made the settlement was year 1; in year 2 S does not make a separate settlement; so the settlement is not UK-linked. However one should not plan on that basis.

For the position where a settlor leaves a loan outstanding after coming to the UK, see 69.16 (Interest-free or back-to-back loan).

### 4.7.2 *Split years*

Suppose a settlor makes a trust with mixed resident trustees and becomes UK resident later but in the same tax year. Since the reference is to residence at the (specific) time when S made the settlement, this is not a UK-linked trust.

## 4.8 Accidental residence: a trap

A trust may become UK resident if:

(1) its sole trustee becomes UK resident; or

(2) any trustee becomes UK resident and it is a UK-linked trust.

The consequences of a trust becoming UK resident will be disastrous for CGT and (except for IP trusts) for IT. Before 6 April 2007 this rule was mitigated for CGT, because a trust would not become UK resident for CGT if a trustee became resident for one year only.[12] That has been withdrawn. So it is essential for an individual to resign trusteeship before becoming UK resident if (1) a sole trustee or (2) trustee of a UK-linked trust. This includes trusteeships of foreign law charitable trusts.

This state of affairs is deliberate, for the 1991 consultative document discussed a relief for temporary resident trustees, but suggested, implausibly, that the problem was not significant. In practice, in cases of unfairness, I expect the problem will be overlooked or ignored by non-compliant taxpayers, and HMRC may not spot it or turn a blind eye.

---

11 See 69.3.9 (Tainting).

12 See the 4th edition of this book para 5.6.1 (Administration "ordinarily" carried on outside UK).

## 4.9 Sub-funds

It is common for one trust to hold separate funds ("sub-funds") on separate terms, and it is possible (though not common) for the sub-funds to have separate trustees. Section 474(2) ITA provides:

> If different parts of the settled property in relation to a settlement are vested in different bodies[13] of trustees, subsection (1) and sections 475 and 476 apply in relation to the different bodies as if they were all one body.

Thus the trust is UK resident unless the trustees of the sub-funds jointly meet the trustee residence conditions.

Section 474(3) deals with Settled Land Act settlements:

> The cases covered by subsection (2) include cases where settled land (within the meaning of the Settled Land Act 1925) is vested in the tenant for life and investments representing capital money are vested in the trustees of the settlement.[14]

Settled Land Act settlements are obsolescent and not considered here.

The FA 2006 introduced a regime for sub-funds where there has been a sub-fund election. The regime is supposed to be a relief, but its conditions are so strict that it is almost never used. In the first year of the sub-fund regime, only *eight* sub-fund elections were made.[15] The lengthy and complex provisions are dead letter tax law. There is a special residence rule for trusts subject to a sub-fund election: see s.477 ITA. In the circumstances it is not necessary to consider this here.

## 4.10 Transfer between settlements

Section 476(4) ITA deals with transfers between settlements:

---

13 The drafter has here retained the expression "body of trustees" which has elsewhere been deleted from the legislation, but it does not matter.

14 The CGT equivalent is s.69(3) TCGA.

15 Private correspondence.

> (4) Further, if—
> (a) there is a transfer of property in relation to which section 471 applies,
> (b) S is a settlor in relation to settlement 2 as a result of that section, and
> (c) immediately before the disposal by the trustees of settlement 1, S meets condition C as a settlor in relation to settlement 1 as a result of subsection (2) or (3) or this subsection,
> then S meets condition C as a settlor in relation to settlement 2 from the time S becomes such a settlor until S ceases to be such a settlor.
> (5) "Settlement 1" and "settlement 2" are to be read in accordance with section 470(1).

For CGT, the equivalent is the last paragraph of s.69(2C) TCGA:

> and, in the case of a transfer of property from Settlement 1 to Settlement 2 in relation to which s.68B applies, "relevant time" in relation to a settlor of the transferred property in respect of Settlement 2 includes any time which, immediately before the time of the disposal by the trustees of Settlement 1, was a relevant time in relation to that settlor in respect of Settlement 1.

## 4.11 Permanent establishment residence rule

Section 475(6) ITA provides:[16]

> If at a time a person ("T") who is a trustee of the settlement acts as trustee in the course of a business which T carries on in the UK through a branch, agency or permanent establishment there, then for the purposes of subsections (4) and (5) assume that T is UK resident at that time.

I refer to this as the "**PE residence rule**". The Trusts Consultative Document (1991) explains the reasoning:

> 10.21 The income tax test might need to be modified for certain foreign corporate trustees. A trust company, resident outside the UK, could be the sole trustee of a trust which was dealt with in this country by the

16 The CGT equivalent is s.69(2D) TCGA.

> company's UK branch. It would not be appropriate if such a trust were treated as non-resident, because it would then be taxed more favourably than a similar trust dealt with by a branch of a UK corporate trustee, or by some other UK professional. That could both lead to a loss of tax and put UK professionals at a competitive disadvantage. It is therefore suggested that the UK branch of a foreign trustee should be treated as a trustee resident in the UK for the purpose of the common residence test.[17]

The PE residence rule has four requirements:

(1) A trustee carries on a business.
(2) It carries on business in the UK.
(3) It carries on business through a branch, agency or PE in the UK.
(4) It acts as trustee in the course of that business.

HMRC has published 17 pages of guidance on the PE residence rule (**"HMRC Trustee Residence Guidance"**).[18] This is supplemented by another 25 pages of guidance issued in 2010 which is not discussed here, but which I hope to consider in the next edition.[19]

### 4.11.1 *"A business"*

The PE residence rule only applies if the trustee carries on a business. A trustee which does not charge, or only charges to recoup expenses (such as a family trustee company) does not carry on a business. This may offer a solution to the problem of the PE residence rule.

HMRC agree. HMRC Trustee Residence Guidance provides:

> By business we mean the business of providing professional trustee services for a fee.

---

17 accessible *www.kessler.co.uk*.

18 Accessible *www.hmrc.gov.uk/cnr/trustee-res-guidance.pdf.*. This was published 31 July 2009 (though the published version is dated 1 July 2009). HMRC say that the guidance will eventually be incorporated into the TSE Manual.

19 Taxguide 3/10 Trustee Residence: Guidance note agreed by HMRC issued August 2010 by ICEAW, CIOT and STEP accessible *www.icaew.com/en/technical/tax/tax-faculty/~/media/Files/Technical/Tax/Tax%20 news/TaxGuides/taxguide-3-10-trustee-residence.ashx*.

### 4.11.2 *"Acting as trustee in the course of a business"*

The business must be (or include) the business of acting as trustee. For instance, a trustee may run a property business in the UK, but is not acting as trustee in the course of running that business.

HMRC agree. HMRC Trustee Residence Guidance provides:

> 8. When considering the applicability of the [PE residence rule] the following three questions are relevant:
> **A. Is the trustee carrying on a business in the UK?**
> ... This question does not relate to the business of a particular trust that might be conducted by the trustee. It enquires whether the person who is a trustee carries out business activities (as a professional or businessman, not as trustee of a particular trust) in the UK.

HMRC Trustee Residence Guidance provides:

> 8. When considering the applicability of the [PE residence rule] the following three questions are relevant ...
> **B. If the trustee is carrying on a business in the UK is it carrying on that business through a branch, agent, or permanent establishment in the UK?**
> Again this means that the trustee is carrying on through the branch, agency or permanent establishment the sort of activities from which it substantially derives its worldwide profits - providing professional services for a fee - and not what it is doing in relation to an individual trust.
> In the case of a corporate trustee it might be the case that activities are carried out in the UK on its behalf by a dependent agent with the result that the trustee is treated as having a PE in the UK (see paragraph 3 of Part 2 of this guidance).

### 4.11.3 *"Business carried on in the UK"*

What if T carries on business partly in the UK and partly elsewhere? It is suggested that T carries on business in the UK, so if the UK part is carried on through a PE, T is deemed UK resident. If this is right, the rule lacks all proportionality. There is no *de minimis* rule. If a tiny part of T's trust business is carried on through a UK PE, the entire trust may become UK resident. As to whether a business is partly carried on in the UK, see 13.5 (Trading income of a non-resident), but if the business is carried on through a PE in the UK, there must be a business carried on in the UK.

### 4.11.4 *"Through a branch/agency and PE"*

In tax, the concept PE is used for companies[20] and "branch or agency" is used for individuals.[21] It is considered that one asks whether an individual trustee is carrying on a trustee business through a branch/agency. One asks whether a corporate trustee is carrying on a trustee business through a PE. One does not ask if an individual has a PE, or if a company has a branch or agency. HMRC agree. HMRC Trustee Residence Guidance provides:

> 5. HMRC accept that for trustees the '*branch*' and '*agency*' tests apply to non-corporate trustees and the '*permanent establishment*' test to corporate trustees. Non-UK resident companies that are trustees therefore need only be concerned about being treated as UK resident if they carry on a business through a permanent establishment in the UK. This is in line with section 10B Taxation of Chargeable Gains Act 1992 which has the effect that an overseas company is not taxed on the gains made by a UK branch or agency, but only on those made by a permanent establishment here. ...

In practice offshore trusts often do not have individuals as trustees, and where individuals do act, they do not usually do so "in the course of business". Accordingly, the question will normally be whether a corporate trustee has a PE: branch/agency will not normally arise. Since branch/agency is a somewhat undeveloped concept that is just as well. If, exceptionally, the issue did arise, the concept of branch/agency is more or less the same as PE and for most practical purposes is identical.

If, as advocated in this book, the concept of branch/agency was replaced altogether by PE, this problem would cease to arise.

### 4.11.5 *One trustee of several trusts*

What is the position if a person is trustee of several trusts and acts as

20 The statutory definition only applies to companies. See 74.2.1 (Scope of UK law definition).

21 For discussion of these concepts, see 74.2 (Meaning(s) of "permanent establishment"); 74.11 (Meaning of "branch or agency").

trustee through a UK PE for one trust, but not the others? It is considered that only that one trust is UK resident. This view makes better sense in the context and is supported by the rule that trustees are a separate person from the person who is actually trustee. HMRC agree. HMRC Trustee Residence Guidance provides:

> 8. When considering the applicability of the [PE residence rule] the following three questions are relevant ...
> **C. If so is the trustee carrying on the activity of being a trustee of that particular trust in the course of its business through the branch, agent or permanent establishment?**
> For example, a corporate trustee could have a permanent establishment in the UK but it is only when it is acting as a trustee through that place that the deemed residence rules apply in relation to the particular trust for which the company acts as trustee. The test is on a trust by trust basis. So while a corporate trustee might be acting as a trustee in relation to one trust through a fixed place of business in the UK, other trusts must be considered separately according to their facts and circumstances.
> The same principle applies in the case of a non-corporate trustee: the test is on a trust by trust basis.

### 4.11.6 *Several trustees of one trust*

Suppose:
(1) a trust has two trustees, T1 and T2.
(2) T1 is deemed UK resident (because it has a UK PE) but T2 is not (e.g. T2 is an individual who does not carry on business).

This is treated as a trust with mixed resident trustees; see 4.6 (Trustee residence condition B: mixed resident trustees). So where a trust does not have a UK-linked settlor, the appointment of a co-trustee who does not carry on trustee business would solve the difficulty posed by the PE residence rule. HMRC agree. Trustee Residence Guidance example 4b provides:

> **Example 4b**
> As in example 4a but the significance of the meetings Mr. Monday has in the UK with the beneficiaries of the Tuesday Trust is sufficient for December Ltd to have a permanent establishment in the UK in respect of that trust. However December Ltd has a co-trustee Mr. Wednesday who is a non-UK resident trustee.
> **HMRC view**: As there is a co-trustee who is non-UK resident and as the

settlor of the Tuesday Trust was not resident or domiciled in the UK when he introduced property into the trust that means that the trustees of the Tuesday Trust as a body will not be UK resident.

## 4.12 When is there a UK PE?

The HMRC Trustee Residence Guidance on this, the central point of the PE residence rule, is vague and heavily qualified. It also contains errors in law for the author nowhere cites the applicable statutory provisions, of which they appear to have been unaware.

### 4.12.1 *Acts of the trustee in the UK*

HMRC Trustee Residence Guidance provides:

> **Core activities**
> 9. In connection with Question C[22] and in line with the Commentary to the OECD Tax Model Convention, "carrying on the function of being a trustee" means in this context activities which are the core activities of a trustee and not those activities which are auxiliary or preparatory. This applies equally to non-corporate trustees.

It is correct that activities which are of a preparatory or auxiliary character cannot constitute a PE.[23] The use of the label "*core* activities" to describe those which are not merely preparatory or auxiliary is not entirely apt, but it is difficult to think of a better term. The Trustee Residence Guidance explains "core activities":

> 10. A trustee is the person who has a legal duty to manage the assets of that trust in the best interests of the beneficiary or beneficiaries. The trustee manages, employs and disposes of the trust assets in accordance with both the terms of the trust and the duties and responsibilities which the law places upon trustees. The core activities of a trustee would therefore be regarded as including:
> 10.1 the general administration of the trusts
> 10.2 the over-arching investment strategy.
> 10.3 monitoring the performance of those investments.

22 See 4.11.5 (One trustee of several trusts).
23 See 74.7 (PE: preparatory and auxiliary activities).

> 10.4 decisions on how trust income will be dealt with and whether distributions should be made.[24]

The Trustee Residence Guidance then explains "ancillary activities":

> 11. There are other activities which trustees carry out which are not core activities central to their conduct and management of the trust, but are instead preparatory or auxiliary activities. These *generally* can include information gathering meetings, including meetings with independent agents or with beneficiaries but, as mentioned below, each case will have to be considered individually.

In fact, the rule that information gathering is auxiliary is a statutory rule.[25] But in practice meetings tend to move seamlessly from information gathering to decision making.

> 12. In deciding whether the conduct and management of a particular trust is being carried on in the course of the corporate trustee's business through a permanent establishment, HMRC's approach will be to look at where the core activities are physically being carried out. If these core activities are being carried on in the UK through the corporate trustee's permanent establishment, the trustee would be treated as UK resident for the purposes of the particular trust. However as well as the nature or significance of the individual activities and meetings and whether they are core activities, we would also consider the issue of frequency. So where there is, in relation to a particular trust, evidence of considerable administrative work – such as meetings with investment managers or beneficiaries - being carried on in the UK through a permanent establishment, so that such meetings have become a major element of the trustee's activities in relation to that trust, and no longer preparatory or auxiliary, we would need to consider carefully whether as a matter of fact the non-UK resident corporate trustee was acting as a trustee through that permanent establishment.

Before turning to the examples, the Guidance sets out the usual disclaimer:

---

24 The draft guidance included a further paragraph 10.5: "accounting, making tax returns and record keeping." Significantly, the final guidance has deleted this.

25 See 74.7 (PE: preparatory and auxiliary activities).

13. The guidance that follows sets out examples of when a corporate trustee may or may not be regarded as UK resident. This guidance is based on the law as it stood on the day of publication. HMRC will publish amended or supplementary guidance if there is a change in the law or in the Department's interpretation of it. Whilst the guidance is intended to be as extensive and helpful as possible, it should not be assumed that it will provide a definitive answer in every case. That will depend upon the facts of each individual case. You can of course take your own advice on this issue and where HMRC's view is that there is a liability to UK tax on the basis that it regards a trust as UK resident because of how these rules apply to the trustees then the trustees can appeal to an independent tribunal.

Marketing to prospective settlors is not carrying on trust business in the UK because no trust at that time exists. HMRC agree:

**1. Preparatory work prior to the creation of any trust**
1.1 A non-UK resident trust company that is to be a trustee of a settlement may carry out a number of activities in the UK before the trust is created. This might, for example, include discussions with clients such as potential settlors or beneficiaries over the appropriate terms of any trust. It could also include research with specialist professionals about possible trust investments and assets. These discussions may take place even before the beneficiaries are chosen.
**Example 1**
Before the January Trust is established, February Ltd, a non-UK resident trust company holds several meetings in the UK at its Manchester office with the potential settlor Mr January. The meetings are to discuss the possible terms of the trust and suitable investments.
**HMRC view:** The January trust does not yet exist, so there is no need to consider the tests in section 69(2D) TCGA 1992 and section 475(6) ITA. In any case, introductory meetings and discussions of this type would generally be regarded as preparatory or auxiliary activities and not core activities.

Occasional visits to meet the settlor/beneficiaries or others cannot constitute a PE, which requires regularity.[26] HMRC agree:

**2. Trustee carrying out duties for the administration of any trust**
As mentioned in paragraphs 9 to 11 of the Background section of this guidance, a range of activities may be carried out by a trustee once a trust has been set up including meetings. When considering whether the corporate trustee is carrying on the administration of a particular trust in the course of their business through the permanent establishment, the frequency of the meetings will be looked at as

26 See 74.3.2 (Degree of permanency).

well as their significance and quality.

**Example 2**

March Ltd, a non-UK resident trust company that is trustee of the April Trust, holds quarterly meetings in the UK at its London offices with investment advisers. The purpose of these meetings is for March Ltd to collect purely factual information about potential assets to inform future investment strategy for the April trust. The actual decisions about the investment strategy are taken by March Ltd at their home office outside the UK. No other activities or meetings relating to the April Trust are carried on in the UK.

**HMRC view:** March Ltd has a permanent establishment in the UK. However, the significance of the meetings with the investment advisers is not sufficient for March Ltd to be regarded as acting as a trustee in respect of April Trust through that permanent establishment. They will not, therefore, be regarded as UK resident for the purposes of the April Trust.

The correct analysis is that the trustee does not have a PE in the UK, for two independent reasons: information collecting is an auxiliary matter, and the office is not used with sufficient regularity to constitute a PE. (One is of course looking on the matter on a trust by trust basis).

The author assumes that the trustee does have a PE but does not carry on business through it. Strictly a PE means a place of business through which a business is carried on, so there is no PE. However the end result is the same.

By contrast:

**Example 2a**

May Ltd, a non-UK resident trust company, is sole trustee of the June Trust. May Ltd carries out all the work for the trust through its UK offices, including preparatory work, general administration, meetings with investment managers, accountants, beneficiaries etc.. The investment and distribution policies are also all determined in the UK office. Formal ratification of those strategies, including signature of documents, is made by May Ltd at very brief meetings outside the UK, with little or no further discussion of the proposals before approval is given.

**HMRC view:** Although the strategic decisions are core activities, all the administration of the June Trust has been carried out in May Ltd's UK office. The formal meetings outside the UK although prima facie core activities are in reality merely "rubber stamping" all the UK work. May Ltd has acted as a trustee in respect of the June Trust through its UK permanent establishment and so will be treated as UK resident for the purposes of the June Trust.

That seems correct.

**Example 2b**

July Ltd, a non-UK resident trust company is trustee of the August Trust. It always carries out the core activities of the August Trust at its office overseas.

> The beneficiary of the trust has a single one-off meeting with July Ltd at July's Manchester office to discuss the potential release of capital from the August trust. The discussion involves the imposition of certain conditions on the beneficiary before such a release. [The author here seems unfamiliar with trust terminology and practice, though nothing turns on that.]
> **HMRC view:** On the face of it July Ltd by discussing the release of capital and the imposition of conditions with the beneficiary has engaged in a core activity and this has taken place at what is July's permanent establishment in the UK. So prima facie July Ltd is acting as trustee of the August Trust through a permanent establishment. However the whole context has to be looked at - i.e. where the decision making on the trust is being carried on and if the meeting in the UK was a one-off. If the trustee took the information from the meetings out of the UK with them and then discussed and made the decisions outside the UK, they would not be UK resident. If there was any doubt as to where the decision making is taking place we would as part of our considerations consider the frequency of any meetings both within and outside the UK.

More analytically, the issues (which are not clearly identified or addressed) are:
(1) Are the acts of the trustee in the UK merely preparatory (such as information gathering)? If so, there is no PE.
(2) Is the office used with sufficient regularity to constitute a PE? On the given facts, a one-off meeting is clearly not sufficient and the office is not a PE, so (although the HMRC example does not reach any conclusion) the answer is that the trustees are not UK resident.

### 4.12.2 *Services provided by UK companies or other agents: the law*

UK companies (which may in the same group as the trustee company or may be unconnected) may provide accounting, tax or investment services to the trustees. Does this constitute a PE?

If the agent is an investment manager or broker, the question for a corporate trustee is whether the investment manager or broker exemption applies: if so there is no PE. In practice these exceptions will be met.

If the agent is any other agent, the question is whether there is an agency PE, which arises if (in short)
(1) it has and habitually exercises authority to do business on behalf of the company and
(2) it is not "an agent of independent status acting in the ordinary course

of their business."[27]

### 4.12.3 *Services provided by UK companies: the guidance*

The HMRC guidance in this area bears only a tenuous connection to the law. The original HMRC guidance did however have the merit of clarity:

> I can confirm that our interpretation of the rules is that the provision of services on an arms length basis would not cause non-UK trustees to have a permanent establishment and therefore would not make the non-resident trustee UK resident.
> More specifically, this would include where services are carried out by a subsidiary on a fully arms length basis, such as:
> - maintaining the financial or accounting records
> - preparation of accounts
> - preparation and submission of tax returns for any settlement by a separate entity within the organisation contracting at arms length terms.
>
> Provided the services are contracted (at arms length terms) HMRC would not consider this constitutes a permanent establishment as the UK company will be rendering a service to the trust. Therefore, these activities would not cause the non-UK trustees to have a permanent establishment in the UK and the non-UK trustee is not made resident by [the PE residence rule].[28]

The correct questions are whether the IM exemption applies, and whether the agent is of independent status and acting in the ordinary course of their business, not whether the agent is receiving an arm's length fee. However the HMRC arm's length fee test reflects the policy aims of the provision, would be a simpler and workable rule, and would not normally give a different result from the correct approach.

In the HMRC Trustee Residence Guidance, this approach is maintained but is unfortunately watered down with qualifications such as "likely" or "ordinarily":

27 See 74.4 (Agency PE) and 74.5 (Independent agent).
28 Extract from letter dated 18 July 2007 accessible *www.step.org/pdf/TrusteeResidenceALS*.pdf

> **3. Activities carried on for the trust other than by the non-UK resident trust company**
> 3.1 Whilst a non-UK resident trust company acting as a trustee may not carry out trust business at a fixed place of business permanent establishment in the UK, it is also necessary to consider whether activities are carried out in the UK on that non-UK resident trust company's behalf by a dependent agent. If this is the case the trustee may be treated as having a permanent establishment in the UK. Annex A provides further information on dependent agents.
> 3.2 The activity of providing services to a non-UK resident trustee, whether by a connected person or not, does not of itself create a dependent agency permanent establishment (see paragraph 5 in the Annex). It is necessary to consider the capacity in which the person provides the services to the trust on behalf of the non-UK resident trustee. Where
> [1] the services that are provided to the trust are only those that the person is contractually obliged to provide under their agreement with the non-UK resident trustee and
> [2] are remunerated at arm's length,
> then this is *unlikely* to create a dependent agency permanent establishment.

At first point [1] is hard to understand. Who would provide services without a contract? Perhaps the author has in mind a beneficiary providing services to the trust informally?

> 3.3 Whether there is a dependent agency permanent establishment will depend on the facts of the case; the position is the same whether it is an unconnected third party or a UK subsidiary or other connected person that carries out the work for the trust. Where, say, a UK subsidiary of a non-UK resident trust company is providing services to a trust, then unless the powers granted to it by the non-UK resident trust company are such that it becomes a '*dependent agent with authority to do business on behalf of the non-resident trustee*' (see paragraph 5 of Annex A) we will not contend that the UK subsidiary's actions cause the non-UK resident trustee company to have a permanent establishment.

This is correct.

> **Example 3**
> September Ltd, a non-UK resident trust company contracts with October

Ltd which is a UK company within the same group. The services to be provided by October Ltd are for investment advice for the November Trust. The contract between September Ltd and October Ltd is on an arm's length basis and October Ltd has no powers granted to it by September Ltd.

**HMRC view:** October Ltd is providing a service for September Ltd and has contracted to do so on arm's length terms. They have no authority to do business on behalf of September Ltd so are not their dependent agent. Therefore, September Ltd will not be treated as having a permanent establishment through the work carried out by October Ltd in the UK. So September Ltd will not be treated as UK resident for the purposes of the November Trust.

This is straightforward. If the investment advisor had no authority to do business on behalf of its principal, then it is not an agent at all. It cannot be a dependent agent.

If the investment advisor did have power to do business on behalf of the trust, it is still not PE as long as it qualified for the IM exemption (which in practice will be the case).

Other examples which would be treated in the same way where there was an arm's length relationship are:

- Preparing trust accounts for the trustees' review and approval
- Preparing trust tax returns for the trustees' review and approval and filing the return on their behalf with HMRC
- Obtaining quotes for necessary repair work on trust property
- Having contact with workmen to ensure that those repairs are carried out
- Day to day management of let property (such as dealing with tenants etc)
- Signing small cheques such as paying for minor repairs

**Example 3a**

As above but October Ltd also has authority to buy and sell commodities with a view to realising profits for the trust subject to trading limits set by September Ltd. It receives an arm's length fee for this activity.

**HMRC view:** The investment manager is appointed by the trustee, and so is its agent. If it receives an arm's length fee for the investment management services, it will not *ordinarily* constitute a dependent agent of the non-UK resident trustee. If, however October Ltd was providing investment management services to the trustees other than on arm's length terms i.e. was acting as their dependent agent, rather than simply providing a service to them, in that case the trustees would be *likely* to

> have a dependent agent permanent establishment. (This is in line with the Investment Manager Exemption provisions – in particular that the provision of services at less than a customary rate can indicate that the investment manager is not an independent agent of the non-UK resident trustee.)

This is muddled because if the IM exemption applies, there is no PE.

### 4.12.4 *UK resident director or employee of trustee*

HMRC Trustee Residence Guidance provides:

> **4. UK resident directors or other employees of a non-UK resident trust company.**
> 4.1 First, it is necessary to consider the role of the UK resident director or employee of the non-UK resident trustee.
> 4.2 If the UK resident employee is not carrying out activities that would be regarded as core trustee activities in relation to a particular trust then the presence in the UK of an employee of a non-UK resident trust company could not by itself cause a non-UK resident trustee to have a permanent establishment in the UK.

This is consistent with the point made at 4.12.1 (Acts of the trustee in the UK).

> 4.3 Where in relation to a particular trust the UK resident employee does carry out [core] trustee activities in the UK then it is likely that the non-UK resident trustee will have a permanent establishment in the UK. This will be the case if the employee operates from a fixed base, or does not have a fixed base but habitually acts on behalf of the non-UK resident trustee for the particular trust, i.e. is a dependent agent permanent establishment of the non-UK resident trustee. The crucial point in relation to a dependent agent permanent establishment is whether the non-UK resident trustee company has in the UK-resident employee a dependent agent with authority to conduct business on behalf of the non-UK resident trustee. If this UK resident employee of a non-UK resident trustee does have the authority to make decisions then s/he is likely to constitute a dependent agent permanent establishment of the non-UK resident trust company.

The first example is a simple variant of example 1 (marketing):

**Example 4**
December Ltd, a non-UK resident trustee has a director or other employee Mr. Monday who is resident in the UK. (This individual may also be an employee or director of UK resident group members.) The group provides office accommodation in the UK to Mr. Monday. His role is to market the business of the non-UK resident trust company in the UK which includes meeting with prospective settlors and other business contacts for this purpose.
**HMRC view:** In this case, Mr Monday's role is only meeting with prospective settlors and other business contacts for the purpose of marketing the business of December Ltd. Although these activities are carried out at the same place, they are not activities as a trustee that are carried out at a fixed place of business. They would generally be preparatory or auxiliary activities. This would not cause December Ltd to be treated as carrying on trustee business through a permanent establishment in the UK.

In the next example, the director does more than marketing:

**Example 4a**
As in example 4, but Mr. Monday's role also extends to meeting beneficiaries of existing trusts.
**HMRC view**: In this case, the importance of the subject matters discussed and the decisions taken at those meetings, and the frequency of the meetings held, will need to be analysed in relation to each trust in order to reach a conclusion as to whether December Ltd is carrying on a business through a permanent establishment in the UK for that trust through Mr Monday
If no office accommodation is at his disposal Mr Monday could still constitute a dependent agent permanent establishment of the non-UK resident trustee if he has authority to enter into contracts or otherwise do business on behalf of the trustee of the trusts i.e. more than simply meeting the beneficiaries and he habitually exercises that authority on behalf of his employer for the trust.

HMRC do not answer the question in the example, but the general approach to the answer is correct.

### 4.12.5 *Conclusion: Some guidelines on the PE residence rule*

It is considered that the following guidelines will avoid difficulties under the UK PE rule. It is assumed that the trust has only a corporate trustee, or if it has individual trustees, they are not carrying on a business (so it is necessary to consider PE issues but not branch/agency issues).

Use of professional UK investment managers and brokers is safe provided that the terms of the IM/broker exemptions are met, which in practice will be the case.

Use of professional UK advisors to prepare tax returns is safe, provided that they are acting in the ordinary course of their business, which in practice they will be.

Use of UK agents to manage UK property investments is safe, providing they are acting in the ordinary course of their business, which in practice they should be.

The trustees may if they wish to meet beneficiaries (or others) in the UK in the following circumstances:

(1) If the meeting is at the offices of the beneficiaries (or others) and not in the trustees own offices, or in offices provided by a company in the same group as the trustees.

(2) If the meeting is occasional. Less than once a year would be "occasional" for this purpose.

(3) If the meeting is purely for information gathering purposes. (The minutes of the meeting should make that clear.) However it may be difficult to restrict meetings to information gathering topics.

The trustees should not appoint a beneficiary to act for the trustee (unless, exceptionally, the beneficiary is carrying on a business and acting in the course of that business.)

Where the trustees own a house which is occupied by the beneficiary, I see no difficulty in the trustees authorising the beneficiary to maintain the house, as that does not constitute carrying on business in the UK.

There are no restrictions on marketing or meetings with prospective settlors.

The trustees would not normally have an employee or director who was UK resident, but if that did happen, the employee or director should not be involved in the management of the trust in the UK, except as above.

## 4.13 UK protector and trustee residence

It is normal practice to appoint a "protector"[29] who has power:

---

29 On trust law and drafting aspects of protectors, see Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010), para 7.29.

(1) to consent to certain key matters of trust administration; and
(2) to appoint and dismiss trustees.

The protector may be a UK resident. A protector could not be regarded as a trustee[30] and so their actual residence is irrelevant in ascertaining the

---

30 The position is clear but since the question has been asked I set out the authorities in some detail.

*Re Marshall* [1945] Ch 21 held that trustees for the purpose of the obsolescent Settled Land Act 1925 are "trustees" for the purpose of the Judicial Trustee Act 1896. Although trust land is not vested in SLA trustees, capital money and investments other than land are vested in them, and *for this reason* they were held to be trustees.

In *Manoogian v Sonsino* a settlement provided:

> "... the Bank shall make such investments as may from time to time be particularly and specifically directed to be made of it in writing from time to time by the Armenian Patriarchate of Jerusalem."

The Patriarch was not a trustee for the purposes of the Charities Act 1993:

> "His power to direct investments is not an obligation to do so. His position is analogous to powers of a life tenant under a conventional strict settlement. The life tenant is often given powers to possess land, direct investments and so on, but none of those things make him a trustee of the settlement."

[2002] EWHC 1304 (Ch); [2002] WTLR 989; 5 ITELR 125 at [41].

In *Bridge Trustees v Noel Penny (Turbines)* [2008] EWHC 2054 (Ch) an employer had power to distribute the surplus assets of a pension scheme. The employer was not "a trustee properly so called, that is to say, a person in whom property is vested as trustee"; see at [23].

Underhill and Hayton, *Law Relating to Trusts and Trustees*, 18th ed, 2010, p.1.78, takes the same view: "Because the protector merely has powers vested in him and not trust property he is not a trustee".

It might be a different matter if the protector's powers extend beyond those traditionally given to a protector. One could imagine a trust deed under which:

(1) persons named "trustees" held legal title to property; and
(2) a person named (or mis-named) "protector" held all the administrative and dispositive powers normally given to trustees.

This case (depending on the drafting) might be equivalent to the common situation where trust property is vested in nominees. In such a case no one suggests that the nominees are "trustees" for the purposes of the trust residence rule. Although the legal title may not be vested in the trustees, the trustees have the right to call for it.

Alternatively (depending on the drafting) the case may be equivalent to the situation where custodian trustees hold the trust fund on behalf of managing trustees under s.4 Public Trustee Act 1906. In such a situation, the (so-called) protector would be a trustee. This is hypothetical – I have never seen it in practice – but worth mentioning as warning of the problems which might arise if the powers of a UK resident protector were unduly extended.

Many offshore Trust Laws state expressly that a protector is not a trustee; but (i) that only states what would in principle be the position, and (ii) that could not be actual residence of the trustees in their personal capacities.

One must take care that the protector is not a permanent establishment of the trustees. This will not normally be the case, but it might be if the protector is given unusually wide powers.

## 4.14 Trustee residence for IHT

Trustee residence is not very important for IHT but the concept is used on a few occasions. IHT definitions of trustee residence are different from the IT/CGT definition.

For the (somewhat academic) relief for foreign currency bank accounts,[31] s. 157(4) IHTA provides:

> For the purposes of this section—
> (a) the question whether a person is resident or ordinarily resident in the UK shall, subject to paragraph (b) below, be determined as for the purposes of income tax; but
> (b) the trustees of a settlement shall be regarded as not resident or ordinarily resident in the UK unless the general administration of the settlement is ordinarily carried on in the UK and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are resident and ordinarily resident there.

For the duty to disclose the creation of non-resident trusts,[32] s.218(3) IHTA provides:

> For the purposes of this section trustees of a settlement shall be regarded as not resident in the UK unless the general administration of the settlement is ordinarily carried on in the UK and the trustees or a majority of them (and, where there is more than one class of trustees, a majority of each class) are for the time being resident in the UK.

For the purposes of s.201(1)(d) IHTA (collection of non-resident trust's tax from settlor), s.201(5) IHTA makes an identical provision.[33]

---

determinative of the meaning of "trustee" in a UK statute.

31 See 53.17 (Non-residents foreign currency bank accounts).

32 See 75.9 (IHT reporting requirement on creation of settlement).

33 For completeness, the same definition is set out yet again in the IHT (Delivery of Accounts) (Excepted Settlements) Regulations 2008.

For the question of where the administration of a settlement is carried on, see the 5th edition of this work, para 5.6. There are various interesting points that could in theory arise under these definitions, but I doubt if any of them will ever arise in practice.

### 4.14.1 *Commentary*

IHT trustee residence is a mess: essentially the same definition is repeated four times.

There is no need to have a separate definition of trustee residence for IHT at all, and if we need to keep the concept of trustee residence, it would be best to switch to the IT/CGT definition. Failing that, a single standard definition applying for all IHT purposes would be a small improvement.

## 4.15 Commentary: Let's abolish the relevance of trustee residence

Residence of individuals is a sensible connecting factor for UK taxation: everyone will accept that an individual who is UK resident should to some extent at least be subject to UK tax. Residence of trustees is a matter which is chosen by the appointment of trustees, and makes little sense as a connecting factor in the taxation of trusts.

An alternative (and, I suggest, a better) system would be that trusts pay IT and CGT regardless of the residence of the trustees: the connecting factor should be that property is provided by a UK domiciled or resident settlor. Conversely, trusts should be exempt from CGT and IT on foreign income in relation to property provided (or wholly provided) by foreign domiciled non-resident settlors. This is the basis of trust taxation in Canada, New Zealand and, I suspect, most other common law jurisdictions. It is also the basis of IHT. Of course, domicile and residence of the settlor are not perfect connecting factors. Such a thing does not exist. International families can sometimes break the link by tax planning.[34] But the mad anti-avoidance structure of ss.86 to 98 TCGA, bolstered (supposedly) by Schs 4A to 5, can be replaced with one based on s.731 ITA. The reform, like any, would bring winners and losers but

34 See 69.33 (Planning to create trust with foreign domiciled settlor).

the overall result could — if properly drafted — be a system which was fairer, simpler and much more effective.

CHAPTER FIVE

# TREATY-RESIDENCE

## 5.1 Treaty-residence - Introduction

The word "residence" (in isolation) is ambiguous. It may mean:

(1) **"treaty-residence"** ie residence as defined for the purposes of a double taxation arrangement ("DTA"); or

(2) "**domestic-law residence"** ie residence as defined for UK tax purposes. (I use the expression "domestic-law" to refer to UK domestic law, unless otherwise stated, though of course every state has its own domestic law.)

These concepts are distinct and to avoid confusion it is essential to use distinct terminology. ("Dual residence" is even more ambiguous and should also not be used without considering what sort of dual residence is involved.)

This chapter discusses the meaning of treaty-residence. The discussion is mainly on the OECD model treaty, though I refer at points to the US and other treaties. In any particular case it will be necessary to review the terms of the actual treaty concerned.

DTAs refer to "contracting states" but I abbreviate this to **"treaty state"** or just **"state"** and where that state is not the UK, I refer to it as **"the other state"**.

For an introduction to DTAs, see 50.1(DT reliefs - Introduction). For further reading, see Maisto (ed.) *Residence of Individuals under Tax Treaties and EC Law* (2010); Venables "The interpretation of double taxation conventions: Residence of dual resident and temporarily non-UK resident individuals" (1999) 8 OTR 189.

### 5.1.1 *Relationship between treaty- and domestic-law residence; dual residence*

A person can of course be domestic-law resident in two (or more) states.

A person cannot be treaty-resident in two treaty states: the tie-breaker test requires treaty-residence to be in one state alone. So a person who is treaty-resident in another treaty state is necessarily not treaty-resident in the UK.

However a person may be domestic-law resident in the UK while treaty-resident in the other state (and not treaty-resident in the UK). Treaty non-residence does not preclude domestic-law residence (except for companies).

The INT Manual provides:

> **154020. Dual residents** [November 2010]
> ... Although the agreement overrides some of the normal consequences of being a UK resident, it does not, in the case of an individual, override the fact of UK residence itself for purely domestic law purposes. Even though an individual may be resident for agreement purposes elsewhere, he (as a resident of the UK for UK tax purposes) still has to complete returns and fulfil any similar obligations imposed by the Taxes Management Act. He will also remain entitled to any personal allowances which may be due on account of his UK residence status.

Sometimes this rule works in favour of the taxpayer; for instance, it preserves the right to personal allowances (which are conferred on domestic-law UK residents but not generally available to non-residents).[1] Often however the rule works in favour of HMRC. For instance, a year in which an individual is domestic-law UK resident counts for the purposes of:

(1) the long-term residence test for the £30k remittance basis claim charge;[2]

(2) deemed domicile for IHT;

even though the individual is treaty non-resident during the year.

## 5.2 Starting point: residence under art. 4.1

Article 4 OECD Model Convention provides:

1 See 41.7.3 (Personal allowances under DTAs: non-residents).

2 See 9.11.10 (Individual treaty non-resident).

> 1. For the purposes of this Convention, the term "resident of[3] a Contracting State" means any person who, under the laws of that State, is liable to tax[4] therein by reason of his domicile, residence, place of management or any other criterion of a similar nature, and also includes that State and any political subdivision or local authority thereof.

I describe a person who is within this paragraph as **"resident of a state under article 4.1"**.

For the purposes of discussion it is convenient to abbreviate the phrase "domicile, residence, place of management or any other criterion of a similar nature" to "domestic-law residence"; in a UK context this is a permissible shorthand since it is UK domestic-law residence (not the other criteria mentioned) which decides whether a person is liable to UK tax.

There are then four requirements to be a resident of a treaty state under article 4.1:

(1) There must be a "person".
(2) The person must be liable to tax in the state.
(3) The person must be domestic-law resident in that state.
(4) Domestic-law residence must be the reason for liability to tax.

A person may be resident under article 4.1 in one treaty state alone, in which case they are treaty-resident in that state. A person may be resident under article 4.1 in both treaty states, in which case the tie-breaker tests discussed below are applied to identify the state in which they are treaty-resident.

So far as the UK is concerned, a person who is domestic-law UK resident is in general a resident of the UK under article 4.1. The expression would also include the (probably theoretical) case of a person who is domestic-law ordinarily resident in the UK but not domestic-law resident.

### 5.2.1 *Certificate of foreign residence*

HMRC helpsheet 302 (Dual Residents - 2010/11) provides:

> If you:

3 UK domestic law always refers to a person as resident *in* the UK; whereas the OECD model always refers to a person as a resident *of* a state; but nothing turns on the choice of preposition.

4 "Tax" is usually defined to mean IT or CGT.

> • are resident in the UK under domestic law, and
> • are also resident in another country under that country's rules, and
> • want to claim that you are a resident of the other country for the purposes of the DTA between the UK and that other country
> then you need to obtain a certificate from the overseas tax authority confirming that it regards you as resident there under its domestic law for the period in question, which must be stated on the certificate.
> The certificate should be attached to your completed claim on pages 8 to 11 of this helpsheet and sent with your tax return.

A certificate is not needed for the US/UK treaty: see 5.17 (UK/US DTA).

## 5.3 "Person"

The first requirement of treaty-residence is that there must be a "person" and one must identify
(1) who that person is; and
(2) whether that person is an individual or a person other than an individual (because different tie-breaker tests apply).
The term "person" is defined (after a fashion). Article 3.1(a) OECD Model provides:

> 1. For the purposes of this Convention, unless the context otherwise requires:
> a) the term "person" includes an individual, a company[5] and any other body of persons;

For individuals (who are "natural persons") and companies (which are "legal persons") this is straightforward, but partnerships, trusts and some other entities are more problematic. See 5.12 (Treaty residence: Trusts); 5.13 (Treaty residence: Partnerships).

## 5.4 Change of residence during tax year

### 5.4.1 *Change of residence of individual during tax year*

Suppose:

---

5 Article 3.1(b) OECD Model defines company: "the term "company" means any body corporate or any entity that is treated as a body corporate for tax purposes".

(1) An individual is resident in state A (under the law of state A) during one part of a tax year ("the resident period").
(2) The individual is *not* resident in state A (under the law of state A) during another part of the tax year ("the non-resident period").
(3) Under the tax law of state A, the individual is liable to tax throughout both periods. (That is of course the position in the UK.[6])

Such a person is a resident of state A under article 4.1 even during the non-resident period, since:
(1) they are liable to tax in state A (during the non-resident period) and
(2) the reason they are so liable is their residence (during the resident period).

Thus if an individual is UK domestic-law UK resident for part of a year and then moves to a treaty state, they need to rely on the tie-breaker provision for treaty relief during the year of departure even if they cease to be UK resident on departure.

This is reasonably clear on first principles, but if authority is needed, see *Smallwood v HMRC.*

### 5.4.2 *Change of residence of trustee during tax year*

In *Smallwood v HMRC*, a trust had three different trustees, resident in different states, in the course of one tax year:

Apr - Dec: Jersey resident trustees
Dec - Mar: Mauritius resident trustees ("the Mauritian period")
Mar onwards: UK resident trustees ("the UK period")

Gains accrued during the Mauritian period. During this period the trustees were residents of Mauritius under article 4.1 as they were liable to Mauritian tax[7] by reason of their residence in Mauritius. The question was whether they were also residents of the UK under article 4.1.[8]

One might have thought that they were not. The Mauritian trustees were liable to tax in the UK during the Mauritian period, but not by reason of

6 For the purpose discussing treaties, the UK split year concessions are not relevant.
7 In fact the trustees were not liable to CGT in Mauritius, because Mauritius did not tax capital gains but only to income tax; but that made no difference because the trustees were liable to "tax" as defined.
8 A further question arose concerning POEM; see 5.16.2 (Short term non-resident periods).

*their* residence: they were so liable by reason of *someone else's* residence (namely, the residence of their successor trustees during the UK period). However the Court of Appeal (citing s.69 TCGA) held that for treaty purposes trustees should be regarded as a continuing body of persons distinct from the actual trustees. The position therefore was just the same as for an individual who is UK resident during part of a year, discussed above. The trustee-body were residents of the UK under article 4.1 during the Mauritian period since:

(1) they were liable to UK tax[9] during that period; and
(2) they were so liable by reason of "their" UK residence in the subsequent UK period.

During the Mauritian period the trustees could not know that they were residents of the UK, as the facts which made them residents of the UK occurred later. That did not matter: "The issue of liability has to be looked at retrospectively".[10]

The Court of Appeal decision is not beyond criticism. Some passages are confused. The Court should not have relied on s.69 TCGA since that provision only applies for the purposes of the TCGA.[11] The High Court decision, which went the other way, may seem more convincing to many readers. However the end result is a sensible one, and the law should be regarded as settled.

In *Smallwood* the law decided by the CA favoured HMRC. However the rule will sometimes favour the taxpayer because income/gains arising at a time when a person does not meet the requirements to be a resident of a treaty state may later meet the requirements and retrospectively qualify for relief. Suppose:

(1) A company within s.13 TCGA is resident in Jersey during part of a tax year ("the Jersey resident period").
(2) The company becomes resident in state A under the law of state A during part of the tax year ("the state A resident period").
(3) Under the tax law of state A the company is liable to tax throughout

---

9 In fact it could have been argued that the trustees were *not* liable to tax in the UK, because of s.77 TCGA and s.624 ITTOIA; but the taxpayer did not take that point, perhaps because art.3.1 would justify treating trustees as a body of persons.

10 *Smallwood v HMRC* at [42].

11 Section 69 provides "In relation to settled property the trustees of the settlement shall *for the purpose of this Act* be treated as being a single and continuing body of persons." However the taxpayer did not argue that point.

both periods. That is, state A has a rule similar to that which applies to individuals and trusts in the UK.

(4) The company is at no time domestic-law resident in the UK.

A gain arising in the Jersey resident period may retrospectively qualify for relief under a treaty between the UK and state A, which would benefit a UK participator within the scope of s.13. (Before the Court of Appeal's decision in *Smallwood*, an advisor would probably have said that the company had to be treaty-resident at the time the gain accrued, in order for treaty relief to apply. But now we know the position is looked at retrospectively.)

### 5.4.3 *HMRC view*

The International Manual provides:

> **154040. Individuals** [November 2010]
> Different countries have different fiscal years, for example, the United States tax year ends on 31 December. An individual who wishes to make a treaty claim as a resident of the United States in respect of the United Kingdom tax year 2002-03 will need to demonstrate that he is a resident of the United States during both of the United States tax years 2002 and 2003. If an individual was resident in the United States during the tax year 2002 but ceased to be so resident after 31 December 2002, then he may make a claim as a United States resident for any 2002-03 income which arose during 2002 but no claim is possible in respect of income arising in 2003.
> If income arises partly during a period of residence in the other country and partly during a period of residence in the United Kingdom, the income may be apportioned between the periods on a time basis, unless it is clear that the income arose unevenly over the two periods, for example a bonus payable for duties performed in one of the periods.

## 5.5 Exception where source tax only

Article 4(1) OECD Model Convention continues:

> This term, ["resident of a Contracting State" ] however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or capital situated therein.

The US Department of the Treasury Technical Explanation of the Convention[12] provides:

> A person who is liable to tax in a Contracting State only in respect of income from sources within that State or capital situated therein or of profits attributable to a permanent establishment in that State will not be treated as a resident of that Contracting State for purposes of the Convention. Thus, a consular official of the UK who is posted in the United States, who may be subject to U.S. tax on U.S. source investment income, but is not taxable in the United States on non-U.S. source income, would not be considered a resident of the United States for purposes of the Convention. (See Code section 7701(b)(5)(B)). Similarly, an enterprise of the UK with a permanent establishment in the United States is not, by virtue of that permanent establishment, a resident of the United States. The enterprise generally is subject to U.S. tax only with respect to its income that is attributable to the U.S. permanent establishment, not with respect to its worldwide income, as it would be if it were a U.S. resident.

While this is directed at the US DTA, the wording in point is (more or less) the same and the same argument should apply in other states where the local law is comparable.

## 5.6 Tie-breaker tests for individuals

It is of course possible for a person to be:
(1) a resident of state A under art. 4.1 during the whole of a tax year and
(2) a resident of state B under art. 4.1 during the whole of the same period.
This may arise for various reasons:
(1) Two states may have different domestic-law definitions of residence.
(2) Residence (however defined) is distinct from presence: a person may be domestic-law UK resident throughout a year while only present in the UK during part of the year (or even not present at all); such a person may be regarded by the other state as a resident of the other state.
In such cases the tie-breaker tests are needed. For individuals, there are a series of tie-breaker tests, in order of priority:
(1) permanent home

12 *www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.*

(2) centre of vital interests
(3) habitual abode
(4) nationality
(5) mutual agreement.

## 5.7 Permanent home

Article 4 OECD Model Convention provides:

> 2. Where by reason of the provisions of paragraph 1 an individual is a resident of both Contracting States, then his status shall be determined as follows:
> a) he shall be deemed to be a resident only of the State in which he has a permanent home available to him;

For clarity of exposition it might be helpful to consider separately the concepts of:
(1) "home"
(2) "permanent"
(3) "available"
But this neat analysis is not practical: to some extent the three terms interact, for a property which is not "available" or "permanent" is less likely to be a "home".

### 5.7.1 *"Home"*

The OECD commentary provides:

> 13 As regards the concept of home, it should be observed that any form of home may be taken into account (house or apartment belonging to or rented by the individual, rented furnished room).

The meaning of the word "home" is discussed in *Re Y* [1985] Fam 136 at p.140.

> 'Home' is defined thus in the Shorter Oxford English Dictionary:
>> "A dwelling-place, house, abode: the fixed residence of a family or household; one's own house; the dwelling in which one habitually lives, or which one regards as one's proper abode."
>
> It is a definition which, in my judgment, contains the essential elements

> of a "home" as it is to be understood for present purposes.

One fundamental characteristic of a "home" is that one lives there. As Sheldon J said:

> I have no doubt that any individual may have two homes; but each, in my judgment, to be properly so called, must comprise some element of regular occupation (whether past, present, or intended for the future, even if intermittent), with some degree of permanency, based upon some right of occupation whenever it is required, where, in the words of Kekewich J. in *Re Estlin*, *Prichard v. Thomas* (1903) 72 L.J. Ch. 687, 689, "You find the comforts of what is known as home"; the fixed residence of a family or household.

However, the *amount* of time that one spends in a place may not shed much light on whether that place is a "home". One can spend relatively little time in a place which is still home. This point arose in *Frost v Feltham* 55 TC 10. The issue in that case was to identify the taxpayer's "main residence". The expression "main residence" is somewhat narrower than "home", for a "main residence" must almost necessarily be a "home" but a "home" need not be a "main residence". In that case, Mr and Mrs Feltham spent periods of two or three days in each month at a property called "Mount Severn". They spent the rest of the time in "The White Horse", a public house of which Mr Feltham was licensee. Nourse J noted that "viewed in isolation those are not long periods of time to spend at a house which can properly be described as the principal or more important residence of the persons concerned". Nevertheless, Mount Severn was held to be their principal residence:

> A residence is a place where somebody lives, and it is clear that Mr Feltham lived for the greater part of the year at the White Horse, Roydon. Therefore, he could not have used Mount Severn as his only residence. But that does not at all mean that he could not have used it as his principal or more important residence, even though he spent very little time there. If someone lives in two houses the question, which does he use as the principal or more important one, cannot be determined solely by reference to the way in which he divides his time between the two. I can test that by reference to an example far removed from the facts of this case and the conditions of our own times. In his "Lives of the Lord Chancellors" Lord Campbell tells how Lord Eldon

> was often prevented by the burdens of his office from visiting his estate at Encombe in Dorset for long periods at a time. Sometimes he was only able to get down there for three weeks or so in the year, for the partridge shooting in September. True it was that Lord Eldon also had a good house in Hamilton Place, but it could not really have been suggested that he did not use Encombe as his principal or more important residence.

A second fundamental characteristic of a "home" is identified in the Law Commission paper on the law of domicile. The Law Commission observes:

> "Home" conveys ... the combined ideas of physical presence and emotional link.[13]

The folk-saying is true that "home is where the heart is". In the dictionary definition which Sheldon J approved, home is a place which one *regards* as one's proper abode. The views of the individual himself are therefore highly relevant. It would be, to put it at its lowest, surprising if a place which an individual actually regarded as home was not in fact their home. The views of the parties as to which property was the main residence were held to be relevant in *Frost v Feltham*; see 55 TC at p.16; the same applies *a fortiori* in determining whether a property is a "home".

The fact that one does not have a room set aside for oneself in a "home" does not shed much light on whether it is a "home". The more important question is whether space is available when one wishes to use it. In Robert Frost's epigram, "home is the place where, when you have to go there, they have to take you in". This was the attitude taken by the Revenue in relation to the so-called "available accommodation rule" before 1993.

### 5.7.2 *"Permanent"*

The concept of "permanent" is more difficult than the concept of "home". The OECD commentary is untrammelled by the restraint of precision:

> 11 The Article gives preference to the Contracting State in which the individual has a permanent home available to him. This criterion will

13 No. 168 CM 200 (1987), at para 4.20

> frequently be sufficient to solve the conflict, eg where the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State.
> 12 Subparagraph (a) means, therefore, that in the application of the Convention (that is, where there is a conflict between the laws of the two States) it is considered that the residence is that place where the individual owns or possesses a home; this home must be permanent, that is to say, the individual must have arranged and retained it for his permanent use as opposed to staying at a particular place under such conditions that it is evident that the stay is intended to be of short duration.
> 13. ... But the permanence of the home is essential; this means that the individual has arranged to have the dwelling available to him at all times continuously, and not occasionally for the purpose of a stay which, owing to the reasons for it, is necessarily of short duration (travel for pleasure, business travel, educational travel, attending a course at a school, etc).

Para 11 of the commentary looks at the situation where "the individual has a permanent home in one Contracting State and has only made a stay of some length in the other Contracting State". The commentary is not making a contrast between:
(1) permanent, and
(2) a stay of some length.
The point correctly being made is that the existence of one (undoubtedly) permanent home impacts on whether one regards *another* place as a permanent home.

Paras 12 and 13 contrast:
(1) permanent use, and
(2) a stay of short duration; exemplified as "travel for pleasure, business travel, educational travel, attending a course at a school, etc".
This suggests that a stay of more than short duration qualifies as permanent.

### 5.7.3 *"Available"*

HMRC helpsheet 302 (Dual Residents - 2010/11) provides:

> A permanent home is any form of accommodation which is continuously available to you for your personal use. It does not necessarily have to be owned by you.

## 5.8 Centre of vital interests

Article 4(2)(a) OECD Model Convention provides:

> if he has a permanent home available to him in both States, he shall be deemed to be a resident only of the State with which his personal and economic relations are closer (centre of vital interests);

The OECD commentary provides:

> 15 If the individual has a permanent home in both Contracting States, it is necessary to look at the facts in order to ascertain with which of the two States his personal and economic relations are closer. Thus, regard will be had to his family and social relations, his occupations, his political, cultural or other activities, his place of business, the place from which he administers his property, etc. The circumstances must be examined as a whole, but it is nevertheless obvious that considerations based on the personal acts of the individual must receive special attention. If a person who has a home in one State sets up a second in the other State while retaining the first, the fact that he retains the first in the environment where he has always lived, where he has worked, and where he has his family and possessions, can, together with other elements, go to demonstrate that he has retained his centre of vital interests in the first State.[14]

This is only relevant where the tie-breaker is not decided by the question of a permanent home.

---

14 HMRC helpsheet 302 (Dual Residents - 2010/11) is based on this:

> 'Personal and economic relations' is a wide expression intended to cover the full range of social, domestic, financial, political and cultural links. The whole range of these factors must be taken into account, but considerations based upon your personal acts are given special weight.
> For example, if you have a home in the UK and set up another in the other State while retaining the first, the fact that you have retained your home in the UK where you have lived, worked and where your family and possessions are, can, together with other factors, go to demonstrate that your centre of vital interests remains in the UK."

## 5.9 Habitual abode

Article 4(2) OECD Model Convention provides:

> b) if
> [i] the State in which he has his centre of vital interests cannot be determined, or
> [ii] if he has not a permanent home available to him in either State,
> he shall be deemed to be a resident only of the State in which he has an habitual abode;

The OECD commentary provides:

> 16 Subparagraph (b) establishes a secondary criterion for two quite distinct and different situations:
> (a) the case where the individual has a permanent home available to him in both Contracting States and it is not possible to determine in which one he has his centre of vital interests;
> (b) the case where the individual has a permanent home available to him in neither Contracting State.
> Preference is given to the Contracting State where the individual has an habitual abode.
> 17 In the first situation, the case where the individual has a permanent home available to him in both States, the fact of having an habitual abode in one State rather than in the other appears therefore as the circumstance which, in case of doubt as to where the individual has his centre of vital interests, tips the balance towards the State where he stays more frequently. For this purpose regard must be had to stays made by the individual not only at the permanent home in the State in question but also at any other place in the same State.
> 18 The second situation is the case of an individual who has a permanent home available to him in neither Contracting State, as for example, a person going from one hotel to another. In this case also all stays made in a State must be considered without it being necessary to ascertain the reasons for them.
> 19 In stipulating that in the two situations which it contemplates preference is given to the Contracting State where the individual has an habitual abode, subparagraph (b) does not specify over what length of time the comparison must be made. The comparison must cover a sufficient length of time for it to be possible to determine whether the

residence in each of the two States is habitual and to determine also the intervals at which the stays take place.

HMRC helpsheet 302 (Dual Residents - 2010/11) provides:

> This broadly means the State in which you stay more frequently over a reasonable period. The comparison must be made over a sufficient length of time for it to be possible to determine whether residence in either of the two countries has become 'habitual'.

## 5.10 Nationality and mutual agreement procedure

Article 4(2)(c)(d) OECD Model Convention provides:

> c) if he has an habitual abode in both States or in neither of them, he shall be deemed to be a resident only of the State of which he is a national;
> d) if he is a national of both States or of neither of them, the competent authorities of the Contracting States shall settle the question by mutual agreement.

## 5.11 The relevant period of investigation for tie-breaker test

In *Hankinson v HMRC* [2010] STC 2640 at [60] the Tribunal said:

> It seems therefore that while one applies the tie-breaker at the time of alienation in a case concerning capital gains, this does not mean that one cannot look at a longer period in applying the elements of the tie-breaker when appropriate, which it may not be for permanent home, but it is necessarily for habitual abode.

This must be so; contrast 3.16 (The relevant period of investigation).

## 5.12 Treaty residence: Trusts

The first step is to identify who is the "person" for treaty purposes.[15]

15 See 5.3 ("Person").

### 5.12.1 *The trust law background*

The following propositions are well established.

(1) A trust is not a person (ie does not have legal personality) in English law, Scots law[16] or, as far as I know, any other trust law.[17]

(2) A trustee is a person. It is often convenient to distinguish:
(a) a person in their capacity as trustee and
(b) that person in their private capacity.
However a trustee is one person, "trustee capacity" is not a separate person.

(3) For domestic law IT and CGT purposes, a trustee is deemed to be a distinct, notional person.[18] References to "individuals" exclude trustees.

### 5.12.2 *Position of trustees under OECD Model treaty*

Let us consider the cases of a trust with (1) several trustees (2) a single individual trustee (3) a single corporate trustee.

Before considering the treaty, one would expect:

(1) trustees to be treated as a person.

(2) the person to be classified as a non-individual (so the non-individual (POEM) tie-breaker test applies even if the trustee is an individual).

(3) the person to be treated as distinct from the individual or company who is actually a trustee.

There is a little difficulty in reading the model treaty to reach this result, but not much.

(1) Where there is more than one trustee, the trustees should be regarded as a body of persons (and so constitute one person) for treaty purposes.

---

16 The Scottish Law Commission discussed but rejected a proposal to give trusts legal or juristic personality: *Discussion Paper on the Nature and the Constitution of Trusts* (October 2006) para 2.29-2.45.

17 Though a trust is close to being a person. Gretton, "Trusts Without Equity" (2000) 49 Int'l & Comp. LQ 599:
"In ordinary language the noun "trust" is a person word. Idiom treats it like "company". "This land is owned by a trust." "These shares are held by a trust". ... "The trust is liable for this debt." Ordinary language is right."
So one should not rule out the possibility that context may show that the word "person" is used (loosely rather than strictly) to mean or include a trust.

18 See 4.4 (Trustee residence for income tax and CGT).

That avoids the difficulty which otherwise arises if a trust had trustees who are resident in different places in their private capacity.

(2) Where there is a sole trustee, it should be regarded as a person (not an individual) distinct from the person who is actually the trustee.

Another possible analysis would be that the trust is a person for OECD model purposes. There are two difficulties with that:

(1) A trust is not a "person" in English law.
(2) If the trust were a person, it is only a resident of a treaty state if it is a person liable to tax. Whether a person is liable to tax is a matter of domestic-law. In UK law, it is the trustees rather than trust which is liable to tax.

These arguments are not insuperable: since treaties can be loosely construed, there are no words from which there is no escape. One could say that a trust is a person (in the treaty sense) even though not a person in English law; and that the trust is "liable to tax" (in the treaty sense) since the trust fund will bear the tax. But there is no need to take this high-handed course, as to regard the trustees as a body of persons (or the sole trustee as a distinct trustee-person) is the simpler and more satisfactory solution.[19]

While it is possible that a foreign law might look at the matter differently, it would be desirable if possible for all countries to adopt the same approach, and in practice this seems to be the case.

HMRC agree. INT Manual provides:

> **162034. Certificates of Residence and trusts and charitable trusts**
> [January 2010]
> Trusts are not themselves liable to tax in the UK, but the trustees on behalf of the trust may be liable to tax in the UK. A trust therefore cannot be a resident of the UK for the purposes of any UK Double Taxation Convention (DTC). Accordingly a certificate of residence cannot be issued in respect of any trust. However, some trusts are included within the definition of 'resident of a Contracting State' in specific DTCs. In those limited circumstances a certificate of residence can be issued in respect of a trust. It is therefore essential that the relevant DTC is checked

19 It has been suggested that the question whether the person for the purposes of the OECD Model is the trustees (as a body) or the trust is purely theoretical and makes no difference in practice. But (1) it is always good to know what one is talking about; (2) it might make a difference on the application of the tie-breaker test; (3) HMRC need to know what name(s) to put on a residence certificate: the trust or the trustee(s).

> on receipt of all applications.
> Trustees as a body (rather than the trust) are regarded as a single person. Where the trustees as a body are regarded as resident in the UK they will be entitled to the benefits of a DTC as they are liable to tax in the UK in respect of the income of the trust. Subject to the comments in the next paragraph a certificate of residence can be issued in respect of a UK resident body of trustees.

The International Manual also provides:

> **353600. Claims by trustees in Ireland** [September 2009]
> Article 4(3) (Fiscal Residence) of the convention makes reference to 'a person other than an individual'. Trustees act as a body of persons and so are persons other than an individual for the purposes of the article, and we therefore refer to the criteria in Article 4(3) to determine whether trustees of an Irish trust are resident in the Ireland for the purposes of the convention.

This is commenting on the Irish treaty but the same would apply generally.

The same would apply to the estate of a deceased person.

On this topic, see Prebble, "Trusts and Double Taxation Agreements" ejournal of Tax Research (2004) vol 2 no 2 p192, accessible *www.atax.unsw.edu.au/ejtr/content/issues/previous/paper3_v2n2.pdf*.

## 5.13 Treaty residence: Partnerships

### 5.13.1 *Is a partnership a "person" for treaty purposes?*

This section considers whether a partnership is a treaty-resident of a state. For other DT issues see 36.9 (DTA relief for partnership).

The first question is whether a partnership is a "person" for treaty purposes.[20] Before turning to the definition, one might expect a partnership to be a person, since:

(1) It avoids difficulty which would arise if a partnership had partners who were resident in different places in their private capacity.

(2) It avoids an undesirable distinction between English partnerships (which are not legal persons) and Scottish partnerships (which are).

---

20 See 5.3 ("Person").

(3) "It is highly improbable that so common a vehicle for commercial activity as a partnership should have been intended to be excluded from an Arrangement [a DTA]..."[21]

Article 3.1(a) OECD Model provides:

> 1. For the purposes of this Convention, unless the context otherwise requires:
> a) the term "person" includes an individual, a company[22] and any other body of persons;

There are three bases for arguing that a partnership is a person:

(1) A partnership is a body of persons, and so within the definition (the "body of persons" argument).

(2) A partnership is a person in the ordinary sense of the expression (the "ordinary person" argument.) If so it does not matter whether a partnership is a body of persons.

(3) Partners (being individuals or companies) are persons (in their private capacities) and a partnership is a person because the singular includes the plural (the singular/plural argument).

Discussion is made more difficult because of the variety of wording in different treaties.

The body of persons argument succeeded in *Padmore v IRC*, where the issue was whether a partnership was a person for the purposes of the Jersey/UK DTA. The definition of "person" in this DTA is not quite in OECD model form. Para 2(1)(d) of the Jersey/UK DTA provides:

> The term "person" includes any body of persons, *corporate or not corporate*;

The Court held that a partnership is a body of persons in the ordinary sense of that term.[23] Accordingly it constitutes a person within the Jersey/UK treaty definition.

The Crown's argument was a subtle one:

---

21 *Padmore v IRC* 62 TC 352 at p.377.

22 Article 3.1(b) defines company: "the term "company" means any body corporate or any entity that is treated as a body corporate for tax purposes".

23 See 5.3 (Is a partnership a "person"?).

> The Crown's answer is that by Article 2(3) of the Arrangement, a term not otherwise defined has, unless the context otherwise requires, the meaning it has under the laws of the United Kingdom or Jersey, as the case may be, relative to the taxes which are the subject of the Arrangement. "Body of persons", it is contended by the Crown, is a term of art in United Kingdom tax law and is defined in the Taxes Act 1970, s 526(5) as follows:
>
> > " 'Body of persons' means any body politic, corporate or collegiate, and any company, fraternity, fellowship and society of persons whether corporate or not corporate".
>
> The Jersey Law has a provision in the same terms (Article 3(1)).[24]

That is, the Revenue argued that (1) a partnership (although a body of persons in the general sense) was not a body of persons in the UK tax law sense[25] and (2) the UK tax law sense applied in the treaty. The Court's reason for rejecting the argument at point (2) was equally subtle:

> If that [UK tax law] definition [of body of persons] is applicable, a partnership is (I will assume) not within it; because a partnership cannot be brought within any of the groups specified in the definition. I agree with Peter Gibson J., however, that the definition is not applicable. The draftsman of the Arrangement in para 2(1)(d) was giving a comprehensive definition of the word "person". If he was assuming that the statutory definition of "body of persons" would apply, I see no reason why he should have added the words "corporate or not corporate". They form part of the Article 2(1)(d) definition itself, and their inclusion had no purpose if the statutory definition applied. I do not think that they can be dismissed as mere tautology. On the face of the Arrangement they are a specific part of what is intended to be a self-contained definition for the purposes of the Arrangement. They are not, it seems to me, consistent with an intention on the part of the draftsman to utilise the statutory definition. They indicate a contrary intention. A partnership is, as a matter of the ordinary use of English, plainly a body of persons, and the language used by the draftsman does not, in my opinion, indicate that he was intending any different meaning.

24 *Padmore v IRC* 62 TC 352 at p.377.

25 Section 989 ITA provides: "The following definitions apply for the purposes of the Income Tax Acts ... "body of persons" means any body politic, corporate or collegiate and any company, fraternity, fellowship and society of persons whether corporate or not corporate." These terms are now of historical interest and it is a pity that the tax law rewrite failed to modernise and simplify this. Perhaps the Office of Tax Simplification could do so.

Unfortunately that reasoning does not apply to the OECD model wording, since that lacks the words "corporate or not corporate." See Article 3.1(a) OECD Model set out above. It is however considered that "body of persons" in the OECD model should be given its ordinary meaning rather than its UK tax meaning. It is relevant to note that the term does not have a UK tax meaning, only an income tax meaning. There is no similar definition for CGT. Thus a partnership is a body of persons (within the meaning of the Model convention) and so a person within the OECD definition.

Avery Jones agrees:[26]

> ...it is hardly likely that the other State, if it had troubled to ask in the course of negotiations what body of persons meant in UK tax law, would wish to have an 18th century list of bodies govern the interpretation of the treaty. It is therefore not difficult to say that the context otherwise requires, and one should include partnerships either within the ordinary meaning of body of persons, or merely by reading the singular as the plural.[27] On the basis a partnership may be included in those cases where wording similar to the 1977 Model is used.[28]

Alternatively one could fall back on the ordinary person or the singular/plural arguments. The difficulty with that is that some treaties provide:

> the term "person" *comprises* an individual, a company and any other body of persons;

Others provide:

26 J Avery Jones, "Bodies of Persons" [1991] BTR 453 at p.464..

27 [Footnote original] This was mentioned as a possibility in Padmore [1989] STC 493, 498g but Fox L.J. stated that this was not sufficient for the taxpayer to succeed, as those persons were not all resident in Jersey. It is not clear why persons in partnerships should not be given a single residence under TA 1988, s.112, which the court held to be applicable for the purpose of interpreting the treaty. The statutory definition of residence of trustees in FA 1989, s.110 does not give them a residence as a body but deems the resident trustees to be non-residence and vice versa.

28 [Footnote original] See art. 1 Comm. Paras. 2-6 of the application of the OECD Model to partnerships. The UK gives a residence to a partnership: TA 1988, s.112(1).

> the term "person" *means* an individual, a company and any other body of persons;

Avery Jones comments:

> Normally in modern United Kingdom treaties the definition of person is that it *comprises* an individual, a company and any other body of persons, which was the wording of the 1963 model; at first sight this might prevent the ordinary meaning of *person* from being used.[29] The official French version of the Model, however, uses the same word *comprend* in both the 1963 and the 1977 versions. There may therefore be no difference between it and the 1977 Model, which makes it difficult to see why the United Kingdom persists in using the 1963 wording. In eight treaties the word *means* is used instead of the Model's *includes*, in which case the ordinary meaning, in addition to the defined meaning, of person cannot be used. But certainly where *includes* and probably in the light of the French version where *comprises*, is used, the argument that the context includes partnerships under the ordinary meaning of body of persons is still available, as these words are not intended to be comprehensive. It is considered that partnerships are so included under that wording, on the basis that they cannot have been intended to be excluded.[30]

It is considered that any of these arguments will suffice, so a partnership is a person for DTA purposes in all cases, though the precise arguments which arise vary from one wording to another. The commentary to the OECD model convention supports this view. The commentary to article 3 provides:

> Partnerships will also be considered to be "persons" either because they fall within the definition of "company" or, where this is not the case, because they constitute other bodies of persons.

### 5.13.2 *Is a partnership "liable to tax?"*

But even though a partnership is a person, it is only a resident of a treaty state within the OECD definition if it is a person liable to tax. Whether a

29 [Footnote original] The OECD Commentary (Art.3 Comm. Para.2), however, stated that the provision was not worded as an exhaustive definition and should be read as indicating that the term person is used in a very wide sense.

30 J Avery Jones, "Bodies of Persons" [1991] BTR 453 at p.464..

person is liable to tax is a matter of domestic law.

In UK law, it is the partners rather than the partnership which is liable to tax. Partners are of course "persons" in their private capacity. They can be treaty-resident in the UK. It seems that a partnership (though a "person") cannot be treaty-resident in the UK.

INT Manual provides:

> **162033. Certificates of Residence and partnerships** [January 2011]
> UK partnerships (including Scottish partnerships and UK LLPs) cannot be resident in the UK for the purposes of any of the UK's Double Taxation Conventions (DTCs) because they are not themselves liable to tax in the UK. Therefore they cannot claim the benefits of any DTC. However, UK resident partners are entitled to such benefits as they are taxed in the UK on their share of the partnership worldwide profits.

This is correct for OECD Model treaty-residence. Para 5 of the OECD Commentary to article 1 similarly provides:

> Where... a partnership is treated as fiscally transparent in a State, the partnership is not "liable to tax" in that State within the meaning of paragraph 1 of Article 4, and so cannot be a resident thereof for the purposes of the Convention.

The same (more or less) applies to LLPs. BI Manual provides:

> **72145 Limited Liability Partnership (LLP): International aspects** [January 2006]
> ... A UK LLP is not itself 'liable to tax' in the UK as the LLP tax provisions identify other persons (i.e. the members) as the persons who are to be taxed. Accordingly for the purposes of the Double Taxation Agreements (DTAs) the LLP is not regarded as being resident in the UK and cannot itself therefore claim relief from foreign taxes under such agreements. As is now the case with ordinary and limited partnerships the members must make the claim.
> ...In the very narrow circumstances where the LLP is not treated as transparent, but instead as a body corporate for tax purposes (such as when the LLP is in liquidation or being wound up in circumstances where transparency cannot be retained), we take the view that the LLP can itself claim relief for foreign taxes, including if appropriate underlying tax.

However HMRC do not always apply this view in practice[31] and it was rejected in India.[32]

### 5.13.3 *HMRC practice*

For US partnerships this practice is not followed and HMRC allow claims from partnerships.[33] There is no reason why American partnerships should be treated better than other partnerships, and other partnerships could therefore seek to obtain similar treatment, even though there would be no legal remedy if HMRC insist on applying the strict law. In practice HMRC accept such claims. INT Manual provides:

> **335510. Background** [March 2007]
> ***How Double Taxation Agreements treat partnerships***
> Double Taxation Agreements (DTAs) do not normally give a tax-transparent concern such as a partnership the right to claim treaty relief. Instead, in those cases where the income of the partnership is taxable in the hands of the partners (rather than at the level of the partnership) each partner should in strictness make a separate claim to treaty relief...
> ***CAR Residency's approach to Partnerships***
> We recognise that applying the provisions of the DTA in such a literal way would be unwelcome and could possibly hamper the business interests of both countries.
> Accordingly, CAR Residency may accept a single claim from a partnership on behalf of its partners. Where a partnership wishes to take advantage of this departure from the strict position and to claim treaty benefits on behalf of its partners, the general or managing partner should sign the declaration on the claim form. In addition to the normal information that is required by the claim form, a list of the names and addresses (residential addresses for individuals and registered addresses where the partners are companies) of the partners should be supplied. These lists should also normally show for each partner their respective percentage shares of the income that is the subject of the claim. In those cases where all of the partners are resident for tax purposes in the same country as the one in which the partnership is established (the country with which the DTA applies) it is not necessary to insist upon this

31 See 50.21.3 (US partnerships and LLCs).
32 *Linklaters LLP v Income Tax Officer* [2010] ITELR 245.
33 See 50.21.3 (US partnerships and LLCs).

information being provided.

Where any of the partners are resident for tax purposes in a country other than that in which the partnership is established, they should make separate claims to relief from UK tax under the terms of any relevant DTA.

In cases where such a partner is resident in a country which (unusually) does not regard the partnership as fiscally transparent – which would mean that it regards the partnership rather than the UK payer as the source of the payments its resident receives – then that partner may have difficulty in getting a claim form certified as relevant to a DT treaty with the UK. In such rare cases, you should consider accepting an uncertified claim form. If you decide to invite a claim in these circumstances you should ask for the claim form to be supported by additional evidence (for example copies of recent tax returns) to show that the partner is resident for tax purposes in the country concerned. Any such case should be referred to Technical Advice Group at an early stage.

**335520. Examination of claims** [September 2009]

***What CAR Residency will do***

Where you are able to conclude that all of the beneficial owners of the income for which relief is being claimed are "qualifying persons" within the meaning of a DTA, then you should process the claim in the normal way without further enquiry. This includes asking the tax office for the UK payer of the income to complete a report on forms in the 4450 series as appropriate.

If the supplementary information that is supplied with the claim form does not allow you to conclude that each of the partners is resident for tax purposes in the same country as that in which the partnership is established, you will have to ask for further information to be supplied.

If any of the partners that are identified are themselves (at face value) transparent for tax purposes (for instance Limited Partnerships and Limited Liability Companies, as well as Trusts and some types of investment funds) you should ask for similar information to be supplied about these 2nd and 3rd level partners. Your aim should be to reach a reasonable level of assurance that all of the underlying participators in these concerns are themselves "persons" who would be able to claim double taxation relief if they were receiving the money directly rather than through the partnership.

*(This text has been withheld because of exemptions in the Freedom of Information Act 2000)*

Where the partnership is unable to provide sufficient information about the identity of its partners to allow you to be satisfied that each person is entitled to relief from UK tax, the amount of relief to be allowed must be restricted to the percentage share of the income that is attributable to the partners who you accept as being entitled to treaty benefits in their own right.

INT Manual provides:

**162033. Certificates of Residence and partnerships** [January 2011]
UK partnerships (including Scottish partnerships and UK LLPs) cannot be resident in the UK for the purposes of any of the UK's Double Taxation Conventions (DTCs) because they are not themselves liable to tax in the UK. Therefore they cannot claim the benefits of any DTC. However, UK resident partners are entitled to such benefits as they are taxed in the UK on their share of the partnership worldwide profits.
Accordingly, we will do what we can to assist UK resident partners to claim the benefits of a particular DTC to which they are entitled.
*Partnerships with only UK Resident Partners*
For partnerships where all partners are UK resident there should not be a problem as we will, if requested, confirm that although the partnership itself cannot be UK resident the individual partners are, and are therefore entitled to the relevant DTC benefits.
*Partnerships with Non-Resident Partners*
Non-resident partners are not entitled to the benefits arising from DTCs between the UK and its treaty partners because they are not persons resident in the UK as set out in the residence Article of a DTC. But, HM Revenue & Customs will, if requested, confirm that, although the partnership itself cannot be UK resident, the UK resident partners are entitled to the relevant treaty benefits.
*Information required*
A request must be accompanied with the following details in writing before a letter of confirmation (certificate) can be issued:
a. Reason for requiring a certificate of residence;
b. The nature of the relevant transaction; and
c. Details of the income concerned.
For partnerships with UK partners only, HM Revenue and Customs will also need:
a. A list detailing the partners' names with confirmation that each and every partner is UK resident at the date of the request for the certificate of residence.
For partnerships with UK and non-resident partners, HM Revenue and Customs will also need:
a. A contact name and address for the partnership; and
b. A list detailing the partners' names, separately identifying those that are UK resident and those that are not and confirming that each of the UK partners is UK resident at the date of the request for the certificate of residence.
Where the source state has provided a form for claiming relief from its tax on the income in question (see DT 2140+), that form should be used accompanied by the HM Revenue and Customs letter of confirmation where appropriate.
A letter of confirmation should not be issued if you think that to do so would not be in accordance with the relevant DTC. However, before a formal refusal is

issued please refer to Specialist International.

**Wording for letter of Confirmation to Partnership with UK resident partners only**

To whom it may concern

The partnership of …………………………… is not itself resident in the UK for the purposes of the UK/? Convention.

However, I certify that to the best of HM Revenue & Custom's knowledge, the individual partners in …………….. as at [date] are resident in the UK in accordance with Article 4 of the Convention in force between the UK and …….

## 5.14 Partnerships under non-OECD model DTAs

Some DTAs do not follow the OECD model. The former ITH provided:

> **1656. Later DT Agreements**
> The significance of 1987 for partnerships and Double Taxation Agreements is that in 1986 the High Court gave its decision on the Padmore case which upset our view that a treaty did not apply to partnerships unless they were specifically mentioned. We look at the Padmore case and its consequences in the next paragraphs. Later treaties will normally have something about partnerships, either specifically excluding some or all of them from the treaty or preserving our right to tax the UK resident partners. The precise provisions may depend on the status of partnerships in the country of the treaty partner. Examples of later treaties where partnerships are mentioned are Italy and Bulgaria.

### 5.14.1 *Partnerships under UK/Switzerland DTA*

Article 4.1 of the UK/Switzerland DTA provides, unusually:

In the case of Switzerland, the term [resident of a Contracting State] includes a partnership created or organised under Swiss law.

The former ITH provided:

**1655. Older DT Agreements**
... the Swiss Agreement which includes as a resident of Switzerland a partnership created or organised under Swiss law. If this were the only provision it could mean that we would not have the right to tax under Case V a UK-resident partner in a Swiss partnership which had no permanent establishment in the UK. But our right to tax our resident partners is specifically protected by a separate provision.

The DTR Manual now provides:

**DT18104 - Switzerland: Partnerships**
The agreement makes it clear that, if a partnership is a resident of Switzerland and is entitled, in accordance with the provisions of the agreement, to exemption from UK tax on any income, the UK nevertheless has the right to tax a UK resident partner on his share of the partnership income. Such income is deemed to be income from a source in Switzerland (Article 27(2)).
The agreement provides in Article 4 (1) that, in the case of Switzerland, the term 'resident of a Contracting State' includes a partnership created or organised under Swiss law. This provision should not be understood to override the general requirement that a resident must be liable to taxation in the relevant Contracting State. Where a claim is received in respect of the income of a Swiss partnership it should be ascertained that the income is actually taxed in Switzerland. Any claim that income of a Swiss partnership which has not been taxed in Switzerland should be relieved from taxation in the UK should be referred to Business Profits, International.

## 5.15 RICs, REITs and REMICs

The US Department of the Treasury Technical Explanation of the Convention[34] provides:

Certain entities that are nominally subject to tax but that in practice are

34 *www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.*

> rarely required to pay tax also would generally be treated as residents and therefore accorded treaty benefits. For example, RICs, REITs and REMICs are all residents of the United States for purposes of the treaty. Although the income earned by these entities normally is not subject to U.S. tax in the hands of the entity, they are taxable to the extent that they do not currently distribute their profits, and therefore may be regarded as "liable to tax." They also must satisfy a number of requirements under the Code in order to be entitled to special tax treatment.

While this is directed at the US DTA, the wording in point ("liable to tax") is the same generally and the same argument should apply to REITs in other states.

## 5.16 Place of effective management ("POEM")

Article 4.3 OECD Model Convention provides:

> Where by reason of the provisions of paragraph 1 a person other than an individual is a resident of both Contracting States, then it shall be deemed to be a resident only of the State in which its place of effective management is situated.

This is the tie-breaker for trusts, companies and PRs. The OECD commentary provides:

> 24. ... The place of effective management is the place where key management and commercial decisions that are necessary for the conduct of the entity's business as a whole are in substance made. All relevant facts and circumstances must be examined to determine the place of effective management. An entity may have more than one place of management, but it can have only one place of effective management at any one time.

This has often been cited and adopted in UK cases, as one would expect. The UN commentary provides:

> [The term "place of effective management"] is used in several provisions of the OECD Model Convention, as is the term "place of management". Neither term is defined explicitly in the Convention itself or in the commentary thereon, nor is it made clear whether the two terms are to be construed as having the same meaning or two different meanings. It is,

however, understood that when establishing the place of effective management, circumstances which may, inter alia, be taken into account are the place where a company is actually managed and controlled, the place where the decision-making at the highest level on the important policies essential for the management of the company takes place, the place that plays a leading part in the management of a company from an economic and functional point of view, and the place where the most important accounting books are kept.[35]

The International Manual provides:

**353600. Claims by trustees in Ireland** [September 2009]

***... When you need to determine the place of effective management of an Irish trust***

... So if you have a claim from a trust under the treaty with Ireland and find that the trustees are resident in more than one country, you will need to establish the trust's place of effective management.

You should ask Technical Advice Group to confirm any judgement you make on the residence of a group of individual trustees.

***Criteria for determining the place of effective management of an Irish trust***

You need to find out who generally controls and supervises the work of administering the trust. By administering the trust we mean: keeping accounts, conducting correspondence, arranging the trustees' meetings and putting the trustees' decisions into effect.

***If the trustees are all individuals***

You will need to find out which of the trustees is responsible for the tasks outlined above, and the dates and locations of all trustees' meetings held during the period of the claim.

***If a professional body acts as a trustee***

You can accept that the place of business of the professional body is the place of effective management of the trust.

For this purpose the professional body is appointed by the testator or settlor of the trust, and does not include:

- An individual who is a solicitor or an accountant
- An agent or an attorney administrator appointed by the trustees

***Residence of a professional body***

If a professional body acting as a trustee is a branch in Ireland of a UK bank or similar institution, it is considered to be in Ireland for the purposes of Article 4(3). A UK branch of an Irish bank would however

35 United Nations Manual for the Negotiation of Bilateral Tax Treaties between developed and Developing Countries 2003.

not be considered to be in Ireland.

### 5.16.1 *"Effective" management*

In *Smallwood v HMRC* [2008] STC (SCD) 209 the Special Commissioners said at [112]:

> We believe 'effective' should be understood in the sense of the French 'effective' (siège de direction effective) which connotes real, French being the other official version of the [OECD] model, though not of the [UK-Mauritius] treaty.

This does not take matters very much further. The word "real" never does.

### 5.16.2 *Short term non-resident periods*

In *Smallwood v HMRC*, a trust had different trustees resident in different states, all in one tax year:

Apr - Dec: Jersey resident trustees
Dec - Mar: Mauritius resident trustees ("the Mauritian period")
Mar onwards: UK resident trustees ("the UK period")

It was necessary to apply the tie-breaker test.[36] Everything was done which could reasonably be done to ensure that the Mauritian trustees carried out effective management, but POEM was still in the UK:

> The scheme was devised in the UK by Mr Smallwood on the advice of KPMG Bristol. The steps taken in the scheme were carefully orchestrated throughout from the UK, both by KPMG and by Quilter. And it was integral to the scheme that the trust should be exported to Mauritius for a brief temporary period only and then be returned, within the fiscal year, to the UK, which occurred. Mr Smallwood remained throughout in the UK. There was a scheme of management of this trust which went above and beyond the day to day management exercised by the trustees for the time being, and the control of it was located in the UK.[37]

The dissenting decision of Patten LJ seems more convincing to me, and the

---

36 See 5.4.2 (Change of residence of trustee during tax year).
37 *Smallwood v HMRC* at [70].

majority dealt with the point in two short paragraphs, as if a fuller exposition of their reasons would be an embarrassment. However the conclusion must be that tax avoidance schemes requiring short term residence in a treaty state are likely to fail on factual POEM grounds.

### 5.16.3 *Comparison with "central management and control"*

In *Smallwood v HMRC* [2008] STC (SCD) 209 the Special Commissioners discussed POEM in the context of a trust, and said:

> 111. There was thus some debate about whether, or to what extent, POEM differed from CMC [central management and control]. We consider that this misses the point; the two concepts serve entirely different purposes. CMC determines whether a company is resident in the UK or not; POEM is a tie-breaker the purpose of which is to resolve cases of dual residence by determining in which of two states it is to be found. CMC is essentially a one-country test; the purpose is not to decide where residence is situated, but whether or not it is situated in the UK…
> 112. POEM, on the other hand, must be concerned with what happens in both states since its purpose is to resolve residence under domestic law in both states, caused for whatever reason, which could include incorporation in one state and management in the other, or different meanings of management applied in each state, or different interpretations of the same meaning of management applied in each state, or divided management. One must necessarily weigh up what happens in both states and according to the ordinary meaning to be given to the terms of the treaty in their context (to quote art 31 of the Vienna Convention on the Law of Treaties) decide in which state the place of effective management is found.

The same passage was applied in the context of a company.[38]
But in *Smallwood v HMRC* at [58] Patten LJ says:

> [In] *Wood v Holden* 78 TC 1 ... Chadwick LJ expressed the view that it was difficult to draw any meaningful distinction between the two tests [POEM and central management and control] but that even if they did in fact differ in substance, they were unlikely to lead to different results.

38 *Laerstate BV v HMRC* [2009] UKFTT 209 at [48].

See Avery Jones, "The Definition of Company Residence in Early UK Tax Treaties" [2008] BTR 556.

## 5.17 UK/US DTA

This section considers the definition of treaty-residence in the UK/US DTA.

Article 4(1) of the UK/ US DTA provides:

> [a] Except as provided in paragraphs 2 and 3 of this Article, the term "resident of a Contracting State" means, for the purposes of this Convention, any person who, under the laws of that State, is liable to tax therein by reason of his domicile, residence, *citizenship,* place of management, *place of incorporation,* or any other criterion of a similar nature.

This is standard OECD model form except for the addition of the italicised words, which reflect the US rule that citizens and US incorporated companies are liable to tax regardless of residence and other such criteria.

Article 4(1) of the UK/ US DTA continues:

> [b] This term, however, does not include any person who is liable to tax in that State in respect only of income from sources in that State or of profits attributable to a permanent establishment in that State.

This is close to standard OECD model form and the differences do not seem material.

### 5.17.1 *US citizens/green card holders*

Article 4(2) of the UK/ US DTA provides:

> An individual who is a United States citizen or an alien admitted to the United States for permanent residence (a "green card" holder) is a resident of the United States only if
> [a] the individual has a substantial presence, permanent home or habitual abode in the United States and
> [b] if that individual is not a resident of a State other than the UK for the purposes of a double taxation convention between that State and the UK.

The US Department of the Treasury Technical Explanation of the Convention[39] provides:

> Paragraph 2 contains an exception to the general rule of paragraph 1 that residence under internal law also determines residence under the Convention. The exception applies with respect to a U.S. citizen or alien lawfully admitted for permanent residence (i.e., a "green card" holder). Under paragraph 1, a person is considered a resident of a Contracting State for purposes of the Convention if he is liable to tax in that Contracting State by reason of citizenship. Although this rule applies to both Contracting States, only the United States taxes its non-resident citizens in the same manner as its residents. In addition, aliens admitted to the United States for permanent residence ("green card" holders) qualify as U.S. residents under the first sentence of paragraph 1 because they are taxed by the United States as residents, regardless of where they physically reside.
>
> Under the exception of paragraph 2, a U.S. citizen or green card holder will be treated as a resident of the United States for purposes of the Convention, and, thereby entitled to treaty benefits, only if he meets two conditions. First, he must have a substantial presence (see section 7701(b)(3)), permanent home or habitual abode in the United States. This rule requires that the U.S. citizen or green card holder have a reasonably strong economic nexus with the United States. Second, he must not be treated as a resident of a state other than the UK under any treaty between the UK and a third state. This rule prevents a U.S. citizen or green card holder who is a resident of a country other than the United States or the UK from choosing the benefits of the Convention over those provided by the treaty between the UK and his country of residence. If the U.S. citizen or green card holder's country of residence does not have a treaty with the UK, however, then he will be treated as a resident of the United States as long as he meets the first requirement of an economic nexus. If such a person is a resident of both the United States and the UK, whether or not he is to be treated as a resident of the United States for purposes of the Convention is determined by the tie-breaker rules of paragraph 4.

The text goes on to give some examples:

> Thus, for example, an individual resident of Mexico who is a U.S. citizen by birth, or who is a Mexican citizen and holds a U.S. green card, but

39 *www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

who, in either case, has never lived in the United States, would not be entitled to benefits under the Convention. However, a U.S. citizen who is transferred to Mexico for two years would be entitled to benefits under the Convention if he maintains a permanent home or habitual abode in the United States and is not a resident of Mexico for purposes of the U.K.-Mexico tax treaty. If he were treated as a resident of Mexico under the U.K.-Mexico tax treaty, he could claim only the benefits of that treaty, even if the Convention would provide greater benefits.

The fact that a U.S. citizen who does not have close ties to the United States may not be treated as a U.S. resident under the Convention does not alter the application of the saving clause of paragraph 4 of Article 1 (General Scope) to that citizen. For example, a U.S. citizen who pursuant to the "citizen/green card holder" rule is not considered to be a resident of the United States still is taxable on his worldwide income under the generally applicable rules of the Code.

HMRC helpsheet 302 (Dual Residents - 2010/11) provides:

Special rules apply where the other country is the United States of America (US), if you are claiming to be a resident of the US for the purposes of the UK/US Double Taxation Convention (DTC). Statements concerning residence should not normally be sought from the US Internal Revenue Service. This is because the US operates a special system whereby it taxes its 'citizens' on their worldwide income, wherever they may be resident. US citizens are not, however, necessarily 'residents' of the US for the purposes of the DTC.

Article 4(2) of the DTA provides that a citizen or green card holder will be treated as a resident of the US for purposes of the DTA, and thereby entitled to treaty benefits, only if two conditions are met:

• first, you must have a substantial presence (see below), permanent home or habitual abode in the US

• second, you must not be treated as a resident of a State other than the UK under any treaty between the UK and a third State.

### 5.17.2 *Substantial presence*

It appears that "substantial presence" is a technical term in US tax law (whose meaning applies in the treaty). HMRC helpsheet 302 (Dual Residents - 2010/11) provides:

***Substantial presence test***

You will have a substantial presence if:

• you were present in the US on at least 31 days in the calendar year under test, and

• the sum total of days on which you were present in the US in the year under test, and in the two preceding years, adds up to at least 183 days. For the purposes of this calculation a day spent in the US in the year preceding the year under test counts as 1 /3, and a day in the year before that counts as 1 /6. Part days of presence in the US should be treated as if they were whole days for this purpose.

*Example 1*

If you spent 48 days in the US in 2011, 250 days in 2010 and 365 days in 2009, the calculation would be as follows:

Year of test – 2011 (more than 31 days spent in the US)

| | | |
|---|---|---|
| 2011 | 48 days × 1/1 = | 48 |
| 2010 | 250 days × 1/3 = | 84 |
| 2009 | 365 days × 1/6 = | 61 |
| | | 193 |

Both conditions of the substantial presence test are passed and you will be regarded as resident in the US under that country's domestic law.

### 5.17.3 *Miscellaneous bodies*

The US/UK DTA continues:

(3) The term "resident of a Contracting State" includes—

(a) a pension scheme;

(b) a plan, scheme, fund, trust, company or other arrangement established in a Contracting State that is operated exclusively to administer or provide employee benefits and that, by reason of its nature as such, is generally exempt from income taxation in that State;

(c) an organisation that is established exclusively for religious, charitable, scientific, artistic, cultural, or educational purposes and that is a resident of a Contracting State according to its laws, notwithstanding that all or part of its income or gains may be exempt from tax under the domestic law of that State; and

(d) a qualified governmental entity that is, is a part of, or is established in, that State.

The US Department of the Treasury Technical Explanation of the

Convention[40] provides:

> Paragraph 3 provides that certain tax-exempt entities such as pension funds and charitable organizations will be regarded as residents of a Contracting State regardless of whether they are generally liable for income tax in the State where they are established. The inclusion of this provision is intended to clarify the generally accepted practice of treating an entity that would be liable for tax as a resident under the internal law of a State but for a specific exemption from tax (either complete or partial) as a resident of that state for purposes of paragraph 1.
> Subparagraph (a) of paragraph 3 applies to pension schemes, as defined in subparagraph (o) of paragraph 1 of Article 3 (General Definitions). Subparagraph (b) applies to any plan, scheme, fund, trust, company or other arrangement established in a Contracting State that is generally exempt from taxation in that State because it is operated exclusively to administer or provide employee benefits. The reference to a general exemption is intended to reflect the fact that under U.S. law, certain organizations that generally are considered to be tax-exempt entities may be subject to certain excise taxes or to income tax on their unrelated business income. Subparagraph © applies to an organization that is established exclusively for religious, charitable, scientific, artistic, cultural, or educational purposes and that is a resident of a Contracting State. Thus, an exempt section 501© organization (such as a U.S. charity) that is generally exempt from tax under U.S. law is a resident of the United States for all purposes of the Convention. Subparagraph (d) applies to a qualified governmental entity, as defined in subparagraph (k) of paragraph 1 of Article 3, if it is the Contracting State itself, is established in a Contracting State or is a part of that State.

### 5.17.4 *Tie-breaker for individuals*

The US/UK DTA continues:

> (4) Where by reason of the provisions of paragraph 1 of this Article, an individual is a resident of both Contracting States, then his status shall be determined as follows—
> (a) he shall be deemed to be a resident only of the State in which he has a permanent home available to him; if he has a permanent home available to him in both States, he shall be deemed to be a resident only of the State

40 *www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.*

> with which his personal and economic relations are closer (centre of vital interests);
> (b) if the State in which he has his centre of vital interests cannot be determined, or if he does not have a permanent home available to him in either State, he shall be deemed to be a resident only of the State in which he has an habitual abode;
> © if he has an habitual abode in both States or in neither of them, he shall be deemed to be a resident only of the State of which he is a national;
> (d) if he is a national of both States or of neither of them, the competent authorities of the Contracting States shall endeavour to settle the question by mutual agreement.

This is standard OECD model wording.

### 5.17.5 *Tie breaker for non-individuals*

Art 1(5) US/UK DTA provides:

> Where by reason of the provisions of paragraph 1 of this Article a person other than an individual is a resident of both Contracting States, the competent authorities of the Contracting States shall endeavour to determine by mutual agreement the mode of application of this Convention to that person. If the competent authorities do not reach such an agreement, that person shall not be entitled to claim any benefit provided by this Convention, except those provided by paragraph 4 of Article 24 (Relief from Double Taxation), Article 25 (Non-discrimination) and Article 26 (Mutual agreement procedure).

The US Department of the Treasury Technical Explanation of the Convention[41] provides:

> Dual residents other than individuals (e.g., companies, trusts, and estates) are addressed by paragraph 5. If such a person is, under the rules of paragraph 1, resident in both Contracting States, the competent authorities shall seek to determine a single State of residence for that person for purposes of the Convention. For example, a company is treated as resident in the United States if it is created or organized under the laws of the United States or a political subdivision. Under U.K. law, a company is

41 *www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf.*

treated as a resident of the UK if it is either established there or managed and controlled there. Dual residence, therefore, can arise if a U.S. company is managed and controlled in the UK. Paragraph 5 provides that the competent authorities will try to determine a single State of residence for such a company.

If the competent authorities do not reach an agreement on the single State of residence, that person may not claim any benefit provided by the Convention, except those provided by paragraph 4 of Article 24 (Relief from Double Taxation), Article 25 (Non-Discrimination), and Article 26 (Mutual Agreement Procedure). Thus, for example, a State cannot discriminate against a dual resident company, and such a company can bring issues to the competent authorities.

Dual resident companies also may be treated as resident for purposes other than that of obtaining benefits under the Convention. For example, if a dual resident company pays a dividend to a resident of the UK, the U.S. paying agent would withhold on that dividend at the appropriate treaty rate because reduced withholding is a benefit enjoyed by the resident of the UK, not by the dual resident. The dual resident company that paid the dividend would, for this purpose, be treated as a resident of the United States under the Convention. In addition, information relating to dual resident companies can be exchanged under the Convention because, by its terms, Article 27 (Exchange of Information and Administrative Assistance) is not limited to residents of the Contracting States.

CHAPTER SIX

# YEAR OF ARRIVAL AND DEPARTURE

## 6.1 Arrival and departure – Introduction

This chapter is concerned with income and gains accruing in a year during which an individual or a trustee becomes or ceases to be UK resident. I also consider cases where an individual becomes or ceases to be ordinarily resident or UK domiciled.

Of course, a person who is present in the UK for part of a year may have the status of UK resident or ordinarily resident throughout the year and then the issues discussed in this chapter do not arise: we are concerned with those who acquire or lose the status of resident or ordinarily resident during the tax year. It is necessary to consider income tax and CGT separately.

For exit taxes on emigration see 7.1 (Exit taxes). For employment income in the year of arrival and departure, see 12.8 (Pre-commencement and post-cessation earnings). The topic of companies becoming or ceasing to be UK resident is not discussed.

## 6.2 Income tax: statutory split year rule

An individual who is resident during part of a tax year is strictly subject to income tax on all the income of the year, even income arising during the non-resident part of the year. I refer to this as the **"the statutory split year rule."**

Confusingly, there is no clear statutory statement of this principle (though no-one doubts its correctness). There is not even any case which clearly decides or discusses it. However there are some that point clearly enough in that direction.

### 6.2.1 *Residing in the UK "in a tax year" and "for a tax year"*

*Mitchell v IRC* concerned the Special Contribution under the FA 1948 which (in short) was not charged "in the case of an individual who in the year 1947/48 was not domiciled in the UK." The taxpayer ceased to be UK domiciled halfway through the year. The charge applied. The Court held that a person who was UK domiciled during part of the year was domiciled "in the year".[1]

Closer to home, *Neubergh v IRC* 52 TC 79 concerned the Special Charge under the FA 1968 which applied (in short) to a person who was resident and ordinarily resident in the UK *"*in the year 1967/68". The taxpayer ceased to be resident and ordinarily resident during that year. The charged applied because the taxpayer could be said to be resident and ordinarily resident "in the year" even though he was only so resident during part of the year.

The expression residing in the UK *"in* a tax year" is sometimes contrasted with the expression residing in the UK *"for* a tax year". The meaning of the latter expression was one of the issues in *Gubay v Kington*. Vinelott J thought that it generally meant resident *throughout* the year so that a person resident during only part of a tax year was not resident in the UK *for* the year. Dillon LJ took the opposite view. Everyone agreed, however, that the expression could be read either way, and context must decide the meaning. I suggest that it is best not to use that expression at all, and indeed it is rare in tax legislation.[2] It is easy to say clearly whatever is intended, as s.2 TCGA illustrates.

1 33 TC 53. The Court went on to deal with the double negative in the provision, and held that the person domiciled during part of a year could not say that they were not UK domiciled "in the year". I find this point unconvincing, but it does not matter for present purposes.

2 The expression "resident for" a tax year is no longer found in the context of the provision discussed in *Gubay,* though it survives in some double taxation contexts, eg ss.26, 28, 137 TIOPA, s.835O ITA. The special commissioners in *Gubay* 57 TC 601 at p.613 rightly said that "the suggested distinction between being 'a person residing in the UK' and being 'resident in the UK for a year of assessment is excessively refined." I stress this because the special commissioner revived this usage (I think, unhelpfully) in *Genovese v HMRC* [2009] STC (SCD) 373 at [54].

### 6.2.2 *Where is the authority for the statutory split year rule?*

With that in mind one can review the statutory provisions, such as s.368 ITTOIA:

> **368 Territorial scope of Part 4 charges**
> (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
> (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK

The terms "UK resident" and non-UK resident are defined in s. 989 ITA:

> The following definitions apply for the purposes of the Income Tax Acts
> ...
> "non-UK resident" means not resident in the UK (and references to a non-UK resident or a non-UK resident person are to a person who is not resident there),
> "UK resident" means resident in the UK (and references to a UK resident or a UK resident person are to a person who is resident there),

*Neubergh* does not, it seems to me, justify the statutory split year rule, as it is a step from "resident in the UK" (the relevant statutory language now) to "resident in the UK in the year" (the terminology considered in *Neubergh*). But for all that, the principle has long been agreed.[3]

ESC A11 (Residence in the UK: year of commencement or cessation of residence) provides:

> [1] The Income and Corporation Taxes Acts make no provision for splitting a tax year in relation to residence and an individual who is resident in the UK for any year of assessment is chargeable on the basis that he is resident for the whole year.[4]

---

3 Rowlatt J alluded to it in *Back v Whitlock* 16 TC 723 at p.726: "As I understand it, there is no question under the Income Tax Acts of any apportionment or adjustment for Income Tax in time, with regard to the date when a person became resident and so became taxable."

4 Likewise HMRC6 para 2.4 provides:
"Strictly, you are taxed as a UK resident for the whole of a tax year when you are resident here for any part of it. But, if you leave or come to the UK part-way through a tax year, the year may, by concession, be split (extra-statutory concession A11).

I find this a slightly confusing way to express the statutory split year rule, but it is in principle correct.

Having said that, however, the statutory split year rule is subject to two exceptions of such breadth that the principle rarely applies:

(1) Relief is available by concession ESC A11.
(2) Relief may be available under Double Tax Treaties.

## 6.3 Concession A11

The concession continues:

> [2] But where an individual—
> (a) comes to the UK to take up permanent residence or to stay for at least two years; or
> (b) ceases to reside in the UK if he has left for permanent residence abroad,
>
> liability to UK tax which is affected by residence is computed by reference to the period of his residence here during the year.
> [3] It is a condition that the individual should satisfy the Board of Inland Revenue that
> [a] prior to his arrival he was, or
> [b] on his departure is,
> not ordinarily resident in the UK.

This concession is often disapplied: see 9.7.1 (Interaction of £2k limit with split-year concessions); 9.11.1 ("Long-term UK resident") and 9.11.11 (Remittance basis claim charge in year of arrival and departure).

### 6.3.1 *Year of arrival*

The usual conditions for year of arrival treatment are therefore:

- The individual comes to the UK:
  (a) to take up permanent residence or
  (b) to stay for at least two years.
  ESC [2](a).

---

This means that the UK Income Tax you should pay because you are resident here is calculated on the basis of the period you are living here rather than the whole of that tax year. This has the effect of splitting the tax year into resident and not resident periods for the purposes of calculating the tax due."

- Prior to arrival, the individual was not ordinarily resident: ESC [3][a].

The first limb of condition [2](a) is otiose since anyone who comes to take up permanent residence will fall within the second limb (they come to stay for at least two years). In condition [2](a) I think the context shows that "stay for at least two years" must mean "be tax resident for two or more tax years". So an individual who is here from 1 September 2000 to 31 September 2001, who is therefore resident in 2000/01 and 2001/02, qualifies for year of arrival treatment in the year of arrival.

The individual who comes to the UK so as to be resident for only one tax year will not qualify for IT year of arrival treatment. This is bizarre because they may qualify for IT year of departure treatment and (I think) may qualify for CGT year of arrival treatment.

Condition [3][a] would only affect someone who (prior to arrival) is non-resident but ordinarily UK resident, which in practice never or hardly ever happens.

### 6.3.2 *Year of departure*

The usual conditions for year of departure treatment are:

- The individual must leave for permanent residence abroad: A11 [2](b).
- The individual must cease to be ordinarily resident in the UK: A11 [3][b].

Condition A11 [2](b) – permanent residence abroad – is stricter than the equivalent rule for the year of arrival, A11 [2](a). If "permanent" is read strictly, a person who leaves for a number of years, three years or even five years, does not qualify for year of departure treatment, unless the employment exception applies. But perhaps a reasonable length period abroad, say three years, is regarded as "permanent" for this purpose.

In respect of this condition, ESC A11 continues:

> The concession would not apply, for example, where an individual who had been ordinarily resident in the UK left for intended permanent residence abroad but returned to reside here before the end of the tax year following the tax year of departure.

Why? Does this assume that the individual is not ordinarily resident abroad in the year following the year of departure? I would have said that they were ordinarily resident, until they changed their minds and decided to return. It is however an unusual case, so the question will not often arise.

### 6.3.3 *Absence under contract of employment*

Condition [2](b) (to leave for permanent residence abroad) is relaxed in one case. ESC A11 provides:

> This concession is extended to the years of departure and return where, subject to certain conditions, an individual goes abroad for full time service under a contract of employment. These conditions are—
> – the individual's absence from the UK and the employment itself both extend over a period covering a complete tax year; and
> – any interim visits to the UK during the period do not amount to—
> (i) 183 days or more in any tax year; or
> (ii) an average of 91 days or more in a tax year (the average is taken over the period of absence up to a maximum of four years).

This is mainly relevant to year of departure treatment for an employee who leaves the UK but not for *permanent* residence abroad so they do not meet condition A11 [2](b). It could also apply to year of arrival treatment, for an employee who returns to the UK but only to stay for one year, so they do not meet condition [2](a). One could just imagine cases where an individual qualifies for year of arrival treatment under this paragraph, but normally if an individual leaves under a contract of employment for a year they cease to be ordinarily resident and will qualify under the usual conditions.

## 6.4 IT computation where ESC A11 applies

ESC A11 simply states:

> liability to UK tax which is affected by residence is computed by reference to the period of his residence here during the year.

There are several possible ways of computing liability by reference to the period of residence. One is straightline time apportionment by reference to the length of the resident and non-resident periods. Another is to identify the income arising in the period of residence.

### 6.4.1 *What is the period of residence?*

ESC A11 refers to "the period of residence here during the year" and the first step is to ascertain this period.[5]

From 2008/09, days of arrival are counted, but days of departure are not: one applies the usual rule that a day only counts if one is present at the end of the day.

There is no other guidance on how to ascertain the period of residence here. Here is just a selection of cases:

| | **Days present: Case 1** | **Case 2** | **Case 3** |
|---|---|---|---|
| April (from 6th) | 0 | 1 | 7 |
| May | 0 | 0 | 0 |
| June | 0 | 0 | 2 |
| July-April | continually present | cont. present | cont. present |

In case 1 the individual's period of residence begins 1 July. Is case 2 different because of the one day visit in April? It is thought not, for one would not describe the individual as resident here in the period April–June if they were only here for one day. It should be the same even if at the time of the day's visit in April the individual had already decided to stay from July to the following April. If that is right then even in case 3, the individual's period of residence starts in July. But where the dividing line comes is hard to say. What if they are resident in all of April, then away, and continuously present from October. Are they resident in the period April–October? Or only from the beginning of October? It is suggested that it depends on intention. If during the April visit they did not intend to come in October, they are not resident during that period. In practice no doubt we muddle through.

### 6.4.2 *Habitual visitors*

The Inspectors Manual provided at 1664:

> **Visitors resident from 6 April**
> An individual who, by reason of habitual and substantial visits, becomes

5 ESC A11 also refers to "arrival" and "departure" and clearly the period of residence is between those two.

> chargeable as a resident for and from the fifth year of such visits (see (a)(ii) of IM45)[6] should be treated as resident for the whole of the year for the purpose of this guidance.

The reason is presumably that in the case of a person making sporadic visits, there is often no obvious way of identifying the period of residence.

## 6.5 Computation in year of arrival – RFI

### 6.5.1 *RFI: arising basis*

IR20 (withdrawn from 2009/10) was difficult to follow by the time it reached its 2008 version, because parts of it were out of date, discussing the preceding year basis (abolished 1996/7) and paying and collecting agents rules (abolished in 2000). The 2008 updates to IR20 made no attempt to address this problem. But apart from some curious rules relating to source ceasing (which were anomolous before 2008 and one can assume have no relevance now) IR20 opted for straightline time apportionment. The Inspectors Manual para 1663 (also withdrawn) provided an example which conveniently illustrated this approach:

> ***New arrivals on or after 6 April 1997***
> *Where an individual arrives in the UK on or after 6 April 1997 and is regarded as resident from the date of arrival, his liability in respect of overseas income within Cases IV or V should be determined as follows.*
> *(1) No liability arises where the source of income ceases before permanent residence begins.*
> *(2) Liability for the year of arrival should be based*
> *(a) where the arising basis applies, upon the proportion on a time basis from the date of arrival to the following 5 April, of the full amount of income arising in the year of arrival.*

The Manual then gave an example which helpfully illustrated the rule:

> *For example, an individual arrives in the UK on 6 October 1997 and is regarded as UK-resident from that date. Case V income arose as follows:–*

6 This passage in the Inspectors Manual set out the short term visitors rules.

| | |
|---|---|
| *30/6/97* | *£100* |
| *30/9/97* | *£200* |
| *31/12/97* | *£150* |
| *31/3/98* | *£250* |
| *[total* | *£700]* |

*If the arising basis applies, the amount chargeable for 1997–98 will be 6/12×£700 =£350*

I describe this as "**straightline time apportionment**".

However, HMRC6 provides:

> **10.14.1 When you become resident in the UK**
> When you come to the UK during a tax year and are resident from the date of your arrival, you are liable to UK tax on your UK investment income for the whole of the tax year, subject to the terms of any DTA which might apply to you.
> You will not be liable to UK tax on foreign investment income *arising before the date of your arrival* under extra statutory concession A11.

This suggests that HMRC may have altered their practice, and one now should identify when the income arose and income attributable to the pre-arrival period is not taxed. This is consistent with the approach adopted for departure.

Of course one would have expected a major change of practice of that kind to be discussed in advance, and highlighted, and possibly HMRC may continue to accept straightline time apportionment, at least when it gives roughly the same result as identifying the actual income of the resident and non-resident periods.

### 6.5.2 *RFI: remittance basis*

The terms of the ESC require that tax is "computed by reference to the period of residence here during the year" which suggests that where the remittance basis applies:

(1) income arising prior to that period of residence, time apportioned, should be disregarded; and
(2) remittances made prior to that period of residence, should be disregarded.

HMRC accept this view. The January 2009 Qs & As provides:

**Q14:** A Polish plumber comes to the UK in September 2008, having worked until August 2008 in Poland. He will be caught by 809D as ESC A11 does not apply but will not be caught by 809X as ESC A11 does apply. It appears anomalous that the April to August income can be treated as unremitted and potentially taxable income for one purpose and then not taxed when remitted for another purpose.
**A:** The disregard of split year treatment applies solely for the purposes of determining whether an individual will need to claim the remittance basis under s809B ITA or whether they can rely upon s809D to use the remittance basis without making a claim because their total foreign income and gains are below the £2,000 threshold (and thereby retain their personal allowances and AEA). ESC A11 continues to apply in terms of what income is chargeable to tax.
Remittances of foreign income arising in the months before an individual came to the UK (assuming the individual was not temporarily non-resident) will not be taxable under the terms of the A11 concession.

## 6.6 IT Computation in year of departure

### 6.6.1 *RFI: arising basis*

The method of computation for the year of departure was formerly entirely different, and more generous, than for the year of arrival. IR20 (withdrawn from 2009/10) provided:

*Investment income of those who leave, or come to, the UK part way through a tax year*
***Leaving the UK***
*6.15 For tax years up to the year ending 5 April 2008, for overseas investment income where you are **not** taxed on the remittance basis, you will pay tax on the smaller of*
*[a] the actual overseas investment income arising for the period from 6 April to the date of your departure, and*
*[b] the same fraction of your total overseas income for the year of departure as the fraction of the full tax year for which you are resident in this country. For example, if you are resident in the UK from 6 April until 6 October in the same tax year, i.e. 6 months, the fraction is 6/12.*
*For tax years from 6 April 2008 onwards, the same rules will apply, depending on your personal circumstances. If you have chosen not to claim the remittance basis in the tax year of your departure you will be*

*liable to pay UK tax on all of your income, including your overseas investment income, up to your departure from the UK – see paragraph 5.12.*

However the practice seems to have been quietly changed. HMRC6 provides:

> **10.14.2 When you stop being resident in the UK**
> When you leave the UK during a tax year and become non-resident here on the day after your departure, you will be liable to UK tax on your UK investment income for the whole of the year.
> If you meet the requirements of extra-statutory concession A11 you will not be liable to UK tax on your foreign investment income following the date of your departure. Up to the date of your departure from the UK you will be liable to UK tax on your foreign investment income, subject to whether you use the remittance basis in the tax year of your departure.
> **10.14.3 When you do not use the remittance basis**
> If you do not use the remittance basis in the year of departure you will, where you are entitled to apply extra-statutory concession A11, be liable to UK tax on your foreign investment income which arose before your departure from the UK.

### 6.6.2 *RFI: remittance basis*

IR20 (withdrawn from 2009/10) provided:

> *6.16 For overseas investment income where you are taxed on the* ***remittance basis*** *(see para 6.2), you will pay tax on the smaller of*
> *[a] the actual overseas investment income remitted to the UK in the period from 6 April to the date of your departure, and*
> *[b] the same fraction of the total overseas income you remit to the UK in the year of departure as the fraction of the full tax year for which you are resident in this country.*[7]

---

7 Similarly, the Inspectors Manual provided:
**1667. Persons ceasing to be resident in UK**
Where a person (other than an individual of the type referred to in IM45 [See 6.4.2 (Habitual visitors)]) takes up permanent residence abroad and ceases to be resident in this country, any liability under Case IV or V for the year in which residence here ceases should be based on—
(a) the proportion, appropriate to the period from 6 April to the date of departure,

However the practice seems to have been quietly changed. HMRC6 provides:

> **10.14.4 When you use the remittance basis**
> If you use the remittance basis in the year of departure you will, where you are entitled to apply extra-statutory concession A11, be liable to UK tax on your foreign investment income which you remitted to the UK before your departure.

## 6.7 Interest from FOTRA securities

IR20 (withdrawn from 2009/10) para 6.6 provided:

> *UK tax is not chargeable on interest arising on **UK Government 'FOTRA' securities**, if you are not ordinarily resident in the UK. 'FOTRA' stands for 'Free of Tax to Residents Abroad'. Where we treat you as becoming, or ceasing to be, ordinarily resident in the UK part way through the tax year, no tax will normally be charged on interest payable while you are not ordinarily resident—that is, before the date you arrive here or after the date you leave.*

HMRC6 contains no guidance on the point, but there is no reason to think that HMRC practice has changed.

## 6.8 Income within s.624 ITTOIA

The Manuals do not deal with this expressly, but ESC A11 is in general terms, so it must be assumed that the RFI rules set out above apply.

## 6.9 Income within s.720 and s.731 ITA

It is considered that one can split years by reference to the periods of

---

of the income arising or remitted, as the case may be, in the ... year of departure ...
or
(b) the actual amount of the income arising or remitted, as the case may be, in the period from 6 April to the date of departure,
whichever is the less.

ordinary residence.[8]

## 6.10 UK source investment income

ESC A11 provides:

> Where the concession applies and the tax year is split, FA 1995 s 128 [now s.811 ITA] (limit on income chargeable on non-residents—income tax) does not apply for the period for which an individual is treated as not resident.[9] That section only applies to complete years of non-residence.

In particular, although a non-resident is not chargeable on UK source dividends, pre-arrival UK dividends and post-departure UK dividends of a split year are taxed in full.

There is no good reason for this anomaly, but there it is.

## 6.11 Gains from life policies, etc.

ESC A11 does not apply to chargeable event gains.[10] There is some sense in this, because policies already qualify for non-resident period relief.[11]

## 6.12 Accrued income scheme

HMRC6 provides:

> **10.13.2 UK Government securities**
> ... If you hold securities with a nominal value of more than £5,000 during a tax year in which you are resident in the UK at any time, special tax provisions (the 'accrued income scheme') will apply when the securities are transferred. You will be charged UK Income Tax on the interest that has built up ('accrued') over the period you owned the securities following the last interest payment, even if you were not resident in the UK for part of that period.

---

8 See 3.2.3 (Ordinary residence during part of tax year).
9 For a full discussion of the relief, see 37.1 (Non-residents Income Tax relief).
10 See 30.4.5 (Individual non-resident in year of chargeable event).
11 See 30.4.6 (Non-resident period relief).

In principle this is of course right, but it is not (I think) addressing the position in the year or arrival or departure. It is suggested that ESC A11 applies.

## 6.13 Withholding tax on interest

If an individual becomes non-ordinarily resident during a tax year, they are entitled to receive interest from UK deposit-takers free of withholding tax for the non-ordinarily resident part of the year.[12] The relevant form must be completed. In this context, note that the TDSI Guidance Notes (February 2009) provide:

> **4.52 Emigration**
> Strictly, a declaration made in contemplation of, but before, leaving the UK is not acceptable. But Financial Institutions may accept such declarations provided they satisfy themselves, before paying interest without deduction of BRT, that the investor has left the UK. A note of any enquires made should be kept in the investor's records.

Similarly if a person ceases to have a usual place of abode outside the UK, non-resident's withholding tax ceases to apply at that time.[13]

## 6.14 UK resident individual becoming ordinarily resident during the year

So far we have considered the position of an individual who becomes or ceases to be UK resident. This section considers the position of an individual who is UK resident throughout a tax year but becomes ordinarily resident during the year. In practice HMRC will generally accept that ordinary resident status begins at the start of a tax year, so this issue should not arise.

### 6.14.1 *Remittance basis claims*

Section 809B ITA provides:

---

12 See 17.11 (Withholding tax on interest from deposit-takers).
13 See 17.6 (Non-resident's withholding tax).

> (1) This section applies to an individual for a tax year if the individual—
> (a) is UK resident in that year,
> (b) is not domiciled in the United Kingdom in that year or is not ordinarily UK resident in that year, and
> (c) makes a claim under this section for that year.

If the individual is not UK domiciled they may claim the remittance basis (ordinary residence is not relevant). If the individual is UK domiciled they may make a remittance basis claim only if they are "not ordinarily UK resident in that year". On the basis of *Mitchell*[14], it is considered that the individual who becomes ordinarily resident during the year does not meet this condition, so a s.809B claim cannot be made.

### 6.14.2 *Employment income*

Section 26(1) ITEPA provides:

> This section applies to general earnings for a tax year where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and the employee is not ordinarily UK resident in that year...

On the basis of *Mitchell*,[15] it is considered that the individual who becomes ordinarily resident during the year does not meet this condition, so a s.809B claim cannot be made.[16]

## 6.15 Income tax on trustees

If a trust changes residence the HMRC view is that the tax year is split into UK and non-UK resident periods for income tax purposes. HMRC Residency: Non-resident Trusts (published 1 April 2008) provides:

---

14 See 6.2.1 (Residing in the UK "in a tax year" and "for a tax year").

15 See 6.2.1 (Residing in the UK "in a tax year" and "for a tax year").

16 In *Genovese v HMRC* [2009] STC (SCD) 373 the Special Commissioner reached the same conclusion, at [51] to [54] (though without much discussion and without reference to the relevant cases; the taxpayer was not represented by counsel). Similarly in *Turberville v HMRC* [2010] UKFTT 69 at [8].

> **Change in residence status of body of trustees**
> A change in the residence status of a body of trustees is usually caused by a change in the trustees who make up the body. It can also happen where the trustees remain the same but one of them changes their residence status.
>
> For income tax purposes if the residence status of a body of trustees changes during the tax year then the trustees are potentially liable for income tax on all their worldwide income for the period they were actually resident. They are only liable for income tax on their UK source income for the period they were actually non-resident.[17]

This view was probably formulated before the introduction in 2006 of the rule that trustees are a single and distinct person for IT;[18] but HMRC do not argue that that rule has altered the position.

## 6.16 CGT statutory split year rule

Section 2(1) TCGA provides:

> ... a person shall be chargeable to capital gains tax in respect of chargeable gains accruing to him in a year of assessment
> [a] during any part of which he is resident in the UK, or
> [b] during which he is ordinarily resident in the UK.

This is better drafted than IT, as the CGT statutory split year rule is clearly expressed. CGT is charged on gains of a year *during any part of which* the individual is UK resident. A UK resident individual who ceases to be UK resident is strictly subject to CGT on gains accruing until the following 6 April; a non-resident who realises a gain is strictly subject to CGT if they become UK resident before the following 6 April.

As with income tax, the CGT statutory split year rule is subject to two exceptions of such breadth that the general principle rarely applies:

(1) Relief is available by concession: ESC D2.
(2) Double Tax Treaties split UK tax years into treaty-resident and treaty-non-resident periods.

---

17 See *www.hmrc.gov.uk/cnr/nr_trusts.htm*. The statement in ESC A11 [1] that years are not split refers to an individual: see 6.2 (Income tax: statutory split year rule)

18 See 4.3 (Trustees treated as single and distinct person).

### 6.16.1 *Section 13 TCGA*

Section 13 TCGA is an exception: the charge only applies if the individual is resident at the time the gain arises, so it is not necessary to rely on ESC D2.

## 6.17 **Concession D2**

ESC D2 provides:

1. [a] An individual who
   [i] comes to live in the UK and
   [ii] is treated as resident here for any year of assessment from the date of arrival
   is charged to capital gains tax only in respect of chargeable gains from disposals made after arrival,
   [b] provided that the individual has not been resident or ordinarily resident in the UK at any time during the five years of assessment immediately preceding the year of assessment in which he or she arrived in the UK.
2. [a] An individual who
   [i] leaves the UK and
   [ii] is treated on departure as not resident and not ordinarily resident here
   is not charged to capital gains tax on gains from disposals made after the date of departure,
   [b] provided that the individual was not resident and not ordinarily resident in the UK for the whole of at least four out of the seven years of assessment immediately preceding the year of assessment in which he or she left the UK.[19]

---

19 The concession continues:
"3. This concession does not apply to any individual in relation to gains on the disposal of assets which are situated in the UK and which, at any time between the individual's departure from the UK and the end of the year of assessment, are either:
(i) used in or for the purposes of a trade, profession or vocation carried on by that individual in the UK through a branch or agency; or
(ii) used or held for, or acquired for the use by or for the purposes of such a branch or agency."

This is consistent with the usual CGT rule for trades carried on through a branch or

### 6.17.1 *Year of arrival*

The conditions for year of arrival treatment are:
- the individual comes to live in the UK: D2 1[a][i]
- the individual is treated as resident here from the date of arrival: D2 1[a][ii]
- the individual has not been resident at any time during the 5 years of assessment before the year of arrival: D2 1[b]

Condition 1[a][i] is not in fact a separate condition, since anyone who meets condition 1[a][ii] must come to live in the UK.

Condition 1[a][ii] is puzzling. If the concession applies the individual is treated as resident here from the date of arrival, if it does not, they are not, so that can hardly be a condition of the concession. Perhaps its point is to withhold the concession for habitual visitors who become UK resident in the fifth year of visits.[20]

Condition 1[b] was introduced as a consequence of the temporary non-residence rules in 1998. But the condition is stricter than the temporary non-residence rules.

It is necessary to ascertain the date of arrival and departure: see 6.4.1 (What is the period of residence?).

### 6.17.2 *Year of departure*

The conditions for year of departure treatment are:
- the individual leaves the UK: D2 2[a][i]
- the individual is treated on departure as not resident: D2 2[a][ii]
- the individual was not UK resident for at least 4 out of 7 of the years of assessment before the year of departure: D2 2[b].

Once again, condition 2[a][i] is otiose, but it does not matter. Condition 2[b] was introduced as a consequence of the temporary non-residence rules in 1998. But the condition is stricter than the temporary non-residence rules. Where the taxpayer has been resident or ordinarily resident in 4 out of the 7 preceding years then gains from disposals made in the year of departure, after the date of departure, are chargeable to CGT

agency.

20 See 6.4.2 (Habitual visitors).

whether or not the taxpayer ever returns to the UK to become resident again.

There is an extended time limit for assessments for individuals leaving the UK if they return within five years.[21]

## 6.18 Computation of CGT

ESC D2 operates differently from A11. One does not compute the total gains of the year and time apportion. D2 states that one ignores disposals in the non-resident part of the year.

Under the remittance basis, gains are treated as accruing when remitted.[22] It is suggested that this does not change the date of disposal for the purposes of the remittance basis, or else a foreign domiciliary who remits gains pays more CGT than a UK domiciled individual.

### 6.18.1 *Losses*

The concession says nothing about allowable losses accruing in the non-resident part of the year. The possibilities are:

(1) losses of the period remain allowable although gains of the same period are not;
(2) losses of the period are allowable only so far as they exceed the gains of the same period;
(3) Losses of the period are not allowable at all.

Solution (1) is too good to be fair, but it is the most consistent with the words of the concession and it is tentatively considered that this is correct. Solution (3) is the most sensible, but cannot be applied, since it imposes more tax than would be the case without the concession. If the concession were made statutory (as is proposed in the residence consultation paper) this problem would not arise.

## 6.19 CGT on trusts – year of arrival and departure

ESC D2 provides:

21 See 8.11 (Time limit for assessment).
22 See 43.2.1 (Date of disposal under remittance basis).

4. This concession does not apply to
[a] the trustees of a settlement who commence or cease residence in the UK[23] or
[b] to a settlor of a settlement in relation to gains in respect of which the settlor is chargeable under [TCGA sections 77–79, or][24] TCGA section 86 and Sch 5.

The CGT concession does not apply to trustees or to a settlor who is chargeable on the gains of a non-resident settlement. This is an anomaly, but a necessary one, because if by concession the trustees or settlor were not charged to tax in a split year, the untaxed gains would not be s.2(2) amounts (trust gains), and so may escape tax altogether. Though if the concession was made statutory as it ought to be, this anomaly could easily be corrected.

Where UK trustees are considering retiring in favour of non-resident trustees, they should consider the alternative course of transferring trust assets to a separate non-resident trust. The chargeable gain on the transfer to a new trust is in principle the same as the exit charge on the appointment of non-resident trustees. However the new trust will not be within the scope of CGT for gains accruing after the transfer, whereas the migrating trust will remain within the scope of CGT for the rest of the tax year.

## 6.20 CGT planning – postponing disposals until non-resident

The obvious CGT planning for individuals is to postpone disposals until non-resident. The CG Manual discussion is mostly pedestrian and partly out of date; but the practitioner needs to read it to see how HMRC approach the issues:

23 The same point is made in SP 5/92 para 2:

> Under TCGA 1992 s 69, a body of trustees is regarded as capable of changing its residence status part-way through a year of assessment. It must be borne in mind, however, that TCGA 1992 s 2(1) provides that the trustees are liable to tax on all chargeable gains of a tax year during any part of which they are resident or during which they are ordinarily resident in the UK.

24 The reference to s.77-79 TCGA is not applicable from 2008/09 as these sections have been repealed.

**25800. Attempted avoidance on emigration**
When an individual plans to emigrate from the UK, he or she will often want to dispose of their assets located in the UK before departure. This is particularly true of privately run businesses carried on in the UK but it is often also true of other property located in the UK. For such assets it may be necessary, or at least convenient, for the individual to be in the UK to deal with negotiations for the sale. The individual may also need to have a definite sale arranged in order to ensure he or she has funds for use in the country to which he or she is emigrating.
**25801. Arrival in/departure from UK**
The emigrating individual will have an expectation that he or she will be treated as not resident and not ordinarily resident from the date of departure.
If the disposal occurs before the date of departure the individual will be liable to a charge to UK Capital Gains Tax in respect of the chargeable assets disposed of.
[omitted text accidentally repeats para 25802]
**25802.**
If the disposal occurs after the date of departure but before the following 6 April there will be no charge to CGT if ESC D2 is applied, see CG25760. And if the disposal occurs after 5 April following departure the gain will be exempt because when it occurs it is outside the scope of TCGA 1992, S 2.
Thus if the sale is genuinely postponed until after the date of departure there will be no charge to UK Capital Gains Tax.
**25803.**
Finance Act 1998 introduced a new TCGA 1992, S 10A, see CG26100+, which charges Capital Gains Tax on certain gains accruing to former UK residents during a period of temporary non-residence abroad, defined as a period of less than five full tax years. ESC D2 was revised, see CG25762, to bring its terms broadly into line with the provisions of Section 10A.
Consequently, for departures on or after 17 March 1998, gains on disposals after the date of departure, which previously might not have been charged to Capital Gains Tax, may now be chargeable under TCGA, 1992, S 2 TCGA 1992, S 10A. However, there will still be cases where such gains will not be chargeable to Capital Gains Tax, for example where the individual remains non-resident for more than five tax years, and the following guidance will still be relevant in those cases.
**25804.**
In a small number of cases the transactions described in CG25800 may be carried out in such a way that will

- enable the individual to have certainty or near certainty by the date of emigration that the sale will occur but
- make it appear that the disposal takes place after that date.

In suitable cases you should consider whether there is liability to Capital Gains Tax using the following guidance.

The CG Manual then sets out three ways to attack this planning:

**25805. Establishing the correct time when a gain arises** [May 2010]

...

There are three circumstances in which Capital Gains Tax liability may arise notwithstanding that the date of disposal appears to be after the date of emigration. These are where it can be shown that

- there was a binding agreement or contract for sale on or before the date of emigration or
- a business was carried on in the UK through a branch or agency in the period from the date of emigration to the date of disposal or
- an attempt has been made to use ESCD2 for tax avoidance.

Detailed guidance on each of these is contained in the following paragraphs.

**25820. Establishing basic facts** [May 2010]

When an individual claims that a disposal is exempt because it is made at a time when he is not resident and not ordinarily resident you should firstly establish the facts concerning two basic points

- what is the date of disposal in a written contract and
- what is the individual's residence status on that date?

In the case of a disposal under an unconditional contract the date of disposal is the date the contract is entered into not the date of completion (TCGA 1992, s.28(1)). However, it is not unknown for individuals and/or their agents to quote the date of completion as the disposal date.

Oh dear.

It can therefore be worth checking that the date quoted is not in fact the completion date. Once you are satisfied on this point the next step is to establish whether, and if so, on what date the individual became not resident and not ordinarily resident.

**25831. Establishing the basic facts** [June 2003]

You should obtain a residence ruling from Centre for Non-Residents, CNR1 before proceeding further with the case. You should follow the procedure laid down in IM32 in doing this.

### 6.20.1 *Binding agreement before departure?*

The CG Manual turns to the first of the three lines of attack:

**25850. Delayed written contracts** [May 2010]

The most common situation is for the individual to negotiate the terms for a disposal but to delay signing the written contract until after the date of departure from the UK. One indicator that this may have happened will be if there is a very short interval between the date of departure and the date the contract is signed. Cases have been seen where the vendor leaves the UK with a copy of the contract in his possession and posts it from the foreign airport on arrival there. Alternatively, he gives his solicitor a power of attorney under which the solicitor can sign and exchange the contracts on behalf of the vendor once he is outside the UK. There are many other variations.

The author's indignation is misplaced and somewhat naive.

In most straightforward cases, where there is no question of a continuing business or where arrangements have not been entered into to use ESC/D2 to avoid tax, it will not be possible to show there is liability to Capital Gains Tax.
An agreement, oral or written, which remains 'subject to contract' is not a binding contract.
Where a formal written contract is entered into after emigration, there is a presumption that the parties intend to leave the transfer unagreed until that time even if it is not specifically 'subject to contract'.
It may be possible to displace that presumption if evidence can be obtained either that the benefit of ESCD2 is being sought as a means of avoidance, see CG25980+, or that the disposal was not in fact conditional or 'subject to contract' at the time of emigration, see CG25805.
**25853 Binding contract pre-dating emigration** [May 2010]
Legislation enacted with effect from 27 September 1989 requires all disposals of interests in land in England and Wales to be evidenced in writing if there is to be a valid contract, see CG70280 and CG14263. (This has always been the requirement for land in Scotland.) For disposals after that date an oral contract will not be a valid contract. This means that in cases where the written contract is delayed until after 5 April following departure from the UK you will not be able to establish the existence of a binding agreement preceding the date of sale (see CG25860).
In such circumstances it is still possible for there to be a gain chargeable to tax if any of the following apply:

- Section 10 TCGA 1992 (non-resident with United Kingdom branch or agency, see CG25500+)
- Section 10A TCGA 1992 (temporary non-residents, see CG26100+)
- Section 25 TCGA 1992 (non-residents: deemed disposals, see CG25570+)

You should note that the above applies only when the land is situated in England or Wales or Scotland. It does not apply if the land is situated in Northern Ireland or any other country where the legislation does not require the contract to be in writing in order for it to be valid.
**25854–25859**
**25860 Binding contract pre-dating emigration** [May 2010]
A disposal occurs at the earliest time at which there is a binding contract between the parties. Except where there is a statutory requirement for a contract to be in writing if it is to be valid (see CG25853 above), it does not matter whether the contract is oral or written. Thompson v Salah 47 TC 559 established that a binding oral contract can be just as effective as a written contract in giving rise to a disposal for Capital Gains Tax purposes.
Establishing the existence of a binding contract or agreement, oral or written, in advance of the formal contract presents considerable difficulty, see CG25850 above, and requires the facts of the case to be established in detail. Usually this will involve reviewing the correspondence, notes of meetings, telephone

conversations, etc which have taken place between the vendor and purchaser (or more usually their professional representatives) prior to the date of signing the formal documents, to see whether there is evidence of a binding oral agreement or whether the correspondence itself constitutes a binding written agreement. It will not usually be worthwhile to undertake such a detailed review unless there are strong prima facie indications of a pre-emigration binding agreement.
If a binding agreement prior to the date of formal documentation can be established, the date of the earlier agreement is the date of disposal for Capital Gains Tax purposes.

### 6.20.2 *Branch/agency*

This is the second line of HMRC attack, though the circumstances in which it arises will be rare:

**25900. Business through branch/agency**
If an individual is carrying on a trade or profession (and possibly even if he or she is carrying on a vocation) in the UK prior to his or her emigration, that individual may find it necessary to sell the business as a going concern if the best price is to be realised. If the written contract for sale of the business assets is to be delayed until after departure, the individual will need to make arrangements for the business to continue operating in his or her absence. In most such cases we will be able to argue that in the period between departure and the date the contract is signed the activity has been carried on in the UK through a branch or agency.
In those circumstances
· if the disposal occurs after the date of emigration but before the following 6 April the disposal will be within Section 2 TCGA 1992 and ESC D2 will not apply (see CG25770)
· if the disposal takes place after 5 April following the date of emigration TCGA 1992, S 10 will apply (see CG25520+).
In either case the individual will be within the charge to Capital Gains Tax...

### 6.20.3 *Withdrawal of concession*

This is the third line of HMRC attack:

**25980. Withholding benefit of ESC D2** [May 2010]
A warning is published as part of the introduction to HMRC's guide to extra statutory concessions. This reads as follows.
'The Concessions described within are of general application, but it must be borne in mind that in a particular case there may be special circumstances which will require to be taken into account in considering the application of the concession. A concession will not be given in any case where an attempt is made to use it for tax avoidance.'

> This is sometimes referred to as the 'health warning'.
>
> **25981. Withholding benefit of ESC D2** [May 2010]
>
> If you are dealing with a disposal after the date of departure from the UK but before the following 6 April, exemption from Capital Gains Tax arises only by reason of ESC D2. The 'health warning' is therefore of relevance to all such cases. Where it can be established that the taxpayer has entered into arrangements in an attempt to use the terms of ESC D2 to avoid liability to Capital Gains Tax which would otherwise arise the Commissioners for HMRC will consider withholding the benefit of ESC D2 under the terms of the 'health warning'.
>
> The case of *R v HMIT ex p. Fulford-Dobson* (60 TC 168) is an example of a case where the benefit of the concession was withheld because of attempts to use it for avoidance purposes.
>
> In straightforward cases where the contract of sale is delayed until after the date of emigration, see CG25850, the Commissioners for HMRC have decided that they will not withhold the concession merely on the grounds that the disposal was arranged to take place after the date of departure from the UK. On its own, a genuine postponement of the disposal is not regarded as an attempt to use the concession for tax avoidance, but where coupled with other arrangements it might be so regarded.

Note that here, as throughout the passage, "genuine" is used as the opposite of "tax avoidance."[25] The CG Manual continues:

> Where the facts support the withholding of the concession and there is also an argument about the existence of a pre-emigration agreement which could be arbitrated by a hearing before Tribunal (see CG25880 above), the Commissioners for HMRC will normally wish to withhold the benefit of the concession as its primary action.
>
> **25984. Withholding benefit of ESC D2: Enquiries** [May 2010]
>
> In all cases where you think the Board may wish to consider withholding the benefit of ESC/D2 you should obtain the full facts. Usually this will involve reviewing the primary documents including correspondence, notes of meetings, telephone conversations, etc which have taken place between the vendor and purchaser (or more usually their professional representatives) prior to the date of signing the formal documents.
>
> If you are asked to explain the reasons for your enquiries you may point out to the taxpayer the existence of the 'health warning' and you may say that it is necessary to establish the facts to enable a decision to be made about whether or not the case falls into that category.
>
> However, if you conclude that your case is one where the benefit of ESC/D2 should be withheld you MUST submit your papers to CAR (Capital Gains Technical Group) in Solihull before any mention of this is made to the taxpayer.

25 See 29.17.3 ("Genuine").

**26010. Other devices** [May 2010]
Individuals may make use of a number of devices to cause at least part of the gain to appear to arise after the date of departure. Some of the possibilities are listed in CG26020 – CG26061 below. It may be possible to counter some of the devices by withholding the benefit of ESC/D2. CAR (Capital Gains Technical Group) in Solihull will be pleased to advise on any of these types of case but they must be submitted before any suggestion is made that the concession might be withheld.

**26020. Splitting a single contract** [May 2010]
In this type of case, what would normally have been included in a single contract for sale is split into two contracts. For example, a farmer owning a farmhouse and associated farmland emigrates; he claims to have sold the farmhouse prior to departure (possibly to give immediate access to capital) and the farmland after the date of departure, and points to the fact that two separate contracts have been entered into. Relief under TCGA 1992, S 222 is claimed on the disposal of the farmhouse. In such cases, it may be possible to sustain an argument that, in reality, there is only a single disposal for capital gains purposes, the date of disposal of the farmland and the farmhouse being the same: that is to say, the earlier of the two dates.

**26030. Conditional contracts** [May 2010]
Cases have been seen where it is claimed that the date of disposal for capital gains purposes does not occur until the satisfaction of a condition written into the terms of the agreement for sale. To decide whether a condition is such as to make a contract conditional within the terms of TCGA 1992, S 28 (2) can be difficult. You will need to consider the full facts of the case in the context of contract law. There is guidance on dates of disposal and conditional contracts at CG14250+ and CG14270+.

**26040. Options and cross-options** [May 2010]
Sometimes the owner, before emigrating, grants an option to a potential purchaser to buy the asset, that option to be exercised during a specified period following the owner's emigration. If there is genuine uncertainty in the vendor's mind at the time of emigration as to whether the grantee will exercise the option, there are no grounds for withholding the benefit of the concession. As with pure delay cases, however, there may be evidence to show that the option was a sham and that the vendor is assured of his sale before he leaves the UK.

These are cases where the vendor and purchaser each grant an option to the other party to sell/buy the asset which is the subject of the agreements. Invariably in these cross-options cases, the options are granted before the vendor leaves the UK, but one of the options is exercised (usually by the purchaser) after the vendor's date of departure. The Board will consider withholding the benefit of ESC D2 if there appears to be no commercial reason for the issue of the cross-options.

**26060. Transfer to émigré spouse or civil partner under no gain/no loss rule** [May 2010]
In this type of case, a husband or wife or a civil partner owns a valuable asset which he or she wishes to sell. The spouse or civil partner of the owner of the

asset is leaving the UK – probably for a limited period such as a fixed term employment abroad. The owner transfers the asset to the departing spouse or civil partner prior to departure and claims the protection of Section 58 TCGA 1992. The asset is subsequently sold by the transferee after the date of departure. This tactic was adopted – unsuccessfully – in the case of *R v HMIT ex p. Fulford-Dobson* (60 TC 168).

Cases of this type need to be distinguished from those where the transfer to the non-resident spouse or civil partner is made after that spouse or civil partner has become non-resident and in a year throughout the whole of which that spouse or civil partner is non-resident. In such cases the benefit of Section 58 can effectively be obtained as a result of the decision in *Gubay v Kington* (57 TC 601), see CG22300+.

## 6.21 CGT planning before arrival in the UK

The Manual discusses planning by emigration but gives no guidance to the converse situation where:

(1) a taxpayer arrives in the UK during a tax year;

(2) a disposal takes place before arrival (but in the same tax year so that ESC D2 is in point).

In order to take advantage of the concession, a taxpayer might arrange disposals just before arriving in the UK. They might do this in various ways:

(1) sell assets;

(2) enter into an unconditional contract with delayed completion;

(3) transfer assets to a trust or company, in which the taxpayer is interested.

Arrangement (1) above should not lose the concession (cf CG Manual 25982 cited above). But (2) possibly, and (3) clearly, take us into what HMRC would regard as “devices” (ie, avoidance) and should not be adopted unless there is a good non-tax reason.

A taxpayer might realise losses (which are in principle allowable) at the same time as realising gains which (under the concession) are not taxable. In these circumstances, HMRC might justifiably feel that the taxpayer is getting the best of both worlds and seek to withdraw the concession if they can identify any element of tax planning in the timing of disposals.

It is best, wherever possible, not to rely on the concession at all except in the simplest cases.

### 6.21.1 *Appeal against withdrawal of concession*

There is no appeal to the tax tribunal against a decision by HMRC to withdraw a concession. The CG Manual provides

> **25880. Dispute over binding agreement** [May 2010]
> Where the written contract is made after 5 April following the date of departure an assessment to Capital Gains Tax made for the year of departure will only be supportable if there was a binding oral or written agreement in the year of departure. A dispute on this point can therefore be adjudicated by the First Tier Tribunal. If they find as a fact that there was such an agreement in the year of departure they can determine the appeal against the assessment for the year of departure in the appropriate figures. However, if they find there was no agreement they will discharge the assessment.
> Where the written contract is made after the date of departure but before the following 6 April an assessment to Capital Gains Tax made for the year of departure will be supportable in law whether or not there was a binding agreement predating departure. This is because TCGA 1992, S 2 imposes liability whenever an individual is resident or ordinarily resident for any part of a year of assessment (see CG25200 above). If the disposal occurred in the period after the date of departure but before the following 6 April relief from assessment will only be possible if the individual receives the benefit of ESC D2. Since the First-tier Tribunal cannot concern themselves with the operation of Extra Statutory Concessions the Tribunal would be unable to discharge an assessment made on gains arising in this period.
> **25882. Dispute over binding agreement** [May 2010]
> If the pre-emigration agreement and the written contract are said to have been made in the same tax year then the gain computed at the time of either will be the same as the other. This means that a dispute about the existence of the pre-emigration agreement cannot be resolved by the First-Tier Tribunal, because the amount of any assessment depends only on whether ESCD2 applies and the Tribunal cannot consider the effects of an Extra Statutory Concession: they would be bound to determine the assessment at the figure of the gain. In such cases, where the taxpayer does not accept that a pre-emigration agreement existed, CAR (Capital Gains Technical Group) in Solihull will advise on what further action may be taken.
> **25883. Dispute over binding agreement** [April 2009]
> Reference of the question of whether a pre-emigration agreement existed to the First-tier Tribunal in circumstances where the Commissioners for HMRC would, in any event, withhold the benefit of ESC D2 could give rise to criticism of HMRC. This is because such action would substantially remove the benefit of any Tribunal decision made in the individual's favour. You should therefore consider early the possibility of withholding the benefit of ESC D2 in accordance with CG25980 below. When dealing with such cases you should attempt to

> obtain all facts relevant to a decision on ESC D2 when obtaining facts about the possible existence of a pre-emigration agreement and then submit to Capital Gains Technical Group in appropriate cases.
>
> **25884. Dispute over binding agreement** [April 2009]
>
> If the pre-emigration agreement and the written contract are alleged to have occurred in the same month (which will frequently occur when there is a very short interval between emigration and contract date) or in different months but the retail prices index for those months is the same, the amount of the assessment would be the same whether or not there was a pre-emigration agreement. As the Tribunal cannot consider the effects of an Extra Statutory Concession they would be bound to determine the assessment at this figure. In these circumstances the dispute about the existence of the pre-emigration agreement could not be resolved by referring the matter to the Tribunal. In such cases, where the taxpayer does not accept that a pre-emigration agreement existed, Capital Gains Technical Group will be pleased to advise on what further action may be taken.

It is possible to challenge HMRC by way of judicial review (or by application to HMRC adjudicator). It is an interesting question whether the taxpayer must show:

(1) the HMRC decision that there is tax avoidance is one which no reasonable person could reach, or merely
(2) the HMRC view is (in the Court's judgment) wrong (even if not unreasonable).

In practice few, if any, cases would turn on that fine distinction and either contention would be difficult to sustain.

## 6.22 CGT planning before arrival in the UK

There are many possible strategies. A minimum course would be for the individual to dispose of UK situate assets with inherent gains so as to bring their base cost up to market value. This need only apply to UK situate assets which might be disposed of while the individual is resident here. The individual might go further and dispose of non-UK situate assets if they wish to have the ability to sell the asset and remit the gain.

Watch the pre-owned asset rules: see 66.1 (Pre-owned assets).

These steps would ideally be taken in the tax year before arrival, but simple disposals might if necessary take place in the tax year of arrival, before the date of arrival, if reliance can be placed on ESC D2.

HMRC (rightly) take the point that the "bed and breakfasting" rules apply to a non-resident so they should not dispose of securities and re-acquire securities of the same class within 30 days: s.106A TCGA; RI 226.

Of course foreign tax on the disposal would need to be considered. It is sometimes possible to arrange a disposal which under UK rules takes place while non-resident but under foreign rules takes place while UK resident.

It may be appropriate to make capital payments from UK trusts before becoming UK resident.

## 6.23 Reforms proposed for 2012/13

The Residence Consultation Paper provides:

> 3.41 Under the current rules an individual is either resident or not resident in the UK for the whole of a tax year. However, by ESC A11, the tax year can be split into periods of residence and non-residence in certain circumstances when an individual comes to, or leaves, the UK part way through a tax year. This prevents some individuals being taxed as if they were resident for the parts of the year before they came to the UK or after they left.
>
> 3.42 Split year treatment can apply where an individual:
>
> • comes to the UK to take up permanent residence; or
>
> • leaves the UK to take up permanent residence abroad; or
>
> • loses UK residence when leaving to work full-time outside the UK.
>
> 3.43 As part of introducing an SRT [Statutory Residence Test], the intention is broadly to recreate the circumstances in which split year treatment currently applies and to put it on a statutory footing. This will mean that ESCs A11, D2 and A78 (which applies where an individual is accompanied, or later joined, by his or her spouse who is not in full-time employment abroad) will be withdrawn and replaced by legislative rules.
>
> 3.44 It is not possible to recreate the conditions of the current extra statutory concessions exactly because they rely on the subjective and imprecise concept of becoming 'permanently' resident in the UK or elsewhere. Therefore, in keeping with the intention of introducing clear and objective rules, the statutory provisions on split years will be linked to the conditions contained in the SRT. This means the new rules will treat a tax year as being split into periods of residence and non-residence if a person:

> • becomes resident in the UK by virtue of their only home being in the UK;
> • becomes resident by starting full-time employment in the UK;
> • establishes their only home in a country outside the UK and becomes tax resident in that country and does not come back to the UK in that tax year;
> • loses UK residence by virtue of working full-time abroad; or
> • returns to the UK following a period of working full-time abroad.
>
> 3.45 A tax year will not be treated as split where an individual's residence status changes due to changes in the number of connection factors under Part C, such as the arrival or departure of their family.
>
> 3.46 If a person becomes not resident by virtue of leaving the UK to work full-time abroad and is accompanied by their spouse or civil partner, split year treatment would also apply to the spouse or civil partner provided their sole or main home is outside the UK.[26]

## 6.24 Year of acquisition of UK domicile

Tax Bulletin 29 provides:

> In line with current practice, but depending on the circumstances of any particular case, we may only change the basis of assessment from 6 April following the date of change in domicile. Where it is difficult to pinpoint a precise date of change in domicile (and again depending on the circumstances of any particular case), the changes to the basis of assessment may take effect from the 6 April following the date our enquiries are concluded.

This coyly suggests a practice where a UK resident individual concedes the acquisition of a UK domicile of choice, in return for which HMRC will regard the domicile as commencing the following 6 April (and so avoiding all problems of a split domicile year). The strict rule is probably that the remittance basis is not available to a person who acquires a UK domicile in the year: see 43.2 (CGT remittance basis).

---

26 HM Treasury, *Statutory Definition of Tax Residence: a Consultation* (June 2011) *www.hm-treasury.gov.uk/d/consult_condoc_statutory_residence.pdf.*

CHAPTER SEVEN

# EXIT TAXES

## 7.1 Exit taxes – Introduction

This chapter considers exit taxes, that is, taxes imposed on emigration from the UK by individuals or trustees. They are as follows:

(1) Clawbacks of holdover and EIS relief on emigration of individual.
(2) Charges on emigration of a trust.
(3) Charges on emigration of persons carrying on a trade.

I hope in a future edition to discuss restrictions on CGT share exchange relief which are akin to an exit charge; see *Coll v HMRC* [2010] STC 1849. Exit taxes on companies are not considered.

I use the term **"emigration"** to refer to a person becoming domestic law non-UK resident, and **"treaty-emigration"** to refer to a person becoming treaty-resident in another state (ie resident for the purposes of a DTA.)

## 7.2 Clawback of hold-over relief on emigration of individual

Section 168(1) TCGA 1992 provides a clawback of hold-over relief on emigration of individuals.

> If—
> (a) relief is given under section 165 in respect of a disposal to an individual or under section 260 in respect of a disposal to an individual ("the relevant disposal"); and
> (b) at a time when he has not disposed of the asset in question, the transferee becomes neither resident nor ordinarily resident in the UK,
>
> then, subject to the following provisions of this section, a chargeable gain shall be deemed to have accrued to the transferee immediately before that time, and its amount shall be equal to the held-over gain (within the meaning of section 165 or 260) on the relevant disposal.

There is no charge if the individual becomes treaty non-resident but remains UK resident. This gives some scope for tax planning. But given the EU issues discussed below, and the CGT temporary non-residence rules, this may not matter much.

### 7.2.1 *Disposal prior to emigration*

The clawback charge does not apply if the individual disposes of the asset before emigration. Section 168(2) TCGA deals with part disposals:

> For the purposes of subsection (1) above the transferee shall be taken to have disposed of an asset before the time there referred to only if he has made a disposal or disposals in connection with which the whole of the held-over gain on the relevant disposal was represented by reductions made in accordance with section 165(4)(b) or 260(3)(b) and where he has made a disposal in connection with which part of that gain was so represented, the amount of the chargeable gain deemed by virtue of this section to accrue to him shall be correspondingly reduced.

Section 168(3) TCGA provides that inter-spouse disposals are disregarded:

> The disposals by the transferee that are to be taken into account under subsection (2) above shall not include any disposal to which section 58 applies; but where any such disposal is made by the transferee, disposals by his spouse or civil partner shall be taken into account under subsection (2) above as if they had been made by him.

This is obviously right.

### 7.2.2 *Time limit*

Section 168(4) TCGA contains a time limit:

> Subsection (1) above shall not apply by reason of a person becoming neither resident nor ordinarily resident more than 6 years after the end of the year of assessment in which the relevant disposal was made.

### 7.2.3 *Relief for short term postings abroad*

Section 168(5) TCGA contains a relief for short term postings abroad:

> Subsection (1) above shall not apply in relation to a disposal made to an individual if—
> (a) the reason for his becoming neither resident nor ordinarily resident in the UK is that he works in an employment or office all the duties of which are performed outside the UK, and
> (b) he again becomes resident or ordinarily resident in the UK within the period of 3 years from the time when he ceases to be so, without having meanwhile disposed of the asset in question;
> and accordingly no assessment shall be made by virtue of subsection (1) above before the end of that period in any case where the condition in para (a) above is, and the condition in para (b) above may be, satisfied.

Section 168(6) TCGA deals with part disposals and inter-spouse disposals by the short term non-resident. The wording is based on s.168(2)(3) but its effect is different:

> For the purposes of subsection (5) above a person shall be taken to have disposed of an asset if he has made a disposal in connection with which the whole or part of the held-over gain on the relevant disposal would, had he been resident in the UK, have been represented by a reduction made in accordance with section 165(4)(b) or 260(3)(b) ...

This is a strict rule, since even a part disposal loses the benefit of the relief for the entire asset. The subsection continues:

> and subsection (3) above shall have effect for the purposes of this subsection as it has effect for the purposes of subsection (2) above.

Thus there is no exit charge on an asset if T goes non-resident, and gives the asset to the spouse, provided that T becomes UK resident again within 3 years and the spouse does not dispose of the asset during that period. It is irrelevant whether the spouse becomes UK resident.

### 7.2.4 *Collection of clawback charge from donor*

The tax may be collected from the donor or transferor. This is not usually so important to individual donors (because they will generally be prepared to take a view about the future actions of their donees). It is important for trustees who transfer assets to beneficiaries and wish to claim hold-over relief to avoid a charge under s.71 TCGA 1992. Section 168(7) TCGA provides:

> Where an amount of tax assessed on a transferee by virtue of subsection (1) above is not paid within the period of 12 months beginning with the date when the tax becomes payable then, subject to subsection (8) below, the transferor may be assessed and charged (in the name of the transferee) to all or any part of that tax.

Section 168(8) sets out a time limit:

> No assessment shall be made under subsection (7) above more than 6 years after the end of the year of assessment in which the relevant disposal was made.

Thus a donor who makes a claim for hold-over relief is at risk of a clawback if the donee emigrates within (approximately) 4 years of the gift. Suppose:
(1) In 2001/02 D makes a gift to T, and T emigrates in 2005/06.
(2) The exit charge is payable on 31 January 2007.
D cannot be assessed until 12 months later, 31 January 2008. That is just within "6 years after the end of the year of assessment in which the relevant disposal was made". But if D had made the gift in 2000/01 it would have been too late for HMRC to collect the tax from D.

Section 168(9) TCGA provides an indemnity (for what it may be worth):

> Where the transferor pays an amount of tax in pursuance of subsection (7) above, he shall be entitled to recover a corresponding sum from the transferee.

### 7.2.5 *Prevention of double charge*

Section 168(10) TCGA provides:

> Gains on disposals made after a chargeable gain has under this section been deemed to accrue by reference to a held-over gain shall be computed without any reduction under section 165(4)(b) or 260(3)(b)

in respect of that held-over gain.

This prevents double UK taxation (if the individual later makes a disposal within the charge to CGT, eg if they return to the UK). It does not prevent double taxation if the individual pays foreign tax on the same gain. The EU have noted the issue and recommend member states to act, but the UK has not done anything yet.

## 7.3 Clawback of EIS relief

There is a similar clawback of EIS relief if (in short) an individual becomes non-resident (and non-ordinarily resident) within three years of acquiring EIS shares: para 3 Sch 5B TCGA 1992.

## 7.4 Charge on emigration of trust

Section 80 TCGA provides an exit charge for trusts:

> (1) This section applies if the trustees of a settlement become at any time ("the relevant time") neither resident nor ordinarily resident in the UK.
> (2) The trustees shall be deemed for all purposes of this Act—
> (a) to have disposed of the defined assets immediately before the relevant time, and
> (b) immediately to have reacquired them,
> at their market value at that time.

Unlike the rule for individuals, this applies to all gains, not just held-over gains.

### 7.4.1 *Defined assets*

"Defined assets" is a label which brings in a number of rules which limit the scope of the charge. Section 80(3) TCGA provides:

> Subject to subsections (4) and (5) below, the defined assets are all assets constituting settled property of the settlement immediately before the relevant time.

### 7.4.2 *Assets of UK trade*

Section 80(4) TCGA brings in an exception for UK trades:

> If immediately after the relevant time—
> (a) the trustees carry on a trade in the UK through a branch or agency, and
> (b) any assets are situated in the UK and either used in or for the purposes of the trade or used or held for the purposes of the branch or agency,
> the assets falling within para (b) above shall not be defined assets.

No charge is needed as such assets remain within the charge to CGT.

### 7.4.3 *DTA exemption*

Section 80(5) TCGA brings in an exception for assets protected by DTAs:

> Assets shall not be defined assets if—
> (a) they are of a description specified in any double taxation relief arrangements, and
> (b) were the trustees to dispose of them immediately before the relevant time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

No charge is needed as such assets never were within the charge to CGT.

### 7.4.4 *Restriction of roll-over relief*

Section 80 TCGA provides:

> (6) Section 152 shall not apply where the trustees—
> (a) have disposed of the old assets, or their interest in them, before the relevant time, and
> (b) acquire the new assets, or their interest in them, after that time, unless the new assets are excepted from this subsection by subsection (7) below.
> (7) If at the time when the new assets are acquired—
> (a) the trustees carry on a trade in the UK through a branch or agency, and

(b) any new assets are situated in the UK and either used in or for the purposes of the trade or used or held for the purposes of the branch or agency,

the assets falling within para (b) above shall be excepted from subsection (6) above.

(8) In this section "the old assets" and "the new assets" have the same meanings as in section 152.

The CG Manual explains:

**38357. Roll-over relief**

Section 80(6) prevents roll-over relief under TCGA 1992, s.152 from applying so as to avoid the new exit charge where trustees dispose of assets before, then acquire new assets after becoming non-resident where the new assets are outside the UK tax charge.

### 7.4.5 *Accidental emigration on death of trustee*

Section 81 TCGA 1992 provides:

**81 Death of trustee: special rules**

(1) Subsection (2) below applies where—

(a) section 80 applies as a result of the death of a trustee of the settlement, and

(b) within the period of 6 months beginning with the death, the trustees of the settlement become resident and ordinarily resident in the UK.

This could apply if for instance a trust has a UK and a foreign trustee, and the UK trustee dies.

(2) That section shall apply as if the defined assets were restricted to such assets (if any) as—

(a) would be defined assets apart from this section, and

(b) fall within subsection (3) or (4) below.

That is, there is no charge apart from the exceptional cases of (3) and (4). Section 81(3) TCGA provides:

Assets fall within this subsection if they were disposed of by the trustees in the period which—

(a) begins with the death, and

(b) ends when the trustees become resident and ordinarily resident in the UK.

Since the trust will be UK resident in the year and subject to CGT on its gains, it is difficult to see the point of this. Section 81(4) TCGA provides:

> Assets fall within this subsection if—
> (a) they are of a description specified in any double taxation relief arrangements,
> (b) they constitute settled property of the settlement at the time immediately after the trustees become resident and ordinarily resident in the UK, and
> (c) were the trustees to dispose of them at that time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.

### 7.4.6 *Accidental immigration on death of trustee*

Section 81 goes on to give a relief where there has been an accidental immigration to the UK followed by emigration:

> (5) Subsection (6) below applies where—
> (a) at any time the trustees of a settlement become resident and ordinarily resident in the UK as a result of the death of a trustee of the settlement, and
> (b) section 80 applies as regards the trustees of the settlement in circumstances where the relevant time (within the meaning of that section) falls within the period of 6 months beginning with the death.
> (6) That section shall apply as if the defined assets were restricted to such assets (if any) as—
> (a) would be defined assets apart from this section, and
> (b) fall within subsection (7) below.

There is only one exceptional case:

> (7) Assets fall within this subsection if—
> (a) the trustees acquired them in the period beginning with the death and ending with the relevant time, and
> (b) they acquired them as a result of a disposal in respect of which relief is given under section 165 or in relation to which section 260(3)

applies.

This is only a limited relief, since it does not avoid the CGT charge on actual disposals of assets by the trustees in a year when accidentally UK resident.

## 7.5 Liability of trustees for exit charge

There are special rules. The usual rule for liability of trustees for CGT is in s.65(1) TCGA 1992:

> Subject to subsection (3) below, capital gains tax chargeable in respect of chargeable gains accruing to the trustees of a settlement or capital gains tax due from the personal representatives of a deceased person may be assessed and charged on and in the name of any one or more of the relevant trustees ....[1]

Section 65(3) has an exemption for trustees who retired before an emigration without knowing of a proposed emigration:

> Where section 80 applies as regards the trustees of a settlement ("the migrating trustees"), nothing in subsection (1) above shall enable any person—
> (a) who ceased to be a trustee of the settlement before the end of the relevant period,[2] and
> (b) who shows that, when he ceased to be a trustee of the settlement, there was no proposal that the trustees might become neither resident nor ordinarily resident in the UK,
> to be assessed and charged to any capital gains tax which is payable by the migrating trustees by virtue of section 80(2).

Section 82 TCGA provides:

> (1) This section applies where—

1 Defined in s.65(4): "In this section ...
"the relevant trustees", in relation to any chargeable gains, means the trustees in the year of assessment in which the chargeable gains accrue and any subsequent trustees of the settlement..."

2 Defined by reference in s.65(4): In this section—
"the relevant period" has the same meaning as in section 82;..."

(a) section 80 applies as regards the trustees of a settlement ("the migrating trustees"), and
(b) any capital gains tax which is payable by the migrating trustees by virtue of section 80(2) is not paid within 6 months from the time when it became payable.

