> Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

This wording would apply to income from a discretionary trust.

> 5 It has been the practice of HMRC to apply the 'looking through' principle to all cases where relief in respect of the discretionary payment was sought and to refuse claims where full repayment of UK tax was claimed under the provision of [the] 'other income' Article in the agreement.
>
> [Para 6 deals with estates: see 68.17 (Non-resident beneficiary of UK estate: DTA relief).]
>
> **Change of practice**
>
> 7 Following a review of their practice in these two areas, HMRC have accepted that if a payment made by trustees out of a UK discretionary trust falls to be treated as a net amount in accordance with TA 1988 s 687(2) [now s.494 ITA], the 'looking through' principle is not appropriate where the beneficiary is resident in a country with which the UK has a double taxation agreement and the 'other income' Article gives sole taxing rights in respect of such income to that country. (This will usually be the case where income from trusts is not specifically excluded from the Article.) This means that tax paid by the trustees in respect of the discretionary payment will be repayable to the beneficiary, provided that any conditions set out in the 'other income' Article are met. For example, the recipient may be required to show that he is subject to tax on the income in his country of residence.
>
> 8 [this deals with estates]
>
> 9 Where the 'other income' Article does not give sole taxing rights to the country of residence in respect of the trust or estate income or there is no double taxation agreement with the country concerned, the existing 'looking through' practice will continue to be applied where it is to the advantage of the beneficiary.

The DTAs which confer relief under the "other income" article on discretionary payments made by UK resident trustees are mostly the older generation of treaties. I think the reason is that before 1973, discretionary trusts were regarded as transparent, so distributed income of discretionary trust was not regarded as falling under the "other income" article.[16] DTAs made from the 1980's onwards usually exclude trust and estate income from the "other income" article. However not all new DTAs do this (eg Hungary, 2007; was that an oversight or intended, and if so, why?)

The International Manual sets out a list of the countries whose DTAs provide relief for discretionary payments made by UK resident trustees. It is not however up to date and for convenience I divide it into two parts:

> **INTM367800 - DT applications and claims: Non-resident beneficiaries of UK trusts**
> **DTAs where relief is available under the 'other income' article on discretionary payments made by UK resident trustees** [March 2007]
>
> The DTTs which currently confer relief under the "other income" article on discretionary payments made by UK resident trustees are:
>
> Austria
> Barbados
> Bosnia Herzegovina*
> Portugal
> Romania
> Croatia*
> Egypt
> Hungary
> Ivory Coast
> Israel
> Jamaica
> Kenya
> Montenegro*
> Morocco
> Namibia
> Serbia*
> Spain
> Sudan
> Swaziland
> Tunisia
> Zambia

* Bosnia-Herzegovina, Croatia, Montenegro, Serbia: relief is given under the terms of the old UK/Yugoslavia DTT: see SP 3/07.
In the following former USSR states, DTT relief ceased in 2002: Armenia, Belarus, Georgia, Kyrgyzstan, Lithuania, Moldova, Tajikistan, Turkmenistan; see SP 4/01 [2002] STI 32.

The following countries are still mentioned in the INT Manual list but should be deleted following new treaties (date of treaty in brackets):

16 See 22.3.3 (Discretionary trust payment: what is the source?).

France (2008, in force, 2010)
Germany (2010, in force 2011)
Macedonia (2007)
Poland (2006)
Slovenia (2007)
South Africa (2002)

### 22.11.2 *DTAs with restrictions on "other income" article*

UK DTAs from the 1980's onwards mostly exclude trust and estate income from the "other income" article. Art 23(1) of the France/UK DTA is typical:

> Items of income beneficially owned by a resident of a Contracting State, wherever arising, which are not dealt with in the foregoing Articles of this Convention, *other than income paid out of trusts or the estates of deceased persons in the course of administration,* shall be taxable only in that State.

This leaves relief to be claimed under ESC B18.[17]

Interestingly, the new UK/Germany treaty (2010) deals with the point expressly. Article 21 provides:

> 1) Items of income beneficially owned by a resident of a Contracting State, wherever arising, which are not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.
> 2) Notwithstanding the provisions of paragraph 1, the following provisions shall apply with respect to income paid out of trusts or the estates of deceased persons in the course of administration:
> Where such income is paid to a beneficiary who is a resident of Germany

17 The US/UK DTA has this exclusion and the Exchange of Notes on that DTA comments:"With reference to paragraph 1 of Article 22 (Other income) - it is understood that the purpose of the exclusion from the paragraph for income paid out of trusts or the estates of deceased persons in the course of administration is to allow a recipient of such income the relief that would have been available to him under the provisions of the Convention had they received the income direct instead of through the trust or estate." More accurately, the purpose is to prevent the recipient of such income from receiving *more than* the relief that would have been available to a person under the provisions of the Convention and ESC B18 had they received the income direct instead of through the trust or estate. But it comes to the same thing.

> by trustees or personal representatives who are residents of the UK out of income received by those trustees or personal representatives which would, if those trustees or personal representatives had been residents of Germany, have fallen within other Articles of this Convention, the beneficiary shall be treated as having received an amount of the income received by the trustees or personal representatives corresponding to the income received by him and any tax paid by the trustees or personal representatives on that amount shall be treated as having been paid by the beneficiary.

Why? Presumably the German authorities do not like German residents to be taxed by law and untaxed by HMRC extra-statutory concessions such as ESC B18 and A14. Those who believe that tax law should be statutory and not concessionary will say: quite right too.

It is curious that the present campaign to legislate ESCs, which has legislated many trivial ESCs, has not covered the important ESC B18. No explanation has been given, so it is tempting to speculate. Perhaps it has been filed as too difficult; perhaps HMRC are planning changes to the law; perhaps legislation will come eventually.

## 22.12 Are discretionary trusts "beneficial owners" for DTA purposes?

### 22.12.1 *Meaning(s) of "beneficial ownership"*

The expression "beneficial ownership" has (at least) three possible meanings:

(1) The English law/trust law meaning, where it may be contrasted with bare legal ownership and is synonymous with equitable ownership.[18]
(2) An international tax law meaning, in the context of DTAs.
(3) A meaning (or set of meanings) in the context of money laundering.[19]

---

18 See 53.5 (Beneficial ownership of FOTRA securities). This is not of course to say that the expression always has this meaning in English statutes, as the context governs the sense.

19 See (1) reg.6 Money Laundering Regulations 2007 (Meaning of beneficial owner). This is too long to set out in full, but it includes "the class of persons in whose main interest the trust is set up or operates."
(2) The Glossary to the Financial Action Task Force's 40 Recommendations defines beneficial owner as: "the natural person(s) who ultimately owns or controls a customer and/or the person on whose behalf a transaction is being conducted. It also incorporates those persons who exercise ultimate effective control over a legal person

These are all quite distinct and discussion of the meaning in one context has almost no relevance to the meaning in other contexts. It would have been better to have three distinct expressions, but the usages are now far too well established to alter that, and the context will generally show which meaning is intended.

A full discussion would require three long chapters.

## 22.12.2 *Discretionary trusts: beneficial owners for DTA purposes*

Relief under DTAs is frequently limited to the beneficial owner.

It is clear that the trustees are the "beneficial owner" of income of a discretionary trust in the DTA sense and so can qualify for DT relief.

The OECD are at present consulting on a revised commentary which will make this clearer. The proposed commentary is as follows (the point is made in the footnote but the entire passage is important):

> **Commentary on Article 10 (Dividends)**
> 12. The requirement of beneficial owner was introduced in paragraph 1 of Article 10 to clarify the meaning of the words "paid ... to a resident" as they are used in paragraph 1 of the Article. It makes plain that the State of source is not obliged to give up taxing rights over dividend income merely because that income was paid direct to a resident of a State with which the State of source had concluded a convention.
> 12.1 Since the term "beneficial owner" was added to address potential difficulties arising from the use of the words "paid to ... a resident" in paragraph 1, it was intended to be interpreted in this context and not to refer to any technical meaning that it could have had under the domestic law of a specific country (in fact, when it was added to the paragraph, the term did not have a precise meaning in the law of many countries). The term "beneficial owner" is therefore not used in a narrow technical sense (such as the meaning that it has

---

or arrangement." See *www.fatf-gafi.org/glossary/0,3414,en_32250379_32236930_35433764_1_1_1_1,00.html#34276864*.

(3) OECD "Behind the Corporate Veil: Using Corporate Entities for Illicit Purposes", (2001) *www.oecd.org/dataoecd/0/3/43703185.pdf*, p.14 has a related definition: In this Report, "beneficial ownership" refers to ultimate beneficial ownership or interest by a natural person. In some situations, uncovering the beneficial owner may involve piercing through various intermediary entities and/or individuals until the true owner who is a natural person is found. With respect to corporations, ownership is held by shareholders or members. In partnerships, interests are held by general and limited partners. In trusts and foundations, beneficial ownership refers to beneficiaries, which may also include the settlor or founder."

under the trust law of many common law countries[20]), rather, it should be understood in its context, in particular in relation to the words "paid … to a resident", and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance. This does not mean, however, that the domestic law meaning of "beneficial owner" is automatically irrelevant for the interpretation of that term in the context of the Article: that domestic law meaning is applicable to the extent that it is consistent with the general guidance included in this Commentary.

12.12 Where an item of income is paid to a resident of a Contracting State acting in the capacity of agent or nominee it would be inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption merely on account of the status of the direct recipient of the income as a resident of the other Contracting State. The direct recipient of the income in this situation qualifies as a resident but no potential double taxation arises as a consequence of that status since the recipient is not treated as the owner of the income for tax purposes in the State of residence.

12.3 It would be equally inconsistent with the object and purpose of the Convention for the State of source to grant relief or exemption where a resident of a Contracting State, otherwise than through an agency or nominee relationship, simply acts as a conduit for another person who in fact receives the benefit of the income concerned. For these reasons, the report from the Committee on Fiscal Affairs entitled "Double Taxation Conventions and the Use of Conduit Companies"concludes that a conduit company cannot normally be regarded as the beneficial owner if, though the formal owner, it has, as a practical matter, very narrow powers which render it, in relation to the income concerned, a mere fiduciary or administrator acting on account of the interested parties.

12.4 In these various examples (agent, nominee, conduit company acting as a fiduciary or administrator), the recipient of the dividend is not the "beneficial owner" because that recipient does not have the full right to use and enjoy the dividend that it receives and this dividend is not its own; the powers of that recipient over that dividend are indeed constrained in that the recipient is obliged (because of a contractual, fiduciary or other duty) to pass the payment received to another person. The recipient of a dividend is the "beneficial owner" of that dividend where he has the full right to use and enjoy the dividend unconstrained by a contractual or legal obligation to pass the payment received to another person. Such an obligation will normally derive from relevant legal documents but may also be found to exist on the basis of facts and circumstances showing that, in substance, the recipient clearly does not have the full right to use and enjoy the dividend; also, the use and enjoyment of a dividend must be

20 [Footnote original] For example, where the trustees of a discretionary trust do not distribute dividends earned during a given period, these trustees, acting in their capacity as such (or the trust, if recognised as a separate taxpayer), could constitute the beneficial owners of such income for the purposes of Article 10 notwithstanding that the relevant trust law might distinguish between legal and beneficial ownership.

distinguished from the legal ownership, as well as the use and enjoyment, of the shares on which the dividend is paid.
12.5 The fact that the recipient of a dividend is considered to be the beneficial owner of that dividend does not mean, however, that the limitation of tax provided for by paragraph 2 must automatically be granted. This limitation of tax should not be granted in cases of abuse of this provision (see also paragraphs 17 and 22 below). As explained in the section on "Improper use of the Convention" in the Commentary on Article 1, there are many ways of addressing conduit company and, more generally, treaty shopping situations. These include specific treaty anti-abuse provisions, general anti-abuse rules and substance-over-form or economic substance approaches. Whilst the concept of "beneficial owner" deals with some forms of tax avoidance (i.e. those involving the interposition of a recipient who is obliged to pass the dividend to someone else), it does not deal with other cases of treaty shopping and must not, therefore, be considered as restricting in any way the application of other approaches to addressing such cases.
12.6 The above explanations concerning the meaning of "beneficial owner" make it clear that the meaning given to this term in the context of the Article must be distinguished from the different meaning that has been given to that term in the context of other instruments1that concern the determination of the persons (typically the individuals) that exercise ultimate control over entities or assets. That different meaning of "beneficial owner" cannot be applied in the context of the Article. Indeed, that meaning, which refers to natural persons (i.e. individuals), cannot be reconciled with the express wording of subparagraph 2 a), which refers to the situation where a company is the beneficial owner of a dividend. Since, in the context of Article 10, the term beneficial owner is intended to address difficulties arising from the use of the word "paid" in relation to dividends, it would be inappropriate to consider a meaning developed in order to refer to the individuals who exercise "ultimate effective control over a legal person or arrangement"....
12.7 Subject to other conditions imposed by the Article, the limitation of tax in the State of source remains available when an intermediary, such as an agent or nominee located in a Contracting State or in a third State, is interposed between the beneficiary and the payer but the beneficial owner is a resident of the other Contracting State (the text of the Model was amended in 1995 to clarify this point, which has been the consistent position of all Member countries). States which wish to make this more explicit are free to do so during bilateral negotiations.[21]

CHAPTER TWENTY THREE

# IP TRUSTS: INCOME TAX

## 23.1 Taxation of life tenant

### 23.1.1 *What is source of income of beneficiary?*

The life tenant is of course subject to tax on income received from the trust if it is UK source income or if the life tenant is UK resident. For this purpose it is necessary to identify the source. The choice is between:
(1) regarding the trust as the source of trust income; or
(2) regarding the trust assets as the source, in which case one "looks through" the trust and it is described as "transparent".[1]
The answer depends on the terms of the trust, construed in accordance with the proper law of the trust.

Similar issues arise for unit trust income, see 35.1 (Unit Trusts).

### 23.1.2 *England and other "Baker" jurisdictions*

The source of the life tenant's income is the underlying trust assets (not the trust) if, under the terms of the trust, construed in accordance with the proper law of the trust, the beneficiary is entitled to the income of each trust asset as it arises. This is the case for a standard form interest in possession trust governed by English law.[2] In other words, an IP trust is transparent for IT purposes.

---

1 See 72.1.1 ("Transparent" and "opaque").

2 *Baker v Archer-Shee* 11 TC 749. This issue has given rise to considerable academic debate ever since the House of Lords reached its 3:2 decision in *Baker*. See Waters, "The Nature of the Trust Beneficiary's Interest" (1967) 45 Can Bar Rev 219; Schabe, "The Trust Conduit Principle: A Foundationless Theory?" [1999] JlATax 17 accessible *www.austlii.edu.au/au/journals/JATax/1999/17.html*.

Rather surprisingly, this applies even if the life interest is subject to an annuity: *Nelson v Adamson* 24 TC 36. But in practice annuities are not used so the point is only of academic interest.

For completeness: it has been suggested, tentatively and *obiter,* that this does not apply to trading income, at least for the purposes of DTAs;[3] however there is no sound basis for that distinction and the correct view is that the transparency principle applies generally.

It is possible to draft an English law trust so that under the terms of the trust the beneficiary is not entitled to a proprietary interest in the income as it arises, but merely has the right to call on the trustees to transfer to them "a balance" of net income.[4] Then the trust (not the underlying assets) will be the source. In practice this is not normally done.[5]

### 23.1.3 *New York and other "Garland" jurisdictions*

Common form interest in possession type trusts governed by some foreign trust laws do not give the beneficiary the right to income as it arises, but only the right to recover a sum from the trustees. The right is *in personam* not *in rem*. In this case the trust is not transparent and the beneficiary's income is classified as an annual payment (regardless of the type of income arising to the trustee).

This is so even if the beneficiary is described as "life tenant" and is, in economic reality, in the same position as a life tenant under an English law trust. Such a trust is more like an English law estate than an English law trust.

### 23.1.4 *Scots trusts*

It is generally accepted that a liferent (a scottish equivalent of a life

---

3 *R on the application of Huitson v HMRC* 2010] STC 715 at [54]. The point was not considered on appeal, see [2011] EWCA Civ 893. At the time of writing it remains to be seen if the case goes on to the supreme court.

4 *R v Special Comrs ex p Shaftesbury House & Arethusa Training Ship* 8 TC 367 appears to be an example. But that case was decided before *Baker*, and it should be decided differently now.

5 Except perhaps unit trusts: see 35.3 (Unauthorised unit trust: foreign trustees).

interest) under a Scots trust in common form is not transparent.[6]

This has been reversed for UK resident Scots trusts; s.464 ITA provides:

> (1) This section applies if—
> (a) income arises to trustees under a trust having effect under the law of Scotland,
> (b) the trustees are UK resident, and
> (c) a beneficiary under the trust ("B") would have an equitable right in possession to the income if the trust had effect under the law of England and Wales.
> (2) B is treated for income tax purposes as having an equitable right in possession to the income (even though B has no such right under the law of Scotland).

It is difficult to see why the statutory rule only applies to UK resident trusts. It is difficult to see why it applies to Scotland and not other *Garland* jurisdictions. The reason is that it is not part of a coherent regime for the taxation of trusts but a late Finance Bill amendment to deal with a narrow domestic anomaly.[7] In practice it will not often matter.

One can create a transparent Scots law trust with appropriate wording.[8]

### 23.1.5 *Commentary*

The UK rules strictly require one to ask whether every trust jurisdiction is:
(1) a *Baker* jurisdiction (where the life tenant of a standard form IP trust

---

6 "There is no difference between the law of Scotland as regards the beneficiary's rights and the law which is admitted in the record to be the law of the State of New York." *Inland Revenue v Clark's Trustees* [1939] SC 11 at p.24 accessible *www.kessler.co.uk* approved by Lord Fraser in *Leedale v Lewis* 56 TC at p.538. See too Discussion Paper on the Nature and the Constitution of Trusts para 2.5:

> "The beneficiary has a … right to compel the trustee to administer the trust funds in accordance with the provisions of the declaration of trust. This is a personal right. It is axiomatic that in Scots law the beneficiaries do not have a real right or a quasi-real right in the trust property. They have no proprietary interest in the trust fund."

Scottish Law Commission 2006 accessible *www.scotlawcom.gov.uk*.

7 See Discussion Paper on Apportionment of Receipts and Outgoings para 4.5, Scottish Law Commission, 2003, accessible *www.scotlawcom.gov.uk/download_file/view/49/*.

8 "Scottish Trust beneficiaries are not entitled to specific items of trust property *unless that is expressly provided for in the Trust Deed*." Discussion Paper on Apportionment of Receipts and Outgoings para 4.5.

has a right to income as it arises); or

(2) a *Garland* jurisdiction (where the life tenant only has a right against the trustee).

That is a somewhat metaphysical question as it is difficult to pin down any practical consequence (other than tax) which arises from the answer.

The distinction between *Baker* and *Garland* jurisdictions should be abolished. It has no economic substance and precious little legal basis. It is to a large extent undone by concession. This could be done quite easily by extending s.464 ITA to apply to all *Garland* trusts.

### 23.1.6 *Credit for tax paid by trustees*

The TSE Manual provides:

> **3762. Beneficiary entitled to trust income - mandated income** [February 2011]
> Sometimes the trustees mandate trust income to a beneficiary. If the trustees mandate income to a beneficiary, it means that the beneficiary receives it and the trustees do not. So in such a case there is no statutory basis (see TSEM3761) for taxing the trustees as being in receipt of the income. The beneficiary both receives the income and is entitled to it.
> The trustees exclude the income from the Trust and Estate Tax Return, even if it is untaxed. The beneficiary's trust income is
> • a share of the net taxed income as calculated on normal basis, and
> • the gross amount of untaxed income directly chargeable on him.
> The beneficiary (or, where the settlor has retained an interest, the settlor) includes the income on his personal return.
> **3763. Beneficiary entitled to trust income - grossing up** [November 2006]
> If the trustees receive income that is taxed at source, or if they pay tax on it under self assessment, the beneficiary will receive a net amount. But he or she is entitled to the gross amount. Consequently he or she is taxable on the gross amount.
> For example, the trustees have gross bank interest of £1,000 on which tax is deducted at source £200.They pay £800 to the beneficiary. The beneficiary is entitled to the gross amount £1,000, and is taxable on that amount.
> **3764. Beneficiary entitled to trust income - credit for trustees' tax** [February 2011]
> If the trustees have paid tax or have received income with tax taken off, the beneficiary is given credit for that tax.

For example, in 2009-10 the trustees have gross rental income of £2,000 on which they pay tax £400. They pay £1,600 to the beneficiary. The beneficiary is entitled to the gross amount £2,000, and is taxable on that amount. He or she is given credit for the £400 tax paid by the trustees. If the beneficiary is a higher rate taxpayer, he or she will have further tax to pay see example in TSEM3765. If the beneficiary is a non-taxpayer, he or she may claim a repayment.

The beneficiary is given credit for trustees' tax only if the beneficiary is taxable on the same item. If the IIP trustees receive an amount that is capital in trust law and deemed to be income for tax purposes (see TSEM3201 and TSEM3767), the beneficiary is not given credit for the trustees' tax. The IIP beneficiary would not be entitled to such a receipt, as it would not be trust income, and would not be taxable on the receipt.

***Settlements legislation***

Different rules apply where the income of the IIP beneficiary is treated as that of the settlor under the settlements legislation. Examples of this area where the IIP beneficiary is a spouse, civil partner or minor child of the settlor. See TSEM4512.

**3765. Beneficiary entitled to trust income - grossing up and credit for trustees' tax example** [February 2011]

An IIP trust where the Settlements legislation does not apply (see TSEM3764) receives income in 2009-2010: rental income £2,000 and bank interest £800 (basic rate tax of £200 has been deducted at source).

***Trustee's position***

| | Rent | interest |
|---|---|---|
| gross income | 2,000 | 1,000 |
| tax due | 400 | 200 |
| net income | 1,600 | 800 |

The trustee receives credit for the tax deducted at source from the bank interest (£200) so has to pay £220 tax.

***Beneficiary's position***

| | | Rent | interest |
|---|---|---|---|
| net income (as above) | 1600 | 800 | 800 |
| grossed up (@ 20%) | | 2,000 | 1,000 |

***Beneficiary is a higher rate taxpayer***

| | | |
|---|---|---|
| tax at 40% | 800 | 400 |
| less credit | 400 | 200 |
| further tax to pay | 400 | 200 |

For an example involving TMEs, see TSEM8485.

**3766. Beneficiary entitled to trust income - form R185 (Trust Income)** [August 2010]
In the example in TSEM3765 the entries on the form R185 (Trust Income) given by the trustees to the beneficiary would be:

| Net amount | | tax credit | | taxable amount | |
|---|---|---|---|---|---|
| 7.4 | 1600 | 7.5 | 400 | 7.6 | 2,000 |
| 7.7 | 800 | 7.8 | 200 | 7.9 | 1,000 |

The beneficiary uses the information on form R185 (Trust Income) to make his or her tax return or to claim repayment. The beneficiary is taxable on the gross amounts at boxes 7.6 and 7.9 at his or her marginal rate, and given credit for the amounts at 7.5 and 7.8.

## 23.2 Taxation of IP trustees

Trustees are in principle subject to tax on income arising to them if it is UK source income or if they are UK resident. This applies even to trustees of transparent IP trusts. There are however a number of exceptions for trustees of IP trusts (which I call **"IP trustees")** as exemptions for life tenants also enure for the benefit of the trustees.

### 23.2.1 *Income mandated to life tenant*

The TSE Manual provides:

**3040. Trust income mandated to a beneficiary** [February 2011]
Trustees of interest in possession trusts (IIPs) (TSEM1105) exclude from the Trust and Estate Tax Returns income mandated to beneficiaries. The beneficiaries include this on their personal returns.
This practice has been extended to trustees of settlor interested trusts (TSEM4000+) where the settlor (or the settlor's spouse or civil partner) is also an IIP beneficiary and the trust income is mandated to them.[9]

9 On this point see 24.10 (Taxation of trustees of settlement within s.624).

### 23.2.2 *Life tenant non-resident*

The taxation of UK trustees of an IP trust (assuming they have not mandated the income to a life tenant) is affected by the residence of the life tenant. TSE Manual provides:

> **3160. Resident trustees with trust income from abroad: beneficiary is not resident** [February 2011]
> These instructions apply only if the beneficiary has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant.
> The trustees' income tax liability is based on the beneficiary's residence position. Trustees are not chargeable in respect of the share of income from abroad payable to the non-resident beneficiary. They exclude it from the Trust and Estate Tax Return. [See] *Williams v Singer* 7 TC 387

The point is also made in form SA904(Notes) Notes on Trusts & Estate Foreign for the year ended 5 April 2010.

### 23.2.3 *Life tenant remittance basis taxpayer*

The taxation of UK trustees of an IP trust (assuming they have not mandated the income to the life tenant) similarly depends on whether the life tenant is a remittance basis taxpayer. TSE Manual provides:

> **3165. Resident trustees with trust income from abroad: beneficiary is resident but not domiciled** [April 2010]
> These instructions apply only if the beneficiary has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant.
> The trustee' income tax liability is based on the beneficiary's domicile. The beneficiary must make a claim for any year that the remittance basis is to apply.
> If in any year the beneficiary claims the remittance basis the trustees' liability on the share of income from abroad payable to the beneficiary is limited to the amount remitted to the UK. Trustees exclude from the Trust and Estate Tax Return any such overseas income that is not remitted to the UK.
> If in any year the beneficiary does not claim the remittance basis the trustees are assessable on the amount arising.
> [See] *Williams v Singer & others* 7 TC 387

> **3170. Resident trustees with trust income from abroad - beneficiary is resident but not ordinarily resident** [February 2011]
> These instructions apply only if the beneficiary:
> • has an absolute interest in trust income (TSEM6204). This includes a life tenant and an annuitant;
> • is a citizen of the Commonwealth or the Republic of Ireland.[10]
> The trustees' income tax liability is based on the beneficiary's not ordinarily resident status.
> The beneficiary must make a claim for any year that the remittance basis is to apply.
> If in any year the beneficiary claims the remittance basis the trustees' liability on the share of other income from abroad payable to the beneficiary is limited to the amount remitted to the UK. Trustees exclude from the Trust and Estate Tax Return any such overseas income that is not remitted to the UK.
> If in any year the beneficiary does not claim the remittance basis the trustees are assessable on the amount arising.
> [See] *Williams v Singer & others* 7 TC 387

The point is also made in form SA904(Notes) Notes on Trusts & Estate Foreign for the year ended 5 April 2010.
This form also directs:

> If the beneficiary(ies) of the trust has an absolute interest in the trust (including a life tenant) and it is known that he/she will make a claim for the tax year to be taxed only on the amount of their foreign income and gains that is remitted to the UK, include foreign savings income on Page TF2 (not Page TF1).
> Add up all the dividends and distributions from overseas sources included in column E on Page TF2. Use the 'Additional information' box 4.39 on Page TF5 to make the following declaration.
>> The amount in box 4.4 on Page TF2 includes a total of £ (x) in dividends and distributions from overseas sources.

The reason for this is that where dividend income is taxed on a remittance basis the rate of tax on trustees is the basic rate and not the dividend ordinary rate. Section 14 ITA provides:

---

10 The manual is out of date here: the requirement to be a citizen of the Commonwealth or the Republic of Ireland does not apply from 2005/06.

(1) Income tax is charged at the dividend ordinary rate on the income of persons other than individuals which—
(a) is dividend income,
(b) would otherwise be charged at the basic rate, and
(c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

This is consistent with the statutory rules for the taxation of individuals: see 41.4 (Rates of tax on dividend income). It is somewhat impractical for trustees to know whether income has been remitted.

It is an interesting question whether trustees are liable where income is remitted in a year after receipt. In practice I expect tax is paid by the life tenant and such income is not entered on the trust tax return.

### 23.2.4 *Life tenant entitled to tax credit relief*

The TSE manual provides:

> **3655. Relief for overseas tax: Beneficiary entitled to trust income** [March 2009]
> These instructions apply to taxed overseas trust income that is treated as a beneficiary's income as it arises.
> The trustees can claim, and receive, tax credit relief on behalf of the beneficiary. The amount is based on the beneficiary's marginal rate and residence status. INTM367730+ onwards has instructions about tax credit relief.
> If the trustees do not claim relief, the overseas income chargeable is the net amount after deduction of overseas tax.
> A paying agent may have allowed provisional tax credit relief on overseas income. If that provisional relief is excessive, the beneficiary accounts for the excessive relief.

The Manual continues with a comment on annuities, but that is so rare in practice it is not set out here.

## 23.3 DT reliefs

In relation to trusts, three states may be concerned:
(1) The state where the income arises

(2) The state where the trustees are resident
(3) The state where the beneficiary is resident

In this book I only consider the matter from a UK perspective: it will be necessary to consider foreign law viewpoints but that is outside the scope of this book.

In this chapter "beneficial ownership" is used in the treaty sense.

### 23.3.1 *Reliefs where beneficial ownership of income is required*

Article 10 OECD model convention provides:

> 1. Dividends paid by a company which is a resident of a Contracting State to a resident of the other Contracting State may be taxed in that other State.
> 2. However, such dividends may also be taxed in the Contracting State of which the company paying the dividends is a resident and according to the laws of that State, but if the beneficial owner of the dividends is a resident of the other Contracting State, the tax so charged shall not exceed:
> a) 5 per cent of the gross amount of the dividends if the beneficial owner is a company (other than a partnership) which holds directly at least 25 per cent of the capital of the company paying the dividends;
> b) 15 per cent of the gross amount of the dividends in all other cases.

Thus relief for UK dividends requires that the beneficial owner of the dividends is treaty-resident in the foreign jurisdiction.

Article 11 OECD model convention provides:

> 1. Interest arising in a Contracting State and paid to a resident of the other Contracting State may be taxed in that other State.
> 2. However, such interest may also be taxed in the Contracting State in which it arises and according to the laws of that State, but if the beneficial owner of the interest is a resident of the other Contracting State, the tax so charged shall not exceed 10 per cent of the gross amount of the interest.

Thus relief for UK interest similarly requires that the beneficial owner of the interest is treaty-resident in the foreign jurisdiction.

Article 12(1) OECD model convention provides:

> Royalties arising in a Contracting State and beneficially owned by a resident of the other Contracting State shall be taxable only in that other State.

Thus relief for UK royalties similarly requires that the beneficial owner of the royalties is treaty-resident in the foreign jurisdiction.

In some treaties beneficial ownership is added as a requirement even where it is not in the OECD model.

### 23.3.2 *Baker trusts*

In the case of Baker trusts, for the purposes of DT reliefs:

(1) The trust is transparent ie the underlying trust income is regarded as the income of the beneficiary.
(2) The life tenant is the beneficial owner of the trust income payable to the life tenant. So if the trust receives (say) interest income, the income of the beneficiary is classified as interest, and if the beneficiary is treaty-resident in a treaty jurisdiction with an article providing exemption from UK source interest, the income qualifies for this DT relief.
(3) The trustees (if otherwise taxable) qualify for DT relief to the extent that the beneficiary qualifies for the relief. This is another case of the trustees enjoying reliefs applicable to life tenants.
(4) The position is different for a receipt which is income for tax purposes and capital for trust law purposes: in that case the trustees are the beneficial owner of the income.

HMRC agree. International Manual provides:

> **339540. Baker and Garland Trusts** [June 2004]
>
> **...**
>
> ***Baker trusts***
>
> Where 'Baker' applies, you cannot treat the trustees as being beneficial owners of a trust's income as it arises. Instead it is the beneficiaries who are the beneficial owners.

That is correct. The manual continues:

> Strictly, each beneficiary should claim in his or her own right.

This is not strictly correct. A trustee could claim indirect DT relief in a case where a beneficiary failed to do so. But nothing turns on that since HMRC do not apply what they identify as the strict law:

> In practice it is acceptable to allow relief to the trustees, provided that you can be satisfied that the beneficiaries are entitled to relief under the same double taxation agreement as that under which the trustees have claimed. If this is not the case you may allow partial relief to the trustees by reference to the percentage of the interests that are relievable under the same DTA as the trustees. The beneficiaries who are not resident in the same country as the trustees will need to make their own claims against the income distributed to them.

### 23.3.3 *Garland trusts*

In the case of Garland trusts, for the purposes of DT reliefs:

(1) The trustee is the beneficial owner of the trust income.
(2) The income of the beneficiary will qualify for DT relief under the "other income" article in the OECD model form (but not under the UK preferred form): see 22.11 (UK trust – non-resident beneficiary: DTA relief).
(3) Point (2) would cause great difficulties. However by concession HMRC will regard a Garland trust as transparent Baker trust for DT purposes. I refer to this as **"the Garland concession"**.

International Manual provides:

> **339540. Baker and Garland Trusts** [June 2004]
>
> **...**
>
> ***Garland trusts***
>
> Where 'Garland' applies, you can, for the purposes of the double taxation agreement, treat the trustees as the beneficial owners of trust income as it arises and allow relief. This treatment is given because we consider that the beneficiary's right to income from the trust is against the trustees, rather than in the underlying assets held in trust. However, you should still establish the identity and residence of the beneficiaries. If any beneficiary is in the UK you should notify their tax inspector.

International Manual provides:

> **166030. Garland trusts** [December 2006]
> In the case of income of a non-discretionary foreign trust of the type considered in the case of *Garland v Archer Shee* 15 TC 693, the beneficiaries are not concerned with the source of the trust income and whether or not it has borne UK tax. It is the practice to allow relief to beneficiaries, other than annuitants, in respect of the proportion of the income assessable under Case V which is regarded as being derived from trust income which has borne UK tax. It is a condition of the relief that the amount of the income for higher rate purposes is to be treated as the sum of the amount assessable under Case V and the amount of tax on a grossed up basis which is applicable to the part of the assessment on which relief has been given.
> Submit the first claim from a beneficiary for this relief to the Offshore Personal Tax Team (part of Charity, Trusts & Residence), before admitting the claim.
> **166040. Foreign tax**
> Where foreign tax has been paid on trust income (including, in the case of dividends, any underlying tax where, exceptionally credit for such tax is due under the terms of an agreement – see INTM164410), it is the practice, in the case of a trust of a type referred to in INTM166030, to allow credit relief to beneficiaries, other than annuitants, for that foreign tax. Credit relief is given in the same way and to the same extent as if each beneficiary were entitled to his proportionate share of the underlying investments of the trust.

## 23.4 Baker or Garland trust jurisdiction?

The English courts assume that foreign trust jurisdictions apply English law principles in the absence of evidence to the contrary. But the Scottish courts will, I expect, assume Scots law principles, in the absence of evidence, with the opposite result. In practice HMRC have helpfully published a list which would constitute evidence on which (in the absence of other evidence) a tribunal should be expected to rely.[1] This list only represents the HMRC view and could be challenged on the basis of expert evidence. The list assumes the trust has standard form wording. It is in principle possible to draft a non-transparent trust in a *Baker* jurisdiction. It may be possible to draft a transparent trust in a *Garland* jurisdiction by using non-standard wording.

The HMRC list is as follows. The endnotes are my own.

| | | | |
|---|---|---|---|
| Argentina | No Trust Law | Latvia | Baker |
| Australia[2] | | Liechtenstein | Garland[10] |
| New South Wales | Baker | Lithuania | Baker |
| Queensland | Baker | Luxembourg | Baker |
| South Australia | Baker | Malaysia | Baker |
| Victoria | Baker | Malawi | Baker |
| Western Australia | Baker | Malta[11] | No Trust Law |
| Bahamas | Baker | Monaco | No Trust Law |
| Barbados | Baker | Montserrat | Baker |
| Belgium | No Trust Law | Namibia | Garland |
| Belize | Baker | Netherlands | No Trust Law[12] |
| Canada[3] | | New Hebrides | Baker |
| British Columbia | Baker | New Zealand | Baker |
| Nova Scotia | Baker | Nigeria | Baker |
| Ontario | Baker | Norway | Garland |
| Saskatchewan | Baker | St Helena | Baker |
| Quebec[4] | Garland | St Vincent | Baker |
| Cayman Islands | Baker | Singapore | Baker |
| Denmark | Garland | South Africa[13] | Garland |
| Egypt | Baker | South Yemen | Baker |
| Estonia | Baker | Spain | No Trust Law |
| Fiji | Baker | Sri Lanka | Baker |
| France[5] | No Trust Law | Sweden | Garland |
| Ghana | Baker | Trinidad & Tobago | Baker |
| Gibraltar | Baker | Uganda | Baker |
| Guernsey | Baker | USA[14] | |
| Guyana | Baker | New York | Garland |
| Hong Kong | Baker | Minnesota | Garland |
| Hungary | Baker | Montana | Garland |
| India[6] | Garland | North Dakota | Garland |
| Ireland, Republic of[7] | Baker | South Dakota | Garland |
| Isle of Man | Baker | Wisconsin | Garland |
| Italy[8] | No Trust Law | All other states[15] | Baker |
| Japan | No Trust Law | Zambia | Baker |
| Jersey[9] | Baker | Zimbabwe | Garland |
| Kenya | Baker | | |

1 Accessible *www.hmrc.gov.uk/cnr/nr_trusts.htm# lctable*.

2 The list omits Tasmania, Northern Territory and Australian Capital Territory. It is considered that these are *Baker* jurisdictions.

3 This seems correct: see *Minister of National Revenue* [1956] SCR 49 especially [1953] Ex CR 292 at p.297, accessible *www.kessler.co.uk*. The list of Canadian jurisdictions omits Alberta, Manitoba, New Brunswick, Newfoundland and Labrador, Northwest Territories, Nunavut, Prince Edward Island and Yukon. It is suggested that these are the same as the other Canadian common law jurisdictions, i.e. *Baker* jurisdictions.

4 This seems well founded in Art. 1261 Code Civil Québec: "The trust patrimony, consisting of the property transferred to the trust, constitutes a patrimony by appropriation, autonomous and distinct from that of the settlor, trustee or beneficiary *and in which none of them has any real right*". See also Gretton, "Trusts without Equity" ICLQ 49, No.3 (July 2000).

5 France was omitted (accidentally?) from the version of the list published 1 April 2008, but the comment in the earlier version of the list is printed here as it is correct.

6 *Duncan's Executors v Adamson* (1935) 14 ATC 22 so held. This seems soundly based on s.3 [India] Trusts Act 1882: "The 'beneficial interest' or 'interest' of the beneficiary is his right against the trustee as owner of the trust-property."

7 The list omits Northern Ireland: this is a *Baker* jurisdiction.

8 This is wrong: Italy does have a trust law.

9 Paul Matthews agrees: *Jersey Law of Trusts*,(3rd ed., 1994) para 1.21.

10 It is not clear whether HMRC are referring to a Stiftung or a Treuhandschaften; see 72.6 (Liechtenstein Foundation: Stiftung); 72.8 (Liechtenstein Treuunternehmen).

11 This is wrong: Malta does have a trust law.

12 This is wrong: The Netherlands does have a trust law.

13 Honoré agrees: *South African Law of Trusts*, (4th ed. 1991), para 349.

14 New York was (rather implausibly) found to be a *Garland* jurisdiction in *Garland v Archer-Shee* 15 TC 693. The finding of fact in *Garland* was also made in *Timpson's Executors v Yerbury* 20 TC 155 at p.157, and was accepted as common ground in *Astor v Perry* 19 TC 255. See "Taxing Foreign Income from Pitt to the Tax Law Rewrite – The Decline of the Remittance Basis", John Avery Jones in *Studies in the History of Tax Law*, 2004 p.46 accessible on *www.kessler.co.uk* for contrary views as to US law. Since foreign law is a question of fact, a court would not be bound by those decisions, but in practice they are not likely to be challenged.

15 This may not be correct for all the other states. In particular, Ohio and New Jersey have been found to be *Garland* jurisdictions. See *The Marchioness of Ormond v Brown* 17 TC 333 at p.341, *Kelly v Rogers* 19 TC 692 at p.696. But see the above footnote. In *Lawson v Rolfe* 46 TC 199 it was common ground that California was a *Baker* jurisdiction.

CHAPTER TWENTY FOUR

# SETTLOR-INTERESTED TRUSTS

## 24.1 Settlor-interested trusts – Introduction

Chapter 5 Part 5 ITTOIA contains a code of anti-avoidance provisions known as the Settlement Provisions. The most important is s.624(1) ITTOIA which provides:

> Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone if it arises—
> (a) during the life of the settlor, and
> (b) from property in which the settlor has an interest.

### 24.1.1 *Cross-references*

On the definition of "settlor", see 69.1 (Who is the settlor?).
"Settlement" for this purpose means settlement-arrangement; see 69.2 (Definitions of settlement).

For following types of income/gains accruing to settlor-interested trusts, see these references:

Chargeable event gains: see 30.7 (Section 624 & chargeable event gains).
Offshore income gains: see 32.7.2 (UK resident settlor-interested trust) and 32.9.1 (Non-resident settlor-interested trust).
Accrued income profits: see 33.14 (Settlor-interested trusts).
Deeply discounted security income: see 33.14.1 (UK resident settlor-interested trust) and 34.11 (Non resident trust).

See too 41.5 (Settlor-interested trust: rates of tax on settlor).

This chapter considers the IT rules. For CGT see 44.1 (Gains of trusts - introduction).

## 24.2 Meaning of "income arising under a settlement"

Section 648(1) ITTOIA provides:

> References in this Chapter to income arising under a settlement include— [1]
> (a) any income chargeable to income tax by deduction or otherwise, and
> (b) any income which would have been so chargeable if it had been received in the UK by a person domiciled, resident and ordinarily resident there.

The points made in 25.14 (The amount of income of person abroad) and 25.13 (Capital receipts deemed to be income) apply also for the purposes of ascertaining what is the "income arising under a settlement".

### 24.2.1 *Income of company, unit trust or partnership held by trustees*

In this discussion, income arising to a company held by trustees (not arising to trustees directly) is called "company income". Company income is not "income arising under a settlement". This follows from the repeal by Sch 17 FA 1989 of s.681(2)(b) ICTA (which formerly brought company income into the scope of that expression).[2] This view is also supported by reference in the definition to "income chargeable to *income* tax". Company income would normally be chargeable to corporation tax.

It is considered that income of a unit trust held by trustees is similarly not "income arising under the settlement" (unless the unit trust is transparent in which case its income passes through to the trustees).

It is suggested that the position is different where trustees have an interest in a partnership. Insofar as income is distributed by the partnership to the trust it obviously constitutes income arising under the settlement. But even if income is retained by the partnership, it is still income of the trustees since a partnership is transparent for IT.

Income of a company or unit trust which is not income arising under the settlement may fall within s.720 ITA.

---

1 The context suggests this is an exhaustive definition, ie the word "include" really means "mean".

2 This was part of the repeal of the close company apportionment provisions.

### 24.2.2 *Income of life tenant (not the settlor)*

Income payable under the trust to a life tenant is "income arising under a settlement". Admittedly, such income is usually regarded for tax purposes as the income of the life tenant, not of the trustees.[3] But that is not relevant here, because:

(1) the expression is "income arising under the settlement", not "income accruing to trustees"; and
(2) "settlement" is very widely defined: see 69.2.3 (Settlement-arrangement definition of settlement).

This can be seen to be the case by considering a trust made by S, revocable by S, under which income is payable to B for life. It could hardly be argued that such income falls outside the scope of s.624 ITTOIA.

### 24.2.3 *Income of life tenant settlor*

Where the settlor has an interest in possession, trust income actually received by the settlor is not within s.624 ITTOIA. It is subject to income tax under general principles.[4] But from 2006/07 the rates of tax are the same in either case,[5] so the issue does not now arise.

### 24.2.4 *Property business income*

Property Income Manual 1045 [February 2007] discusses how one calculates property income for the purposes of the Settlement Provisions:

> **1045. Life interest trusts** [February 2007]
> *Trusts and the settlor - losses*
> ... Various special provisions may apply to trusts and to those who set them up (the 'settlor'). In particular, there is a rule to prevent tax avoidance which can treat trust income as being, for tax purposes, the income of the settlor. Such income is taxed on the settlor under s.619(1)

3 See 23.1 (Taxation of life tenant).

4 The point was discussed in the 4th ed. of this book at 11.4.3. Trust income not received by the life tenant settlor is within s.624 ITTOIA. That applies to income used for trust expenses and income for tax purposes which is capital for trust law purposes.

5 See 41.5 (Settlor-interested trust: rates of tax on settlor).

> ITTOIA. Where the income is property income, the normal property income rules apply in calculating the income. (S.623 ITTOIA).

This is correct. It follows that interest paid by the trustees is in principle deductible in computing the quantum of property income for s.624 purposes.

### 24.2.5 *Property business losses*

The Property Income Manual then considers the treatment of losses:

> **1045. Life interest trusts** [February 2007]
> *Trusts and the settlor - losses*
> The more common case is where the trustees carry on the rental business but the settlor is caught by Section 619(1). Under these circumstances the settlor can't set any trust rental business losses against personal rental business income.
> Similarly the settlor can't merge personal rental business losses and the trust rental business profits which are deemed to be the settlor's income and charged under Section 619(1). Thus:
> - Where the trustees have a rental business loss and the settlor has a personal rental business profit, the trust loss is carried forward and the settlor is taxed on their personal rental business profit; the amount of the trustees' rental business profit charged on the settlor in the following year under Section 619(1) will be reduced by the trust loss carried forward.
> - Where the trustees have a rental business profit and the settlor has a personal rental business loss, the settlor is taxed on the trust rental business profit under Section 619(1); the settlor's personal rental business loss can't be merged with the trust profit; but, as a separate matter, the settlor may in some cases be able to set a personal rental business loss sideways against other income, including any Section 619(1) income deemed to arise from the trustees' rental business; see PIM 4205.
>
> The position is different where the taxpayer is:
> - the settlor; and
> - the life tenant; and
> - carries on the rental business.
>
> Under these circumstances the settlor can merge their personal property losses with the deemed income from the trust and vice versa.

This is thought to be correct. See too 14.4 (Losses of overseas property business).

### 24.2.6 *Trustee expenses*

Section 624(1A) ITTOIA provides:

> If the settlement is a trust, expenses of the trustees are not to be used to reduce the income of the settlor.

ITA EN provides:

> 3323.New subsection (1A) makes it explicit that trustees' expenses are not taken into account in measuring the income of a settlor under section 624 of ITTOIA. This follows from the fact that it is the income arising that is deemed to be the settlor's and the income arising is the gross amount out of which the trustees may pay expenses.

### 24.2.7 *Settlor's deductions and reliefs*

Section 623 ITTOIA provides:

> For the purpose of calculating liability to tax under this Chapter (but for no other purpose), a settlor shall be allowed the same deductions and reliefs as if any amount treated under this Chapter as income of the settlor had actually been received by the settlor.

As far as I can see, this is not needed (except perhaps for the avoidance of doubt). Deductions and reliefs should be available in any event under general principles, and there are none which would otherwise be disallowed on the basis that the settlor did not actually receive the income arising under the settlement. However that may not have been the case in 1938 when the provision was first introduced. Thus it survives mainly for historical reasons, and, perhaps, for the avoidance of doubt. The same applies to the equivalently worded provision in s.746 ITA 2007 which originated in 1936.

### 24.2.8 *Income arising under the settlement must be identifiable*

Section 624 assumes that one can *identify* the amount of income which arises under the settlement. If that identification is not possible then it is considered that s.624 does not operate.[6] In straightforward cases this is not an issue. Where an individual provides funds indirectly to a settlement made by another, for instance by way of interest-free loans, guarantees, payments of trust expenses, etc that person may become a settlor, but s.624 still does not apply unless it is possible to identify the income arising under *that* settlement-arrangement, ie arising from that individual's act of bounty.

## 24.3 Meaning(s) of "settlor-interested"

### 24.3.1 *The concepts of "settlor-interested"*

The term "settlor-interested", first coined in the FA 2000, is used in connection with various provisions of which the most important are:
(1) The IT settlement provisions (discussed in this chapter).
(2) Section 86 TCGA.[7]
Consistent with the patchwork nature of UK tax, these provisions have significant differences, though they share a common framework. "Settlor-interested" is a convenient label, but not a wholly accurate one.

### 24.3.2 *"Settlor-interested" for IT purposes*

Subject to minor exceptions not discussed here, s.625(1) ITTOIA provides:

> A settlor is treated for the purposes of section 624 as having an interest in property if there are any circumstances in which the property or any related[8] property—

---

6 The same point applies to the TAA provisions; see 25.7.2 (Income arising must be identifiable).

7 See 44.6 (Settlor-interested condition). Other examples, not discussed in this book, are s.169F TCGA (restriction of holdover relief for settlor-interested trusts); Sch 4A TCGA (disposal of interest in settlor-interested trusts). In addition, "power to enjoy" for s.720 ITA is a similar concept, with a different label. GWR is a comparable but not identical concept.

8 "Related property" is defined in s.625(5) ITTOIA:

> In this section "related property", in relation to any property, means income from that property or any other property directly or indirectly representing proceeds of,

(a) is payable to the settlor or the settlor's spouse or civil partner,
(b) is applicable for the benefit of the settlor or the settlor's spouse or civil partner, or
(c) will, or may, become so payable or applicable.

In practice the settlor and spouse are usually expressly included as a beneficiary or expressly excluded.[9]

If an individual lends interest free (or at a low rate of interest) to a trust, the HMRC view is that the trust is settlor-interested as the individual may benefit by repayment of the loan (even if otherwise excluded):

> In *Jenkins v IRC* (26 TC 265) the Court of Appeal found that the making of an interest-free loan brought the settlement into what is now [s.624]. In the *Jenkins* case, the dispute was about whether certain income received by the trustees of the settlement could be assessed on the settlor under the provisions of FA 1938 s38(4). That provision contained an extended definition of retaining an interest in income that is in similar terms to the definition of retaining an interest in property or derived property found in [s.624].
> The effect of the decision in *Jenkins* was that a settlor who has made an interest-free loan to his/her trust has brought himself or herself within the scope of s38(4), and by implication [s.624] (albeit that there would be no charge unless income actually arose to the trustees).[10]

The contrary is faintly arguable[11] but for practical purposes this should be accepted as correct.

The IT settlement provisions only apply to income from property in which the settlor has an interest. So if the settlor is excluded from part of the trust fund, the IT provisions do not apply to that part.

---

or of income from, that property or income from it.

9 For further discussion see Kessler & Sartin, *Drafting Trusts and Will Trusts* (10th ed., 2010) Chapter 13 (Settlor exclusion and default clauses).

10 Letter from HMRC to the Association of British Insurers, September 2004, accessible *www.kessler.co.uk*. A person who lends interest-free is a settlor: see 69.16 (Interest-free or back-to-back loan). For other issues arising on loans to trusts, see 24.14 (Settlor receives capital sum) and 26.11 (Transferor receives capital sum).

11 There is a discussion in the 2nd edition of Venables & Kessler, *Taxation of Charities* (1993) p.137.

## 24.3.3 *Meaning of "spouse"*

Section 625(4) ITTOIA gives the word "spouse" an artificial and slightly narrow meaning:

> In subsection (1) "the settlor's spouse or civil partner" does not include—
> (a) a spouse or civil partner from whom the settlor is separated under an order of a court or a separation agreement,
> (b) a spouse or civil partner from whom the settlor is separated where the separation is likely to be permanent,
> (c) the widow or widower or surviving civil partner of the settlor, or
> (d) a person to whom the settlor is not married but may later marry or a person of whom the settlor is not a civil partner but of whom the settlor may later be a civil partner.

The TAA provisions do not contain the same provision, which is anomalous, but that is the patchwork nature of UK tax. Fortunately it does not often matter.

## 24.3.4 *Settlement ceasing to be settlor-interested*

If the settlor originally had an interest in trust property but is later excluded (together with the settlor's spouse) then s.624 ITTOIA ceases to apply to income arising after the date of the exclusion.[12]

If the settlor is excluded from part of the trust fund, then they are within the scope of s.624 only on the income arising from the part in which they still have an interest.

## 24.3.5 *Transfer to new settlement*

If the trust fund is transferred to a new settlement from which the settlor is not excluded, then s.624(1) ITTOIA continues to apply. The old settlor is the settlor of the new trust.[13]

If the entire trust fund is transferred to a new trust from which the settlor

---

12 Contrast 26.6 (Power to enjoy: Section 721 Condition A); 44.6 (Settlor-interested condition).

13 See 69.7 (Transfer from trust A to trust B by exercise of trustees' power).

(and spouse) are entirely excluded then s.624 ceases to apply, and if they are excluded from part, it ceases to apply in part.

## 24.4 Section 624 beneficiary relief

Section 685A ITTOIA avoids a double charge when income of a settlor-interested trust is paid to a beneficiary. I refer to this as **"s.624 beneficiary relief"**.

For completion of tax returns when this relief applies, see 22.3.6 (Entering discretionary trust income in beneficiary's tax return).

### 24.4.1 *Conditions for relief*

Section 685A(1) ITTOIA provides:

> This section applies if—
> (a) a person receives an annual payment in respect of income from the trustees of a settlement,
> (b) the payment is made in the exercise of a discretion (whether of the trustees of the settlement or any other person), and
> (c) a settlor is charged to tax under section 619(1) on the income arising to the trustees of the settlement (whether in the current year of assessment or in a previous year of assessment) out of which the annual payment is made.

The relief only applies to discretionary trusts. But if a trust confers an interest in possession (not on the settlor) then no relief is needed: the life tenant is not taxable as the income is the trust income of the settlor and of the settlor alone.

It is considered that a settlor is not charged to tax (within the meaning of (c)) if the s.624 remittance basis applies and the income is (un)taxed under the remittance basis. Where that relief applies, s.624 beneficiary relief is disapplied; but the contrary is arguable.

Section 685A(2) ITTOIA provides:

> This section applies only in respect of that proportion of the annual payment which corresponds to the proportion of the total income arising to the trustees of the settlement in respect of which a settlor is chargeable to tax under section 619(1).

Section 685A(2) may apply where:

(1) A settlement is partly settlor-interested (because there are two settlors or the only settlor is partly excluded).

(2) A non-resident settlor is charged on part of the trust income (UK source income only).

(3) A remittance basis taxpayer settlor is charged on part of the trust income (UK source and remitted income only).

### 24.4.2 *Relief for non-settlor-beneficiary*

Section 685A(3)–(6) ITTOIA confers the relief:

> (3) If and in so far as this section applies, the recipient of the annual payment shall be treated for the purposes of this Chapter as having paid income tax at the additional rate in respect of the annual payment.
> (4) But—
> (a) tax which the recipient is treated by virtue of this section as having paid is not repayable,
> (b) tax which the recipient is treated by virtue of this section as having paid may not be taken into account in relation to a tax liability of the recipient in respect of any other income of his...
> (5A) If the recipient of the annual payment is treated by subsection (3) as having paid income tax in respect of the annual payment, the amount of the payment is treated as the highest part of the recipient's total income for all income tax purposes except the purposes of sections 535 to 537 (gains from contracts for life insurance etc: top slicing relief).
> (5B) See section 1012 of ITA 2007 (relationship between highest part rules) for the relationship between—
> (a) the rule in subsection (5A), and
> (b) other rules requiring particular income to be treated as the highest part of a person's income.
> (6) Sections 494 and 495 of ITA shall not apply in relation to an annual payment if and in so far as this section applies.

EN FB 2008 explains subsections (5A)(5B):

> 7. The income of a 'settlor-interested' trust is deemed, for the purposes of income tax, to be the settlor's income as it arises.
> 8. In non settlor-interested discretionary trusts, where income payments are made to beneficiaries, the income constitutes a new source, and is taxed on the beneficiary. The tax paid by trustees is available to the beneficiaries in

the form of a tax credit.
9 . In a settlor-interested trust, an income payment to a beneficiary is still a new source of income taxable in the beneficiary's hands. However the tax paid by the trustees of such trusts is treated as paid on behalf of the settlor. Because the settlor has already been taxed on the whole amount, charging the beneficiary to additional tax would result in a form of double taxation.
10. Section 685A ITTOIA 2005 provides that income paid by trustees of a settlor-interested trust to (non-settlor) beneficiaries comes with a non-repayable 'notional' tax credit equal to the higher rate of tax (currently 40 per cent) which covers all the tax liability on that income.
11. However, under current statutory ordering rules income from a trust is charged before savings and/or dividend income. The result is that a beneficiary of such a trust who also has savings and/or dividend income may find that the non-trust income is pushed into higher rates so that more tax is due overall.
12. The measure amends this ordering rule, so that income from a settlor-interested trust is treated within section 1012 ITA 2007 as one of the highest slices of income instead of being treated as part of the lowest slice.
13. The amending legislation backdates the correct position to 6 April 2006 to ensure that those affected are not disadvantaged by the omission.

Two policy points arise from this which ought to raise serious questions about the rule of law in relation to the UK tax system. First the tax system is so complex that it took two years for the error in the FA 2006 to be noticed and corrected. (I confess I did not notice it myself.) Secondly, the error was corrected by casual retrospective legislation.

The TSE Manual provides:

**4570 Payments to beneficiary other than the settlor** [February 2011]
... For 2006-07 onwards the law provides that discretionary payments to the beneficiary are treated as though the beneficiary had paid tax at the higher rate (see TSEM3755). The amount of the actual payment (it is not grossed up) should be shown in the beneficiary's return and it is included in the calculation of that person's total income. The tax credit ensures the beneficiary has no further liability in respect of the payment but it is ring-fenced so that no part of it can be repaid or set against liability arising from any other income of the beneficiary.

### 24.4.3 *Relief for settlor-beneficiary*

Section 685A(5) ITTOIA provides:

> If the recipient of the annual payment is a settlor in relation to the settlement, if and in so far as this section applies the annual payment shall not be treated as his income for the purposes of the Income Tax Acts (and subsection (3) does not apply).

The TSE Manual provides:

> **4570 Payments to the settlor** [February 2011]
> Where you tax the settlor on the income arising to the trust, discretionary payments out of the trust to the settlor are not further taxable. For years up to and including 2005-06 the phrase in Section 687(1) 'but would not be his income if it were not made to him' means Section 687 does not apply to payments that fall to be treated as the income of the settlor under Section 624 ITTOIA. For 2006/07 onwards discretionary payments made by the trustees to the settlor are taken out of charge by Section 685A(5) ITTOIA.

The legislation distinguishes between non-settlor beneficiaries and the settlor. In the one case the beneficiaries are given a credit, and in the latter case the income is tax free. At first sight this seems strange, but a reason will emerge.

## 24.5 Section 624 remittance basis

Section 648 ITTOIA provides a relief which I call "**the s.624 remittance basis**".

The legislation uses the clumsy but effective drafting technique of restricting the definition of "income arising under a settlement". That term is defined in a commonsense way in s.648(1)[14] and s.648(3) then provides:

> And if, for a tax year, section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the settlor, references in this Chapter to income arising under a settlement include in relation to any relevant foreign income arising under the settlement in that tax year only such of it as is remitted to the UK (in that tax year or any subsequent tax year) in circumstances such that, if the settlor remitted it, the settlor would be chargeable to income tax.

14 See 24.2 (Meaning of "income arising under a settlement").

> (4) See Chapter A1 of Part 14 of ITA 2007 for the meaning of "remitted to the UK" etc.

This applies to "relevant foreign income" arising under the settlement. The drafter has overlooked the definition of RFI, which means foreign income chargeable under specified provisions. Foreign trust income is never RFI.[15] Taken literally, s.648(3) would never apply. But the context shows that "relevant foreign income" is a slip for "foreign source income".

> (5) Where subsection (3) applies the remitted income is treated for the purposes of this Chapter as arising under the settlement in the tax year in which it is remitted.

In short, foreign income qualifies in principle for the s.624 remittance basis if it is not remitted to the UK.

The charge under s.648(5) arises if two conditions are satisfied:

(1) The income "is remitted to the UK".
(2) We must ask: would the settlor be chargeable to income tax on the remitted income if the settlor remitted it?

In practice this mainly concerns settlor-interested discretionary trusts. Income of a trust where the settlor has an interest in possession is in principle outside the scope of s.624,[16] though s.624 could apply to a receipt which was income for tax purposes but capital for trust purposes.

### 24.5.1 *Trustees remit trust income to UK*

Suppose first the simplest case. A settlor ("S") has made a settlor-interested discretionary trust. S is a remittance basis taxpayer. The trustees receive foreign income, so the circumstances of s.648(3) ITTOIA are satisfied. Later the trustees remit the income to the UK (without transferring it to S).

We ask the question: if S remitted the income, would S be chargeable to income tax? In principle S is chargeable to tax on remitted income if S is UK resident when the income arises to the trustees and at the time of remittance.

In short, income which is outside the scope of s.624 ITTOIA because of

15 See 9.3.1 (Relevant foreign income).
16 See 24.2.3 (Income of life tenant settlor).

the s.624 remittance basis *prima facie* falls back within s.624 if it is remitted by the trustees.

Suppose trustees accumulate income and thus it becomes trust capital. That capital is then remitted. The charge on remittance still applies. Its status as income or capital for trust law purposes is irrelevant.[17]

Accordingly trustees of a settlor-interested trust within the s.624 remittance basis should not remit their foreign income to the UK. It is desirable for trusts within s.624 to segregate (1) foreign income and (2) capital. They can then remit capital (IT-free) rather than income (chargeable at IT rates). If they fail to do so then the mixed fund rules will apply.

### 24.5.2 *Income payment to beneficiary (not settlor) who remits to the UK*

Suppose:

(1) Trustees of a settlor-interested discretionary trust pay the income to a beneficiary ("B") (not the settlor) and

(2) B receives the sum out of the UK but remits the sum to the UK.

It is considered that the settlor is not charged under the s.624 remittance basis on the remittance. The reason is that what is remitted to the UK is not "foreign income arising under the settlement". It loses its nature as "income arising under the settlement" upon payment to B because it becomes the income of B. It would be surprising if there were a tax charge because the settlor may have no way of knowing whether the income is remitted by B.

It makes no difference whether or not B is a relevant person in relation to the settlor.[18]

If B is UK resident, B will in principle be subject to tax on the income payment (under ordinary principles or s.731 ITA). (B does not qualify for the s.624 beneficiary defence in this case, if my analysis is correct.)

### 24.5.3 *Income payment to settlor-beneficiary*

Suppose:

(1) trustees pay the income to the settlor (as the settlor's income); and

17 Compare 9.3.5 (Capital/income terminology in remittance basis context).

18 Except that if B is not a relevant person, it would be harder to have a remittance within the ITA definition.

(2) S remits the income.

This gives rise to a charge under the s.624 remittance basis. This must be why s.685A is worded differently for settlors and other beneficiaries. The argument above does not apply since the sum paid to S does not become the income of S. This may explain why s.624 beneficiary relief has different rules for the settlor and for other beneficiaries.

There is similarly a charge under the s.624 remittance basis if:

(1) the trustees accumulate the income;
(2) the trustees pay it to the settlor as capital; and
(3) the settlor receives the sum outside the UK but remits the sum to the UK.

Suppose the trustees use the income to repay an existing loan to S. The loan is repaid outside the UK. It is suggested that the income is not remitted, as the settlor's receipt represents the original money loaned, not the trust income.

Suppose the trustees use the income to make a loan to S. This will be caught if the borrowed money in the hands of S is regarded as derived from the trust income; see 10.14.5 (T lends to R).

### 24.5.4 *Transitional rule for pre-2008 trust income*

Para 86(4) Sch 7 FA 2008 provides (so far as relevant):

> ... in relation to an individual's income and chargeable gains for the tax year 2007–08 or any earlier tax year, section 809L has effect as if the references to a relevant person were to the individual.

This disapplies the relevant person rule for pre-2008 income.