(2) The Board may, at any time before the end of the period of 3 years beginning with the time when the amount of the tax is finally determined, serve on any person to whom subsection (3) below applies a notice—
(a) stating particulars of the tax payable, the amount remaining unpaid and the date when it became payable;
(b) stating particulars of any interest payable on the tax, any amount remaining unpaid and the date when it became payable;
(c) requiring that person to pay the amount of the unpaid tax, or the aggregate amount of the unpaid tax and the unpaid interest, within 30 days of the service of the notice.

(3) This subsection applies to any person who, at any time within the relevant period,[3] was a trustee of the settlement, except that it does not apply to any such person if—
(a) he ceased to be a trustee of the settlement before the end of the relevant period, and
(b) he shows that, when he ceased to be a trustee of the settlement, there was no proposal that the trustees might become neither resident nor ordinarily resident in the UK.

(4) Any amount which a person is required to pay by a notice under this section may be recovered from him as if it were tax due and duly demanded of him; and he may recover any such amount paid by him from the migrating trustees.

(5) A payment in pursuance of a notice under this section shall not be allowed as a deduction in computing any income, profits or losses for any tax purposes.

## 7.5.1 *The relevant period*

This term is defined in s.82(6):

For the purposes of this section—
(a) [this is a spent transitional rule for an emigration in 1991-2];
(b) in any other case, the relevant period is the period of 12 months

3 Defined in s.82(6) as (in effect) one year.

ending with the relevant time.

### 7.5.2 *Commentary*

In short, a trustee at the time of the emigration is liable, and a trustee who retired up to a year before is liable if aware of the proposal to migrate the trust. This may help HMRC (because they can go back to trustees in an earlier year) and it may help the trustees (if they can say that they were not aware of a migration). But it is not likely to make any difference either way. There is no good reason for special rules and s.82 and s.65(3) TCGA should be repealed, resulting in a small but worthwhile tax simplification.

## 7.6 Charge on treaty-emigration of trust

Section 83 TCGA 1992 provides:

> (1) This section applies if the trustees of a settlement, while continuing to be resident and ordinarily resident in the UK, become at any time ("the time concerned") trustees who fall to be regarded for the purposes of any double taxation relief arrangements—
> (a) as resident in a territory outside the UK, and
> (b) as not liable in the UK to tax on gains accruing on disposals of assets ("relevant assets") which constitute settled property of the settlement and fall within descriptions specified in the arrangements.
> (2) The trustees shall be deemed for all purposes of this Act—
> (a) to have disposed of their relevant assets immediately before the time concerned, and
> (b) immediately to have reacquired them,
> at their market value at that time.

This charge does not contain any of the exceptions applicable to the s.80 exit charge and has no special rules for trustee liability.

### 7.6.1 *Restriction of roll-over relief*

Section 84 TCGA provides:

> (1) Section 152 shall not apply where—
> (a) the new assets are, or the interest in them is, acquired by the trustees of a settlement,

(b) at the time of the acquisition the trustees are resident and ordinarily resident in the UK and fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK,
(c) the assets are of a description specified in the arrangements, and
(d) were the trustees to dispose of the assets immediately after the acquisition, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.
(2) In this section "the new assets" has the same meaning as in section 152.

This is the equivalent of s.80(6): see 7.4.4 (Restriction of roll-over relief).

## 7.7 Disclosure of emigration or treaty-emigration of trust

Para 5 Sch 5A TCGA provides:

(1) This paragraph applies if—
(a) the trustees of a settlement become at any time (the relevant time) on or after the commencement day neither resident nor ordinarily resident in the UK, or
(b) the trustees of a settlement, while continuing to be resident and ordinarily resident in the UK, become at any time (the relevant time) on or after the commencement day trustees who fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.
(2) Any person who was a trustee of the settlement immediately before the relevant time shall, before the expiry of the period of twelve months beginning with the relevant day, deliver to the Board a return specifying—
(a) the day on which the settlement was created,
(b) the name and address of each person who is a settlor in relation to the settlement immediately before the delivery of the return, and
(c) the names and addresses of the persons who are the trustees immediately before the delivery of the return.
(3) For the purposes of sub-paragraph (2) above the relevant day is the day when the relevant time falls.

There are minor exceptions in para 6 which need not be set out here.

## 7.8 Emigration of individual trader[4]

Section 17 ITTOIA provides:

> (1) This section applies if—
> (a) an individual carries on a trade wholly or partly outside the UK otherwise than in partnership, and
> (b) the individual becomes or ceases to be UK resident.
> (2) The individual is treated for income tax purposes—
> (a) as permanently ceasing to carry on the trade at the time of the change of residence, and
> (b) so far as the individual continues to carry on the trade, as starting to carry on a new trade immediately afterwards....

The BI Manual provides:

> **70610. Changes in residence status** [February 2007]
> [The Manual summarises s.17 ITTOIA and continues:]
> As there is no provision in the Taxes Acts for splitting a tax year in relation to residence, the deemed cessation and recommencement should strictly take place at the start of the tax year in which the taxpayer became resident in the UK or the end of the tax year in which the taxpayer ceased to be resident.

This is not correct, because the statutory provisions refer to "the time of the change of residence" which suggests that the deemed cessation and commencement take place at that moment, not at the end of the tax year. However the point does not arise in practice because the Manual continues:

> But under ESC/A11, the business is treated as ceasing and recommencing on the actual date of arrival or departure if the taxpayer so chooses and the conditions of the ESC are met.

This practice is not referred to in ESC A11, but it is consistent with the approval of ESC A11. (It is considered that this is the law, rather than concession, but in practice that will not matter.)

4 References in this paragraph to a trade include a profession or vocation, since there is no difference between them.

### 7.8.1 *Emigration of partner in trading partnership*

For the equivalent rules for partnerships, see s.852(6) ITTOIA:

> If—
> (a) the firm carries on the actual trade wholly or partly outside the UK, and
> (b) the partner becomes or ceases to be UK resident,
> the partner is treated as permanently ceasing to carry on one notional trade when the change of residence occurs and starting to carry on another immediately afterwards.

## 7.9 EU restriction on exit taxes

### 7.9.1 *Exit charge on emigration of individual to EU state*

An EU communication on exit taxes[5] provides:

> **2. EXIT TAXES: LEGAL FRAMEWORK**
> **2.1. The decision of the ECJ in *de Lasteyrie*[6] and its implications for individuals**
> On 11 March 2004, the ECJ gave an important interpretation of the freedom of establishment in the context of French legislation taxing unrealised increases in value of securities where individual taxpayers move their tax residence outside France. When Mr. de Lasteyrie du Saillant in 1998 moved from France to Belgium, he was subject to immediate taxation on the unrealised increase in value of the shares which he held in a French company.
> The ECJ held that the French provision in question was likely to restrict the exercise of the freedom of establishment, having at the very least a dissuasive effect on taxpayers wishing to establish themselves in another MS, because they were subjected in the exit country, by the mere fact of transferring their tax residence outside France, to tax on a form of income that had not yet been realised, and thus to disadvantageous

5 "Exit taxation and the need for co-ordination of Member States' tax policies" 19.12.2006 COM(2006) 825 final, accessible *ec.europa.eu/taxation_customs/resources/documents/taxation/COM(2006)825_en.pdf.*

6 *de Lasteyrie du Saillant v Ministère de l'Économie, des Finances et de l'Industrie,* [2005] STC 1722.

> treatment by comparison with a person maintaining his residence in France.
>
> Although the ruling in *de Lasteyrie* relates to the facts and circumstances of the case at issue, the ECJ's interpretation of EC Law implies conclusions as regards exit taxes in general.
>
> Taxing residents on a realisation basis and departing residents on an accruals basis is a difference in treatment which constitutes an obstacle to free movement. Where a MS decides to assert a right to tax gains accrued during a taxpayer's residence within its territory, it cannot take measures which present a restriction to free movement.
>
> This rules out the possibility of immediate collection of the tax due on the unrealised gains when taxpayers move their tax residence to another MS.

The communication then considers permitted forms of charges on departing residents (not applicable in the UK)[7] and concludes:

> Most MSs which had exit tax rules on individual shareholders similar to those at issue in *de Lasteyrie* have since abolished or amended them in line with the ruling. This has enabled the Commission to suspend infringement proceedings against a number of MSs on this particular aspect. The Commission will, however, continue to monitor MSs' rules

7 "The ECJ ruled in *de Lasteyrie* and in *N* [*N v Inspecteur van de Belastingsdienst Oost/kantoor Almelo*, [2008] STC 436] that the possible suspension of payment made subject, for example, to conditions that guarantees must be provided, constitutes a restrictive effect in that the taxpayer is deprived of enjoyment of the assets given as a guarantee. Similarly, it is clear from *de Lasteyrie* that suspension of payment cannot be made subject to the condition of designating a representative in the MS of origin. In general, any means of preserving the tax claim must be strictly proportional to that aim and must not entail disproportionate costs for the taxpayer.

As the ECJ confirmed in *N*, when a resident of a MS transfers his/her residence to another MS, the MS from which he/she departs is not prevented by EU law from assessing the amount of income on which it wishes to preserve its tax jurisdiction, provided this does not give rise to an immediate charge to tax and that there are no further conditions attached to the deferral. Such a practice is in line with the principle of fiscal territoriality, connected with a temporal component, namely residence within the territory during the period in which the taxable profit arises. A requirement, that the taxpayer submits a tax declaration at the time of the transfer of residence, necessary for the purpose of assessing the income, can be considered proportionate having regard to the legitimate objective of allocating the taxing powers, in particular so as to eliminate double taxation, between the MSs."

in this area with a view to ensuring their EC law compatibility.

The UK has three exit charges on individuals, the hold-over clawback, the EIS clawback, and the charge on migrating traders. So far they seem to have escaped direct EU attention. If the migration is to a member state, these can hardly be described as compliant with EU law, freedom of establishment[8] and freedom to reside.[9]

### 7.9.2 *Exit charge on emigration of trust to EU state*

What about the exit charge for trusts? The EU communication does not discuss trusts, but it does discuss companies:

> **3.1. Implications of *de Lasteyrie* for companies**
> The Commission is of the opinion that the interpretation of the freedom of establishment given by the ECJ in *de Lasteyrie* in respect of exit tax rules on individuals also has direct implications for MSs' exit tax rules on companies.

This is obviously correct since freedom of establishment applies to companies as well as individuals.[10] The same will apply to a trust either on the grounds that it is an "undertaking" within the meaning of the freedom of establishment rule[11] or on the grounds of the freedom of movement or of establishment of the trustee in its personal capacity.

### 7.9.3 *Exit charge on emigration to EEA state*[12]

The EU communication continues:

---

8 See 51.3 (Freedom of establishment).

9 Art. 21 TFEU provides:

> "Every citizen of the Union shall have the right to move and reside freely within the territory of the Member States, subject to the limitations and conditions laid down in the Treaties and by the measures adopted to give them effect."

10 See 51.3 (Freedom of establishment).

11 See 51.10 (Section 86 TCGA).

12 The states within the EEA (European Economic Area) are Norway, Iceland and Liechtenstein.

**4.1. Freedoms applicable to EEA-states**

The European Economic Area (EEA) Agreement provides for the same four basic freedoms as the EC Treaty (goods, persons, services and capital). It also includes horizontal provisions relevant to the four freedoms. Secondary Community legislation in the area of taxation, however, has not been incorporated in the EEA Agreement. The Mutual Assistance Directive and the Recovery Directive therefore do not apply to these states

**4.2. Emigration of individuals/transfer of seat of companies – free movement of workers/freedom of establishment**

Taxes levied in case of the emigration of individuals or the transfer of seat of companies would primarily appear to involve the free movement of workers (Article 39 EC/28 EEA Agreement) and the freedom of establishment (Article 43 EC/31 EEA Agreement) respectively. The exit taxes at issue in *de Lasteyrie* and *N* which applied to individuals with substantial shareholdings were found to contravene the freedom of establishment. As the same basic freedoms apply to EEA states, the rulings in *de Lasteyrie* and *N* are of direct relevance to them. The question is whether there are significant differences in situation which could justify such restrictions in the case of EEA states. The Commission is of the opinion that an immediate collection of tax may be justified in certain circumstances by overriding reasons in the general interest, in particular the need to ensure the effectiveness of fiscal supervision and to prevent tax evasion.

EEA states are not obliged to implement secondary Community legislation in the area of taxation, such as the Mutual Assistance Directive and the Recovery Directive. As a consequence, MSs do not necessarily have the same guarantees that deferred tax claims can be discharged at a later stage as they would have within the Community. In many cases, MSs have, however, concluded bilateral or multilateral tax conventions with EEA states which include information exchange obligations that provide for an equivalent level of mutual assistance. The Commission believes that in situations where a lack of administrative cooperation prevents MSs from safeguarding their tax claims they should be entitled to take appropriate measures at the moment of emigration or transfer.

Council Directive 2010/24/EU[13] applies to MSs but not to EEA states.

13 16 March 2010, concerning mutual assistance for the recovery of claims relating to taxes, duties and other measures.

However, the UK/Norway and the UK/Iceland DTTs have an information exchange article which should suffice. In the of an emigration to an EEA state, it would be necessary to review the treaties between the UK and that state in order to ascertain the position.

### 7.9.4 *Exit charge on emigration to other countries*

The EU communication continues:

> **5. EXIT TAXES IN RESPECT OF THIRD COUNTRIES**
> Of the four basic freedoms, only the free movement of capital and payments (Article 56) applies to third countries.
> In respect of the emigration or transfer of seat to other third countries as such, the provisions on the free movement of persons do not apply and MSs remain free to assess and collect their taxes at the moment of departure. However, the emigration of an individual or the transfer of seat of a company may involve transactions which are covered by the provisions on the free movement of capital. The transfer of assets to a PE in a third country may also fall to be examined from the perspective of the free movement of capital.
> Since the result of the application of the different freedoms should be the same, it would appear that an immediate collection of tax at the moment of transfer of such assets constitutes a restriction on the free movement of capital. However, as noted above, the Commission believes that a lack of administrative co-operation may justify a restriction in these circumstances. The Commission would encourage MSs, where appropriate, to enhance administrative co-operation with their non-EU partners, as this is the best means of ensuring tax compliance and preventing tax evasion.[14]

The European Parliament supports this view.[15]

In the case of an emigration to a third country (not a MS or EEA state), it would be necessary to review the treaties between the UK and that state in order to ascertain the position.

---

14 In EU terminology, "tax evasion" includes tax avoidance.

15 European Parliament resolution of 24 October 2007 on the contribution of taxation and customs policies to the Lisbon Strategy.

## 7.10 Council Resolution on coordinating exit taxation

The Council of the European Union (the Council of Ministers) adopted a resolution on 2 December 2008 which invites Member States to adopt the following guiding principles:

> A. "Transfer of economic activities" means any operation whereby a taxpayer subject to corporation tax or a natural person engaged in a business:
> 1) ceases to be subject to corporate or personal income tax in a Member State (the exit State) while at the same time becoming subject to corporate or personal income tax in another Member State (the host State); or
> 2) transfers a combination of assets and liabilities from a head office or a permanent establishment in the exit State to a permanent establishment or a head office in the host State.
> B. When, in connection with a transfer of economic activities, the exit State reserves the option to exercise its taxing rights on the reserves made (profits realised but not yet taken into account for tax purposes) and to take back, in full or in part, the provisions made (expenditure not yet incurred but already taken into account for tax purposes), the host State may provide for the creation of reserves or provisions of identical or different amounts, in accordance with the rules governing the tax base in that State, and allow deduction from taxable results for the year in which they were established.
> C. When, in connection with a transfer of economic activities, the exit State reserves the option to exercise its taxing rights on the unrealised gains corresponding to the assets held by the taxpayer, calculated as the difference between the market value of these assets on the transfer date and their book value, the host State takes the market value on the transfer date when calculating the subsequent added value in the event of disposal.
> D. In case of disagreement between the host State and the exit State regarding the market value of the assets on the transfer date, the two States settle their dispute using the appropriate procedure.
> E. The host State can require the taxpayer engaged in a transfer of economic activities to provide evidence that the exit State has exercised or will exercise its rights under the conditions set out above, as well as evidence of the market value applied by the exit State.
> F. The provisions laid down at Community level in relation to Mutual Assistance provide the framework for the host State to assist the exit State, in particular for the purposes of determining the disposal date.

This does not seem to have much impact yet, at least in the UK, but the law is not stable. In the area of company migration (outside the scope of this work) the CIOT have been lobbying the EU for action.[16]

16 Letter dated 20 March 2007 accessible *www.tax.org.uk* (search for *Heydt*).

CHAPTER EIGHT

# TEMPORARY NON-RESIDENCE

## 8.1 Temporary non-residence - Introduction

This chapter discusses the temporary non-residence rules (**"TNR rules"**). The rules were introduced in 1998 and have been amended several times, resulting in a very fine tangle.

### 8.1.1 *Terminology*

In this book I use the term **"treaty-residence"** to mean residence for the purposes of a DTA, and "**domestic-law residence"** means residence for UK tax purposes (it is essential in this chapter to distinguish the two).

Where a person is resident in the UK for UK law purposes, I therefore describe them as **"domestic-law UK resident"** and similarly non residents are described as **"domestic-law non-UK resident"**.

Where a person is treaty-resident in the UK I refer to them as **"treaty UK resident"**. Where a person is treaty-resident in a state outside the UK, I adopt the statutory terminology **"treaty non-resident"** though it might be clearer to say "treaty non-UK resident".

**"CGT treaty relief"** is CGT relief provided by a DTA.

These are somewhat clumsy terms but it is difficult to think of better.

## 8.2 Purpose of the temporary non-residence provisions

It is helpful to outline the two sets of problems which the provisions are intended to address.

### 8.2.1 *Gains accruing to temporary non-resident*

Until 1998, a possible method of CGT planning for a UK resident was as follows. An individual could become domestic-law non-UK resident and dispose of assets during a year of non-residence; in the following tax year they could become UK resident again. Thus relatively brief periods of domestic-law non-residence offered the opportunity of CGT-free disposals. Section 10A(2) TCGA is intended to prevent this.

Until 2005, a variant of this planning was: an individual could remain domestic-law UK resident but become treaty non-resident (ie treaty-resident in a state with a DTA conferring CGT relief); the individual disposed of assets while treaty non-resident; following the disposal the individual could cease to be treaty non-resident. Thus relatively brief periods of treaty non-residence offered some opportunity of CGT-free disposals (so far as CGT treaty relief could be available). Section 10A(2) TCGA is also intended to prevent this.

In 2009 the rule was extended to catch OIGs accruing to temporary non-residents.

### 8.2.2 *Remittance by temporary non-resident*

Similarly, until 2008 a possible method of remitting RFI or gains tax free was as follows. Suppose an individual had RFI/gains taxable on remittance (in this chapter called "**pre-departure income/gains**").

The individual could become domestic-law non-UK resident and remit the pre-departure income/gains during a year of non-residence; in the following tax year they could become UK resident again. Thus relatively brief periods of domestic-law non-residence offered the opportunity of tax-free remittances. Section s.832A ITTOIA is intended to prevent this for income. The drafting of s.832A was based on the existing s.10A which was designed for a different situation, resulting in more anomalies.

The reader may wonder if a variant of this planning was possible: suppose an individual remained domestic-law UK resident but became treaty-resident in a state with a DTA conferring the necessary relief (ie "treaty non-resident"); the individual remitted the pre-departure income/gains while treaty non-resident. However treaties do not provide relief in this situation so planning of this kind was not possible. Nevertheless s.832A does apply in this case. The drafter may perhaps have thought that this planning was possible, or they may have introduced the rule unintentionally by copying across in s.832A the s.10A rules which were designed for a different situation.

Thus there are two distinct sets of rules, though they share a common

framework:
(1) Gains and losses accruing in intervening years: s.10A(2).
(2) Pre-departure income remitted during intervening years: s.832A.

### 8.2.3 *Income of temporary non-resident: the future*

At present a possible method of IT planning for a UK resident is as follows. An individual could become domestic-law non-UK resident and arrange income to arise during a year of non-residence; in the following tax year they could become UK resident again. Thus relatively brief periods of domestic-law non-residence offer the opportunity of receiving income which would not be subject to UK tax if foreign source income or if it qualified for non-residents income tax relief (eg dividends).

A variant of this planning is: an individual could remain domestic-law UK resident but become treaty non-resident (ie treaty-resident in a state with a DTA conferring IT relief); the individual may arrange income to arise while treaty non-resident; later the individual could cease to be treaty non-resident. Thus relatively brief periods of treaty non-residence offer some opportunity of IT free receipts of income (so far as treaty relief could be available).

The Residence Consultation Paper proposes to extend the TNR rules to catch this from 2012/13:

> 3.47 Ceasing to be UK resident means that an individual is no longer liable to UK tax on income from non-UK sources. In many instances there can also be a reduced tax liability on income from UK sources. This can result in people finding it advantageous to become not resident for a short period of time if they expect substantial amounts of income to arise which otherwise would be liable to tax in the UK. This leads to a cost to the Exchequer.
> 3.48 A similar position used to arise for CGT. It was possible for individuals to leave the UK temporarily and realise capital gains in the period of non-residence and therefore be exempt from liability to UK tax on those gains. Legislation was enacted in Finance Act 1998 to counter such avoidance of CGT.
> 3.49 Introducing a statutory definition will make it clearer when a person is tax resident or not resident in the UK. This could enable those who want to avoid liability on substantial amounts of income to plan short periods of temporary non-residence with more certainty.
> 3.50 The SRT [statutory residence test] rules will therefore need to

> counteract the risk of individuals creating artificial short periods of non-residence, during which they receive a large amount of income (which accrued during periods of UK residence) free of UK tax and then bring the income back into the UK tax-free. This activity would undermine the effectiveness of an SRT and present an unacceptable risk to the Exchequer.
> 3.51 The existing anti-avoidance provision to prevent individuals avoiding CGT in this way works broadly as follows:
> • it applies where an individual has been resident in four out of the seven tax years prior to the tax year in which they become non-resident; and
> • if the individual becomes resident again in any of the following five tax years then, with certain exceptions, chargeable gains or allowable losses that arose during the years of non-residence are treated as arising instead in the tax year in which the individual becomes resident again.
> 3.52 This treatment has the effect of making such gains liable to tax; any losses can be set off in arriving at the net amount chargeable to CGT.
> 3.53 The SRT will include an anti-avoidance rule for some forms of investment income along the lines of the model of the CGT rule described above. In particular, it will apply to dividends paid by closely controlled companies[1] that reflect profits that have built up during a period of residence and which are then taken out during a short period of non-residence.
> 3.54 The rule would not apply to all types of income that are received when a person is non-resident. For example, it would not apply to earnings from employment or self-employment or to normal types of regular investment income, such as bank interest or dividends from listed companies.[2]

Individuals who are currently temporary non-resident should arrange to receive income in 2011/12 as next year will probably be too late.

## 8.3 Temporary non-resident conditions

Section 10A TCGA sets out four conditions which must all be satisfied if the section is to take effect. I refer to these as the "**TNR conditions**". Section 10A(1) TCGA provides:

---

1 I expect the author intends to refer to close companies.

2 HM Treasury, *Statutory Definition of Tax Residence: a Consultation* (June 2011) *www.hm-treasury.gov.uk/d/consult_condoc_statutory_residence.pdf*.

> This section applies in the case of any individual ("the taxpayer") if—
> (a) he satisfies the residence requirements for any year of assessment ("the year of return");
> (b) [i] he did not satisfy those requirements for one or more years of assessment immediately preceding the year of return but
> [ii] there are years of assessment before that year for which he did satisfy those requirements;[3]
> (c) there are fewer than five years of assessment falling between the year of departure and the year of return; and
> (d) four out of the seven years of assessment immediately preceding the year of departure are also years of assessment for each of which he satisfied those requirements.

Section 832A(1) ITTOIA is the same for IT.[4]

The legislation uses three defined terms with commonsense definitions:

(1) Year of departure.[5]

(2) Intervening year.[6]

---

3 Limb [ii] appears to be otiose, given para (d); but it does not matter.

4 Section 832A(1) ITTOIA provides:

"This section applies if—
(a) an individual satisfies the residence requirements for any tax year ("the year of return"),
(b) the individual did not satisfy those requirements for one or more tax years immediately before the year of return but did satisfy those requirements for an earlier tax year,
(c) there are fewer than 5 tax years between—
(i) the last tax year before the year of return for which the individual satisfied those requirements ('the year of departure'), and
(ii) the year of return, and
(d) the individual satisfied those requirements for at least 4 out of the 7 tax years immediately before the year of departure."

5 Section 10A(8) TCGA provides:

"'the year of departure' means the last year of assessment before the year of return for which the taxpayer satisfied the residence requirements."

6 Section 10A(8) TCGA provides:

"'intervening year' means any year of assessment which, in a case where the conditions in paras (a) to (d) of subsection (1) above are satisfied, falls between the year of departure and the year of return."

That is, an intervening year is one in which the temporary non-resident conditions are satisfied.

(3) Year of return.[7]

### 8.3.1 *Avoiding the TNR conditions*

The conditions allow (indeed invite) tax planning by ensuring that a person does not satisfy the residence requirements for at least a five year period. The way to do this is to remain domestic law non-resident or treaty non-resident for a five-year period.

### 8.3.2 *EU law compliance*

The rules can give rise to an exit charge and where the charge arises on ceasing to be resident in an EU member state, it is an interesting question whether the charge is EU law compliant.

## 8.4 "Residence requirements"

"Residence requirements" is defined in s.10A(9) TCGA:

> For the purposes of this section an individual satisfies the residence requirements for a year of assessment—
> (a) if, during any part of that year of assessment, he is resident in the UK and not Treaty non-resident, or
> (b) if he is ordinarily resident in the UK during that year of assessment, unless he is Treaty non-resident during that year of assessment.

Section 832A(4) ITTOIA is the same for IT.[8]

One has to read s.10A(9) more than once, to assimilate the double negatives (s.832A(4) is better drafted), but the matter can be set out in a table:

---

7 Defined in s.10A(1)(a) TCGA as the year in which the temporary non-resident again satisfies the residence requirements.

8 Section 832A(4) ITTOIA provides:
"For the purposes of subsection (1) an individual 'satisfies the residence requirements' for a tax year if—
(a) at any time in that year, the individual is UK resident and not Treaty non-resident, or
(b) the individual is ordinarily UK resident, and is not Treaty non-resident, for that year."

| Resident | Ord Resident | Treaty non-res. | Resident Reqs met |
|---|---|---|---|
| Y | Non relevant | N | Y |
| Y | Non relevant | Y | N |
| Not relevant | Y | N | Y |
| Not relevant | Y | Y | N |
| N | N | Not relevant | N |

Section 10A(9)(b) only applies to the theoretical case of a person who is non-resident but ordinarily resident.

### 8.4.1 "*Treaty non-resident*"

"Treaty non-resident" is defined for CGT in s.288(7B) TCGA:

> For the purposes of this Act, a person is Treaty non-resident at any time if, at that time, he falls to be regarded as resident in a territory outside the UK for the purposes of double taxation relief arrangements having effect at that time.

Section 832A(5) is the same for IT.[9]

The key term is "double taxation relief arrangements" (here called "DTR arrangements").

### 8.4.2 *"DTR arrangements" – IT*

Section 832A(6) ITTOIA defines DTR arrangements for the purposes of the IT provision:

> In subsection (5) "double taxation relief arrangements" means arrangements which have effect under section 2(1) of TIOPA 2010.

### 8.4.3 *"DTR arrangements" – CGT*

Section 288(1) TCGA defines double taxation relief arrangements ("DTR

---

9 Section 832A(5) ITTOIA provides:
"For the purposes of subsection (4) an individual is 'Treaty non-resident' at any time if, at that time, he is regarded as resident in a territory outside the UK for the purposes of double taxation relief arrangements having effect at that time."

arrangements") for the purpose of CGT:

> "double taxation relief arrangements"—
> (a) in relation to a company[10] means arrangements that have effect under section 2(1) of TIOPA 2010 except so far as they have effect in relation to petroleum revenue tax, and
> (b) in relation to any other person means arrangements that have effect under section 2(1) of TIOPA 2010 but only so far as they have effect in relation to capital gains tax;

This is different from the IT definition because the treaty needs to contain a CGT provision. For instance, the Jersey DTA counts as "DTR arrangements" for IT but not for CGT because it has no CGT article.

## 8.5 Gains and losses accruing in intervening years

Section 10A(2) TCGA sets out the consequence if the TNR conditions are met:

> Subject to the following provisions of this section and section 86A, the taxpayer shall be chargeable to CGT as if—
> (a) all the chargeable gains and losses which (apart from this subsection) would have accrued to him in an intervening year,
> (b) all the chargeable gains which under section 13 or 86 would be treated as having accrued to him in an intervening year if he had been resident in the UK throughout that intervening year ...[11]
> were gains or, as the case may be, losses accruing to the taxpayer in the year of return.

Para (a) works because gains accruing on disposals of assets by individuals are in principle chargeable gains even if the individual is non-resident. This needs to be supplemented by para (b) because s.13 gains and s.86 gains do not accrue to participators or settlors who are non-resident.

Section 10A(2) is a deeming provision. Gains which actually accrued in

10 Companies are not relevant to this chapter but one needs to read para (a) in order to follow para (b).

11 S.10A(2)(c) deals with losses of non-resident companies: see 8.10.1 (Losses of non-resident company within s.13 TCGA).

an intervening year are deemed to have accrued in the year of return. I refer to this as "**the s.10A(2) fiction**". Applying the s.10A(2) fiction the intervening year gains are in principle taxable in the year of return.

Losses can be carried back, ie losses accruing in a later intervening year can be set against gains accruing in an earlier intervening year.

### 8.5.1 *Rate of tax*

The rate of tax is the rate in the year of return, even though the rate in the year the gain actually accrued may have been lower.[12] Annual exemptions of intervening years are also lost.

## 8.6 Interaction with remittance basis

For a remittance basis taxpayer there could be a conflict between two deeming rules:

(1) Section 12 TCGA (the CGT remittance basis) provides that gains are treated as accruing when remitted.

(2) The s.10A(2) fiction which provides that gains are treated as accruing in the year of return.

Section 10A(9ZA) TCGA provides:

> If—
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the taxpayer for the year of return, and
> (b) the taxpayer is not domiciled in the UK in that year,
> any foreign chargeable gains[13] falling within subsection (2)(a) which were

---

12 Where the year of return was 2010/11, the 18% rate applied: Para 19 sch 1 F(No.2)A 2010 provided: "Gains treated as accruing to an individual under section 10A of TCGA 1992 (temporary non-residents) in the tax year 2010-11 are to be treated for the purposes of this Schedule as accruing before 23 June 2010."

13 Section 10A(9ZA) adds: "For this purpose 'foreign chargeable gains' has the meaning given by section 12(4)." If there were a TCGA-wide definition this would not be necessary.
Suppose (1) an individual has a UK foreign currency account (2) the individual disposes of the account when temporarily resident abroad. The account is non-UK situate for CGT purposes; the gain is a foreign chargeable gain and is charged under the temporary non resident rules when the individual returns to the UK, but qualifies for the remittance basis.

remitted in an intervening year are treated as remitted in the year of return.

### 8.6.1 *"Subsection (2)(a) gains"*

Section 10A(9ZA) only applies to gains "falling within subsection (2)(a)" that is:

> chargeable gains ... which (apart from subsection 2(a)) would have accrued to him in an intervening year,

That is, gains accruing in an intervening year and remitted in an intervening year: they are treated as accruing in the year of return, not when remitted. I refer to those as **"subsection (2)(a) gains"**. It is an interesting question how to treat gains accruing in an intervening year and not remitted until after the year of return.

I had previously considered that s.10A(9ZA) applied to pre-departure gains (foreign gains accruing while the individual was UK resident, ie gains before departure) which were remitted during an intervening year, but on reflection that does not appear to be the case because these are not subsection 2(a) gains.

### *8.6.2 Treaty users*

Section 10A(9B) TCGA provides:

> Where this section applies in the case of any individual in circumstances in which one or more intervening years would, but for his being Treaty non-resident during some or all of that year or those years, not be an intervening year, ...

That is a case of an individual who is domestic-law UK resident but treaty non-resident.[14] It is useful to have a label for individuals in this position and I refer to them as **"treaty-users"**. The position of treaty users is different from individuals who are not domestic-law UK resident, since treaty-users are subject to CGT unless treaty relief applies.

Where no CGT treaty relief applies, there is no need for the TNR provisions, and the TNR rules should simply have been disapplied.

---

14 See row 2 of the table in 8.4 ("Residence requirements").

Instead the rules are disapplied in part, in a complex manner, and the problems have not been fully thought through.

Section 10A(9B) makes four modifications to s.10A:

> this section shall have effect in the taxpayer's case—
> (a) as if subsection (2)(a) above did not apply in the case of any amount treated by virtue of section 87 or 89(2) as an amount of chargeable gains accruing to the taxpayer in any such intervening year,

Section 10A(9B)(a) disapplies the TNR rules for s.87 deemed gains: such gains accrue in the year that the s.87 code provides (under the s.87 matching rules and s.87 remittance basis) and not in the year of return. This is sensible on the view (taken in this book) that such gains do not qualify for DT exemption.

Secondly:

> this section shall have effect in the taxpayer's case ...
> (b) as if any such intervening year were not an intervening year for the purposes of subsections (2)(b) and (c) and (6) above.

There are three amendments here. They are best considered separately.

To follow the first we need to refer back to s.10A(2)(b):

> Subject to the following provisions of this section and section 86A, the taxpayer shall be chargeable to CGT as if—
> (b) all the chargeable gains which under section 13 or 86 would be treated as having accrued to him in an intervening year if he had been resident in the UK throughout that intervening year ...
> were gains ...accruing to the taxpayer in the year of return.

Section 10A(9B)(b) disapplies the TNR rules for s.13 deemed gains: such gains accrue in the year that the s.13 code provides (the year of accrual, subject to the s.13 remittance basis) and not in the year of return. Similarly, the subsection disapplies the TNR rules for s.86 deemed gains: such gains accrue in the year that s.86 provides (the year of accrual) and not in the year of return. This would be sensible on the view that s.13 deemed gains and s.86 deemed gains do not qualify for DT exemption but in some cases they do.

The other amendments made by s.10A(9B)(b) concern s.10A(2)(c) and s.10A(6): these are consequential amendments relating to losses.[15]

What about gains of an individual who is domestic-law UK resident, treaty non-resident, but which do not qualify for treaty relief (eg gains on a disposal of UK land)? They fall within the TNR rules, so the gain accrues in the year of disposal (and tax is paid) but it accrues instead in the year of return (and the former computation is revised, and tax paid or repaid accordingly).

## 8.7 Pre-departure income

Section 832A(3) ITTOIA provides:

> Relevant foreign income is within this subsection if—
> (a) it is for the year of departure or any earlier tax year,[16] and
> (b) section 832 applies to it.

In the following discussion I refer to such income as **"pre-departure income"**; in other words, that means RFI which:

(1) is taxed on a remittance basis, ie accruing to a remittance basis taxpayer while the individual was UK resident; and
(2) which was not remitted prior to departure (so was not subject to tax before departure).

Section 832A(2) ITTOIA sets out the taxation of pre-departure income if the TNR conditions are met:

> Treat any of the individual's relevant foreign income within subsection (3) which is remitted to the UK after the year of departure and before the year of return as remitted to the UK in the year of return.

Pre-departure income which is remitted during an intervening year is treated as remitted in the year of return. This makes sense for an individual who is domestic-law non-UK resident during the intervening year. It makes no sense for someone who is domestic-law UK resident but treaty non-resident, unless one takes the view that treaty relief is available

---

15 See 8.10.1 (Losses of non-resident company within s.13 TCGA).

16 "Any earlier year" would include a year in which a person was non-resident, but income of such a year is not relevant foreign income: see 9.3.1 (Relevant foreign income).

on remitted income during the intervening year, which would not seem to be the case.

Income arising after the year of departure is not caught.

The RDR manual provides a straightforward example. Omitting irrelevant detail (and rewriting slightly to enhance clarity) this provides:[17]

> T is UK resident in 2007-08 and 2008-09 and a remittance basis taxpayer in both years.
> T is non-resident in 2009-10 and 2010-11.
> T is UK resident again in 2011-12 and the temporary non residence conditions of s.832A ITTOIA are satisfied.
> He had £6,000 of unremitted relevant foreign income from 2007-08, and £8,000 of relevant foreign income from 2008-09.
> In 2009-10 and 2010-11 he remits all of this relevant foreign income to the UK.
> T will be taxed on £14,000 in 2011-12 (the 'year of return') in respect of his remittances of his relevant foreign income in the years of 'temporary non-residence'.

It is evident that the rules may work unfairly in that they bunch remitted income of up to four years into the year of return, which may put lower rate taxpayers up into the higher or additional rates of tax. However that is always a possible downside of the remittance basis and any other rule would be unduly complex.

---

17 The example including its irrelevant detail in full is as follows:
**32520 Temporary Non Residents: qualifying conditions** *Example (Travis)*
T, a long-term UK resident has been a remittance basis user since 2000-01. He leaves the UK for a work secondment in January 2009 (2008-09) and is not resident in 2009-10 and 2010-11.
T returns to the UK in August 2011 and meets the residence requirements in s832A in 2011-12.
He has £6,000 of relevant foreign income from 2007-08, a year in which he had claimed the remittance basis under ITA07/s831. He also has £8,000 of relevant foreign income from 2008-09, a year in which he claimed the remittance basis under the new rules at ITA07/s809B.
In 2009-10 and 2010-11 he remits all of this relevant foreign income to the UK to meet certain ongoing UK financial commitments.
T will be taxed on £14,000 in 2011-12 (the 'year of return') in respect of his remittances of his relevant foreign income in the years of 'temporary non-residence'.

### 8.7.1 *Transitional rules*

Para 83(4) Sch 7 FA 2008 provides:

> Nothing in section 832A of that Act applies in relation to anything remitted to the UK in the tax year 2007-08 or any earlier tax year.

Thus pre-2008 income is caught by the new rule if remitted after 2008/09. This retrospective rule is intentional. The RDR manual provides a straightforward example of a case where transitional relief is available. Omitting irrelevant detail (and slightly rewriting for enhanced clarity) this provides:[18]

> J is non-resident in 2007-08 but meets the temporary non-residence conditions of s.832A when he returns to the UK in 2008-09.
> He has unremitted relevant foreign income from 2006-07, a year in which he was resident and had claimed the remittance basis.
> In 2007-08 he remits this relevant foreign income to the UK.
> This transitional provision means that J will not be taxed in 2008-09 (the "year of return") in respect of this remittance of the RFI from 2006-07, although all of the 'temporary non-resident' conditions at s.832A ITTOIA are otherwise met.

## 8.8 Interaction with double taxation relief

### 8.8.1 *DT exemption*

Most DTAs with a capital gains article broadly adopt the OECD Model

18 The example including its irrelevant detail in full is as follows:
**31440 Relevant foreign income and the temporary non-residents rule** [July 2010]
*Example (Johan)*
J is not-resident in 2007-08 but meets the residence requirements in s832A when he returns to the UK in 2008-09.
He has £6,000 of relevant foreign income from 2006-07, a year in which he was resident and had claimed the remittance basis under ITA07/s831.
In 2007-08 he remits all of this relevant foreign income to the UK to meet certain ongoing UK financial commitments.
This transitional provision means that J will not be taxed in 2008-09 (the 'year of return') in respect of this remittance of the £6,000 relevant foreign income from 2006-07, although all of the 'temporary non-resident' conditions at ITTOIA05/s832A are otherwise met.

form:

> Gains from the alienation of any property, other than [specified exceptions] shall be taxable only in the Contracting State of which the alienator is a resident.

Gains accruing to an individual when treaty non-resident appear in principle to qualify for this relief even if within the scope of s.10A. However s.10A(9C) TCGA provides:

> Nothing in any double taxation relief arrangements shall be read as preventing the taxpayer from being chargeable to capital gains tax in respect of any of the chargeable gains treated by virtue of subsection (2)(a) above as accruing to the taxpayer in the year of return (or as preventing a charge to that tax from arising as a result).[19]

This appears to be a breach of any treaty in OECD Model form.[20] However the intention of Parliament is reasonably clear and that prevails over the treaty.[21]

### 8.8.2 *Foreign tax credit relief*

EN FB 2005 provides:

> The application of section 10A in relation to an individual does not prevent the individual obtaining relief for foreign tax paid in respect of chargeable gains which are treated as arising to him or her in the year of return.

## 8.9 Post-departure acquisitions

Section 10A(3) TCGA provides:

---

19 I would be grateful to any reader who could explain why the words in brackets are needed.

20 This is recognised in many treaties, which have an additional provision specifically to authorise a s.10A charge (and any foreign state's equivalent). See 8.13 (DTA and other short term non-residence rules).

21 *Padmore (No 2) v IRC* 73 TC 470.

Subject to subsection (4) below, the gains and losses which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return shall not include any gain or loss accruing on the disposal by the taxpayer of any asset if—

(a) that asset was acquired by the taxpayer at a time in the year of departure or any intervening year when—
   (i) he was neither resident nor ordinarily resident in the UK, or
   (ii) he was resident or ordinarily resident in the UK but was Treaty non-resident; ...

The CG Manual provides:

**26230. Temporary non-residence: Gains or losses excluded from scope of s. 10A** [April 2010]
An individual may acquire assets after leaving the UK for a period of temporary residence abroad. If such assets are disposed of during the period of temporary non-residence, during an intervening year, see CG26111, any gains or losses on such assets are, in general, excluded from the scope of section 10A TCGA 1992, but see CG26240 which tells you about the exceptions to this general rule.
Section 10A(3)(a) TCGA 1992 provides that a gain or loss on an asset that was acquired after departure from the UK in either the tax year of departure or any of the intervening tax years when the taxpayer was not resident or not ordinarily resident shall not be treated as chargeable in the tax year of return.
You should note that the general exclusion of gains on assets acquired and disposed of during temporary non residence applies only to gains and losses which would otherwise be chargeable or allowable by virtue of Section 10A TCGA 1992. Where assets are acquired after the date of departure and disposed of in the year of departure or year of return (and not in an intervening year) while the individual is not resident and not ordinarily resident the gains will be chargeable under Section 2 TCGA 1992 unless split-year treatment under ESCD2 is available to the individual, see CG26300+.
**Example**
Mr Smith, who has lived all his life in the UK, leaves the UK on 10 July 2008 for a four year contract of employment abroad.
He resumes tax residence in the UK on 15 August 2012.
On 8 May 2009 Mr Smith buys 20,000 shares in a UK Company. He sells all of the shares on 10 January 2011, realising a gain of £12,000.
Mr Smith fulfils all of the conditions for Section 10A to apply, see CG26156, but because the shares were acquired after his departure from the UK the gain is **not** treated as chargeable in the year of return.

### 8.9.1 *Exceptions to relief*

The CG Manual provides:

> **26240 Temporary non-residence: Exceptions to the exclusion from section 10A** [April 2010]
> Sometimes the exclusion from the scope of Section 10A TCGA 1992 afforded to gains accruing during intervening years on assets acquired after departure from the UK is not appropriate. Some assets acquired by an individual after departure in either the tax year of departure or any of the intervening tax years when the taxpayer was not resident or not ordinarily resident have a connection with the earlier period of residence. These exceptional assets fall under three headings (see below). Where they apply, any gains or losses on the disposal of the assets during intervening years are treated as chargeable in the tax year of return, that is to say they are within the scope of section 10A.

There are three categories of exceptions. Section 10A(3)(b) TCGA requires:

> (b) that asset was so acquired otherwise than by means of a relevant disposal which by virtue of section 58, 73 or 258(4) is treated as having been a disposal on which neither a gain nor a loss accrued;

The sections referred to are:
Section 58 TCGA (transfers between husband and wife or between civil partners),
Section 73 TCGA (death of life tenant),
Section 258(4) TCGA (works of art).
Section 10A(3)(c) TCGA requires:

> (c) that asset is not an interest created by or arising under a settlement;

This prevents an avoidance scheme under which T would acquire an interest under a settlement with relevant income or trust gains, and then sell the interest tax free.
Lastly, s.10A(3)(d) requires:

> (d) the amount or value of the consideration for the acquisition of that asset by the taxpayer does not fall, by reference to any relevant disposal, to be treated as reduced under section 23(4)(b) or (5)(b), 152(1)(b), 153(1)(b), 162(3)(b) or 247(2)(b) or (3)(b).

The sections referred to are:

Section 23(4)(b) or 23(5)(b) TCGA (compensation and insurance),
Section 152(1)(b) and s.153(1)(b) TCGA (business assets roll-over relief),
Section 162(3)(b) TCGA (transfer of business to a company),
Section 247(2)(b) or 247(3)(b) TCGA (compulsory acquisition).
The asset must be acquired "by the taxpayer". The CG Manual provides:

> **26231. Assets acquired by an offshore trust** [October 2009]
> The exclusion from charge, see CG26230, for assets acquired after the taxpayer's departure does not apply to assets acquired within an offshore trust, TCGA 1992, s.86 or TCGA 1992, s.87 or by a non-resident closely controlled company, TCGA 1992, s.13.
> **26243. Example** [October 2009]
> Mr and Mrs Brown, who have lived in the UK all of their lives, leave the UK on 15 November 1999 for Mr Brown to take up a three year contract of employment abroad.
> They resume tax residence in the UK on 1 December 2002.
> Mr Brown had acquired a property in the UK on 4 March 1992. On 12 June 2000, he gave the property to Mrs Brown. Mrs Brown sold the property on 10 March 2001 realising a gain of £100,000.
> TCGA 1992, s.58 applies to the gift by Mr Brown, so that for Capital Gains Tax purposes at the time of transfer neither gain nor loss arises. On the sale by Mrs Brown, the gain is treated as accruing in the year of return as she fulfils all of the conditions for TCGA 1992, s.10A to apply, and the asset is not excluded from the charge under TCGA 1992, s.10A(3)(b).

Section 10A(4) TCGA provides:

> Where—
> (a) any chargeable gain that has accrued or would have accrued on the disposal of any asset ("the first asset") is a gain falling (apart from this section) to be treated by virtue of section 116(10) or (11), 134 or 154(2) or (4) as accruing on the disposal of the whole or any part of another asset, and
> (b) the other asset is an asset falling within paras (a) to (d) of subsection (3) above but the first asset is not,
>
> subsection (3) above shall not exclude that gain from the gains which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return.

The CG Manual provides:

**26250 Temporary non-residence: Held-over gains** [April 2010]

Sometimes a gain on disposal of an asset (the first asset) is 'held over' and not charged until another asset is disposed of. Where this happens under one of the provisions listed below then the gains which eventually accrue when the other asset is disposed of are not excluded from the scope of Section 10A TCGA 1992 by subsection (3) of that section, where subsection (3) would otherwise apply because the other asset was within its scope (see CG26230 and CG26240). Note that for subsection (3) to be disapplied in this way, the first asset must not be within its scope.

Where Section 10A(4) TCGA 1992 applies, a held-over gain which accrues on a disposal in an intervening year when a taxpayer is not UK resident will be treated as accruing in the year of return to the UK, even if the asset which is disposed of was acquired after the taxpayer became non-resident, see CG26111.

The Capital Gains Tax 'hold-over' provisions to which this subsection refers are:

- Section 116(10) TCGA 1992 or Section 116(11) TCGA 1992 (where the new asset is a qualifying corporate bond), see CG53845+.
- Section 134 TCGA 1992 (compensation stock), see CG55045+.
- Section 154(2) TCGA 1992 or (4) (depreciating assets), see CG60370+.

*Example*

Mr Priestley goes to live in France for political reasons. As a result, he is not resident in the UK for the next three full years of assessment. During the first of those years he sells his shares in Priestley Chemicals Ltd and receives qualifying corporate bonds issued by the purchaser, Davy Plc. In the following year he redeems the qualifying corporate bonds and receives cash.

Although he has actually disposed of his shares, Section 116(10) TCGA 1992 applies and so he is treated for the purposes of TCGA 1992 as if he had not done so. Instead, a gain is computed as if he had disposed of the shares and that gain is 'held over' or 'frozen' until he disposes of the qualifying corporate bonds. Without the special provision at Section 10A(4) TCGA 1992 the gain which accrued when the qualifying corporate bonds were disposed of would not be within the scope of section 10A because they are assets both acquired and disposed of whilst Mr Priestley was not UK resident. Note that the first asset, the shares, is not within the scope of subsection (3) because it was acquired before Mr Priestley left the UK: it is appropriate to bring the gain latent in those shares within the potential scope of section 10A even though the gain did not arise until some other asset was disposed of.

## 8.10 Section 10A and non-resident trusts/companies

### 8.10.1 *Losses of non-resident company within s.13 TCGA*

Section 10A provides:

> (2) Subject to the following provisions of this section and section 86A, the taxpayer shall be chargeable to CGT as if— ...
> (c) any losses which by virtue of section 13(8) would have been allowable in his case in any intervening year if he had been resident in the UK throughout that intervening year,
>
> were ... losses accruing to the taxpayer in the year of return. ...
> (6) The reference in subsection (2)(c) above to losses allowable in an individual's case in an intervening year is a reference to only so much of the aggregate of the losses that would have been available in accordance with subsection (8) of section 13 for reducing gains accruing by virtue of that section to that individual in that year as does not exceed the amount of the gains that would have accrued to him in that year if it had been a year throughout which he was resident in the UK.

The CG Manual explains:

> **26201 Temporary non-residence: Losses attributed to participators in non-resident companies** [April 2010]
> Losses on the disposal of an asset by a non-resident company are only attributed to a participator under Section 13 TCGA 1992 in certain circumstances, Section 13(8) TCGA 1992. A loss is attributed only if it will be set off against a gain attributed to the same person from the same company in the same year of assessment or against a gain made by another non-resident company which has been attributed to the taxpayer in the same year of assessment, see CG57250+, in particular, CG57295-CG57299.
> Section 10A TCGA 1992 can apply to losses which are attributed to a UK resident participator under section 13 just as it applies to attributed gains, so that the losses are treated as accruing in the year the individual returns to the UK. However, the restriction to the attribution contained in Section 13(8) TCGA 1992 has a parallel at Section 10A(6) TCGA 1992, which restricts the amount of losses within the scope of section 10A to the amount which would be available under section 13, subsection (8) to set against attributed gains. Losses of a year in excess

of the gains attributed in that year are not within the scope of section 10A.
**26203. Temporary non-residents** [October 2009]
**Example** (Mrs Adams)[22]

The CG Manual provides an example where the facts (stripping out irrelevancies) are as follows:

A is non-UK resident in 1999/00 - 2001/02 inclusive.
A has owned all of the shares in a non-resident company. During A's period of non-residence gains and losses accrue to the company as follows:
1999/00 gain £20,000; loss £5,000
2000/01 loss £10,000
2001/02 gain £20,000
The TNR conditions apply to A. Under Section 10A(2)(b) all the gains which would have been treated as accruing to A in the intervening years

22 The example including all its irrelevant detail in full is as follows:
**26203. Temporary non-residence: Losses** [April 2010]
*Example*
Mrs. Adams, who has lived in the UK all of her life, leaves the UK on 1 September 2008 to take up a four year contract of employment abroad.
She resumes tax residence in the UK on 31 August 2012.
Mrs Adams has owned all of the shares in a company resident in Jersey for many years. The company owns a portfolio of shares and a number of properties. During Mrs Adams' period of non-residence the company makes a number of disposals. Gains and losses accrue as follows:
3 May 2009 gain £20,000 (year of assessment 2009-10)
23 October 2009 loss £ 5,000 (year of assessment 2009-10)
14 July 2010 loss £10,000 (year of assessment 2010-11)
4 September 2011 gain £20,000 (year of assessment 2011-12)
Mrs Adams fulfils all of the conditions for Section 10A to apply, see CG26156. Under Section 10A(2)(b) all the gains which would have been treated as accruing to Mrs Adams in the intervening years if she had been resident in those years are treated as accruing to her in the year of return. Losses are attributed to her, and section 10A applies to them, to the extent that they may be set against gains attributed in the same year.
Mrs Adams is therefore chargeable in the year of return, 2012-13 as follows
* net gains of £15,000 (gain £20,000 less loss £5000) from 2009-10
* a gain of £20,000 for 2011-12.
The total gains chargeable are therefore £35,000.
The loss arising in 2000-2001 is not allowable because no gains from that year were attributed to her.

> if she had been resident in those years are treated as accruing to her in the year of return. Losses are allowable to be set against gains of the same year of actual accrual.
> A is therefore chargeable in the year of return, 2002-2003 as follows
> - net gains of £15,000 (gain £20,000 less loss £5000) for 1999-2000
> - a gain of £20,000 for 2001-2002.
>
> The total gains chargeable are therefore £35,000.
> The loss arising in 2000-2001 is not allowable.

Careful timing of disposals is necessary to ensure that s.13 losses are not wasted.

### 8.10.2 *Temporarily non-resident beneficiaries: s.87 charge*

Section 10A TCGA does not mention s.87 TCGA. So at first sight it might seem that s.87 deemed gains are not caught; but this is not the case. Section 10A(2)(a) TCGA applies to gains accruing to the individual on actual disposals. If a non-resident individual disposes of assets, chargeable gains do accrue to then (even though under s.2 TCGA they are outside the charge to CGT). Subsection (a) likewise applies if an individual receives a capital payment, as trust gains are treated as accruing to the beneficiary under s.87, even if they are non-resident. However, subsection (a) would not catch s.86 or s.13 gains, as gains under these sections do *not* accrue to a non-resident. The sections only apply to a UK resident settlor or participator. Hence the drafter correctly extends s.10A(2) by subsection (b), which applies ss.13 and 86 by deeming the taxpayer to be UK resident. It was not necessary to do this for s.87.

### 8.10.3 *Temporarily non-resident settlor: s.86 charge*

CG Manual provides:

> **26220 Attribution of gains to settlor** [April 2010]
> Section 86 TCGA 1992 provides that in certain cases a UK resident settlor of a non-resident settlement is assessed on the chargeable gains of the trustees, see CG38300. Following the enactment of Section 10A TCGA 1992 a settlor who is temporarily resident outside the UK may also be assessed under Section 86 on gains realised by the trustees during his/her period of non-residence.
> However, all or part of the gains realised by the trustees during the

> settlor's period of temporary non-residence may already have been charged, under Section 87 TCGA 1992, to beneficiaries of the settlement who have received capital payments, see CG38270. Section 86A TCGA 1992 provides relief in this situation by excluding the gains charged to beneficiaries under Section 87 from the extended charge on the settlor under Section 86.
> Any case involving Section 86 or Section 86A is to be reported to CAR Trusts (Bootle) in accordance with CG38223. No attempt to agree or dispute entries in the return should be made until guidance has been received from CAR Truss (Bootle), see CG38222.

The last sentence tacitly acknowledges that s.86A is a difficult section. The amendments in 2008 have created a fine mess. I do not attempt to consider the transitional rules.

Section 86A(1) TCGA provides:

> (1) Subsection (2) below applies in the case of a person who is a settlor in relation to any settlement ("the relevant settlement") where—
> (a) by virtue of section 10A, amounts falling within section 86(1)(e) for any intervening year or years would (apart from this section) be treated as accruing to the settlor in the year of return; and
> (b) there is an excess of the relevant chargeable amounts for the non-residence period over the amount of the section 87 pool at the end of the year of departure.

"Relevant chargeable amounts" is defined in s.86A(3) TCGA:

> In subsection (1) above, the reference to the relevant chargeable amounts for the non-residence period is (subject to subsection (5) below) a reference to the aggregate of the amounts on which beneficiaries of the relevant settlement are charged to tax under section 87 or 89(2) for the intervening year or years in respect of any capital payments received by them.

"Section 87 pool" is defined in s.86A(4) TCGA:

> In subsection (1) above, the reference to the section 87 pool at the end of the year of departure is (subject to subsection (5) below) a reference to the amount (if any) which, *in accordance with subsection (2) of that section,* fell in relation to the relevant settlement to be carried forward from the year of departure to be included in the amount of the *trust gains*

for the year of assessment immediately following the year of departure.

The definition of "s.87 pool" refers back to s.87(2) TCGA. That worked by reference to the original s.87(2) TCGA. Unfortunately s.87 was redrafted in 2008 and by reference to the current s.87(2) the italicised words make no sense. This can be seen by comparing the two provisions:

*Original s.87(2):*
*(2) There shall be computed in respect of every year of assessment for which this section applies the amount on which the trustees would have been chargeable to tax under section 2(2) if they had been resident and ordinarily resident in the UK in the year; and that amount, together with the corresponding amount in respect of any earlier such year so far as not already treated under subsection (4) below or section 89(2) as chargeable gains accruing to beneficiaries under the settlement, is in this section and sections 89 and 90 referred to as the trust gains for the year.*

Current s.87(2):
(2) Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under section 87A as it applies for the relevant tax year) with the section 2(2) amount for the relevant tax year or any earlier tax year.

The drafter in 2008 failed to spot that consequential amendments were needed here. Taken literally, therefore, the definition of "section 87 pool" is nonsense and the amount of the s.87 pool should be zero. If one could adopt a position of sufficient indifference to statutory words, one might rewrite the section to say what Parliament would presumably have said, had the point been noticed, in which case the "section 87 pool" means s.2(2) amounts; though this really amounts to legislation and not construction.

Section 86A(5) deals with settlements with more than one settlor.[23]

23 "Where the property comprised in the relevant settlement has at any time included property not originating from the settlor, only so much (if any) of any capital payment or amount carried forward in accordance with section 87(2) as, on a just and

Section 86A(6)(7) was intended to deal with the computation of trust gains, now s.2(2) amounts:

> Where any reduction falls to be made by virtue of subsection (2) above in any amount to be attributed in accordance with section 10A to any settlor for any year of assessment, the reduction to be treated as made for that year *in accordance with section 87(3)* in the case of the settlement in question shall not be made until—
> (a) the reduction (if any) falling to be made by virtue of that subsection has been made in the case of every settlor to whom any amount is so attributed; and
> (b) effect has been given to any reduction required to be made under subsection (7) below.

This provision refers to s.87(3) TCGA. That worked by reference to the original s.87(3) TCGA. Unfortunately s.87 was redrafted in 2008 and by reference to the current s.87(3) the italicised words again make no sense. The same problem affects s.86A(7)(8):

> Where in the case of any settlement there is (after the making of any reduction or reductions in accordance with subsection (2) above) any amount or amounts falling in accordance with section 10A to be attributed for any year of assessment to settlors of the settlement, the amount (or aggregate amount) falling in accordance with that section to be so attributed shall be applied in reducing the amount carried forward to that year in accordance with section 87(2).
> (8) Where an amount has been applied, in accordance with subsection (7)) above, in reducing the amount which in the case of any settlement is carried forward to any year in accordance with section 87(2), that amount (or, as the case may be, so much of it as does not exceed the amount which it is applied in reducing) shall be deducted from the amount used for that year for making the reduction under section 87(3) in the case of that settlement.

Lastly, for completeness, s. 86A(9) provides some referential definitions.[24]

---

reasonable apportionment, is properly referable to property originating from the settlor shall be taken into account for the purposes of subsections (3) and (4) above."

24 "Expressions used in this section and section 10A have the same meanings in this section as in that section; and paragraph 8 of Schedule 5 shall apply for the construction of the references in subsection (5) above to property originating from the

## 8.11 Time limit for assessment

Section 10A(7) TCGA provides:

> Where this section applies in the case of any individual, nothing in any enactment imposing any limit on the time within which an assessment to capital gains tax may be made shall prevent any such assessment for the year of departure from being made in the taxpayer's case at any time before the end of two years after the 31st January next following the year of return.

The CG Manual provides:

> **26270. Assessment time limits** [October 2009]
> Where, however, a gain accrues in the tax year of departure from the UK after the date of the departure, this gain should be assessed by virtue of Section 2 TCGA 1992 in the year of departure. ESC D2 will not apply, see CG26300. In these circumstances to ensure there is sufficient time in which to assess such a gain, the time limit has been specifically extended where the individual satisfies the conditions of Section 10A TCGA 1992 (whether or not gains accrue which are chargeable under that section).
> The extended time limit permits gains accruing in the tax year of departure from the UK to be assessed at any time up to two years after 31 January next following the year of return to the UK notwithstanding any other time limit for the making of an assessment.
> If the conditions of Section 10A TCGA 1992 are not satisfied then the normal assessment time limits will apply.

## 8.12 Offshore funds

In the absence of express provision, s.10A TCGA would not apply to offshore funds as OIGs are not chargeable gains. Regulation 23 OFTR provides:

> (1) Section 10A of TCGA 1992 (temporary non-residents) applies for the purposes of this Part with the following modifications.
> (2) The section applies as if, in subsection (2)—
> (a) the reference to section 86A were omitted;

---

settlor as it applies for the purposes of that Schedule."

(b) for the reference to capital gains tax there were substituted a reference to income tax;
(c) in paragraph (a), for the reference to chargeable gains and losses there were substituted a reference to offshore income gains;
(d) in paragraph (b)—
   (i) for the reference to chargeable gains there were substituted a reference to offshore income gains;
   (ii) for the reference to section 13 or 86 there were substituted a reference to regulation 24;
(e) paragraph (c) were omitted; and
(f) for the reference to gains or, as the case may be, losses there were substituted a reference to offshore income gains.

(3) The section applies as if, in subsection (3)—
(a) for the reference to gains and losses there were substituted a reference to offshore income gains; and
(b) for the reference to any gain or loss there were substituted a reference to any offshore income gains.

(4) The section applies as if subsection (4) were omitted.

(5) The section applies as if, in subsection (5)—
(a) for the reference to gains and losses there were substituted a reference to offshore income gains;
(b) for the reference to any chargeable gain or allowable loss there were substituted a reference to an offshore income gain; and
(c) for the reference to section 10 or 16(3) there were substituted a reference to regulation 22(1)(b).

(6) The section applies as if subsection (6) were omitted.

(7) The section applies as if, in subsection (7), for the reference to capital gains tax there were substituted a reference to income tax.

(8) The section applies as if, in subsection (9ZA)—
(a) for the reference to foreign chargeable gains there were substituted a reference to offshore income gains to which regulation 19 applied; and
(b) the second sentence of that subsection were omitted.

(9) The section applies as if, in subsection (9B)—
(a) in paragraph (a)—
   (i) for the reference to section 87 or 89(2) there were substituted a reference to regulation 20;
   (ii) for the reference to chargeable gains there were substituted a reference to offshore income gains; and
(b) in paragraph (b) the references to subsections (2)(c) and (6) were omitted.

(10) The section applies as if, in subsection (9C)—
(a) for the reference to capital gains tax there were substituted a reference to income tax; and
(b) for the reference to chargeable gains there were substituted a reference to offshore income gains.

In the following discussion **“CGT s.10A”** means s.10A as it applies to

CGT, ie in its original form; **"OIG s.10A"** means s.10A as it applies to OIGs, ie amended as reg.23 directs. OIG s.10A TCGA provides:

> (1) This section applies in the case of any individual ("the taxpayer") if—
> *[This sets out the TNR conditions which are the same as CGT s.10A.]*
> (2) Subject to the following provisions of this section ~~and section 86A~~, the taxpayer shall be chargeable to ~~capital gains tax~~ income tax as if—
> (a) all the ~~chargeable gains and losses~~ offshore income gains which (apart from this subsection) would have accrued to him in an intervening year,
> (b) all the ~~chargeable gains~~ offshore income gains which under ~~section 13 or 86~~ regulation 24[25] would be treated as having accrued to him in an intervening year if he had been resident in the UK throughout that intervening year, and
> ~~(c) any losses which by virtue of section 13(8) would have been allowable in his case in any intervening year if he had been resident in the UK throughout that intervening year,~~
> were ~~gains or, as the case may be, losses~~ offshore income gains accruing to the taxpayer in the year of return.
> (3) Subject to subsection (4) below, the ~~gains and losses~~ offshore income gains which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return shall not include any ~~gain or loss~~ offshore income gains accruing on the disposal by the taxpayer of any asset if—
> (a) that asset was acquired by the taxpayer at a time in the year of departure or any intervening year when—
> (i) he was neither resident nor ordinarily resident in the UK, or
> (ii) he was resident or ordinarily resident in the UK but was Treaty non-resident;
> (b) that asset was so acquired otherwise than by means of a relevant disposal which by virtue of section 58, 73 or 258(4) is treated as having been a disposal on which neither a gain nor a loss accrued;
> (c) that asset is not an interest created by or arising under a settlement; and
> (d) the amount or value of the consideration for the acquisition of that asset by the taxpayer does not fall, by reference to any relevant disposal, to be treated as reduced under section 23(4)(b) or (5)(b), 152(1)(b), 153(1)(b) 162(3)(b) or 247(2)(b) or (3)(b).
> ~~(4) Where—~~

25 See 32.13 (OIG s.13 charge).

~~(a) any chargeable gain that has accrued or would have accrued on the disposal of any asset ("the first asset") is a gain falling (apart from this section) to be treated by virtue of section 116(10) or (11), 134 or 154(2) or (4) as accruing on the disposal of the whole or any part of another asset, and~~

~~(b) the other asset is an asset falling within paragraphs (a) to (d) of subsection (3) above but the first asset is not,~~

~~subsection (3) above shall not exclude that gain from the gains which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return.~~

(5) The ~~gains and losses~~ offshore income gains which by virtue of subsection (2) above are to be treated as accruing to the taxpayer in the year of return shall not include ~~any chargeable gain or allowable loss~~ an offshore income gain accruing to the taxpayer in an intervening year which, in the taxpayer's case, has fallen to be brought into account for that year by virtue of ~~section 10 or 16(3)~~ regulation 22(1)(b).[26]

~~(6) The reference in subsection (2)(c) above to losses allowable in an individual's case in an intervening year is a reference to only so much of the aggregate of the losses that would have been available in accordance with subsection (8) of section 13 for reducing gains accruing by virtue of that section to that individual in that year as does not exceed the amount of the gains that would have accrued to him in that year if it had been a year throughout which he was resident in the UK.~~

(7) Where this section applies in the case of any individual, nothing in any enactment imposing any limit on the time within which an assessment to ~~capital gains tax~~ income tax may be made shall prevent any such assessment for the year of departure from being made in the taxpayer's case at any time before the end of two years after the 31st January next following the year of return.

(8) *[This sets out the definitions of "intervening year" "relevant disposal" and "the year of departure" which are the same as CGT s.10A]*

(9) For the purposes of this section an individual satisfies the residence requirements for a year of assessment—

(a) if, during any part of that year of assessment, he is resident in the UK and not Treaty non-resident, or

(b) if he is ordinarily resident in the UK during that year of assessment, unless he is Treaty non-resident during that year of assessment.

(9ZA) If—

(a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies

26 See 30.15 (OIG non-residence defence).

to the taxpayer for the year of return, and
(b) the taxpayer is not domiciled in the UK in that year,
any ~~foreign chargeable gains~~ offshore income gains to which regulation 19 applied[27] falling within subsection (2)(a) which were remitted in an intervening year are treated as remitted in the year of return.
~~For this purpose "foreign chargeable gains" has the meaning given by section 12(4).~~
(9B) Where this section applies in the case of any individual in circumstances in which one or more intervening years would, but for his being Treaty non-resident during some or all of that year or those years, not be an intervening year, this section shall have effect in the taxpayer's case—
(a) as if subsection (2)(a) above did not apply in the case of any amount treated by virtue of ~~section 87 or 89(2)~~ regulation 20 as an amount of ~~chargeable gains~~ offshore income gains accruing to the taxpayer in any such intervening year, and
(b) as if any such intervening year were not an intervening year for the purposes of subsections ~~(2)(b) and (c) and~~ (6) above.
(9C) Nothing in any double taxation relief arrangements shall be read as preventing the taxpayer from being chargeable to ~~capital gains tax~~ income tax in respect of any of the ~~chargeable gains~~ offshore income gains treated by virtue of subsection (2)(a) above as accruing to the taxpayer in the year of return (or as preventing a charge to that tax from arising as a result).

Regulation 23 OFTR only amends s.10A TCGA. It does not amend the definition of "DTR arrangements" which is in s.288 TCGA.[28] However that definition is subject to context, and it is suggested that the context requires that the reference here includes any DTA which confers relief from OIGs.

## 8.13 DTA and other short term non-residence rules

Some DTAs impose a short-term non-residence rule in their CGT article. This is not in the OECD model treaty, but about one third of UK treaties have a restriction of this kind.

Treaties are easier to follow if one notes in the text which contracting state is which. A variety of wordings are used and Italy will serve as an

27 See 32.6 (OIG remittance basis).
28 See 8.4.2 ("DTR arrangements" - IT) and 8.4.3 ("DTR arrangements" - CGT).

example. We are considering a claim for UK CGT relief by a person treaty resident in Italy. Article 13 of the UK/Italy DTA provides:

> (4) Gains from the alienation of any property other than that referred to in the preceding paragraphs of this Article shall be taxable only in the Contracting State of which the alienator is a resident [Italy]

This is (more or less) the OECD model form; the restriction then follows:

> (5) The provisions of paragraph (4) of this Article shall not affect the right of a Contracting State [UK] to levy according to its law a tax on gains from the alienation of any property derived by an individual who:
> (a) is a resident of the other Contracting State [Italy]; and
> (b) has been a resident of the first-mentioned Contracting State [UK] at any time during the five years immediately preceding the alienation of the property; and
> (c) is not subject to tax on those gains in the other Contracting State [Italy]

This is not strictly a *temporary* non-residence rule as it applies to those who do not return to the UK, but the idea is similar.

The IHT deemed domicile rule can be considered in part a similar short term non-residence rule, since its effect is that a person who ceases to be UK resident (or domiciled) continues for a 3 or 4 year period to be regarded as UK domiciled for IHT purposes and so within the scope of IHT.

CHAPTER NINE

# THE REMITTANCE BASIS

## 9.1 Remittance basis – Introduction

Income tax and CGT employ two types or bases of assessment:
(1) An **arising basis** under which tax is charged on the amount of income or gains which arise.
(2) A **remittance basis** under which tax is charged on the amount of income or gains which are received in the UK.
A remittance basis applies (in short) when a foreign domiciliary receives:
(1) Foreign income and gains
(2) Deemed income/gains under various anti-avoidance provisions: the settlement provisions, the TAA provisions and s.87 TCGA.
Before 2008 there were differences between the remittances bases for RFI, employment income and CGT. From 2008/09 there is one common remittance basis for all three, which is also the basis of the remittance basis for the anti-avoidance provisions. I use the following self-explanatory terminology:
(1) "**The ITA remittance basis**" (which applies from 2008/09).
(2) "**The pre-2008 remittance basis**" (which applied until 2008/2009); more specifically, one might refer to "**the pre-2008 RFI, employment income or CGT remittance basis**".
For rates of tax see 41.1 (Rates of income tax). For the position of trustees of IP trusts where the life tenant is a remittance basis taxpayer, see 23.2.3 (Life tenant remittance basis taxpayer).

## 9.2 HMRC guidance

Most of the HMRC guidance is to be found in section 3 of the vast RDR Manual. The first edition was published 31 March 2009, a second edition August 2009 and an online version including paragraph numbering was published in the Manuals section of the HMRC website in about June 2010.

The RDR Manual frequently makes its point by examples. In some cases the examples are completely straightforward and would have been better omitted for the sake of brevity.[1] In almost all cases the examples are padded out with many extraneous and irrelevant facts. (No doubt in the spirit of *The Mikado*, "intended to give artistic verisimilitude to an otherwise bald narrative".) This is about as unhelpful a method of explaining statutory provisions as could be devised. The consequence is to make it quite unnecessarily difficult to identify the important points from the examples. I try to deal with this by recasting the example so the reader can more easily see the relevant point; where a wholesale rewrite is needed, I set the original text of the manual in a footnote, so that the reader can see what I have done.

The RDR Manual was out of date when published, because it took no account of the changes (retrospective and prospective) of the FA 2009. The 2nd edition was not up to date because of more retrospective legislation in the F(no.1)A 2010. Of course, no guidance can ever be up to date while tax reform continues at its present frenetic pace.

Earlier guidance was in three lengthy sets of questions and answers:
"**December 2008 Qs & As**" published 10 December 2008.
"**January 2009 Qs & As**" published 13 January 2009.
"**March 2009 Qs & As**" published 3 March 2009.
Most of the Qs and As are now superceded by the RDR Manual but they are still sometimes relevant.[2]

Guidance published before then, under the name of FAQs, is now almost all of historic interest only.

## 9.3 "Foreign income and gains"

Section 809Z7 ITA provides:

> (1) This section applies for the purposes of this Chapter.

1 But for the sake of completeness, and just in case some readers should find them helpful, I sometimes set them out in footnotes.

2 HMRC has removed the Qs & As from their website but they are accessible on www.kessler.co.uk.

These are chapter-wide definitions though in accordance with the principles of Plain English drafting, the legislation contains occasional and somewhat unnecessary pointers to the definitions.[3]

> (2) An individual's "foreign income and gains" for a tax year are—
> (a) the individual's relevant foreign earnings for that year,
> (b) the individual's foreign specific employment income for that year,
> (c) the individual's relevant foreign income for that year, and
> (d) if the individual is not domiciled in the UK in that year, the individual's foreign chargeable gains for that year.

### 9.3.1 *Relevant foreign income*

Section 830(1) ITTOIA provides the definition of "RFI":

> In this Act "relevant foreign income" means income which
> (a) arises from a source outside the UK, and
> (b) is chargeable under any of the provisions specified in subs.(2) (or would be so chargeable if s.832 did not apply to it).

Subsections (2)–(4) set out a list of the categories of RFI, not repeated here. It includes almost all foreign income, including trading income, property income, interest and dividends. This is income formerly taxed under Schedule D Cases IV and V. "Relevant foreign income" is not a helpful label but it is difficult to think of a better one.

A non-resident's income is not RFI as (if it arises from a non-UK source) it is not "chargeable" and does not meet the condition in s.830(1)(b).

### 9.3.2 *Relevant foreign earnings ("RFE")*

Section 809Z7(3) ITA provides the definition of RFE:

> An individual's "relevant foreign earnings" for a tax year are—
> (a) if the individual is ordinarily UK resident in that year, the

3 Eg s.809C(6) ITA: "See s.809Z7 for the meaning of an individual's foreign income and gains for a tax year".

individual's chargeable overseas earnings[4] for that year, and
(b) otherwise, the individual's general earnings within s.26(1) of ITEPA 2003 for that year (non-UK earnings).

### 9.3.3 *Foreign specific employment income*

Section 809Z7(4) ITA incorporates the definition from ITEPA:

> An individual's "foreign specific employment income" for a tax year is such of the individual's specific employment income for that year as is are regarded as foreign securities income for the purposes of s.41A of ITEPA 2003.

Foreign specific employment income is not discussed in this book.

### 9.3.4 *Foreign chargeable gains*

Section 12(4) TCGA provides a commonsense definition:

> In this section "foreign chargeable gains" means chargeable gains accruing from the disposal of an asset which is situated outside the UK.

This is only a section-wide definition, so it has to be repeated or incorporated when the expression is used elsewhere.

Section 809Z7(5) ITA incorporates this definition:

> An individual's "foreign chargeable gains" for a tax year are the individual's foreign chargeable gains (within the meaning of s.12(4) of TCGA 1992) accruing to the individual in that year.

### 9.3.5 *Capital/income terminology in remittance basis context*

One might start off by thinking that a remittance of income is subject to income tax and a remittance of capital is not. It is not that simple. The terminology of "capital" and "income" in the context of the remittance

4 Section 809Z7(7) provides: "In subs.(3)(a) 'chargeable overseas earnings' has the same meaning as in s.22 of ITEPA 2003 (see s.23 of that Act)." See 12.11 (Chargeable overseas earnings).

basis is potentially confusing.

A sum received in the UK may not be taxable under the remittance basis because it is derived not from income but from some fund easily identified as capital in the hands of the taxpayer, such as a gift or inheritance, or borrowing. In cases in this category it makes sense to say that the remittance is tax free because it is one of capital.

A sum received in the UK may not be taxable under the remittance basis because:

(1) the donor was non-resident when the remitted sum accrued; or
(2) the remitted sum has already been subject to income tax.

Such sums might be said to be "income" in the normal sense of the word. These examples show that a remittance of a sum which is income in nature may nevertheless be remittance free of tax under the remittance basis.

(3) Conversely, suppose a remittance basis taxpayer accumulates income offshore for many years; the accumulated fund might be said to be their "capital" in the normal sense of the word. Yet for the purposes of the remittance basis, it is in principle taxable if remitted.[5] Perhaps it is better described as "income".

It is best not to use the terminology of capital/income in any of cases (1) to (3): it is unnecessary to do so.

## 9.4 History of the remittance basis

It is not necessary for a practitioner to know the history of the remittance basis but it makes an interesting story and is helpful to understand the

5 See (if authority is needed) *Walsh v Randall* 23 TC 55:
"... the accumulated income which he had derived from the drawings of the firm of which he was a sleeping partner. I have no doubt that he had come to regard this sum of money as capital. It was invested savings and it was in that sense capital, unless it can be said that, for instance, a professional man's invested savings never are and never become capital. I should have thought it was quite a harmless thing to use the word 'capital' in relation to a professional man, or indeed to any other private person. I think that word may very definitely have a meaning with regard to ordinary private persons and may be correctly used to describe some part of their property. That, however, is not, for Income Tax purposes, the test. To the Crown the [unremitted] income of a person residing in the UK is, as I gather, always income until it is taxed."

background to the older cases.[6]

Until 1914 all foreign income was taxed on a remittance basis: s.100 Income Tax Act 1842. Since then the remittance basis has been withdrawn, in stages, except for foreign domiciliaries. In 1914 income from "securities, stocks, shares, or rents in any place out of the UK" was brought onto an arising basis: s.5 FA 1914. This did not apply to foreign domiciliaries and non-ordinarily resident British subjects. Even those who were domiciled and ordinarily resident in the UK retained the remittance basis for any foreign source income which did not consist of securities or rents. Hence the need for cases to decide whether trust income was to be regarded as income arising from securities or from the trust.[7] In 1940 the general remittance basis was further restricted, to (a) income from offshore trades, professions or vocations, and (b) income from offshore offices, employments or pensions: s.19 FA 1940. The exception was intended, perhaps, to encourage foreign trade. However, it did enable tax planning by splitting a single mixed UK and foreign based trade into separate UK and foreign source trades, the latter qualifying for the remittance basis. An arrangement of this kind was held to be successful in *Newstead v Frost* 53 TC 525. So in 1974 this was abolished: ss.22, 23 FA 1974.

The same rules applied to companies as to individuals, until the introduction of corporation tax in 1965, which put UK resident companies onto an arising basis.

In 2008 the remittance basis was recast, and restricted by the remittance basis claim charge.

## 9.5 Who qualifies for the remittance basis?

After a (somewhat unnecessary) overview in accordance with the principles of plain English drafting,[8] s.809B, 809D and 809E ITA set out three categories of individuals to whom the remittance basis applies:

---

6 See John Avery Jones, "Taxing Foreign Income from Pitt to the Tax Law Rewrite—The Decline of the Remittance Basis", *Studies in the History of Tax Law* (Vol 1 2004), accessible *www.kessler.co.uk*.

7 See 23.1 (Taxation of life tenant).

8 Section 809A ITA provides: "This Chapter provides for an alternative basis for charge in the case of individuals who are not domiciled in the UK or are not ordinarily UK resident".

(1) Section 809B is the main category, those who make a claim for the remittance basis. I refer to these as "**remittance basis claimants**".

The other two categories are classes of *de minimis* taxpayers, defined with complex and pernickety detail.

(2) Section 809D applies to individuals whose unremitted foreign income and gains are less than £2,000. I refer to these as "**sub-£2k taxpayers**".

(3) Section 809E applies to those with no (or virtually no) taxable (UK source) income and gains who do not remit any foreign income or gains. I refer to these as "**non-taxpayers**".

The advantages of being in one of the two de minimis categories are as follows:

(1) no claim is needed and so the taxpayer may not need to make a tax return.

(2) the remittance basis claim charge does not apply, personal allowances remain available, and the individual is not forced to make a CGT loss election.

I refer to the three groups together as "**remittance basis taxpayers**". HMRC use the term "remittance basis user". (Since about 2001, HMRC do not like to use the word "taxpayer".)

## 9.6 Remittance basis claimants: s.809B

### 9.6.1 *Entitlement to claim remittance basis*

Section 809B ITA provides:

> (1) This section applies to an individual for a tax year if the individual-
> (a) is UK resident in that year,
> (b) is not domiciled in the UK in that year or is not ordinarily UK resident in that year, and
> (c) makes a claim under this section for that year.
> (2) The claim must contain one or both of the following statements-
> (a) that the individual is not domiciled in the UK in that year;
> (b) that the individual is not ordinarily UK resident in that year.

Thus two categories of individual may claim the remittance basis:

(1) A UK resident foreign domiciliary.

(2) A person who is:

(a) resident but not ordinarily resident in the UK; and
(b) domiciled in the UK (or they would fall within the first category anyway).

Category (2) must be a rare case. HMRC agree. The RDR Manual 32220 provides:

> **32220 Counting years of UK residence (seven out of nine) - Section 809 ITA 2007** [July 2010]
> ...
> Most long-term UK Residents will also be Ordinarily Resident in the UK, so most, although not necessarily all, individuals who pay the remittance basis charge will use the remittance basis on account of their non-dom status. Cases involving individuals who are UK-domiciled but claim to be NOR and who pay the remittance basis charge should be referred to CAR PTI Advisory for a review of their NOR status claim.

Category (2) does not qualify for the CGT remittance basis. It is suggested that the law could be simplified, and the anomaly fairly corrected, by abolishing this category and bringing such persons on to the arising basis. However the 2008 reforms chose not to do this, so the anomaly is likely to remain for the foreseeable future. For simplicity I will on most occasions ignore this possibility and simply refer to "foreign domicile".

### 9.6.2 *Is a claim worthwhile?*

A claim gives the advantages of the remittance basis but has the following drawbacks:
(1) For all claimants: loss of personal allowances.
(2) For long-term residents: the £30k remittance basis charge.
(3) The need to make a CGT loss election.
(4) Remitted dividends are taxed at a higher rate than dividends taxed on an arising basis.

The effect of the £30k remittance basis charge is to withdraw the remittance basis from long-term residents except the most wealthy, since a claim is not likely to be worthwhile for individuals whose income is much less than £150,000 in the year in question, though the position varies a great deal from one case to another.

### 9.6.3 *Is a claim worthwhile: US taxpayers*

Bober states:

> Generally, the ability to claim double tax relief will mean that an adult US citizen (or green- card holder) who is a long-term UK resident will achieve a better overall tax result (meaning that less tax will be payable overall) by being subject to UK tax on the arising basis. This is because the individual will generally be subject to US tax on a worldwide basis anyway. For many, while UK tax rates are in excess of US tax rates, the additional UK tax that will be payable on the arising basis will not be in excess of the GBP30,000 RBC payable if the remittance basis claim is made. This will not always be the case, though, as:
>
> - the individual may have specific issues meaning that some of their foreign income or gains are sheltered from the US tax net, and/or
> - the individual might be sufficiently wealthy that the difference between the higher UK tax rates and the US tax rate will mean that paying the GBP30,000 is worthwhile.
> - In addition, some US citizens (or green-card holders) may prefer to pay tax on the remittance basis in the UK rather than try to determine the UK tax treatment with respect to some of the offshore investments they have, and make the necessary disclosure. Since the US and the UK tax systems are different the fact that an individual has to submit a US tax return showing worldwide income and gains will not necessarily mean he or she is in a position to complete a UK return without incurring significant additional compliance costs. Paying the RBC will avoid the need for this work and may result in privacy gains.[9]

### 9.6.4 *How to claim and time limits*

The claim is made by ticking the relevant box in the tax return.[10] Section 809B(3) ITA provides:

> Sections 42 and 43 of TMA 1970 (procedure and time limit for making claims), except s.42(1A) of that Act, apply in relation to a claim under this section as they apply in relation to a claim for relief.

The RDR Manual provides:

---

9 Bober "The remittance basis charge – US issues" (2001) 9 TQR p.8

10 Box 27 form SA109 (Residence remittance basis, etc) 2009/10.

**32030 Claiming the remittance basis: Claims - Time Limits** [July 2010]
The time limits for making claims are set out in s.43 TMA 1970.
The general time limit as set out in s.43(1) TMA70 for making a claim also applies to making a claim for the remittance basis.
... The present limits are changing as a result of changes introduced at Schedule 39 FA 2008. From 1 April 2010 the new time limits will be 4 years after the end of the year of assessment to which it relates. Please refer to the Self Assessment Claims Manual (SACM) for further details.
The Taxes Acts may prescribe a longer or shorter period in respect of certain claims, and if that is the case then that time limit will override the general rule of s.43(1).
S.43(2) extends the time limit in certain circumstances. This information is held in the Self Assessment Claims Manual (SACM 9000 onwards).

The RDR Manual provides:

**32020 Claiming the remittance basis: Making a claim** [July 2010]
...
If the return is subsequently amended, the claim may be included then or a previously made claim may be amended or deleted (s.42(5) TMA 1970). However when the time period for making an amendment has passed, the claim may not be withdrawn even if the making of the claim turns out to have been an error. This is because error or mistake relief does not apply to claims made to use the remittance basis under s.809B ITA 2007 (s.33(2A)(c) TMA 1970).

It is possible to claim the remittance basis in one year and not in another year, thus opting in and out of the remittance basis.

## 9.7 Sub-£2k taxpayer: s.809D

Section 809D ITA provides:

(1) This section applies to an individual for a tax year if-
(a) the individual is UK resident in that year,
(b) the individual is not domiciled in the UK in that year or is not ordinarily UK resident in that year, and

(c) the individual's unremitted[11] foreign income and gains for that year are less than £2,000.

unless condition A or condition B is met.

(1A) Condition A is that the individual is not domiciled in the UK in that year and conditions A to F in section 828B are met.[12]

(1B) Condition B is that the individual gives notice in a return under section 8 of TMA 1970 that this section is not to apply in relation to the individual for that year.

Why should anyone wish to make a claim under s.809D(1B) and move from the remittance basis to the arising basis? The reason may be that the remittance basis (for those without very large incomes) involves simply too much trouble and expense to operate: it is more cost effective to pay tax on an arising basis. Another reason might be to facilitate double taxation relief.

### 9.7.1 *Interaction of £2k limit with split-year concessions*

The RDR Manual provides:

**32120 Below £2,000 threshold users: Years of arrival and departure - interaction with Extra Statutory Concession (ESC) A11**

ESC A11 may apply to an individual for the year in which they arrive or leave the UK; it effectively splits the tax year into periods of residence and non-residence and computes liability accordingly. This generally means that foreign income from the period of "non-residence" is not subject to UK tax.

However in considering whether the "below £2,000 threshold" limit applies in respect of use of the remittance basis of taxation under ITA07/s809D, the level of unremitted foreign income and gains for the

11 Section 809D(2) provides a commonsense definition of "unremitted":

"The amount of an individual's "unremitted" foreign income and gains for a tax year is—

(a) the total amount of what would (if this section applied) be the individual's foreign income and gains for that year, minus

(b) the total amount of those income and gains that are remitted to the United Kingdom in that year.."

12 This relates to lower-paid employees see 12.30 (Lower-paid employee exemption). I do not understand the reason for condition A.

entire tax year must be taken into account.

This is straightforward but the Manual gives an example to drive the point home:[13]

> F enters the UK on 20 October 2010, and is resident for the tax year 2010-11. He claims[14] split-year treatment under ESC A11.
> F's foreign income is as follows:
> 6 April to 19 October 2010 £2,200.
> 20 October 2010 to 5 April 2011 £1,300.
> F remits £1,000 to the UK in that year.
> At the end of the year his total unremitted foreign income is £2,500.

The HMRC analysis is as follows:

> Even though F has claimed split-year treatment for 2010-11, he still has to include any foreign income that arose before he entered the UK.
> As F's unremitted foreign income is above the £2k threshold he cannot use the remittance basis under s809D. If he wishes to use the remittance basis he will need to claim under ITA07/s809B, and will lose his personal allowances and the annual exempt amount.

In practice, F (if well advised) would not make a claim for the remittance basis but could save a few pounds of tax by remitting £1,500.01 to the UK instead of £1,000.

The same applies for chargeable gains under ESC D2. But in practice it hardly matters.

### 9.7.2 *Procedure*

HMRC Business Brief 17/09 provides:

> There is a new box on the supplementary "Residence and Remittance Basis etc." pages (SA109) for such individuals to advise HMRC of their use of the remittance basis under section 809D. This ensures they continue to get their Personal Allowances and the Annual Exempt

13 I have slightly altered the wording of the example for enhanced clarity.

14 *Sic*. It would be more accurate to say "qualifies for split-year treatment" since the concessions do not need a claim. But nothing turns on that.

Amount.

This is box 28 in the 2008/09 SA100 form.

### 9.7.3 *Concession for remittances by sub-£2k taxpayer*

HMRC Business Brief 17/09 provides:

> **Remittance basis users whose foreign income and gains is less than £2,000**
> Individuals making use of section 809D are still taxable on any foreign income or gains remitted to the UK. ...
> It is recognised that some individuals, in particular those on low income, may make small cash remittances to the UK, out of foreign income or gains, and as a result have to complete a Self Assessment tax return possibly to pay only a small amount of tax. This is particularly the case where foreign tax has already been paid on the income or gains. Where an individual who is making use of section 809D remits less than a total of £500 in cash, which arises from foreign income or gains, into the UK during the tax year, then HMRC will accept that such an individual does not need to make a Self Assessment Tax return simply to pay the tax on those cash remittances. However where such an individual is required to complete a Self Assessment tax return for any other reason, or HMRC serves them with a notice to make a return, then they will need to include those remittances on the return and pay the tax due. This practice will apply for 2008-09 and subsequent years.

This is a concession (the word concession is not used, perhaps because HMRC are not now supposed to issue concessions). A concession which only applies if HMRC chose not to require a SA return is a new development in tax, and setting the limit at £500 is difficult to defend, but the manner of introduction of the concession precluded any possibility of debate on it.

## 9.8 Non-taxpayers: s.809E

Section 809E(1) ITA provides:

> This section applies to an individual for a tax year if—
> (a) the individual is UK resident in that year,

> (b) the individual is not domiciled in the UK in that year or is not ordinarily UK resident in that year,
> (c) for that year the individual either has no UK income or gains or has no UK income and gains other than taxed investment income not exceeding £100.
> (d) no relevant income or gains are remitted to the UK in that year, and
> (e) either—
>   (i) the individual has been UK resident in not more than 6 of the 9 tax years immediately preceding that year, or
>   (ii) the individual is under 18 throughout that year.
>
> unless the individual gives notice in a return under s.8 of TMA 1970 that this section is not to apply in relation to the individual for that year.

I refer to a person within s.809E as **"a non-taxpayer"**. Thus there are five requirements which must all be met. Requirements (a), (b) and (e) do not need comment.

### 9.8.1 *(Virtually) no UK income/gains*

The requirement in s.809E(1)(c) is:

> for that year the individual either has no UK income or gains or has no UK income and gains other than taxed investment income not exceeding £100.

Section 809E(2) ITA provides a commonsense definition:

> For the purposes of subs.(1)(c) the individual's "UK income and gains" for the tax year are the individual's income and chargeable gains for that year other than what would (if this section applied) be the individual's foreign income and gains for that year.

There is a paltry exemption for £100 "taxed investment income". This term is defined in s.809E(2A) ITA:

> For the purposes of subsection (1)(c) "taxed investment income" means UK income or gains consisting of payments within s.946 from which a sum representing income tax has been deducted.

### 9.8.2 *No relevant income or gains remitted*

The requirement in s.809E(1)(d) is:

> (d) no relevant income or gains are remitted to the UK in that year

Section 809E(3) ITA provides the definition:

> For the purposes of subs.(1)(d) "relevant" income and gains are—
> (a) what would (if this section applied) be the individual's foreign income and gains for the tax year mentioned in subs.(1), and
> (b) the individual's foreign income and gains for every other tax year for which s.809B or 809D or this section applies to the individual.

Para 85 Sch 7 FA 2008 contains transitional provisions for pre-2008 income and gains:

> (1) In s.809E(3)(b) of ITA 2007, the reference to a tax year for which s.809B, 809D or 809E of that Act applies to an individual includes a tax year (not later than the tax year 2007-08) in which the individual—
> (a) was UK resident, but
> (b) was not domiciled in the UK or was not ordinarily UK resident.
> (2) In relation to such a tax year, the reference there to the individual's foreign income and gains includes the individual's relevant foreign income if (and only if)—
> (a) the individual made a claim under s.831 of ITTOIA 2005 for the year, or
> (b) s.65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the year.

### 9.8.3 *What is the purpose of s.809E?*

EN FB 2008 provides:

> Individuals entitled to claim the remittance basis who have no UK income or gains, and who don't remit any foreign income or gains, won't have to claim the remittance basis in years they are not liable to the RBC. This avoids them having to complete a self assessment return only so they can claim the remittance basis and then have no tax to pay.

There will not be many non-taxpayers within s.809E – mainly spouses accompanying their partners, children and some students, perhaps.

## 9.9 Time of foreign domicile

Section 809B(1) ITA requires (in short) that the foreign domiciliary is not domiciled in the UK in the year that the income arises.

It is an interesting question what is the position if a person changes domicile during a year. The 2008 reforms declined the opportunity to address the question, perhaps because that would have required a consideration of the unsatisfactory ESC A11, raising too many difficult questions.

## 9.10 Effect of remittance basis claim on personal allowances

Section 809G ITA disapplies IT personal allowances for remittance basis claimants:

> (1) This section applies if s.809B (claim for remittance basis to apply) applies to an individual for a tax year.
> (2) For that year, the individual is not entitled to-
> (a) any allowance under Chapter 2 of Part 3 (personal allowance and blind person's allowance),
> (b) any tax reduction under Chapter 3 of that Part (tax reductions for married couples and civil partners), or
> (c) any relief under s.457, 458 or 459 (payments for life insurance etc).

This does not apply to remittance basis taxpayers in the de minimis categories (sub-£2k taxpayers and non-taxpayers): they retain their allowances.

The editor of *Taxation* comments acerbically on s.809G(2)(c):

> So what are these valuable reliefs which it would be unfair to allow those claiming the remittance basis to enjoy? They are relief from tax on half of the premiums paid to trade unions and police organisations for superannuation, life insurance or funeral benefits, or to the employer so that benefits can be paid after the employee's death to their dependants, but limited to £100 a year of relief in each case.

> What on earth is the point of removing a relief like that for the non-domiciles? It is pointless complexity for the sake of a few tenners in tax which will have no impact whatsoever on the non-domiciles concerned. Unless there is some issue related to European law, or human rights (which seem to be the normal culprits in these situations) I really cannot see why the parliamentary draftsman should have been troubled with the need to include them. And, frankly, if there is some such problem, then given the minuscule levels of relief they offer even to those not on the remittance basis, wouldn't it be simpler to just abolish the sections altogether? That would at least be simplification.[15]

Likewise s.3 TCGA[16] disapplies the CGT annual exemption:

> (1) An individual shall not be chargeable to capital gains tax in respect of so much of his taxable amount for any year of assessment as does not exceed the exempt amount for the year.
> (1A) Subs.(1) does not apply to an individual for a tax year if s.809B of ITA 2007 (claim for remittance basis to apply) applies to the individual for that year.

This applies even to a person who is UK domiciled but not ordinarily resident, even though such a person pays CGT on an arising basis.

In consequence the usual restrictions on reporting limits are disapplied. Section 3A TCGA provides:

> (1) Where in the case of an individual—
> (a) the amount of chargeable gains accruing to him in any year of assessment does not exceed the exempt amount for that year, and
> (b) the aggregate amount or value of the consideration for all chargeable disposals of assets made by him in that year does not exceed four times the exempt amount for that year,
>
> a statement to that effect is sufficient compliance with so much of any notice under section 8 of the Management Act as requires information for the purposes of establishing the amount in which he is chargeable to capital gains tax for that year. ...
> (5A) Subsection (1) does not apply to an individual for a tax year if—
> (a) section 809B of ITA 2007 (claim for remittance basis to apply), or

15 Mike Truman, *Taxation* 21 Feb 2008 p.161.
16 Flagged (somewhat unnecessarily) in s.809G(3) ITA.

(b) section 16ZB below (certain chargeable gains charged on remittance basis),

applies to the individual for that year.

Personal allowances which are disapplied for remittance basis claimants may be restored under a DTA. See 41.7.4 (Personal allowances under DTAs: remittance basis claimants).

## 9.11 Remittance basis claim charge

### 9.11.1 *"Long-term UK resident"*

Section 809H ITA provides:

**809H Claim for remittance basis by long-term UK resident: charge**

(1) This section applies if—

(a) s.809B (claim for remittance basis to apply) applies to an individual for a tax year ("the relevant tax year"),

(b) the individual is aged 18 or over in the relevant tax year, and

(c) the individual has been UK resident in at least 7 of the 9 tax years immediately preceding the relevant tax year.

I adopt the statutory terminology and refer to individuals to whom s.809H(1)(c) applies as "**long-term residents**".

The period of residence might be continuous or broken.

While an individual is under 18:

(1) they are not subject to the £30k charge; but
(2) any UK resident years do count in determining their status as a long-term resident.

In the year a long-term resident attains 18, the charge is payable in full. The RDR Manual 32230 provides a straightforward example of a case involving a minor.[17]

---

17 **32230 Counting years of UK residence - Minors**

...

*Example (Pranav)*

"P was born on 23 October 1991. He came to the UK as a school boarder in August 2001 (tax year 01-02). He is domiciled outside the UK. He has stayed in education in the UK for every tax year since.

The RDR Manual provides:

> **32240 Interaction with Extra Statutory Concession (ESC) A11**
> ... Even if this "split-year" treatment is given, these years [of arrival and departure] count as a full year of residence in determining whether an individual meets the long-term residents rule, that is, whether he has been in the UK for at least 7 out of the 9 tax years immediately preceding the current tax year.

The RDR Manual 32220 offers a straightforward example of a case involving a split year.[18]

---

| 00-01 Not Resident | 06-07 Resident |
| 01-02 Resident | 07-08 Resident |
| 02-03 Resident | 08-09 Resident |
| 03-04 Resident | 09-10 Resident |
| 04-05 Resident | |

In 08-09 P has foreign income of £300,000 and he claims to use the remittance basis in that year. He is a long-term resident in the UK as he has been UK resident for eight years, but as he is under 18 he may use the remittance basis in 08-09 without paying the remittance basis charge.

In October 2009 (tax year 2009-10) P turns 18. He has foreign income of £400,000. If he wishes to claim the remittance basis for that tax year he will be liable to the remittance basis charge."

Of course the (implausibly large) income specified is strictly irrelevant to the application of the remittance basis charge: the position is the same whatever is P's income.

18 **32220 Counting years of UK residence (seven out of nine) - Section 809 ITA 2007** [July 2010]

...

*"Example (Dominic)*

*D*, a non-dom, is resident in the UK for the tax year 2008-2009.

- D came to the UK in May 1999 (99-00 tax year)
- He left to live in Spain in January 2001 (00-01 tax year)
- He returned to the UK on 12 October 2002 (02-03 tax year)
- He left to work in the Republic of Ireland on 29 April 2004 (04-05 tax year)
- He then returned to the UK on 16 May 2006 (06-07 tax year) and has been resident here since.

D is resident in the UK for the current tax year (08-09). He has chargeable overseas earnings of £150,000 in that year, paid into his Spanish bank account and he does not remit anything. For the last nine tax years he has been resident/not resident as follows:

### 9.11.2 *Nomination of income and gains*

Section 809C ITA provides:

> **809C Claim for remittance basis by long-term UK resident: nomination of foreign income and gains to which s.809H(2) is to apply**
> (1) This section applies to an individual for a tax year if the individual-
> (a) is aged 18 or over in that year, and
> (b) has been UK resident in at least 7 of the 9 tax years immediately preceding that year.
> (2) A claim under s.809B by the individual for that year must contain a nomination of the income or chargeable gains of the individual for that year to which s.809H(2) is to apply.

Following the statutory terminology,[19] I refer to the income or gains so nominated as "**nominated income/gains**". Section 809C continues:

> (3) The income or chargeable gains nominated must be part (or all) of the individual's foreign income and gains for that year.
> (4) The income and chargeable gains nominated must be such that the relevant tax increase does not exceed £30,000.

Section 809C(5) ITA provides a commonsense definition of "the relevant tax increase":

> "The relevant tax increase" is-
> (a) the total amount of income tax and capital gains tax payable by the individual for that year, minus

---

1 99-00 Resident
2 00-01 Resident (year he went to Spain)
3 01-02 Non Resident
4 02-03 Resident
5 03-04 Resident
6 04-05 Resident (year he went to Ireland)
7 05-06 Non Resident
8 06-07 Resident
9 07-08 Resident

D is a long term resident; if he claims the remittance basis in 2008-2009 he will be liable for the remittance basis charge."

19 Section 809H(3) ITA provides: "'Nominated' income or chargeable gains means income or chargeable gains nominated under s.809C in the individual's claim under s.809C for the relevant tax year." The definition is repeated in s.809I(3) and s.809J(3) ITA. (If a chapter-wide definition had been used the repetition would have been unnecessary.)

(b) the total amount of income tax and capital gains tax that would be payable by the individual for that year apart from s.809H(2).

EN Amendments to the Remittance Basis Charge explains the reason for the £30k cap in s.809C(4):

> This stops an individual from nominating too much income and gains and as a result paying a remittance basis charge of more than £30,000.

The legislation does not say what happens if an individual fails to nominate any income/gains or if they nominate income/gains but the relevant tax increase exceeds £30k. The RDR Manual provides:

> **32310 Nomination of foreign income and gains - overview**
> ... Any claim that does not include a nominated amount is not valid. ...
> **32330 Relevant tax increase**
> The remittance basis charge cannot exceed £30,000. Any nominations which produce an excessive relevant tax increase may invalidate the claim under section 809B to be taxed on the remittance basis.
> If this occurs you should try to contact the taxpayer, or their agent to advise them of their excessive nomination and to assist them to amend their claim to ensure it is valid. To do that the amount of nominated income or gains must be adjusted so that the relevant tax increase equals £30,000.

The following example from the RDR Manual shows how complicated this will be:

> **32350 Relevant tax increase - Example 2** [July 2010]
> ...
> Relevant tax increase: Example 2 (Lorna)
> L, a non domiciled long-term UK resident makes a claim to use the remittance basis in 201X and must pay the £30,000 remittance basis charge (RBC). She is a higher rate taxpayer paying tax at 40%, with UK source employment income of £80,000.
> She also has £150,000 of interest (relevant foreign income) from an overseas investment in Country X paid to her.
> Because nominated income is taxed on the "arising basis", a remittance basis user is in the same position as any other UK resident person and is, subject to the ordinary rules that apply in such cases (s.793 ICTA 1988+), entitled to credit against UK tax for certain amounts of overseas tax that is payable on

that same income.
Under the domestic law of Country X in which the investment was made, the interest was paid after deduction of 15% withholding tax. The Double Taxation Agreement between the UK and Country X provides that tax on this interest may be retained in the "source" country at the rate of 15%.
L is therefore entitled to a credit, which she takes in the form of foreign tax credit relief (FTCR), against UK tax for the tax withheld in the other country.
...
*Foreign tax credit relief calculation – general principles*
Ignoring the remittance basis issue for the moment:
L has received foreign interest of £150,000, on which Country X's tax of £22,500 (15% as provided for in the DT treaty) has been deducted.
L's income is chargeable to tax at 40%. The UK tax charge is respect of this £150,000 would be £60,000 (40%×£150,000).
If she claims foreign tax credit relief her net liability to UK tax after the foreign tax credit relief will be:
£60,000 minus £22,500 = £37,500
*Relevant tax increase including FTCR*
Foreign tax credit relief is only due to the extent that the foreign income on which it is given is brought into the UK tax charge. So for remittance basis users, relief for foreign tax paid on foreign income chargeable on the remittance basis is given when that income is remitted.
However for remittance basis charge payers like L, any foreign income which she nominates is chargeable on the arising basis so foreign tax credit relief can be given in relation to that nominated income.
Because the "relevant tax increase" must be £30,000, L will need to nominate £120,000 of her foreign interest if she wishes to create an overall remittance basis charge of £30,000.

- FTCR calculation

| | |
|---|---|
| Foreign tax that relates to the £120,000 nominated (at 15%) | £18,000 |
| UK tax on £120,000 (at 40%) | £48,000 |
| Net liability to UK tax after the FTCR (£48,000 minus £18,000) | £30,000 |

(refer to note 2 below)

- Relevant tax increase calculation

To determine the relevant tax increase we must complete two calculations.
The first calculation (a) is of the total amount of L's income tax and capital gains tax actually payable in the year, as a remittance basis user and RBC payer.
The second calculation (b) is the total amount of L's income tax and capital gains tax that would be payable by L in the year as a remittance basis user, as if no nomination was required and the RBC was not due that is, as if there was no income tax or capital gains tax payable on her nominated foreign income or gains.
The relevant tax increase is the total of calculation (a) minus calculation (b)

| | Calculation (a) | | | Calculation (b) | | |
|---|---|---|---|---|---|---|
| Non-savings income | | | | | | |
| 20%[1] on | **£34,800** | = | **£6,960** | **£34,800** | = | **£6,960** |
| 40% on | **£45,200** | = | **£18,080** | **£45,200** | = | **£18,080** |
| | £80,000 | | £25,040 | £80,000 | | £25,040 |
| Savings | | | | | | |
| 40% on | £120,000[2] | = | **£30,000** | Note 4 | | |
| Total Income Tax Due | | | **£55,040**[3] | | | **£25,040**[4] |

1 Rates and thresholds used here for the purposes of this example only; use the rates applying in the relevant tax year.
2 This is the foreign income that is nominated, and charged to tax on the arising basis in the year. FTCR is given, which has reduced the tax to £30,000.
3 As a remittance basis user, L has no personal allowances due.
4 L is a remittance basis user so would not be subject to tax on her unremitted foreign income, nor would any FTCR be due.

| | | | |
|---|---|---|---|
| **Relevant Tax Increase** is | Total (a) | | £55,040 |
| less | Total (b) | | £25,040 |
| | | Total | **£30,000** |

March 2009 Qs & As provides:

> **Q3:** HM Revenue & Customs (HMRC) have indicated that individuals do not have to specify which account the nominated income comes from, and from this it could be inferred that without further disclosure of the particulars of the account the taxpayer may be at risk of "tainting" every other source of income of that type. For example if an individual has an account with one bank in Jersey and another bank in a different jurisdiction, he could nominate bank interest on his Jersey account, so that it would be obvious that if he remitted income from his other account, he might not fall foul of re-characterisation provisions. However, this may not be the case if he had three different accounts with the same bank in Jersey and he wishes to nominate income from one of those accounts without disclosing the account number of that account. Can HMRC clarify what their approach to this will be?
> **A:** It is up to the individual to decide how much information to give HMRC on their Self Assessment returns in order to identify the source of the nominated income or gains; if, as in this example, there is more than one account the individual should provide sufficient detail to distinguish between them and identify the "nominated" account. That might be the entire account number, or the account "name", or some

other unique identifying feature of the account.

The RDR Manual 32380 provides:

**Completing the SA Return - How is this done in practice?**
SA109 "Residence, remittance basis etc" is the supplementary page to the SA100 main tax return for remittance basis users to complete under Self Assessment.
There is a box to claim the remittance basis on the SA109 and two boxes where the "amount of nominated income" and the "amount of nominated capital gains" must be entered. The amount nominated can be either income or gains or a combination of the two. The source(s) of the amount nominated is the individual's personal choice.
When either or both of these boxes are completed the SA109 notes say that details of the nominations are to be shown in the "Any other information" box.
The required information is:

- the precise amounts of income and gains that have been nominated, (this should include the country of origin and the type and source of the income)
- the computation of the gain (if applicable)
- the exchange rates used[20]
- the calculation of the tax due in relation to the nominated income and gains.

Also if there have been deductions for expenses or losses from either foreign income or foreign gains in arriving at the final taxable amount, full details of the amounts and nature of those expenses or losses must also be provided.
All of this information is required to validate the nomination or nominations that have been made.

### 9.11.3 *Nominated income/gains charge*

Section 809H(2) ITA provides:

Income tax is charged on nominated income, and capital gains tax is charged on nominated chargeable gains, as if s.809B did not apply to the individual for the relevant tax year (and neither did s.809D).

20 See 49.9 (Nominated income and gains: currency conversion date).

This disapplies the remittance basis, so nominated income and gains are taxed on the arising basis. I refer to this as the "**nominated income/gains charge**".

EN FB 2008 provides:

> 14. This charge is in addition to the tax liability for the year in question on any income and gains remitted to the UK, and any UK income or gains taxed on the arising basis. The £30,000 will be paid on nominated income and gains not remitted to the UK in the year. (These income and gains are called "nominated" income and gains because the taxpayer is free to nominate the income and gains not remitted to the UK in the year on which tax of £30,000 is payable. For example, this could be £75,000 of unremitted foreign deposit interest on which UK tax was due at 40 per cent, so leading to an income tax charge of £30,000.)

### 9.11.4 *Remittance basis deficit charge*

The removal of the remittance basis for nominated income/gains might not yield the desired additional £30k tax for various reasons. The individual might under-nominate, ie, they might not nominate enough income/gains. There is no requirement to nominate enough to give rise to a £30k IT or CGT charge. Indeed, it is not always possible to know how much that would be. One could nominate just £1, as long as what is nominated is foreign income or gains. HMRC agree. The RDR Manual 32320 provides:

> **32320 Making a Nomination**
> *Insufficient nomination*
> Although an individual may choose to make an insufficient nomination (RDRM32360) they must have foreign income and/or foreign chargeable gains from the tax year such that, they can nominate something, even if only £1. This fulfils the mandatory requirement that a nomination **must** be made when making the claim.
> *Completing the self-assessment return*
> All claims and nominations are made on the individual's self assessment tax return. The minimum amount that can be nominated **must** be at least £1 of foreign income or gains for the claim to be valid. Where a claim to the remittance basis is made under s809B but no nomination of either

> foreign income or capital gains is made the claim is invalid.[21]

According to EN Amendments to the Remittance Basis Charge this was done to enhance confidentiality:

> 7. The legislation provides the option for those who can claim the remittance basis not to disclose anything about their unremitted income or gains as they can make a claim with a nominal £1 amount and do not have to specify what further foreign income or gains remain unremitted.

But it may not be in the interests of the taxpayer to under-nominate, and the confidentiality is illusory because HMRC are likely to make further enquiries.

The removal of the remittance basis for nominated income/gains might not yield the desired additional £30k tax where the individual has some tax reliefs (eg loss relief, interest relief, DTRs, etc).

Section 809H(4) ITA goes on to ensure that HMRC will receive their desired £30k tax:

> If the relevant tax increase would otherwise be less than £30,000, subsection (2) has effect as if—
> (a) in addition to the income and gains actually nominated under s.809C in the individual's claim under s.809B for the relevant tax year, an amount of income had been nominated so as to make the relevant tax increase[22] equal to £30,000, and

---

21 Similarly March 2009 Qs & As provides:
"**Q7:** The question has arisen whether less than £1 (ie pence) can be nominated income. Given current interest rates there is concern that accounts specifically set up to generate nominated income may not generate £1 before 6 April 2009. The concern expressed is that because pence are rounded down on tax returns, it might be your view that there is no nominated income?
**A:** The minimum nomination of income or gains required to calculate the relevant tax increase is £1. This is the minimum figure to be declared on the relevant supplementary page of the Tax Return."
But where is the statutory authority for HMRC to disregard figures under £1?

22 Section 809H(5)(5A) ITA repeats the definition of "the relevant tax increase" from s.809C(5) (5A):
"'The relevant tax increase' is—
(a) the total amount of income tax and capital gains tax payable by the individual for the relevant tax year, minus
(b) the total amount of income tax and capital gains tax that would be payable by the

(b) the individual's income for that year were such that such a nomination could have been made (if that is not the case).

I refer to s.809H(4) as the "**£30k deficit charge**". The £30k deficit charge is a tax on deemed income (deemed nominated income) and not on any actual income of the taxpayer (if indeed the taxpayer has other income). Section 809H(6) ITA makes this clear (if necessary):

> Nothing in subs.(4) affects what is regarded, for the purposes of s.809I or 809J, as nominated under s.809C.

I use the term "**remittance basis claim charge**" to mean the two distinct (albeit related) charges:
(1) the nominated income/gains charge, under s.809H(2); and
(2) the deficit charge, under s.809H(4).
It might be more accurate to refer to remittance basis claim *charges* (in the plural). However for many purposes it does not matter that there may be two charges rather than one, (especially since in practice the second will not often arise) and it is convenient to have one label for them both.

### 9.11.5 *Interaction with Gift Aid*

Section 802H(5A) ITA provides:

> The references to income tax in subsection (5) do not include income tax under s.424 (gift aid).

The RDR Manual provides:

> **32450. Charitable Donations and Gift Aid**
> Chapter 2 of Part 8 ITA 2007 provides relief for gifts of money to charities by individuals, known as Gift Aid. Section 414(2)(a) treats the Gift Aid donation as if it had been made after deduction of basic rate income tax. Basically, the rules require that the donor must pay at least

---

individual for the relevant tax year apart from subsection (2).
(5A) The references to income tax in subsection (5) do not include income tax under s.424 (gift aid)."
If there had been a chapter-wide definition the repetition would have been unnecessary.

as much UK income tax and capital gains tax in the tax year as the amount that is repayable to the charity.

Section 424 ITA 2007 ensures that, if the donor has not paid enough UK income tax and capital gains tax to 'frank' the gift aid donations in a tax year, a further amount of income tax is charged to make up the shortfall.

***The Remittance Basis Charge***

Tax paid as part of the Remittance Basis Charge can be used to frank Gift Aid donations, thereby reducing or extinguishing any tax 'shortfall' chargeable under section 424. The £30,000 remittance basis charge is 'income tax charged' or 'capital gains tax charged' on nominated income/gains.

Section 809C(5A) ITA 2007 and Section 809H(5A) ITA 2007 provide that for the purpose of computing the relevant tax increase any amount of income tax must be disregarded in calculating and income tax charged to make up any 'shortfall' in relation to gift aid donations under Section 424 ITA 2007.

The effect of this is that the appropriate amount of income is always nominated to produce exactly the required £30,000 Remittance Basis Charge. The £30,000 is an amount of tax charged on the nominated income/gains and as such counts as part of the income tax/capital gains tax taken into account in Section 424(2) ITA 2007 - Amount C.

Thus it is available to frank Gift Aid donations.

For this topic, see Kessler and Brown, *Taxation of Charities and Non-profit Organisations* (10th edition, 2011), para 16.41 (Donor pays insufficient tax).

### 9.11.6 *How much to nominate?*

It is important not to remit nominated funds to the UK. From that point of view it is convenient to under-nominate, ie nominate a nominal £1 only.

On the other hand, taxpayers who want to offset the £30k against foreign tax will want to nominate income or gains on which the foreign tax is at least equal to the £30k, or as close to the figure as possible; that requires a full nomination and some care in the choice of income/gains which are nominated.

### 9.11.7 *Remittance basis claim charge in cases of doubt over residence*

A person may be unsure whether or not they are UK resident in a year (residence if often unknowable) but know that they would be a long-term resident if actually UK resident in that year. That person may if appropriate make a remittance basis claim in that year, for the avoidance of doubt, and argue the residence position at leisure; if they are eventually held to be UK resident the £30k remittance basis claim charge is due, but if non-resident the sum is not due. Nothing is lost by making the claim.[23] Section 809B does not apply unless the individual meets the conditions of s.809B(1)(a) and (b) in the year.

Alternatively a person may know that they are UK resident in a year but not know if they are a long-term UK resident in that year (because they are unsure whether or not they were resident in one or more earlier years). That person should make a remittance basis claim but not nominate any income or gains. The claim is valid if they are not long-term UK resident. The claim is invalid if they are long-term UK resident, so the £30k remittance basis claim charge is not due (unless they proceed to make a new election and nomination).

On the other hand a remittance basis claim is effective (and the £30k charge payable) even if the individual has less than £2k unremitted income and gains, and so would qualify as a sub-£2k taxpayer. That would be an expensive box to tick in error!

### 9.11.8 *Minimising the £30k remittance basis charge*

Basic tax planning for spouses will be to arrange that income and gains accrue only to one of them, so that only one has to pay the remittance basis claim charge.

Basic planning for individuals who do not wish to pay the remittance basis claim charge every year is to time disposals and accruals so far as possible that foreign income and gains accrue before the 8th year of residence, and only once every few years subsequently (so a claim is only needed once every few years).

### 9.11.9 *Remittance basis claim charge: credit against foreign tax*

EN FB 2008 provides:

---

23 Similar points arise if a person is unsure about their domicile in a year, but in practice that would be less common because domicile (unlike residence) is generally ascertainable.

> 17. As the RBC consists of income tax or CGT paid on the arising basis ... the tax should be recognised as tax (on income or capital gains, as the case may be) for the purposes of our double taxation agreements.

The proposal in the Draft Clauses published January 2008 was for a simple charge of a fixed amount. This would not have qualified as a credit against foreign tax because it was not a tax on income or gains. HMRC presumably agreed, as the provisions were then recast in order that:

(1) The provisions took the form (so far as possible) of a charge on income or gains but

(2) the provisions had the effect (so far as possible) of a fixed charge.[24]

It will be interesting to see if this sleight of hand satisfies American[25] and other foreign tax authorities. The question is of course one for foreign law, not UK law.

Article 24(1) of the UK/US DTA provides:

> In accordance with the provisions and subject to the limitations of the law of the United States (as it may be amended from time to time without changing the general principle hereof), the United States shall allow to a resident or citizen of the United States as a credit against the United States tax on income
>
> (a) the income tax paid or accrued to the United Kingdom by or on behalf of such citizen or resident ...

It is suggested that the *nominated income/gains charge* can in principle be set against foreign tax since it is an income tax or CGT. However the remittance basis *deficit* charge is not a charge on actual income, and cannot be set against foreign tax. HMRC agree. EN Amendments to the Remittance Basis Charge provides:

---

24 See too 9.11.11 (Remittance basis claim charge in year of arrival and departure).

25 For HMRC's opening shot in this debate see BN 107 accessible *www.hmrc.gov.uk/budget2008/bn107.pdf*. It was expected that the United States Treasury and IRS would publish guidance. In fact HMRC say:
"HMRC said they had been in contact with the IRS on this matter and they had declined to say whether the £30,000 charge will be creditable for US federal tax purposes." Joint Expatriate Forum on Tax and NICs: 29 July 2010 Meeting Note *hmrc.gov.uk/consultations/expat-mins-290710.pdf*. In practice US taxpayers have been putting in claims (supported by the HMRC's published view).

> 16. The individual claiming the remittance basis might decide to nominate only £50,000 of bank interest under s.[809C(2)] and pay £20,000 of the £30,000 under s.[809H(2)] (assuming higher rate tax is due on all the £50,000). Section [809H(4)] would then apply with the effect that further income of £25,000 is treated as nominated to bring a further £10,000 of income tax into charge. However if the individual intended claiming credit for all or part of the £30,000 under a DTA then DTA relief will only be due on the income or gains actually nominated under s.[809C(2)] – £50,000 of income and £20,000 of income tax in this example. The income tax paid on income treated as nominated under s.[809H(4)] = £25,000 of income and £10,000 of income tax in this example, will not qualify for relief under DTAs as it is not tax on specific nominated income.

It follows that a careful choice of what income or gains to nominate is important, because (if foreign tax allows credit for the £30k UK tax) that can make up to £30k difference to the foreign tax liability.

9.11.10 *Individual treaty non-resident*

The RDR Manual provides:

> **RDRM32250 Dual residents - treaty non-resident** [July 2010]
> It is possible for individuals to be resident both in the UK and in another country or countries in a tax year. In such a case we look to the provisions of existing Double Taxation Agreements (DTAs) to determine in which country the individual is resident for treaty purposes. So a person may be resident in the UK under UK law, but regarded as 'treaty resident' elsewhere and consequently treated for tax purposes as 'not resident' in the UK.
> An individual who is, under the terms of a DTA, resident in the other country or territory but is also a long-term resident RDRM32200 in the UK (that is someone who is resident in the UK for more than seven out of the previous nine tax years) and claims the remittance basis is, if their un-remitted foreign income and gains is £2,000 or more, liable to the £30,000 remittance basis charge.

It is considered that DTA relief is in principle available against the nominated income/gains charge, but not against the remittance basis deficit charge. The effect of claiming DTA relief against nominated income or gains is to reduce the remittance basis claim charge on the nominated income or gains, but to increase the deficit charge by the same amount.

This certainly defeats the spirit of any DTA. It may also breach the DTA itself. But the intention of Parliament is clear, and the doctrine of parliamentary sovereignty allows Parliament to breach DTAs.[26] How our treaty partners will react to this will be interesting to see.

The RDR Manual continues:

> **32250 Dual residents - treaty non-resident** [July 2010]
>
> ...
>
> In determining the number of years in which an individual has been resident in the UK for the purposes of the long-term resident provisions, you count all years where the individual is resident in the UK under UK domestic law even if the individual was treaty resident in another territory in some or all of those years.

This is correct.[27] The RDR Manual continues with some tax planning advice:

> In most cases, an individual resident both in the UK and in another country and who under the Double Taxation Agreement with the other country is treated as resident in that other country (for the purpose of applying the provisions of the DTA) will be chargeable to tax in the other country on income and gains that originate in that other country and not in the UK. The treatment of any income and gains that originate in third countries (not the UK or the country of treaty residence) will depend upon the terms of the DTA between the UK and the country of residence. Where, exceptionally, an individual is chargeable to tax in the UK on such income or gains, they will need to consider whether a claim for the remittance basis of taxation is in their best interests or if, instead, they should pay tax on the arising basis and in the usual way, claim a credit for the tax charged in the other territory.

### 9.11.11 *Remittance basis claim charge in year of arrival and departure*[28]

The RDR Manual provides:

---

26 See *Padmore v IRC (No.2)* [2000] STC (SCD) 356.

27 See 5.1.1 (Relationship between treaty-residence and domestic-law residence; dual residence).

28 For the distinct issue of the interaction of the split-year concessions and the definition of "long-term UK resident" see 9.11.1 ("Long-term UK resident").

> **32240 Interaction with Extra Statutory Concession (ESC) A11**
> ... Long-term residents who claim the remittance basis under ITA07/s809B are subject to the remittance basis charge of £30,000. This charge is payable in full if the remittance basis is claimed, even in years in which the individual arrives in or departs from the UK part the way through the year, and even if ESC A11 is applied.

In the absence of this guidance one would have expected ESC A11 and D2 to apply, so that if (for instance) an individual nominated gains accruing after their departure, they would be exempt under ESC D2. It is not constitutionally satisfactory that a relief formally granted by concession should be restricted by informal HMRC guidance: the correct course would have been to revise the text of the concession. But in practice nothing is likely to turn on that.

More fundamentally, what is the reason why the concessions do not apply in this case? If the remittance basis claim charge is a tax on the nominated income or gains, they logically should apply. The reason is that the charge is intended only to take the form of a tax on the nominated income or gains, and it is intended to have the effect of a fixed charge.

### 9.11.12 *Administration*

The RDR Manual provides:

> **32210 Long-term residents and the remittance basis charge - overview**
> ... The remittance basis charge is both payable and collected through the SA regime, and an SA tax return must be filed. The SA109 Residence, remittance basis etc is the supplementary return which should be completed and filed for this purpose.

So a long-term resident who wishes to claim the remittance basis will need to file an SA tax return in order to pay the £30,000 charge.

Of course the charge could not be collected through PAYE. For one thing, the charge might be a charge to CGT and even if it is income tax it need not be a charge on employment income. Also the claim on which the charge depends will be made in the tax return some time after PAYE is due.

HMRC Business Brief 17/09 provides:

The rules for nominating income and gains upon which the £30,000 is paid, and the rules for identifying what is taxed if those nominated income or gains are later remitted to the UK, can be complex. To help ensure individuals who pay the £30,000 get the right level of customer support [!] from HMRC, we have decided that most individuals who pay the £30,000, or have paid it in the past, will have their tax affairs dealt with in one HMRC office from 2009-10. This will be the CAR Residency office in Castle Meadow, Nottingham.
Customers who are sent a self assessment return by a different office should make the return to the office issuing that return. Once the return has been received by HMRC we will arrange for the individual's tax records to be transferred to the CAR Residency office in Nottingham and advise the individual and any agent, accordingly. Until such time as individuals or their agents receive such a notification they should continue to deal with their current tax office.

### 9.11.13 *Interaction with payments of IT on account*

The RDR Manual provides:

**32390 Payments on account - interaction with the remittance basis charge (RBC)** The remittance basis charge may consist of either income tax or capital gains tax, or a mixture of the two ...
To the extent that the remittance basis charge consists of income tax, the payment on account position for those paying the charge is the same as that for any other SA taxpayer. This means their payments on account are based their income tax liability for the previous year (TMA1970/s59A(1)).
The relevant SA109 "*Residence, remittance basis etc*" supplementary pages to the SA tax return must be completed to both claim the remittance basis and nominate income or gains and pay the remittance basis charge.
*Effect and treatment of income*
If paying part or all of the remittance basis charge in respect of nominated income, then income tax will be due. The amount which has been nominated from income and produced income tax will need to be taken into account and included in the overall calculation of payments on account for the following year.
If an insufficient nomination is made to produce the remittance basis charge of £30,000 (ITA07/s809H(4)) the additional amount treated as nominated will always produce income tax. This also has a bearing on the payments on account position, even though the additional nominated amount is from an unidentified and unspecified amount of income. The additional amount nominated from income will automatically produce income tax that will become part of the individual's payment on account calculation for the following year.
*Effect and treatment of capital gains*
Capital gains tax is never included in computing payments on account, so any of

the remittance basis charge that is constituted of capital gains tax will not form any part of the following year's payments on account.

*Example (Ricardo)*

R, a non-domiciled (ND) long-term resident has an income tax liability of £200,000 for tax year 2007-08. Subsequently he makes payments of £100,000 on 31 January 2009 and on 31 July 2009 on account of his liability for 2008-09.

His tax liability for 2008-09 is £250,000, which includes for the first time the £30,000 remittance basis charge. The remaining £220,000 is income tax on UK sources. R nominated only £21,000 of his foreign income which led to a charge of £8,400 income tax; he also nominated £120,000 foreign chargeable gains which led to a capital gains tax of charge £21,600. Together these amounts constitute his £30,000 remittance basis charge.

R's payments on account for 2009-10 will be calculated using the £220,000 income tax paid on UK income sources in 2008-09, plus the £8,400 income tax element of the remittance basis charge. This means that he will make payments on account of £114,200 on 31 January 2010 and on 31 July 2010 on account of liability for 2009-10. ...

**32400 Payments on account – nominations involving chargeable gains**

Capital gains tax is not included in computing payments on account, so any of the remittance basis charge (RBC) that is constituted of capital gains tax will not form any part of the following year's payments on account.

There is an additional box to complete on the SA109, if a nomination of capital gains is made in order to pay all or part of the RBC.

This box is called "Adjustments to payments on account" and must be completed if any nomination of capital gains is made. That is because capital gains tax is excluded from the computation of payments on account, and is simply payable as part of the balancing payment on 31 January following the tax year.

This box is not completed if a nomination of income only has been made, as any amount nominated from income will be taken into account in computing the overall payments on account liability for the following year.

The amount entered in the "Adjustment to payments on account" box on the SA109 is required in order for the payments on account to be calculated correctly for subsequent years:

- where a taxpayer is calculating their liability to tax, the amount for capital gains entered in the box to adjust payments on account, should be excluded in their calculation of payments on account
- if the tax calculation summary page is used the first payment on account for the following year will not include any part of the amount entered for capital gains in the adjustment to payments on account box.

*Example involving an amount of capital gains in the "Adjustment to payments on account" box:*

R, who pays tax at a is higher 40% rate decides to nominate both income and capital gains to pay the remittance basis charge.

He nominates as follows:

| | | |
|---|---|---|
| £21,000 of relevant foreign income | @40% | £8,400 |
| £120,000 of foreign chargeable gains | @18% | £21,600 |
| | | £30,000 |

The amount of £21,600 for capital gains will be entered in the "Adjustment to payments on account" box as this amount will be excluded in calculating payments on account for the following year. Only the £8,400 tax that is chargeable on nominated income is taken into account when calculating the amount due as payments on account.

If the entire amount nominated to pay the RBC comes from capital gains then it will not be included in the calculation for payments of account. In this case the full amount of nominated gains will be entered in the "Adjustment to payments on account" box.

**32410 Payments on account - first-year of paying RBC**

The remittance basis charge is only payable from tax years 2008-09 onwards by long-term residents making a claim to use the remittance basis.

For example, if a remittance basis claim is made in 2008-09 and the remittance basis charge is due, then the first year that any payments on account can be considered in relation to the remittance basis charge is 2009-10 unless there is a claim to reduce ...

The fact that their tax liability for 2008-09 will be increased for those paying the remittance basis charge has no effect on the payments on account position for 2008-09 (unless there is a claim to reduce them) but, to the extent that the remittance basis charge is income tax, it will be taken into account when calculating payments on account for 2009-10.

The remittance basis charge for 2008-09 is not due for payment until 31 January 2010 when it can be paid as part of any balancing payment for the year

The same principle applies to the payment on account position in relation to the remittance basis charge for any first year that a claim to the remittance basis is made, and the remittance basis charge is due. Payments on account will not generally be affected until after the first year in which they pay the remittance basis charge (TMA70/s59A(2)).

**32420 Payments on account: no remittance basis charge due in following year**

When the remittance basis of taxation is **not** claimed in a year following one where the remittance basis has been claimed and the remittance basis charge was paid, the amount of income used to pay part or all of the remittance basis charge may be excluded from the calculations of payment on account.

To allow this to happen, a claim to reduce payments on account may be made on form SA 303. Further information on the rules and the time-limits for making a claim to adjust payments on account can be found in the Self Assessment Manual under SAM1110.

**32430 Claim to reduce Payments on Account (PoA)**

The payment on account (PoA) position in relation to the remittance basis charge will be affected by any claims to reduce payments on account.

Where the RBC is paid in the previous year on nominated income, the amount feeds through to the individual's payments on account (PoA) for the next year, unless the individual makes a claim to reduce their PoAs on the grounds that their income tax liability for that year will be less than the sum of the two PoAs. For example this could be because they will not claim the remittance basis for the following year. If they subsequently do claim the remittance basis and pay the remittance basis charge in the following year and the income tax due for that year exceeds the sum of the PoAs made we will charge interest on the reduction in the PoA.

This is shown in the example below:

*Stage 1*

The return shows liability to income tax, which includes the RBC, partly or fully paid in respect of nominated income. The payments on account due on 31 January and 31 July are half of the relevant amount of income tax (TMA70/s59A).

For example, Marie-Clare's 2008-09 income tax liability is £55,000, of which £25,000 related to tax on UK source income, and the remainder is the £30,000 RBC (all in respect of nominated foreign income). Nothing is taxed at source. Her payments on account for 2009-10, payable on 31 January 2010 and 31 July 2010 will each be £27,500.

*Stage 2*

If the individual does not intend to use the remittance basis for the following year, and so they will not be subject to the remittance basis charge, they can claim to reduce the PoAs.

In the Marie-Clare example, if she does not think she will claim the remittance basis and so will not need to pay the remittance basis charge for 2009-10 she could reduce her payments on account for 2009-10 to £12,500 each, that is 50% of her 2008-09 income tax liability of £25,000 (if the remittance basis charge is excluded). She will of course still have to consider her other income sources and overall expected income tax liability for the year in making this decision.

*Stage 3*

If the individual subsequently decides to claim the remittance basis and to pay the £30,000 remittance basis charge and a claim to reduce payments on account has been made which resulted in insufficient PoAs being made, then interest will be charged from the due date for the payments on account until a claim to increase payments on account is made or payment is made for the year is paid to stop interest accruing (TMA70/s86).

In the Marie-Clare example, she has claimed to reduce her payments on account to omit the remittance basis charge, so she only makes payments on account of £25,000 (two lots of £12,500). When she files her 2009-10 self-assessment return her UK income has remained, as expected, at £25,000. However she now decides to claim the remittance basis and so she has to pay the remittance basis charge. As she has erroneously claimed to reduce her payments on account in the year, she will be charged interest on the payments that she should have made, that is, on £15,000 from 31 January 2010 and £15,000 from 31 July 2010 until the date these amounts are paid.

See Self-Assessment Manual – Legal Framework SALF303 for further information on claims to reduce payments on account.

*Example 1 (Eva)*

- E claimed the remittance basis and paid the remittance basis charge in 2008-09, and her income tax liability produces two payments on account for 2009-10 of £120,000 each.
- E has decided that she will not be claiming the remittance basis in 2009-10 so will not pay the remittance basis charge. E makes a claim to reduce the amount

due on account of her tax liability to £200,000 due to a drop in income and because she will not pay the remittance basis charge in 2009-10. When E files her 2009-10 return in September 2010 it shows that the tax due on income is £200,000, but these are provisional figures as E is awaiting some details from her foreign bankers in relation to some foreign transactions.

- The two £100,000 payments on account appear "correct" at this stage. In November 2010 E receives the information from her foreign bankers and decides to amend her return and to claim the remittance basis. She nominates some foreign income and has to pay the remittance basis charge of £30,000, all constituting income tax, bringing her total liability to £230,000.
- E will be charged interest on the £30,000 reduction in her payments on account on the grounds that E should not have reduced them.

*Example 2 (Vali)*

- V had no foreign income or gains arising in 2008-09, so he did not claim the remittance basis and so he did not need to pay a remittance basis charge in 2008-09.
- V's income tax liability for 2008-09 produces two payments on account of £200,000 for 2009-10. No claim is made to reduce the payments on accounts.
- When V begins to prepare his 2009-10 return he has a liability of £420,000 income tax on UK sources, so his £400,000 payments on account were correct, based on Vali's previous year's income tax liability.
- V has foreign income arising in 2009-10 and he decides to claim the remittance basis in his 2009-10 return. As a long-term but non-domiciled resident V has to pay the remittance basis charge of £30,000 bringing his total liability to £450,000. Interest will not be charged on the additional £50,000 tax due, as long as this is paid by the proper due date.[29]

## 9.11.14 *Position from 2012/13: the £50k charge*

The remittance consultation paper provides:

> 2.8 ... the Government proposes to introduce a higher charge of £50,000 for those non-domiciles who claim the remittance basis and have been UK resident in at least 12 of the 14 tax years prior to the year of the claim. It intends that this will take effect from 6 April 2012.
> 2.9 The £30,000 charge will be retained for those who have been resident in at least seven of the nine years prior to the year of claiming the remittance basis, but fewer than 12 years.
> 2.10 The £50,000 charge will work in exactly the same way as the current £30,000 charge, namely:
> • In each tax year the individual will have a choice whether to pay the charge or to be liable to UK tax on their worldwide income and capital

29 See too March 2009 Qs & As Q18.

gains. Any decision will depend on the individual's personal circumstances, such as the level of their overseas income and capital gains; 6
• Those who choose to pay the charge will make a claim to the remittance basis on an SA tax return after the end of the relevant tax year;
• Individuals will be able to opt in and out of the remittance basis from year to year. Choosing the arising basis in one year will not preclude claiming the remittance basis in a future year; and
• It will not be payable if the individual is under 18 or if they have unremitted overseas income and capital gains of less than £2,000 in the tax year.[30]

## 9.12 Nature of charge on remitted RFI

Section 809F(1) ITA provides:

> This section applies if s.809B, 809D or 809E applies to an individual for a tax year.

That is, the section applies to remittance basis taxpayers. Section 809F(3) ITA provides:

> The individual's relevant foreign income for that year is charged in accordance with s.832 of ITTOIA 2005.

So we turn to s.832(1) ITTOIA which provides somewhat repetitively:

> This section applies to an individual's relevant foreign income for a tax year ("the relevant foreign income") if s.809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year.

We find the rule at last in s.832(2) ITTOIA:

> (2) For any tax year in which—
> (a) the individual is UK resident, and
> (b) any of the relevant foreign income is remitted to the UK,
> income tax is charged on the full amount of the relevant foreign income

30 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

so remitted in that year.

At first glance it may seem that IT is charged on remitted RFI and not on unremitted RFI. It is not that simple. The scheme of the rewritten legislation is that for every category of income there is:
(1) a charging provision; and
(2) a provision specifying the amount of income on which tax is charged.
For instance, in relation to dividends from non-resident companies, s.402 ITTOIA provides:

> **402 Charge to tax on dividends from non-UK resident companies**
> (1) Income tax is charged on dividends of a non-UK resident company.
> ...
> **403 Income charged**
> (1) Tax is charged under this Chapter on the...amount of the dividends arising in the tax year.
> (2) Subsection (1) is subject to ... Part 8 (foreign income: special rules).

The (subtle) point is that IT is *charged* on dividends under s.402 ITTOIA. Section 403 ITTOIA does not impose a charge. It merely quantifies *the amount on which income tax is charged.* Likewise s.832(2) ITTOIA does not impose a charge, it merely quantifies *the amount on which income tax is charged.*[31] The distinction does matter. For instance, references to "income chargeable to income tax" in principle include unremitted income taxable on the remittance basis.[32] However the context may show that the word "chargeable" is used in a narrower sense so as not to include unremitted income (un)taxed on the remittance basis.

## 9.13 Charge on remitted gains

Section 809F ITA provides:

> (1) This section applies if s.809B, 809D or 809E applies to an individual

---

31 Hence the legislation states that tax is charged "in accordance with" s.832 not *under* s.832. See eg ss.13, 14, 16 ITA.

32 The distinction explains why foreign dividend income taxable under remittance basis in 2005/06 and 2006/07 was taxable at the dividend upper rate and not at the higher rate (though this is now of historic interest only); see the 6th edition of this work para 28.4.3.

> for a tax year...
> (4) If the individual is not domiciled in the UK in that year, the individual's foreign chargeable gains for that year are charged in accordance with s.12 of TCGA 1992.

So we turn to s.12(1) TCGA which provides (somewhat repetitively):

> This section applies to foreign chargeable gains accruing to an individual in a tax year ("the foreign chargeable gains") if—
> (a) s.809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
> (b) the individual is not domiciled in the UK in that year.

We find the rule at last in s.12(2)(3) TCGA:

> (2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.
> (3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year. ...

While non-ordinary residence is sufficient to qualify for the RFI remittance basis, foreign domicile is needed for CGT.

## 9.14 Remittance in year after income/gains arise

Suppose:
(1) Income or gains accrue to T (a remittance basis taxpayer) on or after 2008/09 and
(2) The sum is remitted in a subsequent year (in which T is still resident).
The income or gains are taxable in the year of remittance. There is no time limit so income or gains may be taxed many decades after they accrue.

### 9.14.1 *Transitional rule for pre-2008 income and gains*

Suppose:
(1) RFI accrues to T before 2008/09 and
(2) The RFI is remitted in 2008/09 or later (when T is still resident).
In the absence of a transitional rule, the income would not be taxable under s.832 ITTOIA because the condition in s.832(1) would not be met. Sections 809B, 809D or 809E did not apply before 2008. Para 83 Sch 7

FA 2008 fills that gap for RFI:

> (1) This paragraph applies to an individual's relevant foreign income for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if—
> (a) the individual made a claim under s.831 of ITTOIA 2005 for the relevant tax year, or
> (b) s.65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the relevant tax year.
> (2) Section 832 of ITTOIA 2005 (as amended by this Part of this Schedule) applies in relation to the relevant foreign income as if s.809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year.

Thus pre-2008 RFI is taxed under s.832(2) if remitted from 2008/09 (as one would expect).

The same applies to gains. In the absence of a transitional rule, pre-2008 gains would not be taxable from 2008/09 because the condition in s.12(1)(a) TCGA would not be met. Para 84 Sch 7 FA 2008 fills that gap:

> (1) This paragraph applies if s.12 of TCGA 1992 (or any corresponding superseded enactment) applied in relation to a gain accruing to an individual in the tax year 2007-08 or any earlier tax year ("the relevant tax year").
> (2) Section 12 of TCGA 1992 (as amended by this Part of this Schedule) applies in relation to that gain as if s.809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year.

### 9.14.2 *Income arising before 2005/06 remitted before 2007/08: ITTOIA transitional rules*

Para 150 Sch 2 ITTOIA provided:

> A claim may be made under s.831 (claim for relevant foreign income to be charged on the remittance basis) for relevant foreign income to be charged in accordance with s.832 for the tax year 2005–06 or any later tax year, despite that income having arisen in a tax year before the tax year 2005–06; and ss. 832 to 834 apply accordingly.

ITTOIA EN Vol 3 para 347 explains:

> This paragraph ensures that Chapter 2 of Part 8 of this Act is not restricted in its operation to income that arose after the tax year 2004–05 (whenever the earlier income is remitted).

Para 150 was not aptly worded, but what it meant was this: if a s.831 claim is made in 2005/06, 2006/07 or 2007/08, pre-ITTOIA income (which was not taxed on receipt because a claim was made under the former s.65 ICTA) is taxed under s.832 ITTOIA if remitted in that year.

### 9.14.3 *Income arising before 2005/06 remitted from 2008/09*

FD Draft Clauses EN 2008 provided:

> 121. Para 47 deletes paras 150 and 151 of Schedule 2 (transitional provisions), which set out transitional arrangements for the application of the remittance basis to certain relevant foreign income arising before the tax year 2005-06. These are now considered obsolete in light of the amendments in this Schedule.[33]

## 9.15 Remittance after acquisition of UK domicile

Suppose:
(1) RFI/gains accrue to T (a remittance basis taxpayer).
(2) T acquires a UK domicile and for that reason ceases to be a remittance basis taxpayer. T remains UK resident.
(3) T subsequently remits the sum.
This is taxable under the ITA remittance basis.

### 9.15.1 *Transitional rules for pre-2008 RFI/gains*

The rule for the pre-2008 RFI remittance basis was that there was no IT charge on a remittance after acquisition of a UK domicile. It is considered that the same applied for the pre-2008 CGT remittance basis, though HMRC did not accept that.
Suppose:
(1) RFI/gains accrued to T before 2008/09.
(2) T became UK domiciled before 2008/09.

33 The equivalent passage in EN FB 2008 para 380 is less informative.

(3) The income/gains are remitted from 2008/09.

T is taxable on the remitted income under s.832(2) ITTOIA. The tax charge is retrospective in that pre-2008 RFI/gains outside the scope of tax has now fallen within the scope of tax.

What is the position if an individual acquires a UK domicile before 6/4/2008 and remitted the income or gains before then? It is suggested that there is no charge because of the cap on the amount remitted; see 10.23.5 (Cap on amount remitted).

## 9.16 Remittance in year when taxed on arising basis

Suppose:

(1) RFI accrues to T from 2008/09 in a year in which T is a remittance basis taxpayer.

(2) T subsequently remits the income in a year in which T is not a remittance basis taxpayer (because T's foreign income and gains exceed the £2k limit and T does not claim the remittance basis).

T is taxable on the remitted income under s.832(2) ITA.

### 9.16.1 *Transitional rules for pre-2008 RFI*

The rule for the pre-2008 RFI remittance basis was that there was no charge on a remittance in a year in which no claim was made for the RFI remittance basis. HMRC accepted that (at least for years when ITTOIA applied). The new rule applies to pre-2008 RFI remitted from 2008/09. The tax charge is retrospective in that pre-2008 RFI/gains outside the scope of tax has now fallen within the scope of tax.

If RFI was remitted before 2008/09, it is considered that there is no charge because of the cap on the amount remitted; see 10.23.5 (Cap on amount remitted).

## 9.17 RFI/gains arising when resident, remitted when non-resident

Suppose:

(1) RFI or gains accrue to T (a remittance basis taxpayer).

(2) T remits the sum to the UK in a year when non-resident.

RFI is not taxable in the year of remittance, because the conditions in s.832(2)(a) ITTOIA are not met. Gains are not taxable in the year of remittance because although the conditions of s.12 TCGA are satisfied (remitted gains are treated as accruing when remitted) the individual (being non-resident) is not subject to tax on chargeable gains.

The temporary non-residence rules need to be considered.

## 9.18 Remittance after death

Suppose:

(1) RFI or gains accrue to T (a remittance basis taxpayer).
(2) T dies, and the sum is received in the UK after the death.

If the RFI is received in the tax year after death, no tax charge arises because the condition in s.832(2) ITTOIA is not met. If gains are received in the tax year after death, no tax charge arises because (it is considered) s.12(2) TCGA assumes that the individual is alive in the year of remittance. The same applies if there is a remittance in the year of death because the sum cannot be received in the UK by T (who is dead) or by a relevant person (there are no relevant persons in relation to a dead person) so it cannot be remitted (within the definition of that term).

A different rule applies for employment income.

## 9.19 Remittance after source has ceased

Section 832(3) ITTOIA provides:

> Subsection (2) applies whether or not the source of the income exists when the income is remitted.

### 9.19.1 *Transitional rules for pre-2008 RFI*

The rule for the pre-2008 RFI remittance basis was that there was no charge on a remittance from a source in a year after the source has ceased. Suppose:

(1) RFI accrued to T before 2008/09.
(2) The source of the RFI ceased before 2008/09.
(3) The RFI is remitted from 2008/09.

Is T taxable on the remitted income under s.832(2) ITTOIA? Yes, the tax charge is retrospective in that pre-2008/09 income previously outside the scope of tax has now fallen within the scope of tax. It does not matter when the income arose or the source ceased: income arising in the 1950s could now come into charge, though all records relating to it would have been long discarded.

STEP rightly comment:

> It appears that any source ceased funds, whenever the source ceased will be caught by the new rules. The effect of this is to retrospectively change the nature of these funds and this is unfair. If this is to be the case then taxpayers who have used this technique may have placed the funds in capital accounts which will, as a consequence of the changes to the rules, now be classified as mixed accounts. Not only do the mixed account rules fail to take into account the change in nature of these funds which were capital on 5 April 2008 and income on 6 April 2008, but there does not seem to be any clear way to separate out these funds now as the mixed account rules only apply to remittances to the UK. Whilst STEP does not object to the change in these rules for the future, we do feel that it is unfair to impose additional tax and reporting burdens on taxpayers who used a technique in the past which HMRC recognised and accepted when they used it.[34]

What if the source ceased and T remitted the income before 2008/09? Even if the transitional rule does not provide relief, it is considered that there is no charge because of the cap on the amount remitted; see 10.23.5 (Cap on amount remitted).

HMRC accept that there is no charge on pre-2008 deemed gains.[35] The same reasoning must apply here so it is considered that pre-2008 source-ceased income, which was remitted to the UK prior to 6 April 2008, remains non-taxable.

## 9.20 RFI/gains arising when non-resident, remitted when resident

Suppose:

(1) A non-resident individual receives RFI or gains. The income or gains are not of course taxed as they arise.

(2) The individual becomes UK resident, and subsequently remits that sum when taxable under the remittance basis.

RFI remitted is not taxed on remittance as the condition in s.832(1) ITTOIA is not met. Gains remitted are not taxed on remittance because the condition in s.12(1) TCGA is not met.

---

34 STEP Representations on the FB 2008.

35 See 10.24.5 (Transitional rules: pre-2008 gains).

FAQ Remittances (April 2008) correctly states:

> **Where a non-domiciled individual not resident in the UK, has purchased assets abroad out of income that has not been taxed in the UK, then moves to the UK and becomes resident, will the importation of those assets in the first year be taxed as a remittance?**
> No. As the untaxed income arose while the individual was not UK resident, there is no charge unless the proposed new s.832A ITA 2007 applies (temporary foreign residence).

## 9.21 RFI from Ireland

In the following discussion:
**"Irish income"** means RFI arising in Ireland.
**"Pre-2008 income"** means income arising before 6 April 2008.
The UK/Ireland DTA also needs to be considered but it is not discussed here. Similar points arise in relation to earnings: see 12.26 (Earnings from Ireland).

### 9.21.1 *Income from 2008/09*

The position for income from 2008/09 is straightforward. The ITA remittance basis treats Irish income in the same way as any other foreign income. The FA 2008 repealed the rule of the pre-2008 remittance basis which provided (unlawfully and probably ineffectively) that Irish income was taxed on an arising basis.

### 9.21.2 *Pre-2008 income remitted from 2008/09*

This change raised the problem of transition. Para 83 Sch 7 FA 2008 provides:

> (1) This paragraph applies to an individual's relevant foreign income for the tax year 2007-08 or any earlier tax year ("the relevant tax year") if—
> > (a) the individual made a claim under section 831 of ITTOIA 2005 for the relevant tax year, or
> > (b) section 65(5) of ICTA (or any earlier superseded enactment corresponding to that provision) applied in relation to the individual for the relevant tax year. ...
>
> (3) But nothing in section 832 of ITTOIA 2005 applies in relation to any

of the relevant foreign income that arose in the Republic of Ireland.

EN FB 2008 provides:

> 399. Sub-paragraph(3) provides that the new section 832 does not apply to relevant foreign income that arose in the Republic of Ireland. This ensures that no double charge can arise in relation to those tax years during which it was not possible to claim the remittance basis for such income. (This might be relevant for example where income arose in one of those years and was charged on an arising basis but was not remitted to the UK until on or after 6th April 2008.)

Para 83(3) disapplies the remittance basis charge for pre-2008 Irish income. In short, if:
(1) Irish income arose before 2008/09; and
(2) The income is remitted on or after 2008/09
there is no tax charge on remittance.

### 9.21.3 *Pre-2008 Irish income: tax position before 2008/09 and 2007/08*

As noted above, according to statute, Irish income was taxable on the arising basis: it did not qualify for the remittance basis. The discrimination against Ireland was contrary to EU law.[36] This book advised that those

---

36 The point is more fully discussed in the 6th edition of this work para 9.51. It appears that the Irish Revenue agree. For the same point arose (in reverse) in Ireland (that is, under Irish law, UK source income was according to statute taxed on a remittance basis). But the Irish Revenue now agree that this was in breach of EU law. Irish Revenue eBrief No. 11/10 provides:

> "Under the provisions of Section 73 [Irish] Taxes Consolidation Act 1997, the remittance basis of assessment did not apply in respect of UK source income. However, Section 73 ceased to have effect in respect of UK income arising on or after 1 January 2008 (see Section 18 [Irish] Finance Act 2008). ...
> Under the provisions of Section 29(4) [Irish] Taxes Consolidation Act 1997, the remittance basis of assessment did not apply in respect of UK source chargeable gains. However, under the provisions of Section 42 [Irish] Finance (No.2) Act 2008, the remittance basis of assessment applies to chargeable gains arising in the UK as and from 20 November 2008.
> Section 18 [Irish] Finance Act 2008 and Section 42 [Irish] Finance (No.2) Act 2008 do not have retrospective effect. *However, arising from certain matters contained in a recent tax appeal case, Revenue are prepared to examine – on a case by case basis and subject to the statutory 4-year time limit for claiming repayment of tax –*

with pre-2008 Irish income should only agree to pay tax on the remittance basis. Where tax has been paid on an arising basis which would not have been paid on a remittance basis, a repayment claim should be made.[37] Under para 83(3) discussed above, pre-2008 Irish income which was not remitted before 2008/09 escapes UK tax altogether, since unremitted Irish income was not lawfully taxable when it arose and it is not (from 2008/09) taxable on remittance.

## 9.22 Remittance basis for trustees

### 9.22.1 *Income accruing before 2006/07*

Under the pre-2008 RFI remittance basis, a "person" who satisfies the relevant conditions could claim the remittance basis. The term "person" generally denotes individuals, trustees and companies.[38] The remittance basis therefore applied to trustees as well as to individuals.

Until 2006/07 a trustee qualified for the remittance basis (regardless of the beneficiaries or form of trust) if:

(1) the trustee was an individual domiciled outside the UK; or

(2) the trustee was a company incorporated outside the UK.[39]

The TAA provisions may, of course, apply to the trust income if it accrues to foreign domiciled trustees. If one trustee is UK resident and domiciled, and others are UK resident and not domiciled, the trustees as a body did not qualify for the remittance basis; *Dawson v IRC* 62 TC 301.

---

*claims for repayment of tax where it is claimed that a repayment of tax would be due had the remittance basis of assessment, rather than the arising basis of assessment, applied for a relevant year of assessment in respect of an individual's UK source income and/or chargeable gains. ...*"

See *www.revenue.ie/en/practitioner/ebrief/2010/no-112010.html.*

37 For the limitation period see s.106 FA 2007.

38 Companies ceased to qualify for the remittance basis with the introduction of corporation tax in 1965: see 9.4 (History of the remittance basis).

39 Or (a rare case) if the trustee is resident but not ordinarily resident in the UK.

The domicile of a company is its place of incorporation. The charge to corporation tax does not apply to a company in its capacity as trustee: s.6 CTA 2009.

The application of the remittance basis to trust income of a UK resident foreign domiciled trustee was recognised in the former s.720(6)(b) ICTA, *Dawson v IRC* 62 TC 301 at 320 and the Trusts Consultative Document (1991) para 10.24.

### 9.22.2 *Income accruing in 2006/07*

Section 474(1) ITA provides:

> For the purposes of the Income Tax Acts (except where the context otherwise requires), the trustees of a settlement are together treated as if they were a single person (distinct from the persons who are the trustees of the settlement from time to time).

Section 475 ITA goes on to ascribe to trustees a residence but not a domicile.[40] One possible solution is to look to the actual domicile of the trustees in their private capacities. But the trustee is deemed to be "distinct" from the persons who are actually the trustees so it is suggested that this is not the right approach. It is tentatively suggested, by analogy to company domicile, that the domicile should be taken to be the proper law of the trust. Another possibility is to say that trustees are not domiciled anywhere, but then all trustees qualify for the remittance basis, which would be absurd. The usual rule is that everyone has a domicile, and that rule should be applied here.

### 9.22.3 *Income accruing before 2008/09 remitted after 2008/09*

Since s.832 ITTOIA now only applies to individuals, trustees escape tax on income accruing before 2008/09 which is remitted after 5/4/2007. This is something of a windfall for trustees who qualified for the pre-2008 RFI remittance basis.

## 9.23 Forward tax agreements

Details of this arrangement were made public in an article by Malcolm Gunn in *Taxation*, 17 May 2001, under the revealing name "subscription rate method of taxation". The taxpayers involved were very wealthy UK

---

40 See 4.4 (Trustee residence for income tax and CGT). One is looking at the domicile of the *trustees* and not the domicile of the "trust". Thus it does not matter that a trust does not have a domicile in the normal sense. (The Civil Jurisdiction and Judgments Act 1982 attributes a "domicile" to a trust, but the concept of domicile in that Act "has little in common, save in name, with the traditional concept": *Dicey and Morris, Conflict of Laws*, (13th ed., 2000) para 6-002.)

resident non-domiciled individuals.

HMRC required full disclosure of the taxpayer's worldwide assets. The taxpayer then offered to settle the tax liability on foreign sources for a fixed sum. A starting position was that one worked out the taxpayer's UK living expenses; deducted from that the amount of UK income; the balance then represented funds which would be required annually from overseas, on which tax was expected. The forward tax agreement related to foreign income and gains. UK source income remained taxable in the normal way. Malcolm Gunn explained:

> One may be able to negotiate the annual fixed payment downwards on the starting point figure. ... So in the final analysis, it is down to negotiating a deal which both the taxpayer and the Revenue feel they can live happily with.[41]

In the first edition of this book I said:

> It is likely that publication will stop the practice completely. Those who believe that tax should be governed by law will add: Quite right too.

Since then the courts have tried to stop these agreements by holding them to be *ultra vires*.[42] Where such agreements have been made in the past, a taxpayer may have a defence to an assessment if they can show they have suffered prejudice. It is an interesting question how these agreements will deal with the remittance basis claim charge.

---

41 Transition from taxation by agreement to taxation by law raises additional problems discussed in Malcolm Gunn's article.

42 *Fayed v Advocate General* 77 TC 273. *Fayed*-style bargaining is however the basis of taxation of wealthy foreigners in many countries, including, I understand, Switzerland, France and Austria. Even in the UK after *Fayed* the temptation is ever present to move from the inconvenience of taxation by law to the convenient (but ultimately corrupt) method of taxation by negotiation.

CHAPTER TEN

# THE MEANING OF REMITTANCE

## 10.1 Meaning of remittance – Introduction

The ITA remittance basis is set out in ss.809K–809Z7 ITA. Section 809K(1) ITA provides:

> Sections 809L to 809Z6 apply for the purposes of—
> (a) this Chapter,
> (b) sections 22 and 26 of ITEPA 2003 (relevant foreign earnings charged on remittance basis),
> (c) section 41A of that Act (specific employment income from securities etc charged on remittance basis),
> (d) section 832 of ITTOIA 2005 (relevant foreign income charged on remittance basis), and
> (e) section 12 of TCGA 1992 (foreign chargeable gains charged on remittance basis).[1]

Thus the ITA remittance basis applies for most (but not quite all) tax purposes. In this chapter I shall not consider the exceptional cases where the ITA rules do not apply.

---

1 Section 809K(2) ITA adds a (somewhat unnecessary) overview in accordance with the principles of Plain English Drafting:
"Those sections—
(a) explain what is meant by income or chargeable gains being 'remitted to the UK' (sections 809L to 809O),
(b) provide for the calculation of the amount remitted (section 809P),
(c) contain rules for attributing transfers from mixed funds to particular kinds of income and capital (sections 809Q to 809S),
(d) contain further provision in relation to certain foreign chargeable gains (section 809T and 809U), and
(e) treat income or chargeable gains as not remitted to the UK in certain cases (see sections 809V to 809Z6)."

### 10.1.1 *Remittance Conditions A to D*

Section 809L(1) ITA provides:

> An individual's income is, or chargeable gains are, "remitted to the UK" if—
> (a) conditions A and B are met,
> (b) condition C is met, or
> (c) condition D is met.

I refer to "**remittance conditions A to D**" to avoid confusion with the myriad other conditions in ITA.

It is considered that s.809L(1) is a comprehensive and not an inclusive definition of remittance, because of the complexity and breadth of the remittance conditions. That is, a sum is remitted if and only if one of these three sets of conditions are satisfied. In practice remittance conditions A and B are the most important.

I refer to a remittance within the meaning of s.809L(1) as **"a taxable remittance"**. A sum which can be received in the UK without a taxable remittance is referred to as **"clean capital"**.

### 10.1.2 *Why is the remittance basis difficult?*

The difficulty is inherent in the concept of a remittance basis. Although it is an exaggeration to say that "money has no earmark" it is often very difficult to trace or earmark money.[2] The fungibility between foreign income/gains and other assets makes it hard to determine whether any assets received in the UK should be regarded as the foreign income/gains. But this is what a remittance basis requires to be done.

Before 2008 the matter was largely left to the courts to sort out. It cannot be said that the courts were entirely successful.[3] In 2008 Parliament recast the rules in statutory form. It cannot be said that this is any more successful. The uncertainties are greater than before, complexity and

2 *Lipkin Gorman v Karpnale* [1989] 1 WLR 1340 at p.1382 (CA). The law of tracing illustrates this in another context.

3 Thus Viscount Simonds referred to remittances as "this difficult branch of the law": *Thomson v Moyse* 39 TC 291 at p.328. Likewise Finlay J in *Kneen v Martin* 19 TC 33 at p.41: "This subject is always troublesome...".

record keeping are vastly increased,[4] and no less than before, careful planning is needed to avoid unfairness.

### 10.1.3 *Comparison with pre-2008 remittance basis*

The wording of the ITA remittance basis is so different that pre-2008 authorities on the remittance basis need careful review to see if they are still applicable under the ITA remittance basis, though some are still useful.

HMRC agree. The RDR Manual provides:

> **31210. Key differences between 'new' (post 5 April 2008) and 'old' regime (pre 6 April 2008)** [February 2011]
> ...The previous case law is now of limited relevance.

## 10.2 Relevant person – introduction

Before discussing the remittance conditions, it is necessary to consider the term "relevant person". All four remittance conditions use the term. "Relevant person" is defined in s.809M ITA. Section 809M(1) ITA provides:

> This section applies for the purpose of sections 809L, 809N and 809O.

In fact the definition applies throughout the remittance provisions.[5]

A relevant person strictly means the individual to whom income/gains accrue, as well as certain persons connected to them. But in the discussion below I generally refer to the individual himself as "the individual" and use the term "relevant person" to mean the others within the statutory definition.

Strictly one should not use the term "relevant person" in the abstract. A relevant person can exist only *in relation to an individual*. But where the context is clear it is permissible to refer to a relevant person in isolation (leaving the words "in relation to an individual" and the identity of that

4 The topic which took up 78 pages in the 2007/08 edition of this work needed three chapters and 300 pages in the current edition.

5 The term "relevant person" is also used in s.809Z2(2) where the drafter has to say expressly that the s.809M definition applies, and in transitional provisions.

individual to be inferred from the context).

Section 809M ITA sets out eight categories of relevant person. These can be split into three groups: close family, family companies and family trusts.

## 10.3 Relevant person – close family

The first four categories of relevant person are close family. Section 809M(2) ITA provides:

> A "relevant person" is—
> (a) the individual,
> (b) the individual's husband or wife,
> (c) the individual's civil partner,
> (d) a child or grandchild of a person falling within any of paras (a) to (c), if the child or grandchild has not reached the age of 18.

### 10.3.1 *Persons living together*

Section 809M(3) ITA provides:

> For that purpose—
> (a) a man and woman living together as husband and wife are treated as if they were husband and wife;
> (b) two people of the same sex living together as if they were civil partners of each other are treated as if they were civil partners of each other.

This provision treats cohabitees as married persons and so relevant persons. This was a relatively new development in tax, but it has now become standard in anti-avoidance provisions.

The New Tax Credits Claimant Compliance Manual provides:

> **15040 Couples who are Unmarried and Not Civil Partners** [April 2010]
> ... The legislation does not say what conditions must exist before we will conclude that a couple are LTAHAW [living together as husband and wife]. We have therefore adopted the approach used by the DWP. Using the same approach for same-sex couples means they are not treated any more or less favourably.
> Since 1977 the Department for Work and Pensions (DWP - formerly the Benefits Agency) has followed a standard approach to the question of whether a man and woman are living together based on a list of criteria to be considered both

individually and as a whole. Working Families' Tax Credit (WFTC) adopted the same criteria and this has continued for WTC and CTC. This approach ensures unmarried couples are not treated any more or less favourably than married couples.