This is extended by para 86(4A) inserted with retrospective effect by the FA 2009:

> For the purposes of sub-paragraph (4), section 648(2) to (5) of ITTOIA 2005 (and corresponding earlier enactments) do not apply (so that relevant foreign income which arose under a settlement in the tax year 2007-08 or any earlier tax year is to be treated as income for the tax year in which it arose).

The point is that pre-2008 trust income is only remitted if received/used/enjoyed by the settlor in the UK. Receipt (etc) by a relevant person does not count. See 10.8 (Relevant person transitional rule for pre-2008 income and gains). The RDR Manual provides:

> **31490 Relevant persons and foreign income and gains arising to a settlement before 6 April 2008** [March 2011]
> *Background*
> As explained in RDRM31480 s.809L ITA has introduced the concept of 'relevant person'RDRM33030 which, broadly, provides that a taxable remittance will occur when foreign income or gains are brought into or otherwise used in the UK by relevant persons.
> Where a settlor creates a settlement and retains an interest in the property in that settlement the income arising to the trust is treated, for income tax purposes, as the income of the settlor alone under s624 ITTOIA. This is the case even where the trust income is paid to someone other than the settlor. Refer to RDRM33590 Settlements: Chapter 5 Part 5 ITTOIA.
> Where a settlor claims to use the remittance basis, section 648 provides for the trust income to be treated as arising in the year in which it is remitted. Because of the narrower definition of remittance which applied before 6 April 2008 this would produce an inequitable result where relevant foreign income that arose to a settlement before 6 April 2008 is remitted and becomes chargeable on the settlor after 6 April 2008.
> *Transition*
> The transitional rule provides that in establishing whether there has been a remittance of an individual's income and gains for 2007-08 or any earlier year Conditions A and B, Condition C and Condition D at s.809L ITA (refer to RDRM33020 Meaning of Remittance) are applied as if references to 'relevant person' are to the individual.
> For the purpose of applying this transitional rule only, that is, for the purpose of determining whether there is any benefit under the provisions of paragraph 86(4) only the income is treated as arising in the year that it arose to the settlement.
> *Effect*
> This means that income arising under a settlement in tax years prior to 5 April 2008 but which is remitted after 6 April 2008 is not treated as remitted by the settlor unless it has been brought to, received by or used in the UK for his benefit.

## 24.6 S.624 remittance basis planning

Practical ways of avoiding the s.624 remittance basis charge are as follows:

(1) Give the settlor an interest in possession, so trust income is taxed on the RFI remittance basis, and is outside s.624.[19]
(2) The trustees do not remit any trust funds to the UK and if the trustees pay the income in any form to the settlor, the settlor does not remit that income.
(3) The trustees segregate trust income and trust capital and remit trust capital, not trust income. There is no charge under the s.624 remittance basis if trustees remit to the UK a sum which is not income arising under the settlement.

## 24.7 Non-resident settlor

The legislation again uses the clumsy but effective drafting technique of restricting the definition of "income arising under a settlement". That term is defined in a commonsense way in s.648(1)[20] and s.648(2) then continues:

> But if, in a tax year, the settlor is not UK resident, references in this Chapter to income arising under a settlement do not include income arising under the settlement in that tax year in respect of which the settlor, if actually entitled to it, would not be chargeable to income tax by deduction or otherwise because of not being UK resident.

Where the settlor is non-resident, UK source trust income is within the scope of s.624, but foreign income is not.[21] Contrast s.720 ITA which does not apply at all unless the transferor is ordinarily resident.

### 24.7.1 *UK resident trust, non-resident settlor*

The trustees are taxed in full on foreign source income. This prevents s.624 applying where it might benefit the taxpayer.

However the settlor is taxed on UK source income. This is beneficial if the settlor's marginal rate is less than the top rate of income tax, or if non-

19 See 24.2.3 (Income of life tenant settlor).
20 See 24.2 (Meaning of "income arising under a settlement").
21 This is clear on the words of the section, but if authority is needed, see *IRC v Countess of Kenmare* 37 TC 383.

residents income tax relief applies.[22]

### 24.7.2 *Non-resident trust, non-resident settlor*

Neither the trustees nor the settlor are taxed on foreign source income. The settlor is taxed on UK source income. This is beneficial if the settlor's marginal rate is less than the top rate of income tax, or if the circumstances are that non-residents income tax relief is available to the settlor and not to the trustees, which could happen because of the UK beneficiary rule.[23]

### 24.7.3 *Remittance of trust income*

It does not matter for the non-resident settlor if trust income is remitted. Suppose:-

(1) Income arises to the trustees of a settlor-interested trust while the settlor is non-resident (**"non-resident period income"**).
(2) The income is remitted by the trustees when the settlor is resident and a remittance basis taxpayer.

Section 648 ITTOIA provides:

> (3) And if, for a tax year, section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the settlor, references in this Chapter to income arising under a settlement include in relation to any relevant foreign income arising under the settlement in that tax year only such of it as is remitted to the UK (in that tax year or any subsequent tax year) in circumstances such that, if the settlor remitted it, the settlor would be chargeable to income tax...
> (5) Where subsection (3) applies the remitted income is treated for the purposes of this Chapter as arising under the settlement in the tax year in which it is remitted.

It may seem at first sight that the non-resident period income is caught as it is treated under s.648(5) as arising in the year of remittance. That is however, not the case, for two reasons:

(1) The circumstances are not "such that, if the settlor remitted the non-

22 See 37.1 (Non-residents IT relief).
23 See 37.1 (Non-residents IT relief).

resident period income, the settlor would be chargeable to IT". Unless the settlor is UK resident when the income arises, the settlor would not be taxed on it when remitted later, even if it had been the settlor's income all along.
(2) Non-resident period income is not "income arising under the settlement" by virtue of s.648(2).
The result is sensible and consistent with rule that income of an individual arising during a non-resident period is not taxable if remitted during a resident period.[24]

## 24.8 Two or more settlors

Section 644 ITTOIA provides:

> (1) In the case of a settlement where there is more than one settlor, this Chapter has effect in relation to each settlor as if that settlor were the only settlor.
> (2) This works as follows.
> (3) In this Chapter, in relation to a settlor—
> (a) references to the property comprised in a settlement include only property originating from the settlor, and
> (b) references to income arising under the settlement include only income originating from the settlor.
> (4) For the purposes of sections 629, 631 and 632 only the following are taken into account in relation to a child of the settlor—
> (a) income originating from the settlor, and
> (b) in a case in which section 631 applies, payments which under that section (as adapted by subsection (5) below) are treated as payments of income.
> (5) In applying section 631 to a settlor—
> (a) the reference to income arising under the settlement includes only income originating from the settlor, and
> (b) the reference to any payment made in connection with the settlement includes only a payment made out of property originating from the settlor or income originating from the settlor.
> (6) See section 645 for the meaning of references in this section to property or income originating from a settlor.

24 See 9.20 (RFI/gains arising when non-resident, remitted when resident).

Section 645 ITTOIA (flagged unnecessarily by s.644(6)) defines "property originating from a settlor":

> (1) References in section 644 to property originating from a settlor are references to—
> (a) property which the settlor has provided directly or indirectly for the purposes of the settlement,
> (b) property representing property so provided, and
> (c) so much of any property which represents both property so provided and other property as, on a just and reasonable apportionment, represents the property so provided.
> (2) References in section 644 to income originating from a settlor are references to—
> (a) income from property originating from the settlor, and
> (b) income provided directly or indirectly by the settlor.
> (3) In this section references to property or income which a settlor has provided directly or indirectly—
> (a) include references to property or income which has been provided directly or indirectly by another person under reciprocal arrangements with the settlor, but
> (b) do not include references to property or income which the settlor has provided directly or indirectly under reciprocal arrangements with another person.
> (4) In this section references to property which represents other property include references to property which represents accumulated income from the other property.

## 24.9 Tax return disclosure

The TSE Manual provides:

> **4575 2006–2007 onwards** [February 2011]
> The settlor returns all UK source trust income, without deducting management expenses, on the Trusts etc pages. Foreign source income goes on the Foreign pages.

## 24.10 Taxation of trustees of settlement within s.624

This frustrating topic is not considered in this book. For an introduction see "Tax Charge Doubled!" Malcolm Gunn, *Taxation* 22 February 2007.

HMRC Trusts and Estates Newsletter (December 2010) provides:

**Trusts and Estates - mandated income of settlor-interested trusts**
*Step 1 of the Trust and Estate Tax Return (SA900)*
Sometimes the trustees of an interest in possession (IIP) trust mandate trust income to a beneficiary. If the trustees mandate income to a beneficiary, it means that the beneficiary receives it and the trustees do not. The guidance on this is at Trusts Settlements and Estates Manual (TSEM) 3761 to 3762.[25]
Step 1 of the Trust and Estate Tax Return (SA900 page 2) does not require a full return to be made, nor income tax to be paid, where all income is mandated to an IIP beneficiary. However, that practice does not currently apply where the trust is settlor interested. Following a review of that practice, HMRC has concluded that where income is mandated to an IIP beneficiary of a settlor-interested trust there is no statutory basis for taxing the trustees as being in receipt of the income. The settlor is taxed on any income (or income from property) in which he or she has a retained interest.
The SA900 for 2010-11 has been amended to reflect the change of view. HMRC will no longer require a fully completed return from trustees of settlor interested trusts in respect of income that is mandated to an IIP beneficiary. Where trustees have already received either a paper return or a notice to file a return for 2009-10 and all income is mandated, they should complete Step 1 accordingly.[26]

## 24.11 Taxation of life tenant (not settlor) of settlor-interested trust

Suppose a settlor-interested settlement under which a beneficiary ("B", not the settlor) has an interest in possession. Income within s.624 ITTOIA is treated as the income of the settlor and of the settlor alone, so that B cannot be taxable on it. B is in principle taxable on income not within s.624, that is, income within the s.624 non-residence defence or s.624 remittance basis.

## 24.12 Settlor indemnity

Section 646 ITTOIA provides:

(1) A settlor is entitled to recover from—

25 See 23.2.1 (Income mandated to life tenant).
26 *www.hmrc.gov.uk/cto/tep-newsletter12-10.pdf.*

(a) any trustee, or
(b) any other person to whom the income is payable in connection with the settlement,

the amount of any tax paid by the settlor which became chargeable on the settlor under section 624 or 629.

For the tax implications see 27.4.10 (Reimbursement of tax under statutory indemnity); 27.21 (Relevant income used to pay expenses) and 69.21 (Failure to exercise right of reimbursement).

## 24.13 Section 624 *v.* s.720: comparison and priority

Sections 624 ITTOIA and 720 ITA cover some similar ground. For a full comparison one would need to read all the relevant chapters in this book. It may be helpful to summarise the major differences:

| **Section 624** | **Section 720** |
|---|---|
| Applies to trusts | Applies to non-resident trusts *and companies* |
| No motive defence | Motive defence |
| Settlor indemnity | No indemnity for transferor |
| Applies generally | Applies to *ordinarily* resident transferor |

The rates of tax are slightly different, a (probably accidental) result of the FA 2006.[27]

Where both s.720 ITA and s.624 ITTOIA apply (or appear to apply), which has priority? It must be one or the other: the settlor/transferor cannot be taxed twice on (effectively) the same income. Section 720 originated in 1936, s.624 originated in 1938. But there is no reason why that distant historical priority should determine the issue. Income within s.624 is treated as income of the settlor "*and of the settlor alone*". Section 720 lacks those additional words. So it is considered that s.624 has priority over s.720. Where s.624 applies, the transfer of asset conditions are not satisfied, because if the income is that of the settlor alone, it is not the income of the person abroad.

27 See 41.5 (Settlor-interested trust: rates of tax on settlor).

## 24.14 Settlor receives capital sum

Section 633 ITTOIA provides:

> (1) Any capital sum paid directly or indirectly in any tax year by the trustees of a settlement to the settlor is treated for income tax purposes as follows.
> (2) The sum is treated as the income of the settlor for the tax year so far as the amount of the sum falls within the amount of income available up to the end of the year.

Section 634 ITTOIA defines capital sum and sums paid to the settlor, but is not sufficiently important to be worth discussing here.

The key term is "available income." Section 635 ITTOIA provides the definition:

> **635 Amount of available income**
> (1) For the purposes of section 633 the amount of income available up to the end of any tax year is, in relation to any capital sum paid as mentioned in subsection (1) of that section by the trustees of a settlement, calculated as follows.
> (2) Add together the amount of income arising under the settlement in that year and any previous year which has not been distributed.
> (3) Deduct from that figure—
> (a) the amount of that income taken into account under section 633 in relation to that sum in any previous year or years,
> (b) the amount of that income taken into account under section 633 in relation to any other capital sums paid to the settlor in any year before that sum was paid,
> (c) any income arising under the settlement in that year or any previous year which has been treated as income of the settlor under section 624 or 629 ...

Section 633 is generally irrelevant to settlor-interested trusts. The trust income will fall into one of two categories:

(1) It will be treated as accruing to the settlor under s.624, or
(2) (if the s.624 remittance basis applies or the settlor is non-resident) it will not be "income arising under the settlement".

In either case there is no "available income".

Section 633 is intended to catch capital sums paid to the settlor (or spouse) from a trust which is not settlor-interested. Accordingly I shall not discuss the section further here.

## 24.15 Interaction of s.624 and s.37 TCGA

Section 37(1) TCGA deals with the relationship between IT and CGT:

> There shall be excluded from the consideration for a disposal of assets taken into account in the computation of the gain any money or money's worth
> [a] charged to income tax as income of, or
> [b] taken into account as a receipt in computing income or profits or gains or losses of,
> the person making the disposal for the purposes of the Income Tax Acts…

Thus IT has priority over CGT.

The section does not work when s.624 applies as the income is treated for IT purposes as income of the settlor and not the trustees! HMRC suggest a creative application of s.32 TMA may solve the problem. CG Manual para 14304 provides:

> **14304. Sums chargeable as income**
> This exclusion does not apply to … situations where the income in question is not treated as the income of the person making the disposal. Typically this is a case of a settlor interested trust where the income is taxed on the settlor. If in this situation the settlor is assessable to both income tax and capital gains tax then relief may be available under s.32 TMA 1970.

Suppose a settlor-interested discretionary trust. Income accrues to the trustees. The settlor pays income tax. What stops the trustees realising a chargeable gain, on which the trustees may be chargeable if UK resident, or which may be s.2(2) amounts if the trust is not UK resident? Ths solution does not lie in s.32 TMA as it is not the case that the settlor is assessable to both IT and CGT. There is nothing obvious to stop the trustees realising a chargeable gain. But no-one suggests that there is a charge. The solution must be in a general implied rule that receipts of an income nature are not within the scope of CGT.

## 24.16 Corporate settlor

Section 624 ITTOIA does not apply to a UK company settlor even if (which is rare) the company is the settlor of a settlor-interested settlement-arrangement. That section only applies for the purposes of income tax and not for corporation tax.

For completeness, it is also considered that the section does not apply to a non UK company settlor, but in practice this issue is not likely to arise.

CHAPTER TWENTY FIVE

# TRANSFER OF ASSETS ABROAD: INTRODUCTION

## 25.1 TAA – Introduction

Non-resident trusts and companies pay no UK tax on foreign income. A non-resident company may pay less tax on UK income. These rules present an obvious means of income tax avoidance. HMRC's first answer to this is Chapter 2 Part 13 ITA, entitled "Transfer of assets abroad".

There are strictly three charging provisions – ss.720, 727 and 731 – but for practical purposes there are two, as s.727 is only a minor supplement to s.720. This chapter considers the requirements they have in common. The next two chapters consider them individually.

The discussion of the provisions in International Manual 600000 contains almost nothing significant, but *thirty eight* paragraphs are withheld "because of exemptions in the Freedom of Information Act 2000". Information may be withheld if disclosure would be likely to prejudice the assessment or collection of tax.[1] No doubt parts of the withheld text do fall into that category, identifying tax avoidance possibilities or procedures to detect evasion. I expect that the bulk of the withheld text is simply a discussion of the law. Disclosure only prejudices tax collection if one takes the view that uncertainty in the scope of anti-avoidance law is desirable. This is constitutionally wrong. The principle of legal certainty is an important aspect of the rule of law. (That is the basis on which the Manuals are published in the first place.) It is also pragmatically wrong. Legal certainty is in the interest of HMRC as well as private citizens. If HMRC are not prepared to state their view then

1 s.31(i)(v) Freedom of Information Act 2000. It is interesting to speculate whether some text might actually be withheld because it acknowledges that parts of RI 201 cannot seriously be defended as correct.

private citizens must do as best they can. They can hardly be guilty of neglect if they form wrong views in this difficult area in which HMRC are themselves not prepared to comment, and this is likely to lead to loss of tax. But there it is.

On 31 March 2009 HMRC published some guidance on the ITA remittance basis rules as they apply to the TAA provisions. This is headed TAH (= Transfer of Assets Handbook).

## 25.2 "Relevant transfer"

The key concept is "relevant transfer". The charges only apply if a relevant transfer occurs. Section 716(1) ITA provides:

> A transfer is a relevant transfer for the purposes of this Chapter if—
> (a) it is a transfer of assets, and
> (b) as a result of—
> (i) the transfer,
> (ii) one or more associated operations, or
> (iii) the transfer and one or more associated operations,
> income becomes payable to a person abroad.

This sets out the following basic conditions:

(1) *A transfer of assets*.
(2) *Income becomes payable to person abroad*.
(3) *Causation*: Condition (2) is caused by (i) the transfer, or (ii) associated operations, or (iii) both. I refer to this as "**the relevant transfer causation conditions (i), (ii) and (iii)**", or together "**the relevant transfer causation conditions**".

These basic conditions are the subject of this chapter. However the fact that there is a relevant transfer is not sufficient in itself to cause a tax charge. The further conditions in the various charging sections must be satisfied. These are considered in the next two chapters.

## 25.3 A "transfer" of "assets"

Section 716(2) ITA provides:

> In this Chapter "transfer", in relation to rights, includes the creation of the rights.

If two parties enter into a contract there are *two* transfers of assets as both parties acquire rights.

In *IRC v Brackett* 60 TC 134, T entered into a contract of employment with a person abroad, an offshore company in which he was interested. Rights under a contract of employment are an "asset". Entering into a contract of employment is a "transfer". So T was taxed on all income accruing to the company as a result of the transfer.

If B borrows from L there are two transfers of assets, for B acquires the money borrowed and L acquires a debt. If L is non-resident, then the interest is income accruing to a person abroad.

Note that there may be a "transfer of assets" in circumstances where there is no individual who is the "transferor".

## 25.4 Person abroad

Section 718(1) ITA provides:

> In this Chapter "person abroad" means a person who is resident or domiciled outside the UK.

### 25.4.1 *Foreign incorporated company*

Section 718(2) ITA provides:

> For the purposes of this Chapter, the following persons are treated as resident outside the UK—
> (a) a UK resident body corporate that is incorporated outside the UK.

This is otiose because a foreign incorporated company is domiciled outside the UK[2] and so even in the absence of this provision it is within the definition of a "person abroad".

The rule that a UK resident foreign incorporated company should fall within the definition of "person abroad" made sense before the introduction of corporation tax in 1965; until then, a UK resident foreign incorporated company was only taxed on the remittance basis. Since 1965 the rule is not appropriate because a UK resident company pays tax on its

2 See 2.16 (Domicile of company).

profits on an arising basis, even if foreign incorporated, so there is no need for the TAA provisions to apply. However s.3(1) CTA 2009 provides:

> **3 Exclusion of charge to income tax**
> (1) The provisions of the Income Tax Acts relating to the charge to income tax do not apply to income of a company if—
> (a) the company is UK resident, or
> (b) the company is not UK resident and the income is within its chargeable profits as defined by section 19.

It is considered that s.720 is a "provision of the income tax acts relating to the charge of income tax" so it does not apply to income of a UK resident company. It is considered that the same applies to s.731.

This makes good sense, because if the profits are subject to corporation tax, HMRC do not need the TAA provisions. This view is also supported by CTA 2009 EN:

> **Clause 3: Exclusion of charge to income tax**
> 46. This clause ensures that income of a company within the charge to corporation tax is not chargeable to income tax as well as corporation tax. It is based on section 6(2) of ICTA.

This argument was put in *IRC v Levy* but the judge expressed no view.[3] HMRC do not officially agree,[4] but they may not have considered this point.

One situation in which this issue arises is where a foreign incorporated company is accidentally UK resident, because of a failure to ensure that it is managed and controlled outside the UK. A second situation is where one deliberately uses a UK resident but foreign incorporated company. This may be done in order to obtain the IHT or CGT advantages of foreign situate property.[5] There may however be commercial reasons why it is desired that a foreign incorporated company should be managed and controlled in the UK, and the tax system should hardly aim to discourage that. If it were desired to restrict the tax advantages (such as they are) of

---

3 56 TC 58 at [87]. HMRC's answer was to rely on s.9 ICTA 1988, but I cannot see how that helps. (Unfortunately the argument was not put in *R v Dimsey & Allen* 74 TC 263, but that should not preclude its being taken now.)

4 See 28.2.1 (Transferor's credit).

5 See 28.2 (Undistributed UK taxable income of offshore company).

UK resident foreign incorporated companies, the TAA provisions are certainly not the way to go about it.

It is considered that s.718(2) should be repealed and replaced by a rule that a UK resident company is not a "person abroad". If my analysis is right, the subsection is otiose, but if my analysis is wrong, it is undesirable if not pernicious.

### 25.4.2 *Trustees and PRs*

Section 718(2) ITA provides:

> For the purposes of this Chapter, the following persons are treated as resident outside the UK—
>
> ...
>
> (b) the person treated as neither UK resident nor ordinarily UK resident under section 475(3) (trustees of settlements), and
>
> (c) persons treated as non-UK resident under section 834(4) (personal representatives).

This is otiose because the statutory residence rules for trustees and PRs clearly state when they are regarded as resident outside the UK for IT purposes.

## 25.5 Income "becomes payable" to person abroad

The condition here is that income becomes payable to a non-resident or foreign domiciled person (the person abroad).

This condition is satisfied where the transfer is to a UK resident and domiciled person who later becomes non-resident or foreign domiciled.[6]

In *Latilla v IRC*[7] a partnership share was transferred to a company abroad which received its share of the partnership profits. It was argued that trading profits could not be described as income *payable* to the company. Trading "income" is the result of a computation in trading accounts. The gross receipts of the trade or gross rents are not the income. The House of

6 *Congreve v IRC* 30 TC 163 (a gift to a company which became non-resident), approved on this point in *IRC v Willoughby* 70 TC 57.

7 25 TC 107. I mention for completeness only that this was followed in *Brackett v Chater* 60 TC 143.

Lords rejected this argument and held that there was no difference between trading income and other types of income. It seems surprising today that this technicality was thought arguable, so far has the pendulum swung from literal to purposive construction.

Suppose T transfers money to a person abroad, and the person abroad uses the funds to repay a debt. In principle, no income arises to the person abroad as a result of the transfer, so the transfer does not satisfy the transfer of asset provisions.[8]

### 25.5.1 *Transfer from one person abroad to another*

Suppose assets are transferred from one person abroad to another, eg from offshore trustees to an offshore company. Can one argue that there is no relevant transfer because one cannot say that income *becomes* payable to a person abroad? It was payable to a person abroad even before the transfer! The argument is linguistically possible, but the context shows that it is wrong. If the argument was right then a transfer by a non-resident or foreign domiciled transferor would never be a relevant transfer, which is certainly not the case.

## 25.6 Situs of transferred assets

The heading "transfer of assets abroad" might suggest a requirement that UK situate assets must become non-UK situate, but that is obviously not the case.

It has been suggested that the assets must be UK situate at the time of the transfer. This was rightly rejected by the Special Commissioner in *IRC v Willoughby* 70 TC 57 at 79. The taxpayer wisely abandoned this point on appeal.

## 25.7 Transfer for full consideration

A relevant transfer may be made for full consideration and need have no element of "bounty" or gratuitous intent. (Contrast the settlement

8 The example is based on the facts of *Fynn v IRC* 37 TC 629 where this s.720 point was not argued, presumably, because the Revenue accepted this view was correct. For other issues raised by this case, see 26.12.3 ("Connected with any relevant transaction").

provisions.)[9]

### 25.7.1 *Purchase of asset from person abroad*

Suppose T buys an asset from a person abroad for cash ("the purchase price"). At first glance, the payment of the cash purchase price is a relevant transfer. The payment is a transfer of assets; as a result of the payment, income (from the cash) will normally accrue to the person abroad. However, it is suggested that this is not the case if:
(1) the asset would otherwise have yielded income to the person abroad;[10]
(2) the purchase price does not exceed the value of the asset.
In these circumstances, the person abroad acquires the income of the cash purchase price T transfers to them, but T loses the income from the asset which they sell to T. If the two (broadly) cancel each other out, it cannot be said that any "income becomes payable" to the person abroad. If that is right, the transfer of asset conditions are not satisfied every time someone sells an asset to (or buys an asset from) a non-resident person. That would be a sensible result. If T sells assets to an offshore trust, say, or to an offshore company, it would be surprising if T's only defence to TAA was the motive defence.[11]

### 25.7.2 *Income arising must be identifiable*

The provisions assume that one can *identify* the amount of income which arises to the person abroad as a result of the transfer. If that identification is not possible then the transfer of asset provisions do not - indeed cannot - operate.

John Avery Jones raises this question:

> What about buying a ticket from a foreign airline, buying a meal or

---

9 See 69.2.3 (Settlement-arrangement definition of settlement).

10 This would not of course be the case if T transfers assets to an offshore company in consideration of an issue of shares or debentures or a life policy.

11 In such cases T would often have "power to enjoy". Unless this is right, there is double taxation. T may be liable under s.720 for income tax on the income arising from the asset sold to the person abroad. T is also liable to income tax on income arising from the proceeds which T receives on the sale of the same asset.
If my view is wrong, then the motive defence should be generously applied in cases of a sale for full consideration.

> paying for a hotel room when abroad? There is a transfer of assets and it is clear that "income becoming payable" includes the receipt of sums which form part of the recipient's trading profits. Oh, and there is my IFA subscription, my subscription to *European Taxation*, my purchase of that overpriced new edition of *OECD Model Tax Convention*, and the new edition of *Klaus Vogel on Double Taxation Conventions* direct from the publisher. Foreign entities all of them. I expect if I think for a moment I shall think of lots more. What about my (foreign) car? Did I buy it from an agent for the manufacturer or from a UK subsidiary, and does it make any difference anyway?[12]

These are all transfers of assets, and trading income is payable to the person abroad. But none of these transfers are relevant transfers because one cannot identify the income which becomes payable as a result of them.[13]

The question whether one can identify the income which arises to the person abroad as a result of a transfer sometimes overlaps with the question whether one can identify a transferor. In *IRC v Pratt* 57 TC 1 the taxpayers were held not to be transferors because one could not identify income arising to the person abroad from what each individual taxpayer had contributed or done.[14] But the two questions are in principle distinct. A person who subscribes for shares in Microsoft Inc is clearly a transferor, but one cannot identify what income accrues to Microsoft as a result of that transfer, so the transfer of asset provisions do not apply.

### 25.7.3 *Deposit in offshore bank account*

If T deposits money with a bank, the trading receipts of the bank are increased, though that may be reduced or almost cancelled by the interest the bank pays to T. There is still a profit overall, if the bank is profitable, but that element of profit cannot be identified. The deposit is a transfer of assets but it is not a relevant transfer because one cannot identify the income which becomes payable as a result of it.

---

12 [1998] BTR 392.

13 Of course in practice considerations of materiality might also arise. An independent reason why the transfers of assets are not relevant transfers is that (maybe) that no income becomes payable as a result of them: see 25.5 (Income "becomes payable" to person abroad).

14 See 26.3.2 (Transfer procured by individual).

### 25.7.4 *Transfer for issue of shares or debentures*

Suppose T transfers an asset to a foreign company in exchange for the issue of shares or debentures in that company (set up for the purpose and wholly owned by a trust or structure set up by T). This may well be transfer for full consideration. It is nevertheless a relevant transfer. Indeed it is the archetypal TAA situation. Tax avoidance arrangements set up in the 1920s and 1930s typically involved the transfer of assets to a Canadian company in consideration of debentures issued by that company.

Contrast the position if T subscribes for shares or debentures in (say) a large quoted foreign company or collective investment scheme. This is not a relevant transfer as one cannot identify the income which arises as a result of the transfer.

### 25.7.5 *Transfer for issue of bond or life insurance policy*

The same applies if T subscribes for a bond or life insurance policy from a large foreign institution. One cannot normally identify the income arising to the institution as a result of the transfer so this is not a relevant transfer. However, if the transfer is linked to particular investments actually made by the institution (as is usually the case for a personal portfolio bond), it would in principle be possible to identify the income, and there would be a relevant transfer.

### 25.7.6 *HMRC view*

EN FB 2006 states:

> [1] The [transfer of asset] provisions do not affect an individual's personal direct offshore investments. They only apply where an individual is able to enjoy income in a form that would otherwise be non-taxable (or subject to a lower rate of taxation), and there is a purpose to avoid UK tax.
> [2] So the legislation would not apply where, for example,
> [a] a UK resident invests directly in an offshore bank account or
> [b] buys shares in a company quoted on an overseas stock exchange, because the income arising from such investments remains liable to UK

tax in the usual way.[15]

Example [a] is the person who invests[16] in an offshore bank account. That person makes a transfer of assets to a person abroad (the bank). It is broadly[17] true that the income from such investments (ie bank interest) "remains liable to tax in the usual way". But while this explains why HMRC do not wish to apply s.720 ITA, it does not actually offer any defence to the provisions.[18] (This fact is relevant to the motive defence, but it would be surprising if the only defence to s.720 was the motive defence.)[19] The true reason is that one cannot identify any income of the bank which becomes payable as a result of the transfer, so the transfer is not a relevant transfer.

Example [b] is the person who buys shares on an overseas stock exchange. The example is misconceived. A person who buys shares does not make a relevant transfer of assets, unless the vendor is abroad; and the fact that the shares are "quoted on an overseas stock exchange", like the flowers that bloom in the spring, has nothing to do with the case. If the vendor is abroad (perhaps the EN assumes this) the transfer is not a relevant transfer for the reason set out above.

Whatever one thinks of the reasoning of the EN, it does appear that the conclusions reached in this section would generally be acceptable to HMRC.

## 25.8 Income accruing to person abroad: causation conditions

There is not a relevant transfer merely because there has been a transfer of assets and income has become payable to a person abroad. The income must become so payable as a result of the transfer (or associated operations). The test is one of causation.

---

15 EN to s.79, para 63.

16 A lawyer would call this a loan or deposit, not an "investment", but nothing turns on that.

17 It is not strictly true that income from offshore investments remains liable to UK tax "in the usual way". A remittance basis taxpayer may invest in a foreign account to qualify for the remittance basis. An arising basis taxpayer obtains the tax advantage that tax is not deducted at source, and DTA relief may apply.

18 See 26.4 (Must the transferor avoid or intend to avoid IT?).

19 No-one expects the depositor to claim the motive defence in their tax return.

### 25.8.1 *Purchase of secondhand company by individual*

Suppose T (UK resident) buys the shares of an already existing non-resident company ("**a secondhand company**"). Assume the company owns assets. That purchase involves a transfer of assets by T – payment of the purchase price[20] – is described in the following discussion as "**the purchase price transfer**".

It is the case that income accrues to a person abroad (the company). However, it cannot be said that the income became payable to the company as a result of the purchase price transfer. The company merely continues to receive the income from its own assets, as it did before, and is not in any way affected by the change in ownership of its shares. Thus if the vendor is UK resident and domiciled, the purchase price transfer is not a relevant transfer.

Now suppose T purchases the shares from a person abroad. In that case the purchase price transfer may be a relevant transfer because the vendor may invest the proceeds of sale and receive income as a result of that transfer. However, the income arising as a result of the purchase price transfer would be the income accruing to the vendor, not the company's income.

In these cases there will have been (at least) one other transfer of assets, the transfer of assets to the secondhand company (eg on a subscription for the company's shares). I call this "**the company funds transfer**". The company funds transfer is a relevant transfer. If T is the transferor of that transfer then T will in principle be within s.720 and taxed on the secondhand company's income.[21] If T is not the transferor, T may be subject to tax under s.731 if T receives benefits (unless the company funds transfer qualifies for the motive defence).

The secondhand company may later make a relevant transfer.[22] If T procures that transfer, T is its transferor.

---

20 The sale in fact involves two transfers of assets: payment of the purchase price to the vendor and transfer of the shares to T.

21 As to whether T is the transferor, see 26.3 (Who is the transferor?).

22 For instance, a transfer to a non-resident subsidiary. A straightforward sale of assets by the company may not be a relevant transfer because no income becomes payable. See 25.7.1 (Purchase of asset from person abroad).

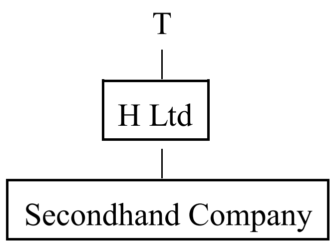
### 25.8.2 *Purchase of secondhand company by holding company*

Now suppose:

(1) T transfers assets to H Ltd, an offshore company ("**the H transfer**").

(2) H uses its funds to purchase a secondhand company ("**the purchase price transfer**").

Thus the position is:



A similar analysis applies:

(1) The H transfer is in principle a relevant transfer. However, no income arises to a person abroad as a result of that transfer.[23]

(2) The purchase price transfer is not a relevant transfer. No income accrues to a person abroad as a result of that transfer. Income does arise to the secondhand company, but not as a result of the H transfer or the purchase price transfer.

Suppose H Ltd then provides additional funds for the secondhand company, directly or indirectly. It appears then that the secondhand company will receive income as a result of the H transfer[24] and T will be subject to tax under s.720 on the income accruing to the secondhand company from the additional funds, if that income can be identified.

## 25.9 Associated operation: definition

Section 719(1) ITA provides just about the widest definition the drafter could devise:

> In this Chapter "associated operation", in relation to a transfer of assets, means an operation of any kind effected by any person in relation to—
> (a) any of the assets transferred,

---

23 Assume no income accrues to H (the secondhand company does not pay a dividend).

24 Together with an associated operation (the provision of funds by H).

(b) any assets directly or indirectly representing[25] any of the assets transferred,
(c) the income arising from any assets within para (a) or (b), or
(d) any assets directly or indirectly representing the accumulations of income arising from any assets within para (a) or (b).

An associated operation does not exist in isolation, it exists in relation to a transfer. There are two requirements:
(1) It must be an "operation".
(2) It must be "effected in relation to" items (a) to (d); I describe this as being "associated" with a transfer.
The term "associated operations" is also used in the IHTA. However, the definition is different so only limited assistance can be drawn from IHT cases.

### 25.9.1 *"Operation"*

"Operation" is (rightly) not defined but is clearly a word of wide import. It includes a company becoming non-resident.[26] It does not include death, but that does not matter because it does include the act of making a will.[27]

In *Herdman v IRC* 45 TC 394 there was a sale (ie transfer) of assets to an Irish company. The company then "accumulated" income and "managed" its assets so as to be able to repay a loan to the transferor. These were held to be "operations" by most of the judges but this is obiter

---

25 "Representing" is defined in s.717(b) ITA:
"references to assets representing any assets, income or accumulations of income include references to—
(i) shares in or obligations of any company to which the assets, income or accumulations are or have been transferred, or
(ii) obligations of any other person to whom the assets, income or accumulations are or have been transferred."
Thus if (1) T transfers assets to a company and (2) T transfers the shares in the company to another person, the second transfer is an associated operation in relation to the first. This would not have been clear without the definition.

26 *Congreve v IRC* 30 TC 163.

27 *Bambridge v IRC* 36 TC 313. This case contains Harman's aphorism: "Death, as we know, is an awfully big adventure, but even the Crown admits that it is not an associated operation." This is in fact obvious, because death is not "effected by a person in relation to assets".

and extremely difficult to accept. Unlike IHT, "operation" does not include an omission. A company does not "accumulate" income (in the legal sense). If "management" is an operation then everything is an operation (all assets must be "managed") and the expression makes no sense. Lords Pearce and Reid (more judiciously) left open the question of whether these were "operations".

### 25.9.2 *"Associated"*

In *Fynn v IRC* 37 TC 627:

(1) in 1948 T transferred assets to an Irish company ("the original transfer");
(2) in 1952 T lent money to the company ("the 1952 loan").

The 1952 loan was not an associated operation in relation to the original transfer, because it was not effected "in relation to" the assets transferred by the original transfer.
In *Carvill v IRC*:[28]

(1) T transferred assets to a Bermudian company (B Ltd) in exchange for shares, and so became a majority shareholder in B Ltd ("the original transfer").
(2) T became a 100% shareholder in B Ltd by (a) purchasing shares and (b) B Ltd purchasing its own shares.
(3) B Ltd entered into arrangements to remunerate T via a personal services company and a brokerage sharing agreement.

Steps (2) and (3) were not operations associated with the original transfer: they did not relate to the assets transferred by the original transfer.

### 25.9.3 *Associated operation preceding the transfer*

Section 719(2) ITA provides:

> It does not matter whether the operation is effected before, after, or at the same time as the transfer.

This provision (introduced in 2006) gives statutory effect to the view

28 [2000] STC (SCD) 143 at [80]-[85], 75 TC 477 (Special Commissioners).

formerly expressed in RI 201.[29] I cannot think of a practical case where it would matter and would be grateful to any reader who could explain why HMRC thought this point was worth legislating for.

### 25.9.4 *Is mere historical association enough?*

On a simply reading of the definition, an operation can be "associated" with an earlier transfer even if the two were not part of any plan and many years apart. Suppose:
(1) A transfers an asset to B (who is UK resident) in 1970; and
(2) B transfers the asset in the year 2010 to an offshore trust under which A may benefit.
On a simple reading, B's disposition is an associated operation in relation to A's transfer even though:
(1) they are not part of a single arrangement;
(2) A is unaware of B's disposition;
(3) B's disposition is itself a relevant transfer;
(4) one or both transfers is a sale on arm's length terms.
The same would apply if A's transfer was made in 1870 or 1670. Indeed, anyone who purchases or disposes of an estate in English land is only effecting the most recent "operation" of a series of associated operations (dispositions of the land) which may perhaps be traced back to the Norman Conquest if not before, and only a lack of records prevents one tracing the sequence of associated operations to the dawn of civilisation. In fact this simple reading cannot be right, for reasons given below.

## 25.10 Significance of associated operations

It is never enough to establish that there is an associated operation in relation to a transfer. This is just the first step. One must then go on to ask what (if anything) follows. The term "associated operations" is used in the definition of "relevant transfer"[30] and it is used in the definition of

---

29 "The wording of s.742(1) ICTA is interpreted as meaning that an associated operation does not necessarily have to take place after a transfer of assets. A transaction undertaken 'in relation to' a transfer of assets can precede the transfer."
That seemed right. The FA 2006 gave no thought to transitional provisions but in the circumstances it does not matter.

30 See 25.2 ("Relevant transfer").

"relevant transaction"; s.715(1) ITA provides:

> A transaction is a relevant transaction for the purposes of this Chapter if it is—
> (a) a relevant transfer, or
> (b) an associated operation.

The existence of associated operations is therefore relevant to the following:

(1) *Section 716 ITA*: Income becomes payable to person abroad as a result of transfer and/or associated operations.[31]

*(2) Section 721 ITA*: Individual has "power to enjoy" as a result of transfer and/or associated operations.

*(3) Section 729 ITA*: Individual receives capital sum connected with any relevant transaction.

*(4) Section 732 ITA*: Individual receives a benefit as a result of the transfer or associated operations.[32]

*(5) Section 733 ITA*: "Relevant income" is income which can as a result of the transfer or associated operations be used for providing a benefit.[33]

*(6) Motive defence*: All relevant transactions must satisfy the conditions of the motive defence.[34]

## 25.11 Person abroad receives income as indirect consequence of transfer

### 25.11.1 *Transfer from A to B followed by transfer from B to person abroad*

Suppose:

(1) In 1970 A transfers an asset to B (who is a UK resident individual) ("A's transfer").

(2) In 2000 B transfers the asset to an offshore trust ("B's trust") under which A may benefit ("B's transfer").

(3) A's transfer and B's transfer are not part of a single arrangement and

---

31 See 25.11 (Person abroad receives income as indirect consequence of transfer).

32 See 27.7 (Benefit causation condition).

33 See 27.30 (Is income of company relevant income?).

34 See 29.39 (Associated operations and motive defence before 5 December 2005) and 29.40 (Transfer and associated operations both after 4 December 2005).

A is unaware of B's transfer.

B's transfer is obviously a relevant transfer. The question is whether A's transfer is a relevant transfer.

It may be helpful to recap the definition. Section 716(1) ITA provides:

> A transfer is a relevant transfer for the purposes of this Chapter if—
> (a) it is a transfer of assets, and
> (b) as a result of—
> (i) the transfer,
> (ii) one or more associated operations, or
> (iii) the transfer and one or more associated operations,
> income becomes payable to a person abroad.

I refer to (i) to (iii) as "causation conditions (i) to (iii)".

A's transfer meets condition (a): it is a transfer of assets. Income becomes payable to a person abroad. Causation condition (i) is not satisfied, that is, it is not as a result of A's transfer alone that income has become payable to the offshore trustees. However, B's transfer is at first sight an "associated operation" in relation to A's transfer. It seems at first sight that causation condition (ii) is satisfied: income becomes payable to the trustees as a result of the associated operation (B's transfer); so A's transfer is a "relevant transfer" and A is taxable under s.720 on the income of B's trust! This clearly cannot be right; but why not? The motive defence is not a satisfactory solution to this problem:[35] one must conclude that A's transfer is not a relevant transfer, that is, it does not satisfy causation condition (ii). How do we reach this result?

### 25.11.2 *Position before 2007/08*

Before 2007/08 the TAA provisions applied a more limited causation test. They only applied to:

> transfer of assets *by virtue or in consequence* of which, either alone or in conjunction with associated operations, income becomes payable to persons resident or domiciled outside the UK.

35 The motive defence could not help if either A's transfer or B's transfer was made for tax avoidance reasons; or even if B's transfer was innocent but A was unable to prove this: see 29.39 (Associated operations and motive defence before 5 December 2005).

This applied causation condition (i) and (iii) but not causation condition (ii).

In the 5th edition of this book I said:[36]

> One might reach this result by understanding [restricting] the reference to "associated operations" to mean only those forming part of a single arrangement. However, it is suggested that a better analysis, the key to making sense of "associated operations" everywhere in the transfer of asset provisions, rests on the concept of causation. In the example above, although income accrues to the offshore trustees, it does not do so "in consequence" of A's transfer *in conjunction* with B's transfer. The only cause is B's transfer.
>
> But for A's transfer, B's transfer would not have happened, and so income would not become payable to the person abroad. However, causation in law (and indeed in ordinary English usage) does not apply a simple "but for" test. B's transfer as an independent act will "break the chain of causation". That is, the reference to words of causation requires one to identify the real or effective or operative cause of the fact that income accrues to a person abroad (which in this case is B's transfer). There must be "sufficient causal connection."

So I concluded:

> Although the statutory words are different, it is suggested that the appropriate test is the "clean break" test, i.e. is A a settlor of B's trust, did A provide the property indirectly?

### 25.11.3 *Position from 2007/08*

Unfortunately the key which allowed the reader to make sense of the provisions was discarded in the tax law rewrite.[37] I infer that HMRC found causation an inconvenience, so they quietly[38] but substantially relaxed it, by adding causation condition (ii). But no consideration was

36 5th edition, para 14.11. Footnotes omitted.

37 The rewrite team would probably say that s.742(1A) ICTA (introduced in 2006) made this change. That was arguably not the correct view of that provision, but it does not now matter.

38 The EN did not mention this important change.

given to the consequences. The removal of foundations, however inconvenient, has an effect on the structure as a whole. The result is a gap which the courts will have to fill up as best they can. It continues to be the case, in the example above, that A *cannot* be the transferor and within s.720. But on what grounds can one reach that result? Something must be read into the statutory wording.

One solution is to say that there can only be one transferor; since B is clearly a transferor, A is not to be regarded as transferor. This has some support in *Vestey* 54 TC 503.

The best solution, now the key to understanding associated operation rules throughout the TAA provisions, is to say that operations cannot be "associated" unless they are "put in train" by one person. Mere historic association is not enough to constitute "associated operations" for the purposes of the Act. There must be something more.[39] In an ideal world, Parliament should have identified that "something more" and not leave the job of constructing workable legislation to the courts. But there it is. It is suggested that the test for associated operations is the "clean break" test, ie is A a settlor of B's trust, did A provide the property indirectly?[40] If not, the operations are not associated.

### 25.11.4 *Transfer to UK trust followed by migration of trust before 6 April 2006*

Suppose:

(1) In 1970, A transfers assets to a discretionary trust with UK trustees ("A's transfer");
(2) In 2000, the UK trustees appoint foreign trustees in their place and transfer the trust assets to them ("the appointment of foreign trustees").

The appointment of foreign trustees is a relevant transfer. (The appointment of foreign trustees involves a transfer of assets, as a result of which income accrues to the non-resident trustees.) The question is

39 Contrast the approach to "disposition by associated operations" in *IRC v Brandenburg* [1982] STC 555, where Special Commissioners added a gloss that a disposition made by associated operations (for IHT purposes) must be "put in train" by one person: see "Gifts by Associated Operations", Robert Venables QC, PTPR, Vol. 5, p.11.

40 See 69.4 (Gift from A to B followed by gift to trust by B).

whether A's transfer does likewise. That is, is it a relevant transfer?

A's transfer alone does not satisfy causation condition (i). Income becomes payable to a person abroad. But causation condition (i) is not satisfied because it is not as a result of A's transfer alone that income has become payable to the offshore trustees. However, the appointment of foreign trustees is an "associated operation" in relation to A's transfer. Before the ITA 2007, the question was whether A's transfer in conjunction with the associated operation together satisfied the causation condition. It is considered that it was as a result of the transfer in conjunction with the associated operation that the income accrued to the foreign trustees. This was so even if the appointment was not envisaged at the time of the transfer to the original settlement. With the current wording, the literal reading is that A's transfer is a "relevant transfer". This is simply because the appointment of foreign trustees is an associated operation, and income becomes payable to a person abroad as a result of that operation; causation condition (ii) is satisfied. Although some gloss is required to make the section work, in other cases, as discussed above, that gloss is not likely to alter the result in this case.[41]

### 25.11.5 *Transfer to trust followed by transfer from trust to offshore company*

This is in principle the same as 25.11.4 (Transfer to UK trust followed by migration of trust before 6 April 2006). This applies whether the transfer by the trustees is gratuitous or in exchange for shares, debentures or an offshore life policy. But if the investment is for wholly commercial reasons, it may be argued that is not the case and so the income of the underlying company is not within the TAA provisions, but this requires

---

41 The position in 25.11.1 (Transfer from A to B followed by transfer from B to person abroad) is different. There B's transfer is independent in a way that trustees are not, because trustees are constrained by the fiduciary nature of their powers.

This view is also supported by obiter dicta in *Congreve v IRC* 30 TC. This concerned a gift to a UK company which became non-resident. This was a relevant transfer without the association operations rule. See 25.5 (Income "becomes payable" to person abroad). But the House of Lords also held (at 206) that the company becoming non-resident was an associated operation; and (by inference) income arose to the company abroad as a result of the transfer and associated operation.

HMRC would have further arguments, if necessary, based on *Muir v Muir* [1943] AC 468.

the Courts to read words into the statute, and the case for doing so here is not strong enough.

### 25.11.6 *Transfer to company followed by migration of company*

This is a relevant transfer even without the associated operations rules.[42]

### 25.11.7 *Transfer to UK trust followed by migration of trust from 6 April 2006*

Suppose the facts of 25.11.4 (Transfer to UK trust followed by migration of trust before 6 April 2006), but assume the migration occurred after 6 April 2006. The trust is deemed to be a single person. The analysis is therefore different. The appointment of foreign trustees does not involve any transfer. Instead the analysis is the same as 25.11.6 (Transfer to company followed by migration of company). The end result is the same, though the route to that destination is different.

## 25.12 Income of person abroad

The concept of "income of the person abroad" is relevant for several purposes of the transfer of asset provisions:

(1) There is a relevant transfer only if "income becomes payable" to a person abroad. If *no* such income becomes payable then there is no relevant transfer and the TAA provisions cannot come into effect.

(2) The *identity* of the income payable to the person abroad as a result of the transfer is relevant:
   (a) for s.720 ITA, as one must ask whether the transferor has power to enjoy that income;
   (b) for s.731 ITA, as one must ask whether that income can be used to benefit an individual.

(3) The *amount* of income payable to the person abroad as a result of the transfer is relevant as ascertaining that amount is the first step in computing the amount on which tax is charged under s.720 or relevant income for s.731.

42 See above footnote.

## 25.13 Capital receipts deemed to be income

The transfer of asset rules refer to "income". This means "income for income tax purposes" which is a different concept from "income for trust law purposes" or "income for accountancy law purposes".[43]

Section 383 ITTOIA provides:

> (1) Income tax is charged on dividends and other distributions of a UK resident company.
> (2) For income tax purposes such dividends and other distributions are to be treated as income.
> (3) For the purposes of subsection (2), it does not matter that those dividends and other distributions are capital apart from that subsection.

This applies for the purposes of the TAA provisions and s.624 ITTOIA, so the distribution on a purchase of own shares, for instance, is income for those purposes[44] even though it is a capital receipt for trust law purposes. Likewise income deemed to accrue on a stock dividend under s.410 ITTOIA and a gain deemed to be income under s.688 ITA (transactions in land). On gains from offshore funds: see 32.9 (OIG arising to non-resident trust). On gains from life policies see 30.6.1 (Non-resident trusts) and 30.6.2 (Non-resident company or institution).

## 25.14 The amount of income of person abroad

This section considers the amount of the income arising to the person abroad as a result of the transfer and associated operations.

### 25.14.1 *Dividend income of person abroad: net or grossed up?*

In order to follow the discussion one needs to bear in mind the usual rules for taxing a UK dividend.[45] In short, a UK resident or EEA national receives a tax credit and the dividend is grossed up. For instance:

---

43 See 16.2 (Why does "capital *v.* income" matter?)

44 This is assumed to be the case in the drafting of s.482 ITA.

45 See 19.2 (Income from UK resident company). References in this section to dividends also include other company distributions.

Dividend £1,000 **("net amount")**
Tax credit (one ninth) £111.11
Dividend plus tax credit £1,111.11 **("gross amount")**

A person abroad who is not resident in the EU is not normally entitled to a tax credit and the income is not grossed up.

In *Carvill v IRC* the person abroad received dividends and was not entitled to a tax credit. The transferor argued that the measure of income for s.720 ITA was the net amount. The argument was rejected:

> 100. [HMRC] contended that the income which the section [s.720] deems to be income of the taxpayer is the dividends [received by the person abroad]. ...
> It follows [from what is now s.746 ITA] that the position is the same as if the taxpayer had actually received those dividends. They would be grossed-up by the amount of the tax credit and he would be entitled to the benefit of the tax credit. The position is just as if International Holdings [the person abroad] had never existed.
> 101. [The taxpayer] contended that the income which was deemed to be the taxpayer's was the net income of the company from all sources after deduction of any reliefs which would have been available to an individual in a comparable position. The income lost its original characteristics and became charged under Case VI of Sch D. ...The effect of this approach is that because [the person abroad who received the dividend] is not entitled to the tax credit, the income is not grossed up but is not charged to income tax at the lower rate [now the dividend ordinary rate].
> 102. It is not necessary for me to decide this point but I find [HMRC's] approach more attractive particularly as it precisely gives effect to counteracting the advantage of the transfer.[46]

For s.731 purposes:

(1) If the person abroad was not entitled to a tax credit, the amount of a dividend would be the net amount.
(2) If the person abroad was entitled to a tax credit the amount of a dividend would be the gross amount. However, the relevant income is only the amount which can be applied for the benefit of any person so the amount of relevant income is the net amount.

46 *Carvill v IRC* [2000] STC (SCD) 143, 75 TC 477.

### 25.14.2 *Deduction of administration costs against investment income*

In *Chetwode v IRC* 51 TC 647 an offshore company received dividends and interest of about £3,000 per annum. The transferor was taxed on the gross amount of that income, without deduction for (i) investment advisory fees, (ii) management fees, (iii) safekeeping charges, (iv) security handling fees and bank charges, (v) registered office and executive office fees, totalling about £1,000 per annum. The approach of *Chetwode* was that s.720 should be construed so as to put the transferor in the same position as if he had retained the assets himself. Had he done so he could not have deducted these investment costs for the purposes of calculating his income. So there was no deduction for s.720 purposes.

HMRC allowed deductions in respect of estimates of such costs of collecting the investment income as would have been incurred had the investment income been instead received by the transferor in person. This was calculated (how?) at about £20 per year. There is no statement on whether this concessionary practice still obtains but it is (perhaps) worth claiming it to see.

For s.731 purposes all expenses will be deducted in computing relevant income.

### 25.14.3 *Trading income and trading losses of person abroad*[47]

It was accepted in *Chetwode* that trading income of the person abroad is calculated by setting trading receipts against trading expenses. The case does not discuss whether trading income is calculated:

(1) by accountancy principles, under which statutory non-deduction provisions such as s.34 or s.45 ITTOIA would not apply, and depreciation would in principle be allowed; or
(2) by tax principles applicable to calculating trading profits.

The approach of *Chetwode* suggests that the second is the correct view.

Profits are computed on a current year basis.[48]

For losses, RI 201 provides:

> The Revenue's practice is only to allow trading losses to be carried

47 See at p.687 "In the case of a trade, it is necessary to strike a balance, in respect of a period, before any taxable "income" arises."

48 *Vestey v IRC* 54 TC at p.528.

forward and set against future trading profits. They cannot be offset against investment income of the same, previous or future years.[49]

For s.731, losses will be deducted in computing relevant income if paid out of relevant income. There is no group relief.

### 25.14.4 *Property income of person abroad*

The rules for measuring property income are the same as for the settlement provisions; see 24.2.4 (Property Business Income). Transfer pricing may also need consideration here.

### 25.14.5 *Loan relationship and Forex income*

Since income is computed on IT principles, "income" does not include profits computed under loan relationship or Forex rules which apply for the purposes of corporation tax and not for IT purposes. This is so even if the person abroad is a company.

49 This is consistent with the position for property income losses. See 24.2.5 (Property business losses).

CHAPTER TWENTY SIX

# TRANSFER OF ASSETS ABROAD: TRANSFERORS

## 26.1 TAA charges on transferor

This chapter considers the TAA charges on the transferor. There are strictly two charges: s.720 and s.727 ITA, but s.720 is by far the most important.

Section 720 ITA imposes the charge to tax:

> (1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are ordinarily UK resident by means of relevant transfers.
> (2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions).
> (3) Tax is charged under this section on the amount of income treated as arising in the tax year.

For the rates of tax, see 41.6 (Rates of tax on transferor within s.720 ITA). For a comparison with s.624 ITTOIA see 24.13 (Section 624 *v* s.720: comparison and priority).

## 26.2 Who is liable?

Section 720(5) ITA provides:

> The person liable for any tax charged under this section is the individual to whom the income is treated as arising.

ITA EN provides:

> 2141. Subsection (5) provides that the individual to whom income is treated as arising is the person liable. This person is defined in section 721.

So we turn to s.721 ITA but we do not find a clear definition:

> (1) Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A and B are met.

The charge is imposed on "such an individual as is mentioned in s.720(1)". There are different views possible of how much of s.720(1) is incorporated into the requirement that the individual to be taxed must be "such an individual as is mentioned in s.720(1)". The wise words of Garner are worth quoting here:

> *Such* is a deictic (pointing) term that must refer to a clear antecedent.[1]

The failure to observe this point – obvious though it may seem – has given rise to a good deal of case law. The intention of the ITA rewrite was to preserve the case law and (so far as the law was unclear) to preserve the ambiguities. ITA EN provides:

> 2144. Sections 739(2) and (3) of ICTA indicate the person liable by using the expression "such an individual" – but do not make it clear how much of section 739(1) is implied by that expression. [Sections 721] and 728 ITA, which are based on section 739(2) and (3) ICTA, reproduce the expression "such an individual", which has been the subject of case law: see, in particular, *Vestey v IRC* 54 TC 503.

What, then, are the requirements to be "such an individual", as is

---

1 Garner, *A Dictionary of Modern Legal Usage* (3rd ed., 2011), entry under "Such". Harold Pinter adroitly exploits the ambiguity in *No Man's Land* (2001):
"... there are some people who appear to be strong, whose idea of what strength consists of is persuasive, but who inhabit the idea and not the fact. What they possess is not strength but expertise. They have nurtured and maintain what is in fact a calculated posture. Half the time it works. It takes a man of intelligence and perception to stick a needle through that posture and discern the essential flabbiness of the stance. I am *such a man*."

mentioned in s.720(1)? There are two:
(1) The individual must be ordinarily resident in the UK; that seems clear.
(2) The individual must be "the transferor"; that was decided in *Vestey*.

## 26.3 Who is the transferor?

The next question is to identify the transferor (if there is one). Clearly, anyone who actually makes a transfer is a transferor, but the expression is a little wider than that.

### 26.3.1 *Transfer made by individuals jointly*

If A and B together own an asset, as tenants in common or as joint tenants, and together transfer their interest to a person abroad, each is transferor of their share. RI 201 states:

> Where the same assets are transferred by several individuals, the Revenue's practice is to assess the transferors in proportion to their share of the assets transferred. Thus, where, for example, shares of a UK company are held by three shareholders in the proportion 40%, 40% and 20% and there is [s.720 ITA] liability in respect of the income of an overseas person to which the shares are transferred, the liability is assessed on each of the three shareholders in proportion to their respective holdings.

That seems obvious.

### 26.3.2 *Transfer procured by individual*

In *Congreve v IRC* the Court of Appeal said in an obiter comment:

> But even if we were prepared to accede to the argument that the preamble [now s.720(1) ITA] connoted activity by the individual concerned, we think this condition would be fulfilled if the execution of the transfer were procured by the individual concerned, even though it was not actually executed by him or his agent. [Counsel] said ... that execution by a company could not be said to be execution by the individual, even though the individual owned all or practically all the shares in the company. ... it is, we think, in the present case, a reasonable inference from the facts found that the execution and

> performance of the transfers and associated operations in question by all the companies concerned were procured by Mrs. Congreve acting through her agent.[2]

In *Vestey v IRC*, the question of who is a transferor did not arise, because the taxpayers (beneficiaries of a discretionary trust) were clearly not transferors. The House of Lords discussed the question in passing, and the answer was expressed in a variety of different ways. Lord Wilberforce said s.720 applies:

> only where the person sought to be charged made or, maybe, was associated with, the transfer.[3]

Lord Keith said the section only applied to an individual:

> who has sought to avoid liability to income tax by means of such transfers of assets as are mentioned in [s.720(1)].[4]

Lord Dilhorne said the section applied to an individual:

> who has sought to avoid income tax[5]

though in the same paragraph he also approved the Court of Appeal's comment in *Congreve* (which one might have thought a somewhat different approach).

Likewise Lord Edmund-Davis:

> individuals whose purpose is the avoidance of liability to tax ...[6]

Thus in *Vestey*, the question who is a transferor had received different answers (though in practice the differences may not often matter).

These doubts were resolved in *IRC v Pratt* which decided that an individual who did not make the transfer may be within s.720 if and only

2 30 TC 163 at p.197.

3 54 TC 503 at p.587A. Lord Salmon agreed. Lord Keith said he agreed with Lord Wilberforce but in his concurring speech he actually put the matter differently.

4 p.602G.

5 p.591E.

6 p.601B.

if they "procured" the transfer.[7] The term used in *Pratt* is "quasi transferor" but I suggest it is better to use the term "transferor" and to define that term to mean anyone to whom s.720 applies, that is, both those who make a transfer and those who procure it.

The classic example of procuring a transfer is if T owns all the shares in a company and uses power of control to procure the company to make a transfer to a person abroad.

> Something of the sort might even be possible in the case of quasi transferors, where two or three of them own the company which makes the transfer, but where it is not possible to do just that, s [720] does not bite at all. ... Where an identifiable portion of the asset transferred can be attributed to a particular transferor then, of course – at any rate in any normal case – that part actually transferred will produce a similar part of the income, and in no case is there any difficulty in applying the section, since one will apply it separately to each of the individual transfers, or each identifiable portion.[8]

This is tentatively expressed, but it is considered to be correct. The position may be different if shareholders had different classes of shares with different interests. In that case it may not be possible to separate out their interests in which case the shareholders would not be transferors.

The facts of *Pratt* were that the taxpayers alleged to be transferors (i) were three directors out of eight; and (ii) held 30% of the company. They had influence but no control at director or shareholder level. They could not "procure" the transfer of assets made by the company, and so they were not "quasi transferors" in relation to that transfer. So they were outside the scope of s.720.

In *Carvill v IRC*, T transferred the majority shareholding to a person abroad, and the minority shareholders transferred their shares. HMRC argued (implausibly) that T was the "transferor" of the minority shareholding. But this was rightly rejected:

> For an individual to be the transferor in relation to a transfer by another individual would be a considerable extension of this principle. However, there might be cases where, as a matter of fact, one

7 57 TC 1 at p.51 B –D and p.55 E–F.

8 *IRC v Pratt* 57 TC 1 at p.50.

> individual's influence over another was so strong that he was the transferor of the other's share but this would clearly be an exceptional case. ...
>
> 72. [Counsel] contends that the taxpayer was the transferor of the old minority shares. In order to find that this was an exceptional case where the taxpayer did in effect force his will on the other shareholders so as to become the transferor of their shares, one would need strong evidence that this was so. Of course, the taxpayer as majority shareholder and one of the founders of a company bearing his name was in a position of some influence. However, the influence did not go as far as telling other shareholders what to do with their shares. Here the decision by the old minority to transfer their shares was one which they came to after discussion, having started with different points of view as to the merits of the transfer. There is no evidence that the taxpayer leaned on any of them heavily, for example, by threatening to sack them if they did not. ... Accordingly, there is no evidence that the taxpayer did anything in relation to the old minority shares which would make him the transferor of them, and I find that he was not the transferor of the old minority shares.[9]

What about a gratuitous transfer from A to B and from B to the person abroad? The question whether A has procured B's transfer does not arise, for A is a transferor by virtue of the transfer to B. The true question is whether B's transfer is caught under the associated operations rules.

What if A (perhaps a principal beneficiary but not settlor) encourages trustees to make a transfer? It is considered that A (not being in control of the trust) cannot be said to procure the transfer made by the trustees. Likewise a trustee or other person exercising fiduciary powers is not a transferor, eg a person with power of appointing new trustees does not become a transferor if they exercise the power because the power is fiduciary. So the concept of "procuring" a transfer in practice applies to individuals controlling companies; other cases, while theoretically possible, will be rare.

Contrast the position where:

(1) T transfers assets to A, in consideration for which A transfers assets to a person abroad.

(2) T transfers assets to a company, in consideration for which the

---

9 *Carvill v IRC* [2000] STC (SCD) 1543 at [71]-[72], 75 TC 477 (Special Commissioners).

company issues shares to a person abroad.

(3) T (an employee entitled to a bonus) waives the right to the bonus, in consideration for which the employer transfers assets to a pension scheme abroad.

In the first two cases, T is not just a quasi transferor, T is an *actual* transferor for T has made a transfer of assets. In the third case, T has procured the transfer so is within the scope of s.720.

A person who is not a transferor (such as the successful appellants in *Pratt*) might instead fall within s.731 if they received benefits.

### 26.3.3 *HMRC practice*

RI 201 provides:

> [1] Section [720 and 727 ITA] can potentially apply not only to an individual who transfers assets but to someone who is "associated with" a transaction (according to the decision of the Courts in *Vestey v IRC*).
> [2] The Revenue regard this as including anyone who procured the transfer of assets.