Living together as husband and wife (LTAHAW) has its normal meaning in every day language, but the Courts and administrative practice have developed a number of criteria to help apply that meaning to every day situations. They are:-

- living in the same household - CCM15070-CCM15075
- stability of relationship - CCM15080
- financial support - CCM15090
- dependent children - CCM15100
- public acknowledgement - CCM15110

Remember that these are only indicators to help you form a sustainable view of whether a couple are living together for the purposes of the tax credit claim. They are not intended as a crude checklist and you should not apply a blanket "four out of five ticked" type test. The weight and worth of each indicator will vary from relationship to relationship and you should arrive at your conclusions on the balance of evidence, based on the facts (see CCM15060). However, you need to be aware of the changing nature of relationships - see CCM15045.

**15045 Modern-Day Relationships** [April 2010]

Since the LTAHAW criteria was devised in the 1970's, the United Kingdom has undergone major social and economic changes. These have had an impact on the nature of personal relationships.

In the 1970's a typical couple might not have lived together before marriage and, after marrying, they might have pooled the whole of their income with the man as the main breadwinner and the woman possibly working part-time and responsible for childcare and running the household.

By 2004, 70% of first domestic partnerships involved unmarried couples and it is now common for each party in a couple to work full-time, keep their own incomes and bank accounts and perhaps only pay money into a joint account for items of joint responsibility. Often because of demands on time both parties share childcare and domestic tasks.

It may therefore be more difficult to identify the criteria shown at CCM15040 but you should still explore all of these items.

**15060 Balance of Evidence** [September 2008]

It is not possible to lay down hard and fast rules about the weight and worth of the various criteria in establishing that a couple are living together. You will need to decide every case on its merits and on the balance of evidence. Sometimes the conclusion will be obvious, and at other times it will be a very fine judgement. Although you must consider each of the five criteria listed at CCM15040 you might not be able to gather evidence for each of them. For example the claimant might say they have no idea what others think of their relationship.

If you are having difficulties in making up your mind about what the evidence means, you may find it helpful to list the evidence on both sides of the argument. This should help you identify where the balance of evidence lies – though you should not base your decision on a crude numerical assessment, as some elements of the evidence may be far more critical than others.

If you still cannot decide, you may want to discuss the issues with your manager, or with another colleague in your team. If the issues are particularly difficult, you may, after consulting your manager, want to refer to your Claimant Compliance Group Manager.

Where there is no reply to your opening letter – see CCM15370.

**15070 Living in the Same Household** [April 2010]

The claimant may admit they live in the same household as the suspected partner but that does not automatically mean they are Living Together as Husband and Wife (LTAHAW) or Living Together as Civil Partners (LTACP).

There may be any number of reasons why a man and woman share accommodation. They include:

- a couple with disabilities or ill health may care for and support each other
- one of them may require care/support to live a normal life
- the claimant may provide accommodation for a friend, or relative or tenant
- the claimant may have been provided with accommodation by a friend, relative or landlord in that person's own home.
- a formerly married or unmarried couple may still live in the same house until they reach a financial agreement. During periods when property prices or rents are high, the property market is sluggish, or negative equity is common, former couples may be compelled by economic necessity to share the same premises for some time after the relationship has ended- see CCM15395

The relevant factors to consider when determining whether a couple are living in the same household may be:-

- how/why the couple came together
- is rent received or paid? If so the income will (unless it is exempt under the rent a room scheme) be treated as income in the hands of the recipient.
- what kind of accommodation they share
- if there is no formal rent agreement how are costs shared? How would exceptional expenditure be met? For example, if major unexpected repairs had to be carried out or home improvements made.
- any absences from the household - why and how often - see CCM15073
- any other reasons for them living in the same household.

Even if you establish a couple are living in the same house this does not necessarily mean they are LTAHAW or LTACP. Before you can amend the award you must therefore consider the other criteria detailed at CCM15080-CCM15110.

**15073 Absences From The Home** [April 2010]

Absences from the home, whether occasional or regular, do not necessarily mean that a couple is not LTAHAW or LTACP. For instance, the absence could be due to:-

- work (eg. oil rig worker or long distance lorry driver)
- hospital in-patient
- holiday
- visit to relatives
- higher education

- custody of less than 52 weeks
- armed forces

This list is not exhaustive, but gives some suggestions to the types of absence. The common feature of all of these reasons for absence is their temporary nature. There is no specific period of time after which an absence ceases to be temporary and you will need to draw conclusions based on the particular facts of each case. Factors to be considered include:

- the length of the absence
- how much longer it is expected to last
- to what extent the couple have maintained contact
- their future intentions

One situation you might encounter is where the partner works away for a few days at a time and either lives with friends or in hotels/bed and breakfast accommodation. They only return to the claimant's home for a couple of days at a time, the suggestion is this is purely to see the children and they stay at the claimant's home as they have nowhere else to stay in the area. As well as exploring the other criteria described in CCM15080-CCM15110 you will need to establish

- the reason why they have this arrangement
- how long has the arrangement lasted
- how much longer is it likely to last?
- what would happen if the partner lost their job?

**15075 Undisclosed Partner has No Other Address** [April 2010]

A claimant may accept that the suspected partner uses their address for mailing purposes. This could be for:

- tax and benefit purposes
- financial purposes (bank account, credit card, loan)
- for motor vehicle purposes (insurance, vehicle registration)

The claimant might suggest this is because the suspected partner has no fixed abode and simply drifts around a series of friends or because their mail is not secure at their own home.

You are entitled to ask for evidence of the suspected partner's other accommodation address and often an appeal tribunal will ask for this sort of information. However, you cannot demand that they provide such information nor can you say that if they do not provide evidence of an alternative address you will treat them as LTAHAW or LTACP and terminate their award.

The absence of such evidence is not conclusive proof that the claimant is living with the suspected partner. Where the claimant cannot provide such evidence you must still look at all of the other criteria and decide their various strengths and weaknesses. In addition, you should consider whether it is reasonable for the suspected partner to be using the claimant's address.

**15080.Stability of Relationship** [October 2005]

The length of time a couple have been together does not necessarily indicate how stable the relationship is. At one end of the scale you may come across couples who have known each other only a few weeks or days, but who have moved in together with the firm intention of staying together.[6] At the other end of the scale may be couples who have divorced after say 25 years of marriage and who are still both occupying the formal marital home until they can afford to live apart. Some couples may also have a history of repeated temporary splits and reconciliations.

Relevant factors may be: –

- on what basis they split household chores and responsibilities, such as cooking, cleaning and paying bills
- whether they are both involved in caring for any children who live in the household
- whether they tend to spend their leisure time together or separately
- whether they normally take joint holidays
- whether they plan any future activities or responsibilities jointly or separately
- whether they intend to get engaged or married
- whether the relationship has a volatile history ie. the couple is known to have had several splits and reconciliations.

An established pattern of domestic or financial activity will usually indicate an established relationship.

**15090 Financial Support** [April 2010]

How a couple organise their finances will vary from couple to couple. Relevant factors may be:

- the existence of joint accounts or investments. If the claimant claims that the joint account is being maintained because one of them is credit blacklisted, does the pattern of transactions suggest that the other person is withdrawing his/her wages for their own use? Or are there indications that the wages are available to meet general household expenditure?
- the extent to which money and other financial resources are pooled.
- who pays the household expenses?
- whether the suspected partner makes regular payments to the claimant, and if so, what they are for.
- whether the suspected partner would provide financial support if the claimant's income ceased.
- whether the claimant would support the suspected partner if their income ceased.
- whether a set amount of maintenance to be paid by the absent parent following a decision by the CSA or a binding agreement between the parties.

At any meeting you should attempt to establish the claimant's incomings and outgoings so that you can see whether they could exist on their own income. If you have already seen bank statements and household bills you should be ready to challenge suspect items. For example deposits into the bank account, direct

---

6 The RDR Manual makes the same point:

**33030. Relevant person - definition** [July 2010]

... There is a no minimum period for cohabitation; it is a question of fact as to whether two individuals are living together as spouses or civil partners.

debits, patterns of withdrawal or any expenses for which you would have expected to see bills but none have been produced.

**15100 Dependent Children** [April 2010]

Joint responsibility for a child or children (who may belong to either or both of the couple) may be an indication that the couple is LTAHAW or LTACP, but it is not conclusive proof. Relevant factors may be:

- parentage of the child or children.
- whether, and how, the couple exercises joint responsibility, for example:
  - who visits the school or delivers/collects to and from the school
  - who would the school contact in an emergency
  - who arranges and takes the children to and from medical and dental appointments
  - who exercises control of or offers guidance to the children
  - who the Child Benefit Office has as the alternative payee
  - who provides financial support/pocket money/pays for treats
  - who buys the clothes and or toys.

An intention to adopt by the non-birth partner could be a particularly telling indication of the couple's long term view of the family unit. You should not, because of its sensitivity, seek out the information; but if it is spontaneously offered you should give it proper weight in arriving at your conclusions. Be wary of drawing conclusions about the current relationship based on say the fact that the children continue to be known by the surname of the ex-husband or ex-partner as this is common practice and is not evidence of a continuing relationship between the parents. Nor does the presence of photographs of the child's father or mother indicate the claimant is living with that person.

**15110 Public Acknowledgement** [October 2005]

An important consideration is how the outside world (including family, friends, neighbours, social workers, employers, schools, childcare providers, etc.), perceive the couple. Relevant factors may be:

- Whether both members use the same surname
- Whether schools/child care providers/employers/others regard them as a couple
- Whether they engage in social activities together
- Whether they are joint members of clubs/leisure centres/societies
- Whether they plan and organise their lives jointly.

CCM5500 lists the third parties you can legally approach for information during the course of your examination. You cannot obtain information from family members, friends, neighbours, social workers or schools, unless they also fall into one of the categories listed at CCM5500.

For example – A family member may also be an employer, or a neighbour may also provide registered child care. But it is perfectly acceptable for you to ask the claimant what their family/neighbours etc. would say if they were asked whether they regarded him/her as being a member of a couple.

**15120 Sexual Relationship** [January 2008]

DWP used to consider the couple's sexual relationship as one of the criteria for determining LTAHAW but this is no longer the case. The couple's sexual relationship is of little help in deciding whether they are living together as husband and wife or living together as civil partners. There may be no sexual relations in a marriage or civil partnership and sexual relationships of a casual nature, where neither partner has any lasting commitment to the other, are a common feature of contemporary life.

You must not ask any questions about a couple's sexual relationship. If the claimant introduces the subject, you should take note of any information volunteered but should bear in mind (and explain to the claimant) that it is unlikely to have any relevance to the question of whether they are living together as husband and wife.

Appeal tribunals sometimes ask claimants about their sexual relationships, however, it remains our policy that you must not ask such questions. If a tribunal asks you why you have not established the position you should say that our internal policy, in common with that in DWP, is not to ask about this side of the relationship.

In one particular appeal case the Social Security Commissioner said that where there has never been a sexual relationship between the parties, strong alternative grounds are needed to reach the conclusion that the relationship is akin to husband and wife. However, absence of a sexual relationship at anytime where there has been one in the past is not itself indicative that the couple are not LTAHAW.

Where the claimant's sole objection to your conclusion is that they have no sexual relationship with the suspected partner or they appeal against a decision on these grounds you should seek further advice from the Benefits and Credits Technical team in Preston.

**15150 Reasons for Failure To Report A Partner** [April 2010]

Claimants may offer a range of reasons or excuses for their failure to report the existence of a partner. These may include:

- S/he does not stay here all of the time - see CCM15073.
- S/he lives at another address but uses my address as a post box - see CCM15075.
- I thought s/he could stay 3 nights a week without it affecting my entitlement.
- S/he does not give me any money, or payments are not regular - see CCM15090.
- S/he is not the mother/father of my child (ren).
- S/he is a lodger - see CCM15070.
- S/he is just a friend.
- It is hard being a single parent.
- The Government does not pay people like me enough.
- The rules on income are not fair.
- We do not have a sexual relationship - see CCM15120.

The 3 nights rule is a popular misconception. No such legal loophole exists. If a suspected partner spends 3 nights with the claimant on a regular basis, s/he may be a member of an established couple. Also, the children's parentage is not, in isolation, reliable evidence.

You will need to explain to the claimant the criteria which we use to determine whether they are living together as husband and wife or living together as civil partners - see CCM15040. You will then need to establish the facts by considering all the evidence from all legally available sources, including the claimant.

**15160 Respecting Claimant's Privacy** [October 2005]

In all your contacts with claimants you must always be aware of Human Rights issues, and of the need to respect the claimant's privacy. It is particularly important that you adopt this approach in any discussions which may touch on their private life.

You should avoid any impression that you are examining the claimant's home or household for signs of any such relationship. You must not ask about the claimant's sleeping arrangements in an attempt to find out whether s/he shares a bedroom with another adult.

Claimants may however volunteer information of this kind when, for example, confirming the number of children who live there; describing how friends or relatives sometimes stay to help out with childcare or explaining that their ex-partners stays in the spare room whenever they come to visit the children. If the claimant simply says their partner stays overnight when they come to visit or care for the children you must not ask where they sleep.

You should not normally ask claimants about the number of bedrooms in their house but if the claimant has suggested that an adult who lives in the house is a paying lodger, it is reasonable to expect the lodger would have his/her room rather than sleeping on a sofa or floor.

In the circumstances it will be appropriate to ask how many bedrooms there are and what room(s) the lodger occupies, and to test the answer in the light of other information/evidence. The number of bedrooms and the ages/sexes of the other occupants of the house will be relevant. For example the claimant may live in a 3 bedroom house with 2 children, a boy of 12 and a girl of 16, and it will be reasonable to ask what arrangements have been made so that the lodger can occupy his/her own room.

It is important that any questions you need to ask should be directed at establishing the room the lodger occupies and their relationship with the claimant and not at establishing who the claimant sleeps with.

**15170 (This text has been withheld because of exemptions in the Freedom of Information Act 2000)** [June 2006]

**15180 (This text has been withheld because of exemptions in the Freedom of Information Act 2000)** [June 2006]

**15190 Claimant Has Been Involved in Different Relationships** [October 2005]

Where the claimant has been involved in relationships with different partners at different times during the year, you should treat the ending of one and beginning of another as a CoC on each occasion. However, where the claimant has split up and reconciled with the same partner, you should normally ignore the splits and treat the claimant and partner as a couple throughout the period.

If the claimant objects to this approach you should consider whether in spite of the temporary break in the relationship, the claimant and partner would still be considered a couple in accordance with other relevant criteria eg. nature of any financial support. If you cannot establish that the couple were effectively living together throughout the period, you should apply the CoC provisions to each break in the relationship.

**15195 Date on which Claimants Became A Couple** [October 2005]

The question of whether the claimant was in reality a member of a couple is not just relevant to the date at which the claim commenced. Becoming or ceasing to be a member of a couple is a notifiable change of circumstances so it is also relevant at all other times during the year.

You will sometimes have evidence that places the suspected partner at the claimant's address at one or more dates during the year for example a series of letters signed by the partner to his/her employer or tax office. However, you may not be able to point to anything which strongly indicates their presence at the beginning of the year or claim period.

When challenged about the existence of a partner, claimants may be reluctant to admit to their failure to declare the partner on the claim, claiming instead that s/he only moved in some time later.

You will need to use your judgement in these cases. As a general rule if you are confident the evidence you have is reasonable proof that the claimant was a member of a couple from the date the claim commenced, you should put that date forward to the claimant. If you feel there is some doubt around that date, or you would have difficulty in substantiating it, but you are convinced that the claimant was a member of a couple at some point during the year, you should propose to the claimant an appropriate date from which they should be treated as a member of a couple. You should be prepared to negotiate the date with the claimant bearing in mind the important factor of getting the claim on the right basis for the future. However, you must remember that your decision may have to be defended before an appeal tribunal so you must have evidence to support the proposal.

**15200 Information held by HMRC** [October 2005]

A case identified for enquiry on the grounds of a suspected undisclosed partner will usually have been selected because information held by us indicates another adult living at the claimant's address. The CCRO will have checked HMRC and other databases and other available information sources, before passing the case to you. You will therefore already have most of the evidence you will want to discuss with the claimant before you open the case.

The information is likely to include some or all of the following sources.

| **Type** | **Identifies** |
|---|---|
| Voter's List | Suspected partner listed? |
| HMC address database | What address does the HMRC hold for suspected partner? |
| Telephone Directory | What address/phone number is listed for suspected partner? |
| Yellow Pages/Other | Ditto for self employed suspected partner. |
| SA | Ditto for self employed suspected partner. |
| TRP Data Mart | Any joint bank accounts etc, listed? |
| COP/CODA | Any additional allowances? |
| Child Benefit | Partner shown on original claim/as alternative payee? |
| Previous Claims | Was partner shown on earlier WFTC/DPTC/WTC/CTC claims? |
| Equifax/Experian | Is suspected partner shown at claimant's address? |

| | |
|---|---|
| DWP | Intelligence suggesting a live-in partner? |
| CSA | Maintenance paid? Reference to partner in interview notes. |
| Housing or Council Tax Benefit | Details of occupants. CT reduction for single adult being Received? |
| Letters on File | Any indication (particularly recent) of suspected partner living at claimant's address? |

**15210. Information from Claimant** [April 2010]

Despite the information that will have been given to you by the CCRO there will also be information you can only obtain from the claimant or with the claimant's agreement, for example:

- Bank statements - are they joint? If not, do they contain evidence of joint incomings/outgoings/spending?
- Utilities and other bills - who are these sent to?
- Council tax bills - a single occupier is entitled to a reduction, which will be identified on the statement.
- Mortgage claims/statement - whose name appears on any documentation?
- Rent book - whose name appears in the book as landlord and tenant?
- Hire purchase agreements - whose name is on the documents?
- Services and rentals eg. TV, satellite, telephone agreements - whose name are they in?
- Marriage certificate - does it show a recent marriage to the suspected partner?

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

**15220 Short Term Relationships** [January 2006]

In some cases the claimant might admit they had a partner during the period under review but says they are no longer a couple. You will need to review the facts to establish whether they are in fact still a couple.

Where the claimant admits to a short term relationship which you accept has now ended you will need to decide whether the relationship amounted to them living together as husband and wife (LTAHAW) or living together as civil partners (LTACP). You will need to explore the criteria at CCM15040.

There are no hard and fast rules as to the length of time a couple are together before we consider it to be LTAHAW or LTACP. If they are LTAHAW or LTACP then we will treat them as a couple for tax credit purposes even if they are only together a short time. However, in reality a short term relationship (less than 3 months) is unlikely to meet the criteria at CCM15040. They may satisfy one of the criteria but not the others. In such cases you will have to use your judgement and you should consult your manager if necessary. Remember your decision may have to be defended before an appeal tribunal so you must have evidence to support the proposal.[7]

---

7 Earlier versions of this guidance are (1) The Independent Taxation Manual (paragraphs now withdrawn) and (2) the ACG–WFTC/DPTC Applicant Compliance Guide para 9010 (not set out here as it adds nothing to the New Tax Credits Claimant Compliance Manual). The text is in the 9th ed of this work.

The Law Commission consultation paper "Intestacy and Family Provision" (October 2009) has some useful comments:

> 2.70 The requirement that the applicant should have been living "as" the spouse or civil partner of the deceased has been the subject of analysis by the courts. In *Re Watson*, it was said that the test is:
>
> > whether, in the opinion of a reasonable person with normal perceptions, it could be said that the two people in question were living together as husband and wife; but, when considering that question, one should not ignore the multifarious nature of marital relationships.[8]
>
> 2.71 Accordingly, it was not determinative in that case that Mr Watson and Miss Griffiths had not continued a sexual relationship during the period when they were living together, nor that they had informally agreed to share outgoings, nor that Miss Griffiths had rejected Mr Watson's marriage proposal. On the whole of the evidence the judge reached the conclusion that Miss Griffiths had been living "as the wife" of Mr Watson.
>
> 2.72 The couple must have been living in the same household, which means that it does not matter if the parties each have a separate home, provided that they have formed one joint household. It has been said that this seems:
>
> > To have elements of permanence, to involve a consideration of the frequency and intimacy of contact, to contain an element of mutual support, to require some consideration of the degree of voluntary restraint upon personal freedom which each party undertakes, and to involve an element of community of resources.[9]

The Law Commission also consider the salacious possibility that an individual may have more than one cohabitee:

> 4.108 ... where the deceased was a party to more than one cohabiting relationship at the date of death, it may be more difficult to determine

8 [Footnote original] [1999] 1 FLR 878, 883, by Lord Neuberger of Abbotsbury.

9 [Footnote original] *Churchill v Roach* [2002] EWHC 3230, [2004] 3 FCR 744, 761. See also *Kotke v Saffarini* [2005] EWCA Civ 221, [2005] 2 FLR 517, a case on similar wording in section 1(3)(b) of the Fatal Accidents Act 1976, where the Court of Appeal held at [59] that it was correct to distinguish between "wanting and intending to live in the same household, planning to do so, and actually doing so".

whether the deceased "was sufficiently involved in either household for one or both to amount to cohabitation at all".[10] However, cases may arise in which it can be shown that both partners are cohabitants within the definition adopted, for example where there are religious marriages which do not qualify as legal marriages.

### 10.3.2 *Prohibited Relationships*

The New Tax Credits Claimant Compliance Manual provides:

> **15025 Prohibited Relationships** [January 2006]
> The law prohibits certain relationships by relatives. For example a woman cannot marry or form a civil partnership with her grandfather or her uncle and a man cannot marry or form a civil partnership with his daughter or sister. A full list of prohibited relationships is contained at CCM15030.
> Where you establish that a claimant is living as a couple with a relative who appears on the list of prohibited relationships we do not consider this to be an LTAHAW or LTACP situation. The reason for this is that the couple cannot marry or become civil partners in law so we cannot say they are living together as husband and wife as they could never be husband and wife or living together as civil partners as they could never be civil partners. The claimant will therefore be treated as a single claimant.
> **15030 List of Prohibited Relationships - Marriage** [April 2010]
> Throughout the United Kingdom and Guernsey, Jersey and the Isle of Man, the law prohibits certain blood relatives, step relatives and relatives-in-law from getting married.
> A man cannot marry his:
> - mother
> - adopted mother/ former adoptive mother
> - daughter
> - adoptive daughter/ former adoptive daughter
> - grandmother
> - granddaughter
> - sister
> - aunt
> - niece
>
> A woman cannot marry her:
> - father
> - adopted father/ former adoptive father
> - son
> - adoptive son/ former adoptive son

10 [Footnote original] Cohabitation: the Financial Consequences of Relationship Breakdown (2007) Law Com No 307, para 3.68.

- grandfather
- grandson
- brother
- uncle
- nephew

Additionally, people cannot marry if:

- either of them is aged less than 16, or
- in a ‘step’ relationship, the younger person had, before reaching age 18:
- lived in the same household as the older person, and/or
  - been treated as a child of the older person’s family, or
- in an ‘in-law’ relationship:
  - either person involved is aged less than 21, and/or
  - any person originally involved in creating the ‘in-law’ relationship’ is still alive, for example we do not consider LTAHAW if a man lives in the same household as his daughter-in-law and the man’s son or wife is still alive.

If you are unsure whether the claimant is in a prohibited relationship you should seek further advice from the Benefits and Credits Technical Team in Preston.

**15032. List of Prohibited Relationships - Civil Partners** [April 2010]

The law in the United Kingdom prohibits certain blood relatives, step relatives and relatives by civil partnership from forming a civil partnership. The legislation in Scotland is slightly different from the legislation that applies in England, Wales and Northern Ireland.

In England, Wales and Northern Ireland someone cannot form a civil partnership with their:

- parent
- adopted parent/ former adoptive parent
- child
- adoptive child/ former adoptive child
- grandparent
- grandchild
- brother, sister, half-brother or half-sister
- parent’s brother, sister, half-brother or half-sister
- niece or nephew

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of grandparent
- Former civil partner of parent
- Former spouse of grandparent
- Former spouse of parent
- Grandchild of former civil partner
- Grandchild of former spouse

If:

- either of them is aged less than 21, or
- the younger person had, before reaching age 18:
- lived in the same household as the older person, and/or

- been treated as a child of the older person's family, or

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of parent
- Former spouse of parent

If:

- either person involved is aged less than 21, and/or
- any person originally involved in creating the relationship is still alive, for example we do not consider LTACP if a woman lives in the same household as her daughter-in-law and the woman's son or husband is still alive.

In Scotland someone cannot form a civil partnership with their:

- parent
- adopted parent/ former adoptive parent
- child
- adoptive child/ former adoptive child
- grandparent
- grandchild
- brother, sister, half-brother or half-sister
- parent's brother, sister, half-brother or half-sister
- niece or nephew

Additionally, someone cannot form a civil partnership with the:

- Child of former civil partner
- Child of former spouse
- Former civil partner of grandparent
- Former civil partner of parent
- Former spouse of grandparent
- Former spouse of parent
- Grandchild of former civil partner
- Grandchild of former spouse

## 10.4 Relevant persons - companies

The provisions discussed in this section have had a complicated evolution. I omit it here - reluctantly as the story has amusing aspects - as it is now of historic interest only.[11]

Under s.809M(2)(e) ITA the next category of relevant person is:

(e) [i] a close[12] company in which a person falling within any other

11 The reader may turn to the 9th edition of this work for a lesson in how not to legislate.

12 Section 809M(3)(c) ITA provides the standard definition:

"'close company' is to be read in accordance with Chapter 2 of Part 10 of CTA 2010 (see in particular section 439 of that Act)."

paragraph of this subsection is a participator, or

[ii] a company which is a 51% subsidiary[13] of such a close company.

Under s.809M(2)(f) ITA the next category of relevant person is:

(f) [i] a company

[1] in which a person falling within any other paragraph of this subsection is a participator, and

[2] which would be a close company if it were resident in the UK, or

[ii] a company which is a 51% subsidiary of such a company

This is intended to catch family companies but it is widely drawn. An individual would not usually know whether or not any company is a relevant person in relation to them, because they cannot tell whether it might have a participator who is a trustee of a RP trust. Companies may also be caught as bodies connected to trusts.[14]

### 10.4.1 *"Participator"*

The key term here is "participator". Section 809M(3)(ca) ITA provides:

"participator",

[i] in relation to a close company, means a person who is a participator in relation to the company for the purposes of section 455 of CTA 2010 (see sections 454 and 455(5) of that Act), and,

[ii] in relation to a company that would be a close company if it were resident in the UK, means a person who would be such a participator if it were a close company

This incorporates s.455(5) CTA 2010 which provides a wider than standard definition of "participator":

13 Section 809M(3)(cb) ITA provides the standard definition:

"'51% subsidiary' has the same meaning as in the Corporation Tax Acts (see Chapter 3 of Part 24 of CTA 2010)."

14 See 10.6 (Body connected with trust).

> If a company (C) controls[15] another company (D), a participator in C is to be treated for the purposes of this section as being also a participator in D.

For this definition, see 73.15 (Definition of participator).

## 10.5 Relevant persons – trusts

Under s.809M(2)(g) ITA the next category of relevant person is:

> (g) the trustees of a settlement of which a person falling within any other paragraph of this subsection is a beneficiary.

This is intended to catch family trusts but it is so widely drawn it covers many if not most trusts in existence.

I refer to a trust within s.809M(2)(g) as an "**RP trust**".

Section 809M(3)(e) ITA defines "beneficiary":

> "beneficiary", in relation to a settlement, means any person who receives, or may receive, any benefit under or by virtue of the settlement;

Thus every trust with an unrestricted power to add beneficiaries (which is a standard form) is an RP trust. But if the power to add is only exercisable with the consent of an individual the position is different.

If T is excluded but lends interest-free to the trust, it is considered that the trust does not become an RP trust in relation to T. T may receive a benefit (on repayment of the loan).[16] However that benefit arises under or by virtue of making the loan to the trustees, and under or by virtue of the loan agreement, but not under or by virtue of the settlement.[17]

A trust is not an RP trust in relation to T if its terms provide that children or grandchildren of T can benefit only after they have reached the age of

15 The ultra-wide definition of "control" applies: see 73.4 (Control in ultra-wide sense).

16 See 24.3.2 ("Settlor-interested" for IT purposes).

17 The same point arises in relation to pre-owned assets, where HMRC accept a similar argument: see 66.8 (POA intangible property charge).

18.[18]

Section 809M(3)(d) ITA provides:

> "settlement" and "settlor" have the same meaning as in Chapter 2 of Part 9.

This brings in the standard IT/CGT definition of "settlement".[19] The definition of "settlement" seems unnecessary, since this definition applies except so far as the contrary intention otherwise requires; but it does no harm.[20]

The definition of "settlor" is otiose as the word is not used in the definition of "relevant person".

Section 809M(3)(f) ITA provides:

> "trustee" has the same meaning as in section 993 (see, in particular, section 994(3)).

So we need to turn to s.994(3) ITA:

> For the purposes of section 993 "trustee", in the case of a settlement in relation to which there would be no trustees apart from this subsection, means any person—
> (a) in whom the property comprised in the settlement is for the time being vested, or
> (b) in whom the management of that property is for the time being vested.[21]

---

18 See *Vestey v IRC* 31 TC 1 which decided that a trust with a power to benefit the widow of the settlor was not settlor-interested. At the time that the income arose:
(1) The settlor's wife could not benefit (as she was not a widow).
(2) It was possible that in the future she could benefit (as she might survive the settlor and so become a widow). That did not matter because the legislation (which is comparable to s.809M) was held to apply only if *at the time that the widow received a benefit* she fell within the words "spouse of the settlor".

19 See 69.2.2 (Standard IT/CGT definition of settlement).

20 The definition is useful for the avoidance of doubt, since s.809M twice refers to s.993 ITA, where the settlement-arrangement definition applies. Thus the definition makes it clear that the settlement-arrangement definition of settlement is not applicable to s.809M.

21 For completeness: s.994(3) concludes: "Section 466(4) does not apply for the purposes of this subsection." That has no relevance here.

Section 809M(3)(f) (incorporating the s.994(3) definition of trustee) is misconceived. The s.994(3) definition of trustee makes sense in the context of s.993 ITA where settlement means settlement-arrangement (which may not have trustees). It does not make sense in the context of s.809M ITA where settlement means classic settlement, which must have trustees. But no significant harm arises from this mistake.

## 10.6 Body connected with trust

Under s.809M(2)(h) ITA the last category of relevant person is:

> (h) a body connected with such a settlement.

That is, a body connected with a settlement within 809M(2)(g), a settlement of which some other relevant person is a beneficiary.

### 10.6.1 *"Connected with a settlement"*

Section 809M(3)(g) ITA defines "connected with":

> a body is "connected with" a settlement if the body falls within section 993(3)(c), (d), (e) or (f) as regards the settlement.

This must not be confused with the more common tax concept of "connected person".

In order to follow it one needs to set out the four paragraphs of s.993(3)(c)(d)(e) and (f).

First, s.993(3)(c)(d) ITA provide:

> (3) A person, in the capacity as trustee of a settlement,[22] is connected with ...
> (c) any close company whose participators include the trustees of the settlement,

22 "Settlement" in s.993 means settlement-arrangement: see s.994(1) ITA. However for a body to qualify as a relevant person under s.809M(2)(h) there needs to be a settlement within the standard IT/CGT definition.

> (d) any non-UK resident company which, if it were UK resident, would be a close company whose participators include the trustees of the settlement

Section 809M(3) is not elegently drafted. It refers to a body connected with a settlement; whereas s.993 refers to bodies connected with trustees of a settlement; but the meaning must be the same.

At first sight it seems unnecessary for s.809M(3)(g) to refer to s.993(3)(c) or (d), because any company within (c) or (d) would be a relevant person in any event under s.809M(2)(e) or (f).[23] But this does make a difference as can be seen from the examples below. In any case, one needs to have them in mind in order to understand s.993(3)(e).

"Participator" in s.993(3)(c)(d) is not defined; it is considered that it bears the normal close company meaning.

Section 993(3)(e) ITA provides:

> (e) any body corporate controlled (within the meaning of section 995) by a company within para (c) or (d)

That takes us to s.995 which provides:

> (1) This section has effect for the purposes of the provisions of the Income Tax Acts which apply this section.
> (2) In relation to a body corporate ("company A"), "control" means the power of a person ("P") to secure—
> (a) by means of the holding of shares or the possession of voting power in relation to that or any other body corporate, or
> (b) as a result of any powers conferred by the articles of association or other document regulating that or any other body corporate,
> that the affairs of company A are conducted in accordance with P's wishes.
> (3) In relation to a partnership, "control" means the right to a share of more than half the assets, or of more than half the income, of the partnership.

Lastly, s.993(3)(f) ITA provides:

23 Because the trustees are participators.

(f) if the settlement is the principal settlement in relation to one or more sub-fund settlements, a person in the capacity as trustee of such a sub-fund settlement.

It seems unnecessary for s.809M(3)(g) to refer to s.993(3)(f). Possibly the drafter only intended to refer to s.993(3)(c)(d)(e) and the reference to (f) slipped in by mistake. But since sub-fund settlements are dead-letter tax law (never found in practice) the point does not matter.

### 10.6.2 *"Body"*

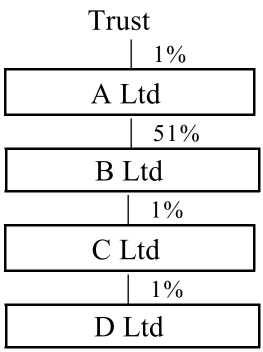
Section 809M(2)(h) refers to a "body" connected with a settlement. The term is wide and somewhat vague. However in order to fall within s.993(3)(c)(d) the body must be a company. In order to fall within s.993(3)(e) the body must be a body corporate. Presumably the word "body" was selected as the apt term to include the (somewhat theoretical) case of trustees of sub-funds under s.993(3)(f).

What if trustees control a partnership? A general or limited partnership is not a relevant person under s.809M(3) since although it is a body, it is not a company or body corporate. A LLP is a body corporate, but is deemed not to be one for IT and CGT purposes; s.993 clearly assumes that a partnership is not a body corporate.

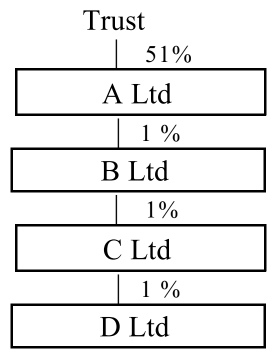
## 10.7 Companies as connected persons: examples

It may be helpful to give some examples of how the relevant person rules apply to trust/company structures. In the following examples:
**"An (e) company"** is one which is a relevant person under s.809M(2)(e).
**"An (f) company"** is one which is a relevant person under s.809M(2)(f).
**"An (h) company"** is one which is a relevant person under s.809M(2)(h).
**"A non (e) person"** is a person who falls within any other paragraph of 809M(2) ie not a person who falls outside 809M or who is *only* within para (e).
**"A non (f) person"** is a person who falls within any other paragraph of 809M(2) ie not a person who falls outside 809M or who is *only* within para (f).

*Example 1*



*Example 2*



Assume the trust is a relevant person (eg the individual is a beneficiary). Assume all the companies are UK resident or non-resident close companies.
A Ltd is an (h) company. It is also an (e) company if UK resident or an (f) company if non-resident. However since it is an (h) company that does not matter; it is a non (e) person and a non (f) person (as those expressions are defined).

*Example 1*
Assume first that the companies are all non-resident close companies.
B Ltd is an (f) company because a non (f) person - A Ltd - is a participator.
C Ltd is not a relevant person. It is not an (f) company as it does not meet the requirement in (f) that a person "falling within any *other* paragraph" of s.809M(2) is a participator.

The end result is the same if all the companies are UK resident close companies, though the statutory references are different:
B Ltd is an (e) company because a non (e) person - A Ltd - is a participator.
C Ltd is not a relevant person. It is not an (e) company as it does not meet the requirement in (e) that a person "falling within any *other* paragraph" of s.809M(2) is a participator.

Suppose however that B Ltd is UK resident and C Ltd is non-resident. In that case C Ltd is a relevant person:
B Ltd is an (e) company because a non (e) person - A Ltd - is a

participator.
C Ltd is an (f) company as a non (f) company - B Ltd - is a participator.

It follows that D Ltd is then an (e) company if UK resident, since as a non (e) company - B Ltd - is a participator.

*Example 2*

The difference in example 2 is that the trustees are participators in B Ltd[24] so B Ltd is an (h) company.

10.7.1 *Commentary*

Where any of these companies are relevant persons, so are all their 51% subsidiaries. It will be apparent that the definition of relevant person in relation to companies is far too wide and it is not realistic to think that the rules are being or ever could be applied in practice to large corporate groups of close companies.

## 10.8 Relevant person transitional rule for pre-2008/09 income and gains

Para 86(4) Sch 7 FA 2008 provides:

> Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

This provision only operates for the purposes of s.809L, so it needs to be repeated for the purposes of s.809N ITA (which relates to remittance condition C)[25] and s.809O ITA (which relate to remittance condition D).[26] The RDR Manual provides:

> **31480 - Remittance Basis: Introduction to the Remittance Basis: Transitional Provisions: Relevant persons and foreign income and**

24 See 73.15.1 (Chain of wholly owned companies).
25 See 10.21.9 (Transitional rules: pre-2008 income/gains).
26 See 10.22.5 (Transitional rules: pre-2008 income/gains).

> **gains arising before 6 April 2008**
> *Background*
> The introduction of Chapter A1 Part 14 ITA 2007 has extended the meaning and scope of foreign income and gains that become taxable when remitted to the UK. One change is the introduction of the concept of 'relevant person'RDRM33030 at section 809L which, broadly, provides that a taxable remittance will occur when foreign income or gains are brought into or otherwise used in the UK by relevant persons other than the individual himself or herself.
> *Transition*
> The transitional rule provides that in establishing whether there has been a remittance of an individual's income and gains for 2007-08 or any earlier year Conditions A and B, Condition C and Condition D at ITA07/s809L (refer to RDRM33000) are applied as if references to 'relevant person' are to the individual.
> *Effect*
> This means that the income or gains remitted either as cash or property have to be brought to, received by or used in the UK for the benefit of the individual concerned before there can be a remittance.

The Manual then provides a factually implausible but fiscally straightforward example[27] and continues:

> Note: The exclusion of 'relevant persons' from s809L for pre 6 April 2008 income and gains does not apply in considering the other transitional rules in relation to the remittance of relevant foreign income (refer to RDRM31140 Relevant foreign income).

## 10.9 Relevant and other persons – compliance

Suppose:

---

27 "Sanjay is a non-domiciled remittance basis user who transferred £10,000 of his foreign employment income from 2007-08 to his 15 year old grandchild's offshore bank account.
In 2008-09 the grandchild then remits £3,000 of this to the UK to buy himself a new computer. [How the 16 year old minor would operate the account and purchase the (surely overpriced) computer is not explained, but it does not matter.]
Under the rules at section 809L this would create a taxable remittance of £3,000 by Sanjay because his grandson is a relevant person. However the transitional rule means that there is no taxable remittance of this income because it is employment income from 2007-08."

(1) an individual gives income or gains to a relevant person ("R"); and
(2) R remits sums to the UK.

The individual in principle becomes liable to a tax charge. The residence of R does not matter.

However, R is under no duty to inform the individual that R has remitted sums to the UK. R is under no duty to inform HMRC, as any tax liability on the remittance is that of the individual, not of R. But the rules in theory require R to keep records for the lifetime of the individual.

Similar issues arise in relation to remittance condition C. Suppose:

(1) an individual gives income or gains to a non-relevant person ("G", a gift recipient); and
(2) qualifying property is enjoyed by a relevant person (or used in respect of a relevant debt).

The individual in principle becomes liable to a tax charge. The residence of G does not matter. G is under no duty to inform the individual or HMRC. But the rules in theory require G to keep records for the lifetime of the individual.

Similar issues arise in relation to remittance condition D, where any property of any third person ("P") is enjoyed by a relevant person (or used in respect of a relevant debt) and there is a connected operation (as defined). The individual in principle becomes liable to a tax charge. The residence of P does not matter. P is under no duty to inform the individual that P has remitted sums to the UK or to inform HMRC. But the rules in theory require P to keep records for the lifetime of the individual.

Of course in practice these rules will not (and indeed could not) be observed except in straightforward cases.

The individual has no indemnity against the relevant person, gift recipient or third party.

Under the pre-2008 remittance basis, if A (a remittance basis taxpayer) transferred A's foreign income to any other person ("B") and B receives that income abroad, there was in general no remittance of that income if B subsequently remits the income to the UK. In the 6th edition of this work I said:

> The law could hardly be otherwise, for A will not usually know what B does with his money after it has been transferred to B.

I was wrong about that! My comment assumed that workability was a necessary requirement of UK anti-avoidance provisions. Now it is sufficient if the law is workable in simple cases. Now if T gives income to a relevant person, who remits, T is taxable.

A relevant person who bears a grudge against an individual (eg a separated spouse) may be able to trigger a significant tax charge out of spite, by deliberately remitting income or gains they have received from the individual. They may alternatively blackmail the individual by threatening to remit unless paid not to do so.

What about a gift recipient (such as an estranged adult child)? There is no charge if they remit income or gains they have received from the individual. What if they apply property they have been given for the benefit of a relevant person, eg a minor child or grandchild of the individual? This arguably does not constitute a taxable remittance under condition B, because the sums are not derived property, but it is caught by remittance condition C.

Also see 10.38 (Proceeds of divorce settlement).

The RDR Manual provides:

> **35030 Conditions A and B - remittances derived from foreign income or gains**
> ... Where an individual gives untaxed foreign income or gains to another person then they should ensure the donee is aware that they must tell the donor if the property or anything subsequently derived from it is bought to the UK in circumstances such that there would be a remittance under ITA07/s809L.

There is no statutory obligation to do this but failure will make compliance difficult.

HMRC say in March 2009 Qs & As Q9:

> If
> [1] the record keeping requirements are felt to be too onerous and
> [2] the probability of remittance to the UK is high
> the donor may wish to consider making a gift of taxed income or gains.

This will not satisfy readers. If "the probability of remittance to the UK is high" then the donor may indeed prefer a gift of taxed income or gains,[28] quite regardless of record keeping requirements. Conversely, what advice

28 Or other clean capital.

would HMRC give if the record keeping was felt to be onerous but the probability of remittance was low? Or if the donee had insufficient taxed income or gains to make the gift?

## 10.10 Relevant persons - commentary: let's simplify relevant person rules

If an individual remits their own income to the UK, they are able to spend it here and there is some sense in taxing them. The same might be said for an individual's spouse and minor children. A case could be made to extend the class to other close family.

Para (d) – applying to minor grandchildren (though not to adults) – is a novel development in tax. The policy is inconsistent with other anti-avoidance provisions, and leads to some strange anomalies and nonsense.[29] The intention is perhaps to catch grandparents paying the school fees of their UK resident grandchildren – at least if the school is in the UK. But that is only a surmise, as the Government never published any explanation.

When a family trust or a family company remits its income to the UK, the individual (as beneficiary or shareholder) is not in any way advantaged unless and until the trustees decide to transfer the income to them or to a close family member. The main effect of the present rules is to impose a prohibitive tax charge on investment in the UK by the foreign domiciliary or relevant persons. In order to impose this comprehensively, the definition of relevant person is made extravagantly wide. What on earth is the thought process that has led to this outlandish situation? Needless to say, there was no discussion of these policy issues when the rules were announced. I infer that it is based on a doctrinaire conception that the remittance basis requires funds to be taxed if and when *the funds* come to the UK. The policy ought surely to be to charge tax when funds are available *for personal spending* in the UK, not simply because they are invested here.

For these reasons the definition of relevant person ought to be restricted to the individual, their spouse and minor children (and if necessary, though I would have thought not, their cohabitee).

29 See 10.26 (Payment of school fees).

## 10.11 Remittance condition A (link to UK)

Remittance conditions A and B go together: condition A requires a link to the UK, and condition B requires a link to the foreign income or gains. Both conditions need to be satisfied to have a remittance under s.809L(1)(a).

Section 809L(2) ITA provides:

> Condition A is that—
> (a) money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person, or
> (b) a service is provided in the UK to or for the benefit of a relevant person.

There are eight ways to satisfy remittance condition A. The first six are:

(1) Property is:
- (a) brought to the UK
  - (i) by a relevant person
  - (ii) for the benefit of a relevant person
- (b) received in the UK
  - (i) by a relevant person
  - (ii) for the benefit of a relevant person
- (c) used in the UK
  - (i) by a relevant person
  - (ii) for the benefit of a relevant person

I refer to these as the **"brought" limb,** the **"received" limb,** and the **"used" limb** of condition A. The last two ways to satisfy condition A are:

(2) A service is:
- (a) provided in the UK to a relevant person
- (b) provided in the UK for the benefit of a relevant person

I refer to property within (1) as "**property brought/received/used in the UK**". (One might refer to that as "condition A property" or "UK property" but on balance I think it is clearer to use the clumsy expression **"brought/received/used in the UK."** I leave the words by/for the benefit of a relevant person to be implied.)

### 10.11.1 *Enactment history*

The wording of remittance condition A is loosely derived from the pre-

2008 s.33(2) ITEPA, but the connection is tenuous. Section 33(2) ITEPA provided:

> *If general earnings are—*
> *(a) paid, used, or enjoyed in the UK, or*
> *(b) transmitted or brought to the UK in any manner or form,*
> *they are to be treated as remitted to the UK at the time when they are so paid, used or enjoyed or dealt with as mentioned in para (b).*[30]

In the current provision, the terminology brought/received/used has replaced paid/used/enjoyed/transmitted/brought.

The former words "in any manner or form" have been omitted; they are unnecessary as the concept of "derived property" in remittance condition B does the same work.

The words "for the benefit of" are new. The reference to a relevant person is new.

### 10.11.2 *"Property" and "Money"*

The language of the remittance basis provisions is not entirely consistent:
"Money or other property" is used 5 times.
"Property (including money)" is used once.
"Property (other than money)" is used once.
Sometimes the word "property" is used by itself. I think it is clear that the word "property" by itself includes money, that is, it is equivalent to "money or other property". In this chapter, I use the word "property" (by itself) to mean money or other property.

When the expression "money or other property" is used, we do not care about the meaning of the word "money" because if an asset is not "money" it will be "other property".

When the expression "money" is used by itself, or in the expression "Property other than money" we do care about the meaning of the word "money".

30 Pre-2008 s.12(2) TCGA was in the same terms. The wording was perhaps intended to extend the concept of "remittance" beyond that which applied for the pre-2008 RFI remittance basis. Though it is just as likely that the drafter only had in mind a plain English paraphrase of the antique language of the former s.65 ICTA 1988. There is no authority discussing these words. (The question was raised but left open in *Harmel v Wright* 49 TC 149.) The question will not now be decided.

Except in a few special contexts[31] the words "property" and "money" are not defined and carry their ordinary meaning.

### 10.11.3 *Property brought to the UK ("brought" limb of condition A)*

The first two ways to satisfy remittance condition A are:

> *(a) Property is brought to the UK by a relevant person*
> *(b) Property is brought to the UK for the benefit of a relevant person*

This limb requires one to identify who brings property to the UK. If a relevant person brings it, condition A is satisfied. If someone else brings it, para (a) is not satisfied.

For instance, suppose T wishes to lend a chattel to a non-relevant person, eg an adult child. If T instructs a courier to transport the chattel to the child, there is a taxable remittance. If the child arranges the transport, then para (a) does not apply. No other part of condition A applies, so there is no taxable remittance. It is strange that the administrative matter of who brings the asset to the UK should determine taxability but there it is.[32] This could be useful if a remittance basis taxpayer wished to lend to a museum, as it would not be necessary to meet the complex conditions of the public access rule.

Para (b) might apply if N holds property as nominee for T, and N brings the property to the UK.

### 10.11.4 *Property received in the UK ("received" limb of condition A)*

The next two ways to satisfy remittance condition A are:

> *(c) Property is received in the UK by a relevant person*
> *(d) Property is received in the UK for the benefit of a relevant person*

Para (d) might apply if N holds property as nominee for T, and N receives

---

31 See 10.30.1 ("Property").

32 For gifts of cash, see 10.11.6 (Gift to non-relevant person).

the property in the UK.

We need the "brought" limb as well as "received". T can receive an asset in the UK without bringing it here (eg on the purchase of a UK situate chattel). Can T "bring" an asset to the UK without receiving it in the UK? Perhaps an example is if T acquires a chattel outside the UK, and packs it in T's hand luggage; or acquires a car outside the UK and drives it to the UK. T "brings" the chattel or car to the UK, but does not "receive" it here. (It is arguable that an asset can only be received once, so if it is received outside the UK it cannot later be received in the UK, but whether or not that is right, in the case of a chattel or car, there is no identifiable moment of "receipt" in the UK.) So both these limbs of condition A are needed.

This limb requires one to ask where property is received, the answer to which is by no means obvious.

### 10.11.5 *Banking machinery and property in transit*

What if a transfer of money to a foreign bank account involves credits in UK accounting records of the foreign bank? (This is understood to be the position for Channel Island and IOM banks.) No difficulty arises. The RDR Manual provides:

> **33560 Banking Issues** [July 2010]
> *Banking Transactions*
> Transfers between foreign centres often pass through the UK banking system, for example when a sterling payment is made abroad and the payment is cleared through London in the normal banking process.
> In such circumstances HMRC do not regard the passage of funds through the UK as being a taxable remittance.
> The machinery employed is irrelevant provided that, without express provision, the individual has:
> - no right to payment at any intermediate point; and
> - no control over the funds transferred by their foreign bank to secure payment at the agreed point.

This approach is extended in March 2009 Qs & As:

> **Q17:** Will HMRC apply the same principle, expressed in relation to mechanistic banking transfers which pass through the UK in the banking system, in a case where a courier passes through the UK in transit

> carrying property not covered by the temporary importation exemption?
> **A:** Yes. In principle, where the "passing through" is a mechanistic part of the courier service provision and, no relevant persons have any rights to use or access the property at any intermediate point; and no control over how property is transported to and from the agreed points. In such circumstances the passage of property which merely "touches" the UK would not be regarded as a sum remitted to the UK.

The EI Manual provides:

> **40302 Meaning of "remitted to the United Kingdom"** [December 2008]
> *Paid in the UK*
> [1] Earnings are remitted to the UK if they are paid to the employee in cash in this country or if the employee's bank account here is credited with them. Employees may arrange to have earnings paid into offshore bank accounts to avoid this rule.
> [2] Money that is transmitted from the employer's bank in the UK to the employee's offshore bank is not treated as remitted here. It has been in the banking system all of the time; the employee did not have access to it.

This is correct, though the statement at [2] that the money has "been in the banking system" is layman's language.[33]

---

33 *Foley v Hill* (1848) 2 HLC 28 at p.36 explains the relationship of banker/customer (and borrower/lender generally):

> "Money, when paid into a bank, ceases altogether to be the money of the principal ... ; it is then the money of the banker, who is bound to return an equivalent by paying a similar sum to that deposited with him when he is asked for it. The money paid into the banker's custody is money known by the principal to be placed there for the purpose of being under the control of the banker; it is then the banker's money; he is known to deal with it as his own; he makes what profit of it he can, which profit he retains to himself, paying back only the principal, ... or the principal and a small rate of interest ... The money placed in the custody of a banker is, to all intents and purposes, the money of the banker to do with it as he pleases; he is guilty of no breach of trust in employing it; he is not answerable to the principal if he puts it into jeopardy, if he engages in a hazardous speculation; he is not bound to keep it or deal with it as the property of his principal, but he is of course answerable for the amount, because he has contracted, having received that money, to repay to the principal, when demanded, a sum equivalent to that paid into his hands."

This is the classic exposition: see *Re Spectrum Plus* [2004] Ch 337 at [88]. However,

### 10.11.6 *Gift to non-relevant person*

In *Timpson's Executors v Yerbury*[34] (a pre-2008 remittance case)

(1) Mrs Timpson ("T") gave cheques representing her foreign income to her children.
(2) The children cashed the cheques which were credited to their bank accounts in the UK.

Thus, the foreign income was received in the UK, but it was not received by T. This was nevertheless held to be a taxable remittance by T. Romer LJ and (I think) Greene LJ decided *Timpson's Executors* on the basis that there is a taxable remittance if:

(1) money is received in the UK by a third party at T's direction, and
(2) immediately before receipt, the money (or funds representing it) belonged to T.[35]

---

"The difference between *commodatum* and *mutuum* – the loan to be returned and the loan to be repaid – was hardly seen. It is hardly seen today by the vulgar. 'My money at the bank', is a phrase in common use." (Maitland, *The Forms of Action at Common Law*, lecture V, 1909).

34 20 TC 155 followed at first instance in *Walsh v Randall* 23 TC 55.

35 "The Rule does not require that the sum should have been received by the person entitled to the income. In computing the tax, therefore, sums paid to third parties [in the UK] for the benefit or at the request of the party so entitled have to be taken into account..." (Romer LJ at p.181); "provided the income in respect of which the assessment is made is income to which the person assessed is entitled, it is, in my judgment, immaterial whether the sum 'received in the UK' is received by him or by some third party upon his instructions." (Greene LJ at p.186).

Lord Denning adopted this reasoning in an obiter comment in *Thomson v Moyse* 39 TC 291:

> "But [the taxpayer] need not receive [the foreign income] himself. It is sufficient if the sums are received in England by some third person *by his authority.* Thus, if Mr Moyse, instead of receiving the money himself, tells his New York banker to send a remittance to his butcher or baker or candlestick-maker in England, he is chargeable with tax on it for the simple reason that he was 'entitled' to the income which has been used to pay the debt; and he must pay tax on it *when it is received in England*, no matter by whom it is received, so long as it is received *by his authority* ..."

Lord Wright MR decided *Timpson's Executors* the case on a different basis, that: "if the sums in question were received in the UK as the income of Mrs. Timpson she was chargeable to tax as being the person entitled to it when it came into the UK, though in fact she never received it herself.... if it comes here as her income, ... the fact that on arrival it is applied, in accordance with her directions, in payment to others does

This is no longer the law under the ITA remittance basis. Remittance condition A requires that property is brought/received/used in the UK *by or for the benefit of a relevant person*. So if a remittance basis taxpayer writes a cheque on a foreign bank account, gives it to a donee (not a relevant person) who pays the cheque into their UK bank account, remittance condition A is not satisfied. The money is received in/brought to the UK by the donee (not by a relevant person).

Suppose (instead of a cheque) T makes a gift to the donee (not a relevant person) by electronic transfer from T's offshore account to the UK account of the donee. It is arguable that remittance condition A is not satisfied. It would be strange if there were a difference between payment by cheque and a direct electronic transfer. But in this case it might be said that T "brought" the money into the UK (even though T did not receive or use it in the UK).

The practice before 2008 was to make the gift abroad (by payment into a foreign bank account of the donee) and this will no doubt continue even though it is not on this analysis strictly necessary.

### 10.11.7 *Arm's length payment to non-relevant person*

Similar points apply to an arm's length payment to a non-relevant person. Suppose X provides services to T outside the UK, or sells a non-UK situate asset to T. If T makes a payment to the foreign bank account of X, remittance condition A is not satisfied. If T pays by giving X a cheque for the amount due, and X pays the cheque into their UK account, there is no taxable remittance. The money is received in/brought to the UK by X, not by T. It is not used in the UK by T.

If (instead of a cheque) T makes pays by electronic transfer from T's offshore account to the UK account X, it is arguable that remittance condition A is not satisfied.

A payment into the foreign account of X is safest, but in practice X may not wish to go to the trouble of opening a foreign bank account.

---

not affect its chargeability to her;" 20 TC 155 at p.180. Clearly T did not receive the income, but Lord Wright said that she was entitled to it on arrival, when it came to the UK. This is not tenable for reasons given in the 6th edition of this work; but the point does not now matter.

### 10.11.8 *Property used in the UK ("used" limb of condition A)*

The next way to satisfy remittance condition A is:

> *(e) Property is used in the UK by a relevant person*

This requires one to ask whether property is used, where property is used, who is the user, and what exactly is the property which is used.

It is considered that "used" means enjoyed in specie, and property is used where it is situate. So if a sum is applied in the purchase of chattels which are brought to the UK and used by the individual, or any relevant person, the "used" limb of remittance condition A is satisfied.

It is difficult to see the role of the "used" limb of condition A. Normally if T uses property in the UK, T (or a relevant person) will have brought or received it in the UK, so the "brought" or "received" limbs will be satisfied. There could be a case where property is brought or received in the UK by a non-relevant person and used by T eg if T gives RFI to a brother who purchases a house which T occupies. In that case condition A is satisfied under the "used" limb alone. But in this case, condition B is not satisfied (the property is not property of a relevant person) so the question whether condition A is satisfied does not arise. This situation is covered instead by condition C.

If money is spent, it is "used" in the normal sense of the word. However it is not clear where spent money is used, so it is not clear how one decides whether it is used in the UK. It is suggested that the spending of money should be considered under the receipt limb, or the brought limb of condition A, or under the debt remittance rules, and so (say) paying a debt may be a remittance under the debt remittance rules but it does not satisfy condition A: the money is not used in the UK.

### 10.11.9 *Receipt of UK situate investment asset*

What is the position if T uses RFI to pay the purchase price of UK situate property which is not used *in specie*?[36] For example, if it used to purchase UK situate shares or land let as an investment?

---

36 There are of course other reasons for avoiding UK situate investments: the income is subject to IT, gains subject to CGT, and IHT may also be a concern. Here I am only addressing the remittance issue.

Assume that the sum itself is not received in the UK (because payment for the asset is made outside the UK).

The “brought” limb of condition A is not satisfied: the shares or land are not brought to the UK, and neither is the RFI.

HMRC must rely on the “received” limb. The shares or land are certainly “received” by the relevant person, but are they received “in the UK”?

It is arguable that they are not, so while condition A is only satisfied if the relevant individual actually uses the assets, merely acquiring UK situate assets is not enough.[37]

Will HMRC agree? The EI Manual para 40302 [December 2008] provides:

> **40302 Meaning of "remitted to the United Kingdom"** [December 2008]
>
> *Assets*
>
> [1] If an employee receives earnings abroad which are used to purchase assets such as a car or a painting and the employee then brings the assets into the UK the earnings used to purchase the assets are regarded as remitted to the UK.
>
> *Investments abroad*
>
> [2] The treatment of investments made abroad depends on the particular facts. In general, money invested abroad by an employee resident here should not be regarded as remitted to the UK. However, if the investment is subsequently sold in this country, or sold abroad and the proceeds brought into the UK, the amount originally invested should then be regarded as remitted here.

Para [2] does not answer the question, as the unlawyerlike expression “investments made abroad” might refer to the situs of the investment or the place where the investment is paid for. But para [1] referring expressly to chattels perhaps suggests that the position may be different for UK shares or other assets not enjoyed in specie.[38]

---

37 If this were wrong then words “used in” in remittance condition C (and perhaps condition A) would be otiose since chattels used in the UK must be received in or brought to the UK.

38 SAI Manual provides:
“4380. **Remittance basis** [December 2009]
... In some cases... the securities themselves are treated as deriving from the accrued

If receipt of a UK situate asset is receipt of an asset in the UK, then there will usually be a remittance if a person lends to any UK resident (even if not a relevant person) since the lender receives a debt and a debt from a UK resident is usually UK situate.

A practical solution where possible is to use bearer shares and specialties and ensure that the document is kept outside the UK.

### 10.11.10 *Property used in the UK for the benefit of a relevant person*

The next way to satisfy remittance condition A is:

> *(f) Property is used in the UK for the benefit of a relevant person*

Funds can be said to be *applied* for the benefit of a person and it is suggested that "used for the benefit of a relevant person" has the same meaning.

### 10.11.11 *Situs of property for purpose of remittance condition A*

There are no statutory situs rules for income tax, so the rules of private international law apply. Thus money received in a UK branch of a foreign bank is remitted, but money received in a foreign branch of a UK bank is not remitted.[39] Money is remitted if received in:

(1) a UK account in the name of the taxpayer, and held by them beneficially; or
(2) a UK account held in the name of a third party who holds on trust for the taxpayer.

CGT has statutory situs rules. But it is considered that the effect of s.12(5) TCGA is to incorporate the ITA rules, so the CGT situs rules do not apply for the purpose of remittance condition A. My view is confirmed by s.809W(6) ITA which applies the CGT situs rules

---

income profits. This means that a charge will arise on the taxpayer when they, or some other 'relevant person', either bring the securities to the UK (if they are held in bearer form) "

(The same point was made in EN FB 2008). Since this comment relates to bearer securities, which are in some ways chattels or like chattels, it does not shed any light on the issue discussed here.

39 See 70.17 (Bank account).

specifically for the purposes of s.809W(3) ITA. If my view were wrong, there would be a remittance under the CGT remittance basis whenever a UK resident foreign domiciliary:

(1) places sterling in a foreign bank account, as the account is regarded as UK situate for CGT;[40] or
(2) sells and leaves the purchase price outstanding, since the right to the purchase price is a UK situate asset under the CGT situs rules.

Suppose T sells and leaves the purchase price outstanding as a debt. T receives property - the right to the purchase price – but where is it situate? If the purchaser/debtor is UK resident, the debt is UK situate, unless one takes specific steps in the documentation to avoid that. If the purchaser/debtor is non-resident, the asset is not in principle UK situate. But if my view about the received limb is correct, it does not matter where the debt is situated.

### 10.11.12 *Non-UK company with UK asset – secondhand companies*

Suppose T acquires a non-UK company which holds a UK asset. If the UK asset is not enjoyed in specie by T or a relevant person, then Condition A is not satisfied. If the UK asset is (say) a house, which is occupied by T, then remittance condition A is satisfied. However, remittance condition B is not satisfied.

### 10.11.13 *Service provided in the UK*

The next way to satisfy remittance condition A is:

> *(e) a service is provided in the UK to a relevant person*

The rule requires one to identify the place where services are provided, or at least whether they are provided in the UK. While in some cases this is straightforward, in other cases there is no obvious answer.[41]

The connecting factors could be:

(1) where the work is done
(2) where the supplier is based

---

40 See 71.12 (Bank account).

41 It is of course no solution to say that the question is just one of fact: see 17.2.10 (Unsatisfactory approaches).

(3) where is the property (if any) to which the services relate
(4) where the customer is
It is considered that the connecting factor should be where the work is done, when that is physical work with a simple physical location. This is consistent with the IT trading source rules.[42] In other cases it should be where the supplier is based.

In practice physical work will generally be done where the supplier is based, so factors (1) and (2) will normally point the same way. But that is not necessarily the case. If one instructs a French firm to provide building services in the UK the service is provided in the UK: if one instructs a UK firm to provide building services in France, the service is provided out of the UK.

Factor (3) cannot be decisive as foreign services relief assumes that a service which relates to property situate outside the UK may be a service provided in the UK.[43]

The RDR Manual is consistent with this view. It provides:

> **34040.Relevant services provided in the UK** [July 2010]
> ... A service is regarded as having been provided in the UK if the providers of that service are based in and give that service in the UK....

"Based in" the UK is my factor (2). I understand that the words *"and give that service in the UK"* is my factor (1), where the physical work is done. This is therefore an easy case where both factors point the same way.

The RDR Manual goes on to give this example:

> *Example 1 (Chandra)*
> C, a remittance basis user, engages an investment manager based in the UK to manage her portfolio of investments in foreign stocks and shares of overseas concerns. ...
> The service - the management of the portfolio - is provided in the UK to C...[44]

---

42 See 13.12 (Services).

43 See 10.29 (Foreign services relief).

44 March 2009 Qs & As made the same point:
**Q23**: ... If a service provider engages with the Jersey resident trustees of a trust of which a UK resident but non-domiciled individual is a beneficiary and settlor and provides advice which is prepared and issued from the UK, but received and read in Jersey, it is not clear if this would be "a service provided in the UK."...

This is a case where there is no physical work within factor (1), so one falls back on factor (2), where the supplier is based.

Where one travels entirely within the UK, the services are provided in the UK and where one travels entirely outside the UK, the services are provided outside the UK. What is the position if the journey begins in the UK and ends outside, or begins outside the UK and ends within? Possible solutions are:

(1) the services are provided in the UK if any part of the journey is in the UK,
(2) the services are not provided in the UK if any part of the journey is not in the UK,
(3) apportion the journey into two parts.

None of these are satisfactory. (1) and (2) are unfair in favour of HMRC or the taxpayer, and not in accordance with the natural meaning of the words. (3) is wrong as there is only one service.

The best answer is that in this case factor (1) - where physical work is done - does not provide a solution, and one should rely on factor (2) - where the supplier is based.[45] HMRC may agree. The RDR Manual provides:

> **34040. Relevant services provided in the UK** [July 2010]
> *... Example 4 (Charlotte)*
> C, a remittance basis user, purchases a return air ticket using her foreign

---

**A**: ... The general rule is that, for the purposes of this condition, a service is regarded as being provided in the jurisdiction where the providers of that service are based. Advice which is researched, prepared and issued from the UK would therefore fall within the definition of "provided in the UK" irrespective of where the client might receive it.

**Q24**: As part of providing advice to clients who have an international aspect to their affairs, a service provider may prepare advice in several different jurisdictions, which may then be issued from only one office, and therefore country, that being the office which has the main relationship with the client.

**A**: In the case where an offshore service provider provides advice which has been prepared in several different jurisdictions, the same approach will need to be taken to determine whether the test in section 809L is met, and, because the advisors in your scenario are based in the UK, their service will be provided in the UK.

45 Exactly the same considerations have led the OECD model to the same rule. Art 8(1) OECD model treaty provides: "Profits from the operation of ships or aircraft in international traffic shall be taxable only in the Contracting State in which the place of effective management of the enterprise is situated."

> income. The ticket is to travel from the UK to Belgium and return. *The ticket was purchased from a UK company* but payment was made into the company's offshore bank account.

The HMRC analysis is as follows:

> Because part of the travel service was provided in the UK (the journey begins and ends in the UK) there is a remittance to the UK [ie the service is provided in the UK].[46]

It is on this analysis significant that the HMRC example specified that the purchase was from a UK company.

In order to decide where a service is provided, it is necessary to identify the service or services which are provided. The VAT distinction between single (though composite) and multiple supplies is applicable here. The RDR Manual gives an example of a multiple supply:

> **34030. Remittance Basis charge - repayment by HMRC** [July 2010]
> ... *Example 5 (Sarah)*
> S, a remittance basis user, purchases an air ticket using her foreign income and gains to travel from Sweden to Holland, using a UK based booking agency. Payment is made into the agency's offshore bank account.
> There is a 'service provided in the UK', which is the agent's booking services, so the part of the cost of the service that relates to the agency's booking fee is a remittance (although not the cost of the flight between Sweden and Holland as no part of this service is provided in the UK).

This is correct if there are two supplies, a booking service and a transport service; but if there is only one supply then it would not be correct.

Basic planning is to use services outside the UK wherever possible, eg

---

46 For completeness: there is another version of this example in RDRM 33130:
"*Example 3*
Charlotte, a remittance basis user, purchases an air ticket using her foreign income. The ticket is to travel from the UK to Belgium. The ticket was purchased from an overseas company and payment made into the company's offshore bank account.
Because part of the travel service was provided in the UK (the journey begins and ends in the UK) there is a remittance to the UK."
This is incoherent, since the question assumes there is a ticket from the UK to Belgium, but the answer assumes the journey ends in the UK.

foreign investment advice, foreign accountancy services, foreign travel agencies, and foreign schools.

The last way to satisfy remittance condition A is:

> *(f) a service is provided in the UK for the benefit of a relevant person*

Do the words "for the benefit of" add anything? Is there a case where a service is provided for the benefit of a person but not to that person? Perhaps an example is where a parent P contracts with a school to educate P's child C. The services are perhaps provided to P (who pays for them) but for the benefit of C.

## 10.12 Remittance condition B (link to foreign income/gains)

Section 809L(3) ITA provides:

> Condition B is that—
> (a) the property, service or consideration for the service, is (wholly or in part) the income or chargeable gains,
> (b) the property, service or consideration—
> (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
> (ii) in the case of property or consideration, is property of or consideration given by a relevant person ... [47]

There are eight ways to satisfy remittance condition B. The first six[48] are:

(1) The property received/used/brought to the UK:
  (a) is (wholly or in part) the income or gains,
  (b) is derived property and is property of a relevant person.

(2) The consideration for the service provided in the UK:
  (a) is (wholly or in part) the income or gains, or
  (b) is derived property and is property of a relevant person.

(3) The service:
  (a) is the income or gains or
  (b) derives from the income/gains.

---

47 Section 809L(3) continues with paras (c) and (d) which relate to debt remittances, considered separately below.

48 The remaining two relate to the debt remittance rules, which are considered separately below.

### 10.12.1 *Property and consideration for service*

It is impossible to refer constantly both to property and to services so I refer to property and leave the reference to services to be read in, as the same points apply to both.

Remittance condition B is not satisfied unless the property brought/received/used in the UK either:

(1) is the foreign income or gains; or
(2) is derived from the foreign income or gains.[49]

If the property *is* the foreign income or gains, it does not have to meet the requirement that it is property of a relevant person. If the property is *derived from* the income/gains ("derived property"), it does have to meet that requirement.

Why the distinction? If T transfers income/gains to R, the funds cease to be the income/gains (instead in the hands of R the funds become derived property). That is, if the property *is* the foreign income or gains, the property must necessarily be property of the individual (T) himself (not any one else who is a relevant person in relation to T), so it is not necessary to impose the requirement expressly. That might be the reason; though if so the matter could have been more simply expressed.

Suppose:

(1) T gives foreign income to S (not a relevant person).
(2) S uses the money to buy property used by T.

Condition B is not satisfied: the purchased property is derived property but it is not the property of T or of any relevant person.[50]

The question whether the property either *is* the foreign income/gains or is *derived from* the income/gains also matters for the purposes of s.809P ITA (amount of income remitted).

We need to classify what the relevant person receives as (1) property or (2) a service or (3) neither. This is not always easy. Suppose T pays rent for use of a picture in the UK. Does T receive a service? It is thought not.[51] Does T receive property and if so what? T does not receive the picture, but receives a contractual right, which is arguably property. Or it may be that T makes a payment in respect of a relevant debt. A court is likely to hold that there is a taxable remittance under one or other of these

49 But where these conditions are not met, remittance condition C or D may apply.
50 But remittance condition C or D may then apply.
51 "Service" is widely defined for VAT, but that definition is not applicable here.

routes, though neither analysis is entirely trouble-free.

### 10.12.2 *Service derives from income/gains*

Next, condition B is met if:

> The service
> (a) is the income or gain; or
> (b) derives from the income or gains.

I am unable to make sense of this. How can a *service* be (or derive from) income or gains? I think the reference to "service" here is misconceived. Perhaps the drafter is considering services which constitute earnings or benefits in kind, or a disposal of an asset in consideration of services. In that case only para (b) is misconceived.

## 10.13 Property is the income or the gains

### 10.13.1 *What is the income?*

The question of whether the property brought/received/used in the UK is the income is straightforward if the income is pure income, such as dividends, interest or income distributions from trusts.

The question is less clear if the income consists of trading or rental income, since in this case the "income" is the result of a trading or property computation. The gross receipts of the trade or gross rents are not the income.

For example, suppose an individual borrows to purchase land and pays interest or other deductible expenses out of the rent. The income of the individual is the net profit (rent less expenses), it is not the gross rent. So the payment of the interest out of the gross rent is not a remittance of the rental income. The income is the profit (if any) which is left after payment of the interest.

### 10.13.2 *What is the gain?*

The question of whether the property is the gains is problematic. What is the jurisprudential nature of a gain? The former Inspectors Manual para 1567 published 9/95 provided:

> whilst the income content of any fund is a separate and distinguishable part of that fund, a capital gain is merely part of the whole proceeds of a disposal transaction that has no separate identifiable existence within those proceeds.

The Manual was correct to say that a gain has no separate identifiable existence. On one view, a gain does not exist even as "part of the whole proceeds". It is not a separate or separable item of property existing at all. A gain is merely the result of a computation. The proceeds of a disposal may be said to represent the gain, but they do not constitute the gain, just as gross trading receipts do not constitute the profits of a trade. On this analysis the proceeds of a disposal are not even derived from a gain, though the quantum of a gain depends on the quantum of the proceeds. But whatever the true jurisprudential nature of a gain may be, I think the drafter has assumed that the proceeds of a disposal for full consideration should be regarded as consisting of (1) gain and (2) everything else (representing base cost and other exemptions) so the proceeds do include the gain.[52]

## 10.14 Derived property

Remittance condition B (and C and D) refer to property which derives (wholly or in part, and directly or indirectly) from the income or gains. I refer to this as "**derived property**".

The words "directly or indirectly" show that the drafter did not want the word "derives" to be construed narrowly.

### 10.14.1 *Enactment history*

Under the pre-2008 CGT and employment income remittance bases, tax was charged on sums received in the UK *in respect of* the foreign income. Under the ITA remittance basis, the sum must be *derived from* the income or gains. Is there any difference? It is impossible to say, since "in respect of" and "derived from" are both vague and context-dependent expressions but "derived from" is probably narrower.

Perhaps the change was made to give effect to the statement in the former Inspectors Manual para 1564 published 9/95:

52 The position is more difficult for sales at an undervalue: see 10.24.4 (sale of asset).

> Income is received in the UK if funds provided in the UK are derived from income arising overseas.

Perhaps there was no reason for the change: the drafter started with a blank sheet and chanced upon the expression "derived from" or perhaps considered it more in accordance with Plain English principles.

### 10.14.2 *Investment and re-investment*

Suppose T uses RFI to purchase assets. The purchased assets are derived from the RFI. If the purchased assets are sold and the proceeds re-invested is new assets, those new assets are derived from the RFI. The tracing process can continue for the lifetime of T.

### 10.14.3 *T gives funds to R*

Suppose T gives income to R. The funds in the hands of R are not the income, but they are derived from the income. If R uses the income to purchase assets, the purchased assets are derived from the income, and (as above) that tracing process can continue indefinitely during the lifetime of T.

### 10.14.4 *T purchases asset for full consideration from R*

Suppose:
(1) T purchases an asset ("the purchased asset") from a relevant person ("R") for full consideration.
(2) T uses RFI to pay the purchase price.
It is considered that after the sale the purchase price in the hands of R is not the income and is not derived from the income. So if R remits the proceeds of sale, remittance condition B is not satisfied.[53]

---

53 There would be a remittance of the RFI if T remits the purchased asset to the UK. If my view is wrong, there would be a double charge to tax where the purchased asset represented RFI of R, that is, where:
(1) R receives RFI (R's income) and uses it to purchase an asset (the purchased asset).
(2) T receives RFI (T's income) and uses it to purchase the asset.
Suppose T brings the purchased asset to the UK. T's income is remitted. But it would be surprising if R's income was also thereby remitted.

Likewise if T provides services to R for full consideration, and T uses RFI to pay the fee. The fee in the hands of R is not derived from the RFI.

This must be the case, because if T uses RFI to purchase an asset from a company, at arm's length, T will often have no way of knowing whether the company is a relevant person, and T can hardly be expected to ask the company what it has done with T's money. Whereas if T *gives* money to R, the request is not so unreasonable.

This view was accepted in another context in *Cohen v Petch* [1999] STC (SCD) 207. Here:

(1) T borrowed money from a building society and used it to purchase an asset from T's mother.
(2) The mother immediately gave or lent the proceeds of sale back to the son.
(3) The son lent the money to a company.

The Special Commissioner said at p.211:

> I cannot overlook the fact that once the money had been borrowed [by] the taxpayer from the society it was paid to his mother and became her funds. Subsequently, three days later, the sum of £46,600 was returned to the taxpayer by his mother either in the form of a loan or as a gift. The funds, whether or not they are traceable in specie, were no longer the money borrowed from the society. They were funds lent or given by Mrs Daphne Cohen to her son. There was no longer any link between the money which the taxpayer eventually lent to the company and the money which he borrowed from the society.

### 10.14.5 *T lends to R*

Suppose T receives RFI and lends it to an individual who is a relevant person ("R"). Are the funds in R's hands derived from the RFI? There are three possible solutions:

(1) R's borrowed money is always derived from T's RFI.
(2) R's borrowed money is never derived from T's RFI.
(3) R's borrowed money is sometimes derived from T's RFI.

In principle, R's funds are derived from R's promise to repay the loan which is full consideration for the money whether the loan is on commercial terms or interest free repayable on demand (the promise to repay an interest free loan is full consideration).[54] Solution (2) is in principle to be preferred. Since T has an asset (the benefit of the debt) which is derived from the RFI, it would be surprising if R's borrowed money was also derived from the same RFI. Suppose R repaid the debt (not out of the borrowed money but out of other funds). On solution (1) the borrowed money would continue to be derived from the RFI, which would be very odd to say the least.

Moreover the avoidance possibilities are dealt with by remittance condition D.

There may however be some circumstances in which one should regard the borrowed money as derived from the RFI. The court might then describe the loan as a mere "conduit" as Lord Templeman did in *Harmel v Wright* 49 TC 149 but the metaphor represents a conclusion rather than an argument for reaching that conclusion. The difficulty is to find a method of distinguishing between cases where one does and does not regard the borrowed money as derived from the RFI.

One circumstance in which that could be justified is if there were no intention to repay the loan.

Another might be where the borrower has insufficient funds to repay the loan (other than the borrowed money).

### 10.14.6 *T subscribes for shares in R Ltd*

Suppose T uses RFI to subscribe for shares in a company which is a relevant person ("R Ltd"). It is considered that the proceeds of the share subscription in R Ltd are derived indirectly from the income.

### 10.14.7 *T purchases shares in R Ltd (secondhand companies)*

Suppose T uses RFI to purchase the shares in R Ltd (a relevant person). R Ltd already owns assets. The assets of R Ltd are not derived property: they do not derive from the RFI.

54 Contrast 66.6 ("Provide"). The position would be different if the loan is a fixed-term loan at a low rate of interest as then R's promise to repay is not full consideration, but that case would be unusual.

### 10.14.8 *Receipt of cheque in UK*

Suppose T receives a cheque in the UK which if cashed would be foreign income. If the cheque is not transferable[55] the cheque is not derived property.[56] If the cheque is not sent abroad, but cashed here, there is still no remittance provided that the credit is made to an account abroad, not to a UK account.

### 10.14.9 *Borrowing on security of foreign income/gains*

It is helpful first to consider the position for unsecured loans. If T borrows without giving security the borrowed money is derived from the promise to repay. That is so even if T owns assets (say, RFI) and the lender would not lend had T not owned those assets. The fact that the lender only lends because of the RFI does not show that the borrowed money is derived from the RFI. No-one would doubt that.

Suppose T borrows on the security of RFI. Is the borrowed money derived from the RFI? It is considered that in this case the borrowed money is still derived from the promise to repay and not from the security. This is clearly so if T could have borrowed without giving the secuirty.

That is still the case even if T could not have borrowed without giving that specific security. There are three reasons for this view:

(1) The position is analogous to unsecured loans where no-one suggests that borrowed money is derived from the borrower's RFI even T could not have borrowed were it not for that RFI.

(2) A rule which says that borrowed money is derived from a security if and only if the borrower needed the security in order to borrow is not workable: the question whether the security is needed is often imponderable.

(3) The debt remittance rules[57] are designed to cover this aspect of remittances and that suggests that there would not be a remittance under general principles.

---

55 Cheques drawn on UK banks have generally been non-transferable since the Cheques Act 1992.

56 This continues the pre-2008 law. The Inspectors Manual provided:

> "A cheque representing income assessable under Schedule D, Case IV or V, which is received in the UK by or on behalf of the taxpayer but is sent abroad and credited to the taxpayer's overseas bank account is not a 'sum received in the UK'."

57 See 10.18.2 (Use as security for debt).

For these reasons it is considered that borrowed money is derived from the promise to repay, not from assets used as security, even if T could not have borrowed without giving that security.

In *West v Trennery* 76 TC 713, trustees held shares and borrowed money on the security of the shares. One question was whether the borrowed money was derived property for the purposes of s.77 TCGA (now repealed). Section 77(8) TCGA at that time provided (somewhat tersely):[58]

> In this section "derived property", in relation to any property, means
> [a] income from that property or
> [b] any other property directly or indirectly representing
> [i] proceeds of, or
> [ii] of[59] income from,
> that property
> [c] or income therefrom.

So the question was whether the borrowed money directly or indirectly represented the proceeds of the shares. Lord Millett said:

> 16. The final question is whether the Revenue are correct in contending that the [borrowed] moneys ... constituted derived property within the meaning of s 77(8) in relation to the Einkorn shares. There can be only one answer to this: of course they do. The [borrowed] moneys ... directly represented the proceeds of a mortgage of the Einkorn shares ... If the trustees ... had invested the moneys in stocks and shares, these would have indirectly represented those proceeds. It will be observed that I have equated the proceeds of a mortgage of property with the proceeds of the property itself. But the subsection does not refer to "the proceeds of a sale of that property", but to "the proceeds of that property"; and this covers any proceeds, whether sale or mortgage or otherwise

58 In 2006 the definition was amended with retrospective effect, only to be repealed in 2008.

59 At first sight the word "of" appears to be a grammatical error, but it makes sense if one understands the words to mean:
*[i] proceeds of, or*
*[ii] [proceeds] of income from,*
*that property...*

> howsoever, by which value is extracted from one property and transferred to another.[60]

It is considered that this case is of no relevance, since the statutory words on which the decision rests are not present in the remittance basis provisions.

In practice HMRC appear to accept this view; see 10.18.2 (Use as security for debt).

### 10.14.10 *Income/gains used to pay debt*

Suppose:
(1) T borrows from L and receives "the borrowed money".
(2) T uses RFI to repay the debt to L so L receives "the repaid money".
In the absence of a statutory provision, the borrowed money would not be derived from the RFI. It is not derived from the RFI at the time of the borrowing. It does not become derived from the RFI later when the debt is repaid.[61] However, s.809R(3) ITA needs to be considered: see 11.3.5 (Income/gains used to repay debt).

It is considered that the repaid money in the hands of L is not derived from the RFI. It is derived from the debt, and (indirectly) from the money which L may have used to make the loan to T.

### 10.14.11 *Income from income/gains*

Suppose:
(1) T receives £1m ("original income").
(2) T invests the original income and receives £50k ("new income").
It is considered that the new income is not derived from the original income. One must stop tracing the original income at that point. Otherwise various odd results will follow:
(1) If T remits the £50k new income, T would pay tax on the £1m original income.[62]

---

60 Likewise Lord Walker said:
> "In my opinion the £770,000 [borrowed money] started off as derived property..."

61 The position could be different if the two steps formed part of a scheme and were carried out in quick succession. Of course, under the debt remittance rules there would be a remittance of the RFI if the debt were a relevant debt.

62 See 10.23.2 (Remittance of derived property).

(2) Suppose:
 (a) T gives £1m original income to R (a relevant person).
 (b) R receives £50k new income.
 (c) R remits the £50k new income.

If the new income is derived from the original income, there will be double taxation:
 (i) R will pay tax on the new income (on an arising or remittance basis, depending on whether R is a remittance basis taxpayer; that makes no difference for the purposes of this example).
 (ii) T would pay tax on the remittance of the new income by R.

### 10.14.12 *Gift to third person*

The position becomes more complex if a second individual is involved. Suppose:

(1) T gives income/gains to A (an individual who may or may not be a relevant person).[63]
(2) A gives the fund to B (a relevant person).

It is suggested that the funds in the hands of B are derived property if steps (1) and (2) form an arrangement. If there is no connection of that kind between T's gift and the transfer to B, the funds in B's hands are not derived property. In particular, if B acquires the funds on the death of A, the funds are not derived property.[64]

If T gives income/gains to a trust and the trust appoints the fund to B, the same approach should be applied, but the two steps do form an arrangement because the trust is merely carrying out the intention of the settlor.

## 10.15 Debt remittance rules

I turn to the second part of remittance condition B. Section 809L(3) ITA provides:

> Condition B is that ...

---

63 If A is not a relevant person, A will be a gift recipient, and remittance condition C needs consideration.

64 This view is supported a little by s.48(3C)(b) IHTA: see 53.16.3 (Purchased equitable interest).

(c) the income or chargeable gains are used outside the UK (directly or indirectly) in respect of a relevant debt, or
(d) anything deriving (wholly or in part, and directly or indirectly) from the income or chargeable gains is used as mentioned in para (c).

I refer to these rules as the "**debt remittance rules**".

In order to have a debt remittance under condition B, three conditions must be satisfied; in short:

(1) A *relevant debt* (broadly, relating to property brought/received/used in the UK).
(2) Foreign income/gains used *in respect of* the debt.
(3) The income/gains are used *outside the UK*; however if the income/gains are used in the UK, there will normally be a remittance under the usual remittance rules.

There is no remittance under the debt remittance rules:

(1) if a relevant debt is paid out of a sum which does not constitute foreign income/gains; or
(2) if foreign income/gains are used to satisfy a debt which is not a relevant debt.

Debt is not defined. It is suggested that it includes any liability to pay money. If an individual takes a lease, the payment of rent is the payment of a debt. If the land is UK situate, the debt is a relevant debt. A guarantee is not a debt but if the guarantee is called on, it becomes a debt.

## 10.16 Relevant debt

"Relevant debt" is a key term, which is found in remittance conditions B, C and D . Section 809L(7) ITA provides the definition.

There are six categories of relevant debt:

> In this section "relevant debt" means a debt that relates (wholly or in part, and directly or indirectly) to—
> (a) property falling within subsection (2)(a) [property brought/received/used in the UK].
> (b) a service falling within subsection (2)(b) [ service provided in UK]
> (c) qualifying property dealt with as mentioned in subsection (4)(a),
> (d) a service falling within subsection (4)(b),

(e) qualifying property dealt with as mentioned in subsection (5)(a), or
(f) a service falling within subsection (5)(b).

To understand this one must read back in the words in the six cross-references:
(a) and (b) relate to remittance condition A
(c) and (d) relate to remittance condition C
(e) and (f) relate to remittance condition D.
When one reads in the words, it is clear that para (f) is otiose: it only repeats para (d).

In para (e) "*Qualifying* property dealt with as mentioned in s.809L(5)(a)", the word "qualifying" is meaningless. The expression "qualifying property" is defined for remittance condition C but not for condition D.

The most important category is para (a). The discussion below concentrates on this category. There are two steps in deciding whether a debt is a relevant debt within para (a):

(1) One must identify the property (if any) to which the debt relates. I refer to that as **"the asset"**.
(2) One must ask if that property is "property falling within s.809L(2)(a)" ie the property is brought/received/used in the UK by a relevant person.

The residence of the lender is not relevant. A loan from a UK bank is not a relevant debt if the money borrowed is received and retained outside the UK but it is a relevant debt if the money borrowed is received in the UK. However the debt remittance rules only apply if income/gains are used *outside the UK* in respect of a relevant debt, which is not likely to happen where the loan is to a UK bank: repayment to a UK bank is in principle use of the funds in the UK.

## 10.17 Debt "relating" to property (debt-related asset)

"Relates" requires some nexus between the debt and the property; exactly what that nexus is has been left to the courts to sort out.

The words "directly or indirectly" do not add any clarity; indeed I am not sure that it is altogether coherent to speak in the abstract of direct and indirect relationships, for "relates" requires a relationship and an indirectly relationship is a type of relationship. But the word "indirectly" shows that the drafter did not want the word "relates" to be construed very narrowly.

In the following discussion I just use the word "relate" and leave "directly or indirectly" to be understood.

10.17.1 *Some straightforward examples*

Suppose T borrows and receives money. The debt relates to the money. If T receives the borrowed money in the UK, the debt is a relevant debt.

If T borrows and receives the borrowed money outside the UK, the debt still relates to the money but the money is not "property falling within s.809L(2)(a)" so the debt is not a relevant debt. However if T later brings the money to the UK, it becomes "property falling within s.809L(2)(a)" and the debt at that time becomes a relevant debt.

Under a typical loan facility, T will borrow but may not receive money: T may draw down the borrowing to pay for an asset, the money being paid directly to the vendor. In that case the debt relates to the asset. If at any time T brings/receives/uses the asset in the UK the debt is a relevant debt. So it makes no difference whether the loan is drawn down first or (which may be more usual) drawn down directly to pay for the asset.

The RDR Manual provides some examples which are consistent with the above. I here set out the relevant parts of the text, relegating the full text to footnotes.

Example 1 concerns borrowing to buy UK shares.

> *Example 1 (Katrina)*[65]
> K borrows money to buy shares in a UK company.

The HMRC analysis is as follows:

> This is a relevant debt as it relates to property (shares) in the UK which is for the benefit of a relevant person.

---

65 The example in full (including its irrelevant detail) is as follows:

"**33160 Condition B - relevant debt**

In May 2006 Katrina, a remittance basis user, borrows money from an overseas bank to buy shares in a UK company. This is a relevant debt as it relates to property (shares) in the UK which is for the benefit of a relevant person (Katrina).

From 6 April 2008 any foreign income or gains that Katrina uses in respect of the loan, for example to service or to repay the loan, are taxable as a remittance."

More analytically, the debt is in the HMRC view a relevant debt on the following grounds:

(1) The debt relates to the shares. (This is correct).

(2) The shares are received in the UK by K. (This assumes a receipt of UK situate property is a receipt in the UK: see 10.11.9 (Receipt of UK situate investment asset)).

Example 2 concerns borrowing to buy UK residential accommodation:

> *Example 2 (Gary)*[66]
> G borrows money to buy an apartment in the UK which he occupies.

The HMRC analysis is as follows:

> The loan is a relevant debt because money is used in the UK, and it is respect of property (the apartment) which is used in the UK for the benefit of a relevant person (G).

More analytically, this is in the HMRC view a relevant debt on one or both of the following grounds:

(1) It relates to the flat which is used in the UK by G. (This is correct).

(2) It relates to money which is used in the UK by G. (Whether this is correct depends on the details of the purchase arrangement but it does not matter since the debt is a relevant debt under (1)).

Example 3 concerns borrowing to buy a UK chattel for a relevant person.

> *Example 3 (Robina)*[67]
> R borrows money to buy a car for M, a relevant person.

---

66 The example in full (including its irrelevant detail) is as follows:
"On 6 April 2015, Gary, a remittance basis user, borrows money from an overseas bank to buy an apartment in Solihull.
The loan is a relevant debt because money is used in the UK, and it is respect of property (the apartment) which is used in the UK for the benefit of a relevant person (Gary)."

67 The example in full (including its irrelevant detail) is as follows:
"In October 2012 Robina, a remittance basis user, borrows money on a fixed-rate loan from an overseas bank to buy a car for Mark, a relevant person. Robina pays £x each month from 1 November 2012, making 24 monthly payments. She uses her foreign chargeable gains to make these repayments.
The loan is a relevant debt because it is respect of property (the car) which is used in the UK by a relevant person (Mark)."

The HMRC analysis is as follows:

> The loan is a relevant debt because it is respect of[68] property (the car) which is used in the UK by a relevant person (M).

More correctly, there is a relevant debt because:
(1) The debt relates to the car.
(2) The car is used in the UK by a relevant person, M. (Another reason is that the car must have been brought or received in the UK by R or M.)

Example 4 concerns borrowing to pay for two services, one provided in and the other out of the UK; I discuss this at 10.17.13 (Debt relating to UK property in part).

Example 5 concerns borrowing to purchase an asset given to a relevant person; I discuss this at 10.17.6 (Debt-related asset given to another person).

Example 6 (Francine) is a straightforward example of borrowing to pay for services in the UK which adds nothing and so is not set out here.

For example 7, see 10.17.12 (Borrowing by relevant person (not the individual)).

### 10.17.2 *Asset derived from debt-related asset*

Suppose:
(1) T borrows and uses the borrowed money to purchase a non-UK asset (“asset 1").
(2) T later sells asset 1 and uses the proceeds of sale to purchase a UK asset (“asset 2").

The debt relates to asset 1. It is considered that the debt does not necessarily relate to asset 2. The word “relates” requires more than just a historic tracing exercise. It is suggested that the debt relates to the UK asset if and only if steps (1) and (2) form part of an arrangement.

Similarly, suppose:
(1) T borrows.

68 The author of the example probably regarded “relates to” and “in respect of” as synonymous, which no doubt they are; but it is best to use the statutory wording and not a paraphrase.

(2) The borrowed funds (or proceeds representing them) are mixed with other funds.
(3) Some of the mixed funds are used to acquire a UK asset.

Unless steps (1) to (3) form part of an arrangement, the debt does not relate to the UK asset. If the debt does relate to the asset, some commonsense tracing rules must be devised; the ITA mixed fund regime does not apply.

Suppose T borrows invests the borrowed funds, and receives income from the borrowed funds. It is considered that the debt does not relate to the income. So if the income is remitted, it is in principle taxable, but the debt does not thereby become a relevant debt.

### 10.17.3 *Debt relating to asset later removed from UK or ceasing to exist*

Suppose:
(1) T borrowed to acquire an asset.
(2) T brings/receives the asset in the UK so the debt is a relevant debt.
(3) T later takes the asset outside the UK.

The debt still relates to the asset. It is suggested that the asset is still "property falling within s.809L(2)(a)" ie property brought/received/ used in the UK by T. So the debt is still a relevant debt. The contrary view gives some scope for planning/avoidance. Suppose T wanted to use property/chattels in the UK:
(1) T borrows funds.
(2) T uses the funds to purchase property in the UK and chattels which are in the UK or which are brought to the UK.
(3) Interest rolls up on the debt.
(4) Later when T no longer wants to use the property/chattels, the chattels are taken outside the UK, and the property is sold.
(5) The debt is then repaid.

If my view is wrong, the debt has ceased to be a relevant debt by the time it is repaid so there is no remittance, even though T may have enjoyed substantial benefits in the UK.

Refinancing might solve the tax problem.[69]

Suppose:
(1) T borrowed to acquire an asset.
(2) T brings/receives the asset in the UK so the debt is a relevant debt.

69 See 10.17.4 (Borrowed money used to repay debt: refinancing).

(3) The asset ceases to exist (eg it is a short lease which expires, or money which is spent).

It is considered that the debt remains a relevant debt. That is consistent with debt remittance rules for services, for if T borrows to pay for services provided in the UK, the debt is a relevant debt even after the services have ceased to be provided.

### 10.17.4 *Borrowed money used to repay debt: refinancing*

Suppose:

(1) T borrows and uses the borrowed money to acquire property brought/received/used in the UK. The debt (“debt 1") is a relevant debt.

(2) T borrows more (“debt 2") and uses the borrowed funds to repay debt 1.

It is suggested that debt 2 is a relevant debt if the steps form a scheme or arrangement.

On the other hand suppose there is no UK asset at the time of step 2 (the refinancing), eg:

(1) T borrows and
- (a) brings the borrowed money to the UK and later takes it out again; or
- (b) uses the borrowed money to acquire UK property which is later sold and the proceeds taken out of the UK or
- (c) spends the borrowed money in the UK.

In each case the debt (“debt 1") is a relevant debt.

(2) T borrows more (“debt 2") and uses the borrowed funds to repay debt 1.

It is suggested that debt 2 is not a relevant debt (unless the steps form part of a single arrangement).

Suppose:

(1) T borrows (“the first debt”) and receives fund A.

(2) T borrows again (“the second debt”) and uses the money borrowed on the second debt to repay the first debt. Thus T retains fund A.

It is suggested that the second debt relates indirectly to fund A if the two steps form a single arrangement, but not otherwise.

### 10.17.5 *Borrowed money lent on to another person*

The position becomes more complex if borrowed money is lent on to another person. Suppose:

(1) T borrows money from a bank.
(2) T lends the borrowed money to A.
(3) A uses the money to acquire a UK asset ("A's UK asset").

In this case:

(1) T has a debt: the burden of the debt to the bank ("T's debt"). One needs to ask if it is a relevant debt.
(2) A has a debt: the burden of the debt to T ("A's debt"). One needs to ask if it is a relevant debt.
(3) T has an asset: the benefit of A's debt to T: one needs to ask if it is UK situate.
(4) A has an asset: "A's UK asset".

A's debt is a relevant debt: it relates to A's UK asset.

Is T's debt a relevant debt? T's debt relates to the benefit of A's debt. If the benefit of A's debt is a UK situate asset, then T's debt is a relevant debt. Let us assume this is not the case.

T's debt is also a relevant debt if (1) it relates (indirectly) to A's UK asset and (2) A is a relevant person in relation to T. It is suggested that T's debt does not relate to A's UK asset. This is clearly the case if steps (1) and (2) do not form an arrangement. If there is no connection of that kind between T's debt and the UK asset, the debt does not relate to the asset. But even if there is an arrangement, T's debt does not relate to A's UK asset, since T has another asset which relates to the debt. There is no scope for tax avoidance in this conclusion, since the debt remittance rules apply to A.

If my view is wrong, what would the position be if:

(1) T borrows from a bank and lends to A.
(2) A lends the proceeds of the borrowing to B.
(3) B uses the money to acquire a UK asset.

How many assets would T's debt relate to, and how could T keep track of them all?

### 10.17.6 *Debt-related asset given to another person*

RDR Manual 33160 gives an example of borrowing to purchase an asset which is later given to a relevant person and brought to the UK:

*Example 5 (Ali)*[70]
A borrows to purchases a sculpture outside the UK.
A gives the sculpture to his wife W.
W brings the sculpture to the UK.

HMRC correctly analyse why the debt is a relevant debt:

> There is a debt (the loan from the bank) which relates to property (the sculpture) which is brought to the UK by a relevant person (W).

Suppose:
(1) T borrows money from a bank.
(2) T gives the borrowed money to R.
(3) R uses the money to acquire a UK asset ("R's UK asset").
Is T's debt a relevant debt? T's debt is a relevant debt if (1) it relates (indirectly) to R's UK asset and (2) R is a relevant person in relation to T. It is suggested that T's debt relates to R's UK asset if and only if steps (1)

---

70 The example in full (including its irrelevant detail) is as follows:

"**33160 Condition B - relevant debt**
Ali, a remittance basis user, purchases a sculpture in Sweden in October 2012 (see earlier example). He takes out an interest-free [*sic*] loan with his US bank to fund this purchase, repayable within 1 year. In November 2012 he gives them to his wife as an anniversary gift.
She initially keeps it at her mother's home in Stockholm, but 6 months later in March 2013 Ali's wife decides to bring the sculpture to the UK to display in her UK garden. In October 2013 Ali arranges with the US bank that he will repay the loan by giving them an oil painting which is currently in his apartment in Miami, which he had purchased in May 2011, using his relevant foreign earnings, and some capital inherited from an uncle.
There is a debt (the loan from the US bank) which relates to property (the sculpture) which is brought to the UK by a relevant person (Ali's wife, in March 2013).
The painting which derives, in part, from A's relevant foreign earnings, is used outside the UK in respect of this relevant debt.
There is a taxable remittance in 2013-14, the tax year in which the painting is used to pay the relevant debt."

More analytically, remittance condition B is satisfied under s.809L(3)(d): the picture (which derives from RFE) is used in respect of the relevant debt. The example continues:

"The remittance occurs when the foreign income or gains are regarded as used in respect of the relevant debt (2013-14) not when the property is first used in the UK by a relevant person (2012-13). ...
NB – for the purposes of this example assume there is no chargeable gain on the transfer of the painting to the bank."

and (2) form an arrangement. If there is no connection of that kind between T's debt and the R's asset, the debt does not relate to the asset.[71]

10.17.7 *Borrowed money used to buy secondhand company*

Suppose T borrows and buys all the shares of a company which owns a UK asset ("the Co's asset"). The debt relates to the shares. At first sight it may seem likely that the debt also relates to the Co's asset. But note that if T uses foreign income to purchase the shares, the income is not remitted. That being the case, it would be anomalous if there were a remittance if T borrows to purchase the shares and then uses foreign income to pay the debt. So the debt should not be regarded as a relevant debt: the debt does not relate to the co's asset. One does not lightly pierce the corporate veil.

10.17.8 *Borrowed money used to buy partnership interest*

Suppose T borrows and buys an interest in a partnership which owns a UK asset. It is suggested that the debt does not relate to the UK asset.[72]

10.17.9 *Debt for unpaid interest*

Suppose one has two debts:
(1) A debt for capital borrowed (the principal debt).
(2) A debt for interest on the principal debt (the interest debt).
The fact that the principal debt is a relevant debt (assume it relates to property brought/received/used in the UK) does not make the interest debt a relevant debt. This follows from the repeal of the former s.809L(8) ITA in 2009. However see 10.18.1 (Payment of interest).

10.17.10 *Borrowing on security of UK asset*

Suppose T borrows and receives the borrowed money abroad but secures the debt on property brought/received/used in the UK. It is considered that the debt does not relate to the UK property (within the meaning of the section) so the debt is not a relevant debt. The context shows that the

71 Contrast 10.14.12 (Gift to third person).
72 See 10.37 (Partnerships).

colourless word "relate" is intended to apply to the proceeds of the debt, the borrowed money. Otherwise there would be a remittance when the debt is repaid, which is absurd.[73]

### 10.17.11 *Debt imposed by law*

Debts may be imposed by law. Court orders on divorces are not relevant debts (they do not relate to property brought received/used in the UK) and indeed the obligation may not be a "debt". So the debt remittance rules do not apply. Similarly, fines imposed by the courts do not in principle relate to property brought/received/used in the UK.

There might, however, be a remittance under ordinary principles when the court order is satisfied.

A tax liability relating to foreign income or gains is not a relevant debt, but it might be argued that a tax liability relating to UK income or gains, or remitted RFI and foreign gains, does relate to UK property.

### 10.17.12 *Borrowing by relevant person (not the individual)*

Suppose:

(1) R (a relevant person - not the individual) borrows to purchase an asset.

(2) R receives or uses the asset in the UK (so the debt is a relevant debt).

The debt is a relevant debt and if T uses their income/gains to repay it there is a taxable remittance.

It is suggested that this is the case even if R ceases to be a relevant person before T uses their income/gains to repay the debt, since even at that time the debt relates to the asset, and the asset is property falling within s.809L(2)(a); but the contrary is arguable.

The RDR Manual 33160 provides an example:

> Example 7 (Kumar)[74]

---

73 The debt would not be a relevant debt if T first took the UK security outside the UK, which would be somewhat odd.

74 The example in full (including its irrelevant detail) is as follows:

> "**33160 Condition B - relevant debt**
>
> *Example 7*
>
> Kumar sets up and is a beneficiary of a non resident trust with £1,000,000 capital which the trustees invest in overseas property which produces income that would be

> K is settlor of a non resident settlor-interested trust.
> The trust borrows to buy an asset which K uses in the UK.

The HMRC analysis is as follows:

> There is a relevant debt (the loan) which is used to purchase an asset in the UK (property used by a relevant person).

More analytically, the debt is a relevant debt since:
(1) It relates to the UK asset.
(2) The asset is used in the UK by a relevant person (K).
Thus if the debt is repaid out of foreign trust income, K is chargeable under the s.624 remittance basis.

That applies even to pre-2008 debts. There is transitional relief if pre-2008 income/gains are used to repay the debt (wherever made).[75] However, transitional relief for pre-2008 debts[76] does not apply in this case.

### 10.17.13 *Debt relating to UK property in part*

If a debt relates partly to property brought/received/used in the UK, the entire debt is a relevant debt. The unfairness is avoided by the rules in s.809P: see 10.23.3 (Debt remittances). But HMRC do not agree. In RDR Manual the facts (stripping out irrelevancies)[77] are as follows:

---

chargeable on Kumar if he remitted it to the UK.
The trust borrows £500,000 from an offshore lender to buy a UK asset which Kumar uses in the UK. The trust pays the interest on the loan with the income from the letting of the overseas property.
There is a relevant debt (the loan) which is used to purchase an asset in the UK (property used by a relevant person). The income used to service the loan is regarded as a taxable remittance, chargeable on Kumar."

75 See 10.8 (Relevant person transitional rule for pre-2008/09 income and gains).

76 See 10.43 (Transitional loan relief).

77 The example in full (including its irrelevant detail) is as follows:
"**33160 Condition B - relevant debt**
*Example 4*
In August 2011 Karen, a remittance basis user, uses an interest-free [*sic*] overdraft facility on her Jersey bank account to pay UK school fees for her 14 year old daughter Lauren. She also uses the remainder of the facility to pay for Lauren to attend a summer school in France organised by a French university. Karen repays the overdraft from her relevant foreign earnings between August and November

> *Example 4 (Karen)*
> K borrows:
> - to pay UK school fees for her 14 year old daughter.
> - to pay for a summer school in France for the daughter.
> K repays the overdraft from her relevant foreign earnings.

The HMRC analysis is:

> There is a debt (the overdraft) which relates in part to a service provided in the UK (the schooling) to a relevant person (the daughter) – this part is a relevant debt. However part of the overdraft facility is not a relevant debt because it does not relate to a service provided to the daughter in the UK, but to a service provided in France.

The author has overlooked the definition of relevant debt in s.809L(7) ITA:

> In this section "relevant debt" means a debt that relates *(wholly or in part,* and directly or indirectly) to—
> (a) property falling within subsection (2)(a),
> (b) a service falling within subsection (2)(b) ...

## 10.18 "Use in respect of" a relevant debt

Condition B is satisfied only if income/gains are used in respect of the relevant debt.

Use "in respect of" a debt requires some nexus between the use and the debt; exactly what that nexus is has been left to the courts to sort out.[78] The words "directly or indirectly" do not add any clarity. Indeed I am not sure that it is altogether coherent to speak in the abstract of use "directly or indirectly" in respect of a debt, for use indirectly in respect of a debt is use in respect of a debt. But the word "indirectly" shows that the drafter did not want the words "in respect of" to be construed narrowly.

In this section I sometimes refer simply to a debt rather than a relevant debt, ie I assume the debt is a relevant debt.

---

2011. ...
The daughter therefore has taxable remittances of the relevant foreign earnings used to service and repay the part of the overdraft that is a relevant debt."

78 In *Cunard's Trustees v IRC* 27 TC 122 at p.135 Lord Greene MR described the phrase "in respect of" as "colourless words".

If foreign income/gains are used to pay a relevant debt, this is a taxable remittance under the debt remittance rules: money used to pay a debt is used in respect of a debt.

### 10.18.1 *Payment of interest*

Section 809L(9) ITA provides:

> The cases in which property (including income or chargeable gains) is used in respect of a debt include cases where the property is used to pay interest on the debt.

Suppose T has two debts:
(1) A debt for capital borrowed (the principal debt).
(2) A debt for interest on the principal debt (the interest debt).
We note above that it is possible that:
(1) the principal debt is a relevant debt (assume it relates to property brought/received/used in the UK) but
(2) the interest debt is not a relevant debt.[79]
However if T uses foreign income/gains to pay the interest debt, the funds are regarded as used in respect of the *principal* debt, and so are regarded as remitted under s.809L(3)(c). In other words, it does not matter whether or not the interest debt is a relevant debt, all that matters is whether the principal debt is a relevant debt.

### 10.18.2 *Use as security for debt*

Suppose foreign income/gains are charged as security for a debt. It appears at first sight that the funds are "used" and (if used) the funds are certainly used "in respect of" the debt. On this view charging funds as security for a debt constitutes a remittance. However the word "used" might connote "used up" ie consumed; in that sense (unless and until the security is enforced) the funds are not "used", and the charge does not constitute a remittance.

I have considered a compromise view, that the funds are "used" in circumstances where the loan would not be made without the security, and funds are not "used" if the circumstances are that the loan would be made

79 See 10.17.9 (Debt for unpaid interest).

anyway. On reflection I think that is not the better view. Among other objections, the question whether the loan would be made without the security is a hypothetical question which would often be imponderable.

The RDR Manual provides:

> **33170 Condition B - collateral[80] in respect of relevant debt** [July 2010]
> Foreign income and gains may be used as collateral for a loan which is brought to the UK or otherwise used for a purpose to which ITA2007/s809L(2) applies (that is, there is a relevant debt).
> Such foreign income and gains used as collateral are used 'in respect of' the relevant debt, so there may be a taxable remittance at this point.
> [1] The foreign income or gains used as collateral may be used directly, that is, the lender may receive a charge over cash assets in a bank account.
> [2] However it is more likely they will be offered indirectly, often in the form of an asset such as a property or bond note that is 'derived from' the foreign income or gains.[81]
> [3] This situation only arises where remittance basis users offer their foreign income or gains for use as collateral for a relevant debt, whether to a UK-based or an offshore lender.
> [4] In many cases UK property or non-taxable offshore property is offered as collateral in respect of a relevant debt; there is no remittance of this collateral within Condition B (ITA2007/s809L(3)(c)).
> To determine the amount of remittance where foreign income or gains are used as collateral in respect of a relevant debt refer to RDRM35050 Condition B - Collateral in respect of relevant debt.

So far the Manual appears to take the view that charging as security is use in respect of a debt, but the text now goes on to qualify that with an exception so large that the rule rarely applies:

> Foreign income and gains used to pay interest on the debt and to repay the borrowed capital are also 'used in respect of' a relevant debt, and will be taxable as a remittance. Thus there are potentially two possible sources of a taxable remittance charge in respect of the relevant debt –

80 [Author's footnote] A note on terminology. The author of this passage is using the word "collateral" as a synonym of "security" though that is (I think) American rather than English legal usage.

81 [Author's footnote]. I rather doubt that [2] is more likely than [1] but it does not matter.

the foreign income or gains used as collateral and the foreign income or gains used to repay the debt.

In the majority of commercial situations, neither party to the relevant debt transaction expects or intends that the collateral offered as security will be taken by the lender. Instead it is planned that the loan will be serviced and the capital repaid without recourse to the security charge. In such cases using foreign income or gains to regularly service or make capital repayments in respect of the relevant debt effectively 'masks' the collateral being used. In such cases the only taxable remittance will occur as and when the foreign income or gains are used to service or repay the loan. The payments, and thus the taxable remittances, will be spread over the loan period.

*Example 1: (John)*[82]

In 2012/13 J, a remittance basis user takes out a loan for £200,000 from a Guernsey bank. J uses the loan to purchase UK property so the loan is a relevant debt.

J offers as collateral for the loan an offshore bond. He purchased this bond in 2010 (a year in which he was also UK resident remittance basis user) using £200,000 of his untaxed RFI from that year.

J repays £18,000 of the loan (principle (*sic)* plus interest) in 2012/13, using his RFE.

J is using the offshore bond as collateral for the loan; the offshore bond derives directly from his foreign income so J is using his RFI in respect of the relevant debt. However J is also using his RFE to both service and repay the debt capital; this 'masks' the collateral and so J will only be regarded as remitting the £18,000 RFE in 2012/13.

Note – In the example above, the relevant debt could also be serviced and repaid using non-taxable income or capital sources; in which case there would be no taxable remittances of foreign income or gains. However the servicing/repaying of the loan effectively masks the collateral offered, so there is still no remittance of the collateral in this circumstance.

In some cases, usually involving avoidance or non-commercial arrangements, the relevant debt is not serviced or repaid by the borrower, or only a token amount is offered. In these circumstances the foreign income or gains offered as collateral are being utilised in respect of the relevant debt, that is, to delay or minimise service charges or repayments. As there is only one possible tax charge in respect of the relevant debt, that is the charge HMRC will take. The charge is taken

82 I omit a few irrelevancies in setting out the text of this example.

> up-front when the collateral is offered. Such arrangements are expected to be rare.
> This should not be mistaken with interest-only repayment terms, or commercial arrangements that offer payment breaks and so forth. Always check the terms and general availability of the loan arrangements on offer.
> If you think there is a remittance of foreign income or gains offered as collateral in respect of a relevant debt you should obtain copies of all the relevant arrangements, including all loan agreements and repayment schedules.

Thus in the HMRC view, security is not "used in relation to a debt" if the debt is "serviced and repaid" on commercial terms. This distinction is difficult to defend, and it is considered that the grant of security is not use in relation to the debt, until the security is enforced.

There may be some special feature in the arrangements which do constitute "use". Back to back loans may be an example. Suppose:

(1) T deposits foreign income/gains in a bank ("T's deposit").
(2) T borrows from the bank ("the relevant debt").
(3) No interest is paid on T's deposit and only a small rate of interest is paid on the borrowing.

It is reasonably arguable that the income/gains deposited is used in respect of the relevant debt. But even here, it is suggested that there is no use in respect of the relevant debt, as the funds are not used up or consumed. (On the other hand, if commercial interest rates are paid on the deposit and the borrowing, the deposited funds are clearly not used in respect of the debt.)

It follows that it is only rarely if ever necessary to consider the amount remitted on the grant of security, but the issue is considered at 10.23.4 (Use as security: amount remitted).

## 10.19 Becoming/ceasing to be a relevant person: conditions A & B

A person may be a relevant person at one time and not at another time. For instance, a child ceases to be a relevant person on becoming 18; a person becomes a relevant person on marriage or cohabitation and ceases to be a relevant person on divorce or separation. A company becomes a relevant person in relation to T if T becomes a participator in the company.

The statute gives no guidance to the application of conditions A and B in this situation. We need to find the answer as best we can in the words of the statute.

### 10.19.1 *Condition A*

Section 809L(2) ITA provides:

> Condition A is that—
> (a) money or other property is brought to, or received or used in, the UK by ... a relevant person...

For present purposes there are three ways of satisfying condition A: property must be (i) brought or (ii) received or (iii) used in the UK by a relevant person. Property is *brought* or *received* in the UK at a particular moment, and it is considered that the person must be a relevant person at that moment.

Suppose:

(1) T uses RFI to make a gift of an asset to S (not a relevant person). S brings or receives the asset in the UK. There is no charge at the time of the gift or of the receipt in the UK.

(2) Later, S becomes a spouse or cohabitee, and so becomes a relevant person. There is no charge at that time.

Likewise if:

(1) T uses RFI to make a gift of an asset to R (a relevant person). R does not remit the asset to the UK. There is no charge at this time.

(2) Later, R ceases to be a relevant person, and subsequently brings or receives the asset in the UK. There is no charge at that time.

HMRC agree. In RDR Manual 33150 example 5, the facts (stripping out irrelevancies)[83] are:

---

83 The example in full (including its irrelevant detail) is as follows:

> "**33150 Condition B - remittances derived from income or gain**
> *Example 5*
> Caroline is a remittance basis user. In August 2013 she realises some foreign assets and so makes some foreign chargeable gains. She uses all the proceeds (and so uses all these gains) to purchase a motorcycle in Paris which she gives to her husband Joel. It is registered in his name. Joel keeps the bike at his French apartment. A few years' [*sic*] later Caroline and Joel divorce, and Joel moves from their home in Liverpool to Manchester.

> In 2013 W uses foreign chargeable gains to purchase a motorcycle in Paris.
> W gives the asset to her husband H. H keeps the bike at his French apartment. [So there is no remittance at this time].
> Subsequently, H and W divorce, and H moves from their home [ie H ceases to be a relevant person].
> In 2017 H brings his bike to the UK.

The relevant part of HMRC analysis is as follows:

> H and W were married and so H was a relevant person in 2013 when W gave him the motorcycle; he could not therefore have been a gift recipient (see Condition C – Gift recipients cannot be relevant persons).

More analytically, condition C is not satisfied.

> By 2017 they have divorced so H is not a relevant person when he brings in the motorcycle [to the UK] for S to use.

More analytically, condition A is not satisfied because H is not a relevant person when H brings the asset to the UK.

### 10.19.2 *Condition B*

Condition B provides (in part):

> Condition B is that—
> (b) the property, service or consideration [received in the UK]—
> (i) derives (wholly or in part, and directly or indirectly) from the income or chargeable gains, and
> (ii) in the case of property or consideration, is property of or consideration given by a relevant person ...

It is considered that the requirement in (b)(ii) is met only if the person is a relevant person at the time that condition A is met (ie at the time that the property is brought/received/used in the UK). HMRC agree. The RDR Manual 33120 provides an example (already discussed above in

---

In September 2017 Joel and Caroline's 16 year old son, Joseph wants to learn how to ride a motorcycle, so Joel imports his bike from Paris to his Manchester home for Joseph to use."

connection with condition A). The facts (so far as relevant) are as set out above with one additional fact:

> The motorcycle is used in the UK by C who is a minor child of W (a relevant person).

The HMRC analysis is as follows:

> Here, property has been provided in the UK (the motorcycle) for the use of a relevant person (C) ...

More analytically, condition A is satisfied.

> ...and the property derives directly from W's foreign chargeable gains. However the motorcycle is the property of H, who is not a relevant person [at the time that the property is used by the relevant person], so there is no taxable remittance for W.

More analytically, condition B is not satisfied because H is not a relevant person when the asset is used by the relevant person, C.

To drive the point home, the RDR Manual 33150 gives another example making the same points on somewhat far-fetched facts. So far as relevant[84] the facts are:

> In 2011 W uses RFI to purchase prints retained outside the UK.
> W gives the prints to her daughter D who is age 16 and so a relevant person. D retains the prints outside the UK [so there is no remittance].
> D ceases to be a relevant person on becoming 18 but in that year (bucking statistics) D has a child GD (who is a relevant person in

84 The example in full (including its irrelevant detail) is as follows:

> "**33150 Condition B - remittances derived from income or gain**
>
> *Example 6*
>
> In 2011, while visiting New York, Ros, a UK resident remittance basis user, purchases several art prints by H Marecus, an international artist. Ros uses her relevant foreign income to make the purchase. She gives them to her daughter Rachael, who is at that time living and studying in the US, as a 16th birthday present in February 2011. Rachael returns to the UK in May 2011, but leaves the prints at her uncle's New York apartment.
>
> In June 2016 Rachael's 3 year old daughter Abigail decides to start singing lessons in Newcastle. The singing teacher's mother is a collector of Marecus prints, so the teacher agrees with Rachael to accept one of the prints in exchange for the lessons. Rachael arranges for her uncle to send the print from New York directly to the singing teacher's mother in California."

> relation to W).
> In 2016 D enters into an (implausible) agreement under which she transfers the prints to the mother of a singing teacher outside the UK in consideration of the teacher giving singing lessons to GD (age only 3) in the UK.

The HMRC analysis is as follows:

> A service has been provided in the UK (the singing lessons) for the benefit of a relevant person (GD) ...

More analytically, condition A is satisfied.

> ...and the consideration for the service (the print) derives from W's RFI. However the consideration is given by D, who is not a relevant person [at the time that condition A is satisfied] and so W has not made a taxable remittance of her relevant foreign income. Rachael is 21 years old and so is not a relevant person in June 2016 when she gives the prints in consideration for a service.

More analytically, condition B is not satisfied.

> Note – D was 16 years old and so is a relevant person in February 2011 when her mother gave her the prints (see also Condition C – Gift recipients cannot be relevant persons).

More analytically, condition C is not satisfied.

The rule of when one applies the relevant person test may work in favour of HMRC. Suppose:

(1) T uses RFI to make a gift of an asset to S (not a relevant person). There is no charge at this time.
(2) S becomes a relevant person, and subsequently remits the asset to the UK. There is a taxable remittance at that time.

HMRC agree. The RDR Manual provides an example where the facts (stripping out irrelevancies)[85] are:

---

85 The example in full (including its irrelevant detail) is as follows:
"In June 2010 Sam, a remittance basis user, uses £8,000 of her relevant foreign income to make an overseas purchase of an antique clock from a dealer in Denmark. Sam immediately makes a gift of an antique clock to Chris and Jo, who at that time are living in Denmark. The clock is kept at Chris's family home in Copenhagen.

> **33240 Gift recipients cannot be relevant persons**
> *Example 2*
> In 2010 T uses RFI to purchase a clock outside the UK.
> T immediately gives the clock to S (not a relevant person) and it is kept outside the UK.
> S, not being a relevant person, is a gift recipient.
> In 2014, T marries S. S becomes a relevant person and ceases to be a gift recipient at this time.
> Subsequently, S brings the clock to the UK.

The HMRC analysis is as follows:

> As S is no longer a gift recipient Condition C is not relevant.
> However as S is now [in 2014] a relevant person there is a taxable remittance chargeable on T when S imports the clock, under Conditions A and B. This is because
> [1] property (the clock) has been brought to the UK by a relevant person (S) [ie condition A is satisfied] and
> [2] that property derives from T's RFI and the property is property of a relevant person (S) [ie condition B is satisfied]

So far we have considered property brought to or received in the UK. That can happen only at a particular moment. On the other hand, property can be *used* in the UK over a period of time. Suppose:

(1) Year 1: T uses RFI to make a gift of an asset to S (not a relevant person). S uses and continues to use the asset in the UK eg she buys a house which she occupies. There is no charge at the time of the gift or at the time of the use.
(2) Year 2: S becomes a spouse or cohabitee, and so becomes a relevant person. She continues to use the property.

---

Chris, not being a relevant person, is a gift recipient.
Two years later Jo and Chris split up, and in July 2014, Sam and Chris marry. Chris ceases to be a gift recipient at this time.
In October 2014 Chris brings the antique clock to the UK to the house that is shared with Sam."
The example as published is defective in that it must be assumed (though this is not stated) that Chris gave his interest in the clock to Jo (or perhaps the gift was to Jo and not to Jo and Chris).

Is there a charge in year 2 when S becomes a relevant person? It would be strange if there were a difference between this case and the case of receipt in the UK. It is tentatively suggested that the answer is, no.

### 10.19.3 *Third persons*

The position becomes more complicated when a third person is involved. Suppose:

(1) T gives RFI to T's spouse W.
(2) There is a divorce and W ceases to be a relevant person.
(3) W transfers the RFI to a trust under which a minor child of T is a beneficiary. The trustee is a relevant person in relation to T.
(4) The trustee transfers the funds to the minor child who receives them in the UK.

Condition B appears to be satisfied since at the time of the receipt in the UK the funds are the funds of a relevant person. But the trust funds may not be derived income.[86]

## 10.20 Debt becoming/ceasing to be a relevant debt

A debt which is not a relevant debt may become a relevant debt. Condition B is (in short) that income is used in respect of a relevant debt. It is considered that the debt must be a relevant debt at the time the income is used.

Suppose:

(1) Year 1: T borrows and receives the borrowed sum offshore.
(2) Year 1: T uses RFI to pay the interest (use in respect of the debt).

In year 1 condition B is not satisfied as the RFI is not used in respect of a relevant debt.

(3) Year 2: T remits the borrowed sum to the UK.

In year 2 the debt becomes a relevant debt, but it is considered that the RFI used to pay interest in year 1 does not become remitted at that time. But if RFI is used to pay more interest in year 2, that RFI satisfies condition B.

86 See 10.14.12 (Gift to third person).

## 10.21 Remittance condition C (gift recipients)

Section 809L(4) ITA provides:

> Condition C is that qualifying property of a gift recipient—
> (a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,
> (b) is consideration for a service that is enjoyed in the UK by a relevant person, or
> (c) is used outside the UK (directly or indirectly) in respect of a relevant debt.

### 10.21.1 *Enjoyment by a relevant person*

The requirements in (a) and (b) are similar but not the same as remittance condition A. The differences are as follows:

| **Condition C requirement** | **Condition A requirement** |
|---|---|
| Property brought/received/used in the UK | Property brought/received/used in the UK *by or for the benefit of a relevant person.* |
| Property *enjoyed* by a relevant person. | No equivalent in condition A (though the requirement that the property is brought/received/used by or for the benefit of a relevant person is similar.) |

The word "enjoyed" in condition C means more or less the same as the word "used" in condition A.[87] I do not think there is a difference though if there were, the vagueness of the words makes it impossible to say what it may be. The reason for the different word is probably that other parts of condition C are derived from the GWR wording, where the word "enjoyed" is used[88] so the word enjoyed is copied across to condition C.

### 10.21.2 *Enjoyment disregards*

Section 809N ITA provides definitions and other supplementary

87 As to which, see 10.11.8 (Property used in the UK ("used" limb of condition A)).
88 See 54.1 (GWR – Introduction).

provisions for condition C. Section 809N(1) ITA provides:

> This section applies for the purposes of determining whether or not income or chargeable gains of an individual are remitted to the UK by virtue of condition C in section 809L.

Section 809N(9) ITA provides three cases where enjoyment is disregarded. Since enjoyment is a requirement of remittance condition C, this disregard amounts to exemption from condition C:

> Enjoyment by a relevant person of property or a service is to be disregarded in any of these cases—
> (a) if the property or service is enjoyed virtually to the entire exclusion of all relevant persons;
> (b) if full consideration in money or money's worth is given by a relevant person for the enjoyment; or
> (c) the property or service is enjoyed by relevant persons in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

Para (a) and (b) are based on IHT GWR provisions.[89]

Para (c) concerns charitable or public gifts, but it is hard to see that it is needed.

Para (b) is the most important of the three exceptions: I refer to it as "**the full consideration exemption**".

Suppose:

(1) T gives pre-2008 RFI to T's spouse (not a relevant person and so a gift recipient) and the spouse uses the money to buy a house jointly with T; or
(2) T gives RFI to T's brother (a gift recipient) and the brother uses the money to buy a property jointly with T.
(3) The co-owners occupy the property jointly.

It is considered T does not "enjoy" the co-owner's half share, so condition C is not satisfied in respect of the gifted RFI.

Suppose:

(1) T gives RFI to T's adult son S (a gift recipient), and
(2) S uses the money to purchase a UK residence which is occupied by S,

89 For (a) see 54.1 (GWR – Introduction); for (b) see para 6 sch 20 FA 1986.

not by T.

(3) S has a minor child, GS, who also lives in the property.

It is considered that the property is not "enjoyed" by GS, who is merely a licensee of S. Any "enjoyment" by GS is incidental to the primary use by S, and should be ignored. It is different if S leaves the property and GS becomes the occupier (but since GS is by then likely to be 18, S ceases to be a relevant person). HMRC agree. RDR Manual provides:

> **33270 Remittance Basis: Identifying Remittances: Condition C - Gift Recipients: Remittances - enjoyment by a relevant person ignored**
> Each case will depend on its particular facts, but broadly, enjoyment by a relevant person is disregarded, and so there is no taxable remittance under Condition C (if there otherwise would be) where the property or service is enjoyed by the gift recipient virtually to the entire exclusion of all relevant person, that is,
> [1] the gift is genuine and
> [2] any enjoyment by a relevant person is incidental (ITA2007/s809N(9)).

After this somewhat loose paraphrase of the statutory provision, the Manual gives the example we are considering:

> For example a minor child may derive benefit from living in the UK with his parents in a house that was purchased using offshore funds gifted by his grandfather (a remittance basis user) to his father, for his father's own use. It is normal for a young child to live with his parents and therefore, in most cases, no advantage over minor children generally is obtained. In this type of circumstance HMRC would generally accept that the minor child's enjoyment of the house was merely incidental to that of his father.

10.21.3 *Gift recipient*

The key terms in remittance condition C are "gift recipient" and "qualifying property".

Section 809N(2) ITA provides:

> A "gift recipient" means a person, other than a relevant person, to whom the individual makes a gift of money or other property that—
> (a) is income or chargeable gains of the individual, or

> (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

Strictly one should not use the term "gift recipient" in the abstract. A gift recipient can exist only *in relation to an individual (the donor)*. But where the context is clear it is permissible simply to refer to a gift recipient.

A relevant person cannot be a gift recipient. So in practice gift recipients will be individuals who are not members of the individual's close family, such as parents, adult children, friends and relatives. (Trusts and companies will generally be relevant persons and where they are not, it is unlikely they would or properly could enter into a transaction caught by condition C.)

If T makes a gift to G, and G gives the property to H, H is not a gift recipient in relation to T.

If T makes a gift to a trust, and the trust appoints the property to B, B is not a gift recipient, as T has not made a gift to B.

### 10.21.4 *Meaning of "gift"*

Section 809N(5) ITA extends "gift" to include disposals at an undervalue:

> The individual "makes a gift of" property if the individual disposes of the property—
> (a) for no consideration, or
> (b) for consideration less than the full consideration in money or money's worth that would be given if the disposal were by way of a bargain made at arm's length;
> but, in a case falling in para (b), the individual is to be taken to make a gift of only so much of the property as exceeds the consideration actually given.

In the phrase "full consideration in money or money's worth *that would be given if the disposal were by way of a bargain made at arm's length*" do the italicised words add anything? It is thought not; these words are otiose but they do no harm.

Section 809N(6) ITA is intended to widen this:

> A reference to the individual making a gift of property includes a case where—

(a) the individual retains an interest in the property, or
(b) an interest, right or arrangement enables or entitles the individual to benefit from the property.

I am unable to make sense of this. The wording is loosely based on s.102A FA 1986 but the context there is different, and s.102A is itself obscure, so that does not shed any light on the matter. Perhaps it is meaningless.

Suppose T makes an interest-free loan to B. The transaction is for full consideration so it is not a gift within s.809N(5). A lender in principle has no interest in the money lent so s.809N(6)(a) does not apply. A loan does not entitle T to benefit from the money lent. B may use that money for himself. It is considered that the loan does not enable T to benefit from the money lent, so s.809N(6)(b) does not apply. B is not a gift recipient.

### 10.21.5 *Meaning of "qualifying property"*

Section 809N(7) ITA defines "qualifying property". There are three categories of qualifying property:

> "Qualifying property", in relation to a gift recipient, is—
> (a) the property that the individual gave to the gift recipient,
> (b) anything that derives (wholly or in part, and directly or indirectly) from that property, or

Para (a) and (b) are what one would expect, but the definition goes on to include something much wider:

> (c) any other property, but only if it is dealt with as mentioned in section 809L(4)(a), (b) or (c) by virtue of an operation which is effected—
> (i) with reference to the gift of the property to the gift recipient, or
> (ii) with a view to enabling or facilitating the gift of the property to the gift recipient to be made.

Section 809N(8) ITA is intended to widen this:

> In subsection (7)—
> (a) the reference in para (b) to anything deriving from property, and
> (b) the reference in para (c) to other property,

> includes a thing,[90] or property, that does not belong to the individual but which the individual is enabled or entitled to benefit from by virtue of any interest, right or arrangement.

This is misconceived. Qualifying property will not belong to the individual because it has been given to the gift recipient, so it is not necessary to say that property includes property not belonging to the recipient. Here, as in s.809N(6), the drafter's desire to achieve the widest possible generality, and avoid any possible gaps in the legislation, has led to incoherence.

### 10.21.6 *Time of remittance*

Section 809L(6) ITA provides a rule which applies for conditions C and D:

> In a case where subsection (4)(a) or (b) or (5)(a) or (b) applies to the importation or use of property, the income or chargeable gains are taken to be remitted at the time the property or service is first enjoyed by a relevant person by virtue of that importation or use.

### 10.21.7 *HMRC examples*

Remittance condition C catches remittances channelled through a gift recipient, which are not caught by conditions A and B.

The RDR Manual provides a straightforward example where the facts (stripping out irrelevancies)[91] are:

---

90 The reference to a "*thing or* property" is meaningless. What non-property "thing" could there be?

91 The example in full (including its irrelevant detail) is as follows:

**33260 Gift recipients - qualifying property**

"*Example 1(a)*

In May 2015 Klimt, a remittance basis user, gives some of his foreign chargeable gains for that year to his sister Helena, a gift recipient.

In October 2016 Helena transfers half of this money to the UK and gives it to Klimt's wife.

The qualifying property here is the money that Klimt gifted to Helena. That qualifying property is used in the UK and is enjoyed by a relevant person (Klimt's wife). The use of the gift means there is a taxable remittance on Klimt.

> T gives money derived from chargeable gains to his sister G (a gift recipient).
> (a) G gives half of the money to T's wife W (a relevant person) in the UK.
> (b) G uses half of the money to buy a car which W uses in the UK.

Condition C is satisfied in case (a) and (b). Condition B would not be satisfied in case (b) because the car is not property of a relevant person. (Would Condition B be satisfied in case (a)? It depends on whether the money given to W can be said to derive from T's gains, which depends on the facts.[92] But since condition C is satisfied, that does not matter either way.)

The RDR Manual 35060 next provides a more challenging example. The facts (stripping out irrelevancies)[93] are:

> T gives RFI to his aunt G (a gift recipient) on terms that G will allow T's wife W to use a property in the UK owned by G, without charge. Several months later G grants a licence to W accordingly.

One analysis of these facts is that T and G have entered into a contract, under which G promises to allow W to use the land in consideration of T's payment (not properly called a "gift") of the RFI to G. In that case there

---

> *Example 1(b)*
> In May 2015 Klimt, a remittance basis user, gives some of his foreign chargeable gains for that year to his sister Helena, a gift recipient.
> In October 2016 Helena uses half of this money to buy a car in the UK which she makes available to Klimt's wife to use.
> The qualifying property here is the car, which derives from the money that Klimt gifted to Helena. That qualifying property is used in the UK and is enjoyed by a relevant person (Klimt's wife). The use of the gift means there is a taxable remittance on Klimt."

92 See 10.14.12 (Gift to third person).

93 The example in full (including its irrelevant detail) is as follows:

> Linda's husband's family has owned a holiday house in Scotland for many years. In February 2012 Adam, a remittance basis user transfers some of his foreign income and gains to his aunt, Linda, the gift recipient, which she uses to book herself on an around-the-world cruise. Adam gives the money to Linda on the agreement that Linda will provide his wife Clare, a keen painter, with access to the Scottish property.
> Several months later Linda provides Clare with an agreement saying that she can use the Scottish house, for which Clare pays nothing.

is a straightforward remittance under remittance conditions A and B. It is however assumed (though unstated and factually somewhat implausible) that the arrangement is an informal, non-binding, non-contractual one. In that case condition B is not satisfied.

The HMRC analysis is as follows:

> The house cannot be said to "derive from" the income or gains.

More analytically, condition B is not satisfied. But condition C is satisfied:

> The house is "other property" [ie within s.809N(7)(c)] used in the UK and enjoyed by a relevant person (W). As the operation which brought the house within Condition C was done with reference to the gift or to enable or facilitate the gift it is qualifying property and Condition C is met.
> There is a remittance and tax is chargeable on T. The amount of the remittance is determined by s809P(11)(c).

Suppose the order of transactions was reversed:

> (1) G grants a licence to W to use a property in the UK.
> (2) Later, T gives RFI to G.

Condition C is not satisfied at stage (1) since G is not at that point a gift recipient. At stage (2) G becomes a gift recipient but condition C does not become satisfied. However condition D would need consideration.

The last HMRC example is slightly contrived, in order to illustrate the debt remittance rule in application to remittance condition C. The facts (stripping out irrelevancies)[94] are:

---

94 The example in full (including its irrelevant detail) is as follows:

> "**33270 Condition C - remittances of relevant income or chargeable gains - relevant debt**
> Fraser, who is a remittance basis user, purchases some non-UK shares in January 2012, using his foreign income and gains. Fraser makes a gift of these shares to his brother, Victor, a fashion designer.
> In March 2012 Victor takes out a loan with an offshore bank to purchase a designer table and chairs. Victor brings these table and chairs to the London town house that he and his brother Fraser inherited jointly from their father, and where they both

T purchases non-UK shares using RFI.
T gives the shares to his brother G, a gift recipient.
G borrows to purchase furniture.
T uses the furniture in the UK.
G uses the shares to repay the loan.

The HMRC analysis is as follows:

> T has made a gift of property derived from his foreign income (the shares) to G, a gift recipient. The shares are thus qualifying property of a gift recipient.
> The loan taken out by G to purchase the furniture is a relevant debt because it relates to property (the furniture) brought to the UK for the benefit of a relevant person (T). T benefits because he uses the furniture.
> The qualifying property (the shares) of G (a gift recipient) is used outside the UK in respect of this relevant debt. There is a remittance under Condition C.

Suppose T gives RFI to T's adult son S (not a relevant person) and S uses it to buy the house in the UK in which T lives. This is not caught by remittance condition B. (The house is derived property, it derives from the RFI but it is not property of a relevant person.) So it can be caught by remittance condition C under s.809N(7)(a)(b).[95] The drafter was also concerned that:
(1) T makes a gift to G (say, an adult son);
(2) G makes a gift of other property to T.

This can be caught by s.809N(7)(c).

### *10.21.8 Becoming/ceasing to be a relevant person: condition C*

Section 809N ITA provides:

> (3) The question of whether or not a person is a relevant person is to be determined by reference to the time when a gift is made.

---

now live. Fraser regularly entertains clients and friends at the house.
Victor uses some of the shares and bonds to pay off the loan.

95 See 10.25 (Purchase of family home).

> (4) But, if a person to whom a gift is made subsequently becomes a relevant person, the person ceases to be a gift recipient.

Thus if a gift is made to a relevant person, condition C cannot apply even if they cease to be a relevant person[96] and so become a gift recipient.

If a gift is made to a non-relevant person, condition C ceases to apply if they become a relevant person. That makes sense because in such a case, remittance conditions A and B may apply.

### 10.21.9 *Transitional rules: pre-2008 income/gains*

It will be recalled that Para 86(4) Sch 7 FA 2008 provides:

> Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

I refer to this as **"the para 86(4) amendment"**. Amended as para 86(4) directs, condition C (set out in s.809L(4)) provides:

> (4) Condition C is that qualifying property of a gift recipient—
> (a) is brought to, or received or used in, the UK and is enjoyed by ~~a relevant person~~ *the individual*,
> (b) is consideration for a service that is enjoyed in the UK by ~~a relevant person~~ *the individual*, or
> (c) is used outside the UK(directly or indirectly) in respect of a relevant debt.

This is consistent with the transitional rule for remittance condition A and B. Since the para 86(4) amendment applies only for s.809L, para 87 Sch 7 FA 2008 has to make further amendments to s.809N:

> Section 809N of ITA 2007 (section 809L: gift recipients, qualifying property and enjoyment) has effect in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year as

96 See 10.19 (Becoming/ceasing to be a relevant person: conditions A & B); 10.22.3 (Becoming/ceasing to be a relevant person: condition D)

if—

(a) the reference in subsection (2) to a relevant person were to the individual,

(b) subsections (3) and (4) were omitted, and

(c) the references in subsection (9) to a relevant person, all relevant persons, or relevant persons were to the individual.

Amended as para 87 requires, s.809N(2) reads:

> (2) A "gift recipient" means a person, other than ~~a relevant person~~, the individual to whom the individual makes a gift of money or other property that—
>
> (a) is income or chargeable gains of the individual, or
>
> (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

The words "other than the individual" are meaningless because the individual cannot make a gift to himself. So s.809N(2) means:

> (2) A "gift recipient" means a person ... to whom the individual makes a gift of money or other property that—
>
> (a) is income or chargeable gains of the individual, or
>
> (b) derives (wholly or in part, and directly or indirectly) from income or chargeable gains of the individual.

Para 87 does not restrict the definition of "gift recipient": it *widens* it.

The para 87 deletions of 809N(3)(4) are straightforward amendments consequential on the para 87 amendment to s.809N(2).

The last para 87 amendment is also a straightforward consequential amendment. Amended as para 87 requires, s.809N(9) reads

> (9) Enjoyment by ~~a relevant person~~ the individual of property or a service is to be disregarded in any of these cases—
>
> (a) if the property or service is enjoyed virtually to the entire exclusion of ~~all relevant persons~~ the individual,
>
> (b) if full consideration in money or money's worth is given by ~~a relevant person~~ the individual for the enjoyment, or
>
> (c) the property or service is enjoyed by ~~relevant persons~~ the individual in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

The condition C rule for pre-2008 income/gains is not very different from that which applied under the pre-2008 law.

## 10.22 Remittance condition D (connected operation)

Section 809L(5) ITA provides:

> [1] Condition D is that property of a person other than a relevant person (apart from qualifying property of a gift recipient)—
> (a) is brought to, or received or used in, the UK, and is enjoyed by a relevant person,
> (b) is consideration for a service that is enjoyed in the UK by a relevant person, or
> (c) is used outside the UK (directly or indirectly) in respect of a relevant debt,
> [2] in circumstances where there is a connected operation.

We need some terminology to grapple with this, and in the following discussion:
**"The non-relevant person"** is "the person other than a relevant person."
**"The condition D enjoyment requirement**" is the requirement in s.809L(5)[1] (in short, that a relevant person enjoys the property of a non-relevant person in the UK).

The wording of the condition D enjoyment requirement is in large part the same as in remittance condition C.[97] The same enjoyment disregards apply.[98] The same timing rule applies. These aspects need not be considered again here.

The RDR Manual provides:

> **33430 Connected Operation - definition**
> The property that is brought to the UK, or used outside the UK as consideration for a service or in respect of a relevant debt must not be qualifying property of a gift recipient as this will fall within Condition C. However this restriction relates to the property not the individual, so the same person may be a gift recipient under Condition C and, in other transactions, "a person whose property is used" under Condition D.

97 See 10.21.1 (Enjoyment by a relevant person).
98 Section 809O(6) ITA exactly repeats s.809N(9); for a discussion, see 10.21.2 (Enjoyment disregards).

### 10.22.1 *"Qualifying disposition"*

The key terms in remittance condition D are "connected operation" and "qualifying disposition." Section 809O provides the definitions and other supplemental provisions for condition D.

Section 809O(1) ITA provides:

> This section applies for the purposes of determining whether or not income or chargeable gains of an individual are remitted to the UK by virtue of condition D in section 809L.

Section 809O(4) ITA defines "qualifying disposition":

> A "qualifying disposition" is a disposition that—
> (a) is made by a relevant person,
> (b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c) [ie made to/for the benefit of the condition D person], and
> (c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

Section 809O(5) provides an exception:

> (5) But a disposition of property is not a qualifying disposition if the disposition is, or is part of, the giving of full consideration in money or money's worth for the dealing that falls within section 809L(5)(a), (b) or (c).

I do not see the need for that, since if there is full consideration for "the dealing that falls within section 809L(5)(a), (b) or (c)" (in short, for the enjoyment by the relevant person) then the full consideration exemption applies.[99] But it does no harm.

### 10.22.2 *Connected operation*

Section 809O(3) ITA defines "connected operation":

99 See 10.21.2 (Enjoyment disregards).

> A “connected operation”, in relation to property dealt with as mentioned in section 809L(5)(a), (b) or (c), means an operation which is effected—
> (a) with reference to a qualifying disposition, or
> (b) with a view to enabling or facilitating a qualifying disposition.

Thus in order to have a connected operation, four requirements must be met:

(1) There must be a qualifying disposition.
(2) There must be an operation (but that is so wide it scarcely counts as a requirement).
(3) There must be a specified link between the operation and the qualifying disposition. (The operation must be effected with reference to/with a view to enabling/facilitating the qualifying disposition.)
(4) There must be a specified link between the operation and the non-transferor’s condition D property. The operation must be “in relation to property dealt with as mentioned in s.809L(5)(a)(b)(c)” ie it must relate to the condition D property.

The RDR Manual comments on requirement (3):

> **33430 Connected Operation - definition**
> It is important to note the words “with reference to” and “with a view to enabling or facilitating a qualifying disposition”. The nature of the link between the connected operation and the qualifying disposition, or even which comes first, is not specified. This means that a taxpayer cannot avoid a charge to tax by setting up complex structures to disguise foreign income or gains, or to try and “break the link” between something enjoyed in the UK and that income or those gains.

An example would be if T and X enter into an informal non-binding arrangement[100] under which:

(1) X provides a benefit to T in the UK (so the condition D enjoyment requirement is met).
(2) Subsequently, T gives RFI to X (the qualifying disposition).

The connected operation is the provision of the benefit by X.

100 If the arrangement is by way of binding contract (which is likely unless T and X are close relatives or friends) then remittance conditions A and B are satisfied as T’s obligation to X will be a relevant debt.

### 10.22.3 *Becoming/ceasing to be a relevant person: condition D*

Section 809O(2) ITA provides:

> For the purposes of section 809L(5), the question of whether or not the person whose property is dealt with as mentioned in para (a), (b) or (c) of section 809L(5) is a relevant person is to be determined by reference to the time when the property is so dealt with.

### 10.22.4 *HMRC examples*

The RDR Manual provides a subtle example where the facts (stripping out irrelevancies)[101] are:

> T wishes to use UK land owned by X.
> T uses RFI to purchase a yacht outside the UK.
> T transfers the yacht to a company owned by X, at an undervalue.
> X, with reference to the transfer of the yacht, allows T to use the land rent free.

One analysis of these facts is that T and X have entered into a contract, under which X leases or licenses the land to T in consideration of T's transfer of the yacht to the company. In that case there is a remittance under remittance conditions A and B on the basis that B receives an asset in the UK (a lease or licence) which is derived from B's RFI. It is however assumed (though unstated and factually somewhat implausible) that the arrangement is an informal, non-binding, non-contractual one. In that case condition B is not satisfied.

The HMRC analysis is as follows:

---

101 The example in full (including its irrelevant detail) is as follows:
"**35080 Condition D - remittances of foreign income or chargeable gains**
John personally owns a country estate in Cornwall, in an area of outstanding natural beauty. His friend Janet wishes to use the mansion for several important family functions.
Janet is a remittance basis user. She owns a foreign yacht which she bought using her foreign income and gains. On 2 March she disposes of the yacht to a nonresident company for £15,000. John has a controlling interest in that non-resident company.
In October, with reference to the transfer of the yacht, John allows Janet full and exclusive use of the estate, rent-free.

X is not a gift recipient (the yacht was given to his company, not to X). Condition C cannot therefore apply.

However condition D will apply:

[1] X is not a relevant person in relation to T.[102]
[2] There is a qualifying disposition because:
[a] There is a disposal of property (the yacht) which derived from T's income (ITA07/S809O(4)(c))
[b]The disposal was made by a relevant person (T) (ITA07/S809O(4)(a))
[c] The disposal was for the benefit of X (although the disposal was not made directly to X, he benefits from it through his ownership of the company) (ITA07/S809O(4)(b))
[3] X's property [the land] is enjoyed in the UK by a relevant person (T) (ITA07/S809L(5)(a) and ITA07/S809O(4)(b)).
In this example T's advantage is due to a connected operation[103] (ITA07/S809O(3)) and Condition D will be met. Some or all of the foreign income used by T to acquire the yacht will be remitted.

HMRC do not identify the operation, but I think it is X's licencing the land to T; this is indeed a connected operation.

Take the same facts but assume that X was a relevant person in relation to T. Condition D would not be satisfied and there would be no remittance.

Take the same facts in another order:

(1) T uses land owned by X rent-free for a period.
(2) After the end of that period, T transfers RFI to a company owned by X.

Condition D is not satisfied at stage (1) as there is no connected operation. There is no charge at stage (2): one could not say that X's property is enjoyed "in circumstances where there *is* [present tense] a connected operation." But if (as would normally be the case) there is a contract between X and T, there would be a remittance under conditions A and B.

102 The HMRC analysis adds that "the company is not a relevant person (as T is not a participator)" but it makes no difference whether or not the company is a relevant person (unless the company brings the yacht to the UK).
103 This wording is a loose paraphrase of the statutory language, but it does not matter.

## 10.22.5 *Transitional rules: pre-2008 income/gains*

It will be recalled that Para 86(4) Sch 7 FA 2008 provides:

> Subject to sub-paras (2) and (3), in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

I refer to this as **"the para 86(4) amendment"**. Amended as para 86(4) directs, condition D (set out in s.809L(5)) provides:

> Condition D is that property of a person other than ~~a relevant person~~ *the individual* (apart from qualifying property of a gift recipient)—
> (a) is brought to, or received or used in, the UK, and is enjoyed by ~~a relevant person~~ *the individual*,
> (b) is consideration for a service that is enjoyed in the UK by ~~a relevant person~~ *the individual*, or
> (c) is used outside the UK (directly or indirectly) in respect of a relevant debt,
> in circumstances where there is a connected operation.

This is consistent with the transitional rule for remittance condition A and B. Since the para 86(4) amendment applies only for s.809L, para 88 Sch 7 FA 2008 has to make further amendments to s.809O:

> Section 809O of ITA 2007 (section 809L: dealings where there is a connected operation) has effect in relation to an individual's income and chargeable gains for the tax year 2007-08 or any earlier tax year as if—
> (a) subsection (2) were omitted, and
> (b) the references in subsections (4) and (6) to a relevant person, all relevant persons, or relevant persons were to the individual.

Amended as para 88 requires, s.809O provides:

> (4) A "qualifying disposition" is a disposition that—
> (a) is made by ~~a relevant person~~ *the individual*,
> (b) is made to, or for the benefit of, the person whose property is dealt with as mentioned in section 809L(5)(a), (b) or (c), and

> (c) is a disposition of money or other property that is, or derives (wholly or in part, and directly or indirectly) from, income or chargeable gains of the individual.

The last para 88 amendment is also a straightforward consequential amendment. Amended as para 88 requires, s.809N(6) reads

> (6) Enjoyment by ~~a relevant person~~ *the individual* of property or a service is to be disregarded in any of these cases—
> (a) if the property or service is enjoyed virtually to the entire exclusion of ~~all relevant persons~~ *the individual,*
> (b) if full consideration in money or money's worth is given by ~~a relevant person~~ *the individual* for the enjoyment, or
> (c) the property or service is enjoyed by ~~relevant persons~~ *the individual* in the same way, and on the same terms, as it may be enjoyed by the general public or by a section of the general public.

## 10.23 Amount remitted

Section 809P(1) ITA provides:

> The amount of income or chargeable gains remitted to the UK is to be determined as follows.

Five rules then follow.

### 10.23.1 *Remittance of actual income or gains*

Section 809P(2) ITA provides:

> If the property, service or consideration[104] is the income or chargeable gains, the amount remitted is equal to the amount of the income or chargeable gains.

That seems sensible, indeed self-evident.

104 The words "property, service or consideration" relate back to the wording of condition B: property means property brought/received/used in the UK, service means a service provided in the UK, and consideration means consideration for a service provided in the UK.

### 10.23.2 *Remittance of derived property*

Section 809P(3) ITA provides:

> If the property, service or consideration derives from the income or chargeable gains, the amount remitted is equal to the amount of income or chargeable gains from which the property, service or consideration derives.

The RDR Manual provides:

> **35030 Conditions A & B - remittances derived from foreign income/gains**
> ... Where, as in most cases, the property, service or consideration derives from a foreign currency, the taxable amount is the pounds sterling equivalent value of the foreign currency (see RDRM31190 Exchange rates) used to acquire or pay for the property or service etc. This means that where an item of depreciating value (such as a car) is brought to the UK the amount that is liable to tax is not the current value of the car but the amount of foreign income or gains from which the car derives (example 4). For the same reason, where an item of appreciating value (perhaps a work of art) is brought to the UK, the taxable amount is the amount of foreign income or gains from which the property derived, and not its current market value (example 5).
> The same principle applies where an investment is made in shares or other such financial instruments, and those shares are in, or are otherwise brought, to the UK. The chargeable amount is the amount of foreign income or gains from which the shares derived...

The RDR Manual provides an example where the facts (stripping out irrelevancies)[105] are as follows:

---

105 The example in full (including its irrelevant detail) is as follows:
In example 1 above, Marianne, a remittance basis user, used £25,000 of her foreign chargeable gains to purchase a car. The car is regarded as derived from foreign income and gains.
Instead of bringing it straight to the UK, Marianne kept the car at her Italian villa for use on her visits to Italy. A few years later she then decides to bring the car to the UK for her and her daughter to use. At this time the approximate market resale value of the car is £14,000.

> **35030 Conditions A and B - remittances derived from foreign income or gains**
> *Example 4 (Marianne)*
> M, a remittance basis user, used £25,000 of her foreign chargeable gains to purchase a car. M kept the car outside the UK.
> A few years later M brings the car to the UK. The market resale value of the car is [implausibly] £14,000.

The HMRC analysis is as follows:

> The amount remitted is still £25,000, that being the amount equal to the chargeable gains from which the property – the car – derived.

The author has not addressed the interesting questions which arise if M sells the car abroad and remits the proceeds of sale or buys a new car.

Suppose:
(1) T invests £3m foreign income in an asset,
(2) T sells the asset at a loss and receives only £1m.
(3) T remits the £1m.
Under the pre-2008 remittance basis the amount remitted was £1m only. Is the amount remitted now £3m? The tax exceeds the amount remitted. I doubt if anyone will observe this in practice. Perhaps a purposive approach allows one to read in a requirement that the amount remitted cannot exceed the amount of the money remitted or (because of the loss) what is received in the UK is not derived from the gain.

Conversely suppose:
(1) T invests £3m foreign income in an asset,
(2) T sells the asset at a gain and receives £6m.[106]
(3) T remits £3m.
The amount remitted is only £1.5m, one half of the foreign income.

## 10.23.3 *Debt remittances*

Section 809P ITA provides:

106 For simplicity assume the gain on this disposal is not within the charge to CGT (eg the gain is not a chargeable gain or T was non-resident when the gain accrued).

> (4) If the income or chargeable gains are used as mentioned in section 809L(3)(c), [that is, used in respect of a relevant debt] the amount remitted is equal to the amount of income or chargeable gains used; but this is subject to subsection (10).
> (5) If anything deriving from the income or chargeable gains is used as mentioned in section 809L(3)(c), [that is, used in respect of a relevant debt] the amount remitted is equal to the amount of income or chargeable gains from which what is used derives; but this is subject to subsection (10).

This is the equivalent of s.809P(2)(3) for debt remittances, but here there is an apportionment rule. Section 809P(10) ITA provides:

> If the debt is only partly in respect of[107] the property or service, the amount remitted is (if it would otherwise be greater) limited to the amount the debt would be if it were wholly in respect of the property or service.

Suppose:
(1) T borrows £10m.
(2) T remits £1m of the borrowed sum to the UK.
The *entire* debt is a relevant debt. Suppose then T repays the entire borrowing out of income/gains. Only £1m is treated as remitted.

Suppose T only repaid £1m or £2m of the debt. There is still a remittance of £1m. This example illustrates a planning point: one should avoid debts which relate *partly* to property brought/received/used in the UK. Instead of the above, T should borrow so as to have two separate debts, one of £1m (remitted to the UK) and one of £9m (unremitted). Then the unremitted debt is *not* a relevant debt and can be repaid out of foreign income/gains.

The apportionment rule applies where a relevant debt is partly in respect of the property received in the UK. What if property is used partly in respect of a relevant debt?

The RDRM provides:

107 Section 809P(10) refers to a debt *in respect of* UK property but the definition of relevant debt is one which *relates to* UK property. It is considered that the expressions are synonymous.

**RDRM35040 Remittance Basis: Amounts remitted: Quantification: Conditions A and B - remittances in respect of relevant debt**

Where foreign income or gains are used outside of the UK in respect of a relevant debt RDRM33040 the chargeable amount is the amount of foreign income or gains so used (ITA07/s809P(4)) (example 1 and 2).

Similarly, if anything, for example an asset, which derived from foreign income or gains is used outside the UK to service a relevant debt then the amount of the remittance is the amount of the income or gains from which the asset used to service the debt was itself derived (ITA07/s809P(5)) (example 3 and 4).

Foreign income or gains may be used outside the UK to redeem or service a debt only part of which is a 'relevant debt' within the meaning of ITA07/s809L(7). In such cases, the amount that is taxable as an 'amount remitted' is, if it would otherwise be greater, limited to the amount that is attributable to that part of the debt which is a relevant debt (ITA07/s809P(10)) (example 5).

The taxable amount of foreign income or gain that is treated as having been remitted because of these provisions, taken together with any amounts that have been previously remitted (or treated as having been remitted), cannot be greater than the amount of the original foreign income and gains (ITA07/s809P(12)).

**Example 1**

In May 2011, Katrina, a remittance basis user, borrows £12,000 from an overseas bank to buy shares in a UK company. This is a relevant debt.

In tax year 2011-12 Katrina uses £4,600 of her relevant foreign income to pay the interest and to repay some of the amount borrowed. The chargeable amount is £4,600.

**Example 2**

On 6 April 2015, Gary, a remittance basis user, borrows money from an overseas bank to buy an apartment in Solihull. Payments are due on the first day of each month from May 2015 onwards. The first 12 payments are on an interest-only basis. Gary pays £1,000 interest each month to the overseas lender from his overseas account with the same bank, into which Gary ensures a sufficient amount of his relevant foreign earnings are paid directly to cover the repayments.

From 1 May 2016 the payments increase to a fixed amount of £2,500 each month as Gary starts to repay the capital amount of the loan as well as the interest. The payments continue to be met from the same account of relevant foreign earnings.

The loan is a relevant debt because it is respect of property (the apartment) which is used in the UK by a relevant person (Gary).

Gary has made taxable remittances in 2015-16 of £12,000, that being the relevant foreign earnings used to service the relevant debt. In 2016-17 Gary has made taxable remittances of £30,000, being the amount used to both service and repay the relevant debt.

**Example 3**

Ali, a remittance basis user, purchases some sculptures in Sweden in October 2012 for £80,000; he takes out an interest-free loan of £80,000 with his US bank to fund this purchase, repayable within 1 year.

In November 2012 he gives them to his wife as an anniversary gift. She initially keeps them at her mother's home in Stockholm, but 6 months later in March 2013 she decides to bring these sculptures to the UK to display in her UK garden.

In October 2013 Ali arranges with the US bank that he will repay the loan by giving them an oil painting which is currently in his apartment in Miami. Ali had purchased the painting in May 2011, using £50,000 of his relevant foreign earnings and £30,000 of capital inherited from an uncle. The relevant debt is serviced by the oil painting, which derives, in part, from Ali's relevant foreign earnings (refer to the earlier example). Ali has made a taxable remittance in 2013-14 of £50,000.

Note: For the purposes of this example assume there is no chargeable gain on the transfer of the painting to the bank.

**Example 4**

Francine, a remittance basis user, has a Spanish-style courtyard created at her house in Brighton. She takes out an unsecured loan of £40,000 from her French bank which she uses to pay the specialist Spanish contractor.

Francine has several French government bonds, which she purchased entirely from her relevant foreign income, and a German government bond which she acquired using her foreign chargeable gains. These bonds are each worth £10,000.

In September 2010 Francine gives the German bond to her bank as part repayment of the loan.

The relevant debt is serviced by the German bond which derives wholly from Francine's foreign chargeable gains, and is used outside the UK in respect of this relevant debt (refer to the earlier examples). Francine has made a taxable remittance in 2013-14 of £10,000.

**Example 5**

In August 2011 Karen, a remittance basis user, uses an interest-free £10,000 overdraft facility on her Jersey bank account to pay £8,000 of UK school fees for her 14 year old daughter Lauren. The remaining £2,000 of the facility is used to pay for Lauren to attend a summer school in France organised by a French university.

Karen repays the overdraft from her relevant foreign earnings between

August and November 2011.
Karen has made a taxable remittance in 2011-12 of £8,000 relevant foreign earnings, that being the part of the debt that is in respect of a service provided in the UK (refer to the earlier example) which is thus a 'relevant debt'.

10.23.4 *Use as security: amount remitted*

The RDR Manual provides:

> **35270 Remittances from mixed funds: Collateral[108] in respect of relevant debt**
> When foreign income and gains are used as collateral for a relevant debt they are used 'in respect of' the relevant debt, so there may be a taxable remittance at this point. See RDRM33170 Condition B - Collateral in respect of relevant debt.

In fact, the RDR Manual takes the view that circumstances where the grant of security is a taxable remittance will be "rare" and in the author's view, the grant of security is not taxable remittance at all, in the absence of some very special circumstances.[109] In the circumstances, it is not perhaps strictly necessary to consider the amount that is remitted on a grant of security, but the passage may still be of some interest as it shows a very loose view of when a property is partly used in respect of a relevant debt:

> The amount of the foreign income or gains that are used in respect of the debt will be restricted to the amount of the capital loaned, together with any accrued interest. See Chapter 5: Condition B – Collateral in respect of relevant debt.
> Often the collateral offered will be an asset which is itself a mixed fund. In these circumstances the mixed fund ordering rules at section 809Q(4) apply to the asset offered as security. In such a case, the taxable amount is made up of the same amounts of capital and foreign income and gains that were used to purchase the asset in the first place.
> The 'transfer' is the offering of the asset as collateral in respect of the relevant debt and any formal charge is registered to the lender (where

108 The author is using the word "collateral" as a synonym of "security" though that is (I think) American rather than English legal usage.
109 See 10.18.2 (Use as security for debt).

appropriate). The analysis is carried out on the date immediately before the collateral is so offered.

*Example 1 (John)*[110]

In 2014/15 J, a remittance basis user takes out a loan for £200,000 from a Guernsey bank. J uses the loan to purchase UK assets. The loan is a relevant debt.

J offers up, as security for this loan, a charge on his Guernsey farmhouse, which he purchased for £320,000 in 2010-11.

J has used his foreign income and gains as collateral, in respect of a relevant debt. If the use of the collateral creates a taxable remittance, the amount of the remittance is 'capped' at the amount of the debt, which is £200,000.

The farmhouse is derived from:

| | |
|---|---|
| Relevant Foreign Income | 2008-09 £60,000 |
| | 2009-10 £50,000 |
| Foreign chargeable gain | 2009-10 £120,000 |
| Clean capital | 2007-08 £40,000 |
| | 2008-09 £50,000 |

The mixed fund rules apply to determine the order of remittances. J will be regarded as remitting £50,000 RFI and £120,000 foreign chargeable gains from 2009-10, and £30,000 RFI from 2008-09.

*Example 2*

As per example 1, except that the farmhouse which J offers as collateral in respect of the relevant debt was purchased for £150,000 in 2010-11. It is now worth £250,000.

J has used his foreign income and gains as collateral, in respect of a relevant debt. If the use of the collateral creates a taxable remittance, the amount of the remittance is 'capped' at the amount of the debt, which is £200,000.

The farmhouse is derived from:

| | |
|---|---|
| Relevant Foreign Income | 2008-09 £60,000 |
| | 2009-11 £50,000 |
| Clean capital | 2007-08 £40,000 |

The mixed fund rules apply to determine the order of remittances; J will be regarded as remitting £110,000 RFI.

Any increase in the value of the farmhouse is ignored.

*Example 3 (Freda)*

F, a remittance basis user receives an interest-free loan[111] of £100,000.

110 I simplify and omit a few tiresome irrelevancies from this example.

111 The grant of an interest-free loan from a bank seems somewhat implausible.

> She uses the loan to purchase a plot of land in the UK, so the loan is a relevant debt. F gives, as collateral for the loan, a general right to the bank over her many current and savings accounts and investment portfolio held with them.
> Ignoring accrued interest, the 'cap' on the amount of collateral regarded as used in respect of the relevant debt is £100,000. The 'transfer' is the offering of the asset as collateral so an analysis of F's accounts over which the charge is granted would be needed to analyse the credits into each account immediately before the date of transfer, in order to determine the constituent parts of each account for s809Q(4) purposes.
> In these circumstances the terms and conditions surrounding the loan and the collateral offered should be examined carefully as this may prioritise the order of the accounts against which any 'collateral' charge will be taken; for example it may prioritise current or savings flexible accounts over high-interest period or notice accounts. The s809Q(4) analysis should reflect this priority.

### 10.23.5 *Cap on amount remitted*

Section 809P(12) ITA provides:

> If the amount remitted (taken together with any amount previously remitted) would otherwise exceed the amount of the income or chargeable gains, the amount remitted is limited to the amount which, when taken together with any amount previously remitted, is equal to the amount of the income or chargeable gains.

How could the amount remitted exceed the amount of the income or the gains? One case is a deemed gain on a disposal for less than full consideration.