Point [1] quotes one of the views tentatively expressed in *Vestey*[10] but disingenuously omits the "maybe". If "associated" here has its normal, rather wide sense, point [1] is clearly wrong in the light of *Pratt* and *Carvill*. It is considered that a person is a transferor only if they have made or procured the transfer, and being associated with a transfer (without procuring it) does not make a person a transferor. In a loose sense of "associated" point [1] cannot possibly be correct, for many individuals may be "associated" with a transfer who cannot possibly all be transferors.

It appears that HMRC would now agree, for Revenue & Customs Brief 18/11 provides:

> 5.1.1 ... For the income charge provisions [s.720] to apply the individual on whom the charge arises must be the person who transfers the assets or procures the transfer.

10 The comment of Lord Wilberforce is set out at 26.3.2 (Transfer procured by individual).

However, in practice HMRC do not take s.720 points when UK companies make transfers abroad, even if there is a 100% shareholder who could be regarded as procuring the transfer. (There is no significant reference to the TAA provisions in *Bramwell on Corporation Tax* and none in the Company Taxation Manual.) The CFC legislation is intended to fill the gap.[11] An exception where HMRC say they might raise the point relates to employee benefit trusts. Revenue & Customs Brief 18/11 provides:

> 5.1.1 ... [1] If the offshore Employee Benefit Trust is a normal commercial arrangement by a company to reward its employees, the transferor is the employer company;
> [2] and in such circumstances the income charge is unlikely to be applicable as the transferor and beneficiaries are different people.
> [3] However, it may be that the employee has transferred a right to receive a bonus into the offshore Employee Benefit Trust and is therefore the transferor. If this is the case the ToA legislation may apply and the employee will be liable to tax on any income arising in the trust.
> [4] If the employer company is controlled by its shareholder/directors and the offshore Employee Benefit Trust was formed solely for their benefit, the director/shareholders may have procured the transfer into the offshore Employee Benefit Trust and could be considered transferors for the purposes of the income charge. Whether or not the ToA income charge is then applied will depend on the facts of each case.

There is a good deal of confusion here:

[1] The fact that the trust is a normal commercial arrangement may be a reason for allowing the motive defence, but does not affect the identity of the transferor. It appears that HMRC are not interested in applying s.720 to "normal commercial arrangements" so they do not care who is the transferor (even in the case of non-resident EBTs).

[2] The correct issue is not whether "the transferor and beneficiaries are different people" but whether the transferor has power to enjoy; which is perhaps similar but not the same.

[3] This is approximately correct; though s.624 may also be in point, and the individual's liability is not on "any income arising in the trust" but

11 It is noteworthy that the CFC legislation followed shortly after *Pratt*. Though s.725 ITA (reduction in amount charged when CFC involved) acknowledges possible overlap between the CFC rules and s.720.

income arising from the transferred asset.

[4] This is correct as far as it goes but it is rightly tentative ("may have procured...").

## 26.4 Must the transferor avoid or intend to avoid IT?

### 26.4.1 *The statutory provisions*

Section 720 ITA provides:

> (1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are ordinarily UK resident by means of relevant transfers.
> (2) Income tax is charged on income treated as arising to *such an individual* under section 721. ...

The Special Commissioners say:

> 185. It is clear that the meaning of the phrase "such an individual" must be found in the preamble [now s.720(1)] and that it is not confined to an individual "ordinarily resident in the United Kingdom". Once you go beyond that restricted meaning in order to ascertain what individuals are comprised in the phrase "such an individual" it seems to us difficult to find any logical stopping place short of importing the whole of [s.720(1)].
> 186. In our view it therefore follows that "such an individual" is an individual ordinarily resident in the United Kingdom who, *by means of a transfer* of assets in consequence of which income becomes payable to a non-resident, *avoids liability to income tax apart from the operation of these provisions*.[12]

This is, with respect, clearly right. The question which arises is whether a person who "by means of transfers of assets avoids liability to income tax" means:

(1) a person who in fact avoids income tax (in the absence of the TAA provisions); or
(2) a person who in fact avoids and intends to avoid IT; or
(3) a person who intends to avoid IT (whether or not they in fact do so).

12 *IRC v Botnar* 72 TC 205.

I am inclined to think that solution (1) is the most natural reading, as the word "avoids" suggests avoidance in fact. However the words "by means of" might be thought of as involving some element of intention, so there is also much to be said for solution (2), ie s.720 only applies to a person who in fact avoids and intends to avoid income tax, (though this does overlap with the motive defence).

### 26.4.2 *Position before 1996*

In order to understand the present law, it is necessary first to consider the position before the law was changed in 1996. Case law and statutory reform have complicated what ought to be a simple question with a simple answer.

The starting point is the decision of the House of Lords in *McGuckian v IRC*.[13] This was (in short) a case where a transaction was made which was intended to avoid income tax but did not actually do so (because another anti-avoidance provision was overlooked).[14] The Revenue raised an assessment under s.720. The taxpayer argued that s.720 did not apply since income tax was not actually avoided. The argument failed. Lord Steyn said:

> I would reject the argument that it is a condition precedent to [s.720] applying that there must be proof of an actual avoidance of tax liability. Such a construction treats [s.720] as a power of last resort and it substantially emasculates the effectiveness of the power under [s.720].

---

13 69 TC 1.

14 The actual facts were not so simple. An interest in possession trust owned a company, and a dividend would have been taxable income of the life tenant. Instead the trustees sold the right to the dividend for a lump sum. This sum was trust capital as a matter of trust law (though it was regarded as income for tax purposes under the *Ramsay* principle). This sale was intended to avoid income tax on the dividend.

It was assumed that the transaction did not actually avoid IT, since the sale of a dividend was caught by anti avoidance provisions (s.730 ICTA 1988) now repealed. Is this right? One might have argued that income tax *was* in fact avoided since even though it was assessable under s.730, no assessment was actually made, but the Revenue did not argue that point. The taxpayer was however assessed under (what is now) s.720 ITA rather than s.730. The simple answer to this should have been to raise the assessment under s.730, as the Court of Appeal decided, but HL did not pursue that approach.

> Nothing in the language or purpose of [s.720] compels such a construction. Properly construed the opening words of [s.720] merely provide that *there must be an intention to avoid liability for tax*. The sensible construction is that [s.720] can be applied even if there are other provisions which could be invoked to prevent the avoidance of tax. That the revenue authorities should have overlapping taxation powers is an unremarkable consequence. And such a construction cannot cause any unfairness to the taxpayer since he cannot be taxed twice in respect of the same income.[15]

Lord Browne-Wilkinson said:

> [Counsel for the taxpayer] submitted that since the dividend would in any event have been taxable under s 470, [s.720] does not apply. He based this submission on the words in [s.720(1)],
>
> > "For the purpose of preventing the avoiding by individuals ordinarily resident in the United Kingdom of liability to income tax …".
>
> He submitted that [s.720] does not apply unless tax has *in fact* been avoided. In my judgment, there is no warrant for this submission. ... the words of subs (1) make it clear that the actual avoidance of tax is not a precondition to the application of the section. The income is deemed to be the income of the United Kingdom resident
>
> > "whether it would or would not have been chargeable to income tax apart from the provisions of this section".
>
> It is therefore clear [!] that [s.720] can still apply even though the effect of the transfer of assets abroad would not have been successful in avoiding United Kingdom income tax.[16]

It is an understatement to say that the reasoning is not compelling,[17] but

---

15 69 TC 1 at p.82E.

16 69 TC 1 at p.76.

17 The reason given by Lord Steyn is not compelling since s.720 is not a "power". The reason given by Lord Browne-Wilkinson is not compelling, since the words he cites (now s.721(5)(a) ITA) are needed for where a transfer reduces the rate of income tax (without avoiding it completely). It is significant that neither judge cites the reason given by the other.

Unfortunately, it was impossible to have any sympathy with the taxpayer or his advisors, whose actions ("disingenuous in the extreme") were held to be the reason why no assessment was made under the correct section in the first place and whose appeal had "no ethical merit". One suspects that this was a case where the decision the decision is still binding. The position before 1996 was settled. The majority of the House of Lords[18] decided that it was not a requirement of s.720 that income tax had to be avoided, though Lord Steyn said that there did have to be an *intention* to avoid income tax.[19]

Thus the law until 1996 was that:

(1) section 720 only applied to a person who intended to avoid income tax; but
(2) actual avoidance of income tax was not necessary.

### 26.4.3 *Position from 1996*

Section 721(5) ITA provides:

> It does not matter for the purposes of this section ...
> (c) whether the avoiding of liability to income tax is a purpose for which the transfer is effected.

This applies to income arising on or after 26 November 1996 regardless of the date of the transfer. This does not affect the operation of the motive defence but it reverses point (1): s.720 applies even it there is no purpose of avoiding income tax.

The provision does not expressly deal with point (2) - actual avoidance. It is suggested that the consequence of this amendment is that the question of whether there must *in fact* be an avoidance of income tax needs to be revisited. For Parliament retained the statutory words set out in 26.4.1 (The statutory provisions) which refer to avoiding income tax. The words should be taken to mean something. If they no longer refer (as Lord Steyn

---

was made first and the reasons were found later. The issue was first raised in the House of Lords (it is not mentioned in the lower judgments) and so the Lords did not have the benefit of the consideration of the lower courts on the issue.

18 Lord Lloyd agreed with the other judgments; the other two judges did not consider the point.

19 This area was considered in a thorough Special Commissioners decision just before *McGuckian*: *Botnar v IRC* [1998] STC 38 at pp.63–67. Here the *Revenue* submitted (and the SCs accepted) that s.720 only applies if there is avoidance of IT *in fact*. See para 180. But this has now been overtaken by *McGuckian*. The Special Commissioners also inclined to the view that s.720 only applied if the transferor intended to avoid Income Tax. Had *McGuckian* been decided first, they would no doubt have cited and followed the comment of Lord Steyn set out above. But this has now been overtaken by the statutory reform.

thought they did) to the intention to avoid income tax, they should be taken to require that income tax is *in fact* avoided.[20] Thus it is tentatively suggested that the effect of s.721(5) is to reverse the decision of *McGuckian* on this issue.

The position for income arising from 1996 is therefore that:

(1) an intention to avoid income tax is not a requirement for s.720 to apply.
(2) income tax must in fact be avoided for the section to apply.

This raises the question of what amounts to the avoidance of income tax in fact. If the taxpayer avoids an assessment (especially by dubious means) then it is suggested that income tax is avoided. Thus the assessment in *McGuckian* would still be upheld under s.720, though for slightly different reasons.

## 26.5 Transferor not ordinarily resident

Section 720 refers to an individual who is ordinarily resident in the UK, but it does not say exactly when the individual must be ordinarily resident for the section to apply.

---

20 This is consistent with the view that HMRC take of s.752(1) ITA (transactions in land) which provides: "This Chapter has effect for the purpose of preventing the avoidance of income tax by persons concerned with land or the development of land." BIM provides:

> **60315. Conditions: Avoidance**
> Section 776 ICTA 1988 is anti-avoidance legislation (Section 776(1) ICTA 1988). The test for avoidance is an objective one, i.e. has tax been avoided, and not a subjective one relating to the intentions of the participants.
> The avoidance need not, therefore, be deliberate, it can be accidental or unwitting ...
> **60320. Conditions: Avoidance: Straightforward transactions of purchase and sale**
> Section 776 ICTA 1988 cannot be used to catch straightforward transactions of purchase and sale of land that do not amount to a trade, or adventure in the nature of trade. ...
> Section 776 ICTA 1988 is not applicable because the necessary avoidance of tax is not present.

### 26.5.1 *Transferor not ordinarily resident when income arises*

Section 720 does not apply to income which arises while the transferor is not ordinarily resident in the UK.[21]

A non-resident individual is subject to tax at their personal rates on their UK rental income. That individual can transfer UK land to an offshore company in order to avoid higher rate income tax.[22] (It is not usually necessary for the individual to transfer other assets to a company in order to avoid higher rate tax as income of a non-resident from most other sources is not subject to tax at the higher rate.)[23]

A UK resident but not ordinarily resident individual is subject to tax at their personal rates on all UK source income. That individual can transfer land and other UK sources of income to a company to avoid higher rate income tax. They can also transfer foreign sources of income to a company in order to avoid tax on the remittance basis. A sale to an offshore company in return for debentures may be suitable. This was common planning before the introduction of the TAA provisions in 1936.

If the individual later becomes UK resident they do not retrospectively become liable for income accruing while non-resident. This is consistent with the usual IT position.[24]

### 26.5.2 *Transferor not ordinarily resident when transfer made*

The intention of those responsible for the legislation was that s.720 should only apply if the transferor was ordinarily resident in the UK at the time of the transfer.[25] This was eventually upheld in *IRC v Willoughby*[26] reversing *Herdman v IRC* 45 TC 394.

The position now is governed by s.721(5) ITA:

---

21 This is clear from the words of the section; if authority is needed, the point was assumed in *Herdman v IRC* 45 TC 394 at p.412: "Some time after making this transfer of shares the Respondent became ordinarily resident in Northern Ireland and " ... [s.720] *then* applied".

22 Of course, CGT, VAT, IHT, and SDLT all need consideration.

23 See 37.1 (Non-residents income tax relief).

24 See 9.20 (RFI/gains arising when non-resident, remitted when resident).

25 "There has to be a transfer of assets abroad by an individual resident in this country." (W.S. Morrison, then Financial Secretary) 313 HL Official Reports 5th series col 685, cited in *IRC v Willoughby* 70 TC 57 at p.113.

26 70 TC 57.

> It does not matter for the purposes of this section ...
> (b) whether the individual is ordinarily UK resident at the time when the relevant transfer is made ...

Thus non-residence at the time of the transfer is not a defence: s.720 may apply to any person after they become ordinarily resident, regardless of residence at the time of the transfer. This applies to income arising from 26 November 1996 regardless of the date of the transfer.[27]

## 26.6 Power to enjoy: Section 721 Condition A

Section 721(1) ITA provides:

> Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A and B are met.

I refer below to **"s.721 conditions A and B"**, to avoid confusion with the myriad other conditions in the ITA. Section 721(2) sets out condition A:

> Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—
> (a) a relevant transfer,
> (b) one or more associated operations, or
> (c) a relevant transfer and one or more associated operations.

Once one has identified the transferor one asks whether they have "power to enjoy" income of the person abroad. "Power to enjoy" is elaborately defined and has given rise to a large case law. But in practice there is not often an issue here. In outline, the transferor has "power to enjoy" if they may possibly enjoy any of the income of the person abroad, or if they are able to control the application of the income. A transferor has no power to enjoy if they (and their spouses/civil partners) are excluded from benefit and have no power of control. A widow or widower of the transferor may be included as a beneficiary.

The test is slightly wider than that of a "settlor-interested" trust for the

27 Also see 27.9.1 (Transferor not ordinarily resident when transfer made; pre-1996 income).

purposes of s.624 ITTOIA[28] though for most practical purposes they are the same. It is hard to see the reason for the distinction, but that is the patchwork nature of income tax.

If the transferor has power to enjoy, but is then excluded and ceases to have power to enjoy, condition A continues to be satisfied for the rest of the tax year. This is an accidental change from the pre-ITA position.[29]

Statutory tax indemnities do not confer a power to enjoy, see 27.4.10 (Reimbursement of tax under statutory indemnity).

On a transfer from a UK domiciled person to their foreign domiciled spouse, see 64.14 (Income tax planning for mixed marriage).

Section 722 ITA provides:

> **When an individual has power to enjoy income of person abroad**
> (1) For the purposes of section 721, an individual is treated as having power to enjoy income of a person abroad if any of the enjoyment conditions are met.
> (2) In subsection (1) "the enjoyment conditions" means conditions A to E as specified in section 723.

I adopt the statutory terminology and refer to "**enjoyment conditions A to E**".

Section 722(1) states that an individual is *treated* as having power to enjoy if any of the five conditions is satisfied. It is considered that this is a comprehensive definition of "power to enjoy" but it is impossible to think of any power to enjoy (in the general sense) which does not also fall within one of the enjoyment conditions, so the point is academic.

Section 722(3) ITA provides:

> In determining whether an individual has power to enjoy income for the purposes of section 721, regard must be had to the substantial result and effect of all the relevant transactions.

It is hard to imagine a case where this makes any difference.

Section 722(4) provides:

28 See 24.3 (Meaning(s) of "settlor-interested").

29 Contrast 24.3.4 (Settlement ceasing to be settlor-interested); 42.6 (Settlor-interested condition).

> In making that determination all benefits which may at any time accrue to the individual as a result of the transfer and any associated operations must be taken into account, irrespective of—
> (a) the nature or form of the benefits, or
> (b) whether the individual has legal or equitable rights in respect of the benefits.

Subsection (b) is a response to the Cayman Islands Trust Act 1967 which formerly provided that a beneficiary of a Cayman Islands exempt trust had no "rights" (as may also be the case under a Jersey foundation or a Cayman Island STAR trust).

### 26.6.1 *Enjoyment condition A: income in fact dealt with to benefit T*

Section 723(1) provides:

> Condition A is that the income is in fact so dealt with by any person as to be calculated at some time to enure for the benefit of the individual, whether in the form of income or not.

The nuance of this un-lawyer-like language was discussed by the Special Commissioners in *Botnar v IRC*:

> 222. [Enjoyment condition A] is concerned with how particular income is dealt with when it arises. [Counsel for the taxpayer] however conceded that this is not confined to its immediate handling on receipt or even to what happens in the year of assessment, if for example it is received late in the year, but that we should look at how it is dealt with within a reasonable time of receipt. ...
> 224. It seems to us that, when the word "calculated" is considered in the context that it refers to income which is "in fact so dealt with", the meaning "likely" is to be preferred to "thought out" in the sense of "intended"; however we are not sure that either "likely" or "intended" gives exactly the same flavour as "calculated". "Calculated" here combines an element of objectivity with an element of forethought.
> 225. It may not however make much difference because if any income was intended to enure for the benefit of Mr. Botnar it is obviously more probable that it was likely to so enure and that it would be seen

objectively as likely to so enure.[30]

### 26.6.2 *Enjoyment condition B: income increases value of T's asset*

Section 723(2) ITA provides:

> Condition B is that the receipt or accrual of the income operates to increase the value to the individual—
> (a) of any assets the individual holds, or
> (b) of any assets held for the individual's benefit.

First one must identify an asset held by T or for T's benefit. Having identified the asset, one asks whether the receipt or accrual of the income operates to increase the value of that asset.

The concept of "assets held by T" is straightforward but what about assets held "for T's benefit"? In *Howard de Walden v IRC* 25 TC 121 a promissory note held by trustees on trust for T for life was considered to be held for T's benefit. One could reach the same result by a different route since T's life interest in the note was itself an "asset" held by T. If the asset is held on a discretionary trust under which T is merely a beneficiary, it is probably not held "for T's benefit". What if the asset is held on interest in possession trusts for T subject to an overriding power of appointment?

The second requirement is that the receipt or accrual of income must increase the value of the asset. This was also considered in *Howard de Walden v IRC*. Here T transferred assets to offshore companies and held (1) a life interest in promissory notes issued by the companies and (2) the benefit of debt due from the companies (T had lent money to the companies).[31] The Court of Appeal held:

> The receipt of the income by each company operates to increase the value of the notes and of the deposit debt...

But it is a question of fact in each case.[32] If a debt is sufficiently covered

---

30 72 TC 205. The wording is also discussed *obiter* in *Vestey v IRC* 54 TC 503 at p.555.

31 In some but not all cases T also held a few shares in the companies. The Court of Appeal did not rely on this because if it had held that T was caught only by virtue of these shares, T would not have been assessable on the income of all the companies.

32 *IRC v Brackett* is another example.

by existing assets of a company, the receipt of further income by the company does not increase the value of the debt.

### 26.6.3 *Enjoyment condition C: individual receives benefit*

Section 723 ITA provides:

> (3) Condition C is that the individual receives or is entitled to receive at any time any benefit provided or to be provided out of the income or related money.
> (4) In subsection (3) "related money" means money which is or will be available for the purpose of providing the benefit as a result of the effect or successive effects—
> (a) on the income, and
> (b) on any assets which directly or indirectly represent the income,
> of the associated operations referred to in section 721(2).

For the meaning of "benefit" see 27.4 (Benefit). For completeness, this question also arose in *Howard de Walden*. The Court of Appeal said:

> ... the payments made and to be made in respect of the notes and deposits are "benefits" within the meaning of (c) since "benefit" as defined ... includes a payment of any kind.

There are two issues here. First, is the payment of a debt to T (or payment of the promissory note) a "benefit" in the general sense? The Court of Appeal rightly thought it was not, since they relied on the former definition clause. Secondly, did the former statutory definition of benefit extend the meaning of benefit to include a payment that is not a benefit in the normal sense? The Court of Appeal held that it did. However, the ITA does not contain the definition of benefit on which the court relied, so this argument no longer arises. However the repayment of an interest-free loan is probably a benefit.[33]

### 26.6.4 *Enjoyment condition D: possibility of benefit*

Section 723 ITA provides:

33 See 24.3.2 ("Settlor-interested" for IT purposes).

> (5) Condition D is that the individual may become entitled to the beneficial enjoyment of the income if one or more powers are exercised or successively exercised.
> (6) For the purposes of subsection (5) it does not matter—
> (a) who may exercise the powers, or
> (b) whether they are exercisable with or without the consent of another person.

This would apply to a discretionary trust where T was a beneficiary (or could be added to the class of beneficiaries).

"Income" here includes any asset representing the income, even if that asset does not constitute the actual income (in the strict sense) of the person abroad. In *Vestey v IRC*:

(1) The individual could receive accumulated trust income. Walton J held that the individual had no power to enjoy the trust income within enjoyment condition D because what the individual could receive was trust capital and so no longer"income".[34]
(2) The trust held a company. Walton J held that the individual had no power to enjoy the company's income within enjoyment condition D because what they could receive was dividends from the company and that was not the same as the income of the company.[35]

This is bizarre and in the House of Lords Viscount Dilhorne rejected it.[36] It is considered that Dilhorne's reasoning is to be preferred.

### 26.6.5 *Enjoyment condition E: control*

Section 723(7) ITA provides:

> Condition E is that the individual is able in any manner to control directly or indirectly the application of the income.

"Control" means non-fiduciary control and so does not include the powers of control of a trustee or a protector with fiduciary powers:

34 *Vestey v IRC* 54 TC 503 at p.555.
35 *Vestey v IRC* 54 TC 503 at pp.562-3.
36 p.595. Strictly, Dilhorne only rejected point (1). He did not address point (2). But the reason is the same in both cases so it logically follows he rejected Walton's view on both points. No other judge considered this aspect.

> The question is whether he was able to control the application of the income, and to answer that question affirmatively it must in my judgment be possible to say at least that he was in a position to ensure that the trustees would act in accordance with his wishes without themselves giving any independent consideration and accordingly to act in disregard of their fiduciary duty.[37]

This is discussed by the Special Commissioners in *Botnar v IRC*:

> 260. It seems to us that due importance must be given to the words "able… to control" in [enjoyment condition E] bearing in mind the words "in any manner whatsoever, and whether directly or indirectly". An example of indirect control is to be found in *Lee v IRC* 24 TC 207, where the taxpayer as majority shareholder could appoint and remove the directors of the company in question.
> 261. In our judgment the ability to control must go beyond an assumption that those controlling the companies will comply with the transferor's wishes and the fact that they do comply is immaterial. We accept the question posed by [Counsel], viz whether Mr. Botnar was in a position to ensure that the companies would act in accordance with his wishes.
> 262. There was in fact no material before us to indicate that Mr. Botnar could have done anything if Dr. Lenz had declined to do what he wanted. The position might have been different if Dr. Lenz was for example an employee who might have been dismissed in the event of failing to cooperate. There was however no evidence to suggest this. We are satisfied that the directors of the companies would have carried out his instructions. We have no doubt that Mr. Botnar was justified in assuming that Dr. Lenz would do what he wanted. However we do not consider that the mere fact that Dr. Lenz was in the saddle of the settlement meant that Mr. Botnar was able to ensure that the income would be applied for his benefit. On the authority of *Schroder* even decisive influence is not enough.
> 263. We readily accept [Counsel's] submission that Mr. Botnar wished to ensure that the shares would remain in friendly hands. In a sense it could be said that he did in fact control the settlement and the Companies because in fact Dr. Lenz did comply with his wishes: there was no evidence of any action by Dr. Lenz which was contrary to Mr.

---

37 *IRC v Schroder* 57 TC 94 at p.125, followed in the non-tax case *R v Radio Authority ex p. Guardian Media Group* [1995] 1 WLR 334 at p.345.

> Botnar's wishes. That is not however the same as Mr. Botnar having the ability, even indirectly, to ensure that the income would be applied in accordance with his wishes.

In practice it is very rare that enjoyment condition E is satisfied and none of the other four enjoyment conditions would be satisfied. *Lee v IRC* 24 TC 207 (shareholder's power to appoint and dismiss directors) offers an example: if T transferred assets to a company under which T's only interest was management shares conferring votes but no dividends or capital, T would satisfy enjoyment condition E. But T would also satisfy enjoyment condition B as company income would tend to increase the value of the voting shares (voting shares do have some value).

### 26.6.6 *Minority shareholding in offshore company*

If T holds a majority shareholding in an offshore company, T has power to enjoy all the income of the company since enjoyment condition E is satisfied. The same applies if T and T's spouse together have a majority shareholding. What is the position if T has a minority shareholding, say, 10% of the ordinary shares? At first sight one might think that T has power to enjoy all the income of the company, since the income of the company increases the value of T's minority shareholding. But it is suggested that the better view is that T has only power to enjoy one tenth of the company's income. This was assumed in *Bambridge v IRC*.[38]

## 26.7 Power to enjoy: causation condition

It is not sufficient that the transferor has power to enjoy the income of the person abroad. A causation condition must also be satisfied. Section 721(2) ITA provides:

> Condition A is that the individual has power in the tax year to enjoy income of a person abroad *as a result of*—
> (a) a relevant transfer,
> (b) one or more associated operations, or
> (c) a relevant transfer and one or more associated operations.

---

38 36 TC 313. See Boyd, "Requiem for a Man of Straw" [1980] BTR 442 at p.457.

Suppose:

(1) In 1970 A transfers an asset to a non-resident company wholly owned by B, who is not UK resident ("A's transfer").

(2) in 2005 B transfers the company to an offshore trust under which A may benefit ("B's transfer").

A has made a relevant transfer. However, before 2005, A is not within s.720 since A does not have "power to enjoy" the income of the company.

From 2010 onwards, A does have "power to enjoy". A does not have that power as a result of A's transfer alone. However, B's transfer appears at first sight to be an associated operation in relation to A's transfer.[39] It seems at first sight that s.721 condition A is satisfied and A is taxable under s.720 on the income of B's trust! This clearly cannot be right, but why not? This raises questions similar to those discussed in para 25.11.1 (Transfer from A to B followed by transfer from B to person abroad). Before the ITA, the legislation dealt with this by applying a more limited causation test. If B's transfer was an independent act, it "broke the chain of causation" and A's transfer was not the real or effective or operative cause.

From 2007/08, the foundation of that argument has been knocked away. But the courts will have to fill in the hole with a gloss, or the legislation simply does not work. It is suggested that B's transfer is not an associated operation, so A is not within s.720 if there is a "clean break" between A's transfer and B's transfer (the same test as applies elsewhere).

Suppose:

(1) In year 1, T transferred assets to an offshore company ("the original transfer of assets").

(2) In year 2, T lent money to the company interest-free (" the loan").

Suppose in year 1 T has no interest in the shares of the company and so has no power to enjoy its income and is outside s.720.

In year 2, T probably does have power to enjoy the income of the company by virtue of the interest-free loan.[40] However T is not taxed on the income arising from the original transfer of assets in year 1, since that power to enjoy does not arise *as a result* of the transfer or any associated

39 See 25.9 (Associated operation: definition).

40 See 26.6.3 (Enjoyment condition C: individual receives benefit).

operation. The loan is not an associated operation.[41]

On the other hand, T is in principle subject to tax under s.720 on the income arising to the offshore company as a result of the loan in year 2 (if there is any) as the loan is itself a transfer of assets.

## 26.8 Income chargeable: Section 721 Condition B

Section 721(3) ITA provides:

> Condition B is that the income would be chargeable to income tax if it were the individual's and received by the individual in the UK.

It is not easy to think of income which would not be chargeable if received by a UK ordinarily resident individual in the UK. Perhaps the drafter had in mind a transferor who was ordinarily resident but not resident. If such a person can exist[42] they will benefit from condition B as (being non-resident) they are not chargeable on foreign income. In practice condition B will always be satisfied.

## 26.9 Amount of s.720 charge

Section 720 ITA provides:

> (2) Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions).
> (3) Tax is charged under this section on the amount of income treated as arising in the tax year.

Unfortunately s.720 does not tell us *what* is the amount of income treated as arising. Section 721 does not answer the question either.[43] So

---

41 See 25.9.2 ("Associated"). The example is based on the facts of *Fynn v IRC* 37 TC 629 where the s.720 point was not argued, presumably, because the Revenue accepted this view was correct. For the s.727 issues raised by these facts, see 26.12.3 ("Connected with any relevant transaction").

42 Which is doubtful: see 3.20 (Ordinary resident but not resident).

43 Section 721 ITA provides:
"(1) Income is treated as arising to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if conditions A and B are met.

construction and common sense must fill the gap.[44]

### 26.9.1 *Power to enjoy part of income of person abroad*

A person may have "power to enjoy" (as defined) over all the income of an offshore person even though their power to enjoy (in the natural sense of that expression) is limited to part[45] or even none[46] of the income. In such a case T is taxed on all the income: *Howard de Walden v IRC* 25 TC 121.

However, if T has power to enjoy (as defined) over only part of the income, T is only taxed on the income which T has power to enjoy:

> The only question is: What income of the non-resident does the resident individual have power to enjoy by reason of the transfer either alone or in conjunction with associated operations? It is that income which is deemed to be income of that individual for all purposes of the Income Tax Acts.[47]

### 26.9.2 *Person abroad with independent source of income*

Suppose:

(1) T transfers assets to an offshore company.
(2) The offshore company has two sources of income:
    (a) income from the assets transferred by T;
    (b) income from other sources which have nothing to do with T.
(3) T has power to enjoy all the income of the offshore company.

---

(2) Condition A is that the individual has power in the tax year to enjoy income of a person abroad as a result of—
(a) a relevant transfer,
(b) one or more associated operations, or
(c) a relevant transfer and one or more associated operations."

44 See R.S. Boyd "Requiem for a Man of Straw" [1980] BTR 442. See also 25.13 (Capital receipts deemed to be income) and 25.14 (The amount of income of person abroad).

45 eg if T transfers shares to a company in which T holds debentures. If all the income of the company increases the value of the debentures just a little, T has power to enjoy over all the income within enjoyment Condition B.

46 eg if T has control within enjoyment Condition E.

47 *Congreve* 30 TC 163 at p.199.

The section does not say *what* income is treated as arising to the individual. Is it any income of the person abroad? Or is it only the income which arises as a result of the transfer of assets or associated operations?

RI 201 states:

> It has not been determined by the Courts whether all the income of the overseas person should be assessed, or only the income of that person to the extent that it arose by virtue or in consequence of the relevant transfer of assets and any associated operation(s). It has been the Revenue's practice (since the decision in *Vestey v IRC* 54 TC 503) to assess on the second of these two possible bases.

This must be so. The view that all the income of the person abroad is taxed is "quite ridiculous".[48] This view is now supported by s.714(2) ITA which provides:

> The charges apply only if a relevant transfer occurs, and they operate by reference to income of a person abroad that is connected with the transfer or another relevant transaction.

This clearly rejects the view that all income of the person abroad is caught. It suggests however that the measure of income caught is not that which arises as a *result* of the relevant transfer or associated operation, it is income which arises that is *connected* with the transfer or associated operation. "Connected" is not defined. However, while the wording was perhaps designed to give HMRC scope to take one step back from the position stated in RI 201, I cannot think of a case where it would arise in practice.