Another case is if income is remitted (the remittance conditions are met) and then the remittance conditions are met again, in relation to the same income or gains. There are many ways that this could happen, but one case concerns re-remittances. Suppose:

(1) Year 1: T (an individual taxable on the remittance basis) receives foreign income. The income is remitted ("the first remittance") and so subject to tax.
(2) Year 2: The income is transferred out of the UK and remitted again ("the re-remittance").

FAQ Remittances (April 2008) provides a straightforward example:

> If an asset is purchased by a non-domiciled individual out of untaxed foreign income abroad after 6 April 2008 and then remitted to the UK, and tax is paid on that remittance under the new legislation, but that asset is subsequently taken out of the UK by the same person and then remitted again, is there a second tax charge on the second remittance?
> Once a taxable remittance has arisen, the amount taxed in the UK will not be taxed again if the asset is subsequently removed from the UK and then brought back.

Similarly, the RDR Manual provides:

> **35030 Remittance Basis: Amounts remitted: Quantification: Conditions A & B - remittances derived from foreign income/gains**
> ...When taken together with any amounts that have been previously remitted (or treated as having been remitted), the taxable amount of income or gain that is treated as having been remitted because of these provisions cannot be greater than the amount of the original foreign income and gains (ITA07/s809P(12)). Where property is brought to or used in the UK by or for the benefit of a relevant person the amount that is liable to tax is the amount of the underlying foreign income or gains from which the property derives (whether directly or indirectly). The taxable remittance will only occur once; this will usually be the time the asset is first brought to, received by or used in the UK by a relevant person.

This is obviously right. But the same would apply if the income were not taxed on the first remittance, eg a remittance before 2008 of source-ceased income or of property enjoyed in specie. The same would apply to cash. HMRC agree. December 2008 Qs & As provides:

> **Q9** If a taxpayer undertook a source ceasing exercise during the 2006-07 tax year and then remitted the proceeds before the 2008-09 tax year, if those funds were to then be taken back outside of the UK and re-imported, would this constitute a remittance. In other words, would the earlier source ceasing exercise be looked through despite its timing? It is understood that interest/profit from any new investment would be a remittance.
> **A** If the source ceased in 2006-07 and was remitted in 2007-08, then this did not count as a remittance and it will not count as a remittance if it is exported and subsequently re-imported.

HMRC do not cite a statutory authority to justify their answer: s.809P(12) ITA would do so, though there are others as well.[112]

### 10.23.6 *Condition C and D cases*

Section 809P ITA provides:

> (6) In a case falling within section 809L(4)(a) or (b), the amount remitted is equal to the amount of the relevant income or chargeable gains.
> (7) In a case falling within section 809L(4)(c), the amount remitted is equal to the amount of the relevant income or chargeable gains; but this is subject to subsection (10).
> (8) In a case falling within section 809L(5)(a) or (b), the amount remitted is equal to the amount of the income or chargeable gains referred to in section 809O(4)(c).
> (9) In a case falling within section 809L(5)(c), the amount remitted is equal to the amount of the income or chargeable gains referred to in section 809O(4)(c); but this is subject to subsection (10).
> ...
> (11) In subsections (6) and (7) "relevant income or chargeable gains" means—
> (a) if the qualifying property falls within section 809N(7)(a), the income or gains—
> (i) of which the qualifying property consists, or
> (ii) from which the qualifying property derives;
> (b) if the qualifying property falls within section 809N(7)(b), the income or gains—
> (i) of which the property given to the gift recipient consisted, or
> (ii) from which that property derived;
> (c) if the qualifying property falls within section 809N(7)(c), the income or gains—
> (i) of which the property given to the gift recipient consists, or
> (ii) from which that property derives.

The RDR Manual offers seven examples but the matter does not seem important enough to be setting out here.

---

112 Para 86(2) Sch 7 FA 2008 would also provide relief here: see 10.42 (Transitional rules).

## 10.24 CGT disposal not for market value

### 10.24.1 *The CGT background*

In certain circumstances the consideration for a disposal is deemed to be market value consideration, not the actual consideration (if any).[113] In these cases a gain is deemed to accrue which is not a real gain (in the sense that the individual does not receive a sum which is or is derived from the gain). This is referred to as **"a deemed gain"**.

The most common case of a deemed gain is a gift: in economic reality a gift cannot give rise to a gain and normally gives rise to a loss. However, for CGT purposes a gift is treated as made for market value.

### 10.24.2 *Deemed gains and the remittance basis from 22 April 2009*

In the absence of express provision the deemed gain arising on the gift could not be remitted, because it does not exist (in the sense that the individual does not receive a sum from the disposal which is or is derived from the gain). Accordingly, s.809T ITA provides:

> (1) This section applies if—
> (a) foreign chargeable gains accrue to an individual on the disposal of an asset, and
> (b) the individual does not receive consideration[114] for the disposal of an amount at least equal to the market value[115] of the asset.
> (2) For the purposes of this Chapter, treat the asset as deriving from the chargeable gains.

---

113 Section 17(1) TCGA sets out seven sets of circumstances when a disposal is treated as made for market value. (The section also deems certain acquisitions to be for market value, but we are not concerned with that here.)
In certain circumstances a gain is deemed to accrue to an individual even though there is no disposal, but s.809T does not apply to that.

114 "Consideration" here obviously means actual consideration, as opposed to market value which is (usually) deemed to be given by s.17(1) TCGA. (Though normally in the legislation the drafter states this expressly; eg s.165(7) TCGA.)

115 Para 171 Sch 7 FA 2008 defines "market value" for the purposes of Part 2 of Schedule 7 ("For the purposes of this Part of this Schedule, the market value of any asset is its market value for the purposes of TCGA 1992"). Accordingly market value here is not defined. But in practice difficulty will not usually arise.

It is not expressly stated that s.809T only applies on a disposal made by an individual, but this is implied. Eg on a disposal by non-resident close company, s.13 deemed gains may accrue to an individual who is a participator, and the individual does not receive the consideration for the disposal, but s.809T does not apply. Otherwise provisions such as s.14A(3)(a) TCGA would be unnecessary.

10.24.3 *Gift of asset*

Suppose:
(1) T (a remittance basis taxpayer) gives an asset (foreign situate) to a trust. A gain is deemed to accrue on the disposal as if the asset were sold for market value. (Assume the asset has risen in value and a gain accrues.)
(2) T (or a relevant person) receives the asset in the UK.

The deemed gain is remitted. This reverses the rule for the pre-2008 CGT remittance basis.

The RDR Manual gives an example:

> **31180. Foreign chargeable gains accruing on disposal made otherwise than for full consideration**
> Example 2 (Ahmeda)
> A transfers his property in Dubai to a trust receiving no consideration in return. The deemed gain computed using the market value of the property at date of transfer is £400,000. The trustees subsequently sell the property for £550,000. The trustees then make a capital payment of £300,000 to a UK close company in which A's spouse is a participator.
> £300,000 of Ahmeda's foreign chargeable gain has been remitted to the UK. This is because the property is treated as deriving from his gain (Section 809T ITA 2007) and the proceeds from the sale of the property therefore also derive from the gain. The company is a relevant person (Section 809M(2)(f) ITA 2007) and property (that is, money) which derives from Ahmeda's gain has therefore been received in the UK by or for the benefit of a relevant person (Section 809L ITA 2007).
> The gain which accrues to the trust on the actual sale of the property will be subject to normal rules.

10.24.4 *Sale of asset*

Suppose T sells an asset to a trust for £100. (Assume T is connected with the trustees.)

If the market value is equal to the purchase price (£100) then s.809T does not apply. It does not matter that the sale is to a connected person. The purchase price is or (better) is derived from the gain, but the asset itself is not (and is not derived from) the gain. So it does not matter if the asset is remitted.

Suppose T sells an asset and the purchase price is left outstanding as a loan. It is considered that T "receives" the consideration, for the benefit of the loan is the consideration.

Suppose a sale at an undervalue (the market value is more than the purchase price). In this case

(1) the asset is deemed to be derived from the gain; *and*
(2) the purchase price is (or is derived from) the gain.

This rule applies to all sales at less than market value, even if accidental.

This rule applies if the sale is less than market value even if it is 99% of the market value.

It is not necessary to have a disposal between connected persons, though in practice s.809T is not likely to apply to a disposal between unconnected persons.

Suppose:

(1) the asset is worth £200 and has a base cost of £50.
(2) the asset is sold for £100 giving rise to a deemed gain of £150.

If the £100 sale proceeds is received in the UK it is suggested that half – £75 – of the gain should be regarded as remitted. If the asset is also received in the UK by a connected person, then there is a remittance of the entire gain. However the cap on the amount remitted avoids double taxation.[116]

If the asset is sold for base cost, £50, it is suggested that the £50 is not derived from the deemed gain, so the £50 sale proceeds could be remitted tax free. But other views are possible.

### 10.24.5 *Transitional rules: pre-2008 gains*

Subject to immaterial exceptions, para 81 Sch 7 FA 2008 provides:

> The other amendments made by this Part of this Schedule have effect for

116 See 10.23.5 (Cap on amount remitted).

the tax year 2008-09 and subsequent tax years.

A deemed gain accrued to an individual on gifts made before 2008/9: it was just not remittable. At first sight this does not help. It is accepted that the ITA remittance basis rules govern pre-2008 income/gains. So after 2008/9 s.809T applies and the gain becomes remittable, though it qualifies for RP relief. It does not matter when (after 1965) the gain arose: gains from disposals made in the 1960s could now come into charge, though all records will have been long discarded. But HMRC do not take that view. FAQ: Residence and Domicile – NR Trusts provides:

> **Will a deemed chargeable gain that arose when I gifted foreign assets to the trustees of a non UK resident settlement before 6 April 2008 become taxable if the trustees remit the property to the UK on or after 6 April 2008?**
> No, a deemed chargeable gain accruing on the gift of property to a non resident trust before 6 April 2008 will not become chargeable if the trustees remit the property or anything derived from it to the UK on or after 6 April 2008.
> However where there was no real alienation of the income or gains by the individual, as for example in the case of *Harmel v Wright*, because the settlor retained effective control over them, then the position after 5 April has not changed. In such a case the income or gains could be taxed on the settlor.[117]

---

117 The point is confirmed in the Public Bill Committee Debate 19 June 2008. Hansard col 834 and 840:
"**Mr. Hoban:** the new section 809R [now s.809T] set out in schedule 7 creates some uncertainty in the minds of advisers as to meaning. The optimistic, preferred best interpretation is that new section 809R does not apply in relation to gains that arose prior to 6 April 2008, It is understood that that is also the view of HMRC. Accordingly, the old legislation states that, provided that there was a genuine gift, there would be no tax liability on the gain that arose when the gift was made. while it has been helpful for HMRC to have made its view known, doubt and concern still remain.
The potential sums will often be significant, and it is likely that inadequate records will have been kept to establish the position since, at the time, the law was clear that there could never be a tax charge as a result of the gift,. Accordingly, taxpayers who made gifts of foreign assets offshore prior to 6 April 2008 will be concerned by the split in opinion; some suggest that new section 809R could exist retrospectively. Taxpayers who made absolute unfettered gifts of foreign assets offshore prior to 6 April 2008 had a legitimate expectation that the gain deemed to have been realised

It seems to me that *Harmel v Wright* 49 TC 149 has nothing to do with the case; though of course a trust could be disregarded under the sham doctrine.

The RDR Manual provides:

> **31180 Foreign chargeable gains accruing on disposal made otherwise than for full consideration**
> The new rule at Section 809T ITA 2007 applies to disposals by remittance basis users on or after 6 April 2008.

## 10.25 Purchase of family home

Suppose:
(1) T gives RFI to T's son S, not a relevant person.
(2) S buys the freehold interest of a house and uses the RFI to pay the purchase price.

The topic raises many remittance issues, discussed throughout this chapter, so it is convenient to draw them together.

### 10.25.1 *Rent-free occupation*

Suppose S allows T to occupy the house rent-free. It is considered that S "uses" the house (the word "use" is wide enough to cover this even though it would be more normal and better legal English to say S occupies or enjoys the use of the house). Accordingly remittance condition A is satisfied. The house is derived from the RFI, but condition B is not satisfied because the property is not property of a relevant person.

Remittance condition C is satisfied, since the property is qualifying property of a gift recipient, and is used and enjoyed by a relevant person. So the purchase price RFI is remitted.

---

on the making of the gift would never come into charge. The new legislation should be clear, which is why amendment No. 375 seeks to insert:

> 'This section shall not have effect with respect to gains accruing to an individual on the disposal of an asset if the disposal took place prior to 6 April 2008.'

**Jane Kennedy (Financial Secretary to the Treasury):** On the very specific point about unfettered gifts of foreign assets offshore, HMRC made its view very clear in a frequently asked question some time ago. In simple terms, it is only when such gifts were made after 6 April 2008 that they would be taxed."

10.25.2 *Lease granted for full consideration*

Now suppose:

(1) T gives RFI to T's son S, who uses it to buy the freehold interest of a house.

(2) S grants a lease of the property to T for full consideration and T occupies the property. S retains the freehold reversion.

One must ask various questions here.

First, does T use the lease? The answer is that T does "use" the lease (see above). So remittance condition A is satisfied in relation to the lease. However the lease is not derived from the RFI. So condition B is not satisfied. Of course funds T uses to pay for the lease are regarded as remitted.

Next, does T use the reversion? If so condition A is satisfied in relation to the reversion. However that may be, the reversion is not property of a relevant person so condition B is not satisfied.

Conditions C and D are excluded (even if they could otherwise apply) since the full consideration exemption applies.

10.25.3 *Lease granted for less than full consideration*

Now suppose:

(1) T gives RFI to T's son S, not a relevant person, who uses it to buy the freehold interest of a house.

(2) S grants a lease of the property to T for no consideration or for less than full consideration, and T occupies the property. S retains the freehold reversion.

One must ask various questions here.

First, does T use the lease? The answer is that T does "use" the lease (see above) So remittance condition A is satisfied in relation to the lease. If the transactions are part of an arrangement, the lease is derived from the RFI. So condition B is satisfied (as the lease is property of a relevant person). What is the amount remitted? It is the amount from which the lease is derived. It is suggested that that is not the full amount used to pay for the property, but only a part reflecting the value of the lease.

Next, does T use the reversion? If so condition A is satisfied in relation to the reversion. However that may be, the reversion is not the property of a relevant person so condition B is not satisfied.

Turning to remittance condition C, does T enjoy the lease for the purposes of remittance condition C? T does. At first sight this does not matter as the lease is not qualifying property of a gift recipient (it is not property of a gift recipient). The lease may (depending on the facts) however be qualifying property within s.809N(7)(c). If so the amount remitted is all the RFI (not the value of the lease).

Next, does T use and enjoy the reversion? It is considered that T does, since the lease T enjoys is derived from the reversion, and the lease is the mechanism by which T enjoys the reversion. If that is right, then condition C is satisfied, since the reversion is qualifying property of a gift recipient.

#### 10.25.4 *Another analysis*

Another analysis is that the "property" is the physical house, not the legal interests in the property, but one should not disregard the most basic principles of the law of real property in construing a taxing statute, if any other approach is possible.

## 10.26 Payment of school fees

Suppose T wishes to pay the school fees of minor grandchildren. Assume the grandchildren are at school in the UK (otherwise there is no problem). A direct payment out of RFI is a remittance as conditions A and B are satisfied.

Suppose T gives funds to T's child (not a relevant person) and the child uses the funds to pay the fees. This is still a remittance as conditions A and B are still satisfied: the funds in the hands of the child are derived from the RFI.

Suppose there is an informal arrangement under which:

(1) T gives funds to T's child;

(2) the child will use *other* funds to pay the school fees.

This is caught by condition C because the funds used to pay the fees are "qualifying property" within s.809N(7)(c). That is, it is used to pay the school fees by virtue of an operation which is effected "with reference to the gift of the property to the gift recipient".

T must therefore make an unconditional gift to T's child ie a gift such that the payment of the school fees is not with reference to that gift; in that case (assuming the fees are not paid out of the gifted property) there is no remittance.

## 10.27 Remittance before income or gains arise

Section 809U ITA provides:

> **809U Deemed income or gains not to be regarded as remitted before time when they are treated as arising or accruing**
> Where—
> (a) income or foreign chargeable gains are treated as arising or accruing, and
> (b) by virtue of anything done in relation to anything regarded as deriving from the income or chargeable gains, the income or chargeable gains would otherwise be regarded as remitted to the UK before the time when they are treated as arising or accruing,
> treat the income or chargeable gains as remitted to the UK at that time.

EN Remittance Basis Amendments 482 to 493 states:

> Under the original wording such payments might in certain circumstances become chargeable before the tax year in which the income or gain is treated as arising. The amendment ensures that cannot happen.

This can apply so s.87 deemed gains[118] to s.731 deemed income, where a benefit is received in a year before the income accrues. It can also apply under the accrued income scheme.

## 10.28 Relief for payment of remittance basis charge

Section 809V ITA provides:

> (1) Money that is brought to the UK by way of one or more direct payments to the Commissioners [HMRC] is to be treated as not remitted to the UK—
> (a) if the payments are made in relation to a tax year to which

118 See 45.15 (Section 87 remittance basis).

section 809H applies, and

(b) if, or to the extent that, the payments do not exceed £30,000.

(2) Subsection (1) does not apply to a payment if, or to the extent that, it is repaid by the Commissioners.

The RDR Manual provides:

**34020. Remittance Basis charge - money paid directly to HMRC** [July 2010]
Money brought into the UK to pay the remittance basis charge (RBC) RDRM32210 is treated as not remitted to the UK if direct payment is made to HMRC (Section 809V(1) ITA 2007).
This exemption will only apply if the money is paid:

- in respect of the tax due for the year in which the remittance basis has been claimed, and
- the remittance basis charge is due for that tax year.

Only remittances that relate to the remittance basis charge are covered by the exemption. Remittances of foreign income or gains to pay any other liability to UK tax, including for example income tax or capital gains tax on remitted amounts, are themselves chargeable to UK tax as remitted income or gains of the tax year in which the tax is paid to HMRC (although also refer to remittances of nominated income) RDRM35140.
The remittance basis charge can be paid in one or more amounts. However, the amount that benefits from the exemption provided at Section 809V is limited to the amount of the charge, that is £30,000. The £30,000 can be paid in one lump sum or in several stages, and may form part of the payments on account paid on 31 January or 31 July, or may be paid as a balancing payment. The exemption applies as long as the payment is in relation to the tax year in which the remittance basis charge is due.
The exemption only applies where the remittance basis charge is paid directly from foreign income or gains held outside the UK, the payment must be made direct to HMRC. This can be done either by:

- cheque (drawn on a foreign bank account)
- electronic transfer of funds.

Taxpayers will need to keep sufficient records to show that payment of the £30,000 RBC was made directly to HMRC from an overseas account. A copy of a cheque (or cheques) drawn on the foreign bank account, or the relevant bank statement identifying the bank transfer are examples of acceptable evidence.
The £30,000 remittance basis charge may be paid directly from outside the UK to HMRC by a person other than the individual; the most common example will be a payment by an employer on behalf of an employee. In such cases the £30,000 paid to HMRC may form part of the taxpayer's income, for example if paid by his employer the £30,000 will form part of the employee's earnings. To the extent that these are regarded as foreign chargeable earnings this exemption will apply.
***Example 1*** (Olaf)

O uses the remittance basis in 2008/09 and 2009/10 and 2010/11; but in 2011/12 O chooses not to use the remittance basis.
In 2011/12 O makes payment of £30,000 direct to HMRC from his foreign income that arose during 2009/10. This payment is to pay the remittance basis charge of his sister Giselle, who is a long term resident of the UK and who has made a claim to the remittance basis in 2011/12.
The £30,000 remitted by O may be treated as not remitted to the UK under Section 809V ITA 2007 and so is not chargeable to tax provided that the payments made for a particular year do not exceed £30,000.
The position should be looked at critically if there is evidence of any reciprocity. In the case of doubt or difficulty submit to PTI Advisory Foreign Income and Remittance Basis Team.
***Example 2*** (Alex)
A is a long-term UK resident remittance basis user. He uses the remittance basis in 2008-09 and plans to use it in 2009-10 also. A therefore makes payments on account RDRM32390 of £100,000 on 31 January 2009 and on 31 July 2009 in respect of his 2009-10 liability.
In July 2009 he pays £40,000 of that payment on account from his 2008-09 foreign income. Payment is made by cheque drawn on an account at a bank in the Isle of Man that was sent direct to HMRC.
A's tax liability for 2009-10 is £200,000 including the remittance basis charge of £30,000, which has been wholly met from the payments on account that he has made. No further tax is due for this year.
Because £40,000 of the tax that A has paid on account was paid directly to HMRC from an overseas account, £30,000 of the £40,000 income remitted may be treated as not remitted to the UK and is not chargeable to tax, unless A has instructed otherwise. The remaining £10,000 will be taxed as a remittance in the normal way. As it was remitted in July 2009 it will be a taxable remittance for the tax year 2009-10, and should be declared as such.
In this example, all of the £40,000 was remitted in July. However the remittances might be split between the payment on account dates, for example £20,000 remitted on 31 January 2009 and a further £20,000 on 31 July 2009. In such cases, unless the taxpayer specifies otherwise, the £10,000 that is not subject to the exemption and so is a taxable remittance will be treated as having occurred at the later date, as this will usually be in the taxpayer's favour.
Refer to RDRM34030 for example of where the 'remittance basis charge' is repaid to A, or otherwise no longer applies.
**Note:** Taxpayers may choose to specify that a payment made is in respect of the remittance basis charge at time of payment. However they are not obliged to do so and it is not necessary as long as payments received can be clearly related to a tax year for which the remittance basis charge is due.
***Nominated Income or gains***
If taxpayers use nominated income or gains to pay the remittance basis charge of £30,000 it is treated as not remitted to the UK under section 809V. Because none of the individual's nominated income or gains is treated as having been remitted to the UK in that tax year you do not have to apply the 'ordering rules' at

ITAs809I and Section 809J. Refer to RDRM35100 Remittances of nominated income or gains.
lf the £30,000 is repaid by HMRC it is treated as remitted at that point (refer to RDRM34030) and section 809I will be triggered.
**34030. Remittance Basis charge - repayment by HMRC** [July 2010]
There may be some exceptional circumstances where the £30,000 remittance basis charge is paid to HMRC but then is later repaid, or is otherwise no longer due.
Any foreign income or gains remitted to pay the charge and initially covered by the exemption at Section 809V ITA 2007 will be regarded as a remittance when the charge is withdrawn and/or the repayment is made and so will be treated as liable to UK tax at that point (Section 809V(2) ITA 2007).
***Change of claim***
The £30,000 remittance basis charge is most likely to be repaid where an individual, having made a claim for the remittance basis and paid the charge for that year, subsequently decides not to claim the remittance basis for that year and makes an amendment to their Self Assessment return (TMA1970/Section 9ZA). In such circumstances Section 809H ITA 2007 will not apply for that tax year, so the exemption cannot apply either.
***Change of status***
The other situation where the £30,000 is likely to be repaid or not otherwise due is where it later transpires that an individual has claimed the remittance basis for a tax year but was not entitled to do so as they were UK domiciled and UK ordinarily resident in that year.
***Effect***
If the exemption under section 809V was claimed then the foreign income or gains used to pay the remittance basis charge will not have been subject to tax in the year in which they arose/accrued because the individual used the remittance basis in that year. Due to the exemption the income or gains will also not have been subject to tax when brought into the UK. In such situations there are two possibilities:
• the £30,000 payment was made from foreign income or gains from an earlier year in which the individual was entitled to claim the remittance basis and did so. The £30,000 is treated as a taxable remittance and will be taxable in the in which the remittance occurred
• the £30,000 payment was made from foreign income or gains from the present year or an earlier year in which the individual was not entitled to claim the remittance basis. In which case the income or gains will be taxed on the arising basis for the year in which the foreign income or gains actually arose. If the return cannot be amended you may need to deal with such assessments under the 'discovery provisions' at Section 29 TMA 1970.
***Example 1*** (Alex)
In the earlier example above, A's circumstances change and he decides not to claim to be taxed on the remittance basis for 2009-10. His liability for 2009-10 is £195,000.
When A made the payment on account of £40,000 in July 2009 he anticipated

> that £30,000 of it would be attributed to the remittance basis charge. In the event he did not claim to be taxed on the remittance basis. He does not have to pay the remittance basis charge.
> None of the payments on account can therefore be attributed to the remittance basis charge and the £40,000 that A paid from his 2008-09 foreign income (remember that A did use the remittance basis in 2008-09) in July 2009 is a taxable remittance.
> Any cases of difficulty should be referred to. CAR, PTI Advisory, Foreign Income and Remittance Basis Team.

## 10.29 Foreign services relief

Section 809W ITA provides a relief which I call "**foreign services relief**". Section 809W(1) provides:

> This section applies to income or chargeable gains if—
> (a) the income or gains would (but for subsection (2)) be regarded as remitted to the UK because conditions A and B in section 809L are met,
> (b) condition A in section 809L [remittance condition A] is met because a service is provided in the UK ("the relevant UK service"), and
> (c) condition B in section 809L [remittance condition B] is met because section 809L(3)(a) or (b) applies to the consideration for the relevant UK service ("the relevant consideration").

I refer to these conditions as "**services relief conditions A and B**" to distinguish them from the myriad other conditions in ITA.

Section 809W(2) ITA provides the relief:

> The income or chargeable gains are to be treated as not remitted to the UK if the following conditions are met but this is subject to subsection (5).

There is no relief in relation to remittance conditions C or D but in practice these will not often apply. More importantly, there is no relief if s.809L(3)(c) or (d) apply, which deal with debt remittances. Thus if T borrows, uses the borrowed money to pay for foreign services and repays the borrowing, there is a remittance under the debt remittance rules even though a direct payment for the services would be exempt. This is anomalous. The reason might be the difficulty of applying services condition B to a relevant debt case; if so it is not a good reason as services condition B is itself misconceived.

### 10.29.1 *Services relief condition A: Relating to property situated outside UK*

Section 809W(3) ITA provides:

> Condition A is that the relevant UK service relates wholly or mainly to property situated outside the UK.

One needs to identify:
(1) the service
(2) the property (if any) to which the service relates
(3) the situs of the property
(4) if the service relates to property in and outside the UK, whether the property is "mainly" outside the UK

Unless the service is provided in the UK there is no need for foreign property services relief.[119] In the following discussion it is assumed that the service is provided in the UK.

Situs is relatively straightforward. Section 809W(6) ITA incorporates the CGT situs rules.[120] The other requirements can be more difficult.

EN Clause 23 Sch 7 Remittance Basis Amendment 354 provides some obvious examples:

> 7. Condition A would cover for example, fees paid to a UK bank for managing an individual's overseas investment portfolio. It would cover legal or brokerage fees in respect of offshore assets, such as the legal fees on the sale of a foreign house....

This is considering fees paid by the individual, but the same applies to fees paid by a relevant person, such as a settlor-interested trust:

> 13. Among the sort of payments that Condition A might cover would be fees paid by non-UK resident trustees to UK advisers for advice on

119 See 10.11.13 (Service provided in the UK).

120 Section 809W(6) ITA provides: "sections 275 to 275C of TCGA 1992 (location of assets) apply for the purposes of subsection (3) as they apply for the purposes of TCGA 1992." See 71.1 (Situs of assets for CGT).

[1] managing the assets held in the trust or
[2] non-UK assets the trustees are considering purchasing.
Accountancy fees for preparing non-UK tax returns would also be covered providing the majority of the accountancy services relates to non UK property.

The RDR Manual provides:

**34060 - Remittance Basis: Exemptions: Relevant services provided in the UK - location of overseas property**
In applying these rules it is important to determine exactly what the service relates to, not just to whom it is provided.
For example, services may be said to be provided for non-resident trustees (a relevant person) RDRM33030 in respect of shares that the trust owns in a non-resident company (that would, if it were UK resident, be a 'close' company').[121] However if the service actually relates to that company's underlying UK assets then the service does not relate to property 'outside the UK'.
On the other hand, if the service is in connection with legal obligations between the trustees and the non-resident company in respect of, say the shares that are held, for example updating the share register in the local territory, then this is a service relating to property (the company/shares) wholly situated outside of the UK.
*Example 1 (Petra)*
P, a remittance basis user, is a participator in a Jersey company that would, if it were in the UK, be a close company. The company is a relevant person RDRM33030.[122] The company owns a portfolio of UK real estate. UK-based advisors produce an investment and tax report in respect of the company's UK activities; the advisors fees are paid overseas using P's foreign income.

The example is factually far-fetched since one would normally expect the company to pay for advice supplied to the company, and then there would

121 The author is confused, here and in the examples which follow, in that whether or not the company is a close company is not relevant; though in the kind of case under consideration the company is likely to be a trust holding company and so would be "close". (In this section I use the expression "close" company loosely, to include a non-resident close company, ie one which would be close if UK resident.)

122 The facts that the company is close, and a relevant person, are irrelevant; see above footnote.

in principle be no taxable remittance. Assuming (as the example requires) P did pay for advice supplied to P, then the HMRC analysis is as follows:

> The relevant UK service is the provision of advice in a tax report which relates to the Jersey company's UK activities. It is the UK activities which are the subject of the advice, not the overseas company so the exemption cannot apply. We look through to what the work relates to.

The HMRC analysis is wrong. The advice relates to property, not activities, but it is UK property and so HMRC are correct to conclude that the exemption does not apply. The moral for tax planning is that P should use foreign advisors.

> *Example 1(a)*
> The Jersey company in example 1 above also has a French property, which makes up only 10% of its business.
> UK-based advisors produce a separate marketing report in respect of this property. The advisors fees are paid overseas using P's foreign income.
> The service provided in the UK - in this case the preparation of the report - relates to a non-UK property. So the exemption at ITA07/s809W would apply, assuming the other conditions are also met.

This is straightforward.

> **RDRM34040 - Remittance Basis: Exemptions: Relevant services provided in the UK**
> ...
> *Example 6 (Micho)*
> M, a remittance basis user, employs UK-based agents to prepare his US tax return. He uses his foreign income to pay for this service, paying directly into the agent's offshore bank account. This is a service provided in the UK.
> Advice on the completion of a non-UK tax return would generally be within the exemption providing the majority of the advice relates to non-UK property; for example:
> 1. M's major source of income is UK salary and other UK employment benefits, and most of the work relates to this.
> This is service work relating to non-asset related income, eg employment income, so whether UK employment or not there is no property so the exemption at s809W cannot apply.

The HMRC analysis is wrong as an employment contract is property.[123] However the UK contract of employment is likely to be subject to UK law, and so UK situate, and so the conclusion that the services exemption does not apply is correct. The moral, again, is that M should use foreign advisors. The Manual continues:

> 2. Most of the work undertaken is in respect of his UK sources of income and gains, albeit these are small compared to his world wide income and gains.
> The service relates to investment income/gains from UK sources so it is outside the exemption.

The HMRC analysis is not strictly correct as the issue is CGT situs, not source, but in practice the two are normally the same.

> 3. Most of the work undertaken is in respect of advice relating to investment income/gains from non-UK sources.
> The service provided relates to investment income/gains from non-UK sources, so it is within the exemption if all other conditions are met.

Perhaps more importantly, fees for preparing UK tax returns will similarly be exempt if they relate mainly to non-UK assets.

### 10.29.2 *"Wholly or mainly"*

The RDR Manual provides:

> **34040. Relevant services provided in the UK** [July 2010]
> ... For the purposes of applying the exemption "wholly or mainly" means more than half. Wholly or mainly relates to the service provided, not the property, and is, in general, judged by reference to work done, normally time spent.
> However, if advisers value the measurement of work done using a variety of factors, such as, for example a basis of both time and fee rate (eg use of a team specialising in international property), it is appropriate that this should be reflected in the considerations of "wholly or mainly". Other factors may include the fee and time rate if specialist advice was

123 *O'Brien v Benson's Hosiery* 53 TC 254.

> required, split of assets between UK and foreign situs, and the place of research or administration.[124]

The RDR Manual provides an example:

> **34040. Relevant services provided in the UK** [July 2010]
> ... *Example 2 (Ritika)*
> R, a remittance basis user, engages an investment manager based in the UK to manage her investment portfolio which covers assets both in and outside the UK and which changes throughout the year. ... Whether Condition A is met depends on whether the service provided relates wholly or mainly to property situated outside the UK.
> If the advice relates to assets and investments held by R, and/or her obligations that ensue from these (eg completing valuation/ownership details to comply with requirements in the jurisdiction where the assets are based), and the advice relates to both UK-situs and offshore situs assets, it will depend on the split of the assets.
> For example, if she holds, say, 60% foreign assets, and the advice given relates to all of the assets held in the portfolio, then the 'wholly or mainly' test would be met.
> If the advisors are considering changes in R's portfolio or the acquisition of UK assets and their research is UK-centric, then the 'service' provided in the UK is likely to relate to UK property, regardless of what is eventually acquired.

The tax planning moral is that R should instruct the investment managers to invest in non-UK property, but in practice she will want to do that for other reasons anyway; or (probably better) appoint foreign managers and then R can forget about the requirements of the relief.

### 10.29.3 *Services relief condition B (payment to foreign bank account)*

Section 809W(4) sets out services relief condition B:

> Condition B is that the whole of the relevant consideration is given by way of one or more payments to one or more bank accounts held outside the UK by or on behalf of the person who provides the relevant UK service.

124 The same point is made in EN Clause 23 Sch 7 Remittance Basis Amendment 354.

No relief is available if any part of the fees are paid in any other manner, for instance by way of set-off.

The service provider will generally remit the payment to the UK immediately on receipt. That does not affect the customer's tax position. The customer will not know, and will not be entitled to know, what the supplier does with its own money.

### 10.29.4 *Services relief condition B: commentary*

I am unable to see the purpose of services relief condition B. It continues the rule in *Timpson's Executors v Yerbury* applicable under the pre-2008 remittance basis. Perhaps the policy was that nothing which was a remittance under the pre-2008 rules should cease to be a remittance under the ITA remittance rules. If so the policy was wholly misguided. The opportunity should have been taken to create an entirely new and coherent set of rules. As it is, suppliers of services relating to foreign property will need to open foreign bank accounts and the individual must ensure that they pay all the fees into that account; a pointless and inconvenient bureaucratic requirement, but there it is.

In practice it will often be easier to appoint foreign advisors so as not to have to bother about the relief.

### 10.29.5 *Identifying "the service"*

It is necessary to identify what is the service before identifying what is the property to which the service relates:

(1) There may be one service relating to UK and non UK property, in which case one applies the "wholly or mainly" test.

(2) There may be separate services, one (or more) relating to UK property, and one (or more) relating to foreign property, in which case the services relating to the foreign property only can qualify for exemption.

Of course either analysis may better suit the taxpayer or HMRC, depending on the result of the wholly or mainly test. The VAT distinction between single (though composite) and multiple supplies is applicable here.

The RDR Manual provides:

> **34040. Relevant services provided in the UK** [July 2010]
> ... If
> [1] the services (and thus the consideration due for that service) can be clearly and specifically identified as relating either to UK assets or to non-UK assets and
> [2] it is possible to separately identify this from the fees structure and invoicing,
> the work relating to UK assets will not be regarded as meeting the "wholly or mainly" test at Condition A in section 809W.[125] This does not necessarily require a separate advice letter, report or invoice ("split-invoice") to be issued, as long as the individual is clearly able to identify from the invoice to what his payments relate.

If that is right, a remittance basis taxpayer should not use a UK investment manager, say, as the commission on the purchase of UK situate securities would not be exempt, even if the securities as a whole are mainly non UK situate. A UK investment manager should be used only if no UK situate securities are purchased.

Where there are two or more separate supplies, some exempt, some not, it is necessary to identify the consideration given for each supply. The RDR Manual discusses apportionment:

> **34040. Relevant services provided in the UK** [July 2010]
> If there is a split contract for services relating to UK and non-UK assets you should accept the computations if the split bears a reasonable resemblance to the actuality of service provided.
> Any attempt to use artificial or otherwise unrealistic cost structures, for example to increase the costs attributed to non-UK property advice work against UK-property advice work should be strongly resisted.

### 10.29.6 *Exceptions: s.730 and s.87 benefits*

Section 809W(5) ITA provides:

> Subsection (2) does not apply if the relevant UK service relates (to any extent) to the provision in the UK of—
> (a) a benefit that is treated as deriving from the income by virtue of

125 [Author's footnote] It follows that the work relating to the foreign assets does meet the wholly or mainly test (even if the foreign assets are a minority of the whole).

section 735, or

(b) a relevant benefit within the meaning of section 87B of TCGA 1992 that is treated as deriving from the chargeable gains by virtue of that section.

I cannot see what the legislation is aiming at here. The following conditions must all be satisfied:

(1) A service is provided in the UK.
(2) The service relates to non-UK property.
(3) The service relates to the provision in the UK of a benefit within s.731 or a capital payment for CGT.

Points (2) and (3) appear to be contradictory, but if one could weave a course which satisfies both, why withhold foreign services relief? I would be grateful to any reader who could explain.

## 10.30 Exempt property

Section 809X(1) ITA provides:

> Exempt property which is brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies is to be treated as not remitted to the UK.

There are five categories of exempt property. These relate to:

(1) public access
(2) personal use
(3) a de minimis exemption
(4) temporary importation
(5) the repair rule

In the FA 2008, exemptions (2) to (5) were limited to relevant foreign income. This was absurd, though it was a conscious decision. HMRC belatedly agreed. The FA 2009 extended the exemptions to apply to all types of income and gains, with retrospective effect.

The exemption does not extend to remittance condition C or D but they will not often apply.

### 10.30.1 *"Property"*

Section 809Z6 ITA provides some definitions. Section 809Z6(1) ITA provides:

> This section applies for the purposes of sections 809X to 809Z5.

Section 809Z6(2) ITA provides:

> "Property" does not include money.

This is an artificial definition of "property" in that the word in its natural sense does include money.

In the remittance basis provisions outside s.809X to 809Z5, the word "property" is used without a definition, and does include money.[126] This breaches the somewhat elementary principle of good drafting, that the same word should not be used with different meanings. The consequence is to cause confusion and make discussion more difficult, as greater care is needed in one's choice of terminology. In this chapter:
- the word "property" (by itself) does include money;
- where I want to refer to "property" in the artificial s.809Z6(2) sense, I use the expression "property (excluding money)".

### 10.30.2 *"Money"*

Section 809Z6(3) ITA defines money:

> In subsection (2) "money" includes—
> (a) a traveller's cheque,
> (b) a promissory note,
> (c) a bill of exchange, and
> (d) any other—
>   (i) instrument that is evidence of a debt, or
>   (ii) voucher, stamp or similar token or document which is capable of being exchanged for money, goods or services.

This is an artificial definition of "money" in that none of these five categories would be "money" in the ordinary meaning of the word.

The definition is over-complex, given the limited importance of the exempt property rules, but there it is.

126 See 10.11.2 "Property" and "Money".

The definition is expressed to apply only for the purposes of s.809Z6(2), through which it applies for the purposes of s.809X to 809Z5. It is also needed in s.809Y, where it is repeated verbatim. It also applies in para 86 Sch 7 FA 2008, where it is incorporated by reference. In the remittance basis provisions elsewhere the word *money* is used without any definition, and has its ordinary meaning. So once again, care is needed in ones choice of terminology. In this chapter:
- when the word *money* is used in the artificial 809Z6(3) sense, I refer to it as "money" with scare quotation marks.
- when the word *money* is used in its ordinary sense, I write it without the quotation marks.

### 10.30.3 *Property "being in the UK"*

Section 809Z6(4) ITA defines "being in the UK":

> References to property being in the UK are references to the property—
> (a) being in the UK after being brought to, or received in, the UK in circumstances in which section 809L(2)(a) applies, or
> (b) being used in the UK in circumstances in which section 809L(2)(a) applies.

Section 809L(2)(a) applies if "money or other property is brought to, or received or used in, the UK by or for the benefit of a relevant person."

## 10.31 Public access rule

### 10.31.1 *Introduction*

Suppose an individual has purchased works of art out of foreign income or gains. It may be possible to lend these works to UK institutions without a taxable remittance[127] but s.809Z ITA provides an additional exemption for works of art brought to the UK for public display. Perhaps it is intended for the case where the institution is a relevant person. The drafting incorporates by reference provisions relating to VAT and import duty (temporary imports and items brought into the UK permanently by

127 See 10.11.3 (Property brought to the UK ("brought" limb of condition A)).

museums and galleries).

Section 809X(3) ITA provides:

> Property is exempt property if it meets the public access rule (see sections 809Z and 809Z1).

Section 809Z(1) ITA provides:

> Property meets the public access rule if conditions A to D are met.

I refer to **"public access conditions A to D"** to avoid confusion with the myriad other conditions in ITA.

### *10.31.2 Public access condition A (works of art)*

Section 809Z(2) ITA provides:

> Condition A is that the property is—
> (a) a work of art,
> (b) a collectors' item, or
> (c) an antique,
> within the meaning of Council Directive 2006/112/EC (see, in particular, Annex IX to that Directive).

Annex IX of the directive provides:

WORKS OF ART, COLLECTORS' ITEMS AND ANTIQUES, AS REFERRED TO IN POINTS (2), (3) AND (4) OF ARTICLE 311(1)
PART A Works of art
(1) Pictures, collages and similar decorative plaques, paintings and drawings, executed entirely by hand by the artist, other than plans and drawings for architectural, engineering, industrial, commercial, topographical or similar purposes, hand-decorated manufactured articles, theatrical scenery, studio back cloths or the like of painted canvas (CN code 9701);
(2) original engravings, prints and lithographs, being impressions produced in limited numbers directly in black and white or in colour of one or of several plates executed entirely by hand by the artist, irrespective of the process or of the material employed, but not including any mechanical or photomechanical process (CN code 9702 00 00);
(3) original sculptures and statuary, in any material, provided that they are executed entirely by the artist; sculpture casts the production of which is limited to eight copies and supervised by the artist or his successors in title (CN code 9703 00 00); on an exceptional basis, in cases determined by the Member States, the limit of eight copies may be

exceeded for statuary casts produced before 1 January 1989;
(4) tapestries (CN code 5805 00 00) and wall textiles (CN code 6304 00 00) made by hand from original designs provided by artists, provided that there are not more than eight copies of each;
(5) individual pieces of ceramics executed entirely by the artist and signed by him;
(6) enamels on copper, executed entirely by hand, limited to eight numbered copies bearing the signature of the artist or the studio, excluding articles of jewellery and goldsmiths' and silversmiths' wares;
(7) photographs taken by the artist, printed by him or under his supervision, signed and numbered and limited to 30 copies, all sizes and mounts included.
PART B Collectors' items
(1) Postage or revenue stamps, postmarks, first-day covers, pre-stamped stationery and the like, used, or if unused not current and not intended to be current (CN code 9704 00 00);
(2) collections and collectors' pieces of zoological, botanical, mineralogical, anatomical, historical, archaeological, palaeontological, ethnographic or numismatic interest (CN code 9705 00 00).
PART C Antiques
Goods, other than works of art or collectors' items, which are more than 100 years old (CN code 9706 00 00).

### *10.31.3 Public access condition B (public access)*

Section 809Z(3) ITA provides:

> Condition B is that—
> (a) the property is available for public access at an approved establishment,
> (b) the property is to be available for public access at an approved establishment and, in connection with its being so available, is in transit to, or in storage at, public access rule premises, or
> (c) the property has been available for public access at an approved establishment and, in connection with its having been so available, is in transit from, or in storage at, public access rule premises.

The key terms here are "available for public access" and "approved establishment." Both are defined.

### *10.31.4 Available for public access*

Section 809Z(4) ITA provides:

> Property is "available for public access" at an approved establishment if

> the property is—
> (a) on public display at the establishment,
> (b) held by the establishment and made available to the public on request for viewing or for educational use, or
> (c) held by the establishment for public exhibition in connection with the sale of the property.

The RDR Manual provides:

> **34140 - Remittance Basis: Exemptions: Public access rule - Condition B - available for public access - definition**
> ... It is important to note that even though the third bullet [para (c)] allows property brought into the UK for public display in connection with its sale to satisfy the public access rule this does not negate any charge arising if the property is actually sold in the UK (refer to RDRM34080 Property ceasing to be exempt).

### *10.31.5 Approved establishment*

Section 809Z(5) ITA defines approved establishment. There are two types:

> An "approved establishment" is—
> (a) an approved museum, gallery or other institution within the meaning of Group 9 of Schedule 2 to the Value Added Tax (Imported Goods) Relief Order 1984, or

If one turns to the VAT (Imported Goods) Relief Order 1984 one might expect to find a definition of "approved museum, gallery or other institution." There is none, but article 2 does say that "approved" means approved by the secretary of state. In practice approval is granted by the National Import Reliefs Unit and its practice is set out in HMRC Notice 361 (Importing museum and gallery exhibits free of duty and VAT).

Section 809Z(5) ITA continues:

> An "approved establishment" is ...
> (b) any other person, premises or institution designated (or of a description designated) by the Commissioners.

The RDR Manual provides:

> **34130 - Remittance Basis: Exemptions: Public access rule - Condition B - approved establishment - definition**
> ...Any questions about what constitutes an 'approved establishment' or requests for approval as an 'approved establishment' (ITA07/s809Z(5)(b)) should be made to CAR: Offshore Personal Tax - Remittance Basis Technical Team.
> There is no set form which needs to be completed to request designation as an approved establishment, but all applications should be made in writing and provide sufficient detail about the relevant circumstances relating to making property available for public access, including particulars of the appropriate person, premises or institution wanting to be designated as an approved establishment and full contact details.

### 10.31.6 *Public access premises*

Lastly, s.809Z(6) ITA defines public access rule premises:

> "Public access rule premises" are—
> (a) premises in the UK at which the property is to be, or has been, available for public access, or
> (b) other commercial premises in the UK used by the approved establishment for the storage of property in advance of its being, or after its having been, available for public access at the approved establishment.

### 10.31.7 *Public access condition C (time limit)*

Section 809Z ITA provides:

> (7) Condition C is that, during the relevant period, the property meets condition B for no more than—
> (a) two years, or
> (b) such longer period as the Commissioners may specify.
> (8) "The relevant period" means the period—
> (a) beginning with the importation of the property, and
> (b) ending when it ceases to be in the UK after that importation.
> (9) "Importation" means the property being brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies.

The definition of "importation" recognises that there may be an importation to the UK to which s.809L(2) does not apply, in which case time does not begin to run. The RDR Manual provides:

**34150 Public access rule - Condition C - two year period** [July 2010]
...
The relevant period starts with the importation of the property and ends when the property ceases to be in the UK after that importation.
For these purposes, property is treated as brought into the UK or imported if it is brought to the UK in circumstances such that it would be treated as a remittance to the UK within Condition A of s.809L ITA2007 (refer to RDRM33120 Condition A - property) if it were not for this public access rule (or any other rule exempting it) (s.809Z(9) ITA2007).
The two year period will not necessarily start with the importation of the property as the property may not have been available for public access when it was first imported into the UK. For example it may be brought in under the temporary importation rule prior to public access.
Again the two year period will not necessarily end when the property ceases to be in the UK as the property may cease to be available for public access before the property actually leaves the UK. For example it may instead qualify under the repair rule after a period of public access.
**Example 1** (Faizal)[128]
F is a remittance basis user. He is asked by a London museum, which is an approved establishment, if he will contribute a vase that he owns to an exhibition that the museum intends to stage. The vase is derived from F's relevant foreign income.
F arranges for the vase to be shipped to the UK from Switzerland. In May the vase is received by the museum and is put into storage for one month after which exhibition begins. The exhibition lasts until the following year in October, at the end of which the vase is returned to Switzerland. The vase has been in the UK for 18 months in total. The vase is exempt property so F has not made a chargeable remittance.
**Example 2**
The circumstances are the same as Example 1 but this time, at the end of the exhibition, the vase is not returned to Switzerland. Instead, F asks for the vase to be sent to a restorer in Newcastle to be cleaned. The restorer keeps the vase in his business premises for a further eight months [!] and then in the following June F arranges for it to be sent back to Switzerland.
The vase has been in the UK for 26 months. The vase, purchased using F's relevant foreign income is exempt property under the public access rule for the 18 months from its arrival in the UK in May to the October in the following year.

128 I omit a few irrelevancies in setting out the text of this example.

Between October and the following June it is within temporary importation rule (as it is with the repairer) and so remains exempt property. As the 2 year time 'repair' limit at Condition C has not been exceeded the vase remains exempt property throughout and F has not made a taxable remittance.
Any requests under the terms of s.809Z(7)(b) ITA 2007 to extend the period during which property may remain in the UK under the terms of the public access rule should be made to CAR: PTI Advisory, Foreign Income and Remittance Basis Team

### 10.31.8 *Public access condition D (VAT relief)*

Section 809Z(10) ITA provides:

> Condition D is that the property attracts a relevant VAT relief (see section 809Z1).

So we turn to s.809Z1(1) ITA:

> Property "attracts a relevant VAT relief" if any of conditions 1 to 4 are met.

I refer to **"VAT relief conditions 1 to 4**."

### 10.31.9 *VAT relief conditions 1 and 2*

Section 809Z1 ITA provides:

> (2) Condition 1 is that article 5(1) of the Value Added Tax (Imported Goods) Relief Order 1984 applies in relation to the importation of the property by virtue of Group 9 of Schedule 2 to that Order (importation of works of art or collectors' pieces by museums etc).
> (3) Condition 2 is that article 5(1) would so apply if the following requirements were disregarded—
> (a) the requirement that the importation be from a third country,[129] and

129 RDRM34160 notes that "In this context 'third country' means a place outside the Member States of the European Union. The second and fourth conditions are required to ensure that, where the conditions are met, the remittance basis exemption scheme applies to property imported from within the European Union, works of art

(b) the requirement that the purpose of the importation be a purpose other than sale.

So we need to turn to article 5(1) VAT (Imported Goods) Relief Order 1984:

> Subject to the provisions of this Order, no tax shall be payable on the importation of goods of a description specified in any item in Schedule 2 to this Order.

Our journey takes us on to group 9 of schedule 2:

> **Group 9 Works of Art and Collectors' Pieces**
> Item No.1: Works of art and collectors' pieces imported by approved museums, galleries or other institutions [for a purpose other than sale][130].
> Note
> Item 1 applies only where the goods are—
> (a) of an educational, scientific or cultural character; and
> (b) imported free of charge or, if for a consideration, are not supplied to the importer in the course or furtherance of any business.

10.31.10 *VAT relief conditions 3 and 4*

Section 809Z1 ITA provides:

> (4) Condition 3 is that article 576(3)(a) of Commission Regulation (EEC) No 2454/93 (relief from import duties for works of art etc imported for the purposes of exhibition, with a view to possible sale) applies in relation to the importation of the property.
> (5) Condition 4 is that article 576(3)(a) would so apply if the requirement that the importation be from a third country were disregarded.

So we need to turn to article 576(3) which provides:

> 3. Total relief from import duties shall be granted for the following:
> (a) works of art, collectors' items and antiques as defined in "Annex I"

---

already in the UK and goods imported for sale which would not otherwise be covered by the existing VAT scheme."

130 The words in brackets are effectively undone by s.809Z1(3)(b) ITA.

> of Directive 77/388/EEC, imported for the purposes of exhibition, with a view to possible sale ...[131]

This is of (virtually) no interest as it only applies to exhibition with a view to sale; a sale in the UK gives rise to a charge; and one would not normally exhibit a work of art in the UK with a view to its sale elsewhere.

### 10.31.11 *Date of importation*

Section 809Z1(6) ITA provides:

> Where the property does not meet condition B in section 809Z at the time of its importation it is to be assumed for the purposes of this section that the property was imported on the day during the relevant period when the property first meets that condition.

The RDR Manual provides:

> **RDRM34160 - Remittance Basis: Exemptions: Public access rule - Condition D - relevant VAT relief**
> ...Where Condition B of ITA07/s809Z - the public access condition - is not met when the property is imported into the UK it is to be assumed, in considering whether the property attracts a relevant VAT relief, that the property was imported at the point that the property is made available for public access, thereby deeming the relevant VAT relief provisions to apply.

### 10.31.12 *Commentary*

Readers (of whom there will not be many) who have studied this section to this point can need no commentary of mine to reach the conclusion that this relief should have been much more simply expressed; contrast the IHT works of art exemption - see 53.18 (works of art). I would be grateful to any reader who could explain in particular what is the reason for public access condition D, which seems quite pointless.

131 This article was inserted into the 1993 regulation by Commission Regulation (EC) No 993/2001 of 4 May 2001.

## 10.32 Personal use rule

Section 809X(4) ITA provides:

> Clothing, footwear, jewellery and watches ~~that derive from relevant foreign income~~[132] are exempt property if they meet the personal use rule (see section 809Z2).

Section 809Z2 ITA provides:

> (1) Clothing, footwear, jewellery or watches meet the personal use rule if they—
> (a) are property of a relevant person, and
> (b) are for the personal use of a relevant individual.
> (2) In this section—
> (a) "relevant person" has the meaning given by section 809M, and
> (b) "relevant individual" means an individual who is a relevant person by virtue of section 809M(2)(a), (b), (c) or (d) (the individual with income or gains, or a husband, wife, civil partner, child or grandchild).

The words "*by virtue of section 809M(2)(a), (b), (c) or (d) (the individual with income or gains, or a husband, wife, civil partner, child or grandchild)*" are otiose because an individual who is a relevant person is necessarily a relevant person by virtue of those provisions; but no harm is done.

## 10.33 Repair rule

Section 809X(5)(a) ITA provides:

> Property ~~of any description~~ ~~that derives from relevant foreign income~~[133] is exempt property if— ...
> (a) the property meets the repair rule (see s.809Z3).

132 The words "that derive from RFI" were deleted with retrospective effect by the FA 2009.

133 The words "that derive from RFI" were deleted with retrospective effect by the FA 2009.

Section 809Z3 ITA provides:

> (1) Property meets the repair rule for the whole of the relevant period if, during the whole of that period, the property meets the repair conditions.
> (2) Property meets the repair rule for a part of the relevant period if—
> (a) during the whole of that part of that period, the property meets the repair conditions, and
> (b) during the whole of the other part of that period, or the whole of each other part of that period, the property meets the repair conditions or the public access rule.
> (3) Property meets the repair conditions if the property—
> (a) is under repair or restoration,
> (b) is in transit from a place outside the UK to repair rule premises, in transit between such premises, or in storage at such premises, in advance of repair or restoration, or
> (c) is in storage at such premises, in transit between such premises, or in transit from such premises to a place outside the UK, following repair or restoration.
> (4) "Repair rule premises" means—
> (a) premises in the UK that are to be used, or have been used, for the repair or restoration referred to in subsection (3)(b) or (c), or
> (b) other commercial premises in the UK used by the restorer for the storage of property in advance of, or following, repair or restoration of property by the restorer.
> (5) "Restorer" means the person who is to carry out, or has carried out, the repair or restoration referred to in subsection (3)(b) or (c).
> (6) Property meets the repair conditions, or the public access rule, during the whole of a period, or the whole of part of a period, if the property meets those conditions or that rule—
> (a) on the whole of, or on part of, the first day of that period or part period,
> (b) on the whole of, or on part of, the last day of that period or part period, and
> (c) on the whole of each other day of that period or part period.
> (7) "The relevant period" has the same meaning as in section 809Z.

The relief applies only to the property being repaired. There is no relief for the service of repair. A remittance basis taxpayer would be mad to bring an asset to the UK in order to make use of UK repair or restoration services. Even if the importation of the asset did not give rise to a remittance the payment for the repair would give rise to a remittance. All yacht and similar restoration work, for instance, from remittance basis taxpayers is lost to the UK. But there it is.

## 10.34 Temporary importation rule

Section 809X(5)(b) ITA provides:

> Property ~~of any description that derives from relevant foreign income~~[134] is exempt property if— ...
> (b) the property meets the temporary importation rule (see s.809Z4)

Section 809Z4 ITA provides:

> (1) Property meets the temporary importation rule if the total number of countable days is 275 or fewer.
> (2) A "countable day" is a day on which, or on part of which, the property is in the UK by virtue of being brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies (whether the current case, or a past case, when the property was so brought, received or used).

One needs to keep a lifetime record for every asset.

> (3) A day is not a countable day if, on that day or any part of that day—
> (a) the property meets the personal use rule,
> (b) the property meets the repair rule, or
> (c) the notional remitted amount[135] in relation to the property is less than £1,000.

The interaction of the temporary importation rule and the public access rule is more complicated:

> (4) A day on which, or on part of which, the property meets the public access rule (the "relevant day") is not a countable day if any of conditions A to C is met.
> (5) Condition A is that the property meets the public access rule during

134 The words "of any description" (which were otiose and misleading) and the words "that derive from RFI" were deleted with retrospective effect by the FA 2009.
135 This term is defined in s.809Z5 ITA: see 10.35 (De minimis rule).

the whole of the period of importation in which the relevant day falls.
(6) Condition B is that—
(a) the property does not meet the public access rule during the whole of the period of importation in which the relevant day falls, and
(b) that period of importation—
(i) begins with a period of no public access, and
(ii) ends with a period of public access which immediately follows that period of no public access.
(7) Condition C is that—
(a) the property does not meet the public access rule during the whole of the period of importation in which the relevant day falls, and
(b) during the parts, or each of the parts of the period of importation during which the property does not meet the public access rule it meets the repair conditions.[136]

Section 809Z4(9) defines period of importation in terms that echo the language of s.809Z1:

(9) "Period of importation" means a period that—
(a) begins when property is brought to, or received or used in, the UK in circumstances in which section 809L(2)(a) applies, and
(b) ends when the property ceases to be in the UK after having been so brought, received or used.
(10) "Period of no public access" means a period which is not a period of public access and "period of public access" means a period during the whole of which property meets the public access rule.

The RDR Manual provides an example:

**34220 Temporary importation rule - countable days**
... Example (Jez)
On 15 January 2010 J, a remittance basis user, brings a rare oil painting into the UK to hang on the wall of his castle. J had purchased the painting two months earlier using his foreign employment income.
On 1 July 2010 he allows the painting to be put on public display at the National Gallery, London. The painting remains on display for six months, until 31 December 2010, after which it is immediately shipped to J's office in Dubai on 1 January 2011.

136 Section 809Z4(8) ITA defines the repair conditions by reference: "Section 809Z3(6) applies for the purposes of this section."

The conditions for meeting the public access rule for the period 1 July 2010 to 31 December 2010 have been satisfied.
Bringing the painting into the UK would ordinarily be a taxable remittance under section 809L but we need to consider the exemption rules. During the period 15 January to 30 June 2009 the painting was not available for public access. This period is immediately followed by a period of public access from 1 July 31 December 2009.
The 15 January to 30 June 2009 period falls to be considered under the temporary importation rule (167 days).
For the period 1 July 2009 to 31 December 2009 the property is exempt property under the public access rule and therefore this period does not count towards the 275 day limit

## 10.35 De minimis rule

Section 809X(5)(c) ITA provides:

> Property ~~of any description that derives from relevant foreign income~~[137] is exempt property if ...
> (c) the notional remitted amount (see s.809Z5) is less than £1,000,

Section 809Z5(1) ITA defines "notional remitted amount":

> The "notional remitted amount", in relation to property, is the amount ~~of income~~[138] that would be taken to be remitted to the UK in relation to the property (if section 809X did not apply in relation to the property).

Each item of property qualifies for the £1,000 limit. HMRC agree. The RDR Manual provides:

> **34180 Exempt Property - Notional remitted amount less than £1,000**
> ... Example (Jacob)
> J, a remittance basis user, uses his foreign income to purchase a mobile phone for £250 a fountain pen for £485, and a new suitcase for £630. He brings all the items back to the UK.

137 The words "that derive from RFI" were deleted with retrospective effect by the FA 2009.

138 The words "of income" (which mistakenly disapplied the section in relation to CGT) were deleted with retrospective effect by the FA 2009.

> The mobile phone, pen and suitcase all derive from J's foreign income so would be taxable as remittances when brought into the UK under ITA07/s809L. However each item's notional remitted amount (£250, £485 and £630 respectively) is under the £1,000 limit, so section 809Z5 provides that the phone, the pen and the suitcase are regarded as exempt property. J has not therefore made a chargeable remittance.
> In J's case the total cost of all the property brought to the UK exceeds £1,000. However the exemption limit applies to each item of property, [unless it forms part of a set.]

In the 7th edition of this book I noted that s.809Z5(2)(3) continued with an unnecessary rule relating to sets of property. HMRC presumably agreed, since this was repealed with effect from 22 April 2009 (though the Manual has not yet been updated).

## 10.36 Exempt property clawback charge

### 10.36.1 *Sale in UK*

> (3) The first case is where the whole or part of the exempt property is sold or otherwise converted into money[139] whilst it is in the UK.

An exchange for a non-money asset is not a sale.
This rule applies (illogically) even if the proceeds are received abroad. It is proposed to relax this rule from 2012/13. The remittance consultation paper provides:

> **Taxation of assets sold in the UK**
> 2.81 Under the current remittance basis rules, assets purchased overseas using foreign income or capital gains are normally liable to tax when they are brought to the UK. Limited exemptions exist for certain assets purchased out of overseas income or capital gains. These are known as exempt assets. These exemptions apply where an asset is:
> • a work of art or antique brought to the UK to be displayed in public;
> • an item of personal clothing, footwear or jewellery;
> • an item brought to the UK temporarily (up to 275 days in total) or for

139 Section 809Y(5) provides a definition of "money" which is the same as in s.809Z6. (If the definition had been expressed to apply to the whole ITA remittance code the repetition would have been unnecessary.) For this definition see 10.30.2 ("Money").

repair; or

• worth less than £1,000.

2.82 However, these exemptions are not available where the asset in question is sold in the UK and, as a result, if it is sold the individual will be liable to UK tax on the initial cost of the asset in question.

2.83 This means that individuals can be faced with a tax charge when they bring such assets to the UK, even in cases where they have only been remitted for the purposes of being sold. The Government recognises that this situation has the potential to make the UK less attractive as a place for the sale of assets by non-domiciled individuals.

2.84 This particularly affects assets, such as works of art, where the current rules strongly discourage non-domiciles from bringing the asset to the UK for sale. This undermines some areas of the UK's economy, including the art market and auction houses, to the advantage of the UK's competitors. It also creates complexity in the rules on remitted assets and imposes a tax charge on income that may not actually be enjoyed in the UK. 2.85 The Government therefore proposes to build on the existing exemptions and introduce a new provision which would remove the tax charge on remitting an exempt asset to the UK where it is subsequently sold in the UK. This exemption would cover situations where an exempt asset which is brought to the UK temporarily is sold and the purchaser retains the asset in the UK.

2.86 However, there is a need to prevent individuals using the proposed exemption as an opportunity to bring their overseas income and capital gains into the UK tax-free by using the proceeds of a sale of their assets for their personal use. Therefore, the exemption would include a provision that, in order to be exempt from a tax charge, all of the proceeds from any sale must be taken out of the UK within two weeks of the money being received by the individual. The Government would welcome views on whether this is a suitable period of time.

2.87 This proposed exemption would apply to all exempt assets and would not be restricted to any particular class of asset or sector of the economy. This would be in line with the underlying principle that non-domiciles using the remittance basis should only be liable to UK tax on overseas income and capital gains to the extent that they are enjoyed in the UK.[140]

140 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

This presumably reflects some effective lobbying by the auctioneer industry.

10.36.2 *Exemption requirements cease to apply*

Section 809Y ITA provides:

> (1) Property that ceases to be exempt property is to be treated as having been remitted to the UK at the time it ceases to be exempt property.
> (2) Property ceases to be exempt property in either of the following cases....
> (4) The second case is where the property—
> (a) is exempt property only because it meets one or more of the relevant rules,[141]
> (b) ceases to meet that rule, or all of those rules, whilst it is in the UK, and
> (c) does not meet any other relevant rule.

## 10.37 Partnerships

This section discusses two related questions:

(1) *Remittance of funds transferred to partnership.* Suppose:
(a) P (a remittance basis taxpayer) receives foreign income/gains.
(b) P contributes the funds to a partnership of which P is a partner, as partnership capital.
(c) The partnership brings the funds to the UK.

(2) *Remittance of partnership income/gains*. Suppose:
(a) A partnership (whose partners include P, a remittance basis taxpayer) receives foreign income/gains.
(b) The partnership does not distribute the funds to the partners, but brings the funds to the UK.

In these cases, is there a taxable remittance? There are two possible views:

141 Section 809Y(5) ITA provides:
"relevant rule" means-
(a) the public access rule,
(b) the personal use rule,
(c) the repair rule, and
(d) the temporary importation rule.

(1) One regards P as owning an asset (a partnership share) which is derived from the foreign income/gains. In that case:
   (a) Funds contributed to the partnership are remitted if P receives the partnership share in the UK.
   (b) Partnership income/gains are not remitted.

(2) One regards the individual as owning a share of the partnership assets. In that case:
   (a) Funds contributed to the partnership are remitted if the partnership brings the funds to the UK.
   (b) Partnership income/gains are remitted if the partnership brings the funds to the UK.

One might describe the first view as being that partnerships are not transparent for remittance basis purposes, and the second view as one that partnerships are transparent.

### 10.37.1 *The background partnership law*

In order to address this one needs to understand the nature of a partner's interest in a partnership (also known as a partnership share).

Partners jointly own the partnership assets. However a partner individually is not entitled to exercise proprietary rights over partnership assets, and a partner's interest in partnership assets is described as a future interest.[142] The RDR Manual correctly states:

> **33530. Partnerships** [July 2010]
> *Investment into partnerships*
> When a partner makes a capital contribution to a partnership they acquire an asset under partnership law, namely an 'interest' or 'share' in the partnership which gives them rights to share in future profits and distributions (of their capital and any surplus) on dissolution of the partnership.

The same applies to a LLP.

---

142 *Lindley & Banks on Partnership* (19th ed 2010) para 19-03 onwards; Law Com, *Partnership Law*, Report no 283, para 9.66 (The nature of a partner's interest).

10.37.2 *Non-transparent nature of partnership for remittance basis purposes*

On this basis the RDR Manual adopts the non-transparent view:

> **33530. Partnerships** [July 2010]
> ... *Offshore partnerships trading or investing in the UK*
> A partnership is not a relevant person. Individuals who are partners together in a partnership are not relevant persons by virtue of their role as a partner (although they may, of course, be relevant persons under other provisions).
> Offshore partnerships, whether trading or investment partnerships, may bring partnership funds into the UK to meet trading or investment expenses in the usual course of partnership business. As the funds are brought in by the partnership they are not brought in by a relevant person. In most cases there will be no benefit to a relevant person from the money or other property brought into the UK by the partnership, nor will a service usually be provided in the UK to or for the benefit of a relevant person, so Condition A of ITA07/s[809L][143] is not met. Thus there will be no taxable remittance.

In short, in the Manual's view, partnerships are not transparent for remittance basis purposes. Insofar as the tax analysis follows partnership law, this is clearly correct. At first glance, one might have thought that s.848 ITTOIA imposed transparency, regardless of what partnership law may have to say.[144] But that view is not really workable. A partner (for instance in a large investment partnership) may not know (and may not be entitled to know) what happens to partnership property, and cannot work it out from the accounts. Serious tracing difficulties arise. So either this is not the true effect of s.848 or the context shows that the deeming of s.848 does not apply here.

This is consistent with the view that a partnership is transparent in the sense that income of the partnership is income of the partners, for the issues are different: there is no reason why the general principle of income tax transparency should require the same answer to both.

The RDR Manual adds four qualifications (which should not be controversial):

---

143 The original erroneously reads: 709L. This is a somewhat inaccurate paraphrase of remittance condition A, but the meaning is clear.

144 See 36.3 (Transparency of partnership for IT).

> **33530. Partnerships** [July 2010]
> ... [1] In cases where there does appear to be a benefit to an individual partner (or to another relevant person) from money or other property brought into UK by the partnership, or from a service provided in the UK for which the partnership gives consideration then you should examine the transaction and the partnership documents very carefully to identify the source of the partnership funds.
> [2] The provision of the property or service by the partnership may be a remittance of that individual's 'share' in partnership profit. To the extent that the individual's share in partnership profit falls to be regarded as relevant foreign income (see below) there may be a remittance.

Para [1] is considering whether a contribution to the partnership is remitted and para [2] is considering whether the partnership income is remitted. Clearly, if the partnership asset is used by the individual, remittance condition A is in principle satisfied.

> [3] You may also need to examine whether there is a true partnership, or whether in fact it is the individual's foreign income or gains that have been remitted.

Whether there is a partnership is a question of partnership law, which should not in practice cause difficulties if documentation and implementation are correct.

> [4] Alternatively there may be a connected operation to which Condition D of ITA07/s809L(5) applies.

The Manual wisely does not seek to explain how condition D might be satisfied.

10.37.3 *Contribution of foreign income/gains to UK partnership*

The RDR Manual 33530 provides:

> **33530. Partnerships** [July 2010]
> ... It follows [from the statement of the partnership law position] that a remittance basis user who uses his foreign income or gains to make a capital contribution to a UK partnership acquires a UK asset; namely a share in the UK partnership, in exchange for his 'equity' subscription in

> the partnership. Thus the foreign income or gains that he uses to contribute to the partnership will be a taxable remittance within ITA07/s809L.
> This is so even if the individual places his investment into the partnership's overseas account, and the UK partnership is only investing or trading overseas and not in the UK.

The text does not say what it means by "UK partnership" - presumably it means one an interest in which is UK situate, on common law principles: that is, an unincorporated partnership which is managed and controlled in the UK or a LLP with a UK register.[145]

An unspoken assumption here is that receipt of a UK situate asset (applying IHT/international law situs rules) is a taxable remittance, ie is a receipt of an asset in the UK. That is arguable.[146]

### 10.37.4 *Remittance of partnership profits*

Where partnership income is RFI[147] the same point arises. There is no remittance if the partnership receives its income in the UK. A partner who is a remittance basis taxpayer can only remit income to the UK after it is distributed to them from the partnership.

### 10.37.5 *Company held by partnership*

Suppose a partnership holds a company. The partners are participators in the company. The company must be a close company (or a non-resident close company), since the partners are connected persons. Accordingly the company is a relevant person in relation to each of the partners. So property brought/received/used in the UK by the company is remitted - even though there would be no remittance if the same property was brought/received/used in the UK by the partnership which holds the company! This is the case regardless of the size of the partnership. The proposed relief for UK investment may mitigate this problem for the future.

---

145 See 70.28 (Situs of partnership share).
146 See 10.11.9 (Receipt of UK situate investment asset)
147 See 36.4 (Partnership income: remittance basis).

## 10.38 Proceeds of divorce settlement

### 10.38.1 *Is a transfer on divorce made for "consideration"?*

The starting point is to understand the family law background.

A transfer in connection with divorce may be made:

(1) Pursuant to a court order
   (a) following a contested hearing; or
   (b) approving a settlement agreed by the parties.
(2) Without a court order but under an agreement between the parties (the transferee agreeing to seek no (or a reduced) court order in return for the transfer).

Assume (as will normally be the case) that the transfer is made bona fide, at arm's length and with no gratuitous intent. Are transfers of these kinds made for consideration?

One might have thought that the answer was no. One argument is:

(1) there is only "consideration" where there is a contract[148] and
(2) (a) a court order is not a contract; and
   (b) an agreement between the parties is not a valid contract.[149]

This line of reasoning now seems less convincing, both because the word consideration is wide enough to apply in the absence of a contract, and because nuptual agreements can in some cases constitute enforceable contracts.[150] But more fundamentally, the quid pro quo which is the essence of consideration is lacking.

Accordingly in *G v G*[151] the High Court held that a transfer pursuant to a Court Order at a contested hearing (type (1)) was not made for consideration, so that CGT hold-over relief was available.

However in *Hill v Haines* [2008] Ch 412 the Court of Appeal held that a transfer pursuant to a Court Order at a contested hearing (type (1)) *was* made for consideration, for the purposes of s.339 Insolvency Act 1986.

Where does this leave *G v G* and CGT hold-over relief? Either it is

148 *C&E Commissioners v Apple and Pear Development Council* [1985] STC 383; *IRC v Plummer* 54 TC 1 at p 57; *Unilever v Smith* [2002] STC 113.

149 See *Aspden v Hildesley* 55 TC 609.

150 See Law Commission consultation paper no. 198, *Marital Property Agreements* (Jan 2011) accessible *www.lawcom.gov.uk*.

151 *G v G* [2002] EWHC 1339 [2003] Fam Law 14 [2002] 2 FLR 1143 at [43] accessible *www.kessler.co.uk*.

overruled or else there are (at least) two concepts of consideration, in which case a transfer might be for consideration in one sense but not for consideration in the CGT sense. In that case one could never ask whether a transfer is made for consideration in the general, but only whether it is made for consideration in some specified sense of the ambiguous word.

Each view has some support in *Hill v Haines* (though they cannot both be right). Morritt C said:

> [30] ... the fact that a transfer ordered by the court does not give rise to a payment of consideration so as to reduce the value of hold-over relief *for capital gains tax* [does not dictate] a conclusion that a property adjustment order must be regarded as made for no consideration.

In other words, "consideration" in the CGT code has a different meaning. But Rix LJ preferred the view that *G v G* was wrong.[152] Since Rix also agreed with Morritt, it is clear that he did not give a great deal of attention to this point (which did not need to be decided and which would not have been fully argued).

It is considered that the view of Morritt is to be preferred. Rights under the Matrimonial Causes Act are not assets for CGT purposes: no gain arises when a spouse is awarded a capital sum. Accordingly, there is no "consideration" for CGT purposes. However that is a special case and a transfer on divorce is made for consideration in the general sense of the expression.

### 10.38.2 *The HMRC view*

The CG Manual provides:[153]

---

152 At [81] "... As for *G v G*, the view expressed by Coleridge J at para 43 regarding potential consequences for the purposes of capital gains tax can hardly be regarded as authoritative in the absence of the revenue. As Coleridge J stated, his view that the wife gave no consideration for the shares transferred to her because 'neither party has any 'rights'... cannot, of course, ultimately bind the Inland Revenue': he merely proceeded "on the footing" that business hold-over relief would be available to the husband. In doing so, he appears to have drawn an unnecessary inference from the decision of this court in the *Xydhias* case."

153 The passage has not been revised after *Hill v Haines,* but as several years have elapsed since that decision, it may be taken as a statement of the HMRC current view.

> **67192. Hold-over relief: Consideration [March 2006]**
> The disposal of an asset from one spouse or civil partner to the other in the circumstances described in CG67191 [that is, a disposal in the year after separation, which does not qualify for the CGT spouse exemption] is, where there is no recourse to the courts, usually made in exchange for a surrender by the donee of rights which they would otherwise be able to exercise to obtain alternative financial provision. In such cases we take the view that the value of the rights surrendered represents actual consideration of an amount which would reduce the gain potentially eligible for hold-over relief to nil. "Consideration" is not limited to money or money's worth.

After considering the case where there is gratuitous intent, which is so rare that it need not be considered here, the Manual continues:

> However, in cases where there is recourse to the courts and a court makes an order
> - for ancillary relief under the Matrimonial Causes Act 1973 which results in a transfer of assets from one spouse to another, or
> - for property adjustment under the Civil Partnership Act 2004, or
> - formally ratifying an agreement reached by the divorcing parties or by the civil partners of a dissolved civil partnership dealing with the transfer of assets,
>
> we take the view that the spouse or civil partner to whom the assets are transferred does not give actual consideration, in the form of surrendered rights, for their transfer. A Court Order, made in these circumstances, reflects the exercise by the court of its independent statutory jurisdiction and is not the consequence of any party to the proceedings agreeing to surrender alternative rights in return for assets.
> This approach represents a change in the Revenue's prevailing practice, following consideration of judicial observations made in the case of *G v G* and applies with effect from 31 July 2002. Therefore, where assets are transferred between divorcing parties or between civil partners of a dissolved civil partnership by reason of a Court Order as described above and a claim for gift hold-over relief is made, or remains unsettled, on or after that date, the relief should not be restricted in accordance with Section 165(7) TCGA 1992 on the grounds that actual consideration has been given by the donee.

Thus in the HMRC view:

(1) A transfer made pursuant to a court order, including a consent or

*Tomlin* order, is not made for consideration.
(2) A transfer not made pursuant to a court order is made for consideration.

It is considered that the position is in both cases the same:
(1) The transfer is made for consideration in the general sense of the word;
(2) The transfer is not made for consideration for CGT purposes.

### 10.38.3 *Are proceeds of divorce settlement "derived property"?*

Suppose T transfers RFI to W as part of a divorce settlement. It is suggested that the funds in the hands of W are not derived from the income. They are received for full consideration (in the general sense of that expression). If that is right, remittance condition B is not satisfied even if:
(1) W remits while still a relevant person (before decree absolute);
(2) W applies the funds for the benefit of relevant persons (eg children or grandchildren of T under 18).

However in case HMRC do not agree, W should not bring the funds to the UK until after decree absolute, by which time she has ceased to be a relevant person; and she should ideally not use the funds for the benefit of relevant persons (in relation to H). Then there is clearly no taxable remittance.[154]

## 10.39 Debit, credit and charge cards

This section considers whether the use of debit, credit and charge cards involves a remittance. The starting point is to understand the legal nature of debit, credit and charge cards. The following analysis draws on *The Law of Bank Payments*.[155]

On the use of a card, three contracts come into being. For present purposes the most important terms of the contracts are as follows:

---

154 See 10.19 (Becoming/ceasing to be a relevant person: conditions A and B). As to debt remittance rules, see 10.17.11 (Debt imposed by law).

155 Brindle and Cox, Sweet & Maxwell, (3rd ed. 2004), para 4-013. In any particular case it is strictly necessary to review the specific terms governing the card concerned, but I expect that will not usually make any difference in practice. Store-issued cards are not discussed here.

(1) Cardholder and supplier
This is the contract for goods or services between the cardholder and the person from whom the cardholder purchases goods or services ("the supplier"). This contract is the same whether the cardholder pays by card or by cash.

(2) Card-issuer and supplier
The card-issuer undertakes to honour the card by paying the supplier.

(3) Card-issuer and cardholder
(a) A *debit* card is issued only by a bank. The contract between the card-issuer bank and cardholder authorises the bank to debit the cardholder's bank account with the amount of the card transaction.
(b) Charge and credit cards are different. Here the cardholder is required to make a payment to the card-issuer. A *charge* card requires the cardholder to repay the balance outstanding after a set period.[156] A *credit* card allows the cardholder extended credit.

It is necessary to distinguish between use of cards to obtain (1) cash, and (2) goods or services.

### 10.39.1 *Cards used to obtain cash*

If a debit card is used to obtain cash in the UK from a foreign bank account which is in credit,[157] and the card is used at a branch of the bank which issued the card, then there is clearly a remittance of the money. The same applies if the cash is withdrawn from a bank which is not the card-issuing bank, because the third party bank acts as the agent for the card-issuing bank.

The use of a *charge* card to obtain cash in the UK from a foreign bank account is likewise a remittance. The time of the remittance is when the sum is debited from the account, not when the card is used. The position is the same if an individual uses a *credit* card to obtain cash in the UK.

---

156 In the case of a bank-issued credit card, the issuer is normally authorised to debit the cardholder's bank account to meet a debt due on the card. But in practice this facility is not used unless needed (or the card effectively becomes a debit card).

157 If the effect of use of the card is to put an account into debit, there is obviously no remittance on ordinary principles, though the debt remittance rule will in principle apply when the overdrawn account is repaid.

### 10.39.2 *Cards used to obtain goods or services*

Where a debit card is used to obtain goods or services in the UK, remittance condition A is satisfied. Payment of the debt to the card issuer out of income or gains satisfies remittance condition B.

### 10.39.3 *HMRC practice*

The RDR Manual provides:

> **36130 Credit Cards and Debit Cards**
> *Credit card issued in the UK*
> If a taxpayer who is chargeable on the remittance basis uses a UK credit card to pay for goods or services, either in the UK or overseas and he or she subsequently settles their credit card bill using foreign income or gains, the payment is a taxable remittance.
> The remittance does not have to be received in the UK by the taxpayer, it is sufficient that it is received by the credit card company in the UK.

This is not correct, but a remittance basis taxpayer should avoid a UK credit card in order to avoid dispute.

> *Credit card issued by an overseas bank or other financial institution*
> Where an overseas credit card is used in the UK, the cardholder is effectively authorising the credit card company to pay the bill for the goods or service in just the same way as if they had instructed the bank to make a payment directly to the person supplying the goods or services. The terms of credit card agreements may differ as to the moment of "indebtedness" between the cardholder and the credit card company. However the use of the credit card to pay for goods used or received in the UK, or services provided in the UK by, to or for the benefit of a relevant person will create a debt.
> The use of the individual's untaxed foreign income or gains to pay the credit card company in respect of the relevant debt will be a taxable remittance.
> Interest and other such charges should be apportioned accordingly between UK and non-UK goods and services. In most cases a straight proportional split of the interest against each type of expenditure will be acceptable; for example if £400 of the debt relates to UK goods which are taxed as a remittance and £600 to non-UK goods and there is an interest charge in relation to that £1,000 debt of £10, then £4 of the

interest is also a taxable remittance. However some cards may apply different rates where cash is withdrawn, or depending of date of purchase, in which case the taxpayer will need to compute the interest due on the "relevant debt" part of the payment only.

**Note 1:** This section may apply to any credit card debt which the individual satisfies using their foreign income or gains, even if they are not the cardholder.

**Note 2:** If an overseas credit card is used abroad and the account is settled direct to the card company out of overseas income, no liability to UK tax will arise. But if an asset purchased using the card is brought to the UK and subsequently sold here, there will be a taxable remittance, at the date of disposal, up to the amount of any foreign income used to settle the original account.

*Debit card issued by an overseas bank or other financial institution*

Payments for goods or services that are made using a debit card (for example a Visa debit card or one issued under the brand name "Cirrus") issued by an overseas financial institution are treated in exactly the same way as a cash transaction.

This means that when goods or services are purchased in the UK using a debit card a taxable remittance is made to the extent of the amount of any overseas income or gains in the bank account. Likewise any cash withdrawals from shops or ATM machines in the UK are taxable cash remittances.

Payment by cheque drawn on an overseas account or by electronic transfer of any kind are also treated in exactly the same way as cash and are potentially taxable remittances of overseas income and gains.

## 10.40 Joint accounts

The RDR Manual provides:

**33510 Joint Accounts** [July 2010]

Where a remittance basis user has an offshore bank account held jointly with another person there may be additional difficulties in identifying the nature of the monies in the account, and any transfers of monies from the account. You will need to read these pages together with the rest of RDRM35200: Mixed Funds.

*Earned Income*

Employment income and pensions are not regarded as "joint property" when received by the employee or pensioner – refer to the Independent Taxation Manual IN127+. So any foreign earnings or foreign pension income (taxed as relevant foreign income) is attributable only to the employee or pensioner to whom they "belong".

*Income from jointly held property*

S.836(2) ITA 2007 provides that where a married couple or civil partners are living together and income arises from property held in their joint names, both individuals are treated for income tax purposes as beneficially entitled to one-half of the income regardless of their actual respective beneficial entitlements, unless they make a joint declaration that it shall be otherwise under s.837 ITA 2007. Refer to the Independent Taxation Manual IN115+ for further details.

This general "equal division" rule at s.836(2) ITA 2007 does not apply in some cases (referred to in s836 ITA 2007 as "exceptions").

These are:

- Exception A - any income to which neither of the individuals is beneficially entitled
- Exception B – where the spouses/civil partners make a joint election to HMRC under the terms of s.837 ITA 2007 that one of them is beneficially entitled to the income to the exclusion of the other or they are both entitled to the income in unequal shares
- Exception C - partnership income
- Exception D - income from a UK property business
- Exception E - distributions from close companies
- Exception F – where one of the persons is beneficially entitled to the income but it is treated as being the income of someone else under any other provision of the Taxes Acts

Broadly then, unless the individuals have made a declaration otherwise, foreign income arising from jointly held property will be regarded as belonging to each individual in an equal (that is usually a 50:50) share.

Any interest arising on the jointly held offshore bank account will be split equally between the account holders.

Of course married couples or civil partners may also hold assets separately; and they can divide up joint assets so that they hold them separately for the future. In these circumstances each spouse or civil partner is then taxed on the income from the assets each holds in his or her own name, in the same way as for "earned income".

*Analysing the account*

Where an individual has a "joint account" with someone else and one or both of them chooses to be taxed on the remittance basis it is necessary to fully analyse the account (with due regard being given to the "exceptions" identified above). You will need to do this in order to apply Step 1 s.809Q(3) ITA 2007 (refer to RDRM35200: Mixed funds) which deals with transfers from mixed funds and requires you to find each of the categories of the remittance basis user's income and gains in the mixed fund. A joint account will almost certainly be a mixed fund.

Analyse the account by putting each credit to the account into separate columns, divided between each individual.

Likewise with the debits; transfers out of the account that are clearly made by or for one or other of the individuals and intended to be made out of "their" share of the income should be debited "under" their column.

"Joint" expenses, for example items such mortgage payments where the debt is held jointly, or council tax bills and so on may, if appropriate, be split equally between each individual. Alternatively, such debits may be fully appropriated to just one of the account holders if that reflects the reality of their joint financial arrangements; for example it may be that only one partner is working and contributes most of the "credits" to the account in the form of their income. In such circumstances it may be more appropriate to attribute all expenditure to that partner in so far as the overall balance of the account permits. When separating the account in this way it is important that the overall balance remains consistent. In practice you should try to take the most pragmatic approach that best reflects the reality of both individuals' situations.

*Cases where only one account holder is a remittance basis user*

Individuals who are not using the remittance basis are liable to tax on the arising basis, so they will, where appropriate, have paid UK tax in respect of their share of the income and gains that have been credited to the joint account in the tax year. Because UK tax has been (or will be) paid by that individual he or she may bring to the UK or otherwise use their share of the funds that are in the account in any way they wish without triggering an additional tax charge.

However, if at any time during the year they bring to the UK or otherwise use amounts in excess of their share of the funds in the joint account at that point in time then they will be regarded as using their partner's income or gains instead.

*Example:*

An offshore bank account was opened on 20 June. It is held jointly by A and B, who are civil partners. A is a remittance basis user in this year. The account shows:

| **Date** | **Credit (Debit)** | **Balance** | **Attributable to** |
|---|---|---|---|
| 20 June | £2,000 | £2,000 | A – foreign earnings |
| 27 June | £1,000 | £3,000 | A – relevant foreign income |
| 1 July | (£800) | £2,200 | B – cash taken out in London |
| 27 July | £90 | £2,900 | B – UK rental income |

In analysing the account you need to look at what was in the account i**mmediately before** each debit. In this case, the cash withdrawn by B in London on 1 July can only be attributed to A's income credits and, as B is relevant person RDRM33030, A will be regarded as having remitted that £800. Also refer to RDRM35230: Remittances from mixed funds.

Remember that in most cases the account holders are likely to be relevant persons in relation to each other, so even transfers from the non-remittance basis using individual may be a taxable remittance on the other partner if it is regarded as consisting of or deriving from the other partner's foreign income or gains.

*Cases where both account holders are remittance basis users*

You will still need to analyse the account in order to determine which transfers from the mixed fund are taxable remittances, and to determine which account holder is liable to pay any tax due. Again, you should try to take the most pragmatic approach that best reflects the reality of the situation.

Once the account has been split between the individual account holders, any taxable remittances (refer to RDRM33020 Meaning of remittance) of the foreign income or gains that are the property of the remittance basis user are subject to the normal "ordering" rules that apply to remittances from a "mixed fund".
The following example demonstrates the principles of analysing a joint account and then determining whether the "transfers" are a taxable remittance from a mixed fund. You will also need to refer to RDRM35230 Remittances from mixed funds.

**RDRM33515 - Remittance Basis: Identifying Remittances: Specific Topics: Joint Accounts - example** *(Erica and John)*
E and J have been married for several years, and currently live in the UK. J is domiciled within the UK. E is not domiciled in the UK. E decides to claim the remittance basis for this year.
Both E and J have employment income that is credited to the account. For most of the year E works in the UK but she also has a separate part-time employment with a foreign employer outside of the UK for part of the year.
E and J have a joint bank account in the Isle of Man. Into this account is paid both of their salaries, and some bank interest. They use the account to pay their household bills, including the mortgage on their jointly owned UK home.
*Table to show the amounts credited to the account*

| **Date** | | **Credit (Debit)** | **Balance** |
|---|---|---|---|
| | Opening Balance | | £0 |
| 30 April | UK salary (Erica) | £3,000 | £3,000 |
| 30 April | UK salary (John) | £2,000 | £5,000 |
| 30 April | Overseas salary (not subject to foreign tax) (Erica) | £2,000 | £7,000 |
| 30 April | Bank interest not taxed | £200 | £7,200 |
| 1 May | Direct debit - UK energy coy | (£200) | £7,000 |
| 5 May | Cash withdrawal (UK) | (£1,000) | £6,000 |
| 10 May | Cash withdrawal (UK) | (£1,000) | £5,000 |
| 17 May | Direct debit - mortgage | (£3,000) | £2,000 |
| 31 May | UK salary (Erica) | £3,000 | £5,000 |
| 31 May | UK salary (John) | £2,000 | £7,000 |
| 31 May | Overseas salary (not subject to foreign tax) (Erica) | £800 | £7,800 |
| 1 June | Direct debit - UK energy coy | (£200) | £7,600 |
| 5 June | Cash withdrawal (UK) | (£1,000) | £6,600 |
| 10 June | Cash withdrawal (UK) | (£800) | £5,800 |
| 17 June | Direct debit - mortgage | (£3,000) | £2,800 |

The credits and the debits account can be analysed between E and J with the following results:

| | | Erica | | John | | Overall Account Balance |
|---|---|---|---|---|---|---|
| | | Credit (Debit) | Balance | Credit (Debit) | Balance | |
| 30 April | UK salary Note 1 | £3,000 | £3,000 | | | £3,000 |
| 30 April | UK salary Note 1 | | | £2,000 | £2,000 | £5,000 |
| 30 April | Overseas salary | £2,000 | £5,000 | | | £7,000 |
| 30 April | Bank interest Note 2 | £100 | £5,100 | £100 | £2,100 | £7,200 |
| 1 May | Direct debit to UK energy coy | (£100 ) | £5,000 | (£100) | £2,000 | £7,000 |
| 5 May | Cash w/drawn (UK) Note 3 | (£1,000 ) | £4,000 | | | £6,000 |
| 10 May | Cash w/drawn (UK) Note 3 | | | (£1,000) | £1,000 | £5,000 |
| 17 May | Direct debit – mortgage Note 4 | (£2,000) | £2,000 | (£1,000) | £nil | £2,000 |
| 31May | UK salary | £3,000 | £5,000 | | | £5,000 |
| 31May | UK salary | | | £2,000 | £2,000 | £7,000 |
| 31May | Overseas salary | £800 | £5,800 | | | £7,800 |
| 1 Jun | Direct debit to UK energy supplier | (£100) | £5,700 | (£100) | £1,900 | £7,600 |
| 5 Jun | Cash w/drawn (UK) | (£1,000) | £4,700 | | | £6,600 |
| 10 Jun | Cash w/drawn (UK) | | | (£800) | £1,100 | £5,800 |
| 17 Jun | Direct debit mortgage Note 4 | (£1,900) | £2,800 | (£1,100) | Nil | £2,800 |

**Note 1:**
Earned income is attributed to the employee only
**Note 2:**
Because this is a joint account, the interest arising on it is split equally between E and J.
**Note 3:**
This money is withdrawn in the UK by J and E to meet their own personal expenditure, for example travel, meals and so on.
In this example J's "personal expenditure" can be attributed to his "income" credits into the account. If instead the withdrawals by J were regarded as coming from E's "portion" of the pot, because J is a relevant person and money has been brought into the UK by a relevant person (so Condition A of s.809L(2)(a) ITA 2007 is met (refer to RDRM33120: Condition A – money and property) there

might still be a taxable remittance, with the tax due payable by E (see below).

**Note 4:**

The mortgage payment is made to a UK bank. The mortgage is held on J and E's UK home and is a joint debt of E and J, and each contributes half of the cost. To the extent that J has money in the account it can be accepted that he has used his taxed income to pay his share of the mortgage.

Money has been brought into the UK to pay this mortgage, so Condition A of s.809L(2)(a) ITA 2007 is met (refer to RDRM33120: Condition A – money and property) and there is a "transfer" from a mixed fund.

Because this is a mixed fund s.809Q(2) ITA 2007 is in point (refer to RDRM35230: Remittances from mixed funds). So in order to determine whether this money is regarded as consisting of, or deriving from, a remittance basis users' foreign income or gains (such that there is a taxable remittance under Condition B of s.809L(2)(a) ITA 2007) it is necessary to look at the composition of the fund immediately before the "transfer".

This shows that £2,000 of the mortgage payment made on 17 May must be attributable to E's income or gains in the mixed fund. Similarly, £1,900 of the mortgage payment of 17 June is attributable to E's income in the mixed fund.

So far as E is concerned, her share of the account shows (for the purposes of calculating if and to what extent she has made a taxable remittance of her overseas income) is as follows:

*E's share of the account*

| | | **Credit (Debit)** | **Category (S809Q(4))** |
|---|---|---|---|
| 30 April | UK salary | £3,000 | Para (a) |
| 30 April | Overseas salary (not subject to foreign tax) | £2,000 | Para (b) |
| 30 April | Bank interest | £100 | Para (d) |
| 1 May | Direct Debit (energy coy ) | (£100) | |
| 10 May | Cash | (£1,000) | |
| 17 May | Direct Debit (mortgage) | (£2,000) | |
| 31 May | UK salary | £3,000 | Para (a) |
| 31 May | Overseas salary | £800 | Para (b) |
| 1 June | Direct Debit (energy) | (£100) | |
| 5 June | Cash | (£1,000) | |
| 17 June | Direct Debit (mortgage) | (£1,900) | |

Applying the rules at s809Q ITA 2007 (refer to RDRM35230: Remittances from mixed funds) to the first "transfer" to the UK, which is the payment to the energy company on 1 May. Remember the mixed fund rules require the account to be analysed before every "transfer"

| | | |
|---|---|---|
| **Step 1** – Identify the "amount of transfer" in the relevant year | | **£100** |
| Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before | **Para (a)** Employment income (UK employment income) | £3,000 |
| | **Para (b)** Relevant foreign | £2,000 |

| | | |
|---|---|---|
| the date of the transfer | earnings (not subject to a foreign tax) | |
| | **Para (d)** Relevant foreign income (not subject to a foreign tax) | £100 |
| **Step 2** – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund | **Para (a)** | £3,000 |

**Step 3** If the amount at Step 2 is equal to or more than the amount of the transfer treat the whole of the remaining amount of the transfer as coming from that item of income or gain

> So E's transfer of £100 is treated as coming from her UK employment income; it is not thus a "taxable" remittance when brought to the UK.
> Then apply the rules at s.809Q ITA 2007 (refer to RDRM35230: Remittances from mixed funds) to the next "transfer" to the UK, which is the cash withdrawal.

*Apply the rules at s.809Q ITA 2007 to the next "transfer" to the UK, which is the case withdrawal*

**Step 1** – Identify the "amount of transfer" in the relevant year

| | | |
|---|---|---|
| | | **£1,000** |
| Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer | **Para (a)** Employment income (UK employment income) | £2,900 |
| | **Para (b)** Relevant foreign earnings (not subject to a foreign tax) | £2,000 |
| | **Para (d)** Relevant foreign income (not subject to a foreign tax) | £100 |
| **Step 2** – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund | **Para (a)** | £1,900 |

**Step 3** If the amount at Step 2 is equal to or more than the amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain

> So E's transfer of £1,000 is treated as coming from her UK employment income; it is not thus a "taxable" remittance when brought to the UK.
> Then apply the rules at s809Q ITA 2007 (refer to RDRM35230: Remittances from mixed funds) to the next "transfer" to the UK, which is the mortgage payment.

*Then apply the rules at s809Q ITA 2007 to the next "transfer" to the UK, which is the mortgage payment*

**Step 1** – Identify the "amount of transfer" in the relevant year

**£2,000**

| | | |
|---|---|---|
| Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer | **Para (a)** Employment income (UK employment income) | £1,900 |
| | **Para (b)** Relevant foreign earnings (not subject to a foreign tax) | £2,000 |
| | **Para (d)** Relevant foreign income (not subject to a foreign tax) | £100 |
| **Step 2** – Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund | **Para (a)** | £1,900 |
| **Step 3** Where the amount transferred is greater than the amount identified at Step 2 the amount transferred is treated as reduced by the amount identified in Step 2. | | £2,000 - £1,900 = £100 |
| **Step 4** - Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3. | | |
| **Step 2** - repeated | **Para (b)** | £100 |

**Step 3** If the amount at Step 2 is equal to or more than the amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain

£1,900 of the transfer is treated as coming from E's UK employment income; it is not thus a "taxable" remittance when brought to the UK. The remaining £100 is treated as a remittance of £100 of E's untaxed overseas earnings.

### 10.40.1 *Property held jointly by spouses*

Section 836 ITA provides:

> (1) This section applies if income arises from property held in the names of individuals—
> (a) who are married to, or are civil partners of, each other, and
> (b) who live together.
> (2) The individuals are treated for income tax purposes as beneficially entitled to the income in equal shares.

How does this interrelate with the remittance basis? Suppose:

(1) Property is held in the names of H and W, but belongs in equity to H alone.
(2) Section 836 applies so that half the income is deemed to be the income of W.
(3) W is a remittance basis taxpayer.

Income of W arising before 2008/09, being merely deemed income, could not be remitted and could not be subject to tax. But income arising from 2008/09 counts as remitted if it is remitted by H, since H is a relevant person in relation to W.

## 10.41 Gift to charity by remittance basis taxpayer

A remittance basis taxpayer ("T") making a gift to charity should give
(1) money (including foreign currency) (qualifying for gift aid relief) or
(2) foreign assets (qualifying for qualifying investment donation relief).

The gift may be made out of foreign income/gains, or property derived from foreign income/gains. The property should be received by the charity outside the UK. The charity may bring the assets to the UK without a taxable remittance, provided the charity is not a relevant person in relation to T. A charitable trust will not be a relevant person (unless T has made an interest-free loan to it). A charitable company could be a relevant person if it is a close company.

The extension of gift aid relief (and in principle other charity tax reliefs) to EU charities in the F(No.1)A 2010 increases the significance of this.

## 10.42 Transitional rules

Para 81 Sch 7 FA 2008 provides:

> The other[158] amendments made by this Part of this Schedule [ie part 1 which sets out the provisions discussed in this clause] have effect for the tax year 2008-09 and subsequent tax years.

### 10.42.1 *Property remitted to UK before April 2008*

Under the pre-2008 RFI remittance basis, there was no remittance of RFI if property was remitted *in specie* (not in the form of money). This is now caught by remittance condition B.

Para 86 Sch 7 FA 2008 provides a transitional relief:

158 "Other" relates to provisions concerning employment-related securities not discussed here.

> (1) Section 809L of ITA 2007 (meaning of "remitted to the UK") has effect subject to this paragraph.
> (2) If, before 6 April 2008, property (including money) consisting of or deriving from an individual's relevant foreign income was brought to or received or used in the UK by or for the benefit of a relevant person, treat the relevant foreign income as not remitted to the UK on or after that date (if it otherwise would be regarded as so remitted).

At first sight the words "including money" seem odd, because the remittance of *money* to the UK before 2008/09 was in principle a taxable remittance. But the wording does make sense, because para 86(5) incorporates a definition of money which is artificial in that it includes assets which are not money in the normal sense. Such assets would not have been taxable on remittance before 2008 so the provision is needed to give them exemption now.[159]

Suppose:

(1) T borrowed to purchase an asset (not "money") and acquired the asset before 6 April 2008.
(2) T receives the asset in the UK after 6 April 2008.
(3) T repays the borrowing out of RFI after 6 April 2008.

The transitional relief does not apply because the purchased asset is not derived from the RFI.

FAQ Remittances (April 2008) provides:

> Is it true that assets in the UK owned by a non-domiciled individual which were purchased out of untaxed relevant foreign income will be taxed if the asset is still in the UK on 6 April 2008?
> No. Assets owned by a non-domiciled individual that were purchased using untaxed foreign income and that are already in the UK will not give rise to a tax charge as a remittance on 6 April 2008. *If the asset is sold in the UK, then a tax charge can arise under existing rules and that charge will remain.*

The italicised sentence is inaccurate. The exemption in para 86(2) continues to apply even if the asset is sold. This may reflect a change of

159 Para 86(5) provides: "money" has the same meaning as in s.809Y of ITA; see 10.30.2 ("Money"). But since the expression here is "property (including money)", the definition of money is not important.

mind since the FAQ was written as the relief was rewritten at Report Stage. The result is something of a windfall, but there it is.

The RDR manual provides:

> **31460. Property derived from relevant foreign income not treated as a remittance (1)**
>
> ***Background***
>
> The introduction of Chapter A1 Part 14 ITA 2007 has extended the meaning and scope of foreign income and gains that become taxable when remitted to the UK. In certain situations, the operation of the previous remittance rules in respect of relevant foreign income meant that it could be brought to the UK without triggering an immediate tax charge. As an example, if an asset such as a car was purchased abroad using relevant foreign income and the car was then brought into the UK, there would be no income or capital gains[160] tax charge when it is brought in. Instead the charge would only occur if/when the asset was sold or otherwise realised for cash in the UK (also refer to RDRM31250 Changes to old regime - cash only).
>
> Property consisting of, or deriving from, relevant foreign income from tax years up to and including 2007-08 may have been brought into the UK prior to 6 April 2008, and the transitional provisions deal with these situations.
>
> ***Transition***
>
> The transitional position is that the new rules contained in Section 809L do not have effect and that property brought to the UK is not treated as a remittance where:
>
> • Property, including money, was acquired either directly or indirectly using relevant foreign income RDRM31140 and was brought to, received, or used in the UK before 6 April 2008.
>
> ***Effect***
>
> Relevant foreign income brought to or used in the UK by the individual or any other relevant person before 6 April 2008 is not regarded as remitted under Section 809L after 6 April 2008 even if it is still in the UK. So in the example of the car above, even though it is still used in the UK by a relevant person on or after 6 April 2008 it will not be treated as a remittance under Section 809L.
>
> Also, the same money or property can be sent or taken outside the UK and then brought in again. It will not be regarded as a remittance when

160 There is no question of a CGT charge so the words "or capital gain" are confused and irrelevant.

> brought in a second or subsequent time.

The Manual goes on to explain why the rule is restricted to RFI:

> Note: This transitional provision applies only to relevant foreign income because the pre 6 April 2008 position for employment income and capital gains was different. These were always chargeable even if remitted in the form of property rather than cash.

It is debatable whether this correctly states the pre-2008 law, but it does not now matter.

### 10.42.2 *Property acquired before 12 March 2008*

Para 86(3) Sch 7 FA 2008 provides:

> If, before 12 March 2008, property (other than money) consisting of or deriving from an individual's relevant foreign income was acquired by a relevant person, treat the relevant foreign income as not remitted to the UK on or after 6 April 2008 (if it otherwise would be regarded as so remitted).

Para 86(2) provides relief where property (including "money") was *remitted* before 6 April 2008.

Para 86(3) provides relief where property (excluding "money") was *acquired* before 12 March 2008, regardless of the date of remittance.

The RDR Manual provides:

> **31470. Property derived from relevant foreign income not treated as a remittance (2)**
> ***Background***
> As explained at RDRM31460, in certain situations the operation of the previous remittance rules in respect of relevant foreign income RDRM31140 meant that it could be brought to the UK without triggering an immediate tax charge.
> As an example, if before 6 April 2008 an individual bought an asset such as a car abroad using his relevant foreign income and the car was then brought into the UK, there would be no income or capital gains tax charge at that time. Instead, the charge would only occur if and when the asset was sold or otherwise realised for cash in the UK (also refer to RDRM31250 Changes to old regime - cash only).

Property consisting of or deriving from relevant foreign income from tax years up to and including 2007-08 may have been brought into the UK prior to 6 April 2008, and the transitional provisions deal with these situations.

***Transition***

The transitional position is that the new rules contained in Section 809L do not have effect and that property brought to the UK will not be treated as a remittance where:

- property (other than money) was acquired either directly or indirectly by a relevant person using relevant foreign income before 12 March 2008 and is brought to or received in the UK after 5 April 2008.

The exclusion of money is important as it ensures that income arising from sources that have ceased is subject to the rule changes.[161] See Section 809Y ITA 2007 for the definition of money in these circumstances.

***Effect***

This provision is similar to that described in RDRM31460. However this provision applies only to the purchase of property abroad before 12 March 2008 using relevant foreign income, where that property remained abroad and was not brought to or used in the UK before 6 April 2008.

***Example 1*** (Heidi)

H bought a car in Germany on 15 October 2007 using her relevant foreign income. She kept the car at her German apartment until May 2009 when she decided to bring it to the UK to use here. Under the previous rules there would have been no remittance until the car was sold in the UK. Under the new rules at Section 809L the car is regarded as derived from the relevant foreign income and so, without this transitional rule, there would be a taxable remittance of that relevant foreign income in May 2009.

***Example 1A*** (Heidi)

As for example 1 but this time H decides that she needs a bigger car. In August 2009 she sells her car in Germany and brings the proceeds to the UK. The proceeds from the sale of the car derive from H's relevant foreign income and would be regarded as a taxable remittance to the UK under the new rules at Section 809L. But as H's car (the property) was acquired before 12 March 2008 the transitional rule at paragraph 86(3) applies and what would be regarded as remitted is treated as not remitted. The money from the sale of the car that H brings into the UK is not therefore a taxable remittance.

161 I am unable to follow this sentence.

> There will be no foreign chargeable gain on the disposal of the car because her private motor vehicle is not a chargeable asset.

Since the expression in 86(3) is "property (other than money) the definition of "money" is very important. Para 86(5) provides: "money" has the same meaning as in s.809Y of ITA; this provides a wide and artificial meaning of "money"; see 10.30.2 ("Money").

If para 86(3) is taken literally, it disapplies the remittance basis for all RFI held in non-"money" form before 12 March 2008! For instance, it would apply to RFI invested in shares or securities.

The possibilities are:

(1) "Property (other than money)" may be taken literally, ie any form of property other than "money" (as defined).
(2) "Property (other than money)" may be taken to refer to chattels (as the drafter of the RDR manual perhaps assumes).
(3) Since Parliament has failed to express any intention with sufficient clarity, it should be dismissed as meaningless.

None of these solutions are easy:

(1) It is not likely that solution (1) represents the actual intention of the drafter. However the FA 2008 was enacted in such a rush that it is likely that no-one carefully formulated any intention at all.
(2) One might infer from the RDR manual that HMRC intended para 86(3) to apply to RFI invested in chattels but the Manual was written much later, and there was no clear statement at the time the Act was passed, so that may be an afterthought. To read the section in that way amounts to legislation and not construction.
(3) This is the course of desperation.

It is considered that solution (1) is to be preferred.

## 10.43 Transitional loan relief

Para 90 Sch 7 FA 2008 provides a relief which I call "**transitional loan relief**". Para 90(1) provides:

> This paragraph applies if—
> (a) before 12 March 2008, money was lent to an individual outside the UK,
> (b) the loan was made for the purpose of enabling the individual to acquire an interest in residential property in the UK (and for no other

purpose), and

(c) before 6 April 2008—

(i) the money was received in the UK,

(ii) the individual used the money to acquire an interest in residential property in the UK ("the interest"), and

(iii) repayment of the debt for the money ("the debt"), or of payments made under a guarantee of that repayment ("the guarantee"),[162] was secured on the interest.

Para 90(2) provides the relief:

> Relevant foreign income of the individual used outside the UK before 6 April 2028 to pay interest on the debt is treated as not remitted to the UK.

Thus:

(1) Transitional loan relief is restricted to RFI (and does not apply if employment income or gains are used to pay the interest).

(2) The relief is restricted to loans for residential property; (it does not apply even to loans for home improvements).

(3) The relief is restricted to secured loans.

Para 90(3) Sch 7 FA 2008 restricts the relief:

> If, at any time on or after 12 March 2008—

162 Para 90(6) Sch 7 FA 2008 defines "guarantee":

"In this paragraph 'guarantee' includes an indemnity, and 'guaranteed' is to be read accordingly."

March 2009 Qs & As provides:

**Q20:** We would also welcome confirmation that the provisions in paragraph 90(1)(c)(iii) apply to a non-UK loan drawn down before 12 March 2008 where there are two (or more) guarantees in place for repayment of the debt, of which only one is secured on the UK residential property.

**A:** We can only reply in general terms to this query. The way in which this provision will apply will be determined in practice by the details of the particular loan or guarantee transactions in question. We would generally treat repayments of a debt secured on the property itself as falling within the provisions of paragraph 90 regardless of what guarantees might also exist. Likewise, any repayments made under such a guarantee will also be covered by the paragraph. However, any repayments made under a guarantee which is not secured on the UK property will not be covered.

> (a) any term upon which the loan was made, or any term of the guarantee, is varied or waived,
> (b) repayment of the debt, or of payments made under the guarantee, ceases to be secured on the interest,
> (c) repayment of any other debt is secured on the interest or is guaranteed by the guarantee, or
> (d) the interest ceases to be owned by the individual,
>
> sub-para (2) does not apply in relation to relevant foreign income used as mentioned there after that time.

I am unable to see the point of conditions (b) and (c).

Suppose:

(1) H borrowed before 2008 to purchase property.
(2) W used her RFI to pay this interest.

Transitional loan relief does not apply as W is not the individual to whom the money is lent.

The effect of the relief in some cases will be to impose a severe tax penalty on a foreign domiciliary who wishes to move house. It also makes re-financing impossible (from 12 March 2008) as the relief ceases to apply.

Para 90(4) Sch 7 FA 2008 provides:

> If—
> (a) before 12 March 2008, money was lent to the individual outside the UK ("the subsequent loan"),
> (b) the subsequent loan was made for the purpose of enabling the individual to repay—
>   (i) the loan mentioned in sub-para (1), or
>   (ii) another loan in relation to which sub-paras (2) and (3) apply (by virtue of this sub-paragraph),
>
>   and for no other purpose, and
> (c) before 6 April 2008—
>   (i) the individual used the money to repay the loan referred to in para (b)(i) or (ii), and
>   (ii) repayment of the subsequent loan, or of payments made under a guarantee of that repayment, was secured on the interest,
>
> sub-paras (2) and (3) apply in relation to the subsequent loan (and for this purpose references there to the debt or the loan are to be read as references to the subsequent loan).

### 10.43.1 *What is the loan for?*

March 2009 Qs & As provides:

> **Q19:** It would be helpful to understand more fully the meaning of the requirement in paragraph 90(1) (b) that the loan was made for the purpose of acquiring an interest in residential property "and for no other purpose" and in particular to what extent any other purpose might cause the whole loan to fall outside paragraph 90.
>
> In a situation where money is lent before 12 March 2008 from a non-UK bank to an individual (resident but not domiciled in the UK) outside the UK under a facility letter for £5 million. £4.5 million of the facility is initially drawn down and the money used by the individual to purchase a residential property in the UK. Assume for these purposes that the loan was secured on a UK residential property.
>
> Subsequently (and before 12 March 2008) a second tranche of £0.5 million was drawn down under the same loan facility, also outside the UK. The money from the second draw down was used to refurbish the residential property purchased by the first draw down.
>
> **A:** The effect of paragraph 90(1) is to provide transitional provisions for loans made for the purpose of acquiring an interest in residential property in the UK. In this scenario, there are effectively two separate loans, even though they were made under a single facility letter: it is the drawdown of the money rather than the facility letter which constitutes the lending of the money. Therefore the first £4.5m drawn-down was money lent to the individual before 12 March and used to purchase a UK residential property and for no other purpose and was secured on that interest. That being the case, the transitional conditions will apply if, and to the extent which, relevant foreign income is used to pay interest on the debt.
>
> However, because the second £0.5m tranche of money was used to refurbish the property rather than to acquire an interest in it, it is does not meet the conditions set out paragraph 90(1)(b). Therefore, any relevant foreign income which is used to pay interest on this part of the debt will be treated as a taxable remittance in the UK.

What if a loan meets the conditions in part? It appears that HMRC accept there can be an apportionment. March 2009 Qs & As provides:

> **Q21**: We would welcome guidance on the principles for calculating the interest on that part of the debt which can be paid from relevant foreign

> income of the individual outside the UK without triggering a taxable remittance (under paragraph 90(2)). We suggest a reasonable approach is to calculate the interest element based on the loan capital ratio (ie that part of the loan which meets the paragraph 90 conditions over total capital of the loan facility), and apply that ratio to the total amount of interest due.
>
> **A**: The approach you suggest is, in broad terms, one which HMRC would consider acceptable, with the obvious caveat that the actual approach in any specific case would depend entirely on the terms of the loans.

### 10.43.2 *Varying a loan*

The relief is disapplied if:

> any term upon which the loan was made, or any term of the guarantee, is varied or waived

FAQ Remittances (April 2008) states that the relief only applies so long as "no further advances are made on or after 12 March". This is not correct, but if any further advances are made care must be taken with the documentation to ensure that there is a new loan (not a variation of an existing one) and the debt is not secured on the individual's interest in the property.

December 2008 Qs & As confirms this:

> **Q21** Where a taxpayer has an existing mortgage with a non-UK institution, secured on a residential property in the UK, with interest payments made out of untaxed foreign income and that existing facility includes an open credit line, would a draw-down of funds after 12 March 2008 constitute a "further advance"? Just to clarify, no variation to the pre-12 March 2008 terms and conditions of the loan would occur, the draw-down is made under the existing facility.
>
> If such a draw-down would constitute a "further advance", can you clarify whether the payments of interest from that point being treated as remittances would comprise (a) only those (pro rated) interest payments which relate to the further sum advanced or (b) all payments of interest on the full loan sum (ie the pre-existing loan sum plus the further advanced sum)?
>
> **A** A draw down of funds after 12 March 2008 would constitute a further

advance and cannot be exempted from tax under para 90 because the monies have to have been lent before 12 March 2008. Only the interest payments in relation to the loan received before 11 March 2008 would be eligible for exemption from tax.

December 2008 Qs & As provide:

**Q29** If an individual has an offshore mortgage with a two year fixed rate, will the grandfathering provision only last until the two year fixed rate period ends?
**A** Assuming the mortgage meets the other conditions for grandfathering whether relief would continue to apply after the fixed rate period ends would depend on the exact terms of the relevant loan agreement which was entered into before 12 March 2008. If, after the two year point was reached, the existing terms of that agreement would need to be amended, or a new agreement entered into (including a side agreement to the existing loan agreement), there would be a variation of the terms of the original agreement and the grandfathering provisions would no longer apply after that time. But if the loan agreement automatically provided for the move from a fixed rate to a variable rate, that would not on the face of it result in a variation in the agreement, and if so relief would continue.

In practice in the usual case the move to a floating rate will happen automatically, and the relief will continue to apply.

10.43.3 *When is the loan made?*

December 2008 Qs & As provides:

**Q 27 Remittance basis - offshore borrowing** If a mortgage was arranged and contracts for the purchase of the relevant property were exchanged in October 2007 but completion was not until March 31 2008 and the mortgage funds were not drawn down until completion, would this be considered to be an existing mortgage as at 12 March 2008?

HMRC refuse to answer the question:

**A** The conditions for the grandfathering relief to run would only be met if the "lending" took place before 12 March 2008, providing the funds

> were received in the UK and used to acquire the interest in the property in question before 6 April 2008. The answer depends on the terms and conditions of the mortgage arrangement, which determine the point at which the funds are regarded as "lent".

The answer does not depend on the terms and conditions of the mortgage arrangement. It depends on when the money was lent which the question states was not until completion. Thus transitional loan relief is not available. This is of course extremely unfair: it may be because of the obvious unfairness that HMRC chose not to answer the question. But the same question is asked later in the Qs & As, and receives a straight answer:

> **Q** A UK non-domiciled came to the UK in July 2007. He made an offer to purchase a residential property in the UK in November 2007. The deal became unconditional in February 2008 and entry was agreed for 16 March 2008. He has an offshore mortgage and the loan offer was made prior to 12 March but of course not drawn until 16 March. Does para 90 of Schedule 7 of FA 2008 apply?
> **A** The grandfathering provisions for offshore mortgages apply only where the loan was made before 12 March 2008. This means that the money had to be in the hands of the non-domiciled individual (or for example in the Solicitor's client account) before that date.

### 10.43.4 *Joint accounts*

March 2009 Qs & As provides:

> **Q22:** We would welcome confirmation that the remittance protection in paragraph 90 applies where a husband and wife (or civil partners), both of whom are resident but not domiciled in the UK, have a joint non-UK bank account and a joint offshore mortgage. The offshore mortgage meets the conditions set out in paragraph 90 (1).
> If only one spouse (or civil partner) has relevant foreign income and that spouse makes a payment into a joint non-UK bank account using that relevant foreign income and these funds are then used to pay the interest on the offshore mortgage, then it is our understanding that such payment of interest will not constitute a remittance of any of the relevant foreign income by virtue of paragraph 90.
> **A:** We are not able to provide the confirmation you are seeking because whether there is a taxable remittance in this situation will depend on the composition of the joint account and the way in which the mixed fund

rules section 809Q apply to it. Therefore we can again only answer in general terms.
Provided the payment of relevant foreign income by one spouse or civil partner into the joint account is the only income within that account (in other words, section 809Q is not in point) which is then used to pay the interest on the mortgage which meets the conditions within paragraph 90(1), then that payment would also fall within paragraph 90.

### 10.43.5 *Meaning of residential property*

Para 90(5) Sch 7 FA 2008 provides:

> In this paragraph "residential property" has the same meaning as in Part 4 of FA 2003 (see section 116 of that Act).

So we turn to s.116 FA 2003 to find the complex definition:

> (1) In this Part "residential property" means—
> (a) a building that is used or suitable for use as a dwelling, or is in the process of being constructed or adapted for such use, and
> (b) land that is or forms part of the garden or grounds of a building within para (a) (including any building or structure on such land), or
> (c) an interest in or right over land that subsists for the benefit of a building within para (a) or of land within para (b);
> and "non-residential property" means any property that is not residential property. This is subject to the rule in subsection (7) in the case of a transaction involving six or more dwellings.
> (2) For the purposes of subsection (1) a building used for any of the following purposes is used as a dwelling—
> (a) residential accommodation for school pupils;
> (b) residential accommodation for students, other than accommodation falling with subsection (3)(b);
> (c) residential accommodation for members of the armed forces;
> (d) an institution that is the sole or main residence of at least 90% of its residents and does not fall within any of paras (a) to (f) of subsection (3).
> (3) For the purposes of subsection (1) a building used for any of the following purposes is not used as a dwelling—
> (a) a home or other institution providing residential accommodation for children;
> (b) a hall of residence for students in further or higher education;
> (c) a home or other institution providing residential accommodation with personal care for persons in need of personal care by reason of old age, disablement, past or present dependence on alcohol or drugs or past or present mental disorder;
> (d) a hospital or hospice;

(e) a prison or similar establishment;
(f) a hotel or inn or similar establishment.
(4) Where a building is used for a purpose specified in subsection (3), no account shall be taken for the purposes of subsection (1)(a) of its suitability for any other use.
(5) Where a building that is not in use is suitable for use for at least one of the purposes specified in subsection (2) and at least one of those specified in subsection (3)—
(a) if there is one such use for which it is most suitable, or if the uses for which it is most suitable are all specified in the same sub-paragraph, no account shall be taken for the purposes of subsection (1)(a) of its suitability for any other use,
(b) otherwise, the building shall be treated for those purposes as suitable for use as a dwelling.
(6) In this section "building" includes part of a building.
(7) Where six or more separate dwellings are the subject of a single transaction involving the transfer of a major interest in, or the grant of a lease over, them, then, for the purposes of this Part as it applies in relation to that transaction, those dwellings are treated as not being residential property.
(8) The Treasury may by order—
(a) amend subsections (2) and (3) so as to change or clarify the cases where use of a building is, or is not to be, use of a building as a dwelling for the purposes of subsection (1);
(b) amend or repeal subsection (7) and the reference to that subsection in subsection (1).
Any such order may contain such incidental, supplementary, consequential or transitional provision as appears to the Treasury to be necessary or expedient.

## 10.43.6 *Commentary*

No reasons were ever given for the strikingly restricted features of transitional loan relief, so one is left to speculate. If the purpose of the relief is to assist those who have taken out loans on the assumption that the law which existed from 1956 to 2008 would govern the taxation of the interest, and who may now be unable to pay the interest, each of these restrictions are irrational. I surmise that the object was specifically to bolster the residential property market by preventing forced sales by foreign domiciliaries who are made unable to repay their mortgages: if so only the restriction of relief to RFI is irrational.[163]

Why the restriction to residential property? The reason may be that loans

163 It was probably based on the erroneous belief that under the pre-2008 rules, employment income or gains used to pay interest were regarded as remitted.

to acquire let property had a benevolent treatment under the pre-2008 remittance basis: the interest could be paid out of foreign income without a remittance, but the interest was deductible against the rent for the purpose of computing the profits of the UK property business. Similar points apply to other cases where interest is deductible. But if that is the aim then it is achieved in a very rough and ready manner. Those who borrowed to buy a house and improve it are particularly unfairly treated.

Perhaps the matter was not thought out at all and the only thinking was to provide the smallest possible transitional relief consistently with appeasing the banking lobby. Of course in the absence of any reasons being provided by HMRC, all the above can only be speculation.

## 10.44 Basic remittance basis planning: avoiding mixed funds

The best way to avoid any question of a remittance basis liability is simple in concept but administratively cumbersome. It is to keep in separate accounts (or sub-accounts) funds which are charged at different rates on remittance.

The starting point is to separate clean capital and other funds. Clean capital may consist of

(1) funds held before arrival in the UK.
(2) gifts[164] and inheritance.
(3) distributions from trusts if not caught by IT and CGT anti avoidance provisions (which normally requires some care).
(2) funds subject to UK tax (UK source income and gains; for taxpayers who do not claim the remittance basis every year, this includes income and gains from a year in which a remittance basis election is not made).

If funds are large enough, may be worth separating:

(1) Income taxable at 50% on remittance ("the 50% account").
(2) Income taxable at lower rates on remittance (because of DTR).
(3) Capital including gains with DTR.
(4) Capital including gains without DTR.
(5) Clean capital ("the clean capital account").

Funds can then be remitted from accounts with a lower or nil rate of tax. Income taxable at the top rate can be used abroad or reinvested.

164 Unless the donor is a a remittance basis taxpayer making a gift to a relevant person.

The clean capital account should be a sterling account as foreign currency could give rise to chargeable gains (without relief for losses). Treasury gilts would be an alternative investment possibility as no chargeable gains arise. Interest would be paid to the 50% account.

What if the individual does not want to tie up their funds in this way? Borrowing charged on the clean capital account may be a solution.

## 10.45 New relief for investment from 2012/13

The remittance consultation paper provides:

**Types of Business**

2.23 In order to encourage investment in a broad range of businesses the Government proposes to allow tax-free remittances for investment in the following types of business. They would be classed as "qualifying businesses" for the purposes of this policy:

• Businesses carrying out trading activity: it is proposed that this will follow the generally understood definition of "trading" as developed in case law, namely that trade generally involves the exchange of goods or services with a customer for reward. Trading on a commercial basis must constitute a substantial proportion of the overall activities of the business in which the individual invests.

• Businesses undertaking the development or letting of commercial property: this is generally carried on as a commercial business but may not technically fall within the definition of trading activity. The Government recognises that non-domiciles often want to invest in commercial property and that including it will broaden the appeal of the incentive. To qualify for tax relief, development or letting of commercial property must constitute a substantial proportion of the overall activities of the business.

2.24 This broad definition extends to all sectors of the economy and caters for entrepreneurial businesses as well as more traditional ones. It would encompass many of the businesses and sectors in which non-domiciles want to invest, for example manufacturing, retail, technology and importing goods. It would also include financial services businesses where a trade is being carried out.

2.25 In keeping with the intention of drawing this policy widely whilst preventing abuse, there are only a small number of areas that the Government proposes specifically to exclude from the definition of a qualifying business. These exclusions would apply even if the business would otherwise fall under the definition contained in paragraph 2.23:

• Holding and letting residential property: the Government is concerned that including this type of activity would introduce an unacceptable risk of the scheme being used for non-commercial purposes, such as an individual using a business to acquire a residential property in which they live. However, it is not intended to exclude all types of investment in residential property. For example, investing in a business that builds and develops residential property would be permitted, provided this business fell within the definition of trading activity. It is also proposed to allow investment in certain types of residential property such as nursing homes and hospitals where a commercial trade is carried on.

• Leasing: where the leasing of tangible moveable property (such as yachts, cars, furniture, pictures) or the provision of personal services (such as nannies, cooks, chauffeurs) is a part of the activities of the business. Excluding this type of business is consistent with the objective of ensuring the incentive is not used for noncommercial purposes or direct personal benefit.

2.26 The Government does not propose to make any other specific exclusions from the definition of a qualifying business.

**Form of Business**

2.27 The Government proposes to stipulate that overseas income and gains must be invested in companies if they are to be classed as tax-free remittances.

2.28 It is concerned that extending relief on remittances to other forms of business, such as partnerships, trusts and sole traders would expose the Exchequer to an unacceptable risk of avoidance and might allow overseas funds to be used for purposes that are not clearly commercial. For example, partnerships have been prone to being used to create artificial losses that are deducted against an individual's income tax bill.

2.29 Confining the policy to companies will be simple and transparent. The Government expects that, in the vast majority of cases, non-domiciled investors will wish to invest in companies and that this will not put unnecessary or prohibitive restrictions on the incentive. Subject to the definition in paragraph 2.23 and the limited exclusions proposed in paragraph 2.25, investment could be made in companies in any sector.

2.30 The Government is considering whether the new incentive should also apply to investment in companies listed on a recognised stock exchange and companies quoted on exchange-regulated markets, such as AIM and PLUS quoted. This would allow non-domiciles to remit income or capital gains free of tax to invest directly in listed companies, including the buying and selling of existing share capital.

2.31 The inclusion of listed companies would be consistent with the aim of designing a policy that encourages a range of investment activity. It might also avoid the need for provisions to deal with situations where companies become listed or de-list during the period of investment. However, it could mean that the benefit of the incentive would be less targeted at the businesses which have the greatest difficulty raising capital. It could also risk creating administrative complexity, for example due to the potentially high volume of transactions in listed companies and the need to keep records of the numerous purchases and sales of shares.

**Channel of investment**

2.33 A variety of investment vehicles already exist that enable individuals to invest in the UK, including offshore companies and trusts. The UK has rules to ensure that such investment vehicles pay their fair share of tax.

2.34 It is common for non-domiciles to hold money in offshore trusts but the tax treatment of remittances currently deters some offshore trusts and companies from investing in the UK. For this reason, it is not proposed to limit the new tax incentive to investments made directly by the individual. There will be no restriction on individuals remitting overseas income or capital gains which are held in investment vehicles or trusts. This will allow non-domiciles to invest in UK businesses using funds held in offshore companies and trusts without attracting a tax charge on the remittance.

2.35 The Government does not intend to introduce new rules on the tax treatment of income or capital gains generated in the UK by investments made in qualifying businesses through offshore channels. The existing tax treatment will continue to apply.

**Form of investment**

2.36 The Government recognises that funding UK companies through a mixture of share and loan capital is a normal commercial structure. It is common for non-domiciles to invest through preference shares and loans, as well as ordinary shares; often this is attractive as a means of reducing the risk of the investment.

2.37 Therefore, it does not propose to impose any restriction in this area and it will be possible for overseas income and capital gains to qualify as a tax-free remittance whether invested in shares or loans.

**UK businesses**

2.38 The Government wants to ensure that non-domiciles can invest in a range of companies, including those incorporated in other countries, and believes this will broaden the positive economic impact of this incentive. Therefore, it does not propose to restrict tax relief to investment in businesses that are resident in the UK or to businesses carrying out trades wholly or mainly in the UK. Relief will be extended to overseas income and capital gains remitted to invest in non-UK resident companies that have a permanent establishment in the UK.

2.39 While this approach would allow investments to be used for trades outside the UK, nondomiciled investors can already invest in such trades without remitting income or capital gains into the UK. It is therefore likely that in the vast majority of cases, non-domiciles will use the new incentives to invest in UK trades, which they cannot currently do without incurring a tax charge.

**Companies holding shares in other companies**

2.40 The Government proposes that the new tax incentive should also apply to overseas income and capital gains remitted to invest in companies which hold shares in other companies, provided the holding company only holds shares in businesses that:

• carry out business activity as defined in paragraph 2.23 and do not carry out excluded activity described in paragraph 2.25; and
• are companies; and
• are resident in the UK or have a permanent establishment in the UK.

2.41 The Government does not propose to introduce any other restrictions on the type of holding company that can qualify or the degree of ownership the company has over its subsidiary companies. This means that companies that hold shares in other companies and are resident outside the UK would be included. It also means that private equity companies and venture capital companies could qualify even where they do not have a majority ownership stake in the invested companies.

**Size of investment**

2.42 The Government would like to attract investment in the UK from non-domiciles regardless of their level of wealth. Therefore, it does not propose to set any upper or lower limit on the amount of overseas income or capital gains that can be remitted tax-free in a tax year for commercial investment in qualifying businesses. Imposing such limits would be restrictive and create complexity.

**Connection to the qualifying business**

2.43 It is not proposed to impose any restrictions on the investor's connections to the business in which they invest. The Government recognises that an investor may wish to work for or be a director of the business and that to prohibit this would undermine the effectiveness of the policy.

2.44 Investors will also be able to draw commercial remuneration from the company in which they invest. However, there will be provisions to prevent an investor taking non-commercial payments from the business as a way of converting their investment into tax-free money used for personal, rather than commercial, purposes. These are described in more detail in paragraph 2.52.
2.45 Equally, an investor may want to invest in a family-run business for which their children or other members of close family work. Therefore, these principles will extend to individuals who are connected to the investor and it is not proposed to impose any restrictions on such individuals working for, investing in or drawing commercial remuneration from the qualifying business.

**Anti-avoidance**

2.46 It is critical to ensure that Exchequer revenue is protected and that appropriate provisions are put in place to prevent abuse of the new rules for non-commercial purposes.
2.47 In particular, the Government is concerned to prevent:

• non-domiciles investing in low-risk businesses for a limited period and then taking out the original investment tax-free to enjoy in the UK; and
• investment leaking out from companies to individuals for non-commercial purposes during the period of investment.

2.48 At the same time the Government recognises that complicated anti-avoidance provisions could deter non-domiciles from using this new incentive and believes that both these risks can be tackled by relatively straightforward provisions.
2.49 Firstly, it proposes a provision to require that overseas income or capital gains remitted for investment in a qualifying business must be taken out of the UK when the investment is disposed of. It is proposed that this must take place within two weeks of the individual receiving the money generated by the disposal of the investment. If the original investment remains in the UK for longer than this period after receipt of the money, it will be treated as a taxable remittance of the original income or capital gains used for the investment and be subject to the usual remittance basis rules. However, there will be provisions to allow individuals to reinvest the overseas income or capital gains in other qualifying businesses without the need to take themback out of the UK, provided this takes place before the end of a period of two weeks after receipt of the money generated by the disposal of the original investment.
2.50 This provision means that it would be unnecessary to impose restrictions on the length of time for which the investment must be held. It also avoids the need for complicated rules to govern how the money can be used in the UK after disposal of the investment.
2.51 It is not intended to create detailed rules to identify which particular holding of shares in or loans to a company is related to the income or capital gains used for the investment. This would be complicated to legislate and to administer. Therefore, the amount of overseas income or capital gains used to fund the qualifying investment will be identified with the first amounts of value taken out of the business which are not a permitted commercial payment until the amount of the income or gains have been matched.
2.52 Secondly, the Government proposes to introduce a provision to prevent the value of the investment leaking out to the individual either directly through payments or loans which are not arms-length or through transactions designed to pass value to the individual.

For example, it would not be permitted for the company to use the funds invested to guarantee loans made to the individual; nor would it be possible to make payments to a third party which are linked to payments made to the individual. This would not prevent an individual or a connected person enjoying commercial levels of remuneration from the company in which they invest or receiving dividends or interest out of profits made by the business after the investment has occurred.

2.53 In addition, there will be provisions to prevent non-domiciles buying a pre-existing business from themselves by selling it to a new company funded by income remitted from overseas. This would create no new business investment in the UK and would merely transfer legal ownership whilst the individual continues to own the business.

**Claiming the relief**

2.54 This policy will not require non-domiciles to invest in businesses that are approved or vetted by the Government. To do so would create onerous burdens for businesses and potential investors, as well as operational costs for Her Majesty's Revenue and Customs (HMRC). However, it is important for the Government to be able to monitor the policy, assess its effectiveness and police the new rules.

2.55 Any non-domicile who uses this business investment incentive would already be required to complete an annual SA tax return under current rules in order to claim the remittance basis. This is not a new requirement. The Government's preference is to make it mandatory for an individual who pays tax under the remittance basis and remits income or capital gains for business investment to make a claim for this new relief on their SA tax return.

2.56 The Government is conscious that it would be counter-productive to require extensive disclosure. Therefore, it proposes only to request basic information related directly to the business investment incentive. Under this approach the individual could be required to state:

• whether they had remitted income or capital gains to the UK for investment in a qualifying business;
• how much they had remitted for this purpose; and
• in what businesses they had invested.

2.57 The information would enable the Government to monitor how the funds remitted for qualifying business investment are used in the UK. The Government would not require disclosure about the source of income or capital gains remitted to the UK for the purpose of investment or the channel through which they were remitted. Additional disclosure in connection with remittances made for purposes other than business investment or other aspects of the remittance basis would not be required as part of the claim for relief.

**Interaction with the remittance basis charge**

2.58 Individuals who make tax-free remittances under the business investment scheme will still be required to pay the annual £30,000 or £50,000 charge in full if they have been resident in the UK for the relevant number of years and elect to be taxed on the remittance basis. It is not proposed to reduce or waive the remittance basis charge for these individuals. To do so would introduce significant complexity and cost to the policy. The Government considers that the proposed tax relief for business investment provides a strong investment incentive notwithstanding the possible requirement for an individual to pay the remittance basis charge.

2.59 Individuals who choose to be taxed on all their worldwide income and capital gains instead of paying the remittance basis charge will, by definition, not benefit from the business investment incentive because their overseas income or capital gains will be liable to UK tax when they arise and before they are remitted to the UK.It is astonishing that the 2008 reforms failed to include a relief of this kind, thus obstructing UK investment.[165]

Whether the proposed new relief achieves anything useful must remain to be seen, but the length of the explanation of the proposals is not an encouraging start.

CHAPTER ELEVEN

# MIXED FUNDS

## 11.1 Mixed funds - Introduction

It may be helpful to outline the problem which the mixed fund rules are intended to address. Suppose a person holds a fund which includes different types of income/gains, or income/gains of different years. If the person remits part of the fund, it is necessary to know which type of income or gains have been remitted (as different rates apply) and income or gains of which year have been remitted (as different rates may apply and different rules may apply to income of different years). The mixed fund rules are intended to answer these questions.

I coin the following terminology:

**"The ITA mixed fund regime"** means the set of rules set out in s.809Q to 809S ITA.

**"The pre-2008 mixed fund regime"** means the case law rules applicable before 2008/09.

## 11.2 Definition of "mixed fund"

Section 809Q(6) ITA provides:

> In this section "mixed fund" means money or other property which, immediately before the transfer, contains or derives from—
> (a) more than one of the kinds of income and capital mentioned in subsection (4), or
> (b) income or capital for more than one tax year.

This is only a section-wide definition so the drafter has to repeat it in the next section where the expression "mixed fund" is used again.

One must first identify what is the fund, and then identify the constituents which it contains (or derives from).

### 11.2.1 *Identifying the fund*

Funds are distinct, ie, not mixed, if they are held in separate accounts or sub-accounts at one bank (even though a bank in principle owes only a single debt to its customer). HMRC agree. The RDR Manual provides:

> **35230 Remittances from mixed funds**
> *No Mixed Fund*
> Also, a mixed fund does not exist just because the individual has several accounts with the same banking institution, if each account is separately constituted and contains only one of the relevant types of income *from only one year*. This will usually include bank accounts set up as sub-accounts under an "umbrella" agreement.
> If income and capital sources from a tax year are maintained separately (sometimes referred to as "kept clean" or "clean capital") no mixed fund is created, and so these rules will not apply.

The manual then gives a straightforward example.[1]

Accordingly one can in principle avoid mixing income with other funds by arranging that the income is paid to a separate bank account. If one does that it will be possible to remit capital and to keep income unremitted.

The RDR Manual provides:

> **33560. Banking Issues** [July 2010]
> *Interest credits to a capital account*
> Often interest on a maturing deposit is credited to the same account comprising the principal capital investment, but under the bank's normal internal system the interest is then immediately and identifiably transferred to an income account.

---

1 "For example, an individual maintains three separate accounts with the same offshore institution:
Account A into which he pays his relevant foreign earnings for the tax year
Account B into which he pays some inherited money (clean capital)
Account C into which he pays some relevant foreign income for the tax year
As long as these accounts do not become mixed funds, the individual can bring money into the UK from Account B and that will be accepted as a being a transfer of "clean" capital, and so will not be a taxable remittance."

> Where a mixed fund such as this is created fleetingly by an operation of the banking system, HMRC will accept that the interest credit will not taint the principal and so the mixed fund rules in s809Q to s809S do not apply.

At first sight this practice may seem concessionary. However, it is a sensible commercial construction of the statute to say that a sum only "fleetingly" in an account should not to be said to become "mixed".

The position is different for capital gains. A capital gain has no separate identifiable existence so the proceeds of a disposal giving rise to a gain are always a mixed fund.[2] For accrued income profits see 33.9 (AIP remittance basis).

## 11.3 Ingredients of a mixed fund

We turn to s.809Q(4) ITA to see what kinds of income and capital may make up a mixed fund:

> The kinds of income and capital are—
> (a) employment income (other than income within para (b), (c) or (f)),
> (b) relevant foreign earnings (other than income within para (f)),
> (c) foreign specific employment income (other than income within para (f)),
> (d) relevant foreign income (other than income within para (g)),
> (e) foreign chargeable gains (other than chargeable gains within para (h)),[3]
> (f) employment income subject to a foreign tax,
> (g) relevant foreign income subject to a foreign tax,
> (h) foreign chargeable gains subject to a foreign tax, and
> (i) income or capital not within another paragraph of this subsection.

I refer to these nine categories as "**the mixed fund categories**". The order in which these categories is placed is important: I call this "**the mixed fund priority order**".

An individual needs to classify every mixed fund into these nine

2 See 10.13.2 (What is the gain?)

3 This applies even in the case of an individual who is resident, not ordinarily resident and UK domiciled, who qualifies for the remittance basis for income but not for gains.

categories for 2008/09 and for every subsequent year. This requires vastly more record keeping than the pre-2008 mixed fund regime.

Income which accrues to an individual when they are non-resident is not RFI[4] (even foreign interest, dividends, etc which would be RFI if received by a UK resident). Similarly, earnings received by a non-resident are not employment income.[5] Such income falls into the bottom category (i). But all income of the year of arrival and departure constitutes RFI or employment income, even if ESC A11 applies.

Chargeable gains from non-UK assets which accrue to an individual when they are non-resident *are* foreign chargeable gains.[6] Such gains will fall within category (e) or (h) depending on whether they are subject to a foreign tax.

What if an individual receives foreign income or gains which are taxable, either because they are remitted to the UK or because no remittance basis claim is made in that year? The sums do not cease to be foreign income or gains, so they remain in their relevant categories (a) to (h).

### 11.3.1 *"Foreign tax"*

I refer to income/gains which are subject to a foreign tax as **"foreign-taxed"**. This affects the mixed fund categories in the following way:

| | **Not foreign-taxed** | **Foreign-taxed** |
|---|---|---|
| **RFE** | para (b) | para (f) |
| **FSEI** | para (c) | para (f) |
| **RFI** | para (d) | para (g) |
| **Gains** | para (e) | para (h) |

The object is to increase UK tax by deferring the remittance of items subject to a foreign tax, so deferring foreign tax credits. This (surely unfair) policy comes at a considerable cost in complexity, since it roughly doubles the number of mixed fund categories and the record keeping.

Section 809Q(5) ITA defines "foreign tax":

4 Because it does not meet the condition in s.830(1)(b) ITTOIA; see 9.3.1 (Relevant foreign income).

5 Unless within s.27 ITEPA (duties performed in UK or overseas Crown employment).

6 See 43.1 (Territorial scope of CGT) and 9.3.4 (Foreign chargeable gains).

> In subsection (4) "foreign tax" means any tax chargeable under the law of a territory outside the UK.

At first I thought that tax deducted under the EU Saving Directive is not "foreign tax". The EU is not a territory outside the UK. But if tax is deducted in, say, Luxembourg, perhaps the better view is that the tax is chargeable under the law of *Luxembourg* so the tax is a foreign tax. The position may depend on whether or not the EU directive has direct effect in the MS concerned.

### 11.3.2 *"Subject to a foreign tax"*

The RDR Manual provides:

> **35240 Remittances from mixed funds - Identifying nature of remittance**
> ...
> Occasionally UK resident remittance basis users' UK employment income may be "subject to foreign tax", that is to say another country (usually their country of nationality or citizenship) will also tax them on this income. In these cases HMRC will accept that the individual's UK source employment income may still be regarded as within para (a) in the mixed fund, unless the individual requests otherwise, in which case it will remain to fall within para (f) as employment income subject to a foreign tax.

This is obviously an extra-statutory concession.

> This is only relevant where the other country has in fact subjected the UK employment income under consideration to their tax. In some cases no tax will, in fact, have been due in or paid to the other country due to various exemptions and provisions, (for example the US has a "foreign earned income exclusion" provision to employment income below a certain level), so the UK employment income will be within para (a) anyway.

This is not correct as it is not consistent with the approach applied elsewhere in deciding what is "subject to tax": see 50.22 ("Subject to tax"). But it will normally suit taxpayers to treat UK earnings as category (a) so it will not be contested.

Section 809Q(8) ITA provides:

> References in this section and section 809R to anything deriving from income or capital within para (i) of subsection (4) do not include—
> (a) income or gains within any of paras (a) to (h) of that subsection, or
> (b) anything deriving from such income or gains.

### 11.3.3 *Finding the income and capital for the year*

Step 1 in s.809Q(3) ITA provides:

> For each of the categories of income and capital in paragraphs (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.

Income for any year is not difficult to identify, for the tax system often requires one to attribute income to a tax year. Chargeable gains for any year are not difficult to identify, for they accrue on a particular date. What about "other capital" falling within category (i)? That would include:
(1) gifts, inheritance;
(2) borrowed money;
(3) chargeable event gains on a surrender of a life policy.
It is considered these must be capital for the year in which it is received. If an asset is sold, the HMRC examples assume that the capital is received at the date of disposal; see eg the example of Martyn (below).

Suppose:
Year 1: T uses RFI to purchase a policy for £1m.
Year 5: T surrenders the policy for £2m and realises a chargeable event gain of £1m (taxable on the arising basis). T remits £1m.

The £1m remitted is category (i) "other capital" of year 5, so there is no further charge on the remittance.

### 11.3.4 *Derived property*

Section 809R ITA provides:

> **809R Section 809Q: composition of mixed fund**
> (1) This section applies for the purposes of step 1 of section 809Q(3)

> (composition of mixed fund).
> (2) Treat property which derives wholly or in part (and directly or indirectly) from an individual's income or capital for a tax year as consisting of or containing that income or capital.

That seems self evident.

### 11.3.5 *Income/gains used to repay debt*

Section 809R(3) ITA provides:

> If a debt relating (wholly or in part, and directly or indirectly) to property is at any time satisfied (wholly or in part) by—
> (a) an individual's income or capital for a tax year, or
> (b) anything deriving (directly or indirectly) from such income or capital,
> from that time treat the property as consisting of or containing the income or capital if and to the extent that it is just and reasonable to do so.

Suppose:
(1) T borrows from L and receives "the borrowed money".
(2) T uses RFI to repay the debt to L.
In the absence of a statutory deeming provision, one would not say that the borrowed money was derived from the RFI, or that the borrowed money consists of or contains the RFI.[7] However the borrowed money is treated as containing or consisting of the RFI so far as is just and reasonable. When is that just and reasonable? The drafter has given up here. Perhaps only so far as it practical to make that tracing exercise.

## 11.4 Onshore transfer mixed fund rule - Introduction

### 11.4.1 *Scope of onshore transfer rule*

Section 809Q ITA provides:

> (1) This section applies for the purposes mentioned in subsection (2) ...

7 See 10.14.10 (Income/gains used to pay debt).

> (2) The purposes referred to in subsection (1) are—
> (a) determining whether condition B in section 809L is met, and
> (b) if it is met, determining (under section 809P) the amount of income or chargeable gains remitted.

Accordingly, the onshore transfer mixed fund rule does not apply for the purposes of remittance basis conditions C or D. This was presumably because those conditions do not always require the use of foreign income/gains or property derived from it. Fortunately conditions C and D will not often apply. So in practice the mixed fund rule applies for most remittance purposes. When conditions C and D are in point, one applies the pre-2008 mixed fund regime.

### 11.4.2 *Onshore transfer*

Section 809Q(1) ITA provides:

> This section applies ... where condition A in section 809L is met[8] and—
> (a) the property or consideration for the service is (wholly or in part), or derives (wholly or in part, and directly or indirectly) from, a transfer from a mixed fund, ...

The drafter has confused a transfer and the property transferred by a transfer, but the meaning is clear enough. Expanding this, it should be read to mean:

> This section applies ... where condition A in section 809L is met and—
> (a) [i] the property or consideration for the service is (wholly or in part) ... [property transferred by] a transfer from a mixed fund, or
> [ii] the property or consideration for the service ... derives (wholly or in part, and directly or indirectly) from [property transferred by] a transfer from a mixed fund...

The next part of s.809Q(1) deals with debt remittances:

> This section applies ... where condition A in section 809L is met and—
> (b) a transfer from a mixed fund, or anything deriving (wholly or in

8 See 10.11 (Remittance condition A (link to UK)).

> part, and directly or indirectly) from such a transfer, is used as mentioned in section 809L(3)(c).

I refer to a transfer to which s.809Q applies as an **"onshore transfer"**. In short, there is an onshore transfer in six cases:

(1) A relevant person receives UK property which:
 (a) is from a mixed fund or
 (b) is derived from a mixed fund
(2) A relevant person receives a UK service, consideration for which:
 (a) is from a mixed fund or
 (b) is derived from a mixed fund
(3) A relevant debt:
 (a) is satisfied out of a mixed fund or
 (b) is satisfied out of a fund derived from a mixed fund.

### 11.4.3 *Transfer*

Transfer is not defined but the context shows that it means any payment out of the mixed fund, whether or not for consideration.

Section 809Q(7) ITA defines the amount of a transfer:

> References in this section to the amount of the transfer include the market value of it.

Strictly one must value the asset transferred, not the transfer, but the meaning is clear.

## 11.5 Onshore transfer mixed fund rule

We can turn at last to the rule itself. Section 809Q(3) ITA provides:

> The extent to which the transfer is of the individual's income or chargeable gains is to be determined as follows.

Section 809Q(3) ITA then sets out five steps. It is easier to follow the steps if one has an example in mind. Suppose T (a remittance basis taxpayer) receives £100 per annum of each of the mixed fund categories and pays them into one mixed fund:

| Category | Type of income | Year 1 | Year 2 |
|---|---|---|---|
| Para (a) | UK earnings | £100 | £100 |
| Para (b) | relevant foreign earnings | £100 | £100 |
| Para (c) | FSEI | £100 | £100 |
| Para (d) | relevant foreign income | £100 | £100 |
| Para (e) | foreign chargeable gains | £100 | £100 |
| Para (f) | foreign-taxed earnings | £100 | £100 |
| Para (g) | foreign-taxed RFI | £100 | £100 |
| Para (h) | foreign-taxed gains | £100 | £100 |
| Para (i) | other income and capital | £100 | £100 |

There is therefore a mixed fund of £1800. Suppose T remits nothing in year 1 and £1,000 to the UK in year 2. This is an onshore transfer. One follows the steps thus:

> *Step 1*
> *For each of the categories of income and capital in paras (a) to (i) of subsection (4), find (applying section 809R) the amount of income or capital of the individual for the relevant tax year in the mixed fund immediately before the transfer.*
> *"The relevant tax year" is the tax year in which the transfer occurs.*

In the example, the relevant tax year is year 2. I consider this further below but for present purposes assume that "the amount of income or capital of the individual in the mixed fund immediately before the transfer" is as set out in the table above.

> *Step 2*
> *Find the earliest paragraph for which the amount determined under step 1 is not nil.*

The earliest paragraph is para (a) and the amount determined under step 1 is £100.

> *If that amount does not exceed the amount of the transfer, treat the transfer as containing the income or capital within that paragraph (and for that tax year).*

T's transfer is treated as containing £100 employment income category (a) for year 2.

*Otherwise, treat the transfer as containing the relevant proportion of each kind of income or capital within that paragraph (and for that tax year).*
*"The relevant proportion" is the amount of the transfer divided by the amount determined under step 1 for that paragraph.*

(Had the transfer been (say) £50 then the relevant proportion would have been £50 ÷ £100 = 50% so the transfer would have been treated as containing £50 employment income category (a) for year 2.)

*Step 3*
*Treat the amount of the transfer as reduced by the amount taken into account under step 2.*

The amount of the transfer is reduced to £900.

*Step 4*
*If the amount of the transfer (as reduced under step 3) is not nil, start again at step 2.*
*In step 2, read the reference to the earliest paragraph of the kind mentioned there as a reference to the earliest such paragraph which has not previously been taken into account under that step in relation to the transfer.*

Following this iterative process a total of nine times, the transfer is treated as containing:

| | | |
|---|---|---|
| (a) | employment income | £100 |
| (b) | relevant foreign earnings | £100 |
| (c) | foreign specific employment income | £100 |
| (d) | relevant foreign income | £100 |
| (e) | foreign chargeable gains | £100 |
| (f) | foreign-taxed employment income | £100 |
| (g) | foreign-taxed RFI | £100 |
| (h) | foreign-taxed gains | £100 |
| (i) | other income and capital | £100 |
| | **Total** | **£900** |

The amount of the original £1,000 transfer is by this stage treated as reduced to £100. We move to the next step:

*Step 5*
*If the amount of the transfer (as reduced under step 3) is not nil once steps 2 and 3 have been undertaken in relation to all paragraphs of subsection (4) for which the amount determined under step 1 is not nil, start again at step 1.*
*In step 1, read the reference to the relevant tax year as a reference to the tax year immediately before the last tax year for which step 1 has been undertaken in relation to the transfer.*

Thus we repeat step 2 a last and tenth time, reading "the relevant tax year" to mean year 1. So the transfer of £1,000 from the mixed fund is treated as being:

| Category | Type of income | Year | Amount |
|---|---|---|---|
| Para (a) | UK earnings | 2 | £100 |
| Para (b) | relevant foreign earnings | 2 | £100 |
| Para (c) | FSEI | 2 | £100 |
| Para (d) | relevant foreign income | 2 | £100 |
| Para (e) | foreign chargeable gains | 2 | £100 |
| Para (f) | foreign-taxed earnings | 2 | £100 |
| Para (g) | foreign-taxed RFI | 2 | £100 |
| Para (h) | foreign-taxed gains | 2 | £100 |
| Para (i) | other income and capital | 1 | £100 |

In order to reach this answer for one single transfer we have had to carry out 37 steps.[9] Yet it will be common for there to be hundreds or thousands of transfers from any mixed fund.

### 11.5.1 *Commentary: drafting style*

The effect of the onshore transfer mixed fund rule is that transfers from a mixed fund are treated as being made in the mixed fund priority order, taking more recent years before earlier years. Why didn't the statute simply say so? For a discussion of the drafting style, see 45.10.7 (Commentary: step-based drafting). But the fundamental problem is not the drafting, but conception of the mixed fund rule.

9 Steps 1–4 were each carried out 9 times and step 5 once.

### 11.5.2 HMRC examples: mixed funds

The RDR Manual provides examples. I set them out more or less verbatim but rearrange and omit some irrelevant detail for clarity.

### 11.5.3 *One transfer from mixed fund: RFE, RFI and UK EI of one year*

The first example involves a single onshore transfer out of a mixed fund containing RFE, RFI and UK employment income of one year.

> **RDRM 35280**
> **Example 1 (Amelia)**
> A, a remittance basis user, has an offshore account with mixed funds as follows:
> - foreign earnings from two employers totalling £40,000 per month, half of which is subject to foreign tax [mixed fund categories (b) and (f)]
> - relevant foreign income of £10,000 per quarter, which is not subject to foreign tax [mixed fund category (d).
> - some of her UK employment income (£50,000 per month) which has already been subject to tax in the UK is paid into the same offshore bank account [mixed fund category (a)]
> On 15 October 2010 A purchases an aircraft for £460,000, which she brings to the UK.

Since the account was opened in the tax year, we have an account with 20 credits and one debit (an onshore transfer) thus:

| **2009-10** | | **Credit (Debit)** | **Balance** | **Category S809Q(4)** |
|---|---|---|---|---|
| 30 April | UK salary | £50,000 | £50,000 | Para (a) |
| 30 April | Overseas salary NFT[10] | £20,000 | £70,000 | Para (b) |
| 30 April | Overseas salary FT[11] | £20,000 | £90,000 | Para (f) |
| 31 May | UK salary | £50,000 | £140,000 | Para (a) |
| 31 May | Overseas salary NFT | £20,000 | £160,000 | Para (b) |
| 31 May | Overseas salary FT | £20,000 | £180,000 | Para (f) |
| 2 June | RFI | £10,000 | £190,000 | Para (d) |
| 30 June | UK salary | £50,000 | £240,000 | Para (a) |
| 30 June | Overseas salary NFT | £20,000 | £260,000 | Para (b) |
| 30 June | Overseas salary FT | £20,000 | £280,000 | Para (f) |
| 31 July | UK salary | £50,000 | £330,000 | Para (a) |
| 31 July | Overseas salary NFT | £20,000 | £350,000 | Para (b) |
| 31 July | Overseas salary FT | £20,000 | £370,000 | Para (f) |

10 Not foreign-taxed.

11 Foreign-taxed.

| | | | | |
|---|---|---|---|---|
| 31 Aug | UK salary | £50,000 | £420,000 | Para (a) |
| 31 Aug | Overseas salary NFT | £20,000 | £440,000 | Para (b) |
| 31 Aug | Overseas salary FT | £20,000 | £460,000 | Para (f) |
| 2 Sept | RFI | £10,000 | £470,000 | Para (d) |
| 30 Sept | UK salary | £50,000 | £520,000 | Para (a) |
| 30 Sept | Overseas salary FT | £20,000 | £540,000 | Para (f) |
| 30 Sept | Overseas salary NFT | £20,000 | £560,000 | Para (b) |
| 15 Oct | Aircraft purchase | (£460,000) | £100,000 | |

| | |
|---|---|
| **Step 1** Identify the "amount of transfer" in the relevant year (2010-11) | £460,000 |
| Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer: | |
| Para (a) UK employment income | £300,000 |
| Para (b) Relevant foreign earnings (not subject to a foreign tax) | £120,000 |
| Para (d) RFI (not subject to a foreign tax) | £20,000 |
| Para (f) Employment income subject to a foreign tax | £120,000 |
| **Step 2** Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund: Para (a) | £300,000 |
| **Step 3** Where the amount transferred is greater than the amount identified at Step 2 the amount transferred is treated as reduced by the amount identified in Step 2. | £460k less £300k = <u>£160,000</u> |
| **Step 4** Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3. | |
| **Step 2** repeated: Para (b) | £120,000 |
| **Step 3** repeated Amount transferred further reduced to: | £40,000 |
| **Step 4** In the order of preference listed above repeat Steps 2 and 3. | |
| **Step 2** repeated: Para (d) | £20,000 |
| **Step 3** repeated Amount transferred further reduced to: | £20,000 |
| **Step 4** In the order of preference listed above repeat Steps 2 & 3. | |
| **Step 2** Para (f) | £120,000 |
| **Step 3** If the amount at Step 2 is equal to or more than the remaining amount of the transfer (the last time step 3 was completed) treat the whole of the remaining amount of the transfer as coming from that item of income or gain | £nil |

There has been a transfer to the UK of £460,000. Of this, £300,000 is from UK employment income which has already been taxed, so will not be taxed again. There have also been taxable remittances of A's relevant foreign earnings (£140,000 (£20,000 of which was subject to a foreign tax) and relevant foreign income (£20,000)).
£100,000 of taxed foreign employment income (para f) remains in the offshore account fund.

*Moral:* A should have kept her taxed foreign earnings separate so that they could be remitted. The tax on that remittance would be less because the foreign tax credit would be available. If A had kept all the sources of income separately, she would also have been saved the significant administrative costs of the computation.

### 11.5.4 *Single transfer: mixed fund RFI of earlier years and gain of later year*

The next example is a single onshore transfer from a mixed fund with RFI of earlier years and a chargeable gain of a later year.

**RDRM 35290**
**Example 2** (Jason)
In Year 1 J purchases shares in a foreign company for £8m. The £8m represents J's 'clean' capital, being perhaps an inheritance or similar such windfall.
In Year 3 J later sells the shares for £10m, which produces a £2m chargeable gain. The sale proceeds are credited in Year 3 to his overseas bank account that contains some relevant foreign income from the last two tax years, but no other monies.
There is now a mixed fund, containing capital from Year 1, and a foreign chargeable gain from Year 3 and some relevant foreign income from Years 2 and 3.
Later in Year 3 J, a remittance basis user, brings £5m to the UK from that account. The ordering rules in ITA07/s809Q mean that all of the relevant foreign income and the £2m gain from Year 3 is treated as remitted before any of the capital can be considered as remitted.
If the mixed fund also included other amounts of income or capital gains for that tax year (Year 2 or 3), those amounts must also be taken into account before any of the 'capital' element of the proceeds, (that is the £8m that is not a gain) realised by the sale of shares can be considered.

## 11.5.5 *Example: transfers from mixed fund accruing over 2 years*

The next example involves a single onshore transfer out of a mixed fund of RFE, RFI and UK earnings and chargeable gains, accruing over a two year period.

**RDRM 35300, 35310**
**Example 3** (Jeff)
J has:
- UK salary of £10,000 a month paid into an overseas bank account [mixed fund category (a)]
- a salary for overseas employment and his net salary for that work of £5,000 a month is paid into the same bank account. Both salaries are paid on the last day of each month [mixed fund category (f)]
- Dividends from a shareholding in a foreign company are also paid into the account [assumed subject to a foreign tax - mixed fund category (g)]

In Year 0, J had purchased shares in a foreign company for £8m. The £8m is accepted as representing J's "clean" capital, an inheritance. J sells the shares in Year 2 for £10m, which produces a £2m chargeable gain [mixed fund category (e) and (i)].

J's remittances to the UK from this fund in that year are £10m.

His UK salary is credited net of PAYE and NIC. His overseas salary is subject to a foreign tax deducted at source, and is credited net. His overseas dividends are credited gross.

| | | **Credit (Debit)** | **Balance** | **Category** |
|---|---|---|---|---|
| **Year 1** | | | £nil | |
| 31 March | UK salary (net of tax) | £10,000 | £10,000 | Para (a) |
| 31 March | Overseas salary FT | £5,000 | £15,000 | Para (f) |
| **Year 2** | | | | |
| 30 Apr | UK salary | £10,000 | £25,000 | Para (a) |
| 30 Apr | Overseas salary | £5,000 | £30,000 | Para (f) |
| 15 May | Dividend | £2,000 | £32,000 | Para (g) |
| 15 May | UK salary | £10,000 | £42,000 | Para (a) |
| 31 May | Overseas salary | £5,000 | £47,000 | Para (f) |
| 18 June | Sale of shares (£8m capital and £2m gain) | £2,000,000 | | Para (e) |
| | (no foreign tax) | £8,000,000 | £10,047,000 | Para (i) |
| 30 Jun | UK salary | £10,000 | £10,057,000 | Para (a) |
| 30 Jun | Overseas salary | £5,000 | £10,062,000 | Para (f) |
| 25 Jul | Dividend | £2,000 | £10,064,000 | Para (g) |
| 31 Jul | UK salary | £10,000 | £10,074,000 | Para (a) |
| 31 Jul | Overseas salary | £5,000 | £10,079,000 | Para (f) |
| 31 Jul | Bank interest | £5,000 | £10,084,000 | Para (d) |
| 14 Aug | Transfer to UK account | (£10,000,000) | £84,000 | |
| 31 Aug | UK salary | £10,000 | £94,000 | Para (a) |
| 31 Aug | Overseas salary | £5,000 | £99,000 | Para (f) |

Applying the ordering rules in S809Q to the account immediately before the transfer:

**Step 1** Identify the "amount of transfer" in the relevant tax year (Year 2) — £10,000,000

Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

| | |
|---|---|
| **Para (a)** Employment income (including UK employment income) not subject to a foreign tax | Year 1 – £10,000<br>Year 2 – £40,000 |
| **Para (d)** Relevant foreign income (not subject to a foreign tax) | Bank interest<br>Year 2 - £5,000 |
| **Para (e)** Foreign chargeable gains (not subject to a foreign tax) | Year 2 - £2,000,000 |

| | |
|---|---|
| **Para (f)** Employment income subject to a foreign tax | Year 1 - £5,000<br>Year 2 - £20,000 |
| **Para (g)** Relevant foreign income subject to a foreign tax | Foreign dividends<br>Year 2 - £4,000 |
| **Step 2** Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund: | |
| **Para (a)** | £40,000 |
| **Step 3** Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2. | £10m less £40k = <u>£9,950,000</u> |
| **Step 4** Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3. | |
| **Step 2** **Para (d)** | £5,000 |
| **Step 3** | £9,955,000 |
| **Step 4** In the order of preference listed above repeat Steps 2 and 3 | |
| **Step 2** **Para (e)** | £2m |
| **Step 3** | £7,955,000 |
| **Step 4** In the order of preference listed above repeat Steps 2 and 3 | |
| **Step 2** **Para (f)** | £20,000 |
| **Step 3** | £7,935,000 |
| **Step 4** In the order of preference listed above repeat Steps 2 and 3 | |
| **Step 2** **Para (g)** | £4,000 |
| **Step 3** | £7,931,000 |
| **Step 4** In the order of preference listed above repeat Steps 2 and 3 | |
| **Step 2** If the amount is more than the [residual] "relevant amount", treat the whole of the remittance as coming from that item of income or gain. **Para (i)** | £8m |

The result of this exercise is that

- All of J's UK salary in tax year 2 is deemed to have been brought to the UK first.
- Similarly all of his foreign income and gains of tax year 2 are treated as remitted to the UK and chargeable to tax at the appropriate rates of tax – allowing credit for foreign taxes charged on that same income as appropriate.
- £7,931,000 capital has also been brought to the UK.