### 26.9.3 *Transferor's deductions and reliefs*

Section 746 ITA provides:

> (1) This section applies for the purpose of calculating the liability to

48 Walton J in vehement form in *Vestey v IRC* 54 TC 503 at p.562, followed in *Carvill v IRC* [2000] STC (SCD) 143 at [97] - [98]. The point had been left open in *Howard de Walden v IRC* 25 TC 119.

> income tax of an individual charged under section 720 or 727.
> (2) The same deductions and reliefs are allowed as would have been allowed if the income treated as arising to the individual under section 721 or 728 had actually been received by the individual.

As far as I can see, this is not needed (except perhaps for the avoidance of doubt). The wording is the same as for the provisions for settlor-interested trusts; so see 24.2.7 (Settlor's deductions and reliefs) for further discussion.

## 26.10 Enjoyment condition C – benefits

Section 724 ITA provides:

> **Special rules where benefit provided out of income of person abroad**
> (1) This section applies if an individual has power to enjoy income of a person abroad for the purposes of section 721 because of receiving any such benefit as is referred to in section 723(3) (benefit provided out of income of person abroad).
> (2) Despite anything in section 720, the individual is liable to income tax under that section for the tax year in which the benefit is received on the whole of the amount or value of that benefit.
> (3) But subsection (2) does not apply so far as it is shown that the benefit derives directly or indirectly from income on which the individual has already been charged to income tax for that tax year or a previous tax year.

This was introduced in 1969 and upset the reasoning of *de Walden* where repayment of a loan was held to fall within enjoyment condition C.[49] Since the charge is now on the value of the benefit, and the value of a payment for full consideration (such as the repayment of a loan) is nil, Condition C is not now satisfied.

In *Botnar* the Special Commissioners said:

> 245. ... Where the power to enjoy arises the tax is charged not on the income which the taxpayer has power to enjoy but on the value of the benefit. This may bear no relationship whatsoever to the income of the

49 See 26.6.3 (Enjoyment Condition C: individual receives benefit).

> non-resident as long as it originated from it even indirectly. We do not accept that [s 724 ITA] only operates where the benefit received in a year exceeds the relevant income.

It is considered that the charge is on the lower of the value of the benefit and the amount of income of the person abroad. The value of a benefit in excess of the income does not come into charge, and if the transferor has power to enjoy the income apart from enjoyment condition C, then this provision does not apply.[50]

## 26.11 Transferor receives capital sum

Sections 727 and 728 ITA must be read together:

> **727 Charge to tax on income treated as arising under section 728**
> (1) The charge under this section applies for the purpose of preventing the avoiding of liability to income tax by individuals who are ordinarily UK resident by means of relevant transfers.
> (2) Income tax is charged on income treated as arising to such an individual under section 728 (individuals receiving capital sums as a result of relevant transactions).
> (3) Tax is charged under this section on the amount of income treated as arising in the tax year. ...
> (4) The person liable for any tax charged under this section is the individual to whom the income is treated as arising. ...
> **728 Individuals receiving capital sums as a result of relevant transactions**
> (1) Income is treated as arising to such an individual as is referred to in section 727(1) in a tax year for income tax purposes if—
> (a) income has become the income of a person abroad as a result of—
> (i) a relevant transfer,
> (ii) one or more associated operations, or
> (iii) a relevant transfer and one or more associated operations, and
> (b) the capital receipt conditions are met in respect of the individual in the tax year (see section 729).

Section 727 ITA is an independent charging section. Lord Greene explains its purpose in *Howard de Walden v IRC* 25 TC at p.135:

50 See Venables "Section 739 and benefits in kind", OTPR Vol 11 Issue 3 p.1.

> The provision was made ... to meet devices by which a transferor took care to give himself no "power to enjoy" any income of a non-resident transferee company within the meaning of [s.723 ITA], but obtained the money he required, for example, by borrowing from the company, all the shares being vested (for example) in his children.

An example would be a non-resident trust or company making an (arm's length) loan to a transferor who was excluded from benefit.

Many of the rules applying to s.720 also apply to s.727. In ITA they are set out twice in full, but I do not discuss them again here. In particular, the words "such an individual" in s.727(2) restrict the charge to the transferor (just as s.720).

### 26.11.1 *Nature of s.727 charge*

ITA EN Change 111 provides:

> Section 739(3) ICTA [now s.727] does not deem the capital sum to be income; instead, it takes income which has become payable to persons abroad as a result of the transfer and deems that income to be the transferor's.

In *Vestey v IRC* 54 TC 503, Lord Wilberforce said:

> It is "any income" of the foreign transferees which is deemed to be the income of the recipient of a capital sum, [*indeed of each and every recipient of any capital sum*,][51] small or large, whenever received. From these words there is no escape.

### 26.11.2 *Relationship of s.720 and s.727*

In *Vestey v IRC*, Walton J said:

> [Sections 720 and 727 ITA] are ... concurrent and not cumulative. A person cannot be taxed in any one year on the same sum under both [s.720 and also s.727]. Like Warren Hastings, the Crown, in making this concession, doubtless stood amazed at its own moderation ... but

51 The words in italics are wrong since s.727 is limited to transferors.

> make it it did.[52]

In practice it is rare for s.727 to apply in a case where s.720 does not, that is, the transferor receives a capital sum without having power to enjoy. So it is rare to have to look at s.727 at all.

## 26.12 The capital receipt conditions

Section 729(1) ITA provides:

> For the purposes of section 728(1), the capital receipt conditions are met in respect of the individual in a tax year ("the relevant year") if—
> (a) either—
>   (i) in the relevant year the individual receives or is entitled to receive any capital sum, whether before or after the relevant transfer, or
>   (ii) in any earlier tax year the individual has received any capital sum, whether before or after the relevant transfer, and
> (b) the payment of that sum is (or, in the case of an entitlement, would be) in any way connected with any relevant transaction.

### 26.12.1 *"Receives"*

"Receives or is entitled to receive" is glossed in s.729(4) ITA:

> For the purposes of subsection (1), a sum is treated as a capital sum which the individual ("A") receives or is entitled to receive if another person receives or is entitled to receive it—
> (a) at A's direction, or
> (b) as a result of the assignment by A of A's right to receive it.

### 26.12.2 *"Capital sum"*

"Capital sum" is defined in s.729(3) ITA:

> In subsection (1) "capital sum" means—

52 54 TC 503 at p.556.

(a) any sum paid or payable by way of loan[53] or repayment of a loan, and
(b) any other sum paid or payable—
  (i) otherwise than as income, and
  (ii) not for full consideration in money or money's worth.

In *Botnar v IRC* 72 TC 205 at p.266 the Special Commissioners say:

> In our judgment the entitlement to use the flat is not a capital sum within the definition in [s.729(3)]; in particular we hold that the entitlement to use was not a "sum" within any normal use of English.

26.12.3 *"Connected with any relevant transaction"*

In *Fynn v IRC* 37 TC 629:
(1) In 1948, T transferred assets to an Irish company ("the transfer of assets").
(2) The company charged the asset for a debt ("the charge").
(3) In Jan 1952, T lent the company £12,000 ("T's loan").
The Revenue assessed T on the income accruing to the company in 1951/2 and 1952/3 under (what is now) s.727.[54]

During those years T was entitled to receive a capital sum (repayment of T's loan). However, this was not "in any way connected" with the transfer of assets or the charge (an operation associated with the transfer). So the condition in s.729(1)(b) was not satisfied, ie, the capital receipt conditions were not satisfied.

This is the only use of the expression "connected with" in the TAA provisions (though the definition of associated operations uses the comparable expression "in relation to" and it is suggested that the meaning is the same). "Connected with" is of course an expression used in other anti-avoidance provisions.[55]

26.12.4 *Relief for repaid loan*

Section 729(2) ITA provides relief for loans which are repaid:

---

53 "Loan" is a fairly narrow term and does not include the right to an unpaid purchase price: *Ramsden v IRC* 24 TC 515.

54 These facts also raise interesting s.720 issues which were not discussed in the case; see 26.7 (Power to enjoy: causation condition).

55 For instance the transactions in securities provisions.

> But subsection (1)(a)(ii) does not apply merely because of the receipt of a sum by way of loan if the loan is wholly repaid before the relevant year begins.

## 26.13 Time extent of s.727 charge

### 26.13.1 *Historic income*

A transferor who receives a capital sum is not taxed on income of years before the year of receipt. Section 727 is not in that sense retrospective:

> While the income of the non-resident trustees would be deemed to be the income of [the taxpayer] on her receipt of the £100,000 [capital sum] on 2 May 1966, *in that and subsequent financial years*, I see nothing in [s.727] which gives it retrospective effect. It does not provide that the income of the non-resident in any year before the person receives or is entitled to receive is to be deemed to be that person's income.[56]

The view that s.727 could apply retrospectively to income of years before receipt of the capital sum seems unworkable since it would require an unlimited number of past years to be reopened. This section could even apply to income accruing in years when the transferor was not ordinarily UK resident.

This explains why the capital receipt conditions are satisfied if a transferor has an entitlement to receive a capital sum, even though they have not actually received it. The application of s.727 makes sense here because on the subsequent receipt of the capital sum the historic income would not otherwise be caught.

### 26.13.2 *Present and future income*

The s.727 charge applies to income of years in which the capital receipt condition is met. However once that condition is met in one year, it is generally met in all future years, so s.727 in principle applies to the income of the person abroad in the year that the capital receipt condition is first met and all future years.

---

56 *Vestey v IRC* 54 TC 503 at p.594.

To this rule there are two narrow exceptions. The first relates to loans which are repaid.[57] The second is this: The capital receipt condition in s.729(1) (so far as relevant) requires that:

> either—
> (i) in the relevant year the individual receives or is entitled to receive any capital sum, whether before or after the relevant transfer, or
> (ii) in any earlier tax year the individual has received any capital sum, whether before or after the relevant transfer

The condition in (a) is satisfied in a year if the individual receives *or is entitled to receive* a capital sum in that year. The condition is satisfied in a year if the individual received a capital sum in an earlier year.

The condition is not satisfied if the individual was entitled to receive a capital sum in an earlier year (if entitlement has ceased and the individual did not actually receive anything). This was deliberate. ITA EN Change 111 provides:

> But the wording of section 739(3) of ICTA [now s.727] leaves the timing of the charge rather unclear. It reads:
>
> > Where, whether before or after any such transfer, such an individual receives or is entitled to receive any capital sum …
>
> Section 739(6) ICTA [now s.729(2) ITA] provides that income is not deemed to be the individual's under section [727] for any tax year "by reason only of his having received a sum by way of loan if that sum has been wholly repaid before the beginning of that year".[58] Therefore income may be deemed to be the individual's in other cases where there has been an actual receipt of a capital sum in a previous tax year. But [the source legislation] makes no provision about whether section [727] imposes a charge if the individual was merely entitled to receive a capital sum in a previous tax year. In practice, where entitlement to a capital sum has ceased HMRC do not pursue further liability under section [727]. Section 729 ITA gives effect to this practice by providing that the individual must either receive or be entitled to receive a capital sum in the tax year or have received a capital sum in an earlier tax year.

However it must be rare that a transferor is entitled to receive a capital

57 See 26.12.4 (Relief for repaid loan).
58 See 26.12.4 (Relief for repaid loan).

sum without ever receiving a capital sum.

In general, therefore, the capital receipt conditions are met in an year if the transferor has received a capital payment in an earlier year. This raises the spectre of a transferor being taxed for all time because they have received a small capital payment. Suppose:

(1) A company under which the transferor has power to enjoy, and under which they are taxed under s.720 ITA.
(2) The transferor receives a capital sum. This does not give rise to any (or any additional) charge under s.727 since all the income is taxed as the transferor's anyway.
(3) The transferor is then excluded from benefit and ceases to have power to enjoy.

It has been suggested in these circumstances that all future income arising in the company will be deemed to be that of the unfortunate transferor. The same point would apply to a non-resident trust if a capital payment was made to the settlor, even though the settlor was subsequently excluded from benefit and ceased to be liable under the settlement provisions. That would be absurd. For good measure, the overlap with s.633 ITTOIA would also lead to a double charge. In practice HMRC do not take that point.[59] It is suggested that s.727 does not normally apply in a situation where s.720 applies, so a capital sum received at that time should be disregarded. A court would no doubt look at the matter differently if there were arrangements under which the transferor effectively enjoyed that income.

The same problem arises if:

(1) Trustees hold a company under which the transferor has power to enjoy, and under which they are taxed under s.720 ITA.
(2) The transferor receives a capital sum.
(3) The trustees then sell the company to a third party..

It has been suggested that all future income arising in the company will be deemed to be that of the unfortunate transferor (though they may not have any right to know from the purchaser what that income will be). That would be absurd. In practice HMRC do not take that point. It is suggested

59 But there is no official statement to this effect. The EN set out above does state:

> "In practice, where entitlement to a capital sum has ceased HMRC do not pursue further liability under s.739(3) ICTA [now s.727]"

but it is assumed there that if the individual *actually* receives a capital sum, liability never ceases.

that s.727 does not normally apply in this situation. A court would no doubt look at the matter differently if there were arrangements under which the transferor effectively enjoyed the company income.

Another possible solution to this conundrum would be that that of Walton J who said in *Vestey* that the charge under s.727 was limited to the amount of the capital sum. This view was rejected by two judges in the House of Lords who commented on the point, though obiter;[60] however it remains arguable, at least in the supreme court, as the court's approach to construction is looser than before, and the problems which arise were not fully explored.

## 26.14 Section 720 remittance basis

Section 726 ITA provides a relief which I call "**the s.720 remittance basis**". Section 726(1) provides:

> This section applies in relation to income treated under section 721 as arising to an individual in a tax year ("the deemed income") if—
> (a) section 809B, 809D or 809E (remittance basis) applies to the individual for the year, and
> (b) the individual is not domiciled in the UK in the year.

In short, the relief applies to remittance basis taxpayers. Section 726(2) ITA defines the term "foreign" deemed income:

> For the purposes of this section the deemed income is "foreign" if (and to the extent that) the income mentioned in section 721(2) would be relevant foreign income if it were the individual's.

"The income mentioned in s.721(2)" is the income of the person abroad (or that part over which the individual has power of enjoyment). Section 726(3) ITA provides the relief:

> Treat the foreign deemed income as relevant foreign income of the individual.

In the HMRC view s.720 deemed income is fictional income distinct from

60 See the comment of Lord Wilberforce set out in 26.11.1 (Nature of s.727 charge).

the actual income of the person abroad. Since fictional income cannot be remitted, the remittance basis would not work. So s.726(4) ITA provides:

> For the purposes of chapter A1 of part 14 (remittance basis), treat so much of the income within section 721(2) as would be relevant foreign income if it were the individual's as deriving from the foreign deemed income.

In short, the remittance basis applies as if the income accruing to the person abroad were the income of the transferor. There is a tax charge if the income of the person abroad is received/brought/used in the UK by the transferor or by a relevant person (in relation to the transferor).

It is desirable for trusts and companies within s.720 to segregate (1) foreign income and (2) capital. They can then remit capital (IT-free) rather than income (chargeable at IT rates). If they fail to do so then the mixed fund rules will apply.

### 26.14.1 *Payment of s.720 income to transferor while non-resident*

Suppose:

(1) Year 1: Income accrues to a company within s.720. The transferor ("T") receives s.720 deemed income but that income is (un)taxed under the s.720 remittance basis.

(2) Year 2:
   - (a) T becomes non-resident.
   - (b) The company distributes its income by way of dividend. T receives actual income (a dividend) but because this dividend is received in a non-resident year, it is not taxed either on receipt or when remitted to the UK.

(3) Year 3:
   - (a) T becomes UK resident.
   - (b) T remits that dividend to the UK.

The question is whether the dividend received in the UK in year 3 constitutes a remittance of the s.720 deemed income of year 1. Is the dividend which the individual received derived from the s.720 deemed income. The answer is that the dividend received is derived from the income of the person abroad, and so is taxable on receipt in the UK in year

3.[61]

The position is no better if T remits the dividend in year 2, as this is in principle caught by the temporary non-residence rules.

In short, one cannot "wash" income taxable on the s.720 remittance basis by a distribution to T in a year of T's temporary non-residence. That view fits the object of s.720 which is to put the transferor in the same position as if they had not made the transfer: see *Chetwode v IRC* 51 TC 647.

### 26.14.2 *Pre-2008 s.720 income and transitional rules*

In the following discussion I use the term **"pre-2008 s.720 income"** to mean foreign income arising before 6 April 2008, which fell within (what was then) s.739 ICTA, but which qualified for the s.739 foreign domicile defence of (what was then) s.743(3) ICTA. There was no tax charge when the income arose.

Before 2008/09 it is considered that there was no charge under s.739 or s.743(3) if such income was (after its receipt) remitted to the UK. This was so whether the income was remitted by:

(1) the person abroad who received it; or
(2) the transferor (if they received the income outside the UK from the person abroad).[62]

Para 170 Schedule 7 FA 2008 provides:

> The amendments made by paras 161 to 179 have effect for the tax year 2008-09 and subsequent tax years.

Pre-2008 s.720 income remitted after 2008/09 is not caught by s.726 as the condition in s.726(1)(a) is not met.[63] So there is still no charge on the

---

61 See s.726(4). This seems even clearer if one remembers that distribution relief would be available, had the dividend in fact been taxable; see 28.4 (Distribution relief).

62 This was actually sensible. See *Taxation of Foreign Domiciliaries* 6th edn para 15.10 (Critique of s.648 clawback). Needless to say, no reason was given for changing the position.

63 Contrast the usual RFI remittance basis, where para 83 Sch 7 FA 2008 fills that gap: see 9.15.1 (Transitional rule for pre-2008 income/gains). HMRC may not agree. TAH 1224 provides:

> "The provisions described in TAH 1223 have effect for the tax year 2008-09 and subsequent years. There are no specific transitional arrangements for introduction of the new provisions. As the income charge only looks at income arising to the

remittance of pre-2009 s.720 income. This is right and fair, since there was no charge on remittance before 2008. However (given the retrospective operation of many of the 2008 reforms) this may have been an oversight and HMRC may argue that pre 2008/09 s.720 income is taxable under s.726 on remittance on or after 2008/09. TAH para 1224 provides:

> The provisions described in TAH 1223 [including s.726 ITA as amended in 2008] have effect for the tax year 2008-09 and subsequent years. There are no specific transitional arrangements for introduction of the new provisions. As the income charge only looks at income arising to the person abroad in the tax year it should not be necessary to have regard to income of earlier years in determining whether there is an amount that is to be regarded as foreign deemed income. However if there is foreign deemed income then in considering any possible charge under Part 8 ITTOIA it will be appropriate to consider all sums remitted to the United Kingdom in the tax year even if they arise, for example, from income of periods prior to the introduction of these provisions. Those remittances will fall to be tested against the rules in Chapter A1 Part 14 ITA 2007 as to whether they are taxable remittances.

### 26.14.3 *s.720 income of years 2005/06 to 2007/08: HMRC view*

In the following discussion I use the term "**2005-2008 s.720 income**" to mean foreign income arising in the years 2005/6 to 2007/8 (inclusive), which fell within (what was then) s.739 ICTA.

TAH para 1222 records the bizarre view that ITTOIA absent-mindedly abolished the s.720 remittance basis formerly in s.743(3) ICTA, so that between 2005-2008 s.720 income was always charged on an arising basis:

> Following the tax law rewrite [ITTOIA] new and separate charging provisions were introduced for all types of foreign income replacing the

---

person abroad in the tax year it should not be necessary to have regard to income of earlier years in determining whether there is an amount that is to be regarded as foreign deemed income. However if there is foreign deemed income then in considering any possible charge under Part 8 ITTOIA it will be appropriate to consider all sums remitted to the United Kingdom in the tax year even if they arise, for example, from income of periods prior to the introduction of these provisions. Those remittances will fall to be tested against the rules in Chapter A1 Part 14 ITA 2007 as to whether they are taxable remittances."

> general charge under what was Case IV/V of Schedule D. The new provisions, included in the Income Tax (Trading and Other Income) Act 2005 (ITTOIA), also provided, on a claim, an alternative basis for calculating certain income categorised as 'relevant foreign income' and the amount on which an individual would be taxed.
>
> From the introduction of ITTOIA non-UK domicile status could impact this relevant foreign income and resulted broadly speaking in the income subject to the claim being taxed only when received in the United Kingdom.
>
> Apart from minor adjustments consequential upon the introduction of ITTOIA the transfer of assets provisions giving exclusion from charge for certain income of non-UK domiciled individuals remained largely unchanged. However the exclusion [s.743(3) ICTA] was only for income that would not be chargeable to tax on the basis of domicile status alone.
>
> It could be argued that following the new charging provisions brought into effect by ITTOIA, which carried no distinction on the basis of domicile, that from 6 April 2005 there was no such income that fell to be excluded on the basis of domicile under the transfer of assets provisions.

I have not come across any reference to this argument before the publication of the TAH in 2009, nor do HMRC say expressly whether or not they regard it as correct. I find it hard to imagine that anyone could take the argument seriously. But in practice the point is academic as HMRC do not usually take any notice of it:

> However the introduction of ITTOIA was not intended to change the law under transfer of assets in this way and as a result HMRC continues to operate the income charge provisions in this interim period in the same way that they were operated prior to April 2005, subject to cases where there appears to be manipulation of the interaction of the new provisions. Where you identify a case that appears to involve manipulation refer it to the Transfer of Assets Technical Adviser in CAR (Residency) Offshore Personal Tax Team.

If the argument were actually right, so 2005-2008 s.720 income was by law taxed on an arising basis, then HMRC could not of course assess the income in a subsequent year when it was remitted. They can only assess it in the year that it arose. One could envisage circumstances when the taxpayer would want to raise the argument. Similar issues would arise in relation to the s.624 remittance basis. However I doubt if these wider ramifications of the argument will ever need to be considered.

## 26.15 No indemnity for transferor

The transferor has no express statutory indemnity against the person abroad for tax paid under s.720. It is considered that no indemnity can be implied.

## 26.16 Tax return disclosure[64]

Helpsheet 262 (Income and benefits from transfers of assets abroad and income from non-resident trusts - 2009/10) provides:

> **How do you report the income?**
> Unless you are completing box 46 – see ‘How do you qualify for an exemption from charge on income or benefits’ on page 5 – report the amount of income as follows:
> • enter in boxes 10 and 11 dividend income of a UK company together with any other income chargeable as dividend income
> • enter in boxes 12 and 13 all other income chargeable by these provisions. You should enter details of the relevant transactions that have given rise to the income, and the offshore structures involved, in the ‘Any other information’ box on page TR 6 of your tax return.
> All income that is chargeable to tax under the transfer of assets provisions should be entered at boxes 10 to 13 of the Foreign pages not in the corresponding boxes elsewhere in the return for the type of income involved.
> For example, if interest income arose to a foreign company and that income is treated as yours under the transfer of assets provisions, then the income should be entered at box 12 not in the relevant boxes for interest. If you are non-UK domiciled then you may not have to enter all of the income if some of the income arising to the person abroad is from a source outside the UK and not remitted to the UK. See ‘How do you report income or benefits if you are non-UK domiciled?’ on page 5.

This reflects the HMRC’s official view that s.720 deemed income is distinct from the income of the person abroad.

64 See too 29.45 (tax return: disclosure of motive defence claim)

CHAPTER TWENTY SEVEN

# TRANSFER OF ASSETS ABROAD: NON-TRANSFERORS

## 27.1 Non-transferors – Introduction and terminology

The provisions can be divided into four parts. In the order in which they appear in ITA they are: the charge, the fundamental s.732 conditions, computation and defences. This is not the most logical way in which the legislation could have been set out but it is convenient to follow the statutory order.

First, s.731 ITA imposes the charge:

> **731 Charge to tax on income treated as arising under section 732**
> (1) Income tax is charged on income treated as arising to an individual under section 732 (non-transferors receiving a benefit as a result of relevant transactions).
> (2) Tax is charged under this section on the amount of income treated as arising for the tax year. ...
> (3) The person liable for any tax charged under this section is the individual to whom the income is treated as arising. ...

The charge applies if income is treated as arising under s.732, to which we must turn as the second stage of our journey. Section 732(1) ITA sets out five sets of conditions. I refer to them as "**the fundamental s.732 conditions**". They are as follows:

> *(a) a relevant transfer occurs.*

I refer to this as "**the relevant transfer condition**".

> *(b) an individual who is ordinarily UK resident receives a benefit.*

This contains two aspects, the receipt of a benefit and residence. So far as the residence aspects are concerned, I refer to this as "**the ordinary residence condition**".

> *(c) the benefit is provided out of assets which are available for the purpose as a result of—*
> *(i) the transfer, or*
> *(ii) one or more associated operations.*

I refer to this as "**the benefit causation condition**".

> *(d) the individual is not liable to income tax under section 720 or 727 by reference to the transfer and would not be so liable if the effect of sections 726 and 730 were ignored.*

I refer to this as "**the transferor's s.731 defence**".

> *(e) the individual is not liable to income tax on the amount or value of the benefit (apart from section 731).*

I refer to this as "**the benefit liable to IT defence**".

Where there is a relevant transfer to a trust or company, and the motive defence and ss.720 and 727 do not apply, I describe this trust or company as being "**within section 731**".

If all five fundamental conditions are satisfied one moves on to s.732(2) ITA:

> Income is treated as arising to the individual for income tax purposes for any tax year for which section 733 provides that income arises.

The third stage is to compute the amount of income treated as arising: this is dealt with in s.733 ITA (and s.734).

Lastly, there are some defences to the charge: in particular the s.731 remittance basis and the motive defence.

The statute refers on many occasions to "income treated as arising under s.732". It is convenient to have a short label for this, and I call it "**s.731 deemed income**". (It might be called "s.732 deemed income" but the charge is under s.731.)

## 27.2 Relevant transfer condition

The first fundamental s.732 condition is the relevant transfer condition. Section 732(1) ITA provides:

> This section applies if—
> (a) a relevant transfer[1] occurs,

Despite the present tense ("occurs") this condition is met in a year if a relevant transfer occurred in an earlier year. Grammarians call this "the historic present".

## 27.3 Ordinary residence condition

The second fundamental s.732 condition requires ordinary residence. Section 732(1) ITA provides:

> This section applies if ...
> (b) an individual who is ordinarily UK resident receives a benefit,

If an individual receives a benefit in a year but is not ordinarily resident in the year there is no charge under s.731 in relation to that benefit in that year.

What if B later becomes UK resident? Suppose:

(1) Year 1: B is not ordinarily resident in the UK, but receives a benefit.
(3) Year 2: B becomes ordinarily resident in the UK but receives no benefit in that year.

It is considered that the fundamental condition in s.732(1)(b) is still not met in year 2: the words "an individual who is ordinarily UK resident receives a benefit" mean that the individual must be ordinarily resident at the time that they receive a benefit.

Residence at the time that relevant income arises is not in principle necessary. Suppose:

(1) Year 1: B is non resident and relevant income arises.
(2) Year 2: B is UK resident and receives a benefit.

---

1 See 25.2 ("Relevant transfer").

The ordinary residence condition is satisfied so there is in principle a charge under s.731 by reference to the income of year 1.

Now suppose:

(1) Year 1: B is ordinarily resident in the UK and receives a benefit. However, there is no relevant income (no income arises at all or it has all been distributed) so there is no charge under s.731.

(2) Year 2: B is not UK resident or ordinarily resident but relevant income arises.

It is suggested that the ordinary residence condition is not met: the words "an individual who is ordinarily UK resident receives a benefit" mean that the individual must be ordinarily resident at the time that the section applies, as well as being ordinarily resident at the time they receive a benefit. This view is supported by the implied territorial limitation of UK taxation; see 16.4 (Why does location of source matter?). But if B returns to the UK in year 3 B may be subject to tax.

## 27.4 Benefit

The second fundamental s.732 condition requires (in short) that the individual receives a benefit. Section 732(1) ITA provides:

> This section applies if ...
> (b) an individual who is ordinarily resident in the UK *receives a benefit*.

I here consider the meaning of "benefit". The word benefit is very common in tax statutes and in other areas of law.[2] So there is no shortage of material for discussion, though it is always necessary to consider the word in its context. Most of the discussion here applies equally to the meaning of "benefit" in s.87 TCGA.

There is no statutory definition of benefit for the purposes of the TAA provisions.[3] It is well established that "benefit" is a word of wide import.

---

2 For discussion in a trust law context see Kessler & Sartin, *Drafting Trusts and Will Trusts*, Key Haven Publishing (10th ed., 2010), para 13.12 (What does a settlor exclusion clause cover?).

3 The pre-ITA legislation stated that "benefit" included a payment of any kind: s.742(9)(c) ICTA. This had (almost) no practical effect, and was sensibly omitted in the ITA rewrite.

### 27.4.1 *Arm's length transaction*

A transaction for which the individual gives full consideration is not a benefit.[4] It does not matter if the other party is a connected person (eg a sale to or from a family trust or company).

What if the parties act at arm's length and have no gratuitous intent but owing to some mistake the individual gives less than full consideration? This is not a benefit.[5]

### 27.4.2 *Receipt or sale of equitable interest*

RI 201 states:

> For the purposes of [s.731 ITA] a benefit is treated as not including
> [1] either the giving[6] of a life interest to a beneficiary or
> [2] the receipt by a beneficiary of the proceeds of selling a life interest.

Point [1] (conferring a life interest) is not a benefit if the interest is revocable (or else the value of the benefit is nil).[7] If the interest is not revocable, then its receipt is a benefit, but this is still outside the scope of s.731 because such a benefit is not "provided out" of trust assets,[8] and to tax such a benefit is outside the scheme of the Act.

Point [2] (receipt of proceeds of sale of a life interest) is outside the scope of s.731 because a sale at market value is not a "benefit" to the

---

4 This is self-evident; but if authority is needed, see *IRC v Lactagol* 35 TC 230 and *Wilson v Clayton* 77 TC 1.

5 *Wilson v Clayton* 77 TC 1 decided that this is the case for the purposes of employment-related benefits. Note the reference to arm's length transactions in the passage from *Cooper* cited at 27.4.8 (Benefit to which a beneficiary becomes entitled under terms of trust); the same should apply for s.731. For CGT the position is dealt with by statute, but only for the avoidance of doubt: see 45.6.4 (Arm's length transaction).

6 "Giving" a life interest is layman's language. The term must include the conferring of a life interest by exercise of a power of appointment. Presumably it also includes the conferring of a life interest by exercise of a power of advancement or re-settlement.

7 The Special Commissioners reached a similar conclusion in the context of (what is now) s.201 ITEPA: *Dextra Accessories v Macdonald* 77 TC 146 at [9]-[12]. The point was not appealed.

8 Likewise for s.87 TCGA purposes the benefit is not "from the trustees".

vendor, or because the value of the "benefit" (if there was one) is zero.[9] If the sale was for more than market value there is a benefit but the benefit is not provided out of trust assets so it is not within s.731.

Although RI 201 refers to a life interest, the same reasoning must apply to any equitable interest.[10]

### 27.4.3 *Sale of company within s.731*

The same reasoning applies on the sale of shares or securities in a company within s.731. This leads to an interesting anomaly:

(1) B holds shares in a company which has accumulated relevant income within s.731. B sells the shares. No charge arises under s.731 as B does not receive a benefit (even when B spends the proceeds of sale).

(2) Trustees hold shares in a company which has accumulated relevant income. They sell the company. The sale proceeds represent the relevant income[11] and so if the trustees appoint the proceeds to B, B receives a benefit taxable under s.731.

### 27.4.4 *Interest-free loan and enjoyment of asset in kind*

RI 201 continues:

> But it ["benefit"] is otherwise treated as including all benefits taken into account in determining whether an individual has power to enjoy income for the purposes of [s.720 ITA]. It therefore includes for example receipt of a loan at less than a commercial rate of interest, and the use of trust property at less than an open market rental.