Until such time as further amounts of income and gains are credited to the overseas account, the mixed fund contains £69,000 of capital (from the sale of shares) together with £15,000 income of the previous tax year (Year 1).

The next part of the example has two more transfers from the mixed fund.

**Remittances from mixed funds – identifying nature of remittance – Example 3a (continuation)**

Immediately after the £10m transfer in Year 2 (see example 3) J's mixed fund contains £69,000 of capital (from the sale of shares) and £5,000 overseas employment income of the previous tax year (Year 1).

For the rest of Year 2, J continues to have his UK salary of £10,000 a month and his relevant foreign earnings of £5,000 a month paid into that same account. Both salaries are paid on the last day of each month. There are no further credits or debits from the account in Year 2.

J also writes two cheques to pay bills. These amounts are identified as being 15 October to buy a car and 3 February to pay for building work on his UK property. The final debit on the account (£100,000) is for the purchase of shares in a UK company. All three of these amounts are remittances from a mixed fund to which the rules in s809Q apply.

His UK salary is credited net of PAYE and NIC. His overseas salary is subject to a foreign tax deducted at source, and is credited net. His overseas dividends are also credited to the account net of overseas withholding taxes.

| | | Credit (Debit) | Balance | Category |
|---|---|---|---|---|
| **Year 2** | Balance b/f | | £99,000 | |
| 30 Sept | UK salary (net of tax) | £10,000 | £109,000 | Para (a) |
| 30 Sept | Overseas salary (net of tax) | £5,000 | £114,000 | Para (f) |
| 31 Oct | UK salary | £10,000 | £124,000 | Para (a) |
| 31 Oct | Overseas salary | £5,000 | £129,000 | Para (f) |
| 30 Nov | UK salary | £10,000 | £139,000 | Para (a) |
| 30 Nov | Overseas salary | £5,000 | £144,000 | Para (f) |
| 31 Dec | UK salary | £10,000 | £154,000 | Para (a) |
| 31 Dec | Overseas salary | £5,000 | £159,000 | Para (f) |
| 31 Jan | UK salary | £10,000 | £169,000 | Para (a) |
| 31 Jan | Overseas salary | £5,000 | £174,000 | Para (f) |
| 28 Feb | UK salary | £10,000 | £184,000 | Para (a) |
| 28 Feb | Overseas salary | £5,000 | £189,000 | Para (f) |
| 31 Mar | UK salary | £10,000 | £199,000 | Para (a) |
| 31 Mar | Overseas salary | £5,000 | £204,000 | Para (f) |
| **Year 3** | | | | |
| 30 April | UK salary | £10,000 | £214,000 | Para (a) |
| 30 April | Overseas salary | £5,000 | £219,000 | Para (f) |
| 15 May | Dividend | £2,000 | £221,000 | Para (g) |
| 31 May | UK salary | £10,000 | £231,000 | Para (a) |
| 31 May | Overseas salary | £5,000 | £236,000 | Para (f) |
| 30 June | UK salary | £10,000 | £246,000 | Para (a) |
| 30 June | Overseas salary | £5,000 | £251,000 | Para (f) |
| 30 June | purchase UK shares | (£150,000) | £101,000 | |
| 3 July | Transfer to UK | (£5,000) | £96,000 | |

**Note 1**

The direct debit on 30 June (£150,000) is a remittance from a mixed fund. Applying the ordering rules in S809Q to the account immediately before the transfer:

Step 1 Identify the "amount of transfer" in the relevant tax year (Year 3) **£150,000**

Analyse mixed fund to identify the separate amounts of income, capital gains and capital present for the relevant tax year (Year 3) immediately before the date of the transfer:

| | |
|---|---|
| **Para (a)** Employment income (including UK employment income) not subject to a foreign tax | £30,000 |
| **Para (f)** Employment income subject to a foreign tax | £15,000 |
| **Para (g)** Relevant foreign income subject to a foreign tax | £2,000 |

Step 2 Identify the earliest paragraph above for the relevant year (Year 3), which has an amount of income or gain in the mixed fund:

**Para (a)** £30,000

**Step 3** Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2. £150,000 less £30,000= <u>£120,000</u>

Step 4 Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3.

**Step 2** Identify the earliest paragraph: **Para (f)** £15,000

**Step 3** Where the amount of the remittance is greater £120,000 less £15,000 = <u>£105,000</u>

**Step 4** Repeat Steps 2 and 3.

**Step 2** Identify the earliest paragraph: **Para (g)** £2,000

Step 3 Where the amount of the remittance is greater £105,000 less £2,000 = <u>£103,000</u>

At this stage all of the amounts credited to the account in Year 3 have been matched against remitted amounts. Income and capital of the next previous year (Year 2) must now be considered - so return to Step 1 for Year 2.

**Step 1** Identify the separate amounts of income, capital gains and capital present for Year 2 before transfer:

| | |
|---|---|
| **Para (a)** Employment income (including UK employment income) not subject to a foreign tax | Year 1 – £10,000<br>Year 2 – £80,000 |
| **Para (f)** Employment income subject to a foreign tax | Year 1 – £5,000<br>Year 2 – £40,000 |
| **Para (i)** Capital | Year 2 – £69,000 |

**Step 2** Identify the earliest paragraph above for the relevant year (Year 2) , which has an amount of income or gain in the mixed fund: **Para (a)** £80,000

**Step 3** Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as reduced by the amount identified in Step 2. £103,000 less £80,000 = <u>£23,000</u>

**Step 4** Find the next paragraph/amount for that tax year.
In the order of preference listed above repeat Steps 2 and 3.

| | | |
|---|---|---|
| **Step 2** Identify the earliest paragraph: | **Para (f)** | £40,000 |
| **Step 3** If the amount is more than the [residual] "transfer amount", the whole of the remittance comes from that paragraph. | | £23,000 |

The £150,000 transfer is therefore regarded as a remittance of:

| | | |
|---|---|---|
| £110,000 | UK employment income | (within para a) |
| £38,000 | relevant foreign income | (within para f) |
| £2,000 | relevant foreign earnings | (within para g) |

**Note 2**

The transfer on 3 July of £5,000 to meet daily living expenses will similarly be regarded as coming from the "earliest paragraph" in the mixed fund, which is paragraph (f) containing relevant foreign earnings from Year 2.

The result of this exercise is that:

- J's UK salary in Year 3 is deemed to have been brought to the UK first and is not a taxable remittance.
- Similarly all of his relevant foreign income and overseas employment income of Year 3 are treated as remitted to the UK and chargeable to tax at the appropriate rates of tax – allowing credit for foreign taxes charged on that same income as appropriate.

*Reconciliation*

The mixed fund still contains:

| | |
|---|---|
| £69,000 | capital (from the sale of shares in Year 2) together with |
| £12,000 | relevant foreign earnings from Year 2, and |
| £10,000 | UK employment income from Year 1 |
| £5,000 | relevant foreign earnings from Year 1 |
| £96,000 | |

*Moral:* J should have kept his capital receipt separate and remitted from that. That would have reduced the rate of tax on the remittance and saved the costs of the computation.

## 11.6 Offshore transfer mixed fund rule

Section 809R(4) ITA provides:

> Treat an offshore transfer from a mixed fund as containing the appropriate proportion of each kind of income or capital in the fund immediately before the transfer.
> "The appropriate proportion" means the amount (or market value) of the transfer divided by the market value of the mixed fund immediately before the transfer.

I refer to this as **"the offshore transfer mixed fund rule".**

"Transfer" must have the same meaning as in s.809Q so it includes any type of payment, whether or not made for consideration.

### 11.6.1 *Meaning of "offshore transfer"*

Section 809R(5) ITA defines "offshore transfer":

> A transfer from a mixed fund is an "offshore transfer" for the purposes of subsection (4) if and to the extent that section 809Q does not apply in relation to it.

So far the definition seems clear. One must ask whether s.809Q applies. Section 809Q applies (in short) if a sum is received in the UK by a relevant person.[12] A transfer to a UK bank account is an onshore transfer. So a transfer to a foreign account appears to be an offshore transfer. But suppose:
Year 1: a sum is transferred to a foreign account ("the first transfer")
Year 2: the sum is transferred to a UK account ("the second transfer").
It appears that in year 1 the first transfer is not an onshore transfer, but in year 2 it becomes one.[13] To avoid this result, s.809R(6) ITA provides:

> Treat a transfer from a mixed fund as an "offshore transfer" (and section 809Q as not applying in relation to it, if it otherwise would do) if and to the extent that, at the end of a tax year in which it is made—
> (a) section 809Q does not apply in relation to it, and
> (b) on the basis of the best estimate that can reasonably be made at that time, section 809Q will not apply in relation to it.

If condition (a) and (b) of this subsection are *both* satisfied, there are two consequences:

(1) One must treat the transfer as an offshore transfer.
(2) One must treat section 809Q as not applying in relation to it, if it otherwise would do.

Unless condition (a) and (b) are both satisfied, this subsection does not apply.

The condition in subsection (6)(a) is clear enough. One asks whether

12 See 11.4.2 (Onshore transfer).

13 Because remittance condition A is met, and the property received in the UK derives indirectly from the first transfer.

s.809Q applies at the end of the tax year. Eg this condition is met if:
(1) T transfers a sum from a mixed fund to a new offshore account on 6th April 2008, and
(2) the money is still there on 5th April 2009, or the money has been used to purchase a non UK asset.

Subsection (6)(b) is a challenge. At the end of the tax year, one must ask whether one can say that s.809Q will not apply in relation to the transfer. In relation to some transfers one can say with certainty that s.809Q will not apply. If the transferor draws a sum from a mixed fund to pay for a dinner outside the UK, then s.809Q will not apply to it because nothing will be received in the UK. That is an offshore transfer.

If a person transfers a sum to an offshore account and does expect to spend it in the UK that is an onshore transfer when remitted to the UK.

### 11.6.2 *Recomputation problem*

I use the term "**problematic transfer**" (for reasons which will become clear) to describe a transfer made in the following circumstances (by no means unusual):
(1) In year 1 T transfers a sum from a mixed fund to an account outside the UK.
(2) At the end of year 1 the transferred sum is not received in the UK.
(3) T cannot say at the end of the year 1 that "section 809Q will not apply in relation to" the problematic transfer. This may be because:
    (a) At the end of year 1, T does expect to spend the sum in the UK but not until a later year, say, year 5; or
    (b) T does not know whether T intends to remit the sum to the UK.

    At the end of year 1, the problematic transfer is not an onshore transfer. It is an offshore transfer within the definition in s.809R(5). Admittedly it is not within subsection 809R(6) but that subsection does not stop any transfer being an offshore transfer, if applicable it treats non-offshore transfers as offshore transfers.
(4) Suppose in a later year (say year 5) T transfers the sum to the UK. I refer to this as its **"subsequent remittance**."

On one view, the problematic transfer changes status at the time of its subsequent remittance and becomes an onshore transfer. That is workable if in the meantime T has not made any other onshore transfers from the mixed fund. It is not workable if in the meantime T has made other transfers from the mixed fund, because:

(1) T needed to know at the time what income or gains those other transfers included.
(2) There cannot possibly be a recomputation of the tax effect of the other transfers in earlier years on the basis that the problematic transfer has turned out to be an onshore transfer after all. I think that is obviously impractical, but for good measure it is also inconsistent with s.809R(9) ITA which provides:

> If section 809Q applies in relation to more than one transfer from a mixed fund, when undertaking step 1 in relation to the second or any subsequent transfer take into account the effect of step 2 of section 809Q(3) (composition of transfer) as it applied in relation to each earlier transfer.

It is almost impossible to make a coherent tax regime out of this intractable statutory material, which is not surprising given the way in which it was enacted. I think the best solution is to say that s.809R(6)(b) is misconceived, that a problematic transfer is only an onshore transfer if s.809Q applies to it in the year of the transfer. If at the end of the year it is an offshore transfer, its status does not change later. This can be justified on the basis that IT is an annual tax.

The alternative view is that the problematic transfer does change its status and becomes an onshore transfer, on the occasion of its subsequent remittance. One carries through the implications for tax purposes so far as that is possible, so the result is that tax is charged as if the problematic transfer was made after the subsequent transfers.

If that were so, another issue arises. Suppose when asked whether the sum will be remitted, T says (as may well be said) that T will remit it if represents an offshore transfer. The question whether a sum will be remitted to the UK may depend on the tax position, ie if it represents an offshore transfer it will be remitted and if it represents an onshore transfer it will not. It is therefore impossible to answer the s.809R(6)(b) question, whether the sum will be remitted, on the view that a problematic transfer becomes an onshore transfer when remitted; for if it is an offshore transfer it will be remitted (and so is an onshore transfer) but if it is an onshore transfer it will not be remitted (and so is an offshore transfer).

### 11.6.3 *HMRC explanation*

EN Clause 23 Schedule 7 Remittance Basis Amendments 463 to 481 explains s.809R(4) ITA:

> 7. Amendment 465 introduces a new subsection [4], dealing with cases where transfers are made wholly offshore. The new rules aim to ensure that where a transfer is made offshore from fund A to fund B, and remittances to the UK are then made from fund A or fund B, the normal ordering rules for mixed funds apply, as they would have done had the transfer to Fund B not been made before the remittance.

In fact the offshore transfer mixed fund rule does nothing of the sort. The EN continues:

> 8. So if fund A consisted of equal amounts of untaxed income and capital, and half the fund was transferred to fund B, it cannot be argued that fund A or B consisted solely of capital, and remittances from fund A or B were not therefore taxable. Instead, where there is an offshore transfer, so that the normal mixed fund ordering rules do not apply, fund B is to be treated as containing the same proportion of the different categories of income and capital as the original fund, in relation to the amount transferred.

### 11.6.4 HMRC examples: onshore and offshore transfers

The RDR Manual provides a straightforward example of onshore and offshore transfers from an account with different categories of income and gains:

**RDRM 35430, 35440**
**Example 1** (Ahmid)
A, a remittance basis user has an offshore bank account into which is paid both UK source (taxed) income and his foreign income and gains. A makes regular **transfers from this account to his UK account to meet his UK living expenses.**

| | | Credit/(Debit) | Balance | Category S809Q(4) | See Note |
|---|---|---|---|---|---|
| 10 April | XYZ (CI) Ltd – proceeds from sale of shares | £1,000,000 | £1,000,000 | e | 1 |
| 15 April | RFI dividend | £10,000 | £1,010,000 | g | |
| 30 April | UK salary | £10,000 | £1,020,000 | a | 2 |
| 30 April | Bank interest | £5,000 | £1,025,000 | d | |
| 30 April | Overseas salary (net of tax) | £5,000 | £1,030,000 | f | |
| 3 May | Transfer to UK a/c | (£5,000) | £1,025,000 | | 2 |

| | | | | | |
|---|---|---|---|---|---|
| 15 May | Offshore dividend | £2,000 | £1,027,000 | g | |
| 31 May | UK salary | £10,000 | £1,037,000 | a | |
| 31 May | Overseas salary (net of tax) | £5,000 | £1,042,000 | f | |
| 31 May | ABC (IoM) Ltd – purchase of shares in foreign company | (£1,000,000) | £42,000 | | 3 |
| 3 June | Transfer to UK a/c | (£5,000) | £37,000 | | 4 |
| 30 June | UK salary | £10,000 | £47,000 | a | |
| 30 June | Overseas salary (net of tax) | £5,000 | £52,000 | f | |
| 3 July | Transfer to UK a/c | (£5,000) | £47,000 | | 5 |
| 31 July | UK salary | £10,000 | £57,000 | a | |
| 31 July | Overseas salary (net of tax) | £5,000 | £62,000 | f | |
| 3 Aug | Transfer to UK a/c | (£5,000) | £57,000 | | 6 |
| 15 Aug | Cheque – ZZZ Cars Ltd London | (£25,000) | £32,000 | | 7 |

**Note 1**

The sale price of the shares includes a gain over the original purchase price of £150,000 that has not been taxed. The purchase was made long before 6 April 2008 and was made using accumulated foreign income and gains which were treated as clean capital.

The mixed fund provisions do not apply to foreign income or gains that arose or accrued before 6 April 2008 (Sch 7 FA 2008 para 89). This means that it is not possible to apply the "mixed fund" rules to the £850,000 used to buy the shares.

**Note 2**

Using the ordering rules at ITA07/s809Q(1), the remittance to the UK on 3 May is matched against the UK salary from that tax year credited to the account on 30 April, as this is the "earliest paragraph" of income or gains within the mixed fund.

Working this through:

The £5,000 transfer to the UK on 3 May is a "transfer" from a mixed fund within section 809Q. Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer:

| | | |
|---|---|---|
| Para (a) | employment income | £10,000 |
| Para (d) | RFI | £5,000 |
| Para (e) | Chargeable gains | £150,000 |
| Para (f) | Earnings subject to a foreign tax | £5,000 |
| Para (g) | RFI subject to tax | £10,000 |
| Para (i) | Income or capital not within another paragraph | £850,000 |

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income. Although money has been brought into the UK, there is no taxable remittance as the money has already been taxed.

**Note 3**

The purchase of shares on 31 May is an "offshore transfer"; by the end of the tax year the shares purchase have not, nor on best estimate are they likely to be, a remittance transfer so that s809Q applies.

The account is treated as including the amounts of foreign income and gain that were present immediately before the transfer (ITA07/s809R(4)). The transfer has no effect on the amount remitted in the current tax year but may need to be taken into account in a later tax year.

Immediately before the offshore transfer the mixed fund consists of:

| | | |
|---|---|---|
| Para (a) | employment income | £15,000 |
| Para (d) | RFI | £5,000 |
| Para (e) | Chargeable gains | £150,000 |
| Para (f) | Earnings subject to a foreign tax | £10,000 |
| Para (g) | RFI subject to tax | £12,000 |
| Para (i) | Income or capital not within another paragraph | £850,000 |
| | | £1,042,000 |

The offshore transfer consists of an appropriate proportion of each kind of income, gain or capital, within the mixed fund, that is:

| | | |
|---|---|---|
| Para (a) | employment income | £14,396 |
| Para (d) | RFI | £4,798 |
| Para (e) | Chargeable gains | £143,953 |
| Para (f) | Earnings subject to a foreign tax | £9,597 |
| Para (g) | RFI subject to tax | £11,517 |
| Para (i) | Income or capital not within another paragraph | £815,739 |
| | | £1,000,000 |

**Note 4**

The £5,000 transfer on 3 June to the UK is a "transfer" to the UK from a mixed fund, and is within s809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital present for each tax year immediately before the date of the transfer:

| | | |
|---|---|---|
| Para (a) | employment income | £604 |
| Para (d) | RFI | £202 |
| Para (e) | Chargeable gains | £6,047 |
| Para (f) | Earnings subject to a foreign tax | £403 |
| Para (g) | RFI subject to tax | £483 |
| Para (i) | Income or capital not within another paragraph | £34,261 |

The transfer is regarded as coming from each of the paragraphs in order; that is £604 from para (a), and a taxable remittance of £4,396, being £202 from para (d) and £4,194 from para (e).

**Note 5 and 6**

Both of these £5,000 transfers are to the UK. There have been credits to the fund between the last transfer (note 4) and this transfer and the fund now contains some employment income (para a) and additional amounts of foreign earning subject to foreign tax (para f) in addition to the residue following the last transfer.

The £5,000 transfers made on 3 July and 3 August are regarded as coming from the earliest paragraph of income, that is para (a) – £10,000 of UK employment income credited to the account on 30 June.

**Note 7**

The cheque remittance on 15 August is £25,000. This amount was used to buy a car from a UK company. This is also a remittance within s809Q. Immediately before the transfer the mixed fund consists of:

| | | |
|---|---|---|
| Para (a) | employment income | £10,000 |
| Para (d) | RFI | £nil |
| Para (e) | Chargeable gains | £1,853 |
| Para (f) | Earnings subject to a foreign tax | £10,403 |
| Para (g) | RFI subject to tax | £483 |
| Para (i) | Income or capital not within another paragraph | £34,261 |

The cheque remittance is regarded as coming from each of the paragraphs in order; that is £10,000 from para (a), £1,853 from para (e) and £10,403 from para (f), £483 from para (g) and £2,261 from para (i).

The remaining £32,000 at 15 August is also within para (i)

**Example 1(a) – Transfer to another account** To continue the offshore account in example 1:

| **Date** | | **Credit/(Debit)** | **Balance** | **Category S809Q(4)** | **Note** |
|---|---|---|---|---|---|
| | Balance b/f | | £32, 000 | | |
| 31 Aug | Overseas salary (net of tax) | £5,000 | | f | |
| 31 Aug | UK salary | £10,000 | | a | |
| 3 Sept | Transfer to UK a/c | (£5,000) | | | 1 |
| 15 Sept | Cheque – XYZ Travel Services (CI) Ltd | (£10,000) | | | 2 |
| 30 Sept | Overseas salary (net of tax) | £50,000 | | f | |
| 30 Sept | Overseas Dividend | £350,000 | | g | |
| 30 Sept | UK salary | £180,000 | | a | |
| 3 Oct | Transfer to UK a/c | (£5,000) | | | 3 |
| 15 Oct | Transfer to Swiss a/c | (£350,000) | | | 4 |

**Note 1**

Immediately before the transfer on 3 September the mixed fund contained:

| | | |
|---|---|---|
| Para (a) | employment income | £10,000 |
| Para (f) | Earnings subject to a foreign tax | £5,000 |
| Para (i) | Income or capital not within another paragraph | £32,000 |

The transfer is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income. Although money has been brought into the UK, there is no taxable remittance as the money has already been taxed,

**Note 2**

The next payment from the account is £10,000 for the family holiday flights to the USA. The full payment is a remittance because the service provided is in the UK – the flights begin or end in London.

The transfer is regarded as coming from each of the paragraphs in order; that is £5,000 from para (a) and a taxable remittance consisting of £5,000 from para (f).

**Note 3**

Immediately before the remittance on 3 October the mixed fund contained:

| | | |
|---|---|---|
| Para (a) | employment income | £180,000 |
| Para (f) | Earnings subject to a foreign tax | £50,000 |
| Para (g) | RFI | £350,000 |
| Para (i) | Income or capital not within another paragraph | £32,000 |

The transfer is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income.

**Note 4**

The transfer of £350,000 to a new Swiss bank account is an offshore transfer. Immediately before the offshore transfer on 15 October the offshore bank account (mixed fund) is regarded as containing:

| | | |
|---|---|---|
| Para (a) | employment income | £175,000 |
| Para (f) | Earnings subject to a foreign tax | £50,000 |
| Para (g) | RFI | £350,000 |
| Para (i) | Income or capital not within another paragraph | £32,000 |
| | | £607,000 |

The offshore transfer consists of an appropriate proportion of each kind of income, gain or capital, within the mixed fund, that is:

| | | |
|---|---|---|
| Para (a) | employment income | £100,906 |
| Para (f) | Earnings subject to a foreign tax | £28,830 |
| Para (g) | RFI | £201,812 |
| Para (i) | Income or capital not within another paragraph | £18,452 |

The Swiss bank account is another "mixed fund", containing the income, gains and capital of the transferred amount. Assuming nothing else is added or taken away from to the Swiss account in the interim, if in a couple of years time A decides to remit £120,000 to the UK from his Swiss bank account, the same ordering rules will apply to the Swiss fund, so the remittance is regarded as consisting of £100,906 from para (a) and £19,094 from para (f).

The next example has another mix of offshore and onshore transfers.

**RDRM 35450**

**Example 2 (Lorraine)**

L, a remittance basis user, opens an offshore bank account in Bermuda into which is paid both UK source (taxed) income and her foreign income and gains. L makes a few transfers from this account to her UK account to meet UK living expenses. She also transfers money from this account to her other offshore account in Jersey, as well as using it for several offshore purchases.

**Account 1 Bermuda**

| | | Credit (Debit) | Balance | Category S809Q(4) | Note |
|---|---|---|---|---|---|
| **Year 1** | | | | | |
| 15 Jan | Capital | £1,000,000 | £1,000,000 | i | 1 |
| 30 Jan | UK salary | £10,000 | £1,010,000 | a | |
| 30 Jan | Bank interest | £5,000 | £1,015,000 | d | |
| 30 Jan | Overseas salary (net of tax) | £5,000 | £1,020,000 | f | |
| 3 Feb | Transfer to UK a/c | (£5,000) | £1,015,000 | | 2 |
| 28 Feb | Dividend | £2,000 | £1,017,000 | g | |
| 28 Feb | UK salary | £10,000 | £1,027,000 | a | |
| 28 Feb | Overseas salary | £5,000 | £1,032,000 | f | |
| 3 March | Purchase of shares in foreign company | (£800,000) | £232,000 | | 3 |
| 10 March | Transfer to UK a/c | (£5,000) | £227,000 | | 4 |
| 31 March | UK salary | £10,000 | £237,000 | a | |
| 31 March | Overseas salary (net of tax) | £5,000 | £242,000 | f | |
| 2 Apr | Transfer to UK a/c | (£5,000) | £237,000 | | 5 |
| **Year 2** | | | | | |
| 30 April | UK salary | £10,000 | £247,000 | a | |
| 30 April | Overseas salary (net of tax) | £5,000 | £252,000 | f | |
| 3 March | Transfer to UK a/c | (£5,000) | £247,000 | | 6 |
| 15 March | Transfer to UK a/c | (£100,000) | £147,000 | | 7 |
| 31 May | UK salary | £10,000 | £157,000 | a | |
| 31 May | Overseas salary (net of tax) | £5,000 | £162,000 | f | |
| 8 June | Transfer – A2Z travel services | (£20,000) | £142,000 | | 8 |

**Year 1**

**Note 1**

The £1,000,000 credited to the account on 15 January was inherited under L's great aunt's will, and is "clean" capital.

**Note 2**

The £5,000 transfer to the UK on 3 May is a "remittance" from a mixed fund within section 809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer:

| | | |
|---|---|---|
| Para (a) | employment income | £10,000 |
| Para (d) | RFI | £5,000 |
| Para (f) | Earnings subject to a foreign tax | £5,000 |
| Para (i) | Inherited capital | £1,000,000 |

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

**Note 3**

The purchase of shares on 3 March (£800,000) is an "offshore transfer". By the end of the tax year the shares purchased have not been sold, brought to the UK or otherwise used so that s809Q applies.

The account is treated as including the amounts of foreign income and gain that were present immediately before the transfer (ITA07/s809R(4)). The transfer has no effect on the amount remitted in the current tax year but may need to be taken into account in a later tax year.

Immediately before the offshore transfer the mixed fund consists of:

| | | |
|---|---|---|
| Para (a) | Employment income | £15,000 |
| Para (d) | Relevant foreign income | £5,000 |
| Para (f) | Earnings subject to a foreign tax | £10,000 |
| Para (g) | Relevant foreign income subject to tax | £2,000 |
| Para (i) | Inherited capital | £1,000,000 |
| | | £1,032,000 |

The "offshore transfer" (the shares purchase) consists of an appropriate proportion (100/129) of each kind of income, gain or capital, within the mixed fund, that is:

| | | |
|---|---|---|
| Para (a) | employment income | £11,628 |
| Para (d) | RFI | £3,876 |
| Para (f) | Earnings subject to a foreign tax | £7,752 |
| Para (g) | RFI subject to tax | £1,550 |
| Para (i) | Income or capital not within another paragraph | £775,194 |
| | | £800,000 |

**Note 4**

The £5,000 transfer to the UK on 10 March is a "remittance" from a mixed fund within section 809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for each tax year immediately before the date of the transfer the mixed fund consists of:

| | | |
|---|---|---|
| Para (a) | employment income | £3,372 |
| Para (d) | RFI | £1,124 |
| Para (f) | Earnings subject to a foreign tax | £2,248 |
| Para (g) | RFI subject to tax | £450 |
| Para (i) | Income or capital not within another paragraph | £224,806 |
| | | £232,000 |

The remittance is regarded as coming from the "earliest paragraph", that is para (a), £3,372, para (d) £1,124 and para (f) £504. Of this amount, £1,124 and £504 are taxable remittances.

**Note 5**

The next remittance on 2 April is again £5,000. Two further amounts have been credited to the account which now consists of

| | | |
|---|---|---|
| Para (a) | employment income | £10,000 |
| Para (f) | Earnings subject to a foreign tax | £6,744 |
| Para (g) | RFI subject to tax | £450 |

| | | |
|---|---|---|
| Para (i) | Income or capital not within another paragraph | £224,806 |

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

The account now consists of:

| | | |
|---|---|---|
| Para (a) | employment income | £5,000 |
| Para (f) | Earnings subject to a foreign tax | £6,744 |
| Para (g) | RFI subject to tax | £450 |
| Para (i) | Income or capital not within another paragraph | £224,806 |
| | | £237,000 |

At the end of the tax year, L has made taxable remittances of: £1,628 (para (d) £1,124 and para (f) £504). She has also made two offshore transfers:

**Year 2**

At the start of the next tax year, L continues to make remittances to the UK from the overseas account. The "mixed fund" rules mean that income gains and capital of a tax year are treated in priority to income gains and capital of a previous year.

**Note 6**

The £5,000 transfer to the UK on 3 May is a "remittance" from a mixed fund within s809Q(1). Applying the ordering rules in that section, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 2 immediately before the date of the transfer:

| | | |
|---|---|---|
| Para (a) | employment income | £10,000 |
| Para (f) | Earnings subject to a foreign tax | £5,000 |

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

**Note 7**

On 15 May, L transfers £100,000 to her UK bank account. This is a "remittance" from a mixed fund within section 809Q(1).

Applying the ordering rules section 809Q, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 2 immediately before the date of the transfer:

| | | |
|---|---|---|
| Para (a) | employment income | £5,000 |
| Para (f) | Earnings subject to a foreign tax | £5,000 |

So £10,000 of the transfer comes from these two paragraphs of Year 2 income. The outstanding balance of £90,000 must be identified by applying the ordering rules section 809Q, and analysing the mixed fund to identify the separate amounts of income, capital gains and capital in the account for tax Year 1 immediately before the date of the transfer:

| | | |
|---|---|---|
| Para (a) | employment income | £5,000 |
| Para (f) | Earnings subject to a foreign tax | £6,744 |
| Para (g) | RFI subject to tax | £450 |
| Para (i) | Income or capital not within another paragraph | £224,806 |

So the remaining £90,000 of the transfer will regarded as consisting of monies

from para (a) £5,000, Para (f) £6,744, Para (g) £450 and Para (i) £77,806 from Year 1.
The mixed fund now consists of:
Para (i) Income or capital not within another paragraph £147,000

## 11.6.5 *Repayment of loan from mixed fund*

The next HMRC example involves an offshore transfer which is repayment of a loan (not a relevant loan) from a mixed fund.

**RDRM 35470**
**Example (Frankie)**
F, a remittance basis user, has a bank account in Jersey into which is paid both UK source (taxed) income and foreign income and gains. F makes transfers from the Jersey account to his UK account to meet his UK living expenses.
On 28 May, F acquires a loan from his Jersey bank that he uses to purchase an asset in Jersey for £200,000 – Note 3. He repays the [capital of the] loan from this account.

| | | Credit (Debit) | Balance | Category | Note |
|---|---|---|---|---|---|
| 6 Apr | Clean capital | £80,000 | £80,000 | i | |
| 15 Apr | RFI NFT | £10,000 | £90,000 | d | |
| 30 Apr | UK salary | £10,000 | £100,000 | a | |
| 30 Apr | RFI bank interest | £5,000 | £105,000 | d | |
| 30 Apr | RFE NFT | £5,000 | £110,000 | b | |
| 3 May | Transfer to UK a/c | (£5,000) | £105,000 | | 1 |
| 15 May | RFI | £2,000 | £107,000 | d | |
| 31 May | UK salary | £10,000 | £117,000 | a | |
| 31 May | Overseas salary | £5,000 | £122,000 | b | |
| 3 Jun | Transfer to UK a/c | (£5,000) | £117,000 | | 2 |
| 28 Jun | bank loan repayment[14] | (£15,000) | £102,000 | | 3 & 4 |
| 30 Jun | UK salary | £10,000 | £112,000 | a | |
| 30 Jun | Overseas salary | £5,000 | £117,000 | b | |
| 3 Jul | Transfer to UK a/c | (£5,000) | £112,000 | | 5 |
| 28 Jul | bank loan repayment | (£15,000) | £97,000 | | 6 |
| 31 Jul | UK salary | £10,000 | £107,000 | a | |
| 31 Jul | Overseas salary | £5,000 | £109,000 | b | |
| 3 Aug | Transfer to UK a/c | (£5,000) | £102,000 | | 7 |
| 15 Aug | Cheque – ZZZ Cars | (£25,000) | £77,000 | | 8 |
| 28 Aug | bank loan repayment | (£15,000) | £62,000 | | 9 |
| 31 Aug | Overseas salary | £5,000 | £67,000 | b | |
| 31 Aug | UK salary | £10,000 | £72,000 | a | |

14 In this example there are monthly repayments of the capital of the loan, but no payments of interest.

| | | | | |
|---|---|---|---|---|
| 3 Sep | Transfer to UK a/c | (£5,000) | £67,000 | 10 |

The first two transfers are straightforward:

**Note 1**
Using the ordering rules at ITA07/s809Q, the remittance to the UK on 3 May is matched against the UK salary from that tax year credited to the account on 30 April, as this is the "earliest paragraph" of income or gains within the mixed fund.
**Note 2**
The remittance on 3 June is also matched against the UK salary from that tax year credited to the account before that date.

We now turn to the point of the example:

**Note 3**
The £200,000 used to pay for the assets is borrowed capital and is not in itself a remittance or an offshore transfer.

The reason that the payment of £200k is not an offshore transfer is that the sum is not mixed into the mixed fund. If it had been paid into the account (and withdrawn from there to purchase the asset) the position would have been entirely different.

However, subsequent payments of interest and capital used to repay the loan are offshore transfers.
**Note 4**
At the time immediately before the first repayment of the debt occurs on 28 June, the mixed fund is composed as follows:

| | | |
|---|---|---|
| Clean capital | £80,000 | |
| UK salary | £10,000 | see note 4(a)[15] |
| Relevant foreign earnings | £10,000 | |
| Relevant foreign income | £17,000 | |
| | £170,000[16] | |

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

15 Note 4(a) provides: "Although £20,000 of F's UK salary has been credited to the account, £10,000 has already been remitted prior to 28 June (see Notes 1 and 2)."
16 *Sic;* the manual has a typographic or an arithmetical error here.

| | |
|---|---|
| Clean capital | £10,256 |
| UK salary | £1,282 |
| Relevant foreign earnings | £1,282 |
| Relevant foreign income | £2,180 |
| | £15,000 |

The property acquired by F using the loan is now regarded as containing this income.[17]

The next remittance is straightforward:

**Note 5**
The next remittance on 3 July is again £5,000 that is matched against the UK salary credited to the account before that date.

Now comes the second loan repayment:

**Note 6**
At the time immediately before the repayment on 28 July, the "mixed fund" is composed as follows:

| | |
|---|---|
| Clean capital | £69,744 |
| UK salary | £13,718 |
| Relevant foreign earnings | £13,718 |
| Relevant foreign income | £14,820 |
| | £112,000 |

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

| | |
|---|---|
| Clean capital | £9,339 |
| UK salary | £1,838 |
| Relevant foreign earnings | £1,838 |
| Relevant foreign income | £1,985 |
| | £15,000 |

The property acquired by F is now regarded as containing this income.

Next come two straightforward onshore transfers:

**Note 7**
A further £5,000 remittance on 3 August is again matched against UK salary.

17 See 11.3.5 (Income/gains used to repay debt).

**Note 8**

The payment of £25,000 to ZZZ Cars is to buy a car and is a taxable remittance. Immediately before the transfer the mixed fund is composed as follows:

| | |
|---|---|
| Clean capital | £60,405 |
| UK salary | £16,880 |
| Relevant foreign earnings | £16,880 |
| Relevant foreign income | £12,835 |
| | £107,000 |

This £25,000 remittance is matched firstly against UK salary (£16,880), then against relevant foreign earnings (£8,120).

Next another loan repayment

**Note 9**

At the time immediately before the repayment on 28 August, the mixed fund is composed as follows:

| | |
|---|---|
| Clean capital | £60,405 |
| UK salary | £nil |
| Relevant foreign earnings | £8,760 |
| Relevant foreign income | £12,835 |
| | £82,000 |

The repayment of the monthly bank loan of £15,000 is an offshore transfer, consisting of an appropriate proportion of each kind of income within the mixed fund, that is:

| | |
|---|---|
| Clean capital | £11,049 |
| Relevant foreign earnings | £1,603 |
| Relevant foreign income | £2,348 |
| | £15,000 |

**Note 10**

The fifth remittance on 3 September is again £5,000 that is matched against the UK salary from that tax year credited to the account before that date.

The account now contains £77,000, being

| | |
|---|---|
| Clean capital | £49,356 |
| UK salary | £5,000 |
| Relevant foreign earnings | £12,157 |
| Relevant Foreign Income | £10,487 |

For the purposes of this example, assume that on 8 September F wins the Jersey local lottery ("clean capital") and uses his winnings to pay off the outstanding loan.

Three years later, F brings the property acquired with the loan to the UK.

The property is a mixed fund, and it is regarded as containing the income and capital used to pay off the loan, that is:

| | |
|---|---|
| UK salary | £3,120 |
| Relevant foreign earnings | £4,723 |
| Relevant foreign income | £6,513 |
| Clean capital. | £185,644 |

F has remitted foreign income of £11,236.

The moral which follows from these examples is the imperative of not mixing funds of different types of income or gains, so far as possible.

## 11.7 Mixed fund anti-avoidance rule

Section 809S ITA provides:

> (1) This section applies if, by reason of an arrangement[18] the main purpose (or one of the main purposes) of which is to secure an income tax advantage or capital gains tax advantage, a mixed fund would otherwise be regarded as containing income or capital within any of paras (f) to (i) of section 809Q(4).
> (2) Treat the mixed fund as containing so much (if any) of the income or capital as is just and reasonable.

I refer to this as "**the mixed funds anti-avoidance rule**".

IT advantage and CGT advantage have the standard (wide) definitions.[19]

---

18 Section 809S(3) ITA contains the usual (unnecessary) commonsense definition of "arrangement":

"'Arrangement' includes any scheme, understanding, transaction or series or transactions (whether or not enforceable)."

19 Section 809S provides:

(4) "Income tax advantage" means—

(a) a relief from income tax or increased relief from income tax,

(b) a repayment of income tax or increased repayment of income tax,

(c) the avoidance or reduction of a charge to income tax or an assessment to income tax, or

(d) the avoidance of a possible assessment to income tax; and for this purpose "relief from income tax" includes a tax credit.

(4A) For the purposes of subsection (4)(c) and (d) it does not matter whether the avoidance or reduction is effected—

(a) by receipts accruing in such a way that the recipient does not pay or bear income tax on them, or

The terms are not limited to tax avoidance in the strict sense.

Section 809S is clearly intended to override the offshore mixed fund transfer rule although this is not expressly stated.[20]

Suppose:

(1) T has a mixed fund containing £2m, 50% income and 50% capital.

(2) T transfers £1m, half the amount, to another account (an offshore transfer). T intends to keep that amount offshore.

(3) T then remits the funds in the first account to the UK.

Applying the offshore transfer mixed fund rule the first account, which is remitted, consists of 50% income and capital, so on remittance 50% of the sum received is tax free. In the absence of the offshore transfer, the whole of the £1m remitted would have been subject to income tax. The offshore transfer is an arrangement which secures an IT advantage. Assuming this was one of the main purposes, s.809S applies.

One then has to ask what is "just and reasonable". The drafter has given up here and left the courts to sort it out. One might say that it is reasonable to apply the pre-2008 mixed fund regime. That can hardly be described as unjust or unreasonable. But it is considered that the expression "just and reasonable" should be construed in accordance with the policy of the onshore transfer mixed fund rule. So an arrangement of the kind discussed above would be set aside and it would be just and reasonable to raise tax as if the offshore transfer had not been made. To put it another way, it is just and reasonable that transfers whose main purpose is to obtain a tax advantage should not do so.

If that were wrong, what would happen if there were a second transfer from the first account: in this way one could reduce the income element of any mixed fund to a relatively small sum by a series of offshore transfers.

---

(b) by a deduction in calculating profits or gains.

(5) "Capital gains tax advantage" means—

(a) a relief from capital gains tax or increased relief from capital gains tax,

(b) a repayment of capital gains tax or increased repayment of capital gains tax,

(c) the avoidance or reduction of a charge to capital gains tax or an assessment to capital gains tax, or

(d) the avoidance of a possible assessment to capital gains tax.

20 The mixed funds anti-avoidance rule could also override the *onshore* transfer mixed fund rule, but it is not likely ever to be just and reasonable to substitute any other set of rules.

### 11.7.1 *Scope of mixed funds anti-avoidance rule*

The mixed fund anti-avoidance rule applies only if the mixed fund contains income or capital within mixed fund categories (f) to (i). So if a mixed fund consisted of (say) RFI within category (d) and chargeable gains within category (e), the anti-avoidance provision does not apply. This is a little surprising and it might be that s.809S(1) contains a typographical error, (f) being a slip for (a). But it is not obvious that there has been an error, as there is rather more scope for manipulation of the rules in a mixed account which contains categories (f) to (i). So a court should construe the section to mean what it says. In practice the point is not so important as a mixed fund will usually contain some item within categories (f) to (i).

## 11.8 Remittance of part of funds transferred

Section 809R(8) ITA provides:

> If section 809Q applies in relation to part of a transfer, apply that section in relation to that part before applying subsection (4) in relation to the rest of the transfer.

## 11.9 Mixed funds of third parties

So far we have considered the ITA mixed fund regime where an individual transfers from a mixed fund containing their own income or gains. The position is more complex when a third party is involved. This may arise in (at least) four circumstances:

(1) A gain accrues to non resident company within s.13 TCGA so that a s.13 deemed gain accrues to an individual participator taxable on the s.13 remittance basis. There is a tax charge if the company remits its gain to the UK. What if that gain forms part of a mixed fund (ie the gain is mixed with other funds of the company)?

(2) Income arises to a person abroad within s.720, so that s.720 deemed income arises to an individual transferor, taxable on the s.720 remittance basis. There is in principle a tax charge if the person abroad remits its income to the UK. What if that income forms part of a mixed fund (ie the income is mixed with other funds of the person abroad)?

It is suggested that the ITA mixed fund regime does apply in these two circumstances. Step 1 of s.809Q(3) requires us to find the income or gain of the "individual" but the funds in the hands of the third person are derived (or are treated as derived) from the income or gains of the individual, so applying s.809R(2) ITA the funds in the hands of the third party are treated as consisting of that income or capital. This view may favour the taxpayer, particularly for a company which is within s.720 but not s.13, or for a company which is within s.13 but not s.720.

(3) Income or gains accrue to an individual and the individual gives the income or gains to a relevant person ("R"). There is a tax charge if R remits the gifted funds to the UK. What if the income or gains form part of a mixed fund (ie the income or gains are mixed with other funds of R)?
(4) An individual makes a gift of an asset to a relevant person ("R"), on which a deemed gain arises. The asset is treated as derived from that gain and there is a tax charge if the asset is remitted to the UK. What if the asset forms part of a mixed fund (ie the asset is mixed with other funds of R)?

If R is not UK resident, the ITA mixed fund regime could apply. If R is UK resident, there is a problem. Suppose:

(1) T gives income ("T's income") to R.
(2) R mixes T's income with gains of R (accruing in the same year).
(3) R remits part of the mixed fund.

Has R remitted T's income or R's gains? It is in R's interest to argue that R has remitted T's income and in T's interest to argue that R has remitted R's gains. It is tentatively suggested that R has remitted T's income first.

## 11.10 Transitional rules for pre-2008 mixed fund

Para 89 Sch 7 FA 2008 provides:

> Sections 809Q to 809S of ITA 2007 (transfers from mixed funds) do not apply for the purposes of determining whether income or chargeable gains for the tax year 2007-08 or any earlier tax year are remitted to the UK (or the amount of any such income or chargeable gains so remitted).

Suppose:

(1) A mixed fund consists only of pre-2008 income/gains (no post 2008 income/gains).

(2) A transfer from that fund is made after 2008.

One needs to determine what part of that fund is remitted to the UK. Para 89 means that one disregards the ITA mixed fund regime (and instead applies the pre-2008 mixed fund regime).[21] This is the approach taken in HMRC's examples in the RDR Manual.

Suppose:

(1) A mixed fund includes pre-2008 income/gains and post 2008 income/gains.
(2) A transfer from that fund is made after 2008.

One needs to determine what part of that fund is remitted to the UK. The analysis comes in two stages.

(1) First, one has to determine whether the remittance consists of pre-2008 or post-2008 income/gains.
(2) (a) If the remittance consists of pre-2008 income/gains, one applies the pre-2008 mixed fund regime to identify what is remitted.
    (b) If the remittance consists of post-2008 income/gains, one applies the ITA mixed fund regime to determine what is remitted.

Which set of rules apply at stage 1? The ITA mixed fund regime raises difficult transitional issues which this statutory provision does not properly address, leaving HMRC, taxpayers and the courts to sort it out as best they can. It is tentatively suggested that one applies the ITA mixed fund regime so far back as 2008/09 and then the pre-2008 mixed fund regime. This is the approach taken in HMRC's examples in the RDR Manual.

## 11.11 From which fund is remittance made: bank errors

The RDR Manual provides:

---

21 It does not mean that one disregards the ITA mixed fund regime (and instead applies the pre-2008 mixed fund regime) in ascertaining whether a pre-2008 transfer from a mixed fund constituted income/gains. (This question arises in order to identify the ingredients of the mixed fund for post-2008 transfers.) First my view is the more natural reading. Secondly, the alternative view would require an individual to classify the constituents of a mixed fund held at 6/4/08 by date and by the nine mixed fund categories, going back without limit of time. Records in many cases will not exist.

> **33560 Banking Issues** [July 2010]
> *Bank Errors and Mistakes*
> Where a bank acts contrary to express instructions by an account holder, and that mistake inadvertently results in a taxable remittance to the UK by the account holder, the account holder and the bank may alter the transaction in line with the original instructions given.
> If the bank does this, HMRC will treat the earlier [mistaken] transaction as not having taken place and the new transaction as being the original transaction in looking at whether there has been a taxable remittance from that account.

This is soundly based on *Duke of Roxburghe's Executors v IRC* 20 TC 711 where a taxpayer received and held offshore:
(1) income subject to UK tax on an arising basis ("taxed income");[22] and
(2) foreign income which qualified for the remittance basis, and which was therefore taxed if remitted ("untaxed income").

These were wisely held in separate accounts in one bank and so a remittance out of the taxed income account would not be taxable. The taxpayer correctly directed the bank to make a remittance to the UK out of her taxed income account. Unfortunately the bank made a remittance out of the wrong account, so the sum remitted could (largely) be traced to untaxed income!

The Court of Session identified the sum remitted as taxed income because the taxpayer had *intended* the remittance to come out of taxed income.[23]

---

22 Being foreign source income of a class not then qualifying for the remittance basis and so subject to UK income tax on an arising basis.

23 "The Duchess was entitled to have the remittance debited against any fund belonging to her and under her control and that she did so effectually by the *instructions* to debit it against money not derived from the [untaxed] income." Lord Normand at p.726 (emphasis added). This was also the view of Lord Fleming at p.732: "I base my decision ... on the ground that it was the legal right of the Duchess to make the appropriation against any particular fund belonging to herself, and that in law she made that appropriation when she directed the Bank making the remittance to charge it against her funds in their hands which had already borne British Income Tax."
A second ground of the decision was that a remittance out of a mixed fund with taxed and untaxed income is in general to be treated as out of the taxed income regardless of the intention of the taxpayer. The second ground is now reversed by the ITA mixed fund regime.

## 11.12 Remittance when ITA mixed fund regime does not apply

Suppose an individual holds in one mixed fund two different types of RFI, both subject to foreign tax but one suffers a higher rate of foreign tax than the other. The ITA mixed fund regime gives no guidance because both fall into the same mixed fund category. It is considered that the *Duke of Roxburghe* 20 TC 711 approach applies. A remittance from this mixed fund should be regarded as made first of all out of the income which qualifies for UK double tax relief.

However, it would be better practice to pay the two types of income into separate accounts. Then this issue does not arise and a remittance from the appropriate account can easily be identified as qualifying for the appropriate relief.

## 11.13 ITA mixed fund regime: commentary

The ITA mixed fund regime operates on a daily, indeed minute by minute basis, as the rules must be applied at the time of every onshore and offshore transfer. They do not operate within a given tax year on a pro rata basis (contrast the s.87 or s.731 matching rules). The reader who has studied the text to here, and who contemplates applying these rules to the actual circumstances of clients accounts containing hundreds or thousands of entries, will agree that the mixed fund rule is unworkable.

Joint Forum on Expatriates Tax and NICs Note of Meeting 18 September 2008 records:

> Delegates asked whether HMRC would be prepared to allow for apportionment on an annualised (rather than a monthly) basis. The legislation concentrates on transfers from mixed funds on the occasion of each and every transfer. HMRC did not think it was possible to override the intention of the legislation but agents considered that it would be unworkable to examine each and every debit and credit on the basis envisaged within a new legislation. ... The overwhelming view put forward by external delegates was that without the availability of a methodology along the lines of SP 5/84 it would be impractical for any inward expatriate to claim access to the remittance basis because it would not be possible to perform the calculations required by the legislation.[24]

---

24 Accessible *www.hmrc.gov.uk/consultations/expat-mins-180908.htm*

The mixed fund legislation is a disaster; it needs to be rethought from beginning to end – an immensely challenging task, which could not possibly have been done in the few days available as Schedule 7 FA 2008 hurtled to the deadline for enactment.

In their defence, HMRC make two points:

> [1] HMRC reminded delegates that use of the remittance basis is voluntary as from 6 April 2008 and [2] that HMRC had been asked to bring in rules on remittance from mixed funds and rules relating to overseas transfers.

But as to point [1], the fact that the remittance basis is voluntary is no excuse for unworkable tax law. HMRC have overlooked that the remittance basis is intended to make the UK an *attractive* place for foreign domiciliaries to reside.[25] There is no need to comment on point [2].

A few months later HMRC issued SP 1/09 so the step thought impossible apparently proved to be possible after all.[26] But while helping the employee who is resident and not ordinarily resident, that does not help the rest of the body of remittance basis taxpayers stuck with the same problems. Why were resident non-ordinarily resident employees singled out for special relief? The reason was presumably down to effective lobbying rather than any rational policy consideration.

## 11.14 Pre-2008 mixed fund regime

### 11.14.1 *Remittance from mixture of taxed and untaxed income*

The former Inspectors Manual provided:

> **1568. Mixed fund/income assessable: Arising/remittance**
> Published: 2/87
> Where a person maintains abroad a mixed fund consisting partly of income assessable on the arising basis and partly of income assessable on the remittance basis, any remittances made to this country out of that fund may be regarded as made primarily out of the income assessable on the arising basis and only the balance out of income assessable on the remittance basis.

---

25 An alternative inference is that a decision was made deliberately to undermine the remittance basis by making it impracticably difficult to operate.

26 See 12.25 (Remittance from earnings for mixed UK/foreign duties).

Similarly, RDR Manual on the example of Martyn provides:

> **35320 Mixed Funds: Example 4 - remittances before 6 April 2008**
> **Note 2**
> Where an overseas "mixed fund" contained an amount that has already suffered UK tax, for example UK salary dealt with under PAYE, the practice (*Sterling Trust v IRC* 12 TC 868) was that a taxpayer was entitled to say that he or she has remitted income which has already suffered UK tax (to the extent that such income exists in the fund) in priority to income which is assessable on the arising basis.

This is soundly based on *Duke of Roxburghe's Executors v IRC.*[27]

### 11.14.2 *Remittance from mixture of capital and foreign income*

In *Scottish Provident Institution v Allan* 4 TC 591, the taxpayer held offshore:

(1) capital which had been invested in secured loans in Australia; and
(2) interest from those loans, which qualified for the remittance basis, and which was therefore untaxed unless and until remitted.

A sum was remitted to the UK and the question was whether this sum was the untaxed income or the capital. The background was this:

(1) The income and capital had been paid into a single account (mixed).
(2) The remittances (from the Australian agents) had been accompanied by letters stating that the sums remitted represent repayments of the loans, ie capital. The loans had in some cases been repaid only very shortly before the remittance.
(3) The sum remitted (£200,000) was small compared to the amount of the loans and the interest received (each about £1.5m).

It was held that the remitted sum was the foreign income, not capital. The Lord Chancellor said:

---

27 20 TC 711 discussed in another context at 11.11 (From which fund is remittance made: bank errors).
Although the taxpayer in *Roxburghe* kept the funds in two accounts at the bank, the result would have been the same if the taxed and untaxed income had been held in a single bank account. This was accepted without argument in *Walsh v Randall* 23 TC 55: see para. 3 of the Special Commissioners' decision, and it is accepted in this passage from the Inspectors Manual.

> It is obvious that the mere nicknaming the sum received and ascribing to it, because it is so named, the character of capital and not of income, cannot defeat the right of the Crown to have the tax levied upon that which in substance and truth is [income] ...[28]

Two points shine out:

(1) The description of the remittance as capital does not make the remittance capital if "in truth" it is income. This is obviously right, an application of the Shakespearean principle that "a rose by any other name ..." However, this principle does not address the more fundamental question of *how* the courts determine what is income and what is capital.
(2) The answer to this second question is that the courts look to the substance.

However, it is one thing to look for the substance, and another to find and identify it. Why, in substance, was the remittance from the income, not from the capital? The answer may be found in the speech of Lord Robertson: "The facts of the case must furnish the inference."

The following facts were relevant:

> [1] First of all there is the fact of remittance in two consecutive years ...
> [2] There is no suggestion that any exceptional reason required remittances of capital, in either year or in both.
> [3] On the other hand it is certain that the amount of invested capital left behind in the Colony, after these remittances, is larger than before; so that the capital is fully accounted for.
> [4] Well then, what is done with this so-called capital remitted? The answer is, exactly what would be done with profits.

This is explained by Lord Shand in argument:

> If it is capital you have brought back and distributed as bonus, you have

28 Similarly Lord Davey: "I must say that that is a draft upon my credulity, a strain upon my powers of belief, which they will not bear. I agree that the mere calling it capital for the purpose of the Inland Revenue Department will not make into capital that which is essentially and in truth ... the interest received on the securities."

> been paying back capital, which I should think you have no authority to do.

This is why Lord Robertson concluded:

> The inference from these facts is that the moneys remitted were in fact profits, [ie income] ...

The former Inspectors Manual para 1566 gave the HMRC view:

> Where a person maintains abroad a fund (for example, a bank account) containing income assessable on the remittance basis, a capital lodgement to the fund is normally considered to lose its identity in the fund. A subsequent remittance from such a mixed fund, therefore, represents income up to the full extent of the income content of the fund (see *Scottish Provident Institution v Allan* 4 TC 409 and 4 TC 591, and especially the Lord Chancellor's remarks on 'mere nicknaming' at 4 TC 593). Only when the income content of the fund is exhausted will any balance remitted be regarded as capital. Where this is not accepted, the full facts of the case should be reported to Revenue Policy, International (Cases IV and V), Victory House.

The Inspectors Manual over-simplified the law as expounded in *SPI v Allan*. There is no rule that the remittance out of a mixed fund of income and capital is bound to be treated as income. Suppose a taxpayer remits a substantial amount, exceeding the income, and applies it to an investment in the UK, or on capital expenditure here, such as the purchase of a house. It is considered that the "substance" of the matter, applying Lord Robertson's approach, is that the remittance is one of capital. The position is even stronger if the taxpayer first uses an amount equal to the income of a mixed account on expenditure abroad of an income nature.

HMRC express a different view in the example of Martyn in RDRM 35320 Note 2:

> For tax years up to 5 April 2008, there are no statutory rules to determine what amounts remitted from "mixed funds" actually consisted of. Broadly HMRC practice was based on House of Lords decisions, in particular that of *Scottish Provident v Allan* (4 TC 409/591). In the Court of Exchequer, Lord McLaren said (page 419)
>
> > " ... unappropriated remittances ... must be dealt with according to the ordinary course of business, and these remittances must be

> presumed to be paid in the first place out of interest so far as they are income, and in the second place of principal or capital. I think that rule results from the fact that no prudent man of business will encroach upon his capital for investment when he has income uninvested lying at his disposal". [29]
>
> The House of Lords considered that the question of whether any amount of income had actually been received in the UK is essentially one of fact – of tracing in the first instance, or, where direct tracing proves to be impossible, of inference from the known facts.
>
> The principle followed is, therefore, that in the absence of any evidence to the contrary, where capital and income have been paid into a single fund overseas so that they are no longer distinguishable, remittances to the UK out of the fund will be presumed to be income to the extent that there is income existing in the fund at the time that the remittance was made.

It is also important to note that *SPI v Allan* was a case where the mixed fund was capital and income. The case can have no application where the mixed fund consists of two different kinds of income or two different kinds of capital.

At first sight there is some tension between *SPI v Allan* and *Duke of Roxburghe* 20 TC 711. In the first, "mere nicknaming" was contemptuously dismissed; in the second, it was the "legal right" of the Duchess to direct whether the remittance was from one part of a mixed fund or the other. The cases agree, however, that the matter is one of "substance". It is submitted that the cases can be reconciled in this way: in a marginal case, the description of the remittance given by the taxpayer may be decisive. Where the substance of the transaction shows that a remittance is one of income or capital, "mere nicknaming" will not alter the position.

### 11.14.3 *Remittance from mixture of untaxed income and income qualifying for DT relief*

Suppose an individual holds in one pre-2008 mixed fund:

(1) income which is subject to foreign tax and qualifies for UK double tax relief; and

29 [Author's note] But what the Court of Exchequer had to say is of no significance since the House of Lords expressed the matter differently.

(2) untaxed foreign income taxable in full on the remittance basis.

It is considered that the *Roxburghe* approach applies. A remittance from this mixed fund should be regarded as made first of all out of the income which qualifies for UK double tax relief.

### 11.14.4 *Remittances out of mixed capital funds*

Suppose an individual holds in one pre-2008 mixed fund:

(1) capital which does not represent any chargeable gain within the scope of CGT; and

(2) the proceeds of a disposal on which a chargeable gain accrued.

A remittance from this fund should for CGT purposes be treated as coming out of the tax free source first.

### 11.14.5 *Remittance of gain or remittance of base cost?*

Suppose a foreign domiciliary purchases a foreign asset for £1m; they sell it for £3m and realises a pre-2008 chargeable gain of £2m. If they remit the entire £3m proceeds, the entire £2m gain is charged to CGT. But what is the position if they remit only £1m and retain the balance abroad? The former Inspectors Manual para.1567 published 9/95 provided:

> Where a capital remittance is made to the UK from a fund or account into which the proceeds of sale of assets situated outside the UK have been paid, the remittance will include a due proportion of any capital gains[30] arising from the disposal transactions. This is because, whilst the income content of any fund is a separate and distinguishable part of that fund, a capital gain is merely part of the whole proceeds of a disposal transaction that has no separate identifiable existence within those proceeds.

The last sentence is correct to say that a capital gain has no identifiable existence. I do not think it even exists as "part of the whole proceeds". It is not a separate or separable item of property existing at all. The gain is merely the result of a computation. The proceeds of a disposal represent

30 The italicised words are a paraphrase of the statutory test, which is not whether the amount remitted includes the gain, but whether it is in respect of the gain. Note how this rephrasing subtly bolsters the HMRC view.

the gain, but they do not constitute the gain, just as trading receipts do not constitute the profits of a trade. So it is considered that the HMRC view is correct.

## 11.15 Pre-2008 mixed fund regime: HMRC examples

The RDR manual gives two examples concerning pre-2008 mixed funds. The first example involves a pre-2008 transfer from a pre-2008 mixed fund. One therefore applies the pre-2008 mixed fund rules.

**35320 Mixed Funds: Example 4 - remittances before 6 April 2008**
**Example 4** (Martyn)
The "mixed fund" rules in s809Q do not apply to amounts that are in an account before 6 April 2008 (FA2008/para 89).
M has lived in the UK for many years. He has paid UK tax on the remittance basis for all relevant tax years and has decided that he will do so again for 2008/2009.
M has his UK salary paid into his overseas bank account. He also has a salary for overseas employment and his net salary for that work of £5,000 a month is paid into the account. Dividends from a shareholding in a foreign company are also paid into the account.
On 18 March M sold some of his foreign shares. He deposited the proceeds of £5,000,000 from the sale into his overseas account. This amount is made up of £4m capital and £1m gain (no deduction of foreign tax).

| | | Credit (Debit) | Balance | Note |
|---|---|---|---|---|
| **Tax Year 2007-2008** | | | | |
| | Balance b/f | | £47,000 | 1 |
| 31 Dec | UK salary (net of tax) | £10,000 | £57,000 | |
| 31 Dec | Overseas salary (net of tax) | £5,000 | £62,000 | |
| 3 Jan | Transfer to UK account | (£5,000) | £57,000 | 2 |
| 31 Jan | UK salary | £10,000 | £67,000 | |
| 31 Jan | Overseas salary | £5,000 | £72,000 | |
| 3 Feb | Transfer to UK account | (£12,000) | £60,000 | 2 |
| 15 Feb | Dividend | £2,000 | £62,000 | |
| 29 Feb | UK salary | £10,000 | £72,000 | |
| 29 Feb | Overseas salary | £5,000 | £77,000 | |
| 3 Mar | Transfer to UK account | (£8,000) | £69,000 | 2 |
| 18 Mar | Share Sale £4m capital £1m gain | £5,000,000 | £5,069,000 | 3 |
| 31 Mar | UK salary | £10,000 | £5,079,000 | |
| 31 Mar | Overseas salary | £5,000 | £5,084,000 | |
| 3 Apr | Transfer to UK account | (£10,000) | £5,074,000 | 2 |

**Note 1**
The balance brought forward of £47,000 is made up of £15,000 UK salary,

£25,000 overseas salary and £7,000 overseas dividends all arising in, and credited during that tax year. M has paid the relevant amount of UK tax based upon his UK sources of income and the amounts of foreign income and gains that he has remitted to the UK.

**Note 2**

[This text is discussed in 11.14.2 (Remittance from mixture of capital and foreign income).]

So to establish the taxable amount of remittances made in the example above in 2007-2008 the account must be analysed. In this case the analysis is straightforward. M has brought £49,000 to the UK between December 2007 and March 2008 to meet his day to day UK spending needs. Applying the *Sterling Trust v IRC* practice outlined above, the £35,000 can be regarded as remittances consisting solely of his UK salary that has already been taxed under PAYE. Because he has claimed the remittance basis of taxation in respect of his relevant foreign income or foreign earnings for 2007-2008 he has no further amount of UK tax to pay on these amounts that stay in the Offshore account.

**Note 3**

Although not relevant in this example, for years up to 5 April 2008, where a remittance is made to the UK from a mixed fund into which the proceeds from the sale of an asset (such as a shareholding) has been paid the remittance contains a due proportion of any capital and of any capital gain arising from the disposal.

That is because, unlike income that can be identified separately, a capital gain is merely part of the money received from the sale and has no separate existence within that amount. See Capital Gains Manual CG25380 onwards (and CG25440 in particular).

### 11.15.1 *Transfer from fund with pre- and post-2008 entries*

The next example is a post-2008 transfer from a fund with pre- and post-2008 entries.

**35330 Remittances from mixed funds involving income/gains before 6 April 2008 - Example 4a**

Continuing from the example 4 above, on 5 April 2008 M's Offshore account contains:

| | | |
|---|---|---|
| **2007- 2008** | UK salary | £20,000 |
| | Overseas salary | £45,000 |
| | Overseas dividends | £9,000 |
| | Sale of shares: Capital | £4,000,000 |
| | -ditto- Gain | £1,000,000 |

| **Tax Year 2008-2009** | | **Credit (Debit)** | **Balance** | **Category** | **Note** |
|---|---|---|---|---|---|
| 6 Apr | Balance b/f | £5,074,000 | | | |
| 30 Apr | UK salary (net) | £10,000 | £5,084,000 | Para (a) | |
| 30 Apr | Overseas salary (net) | £5,000 | £5,089,000 | Para (f) | |
| 3 May | Transfer to UK acc | (£5,000) | £5,084,000 | | 1 |
| 15 May | Dividend | £2,000 | £5,086,000 | Para (g) | |

| | | | | |
|---|---|---|---|---|
| 31 May | UK salary | £10,000 | £5,096,000 Para (a) | |
| 30 May | Overseas salary | £5,000 | £5,101,000 Para (f) | |
| 30 June | UK salary | £10,000 | 5,111,000 Para (a) | |
| 30 June | Overseas salary | £5,000 | £5,116,000 Para (f) | |
| 30 June | Direct Debit | (£100,000) | £5,016,000 | 2 |

**Note 1**

Applying the ordering rules in S809Q to the account **immediately before the** transfer:

| | |
|---|---|
| **Step 1** Identify the "amount of transfer" in the relevant tax year (2008-09) | £5,000 |
| Identify the separate amounts of income, gains and capital present for the relevant tax year (2008-09) immediately before the transfer: | |
| **Para (a)** Employment income not subject to a foreign tax | £10,000 |
| **Para (f)** Employment income subject to a foreign tax | £5,000 |
| **Step 2** Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund | |
| **Para (a)** | £10,000 |
| **Step 3** Where the amount of the remittance is less than the amount identified at Step 2 the amount remitted is treated coming entirely from that paragraph. There is no need to continue to step 4. | £5,000 |

The remittance is regarded as coming from the "earliest paragraph", that is para (a), so the £5,000 is UK employment income, so there is no taxable remittance of foreign income nor further tax to pay upon remittance.

**Note 2**

M decided to buy a residential property. He remits £100,000 to pay some legal fees [!] for the purchase on 30 June. Although M considers that this amount has come from the sale of shares in 2007-2008 the ordering rules in s809Q require the remittance to be taken into account first against all income and gains of the year in which the remittance is made.

| | |
|---|---|
| **Step 1** Identify the "amount of transfer" in the relevant tax year (2008-2009) | £100,000 |
| Identify the separate amounts of income, gains and capital present for the relevant tax year (2008-09) immediately before the transfer: | |
| **Para (a)** Employment income not subject to a foreign tax | £25,000 |
| **Para (f)** Employment income subject to a foreign tax | £15,000 |
| **Para (g)** Relevant foreign income subject to a foreign tax | £2,000 |
| **Step 2** Identify the earliest paragraph above for the relevant year, which has an amount of income or gain in the mixed fund: | |
| **Para (a)** | £25,000 |
| **Step 3** Where the amount of the remittance is greater than the amount identified at Step 2 the amount remitted is treated as | £100,000 - £25,000 = |

| | |
|---|---|
| reduced by the amount identified in Step 2. | £75,000 |
| **Step 4** Find the next paragraph/amount for that tax year. In the order of preference listed above repeat Steps 2 and 3. | |
| **Step 4** In the order of preference listed above repeat Steps 2 and 3. | |
| **Step 2** Identify the earliest paragraph: **Para (f)** | £15,000 |
| **Step 3** Where the amount of the remittance is greater | £75,000 less £15,000 = £60,000 |
| **Step 4** In the order of preference listed above repeat Steps 2 and 3. | |
| **Step 2 Para (g)** | £2,000 |
| **Step 3** | £60,000 less £2,000 = £58,000 |

At this stage all of the amounts credited to the account in 2008-09 have been matched against £100,000 remittance transfer in that year. But £58,000 has been brought to the UK that has not been "matched" under the s809Q rules (and cannot be matched because of FA2008/para89).
The remaining £58,000 is regarded as coming from the 2007-08 credits to the account. The ordering rules at section 809Q cannot be used, so instead the general principles outlined in Note 2 of example 4 above will apply.
This £58,000 will usually be regarded as a remittance of M's income and is, first and foremost (Sterling Trust principle) his taxed income and then (Scottish Provident v Allan principle) any other income - that is his foreign employment income or dividends - as he selects.
However in this case M may equally be able to demonstrate that the remaining £58,000 comes from the proceeds of the sale of shares, as he particularly sold the shares in order to fund this house purchase. If that is the case, the remaining remittance will consist of £11,600 foreign chargeable gain (1/5 due proportion – see note 3 in example 4).

How is M to demonstrate that the £58k comes from the proceeds of the sale of shares, given that the fund is mixed? The correct approach is to say that the substance is one of a remittance of capital since the purchase is for the house.

## 11.16 Remittance of nominated income or gains

### 11.16.1 *Outline*

EN FB 2008 provides:

> 14... If, in subsequent years, that "nominated" income or gains upon which the RBC has been paid is, in fact, remitted to the UK, then that income or gains will not be taxed again. However, there are ordering rules to ensure that if "nominated" income or gains is, in fact, remitted when other untaxed income and gains remain unremitted, then that unremitted income and gains is treated as being remitted before the "nominated" income and gains.

The expression "nominated income and gains" is defined in s.809I(3). The drafter thought that this was a section-wide definition only, so repeated the definition in s.809J(3). (If the definitions had been made ITA-wide definitions this repetition would not have been necessary.) The definition provides:

> (3) In this section the individual's "nominated income and gains" are the total income and chargeable gains nominated by the individual under section 809C for the relevant tax year or any earlier tax year.

The definition is discussed in 9.11.2 (Nomination of income and gains).

### 11.16.2 *"Remittance basis income and gains"*

Section 809I(4) ITA gives this term a fairly commonsense meaning:

> An individual's "remittance basis income and gains" are the foreign income and gains of the individual for all the tax years (up to and including the tax year mentioned in subsection (1)(a)) for which section 809B, 809D or 809E applies to the individual, apart from the individual's nominated income and gains.

Nominated income/gains do not count as remittance basis income/gains because they are taxed on an arising basis. The drafter thought that this was a section-wide definition only, so repeated the definition in s.809J(4):

> (4) In step (1) of subsection (1) the individual's "remittance basis income and gains" are the foreign income and gains of the individual for all the tax years (up to and including the relevant tax year) for which section 809B, 809D or 809E applies to the individual, apart from the individual's nominated income and gains.

### 11.16.3 *Nominated income/gains categories*

The taxpayer must classify all their remittance basis income and gains into 8 categories, which I will call **"the nominated income/gains categories"**. The categories are set out in s.809J(2) ITA. These are almost the same as the nine mixed fund categories but:

(1) there are casual differences of wording which do not affect the meaning; and
(2) there are (incredibly) small differences of substance (I do not see why – if any reader can suggest a reason I would be interested to know).

I here set out a table which compares the two (the differences are italicised):

| **Nominated income/gains categories** | **Mixed fund categories** |
|---|---|
| | (a) *employment income (other than income within para (b), (c) or (f))* |
| (a) relevant foreign earnings (other than those subject to a foreign tax) | (b) relevant foreign earnings (Other than income within para (f)) |
| (b) foreign specific employment income (other than income subject to a foreign tax) | (c) foreign specific employment income (other than income within para (f)) |
| (c) relevant foreign income (other than income subject to a foreign tax) | (d) relevant foreign income (other Than income within para (g)) |
| (d) foreign chargeable gains (other than gains subject to a foreign tax) | (e) foreign chargeable gains (other than chargeable gains within para (h)) |
| (e) *relevant foreign earnings subject to a foreign tax* | (f) employment income subject to a foreign tax |
| (f) *foreign specific employment income subject to a foreign tax* | |
| (g) relevant foreign income subject to a foreign tax | (g) relevant foreign income subject to a foreign tax |
| (h) foreign chargeable gains subject to a foreign tax | (h) foreign chargeable gains subject to a foreign tax |
| | (i) income or capital not within another paragraph |

Section 809J(6) ITA defines foreign tax for the purpose of the nominated income/gains categories:

> In subsection (2) "foreign tax" means any tax chargeable under the law of a territory outside the UK.

The same definition is used for the mixed funds categories and I discuss the definition there.[31]

### 11.16.4 *Condition for application of nominated income remittance rules*

Section 809I ITA provides:

> **809I Remittance basis charge: income and gains treated as remitted**
> (1) This section applies if—
> (a) any of an individual's nominated income and gains is remitted to the UK in a tax year, and
> (b) any of the individual's remittance basis income and gains has not been remitted to the UK in or before that year.
> (2) Income tax and capital gains tax are charged, for that year and subsequent tax years, as if
> [a] the income and chargeable gains treated under section 809J as remitted to the UK by the individual in that tax year had been so remitted
> [b] (and income and chargeable gains of the individual that were actually remitted in that year had not been).

So we turn to s.809J ITA, which sets out artificial or fictional remittance rules which I call **"the nominated income remittance rules".** (It would be more accurate to call this "the nominated income/*gains* remittance rules", but for convenience I shall where possible refer to income (rather than income/gains) and leave gains to be understood.)

Section 809J(1) provides:

> **809J Section 809I: order of remittances**
> (1) If section 809I applies, the following steps are to be taken for the purpose of determining the income or gains treated in a tax year ("the

31 See 11.3 (Ingredients of a mixed fund).

relevant tax year") as remitted to the UK by the individual.

The section sets out six steps. It is easier to follow the steps if one has an example in mind.

Suppose T (a remittance basis taxpayer) has remittance basis income and gains of £10k per annum of each of the nominated income/gains categories thus:

| **Category** | **Type of income (in short)** | **Year 1** | **Year 2** |
|---|---|---|---|
| (a) | relevant foreign earnings | £10k | £10k |
| (b) | foreign specific employment income | £10k | £10k |
| (c) | relevant foreign income | £10k | £10k |
| (d) | foreign chargeable gains | £10k | £10k |
| (e) | foreign taxed relevant foreign earnings | £10k | £10k |
| (f) | foreign taxed foreign specific employment income | £10k | £10k |
| (g) | foreign taxed RFI | £10k | £10k |
| (h) | foreign taxed gains | £10k | £10k |

Suppose T has in addition to the above £30k nominated income and gains per annum.

T remits nothing in year 1. In year 2 T remits:
(a) £1k from T's nominated income/gains.
(b) £80k from T's remittance basis income/gains.

This brings the nominated income remittance rules into action. (Even if only 1p of the nominated income/gains had been remitted, that would suffice. There is no de minimis rule.[32])

32 HMRC say they will take this point. March 2009 Qs & As provides:

"**Q13:** Cross-collateralisation of debts. Many banks are currently setting up dedicated accounts (with capital of say £100) which will earn just sufficient income (say £1) to be used as nominated income for the purposes of the £30,000 charge. However, under their standard terms and conditions, the bank will often have a floating charge over every account the individual has with them as support for any lending. If any of that lending is brought into the UK then there is a concern that the £1 income in the nominated account might be said to be 'used outside the UK in respect of a relevant debt' because it is, theoretically at least, capable of being taken in support of the borrowing under the cross-collateralisation. In practice, of course, the £1 in the nominated income account

*Step 1*
*Find the total amount of—*
*(a) the individual's nominated income and gains, and*
*(b) the individual's remittance basis income and gains,*
*that have been remitted to the UK in the relevant tax year.*
*This amount is "the relevant amount".*

In the example the relevant tax year is year 2. Applying the facts of the example, the relevant amount is £81k.

*Step 2*
*Find the amount of foreign income and gains of the individual for the relevant tax year (other than income or chargeable gains nominated under section 809C) that is within each of the categories of income and gains in paras (a) to (h) of subsection (2).*
*If none of sections 809B, 809D and 809E apply to the individual for that year, treat those amounts as nil (and accordingly go to step 6).*

"The amount of foreign income and gains of the individual for the relevant tax year (other than income or chargeable gains nominated under section 809C)" means the remittance basis income/gains. (It appears that the drafter has forgotten to use the term which the drafter has defined (twice) for this purpose; but it does not matter.) The amount in the example is as set out in the table above.

*Step 3*
*Find the earliest paragraph for which the amount determined under*

makes no difference one way or the other to the bank's security. One answer to this, of course, is for the banks to change their standard terms and conditions to exclude the nominated account. However, this is easier said than done and is unlikely in most cases to be done before 6 April 2009. The concern, as you will realise, is that if any nominated income is - as a result of this - deemed to be remitted then this results in re-characterisation under s809I and s809J, spoiling careful account segregation for ever afterwards.
Is there any possibility that we could have some de minimis here so that, say, up to £100 of nominated income would not be treated as remitted in these circumstances?
**A:** No. Whether or not this is an issue will depend on the terms and conditions attached to the accounts and loans held with the bank or other financial institution. If individuals are concerned about this issue then it would make sense to simply open a separate account with a different financial institution."

> *step 2 is not nil.*

The earliest paragraph is para (a).

> *If that amount does not exceed the relevant amount, treat the individual as having remitted the income or gains within that paragraph (and for that tax year).*

The individual is treated as having remitted £10k relevant foreign earning, category (a) for year 2.

> Otherwise, treat the individual as having remitted the relevant proportion of each kind of income or gains within that paragraph (and for that tax year).
> "The relevant proportion" is the relevant amount divided by the amount determined under step 2 for that paragraph.

(Had the total remittance been (say) £5k then the relevant proportion would have been £5k÷£10k = 50% so the transfer would have been treated as containing £5k employment income category (a) for year (1).)

> *Step 4*
> Reduce the relevant amount by the amount taken into account under step 3.

The relevant amount is reduced to £71k.

> *Step 5*
> If the relevant amount (as reduced under step 4) is not nil, start again at step 3.
> In step 3, read the reference to the earliest paragraph of the kind mentioned there as a reference to the earliest such paragraph which has not previously been taken into account under that step.

Following this iterative procedure a total of eight times, the transfer is treated as containing:

| | |
|---|---|
| (a) relevant foreign earnings | £10k |
| (b) foreign specific employment income | £10k |
| (c) relevant foreign income | £10k |
| (d) foreign chargeable gains | £10k |
| (e) foreign taxed RFE | £10k |

| | | |
|---|---|---|
| (f) | foreign taxed SEI | £10k |
| (g) | foreign taxed RFI | £10k |
| (h) | foreign taxed gains | £10k |
| | **Total** | **£80k** |

The relevant amount is by this stage reduced to £1k. We move to the next step:

> *Step 6*
> *If the relevant amount (as reduced) is not nil once steps 3 to 5 have been undertaken in relation to all paragraphs of subsection (2) for which the amount determined under step 2 is not nil, start again at step 2.*
> *In step 2, read the reference to the foreign income and gains of the individual for the relevant tax year as a reference to such of the foreign income and gains of the individual for the appropriate tax year as had not been remitted*[33] *by the beginning of the relevant tax year.*
> *"The appropriate tax year" is the latest tax year which is—*
> *(a) before the last tax year for which step 2 has been undertaken, and*
> *(b) a tax year for which section 809B, 809D or 809E applies to the individual.*

Thus we repeat step 2 a last and ninth time, reading "the relevant tax year" to mean year 1. So the remittance of £81k is treated as being:

| | | |
|---|---|---|
| (a) | relevant foreign earnings | £11k |
| (b) | foreign specific employment income | £10k |
| (c) | relevant foreign income | £10k |
| (d) | foreign chargeable gains | £10k |
| (e) | foreign taxed RFE | £10k |
| (f) | foreign taxed SEI | £10k |
| (g) | foreign taxed RFI | £10k |
| (h) | foreign taxed gains | £10k |
| | **Total** | **£81k** |

33 Section 809J(5) ITA provides:
In step 6 of subsection (1) the reference to income or gains being remitted is—
(a) as respects any tax year before section 809I applies, to income or gains being remitted to the UK, and
(b) as respects any tax year in relation to which that section applies, to income or gains treated under this section as so remitted.

March 2009 Qs & As provides:

> **Q3:** HM Revenue & Customs (HMRC) have indicated that individuals do not have to specify which account the nominated income comes from, and from this it could be inferred that without further disclosure of the particulars of the account the taxpayer may be at risk of "tainting" every other source of income of that type. For example if an individual has an account with one bank in Jersey and another bank in a different jurisdiction, he could nominate bank interest on his Jersey account, so that it would be obvious that if he remitted income from his other account, he might not fall foul of re-characterisation provisions. However, this may not be the case if he had three different accounts with the same bank in Jersey and he wishes to nominate income from one of those accounts without disclosing the account number of that account. Can HMRC clarify what their approach to this will be?
> **A:** It is up to the individual to decide how much information to give HMRC on their Self Assessment returns in order to identify the source of the nominated income or gains; if, as in this example, there is more than one account the individual should provide sufficient detail to distinguish between them and identify the "nominated" account. That might be the entire account number, or the account "name", or some other unique identifying feature of the account.

March 2009 Qs & As makes an obvious point:

> **Q6:** If I use nominated income or gains to pay the remittance basis charge of £30,000 it would appear that does not trigger the provisions in sections 809I and 809J. Is that right?
> **A:** If £30,000 of the nominated income or gains is brought to the UK to pay the remittance basis charge, it is treated as not remitted to the UK under section 809V. Therefore section 809I does not apply because none of the individual's nominated income or gains is regarded as having been remitted to the UK in that tax year. If the £30,000 is repaid by HMRC then it is treated as remitted at that point and so section 809I will be triggered.

### 11.16.5 *Accidental remittance of nominated income/gains*

The RDR Manual provides:

**35140 Remittances of nominated income or gains - miscellaneous**
If an individual accidentally remits any nominated income or gains to the UK then HMRC will allow them to undo their mistake, by reversing the transfer without unreasonable delay and in any event before the end of the tax year, for example by paying the income or gains back to the original account, so that the ordering rules at s809I and s809J will not apply.
HMRC will only use its discretion in such situations as long as there have been no relevant transactions or other benefits conferred on a relevant person in the interim. Otherwise the s809J ordering rules will apply.
For example, if £20,000 is transferred in error from an overseas bank to a UK bank account and two weeks later the account owner realises the mistake and immediately transfers that £20,000 directly back to the overseas bank account, HMRC will accept that s809I and s809J do not apply. However if, for example, the £20,000 was spent in the UK and then £20,000 from another UK account was transferred back to the overseas account then s809I and s809J do apply.

### 11.16.6 *Remittance basis charge and section ITA07/s809V*

The RDR Manual provides:

**35140 Remittances of nominated income or gains - miscellaneous**
If taxpayers use nominated income or gains to pay the remittance basis charge of £30,000 it is treated as not remitted to the UK under ITA07/s809V (see RDRM34020 Remittance basis charge – money paid directly to HMRC). Therefore the "ordering rules" at ITA07/s809I and s809J do not apply because none of the individual's nominated income or gains is regarded as having been remitted to the UK in that tax year. If the £30,000 is repaid by HMRC then it is treated as remitted at that point and so s809I is triggered.

### 11.16.7 *HMRC example*

The RDR Manual provides:

**35150 Remittances of nominated income or gains** [July 2010]
*Example 1* (Alexandria)
... *A has foreign income or gains, and uses the remittance basis as follows*

| | Foreign gains Para (d) | Jersey RFI Para (c) | Jersey RFE Para(a) | Nomination (from Jersey RFI) |
|---|---|---|---|---|
| 2010-11 | £250,000 | £75,000 | £200,000 | £75,000 RFI |
| 2011-12 | £300,000 | £80,000 | £120,000 | £75,000 RFI |
| 2012-13 | Nil | £75,000 | £280,000 | £75,000 RFI |
| 2013-14 | £130,000 | £80,000 | £150,000 | £75,000 RFI |
| Totals | £680,000 | £310,000 | £750,000 | |

*In 2013-14 A actually and identifiably remits*

£30,000 Jersey relevant foreign income that she nominated in 2010-11,
£140,000 foreign chargeable gains from 2011-12 and
£50,000 relevant foreign earnings from 2013-14.

*The ordering rules are triggered. The "relevant year" is 2013-14*

| | | | |
|---|---|---|---|
| **Step 1** Identify nominated income and gains remitted in the relevant year | £30,000 | **Relevant Amount** | £220,000 |
| Identify the remittance basis income and gains remitted in the relevant year | £190,000 | | |
| **Step 2** | | | |
| Find the total amount of the individual's foreign income and gains (excluding those nominated) for the relevant tax year | **Para (a)** Relevant foreign earnings (not subject to a foreign tax) | | £150,000 |
| | **Para (c)** Relevant foreign income (not subject to a foreign tax) | | £5,000 |
| | **Para (d)** Foreign chargeable gains (not subject to a foreign tax) | | £130,000 |
| **Step 3** Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil. | **Para (a)** | | £150,000 |
| **Step 4** Where the relevant amount is greater than the amount identified above the relevant amount is reduced by the amount identified | £220k less £150k = £70,000 | | |

**Step 5** If the relevant amount is not nil go back and repeat Step 3. Take the reference to the first of paragraphs (a) to (h) as a reference to the earliest paragraph not previously taken into account under Step 3.

| | | |
|---|---|---|
| **Step 3** repeated | **Para (c)** | £5,000 |
| **Step 4** repeated | Relevant Amount reduced to: | £65,000 |

**Step 5** In the order of preference listed above repeat Steps 3 and 4.

| | | |
|---|---|---|
| **Step 3** repeated | **Para (d)** | £130,000 |

**Step 4** If the relevant amount is less than the amount identified, treat the whole of the remaining amount of the transfer as coming from that item of income or gain.

*So A will be taxed on £220,000 of remittances as if she had actually remitted the following*

| | | 2010-11 | 2011-12 | 2012-13 | 2013-14 |
|---|---|---|---|---|---|
| **Foreign chargeable gains** | Accruing in year | £250,000 | £300,000 | Nil | £130,000 |
| | Actually remitted | £Nil | £140,000 | £Nil | £Nil |
| | Treated as remitted | £Nil | £Nil | £Nil | £65,000 |
| **Relevant foreign income Nominated** | Arising in year | £75,000 | £75,000 | £75,000 | £75,000 |
| | Actually remitted | £30,000 | £Nil | £Nil | £Nil |
| | Treated as remitted | £Nil | £Nil | £Nil | £Nil |
| **Relevant foreign income Not nominated** | Arising in year | £Nil | £5,000 | £Nil | £5,000 |
| | Actually remitted | £Nil | £Nil | £Nil | £Nil |
| | Treated as remitted | £Nil | £Nil | £Nil | £5,000 |
| **Relevant foreign earnings** | Accruing in year | £200,000 | £120,000 | £280,000 | £150,000 |
| | Actually remitted | £Nil | £Nil | £Nil | £50,000 |
| | Treated as remitted | £Nil | £Nil | £Nil | £150,000 |

If in future years she actually remits any of these monies, the ordering rules will treat her as having remitted something else instead (refer to RDRM35160 - example 1 continuation).

**35160 Remittance of "nominated" income or gains** [July 2010]

*Example 1 - Continued*

Moving forward, in 2014-15 A has relevant foreign earnings of £80,000, but no other foreign income or gains. She decides not to use the remittance basis in that year.
In 2014-15 A actually brings into the UK;
£5,000 Jersey relevant foreign income that she did not nominate in 2013-14 (note 1)
£80,000 relevant foreign earnings from 2013-14 and
£80,000 relevant foreign earnings from 2014-15
Although A is not using the remittance basis in 2014-15, the ordering rules at s809J ITA 2007 are still required to determine what she is to be taxed as having remitted in that year. The relevant year is 2014-15.

*Ordering rules at 2014-15*

| | | | |
|---|---|---|---|
| **Step 1** Identify nominated income and gains remitted in the relevant year (2014-15) | £nil | **Relevant Amount** | £85,000 |
| Identify the remittance basis income and gains remitted in the relevant year | £85,000 (see note 2) | | |
| **Step 2** Find the total amount of the individual's | Nil | | |

foreign income and gains (excluding those nominated) for the relevant tax year If the remittance basis was not used in that year (that is sections 809B, 809D or 809E did not apply), treat those amounts as nil and go to step 6

**Step 6**

If the relevant amount is not nil, start again at step 2. Take the reference to "relevant year" to be a reference to foreign income of gains of the individual for the earliest 'appropriate year' previous to the lat tax year from which Step 2 was undertaken.

| | | |
|---|---|---|
| **Step 2** Find the total amount of the individual's foreign income and gains (excluding those nominated) for the appropriate tax year (2013-14) (see note 3) | **Para (d)** Foreign chargeable gains (not subject to a foreign tax) | £65,000 |
| **Step 3** Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil. | **Para (d)** | £65,000 |
| **Step 4** Where the relevant amount is greater than the amount identified above the relevant amount is reduced by the amount identified | Relevant Amount reduced to: | £85k less £65k = £20,000 |

**Step 5** If the relevant amount is not nil go back and repeat Step 3. Take the reference to the first of paragraphs (a) to (h) as a reference to the earliest paragraph not previously taken into account under Step 3.

**Step 6**

If the relevant amount is not nil after Steps 3-5 have been completed for the year, start again at step 2. Take the reference to 'relevant year' to be a reference to foreign income of gains of the individual for the earliest 'appropriate year' previous to the lat tax year from which Step 2 was undertaken.

| | | |
|---|---|---|
| **Step 2** Find the total amount of the individual's foreign income and gains (excluding those nominated) for the appropriate tax year (2012-13) | **Para (a)** Relevant foreign earnings (not subject to a foreign tax) | £280,000 |
| **Step 3** Identify the earliest of paragraphs (a) to (h) above for which the amount determined in Step 2 is not nil | **Para (a)** | £280,000 |

**Step 4** If the relevant amount is less than the amount identified, treat the whole of the remaining amount of the transfer as coming from that item of income or gain

So in 2014-15 A is treated as having remitted
£20,000 relevant foreign earnings
£65,000 foreign chargeable gains.
NB – The £80,000 relevant foreign earnings from 2014-15 that she brings in will be taxed on the arising basis in that year.

**Note 1** In 2013-14 A has £80,000 of Jersey relevant foreign income, of which £75,000 were nominated; if this £80,000 were all in the one single account, and there was nothing else in the account then, under the principle of this section the first £5,000 remitted in 2014-15 is accepted as being "not-nominated" income. In this example it is of little practical difference because the s809J ordering rules have already been "triggered" in 2013-14 by her remittance of nominated income (from 2010-11).

But if the ordering rules had not already been triggered, then because, this £5,000 Jersey relevant foreign income in 2014-15 can be accepted as being "unnominated" income first and foremost, so A's remittance of this £5,000 would not, of itself, have triggered the s809J ordering rules in this year.

**Note 2** A's remittance basis income and gains are her total foreign income or chargeable gains for all tax years up to the "relevant tax year (2014-15) in which she used the remittance basis under section 809B, section 809D or section 809E. It therefore excludes her relevant foreign earnings from 2014-15 because she is not using the remittance basis in that year.

**Note 3** the 'foreign income and gains 'for' the appropriate year exclude any:

- 'nominated' income or gains, or
- income or gains that were actually remitted to the UK before the beginning of the appropriate tax year or
- income or gains that were treated as remitted to the UK previously under section 809J before the beginning of the appropriate tax year.

In A's case, the £5,000 Jersey relevant foreign income from 2013-14, and the £80,000 relevant foreign earnings from 2013-14 that she actually remitted in 2014-15 were treated as having been remitted in 2013-14 by the ordering rules (refer to the earlier part of example 1 RDRM35150).

*Summary*

| | | **2010-11** | **2011-12** | **2012-13** | **2013-14** | **2014-15** |
|---|---|---|---|---|---|---|
| **Foreign chargeable gains** | Accruing in year | £250,000 | £300,000 | £Nil | £130,000 | £Nil |
| | Actually brought to UK | £Nil | £140,000 | £Nil | £Nil | £Nil |
| | Treated as remitted | £Nil | £Nil | £Nil | £130,000 | £Nil |
| **Relevant foreign income Nominated** | Arising in year | £75,000 | £75,000 | £75,000 | £75,000 | £Nil |
| | Actually brought to UK | £30,000 | £Nil | £Nil | £Nil | £Nil |
| | Treated as remitted | £Nil | £Nil | £Nil | £Nil | £Nil |
| **Relevant foreign income Not nominated** | Arising in year | £Nil | £5,000 | £Nil | £5,000 | £Nil |
| | Actually brought to UK | £Nil | £Nil | £Nil | £5,000 | £Nil |
| | Treated as remitted | £Nil | £Nil | £Nil | £5,000 | £Nil |
| **Relevant foreign earnings** | Arising in year | £200,000 | £120,000 | £280,000 | £150,000 | £80,000 |
| | Actually brought to UK | £Nil | £Nil | £Nil | £130,000 | £80,000 |
| | Treated as remitted | £Nil | £Nil | £20,000 | £150,000 | £Nil |

## 11.16.8 *De minimis relief from 2012/13*

The remittance consultation paper provides:

> **Nominated income**
> 2.67 Non-domiciles who have been UK resident in at least seven of the past nine tax years are liable to an annual charge of £30,000 if they claim the remittance basis. The rules governing the payment of this charge can be very complicated and result in significant administrative burdens and inconvenience for the taxpayer.
> 2.68 Those who elect to pay the charge are required to nominate an amount of their overseas income and capital gains which is taxable on the arising basis and is deemed to generate an additional tax charge of £30,000.
> 2.69 There are complicated rules to ensure that an individual cannot subsequently remit any of the income or capital gains which they have nominated before other overseas income andcapital gains which would be taxed in the UK when remitted.This must be in addition to the UK tax to which they are otherwise liable on income and capital gains arising in the UK or remitted to the UK. This nomination ensures that the £30,000 is a tax charge on overseas income and gains rather than a standalone levy.
> 2.70 Individuals can encounter significant administrative difficulties where they fail to keep their nominated income and capital gains segregated from other income and capital gains. In such situations, an individual might inadvertently remit some of their nominated income and capital gains to the UK. This will mean that they become subject to complicated identification rules which trace the origin of each payment and ensure that the nominated amounts are always the last to be remitted. In the absence of these rules, it would be possible for an individual to reduce significantly the amount of tax they pay on the income or capital gains which they remit to the UK.
> 2.71 To avoid some of these complexities, it is common for an individual to open an overseas bank account which has the sole purpose of holding funds to generate sufficient income to be nominated for the purposes of the annual charge. Whilst this should allow the individual to avoid the identification rules, the need to set up a special overseas bank account involves additional expenditure and administrative obligations. Moreover, even where an individual has a dedicated bank account for their nomination, it cannot be guaranteed that they would never inadvertently make remittances from the account.
> 2.72 The Government recognises that this can result in excessive and

unhelpful complexity which is hard for the taxpayer to understand. It therefore proposes to amend the legislation to allow individuals to remit the first £10 of income or capital gains which they nominate free of tax and without becoming subject to the identification rules. This will enable them to nominate up to £10 of their foreign income or capital gains for the purposes of the £30,000 charge without having to ensure they do not subsequently remit any part of that nominated amount to the UK. Many individuals only nominate a small amount of foreign income or capital gains and so this simplification would remove the risk of them inadvertently remitting the nominated income and triggering the identification rules.
2.73 This would significantly reduce the need to maintain an overseas bank account solely for the purposes of nominating income and capital gains, whilst making the nomination rules less administratively onerous.
2.74 The remaining rules applying to nominated income and capital gains will remain unaltered.[34]

## 11.17 Nominated income: commentary

In short, the effect of the nominated income remittance rule is that remittances are treated as being made in the nominated income/gains priority order, taking more recent years before earlier years (regardless of the actual remittances). As in the case of the "steps" of the mixed fund rules, one is tempted to ask: why didn't the statute simply say so?

But the drafting is the least of the problems of the nominated income remittance rule. The author of the EN anticipates criticism that this is administratively difficult and offers some tax planning advice:

> 14...The rules dealing with this in sections 809I and 809J will require additional records to be maintained from 6 April 2008 or the first year of residence in the UK, if later.
> 15. The record keeping necessary for sections 809I and 809J can be avoided if individuals ensure that "nominated" income or gains upon which the RBC is paid are not remitted to the UK, or only remitted after the remittance of all other unremitted income and gains since the first year of residence from April 2008. If an individual is confident they will never need to remit that "nominated" income or gains, paying the RBC

34 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

> will not involve any extra complexity or record keeping.[35]

Even if this advice were correct it would not help the majority of remittance basis taxpayers, but they should not complain about administrative complexity: they are responsible for the problem, which they brought on themselves by making a claim for the remittance basis:

> 16. As mentioned earlier, those eligible can choose whether or not to claim the remittance basis for each particular year, depending on whether it is to their advantage to do so.

But even the administrative inconvenience is not the serious problem of the rule. The effect of the rule is that if the individual remits a penny of their nominated income/gains, one disregards entirely the actual remittances and charges on the basis of the fictional rules. Thus an individual who actually remits gains is taxed as if they remitted income (as long as they also remits a penny of nominated income). It is therefore in principle desirable to take care not to remit any nominated income/gains.

35 The last sentence is not correct. It is not enough that an individual is "confident that they will never need to remit that nominated income or gains". The individual must be able to demonstrate to HMRC that they have not remitted, and that requires record keeping.

CHAPTER TWELVE

# EMPLOYMENT INCOME

## 12.1 Employment income - Introduction

The taxation of employment income is mainly governed by ITEPA 2003. Though now dwarfed by the CTAs 2009 and 2010, ITEPA was for its day a mammoth Act: the table of contents is 36 pages long. At least a dozen volumes would be required for a full discussion of the topic. This chapter focuses on matters closest to the theme of this work but the provisions dealing with foreign domiciliaries and non-residents can only be understood in the context of the UK provisions so I begin with a more general outline.

For benefits in kind see 65.6 (Home owned by company: benefit in kind charge), 65.34 (Chattels held by companies) and 40.5 (Employment-related loans). For NICs see 42.1 (National insurance contributions).

I do not discuss employment-related securities but hope to do so in a future edition.

## 12.2 Terminology

It is helpful to begin with some definitions.

### 12.2.1 *"Employer", "employee" and "employment*"

Sections 4 and 5 ITEPA provides a relatively commonsense definition of these terms. Section 5 extends the concept of "employment" to include offices (because directors need not as a matter of employment law be employees):

> (1) The provisions of the employment income Parts that are expressed to apply to employments apply equally to offices, unless otherwise

indicated.

(2) In those provisions as they apply to an office—

(a) references to being employed are to being the holder of the office;

(b) "employee" means the office-holder;

(c) "employer" means the person under whom the office-holder holds office.

### 12.2.2 *"Employment income" "general earnings" "specific employment income"*

"Employment income" is the general category which is subdivided into two subcategories: general earnings and specific employment income. "General earnings" and "specific employment income" are somewhat opaque terms. Section 7 ITEPA provides a referential definition:

> (1) This section gives the meaning for the purposes of the Tax Acts of "employment income", "general earnings" and "specific employment income".
>
> (2) "Employment income" means—
>
> (a) earnings within Chapter 1 of Part 3,
>
> (b) any amount treated as earnings (see subsection (5))[1], or
>
> (c) any amount which counts as employment income (see subsection (6)).[2]
>
> (3) "General earnings" means—

1 Subsection (5) provides:
"Subsection (2)(b) or (3)(b) refers to any amount treated as earnings under—
(a) Chapters 7 to 9 of this Part (agency workers, workers under arrangements made by intermediaries, and workers providing services through managed service companies),
(b) Chapters 2 to 11 of Part 3 (the benefits code),
(c) Chapter 12 of Part 3 (payments treated as earnings), or
(d) section 262 of CAA 2001 (balancing charges to be given effect by treating them as earnings)."

2 Subsection (6) provides:
"(6) Subsection (2)(c) or (4) refers to any amount which counts as employment income by virtue of—
(a) Part 6 (income which is not earnings or share-related),
(b) Part 7 (income and exemptions relating to securities and securities options), or
(c) any other enactment."

(a) earnings within Chapter 1 of Part 3, or
(b) any amount treated as earnings (see subsection (5)),
excluding in each case any exempt income.
(4) "Specific employment income" means any amount which counts as employment income (see subsection (6)), excluding any exempt income.

Specific employment income includes payments on termination of employment and employment-related securities. These topics are not discussed in this work so it is not necessary to consider the terms in further detail.

## 12.3 The charge to tax on employment income

One would expect ITEPA to begin with a provision saying that income tax is charged on employment income. In fact this is implied rather than expressed: s.6 ITEPA provides:

**6 Nature of charge to tax on employment income**
(1) The charge to tax on employment income under this Part is a charge to tax on—
(a) general earnings, and
(b) specific employment income.

Still, the imposition of the charge is clear enough. Section 6 continues:

(2) The amount of general earnings or specific employment income which is charged to tax in a particular tax year is set out in section 9.

Thus ITEPA draws a distinction between what is charged (employment income) and the amount which is charged. This is familiar from other types of income.

## 12.4 Amount charged to tax (taxable earnings)

So we turn to s.9 ITEPA which provides:

(1) The amount of employment income which is charged to tax under this Part for a particular tax year is as follows.

> (2) In the case of general earnings, the amount charged is the net taxable earnings from an employment in the year.

"Net" taxable earnings brings in the rules relating to deductions, not discussed here. "Taxable" earnings is a label which brings in a large number of rules, for in the various situations where the statute desires to bring earnings into charge in a year it provides that they are "taxable" earnings from the employment in that year. Section 9 continues:

> (3) That amount is calculated under section 11 by reference to any taxable earnings from the employment in the year (see section 10(2)).
> ...
> (6) Accordingly, no amount of employment income is charged to tax under this Part for a particular tax year unless—
> (a) in the case of general earnings, they are taxable earnings from an employment in that year, ...

Section 9(3) is just a signpost provision; and s.9(6) expresses what would obviously be the case.

## 12.5 Taxable earnings

Section 10 ITEPA provides the starting point of the definition:

> (1) This section explains what is meant by "taxable earnings" and "taxable specific income" in the employment income Parts.
> (2) "Taxable earnings" from an employment in a tax year are to be determined in accordance with Chapters 4 and 5 of this Part.

So we move on to chapters 4 and 5 part 2 ITEPA. The pace is leisurely. Bypassing two more signpost provisions (ss.14 and 20 ITEPA) we find three sections that identify amounts of taxable earnings: ss.15, 26 and 27 ITEPA.

### 12.5.1 *Summary*

The taxation of employment income can be summarised in this table:

| UK Resident | Ord Resident | UK Domicile | Taxable earnings | ITEPA Section | *Prev[3] ITEPA Section* | Part 2 Chap |
|---|---|---|---|---|---|---|
| Yes | Yes | Yes | All earnings: AB | 15 | *15* | 4 |
| Yes | Yes | No | (1) Overseas earnings: RB<br>(2) UK earnings: AB | 22(2)<br>22(7)→15 | 22<br>*21* | 5 |

## 12.6 Earnings "for" a year, "from the employment in a year" and "received in a year"

ITEPA uses three distinct expressions:
(1) it refers to *earnings "for" a tax year*.
(2) it refers to *earnings from the employment in a tax year*.
(3) it refers to *earnings received in a tax year*.

## 12.7 Earnings "for" a tax year

It is clumsy to refer to the year which earnings are "for" so the statute resorts to quotation marks to help the reader grasp the sense. I adopt that usage here as any paraphrase is even more confusing, but sometimes expressions such as earnings "attributed to a year" or "relating to a year" or "earned in a year" are used.

The concept (however expressed) is fundamental as the taxability of earnings depends on the employee's residence and domicile in the year which the earnings are "for".

The concept is (slightly) elucidated in s.16 ITEPA:

> (1) This section applies for determining whether general earnings are

3 I give the pre 2008-ITEPA reference because this makes it easier to follow the EI Manual which has not yet been updated for the FA 2008 reforms. I do not know why the numbers were reshuffled in 2008.

> general earnings "for" a particular tax year for the purposes of this Chapter.
> (2) General earnings that are earned in, or otherwise in respect of, a particular period are to be regarded as general earnings for that period.
> (3) If that period consists of the whole or part of a single tax year, the earnings are to be regarded as general earnings "for" that tax year.
> (4) If that period consists of the whole or parts of two or more tax years, the part of the earnings that is to be regarded as general earnings "for" each of those tax years is to be determined on a just and reasonable apportionment.
> (5) This section does not apply to any amount which is required by a provision of Part 3 to be treated as earnings for a particular tax year.[4]

Since this section only applies for the purposes of chapter 4, it has to be repeated verbatim in s.29 ITEPA for chapter 5. (If there had been an ITEPA-wide definition the duplication would not have been necessary.)

This is only intended to set out the general meaning that would have applied in the absence of a definition. EN ITEPA Note 6 provides:

> Sections 16 and 29 of the Act therefore spell out that general earnings are "for" a particular period consisting of the whole or part of a tax year if they are general earnings earned in or otherwise in respect of that period. It is thought that this reflects the meaning that a court would give to "for" if the point ever arose.

The EI Manual provides:

**40008. The year that earnings are "for"** [August 2009]

...

This question has no relevance when deciding the tax year in which the tax charge arises. Earnings are assessed to tax in the tax year in which they are "received". The definition of "received" is set out in Section 18 (see EIM42200).

***Why is it important to know the tax year that earnings are "for"?***

Section 16 establishes the year that earnings are "for". Once this has been done, the next step is to decide which of the rules in Part 2 Chapters 4 and 5 apply to calculate taxable earnings.

For the majority of UK Resident and Ordinarily Resident (R/OR) and domiciled employees, the question of the year earnings are "for" has little consequence. This is because all of their earnings are chargeable to UK income tax in consequence of their

4 This is a reference to s.72(2) ITEPA; see too s.222(2) ITEPA and 223(4) ITEPA for definitions in specialist circumstances.

residence and domicile status. In addition, most earn and receive their earnings in the same tax year. However, for those employees who are other than R/OR and UK domiciled and who receive earnings in different years from those in which they earn them, the question continues to be relevant.

***Principles from case law***

The absence of statutory provision in ICTA 1988 and earlier enactments resulted in various cases being litigated through the 20th century.

• *Edwards v Roberts* (19 TC 618)
• *Hunter v Dewhurst*, (*Henry v Foster*) (16 TC 605)
• *Draycup v Radcliffe* (27 TC 188)
• *Heasman v Jordan* (35 TC 518)
• *Board of Inland Revenue v Suite* (Privy Council) ([1986] 2 All ER 577)
• *Griffin v Standish* (67 TC 317)
• *Bray v Best* (61 TC 705)

Before 1989, the year that earnings were "for" also dictated the year in which income tax was assessed. "Receipts basis" replaced "earnings basis" in 1989.

The case of *Bray v Best* (61 TC 705), was heard by the House of Lords in 1988. Lord Oliver set out the preferred approach at page 752:

> "The period to which any given payment is attributed is a question to be determined as one of fact in each case, depending upon all of the circumstances, including its source and the intention of the payer so far as it can be gathered either from direct evidence or from the surrounding circumstances."

Lord Oliver's approach to determining the year that earnings are "for" continues to apply. Section 16 simply confirms the recommended approach.

**40009. The year that earnings are "for" - arrangement of guidance** [March 2009]

In 2007 and 2008, HMRC consulted with professional advisers with particular expertise regarding the treatment of foreign nationals coming to work in the UK and UK residents leaving the UK to work abroad. Many of the advisers' clients have complex remuneration packages. Some are members of Long Term Incentive Plans or participants in other deferred remuneration schemes. The aim of the exercise was to establish principles for determining the tax year that earnings, delivered by these arrangements, are "for".

The guidelines set out on the following pages were adopted by HMRC with effect from 28 February 2008. They are intended to be comprehensive but do not claim to cover every plan and set of circumstances that will arise.

... The guidance sets out general principles and indicates the views HMRC is likely to take in specified circumstances. It is intended to aid and inform fact finding and decision making. It is not a substitute for obtaining all of the relevant information and exercising good judgment by applying the principles to the facts. This is not an easy task as you may be required to balance one set of conditions against others. (This text has been withheld because of exemptions in the Freedom of Information Act 2000)

***Transitional arrangements***

HMRC published the following statement on 18 September 2008:

> "For the avoidance of doubt HMRC was able to confirm that where Tax Returns were submitted prior to 18 October 2007 on the basis of the established HMRC position (which regarded conditionality as the determinant factor over any specific performance period) they will not seek to challenge the Returns on that point. Furthermore, if after 18 October 2007 any individual submitted a Tax

Return for 2006/7 (or earlier) in accordance with the HMRC guidance given on 18 October 2007 HMRC will not seek to challenge the Return on this point, but if the individual wishes to change the basis and adopt the position clarified on 28 February2008 HMRC would not object to a taxpayer amendment provided that this is made within the available window."

**40011. The year that earnings are "for" - the approach to take** [March 2009]

Lord Oliver's approach set out in *Bray v Best* (61 TC 705) at page 752 should be observed when determining the year that earnings are "for":

"The period to which any given payment is attributed is a question to be determined as one of fact in each case, depending upon all of the circumstances, including its source and the intention of the payer so far as it can be gathered either from direct evidence or from the surrounding circumstances".

***Finding out the facts***

An essential starting point is to obtain contemporaneous evidence. This may include all or any of the following:

• An understanding of the intention of the employer in developing the incentive programmes
• Bonus plans
• Award letters
• Notes of meetings
• Correspondence between the parties
• Obtain an analysis of amounts paid out
• An explanation of how awards are treated in the employer-company accounts

These documents may indicate the understanding of the parties regarding the performance period that awards are intended to be "for". The intention of the employer as disclosed to the employee and the understanding of the employee are particularly significant.

Unsubstantiated recollections of the employee regarding intention should be considered but given less weight than contemporaneous documented statements.

If Plan documents and contemporaneous information do not provide clarity, it is reasonable to make inferences from available evidence.

You may ask the Large Business Team or CRM dealing with the Corporation Tax affairs of the employer company how the bonus awards have been treated in the employer company accounts. The company may claim a deduction for a single year or may create provisions to spread the deduction over a longer period. This may indicate the period the employer considers the award to be "for". The accounting treatment is not conclusive, but it is significant. In the absence of clear statements in the Plan documents the accounting treatment may be evidence of the employer's understanding of what the scheme was intended to achieve.

Lump sums may be made up of amounts arising from different bonus periods and different deferred remuneration plans. If component amounts are "for" different tax years, different rules within Part 2 Chapters 4 and 5 may apply, to produce different liabilities to income tax.

**40012. The year that earnings are "for" - annual bonuses awarded for meeting corporate, team or personal targets** [August 2009]

Many employers operate annual bonus schemes for their employees. There are usually performance criteria. These may require employees to meet corporate, team or individual targets.

Bonuses may be paid out by the employer or through a trust - usually an employee benefit trust (EBT). The identity of the payer is not relevant when determining the year that the award is "for". However, see the guidance below on "discretion".

In some schemes, particularly those referenced to company performance, employees may accrue entitlement to receive bonuses as the performance period passes. In others, entitlement is conditional on remaining in employment until a specified date (see below). The performance period and therefore the period that the bonus is "for" may be set out in the scheme documents.

If the performance period spans more than one tax year, Section 16(4) ITEPA 2003 applies. The bonus should be apportioned to the relevant tax years on the basis of a just and reasonable apportionment.

Section 16 attributes general earnings to one or more tax years. You should not accept that awards can be "for" a shorter period, even a day, to which the rules in Part 2 Chapters 4 and 5 can be applied. Employers may spontaneously award "spot-bonuses" to all employees in post on a particular date, or entitlement to a performance bonus may crystallise when a particular performance factor is satisfied. Even though these events make take place on a particular day, the resultant awards should be treated as general earnings "for" the tax year in which the event occurred.

Unless there is evidence to the contrary, HMRC takes the view that performance bonuses are "for" the performance period. This may be a calendar year or the company accounting period. In the case of specific projects, it may be the period beginning on the date when work started and ending when the specified outcomes were achieved.

***Impact of Extra Statutory Concession A11 (ESC A11)***

ESC A11 is a non-statutory concession that permits tax years to be split. It is usually relevant to years in which individuals arrive in or depart from the UK. In consequence of arrival or departure, there are discrete periods of non-residence (NR) and ordinary residence (OR) for tax purposes. If the conditions are satisfied, the tax year is split and each part treated as a separate tax year.

Where entitlement to spot bonuses or conditional bonuses arises on a single day the advice set out above indicates that the award is to be treated as earnings "for" the year in which that days falls. In ESC A11 cases this will be that part of the split year in which the relevant day falls.

Evidence suggests spot bonuses and similar payments are relatively unusual and will be seen infrequently. If you suspect that the timing of entitlement has been manipulated to gain a tax advantage from the use of ESC A11, HMRC may decide to set aside the Concession and treat the individual as resident in the UK for the whole tax year.

**40013. The year that earnings are "for" - bonuses and deferred remuneration plans - the effect of conditionality and employer's discretion** [March 2009]

***Conditionality***

Many bonus schemes are referenced to performance periods, but awards will not be paid unless employees are in employment on the date of payment. For example, a bonus is referenced to company profits for year ended 31 December but is not paid until the following 30 June. Employees who worked for the employer during the performance year forfeit their entitlement if they leave employment before 30 June.

Up to 28 February 2008, HMRC took the view that the bonus award could only be "for" the year in which unfettered entitlement to receive it arose. The year that the bonus was "for" was the year in which the employment condition was satisfied. Since 28 February

2008, HMRC has adopted the principles set out in EIM40008 and subsequent pages.

***Good and bad leavers***

Many of the plans with employment conditions identify "good" and "bad" leavers and prescribe different treatments for the two categories. "Good leavers" are employees who cease employment before the bonus payment date through retirement, redundancy or ill-health. "Bad leavers" are those who are dismissed for cause or resign to join a competitor.

It is possible to take various views on the year that such bonus awards are "for" where there is an employment condition:

- The performance period
- The performance period plus the period from the end of the performance period to the date of payment, sometimes referred to as the "vesting period"
- The year in which the date of payment falls

Your decision should take account of what the bonus scheme is intended to achieve. If this is not clear from the documents, you may base judgments on how the employer treats good and bad leavers.

Plans that:

- are designed to provide incentives to employees for performance periods, but,
- do not pay out unless the participants are still in employment at the specified date, but,
- do not specify any additional performance conditions in the period beginning after the original performance period and ending on the payment date,

are likely to pay out awards that are "for" the original performance period. However, if the Plan introduces additional performance conditions for the second period the period that the award is "for" is likely to be the aggregate of both periods.

If "good leavers" are entitled to receive awards; that may indicate that the awards are "for" the original performance period. Entitlement to pro-rated awards may indicate that entitlement is "for" the performance and the vesting periods.

Some schemes provide for deferred bonuses to be paid out when ownership of the company changes hands. This may be an indicator that the bonus is earned by that date and is "for" the relevant performance period.

Even though these contingencies may not occur for all or any of the plan participants, their existence may shed light on the period the bonus is intended to be "for".

It is sometimes argued that the employment condition is never just about being in employment on the specified date; that the intention of the employer in introducing this condition is to obtain satisfactory performance in the period ending on the date of payment. This may well be the case. If evidence can be found to support the contention you should accept that the period the awards from the Plan are "for" is the combined performance and vesting periods.

***Employers' discretion***

Some bonus schemes give the employer absolute discretion to award or refuse to award bonuses. The discretion may lie with the trustees if an Employee Benefit Trust (EBT) pays out the awards. The Courts have held that, whatever the Plan says, an employer's discretion in awarding or withholding a bonus is not unfettered. However wide the discretion appears to be, the employer is required to exercise his discretion rationally and in good faith, and not irrationally or perversely.

There may be a pattern of awards that may indicate the year the awards are "for". Employees may also have an understanding of how the bonus scheme works, and the period awards are referenced to, while accepting the employer's discretion.

A discretionary bonus may therefore be "for" the performance period, the combined performance and "vesting" period or the year in which discretion is exercised and payment is made. It is important to consider all of the relevant information.

**40014. The year that earnings are "for" - Long Term Incentive Plans and Deferred Remuneration** [March 2009]

Various schemes exist to reward and provide incentives to employees. Not all intended outcomes will be the same. The intention of the employer and the intended behavioural effect will influence the design of the scheme. For example, plans may be intended to:

• Tie-in valued employees and create a disincentive for leaving and moving to a competitor, or,
• Motivate and reward outstanding performance by aligning the interests of employees with those of the shareholders

Schemes intended to aid retention may include the following features:

• Bonuses are paid after 3 – 5 years of satisfactory employment
• The employer has discretion to award or deny bonuses for good or bad leavers
• Part bonuses are paid year on year with other entitlement remaining in the Plan
• Part entitlement to bonuses "vests" each year, but is not paid until a later year

Schemes intended to motivate and reward outstanding performance may include:

• Employment targets linked to growth in the company's:
– share price
– turnover
– net profits
– expansion of certain markets
– market share
• Granting employees real stocks and shares or "phantom" shares in the company. (In the phantom schemes, no stocks or shares are assigned to the employees. Bonus entitlement is calculated by reference to a notional share portfolio.)

Payments may be made up of amounts arising from different bonus periods and different deferred remuneration plans. If component amounts are "for" different tax years, different rules within Part 2 Chapters 4 and 5 may apply, to produce different liabilities to income tax.

Awards from both types of schemes are likely to be "for" the whole performance or reference period. If this is greater than one tax year then the final award should be apportioned over the tax years falling into the performance period on a reasonable basis.

**40015. The year that awards from Long Term Incentive Plans and other deferred remuneration arrangements are "for"** [March 2009]

***Entry to Long Term Incentive Plans (LTIPs)***

If employees perform exceptionally well, they may be invited to participate in an LTIP. LTIPs run for pre-determined period that can be as long as 10 years. This process may repeat year after year so that employees are simultaneously members of several Plans. In any particular year they may receive part awards from some and entire awards from others.

The initial investment is often funded by part of the participant's bonus for the previous year. The employee may be obliged to defer all or part of the previous year's bonus or may do so voluntarily. Plans may require a mixture of the two. The initial contribution may be guaranteed, in the sense that it cannot be lost, and/or it may have the potential to increase and decrease dependant on what the Plan tracks, for example, share price or company turn-over.

Other plans, particularly phantom share schemes, may simply award notional stock without any requirement for deferral from an earlier bonus.

In addition to the anticipated growth in the share price that adds value to the participants' awards, employers may make additional awards of stock to increase the value of the notional portfolio. These "matching awards" may be granted throughout the life of the scheme at times specified in the plan document.

***Deferred bonuses and matching awards***

Employers may defer the payment of bonuses and make eventual payment subject to conditions. For example, the employer awards a bonus of £100,000 referenced to a performance period. £75,000 is paid in cash immediately following the bonus year; £25,000 is to be paid three years later in cash or shares, if the employee has not resigned or been dismissed before the vesting date. Such a deferral may be imposed by the employer, or it may be entered into voluntarily by the employee. To develop the example, the £25,000 deferral may be required by the employer but the employee has the choice of voluntarily deferring a further £25,000. In both scenarios, the employer may offer an enhancement or matching award. The matching award may be delivered in the form of shares or cash. The matching award may be added to the LTIP at the beginning of the period. Additional matching awards may be added at specified dates during the deferral or vesting period.

***What year are LTIP awards "for"?***

It is important to consider all of the relevant facts. The deferred bonus may be "for" the original bonus year, or for the whole deferral period. If there is particular emphasis on the employee remaining in service at a future date, it may be for the tax year in which that condition is met. However, this feature is unlikely to exist in isolation as the employer wants to motivate the employee to perform well while remaining in employment. In order to determine the period that the deferred bonus is "for", it is necessary to consider all of the relevant information and weigh the emphasis given to each factor.

In general terms, simple deferred bonuses will remain earnings for the original bonus period, and growth or matching awards will be "for" the deferral period. In more sophisticated schemes where the deferred bonus is "awarded" and "vests" after the bonus year, and especially where there are further performance conditions relating to this period, the deferred bonus may be earnings for the period between award and vest.

There may also be circumstances where "growth" in the value of the fund is treated as being "for" the performance period of the original deferred bonus. This view is likely where no additional performance criteria are imposed during the deferral period or, if there are, the conditions are the same as for the deferred bonus.

If the conditions are significantly different, e.g. the matching awards are conditional upon new performance criteria, the "growth" or matching awards are likely to be "for" the deferral or vesting period itself.

If the conditions of the matching award are referenced solely to the employee remaining in employment on the vesting or payment date in order to receive payment, the matching award is likely to be earnings for the tax year in which entitlement to receive the award matures.

Enhancements or matching awards may be paid out of LTIPs at the same time as deferred bonuses. Awards may be aggregated amounts that are "for" different periods. It is important to understand how sums are calculated and whether different performance periods should be considered.

**40016. The year that earnings are "for" - Long Term Incentive Plans and Deferred Remuneration – staged vesting** [March 2009]

Some Long Term Incentive Plans (LTIPs) pay out awards in tranches. The details of different schemes will vary. For example, an LTIP fund containing deferred bonuses and matching awards may pay out 20% per annum over five years or nothing in Years 1 and 2 and 33% per annum in Years 3 to 5. Entitlement may be conditional upon participants meeting performance conditions and remaining in employment.

The period that each tranche is "for" has to be determined. If the evidence shows that the Plan is intended to reward performance over the period from award to vest, each part of the final payment is "for" the period from the original award date until it vests, calculated as per Section 16(4) on a just and reasonable apportionment. In the first example, 20% is "for" Year 1; 20% is "for" Years 1 and 2, and so on. Alternatively, if there are no performance conditions and the Plan emphasises being in employment at each vesting date, each payment may be treated as earnings "for" the tax year of receipt.

### 12.7.1 *Earnings from the employment in a year.*

This expression is defined in s.15(2), 22(2) and 26(2) ITEPA, which are discussed below. It is important to note that earnings which are “for” one year may be taxable earnings from the employment in a different year.

## 12.8 Pre-commencement and post-cessation earnings

There are special rules to deal with pre-commencement and post-cessation receipts. These apply where:

(1) earnings are received after an employment has ended or before it began and

(2) the earnings are not attributable to any year in which the employment was held.

Section 17 ITEPA provides:

> (1) This section applies for the purposes of this Chapter in a case where general earnings from an employment would otherwise fall to be regarded as general earnings for a tax year in which the employee does not hold the employment.
> (2) If that year falls before the first tax year in which the employment is held, the earnings are to be treated as general earnings for that first tax year.
> (3) If that year falls after the last tax year in which the employment was held, the earnings are to be treated as general earnings for that last tax

year.
(4) This section does not apply in connection with determining the year for which amounts are to be treated as earnings under Chapters 2 to 11 of Part 3 (the benefits code).

Since this section only applies for the purposes of chapter 4, it has to be repeated verbatim in s.30 ITEPA for chapter 5.

The EI Manual provides:

**40005. Special rules for determining the year that general earnings are "for": Pre-commencement and post-cessation earnings**

**...**

It is unlikely the rules will often apply in practice because general earnings can normally be attributed to periods in which the job is held.

**40006. Effect of non-residence on pre-commencement and post-cessation earnings**

Where the special rules in EIM40005 apply general earnings will be taxable when received if the charging provisions in Sections 15 or 27 apply (or Sections 21 and 25 before 6 April 2008) in the last or first year the taxpayer held the job. The same is true if the taxpayer left the job at the time of going abroad.

Extra-Statutory Concession A11 (ESC A11) (see EIM42850), which provides split year treatment, cannot be used to take out of charge earnings which in substance relate to service in the UK. The same principle applies where the taxpayer takes up a new job on becoming resident in the UK.

In some cases however the taxpayer may leave the job after ceasing to be resident in the UK. Equally the job might start before the taxpayer arrives in this country. In these circumstances it may be reasonable to split the post-cessation or pre-commencement payment between the part of the year when the taxpayer falls within the relevant charging provision and the rest of the year. But this split should not necessarily be made on a time basis. For example, the post-cessation receipt may be primarily attributable to the taxpayer's service in the UK. If it is, a split that reflects the facts should be agreed.

If the taxpayer is unable to agree, the alternative is that the earnings are taxable on the strict statutory basis, that is, without the benefit of ESC A11. The entire sum will be taxable under Section 15 or 21 because the taxpayer is resident and ordinarily resident for the whole tax year.

**40007. Effect of non-residence on pre-commencement and post-cessation earnings: Examples** [August 2009]

This page provides examples of how the above sections apply. ...

The first example concerns pre-commencement earnings of an employee who is resident, ordinarily resident and domiciled throughout:

> ***Example 1***
> An employee is approached by another employer. She is offered a job by the new organisation. As an inducement to change jobs she is paid £50,000 on 1 April 2009. She commenced work for the new employer on 1 May 2009. The employee is resident, ordinarily resident and domiciled in the UK so the relevant charging provision is Section 15 in Part 2 Chapter 4.
> Section 17 operates to make the payment earnings of the year in which the employment commences. Even though paid in tax year 2008/2009 they are earnings "for" the year 2009/10.

The Manual then considers whether domicile makes any difference:

> The result will be the same if the employee is resident, ordinarily resident but not domiciled in the UK.

It is assumed that the earnings are not chargeable overseas earnings.[5] The Manual now considers someone becoming UK resident:[6]

> ***Example 2***
> An employee worked in Singapore for many years for a UK resident company. The employment ceased on 31 December 2008. For 10 years prior to that date the individual was not resident and not ordinarily resident although domiciled in the UK. On 6 April 2009 the employee returned to the UK. From the date of arrival he became resident and ordinarily resident.
> 6 months after the job ended the employer made a payment of £50,000 to the former employee in recognition of the contribution he had made to the expansion of business in the Far East.
> Section 17 makes the payment earnings of the year in which the employment was last held, 2008-2009. In that year the employee was not resident in the UK and performed all of the duties in Singapore. In consequence, the payment does not fall into any of the charging provisions in Part 2 Chapters 4 and 5 and is therefore not chargeable to tax as general earnings.

---

5 See 12.10 (Resident, ordinarily resident and foreign domiciled employee).

6 For the position on becoming ordinarily resident, see 6.14.2 (Employment income).

## 12.9 Resident ordinarily resident and UK domiciled employee

Section 15 ITEPA provides:

> (1) This section applies to general earnings for a tax year in which the employee is UK resident.
> (2) The full amount of any general earnings within subsection (1) which are received in a tax year is an amount of "taxable earnings" from the employment in that year.
> (3) Subsection (2) applies whether or not the employment is held when the earnings are received.

Section 15 sets out the general rule: in short, all earnings are "taxable earnings" and taxed on receipt, on an arising basis. This might be called "the receipts" basis of taxation. "Receipt" is defined in ss.18, 19 ITEPA (not discussed here).

The s.15 rule has two exceptions, for foreign domiciliaries (s.22) and for non-ordinarily residents (s.26). That is not stated expressly[7] but clearly has to be implied.

## 12.10 Resident, ordinarily resident and foreign domiciled employee

### 12.10.1 *Chargeable overseas earnings of ordinarily resident non-domiciled employee*

Section 809F ITA provides:

> (1) This section applies if section 809B, 809D or 809E applies to an individual for a tax year.
> (2) The individual's relevant foreign earnings for that year are charged in accordance with section 22 or 26 of ITEPA 2003.

So we turn to s.22 ITEPA which (somewhat repetitively) provides:

> (1) This section applies to general earnings for a tax year, to the extent that they are chargeable overseas earnings for that year, if—
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis)

7 It was stated clearly in s.14 ITEPA before the FA 2008 reshuffled the statutory provisions.

> applies to the employee for that year, and
> (b) the employee is ordinarily UK resident in that year.
> (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year. ...

In short, the remittance basis applies to chargeable overseas earnings.[8]

### 12.10.2 *UK earnings of ordinarily resident non-domiciled employee*

I use the term "**UK earnings**" to mean earnings which are not "chargeable overseas earnings". Section 22(7) ITEPA provides:

> General earnings for the employee for the tax year fall within section 15(1) to the extent that they do not fall within subsection (1).

This is not strictly necessary, but it does no harm. The drafter put it in as a signpost, because the scheme of the pre-2008 provisions was different, and the charge on UK earnings of an employee who was ordinarily resident and non-domiciled used to fall under s.22, not s.15.

### 12.10.3 *Transitional rules for pre-2008 earnings*

Suppose:
(1) Chargeable overseas earnings accrue to T before 2008/9 and
(2) The earnings are remitted in 2008/9 or later (when T is still resident).
In the absence of a transitional rule, the earnings would not be taxable under s.22 ITEPA because the condition in s.22(1)(a) would not be met. Sections 809B, 809D or 809E did not apply before 2008. Para 82(2)(a) Sch 7 FA 2008 fills that gap:

> (1) This paragraph applies in relation to an individual's general earnings for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if the individual—
> (a) was UK resident in that year, but
> (b) was not domiciled in the UK, or was not ordinarily UK resident, in

---

8 Section 22(6) ITEPA provides: "See Chapter A1 of Part 14 of ITA 2007 for the meaning of 'remitted to the UK' etc."

that year.

(2) Section 22 or 26 of ITEPA 2003 (as amended by this Part of this Schedule) applies in relation to the general earnings as if—

(a) section 809B of ITA 2007 (claim for remittance basis to apply) applied to the individual for the relevant tax year and

(b) section 22(7) or 26(6) of ITEPA 2003 were omitted.

I think para 82(2)(b) is misconceived, though it does no harm. In practice the Courts will hold that UK earnings of an ordinarily resident foreign domiciled employee come into charge under s.15, notwithstanding the lack of the signpost in s.22(7).

## 12.11 Chargeable overseas earnings

The expression "chargeable overseas earnings" is a label which brings in two sets of requirements: the earnings must be "overseas" earnings and they must be "chargeable". The key part of the definition is "overseas earnings". Section 23(2) ITEPA provides the definition:

> General earnings for a tax year are "overseas earnings" for that year if—
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year,
> (aa) the employee is ordinarily UK resident in that year,
> (b) the employment is with a foreign employer, and
> (c) the duties of the employment are performed wholly outside the UK.

The concept of "chargeable" overseas earnings brings in the rules for deductible expenses (not discussed here) and associated employments.

### 12.11.1 *Transitional rule for pre-2008 earnings*

Suppose earnings accrue before 2008/09. At first sight the earnings cannot be "chargeable overseas earnings" within the definition of s.23(2) ITEPA since they do not meet the condition in s.23(2)(a): section 809B, 809D, or 809E did not apply before 2008/09. Moreover, para 82 which fills that gap in s.22 does not fill the gap in s.23. Construed strictly, therefore, pre-2008 earnings which were not remitted before 6 April 2008 have fallen out of charge!

However, I expect that the courts will to strive to construe the section avoid that result. After all, it is obvious (and para 82 confirms) that this result was not intended. One way to do that is to say that if income arises before 2008, the question of whether it constitutes chargeable overseas earnings is to be decided by reference to the legislation in the year that it arises and not the legislation in the year that it is remitted. It has to be said that para 82 (3) sch 7 FA 2008 would then not be necessary. The alternative is to read para 82(2) as if it applied to s.23 as well as to s.22 and 26. Neither of these solutions is comfortable reading, but the conclusion that all pre-2008 earnings fall out of charge seems even worse. This is only one of many infelicities in schedule 7: but a modern court will strive to make it work.

## 12.12 Foreign employer

One requirement of "overseas earnings" is that the employment is with a "foreign employer". The definition is in s.721(1) ITEPA:

> "foreign employer" means an individual, partnership or body of persons resident outside the UK and not resident in the UK.

### 12.12.1 *Foreign employer: HMRC practice*

EI Manual provides:

> **40102 Taxable earnings: Employee resident and ordinarily resident in the United Kingdom: "chargeable overseas earnings"**[April 2004]
> An employee may maintain that general earnings are chargeable overseas earnings taxable on remittance under section 22 rather than on receipt ... This is likely to lead to a significant reduction in the amount of taxable earnings. You should examine the facts closely before accepting that earnings are chargeable overseas earnings within section 22. In particular you should find out whether the employer has any place of business in the UK. If you can trace an accounts file for the employer, ask the accounts Inspector for instructions on the employer's residence status.

## 12.13 Where are duties performed: incidental duties

The next requirement of "overseas earnings" is that "the duties of the employment are performed wholly outside the UK". Section 39 ITEPA elucidates this concept:

(1) This section applies if in a tax year an employment is in substance one whose duties fall to be performed outside the UK.
(2) Duties of the employment performed in the UK whose performance is merely incidental to the performance of duties outside the UK are to be treated for the purposes of this Chapter as performed outside the UK.

In other words, UK duties may be ignored if they are "merely incidental" to the performance of the other duties outside the UK. What are incidental duties? HMRC interpret this strictly. HMRC 6 provides:

> If your work is normally carried out abroad but you have to carry out some of your duties in the UK, the work you do in the UK will be part of your duties abroad only when you can show that the work you did in the UK was incidental to the duties of your employment abroad.
> Whether or not duties performed in the UK are incidental to an overseas employment will always depend on the circumstances of each particular case. Any decision has to be based on the work carried out in the UK – not the amount of time spent on it. But if you spend more than 91 days working in the UK in a tax year the work **will not** be incidental as it is reasonable to say that someone who spends such an extended period working in the UK is actually working here rather than undertaking duties which are incidental to an overseas employment.
> If the work you perform in the UK is the same or is of similar importance to the work that you do abroad, it will not be incidental. You will have to show that there is a purpose to the work you did in the UK which enabled you to do your normal work abroad and which you could only do in the UK.
> Examples of work carried out in the UK as part of an overseas employment
> ***Incidental work***
> • time spent in the UK by an overseas representative of a UK company to make reports or receive fresh instructions
> • time spent training in the UK by an overseas employee which does not exceed 91 days in the tax year and provided no productive work is carried out in the UK by the trainee during that time
> ***Non incidental work***
> • time spent in the UK as part of the duties of a member of the crew of a ship or aircraft
> • attendance at director's meetings in the UK by a director of the company who normally works abroad.

The EI Manual provides:

> **Appendix 3: Non domiciled employees: Dual contract arrangements** [March 2007]
> In *Robson v Dixon* 48 TC 527, Pennycuick V.-C. observed that:
>
> > "the words "merely incidental to" are upon that ordinary use apt to denote an activity (here the performance of duties) which does not serve any independent purpose but is carried out in order to further some other purpose."
>
> So duties performed in the UK that are of the same type as those performed overseas are not merely incidental, even if performed for only a very short time.

EI Manual provides:

> **40203 Employee resident, ordinarily resident or domiciled outside the United Kingdom: location of duties: "merely incidental" duties** [June 2006]
> The case of *Robson v Dixon* (48 TC 527) involved a pilot, resident and ordinarily resident in the UK, who was employed by a Dutch airline. He flew aircraft from Amsterdam to various parts of the world. There were relatively few take-offs and landings in the UK [on average, seven per annum]. He claimed that the small number of take-offs and landings meant that his duties in this country were "merely incidental" to those performed abroad. The Courts rejected his claim on the grounds that the test is one of quality, not quantity. The Judge commented that the core duties of a pilot include landing and taking off in aircraft. So when the aeroplane landed in the UK the pilot was performing substantive duties of his employment.
>
> *Quality not quantity of duties*
>
> The case of *Robson v Dixon* established that it is the quality not the quantity of duties performed in the UK that determines whether or not they are "merely incidental". However, where the employee works in the UK for more than three months in a year, you should not accept that work can be "merely incidental".
>
> *Statement of Practice A10: airline pilots*
>
> Despite the decision in *Robson v Dixon* a single take off and landing in the UK in any year is disregarded on de minimis grounds in considering whether any duties are performed in this country.[9]
>
> *Dealing with cases*
>
> It is not possible to list "merely incidental" duties. Substantive and "merely incidental" duties are relative and specific to employments. It is important to obtain as much information about the employment and employee as possible.

9 [Author's Note] HMRC Brief 17/09 states that SP A10 is withdrawn from 6th April 2009 though there has been no announcement that HMRC now adopt a different practice.

The following list of documents is not intended to be comprehensive:

- employment contract
- job description
- summary of main duties and responsibilities
- business diaries and travel details.

These may help but if at all possible arrange a meeting with the employee to obtain information first hand. Once you have a clear idea of the main duties you are in a position to take a view as to what are "merely incidental".

**(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**

Some practical examples are set out at example EIM40204.

**40204. Employee resident, ordinarily resident or domiciled outside the UK: Location of duties: "merely incidental" duties: Examples** [April 2011]

The following examples illustrate how particular situations should be treated.

*Example 1*

An overseas marketing executive of a UK employer spends the majority of each year working overseas. Visits to the UK total less than three months in a year. While in the UK the representative carries out the following duties:

- reports on trade conditions and results in the territory
- establishes questions of policy
- receives instructions
- collects samples in preparation for the next tour.

The duties performed in the UK should be regarded as "merely incidental". If the employee is not ordinarily resident the duties may be disregarded and the general earnings arising from them not charged under Section 15 [ITEPA]. A charge may arise under Section 26 if the earnings are remitted here (see EIM40301).

*Example 2*

An overseas employee visits the UK for periods of training which do not exceed three months in the year. If no productive work is carried out while in the UK, the duties performed here are regarded as "merely incidental".

*Example 3*

The director of a limited company usually works abroad, but attends directors' meetings in the UK.

Attendance at board/directors' meetings is a fundamental and joint duty of a board of directors to manage the company. Therefore performance of these duties in the United Kingdom can never be "merely incidental" to work done overseas, even if the board member participates from the UK in a board meeting held overseas, for example via a telephone or video conference. Preparation in advance of board meetings (e.g. for a presentation) is also unlikely to be merely incidental to other duties, as preparation is essential to the contribution in the subsequent meeting.

*Example 4*

A courier for a tour operator visits many countries in the course of the employment. Visits to the UK, however few and however short, are of the same importance to the job as visits to other countries and therefore cannot be "merely incidental".

This approach is consistent with the 1955 Royal Commission which gave two examples of incidental duties: "returning for report" and "to collect samples, etc".[10]

## 12.14 Dual contract arrangements

EI Manual discusses dual contract arrangements. The manual first explains the planning:[11]

> **77030 Appendix 3: Non domiciled employees: Dual contract arrangements** [March 2007]
> ... The legislative scheme ... is advantageous to employees or office holders who can show that they are:
> • resident and ordinarily resident but not domiciled in the UK and
> • perform duties of an office or employment under a foreign employer wholly outside the UK.
> As chargeable overseas earnings are taxed on remittance, there is a clear incentive to ensure that such earnings are paid overseas and to minimise the amount of earnings remitted to the UK. However, the requirement that the duties of the employment are performed wholly outside the UK presents problems to foreign domiciled employees whose jobs require them to work partly in the UK and partly abroad. Earnings from an employment with duties performed in and outside the UK would be taxable under section [15] wherever received. An employee may therefore be offered two employment contracts, for example:
> Contract 1 covering the performance of duties in the UK and
> Contract 2 with an associated employer resident overseas covering duties performed in the rest of the world excluding the UK.
> The intention is that earnings from employment contract 2 will be chargeable overseas earnings and therefore taxable under section 22 only when remitted to the UK. For this reason, dual or multiple employment arrangements are popular with foreign domiciled employees whose duties are performed partly in the UK and partly outside the UK. The arrangement is generally that the individual enters into two separate written contracts, frequently referred to as the UK employment contract

---

10 Cmd 9474 para 300.

11 An earlier version of the text was in Tax Bulletin 76 (also classified as RI 273). Alistair Ladkin has written a valuable article on this topic in *Taxation*, Vol. 150, No. 3900, p.632 (27 March 2003).

and the overseas employment contract.

Assuming the non-resident status of the employer and the non-domiciled status of the employee, HMRC can attack the planning in the following ways:

(1) Allege there is only one contract of employment (see below).
(2) Allege some duties of the "overseas" employment are performed in the UK; see 12.13 (Where are duties performed: incidental duties).
(3) Apportionment arguments (see below).

### 12.14.1 *One contract of employment or two?*

*Enquiries into dual contract arrangements*

HMRC offices may make enquiries in order to check whether the earnings under the overseas contract are chargeable overseas earnings. They may also consider whether there is in fact a single employment contract notwithstanding the production of two written contracts. This approach has generally been deployed where there is concern that there has been an attempt to split a single employment to exploit the legislation that provides for chargeable overseas earnings to be taxed on remittance.

Employers, employees and their advisers maintain that there are separate and distinct employments. They invariably argue that the employee performs a different role with different responsibilities under each contract of employment and that the duties under each do not overlap and are not dependent on each other. In many cases written contracts have been drafted that fairly represent the true employment relationships and include a proper job description along with details of the remuneration package and other entitlements (annual leave etc) relating to each employment. Care has been taken to ensure that the roles described in each contract are capable of independent existence with proper regard given to what would happen on termination of one of the employments. Best practice has recognised the importance of maintaining separate payroll and expenses regimes and different line management and reporting arrangements.

Where there are two employment contracts and the written contracts reflect this, dual contract arrangements provide a legitimate way to structure an individual's employment relationships. Where the arrangements reflect the true employment relationships, enquiries focus on:

• whether the employee has in fact performed substantive duties under

the overseas contract in the UK
• whether a section 24 adjustment is needed to address an imbalance between the earnings from the UK and overseas contracts.

12.14.2 *Are some duties performed in the UK?*

The EI Manual goes on to consider this line of attack:

> Given the way in which modern business operates and the ease and speed of communication, some employees may find it increasingly difficult to avoid performing substantive UK duties under their overseas contracts. For example, an employee who is responsible under their overseas contract for servicing the business of overseas clients may have to respond to a telephone call or e-mail from a worried overseas client with an urgent problem when the employee is in the UK. Formulating and communicating a response to such a problem would be regarded as a fundamental duty under the overseas contract. It follows that the performance of such duties in the UK will not be merely incidental to the performance of duties outside the UK as they will be of equal importance to the overseas duties. It is the quality of the UK duties and not the time devoted to their performance that determines whether they are merely incidental.

The EI Manual then considers and dismisses a possible defence:

> *Recent developments*
> In a number of cases, the duties required under each purported employment contract are defined according to where those duties are performed. For example, the UK contract states that the duties of the employment are all those duties performed in the UK whereas the overseas contract states that the duties of the employment are all those duties performed wholly overseas. Employees and their advisers may contend that all overseas duties are duties of the overseas employment and all UK duties are duties of the UK employment. On that analysis, duties performed in the UK in connection with the business of the overseas employer are performed under the terms of the UK contract and are not duties of the overseas employment.
> HMRC does not consider that the existence of separate and distinct employments is determined by the terms of written contracts where the main distinction between the duties required under each contract is geographical. There are concerns that arrangements of this nature artificially divide a single job so earnings attributable to overseas duties

can be treated as chargeable overseas earnings. HMRC has received legal advice that supports a robust challenge to such arrangements.

*The commercial context*

As a result of the legal advice referred to above, HMRC considers that a dual contract arrangement based solely or mainly on a geographical split of employment duties without commercial underpinning is vulnerable to challenge on the grounds that there is in reality a single employment with duties in and outside the UK. In such cases, HMRC offices should fully investigate the facts and circumstances including the commercial rationale and context and assess an employee to tax where the evidence shows that there is in fact a single employment.

HMRC takes the view that a dual contract arrangement is unlikely to work unless there are two distinguishable jobs. For example, a French resident employer 'A' sends employee 'B' who is domiciled outside the UK to establish an office in London for its UK subsidiary 'C'. A requires B to work in its Paris office servicing their existing portfolio of French clients two days per week. On the other three days, C requires B to work in London. This is likely to constitute a proper basis for B holding separate employment contracts with A and C.

In order to decide whether the arrangements create two employments, rather than artificially divide a single employment for tax purposes, it is appropriate to look at the economic advantage that an employer gains from the employee's activity. If the contractual arrangements are to have any meaning, they must be seen in the context of the underlying commerciality of the arrangements. Regardless of there being two written contracts, HMRC would not accept that there were two employments if the risks and rewards relating to work done in the UK and overseas were in fact substantially borne and received by a single employer. Moreover, an arrangement requiring a written contract between an employee and a UK employer which provides only for the performance of duties in the UK would appear artificial if the employer's business extends outside the UK.

An employer's interest does not lie in having the employee work in a defined geographical area but in an economic activity that benefits the employer. An employee may perform duties overseas that directly benefit the business of the UK employer. When performing those duties, the employee is not working for the overseas employer but for the UK employer overseas. If the arrangement were genuine, the employee would not be paid by the overseas employer to work for the UK employer overseas. If that is what the contract requires, it would indicate a lack of commerciality. Conversely, an employee who performs duties in the UK that directly benefit the business of the overseas employer is

> working for the overseas employer in the UK. It is difficult to imagine circumstances in which contracts that can require an employee to work for the benefit of a UK employer whilst being paid by an overseas employer or vice versa would be offered by employers that were not associated.
>
> Various mechanisms exist for allocating costs to another entity that benefits from an employee's services. These include transfer pricing adjustments. It has been suggested that such adjustments restore the commercial equilibrium and thus support the existence of separate employments. However, the fact that such adjustments are necessary indicates that the employer has misjudged the commercial reality of the arrangements. Separate employers do not for sensible commercial reasons pay employees to work for someone else, with or without transfer pricing.
>
> Dual contract arrangements are sometimes used when a UK resident employee holding one employment with worldwide duties first becomes ordinarily resident. Some individuals who are self employed before they arrive in the UK become employees with dual contract arrangements on attaining UK resident and ordinarily resident status without any significant change in the way in which they carry out their professional activities. In other cases, recruitment material suggests that the employer has a single vacancy to fill and a dual contract arrangement is only implemented following the appointment of a non-domiciled individual. In such scenarios, HMRC offices will test whether the facts reflect commercial reality.

This is very doubtful. Whether two contracts of employment exist is a matter of contract law, not of commercial reality. It would be interesting to review the HMRC advice to see on what it is founded. No doubt in the event of a dispute HMRC would be pleased to disclose it, in the interests of the open, frank and transparent enhanced relationship which HMRC would like to have with their customers.[12]

---

12 "The minimum amount of openness on the part of revenue bodies that will be necessary for the enhanced relationship to function will include ... a willingness to disclose such information without invoking (except in the very rare case where the public interest requires otherwise) executive and other governmental privileges and immunities to suppress documents and other information reasonably sought by the taxpayer." OECD Tax Intermediaries Study Working Paper 6 - The Enhanced Relationship, July 2007, para 43; see *www.oecd.org/dataoecd/59/61/39003880.pdf*.

> *Overseas contracts and UK duties*
> Where the commercial reality shows the existence of separate employment contracts, it is sometimes argued that contractual terms that prohibit the performance in the UK of duties connected with the business of the overseas employer, preclude HMRC offices from arguing that the employee has performed duties of the overseas employment in the UK. These arguments are based on the UK duties being "ultra vires".
> HMRC does not consider that the presence of such clauses allows the performance of duties in the UK that clearly benefit the overseas employer to be ignored. To that end, both employers ought to be closely monitoring the employee's UK activities. For example, where the employee has performed substantive duties in the UK that directly benefit the overseas employer, HMRC would expect the UK employer to mark the fact that the employee is effectively abusing its time and take appropriate disciplinary action. And if the UK work in question was valuable, the overseas employer should take it into account when calculating bonus entitlement. It is possible that clauses like this are frequently waived or ignored and may be inserted to create a misleading impression.

This may be correct but it depends on the facts of the case.

> *Tax impact where dual contract arrangements fail*
> Where the facts indicate that there is, in commercial reality, only one employment contract whereby the employee performs duties for the benefit of one employer both in and outside the UK, all of the employee's general earnings will be taxable under section 21 ITEPA. As earnings attributable to overseas duties will not be chargeable overseas earnings, tax will be charged on receipt rather than on remittance to the UK. The identity of the "employer" will depend on all the facts and circumstances of the individual case.

As a matter of contract law, I think this is wrong. If the drafting is correct, there will be two separate contracts. The fact that on HMRC analysis it is unclear who is the employer suggests there must be something wrong with it.[13] The HMRC view might conceivably be defended on the basis

13 The 1955 Royal Commission considered that dual contract arrangements would work. Report Cmd 9474 para 305 provides:

"(3) Let the resident be taxed— ...

*(c)* on the apportioned basis, if he is domiciled outside the UK, in respect of income from an employment which is performed partly inside and partly

of *IRC v Scottish Provident Institution* 76 TC 538: the two contracts being regarded as one composite contract for tax purposes, even though they are (if the drafting is right) separate contracts as a matter of contract law.

The EI Manual then turns to PAYE:

> However, the UK entity that receives the benefit of an individual's services will be obliged to apply PAYE to all payments of PAYE income made to the employee during the period that the employee works for that entity. This is because the UK entity will either be the employer or (for the purposes of section 689 ITEPA) the relevant person.
>
> If there are genuine separate employments but the employee has performed substantive duties in the UK for the overseas employer, then all earnings from the overseas contract will be taxable under section 21 in the relevant year. They will not qualify as chargeable overseas earnings under section 22 because the duties of employment with a foreign employer will not have been performed wholly outside the UK in the year in question. There is unlikely to be an obligation to operate PAYE on earnings from the foreign employer, as that employer will not have the necessary presence in the UK for PAYE purposes, and the UK employer will not be the relevant person in relation to duties performed by the employee under the separate overseas employment.

The Bulletin concludes with a comment on NIC:

> *National Insurance*
>
> Where for tax purposes the facts indicate that despite the existence of

---

outside the UK, the part of his income attributed to the work performed outside the UK being itself taxed on the remittance basis;

*(d)* on the whole income, if he is domiciled in the UK, in respect of income from an employment which is performed partly inside and partly outside the UK.

306. The reason for the special treatment of the non-domiciled resident is that the person most likely to be affected is the employee of a foreign concern who makes his home and headquarters in the UK, while his duties include a good deal of work in Europe. It seems fair to treat his 'European' earnings as if they were truly foreign income, and it is probably to the advantage of this country to recognise the special case. *Even if it did not, most of such employees could get into an equivalent position by having two separate contracts of service, one providing for UK duties and remuneration and the other for European duties and remuneration, in which event the latter income would be taxed on the remittance basis as at present.*"
(Emphasis added)

two written employment contracts, there is a single employment covering UK and overseas duties, there could also be National Insurance consequences. If it is found that the earnings relating to overseas duties are attributable to employment with the UK employer, there will be liability to pay further National Insurance.

The first sentence is tentatively expressed; the Manual wisely does not try to grapple with the complexities of NIC.[14]

### 12.14.3 *Apportionment*

Section 24 ITEPA prevents an over-generous attribution of income to the foreign contract:

**Limit on chargeable overseas earnings where duties of associated employment performed in UK**

(1) This section imposes a limit on how much of an employee's general earnings are chargeable overseas earnings for a tax year under section 23 if—

(a) in that year the employee holds associated employments as well as the employment to which subsection (2) of that section applies ("the relevant employment"), and

(b) the duties of the associated employments are not performed wholly outside the UK.

(2) The limit is the proportion of the aggregate earnings for that year from all the employments concerned that is reasonable having regard to—

(a) the nature of and time devoted to each of the following—

(i) the duties performed outside the UK, and

(ii) those performed in the UK, and

(b) all other relevant circumstances.

(3) For the purposes of subsection (2) "the aggregate earnings for a year from all the employments concerned" means the amount produced by aggregating the full amount of earnings from each of those employments for the year mentioned in subsection (1) so far as remaining after subtracting any amounts of the kind mentioned in step 2 in section 23(3).

(4) In this section—

(a) "the employments concerned" means the relevant employment and the associated employments;

(b) "associated employments" means employments with the same employer or with associated employers.

(5) The following rules apply to determine whether employers are associated—

*Rule A* An individual is associated with a partnership or company if that individual has control of the partnership or company.

14 See 42.1 (National insurance contributions).

*Rule B* A partnership is associated with another partnership or with a company if one has control of the other or both are under the control of the same person or persons.

*Rule C* A company is associated with another company if one has control of the other or both are under the control of the same person or persons.

(6) In subsection (5)—

(a) in rules A and B "control" has the meaning given by section 995 of ITA (in accordance with section 719 of this Act), and

(b) in rule C "control" means control within the meaning given by sections 450 and 451 of CTA 2010 (meaning of expressions relating to close companies).

(7) If an amount of chargeable overseas earnings is reduced under step 3 in section 23(3) as a result of applying any limit imposed by this section, the amount of general earnings corresponding to the reduction remains an amount of general earnings within section 15(1).

### 12.14.4 *Implications for employer*

The former Inspectors Manual para 5348 provided:

> Apart from the Schedule E implications there are other questions to consider:-
> [1] Is the cost of remunerating the individual under his contract for overseas duties effectively borne by a UK company and claimed as a deduction in computing profits which are chargeable to Corporation Tax? If so, there is a mismatch which will need to be considered with some care.
> [2] Do the individual's activities under the contract for overseas duties generate income, and if so to whom does it accrue? Is income which would otherwise accrue to a company which is liable to Corporation Tax being routed to an overseas company?
> [3] If the profits of a company which is liable to Corporation Tax are computed on a cost plus basis are the costs being depressed by reason of the split employment?

Point [1] raises deductibility issues; point [2] raises Controlled Foreign Company issues; point [3] raises transfer pricing issues. All these should be considered before entering into dual contract arrangements.

### 12.14.5 *Disclosure requirements*

HMRC say:

> We can confirm again that we do not intend promoters or employers to have to disclose everyday advice and arrangements. In the context of employment products this would include ... standard dual contract arrangements (although we will require disclosure of innovative arrangements).[15]

This statement was made before the Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regs 2006, but it is still valid under the current law. It is interesting that the statement describes dual contract arrangements as "everyday" and "standard".

## 12.15 Resident but not ordinarily resident employee

Section 26 ITEPA provides:

> (1) This section applies to general earnings for a tax year where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and the employee is not ordinarily UK resident in that year, if the general earnings are neither—
> (a) general earnings in respect of duties performed in the UK, nor
> (b) general earnings from overseas Crown employment subject to UK tax.[16]
> (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year.
> (3) Subsection (2) applies whether or not the employment is held when the earnings are remitted...
> (5) See Chapter A1 of Part 14 of ITA 2007 for the meaning of "remitted to the UK" etc.
> (6) General earnings for the employee for the tax year fall within section 15(1) if they do not fall within subsection (1).

In short, a resident non ordinarily resident remittance basis taxpayer pays tax:

(1) on an arising basis on general earnings in respect of duties performed in the UK; and
(2) on a remittance basis on other earnings.

---

15 Statement to CIOT accessible *www.tax.org.uk/showarticle.pl?id=2704*.
16 See 12.28 (Overseas Crown employment).

This is better than the remittance basis for UK resident and ordinarily resident foreign domiciliary:

(1) It is not necessary to have a foreign employer.
(2) It is not necessary that duties are performed *wholly* outside the UK. (So it is not necessary to consider dual contract arrangements.)

Much of the wording of s.26 is the same as s.22 ITEPA, and so the reader is referred back to 12.10 (Resident, ordinarily resident and foreign domiciled employee).

## 12.16 Non-resident employee

Section 27 ITEPA provides:

> (1) This section applies to general earnings for a tax year in which the employee is not resident in the UK if they are—
> (a) general earnings in respect of duties performed in the UK, or
> (b) general earnings from overseas Crown employment subject to UK tax.
> (2) The full amount of any general earnings within subsection (1) which are received in a tax year is an amount of "taxable earnings" from the employment in that year.
> (3) Subsection (2) applies whether or not the employment is held when the earnings are received.

This applies regardless of domicile. DTAs often override the charge to UK tax.

There are two requirements here:

(1) Duties performed in the UK; and
(2) Earnings in respect of those duties.

These concepts are both relevant for:

(1) A resident but non-ordinarily resident employee, where it makes the difference between an arising and a remittance basis.
(2) A non-resident employee, where it makes the difference between taxable earnings and tax-free earnings.

It is best to consider these separately.

## 12.17 Duties "performed in the UK"

Section 38 ITEPA elucidates the concept of where duties are performed:

**Earnings for period of absence from employment**

(1) This section applies if a person ordinarily performs the whole or part of the duties of an employment in the UK.

(2) General earnings for a period of absence from the employment are to be treated for the purposes of this Chapter as general earnings for[17] duties performed in the UK except in so far as they would, but for that absence, have been general earnings for duties performed outside the UK.[18]

EI Manual provides:

**40202 Employee resident, ordinarily resident or domiciled outside the United Kingdom: Location of duties: Absence from duties** [August 2009]

If an employee who ordinarily works in the UK is absent from work, the general earnings for the period of absence must be treated as being for duties performed in the UK, even if the employee is in fact abroad at that time. If, exceptionally, the employee can show that if he had been working, the earnings would have been for working abroad then this rule is not applied.

*Example*

An employee who is not ordinarily resident in the UK performs the duties of the employment in Manchester. Illness meant that a holiday in Florida was unexpectedly extended so the days normally spent in the UK were lost. The Inspector received a calculation of earnings chargeable 0under s.15 [ITEPA][19] that excluded salary attributable to the days of absence.

The Inspector successfully contended that s.38 [ITEPA] applied on the basis that the duties of the employment were normally performed in the UK. The earnings that had been excluded were therefore UK-based earnings within s.15 [ITEPA]

17 S.38 refers to earnings "for" duties performed in the UK, whereas ss.26, 27 ITEPA refer to earnings "in respect of" duties performed in the UK, but the meaning must be the same.

18 Special rules apply for:

(1) duties on board vessels or aircraft: s.40 ITEPA;

(2) duties performed in the UK sector of the Continental Shelf: s.41 ITEPA.

19 The reference from 2008/2009 is now s.26 ITEPA.

## 12.18 Earnings "in respect of" duties performed in the UK

The question whether earnings are "in respect of" duties performed in the UK is relevant for non-ordinarily resident employees as earnings in respect of duties performed in the UK are taxed on an arising basis and other earnings are taxed on a remittance basis. SP 1/09 explains how this is applied where duties of a single employment are performed both in and outside the UK:

> 13. Where the duties of a single office or employment are performed both in and outside the UK, an apportionment is required to determine how much of the general earnings are attributable to the UK duties. Apportionment of general earnings is essentially a question of fact, but for many years HMRC has accepted time apportionment, based on the number of days worked abroad and in the UK, except where this would clearly be inappropriate. For example, in the case of an employee with 200 working days in the UK and 50 working days outside the UK, the proportion of general earnings attributable to UK duties would be 200/250. This practice does not, of course, apply where the charge arises under Section 15 ITEPA and relief is due under Part 5 Chapter 6 ITEPA (Deductions from seafarers' earnings).

See too *Coxon v Williams* 60 TC 659. EI M77020 provides:

**77020. Appendix 2: General earnings in respect of duties performed in the UK** [April 2008]
(Adapted from an article in Tax Bulletin 63 – February 2003. The section headed "Practical issues - international business travel" sets out a methodology that first appeared as Appendix 2 to the Minutes of the meeting of the Joint Forum on Expatriate Tax and NICs held on 18 April 2007.)
... Whether general earnings (emoluments) are in respect of UK duties is essentially a question of fact. In *Taylor v Provan* (49 TC 579), the courts agreed that the touchstone must be the wording of the statute. In that case, travel expenses paid to a director to come to the UK in order to perform duties here were considered to be "emoluments in respect of duties performed in the UK". In *Perro v Mansworth* [2001] STC (SCD) 179, a Special Commissioner found that the payment by an employer of an employee's liability to tax on UK-based earnings (Case II Schedule E) was itself "an emolument in respect of duties performed in the UK".
Where an attribution is required, Statement of Practice 5/84 (SP5/84) approves time apportionment according to the number of days worked abroad and in the UK except where this would clearly be inappropriate. The Perro case is an example of where time apportionment is not appropriate. The starting point for the SP5/84 approach to time apportionment is that the employee's contractual right to earnings for the work performed

usually accrues from day to day. Authority for this view comes from *Varnam v Deeble* (58 TC 501), although that case was not directly concerned with attributing earnings to UK duties for the purposes of the charge to UK tax. In *Platten v Brown* (59 TC 408), it was held that correct attribution on a time apportionment basis should employ units of days rather than hours.

The courts have consistently taken the view that time apportionment should not be applied to earnings that can be specifically allocated either to duties performed in the UK or to duties performed elsewhere. So time apportionment would be inappropriate in a case where the contract of employment specifically allocated earnings to periods spent working in the UK or overseas. Provisions in a contract of employment that regulate the amount of time to be devoted to the employment, dealing with matters such as the number of days to be worked, the length of holidays or how to calculate compensation do not amount to an allocation of particular parts of remuneration to particular days of work.

This appendix gives examples of how the time apportionment approach envisaged by SP5/84 applies in practice. Self-Assessment Helpsheet IR211 approaches apportionment by calculating the earnings from the employment that are not taxable in the UK. The total earnings are multiplied by a fraction where the numerator is the number of days worked outside the UK and the denominator is the number of days worked in pursuit of the employment during the tax year. Where there are no UK-based earnings taxable under either section 25 or section 27 ITEPA, the resultant figure will be entered at Box 1.31 on the employment page as foreign earnings not taxable in the UK. Although the amount that is not taxable is sometimes referred to as "overseas workday relief", it is not a statutory relief from tax subject to the claims machinery in Section 42 TMA 1970.

Note 4 to IR211 clarifies what is meant by days worked overseas. They are defined as those days that have been spent outside the UK substantially performing the duties of the employment. "Substantially" should be taken as meaning "for the most part". In *Platten v Brown* there is the example of an employee who spends a whole day working in the UK but then leaves the country that evening on an overseas business trip. It would be difficult to say as a matter of contract that the employee’s earnings for that day were not attributable on a time apportionment basis to duties performed in the UK. It follows that the earnings for a day spent working overseas before returning to the UK in the evening will be attributable to duties performed overseas.

There are two questions of fact to be addressed in order to attribute the earnings for a particular day. These are:

- whether the day has been spent substantially performing the duties of the employment
- where those duties have been performed.

Employees should retain evidence such as travel documents and business diaries to demonstrate how they have calculated the earnings from overseas workdays. The following comprehensive example illustrates some practical issues.

***Example***

Monica is resident but not ordinarily resident in the UK. Her salary of £100,000 is paid directly into an offshore bank account. Her contract of employment provides for a five-day 40-hour working week with 22 days holiday plus public holidays - a total of 230 workdays.

During 2005-06, her employer sent her to work at its branch in India for the whole of October and November, a period of 45 weekdays. She also attended the branch office in India on the first Saturday and Sunday in October and spent three other Saturdays working on her employer's Indian premises. She received a special bonus of £15,000 awarded solely in recognition of her work in India.

In addition, she attended her employer's Munich office on five separate occasions during the year. On four of these occasions, she left the UK after work and stayed overnight before returning to the UK on the following evening. On the final occasion, she left the UK on a Friday evening and spent the weekend in Munich. She spent three hours of the Sunday reading papers relevant to a meeting on the following day. She returned to the UK on Monday evening.

Monica was substantially performing the duties of her employment on the five non-weekdays spent working in India, giving a total 50 workdays in India. The Sunday in Munich was not an overseas workday so her duties in Germany encompassed five workdays. The special bonus was on the facts solely attributable to the performance of duties in India.