Interest-free loans and use of property at less than full rent are benefits within s.87 and s.731: *Cooper v Billingham* 74 TC 139. On valuation of that benefit see 27.5 (Valuation of benefits).

---

9 The drafter of FA 1984 Sch 14 para 5(4) reached the same conclusion for the purpose of (what is now) s.87 TCGA.

10 On a sale of an equitable interest, watch:
   (1) CGT on the disposal of the interest; and
   (2) Schedule 4A TCGA.

11 See 27.27 (Relevant income reinvested: tracing).

### 27.4.5 *Loan (not to life tenant): interest paid at commercial rate*

A simple way of avoiding a benefit (and hence avoiding s.731) is:
(1) a trust makes a loan at a market rate of interest;
(2) if appropriate, provide the beneficiary with funds to pay the interest; and
(3) the beneficiary pays the interest.
Take care that the interest does not have a UK source,[12] and watch *Furniss v Dawson*. The same can be done for the use of property in kind provided the property is not in the UK.

### 27.4.6 *Loan (not to life tenant): interest rolled up*

What if interest at a commercial rate is rolled up unpaid? There is no income tax charge on unpaid interest: *Dewar v IRC* 19 TC 361. In principle there is still no benefit (and so no tax charge under s.731). However, if the intention is that the interest will never be paid, the provision for payment of interest is a sham and ineffective for tax purposes. There are many trust law issues: do the trustees have power to make the loan? Unwinding the arrangement after the death of the beneficiary needs careful thought.

### 27.4.7 *Interest-bearing loan to life tenant*

It is impossible to have an interest-bearing loan to a life tenant, under a transparent *Baker*-type[13] trust, because a person cannot pay interest to himself. Accordingly one cannot avoid a charge on a benefit in kind by purporting to charge interest, whether the "interest" is purportedly paid[14]

---

12 See 17.2 (Interest: charge and location of source).

13 It would be different if the trust was a non-transparent *Garland*-type trust. See 23.1 (Taxation of life tenant).

14 Even if the parties go through a ceremony under which:
(1) the life tenant pays "interest" to the trustees; and
(2) the trustees return it to the life tenant.
Even if the parties do this there is no IT charge on the "interest": *Styles v New York Assurance* 2 TC 460.

or purportedly rolled up.[15] It would be different if interest was payable after the death of the life tenant or if the loan was issued at a discount instead of at interest.

There is a school of thought that maintains (to my mind over-optimistically) that interest-bearing loans to life tenants offer a solution to the problem of extracting trust funds free from s.731 ITA and s.87 TCGA. HMRC do not take that view.

### 27.4.8 *Benefit to which a beneficiary becomes entitled under terms of trust*

Suppose:

(1) A beneficiary is entitled to trust property absolutely subject to satisfying some contingency (eg attaining the age of 25).

(2) The contingency is satisfied (the beneficiary reaches 25 and becomes entitled to the trust property).

There is a "capital payment" for the purposes of s.87 TCGA: see s.97(2) TCGA. There is no equivalent provision in the transfer of asset rules. However, it is considered that the beneficiary does receive a "benefit"[16] and the value of the "benefit" is equal to the value of the trust property. The concepts of "value" and "benefit" can (just) be stretched wide enough to support this conclusion[17] and any other view would be inconsistent with the scheme of the provisions. This view is supported by *Cooper v Billingham* 74 TC 139 CA at [39]:

> The whole scheme of the legislation requires the Court to see what benefit a beneficiary actually receives, in cash or in kind, otherwise than as income or under an arm's-length transaction. Any pre-existing beneficial interest belonging to the beneficiary is irrelevant. The Judge

---

15 However, if interest accrues unpaid and the life tenant dies, the position alters and outstanding interest becomes payable to the trust (unless Apportionment Act 1870 principles apply, which will be rare).

16 It is generally agreed that repayment of an interest-free loan is a benefit for the purposes of s.624 ITTOIA. (The point was conceded in *Jenkins v IRC* 26 TC 295 and the concession was held to be correct in *Wachtel v IRC* 46 TC 543. The issue remains (just) arguable in the Court of Appeal.) However, these cases did not have to consider what was the value of the benefit.

17 Contrast *R v Allen* [2000] 2 All ER 142 [2000] 1 Cr App R(s) 497 accessible *www.kessler.co.uk*, where the Court of Appeal stretched the word in a comparable way in order to uphold a confiscation order.

dealt with this point shortly[18] but there was no need for him to say more.

Likewise, if L is entitled to a life interest, and a trust asset is transferred to L, the value of the benefit received is the value of the asset, not the value of the reversionary interest in the asset.[19]

### 27.4.9 *Benefit on liquidation or redemption of shares or securities*

A similar point arises where:
(1) A shareholder holds shares in a company within s.731.
(2) The shareholder receives assets of the company on the liquidation of the company or on the redemption of its shares.

It is arguable that the shareholder does not receive a "benefit" since they merely receive the property to which they ares entitled in the liquidation or redemption; or (which comes to the same thing) that the value of the "benefit" is nil. After all, a sale of the shares would not be a benefit, and is commercially similar. And no-one would say that there is a benefit for the purposes of employment income benefit in kind rules. On the other hand, the liquidation is analogous to becoming entitled under a trust. The better view, consistent with the scheme of the Act, is that the receipt of funds from the company is a "benefit" for the purposes of s.731. Similar points apply on the redemption of debt securities.

### 27.4.10 *Reimbursement of tax under statutory indemnity*

SP 5/92 provides:

> 8 The settlor's right, under Para 6 Sch 5 TCGA, to reimbursement (or any payment in reimbursement) of tax paid under that Schedule is not regarded as creating an interest in a trust for the settlor under the provisions of [Chapter 5 part 5 ITTOIA] where the settlor, the settlor's spouse, and any companies in which they are participators cannot otherwise benefit from the trust, eg where the only beneficiaries are the settlor's children. Similarly, this statutory right to, or payment in,

---

18 The judge said: "... The recipient's existing interest under the trust has to be left out of the calculation for the purpose of valuing the benefit ...", 74 TC 139 at p.155.

19 This was stated (*obiter*) by the judge in *Cooper v Billingham* 74 TC 139 at p.155. It is the converse of the rule that the receipt of a life interest is not a benefit: see 27.4.2 (Receipt or sale of equitable interest).

> reimbursement is not regarded as bringing the settlor within the provisions of [s.633 ITTOIA, and the TAA provisions], nor as a capital payment for the purposes of s.97 TCGA.
> 9 Further, this statutory right is not regarded as a reservation of benefit for inheritance tax purposes; nor is a provision in the trust deed either requiring the trustees to recognise the settlor's right to reimbursement under Para 6 Sch 5 TCGA or to reimburse the settlor. But where a settlor does not pursue the statutory right to reimbursement, the failure to exercise this right may give rise to an inheritance tax claim under s.3(3) IHTA, in which case the usual rules for lifetime transfers would apply.
> 10 A provision written into a settlement deed requiring the trustees to recognise the settlor's right to reimbursement under Para 6 Sch 5 TCGA, or to reimburse the settlor, is not, of itself, regarded as giving the settlor an interest in the settlement for the purposes of Sch 5, nor as bringing into play the provisions of [s.624 ITTOIA, and the TAA Provisions].

HMRC have suggested that this does not apply if reimbursement is made before the settlor has paid the tax for which they need reimbursement. But it is submitted that there is never a benefit (or the value of the benefit is nil) when trustees pay a sum to a settlor in a *bona fide* settlement of a claim or prospective claim for reimbursement.[20]

### 27.4.11 *Benefit from trust/company under court order in divorce proceedings*

A court sometimes orders a trust or company within s.731 to transfer property to the spouse ("W") of the settlor/principal beneficiary ("H"). Assume that the parties are acting at arm's length, which will normally be the case. Is this a benefit?

It is important to understand the family law background, as to which see 10.38.1 (Is a transfer on divorce made for "consideration"?).

If there were a tripartite agreement whereby the trust transfers assets to W in consideration for W giving up a claim against H, then the transfer from a trust to W would not be a benefit to W (who gives consideration)

20 In practice this is an issue for s.87 but not for s.731 (because the settlor will be the transferor and qualify for the transferor's s.731 defence in any event). For other issues relating to reimbursement, see 27.21 (Relevant income used to pay expenses); 69.21 (Failure to exercise right of reimbursement).

but it would be a benefit to H.

If the transfer is under a court order, including a consent order or Tomlin order, HMRC accept there is no consideration for it. Nevertheless it is suggested there is no benefit to W (or the value of the benefit is nil). Even though there is no consideration (a contract law concept) W does not gain anything. She merely receives what the court finds she is entitled to. For similar reasons H does not receive any benefit from the transfer either. The scheme of the legislation does not require "benefit" to be given an extended meaning. If (contrary to my view) there is a benefit, the benefit is not received as a result of the transfer and associated operations. There is a third argument if needed. The court only has power to make an order against H. It has no power to make an order against the trust.[21] In making the order, the court is effectively deciding that the trust or company within s.731 does not exist. On that basis it is impossible for there to be a charge under s.731 (or under s.87 TCGA).

If this were wrong the benefit is as much a benefit to H as a benefit to W; the fact that it is unclear which of H or W receives the benefit strongly suggests there is no benefit to either H or W.

### 27.4.12 *Payment of IHT*

No individual receives a benefit when trustees pay IHT charges on the trust. This is the case for the IHT 10-year charges and the IHT charges on the death of a life tenant with an estate, but it is necessary to consider them separately:

(1) The IHT 10-year charges are payable by the trustees of the settlement concerned: s.201(1)(a)IHTA.
    Beneficiaries[22] who receive capital payments are also liable for the IHT, but:
    (a) They have a right to recover from the trust fund: s.212 IHTA.
    (b) Also they are only liable if the tax remains unpaid after it ought to have been paid: s.204(5) IHTA.
    Accordingly the payment of IHT 10-year charges by the trustees (or by anyone else) is not a benefit to any individual beneficiary.
    This is so even if that beneficiary was (secondarily) liable for the tax

21 There is a power to vary nuptial settlements, but I assume that power is not exercised.
22 For non resident trusts, settlors are also liable.

under s.201(1).

(2) The IHT charge on the termination of an estate (during the life of the life tenant or on the death of a life tenant) is likewise payable by the trustees of the settlement concerned: s.201(1)(a) IHTA.[23] But the same points apply:
   (a) The life tenant has a right to recover from the trust fund: s.212 IHTA.
   (b) The life tenant is only liable if the tax remains unpaid after it ought to have been paid: s.204(5) IHTA.

   Accordingly the payment of IHT by the trustees (or by anyone else) is not a benefit to the life tenant. It cannot be a benefit to be relieved of a secondary liability of this kind, where one has an effective right of indemnity. Further, in the case of a wide common form trust, even if the class of beneficiaries as a whole may be said to receive a benefit, no individual receives a quantifiable benefit.

## 27.5 Valuation of benefits

The amount of s.731 deemed income depends on the "amount or value" of the benefit: see step 1 of s.733 discussed 27.12.2 (Step 1: Total Benefits.)

"Amount" refers to cash benefits and value refers to non-cash benefits.

For s.87 purposes the wording is different but the end result is the same. The amount of deemed s.87 gains depends on the amount of the capital payment and s.97(4) TCGA provides:

> For the purposes of sections 86A to 96 and Schedule 4C the amount of
> [a] a capital payment made by way of loan, and
> [b] of any other capital payment which is not an outright payment of money,
> shall be taken to be equal to the value of the benefit conferred by it.

Arguments that the value of the benefit is nil tend to overlap with arguments that there is no benefit at all, though the points are conceptually distinguishable.

23 In this case the life tenant is also liable for the IHT, under s.201(1)(b).

There are no statutory valuation rules for s.731 or for s.87.[24] Lord Reid rightly says:

> "Value" is an elusive word: it may mean market value, it may mean value in money to the owner, or it may have other meanings like the value of the work necessary to produce it, or even sentimental value.[25]

In *IRC v Botnar* (Supplementary Special Commissioners Decision at p.262) the Special Commissioners discuss the valuation of living accommodation provided by a trust. This is for the purposes of what is now s.724(2) ITA (enjoyment condition C) but the same applies for the purposes of s.731 and s.87. They say:

> 28. It seems to us that the whole of the value of a non-convertible benefit should, in the absence of any other objective means of valuation, be measured by reference to what it would have cost the individual receiving it. ... When measuring what benefit an individual receives it is not in our view relevant to ask whether he would have purchased the benefit himself. If that were the test a penurious individual receiving a non-money benefit under s.742(2)(c) would escape tax however substantial the benefit since he could not have paid for it.
> 29. The measurement of the benefit by reference to what it would have cost the individual will take account of the terms on which it was provided. In this case although nothing was recording in writing, there is a clear inference that the use of the property was provided on the footing that Mr and Mrs Botnar bore the recurrent outgoings.
> 30. It may be that it will not be easy for a valuer to assess what the cost of a benefit such as this would have been since it is wholly hypothetical there being no market for such benefits. However, it seems to us that one approach may be to take the open market rental and to adjust this by reference to the lack of security of tenure, non-assignabilty and outgoings born by Mr and Mrs Botnar and any other special factors.

*Cooper v Billingham* touches on the valuation of interest free loans:

> [Counsel for the taxpayer] argued that the value of the benefit conferred as required for the purposes of s.97(4) would vary according to the

---

24 Contrast the elaborate valuation rules for employee benefits; this is another manifestation of the patchwork nature of IT.

25 *Heaton v Bell* 46 TC 211 at p.246.

> circumstances of the borrower, for example how creditworthy he might be and therefore his ability to borrow at better or worse rates on the market, and that those circumstances might differ from time to time. That may be true and could in theory cause difficulties of qualification in a particular case.[26]

However the status of the borrower as life tenant is disregarded in determining the existence or valuation of the benefit. This is not stated expressly but follows from the scheme of the act.[27] There is not much point in having a charge on benefits if interest-free loans are untaxed.

## 27.6 Who is the recipient of a benefit?

It is important to identify the recipient of a benefit because the individual who receives the benefit is the one who is taxable. It is especially important where some beneficiaries are and others are not UK resident or domiciled, because then the identity of the recipient may affect not only who pays the tax but whether any tax is payable at all. In particular, where a married or unmarried couple of mixed domicile are both beneficiaries under a trust, there is in principle scope for tax saving by arranging that the benefit is received by the non-domiciled beneficiary (and so can qualify for the s.731 remittance basis). The documentation in these circumstances is very important.

For the purposes of s.87 TCGA charge, the concept of "receipt" is explained by s.97(5) TCGA.[28] There is no statutory equivalent for s.731 but it is suggested that the same rules apply: s.97(5) merely states the natural meaning of "receipt".

### 27.6.1 *Payment of school fees*

Suppose trustees pay school fees for an individual's children in circumstances where the parent has no obligation to pay the fees. The children receive a benefit from the trust. The parent merely receives an intangible, non-financial advantage (if they regard the education with

26 74 TC at p.155.
27 74 TC at p 154F. The reasoning was upheld by the Court of Appeal.
28 See 45.7 (Receipt from the trustees).

approval). That is clearly not a "benefit" for the purposes of s.731.[29]

Suppose trustees pay school fees in circumstances where the parent has a family law obligation to meet the fees (such as may arise on a divorce or in other family law proceedings). It might be said that the parent receives a benefit (being relieved of legal obligation). However it is considered that the benefit is outside the scope of s.731 because it is merely incidental.[30]

Suppose trustees pay school fees in circumstances where a parent (or both parents) are under a contractual obligation to pay the school fees (ie the parent has entered into the contract with the school). The position here depends on the facts:

(1) It may be that the parent is entitled to reimbursement from the trustees (eg if the parent entered into the contract at the request of the trustees and on terms that the trustees will meet the fees, or as agent for the trustees). In that case the trustees provide the benefit to the children and the parent does not receive a benefit from the reimbursement.[31] It does not matter that the school are not party to the arrangement (eg the parent may be acting as agent for an undisclosed principal).
(2) On the other hand, the position may be that the trustees are voluntarily meeting a liability of the parent; in that case, the parent is providing the benefit to the child, and the trustees are providing a benefit to the parent.

In practice it is recommended that the contract should be between the trustees and the school, or (if that is not desired) there should be an agency agreement between the trustees and the parent, so the position is clear.

If a parent is the settlor, s.629 ITTOIA needs consideration.

### 27.6.2 *Use of house or chattels*

Suppose a house (or chattels) is provided to a life tenant who then allows their spouse (or partner or children) to live there (and to enjoy the

---

29 If it were a benefit to one parent, it would similarly be a benefit to the other parent, and indeed grandparents and great grandparents; that can hardly be right.

30 Similar issues arise in relation to a settlor exclusion clause which prevents trustees from applying property for the "benefit" of the settlor, and the authorities are reviewed in Kessler & Sartin, *Drafting Trusts and Will Trusts*, Key Haven Publishing (10th ed., 2010), para 13.12 (What does a settlor exclusion cause cover?).

31 Contrast 27.4.10 (Reimbursement of tax under statutory indemnity).

chattels). The same analysis applies. The indirect benefit which the spouse (or partner or children) receive is not a "benefit" for the purposes of s.731, or, alternatively, the benefit is outside s.731 as it is merely incidental.

## 27.7 Benefit causation condition

The third fundamental s.732 condition is the benefit causation condition. Section 732(1) ITA provides:

> This section applies if ...
> (c) the benefit is provided out of assets which are available for the purpose as a result of—
> (i) the transfer, or
> (ii) one or more associated operations ...

There are two alternative conditions here:
(i) the benefit is provided out of assets which are available for the purpose as a result of the transfer; or
(ii) benefit is provided out of assets which are available for the purpose as a result of associated operations.

I refer to these as benefit causation conditions (i) and (ii). They are comparable to the relevant transfer causation conditions. Thus, not every benefit that an individual receives falls within s.731.

### 27.7.1 *Benefit to B1 used by B1 to benefit B2*

Suppose:
(1) A discretionary trust within s.731 has accumulated relevant income.
(2) In 1970 a beneficiary ("B1"), receives a trust asset ("B1's asset"). Although B1 receives a benefit assume B1 does not pay tax under s.731 because he is non-resident, or qualifies for the s.731 remittance basis.[32] This seems on a simple reading to be an associated operation (in relation to the transfer of assets to the trust).
(3) In 2000 B1 (independently and not as part of a prior arrangement)

32 Although strictly the position of B2 is the same even if B1 *is* taxed on B1's benefit, either as a capital benefit under s.731 or as an income benefit under ITTOIA.

gives the asset to another beneficiary[33] ("B2") who is UK resident. B2 has received a benefit. Benefit causation condition (i) is not satisfied. However, it seems at first sight that benefit causation condition (ii) is satisfied, so B2 is at first sight subject to tax under s.731. This clearly cannot be right; but why not? It is necessarily part of the scheme of s.731 that when one beneficiary ("B1") receives a benefit, and uses the benefit to benefit another ("B2") only the first benefit counts. Otherwise what should be regarded in economic reality as a single benefit may give rise to a series of tax charges as it passes from one beneficiary to another and to another.[34] But why is this the case? The best answer is that the operations are not associated. Mere historic association is not enough. These must be something more.[35] It is suggested that the principles to apply are those of the "clean break" test.[36]

Consider a trust where the settlor ("S") is a beneficiary and the settlor wishes to make a payment to another beneficiary ("B"). A direct payment from the trustees to B may be within the scope of s.731. In that case the solution may be to make regular payments to S who may subsequently make a gift to B, but this can only succeed if the gift is genuinely independent, which may not be easy to arrange.

### 27.7.2 *Transfer between trusts*

Suppose:

(1) A trust ("trust 1") within s.731 has accumulated relevant income.

(2) Trust 1 transfers funds ("the transferred funds") to a new UK trust on similar terms ("trust 2").

(3) A beneficiary ("B") receives a benefit from trust 2 out of the transferred funds.

The transfer from trust 1 to trust 2 is an operation associated with the

---

33 If B1 transfers the asset to a person ("C") who is not a beneficiary of the trust (in the sense that trust income cannot be used to benefit C) then C cannot be subject to tax under s.731 as there is no relevant income in relation to C. But in a standard form discretionary trust there is a wide power to add beneficiaries; so trust income is relevant income in relation to every person in the world (whether or not they are specifically identified as "Beneficiaries" in the trust deed).

34 Assume there is sufficient relevant income.

35 The argument would be the same as in 25.11 (Person abroad receives income as indirect consequence of transfer).

36 See 69.4 (Gift from A to B followed by gift to trust by B).

earlier transfer to trust A.[37] B has received a benefit and the benefit is provided out of assets which are available as a result of the transfer and the associated operation. So B is taxed under s.731. The benefit causation condition is satisfied.

Suppose trust 2 was an established trust with a trust fund ("fund 2"). If B receives a benefit from fund 2 B is not taxable under s.731 because that fund is not available as a result of the transfer of assets to trust 1.

It follows that a transfer between settlements will not in principle avoid s.731 charge. There is no reason why it should (except a misconceived analogy with s.90 TCGA).

## 27.8 Benefit causation condition: two transfers of assets

(1) A settlor by a single disposition transfers assets to a trust within s.731.
(2) Part of the trust fund is invested in assets which yield relevant income.
(3) Another part of the trust fund consists of a house occupied rent-free by B.

B pays tax on the benefit by reference to the relevant income. By contrast, suppose:

(1) A settlor by *two* separate transfers creates *two* trusts within s.731:
    (a) a trust which holds income-producing assets and accumulates relevant income; and
    (b) a trust which holds the family home.
(2) B enjoys the benefit of free occupation in the home.

B is not subject to tax under s.731 as there is no relevant income in relation to this benefit. Thus the use of two trusts may avoid a tax charge under s.731 which would have arisen if there were one.

Indeed, it is not necessary to use two trusts. The same applies if there are two separate transfers of assets to one trust.

## 27.9 Transferor's s.731 defence

The fourth fundamental s.732 condition is the transferor's s.731 defence. Section 732(1) ITA provides:

---

37 The transfer between trusts is not a clean break. After all, trustees are expected to pay close attention to the wishes of the settlor, and in doing so they are merely filling in the blanks left by the settlor: see *Muir v Muir* [1943] AC 468.

> This section applies if—...
> (d) [i] the individual is not liable to income tax under section 720 or 727 by reference to the transfer
> [ii] and would not be so liable if the effect of sections 726 and 730 were ignored ...

Section 732(1)(d)[ii] makes clear that this defence applies to a transferor who is a remittance basis taxpayer even though the s.720 deemed income is (un)taxed under the s.720 remittance basis.[38] This is sensible. There is no need to apply s.731 to a transferor to whom s.720 applies. The application of s.720 gives HMRC all they should need. Section 732(1)(d)[ii] is only for avoidance of doubt, and the position would be the same if those words were omitted.

### 27.9.1 *Transferor not ordinarily resident when transfer made; pre-1996 income*

It has never been a requirement of s.731 that the transferor was ordinarily resident at the time of the transfer, but this was a requirement of s.720 until 1996.[39]

RI 201 provides:

> Similarly, a transferor of assets who is outside the charge to tax under Section 739 ICTA [now s.720 ITA] in respect of income arising before 26 November 1996 through being not ordinarily resident in the UK at the time of the transfer, is not assessed under [what is now s.731 ITA].

This is looking at a transferor "T" (wherever domiciled) who:
(1) makes a transfer of assets before 26 November 1996;
(2) is not UK ordinarily resident when T made the transfer;
(3) later becomes UK ordinarily resident.

T was not taxable under s.720 until 26 November 1996. I refer to income arising before that date as "pre-1996 income". If T receives a benefit after 26 November 1996[40] T is not taxable under s.731. This is right because the

---

38 See 26.14 (Section 720 remittance basis).

39 See 26.5.2 (Transferor not ordinarily resident when transfer made).

40 I need not now consider the position if the benefit was received before 26 November 1996 but the result was probably the same.

transferor's s.731 defence does not apply to *income* liable to tax under s.720. It applies to an *individual* liable to tax under s.720. In the example, T (once ordinarily resident and after 26 November 1996) becomes an individual who is "liable to tax under s.720". This is something of a windfall for T, but of course non-transferors may be taxed as the pre-1996 income is relevant income.

### 27.9.2 *Transferor not ordinarily resident at other times*

RI 201 does not address the situation where T is outside the scope of s.720 only because T is not ordinarily resident for a period. Suppose:
(1) T is ordinarily resident when T makes the transfer;
(2) T is non-resident for a period ("the non-resident period");
(3) T returns to the UK.
The reasoning above shows that on these facts T is also outside s.731; T qualifies for the transferor's s.731 defence in relation to income of the non-resident period as well as the income arising while resident.

### 27.9.3 *Spouse of transferor*

Section 714(4) ITA provides:

> In this Chapter references to individuals include their spouses or civil partners.

Accordingly the spouse/civil partner of the transferor also qualifies for the transferor's s.731 defence. This only applies during the life of the transferor as a former spouse/civil partner is not a "spouse" or a "civil partner".[41]

## 27.10 Benefit liable to IT defence

The fifth fundamental s.732 condition is the benefit liable to IT defence. Section 732(1) ITA provides:

> This section applies if ...

41 See Appendix 1.2 (Meaning of "spouse") and 1.3 (Meaning of "civil partner").

(e) the individual is not liable[42] to income tax on the amount or value of the benefit (apart from section 731).

### 27.10.1 *Benefit (un)taxed under remittance basis*

For this purpose a remittance basis taxpayer is "liable" to income tax on unremitted foreign income.[43] This question arises where an individual receives income from a non-resident trust where the s.731 remittance basis does not apply. For instance, suppose:

(1) A discretionary trust within s.731 receives UK source income (or both UK and foreign source income).
(2) A UK resident foreign domiciled beneficiary ("B") receives income ("unremitted foreign trust income") from the trust.

B is taxable on the unremitted foreign trust income on the remittance basis but assume the income is not remitted, so no tax is due.

Can HMRC argue that B is subject to tax on the unremitted foreign trust income under s.731?[44] The answer is, no, because B is liable to IT on the benefit. By contrast, if B had received capital instead of income from the same trust, B would have been subject to tax on the benefit under s.731!

Of course, the word "liable" (like all words) takes its meaning from the context. So perhaps here HMRC may argue that unremitted foreign income is not "liable" to income tax, for the purposes of the benefit liable to IT defence? The answer is that there is no need to apply s.731 in a situation where the ordinary remittance basis regime applies. The remittance basis regime gives HMRC all they should need. So it is considered that unremitted foreign income received by a UK resident

---

42 The word in the pre-ITA legislation was "chargeable" not "liable" but the change has not altered (and has perhaps clarified) the position.

43 This might not seem to accord with the natural meaning of "liable"; but it is consistent with the well established rule that pension schemes and charities are "liable" to tax for the purposes of DTAs even though they qualify for pension scheme or charity exemptions; see Kessler & Brown *Taxation of Charities and Non-Profit Organisations*, (8th ed., 2011), para 15.2.2 (Liable to tax). *Stonor v IRC* [2001] STC (SCD) 199 might be cited against this view but a Special Commissioners decision on other provisions, arguably obiter, and not fully argued, does not count for much. This view is also consistent with the rule that unremitted foreign income is "chargeable" to IT; see 45.6.1 (Definition of capital payment).

44 The s.731 remittance basis is not in point if the benefit relates to UK source relevant income: see 27.34 (Section 731 remittance basis).

individual is taxable, if at all, under ordinary principles and cannot be taxed under s.731.

This result is consistent with the transferor's s.731 defence (s.720 applies to the exclusion of s.731).[45] Anti-avoidance provisions, like hypotheses, should not be multiplied unnecessarily.

## 27.11 Is a benefit within s.731 a capital payment?

The definition of "capital payment" for s.87 purposes is discussed in 45.6 (Capital payment). For present purposes the relevant part of the definition is that a capital payment is any payment "which is not chargeable to income tax on the recipient".

In the following discussion "**a non-capital payment**" is a payment which is not a capital payment.

### 27.11.1 *Benefit giving rise to s.731 charge in year of receipt*

The pre-ITA position was straightforward. Section 740 ICTA was, I think, a tax on the benefit.[46] If a person received a benefit which was subject to tax in the year of receipt, under s.740 (ie assume there was relevant income) then the benefit was a non-capital payment for CGT purposes.

It is not immediately obvious that the position is the same from 2007/08. For s.731 is not expressed as a charge on the benefit. It appears at first sight to be a charge on fictional, deemed income: the amount or value of the benefit is merely an element in the computation of the amount of the

---

45 See 27.9 (Transferor's s.731 defence). A further objection to this HMRC argument is that there may be a double charge to tax:
  (1) Tax under s.731 on receipt of the unremitted foreign trust income.
  (2) Tax under general principles when the foreign trust income is later remitted to the UK.

  Arguably, double counting relief applies: see 28.6 (Double-counting relief). But there is no provision allowing tax paid under s.731 to be reclaimed.

46 Section 740(2) ICTA provided:

  "(2) ... the amount or value of any such benefit as is mentioned in subsection (1) above, if not otherwise chargeable to income tax in the hands of the recipient, shall -
  (a) to the extent to which it falls within the amount of relevant income of years of assessment up to and including the year of assessment in which the benefit is received, be treated for all the purposes of the Income Tax Acts as the income of the individual for that year... "

s.731 deemed income. However it cannot be the case that the same benefit gives rise to CGT on the benefit and deemed income on an amount equal to the benefit. A strained construction is needed to avoid absurdity. There are two possible solutions:

(1) Either (contrary to first appearances) s.731 is in fact a charge on benefits; or
(2) The reference (in the definition of capital payment) to a payment which is "chargeable to IT" should be read as including a benefit giving rise to deemed income.

Section 97(3) TCGA (see below) adopts the first view and so does s.734(1)(c) ITA.[47] Ultimately it makes no difference for present purposes which solution one adopts, but the better view is that s.731 is a tax on the benefit.

## 27.11.2 *Benefit matched to relevant income after year of receipt*

The pre-ITA position was straightforward. In the absence of express provision, a benefit which is not taxable under s.740 ICTA only for lack of relevant income might arguably have been a non-capital payment. But this argument was ruled out by s.97(3) TCGA. For convenience I set out the text of s.97(3) indicating the ITA amendments in track-change format:

> The fact that the whole or part of a benefit is by virtue of ~~section 740(2)(b) of the Taxes Act~~ section 733 of ITA 2007 treated as the recipient's income for a year of assessment after that in which it is received—
> (a) shall not prevent the benefit or that part of it being treated for the purposes of sections 86A to 96 and Schedule 4C as a capital payment in relation to any year of assessment earlier than that in which it is treated as his income; but
> (b) shall preclude its being treated for those purposes as a capital payment in relation to that or any later year of assessment.

Post ITA this wording is not apt because under s.731 (on a first reading) a benefit is not "treated as the recipient's income". Section 731 is a charge on deemed income. But a strained construction is required to give effect to the obvious intention, that a benefit outside s.731 (for lack of relevant

---

47 See 27.13 (Section 733 computation when benefit subject to CGT).

income) is a capital payment for CGT and it is considered that s.731 should be regarded as a tax on the benefit.

Thus if:

(1) a benefit is conferred,
(2) the benefit is not subject to s.731 in year of receipt for lack of relevant income

the benefit can be taxed as a capital payment in year of receipt. If:

(3) the benefit is not subject to s.87 in year of receipt (for lack of s.2(2) gains) the s.731 charge in the following year has priority over the s.87 charge in that year; and so on.