Time apportionment produces the following result –

UK duties - Salary 100,000 * 180/235 = 76,595 (Section 25 ITEPA)

Overseas duties - Salary 100,000 * 55/235 = 23,405 plus 15,000 = 38,405

***Example - variation A***

Following her return to the UK, Monica's employer gave her time off in lieu of the weekends spent working in India. The denominator in the fraction would become 230 and not 235.

UK duties - Salary 100,000 * 175/230 = 76,086 (Section 25 ITEPA)

Overseas duties - Salary 100,000 * 55/230 = 23,914 plus 15,000 = 38,914

***Example - variation B***

Facts are as variation A plus Monica spent the whole of Sunday 30 September travelling to India and was granted a further day off in lieu when she returned to the UK. That day should also be counted as an overseas workday increasing the numerator by one to 56.

UK duties - Salary 100,000 * 174/230 = 75,652 (Section 25 ITEPA)

Overseas duties - Salary 100,000 * 56/230 = 24,348 plus 15,000 = 39,348

***Practical issues – international business travel***

The time of departure or arrival and the duration of international business travel can make it extremely difficult to decide whether a particular day should be regarded as a UK or an overseas workday. In these specific circumstances, HMRC is prepared to accept that the following treatment provides a reasonable basis for determining the status of such a day:

International flight or journey lasting no more than seven hours

- Morning arrival – UK workday
- Morning departure – overseas workday
- Afternoon arrival – overseas workday
- Afternoon departure – UK workday

International flight or journey lasting more than seven hours

- Morning arrival – half UK workday and half overseas workday
- Morning departure – overseas workday
- Afternoon arrival – overseas workday
- Afternoon departure – half UK workday and half overseas workday

A morning or afternoon arrival or departure is judged according to the time that the aircraft, vessel or train actually arrives or departs, not the scheduled times.

Where a journey involves more than one international flight, a one hour transfer addition may be added to the actual flight times to determine whether the total flight time lasts more than seven hours. International business travel that takes place on a Saturday, Sunday or Bank Holiday is subject to the same treatment as any other day. Note: HMRC may accept alternative approaches to quantifying overseas workdays if the available evidence indicates that such an approach better reflects the facts.

## 12.19 Relocation expenses

Section 271(1) ITEPA provides a somewhat limited relief for relocation expenses.

> (1) No liability to income tax in respect of earnings arises by virtue of—
> (a) the provision of removal benefits to which this section applies, or
> (b) the payment or reimbursement of removal expenses to which this section applies.

A full discussion of this relief requires a chapter to itself, but one point is relevant here. Section 271(2) disapplies the relief for employees taxed on the remittance basis:

> Subsection (1) does not apply if (disregarding this section) the earnings are general earnings to which either of the following sections applies—
> (a) section 22 (chargeable overseas earnings for year when remittance basis applies and employee ordinarily UK resident), or
> (b) section 26 (foreign earnings for year when remittance basis applies and employee not ordinarily UK resident).

However in the case of non-ordinarily resident employees this is relaxed by informal concession:

> HMRC were asked to clarify whether or not the exemption for relocation expenses within Section 271 ITEPA 2003 was available against earnings taxed on the remittance basis. HMRC confirmed that the current legislation does not provide for relocation exemption to be available where the remittance basis is claimed. However HMRC were aware of existing practice whereby the relocation exemption was applied before apportionment in respect of non-UK workdays. Although this methodology was not consistent with the existing legislation HMRC were content to allow the practice to continue.[20]

---

20 Joint Forum on Expatriates Tax and NICs Note of Meeting 18 September 2008 *www.hmrc.gov.uk/consultations/expat-mins-180908.htm*.

## 12.20 Remittance after year which earnings are "for"

Suppose:

(1) T receives earnings for year (1); the earnings are taxed on the remittance basis and are not remitted in that year.

(2) the earnings are remitted in year (2).

For a resident and ordinarily resident employee, s.22 ITEPA provides:

> (1) This section applies to general earnings for a tax year, to the extent that they are chargeable overseas earnings for that year, if—
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year, and
> (b) the employee is ordinarily UK resident in that year.
> (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year. ...

Similarly, for a resident but not ordinarily resident employee, s.26 ITEPA provides:

> (1) This section applies to general earnings for a tax year where section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the employee for that year and the employee is not ordinarily UK resident in that year, if the general earnings are neither—
> (a) general earnings in respect of duties performed in the UK, nor
> (b) general earnings from overseas Crown employment subject to UK tax.
> (2) The full amount of any general earnings within subsection (1) which are remitted to the UK in a tax year is an amount of "taxable earnings" from the employment in that year.

The earnings are "taxable earnings from the employment in that year" ie year (2). In year (1) the earnings are not "taxable earnings" (as defined).

## 12.21 Remittance after employment ceases

The charge on the remittance basis applies "whether or not the employment is held at the time when the earnings are remitted": ss.22(3) and 26(3) ITEPA.

## 12.22 Remittance of earnings for year that employee is not UK resident

To be "overseas earnings" the earnings must be for a year of assessment in which the employee was resident and ordinarily resident in the UK. Accordingly, any earnings for a year during which the employee was not UK resident can be remitted at any time without a charge to tax.

## 12.23 Remittance when non-resident

Suppose earnings taxable on the remittance basis are remitted in a year when the employee is non-resident. In the HMRC view the earnings are taxable. EI Manual provides:

> **42371. Foreign earnings taxed at time of receipt in UK: *Example***
> An employee is resident but not ordinarily resident in the UK in 2004/05. She has earnings for that year of £10,000 in respect of duties performed outside the UK. She is paid the £10,000 in New York in 2005/06. In 2006/07 she remits £5,000 of those earnings to the UK. The result is that this employee is chargeable under Section 26(2) ITEPA 2003 on £5,000 in 2006/07.
> This employee is likely to be resident in the UK in the year of remittance but she is assessable on the remittance even if she is not. What matters is her residence status in the year when the money was earned (see EIM42201). She will also be assessable on any further remittances out of the £5,000 balance that remains.
> Note that the employee is chargeable on any remittances to the UK even if her employment ceases in 2005/06 (see EIM42370).

Is this correct? It is a surprising anomaly compared to the position for RFI, enforcement may be difficult, but this is the most natural reading of the legislation.

## 12.24 Receipt or remittance after death of employee

Section 13(4) ITEPA provides:

> If the tax is on general earnings received, or remitted to the UK, after the death of the person to whose employment the earnings relate, the person's personal representatives are liable for the tax.

EI Manual provides:

**42380. Basis of assessment for general earnings: Earnings received after the death of an employee or office holder** [April 2004]
When an employee or office holder dies, earnings received (or, if the employee was subject to the special rule for certain foreign earnings, received in the UK) after the date of death are treated as income of the personal representatives and not the income of the deceased. They are assessable on the personal representatives in the same way as if they had been received by the employee or office holder (see generally EIM42201). The earnings will, of course, all have been earned in periods before the date of death even though they are assessable only on receipt. If it is contended that earnings cannot be attributed to any particular period during the lifetime of the deceased employee or office holder, see EIM40005.
So it is the place where duties were performed and the residence and ordinary residence status of the employee when the remuneration was earned that counts. The residence position of the personal representatives at the time the earnings are received (or, where the special rules for certain foreign earnings apply, received in the UK) is irrelevant.
In cases where an employee or office holder has died the employer will follow the instructions at page 16 of the Employer's Further Guide to PAYE. By following those instructions the employer will account for tax in the following way:
• where payments are made in the tax year in which the employee died, and before a P45 is issued, the employer will calculate the tax due using the tax code in use before the employee died
• where payments are made in the tax year in which the employee died, but after the P45 has been issued, the employer will use code BR
• when payments are made in a tax year following that in which the employee died the employer will prepare a new deductions working sheet and will use code BR.
The statutory assessing position for earnings received by personal representatives after the death of an employee or office holder is set out in EIM42390. In many cases, adopting the statutory position would place an additional burden upon the personal representatives and family of the deceased but would not result in materially different overall tax liability. Sensible administrative procedures should be used in this type of case.
Normally, you can take the pay and tax shown on the deceased's P45 as received in the period before the date of death, and follow EIM42410. However you should use the strict basis of assessment, and follow EIM42390, in cases:

• where it is requested, or
• where you know that a substantial amount has been paid after the date of death. For these purposes a substantial amount means a sum in excess of £1,500.

The tax chargeable on the personal representatives is a debt due from and payable out of the deceased's estate.

As regards:

• the strict basis of assessment for the personal representatives of a deceased employee or office holder, see EIM42390
• the time limit for assessments on the personal representatives, see EIM42400
• the treatment of earnings received up to the date of death, see EIM42410.

**42390. Earnings received after the death of an employee or office holder: The charge on personal representatives**

If an employee or office holder dies and earnings are received after the date of death, the personal representatives are charged to tax on them (see EIM42380). They are charged:

• at the basic rate only
• in the year the earnings are received (or, where the special rules for certain foreign earnings apply, received in the UK)
• without any allowances, deductions or reliefs except for the deductions, reliefs and exemptions that would have been due to the employee had they lived.

The personal representatives cannot claim deductions for expenses that they incur separately themselves. The main deductions due are therefore:

• expenses within Sections 336 to 338 ITEPA 2003 incurred by the employee or office holder (see EIM31620 onwards)
• balancing allowances due to the employee or office holder; balancing charges will also fall on the personal representatives (see EIM36500 onwards)
• foreign travel and accommodation expenses within Sections 341, 342 and 370 to 376 ITEPA 2003 incurred by the employee or office holder (see EIM34000 onwards)
• professional fees and subscriptions within Sections 343 and 344 ITEPA 2003 (see EIM32880 onwards)
• where a lump sum is assessable under the "golden handshake" provisions the various exemptions that are available under Sections 404 to 414 ITEPA 2003 (see EIM13500 onwards).

A deduction that is due is not limited to expenses actually paid by the deceased. The personal representatives can have a deduction for an expense that the deceased was due to pay but that the representatives actually settle.

As regards:

• the time limit for assessing personal representatives, see EIM42400

• the treatment of earnings received up to the date of death, see EIM42410.

**42400. Earnings received after the death of an employee or office holder: Time limits for assessments on personal representatives**

The normal 5 year 10 month time limit for making assessments applies where earnings are received after the death of an employee.[21]

This is because the earnings are deemed to be the income of the personal representatives (see EIM42380). So the 3 year 10 month assessing time limit in Section 40 TMA 1970 relating to income arising or accruing up to the date of death does not apply.

The SA manual sets out the procedures relating to personal representatives.

As regards earnings received before the date of death see EIM42410.

**42410. Death of employee or office holder: Earnings received up to the date of death** [May 2010]

When an employee or office holder dies, any earnings received before the date of death are chargeable on the employee in the normal way. But if the employee has died before filing a return for the period in which the earnings were received, the executors or personal representatives will be asked to complete returns to the date of death. In these circumstances the special rules at EIM42380 to EIM42400 do not apply and any assessment on the personal representatives must be made within 3 years and 10 months from the end of the year of assessment in which the employee died.

With effect from 1 April 2010 the time limit is 4 years from the end of the tax year in which the employee dies.

The SA manual sets out the procedures relating to personal representatives.

Where the arising basis applies, there is clearly a tax charge for earnings received after death by the PRs.

Where the remittance basis applies, it is difficult to see how there could be a charge on earnings received in the UK after the death of the employee, since the tax charge only arises on receipt by a relevant person, and there are no relevant persons after the death of an employee.

21 [Author's note: This is out of date from 2010/11].

## 12.25 Remittance from earnings for mixed UK/foreign duties

### 12.25.1 *The statutory position from 2008/09*

This section considers the position where:
(1) an employee who is a remittance basis taxpayer, and who is resident but not ordinarily resident, receives earnings for duties which are performed partly in and partly out of the UK.
(2) The earnings are received abroad.
The earnings are taxed partly on an arising basis and partly on the remittance basis, and the earnings received constitute a mixed fund consisting of what I will call (1) taxed UK earnings and (2) untaxed foreign earnings.

The statutory position is (in short) taxed UK earnings (mixed fund category (a)) are remitted before untaxed foreign earnings (mixed fund category (b)), but later years' earnings are taxed before earlier years'. So employees would need to keep each year's earnings in separate accounts and never remit more than the taxed income in the account.

### 12.25.2 *HMRC practice in 2008/09*

SP 5/84 paras 1 & 2 summarised the taxation of earnings for a resident non-ordinarily resident individual. The SP then explained the practice before 1983[22] and continued:

---

22 "3 Where an employee resident but not ordinarily resident in the UK performs the duties of a single office or employment both in and outside the UK and is remunerated wholly abroad, he is permitted, by a broad interpretation of the decision in the case of Sterling Trust Ltd v IRC 12 TC 868, to say that any remittances made to the UK are made primarily out of general earnings for that year in respect of duties performed in the UK assessable under [s.15 ITEPA], and only any balance out of general earnings chargeable under s.26 on remittance. [Author's Note: This is arguably correct in law and not a concession: see 11.14.1 (Remittance from mixture of taxed and untaxed income).]
4 However, where part of the general earnings are remitted to the UK, it has been the practice of the Revenue to regard the proportion of the earnings remitted to the UK, as in respect of duties performed both in and outside the UK, and to treat that proportion of such earnings as is attributable to duties performed outside the UK as remitted to the UK for the purposes of s.26."
I find this difficult to follow (paras 3 and 4 do not seem consistent) but it does not now matter.

5 The practice changed with effect from 6 April 1983 when the Revenue introduced a simplified procedure for employees who—

(a) are resident but not ordinarily resident in the UK;

(b) perform duties of a single employment both in and outside the UK, so that they are potentially chargeable under both ITEPA ss.[15] and 26, in respect of general earnings from that employment; and

(c) receive part of their general earnings in the UK and part abroad.

In such cases, provided the general earnings chargeable under s.[15] are arrived at in a reasonable manner (ie in the absence of special facts, the proportion of the general earnings, including benefits in kind, relating to UK duties is arrived at on a time basis by reference to working days), the Revenue are prepared to accept that a charge under s.26 will arise only where the aggregate of general earnings remitted to the UK exceeds the amount chargeable under s.[15] for that year; and to restrict the charge under s.26 to the excess of the aggregate over the charge under s.[15].

This continues to apply in 2008/09, by concession. The 2nd ed of the RDR Manual provided:

**35240 Remittances from mixed funds - Identifying nature of remittance**

For 2008-09 tax year only HMRC will continue to operate Statement of Practice 5/84 on the same basis as in 2007-08. The statement of practice will operate on a concessionary basis until the end of the tax year 2008-09 and where appropriate apply instead of provisions in Schedule 7 Finance Act 2008 (for example instead of the mixed fund rule). This temporary measure is intended [to] help ensure a smooth transition to the new legislation in 2008-09 for employers and employees who use the statement of practice.

(This was omitted from the online version as it applied only to 2008/09.)

### 12.25.3 *Position from 2009/10*

SP 1/09 provides:

*Transfers made from an offshore account holding only the income or gains relating to a single employment*

4. Sections 809Q ITA onwards set out rules to determine the kinds and amount of income or chargeable gains remitted to the UK from a fund containing more than one kind of income and capital, or income, or capital

of more than one tax year. Such a fund is defined in sections 809Q and 809R as a "mixed fund". Where amounts are transferred to the UK out of a mixed fund, Section 809Q(3) requires that the individual's tax liability is calculated by reference to each individual transfer. This transfer by transfer approach is referred to below as the "mixed fund rule". This is a change to HMRC's previous practice, with respect to employees to whom SP 5/84 applied, which was to allow the tax liability to be calculated by reference to the total amount transferred to the UK during the tax year as a whole.

5. In the circumstances outlined in this statement of practice, HMRC will accept that certain individuals who are resident but not ordinarily resident in the UK do not have to apply the mixed fund rule and can continue to calculate their tax liability by reference to the total amount transferred out of a mixed fund during the tax year as a whole, rather than by reference to individual transfers.

### 12.25.4 *Accounts qualifying for the concessions*

Only certain accounts qualify for the concessionary treatment in the SP:

6. Employees who are resident but not ordinarily resident in the UK and who perform duties of an office or employment both inside and outside the UK, do not have to apply the mixed fund rule in respect of transfers from a particular account where:

[1] The mixed fund is an account held solely by the employee;[23] and

[2] The account only contains employment income from a single

23 This requirement is slightly relaxed in Notes of the Joint Expatriate Forum 19 January 2010 accessible *www.hmrc.gov.uk/consultations/expat-mins-190110.pdf.*

"Joint accounts. These fall outside the SP1/09 procedures. The current view is that when the joint account is with a trailing spouse who has no income or gains in her own right whatsoever then these can now be included within the SP1/09 arrangements. HMRC made it clear however that there were no de minimis levels agreed and that other than a share of any interest credited to the joint account by the bank a trailing spouse could not introduce any other income or gains to the account."

Various other relaxations of SP 1/09 are also mooted in this document. HMRC subsequently said:

Where an account is held in the joint names with a spouse or civil partner who has no income or gains of their own, except a share in any interest that arises on the account, HMRC has agreed that SP1/09 can apply. This responds to concerns expressed by stakeholders and will apply to all accounts that qualify for SP1/09 on or after 6 April 2009: HMRC Notice 4 March 2010 [2010] STI 612 employment plus:

[a] Any interest arising only on that account, and

[b] Any gains arising from foreign exchange transactions in respect of the funds in that account

[c] Any gains arising on employee share scheme related transactions

[d] Any proceeds from employee share scheme related transactions, not otherwise covered at paragraph 7, in respect of amounts paid by the employee in acquiring the shares.

7. The employment income from that employment may include:

[1] Employment income (subsection 809Q(4)(a));

[2] Relevant foreign earnings (subsection 809Q(4)(b));

[3] Foreign specific employment income (including termination payments and the proceeds from employee share schemes) (subsection 809Q(4)(c)), and

[4] Employment income subject to a foreign tax (subsection 809Q(4)(f)).

Take care not to pay any dividend income into the account!

### 12.25.5 *The concessions*

SP 1/09 contains two concessions. First:

8. Employees who are resident but not ordinarily resident in the UK may also choose not to apply the mixed fund rule if the account contains only income or gains of a kind listed at paragraphs 6 and 7 above, but for more than one tax year. Where this is the case, the ordering rules at section 809Q(3) shall be applied—ie on a last in first out basis.

9. Where the employee applies this statement of practice, amounts transferred out of the account to the UK will be treated as comprising the kinds of income and gains in the order set out in section 809Q(4) for the tax year as a whole.

The SP then repeats a point made in para 6:

10. Accounts containing income or gains of more than one employment are not covered by this statement of practice.

11. Accounts containing income or gains of more than one individual are not covered by this statement of practice.

After a comment on apportionment (set out above) the SP then provides:

14. Where an employee resident but not ordinarily resident in the UK

> performs the duties of a single office or employment both in and outside the UK and is remunerated wholly abroad, he is permitted, by a broad interpretation of the decision in the case of *Sterling Trust Ltd v IRC* (12 TC 868), to say that any remittances made to the UK are made primarily out of general earnings for that year in respect of duties performed in the UK assessable under Section 15, and only any balance out of general earnings chargeable under Section 26 on remittance.

This text is copied from SP 5/84 though *Sterling Trust* cannot have any relevance to the ITA remittance basis.

> 15. However, where part of the general earnings are remitted to the UK, it was the practice of HMRC to regard the proportion of the earnings remitted to the UK, as being in respect of duties performed both in and outside the UK, and to treat that proportion of such earnings as were attributable to duties performed outside the UK as remitted to the UK for the purposes of Section 26.
> 16. The practice changed with effect from 6 April 1983 when HMRC introduced a simplified procedure for employees who:
> – are resident but not ordinarily resident in the UK;
> – perform duties of a single employment both in and outside the UK, so that they are potentially chargeable under both Sections 15 and 26 ITEPA 2003 in respect of general earnings from that employment; and
> – receive part of their general earnings in the UK and part abroad.
> 17. In such cases, provided the general earnings chargeable under Section 15 are arrived at in a reasonable manner (ie in the absence of special facts, the proportion of the general earnings, including benefits in kind, relating to UK duties is arrived at on a time basis by reference to working days), HMRC is prepared to accept that a charge under Section 26 will arise only where the aggregate of general earnings remitted to the UK exceeds the amount chargeable under Section 15 for that year; and to restrict the charge under Section 26 to the excess of the aggregate over the charge under Section 15.

This text is also repeated from SP 5/84 (the comment on the pre-1983 position is of no relevance now).

SP 1/09 is classified as a statement of practice (though it is clearly a concession). This is presumably because HMRC are not now supposed to grant concessions (except for minor and transitional matters). It appears that the Government have realised that the SP is an unsatisfactory stop-gap measure:

> When SP1/09 was introduced, the intention was that it would apply for one year, before being legislated in Finance Bill 2010. Since April 2009 HMRC has worked towards this aim, including consultation and meeting with external stakeholders. However, it has not been possible to resolve all the outstanding issues in time to legislate the practice this year.
>
> In these circumstances, the Financial Secretary to the Treasury has agreed that SP1/09 will apply for a further year until 5 April 2011.
>
> HMRC will continue working with stakeholders on the issues which remain unresolved, with the aim being that SP1/09 will be brought into legislation as part of Finance Bill 2011.[24]

That deadline was missed, but the remittance consultation paper proposes action in the FA 2012:

> 2.96 SP 1/09 is very widely used by expatriate employers and employees, and is important to business. The Government is seeking to put this non-statutory practice on a statutory footing to provide expatriate employees and their employers with greater clarity and certainty. This will preserve the features and details of the current practice.
>
> 2.97 There are some specific issues for SP 1/09 on which the consultation process will seek to clarify whether the simplified legislative treatment should apply. These are listed below.
>
> **Employee becomes not UK resident part way through a tax year and continues to deposit money into a bank account**
>
> 2.98 The Government expects that this situation would usually only arise in a year in which an employee was leaving the UK permanently. If this is the case, the provisions which allow the tax year to be split into periods of residence and non-residence in certain circumstances (currently contained in Extra Statutory Concession A11), should apply and there would be no need for separate provision in the legislation that will replace SP 1/09.
>
> 2.99 However, the Government would welcome views on whether there are any other circumstances in which this situation would arise and, therefore, whether specific legislative provision might be necessary.
>
> **Employee holds bank accounts containing employee share scheme transactions in respect of non UK situs assets**
>
> 2.100 The Government considers that such accounts should only fall within the simplified treatment if the employee has little or no control over how the transactions are paid. For example, it is common that, when

24 HMRC Notice 4 March 2010 [2010] STI 612

shares or share options which are acquired by virtue of the employment vest to the employee, the amount treated as earnings at that date will be paid through the payroll into the same account as salary payments. The simplified treatment should apply to such transactions.
2.101 However, the Government does not propose that accounts containing capital gains from share scheme transactions should qualify for simplified treatment because the employee can control when and into which account the transactions are paid after the shares have vested.[25]

## 12.26 Earnings from Ireland

In the following discussion:

**"Irish earnings**" means earnings from an Irish resident employer; it is assumed that the conditions for the remittance basis are in principle all met (duties performed outside the UK, etc).

**"Pre-2008 earnings"** means earnings arising before 6 April 2008.

The UK/Ireland DTA also needs to be considered but it is not discussed here. Similar points arise in relation to RFI; see 9.21 (RFI from Ireland).

### 12.26.1 *Earnings from 2008/09*

The position for earnings from 2008/09 is straightforward. The ITA remittance basis treats Irish earnings in the same way as any other foreign earnings. The FA 2008 repealed the rule of the pre-2008 remittance basis which provided (unlawfully and probably ineffectively) that Irish earnings were taxed on an arising basis.

### 12.26.2 *Pre-2008 earnings remitted from 2008/09*

This change raised the problem of transition. Para 82 Sch 7 FA 2008 provides:

---

25 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

> (1) This paragraph applies in relation to an individual's general earnings for the tax year 2007–08 or any earlier tax year ("the relevant tax year") if the individual—
> (a) was UK resident in that year, but
> (b) was not domiciled in the UK, or was not ordinarily UK resident, in that year...
> (3) In relation to the general earnings, the definition of "foreign employer" in section 721(1) of ITEPA 2003 has effect as if at the end there were inserted "and not resident in the Republic of Ireland".

Amended as para 82(3) directs, s.721(1) ITEPA provides:

> "foreign employer" means an individual, partnership or body of persons resident outside the UK and not resident in the UK *and not resident in the Republic of Ireland*.

Thus (although this might surprise the residents of Eire) an Irish resident employer is not (for this purpose) a "foreign employer" so pre-2008 Irish earnings are not "chargeable overseas earnings" so the remittance basis does not apply to them. Para 82(3) is simply a roundabout way of disapplying the remittance basis charge for pre-2008 Irish earnings.
EN FB 2008 provides:

> 395. Subsection (3) ensures that the existing restriction on the application of the remittance basis in the case of employment income from employers resident in the Republic of Ireland continues to apply in relation to the remittance on or after 6 April 2008 of general earnings arising before that date. This will prevent double taxation as the general earnings have already been taxed when they arose.

In short, if:
(1) Irish earnings arose before 2008/09; and
(2) The earnings are remitted on or after 2008/09
there is no tax charge on remittance.

### 12.26.3 *Why is para 82(3) needed?*

Before 2008, s.721 ITEPA provided:

> *"foreign employer" means*
> *(a) in the case of an employee resident in the UK, an individual, partnership or body of persons resident outside the UK and not resident in the UK* ***or the Republic of Ireland,***

Under this definition, earnings from an Irish resident employer could not have been chargeable overseas earnings so at first it seems that para 82(3) is not needed. It may be that para 82(3) is otiose; it is inserted by mistaken analogy with para 83(3) (which is needed). However para 82(3) is needed on the assumption that where
(1) earnings arose before 2008/09 and
(2) the earnings are remitted from or after 2008/09
the question of whether the earnings qualify as chargeable overseas earnings is to be determined by the legislation as it stands in the year of remittance, and not by the legislation as it stood at the time that the earnings arose.

12.26.4 *Pre-2008 Irish earnings: tax position before 2008/09*

As noted above, according to statute, the remittance basis did not apply if the employer was resident in the Republic of Ireland: pre-2008 Irish earnings were taxable on the arising basis and not the remittance basis. The discrimination against Ireland was contrary to EU law.[26] This work advised that those with pre-2008 Irish earnings should only agree to pay tax on the remittance basis. Where tax has been paid on an arising basis which would not have been paid on a remittance basis, a repayment claim should be made.[27] Under para 82(3) discussed above, pre-2008 Irish source income which was not remitted before 2008/09 escapes UK tax altogether, since unremitted Irish source income was not lawfully taxable when it arose and it is not (from 2008/09) taxable on remittance. I expect that this will not often arise in practice, but occasionally it may be important.

26 The point was discussed in some detail in the 6th edition of this book para 9.51 and 10.4.2.
27 For the limitation period see s.106 FA 2007.

## 12.27 Foreign service exemption for termination payments

When a foreign domiciliary comes to the UK having worked for an overseas employer for a number of years, they may receive a termination payment after their arrival in this country. This would ordinarily be chargeable as employment income by s.403 ITEPA to the extent that it exceeds £30,000. However, s.413 ITEPA provides a territorial exemption.

A payment satisfying the above conditions can be remitted free of income tax to the UK. It is a moot point why the payment does not give rise to CGT, but in practice HMRC do not take that point.

## 12.28 Overseas Crown employment

General earnings from overseas Crown employment subject to UK tax[28] are taxed on an arising basis, regardless of residence, domicile and place of work. In the case of UK resident and ordinarily resident employees, such earnings are charged in the normal way under s.15 ITEPA and excluded from the remittance basis because the Crown is not a foreign employer. In the case of a UK resident and non-ordinarily resident individual, the earnings are charged in the normal way under s.15 and excluded from the remittance basis by s.26(1)(b) ITEPA.[29] In the case of a non-resident employee, the charge is under s.27 ITEPA.[30] The 1955 Royal Commission Report explains the reason:

> International comity does not permit the salary of the servant of one State to be taxed by another State: consequently a Crown servant, even if spending his whole time on work abroad, is not amenable to the local taxing jurisdiction and, if he is to be taxed at all, must be taxed by the UK taxing authority. No doubt the scale of remuneration for Crown servants abroad is fixed with these considerations in mind.[31]

---

28 The expression "general earnings from overseas Crown employment subject to UK tax" is defined in s.28 ITEPA.

29 See 12.15 (Resident but not ordinarily resident employee).

30 See 12.16 (Non-resident employee).

31 Cmd 9474 para 307.

### 12.28.1 *Exception for low paid overseas crown employees*

EIM40209 records that HMRC have made the following orders under s.28(5) ITEPA:

> General earnings from overseas Crown employment in respect of an employee who:
> 1. is not resident in the UK;
> 2. was engaged outside the UK; and
> 3. is employed in a grade the maximum rate of pay of which is less than the maximum rate of pay of an executive officer employed in the same department of the UK Civil Service and working in inner London,
>
> is excepted from the operation of Section 27(2) of the Act.
> With effect from 13 June 2006, the order does not apply to Queen's Gurkha Officers or any other members of the Brigade of Gurkhas who were recruited for that Brigade in Nepal.

This replaces the former concession A25. EN ITEPA provides:

> The concession reflects long-standing practice and is in keeping with international treaty obligations.
> The use of a salary level and grade in the concession is an attempt to focus its benefits on genuinely temporary or unestablished staff. However, enshrining these existing limits in primary legislation is not thought to be desirable. Instead it is intended to preserve the existing flexibility of the Inland Revenue to adapt the concession to new circumstances by enabling the Board of Inland Revenue to make an order which sets out the limits of the new statutory exception: see section 28(5) and (6) of the Act. Section 28(7) and (8) of the Act, which deal with the factors by reference to which the statutory exception may be expressed, are intended to reflect the scope of this existing flexibility. Section 717(2) of the Act means that an order does not need to be made by statutory instrument.
> The new statutory exception will operate on the charges to tax arising by virtue of section 25(2) of the Act (UK-based earnings for year when employee resident, but not ordinarily resident, in UK) or section 27(2) (UK-based earnings for year when employee not resident in UK). It is intended that it should operate at least as widely as the present exception conferred by ESC A25.

## 12.29 Seafarers

The rules relating to seafarers and duties performed on vessels and aircraft are too specialist to be considered here, but reference should be made to s.39(3) and ss.40, 372 and Chapter 6 Part 5 ITEPA. On residence of seafarers, see 3.26 (Seafarers).

## 12.30 Lower-paid employee exemption

BN55 (22 April 2009) provides:

> Individuals with small amounts of foreign employment income
> 5. Individuals employed in the UK are currently required to file a Self Assessment tax return if they have also received income from overseas employment in the same tax year. This is the case even where there is little or no tax to pay in the UK because the overseas employment income has already been subject to tax in the other country.
> 6. This obligation to file a return will be removed with effect from 6 April 2008 where such individuals have overseas employment income of less than £10,000 and overseas bank interest of less than £100 in any tax year, all of which is subject to a foreign tax.

EN FB 2009 provides:

> 11. This clause introduces a new income tax exemption for low-income employees working in the UK who meet certain conditions. Such individuals will typically be migrant workers employed in seasonal work in the agricultural or service sectors in UK and in other countries in the same tax year and whose overseas income is subject to tax where it is earned. Previously they were required to file a Self Assessment tax return, even in situations where there was no, or very little, tax to pay. This exemption removes that requirement in most cases.

According, s.828A ITA provides:

> **Chapter 1A**
> Exemption for Persons Not Domiciled in UK
> **828A Introduction**
> This Chapter provides for an exemption from liability to income tax for an individual for a tax year if-
> (a) the individual is UK resident in the tax year but not domiciled in the

UK in the tax year,
(b) section 809B does not apply to the individual for the tax year, and
(c) conditions A to F in section 828B are met.

I refer to these conditions as "**LPE conditions A to F**" to avoid confusion with the myriad other conditions in ITA.

Section 809B will only apply if the individual makes a claim under s.809B, which where the LPE conditions are satisfied will never happen, so the important requirements are the LPE conditions.

### 12.30.1 *LPE condition A: UK employment*

Section 828B(1) ITA provides:

> Condition A is that in the tax year the individual has income from an employment the duties of which are performed wholly or partly in the UK.

Section 828D ITA defines "employment":

> (1) This section applies for the purposes of this Chapter.
> (2) "Employed" and "employment" have the same meaning as in the employment income Parts of ITEPA 2003: see Chapter 1 of Part 2 of that Act.

If these were income-tax wide definitions it would not be necessary to say this here.

### 12.30.2 *LPE condition B: cap on RFE*

Section 828B(2) ITA provides:

> Condition B is that, if the individual's income for the tax year consists of or includes relevant foreign earnings—
> (a) the amount of the relevant foreign earnings does not exceed £10,000, and
> (b) all of that amount is subject to a foreign tax.

Section 828D(5) defines "relevant foreign earnings":

> "Relevant foreign earnings", in relation to an individual, means what would be the individual's relevant foreign earnings for the purposes of Chapter A1 of this Part if section 809B applied to the individual (see section 809Z7(3)).

Section 828D(4) ITA defines "foreign tax":

> "Foreign tax" means any tax chargeable under the law of a territory outside the UK.

See 50.22 ("Subject to tax").

HMRC say:

> HMRC also confirmed that the £10,000 limit for relevant foreign earnings applied for the full year and was not affected by ESC A11 split year treatment. Therefore, an individual who had already earned more than £10,000 abroad in the UK tax year before he or she arrived would not be eligible.[32]

### 12.30.3 *LPE condition C: cap on RFI*

Section 828B(3) ITA provides:

> Condition C is that, if the individual's income for the tax year consists of or includes income that is relevant foreign income by virtue of section 830(2)(e) of ITTOIA 2005—
> (a) the amount of that income does not exceed £100, and
> (b) all of that amount is subject to a foreign tax.

In order to understand the reference to s.830(2)(e) ITTOIA one needs to read it together with s.830(1):

> (1) In this Act "relevant foreign income" means income which—
> (a) arises from a source outside the UK, and
> (b) is chargeable under any of the provisions specified in subsection (2) (or would be so chargeable if section 832 did not apply to it).

32 Joint Expatriate Forum on Tax and Nics: 29 July 2010 Meeting Note *www.hmrc.gov.uk/consultations/expat-mins-290710.pdf*

(2) The provisions are ...
(e) Chapter 2 of Part 4 (interest),

### 12.30.4 *LPE condition D: no other income/gain*s

Section 828B(4) ITA provides:

> Condition D is that the individual has no other foreign income and gains[33] for the tax year.

This condition will in practice rarely be satisfied if (as is likely) the individual has a foreign currency foreign bank account because any withdrawal from the account is more likely than not sooner or later to give rise to some trivial gain.[34]

### 12.30.5 *LPE condition E: exclusion of higher rate taxpayers*

Section 828B(5) ITA provides:

> Condition E is that the individual would not for the tax year be liable to income tax at a rate other than the basic rate or the starting rate for savings if this Chapter did not apply to the individual for the tax year.

### 12.30.6 *LPE condition F: no tax return*

Section 828B(6) ITA provides:

> Condition F is that the individual does not make a return under section 8 of TMA 1970 for the tax year.

Since a return is due if HMRC choose to require it, the position is that HMRC have a power to withdraw the exemption (by requiring a return). The rule is thus: no tax is due unless HMRC happen to ask for it. This is

---

33 Section 828D(3) ITA incorporates the standard commonsense definition of "foreign income and gains":
“"Foreign income and gains", in relation to an individual, means what would be the individual's foreign income and gains for the purposes of Chapter A1 of this Part if section 809B applied to the individual (see section 809Z7(2)).”

34 See 49.11 (Foreign currency bank accounts: CGT).

a new development in tax policy; one hopes it does not become standard.
HMRC say:

> HMRC sought to clarify the intention behind the new legislation which was to remove the obligation on overseas migrant workers on low incomes to file an SA return in cases where there was little or no tax to pay in the UK. It was true that such individuals would no longer qualify for the tax exemption if they filed a return to claim a tax repayment, but the tax exemption was merely the vehicle for delivering the administrative saving. External delegates failed to understand why the exemption should also be lost if the individual filed not a tax return but an R40 to claim repayment of PAYE on UK income.[35]

In fact, the R40 form is not a tax return under s.8 TMA: *Osborne v Dickinson* [2004] STC (SCD) 104.
The RDR Manual provides:

> **32070 - Remittance Basis: Accessing the remittance basis: Claiming the remittance basis: Calculation of income tax liability - exemption for non-domiciles with small amounts of foreign employment income**
> Individuals employed in the UK are usually required to file a Self Assessment tax return if they have also received income from overseas employment in the same tax year. However in many cases there is little or no tax to pay in the UK because the overseas employment income has already been subject to tax in the other country.
> From 6 April 2008 there is no obligation for individuals who are resident but not domiciled in the UK for a tax year to file a return as long as the individual is not claiming the remittance basis under ITA07/s809B and meets all of the following conditions (ITA07/s828A).
> [The Manual summarises conditions A - F and continues:] If all of these conditions apply, the individual receives an exemption from liability to income tax, in so far as that liability is attributable to the individual's foreign income or gains for the tax year (termed the 'relevant amount').
> Broadly, the relevant amount is deducted from what would otherwise be the amount of the individual's liability to income tax for the tax year under ITA07/s23.
> This means that the individual is automatically taxed on the Arising Basis for that tax year, and does not have to complete a return.

35 Joint Forum on Expatriates Tax and NICs 16 July 2009, accessible *www.hmrc.gov.uk/consultations/expat-mins-160709.htm*.

Most individuals who fulfil Conditions A to F are expected to use the Arising Basis and not complete a return. However there may be a small number of non-domiciled individuals who fulfil these conditions but who wish to use the remittance basis in respect of their foreign income and gains and are within the 'below £2,000 threshold' user group (ITA07/s809D). Such individuals will have to complete a return in order to claim the remittance basis under s809D; this will of course mean that Condition F of ITA07/s828A is no longer met, refer to RDRM32110 Unremitted foreign income and gains below £2,000 threshold.

### 12.30.7 *The exemption*

Section 828C ITA provides:

(1) The exemption is given by deducting the relevant amount from what would otherwise be the amount of the individual's liability to income tax for the tax year under section 23.
(2) "The relevant amount" is so much of the amount of the individual's liability to income tax as is attributable to the individual's foreign income or gains for the tax year.

I refer to this as the **"Lower-paid employee exemption**."

### 12.30.8 *Restriction on exemption*

Section 828C ITA provides:

(3) But if for the tax year the individual's total income is reduced by any deductions which fall to be made at Step 3 of the calculation in section 23 from the individual's foreign income or gains for the tax year, subsection (2) has effect as if the individual's foreign income or gains for the tax year were reduced by the amount of the deductions.
(4) And if the individual is entitled under.
(a) sections 2 and 6 of TIOPA 2010(double taxation arrangements: relief by agreement), or
(b) section 18(1)(b) and (2) of that Act (relief for foreign tax where no double taxation arrangements),
to a tax reduction in respect of the individual's foreign income or gains for the tax year, what would otherwise be the relevant amount is reduced by the amount of that reduction.

### 12.30.9 *Administration: avoiding issue of SA return*

HMRC say:

> HMRC stressed that, whilst the exemption was not designed for employees on inter-company transfers, it had become clear that the exemption could be applied to certain assignees, in particular those from India and China.
> 3 The main issue was the difficulty in identifying the relevant individuals. Unless informed that they qualify for filing exemption, HMRC would issue SA returns, thereby preventing them from taking advantage of s828A. HMRC had designed an election letter for Expats to meet this need: agents should submit this letter at the same time as the 64-8, and after the P46 (Expat) had been filed, which would ensure that no SA return is issued.

This is essential as if a SA return is issued, the relief is lost. For the form of the letter, see Fisher, "Expat Exemption", *Taxation* 3 March 2011 p.18.
HMRC continue:

> There was a separate issue with employers using EPM App 6 with a month 12 adjustment to eliminate any residual liability whose employees are required to submit a SA return. However, as some had very simple tax affairs, there was a case for allowing them to use s828A whilst remaining within EPM6. HMRC will seek to engage with such employers to reach a suitable agreement for their employee base. In such cases, the election letter will need to be completed but retained by the employer. If there are individuals who do not qualify, the employer or agent will need to submit an SA1 to request a return.
> A similar case existed for NR individuals who submit SA returns to get personal allowances under DTAs.[36]

### 12.30.10 *Commentary*

Almost every requirement of the lower-paid employee is anomalous. If the aim is to remove obligations to file a return where there is little or no UK tax at stake, why is it so limited? The provision presumably reflects

36 Joint Expatriate Forum on Tax and Nics: 29 July 2010 Meeting Note *www.hmrc.gov.uk/consultations/expat-mins-290710.pdf*

effective lobbying by special interest groups concerned with lower-paid employees rather than a serious attempt to address compliance cost issues.

## 12.31 PAYE

Section 690 ITEPA modifies the PAYE rules for non-resident or NOR employees on the remittance basis:

> (1) This section applies in relation to an employee in a tax year only if the employee—
> (a) is not resident or, if resident, not ordinarily resident in the UK, and
> (b) works or will work in the UK and also works or is likely to work outside the UK.
> (2) If in relation to an employee to whom this section applies and any tax year it appears to an officer of Revenue and Customs that—
> (a) some of the income paid to the employee by the employer[37] is PAYE income, but
> (b) some of that income may not be PAYE income,
> an officer of Revenue and Customs may, on an application made by the appropriate person,[38] give a direction for determining a proportion of any payment made in that year of, or on account of, income of the employee which is to be treated as PAYE income.
> (2A) For the purposes of subsection (2) as it applies in relation to an employee who is UK resident but not ordinarily UK resident in a tax year, the officer may treat section 809B of ITA 2007 (remittance basis) as applying to the employee for that year, even if no claim under that section has been made.[39]

---

37 Section 690(3)(b) ITEPA provides:
"any reference to a payment made by the employer includes a reference to a payment made by a person acting on behalf of the employer and at the expense of the employer or a person connected with the employer."

38 Section 690(3)(a) defines "appropriate person":
"In this section—
(a) "the appropriate person" means the person designated by the employer for the purposes of this section and, if no person is so designated, the employer..."

39 For completeness, the section continues:
(4) An application under subsection (2) must provide such information as is available and is relevant to the application.
(5) A direction under subsection (2)—
(a) must specify the employee to whom and the tax year to which it relates,
(b) must be given by notice to the appropriate person, and

HMRC Brief 17/09 provides:

> **Section 690 ITEPA directions**
> Prior to April 2008 non-domiciled individuals and not ordinarily resident individuals were automatically taxed on the remittance basis on their foreign employment income. However since April 2008 individuals have to make an annual claim to the remittance basis. Section 690 ITEPA was amended in Finance Act 2008 to reflect this change for not ordinarily resident employees. Prior to April 2008 employers were able to ask for a section 690 direction which permitted them not to apply PAYE to certain employment income paid to not ordinarily resident employees entitled to be taxed on the remittance basis. These rules have been amended to allow this procedure to continue.

---

(c) may be withdrawn by notice to the appropriate person from a date specified in the notice.

(6) The date so specified may not be earlier than 30 days from the date on which the notice of withdrawal is given.

(7) If—

(a) a direction under subsection (2) has effect in relation to an employee to whom this section applies, and

(b) a payment of, or on account of, the income of the employee is made by the employer in the tax year to which the direction relates,

the proportion of the payment determined in accordance with the direction is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.

(8) If in any tax year—

(a) no direction under subsection (2) has effect in relation to an employee to whom this section applies, and

(b) any payment of, or on account of, the income of the employee is made by the employer,

the entire payment is to be treated for the purposes of PAYE regulations as a payment of PAYE income of the employee.

(9) Subsections (7) and (8) are without prejudice to—

(a) any assessment in respect of the income of the employee in question, and

(b) any right to repayment of income tax overpaid and any obligation to pay income tax underpaid.

(10) In a case where section 689 applies—

(a) the references to the employer in subsection (3)(a) are to be read as references to the relevant person, and

(b) any reference to a payment made by the employer is to be read as a reference to a payment treated, for the purposes of PAYE regulations, as made by the relevant person.

In this subsection "the relevant person" has the same meaning as in section 689.

HMRC 6 provides:

> **6.4 What should you do if you have UK Tax Allowances and use the Remittance Basis?**
> From 6 April 2008 onwards, if you have claimed the remittance basis (see Chapter 5) and your unremitted income and/or gains is £2,000 or more you will not be entitled to the allowances listed in paragraph 6.2.
> If you decide during a tax year that you are going to use the remittance basis and you are still receiving personal allowances through the PAYE system, you may not be paying enough UK tax. If you let us know, we can arrange to adjust your PAYE code so that you are not left with a tax bill relating to overpaid personal allowances at the end of the year. Otherwise we shall ask you to pay the additional tax through the Self Assessment system.
> If you want us to adjust your PAYE code you should contact the office which deals with your PAYE and ask for a tax code to be issued which does not give relief for personal allowances. This will reduce the amount of tax you may have underpaid at the end of the tax year. Your employer can't do this for you as your tax affairs are confidential between you and HMRC. Until they receive a new tax code from us, your employer will continue to deduct tax from you based on the code we originally issued before you told us you were claiming the remittance basis.

It is hard to imagine anyone wishing to do this. But HMRC say:

> Employers have expressed concern that the P46 (Expat) does not allow them to operate a 0T code (no personal allowance) even where they are aware that the employee will claim the remittance basis or has income in excess of £100K.
> HMRC said that it was not the responsibility of employers to withdraw personal allowances and, if they did so, the New PAYE System (NPS) might reinstate the allowances when the P14 is filed and make a repayment to the individual.
> HMRC said that, if employers agree with their employee that they will claim the remittance basis or if the individual's earnings will exceed £100K, they should request a formal change of code number from the Expat Team. This would ensure that HMRC records mirror those of the employer when the P14 is submitted.
> HMRC confirmed that the Modified PAYE rules in EPM6 allows PAs to be withdrawn from remittance basis users but it would be sensible for Employers to notify the Expat Team of situations where that applies. They agreed to make the necessary changes to the EPM6 agreement to

make this clear.[40]

The minutes of the Joint Expatriate Forum record:

> Tax equalisation packages and repayments of PAYE
> 2.8 Since the last meeting, HMRC had been giving further consideration to the issue of whether a repayment of overpaid PAYE should be treated as a remittance. This had proved to be a complex matter and HMRC proposed convening a subgroup to take this forward.
> 2.9 The point was made that it would be unfortunate if employees were penalised for operating PAYE properly and that the forum was looking for a practical and sensible solution.[41]

## 12.32 Tax equilisation

The EIM provides:

**77040. Appendix 4: Not ordinarily resident employees: Tax equalisation** [March 2007][42]
... In addition to salaries and benefits, employers may also provide their employees with the benefit of tax equalisation. This usually means that the employer undertakes to meet on the employee's behalf any additional tax payable above the tax that the employee would have paid in his home country. It is well established that such payments made on behalf of employees form part of their earnings. But before 2002, there was a difference of view between the then Inland Revenue and a number of accountancy firms about the extent to which such tax equalisation payments represent earnings in respect of duties performed in the UK.

The issue matters for NOR and NR employees: see 12.16 (Non-resident employee).

The view taken by the Inland Revenue and subsequently by HMRC is that tax equalisation payments represent earnings wholly referable to duties performed in the UK where the underlying tax liability is similarly wholly referable to duties performed in the UK. Therefore, where an employer pays a tax liability arising under section 25 on an employee's behalf, that payment will itself represent earnings wholly chargeable under section 25.
This view was approved by a Special Commissioner in 2001 in the case of *Perro v*

40 Joint Expatriate Forum on Tax and NICS: 26 May 2010 Meeting note *www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf*.
41 Joint Expatriate Forum on Tax and NICs: 10 Feb 2011 Meeting Note
42 The text is derived from Tax Bulletin 59.

*Mansworth* [2001] STC (SCD) 179. The Special Commissioner stated that it was an inescapable fact that the payment of tax by the appellant's employer was an emolument (earnings) in respect of UK duties since that tax was only payable because of the performance of duties in the UK.

Ms Perro's net earnings were time apportioned in accordance with SP5/84 in order to find the net attributable to UK duties as there was no specific attribution of salary or other benefits between UK and overseas duties. Following Perro, it has been accepted practice to gross up this net figure on the basis that the payment of tax on UK-based earnings represents additional earnings wholly referable to duties performed in the UK.

The Special Commissioner did not consider the treatment of reimbursement of tax on income other than employment income chargeable under what is now section 25. The employer of a tax-equalised employee may reimburse UK tax on investment income or capital gains. Employers may also pay foreign tax liabilities on the employee's behalf. Following the decision in Perro, the Inland Revenue was asked to give its view on the treatment of such reimbursements.

When apportioning earnings between sections 25 and 26, it is necessary first to consider whether those earnings are wholly referable to UK or non-UK duties on the facts. Clearly if this is so, there is no need to consider time apportionment. If the earnings are not wholly referable either to UK or non-UK duties, then time apportionment will be necessary in accordance with SP5/84.

If an employer reimburses personal tax liability arising on non employment income[43] such as bank interest, dividends or capital gains, then the first question is whether that reimbursement is a payment of earnings that relates wholly to either UK or non-UK duties. We do not consider that the physical presence of the employee in the UK in order to perform employment duties is sufficient justification for treating such reimbursements as wholly in respect of duties performed in the UK. In the absence of unusual facts, we believe that such earnings should be time apportioned. This will produce net section 25 earnings that will then need to be grossed up. The gross up will be on the basis that the payment of UK tax on earnings within section 25 is itself a payment of earnings wholly chargeable under section 25.

With regard to foreign tax payments, the attribution between sections 25 and 26 will depend upon the facts and circumstances. If the foreign tax relates solely to overseas duties, then the payment of that tax by the employer will comprise earnings wholly referable to duties performed outside the UK that cannot be charged to tax under section 25. Alternatively, the foreign tax may be charged on worldwide income so that time apportionment is likely to provide the only practical mechanism for determining the attribution between sections 25 and 26.

With regard to the treatment of employer payment / reimbursement of tax chargeable under section 26, SP5/84 states that provided the earnings chargeable under section 25 are arrived at in a reasonable manner; HMRC is prepared to accept that a charge under section 26 will arise only where the aggregate of earnings received in the UK exceeds the amount

43 [Author's note]. Employees are likely to claim the remittance basis so the tax charge is only on remitted income and remitted foreign gains. It is not clear that the employee ought to pay the charge on remitted income or gains as remittance is a decision of the employee. However it may be appropriate to do so.

chargeable under section 25 for that year. The amount chargeable under section 26 is therefore restricted to the excess of the aggregate over the amount chargeable under section 25.

Where the employer meets UK tax liability under section 26, the payment of that tax to HMRC will clearly be remitted to the UK. It is logical that the payment of the section 26 liability will itself be a payment of earnings chargeable under section 26 and as the tax payment will be remitted to the UK, the related gross up will also be wholly chargeable under section 26.

There can be significant practical difficulties in identifying whether earnings relate solely to non-UK duties and therefore fall within section 26. In such cases, HMRC would not generally dispute time apportionment between sections 25 and 26 on the basis of working days. If any earnings were allocated solely to section 26 as attributable wholly to non-UK duties, evidence should be available to justify the attribution, in the event of an HMRC enquiry.

***Non resident employees***

Some tax-equalised employees are not resident in the UK. They may perform substantive duties of their employment in this country. Unless the specific terms of a Double Taxation Agreement confer an exemption from UK tax on UK source employment income, such employees will be liable under section 27 ITEPA on earnings in respect of duties performed in the UK. Earnings for duties performed outside the UK will fall outside of the charge to UK tax on employment income. HMRC adopts the same approach to tax equalisation for non-resident employees as for those resident but not ordinarily resident employees whose earnings are apportioned between sections 25 and 26.

The following simple examples are intended to illustrate the basic approach to tax equalisation earnings described in this appendix. It is recognised that many cases will have much more complex facts and that the ensuing calculations will be similarly complex.

***Example (Tanya)***

T has been sent to the UK to work at her employer's UK branch for two years from 1 January 2005. She is resident but not ordinarily resident in the UK from the day of her arrival. In addition to her UK duties, her employer requires her to make regular and extensive visits to an overseas branch of its business in order to monitor an important project. Whilst assigned to the UK, T is subject to her employer's policy on tax equalisation which provides for her to receive the same net salary and benefits as if she had remained in her home state.

During 2005-06, T performed the duties of her employment on 225 days. She spent 158 days working in the UK and 67 days working overseas. Net salary and benefits from her employment were £100,000 of which £60,000 was received in the UK. Her employer was obliged to pay her tax liabilities in accordance with its tax equalisation policy. For simplicity, all calculations assume that T's income is chargeable to UK tax at 40%

***Scenario 1***

T's only tax liability was incurred in the UK on the earnings from her employment.

**Calculation of UK tax for 2005-06**

| | |
|---|---|
| Net salary and benefits | 100,000 |
| Less amount attributable to overseas workdays – 67/225 (30%) | (30,000) |
| Attributable to the performance of UK duties | 70,000 |
| Gross up for UK tax at 4/6 | 46,666 |
| UK-based earnings taxable under section 25 ITEPA | 116,666 |

| | |
|---|---|
| Tax at 40% | 46,666 |
| Remitted to the UK - 60,000 plus section 25 tax of 46,666 | 106,666 |
| Section 26 ITEPA - SP5/84 | Nil |

***Scenario 2***

Facts as above but T's employer also paid UK tax liability of £5,000 on her investment income. As the £5,000 is not directly referable to the performance of duties inside or outside the UK, it falls to be time apportioned in accordance with SP5/84. Therefore, the £5,000 has been added to net salary and benefits before calculating and deducting the amount attributable to overseas workdays.

**Calculation of UK tax for 2005-06**

| | |
|---|---|
| Net salary and benefits | 105,000 |
| Less amount attributable to overseas workdays – 67/225 (30%) | (31,500) |
| Attributable to the performance of UK duties | 73,500 |
| Gross up for UK tax at 4/6 | 49,000 |
| UK-based earnings taxable under section 25 ITEPA | 122,500 |
| Tax at 40% 49,000 | |
| Remitted to the UK - 60,000 plus section 25 tax 49,000 and other UK tax 5,000 | 114,000 |
| Section 26 ITEPA - SP5/84 | Nil |

***Scenario 3***

Additionally, T's employer pays overseas tax liability of £5,000 direct to an overseas tax authority. The overseas tax is referable solely to the performance of duties outside the UK and is therefore excluded from the section 25 calculation.

**Calculation of UK tax for 2005-06**

| | |
|---|---|
| Net salary and benefits | 110,000 |
| Less overseas tax payment | (5,000) |
| Salary and benefits to be time apportioned | 105,000 |
| Less amount attributable to overseas workdays – 67/225 (30%) | (31,500) |
| Attributable to the performance of UK duties | 73,500 |
| Gross up for UK tax at 4/6 | 49,000 |
| UK-based earnings taxable under section 25 ITEPA | 122,500 |
| Tax at 40% | 49,000 |
| Remitted to the UK - 60,000 plus section 25 tax 49,000 and other UK tax 5,000 | 114,000 |
| Section 26 ITEPA - SP5/84 | Nil |

***Scenario 4***

Facts are the same as in Scenario 2 except that £70,000 out of the £100,000 net salary and benefits has been remitted to the UK.

**Calculation of UK tax for 2005-06**

| | |
|---|---|
| Net salary and benefits | 105,000 |
| Less amount attributable to overseas workdays – 67/225 (30%) | (31,500) |
| Attributable to the performance of UK duties | 73,500 |
| Gross up for UK tax at 4/6 | 49,000 |
| UK-based earnings taxable under section 25 ITEPA | 122,500 |
| Tax at 40% 49,000 | |
| Remitted to the UK - 70,000 plus section 25 tax 49,000 and other UK tax 5,000 | 124,000 |

| | |
|---|---|
| Net section 26 ITEPA - SP5/84 | 1,500 |
| Gross up for UK tax at 4/6 | 1,000 |
| Foreign earnings taxable under section 26 | 2,500 |
| Total taxable earnings (sections 25 and 26) | 125,000 |
| Tax at 40% | 50,000 |

## 12.33 Accountancy services benefit

Joint Forum on Expatriates Tax and NICs records a discussion on tax return preparation fee benefits:

> It was made it clear that these discussions and any proposals or guidance based on them will relate only to circumstances where:
> • due to tax equalisation arrangements, the employer pays for accountancy services relating to the preparation and submission of the individual assignees' Tax Returns
> • tax return preparation is part of a wider bundle of services provided by the adviser as negotiated with the employer
> • S9A enquiry services are not included as part of the bundle
> In such circumstances HMRC accept that the level of benefit in kind should be arrived at by apportionment based on the facts. The mechanics of how the apportionment should be calculated are an operational issue and CPTT had already shared with delegates (within the meeting notes of 30 August 2007) an exchange with Ernst & Young LLP on this topic. CPTT did not have authority to agree fixed round sum figures applicable in all cases. Indeed, it was clear from the evidence submitted that there is no 'one size fits all'. However, CPTT were prepared, in due course, to provide some clarity of the level at which they perceive there to be a risk worthy of enquiry.
> The intention therefore would be to:
> • establish a level of tax return preparation benefit which if returned or exceeded will not prompt any enquiry
> • continue to allow for different figures to be reported based on the available facts
> • highlight that where levels of tax return preparation benefits are reported below this level it remains open to HMRC/CPTT to enquire into the precise figures and apportionment methodology to check the accuracy of Returns submitted
> CPTT is still analysing the information provided but Martin Dwyer was able to say that the available evidence suggested that a level of around £600 per head would be reflective of a situation where a home and host country Return was completed.

HMRC remain of the view that any accountancy fees paid in respect of S9A enquiry work should be reported as benefits in kind. HMRC will continue to look for evidence of the payment of such fees and their position will be as clarified within the meeting notes of the Forum held on 30 August 2007, as follows:

> 'Where we find evidence to indicate that the costs of accountancy services related entirely to resolving the S9A enquiry, we will regard these costs as giving rise to a taxable benefit in kind. If your clients are unable to accept this treatment, we will need to refer an appropriate case to the Commissioners.'

Subsequent to the meeting HMRC has now completed its analysis of the information provided. From this we conclude that the levels of benefits which appear both realistic and reasonable are £650 per head where a home and host country Return is completed and £250 per head where only the host country (UK) Return is completed. Under existing circumstances these figures will represent levels which if returned or exceeded will not prompt an enquiry from CPTT. However, it has been recently highlighted by external representatives that the proposed levels of analysis necessary to support access to the remittance basis from 6 April 2008 is likely to lead to increases in the costs charged for UK Tax Return preparation where the remittance basis is claimed. If this proves to be the case there would be a need to recognise this and revise the figures for 2008-09 onwards accordingly.

HMRC reiterate that the sums quoted above are not intended to represent an agreed level of benefits which must be reported across the board. We recognise that there is unlikely to be consistency in the precise make up of the bundle of accountancy services provided across different cases and by the variety of advisers involved. Rather, the aim is to indicate a level at which CPTT perceive the level of risk to be worthy of enquiry.[44]

A subsequent meeting of the forum records:

**Q10:Accountancy fees in regard to partially tax-equalised employees**
It is not clear which partially tax-equalised cases are covered by the agreement announced in the 18 September 2008 forum notes. By 'partially tax-equalised' we mean when the employer agrees to tax-equalise part of the employee's income/gains but not the whole. This is very common, often employers will tax equalise only employment

44 Note of Meeting 18 September 2008, accessible *www.hmrc.gov.uk/consultations/expat-mins-180908.htm*

income and even then might exclude elements such as share options.
The notes mention 'due to tax equalisation arrangements, the employer pays for accountancy services' which perhaps suggests the precise nature of the equalisation arrangements is not in point. However, Appendix 6 of HMRC's Employment Procedures Manual – 'Modified PAYE' arrangements – says that those arrangements may be applied only to tax-equalised employees and, for that purpose, 'tax-equalised' means that:
' ... the employer must equalise liability to UK Income Tax on all general earnings (see note) subject to the rules in part 2 Chapters 4 and 5 ITEPA applying to employees resident, ordinarily resident or domiciled outside the UK.
Note: Where the employee is tax-equalised on all general earnings but not, for example, on taxable awards of securities options or the award of securities at undervalue (which is specific employment income) the employee may still be included within the arrangement as long as all the other conditions are satisfied'.
It would seem rather restrictive to take the same approach in relation to accountancy fees as an employee's tax equalisation computations can be just as (possibly more) complex if only part of the earnings are equalised.
**HMRC Answer:** It is the case that the guidance contained within the Forum meeting notes of 18 September 2008 was intended to relate to 'fully' tax equalised cases including those capable of inclusion within an EP Appendix 6 agreement.
Where partial tax equalisation applies it seems to me that the extent to which the accountancy advice directly benefits the individual rather than the employer must increase and I would expect this to be reflected within the level of benefits reported.
As in the case of tax equalised individuals, where HMRC wishes to check the amounts reported we will look at the amounts paid for the basket of services provided and seek to establish those parts of this basket which directly benefit the employer. It should then be possible to calculate a benefit in kind figure by reference to the balance on a per head basis.
...
HMRC were asked to give clarification regarding whether or not the levels of accountancy fees, clarified at the meeting held on 18 September 2008, could be applied in respect of the 2008-09 SA Tax Returns. Martin Dwyer confirmed that these amounts were intended to reflect levels below which HMRC perceive there to be a risk and above which it was unlikely that HMRC would make an enquiry into the matter of accountancy fees relating to Tax Return preparation. They were not intended to represent mandatory levels of benefits which should be included on Tax Returns as HMRC accept that there will be cases where

> the true level of benefit varies from the figures provided for guidance. Against this background, however, HMRC confirmed that the same guidance could be extended to apply to 2008-09 SA Returns. As was confirmed in the answer to Q10, however, that guidance was intended to relate to fully tax equalised cases, including those capable of inclusion within an EP Appendix 6 agreement. Whilst it was accepted that this would include cases where tax equalisation applied to all employment income other than share based remuneration, the guidance was not intended to apply to circumstances where partial tax equalisation arrangements are in place which can often apply to a small proportion of the overall compensation package.[45]

The figures have not been increased:

> 2.6 HMRC thanked the forum for supplying details of the current level of accountancy fees. Based on this information, HMRC would continue not to enquire into benefits in kind reported for fees for preparing tax returns of £650 for UK and home country returns and £250 per head for UK only returns. This would only apply for fully tax equalised employees and does not cover the cost of section 9A enquires which should be reported in full.
> 2.7 The level of fees would be reviewed again in 2013/14 and HMRC would be seeking views from the forum at the end of 2012.[46]

## 12.34 Double Taxation Relief

Article 15 OECD Model provides:

> 1. Subject to the provisions of Articles 16, 18 and 19, salaries, wages and other similar remuneration derived by a resident of a Contracting State in respect of an employment shall be taxable only in that State unless the employment is exercised in the other Contracting State. If the employment is so exercised, such remuneration as is derived therefrom may be taxed in that other State.

The DTR Manual provides:

---

45 Note of meeting 16 July 2009, accessible *www.hmrc.gov.uk/consultations/expat-mins-160709.htm*

46 Joint Expatriate Forum on Tax and NICs: 10 February 2011.

> **1920 Employment** [April 2007]
> The employment Article in our double taxation agreements is normally called the Dependent Personal Services Article. In most of the United Kingdom's agreements the Article is based on Article 15 (Dependent Personal Services) of the OECD Model Convention (see DT153) and the terms of this Model Article are summarised below. It must, however, always be checked that the Article in the particular agreement with which you are concerned follows the OECD Model Article before reliance is placed upon the guidance below.
> Paragraph (1) of the OECD Model Article sets out the general principle that salaries, wages and other similar remuneration may be taxed in the country where the employment giving rise to that remuneration is exercised.
> The words 'salaries, wages and other similar remuneration' should be understood in the broadest sense as covering all income from an employment, including benefits and share option gains chargeable under Section 135 ICTA 1988 (see DT1925).

In *Kljun v HMRC* [2011] UKFTT 371 (TC) the Judge said:

> [18] What does exercised mean? The English is clear and it is where the employee is physically present when performing the activities for which the employee is being paid.

This takes us to Art. 15(2) OECD Model:

> 2. Notwithstanding the provisions of paragraph 1, remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State shall be taxable only in the first-mentioned State if:
> a) the recipient is present in the other State for a period or periods not exceeding in the aggregate 183 days in any twelve month period commencing or ending in the fiscal year concerned, and
> b) the remuneration is paid by, or on behalf of, an employer who is not a resident of the other State, and
> c) the remuneration is not borne by a permanent establishment which the employer has in the other State.[47]

47 For completeness, article 15(3) continues: "3. Notwithstanding the preceding provisions of this Article, remuneration derived in respect of an employment exercised aboard a ship or aircraft operated in international traffic, or aboard a boat

The DTR Manual provides:

> It follows from the terms of Paragraph (1) that, in general, an individual can be taxed on the income arising from duties performed in the United Kingdom whether or not he is resident in the United Kingdom under our domestic law. Our double taxation agreements provide, however, that such income may, in certain circumstances, be exempted from United Kingdom tax.
> Paragraph (2) of the OECD Model Article provides that, notwithstanding paragraph (1), employment income may, if certain conditions are fulfilled, be exempt from tax in the country where the employment is exercised. Consequently it is this paragraph which forms the basis of most claims for exemption from United Kingdom tax under this Article. To qualify for exemption, the taxpayer has to demonstrate that he is a resident of the other country for the purposes of the agreement (see DT310) and three further conditions, explained at DT1921 - DT1923 below, must all be met.
> ...
> For years of assessment 1996-97 onwards, claims to exemption from UK tax in respect of employment income are made as part of the taxpayer's self assessment on the claim form attached, depending on the circumstances, to either Help Sheet IR302 (Dual-Residents) or Help Sheet IR304 (Non-Residents - Relief under Double Taxation Agreements). Both forms require the taxpayer to establish the fact of his residence in the other country for the purpose of the agreement (see DT310) and to declare that the relevant provisions of the particular agreement are considered to have been fulfilled. All claims under Article 15(2) should be checked carefully by reference to terms of the agreement and, where appropriate, to the guidance at DT1921 - DT1923, and enquiries raised in suitable cases. See also DT1924 about certain types of cases which must always be referred to Employment Income Technical, before a claim is accepted.
> ...

### 12.34.1 *Article 15(2)(a): limited days of presence*

The DTR Manual provides:

---

engaged in inland waterways transport, may be taxed in the Contracting State in which the place of effective management of the enterprise is situated."

**1921 Short term visitor exemption 183 day rule** [May 2009]
The first condition for exemption under Article 15(2) is that the employee must not be present in the United Kingdom for more than 183 days either 'in the tax year concerned' (as in Article 15(2)(a) of the 1980 United Kingdom/USA agreement) or 'in any period of 12 months' (found in Article 15(2)(a) of the 1985 United Kingdom/Norway agreement). It is important to distinguish between these formulae. The latter formula is a much tighter test than that used in the agreement with the USA.
For example, a US resident seconded to work in the United Kingdom for a two year assignment arrives here on 15 October 1990 and leaves the United Kingdom on 1 October 1992. Depending on all the circumstances, he could be taxable in the United Kingdom only for the year 1991-92. For the years 1990-91 and 1992-93 he could meet the condition in Article 15(2)(a) because in both periods he was not present in the United Kingdom for 183 days 'in the tax year concerned'.
By contrast, a Norwegian resident working in the United Kingdom would be taxable here throughout the period 15 October 1990 to 1 October 1992 under the test in the agreement with Norway.
Our agreements with Azerbaijan, Belgium, Bolivia, Denmark, Estonia, France, Ghana, Guyana, Iceland, Indonesia, Ivory Coast, Kazakhstan, Korea, Latvia, Malta, Mexico, Mongolia, Pakistan, Papua New Guinea, Sweden, Uganda, Ukraine, Uzbekistan, Venezuela and Vietnam also use the wording of the Norwegian agreement; and the agreement with New Zealand is similar. Most of the United Kingdom's agreements, however, use the tax/fiscal year formula.
Up until 5th April 2009, when counting to 183 days under Article 15(2)(a),a part day counts as a part day and days of arrival and departure and all other days spent inside the country of activity should be included in the calculation.
From 6th April 2009 onwards, when counting to 183 days under Article 15(2)(a), any part of a day, day of arrival, day of departure, and all other days spent in the UK such as Saturdays, Sundays, national holidays, holidays before during and after the period of work, short breaks (training, strikes, lock-out, delay in supplies), days of sickness (unless they prevent the individual from leaving and he would otherwise have qualified for the exemption) and death and sickness in the family should be included in the calculation as a day the person is present in the country of activity.
Days spent in the UK in transit in the course of a trip between two non-UK points should be excluded form the computation.
From 2008/09 onwards (this overlaps for a year with the previous day counting method), days during which the tax payer is a resident of the

UK should not be included in the calculation. The conditions in the treaty are for remuneration derived by a resident of a Contracting State in respect of an employment exercised in the other Contracting State and does not apply to a person who is resident and works in the same State. For example if a person is a resident of the UK but is hired by an employer in another State, moves to that State where he becomes resident and is subsequently sent to work for a short period in the UK by his employer, we would only include days in the UK after the taxpayer became a resident of the other State for the purposes of computing whether they had exceeded 183 days in the UK. Days in the UK when the taxpayer was a resident of the UK should not be included.

Similarly if a non-resident taxpayer is seconded to the UK for a short period by their employer and subsequently moves to and becomes a resident of the UK, days in the UK after they became a resident here should not be taken into account for the purposes of the calculation of the 183 days.

### 12.34.2 *Article 15(2)(b): payment by non-resident employer*

The DTR Manual provides:

**1922 Employment** [April 2007]

The second condition for exemption under Article 15(2) is that the remuneration which is the subject of the claim must be paid by, or on behalf of, an employer who is not United Kingdom resident.

The fact that an individual remains an employee of an overseas company does not on its own satisfy the test in Article 15(2)(b). Not only must the claimant remain an employee of the overseas company but the remuneration in respect of which the exemption is claimed must be paid by the overseas employer and not, for example, by a United Kingdom subsidiary company to whom the employee may have been seconded. Any statement on this aspect of a claim should be checked to ensure that it is consistent with

i) other information in the papers (for example what does the return show?) and
ii) the position in other similar cases involving the same United Kingdom employer.

If there is any doubt you should ask the agents to provide a statement from the United Kingdom company or the overseas employer, to confirm the extent to which, if at all, the overseas employer has continued to pay the claimant's remuneration either directly or by reimbursing the United Kingdom company.

Cases where remuneration continues to be 'paid by' the overseas employer, but there is a recharge of the cost of that remuneration to the United Kingdom company to whom the employee has been seconded, are frequently a cause of difficulty. The Inland Revenue has in the past accepted claims made in these circumstances on the footing that the remuneration continues to be 'paid by' the overseas employer even though it is a United Kingdom company which finally economically bears its cost.

This approach is not consistent with that adopted by a number of the United Kingdom's treaty partners, nor with guidance in the OECD Model Commentary. The June 1995 edition of Tax Bulletin announced that this approach would not be adopted in dealing with future claims. The following approach should be adopted.

When dealing with

- claims from employees who commence a work assignment in the United Kingdom after 1 July 1995 and
- all claims for 1996-97 onwards

claims should not be admitted where

- the employee remains formally employed by a company which is not resident in the United Kingdom and
- he is seconded to work for a United Kingdom resident company and
- the United Kingdom company for practical purposes functions as his employer during the United Kingdom assignment and
- the United Kingdom company bears the cost of the employee's remuneration, either by a direct recharge or as part of a management charge made by the non- resident employer.

Subject to fulfilment of the other conditions for relief and the guidance below concerning avoidance cases, claims for earlier periods should normally be accepted where the overseas employer pays the remuneration but this is subsequently recharged to a United Kingdom company.

*When does a United Kingdom company function as an employer?*

Guidance on the criteria for identifying the employer for the purposes of the Article is to be found in paragraph 8 of the Commentary on Article 15 of the OECD Model Double Taxation Convention which should be considered in cases of difficulty. In short, where an employee works in the business of a United Kingdom company and that company obtains the benefits and bears any risks in relation to the work undertaken by the employee then that company is treated as his employer.

The mere fact that the United Kingdom company has borne the cost of the employee's remuneration is not alone sufficient for that company to be treated as the employer. A United Kingdom company would not be regarded as the employer where the employee continued to work in the business of a non-resident company even though working at the premises of the United Kingdom company - for instance, an employee sent to the United Kingdom company to service equipment supplied by a non-resident company.

The following guidance may also be of assistance in practice. In the case of very short term secondees it is unlikely that an employee would be sufficiently integrated within the business of the United Kingdom company for that company to be regarded as his employer. For that reason it may be accepted that a United Kingdom company with whom an employee does not have a formal contract of employment should not be treated as the employer for the purposes of Article15 where that employee is in the United Kingdom for less than 60 days in a tax year and that period does not form part of a more substantial period when the taxpayer is present in the United Kingdom.

*Avoidance cases*

Even in the case of work assignments beginning before July 1995 claims should not be admitted where payment by an overseas company forms part of an arrangement to avoid United Kingdom tax. Employment Income Technical will advise in cases where, for example, the overseas employer is based in a tax haven or the employee is nominally employed by a company which exists to provide his services to the United Kingdom user of those services. Cases where an employment which existed prior to the employee's assignment to the United Kingdom continues during that assignment usually do not cause difficulty. Cases where the employee has taken up a new formal employment with an overseas company at the time of assignment should be reviewed critically.

*'On behalf of'*

Payments may be made 'on behalf of'a non-resident employer in cases where the payment is physically made by a United Kingdom company. It may be accepted that remuneration has been paid or benefits provided 'on behalf of' a non-resident employer if that non-resident ultimately bears the cost of such remuneration and benefits. Claims should not be admitted where a United Kingdom company pays remuneration or incurs the cost of benefits and does not receive reimbursement from the overseas employer. Such payments and costs are incurred in the interest of the United Kingdom company and not on behalf of the overseas employer.

Unless the claimant offers evidence that the United Kingdom company was reimbursed the cost of the taxpayer's remuneration and benefits by the non-resident employer (and this can be checked with the District dealing with the United Kingdom company's Corporation Tax affairs) a claim under Article 15(2) should be resisted.

> Where it is argued that remuneration has been paid 'on behalf of' an overseas employer, even though a United Kingdom company has paid the individual's remuneration and the overseas employer has not reimbursed the cost, it should be pointed out that it is unlikely that, in these circumstances, the cost of the remuneration could be regarded as wholly and exclusively incurred for the purposes of the United Kingdom company's trade and that, therefore, no deduction should be claimed for the cost of the remuneration in computing the United Kingdom company's taxable profit. Reference should be made to the tax case of Robinson v Scott Bader and Co Ltd (54TC757) which considers the inadmissibility of remuneration paid on behalf of another employer.
>
> The decision in the Scott Bader case makes clear that the object of the person making the payment is decisive in determining whether or not a deduction is permissible in accordance with Section 74 ICTA 1988.
>
> In relation to seconded employees there are three possible situations
>
> - the payment to the employee is made solely in the interests of the overseas company;
> - the payment is made partly in the interests of the United Kingdom company and partly in the interest of the overseas company or
> - the payment is made solely in the interests of the United Kingdom company.
>
> Only in the third case is a deduction available to the United Kingdom company in computing its profits.
>
> *Benefits*
>
> Even where basic remuneration continues to be paid by the overseas employer it is common for benefits (for example, the use of a flat) to be provided at the cost of the United Kingdom employer to whom the employee has been seconded. Subject to the other conditions in the Article, the basic remuneration may be exempt from United Kingdom tax but the condition in Article 15(2)(b) is not satisfied in relation to benefits in these circumstances because they are not 'remuneration paid by, or on behalf of,' the overseas employer (unless the cost of the benefits is borne by the overseas employer through a recharge).

*Kljun v HMRC* [2011] UKFTT 371 (TC) offers an illustration of a case within art 15(2)(b).

### 12.34.3 *Article 15(2)(c): PE in other state*

The DTR Manual provides:

**1923 Employment**

The third condition for exemption under Article 15(2) is that the remuneration of the employee must not be borne by a permanent establishment or fixed base which the employer has in the United Kingdom –see DT1710 onwards and DT219 for general guidance concerning the meaning of these terms.

This condition should be considered carefully in all cases where the employee has not apparently been assigned to work in the United Kingdom for a United Kingdom-resident company. If an employee has simply been seconded by his overseas employer to work here for a United Kingdom-resident company it will not usually be necessary to consider this condition.

A subsidiary company in the United Kingdom is not generally a permanent establishment of its overseas parent company (see DT1714). The subsidiary is not in law part of its parent company but is a distinct legal person. A permanent establishment is simply a part of an overseas company which is transplanted in the United Kingdom. Customers and employees all contract with the overseas company rather than with a separate legal person in the United Kingdom. Company letter-paper often indicates how the United Kingdom operations are organised; the registered number and place of registration of a United Kingdom company are often given at the head or foot of the paper.

If operations in the United Kingdom are carried out through a permanent establishment, it should be assumed in the absence of evidence to the contrary that the cost of remuneration of an employee seconded to the permanent establishment is a deduction in computing the profits of the permanent establishment. This will be the normal basis of allocating costs in accordance with international tax principles. The permanent establishment should therefore be regarded as bearing the cost of that individual's remuneration unless there is evidence that the overseas Head Office continues to pay the employee and the cost is not allocated to the United Kingdom permanent establishment for United Kingdom tax purposes. A permanent establishment cannot be said to 'bear the remuneration' unless it is charged against its profits without a corresponding credit, for example by way of a management charge. In doubtful cases advice may be sought from the Inspector dealing with the accounts of the permanent establishment.

Sometimes dealing with the PAYE District may be the first contact which an overseas company has with the United Kingdom Revenue and it may not yet have been established whether or not the company has a permanent establishment in the United Kingdom. If the company has had no prior contact with the Revenue the Corporation Tax District which would have responsibility for the company (the District dealing with the area where the business premises of the company are located) should be asked to advise whether or not a permanent establishment exists in the United Kingdom (see DT1715 in cases of difficulty).

**1924 Employment** [April 2007]

Refer to Employment Income Technical all claims to the exemption of employment income from United Kingdom tax (DT1920 onwards) where

- the tax at stake in that case exceeds £50,000, or
- the company claimed to be the employer is apparently based in a tax haven, or
- difficulty is experienced in applying the guidance at DT1920 onwards in a particular case.

As the instructions in DT410 explain, a claim to exemption under an agreement is a claim to the Board by virtue of Section 788(6) ICTA 1988 and a notice of decision on a claim may not be given by an Inspector. If you reach the point where you are unable to reach agreement with the taxpayer please send the case to Employment Income Technical.

*Kljun v HMRC* [2011] UKFTT 371 (TC) offers an illustration of a case within art 15(2)(c).

### 12.34.4 *The 60-day rule*

Tax Bulletin 68 provides:

**Non-Residents Working In The UK For Short Periods: The "60-Day" Rule**

Most of the United Kingdom’s double taxation agreements contain a provision which may enable an employee who comes to work here on a short-term basis to be taxed only in his or her home country. An employee must show that he or she fulfils a series of conditions specified in the agreement to make a valid claim to exemption from UK tax. One of those conditions will be that the employee’s remuneration must be ‘paid by or on behalf of an employer’ who is not resident in the United Kingdom .In many cases, it is clear that the employer is the non-resident company for whom the taxpayer was working before he or she came to the UK. In other cases, the employee may have been seconded by his or her overseas employer to work for a UK company, or the overseas employer may carry on a business of hiring out staff to other companies. A formal contract of employment remains with the overseas employer, but the employee works in the business of the UK company, which obtains the benefits and bears any risks in relation to the work undertaken by the employee. In economic terms, this state of affairs is recognised by the overseas employer recharging the cost of the employee’s earnings to the United Kingdom and the UK company might be described as the ‘economic employer’. In such a case, the exemption from UK tax for short-term visitors will not be available. This was explained in Tax Bulletin 17, published in June 1995.

However, the position of very short-term visitors caused concern, and Tax Bulletin 25 dealt with this in October 1996. This reproduced a statement by the Financial Secretary to the Treasury (FST) that the Inland Revenue would not consider that a short term business visitor was sufficiently integrated into the business of a UK company for it to be regarded as the employer where:

- the employee concerned is in the UK for less than 60 days in a tax year; and
- that period does not form part of a more substantial period when the taxpayer is present in the UK.

This has become known as the "60-day rule". This article gives further guidance on common situations where it may be an issue.

**Does the worker have to be from a country with which we have a full double tax agreement for the 60-day rule to apply?**

The 60-day rule is framed in terms of accepting without enquiry that the conditions in a DTA for short-term business visitors to be solely taxed in their country of residence have been satisfied. That exemption, and consequently the 60 day rule, is therefore only relevant if the person is resident in a country with which we have signed a comprehensive double tax agreement. If not, domestic legislation will apply in full.

**Is the 60-day exemption available if the employee is on the UK payroll?**

No. The FST's statement was made in the context of workers who were paid via a non-resident employer's payroll but whose economic employer might be in the UK.

**How do you count the days for the 60-day rule?**

It is based on physical presence in the UK in the same way as the 183 days are counted for the purposes of Article 15(2) of the OECD model Tax Convention.

**Is the 60 days a fixed limit? For example, an employer has a succession of people who work for him and he bears their wages, but they may be in the UK up to 90 days.**

The 60-day rule represents a balance between a loss of tax revenue which may be due to the UK and the compliance costs to both employers and the Revenue of ascertaining and collecting such tax for very short-term visitors. There are no plans for it to be altered. However individuals working in the UK may be exempt under the relevant DTA anyway, for example if their earnings are paid by an overseas company, not recharged in any form to a UK company or permanent establishment and no UK company acts as their employer.

**Is the 60-day rule available where the earnings have been recharged to a UK permanent establishment rather than a UK-resident company?**

Although not covered in the actual wording of the 1996 statement, the Revenue accepts the 60-day rule should apply in these circumstances also.

**How should the phrase "part of a more substantial period" be interpreted?**

The aim is to provide consistency:

- Between very short-term workers, regardless of the particular dates involved; and
- Between short-term workers seconded from overseas and the normal workforce of the UK employer.

The most obvious example met is where less than 60 days are worked up to 5th April and less than 60 days after, but the overall period is more than 60 days. In these circumstances, the 60-day exemption will not be available, to be consistent with periods of more than 60 days worked over, say, November to January.

What if there is a gap between two shorter periods of employment?

To consider whether the 60-day period has been exceeded, the following factors may be relevant:

- Is there an expectation that the employee will return to the UK when they depart initially?
- How long is the gap between visits in comparison to the length of those visits?
- How frequently does the employee return to the UK?
- How integral to the business are the duties performed?

It is impossible to give an exact formula that will cover all circumstances. However, the following examples should assist in seeing how the Revenue will approach this question.

**Example 1: Alain visits the UK for 35 days in Feb/March 2003, then returns to Austria for a fortnight's holiday, and returns again to the same contract for 40 days in April/May.**

The 75 days would be regarded as one period. The gap here is insignificant compared to the two periods either side and liability to UK tax would be consistent with a person who works for 75 days here continuously. As the periods are part of the same contract, the employer would be expected to operate PAYE from day one. If there had been no expectation of returning during the first 35 days we would expect PAYE to be operated only for the second period even though liability to UK tax would exist for both for Alain. This is because the 60 days is an objective test whilst PAYE is based on "reasonable expectation" that payments are liable to UK tax.

**Example 2: Beatrice visits the UK for 35 days in Year 1. She returns to Belgium but unexpectedly is asked to return in Year 2, after a 7 month gap, and does so for 40 days.**

Each episode in the UK would be regarded as separate periods of less than 60 days. Beatrice's return was unexpected, and after a relatively long gap. So there is no UK liability for either and no PAYE is due.

**Example 3: Cedric is the financial controller for a Canadian group. Each year he visits the UK subsidiary for 55-59 days.**

Once there is an expectation that this will be the work pattern, the Revenue would consider that the episodes of work here were part of a more substantial period. A financial controller will be significantly integrated into the business, whether this is of the UK subsidiary or possibly a permanent establishment of the parent company. PAYE will apply from when it is clear that visits will recur as part of a regular and integrated pattern, although Cedric may have to consider whether he is also liable under self assessment to UK tax for an earlier period of work, as for Alain in Example 1. Cedric and the group will then be able to decide the duration and timing of visits to the UK on business grounds rather than for individual tax considerations.

**Example 4: Danielle spends 50 days working in UK between 10 April and 15**

**January, with visits averaging 3 days each. Then from 1 June to 6 October a further 15 days are spent visiting UK for business meetings on the same piece of work.**

Although Danielle is taxable from the very start, we would not expect either her or the company to be able to recognise this. However, the Revenue would expect PAYE to be operated in Year 2.

HMRC say:

HMRC were asked to clarify the way in which the economic employer test applies in a number of scenarios in which employment costs are recharged to a UKemployer. In each scenario, an individual has a formal employment contract with a person resident outside the UK and is seconded to work in the UK.

The economic employer test is set out in the commentary to Article 15 of the OECD Model Tax Convention on Income and Capital which, subject to certain conditions, enables an overseas employee who comes to the UK to work on a short-term basis to be taxed only in his or her home country. HMRC confirmed that it is not practice to restrict this test for UK resident employers.

This means that, where an employee is present in the UK for less than 60 days and is not on the payroll of a UK resident employer, the 60-day rule set out in Tax Bulletin 68 will normally apply: the individual will not be considered to have an economic employer without any further consideration of the facts being necessary. In other situations, it will be necessary to examine the facts to determine who has the rights on the work produced and bearing the relative responsibility and risks. Where the employee is a resident in another contracting State and is seconded to the UK for a short period, the economic employer will not depend on whether the UK employer is entitled to a Corporation Tax deduction for the remuneration costs: the UK employer might be entitled to a deduction even where they are not the economic employer.

HMRC referred to the recent publication on 21 May 2010 by the OECD of proposed revisions to the Model Treaty Commentary on employment relationships for the purposes of Article 15.[48]

48 Joint Expatriate Forum on Tax and NICS: 26 May 2010 Meeting note *www.hmrc.gov.uk/consultations/260510-epf-minutes.pdf.*

CHAPTER THIRTEEN

# TRADING INCOME

## 13.1 Trading income- Introduction

A full discussion of the taxation of trading income would require many volumes. In this chapter I focus on matters closest to the themes of this book.

See too 39.11 (When is there a trade in financial assets?); 14.7 (Border between trading income and property income).

## 13.2 Charge on trading income

Section 5 ITTOIA provides:

> Income tax is charged on the profits of a trade, profession or vocation.

Section 5 applies to all trading[1] income, but s.6 ITTOIA distinguishes between trading income of residents and of non-residents; these need to be considered separately.

## 13.3 Trading income of UK resident

Section 6(1) ITTOIA provides:

> Profits of a trade arising to a UK resident are chargeable to tax under this Chapter wherever the trade is carried on.

---

1 In this chapter, reference to a "trade" includes a profession or vocation as there is no relevant distinction between them. Section 6(3) ITTOIA provides:
"This section applies to professions and vocations as it applies to trades."

Section 7 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the profits of the tax year. …
> (4) This section is subject to Part 8 (foreign income: special rules).

This brings in the remittance basis rules if the trading income arises from a source outside the UK. It is therefore necessary to identify the source. Section 7(5) ITTOIA states the test of source of trading income:

> And, for the purposes of section 830 (meaning of "relevant foreign income"), the profits of a trade, profession or vocation arise from a source outside the UK only if the trade, profession or vocation is carried on *wholly* outside the UK.

This is a statutory statement of the pre-ITTOIA case law.[2] It is a wide and strange test of source. Applying this test, if a trade is carried on partly in country A and partly in country B, the source of the income is in country A *and* country B. For the same income to have a source in two different countries is contrary to the natural meaning of "source" and contrary to the purpose of the concept which is to locate a source in one jurisdiction in order to identify one state with jurisdiction to tax. (Similarly an individual can have only one domicile.)

The explanation is that s.7(5) ITTOIA does not provide the natural meaning of "source"; it is an artificial or deeming definition. It is fortunate (but not surprising) that commonwealth countries which adopted a UK style income tax did not adopt this rule. Thus Commonwealth cases on the source of trading income are not relevant here.

If any part of the trade is carried on in the UK then the entire trade has a UK source and does not qualify for the remittance basis. There is not even a *de minimis* rule; contrast the incidental duties disregard which applies to employment income.[3]

The former ITH discussed the old case law, which still holds good under ITTOIA:

---

2 See John Avery Jones, "Taxing Foreign Income from Pitt to the Tax Law Rewrite – The Decline of the Remittance Basis", *Studies in the History of Tax Law* (Vol 1 2004) p.26 accessible *www.kessler.co.uk*.

3 See 12.13 (Where are duties performed: incidental duties).

**209. San Paulo case**
[The San Paulo Railway Company (*San Paulo (Brazilian) Railway Company v Carter* 3 TC 407)] ... was a UK incorporated company with its board meetings in London. The whole of its physical undertaking was in South America and while it accepted that it was resident here it argued that its business was carried on wholly abroad where its railway was. The Courts held that the head and brain of the trading venture was here and that the profits were those of a trade partly carried on here and that, accordingly, Case I applied. ...
**210. Trade partly in UK**
The principle underlying the San Paulo decision is that a trade carried on partly in the UK is within Case I. The factors which decide whether a company is resident in the UK by reason of central management and control are, as will be seen, similar to those which decide whether its trade should be within Case I or Case V and the result is that for many years in the corporate sector the only examples seen of Case V trades were those in which a company is a partner in an overseas trade. ...
**211. *Ogilvie v Kitton***
But other cases were to show how difficult it was going to be, except on very exceptional facts, to establish that any trade of a resident person was carried on wholly abroad. There was, for example, Mr Ogilvie in *Ogilvie v Kitton* (5 TC 338). He lived in Aberdeen and ran a shop in Canada. To say that he ran the shop really begs the question because he simply received reports from his manager in Canada and did not in fact intervene actively in the business at all, merely taking a tacit interest in things from the information in the reports. It was held that the head and brain of the trading venture was in Aberdeen and that the profits were assessable under Case 1.

In short, if a sole trader is UK resident it is in practice impossible to arrange that their trading income has a foreign source. Section 7(4)(5) ITTOIA is dead letter law. The former ITH recognised this at para 209:

> That decision [*San Paulo*] suited the Revenue very well. We no longer had to worry about remittances which after all, though very sensible for an extractive activity which had to send its produce home, did not apply well at all to the more modern industries which did not need to remit their profit and which indeed probably wanted to keep as much profit abroad as possible for the expansion of their business. And so we effectively got on to a statutory arising basis for trades which, in everyday language, were wholly overseas and we reached that position purely through the interpretation of the statute by the Courts. ...

For completeness: s.95 ITA restricts loss relief for trades carried on wholly outside the UK, but since it is almost impossible to arrange that, the section is dead letter law.

### 13.3.1 *Planning for UK resident sole trader*

If a remittance basis taxpayer carries on a trade partly in and partly out of the UK, the individual will be taxed on the arising basis and not under the remittance basis. In these circumstances the individual may be able to divide up their activities into two spheres – those in and those out of the UK. The individual will then be carrying on two separate activities, of which at least one will yield foreign source income and qualify for remittance basis treatment.

How is this division to be achieved? Overseas activities could be carried on by a partnership controlled abroad. The offshore partner may be a company. This was the route successfully adopted by Sir David Frost: see *Newstead v Frost* 53 TC 525. Alternatively the activities could be carried on by a company or trust. In this way foreign trading income may be converted into foreign employment or dividend income which would enjoy a more beneficial tax treatment

## 13.4 To whom does trading income arise?

Since different rules apply depending on whether trading income arises to a UK or non-UK resident, it is necessary to identify the person to whom the income arises.

Suppose a non-resident trust is carrying on a trade. If the trading income accrues to the trustees, they are taxed in accordance with the rules relating to *non*-residents, discussed below, so the trustees would only be subject to UK income tax if the trade was carried on partly in the UK, and then only on the profits (if any) attributable to that part.

However if the life tenant of a transparent (*Baker*-style) trust was resident in the UK, then the profits of the trade arise to a UK resident, and the life tenant is taxed in accordance with the rules relating to UK residents: ie on an arising basis unless the strict condition is satisfied that the trade is carried on wholly outside the UK.[4]

Suppose a non-resident settlor-interested trust with a settlor who is a remittance basis taxpayer. One might think that the settlor would be taxable on an arising basis only on the part (if any) of the trading income

4 This may need to be reviewed when *R on the application of Huitson v HMRC* [2010] EWHC 97 (Admin) is final, because of the somewhat novel dicta of that case, but I do not anticipate any changes are likely.

attributable to carrying on the trade in the UK. The balance of the profits one might think taxable only (if at all) under the s.624 remittance basis. But this is not the case. Since the trust income is deemed to be that of the UK resident settlor, the settlor is taxed in accordance with the rules relating to UK residents: ie theirs are taxed on an arising basis unless the strict condition is satisfied that the trade is carried on wholly outside the UK.

What if the trade is carried on by a non-resident company within s.720 ITA? The transferor is treated as receiving income which in the HMRC view is not trading income. However, the s.720 remittance basis applies only to income which would be RFI if it were the individual's.[5] So for the purpose of the s.720 remittance basis one must apply the rules relating to UK residents: ie the transferor is taxed on an arising basis unless the strict condition is satisfied that the trade is carried on wholly outside the UK.

In practice there will often be some UK element which would be sufficient to make the entire trade taxable.

## 13.5 Trading income of non-resident

An entirely different rule applies to trading income arising to a *non*-resident person. Section 6(2) ITTOIA provides:

> Profits of a trade arising to a non-UK resident are chargeable to tax under this Chapter only if they arise—
> (a) from a trade carried on wholly in the UK, or
> (b) in the case of a trade carried on partly in the UK and partly elsewhere, from the part of the trade carried on in the UK.

The pre-ITTOIA wording imposed a charge on non-residents on income arising:

> from any trade, profession or vocation exercised within the UK.[6]

The meaning was the same so pre-ITTOIA case law is still relevant.

5 See 26.14 (Section 720 remittance basis).

6 Section 18 ICTA 1988 (repealed). It was accepted (though not stated in statute) that where a trade was exercised partly in the UK, income was apportioned and only the UK part was taxable.

Section 6(2) raises two issues: (1) When is a trade carried on wholly or partly in the UK? and (2) If a trade is carried on partly in the UK, how does one identify the profits from that part?

This is sometimes paraphrased by asking the question whether (or to what extent) the source of the trading income is in the UK. There seems nothing wrong with that; it is the correct and natural meaning of the word "source". Since s.7(5) ITTOIA uses the word "source" in an artificial sense in the rules relating to trading income UK residents, I have wondered whether it would aid clarity to avoid the word "source" in the context of the rules for non-residents. But in practice it is not possible to avoid the use of the word "source" here[7] so one simply needs to remember that source has two distinct meanings.

The UK case law is mostly antique, because in practice double taxation treaties often apply and then the issues may not arise. But of course that is not always the case. The former ITH is erudite and still helpful.[8] There are two other sources of guidance: cases on foreign tax credit and non UK tax cases. I should comment briefly on these.

### 13.5.1 *Foreign tax credit cases*

Section 9 TIOPA provides foreign tax credit relief where the foreign tax is:

> calculated by reference to income arising ... in the territory.[9]

Thus for the purposes of foreign tax credit it is similarly necessary to identify the locality of the source. The issue arose in *Yates v GCA International*[10] where *Smidth* principles (ie the rules for trading income of non-residents) were applied. The former ITH para 827 provided:

> The *Gaffney Cline* case [*Yates v GCA International Ltd* 64 TC 37], ... The point there was what part, if any, of the income from services arose in Venezuela when the contract was made in Venezuela but the services were performed partly in Venezuela but mainly in the UK. That is not necessarily the same as asking whether the trade was exercised in only one or in both of the countries – that was

---

7 Since relevant case law and foreign statutes regularly use the word "source".

8 Tax Bulletin 18 provides a brief summary, not set out here.

9 See 50.5 (Foreign tax credit relief).

10 64 TC 37.

made clear in the judgement. But the judge looked for guidance to the criterion of Atkin LJ in the *Smidth* case 'where do the operations take place from which the profits in substance arise' when deciding that the income arose partly in Venezuela and partly in the UK.

### 13.5.2 *Non-UK tax cases*

There are many Commonwealth cases, including some modern cases, which ought to be helpful. However, the Commonwealth legislation is differently worded. It is necessary to consider whether the test is the same, ie whether the Commonwealth cases have any relevance in the UK (and vice versa).

The Southern Rhodesia statute imposes a charge on the amount:

> received by ... any person ... *from any source within the Territory* ...

In *Rhodesia Metals v CT*, the Privy Council said of this provision:

> ... numerous cases founded on the various Income Tax Acts, English, Australian, New Zealand and South African, were cited ...
> Their Lordships have no criticisms to make of any of those decisions, but they desire to point out that
> [1] decisions on the words of one statute are seldom of value in deciding on different words in another statute, and that
> [2] different business operations may give rise to different taxing results.

Point [2] is obviously correct but we are here concerned with point [1]. The Privy Council continue:

> [3] If the charging words of the English statute are looked at,
>> "annual profits or gains arising to any person ... (ii.) residing in the UK from any trade wherever carried on, and (iii.) whether resident in the UK from any trade exercised within the UK";[11]
>
> they are obviously different from the Southern Rhodesian charging words,
>> total amount [other than capital] received by ... any person ... from any source within the Territory.

11 I have corrected a slight misprint in the law report. This is only a rough summary of the statutory wording, later s.18 ICTA, now rewritten in ITTOIA.

> [4] It is desirable, also, to point out that, at any rate for different taxing systems, income can quite plainly be derived from more than one source even where the source is business. For instance, in the case of the business of a railway company whose railway is situate abroad, as in *San Paulo (Brazilian) Railway Co. v Carter*,[12] while the English company may be assessed in England on the whole of its profits because it carries on part of its business there, yet it could not be doubted that so much of the profits of the business as were in fact earned from running the railway in Brazil were derived from exercising a business in Brazil; and still less could it be doubted that the sums received by the company in Brazil were received from a source in Brazil.[13]

Lord Atkin correctly states at [4] that the Commonwealth legalisation and case law has no relevance to the (artificially wide) test of location of source of trading income for UK residents.[14] It is considered that the Commonwealth legislation does apply the same test as s.6(2) ITTOIA (trading income of non-resident). For this purpose the Commonwealth cases *are* persuasive authorities in the UK. For the object of the rules for non-residents is to avoid double taxation and ensure that income is taxed in one and only one jurisdiction. That object can only be achieved if there is an international "common law" on the subject. In practice this is the view taken. For instance, the former ITH referred to *Kirk*.

The same applies to Hong Kong, where the charge is on profits "arising in or derived from Hong Kong".[15] *Smidth* is the basis of the Hong Kong case law.[16] The Hong Kong Revenue have issued useful guidance **"the Hong Kong guidance note"**. It is suggested that its status in an English court should be the same as that of a respected textbook. The Hong Kong guidance note provides:

> 4. Though the word "source" is not used in section 14, it has always been accepted by the courts that the words "arising in or derived from" raised the concept of source. Cases from other common law jurisdictions with

12 3 TC 407.
13 [1940] AC 774 at p.788–9.
14 See 13.3 (Trading income of UK resident).
15 Section 14 Hong Kong Inland Revenue Ordinance.
16 *IRC v HK-TVB* [1992] STC 723 at p.728.

> legislation using the specific word "source" are therefore relevant and have been used in assisting the interpretation of the words used in section 14. In *IRC v. Philips Gloeilampenfabrieken* [1955] NZLR 868, Barrowclough CJ at 874 said that the concept of derivation seems necessarily to imply the concept of a source.[17]

In an Indian statute, the charge was on profits "accruing or arising in British India". This was held to be substantially the same as in Hong Kong.[18]

Unfortunately the Commonwealth cases are remarkably inconsistent.[19]

## 13.6 Place where contract made

The former ITH provided:

> **813. *Erichsen v Last***
> Another very early case was *Erichsen v Last* [4 TC 422] which was heard in the Court of Appeal in 1881. It is a highly important case and, curiously, was not published in Tax Cases until some twenty years after the decision. It is perhaps a pity that *Erichsen v Last* was concerned with a very special sort of trade – the relaying of telegraph messages. The application of the ideas which emerge from *Erichsen v Last* to other trades is, because of its special facts, rather difficult.
> The facts are simple enough. Erichsen was the UK representative of the Great Northern Telegraph Company of Copenhagen. The company was not resident here but it had three cables running across the North Sea to bases in Scotland and it had a staff of operators here. Messages were collected through an arrangement with the Postmaster General. The Post Office collected the money and deducted its agreed remuneration before handing over the messages to the company's operators here. The company's own staff then transmitted the messages across the North Sea. Thereafter, depending on their destination, they passed through cables owned by the Danish and Russian governments to their destinations which might have been as far off as Japan. The company made a weak sort of claim that it was not trading here but it went on to say that if it was, it ought to be taxed only on the profit arising from the relaying of the messages along the main cable

17 Inland Revenue Department Hong Kong, Departmental Interpretation and Practice Notes No. 21 (Revised) Locality of Profits December 2009, accessible *www.ird.gov.hk/eng/pdf/e_dipn21.pdf*.

18 *IRC v Hang Seng Bank* [1990] STC at p.739 though "it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases".

19 See Michael Littlewood's scholarly article "The Privy Council, the Source of Income and *Stare Decisis*" [2004] BTR 121 and Robert Venables QC, "The Territorial Source of Income" OTPR, Vol 7, p.177.

to Denmark. It was making the point that some of the profit arose from the transmission along other cables which had absolutely nothing to do with the UK. The first thing the judgments in the Court of Appeal make clear is that the matter is wholly one of fact. The judgments then separate two questions for decision. First, is there trading in the UK? Brett LJ says this on page 425. His words are important because it is here that the significance of contract – place of contract – begins.

> "Now, I think it would be first of all nearly impossible and second wholly unwise to attempt to give an exhaustive definition of when a trade can be said to be exercised in this country. The only thing that we have to decide is whether upon the facts of this case it can be said that this company is carrying on a profit earning trade in this country. Now I should say that wherever profitable contracts are habitually made in England by or for a foreigner with persons in England, because those persons are in England, to do something for or supply something to those persons, such foreigners are exercising a profitable trade in England, although everything done by or supplied by them in order to fulfil their part of the contract is done abroad. The profit arises to them from the contract which they make. The profit which they derive can only be derived from the payment which is to be made to them by the person with whom they contract. In the given case they would not have any such contract as they are in the habit of making unless it was a contract made in England with a person who is in England because he is in England. Observe, if the person or someone acting for him were not in England he would not be wanting to send a telegraph message from England".

The language is now over 100 years old and while it may perhaps look a little old fashioned today its meaning seems plain. The Court was saying: "You, the customer, are in England and because you are here you want goods here (or in the case in point, you want a message sent from here). The profit comes from the contract, the contract is here and there is trading in England and it is nonetheless trading in England even though the goods come from abroad or the service is provided through electric cables which are partly abroad". ...

**815. First champagne cases**

*Erichsen v Last* was followed by the so-called champagne cases. There were three leading champagne cases. In the first two, the Revenue succeeded in a claim that the French champagne houses concerned were trading in the UK through agents in London. In the Pommery case [*Pommery and Greno v Apthorpe* 2 TC 182] there was no express finding as to where contracts were made but most orders were met from stock held in the UK. In the Werle case [*Werle v Colquhoun* 2 TC 402] the Court of Appeal made it clear that they considered the contracts to be made by the agents here on behalf of their principal.

These two houses were producers of champagne as well as sellers of champagne and it is reasonably clear that the Revenue did not claim to tax the producer's profit. In the Pommery case at page 189, the Judge specifically referred to the difficulty of calculating the profit; he said that there might be some difficulty as to the manner of calculation in deciding what amount of expenditure to put against the profits and wondered whether it would be proper to look at the goods sent over to England and to put a fair valuation upon them as they arrived. That he said was a matter of quantum, a matter for the consideration of persons skilled in such things.

In the Werle case on page 413 Fry LJ had a similar approach, he said

> "A small shopkeeper... is plainly carrying on a trade in the place where the shop is ... The question, however, becomes more difficult when the trade is carried on, as in the present case, in a far more complicated manner ... when the contract may be in one place, the goods in another, the principal in another and the goods may be delivered in some other place. We have, however, simply to do this, to take all the relevant facts and the mode in which the business is carried on, and to ask ourselves whether that business be or be not carried on within the UK. It appears to me that the same business may in some sense be carried on in many places. The Head Office of a firm, the place where the goods are manufactured, the place where the contracts are made, may all of them be places in which the business or parts of the business is or are carried on. Now, in the present case what we find is this, that the appellants reside in France, carrying on there the business of vineyard proprietors, champagne makers and champagne merchants, no doubt a large portion of that business is carried on within France, but a portion of that business is that of champagne merchants. Now, that means, as I understand, the selling of champagne and that business they carry into effect in England through the intervention of a firm of agents in this country."

**816. Contracts abroad**

The last of the champagne cases is *Grainger v Gough* [3 TC 311 and 462] and it is a very significant case. The Court of Appeal made no distinction between this and the earlier cases and found that the champagne house was liable on its trading here. ...

But Lord Esher and his fellow judges were overruled by the House of Lords on the question of whether there was liability at all. That was on the basis that in this particular case, contracts were not made in the UK. Although to the customer there may have been little difference between buying through the agents in the first two cases and buying through the agents in the third, there was a difference in the arrangements which the House of Lords saw as vital in determining the non-resident's liability to UK tax. In finding that the contracts were not made in the UK the House of Lords drew the now classic distinction between trading in the UK which involves liability and trading with the UK which does not. Non-residents with customers here commonly rely on this distinction.

The House of Lords may well have had it in mind that if we sought too strenuously to tax foreigners who sold goods here, we might be faced with hostility by countries to which we were exporters and which might seek to tax those exporters in parallel circumstances. The thought is not directly expressed but there is a hint of it at the end of Lord Herschell's judgment on page 468.

## 13.7 Rejection of place of contract test

The former ITH provided:

> **817. Place of contract not decisive**
> There are later judgments and very important judgments which tend to water down a little the great emphasis on place of contract. Lord Atkin speaking in the Smidth case [*Smidth & Co v Greenwood* 8 TC 193] in 1921 said this
>
> > "It (the place of contract) is obviously a very important element in the enquiry and if it is the only element the assessments are clearly bad. The contracts in this case were made abroad. But I am not prepared to hold that this test is decisive. I can imagine cases where a contract of resale is made abroad, and yet the manufacture of the goods, some negotiation of the terms, and complete execution of the contract take place here under such circumstances that the trade was in truth exercised here. I think that the question is, where do the operations take place from which the profits in substance arise?"

This is sometimes called "the operations test". It is not in fact a "test" as such, because further guidance is needed to identify where the profits in substance arise. It is however a rejection of the place of contract test. The former ITH gave one further quote to drive the point home:

> In one of the few fairly modern[20] cases on this subject, the Firestone case [*Firestone Tyre & Rubber Ltd v Lewellin* 37 TC 111 at p.142] in 1957, Lord Radcliffe said this
>
> > "But he (Counsel for the Appellants) rightly reminded us that more than once the place where the contract is made has been spoken of as the 'crucial' test or, again, as the 'most vital' element. Speaking for myself, I do not find great assistance in the use of a descriptive adjective such as 'crucial' in this connection. It cannot be intended to mean that the place of contract is itself conclusive. That would be to re-write the words of the Taxing Act, and could only be justified if there was nothing more in trading than the act of sale itself. There is of course much more. But if 'crucial' does not mean as much as this, it cannot mean more than that the law requires that great importance should be attached to the circumstance of the place of sale. It follows, then, that the place of sale will not be the

20 I guess that this passage in the former ITH was written in the 1980s.

determining factor if there are other circumstances present that outweigh its importance or unless there are no other circumstances that can."

This approach is adopted in the Privy Council. The Hong Kong guidance note provides:

> 7. Lord Bridge explained the "broad guiding principle" in *Hang Seng Bank* at 322H to 323A in the following terms: "But the question whether the gross profit resulting from a particular transaction arose in or derived from one place or another is always in the last analysis a question of fact depending on the nature of the transaction. It is impossible to lay down precise rules of law by which the answer to that question is to be determined. The broad guiding principle, attested by many authorities, is that one looks to see what the taxpayer has done to earn the profit in question."
> 8. The "operations test" was further elaborated by Lord Jauncey in *HKTVBI* at 407C-D:
>
> > "*F. L. Smidth & Co. v. Greenwood* [1921] 3 K.B. 583 was cited in Hang Seng Bank case and their Lordships do not doubt that Lord Bridge has in mind the judgment of Atkin L. J. in that case and in particular the passage when he said, at p. 593: 'I think that the question is, where do the operations take place from which the profits in substance arise?' Thus Lord Bridge's guiding principle could properly be expanded to read 'one looks to see what the taxpayer has done to earn the profit in question and where he has done it.'"[21] ...
>
> 21. When Lord Bridge said in *Hang Seng Bank* that profits from buying and reselling of commodities were derived from the place where "the contracts of purchase and sale were effected", he could not merely mean legally executed (as this would depend on formal legal rules of offer and acceptance). The Department agrees with the approach in *Magna* and will contemplate all the relevant operations carried out to earn the profits, including the solicitation of orders, negotiation, conclusion, trade financing, shipment and performance of the contracts.
> 22. The Department does not merely look at the place of contract to determine the geographical source of profits. Where the contract is made by exchange of letters, by fax, or by e-mail, the application of contract

21 Similarly Lord Jauncey in *HK-TVBI* at 409D-E:
"The proper approach is to ascertain what were the operations which produced the relevant profits and where those operations took place."

law and of private international law as to where the contract is made may result in conclusions that are entirely fortuitous. In *Firestone Tyre and Rubber Co Ltd v. Lewellin* [1957] 1 WLR 464 (HL) at 471, Lord Radcliffe said such an approach under the conditions of international business and modern facilities of communication was capable of proving a somewhat ingenuous one. Hunter J shared the same view in *Sinolink Overseas Ltd v. CIR* 2 HKTC 126 at 131.[22]

## 13.8 Where profits in substance arise

So we turn to the question of where profits in substance arise. The short answer is that there is no short answer. The former ITH provided:

> **820. NRs: profits in substance**
> It is consistent with the words of Brett LJ at the start of the quotation in ITH813 to say that no neat formula to decide what is, and what is not, trading in the UK can be devised. ...

Circumstances vary so widely that it is not possible to devise a single test that fits all cases.[23] The Hong Kong guidance note provides:

> 11. The broad guiding principle has been followed in subsequent cases before the Court of Final Appeal. In *Kwong Mile*, Bokhary PJ summarised the broad guiding principle at 174I to 175E:
>
> > "The ascertainment of the source of a profit is not hindered by technical rules, but is helped by the broad guiding principle that one looks to see what the taxpayer has done to earn the profit and where he has done it. ... In *CIR v. Orion Caribbean Ltd* [1997] HKLRD 5 924, Lord Nolan emphasised (at p.931F) that '[n]o simple, single, legal test can be employed' when ascertaining the source of a profit. ... The situations in which the source of a profit has to be ascertained are too many and varied for a universal judge-made test. Apart from the words of the statute themselves, the only constant is the need to grasp the reality of each case, focusing on effective causes without being distracted by antecedent or incidental matters."[24]

---

22 *IRC v Hang Seng Bank* [1990] STC at p.739 though "it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases".

23 "No simple legal test can be employed"; see *IRC v Orion Carribean.*

24 *IRC v Hang Seng Bank* [1990] STC at p.739 though "it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases".

It is not, of course, an answer to say that the question is just a question of fact. The comments made at 17.2.10 (Unsatisfactory approaches) apply here too.

## 13.9 Trading in UK: preparatory and auxiliary activities

The former ITH Manual para 849 provided that activities within OECD Model Convention para 5(4) do not amount to trading in the UK. Para 5(4) provides:

> Notwithstanding the preceding provisions of this Article, the term "permanent establishment" shall be deemed not to include:
> a) the use of facilities solely for the purpose of storage, display or delivery of goods or merchandise belonging to the enterprise;
> b) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of storage, display or delivery;
> c) the maintenance of a stock of goods or merchandise belonging to the enterprise solely for the purpose of processing by another enterprise;
> d) the maintenance of a fixed place of business solely for the purpose of purchasing goods or merchandise or of collecting information, for the enterprise;[25]
> e) the maintenance of a fixed place of business solely for the purpose of carrying on, for the enterprise, any other activity of a preparatory or auxiliary character;
> f) the maintenance of a fixed place of business solely for any combination of activities mentioned in subparas a) to e), provided that the overall activity of the fixed place of business resulting from this combination is of a preparatory or auxiliary character.[26]

The Hong Kong guidance note provides:

> ANTECEDENT OR INCIDENTAL ACTIVITIES
> 14. In *ING Baring* at 428, Ribeiro PJ when discussing the legal principle also emphasised the need to grasp the reality of each case, focusing on effective causes without being distracted by antecedent or incidental matters. The focus is on establishing the geographical location of the taxpayer's profit-producing transactions as distinct from activities

25 See 13.10 (Buying from UK sellers).

26 For similar discussion, see 74.7 (PE: preparatory and auxiliary activities).

antecedent or incidental to those transactions.
15. Whether an act is an antecedent or incidental activity is a question of fact and would depend on the nature of the transaction. In *CIR v. The Hong Kong & Whampoa Dock Co Ltd* [1960] 1 HKTC 85, the initial business contact in Hong Kong which set in motion a chain of operations that ultimately led to the salvaging of the vessel was rejected as the relevant operation.
16. Comments in a similar vein can be found in *Hang Seng Bank* at 320F-G:

> "The activities of the bank from which the income arose was the buying and selling of this property in overseas market places and not the decision making process in Hong Kong or any other activities in Hong Kong. Likewise the income arose from the trading in property situate outside of Hong Kong and not the moneys of customers situate in Hong Kong."[27]

## 13.10 Buying from UK sellers

The former ITH provided:

> **812. Purchasing is not trading in**
> The mere buying of goods here does not amount to trading here. That was decided in the very first case in these matters, *Sulley v AG* [2 TC 149], in 1860. A New York firm purchased goods in England for sale in America. It had an office here where the English resident partner saw to the purchasing and shipping of the goods. The Court of Exchequer (a Court of Appeal) found that "The profits of the firm in America do not accrue in respect of any trade carried on in this country, but in respect of the trade carried on in New York, where the main business is conducted".

Maintaining a purchasing office is also included in the list of auxiliary activities which do not amount to trading in the UK.[28]

The Hong Kong guidance note provides:

---

27 *IRC v Hang Seng Bank* [1990] STC at p.739 though "it may be that there is some marginal difference in the shades of meaning conveyed by the two phrases".

28 Model convention para 5(4)(d); see 13.9 (Trading in UK: preparatory and auxiliary activities).

BUYING OFFICE
29. A trading company, carrying on business outside Hong Kong, may set up a branch in Hong Kong to act as a buying office for the purpose of purchasing goods or merchandise or of collecting information. The activities of the branch are confined to the purchase of goods or merchandise or of collecting information in Hong Kong and it is not involved in their sale, either in Hong Kong or elsewhere. In such a situation, a liability to Hong Kong profits tax would not arise. The functions of a buying office may also be carried out by a subsidiary company or by an agent (either related or unrelated). However, as for a branch, the subsidiary company or agent must not be involved in the sale of the goods. On the other hand, any commission or other remuneration earned by the subsidiary company or agent for performing its services in Hong Kong will be fully taxable.

## 13.11 Buying and selling to UK purchasers

The former ITH para 820 provided:

But we do attach much importance to Lord Atkin's approach to the question of "trading in" in the *Smidth v Greenwood* case quoted in ITH817 above – "where do the operations take place from which the profits in substance arise".
We have come to adopt this test as the principal criterion for determining whether there is "trading in". But it should be borne in mind that the Smidth company was found not to be trading in the UK. Although it had an agent in the UK to advise prospective purchasers and assist with the installation of machinery, the profits in substance arose from the sale of that machinery under contracts made abroad. ...
**821. Merchanting: Place of sale**
The decision in the *Smidth* case supports the conclusion that in the case of merchanting business (buying and selling goods for profit), the trade is normally exercised at the place where the contracts for sale are made – that is where the operations take place from which the profits in substance arise.
It may help, in considering why that should be the relevant place, to put the decided cases aside and to ask what sort of facts could possibly be significant in leading to an answer to the question of whether there is trading in the UK. Where merchanting is concerned – buying and selling – there will often be a central office where questions of policy are considered and finance is arranged. There is the buying of the goods and perhaps the holding of a stock of goods. Then there is the search for customers and there is the actual contract for sale. That contract may be at a price laid down in a distant Head Office or it may be for a price negotiated with some skill on the spot. Finally there is delivery involving the question where does the lawful property in the goods pass from seller to buyer.
Few if any of the elements described above necessarily call for a presence in this

country and the functions involved can be located where the trader wishes. Most countries take the same view as we do about buying. The Court in *Sulley's* case simply said "It would be most impolitic thus to tax those who come here as customers." The place of sale, as identified by the place of contract for sale, is a reasonable means of determining the location of trading; trading profit becomes measurable only when there is a sale and without a sale there can be no profit.

**822. Place of sale unreliable**

But the place of sale, like other elements, can be moved. Even where the trade is that of buying and selling some qualification is needed to the assertion that there is trading in the UK if the contracts for sale are made here. It is generally taken for granted that it must be so if the sales are to people who are here. But, as is apparent from ITH830–ITH834 below which look at the place of contract, just when and where a contract is concluded can depend on fine distinctions and may even be a matter of chance. If, for example, a non-resident advertises goods for sale in a newspaper here and the customer responds by a telephone call to the non-resident during which agreement is reached or there is an exchange of telexes, the contract may technically be made in the UK even though the non-resident does very little here at all. We do not know what view the Courts would take of that though they have certainly not ruled out the possibility that while there may be contracts here there may nevertheless be no trading here [See *Belfour v Mace* 13 TC 558].

There may be similar doubt when sales are to people who are not resident here. The problem can be illustrated by a simple example. A New York art dealer has a picture which a Frenchman is interested in. The American and the Frenchman happen to meet in London which both are visiting for a few days holiday. In their hotel they agree on a price for the picture and conclude the deal. The contract is made here. Is the American trading in the UK? The matter is considered further on in chapter 9 (ITH947).

One may devise improbable examples of this kind without doing more than to highlight the difficulties which absolute reliance on the place of contract as a test would involve. Other cases of difficulty are those where there is reason to believe that, although contracts are formally made abroad, everything is really done here short of signing a piece of paper. In such cases we would say that there is trading here. The problem in such a case is largely one of proof. See, for example, the comments in chapters 9 (ITH914) and 10 (ITH1017).

The Hong Kong guidance note provides:

18. In *CIR v. Magna Industrial Co Ltd* [1997] HKLRD 171 at 178, Litton VP recognised that in case of a trading profit the purchase and the sale were the important factors. He further included in his deliberation all of the relevant operations and not just the purchase and sale of the products. When applying the operations test, Litton VP said at 176G:

> "In other words, one looks to see what the taxpayer has done to earn the profits and where he has done it. Obviously the question where the goods

were bought and sold is important. But there are other questions: For example: How were the goods procured and stored? How were the sales solicited? How were the orders processed? How were the goods shipped? How was the financing arranged? How was payment effected?”

19. The obtaining of the buyer’s order in Hong Kong and the placing of the order with the seller from Hong Kong are the foundations of a trading transaction since the differential between the selling price and the buying price (i.e. the mark-up) generates the profit. In *Exxon Chemical International Supply SA v. CIR* 3 HKTC 57, having decided that the obtaining of the order from the buyer and the placing of the order with the seller, took place respectively in and from Hong Kong, Godfrey J concluded that the profit arose in or was derived from Hong Kong.

20. In *CIR v. Euro Tech (Far East) Limited* 4 HKTC 30, Barnett J doubted that there should be some particular level or threshold of activity on the part of the taxpayer in Hong Kong, such as by bringing the products into Hong Kong and re-exporting them. He observed that in many trading companies the taxpayer was doing no more than bringing together the complementary needs of sellers and buyers. He said if the bringing together was done in Hong Kong the trading profit was sourced in Hong Kong....

23. On the basis of the various court judgments discussed in paragraphs 18 to 22 above, the Department’s views which are reflected in its assessing practice on the locality of profits derived from trading in commodities or goods by a business carried on in Hong Kong can be summarised as follows:

(a) Where both the contract of purchase and contract of sale are effected in Hong Kong, the profits are fully taxable.

(b) Where both the contract of purchase and contract of sale are effected outside Hong Kong, no part of the profits are taxable.

(c) Where either the contract of purchase or contract of sale is effected in Hong Kong, the initial presumption will be that the profits are fully taxable. Matters, such as those mentioned in paragraph 18 above, will be examined to determine the issue.

(d) Where the sale is made to a Hong Kong customer (including the Hong Kong buying office of an overseas customer), the sale contract will usually be taken as having been effected in Hong Kong.

(e) Where the commodities or goods are purchased from either a Hong Kong supplier or manufacturer, the purchase contract will usually be taken as having been effected in Hong Kong.

(f) Where the effecting of the purchase and sale contracts does not require travel outside Hong Kong but is carried out in Hong Kong by telephone, fax, etc., the contracts will be considered as having been effected in Hong Kong.

(g) The purchase and sale contracts are important factors but all the relevant operations that produce the trading profits must be looked at to determine the locality of the profits. Persons who are merely trading with Hong Kong by either selling goods to customers in Hong Kong or buying goods from suppliers in Hong Kong will not fall within the ambit of this paragraph. Nor will this paragraph applies to a buying office referred to in paragraph 29 below.

24. Having regard to the points expressed above, it will be apparent that, in the Department’s view, the question of apportionment does not arise in relation to

trading profits. Trading profits will be either wholly taxable or wholly non-taxable. There is no room to substitute a mixed source for a Hong Kong source even though there might be some overseas activities.

### 13.11.1 *Situs of assets sold*

In *IRC v HK-TVB* the Privy Council said:

> profits accruing to a resident taxpayer from the sale of foreign immovable property are likely to arise in the country where that property is situated although both the contracts of purchase and sale thereof are made in the country of residence of the taxpayer: *Liquidator, Rhodesia Metals Ltd. v. Commissioner of Taxes* [1940] AC 774.[29]

The Hong Kong guidance note provides:

> 45. Subject to specific provisions, the Department regards the locality of the following types of profits to be as follows:
> (a) Rental income from real property. *Locality:* Location of the property.
> (b) Profits derived by an owner from the sale of real estate. *Locality:* Location of the property.
> (c) Profits from the purchase and sale of listed shares and other listed securities. *Locality:* Location of the stock exchange where the shares or securities in question are traded. Where the purchase and sale took place over-the-counter, the place where the contracts of purchase and sale are effected.
> (d) Profits from the purchase and sale of unlisted shares and other unlisted securities. *Locality:* Place where the contracts of purchase and sale are effected, except financial institutions in instances where section 15(1)(l) applies.

### 13.11.2 *Buying and selling through an agent*

SP 1/01 provides:

> 22. If a non-resident carries on a financial trade outside the UK, any transactions carried out through a UK investment manager are likely to amount to trading in the UK. That is so whether there is a discretionary

29 [1992] STC 723 at p.729.

agreement or whether the manager acts on the instructions of the non-resident.

Whether or not this is right does not much matter as in most cases the investment manager exemptions apply, but (even allowing for the qualification in the use of the word "likely") it is too widely expressed. The Hong Kong guidance note provides:

> 25. Cases may arise where it is claimed that contracts of purchase and of sale have been effected wholly outside Hong Kong by employees of the Hong Kong business travelling abroad or by overseas agents. In this context, no operations are carried out in Hong Kong to give effect to the trading transaction; and the employee or overseas agent habitually exercises a general authority to negotiate and conclude contracts on behalf of his principal.
> 26. Normally the activities of an agent and an employee are accorded the same weight if it can be shown that the employee has full authority to conclude contracts without reference to the business in Hong Kong. In considering claims that contracts have been wholly effected outside Hong Kong by employees, Assessors will, in addition to facts in paragraph 18 above, require details of travelling, hotel and subsistence expenses in respect of each individual transaction. Where it is claimed that contracts are effected by overseas agents, it will be necessary to provide agency agreements or other evidence to support the claim.

## 13.12 Services

The former ITH continued:

> **826. Where work is done**
> Many trades are not limited to merchanting. Where services are concerned, we tend to give greater weight to the place where the service is provided.[30]

The Hong Kong Guidance Note adopts the same approach:

---

30 The former ITH para 826 continued:
There are particular difficulties with transmission services with which the approach is to say that the service is given where the act of transmission begins, following the case of *Erichsen v Last* already quoted in ITH813.

> 20. The Department regards the locality of the following types of profits to be as follows -
> (e) Service fee income. *Locality*: place where the services are performed[31] which give rise to the fees.

This is consistent with the statutory rule for foreign tax credit relief. Section 9(1) TIOPA provides relief where foreign tax is

> (b) calculated by reference to income arising ... in the territory, and

Section 9(3) TIOPA provides:

> For the purposes of subsection (1), profits from, or remuneration for, personal or professional services performed in the territory are to be treated as income arising in the territory.

This raises the question of where the services are provided or performed. Where the services involve physical work, the answer is obvious. In *Brackett v Chater*[32] a surveyor contracted himself to a Jersey company (owned by a Jersey trust that he had made although this was not material). He became its employee. Clients contracted with the Jersey company but the surveyor did all the work in the UK using facilities available to them at the offices of the firm in which they were previously partners. The Jersey company was held to be trading in the UK.

The Hong Kong guidance note provides:

> It should be noted that in the case of an investment adviser whose organisation and operations are located only in Hong Kong, profits derived in respect of the management of the clients' funds are considered to have a Hong Kong source. Included in chargeable sums are not only management fees and performance fees but also rebates, commissions and discounts received by the adviser from brokers located in Hong Kong or elsewhere in respect of securities transactions executed on behalf of clients.

31 The ITH refers to the place where services are *provided* and the HK guidance refers to the place where services are *performed* but in the context the meaning is the same.
32 60 TC 134 & 639.

In *Yates v GCA International*[33] a UK resident company provided services (an investigation into oil fields in Venezuela). Some of the work was done in Venezuela and some in the UK. The company (being UK resident) was in principle taxable on all trading income, but subject to foreign tax credit relief for Venezuela tax on income arising in Venezuela.[34] The *Smidth* principles were applied and so (unsurprisingly) part of the profits were held to arise in Venezuela.

### 13.12.1 *Commissions*

The Hong Kong Revenue guidance provides:

> RE-INVOICING CENTRE
> 27. The Department's view is that if a profit is derived from services rendered in Hong Kong, the profit is clearly taxable. Commission income or profit that accrues to a "re-invoicing centre" for services rendered is chargeable to profits tax. Profits derived from the buying and selling of goods are not service income. The transaction involves the taking of commercial risks (e.g. product risks, inventory risks, credit risks, exchange risks, capital risks, etc.) different from those attached to a service. Confirmation of sales and issue of purchase orders are indications that it is a trading transaction. The source of trading profits depends on the locality of the trading operations. Paragraphs 18 to 26 are relevant.
> 28. It is not possible to categorise the circumstances under which income or profit derived by a "re-invoicing centre" would be regarded as a service income and not as a trading profit. In each case, the Department would examine the nature of the operations and the type of risks in question to determine whether they constitute the provision of services or trading. The label "re-invoicing centre" clearly does not in itself provide the answer as it can mean different business structures.
> *Example 1*
> Company A, incorporated in Hong Kong, is a re-invoicing centre of a group of companies with a holding company incorporated in the United States, as more particularly described below. It manages in Hong Kong all foreign currency exposures from intra-company trade, guarantees the exchange rates for future orders and manages intra-affiliate cash flows, including lead and lags of payments. Manufacturing affiliates in Mainland China sell goods to Company A, which in turns resells to the distribution affiliates in North America and Europe. Company A resells at cost plus a mark-up for its services. The mark-up covers the cost of the re-invoicing centre and a reasonable return on the services

33 64 TC 37.
34 See 13.5.1 (Foreign tax credit cases).

> provided. The profits accrue to Company A are service income derived from Hong Kong. The mark-up earned by Company A, which acts as a re-invoicing centre, is chargeable to profits tax.

## 13.13 Construction and engineering works

The former ITH para 826 continued:

> Where construction and engineering works are concerned we say that the construction works are the essential operations and it is normally immaterial where the contract is signed – there is support for this in the Muller case [*WH Muller & Co (London) Ltd v Lethem* 13 TC 151].

## 13.14 Manufacturing

The former ITH para 826 continued:

> There may be more than one part of the trade which can be identified as the profit producing part. There can be the case where there is manufacture abroad and selling here or manufacture here, and selling abroad. To look at the first situation, manufacture abroad and selling here, it is reasonably clear from the champagne cases that the Revenue only claimed to tax the selling profit and there is nothing in the judgments to suggest that it was entitled to more. The question is considered more fully in chapter 9 (ITH920). As to the second situation, manufacture on its own is certainly trading, even though there may be no sales here, and the old judgments tend to support the view that we should in such circumstances seek, on some sensible basis, to tax only the manufacturing profit. There was a Privy Council [*Commissioners of Taxation v Kirk* [1900] AC 588] case in the early part of the century, an Australian case, which supports that idea and it is what we have in fact always done.

See too *IRC v Hang Seng Bank*:

> If he has … engaged in an activity such as the manufacture of goods, the profit will have arisen or derived from the place where ... the profit making activity carried on. There may, of course, be cases where the gross profits deriving from an individual transaction will have arisen in or derived from different places. Thus, for example, goods sold outside Hong Kong may have been subject to manufacturing and finishing

processes which took place partly in Hong Kong and partly overseas. In such a case the absence of a specific provision for apportionment in the Ordinance would not obviate the necessity to apportion the gross profit on sale as having arisen partly in Hong Kong and partly outside Hong Kong.[35]

The Hong Kong Revenue guidance note provides:

MANUFACTURING PROFITS

30. Lord Jauncey in *HK-TVBI* at 410F has commented on the source of manufacturing profits. He explained:

> "If a manufacturer in Hong Kong sells his goods to a merchant in Manila the payment which he receives is no doubt sourced in Manila but his profit on the transaction arises in and is derived from his manufacturing operation in Hong Kong."

Where goods are manufactured in Hong Kong, the profits arising from the sale of such goods will be fully taxable because the profit making activities are considered to be the manufacturing operations carried out in Hong Kong, which should include the procurement of raw materials, the employment of labour, the design of products and the use of machinery and plant, etc.. The following examples illustrate the Department's views on this subject:

*Example 2*

Company B manufactures goods in Hong Kong and sells them to overseas customers. The fact that Company B has sales staff based overseas does not give a part of the profits an overseas source. This is not a case for apportionment. The whole of the profits are liable to profits tax.

*Example 3*

Company C manufactures in Mainland China and sells the finished goods through a retailing branch in Hong Kong. The retailing branch has sales staff and a fixed place of business, and has registered for business in Hong Kong. Company C is both a manufacturer and a retailer. Profits are derived from the manufacturing operations in Mainland China and the retailing operations in Hong Kong. It is necessary to apportion the profits derived by Company C. Profits attributable to the Hong Kong retailing branch are chargeable to profits tax.

32. In Mainland China, two types of processing trade normally involve Hong Kong companies: contract processing and import processing. They are two different forms of transaction and require an accurate legal analysis.

CONTRACT PROCESSING

33. In contract processing, the document that governs the contractual relationship among the parties is the processing agreement. It sets out the rights and responsibilities of the Hong Kong company and the Mainland processing

35 [1990] STC 733 at p.740. The *dictum* to the contrary in *IRC v HK-TVB* [1992] STC 723 at p.730h can be disregarded.

enterprise. The Hong Kong company is responsible for the supply of raw materials and machinery without consideration and to provide technical and managerial know-how while the Mainland processing enterprise is responsible for the provision of factory premises, utilities and labour force. 34. In return for the processing service, the Hong Kong company pays a subcontracting charge to the Mainland enterprise. The legal title to the raw materials and finished goods remains with the Hong Kong company. In the Department's view, the Hong Kong company's operations in Mainland China complement its operations in Hong Kong. Recognising the operations of the Hong Kong company in the Mainland, an apportionment of profits on a 50:50 basis is usually accepted.

35. In *D132/99* 15 IRBRD 25, the taxpayer contended that all of its profits were offshore in nature. The Board of Review held that its operations in Mainland China were not dominant operations that overshadowed the activities in Hong Kong and the operations in Hong Kong could not be disregarded.

36. In *D145/99* 15 IRBRD 91, the Board found that the taxpayer was not privy to the processing agreements, which had been entered into by its fellow subsidiaries and the taxpayer should be assessed for profits tax on 100% of its profits for the years of assessment after the processing agreement lapsed. The Board found that the taxpayer's business was the procurement of toys to satisfy sale and purchase contracts and that important operations took place inside Hong Kong: the reaching of purchase agreements; the determination of price; the issue of invoices; the procurement of raw materials and the shipment of finished products.

37. If the Hong Kong company has restricted involvement in the processing arrangement with the Mainland enterprise, the apportionment of profits could not be appropriate. For example, a Hong Kong company has contracted out the assembly work to various contractors in Hong Kong and the Mainland. The jobs are numerous, small in value and of short duration and the Hong Kong company has minimal involvement in the assembly work. Given that the Hong Kong company does not carry out any manufacturing operations outside Hong Kong, its profits should be fully chargeable to profits tax without any apportionment.

38. The apportionment contemplated in paragraph 34 above will also apply to cases where manufacturing activities are undertaken under a similar arrangement in other places.

IMPORT PROCESSING

39. In import processing, the manufacturing operations are carried out by a foreign investment enterprise (FIE) related to the Hong Kong company. An FIE is often a separate legal entity incorporated in the Mainland. The Hong Kong company sells raw materials to the FIE and buys back the finished goods from the FIE. The Hong Kong company engages in the trading of raw materials and finished goods whilst the FIE manufactures the finished goods. The legal title to the raw materials and the finished goods passes to/from the FIE.

40. In import processing, the gross profits arise from trading transactions whereby the Hong Kong company purchases finished goods from an FIE and sells them for a profit. The manufacturing operations of the FIE in the Mainland are not performed on behalf of, or for the account of, the Hong Kong company even though the Hong Kong company and the Mainland enterprise might be

within the same group of companies.

41. In *ING Baring*, Lord Millet NPJ said that the source of profits had to be attributed to the operations of the taxpayer which produced them and not to the operations of other members of the group. In D36/06 21 IRBRD 694 which was a typical import processing case, the Board held that the taxpayer's profits were fully chargeable to profits tax. It was ruled that the FIE was not part of the taxpayer and was not an agent of the taxpayer. Hence the FIE's operations were not relevant in determining the source of profits of the taxpayer. The Board of Review rejected the contention of "substance over form" and disagreed with the suggestion that a leasing agreement of production facilities was similar to a contract processing agreement.

42. The Department holds the view that profits which accrued to the Hong Kong company from "trading transactions" carried out in Hong Kong cannot be attributed to the manufacturing operations of the FIE carrying on business in Mainland China. The source of the trading profits must be attributed to the operations of the Hong Kong company which produced them. In *Consco Trading Co. Ltd v. CIR* [2004] 2 HKLRD 818, To Deputy J said that it was correct to consider factors such as the finance arrangements, the payment of raw materials and processing fees, the arrangement for receipt of payment from purchasers for the finished product and pre-contract negotiations and the Board was entitled to conclude that, on the evidence, the preponderance of the activities which earned the profits were performed in Hong Kong. The Court of First Instance said the Board correctly excluded the processing activity of the Mainland Chinese entity as not being relevant to the determining of the taxpayer's source of profits which were derived through the sale of processed goods.

43. In *CIR v. Datatronic Limited* [2009] 4 HKLRD 675, where the arrangement between Datatronic and the FIE was an import processing arrangement, the Court of Appeal held that the profit-producing transactions were the purchase of goods from the FIE by Datatronic and subsequent sale and that these activities took place in Hong Kong. Thus, the profits were derived from Hong Kong. The Court of Appeal further held that the fact that the FIE, although a wholly-owned subsidiary of Datatronic, is a separate legal entity and that its dealings with Datatronic were not at arm's length would not detract from the reality of the legal effect of the transactions. It is also worth to note the Court of Appeal's concurrence with the Board's findings that the manufacturing was done by the FIE in the Mainland is substance and not form and that Datatronic's activities (i.e. assisting the FIE in preparing the goods and supplying them to Datatronic) in the Mainland were merely antecedent or incidental to the profit-generating activities.

44. The Department has noticed that a Hong Kong company is sometimes interposed between an overseas company and a Mainland manufacturing enterprise in order to comply with or circumvent the trade barriers imposed by the overseas jurisdiction. In D7/08 23 IRBRD 102, the Board of Review recognised that making the Hong Kong company a customer of the overseas company and of the Mainland enterprise freed the overseas company from the trade barriers. Applying what the Court of Final Appeal held in the Kim Eng case on the effective cause of the production of the profits in question, it was

held that the Hong Kong company's relevant activity in Hong Kong however limited was what was done to earn the profits in question and the Hong Kong company did it in Hong Kong.

## 13.15 Use of UK commodity markets

The former ITH provided:

**929. Is use of the markets "trading in"?**

It is a good thing for this country that these markets exist. There are all sorts of spin-off advantages. Big business has to be financed and insured and there are shipping services and all sorts of peripheral activities which are good both for the people who are involved in them and for the country's balance of payments. Looking at the physical markets the produce concerned may or may not come to this country. A Brazilian plantation owner may sell his cocoa in London although the buyer may be in France. A broker here will sell to another broker acting on behalf of the buyer and the contract will be made here. So the question arises – is the Brazilian producer trading in London and until the end of the last century it never occurred to anybody that this might be so.

Then came clarification by the Courts on the meaning of trading in the UK and the possibility that the fact of a contract being made by an agent in London could involve the principal in UK tax. It appeared open to the Revenue to contend that the principal was carrying on the selling part of his trade in London or even carrying on the whole trade in London. The Revenue had contended neither of those things; to have done so would have frightened off the foreign users of our markets. In any event, in those early days, the non-resident principal could have arranged that his London brokers did not receive the profits or gains.

But in 1915 everything changed because it was then provided that the receipt of the profits or gains would no longer count and the business world was worried. The Revenue said that it had always regarded business done on our markets through brokers as trading with the UK rather than trading in the UK. But the business world was not satisfied. The difficulty was clear enough. If, as some of the early cases might suggest, the bare making of a contract here is such a vital matter, there is a risk that anybody using our markets might be held to be trading here. The Revenue's former view that in normal circumstances that constituted trading with rather than in the UK is not easily defensible.

**930. Pt VIII TMA 1970: Trading in: Can there be any profit?**

But accepting that a primary producer, a Brazilian plantation owner selling cocoa in London, is trading in the UK, where is the profit? Such commodities have a world market price at any time; it is an essential function of the market to decide exactly what that price is. If it is decided that the Brazilian producer is trading in the UK he must be charged either as a seller of cocoa or as a cocoa grower. If he is not charged as a grower and, to put it no higher it would be stretching things rather to do so, it is hard to see how any profit can be said to arise in London as a seller of cocoa. The position is entirely different from that of the French champagne grower of the type referred to in ITH815 of chapter 8, who

> may at least be regarded as making a merchanting profit here. In that situation one would look at the market value of the champagne in bulk and then at the price (wholesale or retail) actually realised in this country. But where commodities like bulk tin or rubber or cocoa are concerned, the position is otherwise. These things are traded in our markets precisely to determine what their market value is and to dispose of them at that price.
>
> **931. Dealer**
>
> In some cases the primary producer may not sell directly in London but sell to an intermediary in the producing country who in turn sells on the London market. The trade here is then clearly that of selling and if the intermediary does not purchase at world prices – there may, for example, be a reserve price – it may be possible to identify a profit or a loss. But if the intermediary sells through a broker within the exemption described in the following paragraphs then the exemption runs just the same. But it sometimes happens that, although the contracts are made through a broker, the seller has a presence here – a branch or an agent – which plays some part in the selling process. It may, for example, instruct the brokers. The question then is whether what is done is sufficient to enable us to say that the non-resident is trading also through that branch or agent. The terminal markets may be used by a non-resident dealer in commodities simply to hedge purchases or sales of raw materials which take place outside the UK. The hedging transactions may amount to trading here but, again, the broker exemption may apply unless the non-resident has a presence here, other than the broker, which is involved with the hedging transactions. If the exemption does not apply, there is then the question of the extent, if any, to which the results of the related transactions outside the UK should be taken into account in measuring the taxable profits. This is an area of difficulty and International Division should be consulted in such a case.

In practice the point is not important because the broker exemption applies.[36]

## 13.16 Leasing and licensing tangible property

The position for property income from land is governed by statute and trading case law is irrelevant for UK tax.[37]

What about leasing[38] chattels (eg pictures)? It is helpful to consider trading and non-trading cases separately.

---

36 See 39.1 (Investment Manager exemptions).

37 See 14.1 (Property income).

38 References to leasing in this paragraph include licensing: there is no material distinction for our purposes.

### 13.16.1 *Leasing chattels without trading*

If there is a simple lease (without a trade) the source of the income is the chattel (not the contract) and one would expect the source to be where the chattel is situate.

In *IRC v Hang Seng Bank*, the Privy Council said:

> If the profit was earned by the exploitation of property assets as by letting property ... the profit will have arisen in or derived from the place where the property was let ...[39]

But this was tactfully "explained" in *IRC v HK-TVB*:

> When Lord Bridge used the words "place where the property was let" he must have been referring to the place where the property was situated and not to the place or places where the lease happened to have been signed.[40]

Although the comment was made in the context of immoveable property, it is considered that the same applies to chattels.

It is true that the chattel may be moved, but most chattels do not move often. If a picture was moved permanently, it is unclear whether the source changes. It is tentatively suggested that the source changes.

If the chattel were a mobile asset (a plane or yacht) then it is suggested that one should not adopt the rule that the source is where the asset is situated. It is rational to have a separate rule for ships and aircraft. The IHT/CGT situs rules are also different for such assets.

### 13.16.2 *Leasing as part of trade*

If the leasing is a trade, then the income is trading income and the source is the trade not the assets of the trade. The question whether the trade is partly carried on inside the UK can be addressed looking at wider factors than just where the asset is situate. But in practice it is suggested that the situs of the assets will often be determinative (unless the trade involves

39 [1990] STC 733 at p.740b.
40 [1992] STC 723 at p.729e.

assets situate in more than one country).[41]

### 13.16.3 *When is chattel leasing a trade?*

Finance Leasing Manual provides:

> **20.10. Schedule D Case I: whether trading**
> In general, where chattels are leased, it should be accepted that the leasing is by way of trade. In exceptional cases, however, where the evidence of trading is extremely slight, for example if only one asset has been acquired for leasing and there is no personal involvement by the taxpayer or any semblance of a trading organisation, the taxpayer's activities are more likely to be in the nature of an investment, with the income assessable Case VI, than trading. Case I treatment should not be refused where, although there is no personal involvement by the taxpayer, there is trading activity by a manager as agent for the taxpayer.[42]

Business Leasing Manual takes a similar line and gives a little more detail:

> **315. Whether lessor trading**
> In general, where chattels are leased, you should accept that the leasing is by way of trade.
> In exceptional cases, however, where the evidence of trading is extremely slight, for example if only one asset has been acquired for leasing and there is no personal involvement by the taxpayer or any semblance of a trading organisation, the taxpayer's activities may be special leasing within Section 19 CAA 2001.
> You should not seek to deny trading treatment where, although there is no personal involvement by the taxpayer, there is trading activity by a manager as agent for the taxpayer.
> The same principle applies to special purpose vehicle lessor companies set up by groups that carry out leasing activities. In such cases it is not unusual for the company to own only one (or a few) assets and be managed by a group member.

This is an oversimplification. For instance, when the chattel is acquired by way of gift (not purchase), and when the taxpayer is an individual or

41 See 13.11.1 (Situs of assets sold).
42 The same text is found in BI Manual 61190.

trust rather than a commercial company, then trading is much less likely.

A conclusion of trading will usually suit a non-corporate taxpayer and so not be challenged. A conclusion of trading would be a concern to a corporate taxpayer only if it were carrying on that trade in the UK through a permanent establishment, which would move it from income tax to the more onerous corporation tax regime.

## 13.17 Research division and shop windows

The former ITH provided:

> **827. Profit producing activities**
> Early in this chapter (ITH811) an illustration was given of the hypothetical maker of refrigerators making them in various places in the world and selling them in those places. One way of describing the split of that trade is as a vertical split with a vertical slice here and other similar vertical slices in other countries. We would wish to tax only the vertical slice of the trade carried on here. The other way in which a trade may be split may be thought of as horizontal, the sort of situation we have just discussed, one horizontal slice of the trade, manufacturing say, being here and another slice, the selling, abroad.

The horizontal/vertical terminology seems strange. The metaphor is also used in competition law but the other way round.[43] The former ITH continued:

> The above cases are straightforward enough but difficulty starts to emerge when what is done here is not clearly identifiable as part of the whole trade in that way. An example is the non-resident stock-broker with a branch in London which merely puts the goods in the shop window.

"Shop window" is another unhelpful metaphor. What does it mean? The former ITH explained:

43 "Vertical agreements" are those made between two or more undertakings each of which operates at a different level of the production or distribution chain. Horizontal agreements are those made between undertakings operating at the same level of the production or distribution chain, covering for example research and development, production, purchasing or commercialisation. See Regulation (EC) no. 2790/1999.

> There may be a research section here with computers and the other paraphernalia of a modern trade of that sort. The branch gives advice to would be customers and when they decide to buy a particular American stock, it tells its head office in New York and there the actual deal is done. If the London branch really is only a shop window and really does take no part in the contracting process then the conclusion is that that is not trading within the UK; there is only one trade which is providing the service of buying or selling stocks and that is done in New York. It is quite possible for a non-resident trader to have an office here employing a substantial number of people and yet not to be exercising the trade here.
> Another example might be the manufacturer on a very large scale in America, which has a research division in this country. The work of the research division may be absolutely vital to the trade but if that trade consisted for example in the making and sale of television sets, one could not say that research on, let us say, conductivity constituted a distinct profit producing part of that trade. That is reasonably clear.

This is right because it is difficult to allocate the profits, so they should be regarded as merely auxiliary.[44]

> More difficult is the position of non-resident banks or insurance companies which use the UK for their investment activities but do not carry on the business of banking or insurance here. The questions in this whole area of "trading in" are mainly those of fact and degree and absolute guidelines are simply not possible. International Division will be glad to help in cases of doubt.

## 13.18 Where is contract made?

If or to the extent that the place where is the contract made is an important factor, that place has to be identified. The place where a contract is made is, fundamentally, a question of contract law. But the identity of the place where the contract is made is not relevant for the purposes of contract law, so there are no contract law cases discussing the issue. In the reported tax cases the place where the contract was made was fairly obvious, and so the cases do not help us here. We are thrown back to first principles.

Going back to first principles, a contract in English law[45] is made by acceptance of an offer. The contract takes effect on acceptance and the place where the contract is made is where the acceptance takes place. As a general rule, acceptance takes place when the acceptance is received by

---

44 See 13.9 (Trading in UK: preparatory and auxiliary activities).

45 Further consideration is needed if the applicable law is not English law.

the person who makes the offer. There are, however, exceptions to this:

(1) Acceptance by post–acceptance takes place when and where the letter of acceptance is posted, not where received (unless the offer otherwise provides).

(2) When an offer is made, one can specify in the terms of the offer how and when it can be accepted, and this can therefore alter the place where the contract is made.

Offer and acceptance can be difficult to identify. The court will try to impose an offer and acceptance analysis on circumstances which may not lend themselves to that analysis.[46]

There is no case law on email acceptance.[47] The person making the offer can decide how that offer is accepted so if the documentation is correctly drafted a contract can be made abroad by the click of a mouse outside the UK.

The former ITH discussed this issue:

> **The making of a contract**
> **830. General**
> There have been many references in this chapter to the making of a contract and to the place where a contract is made. If two people agree specifically on a sale by word of mouth that is the making of a contract and the place of their agreement is the place where the contract is made. A great deal of business is done in that way daily and the place of contract is not changed by the signing of a piece of paper in a tax haven sometime afterwards. The difficulty is one of proof as we have already seen in ITH822. But putting difficulties of that sort on one side, if the question where a contract is made becomes of central importance it is one on which we should rely on legal advice – it is pre-eminently a question for the Solicitor and what follows is very general guidance.
> **831. Acceptance of offer**
> Offer and acceptance constitute contract. The place of contract is governed by the place of acceptance of the offer and acceptance takes place where it is

46 Some academic writers have suggested abandoning the "offer and acceptance" analysis and replacing it by a contract theory based on reliance. (There is more than a hint of this in Lord Denning's judgment in *Gibson v Manchester City Council.* This decision was reversed by the House of Lords but even Lord Diplock accepted that there would be times when offer and acceptance would be difficult to identify and the "normal analysis of a contract as being constituted by offer and acceptance" might not be appropriate. However that would be exceptional. See [1979] 1 WLR 294 at p.297).

47 The Law Commission paper (Electronic Commerce: Formal requirements in commercial transactions, December 2001) does not deal with the issue of where a contract made by email is made.

received. Where acceptance is communicated by letter it is regarded as received at the place of posting rather than at the place of actual receipt. This is because, once a letter has been posted, the Post Office holds it on behalf of the addressee. Where telephone communication is used the place of acceptance is the place where the recipient of the acceptance is. That is the general rule for so-called instantaneous communication. It would apply also to an acceptance sent by telex or fax directly from the acceptor's office to the offeror's office. The general rule may need qualifying when a cable company's services are used. A telegram like a letter is regarded as received when put into the hands of the Post Office.

**832. Price lists**

The mere sending out of price lists and advertisements does not constitute an offer, it is rather an open invitation for offers to be made. An offer must be quite specific and a price list is not an offer to supply an unlimited amount of goods at the price named. It follows that when a customer buys goods from a supplier the customer makes the offer and the supplier notifies acceptance. That is generally the assumption in cases where place of contract has been decisive in determining a non-resident's liability. But it is not impossible for a price list to amount to an offer, as long as the list details the price, the quantity and gives a definite description of the goods concerned. If in such circumstances the buyer were to put in some amendment not contained in the original offer, then what the buyer does becomes a fresh offer and one which has to be unconditionally accepted before there can be said to be a binding contract. And there may be a series of communications between customer and supplier so that it is a matter of chance as to who makes and who accepts the final offer.

**833. Delivery**

It is quite common to find that there is no formal acceptance of the offer by the person supplying the goods and, in that situation, delivery itself will normally constitute acceptance; and then it would be important to look at the place of delivery, the place where the lawful property in the goods passes from seller to buyer.

**834. Acceptance by agent**

There can be widely different circumstances in which contracts are made here. There is the case where the agent or branch in this country really does the job of negotiating the contract. That person settles the deal and terms and makes the contract here and there is no doubt whatever about it. On the other hand, there can be the case where the agent makes the contract in the legal sense, but does so only with the specific authority of the principal. That is to say the agent gets an offer, writes to or rings the principal, obtains approval and then, and only then, accepts the offer. In that case, acceptance would be here and there are at least two cases [For example, *Wilcock v Pinto & Co* 9 TC 111] on that point.[48]

---

48 There is also a brief comment (not worth setting out here) in NI Manual 29013.

## 13.19 Trade partly in UK: apportionment

I turn to the question of how to apportion where part of the trade is in the UK. Of course this overlaps with the question of whether there is a trade partly in the UK. If there are activities in the UK which do not involve trading in the UK there is nothing to apportion.

Tax Bulletin 18 provides:

> It is perhaps less obvious how the profits from the part of the trade carried on in the UK should be measured. They are required to be measured on the arm's length principle set out in the [OECD model tax convention] where a DTA applies which includes the relevant provisions. It is considered that it also follows from the main rule in Schedule D that the same principle applies even if there is no treaty.
>
> There is support for this principle in the early tax cases on non-residents trading in the UK. For example, in *Pommery & Greno v Apthorpe* at 2 TC 189, Denman J said, with regard to the profits chargeable in the UK from merchanting champagne produced in France, that:
>
>> It may be that there may be some difficulty in some respects as to the manner of calculating the amount of expenditure to be put against the profits, whether it would be a proper course to look at the goods sent over to England and then to consider what profit they make, putting a fair valuation on them as they arrive, and as the money is transmitted, or whether it would be necessary in such a case to look more minutely into the profits and losses upon the whole trade carried on partly in France and partly in England. I do not think it is necessary at all at this stage of the case to decide that. That is a matter of quantum, a matter for the consideration of persons skilled in dealing with such matters as assessing profits of trade.
>
> This can be seen as an early description of the arm's length principle and as a recognition of the need to develop methods to apply that principle in practice. Such methods were developed in the OECD 1979 Report on "Transfer Pricing and Multinational Enterprises" and have been reaffirmed and clarified in the recently published 1995 revision of that report by OECD "Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations".[49]

---

49 [Author's Note] For a more up-to-date discussion, see "The Attribution of Profit to Permanent Establishments" ed. Russo, IBFD 2005 and OECD Report on the Attribution of Profits to Permanent Establishments 17 July 2008 accessible

The former ITH also touched on this issue:

> **814. Measure of profit in *Erichsen v Last*[50]**
> The second point the case deals with is – what is the chargeable profit? That is a rather special point where the transmission of messages is concerned. What the company claimed was that a great deal of the profit arose from the transmission over cables which were not here at all. The Master of the Rolls gave a simple parallel example of a foreign company running a steam packet between Dover and Calais. He said that as far as carrying passengers from Dover to Calais was concerned that was trading in Dover. There was no need to look at the three mile limit or anything of that sort. One simply had to take the receipts and deduct the expenses. The journey started here and the service was here. That is an idea limited in its application to trades involving the transmission of passengers, goods and information.

## 13.20 DT relief for trading income

### 13.20.1 *Treaty relief for trading income*

Article 7 OECD model treaty provides:

> 1. The profits of an enterprise of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein. If the enterprise carries on business as aforesaid, the profits of the enterprise may be taxed in the other State but only so much of them as is attributable to that permanent establishment.

"Enterprise of a Contracting State" is defined in article 1:

> 1. For the purposes of this Convention, unless the context otherwise requires:
> c) the term "enterprise" applies to the carrying on of any business;
> d) the terms "enterprise of a Contracting State" and "enterprise of the other Contracting State" mean respectively an enterprise carried on by a resident of a Contracting State and an enterprise carried on by a

*www.oecd.org/dataoecd/20/36/41031455.pdf.*

50 [Author's Note] For facts of *Erichsen v Last* 4 TC 422 see 13.6 (Place where contract made).

> resident of the other Contracting State;

A discussion of this topic requires a book to itself, and is not attempted here.

### 13.20.2 *Treaty override for trading income*

Section 130 TIOPA provides:

> (1) Subsection (4) applies if double taxation arrangements make the provision, however expressed, mentioned in subsection (2).
> (2) The provision is that the profits of an enterprise within subsection (3) are not to be subject to UK tax except so far as they are attributable to a permanent establishment of the enterprise in the UK.
> (3) An enterprise is within this subsection if the enterprise—
> (a) is resident outside the UK, or
> (b) carries on a trade, or profession or business, the control or management of which is situated outside the UK.

Section 130(3)(a) is misworded as an enterprise does not have a residence: only a person can have a residence and an enterprise is not a person.

Section 130(3)(b) is also misworded as an enterprise does not carry on a trade, profession or business (hereafter abbreviated to "trade"). Only a person can carry on a trade. This is however the wording used in the OECD model.

But reading purposefully and somewhat charitably, the meaning of s.130(3) is that s.130 applies if:
(a) the person carrying on the enterprise is resident outside the UK; or
(b) the enterprise consists of a trade the control or management of which is situated outside the UK.

Assuming we have such an enterprise we move on to s.130(4) which disallows treaty relief:

> The provision does not prevent income of a person resident in the UK being chargeable to income tax or corporation tax.

Treaty relief is only allowed for a person resident outside the UK. Section 130(6) TIOPA defines residence:

> A person is resident in the UK for the purposes of this section if the person is resident in[51] the UK for the purposes of the double taxation arrangements.

Section 130 is headed: *Interpreting provision about UK taxation of profits of foreign enterprises.* This rule is however not interpretation or even misinterpretation: it is a treaty override. This section simply disapplies the relief for business profits. Breach of treaty agreements has ceased to concern HMRC when on the tax avoidance warpath.

Section 130 applies where an enterprise is carried on by a trust or company which is a resident in a treaty state with a standard business income article; and a UK resident is taxable on the income as life tenant of the trust, or under s.624, or under s.720. The UK resident person does not qualify for DT relief.

For completeness: s.130(5) TIOPA provides an exception:

> Subsection (4)—
> (a) does not apply in relation to income of a person resident in the UK if section 858 of ITTOIA 2005 (UK resident partner is taxable on share of firm's income despite any double taxation arrangements) applies to the income, and
> (b) does not apply in relation to income of a company resident in the UK if section 1266(2) of CTA 2009 (UK resident company that is partner in a firm is taxable on share of firm's income despite any double taxation arrangements) applies to the income.

Section 130 is not needed here as s.858 ITTOIA does the same job; see 36.9 (DTA relief for partnership).

51 The treaty wording is: "a resident *of* the UK", see 5.2 (Starting point: residence under art. 4.1), but it does not matter.

CHAPTER FOURTEEN

# PROPERTY INCOME

## 14.1 Property income - Introduction

ITTOIA uses the term "**property income**" to mean income from land.[1] The taxation of property income is governed by Part 3 ITTOIA. A full discussion requires a book to itself. I chapter focuses on matters closest to the themes of this book.

I do not consider the position of UK resident companies (subject to CT rather than to IT).

I do not consider deduction of tax at source and UK agents, under the non-resident landlord regulations (on which HMRC have written 88 pages of guidance notes) though I would like to cover this in a future edition.

---

1 A note on terminology. The commentary to TLR Exposure Draft No. 13 provides: "*Finding a suitable name*

223. Letting income has long been referred to as 'Schedule A income' by tax professionals. But that is not an informative label for the non-specialist and we are removing references to the Schedules.

224. We considered several possible new names for this type of income including 'land income', 'letting income', 'rental income', 'property business income' and 'property income'. We concluded that 'property income' offered the best compromise because:

- it matches the names that are proposed for the other types of income: 'trading income', 'employment income' and 'savings and investment income';
- for most people, it is likely to appear the most appropriate name; and
- it links directly with what we think is the most appropriate name for the business activity ('property business'): 'land business' and 'rental business' might be particularly misleading.

225. The disadvantage is that it might appear to go wider than income just from land; that is, strictly, 'property' means more than just land and buildings. But we do not think that most people will find this confusing as the proposed use corresponds broadly to the popular use."

## 14.2 Property income terminology

### 14.2.1 *"UK property business"*

Section 264 ITTOIA provides:

> A person's UK property business consists of—
> (a) every business which the person carries on for generating income from land[2] in the UK, and
> (b) every transaction which the person enters into for that purpose otherwise than in the course of such a business.

At first sight (b) is puzzling. ITTOIA EN explains why it is there:

> 1049. … the concept of the "property business" is, to a certain extent, an artificial one. Unlike the term "trade" it may not always correspond to an activity organised in a way that the proprietor would necessarily describe as a business. As such, the term has to cover:
>
> - "real" businesses where the lettings are organised in a professional way;
> - lettings which are not so organised; and
> - casual and one-off transactions which may have very little of the qualities normally associated with a business.
>
> Then all of these lettings of different types must be treated as part of the same, single business.

### 14.2.2 *"Overseas property business"*

ITTOIA continues:

> A person's overseas property business consists of—
> (a) every business which the person carries on for generating income from land outside the UK, and
> (b) every transaction which the person enters into for that purpose otherwise than in the course of such a business.

ITTOIA EN explains:

---

2 The expression "generating income from land in the UK" is defined in ss.266, 267 ITTOIA.

> 1056. The definition is identical to that of "UK property business" except that the land from which the income arises is outside the UK. That is the only difference between a UK and an overseas property business: income from land outside the UK can arise only in an overseas property business; income from land in the UK can arise only in a UK property business.
> 1057. For the purpose of deciding whether there is an overseas property business, overseas land law is interpreted in accordance with section 363.

See 14.4 (Losses of overseas property business) for a refinement to this definition.

### 14.2.3 *"Property business"*

Section 263(6) provides a commonsense definition:

> In this Act "property business" means a UK property business or an overseas property business.

## 14.3 Taxation of income from property business

The charging provisions are in Chapter 3 Part 3 ITTOIA. Sections 268–270 provide:

> **268 Charge to tax on profits of a property business**
> Income tax is charged on the profits of a property business.
> **269 Territorial scope of charge to tax**
> (1) Profits of a UK property business are chargeable to tax under this Chapter whether the business is carried on by a UK resident or a non-UK resident.
> (2) Profits of an overseas property business are chargeable to tax under this Chapter only if the business is carried on by a UK resident.
> **270 Income charged**
> (1) Tax is charged under this Chapter on the full amount of the profits arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

Section 270(2) ITTOIA feeds into s.832 which incorporates the remittance basis rules.

## 14.4 Losses of overseas property business

### 14.5 *Losses from 2008/09*

Chapter 4 Part 4 ITA provides loss relief for a property business. There are three classes of loss relief:

(1) Carry forward against subsequent property business profits: ss.118–119 ITA.

(2) (a) Capital allowance losses and
(b) agricultural estate losses.
Sections 120–124 ITA.

(3) Post-cessation property relief: ss.125–126 ITA.

In this chapter I consider only the first of these reliefs. Section 118 ITA provides:

> **Carry forward against subsequent property business profits**
> (1) Relief is given to a person under this section if the person—
> (a) carries on a UK property business or overseas property business (alone or in partnership) in a tax year, and
> (b) makes a loss in the business in the tax year.
> (2) The relief is given by deducting the loss in calculating the person's net income for subsequent tax years (see Step 2 of the calculation in section 23).
> (3) But a deduction for that purpose is to be made only from profits of the business.[3]

---

3 For completeness, the ITA continues:
"(4) In calculating a person's net income for a tax year, deductions under this section from the profits of a business are to be made before deductions of any other reliefs from those profits.
(5) No relief is to be given under this section so far as relief for the loss is given under section 120.
(6) This section needs to be read with section 119 (how relief works).
**119 How relief works**
This section explains how the deductions are to be made.
The amount of the loss to be deducted at any step is limited in accordance with section 25(4) and (5).
Step 1 Deduct the loss from the profits of the business for the next tax year.
Step 2 Deduct from the profits of the business for the following tax year the amount of the loss not previously deducted.
Step 3 Continue to apply Step 2 in relation to the profits of the business for subsequent tax years until all the loss is deducted."