### 27.11.3 *Benefit where s.731 remittance basis applies*

A benefit which falls within s.731 but qualifies for the s.731 remittance basis is taxed on the remittance basis, but is nevertheless "chargeable" to tax, so it is a non-capital payment. HMRC agree. Residence and Domicile: FAQ provides:

> **Interrelation between s727 or s731 ITA and s87**
> **Q** Could it be clarified that where a payment has been made - such as one under s731 which has attracted relevant income but has been protected from tax by non remittance - such a payment will not be regarded as a capital payment for s87 purposes?
> **A** Where a payment (benefit) results in an amount becoming taxable by virtue of s731 ITA 2007, but the charge is deferred by a remittance basis claim because no relevant amount has at that time been remitted to the UK, the benefit will not also be taken into account for the purpose of s87 TCGA. Where the 'capital receipt' condition is met for the purpose of a charge under s727 ITA, even though the charge may be deferred by a remittance basis claim, nothing in that section alters the nature of any payment that triggered the charge.[48]

By contrast, s.731 does not apply to a benefit which does not meet any of the five fundamental s.732 conditions (for instance a benefit to a transferor) and such a benefit is a capital payment.

---

48 *www.hmrc.gov.uk/cnr/res-dom-faqs.htm* The rubric to the FAQ explains: "Most of the FAQs have now been incorporated into the new guidance. Those that have not are reproduced below."

### 27.11.4 *Benefit where motive defence applies*

The pre-2006 wording was that "Sections 739 and 740 *shall not apply*" where the motive defence applied, so it was clear that a benefit where the motive defence applied could be a capital payment.

Under the current legislation, where the motive defence applies, the individual who receives a benefit "is not *liable to income tax*" under the TAA provisions. It might be argued that the benefit is chargeable (even if the individual is not liable) but is considered that a benefit where the motive defence applies is a capital payment: it is not chargeable to IT within the meaning of the capital payment definition.

### 27.11.5 *Interaction with IHT exit charge income exemption*

Section 65(5) IHTA provides an exemption from the exit charge otherwise payable under s.65:

> (5) Tax shall not be charged under this section in respect of—
> (b) a payment[49] which
>> [i] is (or will be) income of any person for any of the purposes of income tax or
>> [ii] would for any of those purposes be income of a person not resident in the UK if he were so resident ...

I refer to this as **"the exit charge income exemption"**.

If a UK ordinarily resident beneficiary receives a benefit which is taxable in the year of receipt under s.731, it is considered that this exemption applies. The benefit is income of the recipient.

Suppose:
(1) at the time the benefit is received there is no relevant income; but
(2) the person abroad receives relevant income later in the tax year.
It is considered that the exemption still applies: the benefit is still taxable. This explains why s.65(5) refers to a payment which is *or will be* income.

Similarly, if a UK resident beneficiary receives a capital payment which is subject to income tax under OIG s.87, the capital payment is subject to

---

49 Section 63 IHTA provides:
> "In this Chapter, unless the context otherwise requires ... "payment" includes a transfer of assets other than money".

income tax and the exit charge income exemption applies.

This is consistent with the object of the relief, which is to prevent a double charge to IT and IHT.

What if the beneficiary is non-resident? If the trust has "OIG amounts" then the relief applies under s.65(5)(b)[ii] because the payment "would for IT purposes be income of a person not resident in the UK if he were so resident." On the other hand if there is relevant income, but no OIG amounts, the relief does not apply. The payment would only be income of the person if they were *ordinarily* resident and it is not the case that the payment would be income if the person were merely "resident".

## 27.12 Computation of charge

### 27.12.1 *Introduction*

In outline, where an individual receives a benefit, s.731 imposes a charge on the lesser of:

(1) the value of the benefit; and

(2) the amount of relevant income in relation to that individual.[50]

However, the details are more complicated than this outline suggests. The rewrite legislation is defectively drafted (it reproduces some defects from the source legislation and adds some new ones). The task here is to find a construction which (if somewhat loose) will yield a workable scheme of taxation.

The computation is governed by s.733 ITA. This is only a computation provision. It does not apply unless the five fundamental conditions of s.732 are met. I refer to the computation made under s.733 as "**the s.733 computation**". There are six steps in the computation. It could serve as a case study as to how much obscurity can be found in step-based drafting, an innovation of the tax law rewrite in their search for clarity.[51]

### 27.12.2 *Step 1: Total Benefits*

In order to follow Step 1, we need to read it in the context of s.732 and the opening words of s.733

50 Contrast s.720, which in general imposes a charge on the whole of the income accruing to the person abroad.

51 See too 45.10.7 (Commentary: step-based drafting).

**732(1)** This section applies if—
(a) a relevant transfer occurs,
(b) an individual who is ordinarily UK resident receives a *benefit*,
(c) the *benefit* is provided out of assets which are available for the purpose as a result of—
(i) the transfer, or
(ii) one or more associated operations,
(d) [in short - the individual is not the transferor]
(e) the individual is not liable to income tax on the amount or value of the *benefit* (apart from section 731).
...

**733(1)** To find the amount (if any) of the income treated as arising under section 732(2) for any tax year in respect of *benefits provided as mentioned in section 732(1)(c)* take the following steps.

*Step 1*
Identify the amount or value of *such benefits* received by the individual
[1] in the tax year and
[2] in any earlier tax years *in which section 732 has applied*.
The sum of those amounts and values is "the total benefits".

I (slightly reluctantly) adopt the statutory terminology and refer to benefits within step 1 as "**Total Benefits".** I refer to benefits within Step 1[1] as **"present year Total Benefits"** and benefits within [2] as **"earlier year Total Benefits".**
There are two obscure references in Step 1:
(1) Which benefits are counted as Total Benefits? One does not identify *all* benefits received by the individual, but only "such benefits". The drafter has overlooked the basic rule that "such" ought only to be used when it refers to a clear antecedent.
(a) On one view, "such benefits" refers back to the words in the first sentence of s.733(1): "benefits provided as mentioned in s.732(1)(c)". So "such benefits" refers to all benefits which meet the benefit causation condition.
(b) On another view,"such benefits" refers back to s.732(1) which uses the word benefit three times. "Such benefits" means benefits in respect of which all five fundamental s.732 conditions are satisfied (not just the benefit causation condition).

The difference between the two views is, for instance, that on the first view an income-taxable benefit can count as "such benefits" and on the second view an income-taxable benefit cannot (because of the benefit liable to IT defence). Likewise, on the first view a benefit received by a non-resident can count as "such benefits" but on the second view it cannot (because of the ordinary residence condition).

The second view is to be preferred as it yields more sensible results.[52]

(2) Which benefits from earlier years are Total Benefits? One does not identify *all such benefits* received by the individual, but only such benefits in tax years "in which s.732 has applied". It is not of course enough that *section 732 applies*, for the section no doubt applies every year to some taxpayer or other. Section 732 must apply having regard to the circumstances of the transfer or the individual in the earlier year.

If this is right, the definition of "Total Benefits" can be expanded to mean the following:

> [1] *Present year total benefits* must meet the following conditions (in order to be "such benefits"):
> (a) a relevant transfer has occurred
> (b) an individual who is ordinarily UK resident ("B") receives a benefit in the present year
> (c) the benefit is provided out of assets which are available for the purpose as a result of—
> (i) the transfer, or
> (ii) one or more associated operations,
> (d) B is not the transferor; and
> (e) B is not liable to income tax on the benefit (apart from section 731).
> [2] *earlier year benefits* must meet the following conditions (in order to be "such benefits" and to meet the requirement that s.732 applies in the year):
> (a) The relevant transfer has occurred
> (b) B was ordinarily UK resident in the earlier year and received a benefit in the earlier year ("the earlier year benefit").
> (c) the earlier year benefit is provided out of assets which are available for the purpose as a result of -

52 If one adopted the first view one could avoid the problems which arise by a generous application of s.743 ITA (no duplication of charges) but it is better to avoid that solution since the relief depends on HMRC discretion.

(i) the same transfer as [1] (a) above, or
(ii) the same associated operations as [1] (c) above
(d) B is not the transferor, and
(e) B is not liable to income tax on the earlier year benefit (apart from section 731).

### 27.12.3 *Step 2: Total Untaxed Benefits*

"Total Untaxed Benefits" has a relatively commonsense definition. Step 2 provides:

> Deduct from the total benefits the total amount of income treated as arising to the individual under section 732(2) for earlier tax years as a result of the relevant transfer or associated operations.
> The result is "the total untaxed benefits".

We need a label to describe the deduction as it is impossible to follow a discussion which refers more than once to "the total amount of income treated as arising to the individual under section 732(2) for earlier tax years as a result of the relevant transfer or associated operations". I refer to the deduction as "**prior year s.731 income**".

A straightforward example is if:
(1) Year 1: B receives benefit £100.
(2) Year 2: B receives benefit £100.
The Totals Benefit is £100 + £100 = £200. But assuming in year 1 B was treated as receiving £100 s.731 income, then the prior year s.731 income is deducted, so Total Untaxed Benefits are computed thus:

| | |
|---|---|
| Total Benefits | £200 |
| Prior year s.731 income | -£100 |
| **Total Untaxed Benefits** | **£100** |

Section 734 ITA provides for another deduction from Total Untaxed Benefit: since this only arises infrequently I deal with it separately below; see 27.13 (Section 733 computation when benefit subject to CGT).

### 27.12.4 *Steps 3 and 4: Relevant Income and Total Relevant Income*

Steps 3 and 4 concern relevant income and total relevant income, and are discussed below.

### 27.12.5 *Step 5: Available Relevant Income*

Step 5 provides:

> Deduct from total relevant income—
> (a) the amount deducted at Step 2 [ie prior year s.731 income], and
> (b) any other amount which may not be taken into account because of section 743(1) and (2) (no duplication of charges).
> The result is "the available relevant income".

The deduction in Step 5(b) is discussed in 28.6 (Double-counting relief).

What is the reason for the deduction in Step 5(a)? ITA EN explains a double taxation problem in the pre-ITA law:

> Section 740 of ICTA [now s.731 ITA] leaves several questions unanswered.
> It provides that
> [a] if the relevant income exceeds the benefit, the amount or value of the benefit is chargeable to income tax in the individual's hands,
> [b] but does not make provision about the treatment of the excess of the relevant income over that amount.
> [c] Taken literally and in isolation, section 740(2)(a) suggests that whenever a benefit is received the amount or value of the benefit must be compared with *all* the relevant income that has arisen on or after 10 March 1981, regardless of whether the receipt of previous benefits has involved charges by reference to that income before.[53]

For instance, if the relevant income is only £100, and T receives benefits of £100 annually, T would appear to be taxed each year on £100, so the relevant income in effect comes into charge again and again. I refer to this as **"the RI multiple counting problem"**. I confess I had not noticed the

53 Section 740(2) ICTA provided so far as relevant:
" ... the amount or value of any such benefit as is mentioned in subsection (1) above, ... shall— (a) to the extent to which it falls within the amount of relevant income of years of assessment up to and including the year of assessment in which the benefit is received, be treated for all the purposes of the Income Tax Acts as the income of the individual for that year".

problem, but point [c] seems correct if one takes the words literally and in isolation (which is of course never the right approach to a statute). The EN then give two independent reasons why no problem arose, that is, it identifies two pre-ITA solutions to the RI multiple counting problem:

> But
> [1] relevant income is defined as income that can directly or indirectly be used to provide a benefit in the tax year [ie in the year that the tax charge arises], and
> [2] section 744(1) and (2)(c)[54] of ICTA [now s.743 ITA] prevent the same relevant income being taken into account more than once.
> It is therefore considered that the *surplus* relevant income *(if it continues to be available)* has not been taken into account and so must be carried forward year by year until extinguished by a benefit or benefits. Section 733 of this Act gives effect to this view by providing [only] for *surplus* relevant income to be carried forward.[55]

Note that it is assumed in solution [1] that in order to identify the amount of relevant income, one asks whether income can be used to provide a benefit at the time the tax charge arises, ("if it continues to be available") not at the time that the relevant income accrues.

*Example 1: one beneficiary*

Suppose a trust with Total Relevant Income of £200 and:
(1) Year 1: B receives a benefit (£100) and £100 s.731 deemed income. Assume the benefit is not paid out of relevant income.
(2) Year 2: B receives another benefit (£200).
The computation in year 2 goes as follows:

*Step 1*: The Total Benefits of B are £300.
*Step 2*: The Total Untaxed Benefits of B are computed thus:

| | |
|---|---|
| Total Benefits | £300 |
| Prior year s.731 income | - £100 |
| *Total Untaxed Benefits*: | **£200** |

*Steps 3 and 4*: The Total Relevant Income is £200.

54 The original erroneously reads: (2)(b).
55 Change 1113, p.472; emphasis added.

*Step 5*: The Available Relevant Income is computed thus:

| | |
|---|---|
| Total Relevant Income | £200 |
| prior year s.731 income | - £100 |
| *Available Relevant Income:* | **£100** |

*Step 6*: the amount of s.731 income in year 2 is the lower of Total Untaxed Benefits and Available Relevant Income = £100.

That is fair and reasonable and tax law rewrite's solution to the RI multiple counting problem has worked.

*Example 2: two beneficiaries*

Now suppose a trust with Total Relevant Income of £200 and:

(1) Year 1: B receives a benefit (£100) and £100 deemed income under s.731.

(2) Year 2: C (not B) receives a benefit (£200).

The computation for C in year 2 goes as follows:

*Step 1*: The Total Benefits of C are £200.
*Step 2*: The Total Untaxed Benefits of C are £200 (nothing is deducted).
*Step 5*: Total Available Income = £200: There is no deduction from the Total Relevant Income under Step 5(a) because nothing is deducted at Step 2.

Here the Step 5(a) deduction does not prevent double taxation. The tax law rewrite team have only partly solved the RI multiple counting problem which (on a literal reading and taken in isolation) they identified. They have solved the problem where the *same* beneficiary receives benefits in different years. They have not solved it where *different* beneficiaries receive benefits in different years. Why is C not taxed on £200?

C must fall back on one of the two pre-ITA solutions identified by the tax law rewrite team:

(1) that distributed income ceases be relevant income (because it ceases to be available); so the amount of relevant income is only £100 (assuming B's benefit is a distribution of relevant income); or (if relevant income is not distributed):

(2) Step 5(b): double counting relief.

Solution (2) applies if the distribution to B did not consist of relevant income. It depends on HMRC discretion, but that was the position before the ITA rewrite, so nothing has changed.

*Example 3: one beneficiary receives a distribution of relevant income*

The second difficulty is that the rewrite team solution – a deduction for prior year s.731 income – does not link in with the first of the pre-ITA solutions to the RI multiple counting problem. Suppose a slight variant to example 1: a trust with Total Relevant Income of £200 and:

(1) Year 1: B receives a benefit (£100) and £100 s.731 deemed income. Assume the benefit *is* paid out of relevant income.[56]

(2) Year 2: B receives another benefit (£200).

The computation in year 2 goes as follows:

*Step 1*: The Total Benefits of B are £300.

*Step 2*: The Total Untaxed Benefits of B is computed thus:

| | |
|---|---|
| Total Benefits | £300 |
| Prior year s.731 income | - £100 |
| *Total Untaxed Benefits*: | **£200** |

*Steps 3 and 4*: The Total Relevant Income is £100 (because £100 has already been distributed and is not available to provide a benefit.)

*Step 5*: The Available Relevant Income appears to be:

| | |
|---|---|
| Total Relevant Income | £100 |
| prior year s.731 income | - £100 |
| *Available Relevant Income:* | **£0??** |

B should have £100 s.731 income in year 2, not £0! I think that the best solution is to say that where relevant income is distributed, no further deduction is allowed at Step 5, so there is no double deduction. Though this is reading a good deal into the provision.

### 27.12.6 *Section 733 computation where s.731 remittance basis applies*

Where the s.731 remittance basis[57] applies, s.731 deemed income is still treated as accruing to the foreign domiciled individual under s.731, even though not remitted. So the s.731 remittance basis does not prevent a deduction under Step 2 (and Step 5(a)) if applicable.

Suppose the facts of example 1 or 3 above, but the benefit which B received in year 1 was an unremitted foreign benefit which qualified for

56 For instance, trust income is accumulated and then paid to the beneficiary as capital.

57 See 27.34 (Section 731 remittance basis).

the s.731 remittance basis. The computations are exactly the same. Thus benefits to B within the s.731 remittance basis reduce available relevant income in relation to B (whether or not made out of relevant income) just as where the arising basis applies.

Suppose the facts are as in example 2 above, but the benefit which B received in year 1 was a foreign benefit which qualified for the s.731 remittance basis. There is as before no deduction under Step 2 or Step 5, but C must fall back on the two pre-ITA solutions to the RI multiple counting problem:

(1) that distributed income ceases be relevant income (because it ceases to be available); or (if relevant income is not distributed):
(2) Step 5(b): double counting relief.

Solution (2) depends on HMRC discretion, but it is considered that the relief ought to apply to relieve C. Of course, B may not agree. Suppose a variant of example 2:

*Example 4: two beneficiaries (one taxed on remittance basis)*
Suppose a trust with Total Relevant Income of £200 and:

(1) Year 1: B receives a benefit (£100) and £100 deemed income under s.731. B is a remittance basis taxpayer and does not remit the benefit so no tax is due.
(2) Year 2: C receives a benefit (£200).
(3) Year 3: B receives the benefit in the UK.

The computation for C in year 2 is the same as example 2:

*Step 1*: The Total Benefits of C are £200.
*Step 2*: The Total Untaxed Benefits of C are £200 (nothing is deducted).
*Step 5*: Total Available Income = £200: There is no deduction from the Total Relevant Income under Step 5(a) because nothing is deducted at Step 2.

Is C taxed on £200? C must fall back on one of the two pre-ITA solutions identified by the tax law rewrite team:

(1) that distributed income ceases be relevant income (because it ceases to be available); so the amount of relevant income is only £100 (assuming B's benefit is a distribution of relevant income); or (if relevant income is not distributed):
(2) Step 5(b): double counting relief.

If the distribution to B did not consist of relevant income solution (2) is the only one available. It depends on HMRC discretion but it is considered that it ought to be allowed. It follows that C will be taxed in year 3. C may argue that B ought to be taxed and B's may be subject to tax remittance should be tax free, but that seems less "just and reasonable".

### 27.12.7 *Step 6: computation of charge*

We have at last reached the final step of the s.733 computation. Step 6 is as follows:

> Compare the total untaxed benefits and the available relevant income.
> The amount of the income treated as arising under section 732(2) for any tax year is the total untaxed benefits unless the available relevant income is lower.
> If the available relevant income is lower, it is the amount of income treated as so arising.

That is, the s.731 deemed income is the lesser of:
(1) Total Untaxed Benefits; and
(2) Available Relevant Income.

### 27.12.8 *Section 733 computation: commentary*

The reader who has laboriously followed the text to this point will agree that s.733 needs to be rethought and rewritten.

## 27.13 Section 733 computation when benefit subject to CGT

Section 734 ITA provides:

> **Reduction in amount charged: previous capital gains tax charge**
> (1) This section applies if—
> (a) benefits provided as mentioned in section 732(1)(c) are received in a tax year,

That is, the benefit is in principle taxable under s.731.

> (b) for that tax year the whole or part of any benefits so provided is a capital payment to which section 87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 applies (chargeable gains: gains

attributed to beneficiaries),

That is, the benefit is in principle taxable under s.87.

(c) it is such a payment because the total untaxed benefits[58] exceed the available relevant income (see Step 6 in section 733(1)) and so it is not treated as income arising to the individual under section 732(2), and

That is, the benefit was not subject to income tax for lack of relevant income.

(d) because of that capital payment chargeable gains are treated as accruing to the individual in that or a subsequent tax year under any of the provisions referred to in para (b).

The CGT charge applies under the rules set out in 27.11 (Is a benefit within s.731 a capital payment?).

> (2) For any tax year after one in which such chargeable gains are so treated, the amount of income treated as arising to the individual under section 732(2) in respect of benefits provided as mentioned in section 732(1)(c) as a result of the transfer or operations in question is calculated as follows.
> (3) The amount is calculated under section 733(1) as if the total untaxed benefits were reduced by the amount of those gains.

This ensures that a benefit charged under s.87 is not later also charged to IT.

## 27.14 "Relevant income": definition

"Relevant income" is a central but perplexing concept. The absence of litigation on the subject is because HMRC have in practice generally applied the legislation in a way which leads to a sensible result.

Section 733(1) Step 3 provides the definition:

---

58 Section 743(4) provides:
"In this section 'the total untaxed benefits' and 'the available relevant income' have the same meaning as in section 733(1) (see Steps 2 and 5)."

*Step 3*
Identify the amount of any income which—
(a) arises in the tax year to a person abroad, and
(b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.
That amount is "the relevant income of the tax year" in relation to the individual and the tax year.

The condition in Step 3(a), income arising to a person abroad, is the same as in the transfer of asset conditions.[59]

Strictly one should not use the term"relevant income" in the abstract. Relevant income can exist only *in relation to an individual*. There may be relevant income in relation to A which is not relevant income in relation to B (eg income of a discretionary trust under which A can benefit and B cannot). There may be relevant income in relation to anyone in the world (eg income of a discretionary trust with a power to benefit anyone in the world). But where the context is clear, one may refer to "relevant income" in isolation (leaving the words "in relation to the individual" and the identity of that individual to be inferred from the context).

The s.731 concept "relevant income" must not be confused with "relevant foreign income."

## 27.15 Deemed income of person abroad

### 27.15.1 *Capital deemed to be income*

Although the statute refers to "income" capital receipts of the person abroad are sometimes treated for tax purposes as income of the person abroad, and such receipts can therefore be relevant income.[60]

### 27.15.2 *Stock dividends and accrued income profits*

Suppose non-resident trustees receive a stock dividend from a UK

59 See 25.5 (Income "becomes payable" to person abroad).

60 See:

(1) 25.13 (Capital receipts deemed to be income).

(2) 30.6.2 (Non-resident company or institution).

(3) 32.9 (OIG arising to non-resident trust).

company. In that case "income is *treated* as arising to the trustees": see s.410(3) ITTOIA. The amount is deemed "income" for TAA purposes, but it is considered that it is not relevant income. The amount is fictional so one cannot say that it "can" be used for the benefit of any beneficiaries. The shares issued in the stock dividend can be used for that purpose, but they are not the same income. The distinction between a gain and an amount equal to the gain is one on which HMRC insist in a DTA context;[61] here the distinction between the actual stock dividend and the fictional income is similar but clearer.

The same point arises if a person abroad is treated as receiving AIP income. The amount is treated as income becoming payable to the person abroad for TAA purposes[62] but it is considered that it is not relevant income. The amount is fictional so one cannot say that it "can" be used for the benefit of any beneficiaries. The proceeds of the AIP securities can be used for that purpose, but that is not the same income.

HMRC may argue that one should carry through the deeming:[63] if the person abroad is treated as receiving income, the (deemed) income must be treated as if it can be used to benefit beneficiaries (even though it does not exist). If that were right, however, two difficulties would arise:

(1) How would the rule that distributed income is not relevant income[64] operate in this context? In order to distribute the AIP income would it be necessary to distribute the entire proceeds of the transfer (sale) of the security? Perhaps the matter would be analogous to the DDS scheme.[65] Then the only way to avoid relevant income by distribution would be to distribute the entire proceeds of the securities. Perhaps a division would be possible as it is under the mixed fund rules.[66]

(2) How does one deal with AIP loss relief? This tends to support the view that deemed AIP income is not relevant income.

---

61 See 50.9 (The characterisation issue).

62 See 33.15 (Transfer of assets abroad).

63 For the general approach to deeming provisions, see 54.11.1 (Construction of deeming provisions).

64 See 27.22 (Relevant income of trust distributed as income in year it arises) to 27.26 (Distributed income: HMRC view).

65 See 34.12.1 (Section 731 ITA).

66 See 33.9.2 (Mixed funds and separating income/capital: sale with accrued interest).

## 27.16 Is income of life tenant relevant income?

Consider an interest in possession trust: one where the trust income is payable to a beneficiary ("L").

If L is UK domiciled and resident, the trust income is not relevant income because it does not meet the condition in Step 3(a). It does not arise to a person abroad.

If L is not UK domiciled then the condition in Step 3(a) is satisfied. Nevertheless, the trust income is not relevant income because it is distributed.[67]

There is nothing surprising in this conclusion: there is no need for s.731 in these circumstances, and one would not expect it to apply. If it did apply there could be double taxation – L being taxed on the income L receives, and on other benefits (if L receives any) to the value of the relevant income.

## 27.17 Is trust income within s.624 relevant income?

One must consider UK resident and domiciled settlors separately from those who are non-resident or domiciled.

### 27.17.1 *UK resident and domiciled settlor*

Suppose:

(1) a non-resident discretionary trust within s.731;

(2) a UK resident and domiciled settlor ("S") has an interest in the trust.

All the trust income is within the scope of s.624 ITTOIA. Section 624 ITTOIA provides in such a case:

> Income which arises under a settlement is treated for income tax

---

67 See 27.22 (Relevant income of trust distributed as income in year it arises). Even if that were wrong:

(1) The trust income is not relevant income in relation to L. One would not say in ordinary language that the trust income *can* be used for providing a benefit for L. The income *is* the property of L.

(2) The trust income is not relevant income in relation to any other person. Since the income belongs to L, one cannot say that the income "can" be used to benefit anyone else. See 27.19 (Income which "can" be used to benefit another person).

purposes as the income of the settlor *and of the settlor alone* ...
(Emphasis added)

The trust income is not relevant income as it does not meet the condition in Step 3(a): the income is treated by s.624 as accruing to S, so it cannot be regarded as arising to a person abroad. This is so even if S (wrongly) fails to pay the tax due on the income.

27.17.2 *UK resident foreign domiciled settlor*

Now suppose:
(1) a non-resident discretionary trust within s.731;
(2) a UK resident but not UK domiciled settlor ("S") has an interest in the trust; and
(3) the trust income is actually subject to tax under s.624 ITTOIA (the s.624 remittance basis does not apply).[68]

In this case the condition in Step 3(a) is satisfied since even applying s.624 the income is treated as accruing to S. However, it is considered that the condition in Step 3(b) is not satisfied: if the income is treated as that of S, and of no other person, it is not income which "can be used for providing a benefit" for anybody else. So the income is not relevant income.

The position is different if and to the extent that the income is within the s.624 remittance basis. Section 624 does not apply to income which qualifies for the s.624 remittance basis.[69] Accordingly the trust income can, in principle, be relevant income for s.731. What happens then if the income is later remitted, so it becomes taxable on S under s.624? It is tentatively suggested that the income retrospectively ceases to be relevant income, so that tax paid under s.731 can be recovered by a beneficiary. In practice this could arise only in fairly unusual circumstances, eg where:
(1) Year 1
 (a) a beneficiary ("B") receives a benefit;
 (b) foreign source income arises on which the settlor ("S") is not subject to tax as the s.624 remittance basis applies. This is relevant income in relation to B, so B pays tax under s.731.

68 This may be because there is UK source income, or foreign income is received in the UK, or S does not claim the remittance basis. See 24.5 (Section 624 remittance basis).
69 See 24.5 (Section 624 remittance basis).

(2) Year 2: that income is remitted to the UK, so S pays tax under s.624. Where s.720 applies (as well as s.624) see 27.18 (Is income within s.720 relevant income?).

### 27.17.3 *Non-resident settlor*

Suppose now:
(1) a non-resident discretionary trust within s.731; and
(2) a non-resident settlor ("S") has an interest in the trust.
Section 624 does not apply to foreign source trust income.[70] Accordingly foreign source income may in principle be relevant income.

Section 624 does apply to UK source income. Here too it is submitted that the condition in Step 3(b) is not satisfied: if the income is treated as that of S, and of no other person, it is not income which "can be used for providing a benefit" for anybody else. So UK source income is not relevant income.

## 27.18 Is income within s.720 relevant income?

The analysis is different if income falls within s.720 and not s.624 because the wording of the provisions is different.

### 27.18.1 *HMRC view*

ITA EN provides:

> Where a non-UK domiciled individual transfers assets but is not chargeable to tax under section 739 ICTA [now s.720 ITA] owing to section 743(3) ICTA [the s.720 remittance basis, now replaced by the somewhat different s.735 ITA], there is no bar in HMRC's view on the application of section 740 ICTA [now s.731] to others who did not themselves make the transfer but were beneficiaries of it. HMRC interpret section 732 ITA in the same way.[71]

In HMRC's view the position (as in the s.624 case) depends on whether

---

70 See 24.7 (Non-resident settlor).

71 See Change 105 in ITA EN Vol III, annex 1. The same point was made in the same words in RI 201.

the s.720 remittance basis applies:

(1) where the s.720 remittance basis applies, so the transferor is not taxed, the income of the person abroad is relevant income; but
(2) where the s.720 remittance basis does not apply (so the transferor is taxed under s.720 on an arising basis) the income of the person abroad is not relevant income.

### 27.18.2 *Where the s.720 remittance basis applies*

At first sight, the application of the s.720 remittance basis does not disapply s.720: the transferor receives s.720 deemed income even though not taxed on it, so it cannot be relevant income.

HMRC might respond that the s.720 income is different income from the income of the person abroad, but that view is to be rejected; see 50.12 (DT reliefs: section 720 ITA). It is suggested however that even though the income of the person abroad is deemed to accrue to the transferor, it also accrues to the person abroad. See *R v Dimsey & Allen* 74 TC 263.

What happens where the s.720 remittance applies and there is a subsequent remittance is an interesting question.

### 27.18.3 *Where the s.720 remittance basis does not apply*

If that is right, the only defence is s.743 ITA (double counting relief).[72] This is surprising, because it is not clear who qualifies for the relief: the transferor or a beneficiary who receives a benefit. But it is difficult to construe the legislation any other way.

## 27.19 Income which "can" be used to benefit another person

An essential feature of the definition of relevant income in relation to an individual is the condition in Step 3(b) that the income "can be used for providing a benefit" for the individual.

"Can", like most common words, has a variety of meanings, but the meaning here must be:

72 See 28.6 (Double-counting relief).

Expressing a possible contingency; = May possibly.[73]

### 27.19.1 *Income of individual*

Of course, any income "can" be used for the benefit of any individual in the world if it is received by a beneficial owner who so directs. That contingency must plainly be ignored or the definition does not work.[74]

### 27.19.2 *Income received by company owned by individual*

Suppose an individual, T, transfers assets to a non-resident company all the shares of which T owns absolutely. Assume the transfer does not qualify for the motive defence. So long as T remains owner of the company, the income of the company is not relevant income in relation to any person (other than T[75]).

For the position if T later gives the company to a trust, see 27.30 (Is

---

73 *Oxford English Dictionary*, 2nd ed. Another meaning of "can" is "to be able; to have the power, ability or capacity". This meaning applies where one says that a *person* "can" do something. This meaning is not applicable here where the subject of "can" is the income. *Income* does not have any power, ability or capacity: only a *person* does. There is a fine discussion of *can* in Williams *Tradition & Change in Legal English* (2005), at 2.8.

74 The issue is not so much the meaning of the word "can": if income is paid to A it is obvious that it "can" (in the sense of "may possibly") be paid to B if A so directs. The better way to put the issue is: which hypothetical contingencies should be taken into account in order to ask the question whether or not income "can" be used for providing a benefit?
The question is similar to the issue which arises for the purposes of the settlement provisions, whether income "may" be used to benefit the settlor "in any circumstances whatsoever". These words do not include the possible circumstance that there may be "a mere voluntary application of income by a beneficiary to the settlor": see *Glyn v IRC* 30 TC 321 at 329. A similar question arose in reverse in *Inglewood v IRC* [1983] STC 133. The question was whether one could say that a beneficiary "will" become entitled to an interest in possession: held that one should ignore the contingency that the beneficiary may not become entitled by virtue of the beneficiary voluntarily assigning the interest to another person.
Another way to reach this conclusion is to say that the income "can" be used to benefit the individual, but not "as a result of the relevant transfer or associated operations" (the application of the income by the beneficial owner not counting as an associated operation).

75 Strictly the income of the company may be relevant income in relation to T, but T is not concerned with s.731 as T will qualify for the transferor's s.731 defence.

income of company held by a trust relevant income?).

### 27.19.3 *Income of trust only payable to B on remote contingency*

Now consider this type of trust,[76] divided into two sub-funds:

(1) A's sub-fund: income to be applied for the benefit of A or accumulated; capital to be paid to A at the age of 25; if A dies under 25, the share accrues to B's share.

(2