The Property Income Manual correctly summarises:

> **4705 CT**
> *Losses*
> As part of the changes made by FA 1995, the taxable profits and losses of overseas let property were ring fenced for IT purposes. The effect was that:
> · losses of an overseas property business cannot, for IT purposes, be set against profits of a UK property business carried on by the same individual,
> · similarly, losses of UK property business cannot for IT purposes be set against profits of an overseas property business carried on by the same individual.

The definitions of UK property business and overseas property business in ITTOIA were only ITTOIA-wide definitions (they do not apply for all the income tax Acts) so the drafter of the ITA had to repeat them. Section 989 ITA extends them to the income tax acts:

> The following definitions apply for the purposes of the Income Tax Acts—
> "overseas property business" has the meaning given by Chapter 2 of Part 3 of ITTOIA 2005,
> "UK property business" has the meaning given by Chapter 2 of Part 3 of ITTOIA 2005

At this point we need to consider s.263(4)(5) ITTOIA which restricts the meaning of "overseas property business":

> (4) References in this Act to an overseas property business are to an overseas property business so far as any profits of the business are chargeable to tax under Chapter 3 (as to which see, in particular, section 269).
> (5) Accordingly, nothing in Chapter 4 or 5 is to be read as treating an amount as a receipt of an overseas property business if the profits concerned would not be chargeable to tax under Chapter 3.

I refer to this provision as **"the non-chargeable overseas property business rule".** This rule applies for the purposes of "this Act" (ITTOIA). However it is suggested that this applies for the purposes of loss relief in the ITA, s.989 ITA incorporates the s.263 rule, because it incorporates the definition of Chapter 2 Part 3 ITTOIA, and s.263 is in Chapter 2.
Suppose T carries on an overseas property business and:

(1) Year 1: T is non-resident and realises losses;
(2) Year 2: T is UK resident and realises profits.

The losses of Year 1 are disallowed since the profits of that year are not chargeable under Chapter 3 (or at all) so there is no overseas property business. In short, losses of non-residents are not relievable. *Quaere* whether this would apply if T were resident in an EU member state.

What about an overseas property business carried on by a remittance basis taxpayer? An overseas property business which is taxed under the remittance basis is (from 2008/09) taxed under Chapter 3 (even though the amount of income taxed is determined by s.832 ITTOIA which is not in chapter 3.) So the non-chargeable overseas property business rule does not disallow loss relief. Presumably this change was intentional as it was not desired to introduce an equivalent of the incomprehensible CGT loss rules into this context.[4]

## 14.6 *Losses before 2008/09*

The position was different before 2008/09. This is still relevant in relation to the question of whether pre-2008 losses can be carried forward and set against post 2008 profits. The relevant legislation in ITTOIA provided:

> **268 Charge to tax on profits of a property business**
> Income tax is charged on the profits of a property business.
> **269 Territorial scope of charge to tax**
> (1) Profits of a UK property business are chargeable to tax under this Chapter whether the business is carried on by a UK resident or a non-UK resident.
> (2) Profits of an overseas property business are chargeable to tax under this Chapter only if the business is carried on by a UK resident.
> *(3) But, in the case of an overseas property business carried on by a UK resident to whom the remittance basis applies, the only profits of the business chargeable to tax under this Chapter are those in respect of land in the Republic of Ireland.*
> *(4) For a UK resident to whom the remittance basis applies, see also Chapter 11 (charge to tax on overseas property income other than income arising in Republic of Ireland).*

4 See 48.8 (Loss accruing to remittance basis taxpayer).

(Words in italics repealed by the FA 2008.) Thus for a remittance basis taxpayer, and ignoring the special case of land in Ireland,[5] the charge was not under Chapter 3. Instead it was in Chapter 11 (also repealed in the FA 2008). This provided:

> ***357 Charge to tax on overseas property income***
> *Income tax is charged on the overseas property income of a person to whom the remittance basis applies.*
> ***358 Meaning of "overseas property income"***
> *In this Chapter "overseas property income", in relation to a person to whom the remittance basis applies, means amounts which*
> *(a) are not brought into account in calculating the profits of any overseas property business of the person, but*
> *(b) would be if section 269(3) (charge to tax on profits of an overseas property business of a person to whom the remittance basis applies only in respect of land in the Republic of Ireland) were omitted.*
> ***359 Income charged***
> *Tax is charged under this Chapter on the amount specified by section 832 (relevant foreign income charged on the remittance basis).*

So before 2008, the remittance basis taxpayer did not have an "overseas property business" so there could not be loss relief. In the 2007/08 edition of this book I commented:

> This is consistent with the CGT treatment of losses. It may be desirable for a foreign domiciliary not to claim remittance basis treatment in the year that a loss accrues in order to obtain that loss relief. Though the cost of that claim must be set against the benefit of the remittance basis in that year. Suppose the loss is allowable in the year it accrues but in a subsequent year the owner claims remittance basis treatment. The loss is not allowable in that year. However, it is suggested that the loss can be carried forward and set against profits of other years if the arising basis applies to those years.

It is suggested that a loss which did not qualify for relief in the year that it accrued cannot be carried forward to 2008/09 or subsequently. HMRC may well agree. The Property Income Manual provides:

5 I do not discuss Irish property income here, but note that the pre-2008 legislation was in breach of EU law; see 9.21 (RFI from Ireland).

**4702. IT cases up to 2004-05** [February 2007]
No loss can ever arise on income taxed on the remittance basis.

Offshore property business losses from before 1998/99 are allowable under ESC B25, but it seems unlikely that any such losses will still be available to be carried forward to the present time.

## 14.7 Border between trading income and property income

A receipt may in some cases be both a trading receipt and a receipt of a property business. Sections 4 and 261 ITTOIA deal with the overlap.

Section 4(1) ITTOIA provides:

> Any receipt or other credit item, so far as it falls within—
> (a) Chapter 2 of this Part (receipts of trade, profession or vocation), and
> (b) Chapter 3 of Part 3 so far as it relates to a UK property business,
> is dealt with under Part 3.

Section 261 ITTOIA provides:

> Any receipt or other credit item, so far as it falls within—
> (a) [i] Chapter 3 of this Part so far as it relates to an overseas property business or
> [ii] Chapter 8 or 9 of this Part (rent receivable in connection with a UK section 12(4) concern or for UK electric-line wayleaves), and
> (b) Chapter 2 of Part 2 (receipts of a trade, profession or vocation),
> is dealt with under Part 2.

ITTOIA EN explains:

> 1058. The priority rules in the trading income Part of this Act (section 4) make it clear that a charge under Part 3 of this Act as UK property income has priority over a charge under Part 2 as trading income. This reflects the rule in Schedule D Case I (section 18(3) of ICTA). The sort of receipt to which this rule might apply is rent received by a property developer from the temporary letting of land awaiting development. The rent is taxed as property income, even if it could properly be regarded as a trade receipt.
> 1059. In the case of a foreign trade and foreign property, the rule in section 65A(1)(b) of ICTA is the reverse of that in section 18(3) of

> ICTA. An overseas property business does not include "income to which section 65(3) of ICTA applies (income immediately derived from carrying on a trade ..)". So the priority rule in section 261 preserves this position.

Perhaps the reason for this apparent anomaly is to maximise income classified as UK source. Under these rules, if UK property income is a receipt of a foreign trade, it is classified as UK property income (and so taxable even in circumstances where foreign trading income may not be); whereas if foreign property income is part of a UK trade it is treated as UK trading income (and similarly taxable).

CHAPTER FIFTEEN

# DEDUCTION OF INTEREST IN COMPUTING PROPERTY INCOME

## 15.1 Deduction of interest in computing property income

This chapter considers the deduction of interest in the computation of UK property income.

A great deal of tax and a great deal of tax planning depends on obtaining that deduction. See *Langsam v Beachcroft LLP* [2011] EWHC 1451 (Ch) for an interesting negligence action where a dissatisfied remittance basis taxpayer obtained some damages against his advisors for failing to advise him on the tax avoidance possibilities dignified with the label of an "equity release arrangement".

For the questions of the location of the source of interest, and deduction at source, see 17.1 (interest income).

Section 272(1) ITTOIA provides:

> The profits of a property business are calculated in the same way as the profits of a trade.

Section 272 gives a long list of provisions which apply, including s.29 ITTOIA:

> For the purpose of calculating the profits of a trade, interest is an item of a revenue nature, whatever the nature of the loan.

Interest is in principle a deductible expense if incurred wholly and exclusively for the purpose of the property business.

The Property Income Manual provides:

> **Introduction** [January 2009]
> ... For IT, interest payable on loans used to buy land or property which

is used in the rental business, or on loans to fund repairs, improvements or alterations, is deductible in computing the profits or losses of the rental business in the same way as other expenses.

Similarly, interest payable under hire purchase agreements or on an overdraft is deductible where the asset is used for business purposes.

The normal rental business rules apply, see PIM2000 onwards, including the 'wholly and exclusively' rule and the rules governing the timing of relief (see PIM1100 onwards). A taxpayer cannot, for example, deduct interest on a private loan, such as a loan used to buy their private residence. Where part of the taxpayer's own residence is let see PIM2120.

Similarly, the interest on a loan or overdraft may not be allowable, or only part may be allowable, where the taxpayer, for example, uses the borrowing:

- to buy non-rental business investments (which may be shown in the balance sheet as assets),
- to buy private assets or assets for their family,
- for the provision of private funds to be taken out from the rental business.

Deciding what interest, if any, can be deducted may be difficult, particularly where the taxpayer's account with the business is overdrawn. That is, where the taxpayer has drawn out more money than the profits of the rental business. The loan may have, for example, partly financed the rental business and partly met private living expenses. Interest on a borrowing that is used to fund private living expenses or other non-business expenditure isn't allowable.

For advice regarding the incidental costs of loan finance see PIM2050.

Interest on a partner's capital account with the business isn't deductible. It is merely an allocation of the rental business profit and is taxed as property income.

For more detailed guidance about the deduction of interest see BIM45650 onwards.

*Interest payable on property only partly used for rental business*

A property may be let for short periods in a tax year or only part of it may be let throughout a tax year (or both); the rest of the time the property is used for private or non-business purposes. Here the interest charged on a qualifying loan on that property has to be split between the rental business use and the private or non-business use. The split is done in whatever way produces a fair and reasonable business deduction, taking account of both the proportion of business use and the length of business use.

You don't have to split the interest if the taxpayer is genuinely trying to let the property but it is empty because they have not been able to find a tenant. In this case the interest will meet the 'wholly and exclusively' test. It won't meet this test if they have not been trying to let the property or they have been using it for private or non-business purposes .

*Interest and rent-a-room*

Interest paid on a loan used to buy a property cannot be claimed as a deduction in the rental business if rent-a-room relief has been claimed. There is more information about rent-a-room relief at PIM4000 onwards.

*Legislation*

The profits of a rental business are calculated in the same way as the profits of a trade. Therefore interest may be deducted in computing the profits of a rental business provided that it meets the following criteria.

- It must be payable wholly and exclusively for the purposes of the rental business.
- If it is paid to a person not resident in the UK, the deductible element must not be at more than a reasonable commercial rate - see PIM2110.
- It must not be within MIRAS - see PIM2120.

Remember that under the rental business rules, relief is given for interest payable on the accruals basis (not interest paid unless, exceptionally, the cash basis is used - see PIM1101).

The guidance on interest as a trade expense at BIM45650 onwards applies equally to interest as a rental business expense.

*Interest rate hedging instruments*

Where an interest rate hedging contract such as a swap or cap is taken out to hedge interest payments which are deductible in computing the profits or losses of a rental business, then profits or losses on that contract will normally be taxed or relieved as receipts or deductions of that rental business. This is because trading principles are imported into the property income computation rules. Profits and losses on such instruments should normally be computed on an accruals basis so that payments and receipts are allocated to the periods to which they relate, without regard to the periods in which they are made or received or become due and payable, in accordance with normal accounting practice. For more on the tax treatment of swaps held by IT payers see PIM2140.

## 15.2 Tax relief schemes and arrangements

Section 809ZG(1) ITA provides the general rule:

> Relief is not to be given under any provision of the Income Tax Acts to a person in respect of a payment of interest if
> [a] a tax relief scheme has been effected, or
> [b] tax relief arrangements have been made,

> in relation to the transaction under which the interest is paid.

Section 809ZG(2) is a small point:

> Subsection (1) applies whether the tax relief scheme is effected, or the tax relief arrangements are made, before or after the transaction.

I do not see how a transaction could take place before the scheme is effected, but it does not matter.

Section 809ZG(3) defines tax relief scheme:

> A scheme is a tax relief scheme in relation to a transaction for the purposes of subsection (1) if it is such that the sole or main benefit that might be expected to accrue to the person from the transaction is the obtaining of a reduction in tax liability by means of relief under the Income Tax Acts.

Section 809ZG(4) defines tax relief arrangements in the same way:

> Arrangements are tax relief arrangements in relation to a transaction for the purposes of subsection (1) if they are such that the sole or main benefit that might be expected to accrue to the person from the transaction is the obtaining of a reduction in tax liability by means of relief under the Income Tax Acts.

Section 809ZG(5) provides a commonsense definition of relief:

> In this section "relief" means relief by way of—
> (a) deduction in calculating profits or gains, or
> (b) deduction or set off against income.

Corporate Finance Manual provides:

> **39030. Artificial payments of interest: Sole or main benefit**
> [The manual summarises the legislation and continues:] The sole or main benefit test is an objective, rather than a subjective test: the subsection focuses on the result to be expected from the transaction rather than its purpose. (See *The Crown Bedding Co Ltd v CIR* 34 TC 107 at pp 115, 118-120, followed in *Ackland & Pratten Ltd v CIR* 39 TC 649 at p662, and approved in *CIR v Brebner* 43 TC 705 at p718).
> Ordinary borrowings involving funds, which are genuinely invested or

re-lent, are not affected because the tax relief on the interest paid is incidental to the transaction.

International Manual provides:

**509120. Section 787 ICTA 1988** [March 2007]
Part XVII ICTA 1988 includes various anti-avoidance provisions including Section 787. This restricts relief for interest paid under a scheme from which the sole or main benefit which might be expected to accrue is the reduction of tax resulting from the relief, including group relief. Although this appears to be a far reaching section which could be used against many avoidance schemes, its usefulness is somewhat restricted.
The provision was introduced to counteract a specific domestic avoidance scheme to get relief on 'manufactured' interest by paying interest in advance on a borrowing which was effectively immediately repaid. It is necessary to distinguish between an out-and-out avoidance scheme and a judiciously arranged borrowing scheme. The section is not, therefore, easily invoked but it may still be legitimate to use it in some cases involving intra-group funding transactions.

HMRC's reluctance to use the section goes back to an assurance given in Parliament:

**Mr. Robert Sheldon (financial secretary to the Treasury)**: The hon. Member for Guildford (Mr. Howell) rightly asked for some assurance that there would be no problems for innocent parties seeking arrangements whereby they undertook to pay interest for genuine business purposes. I can give the hon. Gentleman the assurance that those paying true interest for genuine business purposes will not be caught by this scheme. To give him the definition, which I think also deals with the question put by the hon. Member for Cirencester and Tewkesbury (Mr. Ridley), in a genuine commercial scheme the main benefit is to secure finance. If that is applicable, those people will not be caught by the main benefit test and they will be perfectly free to go about seeking and undertaking any transactions which fall within that definition.
The natural anxiety of the hon. Member for Guildford is that these matters are closely watched. I can give him that assurance. That is to the advantage of the kind of people mentioned in this debate so that we do not entrap those perfectly legitimate and proper cases where people are prepared to pay the interest and get it allowable against tax. We are

concerned about people who resort to some of those very peculiar devices of the kind which show an immense amount of ingenuity and, as the hon. Member for Guildford said, with such unfortunate results.[1]

## 15.3 Transfer pricing and thin capitalisation

The transfer pricing rules are in part 4 TIOPA, supplemented by the OECD transfer pricing guidelines which are nearly 400 pages long. That is a vast topic, and a full discussion would need many volumes. I focus on matters closest to the themes of this book. I only consider income tax and not corporation tax issues.

Assuming interest is paid at market rates, one would not expect any transfer pricing issues to arise. However the effect of some deft deeming provisions is that transfer pricing rules also serve as thin capitalisation rules, ie rules which restrict the deduction of interest by companies funded primarily by borrowing, having limited share capital or net value. It is therefore necessary to consider these rules in some detail.

The International Manual explains the background as it appears to HMRC:

> **542005. Definition of thin capitalisation** [March 2011]
> In the commercial world, a company is said to be thinly capitalised when it has more debt than equity. In transfer pricing, this definition is widened, though the issue may often be much the same. Many cases boil down to a company with more debt than it could and would have borrowed on its own resources, because it is borrowing either from or with the support of connected persons, but thin cap work extends to other terms and conditions of lending and borrowing such as the interest rate, the duration of loan, repayment terms, etc. Financial transfer pricing is a more appropriate term for the work described in this chapter. It is important to note then, that the amount of interest payable may be excessive for a combination of reasons - interest rate, excessive duration of lending, restrictions on repayment, etc - so all terms and conditions should be considered under the banner of thin capitalisation. Other less obvious issues are the appropriateness of the currency (e.g. forex risk) and the possible presence of guarantees. For HMRC, thin cap is shorthand for financial transfer pricing, looking at every aspect of lending and borrowing.

---

1 Hansard, 13 July 1976.

**Other legislation on finance**

There is other legislation - and this is not an exhaustive list - which may result in a restriction of the interest deduction, including:

- Arbitrage provisions - see INTM590000
- Unallowable purpose legislation - Section 441–442 CTA 2009 - see CFM38010
- Remaining provisions of Section 209 ICTA 1988 - now around Section 1000 CTA 2010 - such as interest in excess of a commercial rate of return - see below and CTM15502
- World-wide debt cap - Part 7 TIOPA 2010 - see CFM90100

The first two represent anti-avoidance legislation, so the choice depends on the facts and circumstances of the particular case. Section 155(6) TIOPA 2010 says that the Section 1000 CTA 2010 list and the world-wide debt cap legislation shall be disregarded when calculating the transfer pricing tax advantage. The debt cap applies after any transfer pricing adjustment has been made.

These provisions concern corporation tax only and are not discussed here. The Manual continues:

**Section 1000 CTA 2009 onwards (Section 209 ICTA 1988) - distributions in the form of interest**

While the main thin cap provision at Section 209(2)(da) ICTA 1988 was repealed in 2004, much of the section remains, dealing with payments which are interest in form but distributions in substance. These provisions are useful: they require no connection between borrower and lender, and are matters of substance and form rather than pricing. The legislation is now in the form of a list at Section 1000 CTA 2009, under the heading of "Meaning of Distribution", which is followed by a schedule at Section 1001 which lists subsequent sections that explain or supplement these summaries. Included are:

interest in excess of a commercial return - previously at Section 209(2)(d) ICTA 1988

- securities that are convertible into shares - previously at Section 209(2)(e)(ii) ICTA 1988
- interest that is dependent on the results of the borrower’s business - previously at Section 209(2)(e)(iii) ICTA 1988
- securities that are connected with shares - previously at Section 209(2)(e)(vi) ICTA 1988
- interest payable on an equity note issued to an associated company - previously at Section 209(e)(vii) ICTA 1988

These are covered in the Company Tax Manual. Links within INTM to other manuals may not be "live", but will work as search terms on the HMRC website, and possibly on internet search engines.

**How thin capitalisation arises**

When a company operates at arm's length from its sources of funding, commercial considerations drive the decision to raise funds either through debt, equity, or a mixture of the two. There is a marked difference in tax treatment between debt finance and equity, in that interest on debt is deductible from profits, whereas dividends on shares are not. This is explored in more detail in the Practical Thin Cap Guidance from INTM570000 onwards.

When a company borrows from or with the support of other group companies, funding decisions may not be driven by commercial considerations alone. The connection between the parties involved might allow them to change the way in which the funding is obtained in ways unavailable to the borrower at arm's length or to take on funding risks which an independent borrower would avoid. Factors such as group policy, strategy, and tax planning will sit alongside commercial considerations.

As a result of the differences in tax treatment between interest and dividends, a company which increases its indebtedness, and thereby increases its interest payments, reduces the tax it has to pay.

Thin capitalisation is just a form of transfer pricing, and is not limited to companies, except where the legislation says so, but this guidance concentrates on corporate relationships.

**Thin capitalisation and tax planning**

As with transfer pricing more generally, thin capitalisation does not have to find an avoidance motive. The aim of transfer pricing is to ensure that, for tax purposes, arm's length prices are charged for goods, services, etc. However, company finance is an easy and attractive way for groups to change the jurisdiction within which profits arise, and tax planning will be an aspect of the financing plans for any major corporate acquisition.

Corporate thin capitalisation is usually seen in a group context, since it would be counter-productive (though not unheard of) for a company to increase its interest costs payable to a third party, just to reduce its tax payable. Besides, a borrower cannot borrow more (or pay more interest) than an arm's length lender is willing to lend, unless that money is guaranteed by one or more persons who are connected with the borrower for transfer pricing purposes, usually group members. Where the borrowing is intra-group, the interest remains within the group; the group as a whole is no less profitable, but the borrower has paid less tax, and, where the lender is in a country with a lower corporation tax rate than the borrower or has losses to absorb interest received, the group can end up far better off overall.

With third party borrowing supported by a group guarantee, interest is paid to a third party and value leaves the group, but in that case the issue may be a matter of where it is most tax efficient for the group's interest costs to arise. The inference is that the world-wide group has capacity to borrow but not necessarily within the UK entity, which is where it wishes to place the debt. However, guarantees, including less formal support such as a letter of comfort, can enable a company to borrow more cheaply than would be possible on a standalone basis.

### 15.3.1 *"The basic pre-condition"*

Section 147 TIOPA provides:

> (1) For the purposes of this section "the basic pre-condition" is that—
> (a) provision ("the actual provision") has been made or imposed as between any two persons ("the affected persons") by means of a transaction or series of transactions,
> (b) the participation condition is met (see section 148),
> (c) the actual provision is not within subsection (7) (oil transactions), and
> (d) the actual provision differs from the provision ("the arm's length provision") which would have been made as between independent enterprises.

Thus the "basic pre-condition" actually consists of four conditions or sets of conditions.

Section 151(1) TIOPA defines **"arm's length provision"** in line with the commonsense usage above:

> In this Part "the arm's length provision" has the meaning given by section 147(1).

Section 150 TIOPA defines transaction:

> (1) In this Part "transaction" includes arrangements,[2] understandings and mutual practices (whether or not they are, or are intended to be, legally enforceable).

---

2 Section 150(5) TIOPA provides the standard, unnecessary definition of "arrangements": "In this section "arrangement" means any scheme or arrangement of any kind (whether or not it is, or is intended to be, legally enforceable)."

(2) References in this Part to a series of transactions include references to a number of transactions each entered into (whether or not one after the other) in pursuance of, or in relation to, the same arrangement.
(3) A series of transactions is not prevented by reason only of one or more of the matters mentioned in subsection (4) from being regarded for the purposes of this Part as a series of transactions by means of which provision has been made or imposed as between any two persons.
(4) Those matters are—
(a) that there is no transaction in the series to which both those persons are parties,
(b) that the parties to any arrangement in pursuance of which the transactions in the series are entered into do not include one or both of those persons, and
(c) that there is one or more transactions in the series to which neither of those persons is a party.

The International Manual provides:

**542040. Transaction or series of transactions** [March 2011]
... Mutual practices might include informal two-way trading arrangements between persons falling within the transfer pricing legislation.
Transactions within a series do not have to occur in a recognisable sequence. They may be simultaneous or removed in time from one another, but they have to be part of an overall arrangement or scheme.
The meaning of series of transactions is further widened by Section 150(4) TIOPA 2010, which sets out a number of situations that do not prevent a series of transactions being recognised as such. There may be a series of transactions, even if, in relation to the "affected persons" (INTM542020):
• there is no transaction in the series to which both those persons are parties,
• the parties to any arrangement in pursuance of which the transactions in the series are entered into do not include one or both of those persons, and
• there is one or more transactions in the series to which neither of those persons is a party
By recognising a series of transactions, the transfer pricing legislation can apply to more complex and indirect financial structures in the same way that it does to the most straightforward borrower/lender situation.
However, irrespective of the complexity or number of transactions which make up the "series", it should always be borne in mind that this

legislation is still about a provision within Section 147 TIOPA 2010 between two persons that results in a tax advantage. (INTM542020 and INTM542030)

A simple example of indirect finance which would fall within the definition of a series of transactions is a UK borrower being lent money by an entirely unconnected third party bank, with a party connected to the borrower guaranteeing the loan.

A more complex example is where a company in the same group as the UK borrower has provided a guarantee to one bank, which then provides a guarantee to a second bank, and the second bank then lends money to the UK borrower. Here there is a step - between the first and second banks - which does not involve either the parent or the borrower. This is still a series of transactions, and one which, though difficult to detect, would fall within the scope of the thin capitalisation legislation.

In cases such as these, the questions to ask in considering the provision are:

- Without the guarantee(s) would the borrower have been able and willing to borrow on these terms?
- Had the borrower and the guarantor been at arm's length from one another, would they have entered into the guarantee?

## 15.4 The participation condition

Section 148 TIOPA provides:

(1) For the purposes of section 147(1)(b), the participation condition is met if—

(a) condition A is met in relation to the actual provision so far as the actual provision is provision relating to financing arrangements, and

(b) condition B is met in relation to the actual provision so far as the actual provision is not provision relating to financing arrangements.

(2) Condition A is that, at the time of the making or imposition of the actual provision or within the period of six months beginning with the day on which the actual provision was made or imposed—

(a) one of the affected persons was directly or indirectly participating in the management, control or capital of the other, or

(b) the same person or persons was or were directly or indirectly participating in the management, control or capital of each of the affected persons.

(3) Condition B is that, at the time of the making or imposition of the actual provision—

(a) one of the affected persons was directly or indirectly participating in

the management, control or capital of the other, or
(b) the same person or persons was or were directly or indirectly participating in the management, control or capital of each of the affected persons.
(4) In this section "financing arrangements" means arrangements made for providing or guaranteeing, or otherwise in connection with, any debt, capital or other form of finance.

## 15.5 The general rule

If the"basic pre-condition" is met, we move on:

(2) Subsection (3) applies if—
(a) the basic pre-condition is met, and
(b) the actual provision confers a potential advantage in relation to UK taxation on one of the affected persons.

If that is the case we come to the general rule:

(3) The profits and losses of the potentially advantaged person are to be calculated for tax purposes as if the arm's length provision had been made or imposed instead of the actual provision.

Similarly if there are several affected persons:

(4) Subsection (5) applies if—
(a) the basic pre-condition is met, and
(b) the actual provision confers a potential advantage in relation to UK taxation (whether or not the same advantage) on each of the affected persons.
(5) The profits and losses of each of the affected persons are to be calculated for tax purposes as if the arm's length provision had been made or imposed instead of the actual provision.

The International Manual provides:

**542010. Introduction [March 2011]**
...Paragraph 1.65 of the OECD Transfer Pricing Guidelines is particularly helpful in finding the appropriate approach towards the arm's length provision in thin capitalisation cases. This says that the basic transfer pricing approach considers economic substance versus form in thin capitalisation cases:

> "[In cases] where the economic substance of a transaction differs from its form... the tax administration may disregard the parties' characterisation of the transaction and re-characterise it in accordance with its substance. An example of this circumstance would be an investment in an associated enterprise in the form of interest-bearing debt when, at arm's length, having regard to the economic circumstances of the borrowing company, the investment would not be expected to be structured in this way. In this case it might be appropriate for a tax administration to characterise the investment in accordance with its economic substance with the result that the loan may be treated as a subscription of capital."

This means that where a borrower obtains an actual loan of £100m from a non-arm's length source, but would only be able to borrow £60m at arm's length, the tax deduction for the interest costs should be restricted to those accruing on £60m of the £100m actually borrowed. The balance would have had to be provided in some other form, most likely as equity. This is not recharacterisation in the way that excessive interest was once reclassified as a distribution for tax purposes (see INTM542230). Debt which is found to be excessive may be treated as equity for the purposes of a thin cap analysis, but the interest on the £40m excess remains interest for tax purposes; it is simply disallowed in the computation.

There will be variations in the way debt is treated as equity. There may be negotiations which result in an amount of debt being recognised as serving an equity function, as if that debt had actually been permanently converted into equity, but there will be other instances, for example the application of a debt: equity ratio in an advance agreement, where equity will in effect vary from year to year.

This sort of "recharacterisation" should be uncontroversial, assuming the level of disallowance is agreed. It is a case of finding an explanation, should one be needed, for the presence and treatment of funds that have been deemed "excessive" in thin cap terms. However, if the argument goes further, for example towards saying that the transaction would not have taken place at all and something different would have happened at arm's length, it is recommended that the matter be discussed with Business International before the case is developed,

It is important to remember that thin capitalisation considerations are not limited to determining the amount which would have been borrowed at arm's length, but also extend to the other terms attached to the actual provision, such as the interest rate, duration and repayment terms. Any of these is capable of creating or extending a tax advantage for the UK borrower.

### 15.5.1 *Separate entity basis*

The International Manual provides:

> **542050. Separate entity basis for determining borrowing capacity**
> [March 2011]
> The separate entity principle comes from the basic precondition in Section 147(1)(d) TIOPA 2010 which defines the arm's length provision as that which would have been made as between independent enterprises. The arm's length borrowing capacity of the borrower is therefore the debt which it could and would, as a stand-alone entity, have taken on from an independent lender. It follows that in establishing the arm's length borrowing capacity of a particular borrower, it is necessary to consider the borrower separately from both the immediate grouping of which it is part and other members of the same global group. This is the "separate entity" or stand-alone basis for determining borrowing capacity.
> This approach is derived from OECD guidance, as expressed in 1.6 of the Transfer Pricing Guidelines:
>
> > By seeking to adjust profits by reference to the conditions which would have obtained between independent enterprises in comparable transactions and comparable circumstances, the arm's length principle follows the approach of treating the members of an MNE group as operating as separate entities rather than as inseparable parts of a single unified business. Because the separate entity approach treats the members of an MNE group as if they were independent entities, attention is focused on the nature of the dealings between those members.
>
> The main impact of the "separate entity" basis for determining borrowing capacity is that no account is taken of any guarantees, explicit or implicit, from connected companies (INTM542020). However, that is not the end of the story, as it is recognised that, even on a standalone basis, negotiations with a third party lender would include an assessment of the financial strength of the borrower, to inform the thinking of both parties. This would take into account the income, assets and liabilities within the borrower's subsidiaries. In broad terms, this will be based on the strength (or otherwise) of the borrower's consolidated balance sheet and profit and loss account, subject to some analysis of what underlies the figures on the face of the accounts. How this might be achieved would depend on the complexity of the situation.
> HMRC follows a practical approach and, if consolidated accounts are not drawn up as a matter of course, will request consolidated figures.

> There is no obligation on the borrower to produce audited consolidated accounts purely for HMRC, so properly drawn up schedules reflecting the consolidated position will be acceptable. This may not be a straightforward task if the exercise embraces companies resident in a number of countries and using a variety of accounting conventions. In such cases it may be helpful to discuss how HMRC may be satisfied without creating major expense and difficulty.
> There may be companies that need to be excluded from the homogenised group and dealt with according to their own characteristics e.g. finance companies which are likely to have higher proportions of debt than ordinary trading companies. Some subsidiaries may need to be excluded altogether e.g companies with a dividend block which a lender might not recognise as assets against which they would wish to lend. This whole question must be viewed pragmatically
> ...The separate entity principle for measuring borrowing capacity is illustrated by the following example.
> To determine the borrowing capacity of B Ltd, its results are consolidated with those of UK sub Ltd and the two overseas Subs. (INTM578050).
> A, C and D Ltd are not taken into account when measuring the borrowing capacity of B Ltd. However, as a separate matter, in the event that interest on the loan is found to be excessive and is disallowed because the borrowing capacity of B Ltd (including its subsidiaries) would not support the full amount of the loan from Overseas Lender, it may be possible for A, C or D Ltd to make a claim as guarantors under Section 192 TIOPA 2010, if they have assets not already pledged elsewhere....

## 15.6 "Differ from the provision that would have been made"

Section 151(2) TIOPA provides:

> For the purposes of this Part, the cases in which provision made or imposed as between any two persons is to be taken to differ from the provision that would have been made as between independent enterprises include the case in which
> [a] provision is made or imposed as between two persons but
> [b] no provision would have been made as between independent enterprises;
> and references in this Part to the arm's length provision are to be read accordingly.

The International Manual provides:

**542012. The "would" and "could" arguments** [March 2011]
The test of thin capitalisation is to compare the actual borrowing position with the arm's length borrowing position.
The arm's length principle recognises that connected parties have the opportunity to enter into transactions with each other on terms which differ from those which would be found in the open market between entirely unconnected persons. Where profits arise and where (and how much) tax is paid may also differ from the arm's length position.
The application of the arm's length principle requires a judgement on the merit of each individual case to establish what would have happened at arm's length; the terms on which the company in question:
- could have borrowed and would have borrowed (if anything), as a separate entity
- from a third party lender unconnected with the borrower, and
- without guarantees or other forms of comfort from any party connected with the borrower.

There are two main ways of looking at the borrowing: what the lender would do and what the borrower would do if the circumstances were as outlined above, and these are expressed as:
- the "could" argument - what a lender would have lent and therefore what a borrower could have borrowed - and
- the "would" argument - what a borrower acting in the best interests of their own business would have borrowed.

**The "could" argument**
This is generally the less subjective issue. The could argument focuses on what a lender would be prepared to lend to the company and on what terms, taking into account the borrower's capacity to borrow, the risk of default, assets (as security) and liabilities (additional drains on the borrower's resources), and its ability to service the debt: in short, how much and on what terms a lender would lend.
Risk elements will include amount, duration of lending, purpose, security, currency and the economic climate at a sector, national and international level.
**The "would" argument**
This issue is more subjective, since it can involve the whole basis on which the business is run. The "would" argument considers the borrower's perspective: whether the borrower would have entered into the actual transaction in the absence of a special relationship. Therefore, when trying to establish the amount and terms of arm's length debt, the "would" argument relates to how much, and on what terms, the borrower would have borrowed at arm's length bearing in mind the sort of issues

mentioned below.

So, the "would" argument requires analysis of the terms which a borrower would have agreed at arm's length, such as

- the amount of debt, and whether that leaves headroom to allow the borrower to absorb cyclical or seasonal variations, an unforeseen event or a fluctuation in interest rates or profits, and ultimately repay the principal;
- the costs of borrowing, and whether forecasts indicate that the borrower is likely to be able to service the debt fully and still have sufficient cash to operate as a profitable going concern;
- whether the other terms, such as the interest rate or provision for early repayment are ones to which the borrower would have agreed in the absence of a special relationship;
- whether the borrower would have taken out the loan at all.

Consideration of the "could" and "would" arguments should highlight situations such as where

- an arm's length interest rate is being applied, but the amount of debt is more than the borrower could have borrowed from an independent lender, or
- an arm's length interest rate is applied to an arm's length amount of debt, but the borrower appears to have no purpose of its own for borrowing the money (and therefore no reason to borrow other than the group relationship).

Debt is not necessarily paid down to nil. A certain level of debt is acceptable, even desirable in most companies, and while higher levels of acquisition debt tend to be reduced in the years following the transaction, there is likely to be a level of debt appropriate to the needs of the business, year on year, appropriate to achieving the right balance between debt, equity and profitability.

## 15.7 Securities (loans)

Section 152 TIOPA provides:

(1) This section applies where—
(a) both of the affected persons are companies, and
(b) the actual provision is provision in relation to a security issued by one of those companies ("the issuing company").
(2) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring account to be taken of all factors, including—

(a) the question whether the loan would have been made at all in the absence of the special relationship,
(b) the amount which the loan would have been in the absence of the special relationship, and
(c) the rate of interest and other terms which would have been agreed in the absence of the special relationship.

The International Manual provides:

**542015. Summary of sections specific to thin capitalisation** [March 2011]
There are specific sections within Part 4 TIOPA 2010 that apply only to loans between two companies:
- Section 152 TIOPA 2010 requires certain factors to be considered when comparing the arm's length provision with the actual provisions in Section 147(1)(d) TIOPA 2010. INTM542080
- Section 181 TIOPA 2010 to Section 184 TIOPA 2010 sets out the conditions required for a lender to make a valid compensating adjustment claim where a disallowance has been made in the borrower's computations. INTM542110
- Section 153 TIOPA 2010 deals with the factors that are taken into account when a loan is supported by a guarantee, and the borrower and the guarantor have a special relationship. INTM542130
- Section 191 TIOPA 2010 to Section 194 TIOPA 2010 sets out the conditions required for a guarantor to make a valid compensating adjustment claim. INTM542120

**Non-corporates**
Part 4 TIOPA 2010 applies to loans made to companies by non-corporates where the participation condition in Section 148 TIOPA 2010 is met. However, the explicit instructions regarding factors to be considered as part of evaluating the arm's length provision in Section 152 TIOPA 2010 and Section 153 TIOPA 2010 do not apply as legislation to loans by non-corporates. Even so, the factors that are set out in Section 152 TIOPA 2010 and Section 153 TIOPA 2010 are generally those which are taken into account by lenders and borrowers acting at arm's length, so in practice the nature of the lender, corporate or non-corporate will have little if any impact on how the arm's length provision is determined.
Claims for compensating adjustments by non-corporates can be made under the conditions in Section 174 TIOPA 2010 to Section 178 TIOPA 2010.

### 15.7.1 *Disregard: Non-business loans*

Section 152(3) TIOPA introduces two disregards:

> Subsection (2) has effect subject to subsections (4) and (5).

Section 152(4) TIOPA provides:

> (4) If—
> (a) a company ("L") makes a loan to another company with which it has a special relationship, and
> (b) it is not part of L's business to make loans generally,
> the fact that it is not part of L's business to make loans generally is to be disregarded in applying subsection (2).

Why is this needed? The International Manual explains:

> **542080. Special rules for lending between companies** [March 2011]
> ...It might be arguable that at arm's length a company that is not generally in the business of making loans would not lend to another party under any circumstance. Section 152(4) TIOPA 2010 ensures that the fact that the lender is not generally in the business of making loans cannot be taken into account when evaluating the terms.

### 15.7.2 *Disregard: guarantee*

Section 152(5) TIOPA provides:

> (5) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring that, in the determination of any of the matters mentioned in subsection (6), no account is to be taken of (or of any inference capable of being drawn from) any guarantee provided by a company with which the issuing company has a participatory relationship.
> (6) The matters are—
> (a) the appropriate level or extent of the issuing company's overall indebtedness,
> (b) whether it might be expected that the issuing company and a particular person would have become parties to a transaction involving—
> (i) the issue of a security by the issuing company, or

(ii) the making of a loan, or a loan of a particular amount, to the issuing company, and

(c) the rate of interest and other terms that might be expected to be applicable in any particular case to such a transaction.

Section 153 TIOPA repeats the same material:

(1) This section applies where the actual provision is made or imposed by means of a series of transactions which include—
(a) the issuing of a security by a company which is one of the affected persons ("the issuing company"), and
(b) the provision of a guarantee by a company which is the other affected person.
(2) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring account to be taken of all factors, including—
(a) the question whether the guarantee would have been provided at all in the absence of the special relationship,
(b) the amount that would have been guaranteed in the absence of the special relationship, and
(c) the consideration for the guarantee and other terms which would have been agreed in the absence of the special relationship.
(3) Subsection (2) has effect subject to subsections (4) and (5).
(4) If—
(a) a company ("G") provides a guarantee in respect of another company with which it has a special relationship, and
(b) it is not part of G's business to provide guarantees generally,
the fact that it is not part of G's business to provide guarantees generally is to be disregarded in applying subsection (2).
(5) Section 147(1)(d) [the actual provision differs from the arm's length provision] is to be read as requiring that, in the determination of any of the matters mentioned in subsection (6), no account is to be taken of (or of any inference capable of being drawn from) any guarantee provided by a company with which the issuing company has a participatory relationship.
(6) The matters are—
(a) the appropriate level or extent of the issuing company's overall indebtedness,
(b) whether it might be expected that the issuing company and a particular person would have become parties to a transaction involving—
(i) the issue of a security by the issuing company, or
(ii) the making of a loan, or a loan of a particular amount, to the issuing

company, and
(c) the rate of interest and other terms that might be expected to be applicable in any particular case to such a transaction.

The International Manual provides:

**542090. Guarantees - what they do and what they are** [March 2011]
As explained in INTM542040, a provision may arise from a series of transactions rather than just a single transaction between two connected companies. In the context of thin capitalisation, a loan and a guarantee from a connected person constitute a provision consisting of a series of transactions. The most common instance will be a single loan supported by a single guarantee but the provision could consist of any number and combinations of loans and cross guarantees.

**The effect of a guarantee**
Guarantees most commonly support third party borrowing, but can be used to support loans between group companies: for example, a European group treasury company might provide finance to a fellow group company resident in the UK, but under guarantee from the UK borrower's parent company.

With the additional comfort offered to the lender by a guarantor, the lender might provide a loan on more advantageous terms than the borrower could have obtained otherwise, because the guarantee will reduce the risk to the lender. In the event of a failing borrower and no guarantee, a third party lender's prospects of recovering its outlay would be at risk. However, with a guarantee in place, the lender should have greater and more immediate success in recovering debt and interest, simply by exercising its rights under the guarantee and seeking payment from the guarantors, than it would by waiting for a distribution of assets in a liquidation, or having to write off all or part of the loan. The guarantor would of course have to demonstrate that it could make good its pledge, and probably provide security in relation to its commitment.

The effect of a guarantee on loan terms is varied. Guarantees may help secure:

- A larger loan
- A lower rate of interest
- An increase in duration
- Less demanding covenants on the borrower

Any of these may have implications for the transfer pricing of the transaction e.g. a larger loan may be obtainable, but it may be more than the borrower would be able or willing to take on at arm's length. Also, the guarantee may secure preferable terms as compared to what would be otherwise on offer. A lower interest rate on a larger amount of debt might be regarded as a more attractive and not a more expensive deal. See INTM542100.

The presence of a guarantee does not necessarily signify a change in lending terms, and in any case larger, longer, etc, do not mean "better" for the borrower; a larger loan may be more than the borrower would or could borrow without this help, and therefore more than the borrower could or would borrow at arm's length. Lenders may seek guarantees as part of a belt and braces approach, a typical example being the cross guarantees required by lenders when they lend to a group of companies.

**542100. Evaluating guarantees: starting with the arm's length cost of debt** [March 2011]

Section 153 TIOPA 2010 (Paragraph 1B Schedule 28AA) deals with the pricing of guarantees between connected companies. It adopts a similar approach to the way transfer pricing of securities between companies operates - see Section 152 TIOPA 2010 (INTM542080). However to understand how the section works it is better to start by looking at the factors that have to be disregarded before looking at the factors that are specifically to be taken into account.

Section 153(4) TIOPA 2010 has the same effect for guarantees as Section 152(4) TIOPA 2010 has for loans. It ensures that where the guarantor is not generally in the business of making guarantees, that circumstance cannot be taken into account when evaluating what the guarantee fee would be at arm's length.

Section 153(5) and (6) TIOPA 2010 ensure that guarantees from connected companies are ignored, so that the borrower's borrowing capacity is evaluated on a separate entity basis (INTM542050). These subsections repeat what was said at Section 152(5) and (6) TIOPA 2010, except with different intent. Section 152 is about how the arm's length provision is calculated for the borrower, for the purposes of testing whether a security is on arm's length terms. Section 153 repeats the same test, but as a precursor to working out whether a guarantee has an arm's length value. The exercise should isolate the effect of the guarantee e.g. has it provided access to a larger loan than would have been taken on at arm's length?

Looking at the loan whilst ignoring the effect of any guarantees establishes the amount the borrower would have been able to borrow in its own right, and the terms on which it would have done so. The legislation specifically states that guarantees should be disregarded in considering the following specific issues:

- the level or extent of overall debt
- whether a loan would have been entered into
- the rate of interest or other terms

Once this is established, the legislation considers the transfer pricing of the guarantee fee itself - see INTM542105.

**542105. Establishing the arm's length value of a guarantee** [March 2011]

Establishing the arm's length value of a guarantee

This is about guarantee fees and their worth to the borrower: where the borrower is actually charged for the provision of a guarantee. This is therefore about:

- what value the guarantee brings to the borrower
- whether that guarantee gives the borrower improved terms over and above what it could obtain on a separate entity basis i.e. without the support of any but its own subsidiaries.
- What is the appropriate level for the guarantee fee

Section 153 (Paragraph 1B) first establishes the arm's length price of the loan without guarantees. This does not necessarily mean that guarantees will be ignored in pricing the debt. In considering what guarantee, if any, would have been provided at arm's length. Section 153(2) TIOPA 2010 (formerly Paragraph 1B(2) Schedule 28AA ICTA 1988) asks that "all factors" be taken into account in working this out, and particularly asks what would have happened in the absence of the special relationship between the borrower and the provider of the guarantee (i.e. at arm's length):

- would the guarantee have been provided at all
- what amount would have been guaranteed
- what consideration (fee, etc) and other terms would have been agreed

This is simply a matter of applying a transfer pricing test to guarantee costs.

At arm's length, a company will not take on the extra cost of a guarantee unless that guarantee makes the overall cost of finance cheaper than it would be on a stand-alone basis. If the cost of the guarantee itself is greater than the saving it brings, it will be disallowed to the extent that it causes the total finance costs relating to the guaranteed debt to exceed the stand-alone arm's length price.

The scenarios below set out how Section 153 TIOPA 2010 operates for the borrowing company. "Cost of loan" refers to actual costs of borrowing excluding guarantee fees and not adjusted by transfer pricing provisions. These scenarios will not indicate the arm's length price of a guarantee, but will show whether the guarantee has brought a benefit to its holder.

1. Guarantee fee charged and cost of loan exceeds arm's length

The borrower is already paying more than it would if borrowing on a separate entity basis. In arm's length terms, the value of the guarantee is nil and it simply represents an additional cost. The terms of the loan are adjusted for transfer pricing purposes to the arm's length amount, and the guarantee is disregarded. Not only will the non-arm's length element of the loan cost be disallowed, so will the whole of the guarantee fee. There is no apparent benefit from this guarantee, so any claim that there is value meriting a guarantee fee should be subject to a thorough analysis to identify if the guarantee provides any other, less obvious commercial benefit that would justify the payment of a fee. A guarantee might enable a borrower to spread its finance costs over a longer period, which might be advantageous in certain circumstances.

2. Guarantee fee charged and cost of loan is equal to the arm's length

The cost of the loan is arm's length so no adjustment is required with respect to loan costs, but as in 1. above, it would be difficult to justify a guarantee fee. The guarantee fee would be disallowed.

3. Guarantee fee charged and cost of loan is less than arm's length

This situation may arise where the guarantee is taken into account in setting the terms of the loan. For example, the presence of the guarantee may improve the credit rating of the borrower and achieve a reduction in the interest rate. As the guarantee has reduced the cost of the loan to below the stand-alone cost, there is a clear benefit to the borrower in entering into the guarantee. It is therefore likely that at arm's length a fee would be paid, as there is a genuine benefit. However, the borrower would only agree to pay a fee at arm's length if there was an overall saving, and the level of the fee should reflect this.

4. No guarantee fee charged and cost of loan is less than arm's length

Where there is a guarantee in place but no fees have been charged, the guarantee may still provide the borrower with beneficial terms, such as a reduced interest rate. The arm's length cost of the loan will exceed the actual cost of the loan, because the guarantee reduces finance costs without itself costing anything. It might be argued that, at arm's length, a fee would be charged for such an effective guarantee, but one may not be imputed because transfer pricing legislation operates as a one way street. This scenario creates no tax advantage, so the basic transfer pricing conditions are absent. Of course if the guarantor negotiated a fee, that would be considered on its merits.

Evaluating the arm's length value of a guarantee fee should be more than a simple mathematical comparison of actual and arm's length costs. It is worth emphasising that all relevant factors should be considered:

- the obligations of the guarantor
- its ability to fulfil them
- an analysis of the improvement to the borrower's credit worthiness
- consideration as to whether the guarantee brings the borrower something beyond the implicit parental or group support provided by passive association with fellow group members.

> It may be that the benefits provided by a guarantee, particularly informal understandings, are such that a guarantee fee would not normally be justified. Furthermore where the guarantor is unable to honour its commitments under the guarantee because of the state of its own finances, the guarantee will in practice have no value.

## 15.8 Definitions

### 15.8.1 *Special relationship*

Section 154 TIOPA provides some definitions introduced by s.154(1)

> Subsections (3) to (7) apply for the purposes of sections 152 and 153....

Section 154(3) TIOPA provides:

> "Special relationship" means any relationship by virtue of which the participation condition is met (see section 148) in the case of the affected persons concerned.

The term "special relationship" is used in the OECD model treaty without definition (though discussed in the commentary) but the definition here is narrower.

### 15.8.2 *Guarantee*

Section 154(4) TIOPA provides:

> Any reference to a guarantee includes—
> (a) a reference to a surety, and
> (b) a reference to any other relationship, arrangements, connection or understanding (whether formal or informal) such that the person making the loan to the issuing company has a reasonable expectation that in the event of a default by the issuing company the person will be paid by, or out of the assets of, one or more companies.

The International Manual has an interesting passage on implicit guarantees which is not set out here as it is not relevant to the themes of this book.

### 15.8.3 *Participatory relationship*

Section 154(5) TIOPA provides:

> One company ("A") has a "participatory relationship" with another ("B") if—
> (a) one of A and B is directly or indirectly participating in the management, control or capital of the other, or
> (b) the same person or persons is or are directly or indirectly participating in the management, control or capital of each of A and B.

### 15.8.4 *Security*

Section 154 TIOPA provides:

> (6) "Security" includes securities not creating or evidencing a charge on assets.
> (7) Any—
> (a) interest payable by a company on money advanced without the issue of a security for the advance, or
> (b) other consideration given by a company for the use of money so advanced,
> is to be treated as if payable or given in respect of a security issued for the advance by the company, and references to a security are to be read accordingly.

Subsection (6) is standard form. However subsection (7) means that all loans are "securities." It would have been clearer to use the word "loan" rather than to (mis)use the word "securities", but there it is.

## 15.9 Potential advantage in relation to UK taxation

Section 155 TIOPA provides:

> (1) Subsection (2) applies for the purposes of this Part.
> (2) The actual provision confers a potential advantage on a person in relation to UK taxation wherever, disregarding this Part, the effect of making or imposing the actual provision, instead of the arm's length provision, would be one or both of Effects A and B.
> (3) Effect A is that a smaller amount (which may be nil) would be taken for tax purposes to be the amount of the person's profits for any

chargeable period.
(4) Effect B is that a larger amount (or, if there would not otherwise have been losses, any amount of more than nil) would be taken for tax purposes to be the amount for any chargeable period of any losses of the person.

### 15.9.1 *Disregarded income*

Section 155(5) provides a disregard for disregarded income:

> In determining for the purposes of subsection (3) or (4) the amount that would be taken for tax purposes to be the amount of the profits or losses for a year of assessment in the case of a non-UK resident, there is to be left out of account any income of that person which is—
> (a) disregarded income within the meaning given by section 813 of ITA 2007 (limits on liability to income tax of non-UK residents), or
> (b) disregarded company income within the meaning given by section 816 of that Act.

Subsection (6) provides two more disregards:

> (6) For the purposes of subsections (2) to (4)—
> (a) Part 7 (tax treatment of financing costs and income), and
> (b) paragraph E of the list in section 1000(1) of CTA 2010 (excessive interest etc treated as a distribution),
> are to be disregarded.

## 15.10 Exemption for small companies

Section 166 TIOPA provides what appears to be a general exemption, which is then restricted by significant exceptions.

> (1) Section 147(3) and (5) do not apply in calculating for any chargeable period the profits and losses of a potentially advantaged person if that person is a small or medium-sized enterprise for that chargeable period (see section 172).

Section 166(2) provides the signposts in accordance with the dictates of plain english drafting:

> (2) Exceptions to subsection (1) are provided—

(a) in the case of a small enterprise, by section 167, and
(b) in the case of a medium-sized enterprise, by sections 167 and 168.

## 15.11 Election into transfer pricing regime

I mention the first exception only for completeness. Section 167(1) TIOPA provides:

> (1) Subsections (2) and (3) set out exceptions to section 166(1).
> (2) The first exception is if the small or medium-sized enterprise elects for section 166(1) not to apply in relation to the chargeable period. Any such election is irrevocable.

Why would anyone would want to elect into the regime?

## 15.12 Resident of non-qualifying territory

The next exception is more important. Section 167 TIOPA provides:

> (3) The second exception is if—
> (a) the other affected person, or
> (b) a party to a relevant transaction,
> is, at the time when the actual provision is or was made or imposed, a resident of a non-qualifying territory (whether or not that person is also a resident of a qualifying territory).

Section 167(4) TIOPA provides some general definitions:

> For the purposes of subsection (3)—
> (a) a "party to a relevant transaction" is a person who, if the actual provision is or was imposed by means of a series of transactions, is or was a party to one or more of those transactions, and
> (b) "qualifying territory" and "non-qualifying territory" are defined in section 173.

Resident is based on the OECD model definition. Section 167(5) TIOPA provides:

> In subsection (3) "resident", in relation to a territory—
> (a) means a person who, under the law of that territory, is liable to tax there by reason of the person's domicile, residence or place of

management, but
(b) does not include a person who is liable to tax in that territory in respect only of income from sources in that territory or capital situated there.

## 15.13 Qualifying Territory

Section 173 TIOPA provides:

> (1) In section 167(3)—
> "non-qualifying territory" means any territory which is not a qualifying territory, and
> "qualifying territory" means—
> (a) the UK, or
> (b) any territory in relation to which condition A or condition B is met.

I refer to **"qualifying territory conditions A and B"** to avoid confusion with the myriad conditions in TIOPA.

### 15.13.1 *Qualifying territory conditions A and B*

Section 173 TIOPA provides:

> (2) Condition A is that—
> (a) double taxation arrangements have been made in relation to the territory,
> (b) the arrangements include a non-discrimination provision, and
> (c) the territory is not designated as a non-qualifying territory for the purposes of this subsection in regulations made by the Treasury.
> (3) Condition B is that—
> (a) double taxation arrangements have been made in relation to the territory, and
> (b) the territory is designated as a qualifying territory for the purposes of this subsection in regulations made by the Treasury.

Non-discrimination provision has a commonsense definition:

> (4) For the purposes of subsection (2)(b) a "non-discrimination provision", in relation to any double taxation arrangements, is a provision to the effect that nationals of a state which is a party to those arrangements (a "contracting state") are not to be subject in any other

contracting state to—

(a) any taxation, or

(b) any requirement connected with taxation,

which is other or more burdensome than the taxation and connected requirements to which nationals of that other state in the same circumstances (in particular with respect to residence) are or may be subjected.

(5) In subsection (4) "national", in relation to a state, includes—

(a) any individual possessing the nationality or citizenship of the state, and

(b) any legal person, partnership or association deriving its status as such from the law in force in that state.

(6) In this section "double taxation arrangements" means arrangements that have effect under section 2(1) (double taxation relief by agreement with territories outside the UK).

CHAPTER SIXTEEN

# SAVINGS AND INVESTMENT INCOME

## 16.1 Savings and investment income – Introduction

Savings and investment income is charged under Part 4 ITTOIA (occasionally supplemented other provisions). Interest, dividends and royalties each need a chapter to themselves. This chapter contains some general comments and deals with some remaining categories of savings income.

It is necessary to identify the charging provision for each type of income in this category and consider:

(1) When is a receipt "income" in nature and when is it capital?
(2) What is the source of the income?
(3) Where is the source?

These are distinct (though sometimes related) questions. They are generally governed by case law, though occasionally statute chips in.

## 16.2 Why does "capital *v.* income" matter?

*"Income tax is a tax on income."* This slogan is less true now than when it was formulated in 1900; but the question whether a receipt is "income" in the hands of the recipient remains important. References to "income" in tax legislation do not include capital receipts unless statute expressly so provides (which it often does).

This issue often arises in the context of distributions from trusts and non-resident companies, where the income/capital distinction is fraught.

## 16.3 Why does source of income matter?

The classification of the source of income is important because different rules apply to income with different types of source. In particular, it may be necessary or helpful to identify the source of income before one goes on to identify the location of the source.

There is no statutory definition of "source". The word is too basic to be usefully defined. The word has been paraphrased as "origin"[1] and "chief" or "originating" cause[2] but these paraphrases are of no practical assistance.

## 16.4 Why does location of source matter?

The question of the geographical location of a source of income is fundamental to the territorial scope of income tax.

Section 368 ITTOIA provides:

> (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
> (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK.

This is a statutory statement of a principle which was formerly in part in the statute and (where absent) was inferred by the courts.[3] It rests ultimately on a principle of international tax law.[4]

---

1 *Hart v Sangster* 37 TC 231 at p.235.

2 *IRC v Philips' Gloeilampenfabrieken* [1955] NZLR 868.

3 ITTOIA EN Vol II explains:

"29. ...Since *Colquhoun v Brooks* 2 TC 490 the courts have followed Lord Herschell's judgment that (page 499):

> The Income Tax Acts, however, themselves impose a territorial limit, either that from which the taxable income is derived must be situate in the UK or the person whose income is to be taxed must be resident there.

30. Whether Lord Herschell's words referred to the statutory rules of the time or to a general statement of the law, it is as the latter that they have been subsequently applied by the courts. For example in *Perry v Aston* 19 TC 255 Lord Russell of Killowen states (page 280):

> There must, of course, be the necessary limitation which is inherent in all our Income Tax legislation, namely, that what is taxed under or by virtue of this provision can only be either (1) income which is here, or (2) income of a person resident here.

31. Additionally there is the general principle of UK law that, unless the contrary intention appears, an enactment is taken as not applying to matters outside the UK."

4 "The jurisdiction to impose income tax is based either on the relationship of the income (tax object) to the taxing state (commonly known as the source or situs principle) or the relationship of the taxpayer (tax subject) to the taxing state based on

Secondly, income must have a source outside the UK to qualify as RFI and so to qualify for the remittance basis.

Statute formerly used a variety of expressions[5] but now the standard terms are: "source in/outside the UK" or "income arising in/outside the UK"; these expressions are synonymous.

Different considerations naturally apply to locating the source of different kinds of income.

The concept of the location of income is sometimes said to be misconceived:

> Income itself does not have a geographical location.[6]

It seems to me that this is an overstatement.[7] In most cases it is proper to say that income has a location, and easy to identify it, as the same passage goes on to state:

> By long standing convention, however, income is assigned a geographical location by reference to the location of the assets and activities that are used to generate the income. When all of those assets and activities are located in one State, that State may be considered to be the unambiguous source of the income.

The problem is how to identify the location in harder cases. The passage continues:

---

residence or nationality. Under the source principle, a State's claim to tax income is based on the State's relationship to that income. For example, a State would invoke the source principle to tax income derived from the extraction of mineral deposits located within its territorial boundaries. Source taxation is generally justified on the ground that the State has contributed to the creation of the economic opportunities that allow the taxpayer to derive income generated within the territorial borders of the State. Of course, jurisdiction to tax is also about power, and a State generally has the power to tax income if the assets and activities that generated it are located within its borders...." (United Nations Manual for the Negotiation of Bilateral Tax Treaties between developed and Developing Countries) 2003.

5 e.g. in section 65 ICTA 1988 (repealed) the test was whether a possession or security was "out of the UK", but that meant "having a source out of the UK"; see ITTOIA EN Vol II para 1642.

6 Para 2, United Nations Manual for the Negotiation of Bilateral Tax Treaties between developed and Developing Countries) 2003.

7 Contrast the view that the situs of a chose in action is fictional, which is rejected in 70.1 (Concepts of situs).

> ... When some of the assets or activities generating income are located in more than one State, the source of the income is less clear. For example, business profits derived from the manufacture of goods in State A and their sale in State B have a significant relationship to State A and to State B. In these circumstances, some rules for determining source are needed.

An American scholar makes the same point:

> ... the source of income is difficult to define. In fact, many public finance economists would claim that the concept lacks meaning in the majority of cases... the problem has been partially solved by arbitrary rules. ... Economists argue that defining the true economic source is almost impossible, because income has contributions from many countries.[8]

In more complex matters, where several states are involved, it is clearly correct that there is no (economically) "true" source of income. However tax law must somehow choose connecting factor(s) to link a source to a state. In principle, it does not matter what the rule is, as long as there is some rule and its application is clear. There are many possible connecting factors, and the selection of the determining factor(s) must to some extent be arbitrary.

The IT rules for the location of an income source are different from the situs of asset rules for IHT/private international law.[9] It would aid clarity of thinking not to use the same word, situs, in both contexts, so in this book I prefer to use the term "**location**" of a source of income (abbreviated to location of income) and keep *situs* for IHT/international law concepts and CGT. But the usage of "situs" in an income tax context is too well established to alter easily, and no real difficulty ought to arise as long as one bears in mind that IHT/international law situs of assets, and IT location of source of income, are different concepts (though the rules often overlap.) "Locality of income" is sometimes used as a synonym of location of a source of income.

The location of a source is also important for double tax treaties.[10] However DTAs sometimes lay down their own rules for locating a source

8 Reuven Avi-Yonah, *International Tax as International Law*, Cambridge University Press (2007), p.27, 38

9 See 70.1 (Concepts of situs).

10 See "Treaty Problems Relating to Source" [1998] BTR 222.

(for treaty purposes) so it may be necessary to distinguish between domestic law source location and treaty-source location.

### 16.4.1 *Formal* v. *substantive source rules: the policy background*

An American scholar draws an interesting distinction between formal and substantive rules for determining the location of a source of income. This is helpful in identifying the policy issues behind the framing of location of source rules:

> Source rules fall into two basic categories. The first category comprises formal rules. These rules do not attempt to trace the economic source of the income, but rather seek to achieve administrative ease and certainty. For example, the source rule for dividends is residence of the payor. Consider the following example demonstrating the formal rule: Suppose a foreign corporation exists and all of its income is earned in the United States - it has no other business activity.[11] From an economic perspective, it is clear that a dividend paid by this foreign corporation to its shareholders is U.S.-source. But it is foreign-source under the dividend rule, because the payor is a foreign corporation. Notice also that this means that the source of dividend income is under the control of the taxpayer ... The main reason behind this rule is that it is administratively hard to tax a dividend from a foreign corporation to foreign shareholders, but easy to tax a dividend from a U.S. corporation. The rule for interest is also a formal rule, and it is the same as the rule for dividends - the residence of the payor. This is fortunate because of the difficulty of distinguishing debt from equity in many cases; at least the source rule is the same. ...
>
> The other kind of source rule is the substantive rule, which attempts to trace the economic source of the income. The first one of these is the rule for royalties, ... No universal consensus exists about what the source rule for royalties should be. Many countries have a source rule for royalties that focuses on the residence country; the place of ownership of the underlying copyright or the place of production (research and development). The American rule is a place of use rule, meaning that it focuses on where the copyright or patent is utilised. ...
>
> There are other categories in which a substantive rule applies. In services, for example, the place of delivery of service controls. In many

11 Author's note: In the USA a foreign corporation is non-resident: there is no central management and control test for corporate residence.

cases, it is not so easy to determine the place of delivery of service, either, because many high value-added services can now be delivered over long distances. In the past, when these rules were formulated, most services were delivered at the same place they were consumed, because physical proximity between the service provider and service consumer was necessary. Although that continues to be true for certain services - you cannot have long-distance haircuts - most services today (including teaching and legal and medical services) do not require such physical proximity. A disjunction may therefore exist between the place of delivery of the service and the place of receipt of the service that did not exist at the time the rules were formulated. Nevertheless, the rule continues to state that the place of delivery controls; in other words, the place where the service provider is located prevails. ...

The basic difference between formal rules and substantive rules is that the formal rules require one single determination (residence of the payor, residence of the seller, or passage of title), whereas substantive rules attempt to trace the economics of the transaction. Formal rules are generally relatively easy to administer, from both the IRS perspective and the taxpayer's perspective, whereas substantive rules may involve much more difficult determinations. For example, in the case of patents and copyrights, the rule requires determination of the location of use, which may be difficult to determine if it is used in many countries: it may be difficult to break up the income into where the service was actually delivered. Not all substantive rules are difficult to administer: real estate is relatively easy because the location of real estate governs residency, and location is simply to determine in real estate. Most of the important applications of substantive rules, however, are difficult to administer and are more difficult for the taxpayer to avoid because the formal rules are much more under the taxpayer's control.[12]

### 16.4.2 *Location of source of income when there is no source*

It was once the case that income tax was charged only on income from sources specified in the schedules, so in the absence of a source of income there could be no income tax. This is no longer so:

Income tax is traditionally a source-based annual tax, liability depending upon the existence of a source of income falling under one of the

12 Reuven Avi-Yonah, *International Tax as International Law*, Cambridge University Press (2007), p.42

> Schedules during the year of assessment (see *Brown v National Provident Institution* 8 TC 57). ...
> It is, however, no longer true to say that liability to income tax depends upon the existence during the year of assessment of a source within the charge. There are cases (such as post-cessation receipts) when liability depends upon the existence of income defined by reference to a source which does not exist within the year of assessment. Or liability may depend upon an event, such as a balancing charge on the sale of an asset which has attracted a capital allowance, or the receipt of a capital sum from a particular kind of transaction, which is deemed to be taxable income received in that year of assessment or sometimes spread over several years of assessment.[13]

ITTOIA EN Vol II para 1639 notes that:

> Such chargeable amounts [capital receipts subject to income tax] could not therefore be said to derive from a "source" in the traditional sense.

ITTOIA EN was concerned that this might cause difficulty in finding the location of the source:

> 1640. Although the definition [of RFI] uses "income which arises from a source" in respect of all income within the definition, specific rules have been added, in view of Lord Hoffmann's remarks [set out above], in sections 428(3) (deeply discounted securities) and 658(2) (beneficiaries' income from estates in administration), to attribute a foreign source to the income in question to ensure that there is no doubt that the definition applies to these provisions.

Accordingly, s.368(3) ITTOIA provides:

> References in this section to income which is from a source in the UK include, in the case of any income which does not have a source, references to income which has a comparable connection to the UK.

ITTOIA EN Vol II expands on this:

> 34. However, while the term "source" may apply to the majority of

13 *Walker v Centaur Clothes Group* 72 TC 379 at p.416.

> receipts chargeable to income tax it does not apply to all such receipts. "Source" is something from which income arises and not all sums charged to income tax are by nature income. "Source" may not be the appropriate term where the amount charged to tax represents a profit on a transaction which is not by nature income and would not be charged to income tax without a specific charge. Indeed, the chargeable profit may arise on the disposal of an income source. This restricted meaning of "source" is supported by Lord Hoffmann's judgment in *Walker v Centaur Clothes Group Ltd*, 72 TC 379 ... [set out above].
> 35. It has therefore been necessary to consider how to express the territorial scope in cases where there is no natural source of income.
> 36. [Section 368(3)] is broadly worded to catch such income. Where the connection such income has to the UK is comparable to the connection that income with a source in the UK has to the UK, then it is treated for the purposes of this section as income from a source in the UK.

It is hard to see that this concern was justified, but s.368(3) does no harm.

## 16.5 Building societies

In practice, income from a building society will have a UK source. ITTOIA EN Vol II explains:

> 48. Under section 66 FA 1988 a society incorporated under the Building Societies Act 1986 will be resident in the UK through incorporation. As long as dividends are paid by a UK resident company they have a UK source under the principle in *Bradbury v The English Sewing Cotton Company Ltd* 8 TC 481.
> 49. But a society may be non-resident where it satisfies a residence test in the territory of a treaty partner and the treaty awards residence to that other territory. Section 249 FA 1994 will then apply to treat the society as non-resident. Theoretically dividends paid by a building society may therefore arise from a source outside the UK. This would be most unlikely, however, since a building society may only be incorporated under the Building Societies Act 1986 if its principal office is in the UK. With the place of incorporation and the principal office in the UK a residence test is unlikely to be satisfied in another territory.

## 16.6 Open-ended investment companies and AUTs

ITTOIA EN Vol II discusses the location of the source of OEIC income:

> 50. The definition of an open-ended investment company in section

> 468(10) ICTA carries a limitation that the company should be incorporated in the UK under the OEIC regulations of 1996. Section 468(10) ICTA is inserted in section 468 of ICTA by para 10(4) (Open-ended Investment Companies (Tax) Regulations 1997 SI 1997/1154). All open-ended investment companies within the definition in section 468(10) ICTA are therefore subject to the company residence rule in section 66 FA 1988 ("regarded for the purposes of the Taxes Acts as resident"). Open-ended investment company interest distributions treated as made by a UK resident company will be UK source income. Section 249 FA 1994 could in theory also apply to make such companies non-resident (as explained in connection with industrial and provident societies). In that case interest distributions made will be treated as dividends from non-resident companies.

For AUTs see 35.2 (Income accruing to unit trust).

## 16.7 Industrial and provident societies

ITTOIA EN Vol 2 explains the source of income from an industrial and provident society:

> 52. Under section 66 of FA 1988 a society registered under the Industrial and Provident Societies Acts will be resident in the UK through incorporation. A society may, however, be non-resident where it also satisfies a residence test in the territory of a treaty partner of the UK and the treaty awards residence to that other territory. Section 249 of FA 1994 will then apply to treat the society as non-resident.
>
> 53. Section 486(4) of ICTA provides that share or loan interest is chargeable under Schedule D Case III. Theoretically therefore payments by a registered society may arise outside the UK but be charged under Schedule D Case III and not able to benefit from treatment specific to Schedule D Cases IV and V. For the sake of consistency this section[14] treats such income arising outside the UK as relevant foreign income and therefore able to benefit from the special rules in Part 8 of this Act.

## 16.8 Alimony and maintenance income

The source of alimony income is the country whose court ordered the

14 [Author's Note] See ss.379 and 83D(2) ITTOIA.

payment.[15] HMRC agree. ESC A12 provides:

> Where alimony or maintenance payments are paid under a UK court order or agreement, the income arises from a UK source regardless of the country of residence of the payer.

However, alimony and maintenance is not usually taxable, because relief under s.727 and s.730 ITTOIA usually applies, so the question of source does not often arise for UK tax purposes.

Foreign tax may of course be payable if the payments have a foreign source under the foreign law. However if

(1) there is a DTA with an "other income" article in OECD model form, and
(2) the recipient is treaty-resident in the UK,

DTA relief will usually give relief against the foreign tax (even though the income is not taxable here). This is strictly a matter for the foreign law, but the INT Manual notes the point:

> **161130. The source rule - concessions** [January 2011]
> ... Note, however, that a UK resident payee, may, if foreign tax has been deducted from alimony etc. payments, be entitled to exemption from foreign tax if the relevant double taxation agreement so provides (for example in a specific Article or in the other income Article – see INTM153200 and INTM153240). If this happens or is likely to happen, then invite the payee to make a claim to the foreign Revenue authority for repayment of any tax deducted and for exemption from tax on future payments. Guidance on how to make such claims are given in the entries relating to the respective individual countries.

ESC A12 by concession allowed a foreign tax credit where alimony was UK source under UK principles and foreign source under foreign law principles and so suffered UK and foreign tax. However this has little role to play since 1988 since UK tax is no longer payable and foreign tax credit is not needed and the INT manual discussion on this issue seems to be 2 decades out of date.

---

15 See *Bingham v IRC* 36 TC 254 where a UK resident made maintenance payments to his ex-wife who was resident in the Netherlands. The payments had been ordered by a Dutch court and so were not UK source income.

## 16.9 Casual income

The BI Manual provides:

> **BIM80130 - Miscellaneous income: Scope of the provisions: Sweep-up - judicial comment**
> ...Income from "property"
> The case of *Alloway v Phillips* [1980] 53 TC 372 involved the wife of one of the Great Train Robbers. Whilst living in Canada, she received £39,000 from a newspaper. It was not in dispute that she had provided information to the newspaper which led to the newspaper publishing a series of articles. It was found that she had entered into an agreement, governed by English law, to assist the newspaper.
> The Court of Appeal held that the £39,000 was taxable in the UK under the Miscellaneous Income provisions as it arose from "property" in the UK. Lord Denning MR said at page 387D:
>
> > "The truth is that she had a chose in action in England. It was property in England: but she had no property at all in Canada. She had no copyright there. She only had the information in her head which she told to the newspaper reporter. That is not a species of property known to the law of England"

In *Alloway v Phillips* the location of the source of income was held to be the place that the benefit of the contract (the chose in action) was situate, and the contract being enforceable in the UK the income was taxable. This is not a suitable test, as taxpayers can in principle choose the place where the contractual right is situate. *Alloway v Phillips* is one of those cases where the Court decided the result first and the reasoning second.[16] It is considered that the place where the work is done is the correct test for income in this category. But until such time as the Courts say so, a taxpayer is entitled, indeed strictly required, to proceed on the basis that the reasoning of the Court of Appeal is correct in law.

16 "If the criminals or their wives get money by relating their stories to newspapers, they ought to pay tax on their profits and gains. That is this very case. The wife is now in England. She is outside the jurisdiction of the Canadian courts. She received the money here and ought to pay tax here ..." (Lord Denning, 53 TC 372 at p.387).

CHAPTER SEVENTEEN

# INTEREST INCOME

## 17.1 Interest - Introduction

This chapter considers:
(1) The taxation of interest income
(2) Withholding tax on payment of interest to non-residents
(3) Withholding tax on payment of interest by deposit-takers (banks)
(4) The EU Interest and Savings Directive
Each topic requires a book to itself, except for the EU directive which requires several volumes. I focus on matters closest to the themes of this book. I do not consider corporation taxation of interest (the loan relationship rules) or the EU interest and royalties directive 2003/49/EC of 3rd June 2003 which applies to interest and royalty payments made between associated companies of different member states. Each of those would also require long books to themselves.

For interest on FOTRA securities and foreign currency securities see 18.1 (Exempt interest of non-residents).

For relief for payment of interest, see 15.1 ( Deduction of Interest in Computing Property Income).

## 17.2 Interest: charge and location of source

Section 369(1) ITTOIA imposes the charge on interest:

> Income tax is charged on interest.

I refer to the person paying interest as "**the debtor**" and the recipient as "**the creditor**".

Section 370 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the interest arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

This incorporates the remittance basis for foreign source interest. Foreign source interest is outside the scope of withholding tax and qualifies for the remittance basis, so the question of source matters to both creditor and debtor.

The statute gives virtually no guidance on the location of a source of interest, so one falls back on principle, case law and HMRC guidance.

Principle cannot identify the "right" connecting factor(s) but it can identify some approaches to the issue as unsatisfactory.

The location needs to be known by the debtor (who may have to deduct tax at source) and creditor (who may be taxable on the interest). This suggests no weight should be given to factors not likely to be known by both parties.

Factors which the parties can manipulate without commercial cost or inconvenience are not suitable (at least from HMRC's viewpoint and one can expect the courts to sympathise).

Debts are frequently assigned, and it is suggested that:

(1) assignment should not alter the location of the source; and
(2) facts not likely to be known by an assignee should not affect the location.

Many of the connecting factors may change, and it is possible that the source of interest can change its location. However, it would not be convenient for location of a source to change very often. There are two ways to deal with this:

(1) to place little or no weight on features which may easily change; or
(2) to look at the situation at the time the debt arises, and to ignore later changes.

Solution (1) seems preferable.

There are many possible connecting factors. It would not be possible to compile a complete list but the main factors are as follows:

(1) the debtor:
    (a) residence of debtor;

   (b) place of business of debtor;[1]
(2) payment of the interest:
   (a) place where interest is paid;
   (b) situs of funds out of which interest is paid;[2]
(3) contract under which interest is paid:
   (a) proper law;
   (b) place where contract would be enforced;
   (c) place where contract is made;
(4) situs of debt on which interest is due under IHT/international law principles (ie location of deed if debt is a specialty);
(5) place where debtor uses the money borrowed (eg to purchase UK/non-UK situate asset);
(6) place where money is lent or where credit is provided;
(7) situs of security for debt (if any);
(8) residence of guarantor (if any);
(9) residence of creditor.

I shall evaluate these factors in order.

### 17.2.1 *Residence and place of business of debtor*

Residence of the debtor is in principle a satisfactory connecting factor. In the case of dual resident debtors, the place of business connected with the loan would usually act as a suitable tie-breaker.[3]

A difficulty arises if debtors change their residences, which if not common is by no means impossible. This was pointed out in *Philips*.[4] But a solution might be to ignore subsequent changes of residence. Similarly, if a debtor dies and the liability is that of PRs, the place of residence of the PRs should not affect the source of the interest.

---

1 Place of incorporation is another conceivable connecting factor but no-one has ever suggested it should be relevant.

2 This is often called the “source” of the payment but it is hopelessly confusing to use the word “source” in that way.

3 See 70.12.1 (Meaning of “residence” and dual resident debtor).

4 See 17.3.3 (*IRC v Philips' Gloeilampenfabrieken)* [1955] NZLR at p.898: “In my opinion, the fallacy in the able argument presented by [counsel for the Commissioner] was exposed when he felt obliged to submit (as indeed he was if he was to be consistent) that if a New Zealand citizen, while in London, found himself in financial difficulties and had to obtain from a London money-lender a loan, which he was able to repay over a period of years only after he had returned to his own country, the London money-lender could be assessed with [New Zealand] income tax ...”

## 17.2.2 *Payment of the interest (place where interest is paid or situs of funds out of which interest is paid)*

This is not a suitable connecting factor as it can and often will change from year to year. This view is supported by *IRC v Philips' Gloeilampenfabrieken*:

> It is not sufficient to ascertain the fund out of which the income was in fact paid, which is no more than the reservoir from which it was drawn. It is not whence it was paid, but why it was paid, that is the determining factor. The emphasis is not upon the receipt, but upon the derivation of the income. Consequently, it does not constitute the source within the meaning of the section that the money [used to pay the interest] was drawn from or provided by the trading profits in New Zealand. The New Zealand company [the debtor] was free to obtain the funds with which to perform its obligation anywhere it chose, from deposits in England, if it had any, or from borrowing in England, or from the profits of its trading in New Zealand. That was a domestic matter. The money could "come from" any of these "sources", but none of them would be the source from which the [creditor] derived what it received as income.[5]

In other words, one should not equate the location of the source of the interest with the situs of the *resources* that the debtor uses to pay the interest.[6]

---

5 See 17.3.3 (*IRC v Philips' Gloeilampenfabrieken*) [1955] NZLR at p.898.

6 For completeness, I should mention *IRC v Broome* 19 TC 667, where the features of the loan were as follows:

(1) (a) The debtor was (primarily) resident in Kenya (also UK resident, but that does not matter).
    (b) However, the original debtor died. His executors were UK resident.

(2) The executors [debtors] paid the interest in the UK out of funds in the UK.

(3) The loan was enforceable in Kenya.

(4) The creditor was resident in Kenya.

Finley J held:

"There is no doubt at all that if a payment is made by a person here out of a source which is here, then that payment attracts tax. ... I think it was payment out of a source here. The first two payments are perhaps a little more clear, because there the payment was actually made to Earl Kitchener [the creditor] personally in this country. He happened to be here; he was resident abroad, but he happened to be here, and he was actually paid by the executors in London; and equally [the other

### 17.2.3 *Contract under which interest is paid: (a) proper law, (b) place where contract would be enforced, (c) place where contract is made*

These are not suitable connecting factors as they are within the control of the parties.[7]

### 17.2.4 *Situs of debt: location of deed if debt is a specialty*

For IHT/international law the situs of a specialty debt is the location of the deed.[8] This is obviously an unsuitable connecting factor. The debtor will not have possession of the deed and may not know its location. The location is easily changeable, and the rule would allow easy tax planning.

This view is supported by *Philips*:

> If the location of the debt were to be selected as the test, the source would be located differently according as whether the contract was a simple contract or a specialty; and, in the latter case, its location would arbitrarily change with the actual situation of the deed itself. Such a test would, indeed, be far from the practical commonsense test prescribed by the authorities; and I cannot think it proper to apply it here if some other is available.[9]

The High Court of Australia rejected the same argument for similar reasons in *Studebaker Corporation of Australasia v Commissioner of Taxation for New South Wales*.[10]

My view could also obtain support from *Bank of Greece*[11] where

---

payments] were made in London, were sent to a bank in London, and were remitted by the bank in London to Kenya to be paid there. In these circumstances I am of opinion that this was a payment made by persons resident in London out of sources in London."

This passage adopts uncritically the view criticised here that the funds used to pay interest determine the source of interest. It is suggested that no guidance should be taken from *Broome* and it has (rightly) been ignored in all later cases.

7 Place of enforceability is also unsuitable as a contract may be enforceable in more than one place, or the place of enforceability may be unclear.
The place the contract is made is also unsuitable because the place the contract is made is itself often difficult to identify. See 13.18 (Where is contract made).

8 See 70.13 (Specialty obligation).

9 See 17.3.3 (*IRC v Philips' Gloeilampenfabrieken*) [1955] NZLR at p.898.

10 See 17.3.3 (*IRC v Philips' Gloeilampenfabrieken*).

11 See 17.3.1 (*Bank of Greece*).

although the court did not seriously address the question of the location of a source of interest, its approach was certainly not consistent with the IHT/international law approach.

For a simple debt, the IHT/international law approach takes us back to residence as a connecting factor, which is discussed above.

It is not illogical or inconsistent to say that the situs of a debt for IHT/international law purposes is in one country but the location of the source of interest on that debt for income tax purposes is in another. This is the case for shares, which may be non UK situate for IHT/international law but whose dividends may be UK source (if the company is UK resident.) One might simply say that the two taxes apply different rules. Alternatively, and more subtly, one might say that the source of interest (for IT purposes) is not the debt but the transaction which gives rise to the debt (which may be located in a different place from the location of the debt).[12] Either way, the IHT/international law situs rule is not the test.

I stress this as the view that the location of the source of interest for IT should be equated with IHT/international law situs of the debt has from time to time found support.[13]

### 17.2.5 *Purpose for which the loan is made*

This is not such a suitable connecting factor, for it will often not be possible to identify a purpose with any particular location. Also money borrowed for one purpose may later be used for another.

### 17.2.6 *Place where money is lent (where money is received)*

This is a sensible connecting factor. It may be objected that it allows tax planning where money is lent in one jurisdiction and then immediately transferred to another. But the courts could easily look through transient arrangements of that kind to identify the place where the money is substantially received.

### 17.2.7 *Situs of security for debt*

A rule that source of interest on a secured debt depends on the location of

12 *Philips* takes this approach:

13 See 17.3.2 (*Hafton Properties*); 17.4.1 (HMRC view before 1979).

the property on which the debt is secured is not sensible or workable, for the following reasons:

(1) A debt may be charged on property in two different countries.
(2) The rule becomes absurd if a large debt is secured on an asset of a small value. Would one say that a £100 million debt is situate in Jersey if it is secured on property there worth £100,000? Also, one cannot have a rule where the location of interest depends on the relative value of the debt or the security, which may fluctuate from time to time (though that might be resolved by looking only at the position at the time the debt arises.)
(3) If land determines the location of interest from of a debt secured on land, then a debt charged on (say) shares should be situate where the shares are situate.

This rule would sometimes allow scope for tax planning.

### 17.2.8 *Residence of guarantor (if any)*

No weight should be given to the residence of a guarantor, since in the normal course of events a guarantor would not be called on to make any payment.

### 17.2.9 *Residence of creditor*

No weight should be given to the residence of the creditor, since one is looking for the source and not the destination of the interest; also this may change easily as debts are usually assignable and frequently assigned. A single debt may be owed to two creditors resident in different places, but the interest on that debt cannot have two different sources.

### 17.2.10 *Unsatisfactory approaches*

The most unsatisfactory approach of all is to say that it is a question of fact.[14] The meaning of "source" is a question of law and so is the question

---

14 Sometimes a "practical hard" matter of fact, the phrase derives from *Nathan v Federal Commissioner of Taxation* [1918] HCA 45; (1918) 25 CLR 183 and is also mentioned in *Rhodesia Metals v CT* [1940] AC 774 at p.789, but the adjectives are meaningless. The point is made discreetly by Lockhart J at first instance in *Spotless* ("... a little opaque...")

of whether known facts (which will usually be simple) fall within that meaning. It is the task of the courts to provide an answer to that question.

Equally unsatisfactory is to say that the answer is whatever a "practical man would regard as the real source". The only way in which a man, practical or otherwise, can locate a source of interest (other than tossing a coin) is to apply a theory as to the priority of rival connecting factors.[15] The exhortation to adopt a "practical approach" is harmless but not particularly helpful. No-one advocates that the court should adopt an impractical approach. But those who stress this approach should bear in mind that the one thing that a practical man will demand of the law is that it will provide a clear *answer* to the question of where is a source. There is nothing more impractical than uncertainty. What Kurt Lewin said of psychology is also true of tax: there is nothing so practical as a good theory.

It is not satisfactory to say that all the features listed are relevant, and if different features point in different ways, it is a matter of carrying out a balancing exercise. We need guidance on which factor has priority or there is no law on the subject at all. The formulation derives from Commonwealth cases on the source of *trading* income.[16] There it seems more apt as the circumstances in which trading income arises differ very widely indeed. But even in that context experience has shown that it has not worked well, because no consistent pattern has developed as to which factors have the greatest weight.[17] However that may be, the questions of the source of *interest* and the source of *trading* income are entirely different. There is no reason why the test should be the same. The point

15 See 17.3.3 (*IRC v Philips' Gloeilampenfabrieken*) [1955] NZLR 868 at p.895–6:
"What sort of thing is to be looked for when it is sought to discover a *source of income*? This is a question less simple than it seems at first sight, and its difficulty does not seem to me to be greatly lessened by taking the 'practical' approach to it first put forward in *Nathan v Federal Commissioner of Taxation* (1918) 25 CLR 183. ... I am attracted by an approach by which an attempt is made to state lucidly what must be meant by the word 'source' in the phrase 'source of income' in given circumstances."
Similarly, though in a different context, *IRC v Pratt* 57 TC 1 at p.52:
> "It is very simple to say that something is a question of fact, or mixed fact and law, and leave it at that, but this does not solve anything at all."

Contrast Keynes' *dictum* that "practical men who believe themselves exempt from intellectual influence are the slaves of some defunct economist".

16 *Rhodesia Metals v CT* [1940] AC 774.

17 See 13.5 (Trading income of non-resident).

is made correctly in *Philips*:

> The location of the source of profits of a business, for instance furnishes a kind of investigation quite different from that of the source of interest on moneys lent, and decisions on sources of one kind of income may be of little assistance when considering sources of a different kind of income.[18]

## 17.3 Case law on source of interest

The case law is not easy reading.

### 17.3.1 *Bank of Greece*

The facts of *Bank of Greece*[19] are a little complicated and unusual, and one needs to understand them in order to see clearly what the case is about. The facts are not very fully stated by the House of Lords but further details can be teased out from the various reported cases concerning these much litigated bonds.

The case concerned bearer bonds issued by a Greek bank in 1927. The bonds suffered various changes in the turbulent years which followed. The bonds had the following features (using the numbering of the list in the above paragraph):

(1) The debtor was non-resident (a Greek bank).

(2) (a) Payment was to be made in sterling.[20] Payment was to be made in London or (at the option of the creditor) in Athens, by cheque in London.

(b) Payment would in the ordinary course have ultimately derived from funds situate in Greece.[21]

(3) The bonds were governed by English law and were enforceable in England.[22] (Enforceablility was originally recognised in Greece, but

---

18 See 17.3.3 (*IRC v Philips' Gloeilampenfabrieken*) [1955] NZLR 868 at p.896.

19 *Westminster Bank Executor and Trustee Company (Channel Islands) v National Bank of Greece* 46 TC 472.

20 For completeness, in 1935 this changed so that Greek residents could only be paid in drachmae: see [1958] AC 509 at p.510 but nothing turned on that.

21 I think this is what Lord Hailsham means in the somewhat convoluted sentence at p.494A.

22 [1958] AC 509.

that ceased to be the case following a moratorium under Greek law, raising conflict of law issues which twice went to the House of Lords.)

(7) The debt was originally secured by lands in Greece but these properties were taken over or disappeared following the German occupation of Greece in 1941.[23]

(8) The guarantor was non-resident.

It is fairly clear (and all sides accepted) that the interest on the bonds originally had a Greek source. Almost[24] all the features of the debt pointed the same way, to Greece. The House of Lords held that the interest had a foreign source in these words:

> [1] the bond itself is a foreign document, and
> [2] the obligations to pay principal and interest to which the bond gives rise were obligations whose source is to be found in this document.

This was adequate for the decision as it related to a point not in dispute. However, the *dictum* is inadequate as a basis for ascertaining the location of a source of interest in other cases. The court did not say how it reached its conclusion: it just described the loan and stated the conclusion.

The conclusion that some have drawn from this case is that all the features listed in the list above were relevant, and if different features point in different ways, it is a matter of carrying out a balancing exercise (how one goes about that is never explained). This is a complete misreading. *Bank of Greece* provides no support for that approach whatsoever. The speech in the case had no need to say anything about the

---

23 46TC 472 at p.483H.
At p.493H Lord Hailsham says that the debt was secured by lands *and public revenues* in Greece, As far as I can tell from the case reports this seems to be a slip, or perhaps Lord Hailsham was referring to the income of the bank as "public revenues" as the National Bank of Greece was publically owned. Nothing turns on that point but it is important to note that the bonds were bank bonds and not government bonds.

24 The following features in *Bank of Greece* did not cause it to have a UK source:
(1) payment made in sterling
(2) English proper law
(3) interest paid in England.
(4) Karminski LJ adds that "the loan was raised in London": 46 TC at p.489.

location of source of interest paid by the principal debtor, because that location was not in dispute. The court heard no argument about the principles of identifying the location of the source of interest. The relevant cases were not cited. In my view *Bank of Greece* gives no guidance at all on what is the test for the location of the source of interest. The fragment of the sentence ("the bond is a foreign document") was merely descriptive of the facts of the case and not intended to lay down a general test for location of a source of interest. If it lays down a test at all, it is imponderable. In a marginal case, how does one decide if a bond is a foreign document? The test can only be applicable to interest on securities.

The actual dispute in *Bank of Greece* concerned the location of the source of income consisting of guarantee payments. The original borrower, the principal debtor, (the National Mortgage Bank of Greece) had defaulted on the bond and the payments were made by the guarantor.[25]

It was not completely clear that income in the form of guarantee payments was to be classified as "interest".[26] However if it was not interest it is sensible that location of the source of such income should be determined on principles similar to those which apply to interest, so that makes no difference.

Why was it argued the income had a UK source?

> The only circumstances relied on by the Appellants as supporting their contention that the obligation was located inside the UK were as follows.
>
> [1] Although the original guarantor had no branch in the UK, the present Appellants had acquired one on their universal succession in London.[27]
>
> [2] Moreover, it was argued that, since discharge of the obligations under the bond in Greece had been caught by the moratorium enacted by the Greek Government, it followed that the only place at which the obligation of the guarantor could have been discharged or

---

25 To be precise, the payments were made by a company which had succeeded to the guarantor following an amalgamation, and which was subject to the same obligations as the original guarantor, but that made no difference.

26 Two of the three judges in the CA held that the payments were interest, and in the House of Lords this was said to be "attractive". But nothing turned on this point.

27 Lord Hailsham means that the guarantors who succeeded to the original guarantor acquired a branch in London on their succession to the original guarantor.

enforced was in London.[28]

There is some strength in this argument but it did not win the day. These changes did not affect the location of the source of income:

> Speaking for myself, I do not see how an obligation originally situated in Greece for the purposes of British income tax could change its location either by reason of the fact that
> [1] one guarantor had been substituted for another, or ...
> [2] the second guarantor so substituted subsequently acquired a London place of business, or ...
> [3] the Government of Greece had by retrospective legislation altered by moratorium and substitution of a new guarantor for the purposes of Greek law the obligations imposed upon the principal debtor and the guarantor.
> The Appellants acquired no obligation different from that of the original guarantors, and that was the obligation imposed on the original guarantors by the terms of the bonds.[29]

*Bank of Greece* is authority for the (sensible) proposition that sources of interest are fixed and do not move with changes of circumstances of the debt.[30] It is not relevant to any other aspect of the location of a source of interest.

### 17.3.2 *Hafton Properties*

In *Hafton Properties v McHugh* 59 TC 420 (a decision at Special Commissioner level) the facts were weighted as strongly as possible in favour of a foreign source, except there was a UK resident debtor. Under the original loan agreement, a US company borrowed from a US bank, the loan being secured on US property. Hafton (UK resident) acquired the property subject to the mortgage. It paid interest. This was not UK source:

---

28 46 TC at p.494.

29 46 TC at p.494.

30 More accurately, the case is authority for the proposition that the changes which occurred in the *Bank of Greece* case did not change the location of the source. It is open to a court to distinguish that from other types of changes. However the changes which occurred there were so fundamental that it is considered that there will be few if any cases where the location of a source of interest will move.

> [1] In one respect the Greek Bank case is different from this one, in that in that case the debtors (both original and substituted) were at all times essentially Greek in character. Nevertheless I collect from Lord Hailsham's speech a clear disinclination to regard sources of income as being peripatetic. He looked to the nationality (if I may so put it) of the document creating the obligation, and, applying the sentence which I have already read from that speech to the present case, there can be no doubt that the obligation here was American in character.
>
> [2] That is fortified, of course, by the fact that the debt was a mortgage debt. Such a debt is regarded for private international law purposes (at any rate) as a speciality debt, the situs of which is to be found where the mortgage deed is to be found. The mortgage deed is, and so far as I know always has been, in the United States.[31]

Point [1] is right. If a change of guarantor does not affect location of a source of interest, neither should a change to the identity of the principal debtor. This point will not often arise because the facts of *Hafton Properties* (purchase of property subject to mortgage) are unusual. A mortgage is usually paid off at the time of the purchase.

A more common situation is that an individual who has borrowed funds later comes to the UK and continues to pay interest. *Hafton* supports the view that (whatever the test for location) the interest does not become UK source merely because the debtor becomes UK resident. Conversely interest does not cease to be UK source just because a debtor becomes non-resident.

Point [2] is therefore *obiter*; it is considered that situs of the debt on IHT/international law principles should not carry much if any weight, for the reasons given above.

### 17.3.3 *IRC v Philips' Gloeilampenfabrieken*

I have already mentioned *IRC v Philips' Gloeilampenfabrieken ("Philips")*.[32] This decision of the Court of Appeal of New Zealand considers and cogently rejects various alternative tests of source, including the location of funds used to pay the interest and IHT/international law situs rules. It concludes:

---

31 59 TC 420 at p.426.

32 10 ATD 435 [1955] NZLR 868 accessible *www.kessler.co.uk*.

> the actual source of this income was the credit made available by way of loan under the agreement made in the Netherlands in the course of the respondent's business in that country. ...the source of the income was the business transaction carried out in the Netherlands...[33]
>
> ... the source is located where the transaction from which the debt took its origin took place...[34]

This is the place of credit test. It was said to be equivalent to the test of asking where the loan was made.[35] A particular attraction of this test is that it is fixed at the time the loan is made and does not change.

Unfortunately this test does not resolve all the issues as one then has to ask where the credit was provided. The answer may not be obvious.

The facts of *Philips* were also slightly complicated and unusual. The debtor (a New Zealand company) owed a trading debt of £80k to the creditor (a Dutch company). The debtor was unable to pay. Rather than leave that debt outstanding:

(1) the creditor lent £80k to the debtor
(2) the debtor used the £80k to pay the trading debt

(ie the old debt was paid and a new one came into existence).

The loan agreement was made in Holland and governed by Dutch law. The money was not received in New Zealand though payment of the borrowed money was made in a convoluted way:

(1) the Dutch company creditor drew a cheque and sent it to the New Zealand company
(2) the New Zealand company endorsed it and returned it to the Dutch company.

On these facts the credit was not provided in New Zealand, so the source of the interest was not in New Zealand.

The High Court of Australia applied the same test in *Studebaker Corporation of Australasia v Commissioner of Taxation for New South Wales* where the facts were more straightforward: an Australian debtor paid interest on a trade debt arising on the purchase of cars from America. The interest did not have source in Australia.[36]

---

33 [1955] NZLR at p. 809, 891.

34 p.898.

35 p.899.

36 (1921) 29 CLR 225 accessible *www.austlii.org* at p.233: "The attribution of locality to the obligation to pay interest [the situs of the debt] is not decisive. The facts must be examined, and when we find that the interest arises from business transacted and

The Appeal Division of South Africa applied the same test in *IRC v Lever Bros* where a South African debtor paid interest on a debt arising on the purchase of UK shares from a UK vendor under a UK contract. The interest did not have a source in South Africa.[37]

The High Court of Singapore has adopted the same test.[38]

### 17.3.4 *Hong Kong cases and practice*

In *IRC v Hang Seng Bank* [1990] STC 733 at p.740 the Privy Council state the position quite clearly:

> If the profit was earned by ... lending money ... the profit will have arisen in or derived from the place where ... the money was lent ...

In *IRC v Orion Caribbean* [1997] STC 923 at p.930 the same court made (I think) the same point, but more cautiously:

> If [a company] lent its own money to a borrower in, say, New York,[39] then other things being equal there might be little difficulty in saying that the location of the source of the interest on the loan was New York.

Both these cases were trading cases, ie the issue was the source of trading income. Since different principles apply to trades[40] the comments are *obiter*. However, there is much to be said for the *Hang Seng* approach and it represents the generally held view in Hong Kong. The Hong Kong

---

wholly carried out in America the conclusion must be that it was not derived from any source within new South Wales." Similarly *Commissioner of Taxes v. Dunn and Co Ltd* [1918] AD 607, in which interest earned by an English company on advances on open account for the purchase of goods in the UK for despatch to a South African business firm was held to be derived from a source in the UK, where the capital was employed in making the purchases.

37 [1946] AD 441, 14 SATC 1 accessible *www.kessler.co.uk*.

38 *CH Pte Ltd v Comptroller of Income Tax* (1988) 1 MSTC 7022 accessible *www.kessler.co.uk*. In this case an agreement was made in Malaysia, but (which is considered to be the key fact) the money lent was received in Singapore. (A cheque received outside Singapore but paid into a Singapore account constitutes a receipt in Singapore.)

39 I assume this means that the money was lent (received) in New York.

40 See 17.2.10 (Unsatisfactory approaches).

Revenue explain:[41]

> 2. Only interest arising in or derived from Hong Kong is liable to profits tax. For many years, the Department has taken the view that for the purpose of determining the place where interest arises or is derived from, it is the location of the originating cause that almost invariably determines the source. In essence, the place of derivation of interest is the place where the credit was provided to the borrower, i.e. *the place where the funds from which the interest is derived were provided to the borrower*, commonly known as the "provision of credit" test. This view is based on the decisions in *IRC v Philips Gloeilampenfabrieken,* and *IRC v Lever Brothers & Unilever*.[42]
> 3. If the originating cause is situated in Hong Kong, the source of the interest is in Hong Kong, irrespective of the currency in which the loan is denominated, the place of residence of the debtor or the place where the debtor employs the capital.[43]

---

41 Departmental Interpretation and Practice Notes No. 13 (Revised) Profits Tax: Taxation of Interest Received, December 2004, accessible *www.ird.gov.hk/eng/pdf/e_dipn13.pdf.*

42 For these two decisions see 17.3.3 (*IRC v Philips' Gloeilampenfabrieken*).

43 Emphasis added. The statement continues with three exceptional cases:

"[1] Whilst the emphasis is generally placed on the provision of the credit, in some situations, such as mortgages, the originating cause may well be the mortgage itself.

[2] In addition, interest has a Hong Kong source where it forms an integral part of a trading transaction carried out in Hong Kong, e.g. where a Hong Kong manufacturer sells his goods to an overseas buyer on extended credit terms. In such situations, the interest is just as much a part of the profit as the trading profit itself and also arises in Hong Kong, e.g. BR 20/75, IRBRD, vol. 1, 184 and *Studebaker Corporation of Australasia v C of T,* 29 CLR 225.

[3] It should also be noted that the 'provision of credit test' is not applicable where the loans are not simple loans of money. The Privy Council held in the case of *IRC v Orion Caribbean* 4 HKTC 432 [1997] STC 923 that where the taxpayer earned its profits by borrowing and lending of money, the proper test to determine the source of the profits was the operation test, i.e. "one looks to see what the taxpayer has done to earn the profit in question and where he has done it". In the case of a money lending business, the taxpayer's business would normally encompass a broader range of activity, including the borrowing and/or lending of money. For this type of business, the Department will apply the operation test instead of the provision of credit test in determining the source of the interest income."

Cases [2] and [3] are both trading cases and not governed by the location test for interest.

## 17.3.5 *Spotless*

The source of interest was also an issue in *Commissioner of Taxation of the Commonwealth of Australia v Spotless Services*.[44] Here the court took a balancing exercise approach:

> 52. Where, as in the present case, the transaction is complex in terms of its background, its nature and its execution, and where, as here, important aspects of the transaction have their origin in locations in several different countries, it will usually be difficult to identify the real source of income so generated. To attribute "source" is a matter of judgment, and of assessment, of the relative weight of all of the relevant surrounding circumstances.

However, the place where the money was lent was a major factor in the balancing exercise:

> 11. In weighing the factors to be taken into account when reaching a conclusion as to the source of the income, his Honour gave considerable weight to the place where the contract was made and where the money was lent. These events, his Honour found, occurred in the Cook Islands. His Honour continued (25 ATR at 361; 93 ATC at 4,411):-
>
> "There are other facts and circumstances that in my view point strongly in the direction of the conclusions that the interest was derived by the taxpayers in the Cook Islands.
> [1] The borrower, EPBCL, was incorporated in the Cook Islands and carried on business there. It did not carry on business in Australia.
> [2] The deposit was repaid, together with interest, less withholding tax, from the Cook Islands.
> [3] It is impossible to ignore the legal effect of the arrangements entered into by the parties with respect to the lending of the money. Until the cheque for $40m was handed over on 11 December in the Cook Islands (10 December CI time) and the certificate of deposit

---

Whether case [1] should be an exception is more doubtful, though it has a little support from *obiter* in *Philips* at p.898: "Where the debt is a secured one, it is possible that the application of the practical test may, in some cases, make it arguable that the source is where the security is; or where the registry is wherein the mortgage deed is registered..."

44 I could not find the case on *www.austlii.org* so have put it on *www.kessler.co.uk*. The case went on to the High Court of Australia but the source point was discussed only at first instance and in the Court of Appeal.

> received in return there was no contract between the lender (the taxpayer) and the borrower (EPBCL). If EPBCL failed to honour the certificate of deposit on the due date the taxpayers could have sued on the certificate and there would have been no answer in law to their right to judgment."
>
> 12. Once the contention that the contract was in reality made in Australia and that what occurred in the Cook Islands was a mere "formal step designed to screen the reality" is rejected and the banker's letter of credit issued by Midland is seen for what it was, a security to secure performance by EPBCL of repayment of the loan with interest, and not as an investment in itself, the matters contended for by the Commissioner as matters of practical substance sourcing the interest in Australia are either not factually correct or not sufficient to outweigh the Cook Islands elements.

## 17.4 HMRC view(s)

### 17.4.1 *HMRC view before 1979*: *IHT/international law situs rules*

The IR consultative document Tax Treatment of Interest paid by Companies to Non-residents[45] provides:

> In the case of a simple contract debt it is settled law that the source is where the debtor is resident. Before the ending of exchange control, the Revenue was normally able to accept that interest paid abroad in a foreign currency under a specialty contract (ie a contract under seal governed by foreign law) to a non-resident could have a foreign source, even though the payer was a UK resident company.

This (more or less) adopts the IHT/international law situs approach to location of a source, which is wrong on principle[46] and rejected in every reported case.[47]

This view survives in the Double Taxation Relief Manual:

> **1730. Interest**
> There is sometimes some difficulty in deciding whether interest is

45 January 1983 accessible *www.kessler.co.uk*.

46 See 17.2.4 (Situs of debt: location of deed if debt is a specialty).

47 Apart perhaps from the stray comment of the Special Commissioner in *Hafton* and even there situs is of subsidiary importance: see 17.3.2 (*Hafton Properties*).

> treated as having a UK source where the borrowing is made by a UK branch. ...
> The leading case on this subject is a Privy Council decision on a Hong Kong estate duty matter (*Kwok Chi Leung Karl* [1988] STC 728). The Privy Council decided that where a debtor company has two places of residence where a debt may be enforced, the locality of the debt (and its source for tax purposes in the absence of statutory provision to the contrary) falls to be determined by reference to the place of residence where under the contract creating the debt the primary obligation is expressed to be performed (that is where the creditor would apply first for his money).

*Kwok* concerned situs for estate duty, applying IHT/international law rules and is not relevant to the source of interest for IT purposes.

A different practice is recorded in Revenue/Treasury correspondence in 1969. According to the Revenue, interest has a foreign source if:

(a) the loan contract is made abroad
(b) the loan contract is governed by foreign law
(c) the interest is payable abroad, and there is no UK paying agent and
(d) the loan is not secured on any specific assets or revenue in the UK.[48]

Note that this practice envisages interest paid by a UK resident debtor having a foreign source.

### 17.4.2 *HMRC view 1979–1993: residence of debtor*

The consultative document continues:

> The abolition of exchange control has meant that a transaction in the form of a foreign specialty contract can now take place entirely between UK residents. The Revenue therefore now generally has to regard interest paid by a UK borrower as having a UK source, whatever the nature of the contract ...

This (more or less) equates source with residence of the debtor. The Revenue forthrightly admit that their change of view was made for

48 Note by the Inland Revenue to the Working Party on Balance of Payments Aspects of Tax Questions 20 November 1968; Letter DA Walker (HM Treasury) to JE Redman (Inland Revenue) 10 January 1969; both accessible *www.kessler.co.uk*.

pragmatic reasons and not by reference to the law. In the circumstances it is not altogether surprising that their view could not be maintained. The consultation paper gives the impression that this practice lasted for 15 years but I doubt if the view was strictly enforced.

There is no support for this view in any of the case law, though in practice a residence test will often lead to the same result as other better established tests.

### 17.4.3 *HMRC view 1993–2008: balance all factors*

HMRC next changed their position in RI 58 (November 1993):

> **Schedule D Case III—meaning of "source"**
> ...The current [HMRC] view on the location of the source for interest is based on ... the Greek Bank case. The factors considered relevant in that case (leading to the conclusion that the income involved did not have a UK source) were—
> [1] there was an obligation undertaken by a principal debtor which was a foreign corporation;
> [2] the obligation was guaranteed by another foreign corporation with no place of business in the UK;
> [3] the obligation was secured on lands and public revenues outside the UK;
> [4] funds for payments by the principal debtor of principal or interest to residents outside Greece would have been provided
> [i] either by a remittance from Greece or
> [ii] funds remitted by debtors from abroad[49]
> (even though a cheque might be drawn in London).
> Although the Greek Bank case was concerned with income which turned out not to have a UK source, inferences can be drawn from that case about the factors which would support the existence of a UK source and [HMRC] regard the most important as—
> [a] the residence of the debtor, that is the place in which the debt will be enforced;
> [b] the source[50] from which interest is paid;

49 I am not sure what is meant by this.

50 [Author's Note] I think this means the situs (on IHT/international law principles) of the funds from which the interest is paid. It does not mean the location on IT principles of the source of income out of which the interest is paid (which could of course be different).

> [c] where the interest is paid; and
> [d] the nature and location of the security for the debt.
> If all of these are located in the UK then it is *likely* that the interest will have a UK source.
>
> (Emphasis added)

This adopted a balance all the factors approach. This is not supported by *Bank of Greece*. *Spotless* does support this approach, but it does not support the selection of these four factors as the most important.

Assuming one does adopt that approach, "likely" was a timid word to use when all four of what HMRC identified as the "most important" connecting factors point the same way. The problem is when different connecting factors point different ways as they frequently do. Here the RI copped out:

> It is not possible for [HMRC] to comment individually in advance on the many cases in which the location of the source of interest may be relevant since the precise tax treatment depends on all the factors and on exactly how the transactions are in fact carried out.[51]

### 17.4.4 *HMRC view from 2009: balance all factors*

HMRC did not announce a change of view, but from 2008 the SAI Manual takes a slightly different line, and RI 58 is now described as "superseded by SAIM 9090 onwards".[52] I take that to be notice that HMRC have withdrawn from it.[53]

The SAI Manual also adopts a balance all the factors approach but it

---

51 RI 58 ended with wishful thinking:
"[HMRC] hope that this summary of [their] views will assist practitioners and their clients in determining for themselves where the source of interest with which they may be concerned is located."

52 See the HMRC online version of Tax Bulletin 9, *www.hmrc.gov.uk/bulletins/tb9.htm* also recorded in the Yellow Book 2008/09.

53 However INT Manual still supports RI 58:
**342030 UK source** [September 2009]
The onus is on the payer to decide whether tax is properly to be deducted having regard to settled case law principles [!] and all the facts surrounding the loan. In particular, the payer should refer to the approach and criteria endorsed by the House of Lords in the National Bank of Greece case (46 TC 472). HMRC's position in that case is outlined in Tax Bulletin 9 of November 1993 [RI 58].

offers us an expanded selection of eight relevant factors, and an inkling of priority:

> **9090. Yearly interest: UK source: The general rule** [January 2009]
> Whether or not interest has a UK source depends on all the facts and on exactly how the transactions are carried out. HMRC consider the most important of factor in deciding whether or not interest has a UK source to be
> [1] the residence of the debtor and
> [2] the location of his/her assets.
> Other factors to take into account are
> [3] the place of performance of the contract and
> [4] the method of payment;
> [5] the competent jurisdiction for legal action and
> [6] the proper law of contract;
> [7] the residence of the guarantor and
> [8] the location of the security for the debt.
> This list of factors is derived from the leading case on the source of interest, *Westminster Bank Executor and Trustee Company (Channel Islands) Ltd v National Bank of Greece SA* (46 TC 472).

In fact *Bank of Greece* provides no support for a balance the factors approach or for this particular selection of eight factors.

> HMRC consider the residence of the debtor to be most important because this, along with the location of the debtor's assets, will influence where the creditor will sue for payment of the interest and repayment of the loan.

The SAI Manual then defines "residence":

> 'Residence' in these circumstances is not the same as tax residence. Residence of the debtor is residence for the purposes of jurisdiction.

It would greatly assist clarity of thinking not to use the word "residence" (which has a specific meaning in tax) to mean something else. I shall reluctantly refer to the concept as "**jurisdiction-residence**" to distinguish it from tax-residence.

What is the test of jurisdiction-residence? In the case of an individual it means tax-residence, and in the case of a company, place of business. The International Tax Handbook provides at para 1103:

> An important factor in determining the source of interest is the residence of the debtor. 'Residence' does not, however, necessarily mean tax residence, rather it means where the [debtor] company has a business presence and can be sued for the debt. If it has more than one such presence then the source will normally be where, under the contract, the company is primarily required to pay the interest and repay the principal. It is, therefore, possible for a UK resident to pay interest which has an overseas source if a borrowing is made and interest is paid by an overseas branch. Likewise it is possible for a UK branch of a non-resident company to pay UK source interest.[54]

The SAI Manual makes the same point for interest paid by companies:

> **9095. Yearly interest: UK source: Companies**
> *Interest paid by companies*
> In deciding whether or not interest has a UK source, in addition to the factors described in SAIM9090, there are other matters to be taken into account for companies.
> **Companies and branches**
> Where the debtor is a company it may of course have more than one residence – for example it may be registered in a US state but managed and controlled from the UK.[55] Jurisdiction in relation to a corporation will in general depend on where the corporation does business (except where the EU Regulation or the 1968 Convention apply – see SAIM9090). So for these purposes it will be resident where it carries on business. If a debtor company has a number of places of residence/business then to decide the location of the debt you have to look at the terms of the loan agreement. The loan agreement should say where the interest and loan are payable, which (if the company is also resident in that place) will determine whether or not the interest has a UK source.
> When it comes to considering loans made to a branch of a UK company the source of the interest is overseas if all the following factors apply:
> [1] an overseas branch of a UK resident company has entered into a loan agreement overseas;
> [2] the loan is for the business of the overseas branch;
> [3] the overseas branch pays the interest from its income;
> [4] the loan agreement obligations are enforceable in the jurisdiction in

54 This is based on IHT/international law situs principles: see 70.12.1 (Meaning of "residence" and dual resident debtor).

55 "Residence" is being used here in a non-standard way, but it does not matter.

> which the branch is situated.

The paragraph does indicate a "safe haven" situation where one can be confident that the interest paid by a UK resident payer does not have a UK source.

The SAI Manual continues:

> Conversely, where a branch of a non-UK resident company enters into a loan agreement in the UK for the business of its UK branch and the UK branch pays the interest then the interest is regarded as having a UK source.

### 17.4.5 *Impact of modern private international law*

The background law (that is, private international law) has moved on considerably since the date of the situs cases which underlie the HMRC view, such as *New York Life Insurance* decided in 1924. Jurisdiction is now largely governed by international conventions, under which it is only very approximately correct to say that residence of the debtor is the test of jurisdiction, (even though in many cases the end result be the same). In short, it is not the case that the residence or place of business of the debtor is the place the debt will be enforced.[56] Do we continue to apply the historic residence tests? Or do we say interest arises where the debt is enforceable, ignoring the place that the debtor resides?

The author of the SAI Manual is aware of the problem, but does not know the answer:

> **9090. Yearly interest: UK source: The general rule** [January 2009]
> *Duty to deduct tax from interest with a UK source*
> **EU rules**
> If the debtor is resident within the EU, the Council Regulation (EC) 44/2001 on Jurisdiction and the Recognition and Enforcement of Judgments in Civil and Commercial matters, ["the Judgments Regulation"] and the 1968 'Brussels Convention',[57] may have an impact

56 See 70.12 (Simple contract debt). In *Bank of Greece* the debt was enforceable in the UK but the interest was not UK source.

57 [Author's footnote] The Judgments Regulation applies in EU Member States. It supersedes the 1968 Brussels Convention except for some territories which fall within the scope of the Convention and which are excluded from the Regulation

on the general rule described above.

Different rules apply for individuals, corporations, and trusts.

The usual rule is that where an individual is domiciled in a contracting state, then they should be sued in the courts of that state (Article 2 of the Regulation/Convention).[58] Domicile is defined according to the rules of that contracting state but for these purposes only, it is, in the UK, linked to the individual's residence. Under these rules an individual is domiciled in England for example if he is resident there and the nature and circumstances of his residence indicate that he has a substantial connection with England.[59] So an individual resident in England would in general terms only be sued in the courts in that country. However this is a complex area and there are exceptions. For example it may be argued that:

[1] the case does not fall within the Regulation;
[2] another convention or international agreement gives jurisdiction to another state's courts
[3] proceedings have already begun in another state's courts; or
[4] it has been agreed under Article 22 of the Brussels Convention[60] that the courts of a particular state have exclusive jurisdiction.

---

pursuant to Article 299 of the Treaty (now Article 349 TFEU).

58 [Author's footnote] Article 2 of the Judgments Regulation 44/2001 provides: "Subject to this Regulation, persons domiciled in a Member State shall, whatever their nationality, be sued in the courts of that Member State."

59 [Author's footnote] Article 59 of the Judgments Regulation provides:
"1. In order to determine whether a party is domiciled in the Member State whose courts are seised of a matter, the court shall apply its internal law.
2. If a party is not domiciled in the Member State whose courts are seised of the matter, then, in order to determine whether the party is domiciled in another Member State, the court shall apply the law of that Member State.
In England, s.41(3) Civil Jurisdiction and Judgments Act 1982 provides:
"... an individual is domiciled in a particular part of the UK if and only if—
(a) he is resident in that part; and
(b) the nature and circumstances of his residence indicate that he has a substantial connection with that part.

60 [Author's footnote] I think the reference should be Article 23 Council Regulation (EC) No 44/2001 on Jurisdiction and the Recognition and Enforcement of Judgments in Civil and Commercial Matters, which provides:

> "1. If the parties, one or more of whom is domiciled in a Member State, have agreed that a court or the courts of a Member State are to have jurisdiction to settle any disputes which have arisen or which may arise in connection with a particular legal relationship, that court or those courts shall have jurisdiction..."

Point [4] is common, as the parties may agree any jurisdiction which suits them. What happens then? HMRC will not say (I expect they do not know):

> In any case in which it is argued that a UK resident debtor can be sued in a Member State in precedence to the UK courts please refer the case to CT&VAT (Financial and Insurance Team).

The SAI Manual then turns to consider the impact of the modern law on debts owed by companies:

> **9095. Yearly interest: UK source: Companies**
> *Interest paid by companies*
> **Companies within the EU**
> Under both the EU Regulation and 1968 Convention, domicile is the main ground of jurisdiction and will, at first sight, determine the rules for the recoverability of debts. EU regulation 44/2001 provides for a definition of domicile for corporations so that the company is domiciled where it has its statutory seat (in the UK its registered office), central administration or its principal place of business.[61] However it is important to note that a corporation is not domiciled in a country for these purposes merely because it does business there. If an EU based company carries on business in a country in which it is not domiciled you have to consider the terms of the loan agreement to determine the situation of the debt. For example, if a company which has its principal place of business in the UK also carries on business in another Member state, where the interest and loan are payable in that other Member state

61 [Author's footnote] Article 60 Judgments Regulation provides:

> "1. For the purposes of this Regulation, a company or other legal person or association of natural or legal persons is domiciled at the place where it has its:
> (a) statutory seat, or
> (b) central administration, or
> (c) principal place of business.
> 2. For the purposes of the UK and Ireland 'statutory seat' means the registered office or, where there is no such office anywhere, the place of incorporation or, where there is no such place anywhere, the place under the law of which the formation took place."

Thus the Judgments Regulation provides *three* places where a company is domiciled and may be sued. There is no single place where the debt can be enforced which would serve as a test for the location of a source.

> and that member state's courts have jurisdiction then the interest will be non-UK source.
> For branches of EU companies the position is as described above for branches generally.[62]

For the reasons given in 70.12.2 (Place-of-debtor rule v. jurisdiction where debt enforced) it is suggested that the better approach is to pay no regard to modern conflicts law in determining the source of interest, even if the place where the debt is enforceable is not the place where the debtor resides.

### 17.4.6 *Interest from securities*

The RDR Manual provides:

> **33550 - Remittance Basis: Identifying Remittances: Specific Topics: Accrued Income Scheme** [July 2010]
> ... Securities are "foreign" where income(in practice, interest) from them would be relevant foreign income. This will include, for example, a security issued in registered form by a non UK company, which maintains the register of note-holders outside the UK.[63]

The rule that the source of interest on registered bonds of a foreign company is the location of the register seems a sensible rule and is consistent with *Bank of Greece*.

## 17.5 Source of interest: conclusion

There are two rival solutions to the question of where is the source of interest: the place of credit test and the balance all the factors approach. It is submitted that the courts ought to adopt the place of credit test, ie the source of interest is where the credit is provided, or where money is lent,

62 [Author's footnote] Article 5(5) Judgments Regulation provides:
"A person domiciled in a Member State may, in another Member State, be sued:
... 5. as regards a dispute arising out of the operations of a branch, agency or other establishment, in the courts for the place in which the branch, agency or other establishment is situated;"

63 The comment is made in relation to the AIS remittance basis, but the point made here relating to the source of interest has a more general application. The text is also found in EN FB 2008.

ie where the money lent is received (the two phrases being understood to come to the same thing). This is consistent with case law, principle, international practice (at least in Hong Kong)[64] and provides a reasonable element of certainty. The English courts are not bound to follow it, however.

The rival balance of all the factors approach is supported by *Spotless* and (after some dithering) HMRC practice, though it would need at least half a dozen reported cases before one could have much idea of the relevant factors and their relative priority, and in practice it is unlikely that the law would ever be clear. If (contrary to my view) such an approach were adopted, it is suggested that the position should be as follows:

(1) Suppose a debt were wholly non-UK connected but secured on UK land; that is, the UK situate security is the only UK aspect of the debt. For instance, a debt from one non-resident to another non-resident, which arises under a contract governed by a foreign proper law. It is suggested that interest on such a debt has a foreign source. It would be wiser to avoid the issue.

By contrast, suppose a debt was made unsecured (or secured on non-UK assets) and later became secured on UK land. It is considered that this would not turn a non-UK source into a UK source.

(2) Suppose a debt were wholly non-UK connected but paid out of funds derived from UK source income (eg rents of UK land). This cannot be enough to make the interest UK source. The origin of funds used to pay interest is a weak connecting factor. (I would submit it should not be a connecting factor at all.)

(3) Suppose a debt were wholly non-UK connected but had a UK resident debtor. It is suggested that this alone does not give the source of interest a UK location.[65]

### 17.5.1 *Commentary*

HMRC rightly say:

---

64 I would be grateful to readers who could direct me to statements of practice from other common law jurisdictions.

65 *Norfolk and Montagu on the Taxation of Interest and Debt Finance* (looseleaf) para 3.172, points out that s.338(4)(d) ICTA (now repealed) assumed it was possible for a UK resident to pay interest with a non-UK source.

> The current tests in UK law of whether, for the purposes of deduction of tax, payment of interest is made from a UK source are unclear and cause confusion.[66]

It is surprising that the question of the source of interest has not given rise to more litigation or to clearer principles. The reason may be that HMRC have in practice taken a relaxed view on source (which no doubt encourages taxpayers to take a relaxed view on disclosure). Of course, there is no guarantee that will continue. Also, DTAs sometimes render the point irrelevant.[67]

The test in the OECD Model Treaty is superior to both the place of credit test and the balance all the factors approach.[68] However legislation (with appropriate transitional provisions) would be needed to make this reform. The gap between the existing case law and this solution is too great to be bridged by the courts, except by the Supreme Court. A HMRC consultation document in 2003 proposed this sensible reform but the proposal was quietly dropped. The reason why was never announced. Tax reforms generally have winners and losers. The losers cry louder than the winners, and that is an obstacle for many tax reforms. But it is not clear that this was the case here since it is hard to identify significant classes of "losers", ie persons who could say with any confidence that they were not taxable under the present law.

---

66 "Income tax: Meaning of UK Source for Payments of Interest and Royalties" Consultation document 10 December 2003, para 1.1. The courts have made the same point in the passage in *Spotless* cited above: "Where ... the transaction is complex in terms of its background, its nature and its execution, and where ... important aspects of the transaction have their origin in locations in several different countries, it will usually be difficult to identify the real source of income so generated."

67 See 17.10 (Double tax treaty relief).

68 Article 11(5) OECD Model Treaty provides:

> "Interest shall be deemed to arise in a Contracting State when the payer is a resident [ie treaty-resident] of that State. Where, however the person paying the interest, whether he is a resident of a Contracting State or not, has in a Contracting State a permanent establishment in connection with which the indebtedness on which the interest is paid was incurred, and such interest is borne by such permanent establishment, then such interest shall be deemed to arise in the State in which the permanent establishment is situated."

If we adopted the OECD model treaty test one modification might be desirable: that where a debtor changes residence, the source of interest does not change (ie the source is determined and fixed at the time the debt arises.) But that point could be argued both ways.

## 17.6 Non-resident's withholding tax

Section 874 ITA provides:

> **874 Duty to deduct from certain payments of yearly interest**
> (1) This section applies if a payment of yearly interest arising in the UK is made—
> (a) by a company,
> (b) by a local authority,
> (c) by or on behalf of a partnership of which a company is a member, or
> (d) by any person to another person whose usual place of abode is outside the UK.
> (2) The person by or through whom the payment is made must, on making the payment, deduct from it a sum representing income tax on it at the basic rate in force for the tax year in which it is made.

For interest paid by individuals, trustees and PRs the obligation to withhold arises under s.874(1)(d) when the following conditions are satisfied:

(1) A payment of yearly interest.
(2) The interest arises in the UK.
(3) The payment is made to a person whose "usual place of abode" is outside the UK. In the following discussion a person whose usual place of abode is outside the UK is described (for brevity) as "**outside the UK**".

### 17.6.1 *Collection of tax deducted and interest on late payment of tax*

The rules for the collection of tax deducted are in chapters 15-17 ITA 2007, s.945-964 ITA. I do not address them here, though I hope to do so in a future edition.

INT Manual provides:

> **542190. Consequences of failing to deduct withholding tax** [March 2011]
> ...
> ***Assessing the unpaid income tax***
> Chapter 15, Part 15 of Income Tax Act 2007 (formerly Schedule 16 ICTA 1988) provides for returns and collection of income tax in respect of payments falling within Section 946 ITA 2007, which specifically includes payments of yearly interest where a deduction is required under

Section 874.
The rules, under Section 951 ITA 2007 are that:
• the income tax on the interest is due on the same date as the return reporting the payment, at the basic rate
• both the return and tax are due within 14 days of the end of the quarter within which the payment of interest was made
• no assessment is required for collection of this tax.
This means that withholding tax, and where applicable, late payment interest, are due and payable even if HMRC does not raise an assessment.
Section 957 ITA 2007 sets out what should happen if it appears that a section 946 payment (which this is) has not been included in a return, and the tax arising on the payment has not been paid:
(1) This section applies if an officer of Revenue and Customs thinks—
(a) that there is a section 946 payment which should have been included in a return under this Chapter and which has not been so included, or
(b) that a return under this Chapter is otherwise incorrect.
(2) An officer of Revenue and Customs may make an assessment, to the best of the officer's judgement, on the person who made the return, or who should have made one.
Note that the onus is on the payer to fulfil their obligation, and to rectify the position if they do not.

## 17.7 To whom is interest paid?

Since the duty to withhold arises on a payment to a person who is not in the UK, it is necessary for non-residents' withholding tax to identify the person to whom the payment is made.[69]

Suppose interest is paid to a transparent (*Baker*-style) interest in possession trust which is not a settlor-interested trust. It is suggested that the interest is paid "to" the trustees (who have a lien). So if the trustees are in the UK but the life tenant is outside the UK the person paying the interest to the trustees need not deduct; but the trustees must do so when they pay the interest to the life tenant. But if the trustees mandate the income to the life tenant, the payer has an obligation to deduct.

Suppose:
(1) interest is paid to a settlor-interested trust; and

---

69 Similar issues arise elsewhere: see 13.4 (To whom does trading income accrue?). Somewhat different issues arise for deposit-takers withholding tax: see 17.11(Withholding tax on interest from deposit-takers)

(2) the trustees are outside the UK and the settlor is in the UK.

At first sight there is no obligation to deduct as the interest is treated as income of the settlor "and of the settlor alone". Following the deeming, the payment should be treated as paid to the settlor. Conversely, if the settlor is outside the UK, there is an obligation to deduct even if the trustees are in the UK. It is suggested that that is the correct view. This is consistent with the position for deposit-takers. HMRC agree. TDSI guidance notes[70] para 2.3 provide:

> [2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit should be considered to belong to the settlor[71] and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.
> [3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust ... and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

But this result is surprising: the payer is expected to know whether the payee is outside the UK, but they cannot be expected to know if the recipient is a settlor-interested trust, and if so, who is the settlor and is the settlor outside the UK.

Section 646(8) ITTOIA provides:

> Nothing in sections 624 to 632 is to be read as excluding a charge to tax on the trustees as persons by whom any income is received.

This is not entirely to the point but it illustrates the view that the deeming of s.624 does not apply in all cases.

Suppose:

(1) interest is paid to a non-resident company within s.720; and

(2) the transferor is in the UK.

The transferor is taxable under s.720 on income treated as arising to them, but the interest is still the income of the company. So there is an obligation to deduct.

---

70 *www.hmrc.gov.uk/tdsi/guidance-notes.pdf*. For TDSI (tax deduction scheme for interest) see 17.11 (Withholding tax on interest from deposit-takers).

71 [Author's footnote] It is assumed that the Stiftung is a settlor-interested trust.

## 17.8 Usual place of abode

### 17.8.1 *Introduction*

The expression "usual place of abode" occurs in the context of withholding tax on rent and copyright royalties, as well as in the context of withholding tax on interest. The meaning in all cases is the same.[72]

The expression is discussed in a variety of HMRC manuals. I set out all relevant passages whether or not the manual has interest specifically in mind.

The phrase "settled or usual abode" is often used as an explanation or paraphrase of the concept of residence[73] so one might think that there is no difference between residence and "usual place of abode". However in the HMRC view there is a difference, though the concepts overlap. The PI Manual provides:

> **4800 Overseas landlords** [May 2010]
> *Meaning of "usual place of abode"*
> "Usual place of abode" is not identical in meaning to residence, or ordinary residence, but a person who is not resident in the UK should normally be treated as having their usual place of abode outside the UK.

Likewise the SAI Manual para 9080:

> **9080. Yearly interest: 'place of abode' of recipient**
> *Meaning of 'place of abode'*
> Section 874(1)(d) ITA 2007 requires deduction of tax from a payment to a person "whose usual place of abode is outside the UK". This phrase is distinguishable from the concept of "residence"...

### 17.8.2 *Individuals*

The PI Manual provides:

---

72 This view is adopted by ITA EN para 2648: "The term 'usual place of abode' is consciously retained, *because it is a technical term*, distinct from residence" (emphasis added).

73 See 3.8 (Case law on residence).

**4800 Overseas landlords** [May 2010]
a. Individuals have a usual place of abode outside the UK if they usually live outside the UK. You should still regard the term as applying to them even if in a particular year they are resident in the UK for tax purposes, as long as the usual place of abode is outside the UK. (For example the individual may count as resident in the UK in a particular year because of a six months' visit, [or a visit of a shorter time when he has a place of abode available in the UK].)[74] Do not treat someone as having their usual place of abode outside the UK if they are only temporarily living outside the UK, say for six months or less.

The SAI Manual makes the same point more tersely:

**9080. Yearly interest: 'place of abode' of recipient**
An individual's usual place of abode is outside the UK if he or she usually lives abroad, unless that arrangement is temporary.

This roughly equates "usual place of abode" with ordinary residence.

The former Inspectors Manual made some comments which are not in the current manuals. Perhaps there has been a change of practice, or at least of emphasis:

**4005. Usual place of abode** [October 2003]
The term 'usual place of abode' should be interpreted in the light of the intention of [what is now s.906 ITA], which is to enable tax in respect of income from a copyright in this country to be collected both where the copyright owner lives wholly abroad and also where his visits to the UK are not of sufficient duration to enable the tax to be collected with any ease under the ordinary machinery.
A person may be regarded as having his usual place of abode in this country if he usually or habitually lives here for considerable periods each year, for example, for an unbroken period of three or four months, or for broken periods amounting to five or six months. A person with a house in this country, but habitually here for so short a time that there is or has been difficulty in collecting tax under a direct assessment upon him, should not be considered as having his usual place of abode here. If, however, the conditions are such that tax can clearly be collected

74 Author's note: This refers to the supposed "available accommodation rule" which was abolished in 1993. The passage was no doubt written before 1993 and has not been updated since.

without difficulty, no objection need be taken to regarding the person as having his usual place of abode in this country.
[It will be observed that it is possible for a person who has a house here to be 'resident' - and also 'ordinarily resident' - and yet not to have his 'usual place of abode' here.][75]
(If a copyright owner's usual place of abode is in the UK this fact connotes that he is resident and carries on his vocation of author etc. in this country. He is consequently liable to direct assessment on the whole of his profits, including any lump sum payments and payments from abroad.)

### 17.8.3 *Companies*

The PI Manual continues:

> **4800 Overseas landlords** [May 2010]
> b. Companies that have their main office or other place of business outside the UK, and companies incorporated outside the UK, will normally have a usual place of abode outside the UK. However if the company is treated as resident in the UK for tax purposes, do not treat it as having a usual place of abode outside the UK.

The SAI Manual addresses the question of UK branches of non-resident companies:

> **9080 Yearly interest: 'place of abode' of recipient**
> *Companies*
> A non-UK resident company that has a UK permanent establishment that is within the charge to corporation tax does not have a usual place of abode abroad.[76]

This practice seems surprising, but it favours the taxpayer so it will not be challenged.

---

75 Author's note: This also refers to the supposed available accommodation rule: see above footnote.

76 Accessible *www.hmrc.gov.uk/cnr/nrl_guide_notes.pdf.* The HMRC guidance notes on the Non-resident Landlords Scheme likewise provides:
"2.5 The UK branch of a non-resident company, where that branch is within the charge to Corporation Tax, does not have a usual place of abode outside the UK for the purposes of the NRL Scheme."

### 17.8.4 *Trustees and PRs*

The SAI Manual 9080 provides:

> **9080 Yearly interest: 'place of abode' of recipient**
> *Trustees*
> Trustees, including personal representatives, have a usual place of abode abroad if each trustee, considered as an individual or a company as the case may be, has a usual place of abode there. So if one trustee does not have a usual place of abode abroad, neither does the trust.[77]

This text was probably composed before the statutory residence rules for trustees and PRs. One might have thought that the usual place of abode for trustees and PRs is where they are resident under those rules. But the HMRC practice favours the taxpayer so it will not be challenged. It is also satisfactory for HMRC; as long as one trustee is here, HMRC can collect tax from that trustee and do not need the assistance of a withholding tax.

### 17.8.5 *Miscellaneous*

The HMRC guidance notes on the Non-resident Landlords Scheme makes further comments which are also relevant to deduction of interest:

> **Jointly owned property**
> 2.7 Where a property is jointly owned and one or more of the joint owners has a usual place of abode outside the UK, the share of rental income applicable to those joint owners falls within the NRL Scheme. The share applicable to joint owners who do not have a usual place of abode outside the UK does not fall within the Scheme. For husband and wife joint-ownership cases, see para 2.8 below.
> **Husband and wife joint-ownership cases**
> 2.8 Where a husband and wife jointly own a UK property and both have their usual place of abode outside the UK, the NRL Scheme applies to both spouses and each is treated as a separate landlord in their own right.

---

77 The PI Manual similarly provides:
"c. Trustees have a usual place of abode outside the UK if all the trustees have a usual place of abode outside the UK."

If the husband and wife both wish to receive the rental income with no tax deducted they must each complete a separate application form and send it to the Inland Revenue (see Chapter 11 below). In such cases, letting agents and tenants should pay rental income with no tax deducted only to the spouse(s) named on Inland Revenue authorities they hold. Under no circumstances should they pay with no tax deducted to a husband and wife where they hold an authority to do so for only one spouse. But if only one of the spouses has a usual place of abode outside the UK, the NRL Scheme applies only to that spouse's share of the rental income. The rental income belonging to the UK resident spouse is not within the Scheme and no Inland Revenue approval is required to pay the income with no tax deducted.

**Members of HM Armed Forces and other Crown Servants**

2.9 Members of HM Armed Forces and other Crown Servants, including diplomats, are treated no differently from any other non-resident landlords. So if they receive UK rental income and have a usual place of abode outside the UK (see para 2.3 above) the NRL Scheme applies to them.

2.10 If members of HM Armed Forces and other Crown Servants whose usual place of abode is outside the UK wish to receive rental income with no tax deducted, they should apply to HMIT Public Department 1 or South Wales Area tax office, as appropriate, for approval (see Chapter 11.1 below).

**How do letting agents and tenants know whether a landlord has a "usual place of abode" outside the UK?**

2.11 A landlord's usual place of abode (see paras 2.3 to 2.6 above) will usually be evident without the need for special enquiries. If it is outside the UK, letting agents or tenants should operate the NRL Scheme. If the usual place of abode is in doubt, letting agents and tenants should get more information from the landlord to satisfy themselves on the point. In particular, PO Box numbers and "care of" addresses alone should *not* be relied on as evidence that the Scheme does not apply. In cases of difficulty letting agents can get advice from the Centre for Non-Residents (see para 1.15 above).

2.12 Where letting agents and tenants have no reason to believe that a landlord has a usual place of abode outside the UK they are not required to make any special enquiries. In these circumstances they do not have to operate the Scheme.[78]

78 Accessible *www.hmrc.gov.uk/cnr/nrl_guide_notes.pdf.*

### 17.8.6 *Commentary*

Do we need a concept of "usual place of abode" in addition to concepts of residence and ordinary residence? At first sight it seems that the law could and should be simplified by replacing the reference to usual place of abode with a reference to ordinary residence. At present perhaps we need a separate concept: a rule requiring deduction of interest at source on payment to a non-ordinarily resident would be difficult to apply because "ordinary residence" is far too unclear. For a payer to ascertain the ordinary residence of the lender would require searching enquiries and even then the payer would often not know the position. The lender himself may not know. To ascertain the "usual place of abode" may perhaps be a little more practical (though I am not altogether sure about that). However if we had proper definitions of "residence" and ordinary residence, then we could and should adopt them here and "place of abode" should be abolished.

## 17.9 Exceptions to obligation to deduct

Sections 875–888 ITA set out 14 exceptions to the duty to deduct. In outline:

| Section | Exemption |
|---|---|
| 875 | Interest paid by building societies |
| 876 | Interest paid by deposit-takers |
| 877 | UK public revenue dividends |
| 878 | Interest paid by banks |
| 879 | Interest paid on advances from banks* |
| 880 | Interest paid on advances from building societies |
| 881 | National Savings Bank interest |
| 882 | Quoted Eurobond interest |
| 883 | Interest on loan to buy life annuity |
| 884 | Relevant foreign income* |
| 885 | Authorised persons dealing in financial instruments |
| 886 | Interest paid by recognised clearing houses etc |
| 887 | Industrial and provident society payments |
| 888 | Statutory interest |

The most relevant to the themes of this book are marked * and considered in more detail below.

### 17.9.1 *Foreign source interest*

Section 884(1) ITA provides:

> The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest which is chargeable to income tax as relevant foreign income.

This is otiose, as the obligation applies only to interest arising in the UK. The SAI Manual correctly states:

> **9090 Yearly interest: UK source: The general rule** [January 2009]
> The obligation to deduct tax from interest that has a UK source is imposed by Chapter 3 of Part 15 ITA 2007 ... Section 874 ITA 2007 specifies that the interest must be "yearly interest arising in the UK". Section 884 ITA 2007 makes it clear that this excludes "relevant foreign income", that is, income arising outside the UK (see SAIM1130).
> So whether or not tax should be deducted from interest paid on an overseas loan depends on the source of the interest. If the interest has a UK source tax must be deducted, if it does not then tax should not be deducted.

### 17.9.2 *Interest paid to UK bank*

Section 879(1) ITA provides:

> The duty to deduct a sum representing income tax under section 874 does not apply to a payment of interest on an advance from a bank if, at the time when the payment is made, the person beneficially entitled to the interest is within the charge to corporation tax as respects the interest.[79]

This would apply on payment of interest to a UK branch of a non-resident

79 For completeness, s.879 continues:
"(2) Section 991 (meaning of 'bank') applies for the purposes of this section.
(3) Subsection (1) applies to the European Investment Bank as if the words from 'if' to the end were omitted.
(4) An order under subsection (2)(e) of section 991 designating an international organisation as a bank may provide that subsection (1) applies to the organisation with the modification mentioned in subsection (3)."

bank, though it may be that such companies do not have their usual place of abode abroad.

### 17.9.3 *Short interest*

Tax law distinguishes between:
(1) "yearly" or "annual" interest (the terms are synonymous); and
(2) other interest (known as "short" interest).
The duty to deduct tax does not apply to short interest. The SAI Manual explains the distinction:

> **9075. Yearly interest: Case law on short and yearly interest** [January 2009]
> *When is interest "short" or "yearly"?*
> Although tax law has made a distinction between yearly and short interest since 1806, there is no statutory definition of yearly interest. The distinction rests wholly on case law.
> The classic example of short interest is interest payable on a bank loan for less than a year. In the early case of *Goslings and Sharpe v Blake* (2 TC 450), the Court of Appeal confirmed that interest on such a loan, where there was no provision to extend the borrowing for more than a year, could not be yearly interest, notwithstanding the use of an annual percentage rate.
> It is therefore a useful starting point to say that where a loan or debt is for less than a year, there is a presumption that it gives rise to short interest. Conversely, interest on a loan or debt that exists for more than a year is likely to be yearly interest.
> But you cannot just apply this as a mechanical rule, with the benefit of hindsight. Particular difficulties may occur where, at the time when a loan or debt comes into existence, it is not clear how long it is going to last.
> For example, the case of *Bebb v Bunny* (1854) 1 K&J 216 concerned the payment into court of the purchase price of a property, with interest on the delayed payment. It would have been possible for the interest to have run for more than a year if the purchaser had been particularly late in paying. The judge held that the interest was yearly. On the other hand, the Court of Appeal held, in *Gateshead Corporation v Lumsden* [1914] 2 KB 883, that certain interest which had run for more than a year was nevertheless short interest. The interest in question was statutory interest due to Gateshead Corporation on late-paid contributions towards the cost of making up roads. The court took the view that the mere failure by the Corporation to enforce the debt within a year did not make the interest "yearly interest".
> To distinguish interest arising on long-term loans from that arising on apparently short-term debts, the courts began to lay stress on the debt having "a measure of permanence" or being "in the nature of an investment" as opposed to being merely "temporary accommodation". Thus in *Corinthian Securities Ltd v Cato* (46 TC 93) the Court of Appeal decided that interest on a bank loan, repayable on demand, was yearly interest because the loan had the quality of investment –

even though, in the event, the loan was called in after 6 months.

However, the leading case on yearly interest is now considered to be *Cairns v MacDiarmid* (56 TC 556). In this case, the Court of Appeal saw the intention of the parties as the determining factor. If the debtor and creditor intend that the debt should subsist for more than a year, or where there is mutual acceptance that the interest may have to be paid from year to year, the interest will be yearly. This principle was applied in *Minsham Properties Ltd v Price* (63 TC 570), where a loan from a parent company, repayable on demand, gave rise to yearly interest because it was regarded by both parties as permanent finance.

It was felt in *Cairns v MacDiarmid* that merely asking whether a loan had the character of an investment was a less useful test – even an overnight deposit of money might be regarded as an "investment".

**9076. Practical application** [November 2007]

*Applying case law principles*

It is always a question of fact whether, in any particular case, interest is yearly or short. The intention of the parties will be the most important factor in deciding the question (see SAIM9075).

The question of whether interest is short interest, from which the payer has no obligation to deduct tax, is most likely to arise in the context of payments made by a UK resident to a person whose usual place of abode is outside the UK. If the interest is short, there is no need for the recipient to apply under a relevant Double Taxation Agreement to receive the interest gross (or with tax withheld at a reduced rate). There is guidance at INTM505010 onwards.

A UK resident may make a series of loans, each of less than a year, to a non-resident, and claim that the interest is short. HMRC staff should refer to the guidance at INTM542010 in such cases.

Uncertainty may also arise as to whether there is a duty to deduct tax from interest in circumstances comparable to that in *Bebb v Bunny* (SAIM9075) – where a sum of money remains outstanding for a period that may, or may not, be longer than a year. For example, a manufacturer might guarantee to refund the purchase price, with interest from the date of claim, if a product proves faulty: such claims may normally be processed speedily but, in disputed cases, may drag on for over a year.

Where the parties intend at the outset that monies due will not be left outstanding longer than 12 months, the interest will be short – even if, in a few cases, there are delays which prolong the period over which interest accrues. If however the parties anticipate at the beginning that the debt will exist for more than a year, or appear to be indifferent as to whether it will or not, the interest is likely to be yearly.

Where the payer of the interest is uncertain about whether it is short or yearly, they may in practice "play safe" by deducting tax. If the recipient of such interest objects to the tax deduction, HMRC staff should advise him or her to take up the matter with the payer, see SAIM9180.

If, conversely, the payer decides that interest is short and pays it gross, HMRC staff should not challenge that view unless

- the decision appears to be completely unjustified on the facts and in the light of relevant case law, or there is reason to suspect a definite intention of

avoiding the payment of withholding tax; and
- material sums of tax are at risk.

Overdraft interest is usually short interest.

The INT Manual formerly provided:

> ***542010. Provisions of Section [s.874 ITA]*** *[March 2007]*
> *In some circumstances, an overseas lender may seek to circumvent the provisions of [what is now s.874 ITA] by advancing a series of short-term consecutive loans, each for a period of less than one year. It may then be argued that the interest is not annual interest but short interest, to which the provisions of [s.874 ITA] do not apply. This argument is open to challenge unless the UK borrower can show that there was no need for long term funding or that alternative sources of funding were readily available to replace that which was argued to be short term.*
> *Where Inspectors meet a situation in which a long-term funding requirement is being met via a series of short-term loans, they should refer for advice to CT & VAT, Business Profits & Relief.*

This was deleted when the manual was rewritten in March 2011. Perhaps HMRC now accept these arrangements. Challenge would be harder if the short-term loans are each from separate lenders.

### 17.9.4 *Discounts and premiums*

The duty to deduct tax does not apply to:

(1) profits on discounts (which are normally treated as interest but which are expressly taken out of the duty to deduct);

(2) premiums even though premiums may be charged to income tax.

SAI Manual rightly provides:

> **3070 Taxation: Profit on disposal**
> *Deduction of tax*
> Discounts or premiums payable on the redemption of relevant discounted securities[80] are not payments of interest. Consequently the payments are made without deduction of tax.

---

80 Discounts and premiums on securities which are not "relevant discounted securities" are also not "interest".

However, the distinction between interest and premiums can be fraught.

## 17.10 Double tax treaty relief

Regulation 2(1) Double Taxation Relief (Taxes on Income) (General) Regulations 1970 provides:

> The following provisions of these Regulations shall have effect where, under arrangements having effect under section 497 ICTA 1970 [now s.2 TIOPA], persons resident in the territory with the government of which the arrangements are made are entitled to exemption or partial relief from UK income tax in respect of any income from which deduction of tax is authorised or required by the Income Tax Acts.

This applies where interest qualifies for relief under a DTA. Regulation 2(2) provides the exemption from withholding tax:

> Any person who pays any such income (referred to in these Regulations as "the UK payer") to a person in the said territory who is beneficially entitled to the income (such person being referred to in these Regulations as "the non-resident") may be directed by a notice in writing given by or on behalf of the Board that in paying any such income specified in the notice to the non-resident he shall—
> (a) not deduct tax, or
> (b) not deduct tax at a higher rate than is specified in the notice, or
> (c) deduct tax at a rate specified in the notice instead of at the lower[81] or basic rate otherwise appropriate;
>
> and where such notice is given, any income to which the notice refers, being income for a year for which the arrangements have effect, which the UK payer pays after the date of the notice to the non-resident named therein shall, subject to the following provisions of these regulations, be paid as directed in the notice...

### 17.10.1 *Which treaties provide relief?*

The question whether interest qualifies for exemption depends of course on the DTA concerned. The OECD Model Convention does not provide

81 The rate "otherwise appropriate" is always the basic rate, never the lower rate; the drafter has failed to amend the wording of the regulation to keep up with the changes to the rates of tax in 2008. But no harm arises from this error.

exemption but only a partial relief. About one third of UK DTAs provide full relief, including France, Ireland, Luxembourg, Switzerland and USA.[82] HMRC publish a convenient digest of DTAs.[83]

The Jersey, Guernsey and Isle of Man DTAs do not provide exemption for interest. They do however provide an exemption for industrial or commercial profits. The treaties are in similar form so I take the Jersey DTA as an example. Art 3(2) Jersey DTA provides:

> The industrial or commercial profits of a Jersey enterprise shall not be subject to UK tax unless the enterprise is engaged in trade or business in the UK through a permanent establishment situated therein. If it is so engaged, tax may be imposed on those profits by the UK, but only on so much of them as is attributable to that permanent establishment.

This confers relief on interest, provided:

(1) The recipient is a Jersey enterprise, defined as "an industrial or commercial enterprise or undertaking carried on by a resident of Jersey"[84] (eg a Jersey bank).

(2) The recipient is not engaged in trade or business in the UK through a PE in the UK (or if it is so engaged, the interest is not profits attributable to that PE).

(3) The interest is or is part of the "industrial or commercial profits".

A person who makes a simple loan by way of investment does not carry on an industrial or commercial enterprise, and interest on such a loan does not constitute industrial or commercial profits. However a business (such as a bank) which includes lending does constitute an industrial or commercial enterprise and the interest is part of its profits.[85] HMRC agree. The International Manual provides:

> **355225. Industrial or commercial profits paragraph** [July 2005]
> Para 3 provides for the relief from UK tax of "the industrial or commercial profits of a Jersey enterprise".
> In practical terms, this means that we can allow relief on UK interest

---

82 UK/France Art.11; UK/Ireland DTA Art.12; UK/Luxembourg DTA Art.11; UK/Switzerland DTA Art.11; UK/USA DTA Art. 11.

83 *www.hmrc.gov.uk/cnr/dtdigest.pdf.*

84 Jersey/UK DTA art.2(1)(h).

85 The issue was discussed in more detail in the 6th edition of this work, but the Manual passages cited makes this academic.

paid to a bona fide bank in Jersey, since it can be held that interest represents part of the bank's profits as defined by para 3.

So if you get a claim from a bank in Jersey you will need to;

- be certain that it is a recognised bank – the Banker's Almanac will help you here[86]
- consider if you should have the loan agreement reviewed by the inspector of taxes who deals with the accounts of the UK borrower – the guidance at INTM342010 will help you here

If these checks are satisfactory, you can allow **full** relief.

**But** if you receive a claim from a Jersey enterprise in respect of any other category of income, please refer to Technical Advice Group before taking any action.

The International Manual provides:

**337310. Background to claims by foreign financial concerns** [April 2004]

Under a long-standing practice approved by the Board a claim by an overseas financial concern for interest which bears the character of income arising from their trading activities or forms part of their trading income may be relieved under the Business Profits Article (provided the Business Profits Article doesn't clearly exclude interest for example Kenya) in either of the following circumstances

- there is no interest article, or
- the conditions of the interest article are not satisfied.

**337320. Claims by Channel Islands and Isle of Man Banks** [March 2007]

CAR Residency is authorised to consider claims and applications for relief at source by banks in the Channel Islands and the Isle of Man in respect of interest under paragraph 3(2) of the Double Taxation Arrangements with those countries. The basis for this is that the interest forms part of the 'industrial and commercial profits' of the banks.

Relief in respect of interest is available only to a bona fide bank. If you receive a claim or correspondence about relief under paragraph 3(2) from any other concern in the Channel Islands or Isle of Man you should refer the case to Technical Advice Group.

**337330. How to deal with claims from foreign financial concerns** [April 2004]

If you receive a claim or correspondence for income which can be

86 [Author's footnote]: see *www.bankersalmanac.com*.

considered under the Business Profits Article as outlined in INTM337310 you should deal with it as follows:

Where there is no interest article in the relevant Double Taxation Agreement (DTA) and the claimant is not trading in the UK through a permanent establishment, exemption may be authorised under the business profits article on form 241(Int-Roys).

Where in such circumstances the claimant is trading in the UK through a permanent establishment, necessitating restriction of relief under that article, and in cases where there is an interest article but claims under it are automatically restricted because the claimant is trading in the UK through a permanent establishment, you will need to consult the Inspector dealing with the permanent establishment and arrange for any interest attributable to the permanent establishment to be included in his computation of liability. Form 502 should be used for this purpose. Provided the Inspector has no objections the interest can then be exempted under the business profits article using form 241(Int-Roys).

You should issue form 501 (amended as necessary) with the Inspector's copy of the exemption notice where relief is authorised under the business profits article and there is trading in the UK through a permanent establishment. Where there is no trading through a permanent establishment you need to send a memo with the exemption notice explaining the circumstances in which relief has been authorised.

Note: These provisions do not apply where the rate of relief under the business profits article is more favourable than under the interest article and relief is available under the latter.

**337340. Requests to extend the provisions to other income** [April 2004]

If the claimant asks you to extend the concession to dividends or other distributions you should ask the UK Inspector for the permanent establishment (PE) to confirm that

- the payments represent trading income and
- they are not attributable to the Branch or PE.

The reason for doing this is because dividends/distributions, unlike interest and royalties, cannot be brought into the charge to corporation tax on the PE (Section 11(2) ICTA 1988).

### 17.10.2 *Procedure for claiming relief*

For the procedure see RI 79, Tax Bulletin 41, and the HMRC booklet "Double Taxation Relief Provisional Treaty Relief Scheme".

The application forms are available online.[87]

The International Manual provides:

> **542200. The interaction between UK taxing rights and double taxation agreements** [March 2011]
> Where UK-source interest is paid to a person taxable in another state, the same income might be taxable both in the source state (the UK) and in the recipient's country. If the person being subjected to double taxation (the recipient of the interest) makes a certified application to HMRC's treaty team, fulfilling the relevant requirements, the double taxation can be reduced or eliminated so far as the relevant double taxation agreement (DTA) and domestic legislation allows. This is effected by the source state yielding some or all of its taxing rights.
> Chapter 1 of Part 2 of TIOPA 2010 (formerly Section 788 ICTA 1988) gives effect to the arrangements contained in DTAs, since domestic legislation is necessary to either remove or reduce the requirement to deduct tax in Section 874 ITA 2007, or to give entitlement to repayment of tax previously deducted.
> To obtain treaty benefits, the lender must demonstrate eligibility, in which case HMRC will give up its prospective taxing rights and issue a notice under SI 1970/488 directing the borrower to begin paying the interest on the loan in question in accordance with the DTA.

### 17.10.3 *Relief when borrower is a partnership*

HMRC say:

> In deciding whether or not HMRC Residency should exercise its discretion in meeting an application for relief at source [ie an application to pay interest without deduction], it must primarily have regard to the risk that the underlying conditions for relief might change over the lifetime of a Direction (which will normally last no longer than five years). Such changes might remove the basis for relief altogether, or in some other way prejudice the amount of tax that the UK is otherwise properly entitled to receive in that period.
> Given its duty of care to the UK Exchequer and taxpayer, HMRC Residency have to give particular consideration to the desirability of giving DT treaty relief where transparent concerns such as partnerships and LLCs are concerned. This is because, more often than not, there is a much higher risk that the beneficial owners of such concerns will change. Or that there will be fluctuations in income or profit apportionment that might erode the amount of UK-source income that is attributable to the DT treaty-resident beneficial owners who were identified at

87 Accessible *www.hmrc.gov.uk/cnr/app_dtt.htm#5*.

> the time the application for relief at source was made.
>
> Attention is drawn to the undertaking sought from claimants in the Declaration (Part F of the US/Company 2002) that they will notify HMRC Residency of any changes in the information given on the form. (A similar warning to notify any material changes is given to a UK payer when a Direction is issued to it.)
>
> Without calling into question the good faith of partnership or LLC claimants who give these undertakings, HMRC Residency considers that the problem of monitoring this aspect is particularly acute where there are a very large number of investors, or there is an unfeasible number of layers of participation - partners who are themselves partnerships, which contain yet more transparent partners.
>
> For these reasons, although HMRC Residency is willing to entertain any application for relief at source from partnerships or LLCs, it should be understood that it is likely to give relief in this way chiefly where:
>
> * HMRC Residency are able to accept satisfactory assurances about the monitoring and notification of membership from the claimant concern.
> * The number and type of the concern's membership is not a problem in the first place - for example, a small and fixed number of participators, such as US corporations engaged in a joint venture. Or where the concern is the business arm of a small number of joint intellectual property owners such as a band or similar collaborative venture.
> * In response to a successful representation of special considerations or factors that would allow us to decide that relief may safely be given in this form.
>
> Each case will be considered on its merits.
>
> Otherwise, HMRC Residency will consider giving relief only by meeting discrete repayment claims.[88]

Although this comment is made in relation to the USA DTA, it should apply to partnerships generally. On the other hand, it applies only to American LLCs (which are treated as transparent under the US DTA).

If interest is paid before a notice of non-deduction is obtained, tax deducted at source can be reclaimed by the creditor. If the loan agreement provided for grossing up where tax is deducted at source, the creditor may compensate the debtor for over-payment).

### 17.10.4 *Relief when borrower is outside the UK*

HMRC Residency Double Taxation Guidance Note 1 deals with applications for relief at source on interest payments where the borrower is outside the UK:

88 "HMRC Residency Double Taxation Guidance Note 3 partnerships and LLCs claiming relief under the 2002 UK/USA DTC."

> This Guidance Note explains how HM Revenue & Customs (HMRC) Residency Nottingham handles applications for relief at source from UK income tax under a double taxation treaty in respect of interest payments where both lender and borrower are outside the UK.
>
> [After some general comments on the law the note continues]
>
> In its consideration of an application for relief at source in such circumstances, HMRC Residency must be satisfied that all the elements necessary to give relief are present. In the circumstance where the payer of the interest is not situated in the UK, HMRC Residency will need satisfactory evidence that the payer has concluded that the payments are to be considered as UK-source and has formed the intention of deducting and accounting for tax accordingly.
>
> HMRC Residency's claim forms ask claimants to attach copies of relevant loan documentation as part of the normal process. In cases such as those discussed in the previous paragraph, HMRC Residency would also ask claimants to enclose supporting evidence confirming the payers' intentions. This could, for example, be copies of pertinent correspondence with the borrower or other relevant documentation.
>
> Without the comfort afforded by such supporting documentation, HMRC Residency may well take the view that it should not exercise its discretion under SI 1970/488 to authorise relief at source.
>
> However, it would then be open to the non-resident payee to make a repayment claim to HMRC Residency once the interest payments have commenced and tax has been deducted. HMRC Residency will be prepared to keep the application for relief at source open and on file pending this eventuality. If the non-resident payee is then able to forward a certificate of tax deducted completed by the payer, HMRC Residency may then be able to accept that the UK source categorisation of the payments has been established. Assuming that all the other conditions for Double Taxation treaty relief are present, HMRC Residency should then be in a better position both to repay the tax deducted and consider in a more positive light the appropriateness of issuing a Direction under SI 1970/488 for future payments.

This is quite the most absurd procedure which could possibly be imagined, for in many cases the payor will want to argue that the interest is not UK source but (since one can rarely[89] be sure) will want a direction to pay

---

89 The guidance note states complacently that "The meaning of UK-source in this context will not normally give rise to difficulties." The author has not read the HMRC consultation paper on interest:

> "The current tests in UK law of whether … payment of interest is made from a

gross as a safeguard. Perhaps no-one takes any notice of it in practice.

17.10.5 *Interest paid before HMRC notice to pay gross*

The INT Manual provides:

> **542190. Consequences of failing to deduct withholding tax** [March 2011]
> ...
> An application by the overseas lender under a DTA or under the EU Interest & Royalties Directive (INTM400000), is likely to be made up of two elements, depending largely on how promptly the claim follows the making of the loan. These are:
> • A clearance application - for Section 874 no longer to apply (or only to apply to a lower rate of withholding specified in the relevant tax treaty). If the application is successful, the payer will receive a notice issued under SI 488/1970 advising them that they may henceforth, for a specified period, pay interest gross or at the lower rate on the income named in the notice;
> • A repayment claim - for tax which the payer of the interest has paid to HMRC in compliance with their Section 874 obligation, prior to the notice being issued.
> Forms available on the HMRC website cater for both elements on a single form.
> It is vital to understand that until the payer receives a notice directing them to do otherwise, the payer must withhold and account for the income tax on interest payments made to an overseas lender. The UK payer is not entitled to anticipate either the lender making an application or the outcome of them doing so. It is immaterial whether the lender is a fellow group company to the borrower, or a vast European lending institution for which the borrower is just another customer.
> If, while the obligation to withhold and pay over the tax persists, the payer fails to do so or does so late, then HMRC can assess and recover the tax, and charge late payment interest under Section 87 TMA 1970 on the outstanding income tax, running from the tax due date to the date of payment. See INTM542200 for what may happen in circumstances where a valid clearance/repayment claim is received.
> So-called "grossing up clauses" appear in loan agreements, requiring borrowers to pay over interest as if the treaty benefits already applied i.e.

UK source are unclear and cause confusion."
See 17.5.1 (Commentary)

without deduction or with deduction at a treaty-specified rate. Whether this appears in an agreement between group companies or with an unconnected lender, it remains a private agreement between those parties and does not affect the obligation of the interest payer, as outlined above.

The International Manual provides:

**542200. The interaction between UK taxing rights and double taxation agreements** [March 2011]

... If clearance is obtained early in the term of the loan, before any interest payments have been made, then all the interest accruing on the loan (up to the expiry of the treaty clearance if applicable) can be paid without deduction, or subject to a lower rate of income tax, depending on the DTA. However, a problem arises when the benefits set out in the DTA have not yet been obtained and the company paying the yearly interest does so - for whatever reason - without withholding and accounting for the income tax.

Although it is recognised that once treaty clearance has been granted (following a successful certified DTA application), income tax will either no longer be withheld or may be withheld at a lower rate, it must also be recognised that clearance applies only to arm's length interest payments made after the clearance is granted. The obligation to deduct income tax from yearly interest paid prior to clearance will not have been removed, and therefore remains enforceable. For payments of interest made before clearance is notified, double taxation is relieved by the lender making a claim for repayment of the income tax withheld. Forms available on the HMRC website allow repayment claims to be made at the same time as the certified application for treaty benefits, although the repayment relief can only go back 5 years after the 31st January next following the year of assessment to which it relates (Section 43(1) TMA 1970).

***Section 87 TMA 1970 - late payment interest***

In addition to the unpaid income tax remaining due and payable on payments of yearly interest not covered by a treaty clearance notice, late payment interest will accrue under Section 87 TMA 1970 on any unpaid tax, from the due date (normally 14 days after the quarter in which the yearly interest was paid) until payment. It will accrue whether or not the income tax has been assessed, and while any income tax paid can be repaid if it is subject to a valid repayment claim from the lender, there is no relief or discharge from the Section 87 TMA 1970 interest charge on the payer.

The Section 87 TMA 1970 late payment interest charge is both mechanical and neutral, and accrues at the same rate irrespective of the reason for late payment. While it is not a penalty (though penalties are available for failure to make a return under Part X of TMA70), it stands to reason that if the loan is large, and the tax is outstanding for a long time, the interest charge will be correspondingly greater than in other circumstances.

This is the position for pre-clearance interest payments made gross, even after a DTA clearance application has been made, and clearance granted. While the UK may give up its taxing rights, HMRC does not give up its right to recompense for the late payment of the income tax from the time when it was due. UK taxing rights do not simply disappear following a DTA clearance application, taking with them all associated obligations. HMRC surrenders primary taxing rights to the tax authority of the claimant's country of residence, but retains the power to assess income tax which has not been accounted for and which has not been paid under a notice giving permission to pay gross. Interest payments made before the date on which clearance takes effect are not subject to the clearance. This is the statutory position, unaffected by the fact that assessment and collection of the tax might take place after a certified DTA clearance application has been lodged, in circumstances where it would be immediately repayable to the applicant (assuming a successful claim).

However, in circumstances where there is an established entitlement to repayment, HMRC will by concession, circumvent the assessment and repayment process, and if assessments are raised, they will be "interest only" assessments to collect the Section 87 TMA 1970 interest.

***Assessing only the Section 87 TMA 1970 late payment interest - concession***

Despite the existence of the powers mentioned above to recover tax which is owing, HMRC considers that in circumstances where it is clear that

- the overseas recipient of the interest has applied for, and has been granted, clearance to receive future interest payments from the source in question without deduction of income tax under SI 1970/488; and
- the lender would be entitled to repayment of the tax for the period for which income tax should have been withheld, so that it is clear that if tax had been accounted for each period concerned, ultimately HMRC would not have retained it

the right to assess and collect the tax will be set aside and only the Section 87 TMA 1970 interest will be sought. For more detail, see the Thin Cap Practical guidance from INTM574000 onwards.

The notion that tax collected from the payer will inevitably be repayable to the overseas recipient is not one that may be assumed. It must be established as a fact and a legal right.

### 17.10.6 *Commentary*

The EU has issued a recommendation to encourage relief from withholding tax where treaty relief applies. Where “in exceptional cases” tax relief at source is not feasible, member states are invited to set up standardised and quick refund procedures.[90] The recommendation is not binding but hopefully it will lead to a review of the UK law and practice.

The deduction scheme for royalties allows self-certification. It is suggested that a similar system should be introduced here.

## 17.11 Withholding tax on interest from deposit-takers

The legislation is in chapter 2 part 15 ITA. HMRC refer to this as the tax deduction scheme for interest (“TDSI”) but I prefer not to use that label as this is only one of the three tax deduction schemes for interest discussed in this chapter. HMRC have issued 139 pages of guidance notes.[91] This contains much interesting material which is not set out here for reasons of space.

Section 851 ITA provides:

> (1) This section applies if—
> (a) a deposit-taker or building society makes a payment of interest on an investment (see section 855(1)), and
> (b) when the payment is made, the investment is a relevant investment (see section 856).
> (2) The deposit-taker or building society must, on making the payment, deduct from it a sum representing income tax on it at the basic rate in force for the tax year in which it is made.

Section 852 ITA authorises exceptions to be made by statutory instrument. Sections 853 and 854 ITA provide an elaborate definition of “deposit-taker” but for present purposes it is sufficient to note that the expression includes banks.

---

90 EU recommendation 19 Oct 2009 on withholding tax relief procedures C(2009)7924 final.

91 February 2009, accessible *www.hmrc.gov.uk/tdsi/guidance-notes.pdf.*

### 17.11.1 *Investment and deposit*

Section 855 ITA provides commonsense definitions of these terms:

> (1) In this Chapter "investment" means—
> (a) a deposit with a deposit-taker,
> (b) a deposit with a building society,
> (c) shares in a building society, or
> (d) a loan to a building society.
> (2) In this Chapter "deposit" means a sum of money paid on terms which mean that it will be repaid (with or without interest)—
> (a) on demand, or
> (b) at a time or in circumstances agreed by or on behalf of the person who pays it and the person who receives it.

## 17.12 Relevant investment

The expression "relevant investment" is a label which brings in a number of rules. Section 856 ITA provides:

> (1) An investment is a relevant investment for the purposes of this Chapter if it meets—
> (a) the individual interest condition (see subsection (3)),
> (b) the Scottish partnership condition (see subsection (4)),
> (c) the personal representative condition (see subsection (5)), or
> (d) the settlement condition (see subsection (6)).
> (2) But an investment is not a relevant investment if any of sections 858 to 870 prevent it from being a relevant investment.

### 17.12.1 *Individual interest condition*

Section 856(3) ITA provides:

> An investment meets the individual interest condition if the only persons beneficially entitled to interest on the investment are individuals.

An investment held by a Baker IP trust meets this condition as the life tenant (assume, an individual) is beneficially entitled to the interest.

In the case of a settlor-interested trust within s.624, the income is deemed to accrue to the settlor and the settlor alone. If the settlor is an individual, the individual interest condition is satisfied.[92] HMRC appear to agree. TDSI guidance notes[93] para 2.3 provide:

> **Anstalts & Stiftungs**
> [1] Anstalts and Stiftungs are Liechtenstein business entities which are fiscally opaque. ...
> [2] The current HMRC view is that Stiftungs are Trusts for UK tax purposes. For TDSI purposes, the deposit[94] should be considered to belong to the settlor[95] and the TDSI treatment depends on the nature of the settlor – so if the settlor is an individual, BRT [basic rate of tax] must be deducted.
> [3] If the settlor can show that they have not retained an interest, the Financial Institution can treat the Stiftung as an interest in possession trust (see paragraph 2.9) and the TDSI position will depend on the nature of the beneficiary. If the beneficiary is an individual, BRT must be deducted.

17.12.2 *Scottish partnership condition*

Section 856(4) ITA provides:

> An investment meets the Scottish partnership condition if—
> (a) a Scottish partnership is beneficially entitled to all interest on the investment, and
> (b) that partnership consists only of individuals.

It is difficult to see the need for this since a Scottish partnership is transparent for IT purposes. However, it does no harm.

17.12.3 *PR condition*

Section 856(5) ITA provides:

92 If the settlor is NOR, the NOR exemption applies.

93 Accessible *www.hmrc.gov.uk/tdsi/guidance-notes.pdf.* For TDSI (tax deduction scheme for interest) see 17.11 (Withholding tax on interest from deposit-takers).

94 [Author's footnote] More accurately, the interest on the deposit should be considered to belong to the settlor.

95 [Author's footnote] It is assumed that the Stiftung is a settlor-interested trust and that the settlor is UK resident.

> An investment meets the personal representative condition if
> [a] personal representatives are entitled to any interest on the investment and
> [b] they receive it in that capacity.

Section 856(5)[b] seems to me otiose, though it does no harm.

### 17.12.4 *Settlement condition*

Section 856(6) ITA provides:

> An investment meets the settlement condition if
> [a] all interest on the investment is income arising to the trustees of a discretionary or accumulation settlement and
> [b] they receive it in that capacity.

Section 856(6)[b] seems to me otiose, though it does no harm.

The key term here is "discretionary or accumulation settlement". Section 873(1) ITA provides a referential definition:

> A settlement is a discretionary or accumulation settlement for the purposes of this Chapter if any income arising to the trustees would (unless treated as income of the settlor) be to any extent income within subsection (2) for the tax year in which it arises.

So we need to turn to s.873(2):

> Income is within this subsection so far as it is—
> (a) accumulated or discretionary income as defined in section 480 (other than income arising under a charitable trust or an unauthorised unit trust in relation to which section 504 applies), or ...[96]

So to follow s.873(2)(a) we need to turn to s.480 ITA. This is discussed elsewhere; see 22.2.1 (Accumulated or discretionary income).

Having dealt with s.873(2)(a), we turn to s.873(2)(b). This is somewhat more confusing:

> (2) Income is within this subsection so far as it is—

96 I consider s.873(2)(b) separately below.

(b) an amount of a type set out in section 482 (unless the trust is a unit trust scheme or the amount is income arising under a charitable trust or is excluded by section 481(5)).

So to follow s.873(2)(b) we need to turn to s.482 ITA. This is discussed elsewhere; see 22.2.3 (Other income taxed at top rates). If one reviews the 11 types set out in s.482 one emerges somewhat confused as these types are not interest. This does not make sense, and I would be grateful to any reader who could explain.

## 17.13 Exceptions for non-residents

### 17.13.1 *Non-resident individual*

Section 858 provides:

**858 Declarations of non-UK residence: individuals**
(1) This section applies to an investment with a deposit-taker or building society which meets the individual interest condition in section 856(3).
(2) The investment is not a relevant investment if—
(a) an appropriate person[97] has made the declaration set out in subsection (3) to the deposit-taker or building society,
(b) the declaration contains the undertaking set out in subsection (4),[98]
(c) the declaration contains the name and principal residential address of the individual or (as the case may be) each of the individuals entitled to the interest,
(d) the declaration contains such other information as the Commissioners for HMRC may reasonably require, and
(e) the declaration is in such form as the Commissioners may prescribe or authorise.

Section 858(3) then sets out the terms of the declaration:

97 Section 857(5) provides:
"In this section 'appropriate person' means—
(a) a person who is beneficially entitled to interest on the investment, or
(b) a person to whom any such interest is payable."

98 Section 858(4) provides:
"The undertaking is an undertaking by the person making it to notify the person to whom it is made if any individual in respect of whom it is made becomes ordinarily UK resident."

The declaration is that, at the time when the declaration is made—
(a) the person who is beneficially entitled to the interest is not ordinarily UK resident, or
(b) (as the case may be) all the persons who are so entitled are not ordinarily UK resident.

The form is R105. I refer to this (adopting the terminology of the TDSI guidance note) as "**NOR declaration**".

In short, the requirement for exemption from deposit takers withholding is non-ordinary residence. Curiously, "usual place of abode" (which is more or less the same) is the requirement for the *imposition* of non-resident's withholding.[99] Some irreconcilable policy choices are at play here, on one hand to facilitate collection of UK tax from non-residents and on the other to facilitate investment in the UK by non-residents. For the year during which a person becomes ordinary resident, see 6.13 (Withholding tax on interest).

### 17.13.2 *Interest in possession trusts*

The person beneficially entitled to the interest is the life tenant and if that person is NOR, the NOR exemption applies.

### 17.13.3 *Non-resident discretionary trust*

Section 861 ITA provides:

**861 Declarations of non-UK residence: settlements**
(1) This section applies to an investment with a deposit-taker or building society which meets the settlement condition in section 856(6).
(2) The investment is not a relevant investment if—
(a) an appropriate person[100] has made the declaration set out in subsection (3) to the deposit-taker or building society,
(b) the declaration contains the undertaking set out in subsection (4),[101]

---

99 See 17.6 (Non-resident's withholding tax).
100 Defined s.861(5): "In this section 'appropriate person' means—
(a) any person who is a trustee entitled to receive interest on the investment, or
(b) a person to whom any such interest is payable."
101 S.861(4) provides:
"The undertaking is an undertaking by the person making it to notify the person to whom it is made if—

(c) the declaration contains such information as the Commissioners for Her Majesty's Revenue and Customs may reasonably require, and
(d) the declaration is in such form as the Commissioners may prescribe or authorise.
(3) The declaration is that, at the time when the declaration is made—
(a) the trustees who are entitled to the interest are non-UK resident (see section 475), and
(b) no person who is a trustee has reasonable grounds for believing that any beneficiary under the settlement is—
  (i) an individual who is ordinarily UK resident,
  (ii) a company which is UK resident, or
  (iii) a Scottish partnership any of the partners of which is an individual who is ordinarily UK resident or a company which is UK resident.

The term "beneficiary" is defined in s.873 ITA:

(3) A person is a beneficiary under a discretionary or accumulation settlement for the purposes of this Chapter if—
(a) the person is an actual or potential beneficiary under the settlement, and
(b) condition A or B is met in relation to the person.
(4) Condition A is that the person is, or will or may become, entitled under the settlement to receive some or all of any income under the settlement.
(5) Condition B is that some or all of any income under the settlement may be paid to or used for the benefit of the person in the exercise of a discretion conferred under the settlement.
(6) The references in subsections (4) and (5) to any income under the settlement include a reference to any capital under the settlement so far as it represents amounts originally received by the trustees as income.

---

(a) the trustees become UK resident,
(b) an individual in respect of whom it is made becomes ordinarily UK resident,
(c) a company in respect of which it is made becomes UK resident,
(d) an individual partner in any Scottish partnership in respect of which it is made becomes ordinarily UK resident,
(e) a company partner in any Scottish partnership in respect of which it is made becomes UK resident,
(f) a partner who is an ordinarily UK resident individual or a UK resident company joins any Scottish partnership in respect of which it is made, or
(g) a person within any of sub-paras (i) to (iii) of subsection (3)(b) becomes or is found to be a beneficiary under the settlement to which the declaration relates."

The definition is the same as in 37.5.1 (“Beneficiary”).

The form is Form R105 (DAT).

The TDSI guidance notes provide:

> **R105 (DAT) – change of trustees or beneficiaries**
> 4.33 Where the Financial Institution becomes aware that there has been a change of trustee or beneficiary, it may continue to pay interest without deduction of BRT if it has no reason to believe
> - that the trustees are or may be resident, or
> - a beneficiary is or may be ordinarily resident/resident in the UK, or
> - a new beneficiary is or may be ordinarily resident/resident in the UK.

17.13.4 *Non-resident Scottish partnership*

Section 859 ITA contains an exception for non-resident Scottish partnerships, which is not discussed here.

17.13.5 *Non-resident PRs*

Section 860 ITA provides:

> **860 Declarations of non-UK residence: personal representatives**
> (1) This section applies to an investment with a deposit-taker or building society which meets the personal representative condition in section 856(5).
> (2) The investment is not a relevant investment if—
> (a) an appropriate person[102] has made the declaration set out in subsection (3) to the deposit-taker or building society,
> (b) the declaration contains such information as the Commissioners for Her Majesty’s Revenue and Customs may reasonably require, and
> (c) the declaration is in such form as the Commissioners may prescribe or authorise.
> (3) The declaration is that the deceased was not ordinarily UK resident immediately before the deceased’s death.

102 Defined in s.860(4): “In this section ‘appropriate person’ means—
(a) any of the personal representatives who are entitled to receive interest on the investment, or
(b) a person to whom any such interest is payable.”

One would expect the rule to require withholding where the PRs were subject to tax and not where they were not subject to tax. But the actual residence of the PRs for IT purposes is not relevant. I suspect the reason may lie deep in the history of the provisions, and would be grateful to any reader who could elucidate the puzzle.

The TDSI guidance notes provide:

> **R105(PR) – personal representatives**
> 4.21 Form R105 completed by an investor before his or her death will remain in force after the date of death during the winding up of the estate. But if the personal representatives open an account in their own names, or transfer funds into an account in their own names, that account will not be an NOR account, unless and until the personal representatives make a NOR declaration. Personal representatives must make their declaration on
> - a photocopy of the R105(PR) (see Appendix 5), or
> - a downloaded copy of the R105(PR) from the HMRC website
> - a substitute form which has been approved by the HMRC.
>
> **R105(PR) – who can sign?**
> 4.22 In the case of an investment forming part of a deceased person's estate the form can be signed by either
> - the personal representative of the deceased (or legal equivalent in the country where they live), or
> - the person to whom the interest is paid.
>
> The person signing the declaration should tick the relevant box above the signature to show whether or not he or she is the personal representative (or legal equivalent in that country).
> It is the NOR status of the deceased which is important, and not that of the personal representative. Therefore, it is acceptable for a personal representative who is ordinarily resident in the UK to complete the declaration in respect of a deceased NOR investor.

### 17.13.6 *Policy and practical use of non-resident exceptions*

The former ITH para 876 explained the policy reason behind the exemption:

> There were moreover compelling policy considerations. An attempt to tax the interest could have harmed the balance of payments by discouraging foreigners from putting their money into the UK. For the same reason no attempt has been made to require banks to deduct tax

from interest paid to non-residents and interest belonging to persons not ordinarily resident is now excluded from the arrangements for deduction of tax from bank interest.

Since the conditions of all these non-resident exceptions could be onerous, I would have thought that the easier course would be to deposit funds with a non resident deposit-taker and not to use a UK bank. IHT may also be a reason for avoiding UK bank deposits. The remittance basis (and the temporary non-residents rules) may be another reason.

### 17.13.7 *Other exceptions*

The following exceptions to deposit takers withholding are mentioned for completeness and not discussed here:

- Client accounts: s.863 ITA
- Qualifying uncertificated eligible debt security units: s.864 ITA
- Qualifying certificates of deposit: s.865 ITA
- Qualifying time deposits: s.866 ITA
- Lloyds premium trust funds: s.867 ITA
- Sale and repurchase of securities: s.869 ITA
- Loans made by deposit takers: s.870(1)(a) ITA
- Debt on a security listed on a recognised stock exchange: s.870(1)(b) ITA
- Debt on a debenture issued by the deposit-taker: s.870(1)(c) ITA

## 17.14 Duty on deposit-taker

Section 857 ITA provides:

> **857 Investments to be treated as being or as not being relevant investments**
> (1) A deposit-taker or building society must treat every investment with it as a relevant investment unless satisfied that the investment is not a relevant investment.
> (2) If a deposit-taker or building society is satisfied that an investment is not a relevant investment, it may continue to treat the investment as not being a relevant investment until subsection (3) applies.
> (3) This subsection applies when the deposit-taker or building society has information which can reasonably be taken to indicate that the

investment is or may be a relevant investment.

The TDSI guidance notes provide:

**UK address**

4.9 Where the declaration shows a residential address in the UK it should not be regarded as acceptable unless it is known that the investor is temporarily in the UK (for example, as a student) and the address given is for the time being his or her principal residential address.

**Incompatible evidence**

4.10 If there is information which appears incompatible with the investor's status as indicated in his or her NOR declaration (for example, he or she appears to have a business in the UK), the Financial Institution cannot be satisfied that the deposit is a relevant investment and is obliged to seek further clarification from the investor of his status before the NOR declaration can be acted upon. The Financial Institution should contact the investor seeking an explanation of why he or she considers themselves to be not ordinarily resident. See also paragraph 4.37. If the investor is able to satisfy the Financial Institution that the declaration is valid, the Financial Institution can accept the declaration and need take no further action. Financial Institutions are recommended to retain some note of the enquiry. If the investor is unable to satisfy the Financial Institution that his or her NOR declaration is valid the Financial Institution should deduct BRT from any interest paid on the deposit.

**Joint accounts**

4.11 Any investor in a joint account may sign the form R105 on behalf of all the other investors. But if that investor ceases to be a party to the account, for example, if he or she dies, a new NOR declaration will be required. Financial Institutions can only pay interest on a joint account without deduction of tax if the investors are eligible to receive interest without deduction of tax for the same reason. For example, where one investor is entitled to register using form R85 and another investor is entitled to sign an NOR declaration on form R105 interest must be paid net. In other words, a mixture of a registration on form R85 [income within personal allowances] and form R105 is not allowed on the same joint account.

**Death of an investor**

4.12 If one party to a joint account dies or otherwise leaves the account, a new declaration is not required unless that person was the only signatory of the NOR declaration.

**Giving effect to the NOR declaration**

4.37 When Financial Institutions receive a NOR declaration which is fully completed in the form currently prescribed (or approved) by HMRC, they must satisfy themselves that there are no grounds for believing that the investor is or may be ordinarily resident in the UK or that the trustees are or may be resident in the UK, or that any of the beneficiaries are or may be ordinarily resident/resident, as appropriate. If they are so satisfied they must pay interest without deducting BRT.

If Financial Institutions have any information suggesting that the investor is or may be ordinarily resident in the UK, or that the trustees are or may be resident, or that any of the beneficiaries are or may be ordinarily resident/resident, they must not pay interest without deduction of BRT unless and until they have satisfied themselves that the investor is NOR or that the trustees are not resident and the beneficiaries are NOR/not resident, as appropriate.

The NOR supervisor normally carries out these checks on behalf of the Financial Institution. Financial Institutions must therefore put in place systems (clerical or computer-based) for ensuring that all relevant information is made available to the NOR supervisor. In particular all accounts in the branch to which the investor or trustees/beneficiaries is/are party, whether deposit or loan accounts (including mortgage accounts), and any such other accounts which are known to the branch should be reviewed. Examples of relevant information which could cast doubt on the validity of the declaration are

- a UK business in which the investor/trustees/beneficiaries appear to participate actively,
- a UK address or postal directions,
- an overseas PO Box or "c/o" address,
- a BFPO address, and
- a notification that the account is the subject of a third party mandate in favour of a UK resident or used as security for borrowing by UK residents or for borrowing in respect of the purchase of the UK property.

In making his or her decisions the NOR supervisor must not ignore information which comes to his or her attention by personal knowledge or otherwise. An example of this might be frequent or regular personal visits to the bank, cash transactions etc. The Financial Institution should put procedures in place so that information of a similar nature which comes to the knowledge of an employee who is responsible for handling any NOR accounts should similarly be drawn to the NOR supervisor's attention.

It will be unusual for such information to provide conclusive proof that the NOR declaration is invalid. However, where the information could reasonably be taken to indicate that the investor may be ordinarily resident in the UK, the trustees may be resident or that any of the beneficiaries may be ordinarily resident/resident, the Financial Institution is obliged to satisfy itself that the evidence does not render the NOR declaration invalid. One way of doing this would be by obtaining written confirmation from the investor. A note of any enquiries made should be kept in the investor's records or the trust records.

It may be possible to resolve doubts which arise without reference to the investor or trustees. For example if the investor is known to be a student in the UK it would be reasonable for him or her to make frequent personal visits to the bank. In such circumstances, no further action need be taken by the NOR supervisor and the NOR declaration may be accepted. NOR supervisors are recommended to retain some record of the decisions.

**The continuing obligation**

4.38 Once an NOR declaration has taken effect, Financial Institutions must continue to pay interest without deducting BRT unless and until they receive information suggesting that the investor is or may be ordinarily resident in the

UK, or the trustees are or may be resident, or any of the beneficiaries are or may be ordinarily resident/resident. This is called the "continuing obligation". They must put in place systems so that as far as possible all relevant information which can be readily linked to a NOR account is brought to the attention of the NOR supervisor. Relevant information is that which points to a UK connection, for example

- notification of a UK address,
- change of account title,
- applications for credit cards, loans or mortgages suggesting UK residence,
- use of the deposit as security for borrowing by UK residents or for borrowing in respect of the purchase of UK property,
- the grant of third party mandates in favour of a UK resident,
- the grant of a "lien" on the account,
- information which comes to the NOR supervisor's attention by personal knowledge,
- the existence of a UK business in which the investor has an active interest, and
- frequent or regular personal visits to the Financial Institution, cash transactions in the UK etc.

Where information indicates that the investor is or may be ordinarily resident in the UK or the trustees are or may be resident in the UK, or any of the beneficiaries are or may be ordinarily resident/resident in the UK, as appropriate, strictly the Financial Institution should treat the deposit as a relevant investment immediately and begin to deduct BRT. However, provided the Financial Institution has taken steps to satisfy itself that the investor has remained NOR, and, if necessary, has asked the investor to confirm that he or she has remained NOR (or in the case of trustees or beneficiaries that they are NOR/not resident, as appropriate), the Financial Institution may continue to pay interest without deducting BRT for up to 180 days to enable enquiries to be concluded. In exceptional cases HMRC may allow up to a further 180 days. Any Financial Institutions needing more than 180 days should apply to ...

HMRC recommends that where the matter is resolved without correspondence the NOR Supervisor records why he or she considers that the declaration remains valid.

Where the investor or the trustees is/are unable to satisfy the Financial Institution that a NOR declaration remains valid the Financial Institution should treat the deposit as a relevant investment and deduct BRT. Where the investor has not given all the necessary information within 180 days (or any further period HMRC may allow) the Financial Institution must deduct BRT from any future payments of interest.

**Overseas Students**

4.39 Students entering the UK for a period of study lasting less than four years are normally treated as not ordinarily resident in the UK. HMRC recommend that institutions make a diary note to review these accounts at the end of 4 years. If, at the end of 4 years, there is still a UK address on the account then you have 180 days to check the position with the investor.

If there is a reply and the investor is now ordinarily resident in the UK the

Financial Institution should cancel the form R105 and deduct BRT from future payments of interest. The investor may be eligible to complete a form R85.

If there is no reply and there is still movement on the account. The Financial Institution should cancel the form R105 at the end of 180 days and deduct BRT from future payments of interest.

If there is no reply, no movement on the account and no evidence suggesting the investor is ordinarily resident in the UK interest can continue to be paid gross.

**Change of name of investor**

4.40 Where the investor changes his or her name, for example by marriage, it is not necessary to replace the NOR declaration but the Financial Institution should ensure there is a clear audit trail. An example of a clear audit trail would be annotating the form with the revised details and endorsing the amendment with date stamp.

**Transfer of account between branches**

4.41 A new NOR declaration is not required when an account is transferred between branches. But Financial Institutions should ensure that there is a clear audit trail back to the original NOR declaration.

## 17.15 EU Interest and Savings Directive

The relevant law and practice is found in:

(1) European Directive 2003/48/EC on taxation of savings income in the form of interest payments (**"EUSD"**) which applies to EU states.

(2) International agreements made by non-EU states.[103]

(3) Domestic legislation in each state (where the state has chosen to enact domestic legislation to impose the rules agreed in the Directive or agreement).[104]

(4) Guidance notes issued by each state.[105]

A full discussion requires many volumes. Proposals are underway to amend and extend the law.[106]

---

103 These are:

(1) UK Crown Dependencies: the Channel Islands and the Isle of Man.

(2) UK Overseas Territories: Anguilla, British Virgin Islands, Cayman Islands, Gibraltar, Montserrat, Turks and Caicos Islands,.

(3) Dependent Territories of the Netherlands: Netherlands Antilles and Aruba.

(4) Other countries: Switzerland, Andorra, Liechtenstein, Monaco and San Marino.

104 In the UK this has been done by the Reporting of Savings Income Information Regs 2003 (SI 3297).

105 In the UK see *www.hmrc.gov.uk/esd-guidance/guidance.htm* which is 71 pages long. But UK residents would not be concerned about UK law.

106 See Proposal for a council directive amending directive 2003/48/EC, COM(2008) 727 final 2008/0215 (CNS), accessible *ec.europa.eu/taxation_customs/resources/documents/taxation/personal_tax/savi*

In the following discussion, "**an ISD state**" is a state where Directive rules apply.

In short, the rules apply when a "paying agent"[107] established in one ISD state pays "interest"[108] to an individual who is "resident"[109] in another ISD state. The duties of the paying agent depend on the state in which the paying agent is established: they are not identical in every state.

A UK resident will most often be affected where:

(1) they receive interest from a paying agent in Belgium, Luxembourg, Austria, or a tax haven in a jurisdiction which has agreed to apply Directive rules; or
(2) trustees of a transparent *Baker*-type IP trust[110] in such a jurisdiction pay interest to a life tenant resident in the UK.

The paying agent has two choices:

(1) If the individual gives authority, the trustees may report the interest payments to HMRC in the UK.
(2) Alternatively the trustees must impose a withholding tax (also called a retention tax) on the payment of interest.[111] Statute uses the label "special withholding tax"[112] and I adopt that terminology for lack of better.

Several jurisdictions have taken the view before 2008/09 that the withholding/disclosure requirement does not apply when a payment of interest is made to a remittance basis taxpayer, if the interest is not remitted (and so not subject to UK tax).[113] This is a purposive

---

*ngs_tax/savings_directive_review/COM(2008)727_en.pdf*

107 This term is elaborately defined: Art.4 EUSD. It includes trustees but not (in short) individual borrowers not carrying on business.

108 This term is also elaborately defined: Art.6 EUSD.

109 This term is defined in Art.3(3) EUSD.

110 Payment from a discretionary trust or non-transparent IP trust is not "interest" and so it does not require withholding or disclosure. The EUSD will eventually be extended to cover this.

111 The states that operate this tax are: Austria, Belgium, Luxembourg, Jersey, British Virgin Islands, Netherland Antilles, Turks & Caicos, Switzerland, Andorra, San Marino, Liechtenstein and Monaco.
The EU withholding tax is in addition to any foreign tax that is withheld.

112 Section 136(6) TIOPA.

113 The Channel Islands and the Isle of Man take this view. See eg para 32 of the Isle of Man Treasury guidance notes accessible
*www.gov.im/lib/docs/treasury/incometax/guidance.pdf.*

> "32. In deciding to whom the retention tax will need to be applied the focus should be on the ultimate aim of the Directive which is to enable savings income

construction, as the point is not made in the text of the agreements and whether it is correct seems very doubtful. HMRC do not agree, but the point is not within their jurisdiction, and they actually benefit from this practice as they do not have to allow a tax credit. This point ultimately raises questions of EU or international law, but not questions of UK law.

However the EU has action on this point. An EU press release IP/09/1013, 25 June 2009, provides:

> The European Commission has decided to refer Luxembourg[114] to the European Court of Justice over its incorrect application of certain provisions of the Savings Tax Directive as regards interest payments made to beneficial owners who benefit from so-called "non-domiciled resident" status in their country of residence.
> Luxembourg refuses to apply the Directive to beneficial owners who benefit

---

in the form of interest payments made in one Member State to beneficial owners who are individuals resident in another Member State to be made subject to effective taxation in accordance with the laws of the latter Member State. The emphasis should be on individuals, and also on those individuals who are not only resident in a Member State but are persons subject to effective taxation in accordance with the laws of the Member State. It is therefore consistent with the aims of the Directive, and therefore of the Agreements into which the Crown Dependencies have entered, that the retention tax will not apply to interest payments made to …

- a trust (unless, as in the case of an interest in possession trust, a relevant beneficiary has the immediate and absolute entitlement to an interest payment); …
- an individual where it is known to the paying agent that they benefit in their Member State of residence from an exemption from income tax; or where because no interest is remitted to the individual no liability to income tax arises in their Member State of residence."

Switzerland agrees: see *Eidgenössische Steuerverwaltung: Wegleitung zur EU-Zinsbesteuerung* (Swiss Federal Tax Authority Guidelines) § 37.

The operation of this practice from 2008/09 is a little more difficult, because the remittance basis depends on making a claim and at the time the interest is paid the claim will not yet have been made. But the practice will probably continue to be applied in cases where the individual confirms that they intend to make a remittance basis claim.

114 Belgium had previously taken the same view, see the 7th edition of this work, but it backed down so the proceedings are now against Luxembourg alone. I do not know if there are also proceedings against the tax havens which take the same view, but maybe Luxembourg will be a test case which will determine the point.

> from the so-called "non-domiciled resident" status in their country of residence. Consequently, Luxembourg paying agents do not levy withholding tax on interest payments to such beneficial owners.
>
> According to Luxembourg legislation, beneficial owners are considered to benefit from the "non-domiciled" status, if they are generally exempt from income tax in their State of residence for tax purposes or if the interest payments, as long as they are not transferred to the State of residence ("remittance"), are not subject to tax in that State.
>
> According to the Commission, Luxembourg cannot provide for an exemption from withholding tax in situations other than those expressly provided by article 13 of the Directive (the so-called "voluntary disclosure" procedure which allows the beneficial owner expressly to authorise the paying agent to report information to the tax authorities of his State of residence and the "certificate procedure" which ensures that withholding tax is not levied when the beneficial owner presents to his paying agent a certificate drawn up by his Member State of residence for tax purposes).
>
> The Commission is of the opinion that the paying agent has the obligation to establish the residence of the beneficial owner on the basis of minimum standards, as provided by article 3(3) of the Directive. If the beneficial owner is a resident of another Member State in accordance with these standards, the Member State of the paying agent must ensure that the latter applies the Directive and, in the case of Luxembourg, that the paying agent levies a withholding tax on interest payments to such a beneficial owner.
>
> Consequently, the Commission considers that Luxembourg's legislation, in its current state, is not compatible with articles 2, 3, 10 and 11 of the Directive.
>
> Given that the above Luxembourg tax rules were not amended following the reasoned opinion sent by the Commission in November 2008 ( IP/08/1815 ), the Commission has decided to refer the case to the European Court of Justice.
>
> The Commission's reference number for the case at issue is 2007/2178.

The current renegotiation of the EUSD may resolve the issue, but that will take years to come to fruition.

In practice, if the paying agent, guided no doubt by the local authorities, takes the view that the duty of withholding/disclosure does apply to unremitted interest, the individual will usually consent to the disclosure. Then there will be no withholding tax. No difficulty will normally arise out of that disclosure. The Directive and supplemental agreements are designed to prevent criminal tax evasion, not lawful tax planning of the kind considered in this book.

#### 17.15.1 *Credit for special withholding tax*

If tax is withheld, 75% of it is paid to the Member State where the beneficiary is resident.[115] But the beneficiary is entitled to a tax credit for 100% of the tax withheld.[116]

HMRC now accept that the credit is applicable even if it relates to unremitted income (un)taxed on the remittance basis.[117] Helpsheet 264 (Remittance basis) for 2010/11 provides:

> Where SWT is deducted you are treated as having paid an equivalent amount of Income Tax in the UK which can be set against your UK liability or repaid to you if the amount exceeds that liability.
>
> If the remittance basis applies to you and you set an amount of SWT against your Income Tax liability, or claim a repayment if the SWT exceeds your liability, the amount set off or repaid is treated as a remittance of the income at the time it is set off or repaid.
>
> *Example 4*
>
> Grace received £8,000 of interest from a Liechtenstein account after deduction of SWT of £2,000. Grace is non-domiciled in the UK and claims for her foreign income to be taxed on the remittance basis. Grace did not remit any of the money from her Liechtenstein account but includes an equivalent amount of Income Tax in her return for the SWT to set against other UK tax liability.

> Enter on page F 2/F 3 of the Foreign pages:

| | |
|---|---|
| Country or territory code (page F 2 column A) | LIE |
| Amount of income received (page F 2 column B) | £0 |
| SWT (page F 3 column D) | £2,000 |

> Setting off the SWT against Income Tax liability will mean that part of the interest income is remitted to the UK and will be a taxable amount at that time. Normally the 'set-off' will be regarded as having been at 31 January following the tax year. In this example that would be 31 January 2012. Grace will therefore have to enter taxable income of £2,500 on her next return (remittance £2,000 increased by the rate of SWT (20%) £500 total £2,500), she will not be entitled to any relief for SWT for that year as the full amount has been relieved in this tax year).
>
> If you claim for your foreign income to be taxed on the remittance basis and you remit part of the amount after SWT deducted then the amount of your income remitted is calculated by including the appropriate proportion of the SWT.

115 Art.12.

116 Art.14.

117 HMRC changed their mind in Tax Bulletin 84 (discussed in the 6th edition of this book).

**You are still able to claim the whole amount of SWT deducted in the year at column D.**

*Example 5*

Adam received interest of £800 from Jersey after deduction of SWT of £200. Adam is non-domiciled in the UK and claims for his foreign income to be taxed on the remittance basis. £400 of the interest was remitted to the UK.

| | |
|---|---|
| Interest received in UK | £400 |
| SWT | £100 |
| | £500 |

Enter on page F 2/F 3 of the Foreign pages:

| | |
|---|---|
| Country or territory code (page F 2 column A) | JEY |
| Amount of income received (page F 2 column B) | £500 |
| SWT (page F 3 column D) | £200 |

As in Example 4, the £200 set-off will be a further remittance at the date it is set off and subject to the same calculation until the total of the income £1,000 is taxed. In this example £250 of income should be included on the tax return of the year when the SWT £200 is set off – normally that would be the 2011–12 tax year for this example.

However, if a credit is given against tax, it is considered that the amount credited is not received in the UK and so not remitted.

If the credit takes the form of a refund, received in the UK, it is considered that the amount received is derived from the foreign interest, and so is regarded as remitted.

CHAPTER EIGHTEEN

# EXEMPT INTEREST OF NON-RESIDENTS

## 18.1 Exempt interest - Introduction

This chapter considers exemptions for interest on:
(1) FOTRA securities;
(2) foreign currency securities;
(3) international securities

## 18.2 Meaning of "FOTRA Securities"

Section 713(2) ITTOIA provides:

> In this Chapter "FOTRA security" means—
> (a) a security issued with a condition about exemption from taxation authorised by section 22 of F(No.2)A 1931,
> (b) a gilt-edged security which was issued before 6th April 1998 and without any such condition (other than 3½% War Loan 1952 Or After), or
> (c) 3½% War Loan 1952 Or After.

FOTRA stands for 'Free of Tax to Residents Abroad'.

### 18.2.1 *The exemption condition*

Section 713 ITTOIA provides:

> (3) In this Chapter "the exemption condition" has the meaning given by subsections (4) to (6), according to the kind of FOTRA security involved.
> (4) In relation to a security within subsection (2)(a), it means the condition authorised by section 22 of F(No 2)A 1931.

> (5) In relation to a security within subsection (2)(b), it means a condition with which 7.25% Treasury Stock 2007 was first issued, being a condition treated by section 161(1) of FA 1998 (non-FOTRA securities)—
> (a) as a condition with which the security within subsection (2)(b) was issued, and
> (b) as a condition authorised in relation to its issue by section 22 of F(No 2)A 1931.
> (6) In relation to 31/2% War Loan 1952 Or After, it means a condition of its issue authorised by section 47 of F(No 2)A 1915.

For these provisions see 53.4.1 (Conditions for exemption).

## 18.3 Deduction at source

Section 893 ITA 2007 provides:

> (1) A payment of a UK public revenue dividend is payable gross if—
> (a) it is a payment of interest on gross-paying government securities, and
> (b) no deduction at source application has effect in respect of the securities at the time the payment is made (see section 895).

Thus there are three conditions for gross payment. First the security must be a UK public revenue dividend, defined s.891 ITA:

> In this Chapter "UK public revenue dividend" means any income from securities which—
> (a) is paid out of the public revenue of the UK or Northern Ireland, but
> (b) is not interest on local authority stock.

Secondly the security must be a gross-paying government security, defined s.893(2) ITA:

> In this Chapter "gross-paying government securities" means—
> (a) gilt-edged securities (see section 1024), or
> (b) securities which are the subject of a Treasury direction under section 894(1) or (3).

Thirdly, holders may ask for tax to be deducted at source. It must be rare to want to apply for tax to be deducted, though it might perhaps be convenient for a basic rate taxpayer who does not otherwise have to put in a return.

## 18.4 The FOTRA exemption

Section 714 ITTOIA provides:

> (1) No liability to income tax arises in respect of profits from a FOTRA security if conditions A and B are met. ...
> (3) Condition A is that the profits are stated in the exemption condition to be exempt from income tax.
> (4) Condition B is that any requirements for obtaining the exemption imposed by the security's conditions of issue are met.

A non-resident individual or company would qualify for non-residents IT relief on the interest, so the exemption only matters in unusual cases, such as:

(1) Individuals who are UK resident but not ordinarily resident.
(2) Beneficiaries of UK discretionary trusts and estates.

### 18.4.1 *Sections 624 and 720*

Section 714 ITTOIA provides:

> (5) Whatever the exemption condition provides, amounts charged under the provisions specified in subsection (6) are not exempted by subsection (1).
> (6) The provisions are—
> Chapter 5 of Part 5 (settlements: amounts treated as income of settlor) so far as it applies to income within section 619(1)(a) or (b), and
> Chapter 2 of Part 13 of ITA 2007 (anti-avoidance provisions: transfer of assets abroad).

These anti-avoidance provisions override FOTRA exemption.

### 18.4.2 *Restriction on deductions*

For completeness, s.716 ITTOIA provides:

> (1) A person who meets conditions A and B may not bring into account for income tax purposes—
> (a) any amount relating to changes in the value of a FOTRA security, or
> (b) expenses related to holding it or to any transaction concerning it.
> (2) Condition A is that the person is the beneficial owner of the security.
> (3) Condition B is that the person is a person who would be exempt from tax on the security under this Chapter.

This can only apply to traders and is not of general importance.

## 18.5 Beneficial ownership

For a general discussion of the beneficial ownership requirement, see 53.5 (Beneficial ownership of FOTRA securities). The International Manual provides:

> **368040. The FOTRA condition** [October 2004]
> ...
> *Beneficial ownership of the security*
> To demonstrate beneficial ownership of the security, the claimant must hold the security on the interest date. In strictness a person who has sold a FOTRA security but receives the next interest payment due (an ex-dividend sale) ceases to be the beneficial owner of the security when he sells it.

It would be very strange if an ex-dividend sale caused the interest received post sale to become taxable, and I doubt if that can really be correct. In practice perhaps it does not often happen.[1]

---

1 For completeness, The INT Manual continues:
"There is a column on the A1 claim form with the heading 'If sold, date of sale or write still held'. Entries in this column will alert you to a sale before the interest date. You should obtain guidance from Technical Advice Group before you take any action if
• a FOTRA security was sold before the interest date
• that column is left blank"
This is more than a decade out of date since from 1998 interest is paid gross and claims for repayment of deducted tax (formerly on form A1) are not needed.

## 18.6 FORTA securities held on trust

### 18.6.1 *Interest in possession trust*

The TSE Manual provides:

> **3185. FOTRA securities - resident trustees** [February 2011]
> ... From 6 April 1998 all interest on such securities is paid gross. Trustees need to know whether or not to Self-Assess liability. This depends upon the type of trust involved and the Residence status of the beneficiary.
> *Interest in possession trust (TSEM1105)*
> For any beneficiary who is not ordinarily resident (NOR) in the UK the interest is not taxable. Trustees should not include it on the returns. The authority for this is *Williams v Singer* 7 TC 387 (TSEM7070).

Thus (although not clear from the statute) all that matters is the ordinary residence of the life tenant. That is sensible.

### 18.6.2 *Discretionary trust*

Section 715 ITTOIA provides:

> (1) This section applies if—
> (a) a FOTRA security is held on trust, and
> (b) apart from this section, interest payable on the security would not be exempt from income tax under section 714 because of the security not being in the beneficial ownership of a person not ordinarily UK resident.
> (2) For the purposes of determining whether the interest is exempt under section 714 it is to be assumed that the security is in the beneficial ownership of a person not ordinarily UK resident if none of the beneficiaries of the trust is ordinarily UK resident at the time when the interest arises.
> (3) In subsection (2) "beneficiaries of the trust" includes any person known to the trustees as a person—
> (a) who is, or will or may become, entitled under the terms of the trust to receive income under the trust, or
> (b) to whom or for whose benefit such income may be paid or applied.
> (4) In subsection (3) "income under the trust" includes any property held on the terms of the trust and falling to be treated as capital so far as

it is or represents amounts received by the trustees as income.

ITTOIA EN change 116 provides:

> **Change 116: Interest from FOTRA securities held on trust: s.715**
> This change gives statutory effect to a practice relating to interest arising from FOTRA securities held on trust.
> FOTRA exemptions apply where gilt-edged securities are in the beneficial ownership of persons who are not ordinarily resident in the UK. The source legislation, principally section 154 of FA 1996, is rewritten in Chapter 6 of Part 6 of this Act. The beneficial ownership test lies within the definition of "FOTRA security" as it is part of the exemption condition of the securities. (See, in particular, section 22 of F(No 2)A 1931).
> Although in the case of bare trusts and trusts with an interest in possession, it is fairly clear where the beneficial ownership lies, in the case of discretionary or accumulation trusts it can be difficult to apply the beneficial ownership test. In some types of trust the beneficial ownership of an asset is, in effect, in suspense. In others, while it may be clear where the beneficial ownership lies, it may belong to a different person from the person entitled to the income.

The author does not have a sound grasp of the English law concept of beneficial ownership, but it does not matter, as the passage continues:.

> In practice, where interest from FOTRA securities held in trust arises to trustees and none of the beneficiaries of the trust is ordinarily resident in the UK, the beneficial ownership test is regarded as met whatever kind of trust is involved and no account is taken of whether the trustees themselves are resident or ordinarily resident. So if all the potential beneficiaries of a discretionary or accumulation trust (that is, those who have the right, at the discretion of the trustees, to benefit from the trust income or accumulated income) are not ordinarily resident in the UK, the FOTRA beneficial ownership test is treated as having been met.
> Section 715 of this Act gives effect to this practice. So, for the purposes of determining whether interest arising from a FOTRA security held in trust is exempt from income tax under section 714 of this Act, it is to be assumed that the security is in the beneficial ownership of a person who is not ordinarily resident if none of the beneficiaries of the trust is resident when the interest arises. (See section 715(1) and (2)). Section 715(3) defines "beneficiaries of the trust" widely so as to cover all potential income beneficiaries of discretionary and accumulation trusts.

> Section 715(4) brings in beneficiaries receiving accumulated income. This change is in taxpayers' favour in principle. But it is expected to have no practical effect as it is in line with current practice.

This applies even to a UK resident trust.

In a case where

(1) some beneficiaries are UK resident (so the requirements of this relief are not met) but
(2) the trustees distribute income to a non-ordinarily resident beneficiary relief is available under ESC B18.

## 18.7 Interaction of FOTRA exemption and DT relief

DT relief is obviously not needed where FOTRA exemption applies or where non-residents IT relief applies. There are a few gaps where DT relief could be useful, for instance, an individual who is resident and ordinarily resident in the UK but is treaty-resident outside the UK. The International Manual provides:

> **368110. FOTRA and DT claims** [October 2004]
> A person entitled to exemption from UK income tax on interest payments from a FOTRA security may claim repayment of some or all of the tax deducted under the terms of an interest article in a DTA. You should treat any such claim as a claim under the interest article. It follows that the claimant must satisfy the conditions of the DTA rather than the conditions for FOTRA exemption. In effect the payment loses the label of FOTRA and is treated in the same way as any other interest payment.
> In practical terms it makes no difference if the claimant is entitled to full relief under the DTA. However the person who received the FOTRA interest may be able to claim repayment of the tax deducted by meeting the requirements of the DTA without meeting the beneficial ownership condition for FOTRA exemption.
> If the claimant is only entitled to partial repayment of the tax deducted under the DTA he will probably receive credit for the UK tax retained against his liability to tax on the interest in his country of residence. You should therefore make the payment as claimed because to increase the payment may cause the claimant inconvenience when settling his liability to tax in the country of residence. You could explain to the claimant that full repayment would be available if he made a claim on form A1.

This is more than a decade out of date since from 1998 interest is paid gross and claims for repayment of deducted tax (formerly on form A1) are not needed. But the underlying points are still correct.

## 18.8 Exempt foreign currency securities

### 18.8.1 *Securities qualifying for relief*

Section 755 ITTOIA provides:

> (1) This section applies to interest on—
> (a) such foreign currency securities issued by a local authority or a statutory corporation as the Treasury direct, and
> (b) such foreign currency loans made to a statutory corporation[2] as the Treasury direct.

I refer to securities within s.755 as **"exempt foreign currency securities"**.

Section 756 ITTOIA defines "foreign currency" security:

> (1) For the purposes of section 755, a security or loan is a foreign currency one if under its terms the currency to be used for repayment is not sterling.
> (2) Subsection (1) is subject to the following qualifications.
> [Subsections (3) and (4) are transitional rules for securities issued before 6 April 1982.]
> (5) If in the case of a security there is an option as to the currency to be used for repayment, the security is only to be treated as a foreign

2 Terms are defined in s.755(4) ITTOIA:
In this section—
"company" means a company, as defined in section 1(1) of the Companies Act 2006 (c 46),
'foreign currency', in relation to loans and securities, has the meaning given by section 756, and
'statutory corporation' means—
(a) a corporation incorporated by an Act (other than a company), or
(b) any other corporation on which functions connected with carrying on an undertaking are conferred by an Act or by an order made under or confirmed by an Act.

> currency one if the option is exercisable only by its holder.
> (6) If in the case of a loan there is an option as to the currency to be used for repayment, the loan is only to be treated as a foreign currency one if the option is exercisable only by the person for the time being entitled to repayment or eventual repayment.

### 18.8.2 *Exemption from deduction at source*

Section 981 ITA provides:

> Despite the provisions of this Part there is no duty to deduct a sum representing income tax from a payment of interest within section 755(1) of ITTOIA 2005 (interest on foreign currency securities etc owned by non-UK residents).

### 18.8.3 *Tax exemption*

Section 755(2) ITTOIA provides:

> No liability to income tax arises in respect of interest to which this section applies if—
> (a) in the case of interest on a security, its beneficial owner is a non-UK resident, and
> (b) in the case of interest on a loan, the person for the time being entitled to repayment or eventual repayment is a non-UK resident.

A non-resident individual or company would qualify for non-residents IT relief on the interest, so the exemption does not matter in practice.

### 18.8.4 *Section 624 and 720*

Section 755(3) ITTOIA provides:

> But interest is not exempt under subsection (2) because a person is a non-UK resident if it is treated as another person's income under—
> Chapter 5 of Part 5 (settlements: amounts treated as income of settlor), or
> Chapter 2 of Part 13 of ITA 2007 (anti-avoidance provisions: transfer of assets abroad).

This is the same as the rule for FOTRA securities.[3]

ITTOIA EN provides:

> Subsection (3) of the section is an anti-avoidance provision. Section 581(3) of ICTA is very widely drafted: "where any income of any person is by virtue of any provision of the Income Tax Acts to be deemed to be income of any other person, that income shall not be exempt ..". In fact, there are only two sets of provisions under which this type of income could be deemed to be income of another person. The relevant provisions are listed in subsection (3) of the section.

### 18.8.5 *Commentary*

If the aim is to encourage investment in local authority and similar securities, why should the exemption be limited to foreign currency securities? It seems the object when the rules were introduced in 1969 was to encourage loans from foreign lenders who would not wish to lend in sterling; borrowers fared badly because of the devaluation in the subsequent sterling crisis.

Alignment of the foreign currency security with the FOTRA rules would be a small but worthwhile simplification. However the Treasury when asked for a list of exempt foreign currency securities stated that they did not hold the information and could locate no record of a direction having been given under s.755 ITTOIA 2005! It may well be that no exempt foreign currency securities exist, and the entire legislation is dead letter law. I would be grateful for readers comments on that.

## 18.9 Securities of international organisations

### 18.9.1 *Inter-American Development Bank*

Section 773 ITTOIA provides:

> (1) No liability to income tax arises for a non-UK resident in respect of income from a security issued by the Inter-American Development Bank if the liability only arises because one or more of circumstances A to C apply.

---

3 See 18.4.1 (Sections 624 and 720).

(2) Circumstance A is that the security is issued in the UK or in sterling.
(3) Circumstance B is that the income is made payable or paid in the UK or in sterling.
(4) Circumstance C is that the Bank maintains an office or other place of business in the UK.

This reflects Section 9 of the Agreement Establishing the IDB:

(c) No tax of any kind shall be levied on any obligation or security issued by the Bank, including any dividend or interest thereon, by whomsoever held:
(i) which discriminates against such obligation or security solely because it is issued by the Bank; or
(ii) if the sole jurisdictional basis for such taxation is the place or currency in which it is issued, made payable or paid, or the location of any office or place of business maintained by the Bank.
(d) No tax of any kind shall be levied on any obligation or security guaranteed by the Bank, including any dividend or interest thereon, by whomsoever held:
(i) which discriminates against such obligation or security solely because it is guaranteed by the Bank; or
(ii) if the sole jurisdictional basis for such taxation is the location of any office or place of business maintained by the Bank.[4]

### 18.9.2 *Designated international organisations*

Section 774 ITTOIA provides:

(1) No liability to income tax arises for a non-UK resident in respect of income from a security issued by an organisation if—
(a) the organisation has been designated by the Treasury for the purposes of this section, and
(b) the liability only arises because one or more of circumstances A to C apply.
(2) Circumstance A is that the security is issued in the UK or in sterling.
(3) Circumstance B is that the income is made payable or paid in the UK

4 *http://idbdocs.iadb.org/wsdocs/getdocument.aspx?docnum=781584*

or in sterling.

(4) Circumstance C is that the organisation maintains an office or other place of business in the UK.

(5) The Treasury may by order designate for the purposes of this section—

(a) any of the Communities,

(b) the European Investment Bank,

(c) any international organisation that meets conditions A and B.

(6) Condition A is that one of its members is the UK or any of the Communities.

(7) Condition B is that the agreement under which that member became a member provides for the same kind of exemption from tax for income from securities issued by the organisation as this section provides.

See the Bretton Woods Agreement Order in Council, 1946 (SR&O 1946 No 36); International Finance Corporation Order 1955; International Development Association Order 1960; International Monetary Fund (Immunities and Privileges) Order 1977/825; International Organisations (Tax Exempt Securities) Order 1984; European Communities (Tax Exempt Securities) Order 1985; International Organisations (Tax Exempt Securities) Order 1991.

CHAPTER NINETEEN

# DIVIDENDS AND DISTRIBUTIONS

## 19.1 Dividends and distributions - Introduction

A full discussion of the taxation of dividends and distributions needs a book to itself. This chapter focuses on matters closest to the themes of this book. I do not discuss the corporation tax treatment of dividends and distributions received by UK companies.

## 19.2 Income from UK resident company

Section 383 ITTOIA imposes a charge on dividends and distributions from a UK resident company:

> (1) Income tax is charged on dividends and other distributions of a UK resident company.
> (2) For income tax purposes such dividends and other distributions are to be treated as income.
> (3) For the purposes of subsection (2), it does not matter that those dividends and other distributions are capital apart from that subsection.

Section 989 ITA defines "distribution" by reference to the wide and elaborate definition in CTA 2010:

> The following definitions apply for the purposes of the Income Tax Acts—
> "distribution" has the meaning given by Chapters 2 to 5 of Part 23 of CTA 2010, disregarding section 1027A of that Act.

Section 384 ITTOIA provides:

> (1) Tax is charged under this Chapter on the amount or value of the dividends paid and other distributions made in the tax year. ...

There is no reference to the remittance basis rules in part 8 ITTOIA, so dividends and distributions from UK resident companies are taxed on the arising basis (even for remittance basis taxpayers). This adopts or enacts the decision in *Bradbury v English Sewing Cotton Co* 8 TC 481 that the source of income from shares is located where the company is resident.

When the income consists of the transfer of a non-cash asset, there has been some debate whether the amount of the income is computed by reference to the market value or the book value of the asset. For UK company law purposes, one takes the book value: s.845 Companies Act 2006. But for tax purposes, one should take the market value.

### 19.2.1 *Tax credit*

Section 397 ITTOIA provides:

> (1) A UK resident or eligible non-UK resident receiving a qualifying distribution made by a UK resident company is entitled to a tax credit equal to one-ninth of the amount or value of the distribution (but see subsections (3) and (6)).
> (2) Such a person may claim to deduct the tax credit from—
> (a) the income tax charged on the person's total income for the tax year in which the distribution is made.
> (3) Subsection (1) only applies so far as the distribution is brought into charge to tax, and accordingly if the person's total income is reduced by any deductions which fall to be made from the distribution, the tax credit for the distribution is reduced in the same proportion as the distribution.

The SAIM explains subsection (3):

> **5100. Tax credits on qualifying distributions** [May 2010]
> [The manual paraphrases s.397(3) ITTOIA and continues:] So, for example, if an individual's total income is reduced by deductions (for example, personal allowances) such that the qualifying distributions are not, or are not wholly, brought into charge to tax, the value of the tax credits attaching to those distributions are correspondingly reduced. So a person may be entitled to a tax credit whose value is nil.

### 19.2.2 *Eligible non-UK resident*

Section 397(4) ITTOIA provides:

> For the purposes of this section "eligible non-UK resident", in relation to a qualifying distribution, means an individual who at any time in the tax year in which it is received is a non-UK resident within
> [a] section 278(2) of ICTA or
> [b] section 56(3) of ITA 2007 (Commonwealth citizens, EEA nationals etc.).

Subsection (4)[a] has no effect as s.278 ICTA was repealed in 2009 (the drafter forgot to repeal the cross reference here). There are seven categories of individuals within s.56(3) ITA, of which the only important one is EEA nationals.[1]

The individual has only to fall into the relevant category 'at any time' in the tax year, not necessarily throughout the tax year.

For completeness, s.397(5) ITTOIA provides:

> If a distribution is, or is treated under any provision of the Tax Acts as, the income of a person ("P") other than the recipient ("R"), P (not R) is treated as receiving it for the purposes of this section (and so P (not R) is entitled to a tax credit if P falls within subsection (1)).

### 19.2.3 *Grossing up*

Section 398(1) ITTOIA[2] provides for grossing up a dividend by the amount of the tax credit:

> If a person is entitled to a tax credit under section 397 or 397A in respect of a dividend or other distribution, the amount or value of the dividend or other distribution is treated as increased by the amount of the tax credit for all income tax purposes (except sections 397(1) and 397A(1)).

For instance:

1 See 41.7.1 (Entitlement to personal allowances under UK domestic law).
2 Flagged by s.384(3) ITTOIA.

Dividend: £1,000 **("net amount")**
Tax credit (one ninth): £111.11
Dividend plus tax credit: £1,111.11 **("gross amount")**

### 19.2.4 *Recipient non-eligible person: effective tax credit*

Section 399 ITTOIA provides:

> (1) This section applies if a person is not entitled to a tax credit under section 397 or 397A for a qualifying distribution included in the person's income for a tax year.
> (2) The person is treated as having paid income tax at the dividend ordinary rate on the amount or value of the distribution (but see subsection (7))...
> (6) The income tax treated as paid under subsection (2) is not repayable.

I call this **"an effective tax credit"** as the legislation uses the expression "tax credit" in the strict sense of a tax credit under s.397 or 397A.

Subsection (7) contains four exceptions concerning specialist topics not discussed here.

### 19.2.5 *Grossing up income of non-residents*

Section 399 ITTOIA provides:

> (3) For the purposes of subsection (2), if the person is non-UK resident the amount or value of the distribution is treated as the grossed up amount, unless the person is a company which is beneficially entitled to the income.
> (4) If the person is non-UK resident, the amount or value of the distribution is treated for the purposes of Chapters 3, 4 and 6 of Part 9 of ITA 2007 (special rates for trustees' income) as the grossed up amount.
> (5) In this section "the grossed up amount" means the actual amount or value of the distribution, grossed up by reference to the dividend ordinary rate for the tax year.

This is relevant to a non-resident trust because (in the absence of treaty relief) it affect how much tax is paid at the dividend rates. A non resident individual does not usually care about grossing up since no tax is due beyond the effective tax credit but grossing up might be relevant to an individual treaty-resident in a state where the treaty allows repayment of the tax credit.

## 19.3 Income from non-resident company

### 19.3.1 *Income dividends*

Section 402(1) ITTOIA imposes a charge to tax on dividends from non-resident companies:

> Income tax is charged on dividends of a non-UK resident company. ...

I refer to this as a charge on **"income dividends"** because s.402(4) ITTOIA provides:

> In this Chapter "dividends" does not include dividends of a capital nature.

Section 403 ITTOIA provides:

> (1) Tax is charged under this Chapter on the amount of the dividends arising in the tax year.
> (2) Subsection (1) is subject to ...[3] Part 8 (foreign income: special rules).

Section 403(2) ITTOIA introduces the remittance basis for foreign source income dividends.

ITTOIA EN discusses the meaning of "dividend" without shedding much light on the subject:

> 187. The term "dividend" is not defined in this Act. "Dividend" is a widely used and understood term and is defined only in very specific circumstances not applicable in this context ... . It is not thought appropriate to attempt to define "dividend" here. It will usually be a matter of referring to the relevant company law to determine whether or not a payment made by a company is a dividend.

---

3 Omitted words relate to SIPs (outside the scope of this book).

### 19.3.2 *Non-dividend company income*

Non-dividend income from a non-resident company is taxed under s.687 ITTOIA:

> (1) Income tax is charged under this Chapter on income from any source that is not charged to income tax under or as a result of any other provision of this Act or any other Act. ...
> (4) The definition of "income" in s.878(1) does not apply for the purposes of this section.[4]

Section 688 ITTOIA provides:

> (1) Tax is charged under this Chapter on the amount of the income arising in the tax year.
> (2) Subsection (1) is subject to ...[5]
> (c) Part 8 (foreign income: special rules).

Section 688(2)(c) ITTOIA introduces the remittance basis for foreign source non-dividend company income.

Thus we have two separate charging provisions:

(1) Section 402 imposes the charge on income dividends.
(2) Section 688 imposes the charge on income from companies other than dividends (which I call **"non-dividend company income"** ).

ITTOIA EN Vol. II explains why:

> 184. Income which, under the source legislation, is charged to tax under Schedule D Cases IV or V, has, where appropriate, been fully integrated with the equivalent income arising from a UK source. In the case of dividends from non-UK resident companies there is no exact equivalent in terms of UK source income. The closest equivalent is the charge to tax on dividends and other distributions from UK resident companies (section 20 of ICTA, Schedule F in the source legislation). But there is no precise overlap. The UK charge, by the adoption of the

---

4 The disapplied definition states:
"'Income' includes amounts treated as income (whether expressly or by implication)."

5 The exceptions in (a)(b) are outside the scope of this book.

> definition of "distribution" from Part 6 of ICTA ... can include dividends or distributions of a capital nature and can also operate to convert payments that would otherwise be treated as interest into distributions. Any charge on distributions from non-UK resident companies must be confined to income only. For this reason ... it is not thought appropriate to integrate the charges. So a separate charge is needed to cover dividends from non-UK resident companies. ...
> 186. ... It is possible that a non-UK resident company may make a distribution of income which would not fall within Chapter 4 of Part 4 of this Act because it is not a "dividend". But if the distribution comprises income it will fall to be dealt with either under alternative specific charges (eg interest) or within "income not otherwise charged", the charge on which appears in Chapter 8 of Part 5 of this Act.

In practice it does not usually matter whether a receipt from a company is classified as an income dividend (chargeable under s.402) or as non-dividend company income (chargeable under s.687). In either case the receipt is only taxable if it is income and not capital in nature.

### 19.3.3 *Tax credit and grossing up*

The topic of grossing up and tax credits on foreign dividends, in s.397A ITTOIA, needs a chapter, and is not discussed here; but I hope to cover it in a future edition.

## 19.4 Receipt from a non-resident company: income or capital?

What receipts from non-resident companies are income within the charge under s.403 or s.687? For receipts from UK resident companies the question does not arise. The charge is on "distributions" and the term is defined and includes a capital distribution. For receipts from non-resident companies, the charge is restricted to "income" and there is no guidance in the statute. So the income/capital distinction is one of the general law (eg it applies for trust law purposes) which is adopted by UK tax law. Hence many of the cases are trust cases and not tax cases.[6]

---

6 See Law Commission Consultation Paper 175 (Capital and Income in Trusts, 2004) accessible *www.justice.gov.uk/lawcommission/index.htm*.

### 19.4.1 *The general principle*

*Courtaulds Investments v Fleming* 46 TC 111, at p.124 summarises the law as follows:

> The rights and interests of shareholders in the assets and the profits of companies in which they hold shares vary widely in detail, but I think they can all be said to fall under three heads:
> (1) rights to participate in the distributable profits of the company while it is a going concern;
> (2) rights to participate in the division of the assets of the company in a liquidation, and
> (3) rights to participate in any distribution to shareholders on an actual or notional reduction of capital.
> Anything received under the first head is treated by English law as income of the recipients for both tax purposes and trust purposes (but subject as to the latter to any special provision of the trust) notwithstanding that the source of the distribution may be a profit not of the company's business but on capital account: see *In re Doughty* [1947] Ch 263 and *IRC v Reid's Trustees* 30 TC 431. Anything received under the second head is treated by English law as capital both for tax purposes and, subject as aforesaid, for trust purposes. So also is anything received under the third head. That this is so for trust purposes is clear from *In re Duff's Settlements* [1951] Ch 923, where moneys received by trustees on a distribution of part of a share premium account under the Companies Act 1948, s.56, were held to be capital for the purposes of their trust. My attention was not drawn to any case where the same has been held to be so for tax purposes on a distribution of a share premium account under s.56, but in my judgment that must follow.

The distribution of a share premium account of a Cayman company is income and not capital: *First Nationwide v HMRC* [2010] UKFTT 24 (TC).

The HMRC view was set out in the former Inspectors Manual. The material was deleted from the current SAI Manual, which deals with the question only cursorily at 5210. I set out the old Inspectors Manual passages, as they no doubt continue to reflect HMRC practice:

**1610. Distributions/foreign cos: In cash**
Published: 9/95
... a cash distribution to its shareholders by a foreign company will normally be assessable under Case V, whether it is attributable to the undivided[7] profits or to the capital resources of the company (*IRC v Reid* 30 TC 431). Where, however, cash —
a) is distributed on the liquidation of the company (*IRC v Burrell* 9 TC 27) or
b) comprises a return of part of the shareholder's capital interest in the company (*Rae v Lazard Investment Co* 41 TC 1; *Courtaulds Investments v Fleming* 46 TC 111),

the cash constitutes a capital sum not assessable as income under Case V. ...

This is correct, though (b) is a slightly abbreviated summary of the position as more fully set out in *Courtaulds Investments*.

**1613. Distributions/foreign cos: Not in cash: Release of assets**
Published: 9/95
Where a foreign company releases[8] some of its assets (for example, shares it holds in another company) to its shareholders, the distribution will normally be assessable under Case V by reference to the UK currency value of such assets at the date of distribution (*Pool v Guardian Investment Trust* 8 TC 167; *Wilkinson v IRC* 16 TC 52; *Briggs v IRC* 17 TC 11). Where, however, the assets are released on liquidation or are otherwise claimed to be a return of capital to the shareholder, the claim should be referred to Revenue Policy, International (Cases IV and V), Victory House in accordance with IM1610, last sub-para.

The Manual dealt separately with distributions of cash and distributions of non-cash assets but the principle is exactly the same.

### 19.4.2 *Stock option*

The Inspectors Manual continued:

---

7 [Author's Note] "Undivided" in this context is an old-fashioned term for "undistributed".

8 [Author's Note] "Releases" here means "distributes". The word "release" was used in *Pool v Guardian* (1922), but is not normally used nowadays in this sense.

**1611. Distributions/foreign cos: Not in cash: Option cases**
Published: 9/95
Where a foreign company declares a cash dividend but offers its shareholders, on their own initiative, the option of taking up further shares in lieu of the cash dividend, a shareholder who exercises the option to take up the shares is not assessable under Case V of Schedule D in respect of that dividend. If, however, a shareholder does not exercise the option but takes the dividend in cash, he is assessable under Case V of Schedule D on the amount of the cash dividend. See CG51823 regarding the capital gains position.

### 19.4.3 *Issue of shares or debentures*

The Inspectors Manual continued:

**1612. Distributions/foreign cos: Not in cash**
Published: 9/95
Where a foreign company capitalises undivided [ie undistributed] profits and —
a) issues to its shareholders the additional capital so created, in the form of its own shares or debentures, in proportion to the number of shares already held by them or
b) satisfies a dividend out of such profits by the issue of its own stocks or shares (for example, a "stock dividend" by a United States company),

such a distribution does not constitute income for Case V purposes in the hands of the shareholder. This principle applies when the distribution is actually made in shares, whether or not an effective option was given to the shareholder to receive cash in place of shares (*IRC v Blott*, 8 TC 101; *Whitmore v IRC* 10 TC 645; *IRC v Fisher's Executors*, 10 TC 302; *IRC v Wright* 11 TC 181). ...
In cases where the distribution is not actually made in shares and the shareholder accepts cash from the company under an option given to him to receive cash in place of shares, the cash is assessable as income in accordance with IM1610.
**1614. Distributions/foreign cos: Certificates of indebtedness**
Published: 9/95
As regards liability in respect of dividends received in the form of certificates of indebtedness redeemable at a future date, see *Associated Insulation Products Ltd v Golder* 26 TC 231.
See also IM4580 as regards liability on the sale or transfer of such certificates.

### 19.4.4 *Dividend reinvestment plans*

The former Inspectors Manual continued:

> **1615. Dividend reinvestment plans**
> Published: 9/95
> Some foreign companies, particularly in North America and Australia, establish dividend reinvestment plans for their shareholders. Such plans can be structured in a number of different ways, some of which result in liability under Case V when a dividend is declared, and others which do not. At one extreme is the pure bonus issue, when a dividend is declared payable in shares with no option for the shareholder to take cash. Alternatively a company may arrange for cash dividends to be paid to a third party, typically a bank, which then applies the dividends in the purchase of additional company shares in the market on behalf of the shareholder. The first situation falls within the principle of *IRC v Blott* (8 TC 107) – see IM1612. The second gives rise to a Case V charge because the reinvestment in the company is regarded as a voluntary application of income which has already arisen to the shareholder.
> Between these two extremes lies a variety of situations, each of which must be considered by reference to their own facts to determine whether a Case V charge arises...

## 19.5 Income distribution from non-resident company: location of source

If a distribution from a non-resident company is income in nature, the question arises as to where is its source. There are many possible connecting factors, but the House of Lords held in *Bradbury v English Sewing Cotton Co* 8 TC 481 that the source of income from shares is situated in the place where the company is resident – not where it is incorporated or where the share register is kept. (This is a good illustration of how the income tax source rules may differ from the IHT/private international law situs rules.) This rule is clearly assumed in the way that the current legislation is drafted.

## 19.6 Distribution to non-shareholder

In *Aveling Barford v Perion* [1989] BCLC 626, a company (Aveling Barford) sold an asset at an undervalue to another company (Perion). The sale was made at the direction of the shareholder of Aveling Barford, and Perion was held on trusts for the benefit of the shareholder and their family. This was held to be a distribution (and so unlawful as the company had no distributable profits):

> The fact that the distribution was to Perion rather than to Dr. Lee or his other entities which actually held the shares in Aveling Barford is in my judgment irrelevant.

The rule that a sale at an undervalue is a distribution has been changed by s.845 CA 2006 but that does not affect the separate point that a payment from a company to a non-shareholder may be classified as a distribution.

How does one reconcile this with s.829 CA 2006 which defines "distribution" to mean:

> Every description of distribution of a company's assets *to its members*...

There are two answers. The better view is that the word "to" may be read as "to or at the direction of". Alternatively it might be said that there are two sets of rules relating to distributions from companies, the statutory rules and common law rules, and a distribution to a non-shareholder is a "distribution" for the purposes of the latter. It would not matter for company law which of these is correct.

What is the tax position on a distribution to a non-shareholder? If the company is owned by A, an individual, and the company makes a distribution to B, then B cannot be subject to income tax as B has no source of income. A will be chargeable to tax on the distribution if A is a person receiving or entitled to the income: see s.689 ITTOIA.

What if the company is owned by a discretionary trust, and the company makes a distribution to B, a beneficiary? There are several possible solutions:

(1) The distribution is income of B in the form of a company distribution.
(2) The distribution is income of B in the form of a trust distribution.
(3) The distribution is:
  (a) income of the trustees in the form of a company distribution; and
  (b) income of B in the form of a trust distribution.
(4) The payment is not income of B or of the trustees.

Solution (1) seems sensible but is inconsistent with the source doctrine which states that one cannot receive income (for tax purposes) unless one has a source of income: B has no interest in the company. (B's interest in the discretionary trust is not an interest in the company.) A radical House of Lords could (and perhaps should) reform the source doctrine to reach this result, but subject to that, solution (1) is not available.

It is considered that solution (2) is to be preferred. The reason that B receives the distribution is that B is a beneficiary of the trust, so the result is like any other trust distribution of an income nature.

Appropriate documentation would of course bring the matter into class (3) but in the absence of a payment to the trustees, it is artificial to regard them as in receipt of income.

Solution (4) is arguable but a court may regard it as too good to be true.

In these cases IHT needs to be considered: see ss.94, 99 IHTA. CGT and the transactions in securities code may also need to be considered.

## 19.7 Dividends from UK company to treaty non-resident person

Article 10 OECD Model provides:

> 1. Dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
> 2. However, such dividends may also be taxed in the Contracting State of which the company paying the dividends is a resident and according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:
> a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends;
> b) 15 per cent of the gross amount of the dividends in all other cases.
> ...

Actual treaties vary considerably, particularly in the terms of art 10(2).

Persons within (a) are sometimes described as **"direct investors"** and those within (b) as **"portfolio investors"**, though the effective meaning of those terms depend on the requirements of the treaty concerned.

In practice, non-resident individuals and non-resident companies do not need treaty relief.[9] They qualify for non-residents IT relief which restricts the tax on dividends to an amount which is covered by the effective tax credit. The relief is relevant to:

(1) Non-resident trusts (if they do not qualify for non-residents income tax relief, because of having UK resident beneficiaries).[10]
(2) Individuals who are UK domestic-law resident, but treaty non-resident.

Some older treaties give the treaty non-resident a right to be repaid surplus tax credit. However:

(1) The number of treaties with a provision of this kind is small, and is diminishing as new treaties replace the older ones.
(2) The reduction in the amount of the tax credit to one ninth usually means that there is nothing to be repaid.

The International Manual provides:

**343510. Background** [March 2007]
...Since 6 April 1973, dividends have not had income tax deducted but have an amount attached to them (not paid to the shareholder at the time of the dividend) called a tax credit. See Section 231 ICTA 1988. Some DTAs provide for payment of tax credit. You need to check the details of each DTA. There are two types of investor

- portfolio investors (someone who owns less than 10% of the total number of issued shares in a UK company) – the dividend article usually provides that the investor is entitled to a tax credit equal to that to which a UK resident individual would be entitled had he received the dividend. Any excess of the tax credit above a deduction of 15% of the aggregate of the dividend and the tax credit is payable..
- direct investors (where a company controls 10% or more of the voting power of the UK company paying the dividend) – the dividend articles of a small number of DTAs provide that the investor is entitled to a tax credit equal to one-half of that to which a UK resident individual would be entitled had he received the dividend. The relief allowable is a payment of that half tax credit minus 5% or 10% of the aggregate of the dividend plus the half tax credit.

**343520. Portfolio Investors** [March 2007]
The expression "portfolio investors" describes the great majority of shareholders. They include individual persons, pension funds, companies and others who have invested money in shares issued by the UK company. The number of shares owned by each investor may range from single figures to several million shares. If a shareholder owns 10% or more of the total number of voting shares that have been issued by a UK company they are called a "direct investor". See INTM343540.
Some Double Taxation Agreements (DTAs) contain provisions that allow a portfolio shareholder to claim payment of part of the tax credit. In these treaties the dividend

9 See 37.1 (Non-residents IT relief).
10 See 3.5 (Trusts: UK beneficiary rule).

article usually provides that the amount payable is equal to the tax credit minus 15% of the aggregate of the dividend and the tax credit.
Where the DTA does not provide for payment of tax credits and the shareholder is an individual (a person) see INTM343530.
... For dividends paid on or after 6 April 1999 the rate of tax credit that is attached to a UK dividend is one ninth of the dividend. The effect of this rate of tax credit is that there is no amount for a portfolio investor to claim (see Section 30(10) F(No2)A 1997).
***Example***
Dividend £1,000
Tax credit (one ninth) £111.11
Dividend plus tax credit £1,111.11
15% retained in the UK £166.66
Because the amount to be retained in the UK is greater than the original tax credit there is nothing to pay. £111.11 less £166.66 equals nothing.
**343540. Direct investors** [March 2007]
A "direct investor" may be defined as a company that controls 10% or more of the voting shares of the UK company that is paying the dividend. Many Double Taxation Agreements (DTAs) that provide for payment of tax credits specifically exclude companies that either alone or together with associated companies control 10% or more of the voting power in the company that is paying the dividend. The claim forms contain a question that will allow you to identify these cases.
However, some DTAs contain provisions that specifically allow for payment of part of the tax credit to direct investors. The amount of relief that may be claimed by the non-resident shareholder is one half of the tax credit a UK resident would be entitled to minus 5% or 10% of the aggregate of the dividend plus half the tax credit.
The treaties that contain these special provisions that allow a direct investor to claim payment of part of the tax credit are
• Belgium see example 1.
• Canada, but no amount is payable for dividends paid on or after 6 April 1999 – see example 2.
• Italy see example 1.
• Luxembourg see example 1.
• Netherlands see example 1.
• Sweden see example 1.
• Switzerland see example 1.
• USA see example 1. Because the treaty changed there is no relief for any dividend paid on or after 1 May 2003 unless a specific election is made.
***Example 1***
Dividend paid on or after 6 April 1999 rate of tax credit is one ninth of the dividend.
Dividend £1,000,000
Tax credit £111,111.11
Dividend plus half tax credit £1,055,555.55
5% of dividend plus half tax credit £52,777.77
Payment is calculated as half tax credit (£55,555.55) less 5% of dividend plus half tax credit (£52,777.77) equals £2,777.78.
***Example 2***
(Direct investor company resident in Canada.) Dividend paid on or after 6 April 1999 rate

of tax credit is one ninth of the dividend.
Dividend £1,000,000
Tax credit £111,111.11
Dividend plus half tax credit £1,055,555.55
10% of dividend plus half tax credit £105,555.55
Because the amount to be retained in the UK is greater than the original tax credit there is nothing to pay. £55,555.55 less £105,555.55 equals nothing (see F(No2)Section 30(10) A 1997.

### 19.7.1 *"Dividends"*

Article 10(3) defines dividends:

> The term "dividends" as used in this Article means income from shares, "jouissance" shares or "jouissance" rights, mining shares, founders' shares or other rights, not being debt-claims, participating in profits, as well as income from other corporate rights which is subjected to the same taxation treatment as income from shares by the laws of the State of which the company making the distribution is a resident.

See Avery-Jones et al "The Definitions of Dividends & Interest in the OECD Model: Something Lost in Translation?" [2009] BTR 406.

### 19.7.2 *Dividends paid through PE*

Article 10(4) provides:

> 4. The provisions of paragraphs 1 and 2 shall not apply if the beneficial owner of the dividends, being a resident of a Contracting State, carries on business in the other Contracting State of which the company paying the dividends is a resident through a permanent establishment situated therein and the holding in respect of which the dividends are paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.

### 19.7.3 *Dividends to treaty non-resident company*

Article 10(4) provides:

> Where a company which is a resident of a Contracting State derives profits or income from the other Contracting State, that other State may

not impose any tax on the dividends paid by the company, except insofar as such dividends are paid to a resident of that other State or insofar as the holding in respect of which the dividends are paid is effectively connected with a permanent establishment situated in that other State, nor subject the company's undistributed profits to a tax on the company's undistributed profits, even if the dividends paid or the undistributed profits consist wholly or partly of profits or income arising in such other State.

CHAPTER TWENTY

# ROYALTIES

## 20.1 Royalties - Introduction

This chapter considers the taxation of royalties and deduction of tax at source rules for royalties. I use the term **"royalty income"** to mean royalties and all other receipts from intellectual property.

The topic requires a book to itself, and I focus on matters closest to the themes of this book.

I do not consider corporation taxation of royalties or the EU interest and royalties directive 2003/49/EC of 3rd June 2003 which applies to interest and royalty payments made between associated companies of different member states. Each of those would require long books to themselves.

## 20.2 Classification of royalty income for tax

Royalty income is classified for tax purposes in one of three ways. Statute does not provide much terminology, so I use the following terms:

(1) **Trading royalties**: royalties which constitute a receipt of a trade or profession (including a post-cessation receipt).
(2) **Non-trading royalties**: royalties which are not trading royalties. These may be:
(a) **Annual payment royalties**: royalties which are annual payments
(b) **Non-annual payment royalties**.

The three categories are recognised in *Noddy Subsidiary Rights v IRC* 43 TC 458 at p.474:

> It seems to me that, where you have this position, that a person owns an asset of any kind, whether physical or not, and grants licences under it, the activities which he carries on in connection with the grant of those

> licences may amount to a trade and then Case I of Schedule D applies. On the other hand, at the other end of the scale, the activities may amount to the mere holding of an investment, so that the receipt of income is in the nature of pure income profit and then Case III of Schedule D applies. There may be intermediate cases in which Case VI of Schedule D might apply.

ITTOIA has changed the terminology but not the underlying categorisation.

## 20.3 Trading royalties

The recipient of trading royalties has income of a dual character. The recipient has what must be classified as trading profits but in general the receipt is also classified as "royalties" within the usual sense of the word.

### 20.3.1 *Position of recipient of royalties*

Although the income has a dual character, there is only one charge to tax. The charge on trading profits under part 2 ITTOIA has priority over the charge on royalty income in part 5 ITTOIA, see s. 575 ITTOIA.

For the purpose of taxing the trading royalties the question whether the trading income has a UK source is naturally to be decided according to the rules which apply to trades/professions. Thus a UK resident trader has UK source trading profits even if the royalties come from abroad, since the trade is at least in part carried on in the UK.

What about trading income arising to a non-resident? There is commonwealth authority. In *Millin v IRC* Mrs Millin received royalties from publishers in respect of works which were written by her in South Africa, but printed and published in England and the USA. The Appellate Division held that the income arose wholly from a source within South Africa:

> ... the source of the whole amount received for royalties was in the Union. It is true that in this case no capital in the ordinary sense of that term was employed by Mrs. Millin. It was the exercise of her wits and labour that produced the royalties. They were employed in the Union,

> and it matters not, on the analogy of the *Overseas Trust* case,[1] that the grant to her publishers of the right to publish her book was contained in a contract made in England. Her faculties were employed in the Union both in writing the book and in dealing with her publishers, and, therefore, on the test applied in the cases cited, the source of the whole of her income would be in the Union.[2]

### 20.3.2 *Position of payor of royalties*

If the royalties have a UK source, and the payee is not in the UK, the deduction at source rules in principle apply. This is so even if:

(1) The receipt is a trading receipt of the recipient. The mere fact that the recipient of the royalties is trading does not prevent the payment from being "royalties".

(2) The trading income is subject to UK tax. Withholding tax applies if the royalties are taxable, whether taxable as royalties or as trading income.

(The same applies of course to interest.)

### 20.3.3 *Credit for foreign tax on foreign royalties*

Conversely, foreign tax may be deducted from foreign royalties received from a person subject to UK tax. ESC B8 provides:

> **B8 Double taxation relief: income consisting of royalties and "know-how" payments**
>
> Payments made by a person resident in an overseas country to a person carrying on a trade in the UK as consideration for the use of, or for the privilege of using, in the overseas country any copyright, patent, design, secret process or formula, trademark or other like property
>
> [1] may in law be payments the source of which is in the UK,
>
> [2] but are nevertheless treated for the purpose of credit (whether under double taxation agreements or by way of unilateral relief) as income arising outside the UK except to the extent that they represent consideration for services (other than merely incidental services) rendered in this country by the recipient to the payer.

1 *Overseas Trust Corporation v IRC* [1926] AI 444, 2 SATC 71.

2 [1928] AD 207 at p.216.

[1] is wrong or poorly expressed. The payments are not "payments the source of which is in the UK". They are receipts of a trade, and the *trading profits* (which are entirely distinct from the payments) are profits whose source is in the UK.
[2] is law and not concession, but it does not matter.
INT Manual expands on this:

> **161130. The source rule – concessions** [January 2011]
> *(B) Extra-Statutory concession ESC/B8 - DTR: royalties and 'know how' payments*]
> A UK resident may receive income consisting of royalties or 'know how' payments from a foreign resident. While in particular cases there may be special circumstances which will require to be taken into account, in general such income should be dealt with as follows.
> a) Payments made by a person resident in a foreign country to a person carrying on a trade in the UK as consideration for the use of, or for the privilege of using, in the foreign country any copyright, patent, design, secret process or formula, trademark or other like property may be treated for the purpose of credit (whether under double taxation agreements or by way of unilateral relief) as income arising outside the UK, except to the extent that they represent consideration for services (other than merely incidental services) rendered in this country by the recipient to the payer.
> b) Traders resident in the UK are not entitled to claim credit for any tax which is levied in the foreign country in respect of payments for services which are rendered in the UK and are not merely incidental services. In any such case the net amount of the payment (after deduction of any foreign tax borne by them on the payments) is included in the computation of profits for UK tax purposes.
> The prohibition on credit for foreign tax charged on payments for services rendered in the UK may be overruled by the terms of those double taxation agreements which have a royalties Article which includes technical services in the definition of royalties (see INTM153130) or a separate technical fees Article (see INTM153140) and those agreements deem the source of such payments to be in the country of which the payer is a resident. In such cases, even though the services are rendered in the UK, credit is due for the foreign tax charged on these payments.

### 20.3.4 *Professional author*

The International Manual has an important comment here:

> **342590. Professional authors** [June 2004]
> Copyright royalties that are payable to an author/originator of a literary, dramatic, musical or artistic work that has been created in the ordinary course of his profession (an "author by profession") fall into the same category as fees for professional services and do not come under [what is now s.906 ITA]. Payments that are made to an author by profession who usually lives overseas are therefore not subject to deduction of UK income tax at source. This follows the decisions in *Carson v Cheyney's Executor* (38 TC 240) and *Hume v Asquith* (45 TC 251) ...
> A Professional Author can be classed as such if he is clearly the originator of the work(s) concerned. If the claimant is not the originator of the work but has acquired the rights from that person they may not be treated as a professional author.

This practice goes back to a Parliamentary statement in 10 November 1949. Roy Jenkins (then Chancellor of the Exchequer) said

> "I am advised that [the deduction at source rule] does not apply to payments made to those who are authors by profession... "

Payments to a professional author are fees for services and not "royalties". This is odd, though the oddity is long-established and based on decisions of the highest authority. In practice it only matters where the author is resident in a jurisdiction without a DTA conferring relief. That would be fairly unusual, which may be the reason why the rule has survived.

The same rule must apply to post-cessation receipts. Contractual payments which are exempt from deduction at source (because they are not "royalties") continue to be exempt after the death of the author.

## 20.4 Non-trading royalties

After the (somewhat unnecessary) introduction in accordance with the principles of plain English drafting, s.579(1) ITTOIA provides the charge to tax:

> Income tax is charged on royalties and other income from intellectual property.[3]

Section 580 ITTOIA provides:

> (1) Tax is charged under section 579 on the full amount of the income arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules). ...

This incorporates the remittance basis for foreign source royalty income.

Non-trading royalties are taxable under chapter 2 part 5 ITTOIA. This is so whether or not the royalties are annual payments or non-annual payments. The distinction between (non-trading) royalties which are annual payments and those which are not (former DVI income) is important, because:

(a) If the royalties are "annual payments" no expenses are deductible;
(b) If royalties are "other than annual payments" then expenses are deductible. Section 582 ITTOIA provides:

> (1) This section applies for calculating the amount of income charged under section 579 other than annual payments.
> (2) Expenses wholly and exclusively incurred for the purpose of generating the income are deductible...

"Annual payment" is an opaque and unhelpful label for a technical term whose meaning is discussed in a large and in parts difficult body of case

3 Section 579(2) ITTOIA defines intellectual property:
"In this section "intellectual property" means—
(a) any patent, trade mark, registered design, copyright, design right, performer's right or plant breeder's right,
(b) any rights under the law of any part of the UK which are similar to rights within paragraph (a),
(c) any rights under the law of any territory outside the UK which correspond or are similar to rights within paragraph (a), and
(d) any idea, information or technique not protected by a right within paragraph (a), (b) or (c)."

law,[4] which cannot be discussed here.

## 20.5 Where is the source of non-trading royalties?

Foreign source royalties are outside the scope of withholding tax and (unless trading royalties) only taxed (if at all) as RFI so the question of source matters to both payor and recipient.

What is the test to determine the source of non-trading royalties? The INT manual provides:

> **342520. Copyright royalties** [March 2007]
> If the copyright is exploited in the UK the royalty payment will be regarded as having a UK source and therefore within the provisions of [what is now s.906 ITA]. This is irrespective of the law governing the contract.

The same view is expressed in "Payments for the use of computer software and the deduction of income tax therefrom" Hughes & Payne [2000] BTR 5 at p.10. It is considered that this is correct.

Another passage in the INT Manual offers a different test:

> **161130. The source rule – concessions** [March 2007]
> ... If the owner of a right such as a patent, trademark or copyright is not engaged in any trade to which the right relates but derives income by exploiting that right, the source of the income may be regarded for the purpose of credit as located in the country where the right is enforceable.

But as a result of developments in private international law, the place of enforcement is no longer a useful connecting factor for tax[5] (even though in many cases it will be the same as the place of exploitation).

## 20.6 Withholding tax

Section 906 ITA provides:

---

4 Section 582(7) ITTOIA specifies one rule: "The frequency with which payments are made is ignored in determining whether they are annual payments for the purposes of subsection (1)."

5 See 17.4.5 (Impact of modern private international law).

(1) This section applies to any payment made in a tax year if—

(a) it is a payment of any royalties, or sums payable periodically, in respect of a relevant intellectual property right (see section 907),[6]

(b) it is one that is charged to income tax or corporation tax, and

(c) condition A or B is met.

## 20.6.1 *Withholding tax conditions A and B*

Section 906(2) provides:

> Condition A is that the usual place of abode of the owner of the right is outside the UK.

See 17.8 (Usual place of abode). Note the test is the place of abode of the owner of the right. Condition B is an anti-avoidance rule. Section 906(3) ITA provides:

> Condition B is that—
> (a) a person ("the seller") has assigned the right to another person,
> (b) the usual place of abode of the seller is outside the UK,
> (c) the seller is entitled to periodical payments in respect of the right, and
> (d) the payments are in respect of that entitlement.

Section 906(4) ITA provides one exception:

> But this section does not apply if the payment is made in respect of copies of works, or articles, which have been exported from the UK for distribution outside the UK.

Section 906(5) ITA imposes the obligation to withhold tax:

> The person by or through whom the payment is made must, on making it, deduct from it a sum representing income tax on it at the basic rate in

---

6 Section 909(3) ITA slightly extends the concept of "payment of royalties":
(3) Section 906—
(a) applies to payments on account of royalties as it applies to payments of royalties, and
(b) applies to payments on account of sums payable periodically as it applies to payments of sums payable periodically.

force for the tax year. ...

Section 907 ITA defines "relevant intellectual property right":

> (1) In section 906 "a relevant intellectual property right" means—
> (a) a copyright,
> (b) a right in a design, or
> (c) the public lending right in respect of a book.
> (2) In this section—
> "copyright" does not include copyright in—
> (a) a cinematographic film or video recording, or
> (b) the sound-track of a cinematographic film or video recording, except so far as it is separately exploited,
> "a right in a design" means the design right in a design, or the right in a registered design.

This definition takes film royalties outside the deduction of tax at source regime.

### 20.6.2 *Miscellaneous*

Section 908 ITA provides:

> **908 Royalty payments etc made through UK resident agents**
> (1) If—
> (a) a payment to which section 906 applies is made through an agent who is UK resident, and
> (b) the agent is entitled as against the owner of the right to deduct a sum as commission for services provided,
> section 906(5) and Chapters 8 (deduction at special rates), 15 and 16 (collection) apply as if the amount of the payment were the amount net of the sum deductible as commission.
> (2) But if the person by or through whom the payment is made does not know the commission is payable, or does not know its amount—
> (a) the sum representing income tax required to be deducted under section 906 must be calculated in the first instance on the total amount of the payment, and
> (b) the return to be made under Chapter 15 or the account of the payment under Chapter 16, must be based on that total amount.

Section 909(1) ITA is a timing provision:

> A payment to which section 906 applies is treated for all income and corporation tax purposes as made when it is made by the first person who makes it, not when it is made by or through any other person.

Section 909(2) ITA prevents contracting out:

> If, under section 906, a sum representing income tax must be deducted from a payment, any agreement to make the payment without deduction of that sum is void.

## 20.7 DT defence to deduction at tax at source

Art 10.1 OECD model treaty provides:

> Royalties[7] arising in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in that other State.

Art 10.3 and 10.4 contain two exceptions not discussed here.[8]
The UK operates a self-certification system. Section 911 ITA provides:

---

7 Article 10.2 defines royalties:

> The term "royalties" as used in this Article means payments of any kind received as a consideration for the use of, or the right to use, any copyright of literary, artistic or scientific work including cinematograph films, any patent, trade mark, design or model, plan, secret formula or process, or for information concerning industrial, commercial or scientific experience.

8 3. The provisions of paragraph 1 shall not apply if the beneficial owner of the royalties, being a resident of a Contracting State, carries on business in the other Contracting State in which the royalties arise through a permanent establishment situated therein and the right or property in respect of which the royalties are paid is effectively connected with such permanent establishment. In such case the provisions of Article 7 shall apply.
4. Where, by reason of a special relationship between the payer and the beneficial owner or between both of them and some other person, the amount of the royalties, having regard to the use, right or information for which they are paid, exceeds the amount which would have been agreed upon by the payer and the beneficial owner in the absence of such relationship, the provisions of this Article shall apply only to the last-mentioned amount. In such case, the excess part of the payments shall remain taxable according to the laws of each Contracting State, due regard being had to the other provisions of this Convention.

> (1) This section applies if—
> (a) a company pays a royalty from which it is required to deduct a sum representing income tax under Chapter 6 or 7,
> (b) the income tax in respect of the payment is collectible under Chapter 15 or 16, and
> (c) the company reasonably believes that, at the time the payment is made, the payee is entitled to relief in respect of the payment under double taxation arrangements.
> (2) The company may calculate the sum to be deducted from the payment under Chapter 6 or 7 by reference to the treaty rate.
> (3) But, if the payee is not at the time entitled to such relief, this Part has effect as if subsection (2) had never applied in relation to the payment.
> (4) In this section "the treaty rate" means the rate of income tax appropriate to the payee under the arrangements.

This only applies to company payors. Section 912 allows HMRC to require withholding:

> (1) This section applies if an officer of Revenue and Customs is not satisfied that the payee will be entitled to relief under double taxation arrangements in respect of one or more payments of royalties that a company is to make.
> (2) The officer may direct the company that section 911 is not to apply to the payment or payments.
> (3) A direction under subsection (2) may be varied or revoked by a later direction.
>
> 913 Interpretation of sections 911 and 912
> (1) In sections 911 and 912 "royalty" includes—
> (a) a payment received as consideration for the use of, or the right to use, a copyright, patent, trade mark, design, process or information, and
> (b) the proceeds of the sale of the whole or part of any patent rights.
> (2) In sections 911 and 912 "payee" means the person beneficially entitled to the income in respect of which the payment is made.

## 20.8 Films and sound recordings

Special rules apply to the exploitation of films and sound recordings. Section 609 ITTOIA provides:

> (1) Income tax is charged on income from a business involving the exploitation of films or sound recordings where the activities carried on do not amount to a trade.
> Such a business is referred to in this Chapter as a "non-trade business".
> (2) Expressions which are used in this Chapter and in Chapter 9 of Part 2 (trade profits: films and sound recordings) have the same meaning in this Chapter as they do in that Chapter.

Section 610 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the income arising in the tax year. ...
> (3) This section is subject to Part 8 (foreign income: special rules).

The charge applies to UK and foreign source income, but this incorporates the remittance basis for foreign source income.

Section 612 ITTOIA provides:

> (1) This section applies for calculating the amount of income charged under this Chapter.
> (2) Expenses wholly and exclusively incurred for the purpose of generating the income are deductible. ...
>
> 613 Application of trading income rules to non-trade businesses
> The provisions of Chapter 9 of Part 2 apply in relation to non-trade businesses as they apply in relation to trades but as if—
> (a) references to a basis period were to a tax year, and
> (b) references to anything not constituting trading stock of a trade were omitted.

CHAPTER TWENTY ONE

# PENSION INCOME

## 21.1 Pension Income – Introduction

The income taxation of pensions requires a book to itself. In this chapter I only touch on the matters closest to the themes of this book.

The legislation is in part 9 ITEPA. After the usual outline in accordance with the principles of plain English drafting, which does not need to be considered here, there follows a cascade of definitions which need to be considered briefly.

### 21.1.1 *"Pension income"*

This term is defined in s.566(2) ITEPA:

> "Pension income" means the pensions, annuities and income of other types to which the provisions listed in subsection (4) apply.
> This definition applies for the purposes of the Tax Acts.

Section 566(4) sets out 13 categories of income of which the first two are the most important (and the only ones discussed here):

These are the provisions referred to in subsection (2)—

| **Provision** | **Income** | **Chapter (of this Part)** |
|---|---|---|
| Section 569 | UK pensions | Chapter 3 |
| Section 573 | Foreign pensions | Chapter 4 |
| Section 577 | UK social security pensions | Chapter 5 |
| Section 579A | Pensions under registered pension schemes | Chapter 5A |
| Section 609 | Annuities for the benefit of dependants | Chapter 10 |
| Section 610 | Annuities under sponsored superannuation schemes | Chapter 10 |
| Section 611 | Annuities in recognition of another's services | Chapter 10 |
| Section 615 | Certain overseas government pensions paid in the UK | Chapter 11 |
| Section 619 | The House of Commons Members' Fund | Chapter 12 |

| | | |
|---|---|---|
| Section 629 | Pre-1973 pensions paid under OPA 1973 | Chapter 14 |
| Section 633 | Voluntary annual payments | Chapter 15 |
| Section 636B | Pensions treated as arising from payment of trivial commutation lump sums and winding-up lump sums under registered pension schemes: | Chapter 15A |
| Section 636C | Pensions treated as arising from payment of trivial commutation lump sum death benefits and winding-up lump sum death benefits under registered pension schemes: | Chapter 15A |

### 21.1.2 *"Taxable pension income" and "Net taxable pension income"*

These terms are defined in s.567 ITEPA. "Net" taxable pension income brings in rules for deductions, not discussed here. The legislation brings pension income into charge by classifying it as "taxable pension income".

## 21.2 UK pension

Section 569 ITEPA provides:

> (1) This section applies to any pension[1] paid by or on behalf of a person who is in the United Kingdom.
> (2) But this section does not apply to a pension if any provision of Chapters 5 to 14 of this Part applies to it.
> (3) For pensions paid by or on behalf of a person who is outside the United Kingdom, see Chapter 4 of this Part.

I refer to this as "**a UK pension**". Section 571 ITEPA provides:

> If section 569 applies, the taxable pension income for a tax year is the full amount of the pension accruing in that year irrespective of when any amount is actually paid.

Thus a UK pension is taxed on an arising basis.

1 "Pension" for the taxation of UK pensions is defined in 570 ITEPA. The definition (perhaps for historic rather than cogent reasons) is different from the definition which applies for foreign pensions, in s.574 ITEPA.

## 21.3 Foreign pension

Section 573 ITEPA provides:

> **Foreign pensions**
> (1) This section applies to any pension[2] paid by or on behalf of a person who is outside the UK to a person who is resident in the UK.
> (2) But this section does not apply to a pension if any provision of Chapters 5 to 14 of this Part applies to it.

I refer to this as **"a foreign pension"**.

Section 575 ITEPA provides:

> **Taxable pension income**
> (1) If section 573 applies, the taxable pension income for a tax year is the full amount of the pension income arising in the tax year, but subject to subsections (2) and (3). ...
> (3) That pension income is treated as relevant foreign income for the purposes of Chapters 2 and 3 of Part 8 of [ITTOIA] (relevant foreign income: remittance basis and deductions and reliefs).

The significance of treating the income as RFI is that the income can qualify for the remittance basis.

An arising basis taxpayer is allowed a 10% deduction from foreign pensions: s.575(2) ITEPA provides:

> The full amount of the pension income arising in the tax year is to be calculated on the basis that the pension is 90% of its actual amount, unless as a result of subsection (3) the pension income is charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

This rule was introduced when the remittance basis on foreign pensions was abolished in 1974. It is difficult to see a good reason for it but presumably this was a political douceur to ease the abolition of the remittance basis, and which has survived ever since. This deduction does not apply to a remittance basis taxpayer whose pension is taxed on the remittance basis. One relief was thought to suffice; fair enough. The

2 See above fn.

individual may always choose to be taxed under an arising basis.

## 21.4 Canadian RRSP and RRIF

The HMRC view was set out in the former Inspectors Manual:

> **1622. Canadian RRSPs** Published: 9/95
> Canadian Registered Retirement Savings Plans (RRSPs) are tax-deferral vehicles commonly used by taxpayers working in Canada to provide an income or lump sum on retirement. The plan holder is permitted to set aside a certain proportion of his income (on which relief from Canadian tax is received) for investment either directly by the individual or, more usually, through a financial institution such as a bank or insurance company. On retirement or earlier, the taxpayer may withdraw a lump sum from the Plan or roll-over the proceeds into the purchase of an annuity. A lump sum withdrawal is subject to Canadian income tax, but if the proceeds are reinvested in an annuity, only the annuity is taxed.
> The tax consequences for a UK-resident holder of an RRSP are as follows:
> 1) income invested in the Plan is not eligible for UK tax relief;
> 2) the Plan is treated as 'fiscally transparent', that is income arising within the Plan is taxable in the UK as if the Plan did not exist, notwithstanding the tax-free accrual of income in Canada.
> 3) a lump sum withdrawal from the Plan is not taxable as such but the disposal of assets held within the Plan to effect the withdrawal may produce a UK tax charge. For example, a disposal of chargeable assets held within the Plan might produce a capital gains tax charge.
> 4) if an annuity is purchased the non-capital element will be taxable under Case V of Schedule D (see AP896 onwards). A purchased life annuity should be submitted to Financial Institutions Division 1 for determination of the proportion of the annuity which should be regarded as capital.
> 5) Canadian withholding tax at a rate of 25 per cent is deducted from withdrawals made by Plan holders who are not-resident in Canada. No tax credit relief is available in the UK for this tax where a tax charge arises in the UK (see (3) above), because the Canadian tax is imposed on a lump sum withdrawal from the Plan, whereas UK tax is imposed on gains resulting from the disposal of assets held within the Plan.
> 6) under Canadian domestic law, tax at 10 per cent may be withheld from payments of annuities derived from RRSPs, but it is understood that the Canadian tax authorities take the view that where such annuities are paid to UK-residents they will be exempt from Canadian tax under Article 17(1) of the Canada/UK Double Taxation Convention. If a taxpayer claims credit for Canadian tax paid on an annuity he should be advised to seek repayment from Revenue Canada and credit relief will not be allowable in the UK.
>
> **1623. Canadian RRIFs** Published: 9/95
> When an RRSP (see IM1622) matures, the Plan holder may, as an alternative

to withdrawing the funds or buying an annuity, use the property held within the Plan to establish a Registered Retirement Income Fund (RRIF).
An essential feature of an RRIF is that a minimum amount, arrived at by dividing the fair market value of the property held within the Fund at the beginning of the year by the difference between 90 and the age of the Fund holder at the beginning of the year, must be paid out to the investor each year. In this way, cash benefits are provided each year up to age 90. If, in any particular year, additional funds are required, these may be withdrawn, so long as the total does not exceed the value of the property held in connection with the Fund immediately before the withdrawal.
Income arising within an RRIF is tax-free in Canada, but there is a Canadian tax charge on withdrawals from the Fund.
For UK tax purposes, the treatment of RRIFs follows that for RRSPs indicated at IM1622(2), (3) and (5). It is understood that Revenue Canada regards the payments made each year as pension income and treats them as exempt from Canadian tax where paid to a UK-resident, under Article 17(1) of the UK/Canada Double Taxation Convention. The Canadian concept of 'periodic pension income' has no relevance, however, in the UK, where it is the income earned by the Fund's investments which is taxable, while withdrawals do not themselves attract a UK tax charge.

## 21.5 US IRAN

The Inspectors Manual also dealt with US IRANs:

**1625. United States Individual Retirement Annuities** Published: 9/95
Under Individual Retirement Annuities (IRANs), contributions are used to purchase an annuity from a life assurance company. No UK tax liability arises until the annuity becomes payable, when the annuity payments become chargeable under Case V of Schedule D.
If an IRAN life annuity was paid for partly or wholly by an employer, the whole of each annuity payment will be taxed as income, but if there was no employer's contribution the provisions of ICTA, s 656 apply so as to exclude the capital element. Any annuity within ICTA, s 656 should be submitted to Business Tax (Technical) for determination of the capital element.

## 21.6 US Pensions and IRAs

The DTR Manual provides:

**19876. Pensions: US Social Security Act**
...Article 17(3) now specifically provides for exclusive residence-country taxation of social security benefits. Like the old Agreement it provides that payments made by one of the Contracting States under the provisions of its social security or similar legislation to a resident of the other Contracting State will be taxable only in the other Contracting State. The result is precisely the

same as in the old Agreement.

Pensions paid by the United States government to former members of the US armed forces (or to their surviving spouses or dependent children) in respect of their period of service continue to regarded as paid for services rendered to the United States. Such pensions therefore come within Article 19 (Government Service) of the agreement and are exempt from United Kingdom tax unless, exceptionally, the recipient is both a national and a resident of the United Kingdom in which case the pension is taxable only in the United Kingdom

**19876A. Pensions from 2003[October 2007]**

Article 17 in the new Agreement is a fairly standard pensions article, which provides for the taxation of pensions and other similar remuneration only in the state of residence of the beneficial owner. But there are two provisions that have generated particular interest. The new Agreement applies from 1st January 2004 for US taxes and 6th April 2003 for UK Income Tax.

Paragraph 1(a) sets out the general rule above. For this purpose, a payment is treated as a pension or other similar remuneration if it is a payment under a pension scheme, as defined at Article 3(1)(o).

***IRAs***

However, the residence state, under paragraph 1(b), must exempt from tax any amount of such pensions or other similar remuneration that would be exempt from tax in the State in which the pension scheme is established if the recipient were a resident of that State. Thus, for example, a distribution from a US "IRA" to a UK resident will be exempt from tax in the UK to the same extent the distribution would be exempt from tax in the US.

An IRA is a trust (or similar arrangement known as a custodial account) set up for the exclusive benefit of the taxpayer and, on his death, nominated beneficiaries, which satisfies certain conditions imposed by United States tax law. Contributions to an IRA are tax deductible in the United States and the funds can be invested in a wide range of investments. IRA funds can be withdrawn at any time, but if withdrawals are made before the taxpayer reaches the age of 591/2 he must pay an additional penalty tax of 10% unless he is disabled.

...

***IRAs: Year 2003/04 et seq.***

... The new Agreement takes precedence and this will mean that no liability will arise until it would have done so under US tax law. Under US law, this will be when distributions are made. As indicated above, this will generally not be before age 591/2 but must be before age 701/2. The important point to note is that income will no longer be assessable in the UK on the basis of income arising within the IRA.. Any case of doubt or difficulty should be referred to HMRC, Customs & International, Tax Treaty Team.

***Lump Sums***

Under the old Agreement, a lump-sum payment from a pension scheme was taxable only in the country of residence. So if an individual moved from the US to the UK before receiving a lump sum from a US pension scheme, they would be taxable on the lump sum neither in the US (because of the treaty) nor in the UK (which does not tax lump sums anyway).

The new provision prevents this occurring by providing that a lump-sum payment derived by a resident of one State from a pension scheme established in the other State shall be taxable only in that other State.

The provision preserves the exemption from income tax of a lump sum relevant benefit where it is paid by a UK approved pension scheme to a beneficial owner who is a US resident. However, Article 1(4) will apply in respect of US citizens as the provisions of Article 17(2) are not amongst those listed at Article 1(5). So the US are able to tax lump sums received by US citizens from UK schemes.

**19876B. Pension Contribution**

The new Agreement which applies from 1st January 2004 for US taxes and 6th April 2003 for UK Income Tax contains an Article dealing with pension contributions. It also touches on the taxation of the income, profits and gains accruing to pension schemes.

The term "pension scheme" is defined for the purposes of the treaty at Article 3(1)(o). This means that Treaty benefits are for approved schemes only. As section 615 ICTA 1988 schemes, which are UK established trusts for non-residents, are not approved they do not come within the definition of "pension scheme" in Article 3(1)(o) because they are not "generally exempt from income taxation in that State". They are therefore not included in the list in the Exchange of Notes.

So called US section 401(k) plans are included within the definition of a pension scheme as they are within the definition of a pension scheme in Article 3(1)(o) because they are a type of section 401(a) plan.

It is a feature of several UK treaties from 2003 onwards that pension contributions made in one country are recognised for tax purposes in the other. The general premise of these is that if a member of a pension scheme established in one country goes to work (as an employee or in a self-employed capacity) in the other country, the state of residence will not tax the scheme member on income earned by the scheme unless it is paid to him (or for his benefit). Nor will tax be payable if income is transferred to another pension scheme until the benefits are actually received.

Under the new Agreement, contributions to the scheme by that member (or those paid on his behalf) will be tax-deductible in the state of residence. In the same way, benefits accrued under the scheme, or employer contributions to the scheme, will not be treated as part of his taxable income and those contributions will be tax-deductible for the employer. The reliefs available cannot exceed those allowed by the state of residence for contributions of the same amount to a scheme established in the state of residence.

The conditions for getting the relief are as follows

- contributions were made by or on behalf of the individual or (in the case of an employee) his employer to the pension scheme (or to a similar scheme for which it was substituted) before the individual began to exercise an employment or self-employment in the other contracting state, and
- the competent authority of the other State agrees that the pension scheme generally corresponds to a pension scheme established in that other State.

Where someone comes to work in the UK we will regard the first condition as

having been met if the individual was a member of the US scheme before beginning to exercise an employment or self-employment in the UK.
The types of scheme that would be accepted as "generally corresponding" are those listed in the Exchange of Notes.
Relief will be restricted where contributions to a pension scheme are deductible or excludable in computing a person's taxable income in the host country if he is subject to tax there not on his total income but only on amounts remitted to that country. Relief is available only on a corresponding proportion of the pension contributions.

*An example*

| | |
|---|---|
| Individual's total income, profits and gains | £100,000 |
| Income, profits and gains remitted to the UK | £90,000 |
| Individual's contributions to US pension scheme | £5,000 |

Contributions deductible in computing individual's UK taxable income - £4,500 (i.e. 90% of individual's total contributions).

CHAPTER TWENTY TWO

# DISCRETIONARY TRUSTS: INCOME TAX

## 22.1 Discretionary trusts – introduction

This chapter is concerned with the income taxation of discretionary trusts. The topic requires a book to itself. This chapter focuses on the matters closest to the theme of this work but it is necessary to review the general rules to understand these matters in their context.

In outline, there are three tiers of IT charges.

*Tier (1): Charge on trustees on the receipt of income.*

At this tier it is necessary to distinguish resident and non-resident trustees:

(a) UK resident trustees charged on all their income

(b) Non-resident trustees charged on UK source income only.

*Tier (2): Charge on trustees on making a discretionary income payment.*

At this tier it is also necessary to distinguish resident and non-resident trustees:

(a) UK resident trustees pay this charge.

(b) Non-resident trustees do not pay this charge.

*Tier (3): Charge on beneficiaries on receiving a discretionary income payment.*

At this tier it is necessary to distinguish resident and non-resident beneficiaries:

(a) UK resident beneficiaries: charge on all trust income

(b) Non-resident beneficiaries: charge on UK source trust income (ie UK resident trusts) only.

Two sets of tax credits (more or less) eliminate the triple taxation which would otherwise result.

(1) Tax paid at tier (1) enters a "tax pool" and is allowed as a credit for the tax at tier (2) so that no additional tax may be paid at that tier. I refer to this as **"the trustees tax pool credit"**.

(2) The tax at tier (2) is a credit for the tax at tier (3), and beneficiaries who are not top rate taxpayers or who are entitled to some reliefs may reclaim this tax. I refer to this as **"the beneficiary's tax credit"**.

Where the trustees tax pool credit fails to provide relief, there are further statutory and concessionary reliefs.

I use the term **"discretionary income payment"** to refer to a payment made from a trust to a beneficiary at the discretion of trustees, which is income (not capital) in the hands of the beneficiary. The statutory term is "discretionary payment" (it is assumed, though not expressly stated, that the payment has an income nature).

Section 462 ITA provides an overview of the layout of the legislation:

> (1) This Part [part 9 ITA] sets out special rules about settlements and trustees.
> (2) Chapter 2 contains general provision about settlements and trustees, for example, definitions of expressions relating to settlements.
> (3) Chapter 3 provides for income tax to be charged at the dividend trust rate or at the trust rate on certain amounts included in the net income of the trustees of a settlement.
> (4) Chapter 4 provides—
> (a) for expenses of the trustees of a settlement to be set against the trustees' trust rate income (see section 463(2)), and
> (b) consequentially, for the amount of the trust rate income to be reduced.
> (5) Chapter 5 qualifies section 479 (which is in Chapter 3) in the case of the trustees of an approved share incentive plan.
> (6) Chapter 6 provides that the first slice of the trust rate income of the trustees of a settlement is not to be charged at the dividend trust rate or at the trust rate.
> (7) Chapter 7 deals with the treatment of payments made by the trustees of a settlement in the exercise of a discretion ...

I do not consider trustees expenses (chapters 4 and 8), share incentive plans (chapter 5) or the relief for the first (small) slice of income (chapter 6). I do not consider the position of corporate beneficiaries.

In this chapter when I refer to a trust, I am referring to a discretionary trust, and assume that the trust is not settlor-interested (or if it is, that s.624 does not apply).

## 22.2 Tier 1: charge on trustees on receipt of income

There are special rules, primarily dealing with the rates of tax on trusts. However the charge on receipt of income arises under the usual charging provisions: there is no special charging provision for trusts. Accordingly:
(1) UK trustees are subject to tax on all their income
(2) Non-resident trustees are subject to tax on UK source income (except so far as non-residents income tax relief is available).
The trustees can qualify for the usual reliefs. Insofar as non-resident trustees qualify for reliefs, the position is straightforward, but if UK trustees qualify for (for instance) DT reliefs[1] this affects the tax pool credit system, which therefore has to be supplemented with further reliefs.

### 22.2.1 *Accumulated or discretionary income*

The TSE Manual provides a rough summary:

> **3015 Amount of trust income chargeable** [November 2008]
> Trustees are chargeable at the basic rate on trust income without any deduction for trust management expenses.
> Accumulation or discretionary trust
> If the trust is within Section 479 ITA, the trustees are liable to tax at the special trust rates. These are the dividend trust rate in respect of dividend type income and the trust rate in respect of other income. TSEM3020 explains which trusts are within Section 479 ITA.
> The amount of trust income chargeable at the special trust rates is the gross trust income, minus the total of:
> [a] income which before distribution ranks as the income, for tax purposes, of a person other than the trustees
> [b] for years to and including 2005-06 only income which is treated, for any purposes of the Taxes Act, as that of the settlor (from 6 April 2006 the exemption for settlor- interested settlements to the special trust rates no longer applies) and
> [c] allowable trust management expenses (TSEM8300+).

Section 479 ITA provides:

> (1) This section applies if—

1 See 22.12 (Are discretionary trusts "beneficial owners" for DTA purposes?)

> (a) accumulated or discretionary income arises to the trustees of a settlement, and
> (b) the income does not arise under a trust established for charitable purposes only.
> (2) Income tax is charged on the income at the rates referred to in this section instead of at the rates which would otherwise apply (for which see Chapter 2 of Part 2 (rates at which income tax is charged)).
> (3) Income tax is charged on the income at the dividend trust rate so far as the income is dividend income.
> (4) Otherwise, income tax is charged on the income at the trust rate.

The rates are the top income tax rates (the Blair/Brown administration disapproved of trusts). For 2011/12, s.9 ITA provides:

> (1) The trust rate is 50%.
> (2) The dividend trust rate is 42.5%.

The key term is "accumulated or discretionary income". Section 480 ITA provides:

> (1) Income is accumulated or discretionary income so far as—
> (a) it must be accumulated, or
> (b) it is payable at the discretion of the trustees or any other person,
> and it is not excluded by subsection (3).
> (2) The cases covered by subsection (1)(b) include cases where the trustees have, or any other person has, any discretion over one or more of the following matters—
> (a) whether, or the extent to which, the income is to be accumulated,
> (b) the persons to whom the income is to be paid, and
> (c) how much of the income is to be paid to any person.

This covers common form discretionary trusts.

### 22.2.2 *Exception for settlor-interested trusts*

Section 480 continues with 3 exceptions of which only the first is relevant here. Section 480(3) ITA provides:

> Income is excluded for the purposes of subsection (1) so far as—
> (a) before being distributed, it is the income of any person other than the trustees...

I would have thought that this applies to the income of settlor-interested trusts so far as s.624 ITTOIA applies, but HMRC do not agree: see TSE Manual quoted above at [b].

### 22.2.3 *Other income taxed at top rates*

Section 481 ITA provides:

> (1) This section applies if—
> (a) the trustees of a settlement are liable for income tax on an amount of a type set out in section 482,
> (b) the trustees are not trustees of a unit trust scheme, and
> (c) the amount is not income arising under a trust established for charitable purposes only.
> (2) Income tax is charged on the amount at one of the rates referred to in this section instead of at the rate which would otherwise apply (for which see Chapter 2 of Part 2 (rates at which income tax is charged)). This is subject to subsection (5).
> (3) If the amount is within Type 1 as set out in section 482, income tax is charged on the amount at the dividend trust rate.
> (4) Otherwise, income tax is charged on the amount at the trust rate.

This applies to all trusts, IP as well as discretionary, but it is convenient to deal with it here. Section 481 continues with 4 exceptions:

> (5) Income tax is not to be charged as mentioned in subsection (2) so far as the amount—
> (a) is accumulated or discretionary income,
> (b) would be accumulated or discretionary income apart from section 480(3)(a) or (c), or
> (c) is income from property within subsection (6).
> (6) Property is within this subsection if it is held for the purposes of a superannuation fund to which section 615(3) of ICTA (superannuation funds relating to undertakings outside the UK) applies.

Section 482 specifies 11 types of income, mostly fairly exotic categories, which constitute capital for trust purposes but income for tax purposes:

> The types of amount referred to in section 481 are as follows.
> *Type 1* A payment—

(a) which is made to the trustees or to which the trustees are entitled, and
(b) which is made by way of qualifying distribution by a company on the redemption, repayment or purchase of shares in the company or on the purchase of rights to acquire such shares.
*Type 2* Accrued income profits treated as made by the trustees under section 628(5) or 630(2).
*Type 3* Income treated as arising to the trustees under regulation 17 of the Offshore Funds (Tax) Regulations 2009.
*Type 4* Income which the trustees are treated as receiving under section 68(2) or 71(4) of FA 1989 (which relate to employee share ownership trusts).
*Type 5* A sum to which Chapter 4 of Part 3 of ITTOIA 2005 (which provides for certain amounts to be treated as receipts of a property business) applies.
*Type 6* A profit in relation to which the trustees are liable for income tax under section 429 of ITTOIA 2005 (profits from deeply discounted securities).
*Type 7* A gain in relation to which the trustees are liable for income tax under section 467 of ITTOIA 2005 (gains from contracts for life insurance etc), other than a gain to which subsection (7) of that section applies.
*Type 8* A profit or gain in relation to which the trustees are liable for income tax under section 554 of ITTOIA 2005 (transactions in deposits).
*Type 9* A profit or gain—
(a) in relation to which the trustees are liable for income tax under section 557 of ITTOIA 2005 (disposals of futures and options), and
(b) which does not meet any of conditions A to C in section 568 of ITTOIA 2005.
*Type 10* Proceeds in relation to which the trustees are liable for income tax under section 573 of ITTOIA 2005 (sales of foreign dividend coupons).
*Type 11* Income treated as arising to the trustees under Chapter 3 of Part 13 of this Act (tax avoidance: transactions in land).

## 22.3 Tier 3: Discretionary income payment: charge on beneficiary

Section 683(1) ITTOIA imposes the tax charge on discretionary income payments:

> Income tax is charged under this Chapter on annual payments that are not charged to income tax under or as a result of any other provision of this Act or any other Act. ...

"Annual payment" is an opaque label for a technical term whose meaning is discussed in a large and in parts difficult body of case law.[2] It is not necessary to discuss that here, as it is well established that income payments from discretionary trusts are annual payments and so are charged under this section.

### 22.3.1 *Beneficiary a remittance basis taxpayer*

Section 684 ITTOIA provides:

> (1) Tax is charged under this Chapter on the full amount of the annual payments arising in the tax year.
> (2) Subsection (1) is subject to Part 8 (foreign income: special rules).

This brings in the ITA remittance basis if the income payments have a foreign source.

### 22.3.2 *Non-resident beneficiary*

Section 577 ITTOIA provides the necessary exemption for non-residents:

> (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
> (2) Income arising to a non-UK resident is chargeable to tax under this Part only if it is from a source in the UK...

The wording is the same as the equivalent exemption for savings and investment income, in part 4 ITTOIA; for a discussion see 16.4 (Why does location of source matter?).

### 22.3.3 *Discretionary trust payment: what is the source?*

Where the trust is a common form discretionary trust and a beneficiary

---

2 Section 683(3) ITTOIA provides one statutory rule: "The frequency with which payments are made is ignored in determining whether they are annual payments for the purposes of this Chapter."
ITTOIA EN explains: Subsection (3) rewrites "or whether the same is received and payable half-yearly or at any shorter or more distant periods".

receives trust income in the exercise of the trustees' discretion, the trust is the source (not the underlying trust assets) and the beneficiary's income is categorised as annual payments (regardless of the type of income received by the trustees). See *Memec v IRC* 71 TC 77 at p.95:

> A discretionary trust ... is not transparent. No beneficiary is entitled unless and until the trustees exercise their discretion in his or her favour, and the trustees' exercise of discretion is regarded as ... creating a new source of income...[3]

HMRC agree. The TSE Manual provides:

> **3756. Individual beneficiary receives discretionary income payment from a resident trust: trust not settlor-interested** [February 2011]
> In the case of trusts or settlements that are not settor-interested a discretionary income payment is treated as an amount that is net of tax at the trust rate. The beneficiary's income is the net amount grossed at the trust rate applicable. It carries tax credit at that rate. It is available for relief or repayment.
> The gross amount is an annual payment. It is a new source of income, usually not identified with the underlying trust income. *Cunard's Trustees v CIR* (27 TC 122) supported the view that when the trustees exercised their discretion, a new source of income came into existence.

---

3 The same point was made in *IRC v Berrill* 55 TC 429 at p.444.
Robert Venables QC disagrees: Venables, "*Memec v IRC* and the Source of Discretionary Income Payments from Trusts" PTPR (1999) Vol. 7 p.87; *Non-Resident Trusts*, (8th ed 2000), 16.3 (Taxation of Beneficiary):

> "Where there are discretionary trusts of income ...and the trustees distribute income in the exercise of their discretion, the taxability of the recipient beneficiary is a matter of some controversy. My own opinion is that in exercising their discretion the trustees simply perfect the settlor's gift so that the position at the end of the day is the same as if the trust instrument had expressly provided that the beneficiary should receive the income. Thus, the income which the beneficiary receives is the same income as that which the trustees received, the beneficiary's source is the same as the trustees' source and any tax paid by the trustees is to be treated as having been paid on account of the beneficiary."

This was assumed to be correct in *Drummond v Collins* 6 TC 525 though the point was not directly considered. Before 1973 this view was (I think) generally held though the point was not formally decided. However the FA 1973, imposing the additional rate of tax (now chapter 7 part 9 ITA), clearly assumes that a discretionary trust is a separate source, and so provides a statutory basis (if needed) to support the view that discretionary trusts are not transparent.

…

If a discretionary trust becomes interest in possession in form, the trustees' discretion over income in principle comes to an end and the source has ceased: *IRC v Berrill* at p.444. But the cessation of a source is not now significant for tax purposes.

In *Memec*, Walker LJ also considers annuities:

> Similarly, the rights of an annuitant under a trust are regarded as a source of income distinct from that of the underlying trust investments.[4]

However annuities are not now found, so this is of academic interest only.

### 22.3.4 *Discretionary trust payment: location of source*

Where the trust is the source, how does one decide its location? There are (as usual) a variety of possible connecting factors, including: the residence of the trustees, the country in whose courts the trust will be enforced, the place where the discretion is exercised. It is suggested that trustee residence is the deciding factor, and this is consistent with s.493(1)(b) ITA. Normally all these factors will point the same way so the issue will not arise.

### 22.3.5 *Time income arises*

The TSE Manual provides:

> **3759. Beneficiary receives discretionary payment from a resident trust: when payment made** [November 2008]
> For tax purposes the beneficiary receives a payment on
> • The date the trustees made the payment or
> • The date the beneficiary became legally entitled to require the trustees to pay over the income. This could be when the payment indefeasibly vested, following the trustees' resolution.
> Tax cases: *Cunard's Trustees v CIR* 27 TC 122

4 See too *R v Special Comrs ex p. Shaftesbury Homes & Arethusa Training Ship* 8 TC 367; *Inchyra v Jennings* 42 TC 388.

### 22.3.6 *Entering discretionary trust income in beneficiary's tax return*

HMRC Helpsheet 262 (2010/11) provides:

> If you have received a discretionary payment from the non-UK resident trust, enter all of the income in box 41 unless the situation mentioned in the next paragraph applies. ...
> If part or all of the income distribution has already been charged to tax in the UK on the settlor of the trust, see page TN 1 of the Trusts etc. notes. Instead of entering the amount so charged in box 41 include it in the Trusts etc. pages in box 2. Tax equivalent to 40% of this sum is allowable as a non-payable tax credit. If you are the settlor and already chargeable on the income arising to the trustees, there is no need to include in box 41 or box 2 on the Trusts etc. pages any discretionary payments made to you by the trustees. The amount to be entered either in box 41 or in box 2 of the Trusts etc. pages should take account of the effects of your residence/domicile status.

## 22.4 Beneficiaries tax credit

### 22.4.1 *UK resident trusts*

The tax credit is in s.494 ITA, which is introduced by s.493 ITA:

> (1) Sections 494 and 495 apply for income tax purposes if—
> (a) in a tax year the trustees of a settlement make an annual payment to a person ('the beneficiary') in the exercise of a discretion (whether exercisable by the trustees or any other person),
> (b) the trustees are UK resident for the tax year, and
> (c) condition A or condition B is met.

The usual case is condition A. Section 493(2) ITA provides:

> Condition A is that what is paid to the beneficiary is, only because of the payment, income of the beneficiary for income tax or corporation tax purposes. 'Income' does not include employment income.

Condition B relates to payments to minor children of the settlor,[5] a topic not considered here.

Section 494 ITA provides the beneficiaries tax credit and grossing up. Grossing up comes first:

> (1) The discretionary payment is treated as if it were made after the deduction of a sum representing income tax at the trust rate on the grossed up amount of the discretionary payment.
> (2) The grossed up amount of the discretionary payment is the actual amount of the discretionary payment grossed up by reference to the trust rate.

Then the beneficiaries tax credit:

> (3) The person mentioned in subsection (4) is treated as having paid income tax of an amount equal to the sum deducted as mentioned in subsection (1).
> (4) That person is—
> (a) if condition A in section 493 is met, the beneficiary, and
> (b) if condition B in section 493 is met, the settlor.

Condition B (payments to minor children of the settlor) is not considered here.

### 22.4.2 *Non-resident trusts*

The beneficiary's tax credit (along with the tier 2 charge on trustees) only apply if the trustees are UK resident: s.493(1)(b) ITA.

EN ITA Change 89 provides:

> This change makes it explicit that the Chapter dealing with the taxation of discretionary payments by trustees applies only to payments made and tax suffered while the trustees are UK resident.
> Section 687 of ICTA contains rules regarding the liabilities of the trustees and the beneficiary when the trustees make a payment to a

5 Section 494(3) ITA provides: "Condition B is that the payment is treated for income tax purposes as the income of a settlor under section 629 of ITTOIA 2005 (income paid to relevant children of settlor)."

beneficiary in the exercise of a discretion. The rules can only operate sensibly where the payment is chargeable on the beneficiary as an annual payment under Chapter 7 of Part 5 of ITTOIA and it is well established that those provisions only apply where the payment arises in the UK.

The question can arise as to whether that test is satisfied in cases where UK resident trustees exercise discretion abroad or non-UK resident trustees exercise discretion in the UK. The approach adopted in practice is that section 687 of ICTA applies only to payments by UK resident trustees. Accordingly, section 493 contains the condition that it only applies to UK resident trustees. It follows that where a payment is made by non-UK resident trustees:

- the payment does not carry any tax credit in the hands of the beneficiary; and
- the trustees are not liable for any tax in respect of the payment.

As a corollary to the provisions of section 687 of ICTA not applying to non-UK resident trustees, tax only enters the trustees' tax pool if it is tax suffered on income arising while the trustees are UK resident - see section 497.

This change does not affect the operation of ESC B18, which enables UK resident beneficiaries who receive discretionary payments to have a credit for the tax paid by non-UK resident trustees on UK source income.

## 22.5 Tier 2: Charge on trustees making discretionary income payment

Section 496 ITA provides the charge on trustees:

(1) Income tax is charged for a tax year if—

(a) in the tax year the trustees of a settlement make payments as a result of which income tax is treated as having been paid under section 494, and

(b) amount A is greater than amount B.

(2) Amount A is the total amount of the income tax treated under section 494 as having been paid.

(3) Amount B is the amount of the trustees' tax pool available for the tax year (see section 497).

(4) The amount of the tax charged under this section is equal to the difference between amounts A and B.

(5) The trustees are liable for the tax.

## 22.6 Trustees tax pool credit

Section 497(1) ITA deals with the trustees' tax pool:

> Take the following steps to calculate the amount of the trustees' tax pool available for a tax year ('the current tax year').
> This is subject to subsections (2) and (3).
> *Step 1* Take the amount of the trustees' tax pool available for the previous tax year and deduct from that amount (but not so that it goes below nil)—
> (a) the total amount of income tax treated under section 494 as having been paid as a result of payments made by the trustees in the previous tax year, and
> (b) the amount to which the trustees are entitled under section 496B in respect of the previous tax year.
> *Step 2* Add together all amounts of income tax for which the trustees are liable for the current tax year and which are of a type set out in section 498.
> *Step 3* Add the sum calculated at Step 2 to the amount resulting from Step 1.

Section 497(2)(3) ITA deal with the special cases of immigrant trusts and new trusts:

> (2) If the trustees were non-UK resident for the previous tax year, references in subsection (1) to the previous tax year are to be read as references to the last tax year prior to the current tax year for which the trustees were UK resident.
> (3) If—
> (a) the current tax year is the tax year during which the settlement is established, or
> (b) the trustees have been UK resident for no tax year prior to the current tax year,
> ignore Steps 1 and 3 and, accordingly, the trustees' tax pool available for the current tax year is the sum calculated at Step 2.

Section 498 ITA provides the list of types of income which qualify fall within the tax pool. It is in short all the tax paid by the trustees. In full detail:

(1) The types of amount referred to at Step 2 in section 497 are as follows.
*Type 1* The amount of any tax on income (other than income of a kind mentioned below in relation to Type 2, 3 or 3A) charged at the dividend trust rate or at the trust rate.
*Type 2* The amount of tax at the nominal rate on any income which is—
(a) chargeable under Chapter 3 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies),
(b) chargeable under Chapter 5 of that Part (stock dividends from UK resident companies), or
(c) chargeable under Chapter 6 of that Part (release of loan to participator in close company),
and on which tax is charged at the dividend trust rate as a result of section 479.
*Type 3* The amount of tax at the nominal rate on any income on which tax is charged at the dividend trust rate as a result of section 481.
*Type 3A* The amount of tax at the nominal rate on any amount in respect of which—
(a) the trustees are liable to income tax under section 467 of ITTOIA 2005 (gains from contracts for life insurance etc),
(b) the trustees are liable to income tax at the trust rate by virtue of section 482 above, and
(c) tax at the basic rate is treated as having been paid by virtue of section 530 of ITTOIA 2005 (life insurance).
*Type 4* The amount of any tax on income on which tax is charged at the basic rate …2 as a result of section 491.
*Type 5* The amount of tax on any income determined in accordance with section 26 of FA 2005 (special tax treatment for trusts for the benefit of vulnerable persons).
(2) In relation to Types 2 and 3, references to the nominal rate are references to a rate equal to the difference between the dividend trust rate and the dividend ordinary rate.
(2A) In relation to Type 3A, the reference to the nominal rate is a reference to a rate equal to the difference between the trust rate and the basic rate.
(3) In relation to Types 1 to 4, references to income do not include income the tax on which is reduced in accordance with section 26 of FA 2005.

## 22.6.1 *Effect of trustees DTA relief on tax pool*

The TSE manual provides:

**3670 Discretionary trust** [March 2009]
These instructions apply to taxed overseas income received by a discretionary or accumulation trust. The trustees can claim double taxation relief in respect of overseas tax that qualifies for relief. The trustee's marginal rate is the rate applicable to trusts, or where it applies, the dividend trust rate. INTM367780+ onwards has instructions about calculating relief.
A paying agent may have allowed provisional tax credit relief on overseas income. The computation of double taxation relief must reflect this.
Tax pool
The Section 687 ICTA 1988 tax pool must contain only UK tax paid or suffered by deduction. It must not include UK tax covered by credit for overseas tax.
Section 687(3)(a) ICTA 1988 effectively withdraws the double taxation relief when the trustees make a discretionary payment to a beneficiary.

### 22.6.2 *Transitional rule for pre-2008 income*

ITA 2007 Sch 2 para 104 provides:

(1) Section 497 applies with the following modifications in relation to the trustees of a settlement established prior to the tax year 2007–08 if the current tax year is the tax year 2007–08.
(2) It also so applies if—
(a) the current tax year is a tax year subsequent to the tax year 2007–08, and
(b) the trustees have been UK resident for no tax year prior to the current tax year or the last tax year prior to the current tax year for which they were UK resident is a tax year prior to the tax year 2007–08.
(3) It applies as if in subsection (1) for Step 1 there were substituted—
'Step 1
Take the amount of the trustees' final section 687(3) tax pool and deduct from that amount (but not so that it goes below nil) the total of all tax (if any) treated under section 687(2)(a) of ICTA as being paid as a result of payments made by the trustees in the tax year 2006–07.
'The amount of the trustees' final section 687(3) tax pool' is the total amount—
(a) available to the trustees under section 687(3) of ICTA for setting against tax assessable on them under section 687(2)(b) of that Act for the tax year 2006–07, or

(b) which would have been so available had tax been so assessable.'
(4) It applies as if subsections (2) and (3) were omitted.

## 22.7 HMRC example

The TSE Manual provides an example:

**3024B. The tax pool - trustees calculate maximum discretionary payment** [August 2010]
In this example, in the tax year 2010-2011 a trustee of a discretionary trust receives a net dividend of £1,350 (tax credit £150. The trustee is chargeable at 42.5%, which is partly covered by the 10% non-payable tax credit.

| **Description** | **Amount** | **Amount** | **Amount** |
|---|---|---|---|
| Dividend received | £1,350 | | |
| Plus non-payable tax credit | £150 | | |
| Gross income | £1,500 | | |
| Tax at 10% on first £1,000 (standard rate band) | | £100 | |
| Tax at 42.5% on the remainder (£500×42.5% | | £212.50 | |
| Total tax | | £312.50 | |
| Less non-payable tax credit | | (£150) | |
| Tax payable by trustee - goes into tax pool | | £162.50 | |
| Net income after tax | | | £1187.50 |

The trustee now has net income of £1,187.50 (net dividend of £1,350 less tax paid of £162.50). Only £162.50 of the total tax goes into the tax pool because the £150 dividend tax credit is not payable.
If the trustee pays the net income of £1,187.50 to the beneficiary, the tax credit of 50% on that net payment is £1,187.50 (gross amount of £2,375 at 50%). But if the tax pool has nothing brought forward from the previous year and there is no other income on which tax has been paid, the tax pool of £162.50 will not cover the tax credit of £1,187.50 on the payment made. Under Section 496 the trustee would have to pay £1,187.50 less £162.50 = £1,025, bur there are no funds available.
Instead, the trustees can calculate the maximum amount of discretionary payment as follows:-

| Description | Amount | Amount |
|---|---|---|
| Net income after tax | £1,187.50 | |
| Add tax in tax pool | £162.50 | |
| Total amount to cover payment to beneficiary & tax credit at 50% | £1,350.00 | |
| Tax credit at 50% | £675.00 | £675.00 |
| Less tax paid in tax pool | | £162.50 |
| Additional tax to be paid by trustee | | £512.50 |
| Net payment to beneficiary | £675.00 | |

The beneficiary is paid net income of £675 with a tax credit of £675, which is equivalent to gross income of £1,350 with tax credit at 50%. The trustee pays a total of £675 tax to HMRC, £162.50 tax on the dividend received and the additional £512.50 under Section 496. So if the trustee is relying on the dividend income to fund both the payment to the beneficiary and the additional tax there are sufficient funds to release only 50% of the actual dividend, that is £1,350×50% = £675.

HMRC also offer an online tax pool calculator to do the computations, in simple cases: *www.hmrc.gov.uk/tools/trusts/calculator.htm*.

## 22.8 Payment from discretionary trust: income or capital?

The question whether a trust distribution is an "annual payment" (ie, income) or not (ie, capital) matters for many purposes. In particular:

(1) The IT charge on a beneficiary receiving the distribution (tier 3) only applies if the distribution is income.
(2) The IT charge on trustees making the distribution (tier 2) only applies if the distribution is income.
(3) Section 87 and section 731 only apply if the distribution is capital.

The position depends on the terms of the power under which the payment is made.

### 22.8.1 *Power over income*

A common form discretionary trust[6] provides this type of power over trust income:

6 For a discussion of the drafting, see Kessler & Sartin, *Drafting Trusts & Will Trusts* (10th ed., 2010), Chap 15 (Discretionary Trusts).

> The Trustees may pay or apply the trust income to or for the benefit of any Beneficiaries, as the Trustees think fit.

If trustees receive income and make a payment under such a power, the receipt is income and not capital. This has never been doubted.

### 22.8.2 *Power over capital*

A common form discretionary trust also provides this type of power over trust capital:

> The Trustees may pay or apply the capital of the Trust Fund to or for the advancement or benefit of any Beneficiary.

If trustees make a payment under such a power the receipt is capital and not income. This is still the case even if:
(1) the payments are made to satisfy an "income purpose", eg maintenance of a beneficiary; and
(2) the payments are recurrent (eg annual or even monthly).
This follows from *Stevenson v Wishart*.[7]

### 22.8.3 *Accumulated income paid out as income*

A common form discretionary trust allows trustees to accumulate income, and add it to trust capital. However, trustees usually have power "to apply the accumulations as if they were income arising in the then current year". If trustees make a payment out of trust capital under such a power the receipt is an income receipt of the beneficiary. The important point is that the terms of the relevant provision of the settlement link the payment with an income interest of a beneficiary. See the comment of Knox J in *Stevenson v Wishart* 59 TC 740 at 757D.

It might perhaps be clearer if the trust accounts recorded an

7 59 TC 740. The judgment of Knox J is clearer on this point than the Court of Appeal; this view is adopted in *Pierce v Wood* [2010] WTLR 253 at [29] "An appointment or advance of trust capital, in exercise of a power over capital, even if it were to meet an income need of the beneficiary, is normally a capital receipt in the beneficiary's hands."

"Accumulated Income Fund" (instead of recording accumulated income as increasing the capital fund). However, this is not necessary.

### 22.8.4 *Accumulated income paid out as capital*

Suppose, lastly:

(1) trustees accumulate income and add it to capital; and

(2) the trustees pay that capital to a beneficiary in exercise of a power like that in para 22.8.2 (Power over capital).

The receipt is still capital and not income. This follows from *Stevenson v Wishart.* In that case the distributions which HMRC sought to tax as income represented original trust capital and not accumulated income. It is considered that this makes no difference. *Stevenson v Wishart* is authority for the proposition that the income/capital question is governed by the terms of the power concerned.[8]

It might be different in an extreme case, where for tax planning reasons there was an arrangement under which:

(1) income was accumulated;

(2) the trustees pay that capital to a beneficiary (by exercise of a common form power of advancement or appointment) shortly afterwards.

HMRC would have an attractive argument that the receipt should be regarded as income under general principles (or under the rule in *Furniss v Dawson* but it would not be necessary to fall back on that).

In practice it should be possible to avoid this by ensuring that advances of capital are not neatly identifiable with accumulated income.

### 22.8.5 *HMRC view*

HMRC agree with the views set out above. The TSE Manual provides:

> **3758. Discretionary payment from trust capital** [January 2008]
> A discretionary payment made out of trust capital, including a payment out of accumulated income or out of a capital receipt that is deemed to be income for tax purposes, is usually not regarded as the income of the beneficiary. This view was supported in the case of *Stevenson v Wishart*

8 Provisions such as ss.631(1)(2) and 633 ITTOIA assume this is correct (deeming payments out of accumulated income to be treated as income).

> (59 TC 740).[9]

The same point is made in the HMRC Trust & Estate Tax Return Guide (form SA950) for the year ended 5 April 2010:

> **boxes 14.1 to 14.14**
> Payments out of trust income are always the income of the beneficiaries. Payments out of trust capital or accumulated income are not to be regarded as the income of a beneficiary irrespective of the purposes for which they are made and should not therefore be included.
> If, exceptionally, the terms of the trust empower the trustees to release monies in order to bring up a beneficiary's income to a certain defined level the total amount of the monies released should be included even if part of it represents capital or accumulated income.

## 22.9 Discretionary trusts treated as transparent to allow beneficiary reliefs

In some cases discretionary trusts are treated as transparent in order to confer some relief.

### 22.9.1 *DT relief for UK resident discretionary trust*

Section 111 TIOPA provides:

> **When payment to beneficiary treated as arising from foreign source**
> (1) Subsection (6) applies if each of conditions A to D is met.
> (2) Condition A is that a payment is made by trustees of a settlement.
> (3) Condition B is that income tax is treated under section 494 of ITA 2007 (treatment of discretionary payments by trustees) as having been paid in relation to the payment.

---

9 For completeness: the Manual continues:
"Exceptionally, payments out of capital are treated as the income of the beneficiary where, by the terms of the trust instrument, payments out of capital are required to be made, or may be made, in order to supplement income. For example, the trustees may or have to make income up to a fixed amount or a certain defined level as in *Cunard's Trustees v CIR* (27 TC 122)"
This is correct but academic since trusts are not nowadays drafted in those terms.

This restricts the relief to UK resident trusts.[10]

> (4) Condition C is that the income arising under the settlement includes taxed overseas income.[11]
> (5) Condition D is that the trustees certify—
> (a) that the payment is one made out of income consisting of, or including, taxed overseas income of an amount, and from a source, stated in the certificate, and
> (b) that that amount of taxed overseas income arose to the trustees not earlier than 6 years before the end of the tax year in which the payment is made.

Where these conditions are satisfied, s.111(6) TIOPA provides the relief:

> The person to whom the payment is made may claim that the payment, up to the certified amount, is to be treated for the purposes of this Part [Part 2 TIOPA headed Double Taxation Relief] as income received by the person—
> (a) from the certified source, and
> (b) in the tax year in which the payment is made.

The TSE Manual provides:

> **3675. Relief for overseas tax: expenses of discretionary trust**
> If trustees are claiming relief for overseas tax they will usually regard expenses as paid out of UK income. This means they can certify the overseas income to the beneficiaries under s.809 ICTA (TSEM3680).
> They may sometimes regard expenses as paid from overseas income. This could be because there is not sufficient UK income to cover the expenses. Or maybe certification is not advantageous to the beneficiary. Trustees cannot certify, under s.809, the overseas income they set against the expenses.
> **3680. Trustee's certificate of overseas taxed income**
> The income of a discretionary or accumulation trust may include overseas taxed income. The trustees can certify that discretionary payments they made to beneficiaries included income from the taxed

---

10 See 22.4 (Beneficiaries tax credit).

11 This term is defined in s.111(7) TIOPA: "In this section "taxed overseas income", in relation to a settlement, means income in respect of which the trustees are entitled to credit under this Part for tax under the law of a territory outside the UK."

overseas sources. The certificate must state how much of the payment refers to the overseas income. Trustees issue the certificates under the provisions of s.809(1)(b) ICTA. There is no prescribed wording for the certificate.

Limits of the amounts certified

The trustees must ensure that:

- the amounts they certify do not exceed the gross equivalent of the payments they made
- the gross amounts they certify do not exceed, in the aggregate, the gross income they received.

Trustees can accumulate, for future certification, overseas income that they have not paid out. Income ceases to be available for certification six years after the start of the tax year in which it arose.

**3685. Relief for overseas tax: mixed trust**

A mixed trust has both a discretionary interest and an interest in possession.

The trustees may claim double taxation relief in respect of overseas tax that qualifies for relief. The instructions at TSEM3655 apply to income that the beneficiary is entitled to receive. The instructions at TSEM3670 apply to the balance of the income.

### 22.9.2 *Concessionary relief for UK resident trust*

ESC B18 provides:

**UK resident trusts**

A beneficiary may receive from trustees a payment to which [what is now s.494(1) ITA] applies.[12] Where that payment is made out of the income of the trustees in respect of which, had it been received directly, the beneficiary would—

[1] have been entitled to exemption in respect of FOTRA securities issued in accordance with [what is now s.714 ITTOIA]; or

[2] have been entitled to relief under the terms of a double taxation agreement; or

[3] not have been chargeable to UK tax because of their not resident and/or not ordinarily resident status

the beneficiary may claim that exemption or relief or, where the beneficiary would not have been chargeable, repayment of the tax

12 This reference restricts the relief to UK resident trusts. See 22.4 (Beneficiaries tax credit).

treated as deducted from the payment (or an appropriate proportion of it).

For this purpose, the payment will be treated as having been made rateably out of all sources of income arising to the trustees on a last in first out basis.

There are three distinct classes of reliefs here:

(1) Relief for interest on FOTRA securities (beneficiary not ordinarily resident)
(2) DTA relief (beneficiary treaty-resident outside the UK)[13]
(3) Exemptions for non-resident beneficiary

ESC B18 goes on to specify the conditions for the relief:

> Relief or exemption, as appropriate, will be granted to the extent that the payment is out of income which arose to the trustees not earlier than six years before the end of the year of assessment in which the payment was made, provided the trustees—
> [1] have made trust returns giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required, and
> [2] have paid all tax due, and any interest, surcharges and penalties arising; and
> [3] keep available for inspection any relevant tax certificates.
> Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.

The INT Manual expands on B18 and provides a worked example. The Manual is not up to date, and in example tax rates are those before the increase to the 50% rate in 2010/11; I omit text referring to the position before 2004.

> **367790. What methods of relief are available on discretionary payments from UK resident trustees** [April 2004]
> The way in which relief is calculated will depend on the terms of the treaty under which relief is claimed.
> - Under an "other income" article which does not exclude payments from trusts, relief is given in full....

---

13 But s.111 TIOPA covers this.

- Where there is no other income article or the article excludes trust income, relief is given by "looking through" to the underlying sources of the income. The way in which we "look through" is determined by Extra Statutory Concession (ESC) B18
- Because payments are made at the discretion of trustees, it is not possible to allow relief at source to a beneficiary of a discretionary trust.

...

**367820. Extra Statutory Concession B18** [March 2007]

Under ESC/B18, income underlying a discretionary payment is treated as arising from the sources of income received by the trustees in the tax year that the payment is made. Income is considered as arising rateably from the sources of income. By rateably we mean the beneficiary's payment contains the same proportion of each strand of income as the total received by the trustees.

If there is not enough income arising in the year the payment is made to fund all of the payments made by the trustees (that is, if the trustees are drawing on accumulations – that is, income received by trustees in excess of payments out of trust income – made in previous years) we need to apply the proportions of trustees' income from the year(s) in which the accumulations were made. This is known as "spreading back" (see INTM367910).

**367830. ESC/B18 and dividends taxed at the dividend trust rate** [March 2007]

When the Schedule F trust rate (now the dividend trust rate) was introduced in 1999/2000 at 25%, the wording of ESC/B18 was revised to exclude the element of tax credit included in that tax. For example, where trustees receive a dividend of £90, with a tax credit of £10, their liability is £15 (that is, £25 less £10 tax credit). However, when applying a beneficiary's share of dividends to a dividend article of a treaty, the tax credit is excluded from the calculation. Therefore for the purposes of ESC/B18, the 'gross' to which the restriction in the dividend article is applied is £90, the tax £15, and the net £75.

A dividend article with a 15% restriction would apply to the dividend element underlying a beneficiary's distribution as follows:

- Restriction: £90 × 15% = £13.50
- Tax £15 less restriction £13.50 = £1.50

**367840. ESC/B18 and trustees' tax returns** [March 2007]

It is a condition of ESC/B18 that in order to allow a beneficiary's claim to repayment, the trustees must have made their tax return for the year of the distribution, and paid over any tax due to HMRC.

It is therefore possible that a beneficiary's claim form can be received before the conditions of ESC/B18 are satisfied.

**367850. ESC/B18 and Self Assessment** [April 2004]

As the conditions for relief under ESC/B18 include actions by trustees, we do not consider a claim as being valid until these actions have been carried out. We cannot accept that the beneficiary has made a valid claim until the trustees have met the conditions set out in ESC/B18.

In practical terms this means that a beneficiary's claim is not valid until the trustees have sent in their tax return for the year in which the distribution was made and paid any tax due.

**367860. Dealing with claims by non-resident beneficiaries of UK discretionary trusts under ESC/B18** [March 2007]

***How to identify a repayment claim***

The claim will usually be supported by a tax certificate on form R185, or an equivalent certificate prepared by the payer, showing tax deducted from the payment at 40%...

If the tax certificate is missing, the schedule will show that tax on the income is at 40% ...

Exceptionally, you may receive a claim on a payment from a UK discretionary trust where tax is not shown as having been paid at the Rate Applicable to Trusts (see INTM367950).

***Procedure***

You will need to request the trust file (the UTR for this should be quoted on the tax certificate) together with the trustees' tax return for the year of the distribution and all earlier years in date for time limit purposes during the year of distribution (you will need these if a 'spreadback' calculation is necessary).

You will need to advise the claimant or their agent that you have requested information from the trust's tax office to enable you to deal with the claim.

**367870. Calculating relief due under ESC/B18** [July 2005]

When the trust file is received the information concerning trust income and distributions provided by the trustees in their returns is extracted and used to calculate the relief due to the beneficiary.

Due to the complexity of the calculations, a computer program is used to apportion the trust income to the beneficiary's share.

(This text has been withheld because of exemptions in the Freedom of Information Act 2000)

If necessary a calculation can be made manually (INTM367890).

**367880. How to manually calculate relief due under ESC/B18** [March 2007]

Although the apportionment of the income will normally be performed using a computer program, if necessary the calculation can be performed manually, as follows:

1. Deduct any expenses and other obligations, for example Trust Management Expenses (see INTM367920) and annuities (see INTM367770), from the income received by the trustees.
2. For each income source (after deductions at 1 above) calculate the net amount available for distribution, that is the amount after deduction of tax at the rate applicable to trusts or the dividend trust rate as appropriate.
3. Calculate the total net distribution made to the discretionary beneficiaries.
4. Check that the total net distribution made to the discretionary beneficiaries is less than (or equal to) the total net available for distribution. If it is greater than the total net available for distribution, you will need to apply a 'spreadback' calculation (see INTM367910).
5. Allocate the net amount of each source of income arising to the trustees to the beneficiary's net distribution, by the following formula (each source of income must be treated separately because of the different tax rates to which the trust income is subjected):

(a ÷ b) × c =beneficiary's share of income source, where

- a = net income from source
- b = total income available to distribute
- c = beneficiary's net distribution

6. Calculate the beneficiary's gross share of each income source by reference to ESC/B18. For UK dividends the calculation for 2004–05 onwards is

(a ÷ 67.5) × 90 = beneficiary's gross share of dividends for the purposes of ESC/B18, where

- a = beneficiary's share of dividends

...

For other income (including foreign dividends) the calculation for 2004–05 onwards is

(a ÷ 60) × 100 = beneficiary's gross share of dividends for the purposes of ESC/B18, where

- a = beneficiary's share of income

...

7. Calculate the tax applying to each income source under ESC/B18 by deducting the net (calculated at 4) from the gross (calculated at 5).

8. Calculate the repayment due by reference to the relevant treaty articles, and/or UK legislation allowing relief to non-residents. Where repayment is restricted under a double taxation agreement, calculate the amount to restrict as a percentage of the ESC/B18 gross (calculated at 5) and deduct it from the tax (calculated at 6).

**367890. T applications and claims: Non-resident beneficiaries of UK trusts**
[March 2007]

***Example of a manual calculation under ESC/B18***

In the tax year 2004–2005 a trust had income from the sources shown below (gross except for dividends paid). The trustees made net distributions of £1000 each to one beneficiary in Canada (who has made a claim to us) and to one beneficiary in the UK. [Trust income is:]

- UK dividends paid £1292
- UK interest £1000
- Rents £500
- Foreign dividends £880
- Foreign interest £1000

Trustees net management expenses were £500

First, deduct trust management expenses from dividends: 1292 less 500 = 792

Then calculate income available for distribution:

| | |
|---|---|
| Dividends | 792 |
| plus (tax credit at one ninth of the dividend) | 88 |
| less (dividend trust rate 25%) | (220) |
| | 660 |

| | |
|---|---|
| Interest | 1000 |
| less (tax at rate applicable to trusts 34%) | (340) |
| | 660 |

| | |
|---|---|
| Rents | 500 |
| less (tax at rate applicable to trusts 34%) | (170) |
| | 330 |

| | |
|---|---|
| Foreign dividends | 880 |
| less (tax at dividend trust rate 25%) | (220) |
| | 660 |

| | |
|---|---|
| Foreign interest | 1000 |
| less (tax at rate applicable to trusts 34%) | (340) |
| | 660 |

Total available for distribution: 2970

Distribution: (2 × 1000) = 2000; this is less than the total available for distribution, so no spreadback required

Allocation to beneficiary:

Dividends: (660 ÷ 2970) × 1000 = 222.22
Interest: (660 ÷ 2970) × 1000 = 222.22
Rents: (330 ÷ 2970) × 1000 = 111.11
Foreign dividends: (660 ÷ 2970) × 1000 = 222.22
Foreign interest: (660 ÷ 2970) × 1000 = 222.22

Grossing up and deducting net to find tax attributable under ESC/B18:

Dividends: (222.22 ÷ 75) × 90 = 266.66 – 222.22 = tax 44.44
Interest: (222.22 ÷ 66) × 100 = 336.70 – 222.22 = tax 114.48
Rents: (there is actually no need to calculate this, as there is no relief, but the calculation would be as follows)
(111.11 ÷ 66) × 100 = 168.35 – 111.11 = tax 57.24
Foreign dividends: (222.22 ÷ 66) × 100 = 336.70 – 222.22 = tax 114.48
Foreign interest: (222.22 ÷ 66) × 100 = 336.70 – 222.22 = tax 114.48

***Calculating the repayment due***

In this example the claimant is claiming under the Double Taxation Convention with Canada on dividends and interest, and under UK legislation applying to non-residents on foreign income. Under the treaty there is a 15% restriction on dividends and a 10% restriction on interest.

| | | |
|---|---|---|
| Dividends: Gross 266.64 × 15% = 40 restriction | Tax 44.44 less 40 = | 4.44 |
| Interest: Gross 336.70 × 10% = 33.67 restriction | Tax 114.48 less 33.67 = | 81.21 |
| Foreign dividends: Gross 336.70 | Tax | 114.48 |
| Foreign interest: Gross 336.70 | Tax | 114.48 |
| Total repayment | | 314.61 |

This text has been withheld because of exemptions in the Freedom of Information Act 2000.

**367900. Notes on types of underlying income in a discretionary trust** [March 2007]

UK dividends: includes stock dividends.

UK interest

Dividends and interest are the most common types of income that you will see in discretionary trusts. With the exception of UK dividends, all of the tax associated with a particular source is considered for the purposes of ESC/B18 to be tax on that source. You may also see:

– Foreign income: relief is given under domestic legislation. Although foreign dividends are taxed in the hands of the trustees at the dividend trust rate of 32.5% ... the beneficiary is treated as having been taxed at 40% ....
– Rental income: there are no double taxation agreements that allow relief to individuals on rental income. No repayment is due on any part of the tax applicable to rental income.
– Accrued income: income returned under the ‘accrued income’ scheme cannot be relieved under double taxation agreements.
– Royalties: these are unusual in discretionary trusts. Relief is given at the appropriate agreement rate.
– FOTRA securities: you may be considering relief under an agreement which has an interest article that restricts relief. However, income shown on the trust return as interest may be derived from FOTRA securities on which full relief is available to non-residents. As there is no indication in the trust return that income is derived from FOTRA securities, you will not usually be able to consider repayment on this as a separate source from interest. However, if there is any indication of the amount of FOTRA securities in the papers submitted with the return, or in figures originating from the trustees and provided by the claimant or their agent, you should use these to allow relief on the FOTRA securities.

**367910. What happens if the total net distributed in a year exceeds the total net available for distribution (‘overdistribution’)** [June 2004]

It the trustees have distributed more money in one year than is available to distribute from the income received in that year, you will need to analyse the balance from undistributed income arising in earlier years.

This is known as a ‘spreadback’ calculation. The income arising in earlier years can be analysed using the trust report program.

When spreading back we start with the most recent year in which income has been accumulated. If the trustees have over-distributed in earlier years we may have already made a spreadback calculation and used income accumulated in an earlier year. It is important that we do not use that accumulation again in the current spreadback. You cannot go back more than six years before the year in which the distribution was made. So if the trustees have made an excess distribution in 2003/04 you can only go back to 1998/99. But you only go back to accumulations made in that year if you have used up all the income accumulated in 2002/03, then 2001/02 and so on. The residence position of the beneficiary in the year(s) that the income was accumulated is not relevant.

## 22.9.3 *Confidentiality*

The INT Manual provides:

**367630. Claims by non-resident beneficiaries of non-resident discretionary trusts** [March 2007]

...

*Confidentiality when advising a beneficiary or agent about a payment*

A beneficiary of a discretionary trust has no rights against the income of the trust. Trustees may favour one potential beneficiary rather than another. Therefore, to provide information to a beneficiary about the income of a trust that you have used to calculate relief due under ESC/B18 will infringe the confidentiality of the trustees.

Because of this we cannot provide a breakdown of the underlying income comprising the repayment. The claimant (and their agent) only has a right to the final figure of the repayment we have calculated. However, if the beneficiary obtains the written permission of a trustee we can release information concerning the underlying trust income.

Sometimes a trustee will act as the nominated agent of the beneficiary. In that case you can release details of the computation to the trustee without seeking further written permission. If you are providing this information, you will need to show a full calculation. If the original apportionment of income was calculated using the computer program, you will need to make a full manual calculation (see INTM367890).

### 22.9.4 *Disclosure of ESC B18 claim on tax return*

HMRC Helpsheet 262 (2010/11) provides:

> If you wish to make a claim under Extra Statutory Concession B18, you should phone HMRC CAR Trusts & Estates Nottingham on 0845 604 6455. In addition, you should advise your tax office that you are making a claim under Extra Statutory Concession B18 and, in the 'Any other information' box of your tax return, enter details of the name of the trust from which the income payment was received and the tax reference of the trust

It is not clear why more than a note in the tax return "other information" box is needed.

## 22.10 ESC B18 relief for non-resident trust

ESC B18 provides:

> **Non-resident trusts**
> A similar concession will operate where a beneficiary receives a payment from discretionary trustees which is not within [what is now s.494(1) ITA] (ie where non-resident trustees exercise their discretion outside the UK).
> [1] Where a non-resident beneficiary receives such a payment out of income of the trustees in respect of which, had it been received directly, it would have been chargeable to UK tax, then the beneficiary—
> [a] may claim relief under s.278 ICTA (personal reliefs for certain non-residents); and
> [b] may be treated as receiving that payment from a UK resident trust but claim credit only for UK tax actually paid by the trustees on income out of which the payment is made.
> [c] The beneficiary may also claim exemption from tax in respect of FOTRA securities issued in accordance with [what is now s.714 ITTOIA] to the extent that the payment is regarded as including interest from such securities.
> [2] A UK beneficiary of a non-resident trust may claim appropriate credit for tax actually paid by the trustees on the income out of which the payment is made as if the payments out of UK income were from a UK resident trust and within s.687(1) ICTA.

There are three distinct sets of reliefs here:
(1) Personal reliefs for non-resident beneficiaries.
(2) Credit for tax paid by the trust as if the trust were UK resident; this only applies if the trust wishes to comply with UK tax requirements and pay trust rate tax on UK source income.
(3) Relief for interest on FOTRA securities: I suspect that this is in practice academic, though strictly it applies if:
 (a) the trust receives income from FOTRA securities;
 (b) the trustees are outside the FOTRA exemption for trustees;[14]
 (c) the income is paid to a beneficiary who is not ordinarily UK resident and so is within the FOTRA exemption; and
 (d) the trust wishes to comply with UK tax requirements.

ESC B18 goes on to specify the conditions for the relief, which are similar to the conditions for UK resident trusts:

14 Because there are UK beneficiaries: see 18.6.2 (Discretionary trust).

This treatment will only be available where the trustees—

– have made trust returns giving details of all sources of trust income and payments made to beneficiaries for each and every year for which they are required; and
– have paid all tax due and any interest, surcharges and penalties arising; and
– keep available for inspection any relevant tax certificates.

Relief or exemption, as appropriate, will be granted to the beneficiary on a claim made within five years and ten months of the end of the year of assessment in which the beneficiary received the payment from the trustees.

No credit will be given for UK tax treated as paid on income received by the trustees which would not be available for set off under s 687(2) if that section applied, and that tax is not repayable (for example on dividends). However, such tax is not taken into account in calculating the gross income treated as taxable on the beneficiary under this concession.

### 22.10.1 *Who makes the claim?*

After considering the case of a settlor-interested trust[15] the International Manual continues:

> **339550. Claims by non-resident trustees of discretionary trusts** [March 2007]
> You may receive a claim or application from non-resident trustees of a discretionary trust. ...
> ***What to do if one or more beneficiaries of the trust has a residential address in the UK***
> If the completed form 4467(trustee)/FD shows any beneficiaries with UK residential addresses, Technical Advice Group will refer the papers to CNR (Non-resident trusts) in Bootle, who will consider whether the trustees will need to make UK tax returns. Any claims will need to be made by the non-resident beneficiaries under ESC/B18 (see INTM367630).
> ***What to do if all of the beneficiaries are resident in the same country as the trustees and the settlor of the trust is excluded from benefit***
> If all of the beneficiaries of the trust are resident in the same country as the trustees and the settlor of the trust is excluded from benefit, you can

15 See 50.11.3 (Settlor treaty-resident outside the UK).

allow relief to the trustees.

## 22.11 UK trust - non resident beneficiary: DTA relief

### 22.11.1 *DTAs with OECD model "other income" article*

SP 3/86 provides:

> **Payments to a non-resident from UK discretionary trusts or UK estates during the administration period: double taxation relief**
> **Introduction**
> 1 This statement explains how relief from UK tax under double taxation agreements will be given in respect of payments made to a non-resident [from] a UK discretionary trust or a UK estate.
> **Background**
> ***Discretionary trusts***
> 2 Generally speaking, a non-resident beneficiary receiving payments from a UK discretionary trust is not entitled to repayment of the tax paid by the trustees on the trust income. However, under concession B18 (which embodies a longstanding practice) HMRC 'looks through' the trust income to the underlying component parts of that income. The purpose of this 'looking through' is to allow the recipient of the income any relief that would have been available to him under the Taxes Acts had the income come to him direct instead of through the trustees.
> 3 Where the beneficiary is resident in a country with which the UK has a double taxation agreement, further relief under the 'looking through' principle may be due. Thus, for example, if the agreement provides for a withholding rate on interest of 15 per cent and interest liable to UK tax formed part of the trust income which had suffered tax at 40 per cent (ie the rate applicable to trusts) then, under the 'looking through' principle, the beneficiary would be repaid the amount of tax suffered in excess of the withholding rate, in this case 25 per cent.
> 4 Some of the UK's double taxation agreements include an 'other income' Article. The purpose of this Article is to determine in which country income not expressly dealt with elsewhere in the agreement should be taxed. In the UK's agreement the article sometimes gives sole taxing rights in respect of such income to the recipient's country of residence.

It is in fact standard OECD model form to give sole taxing rights in respect of such income to the recipient's country of residence. OECD

Model Article 21(1) provides:
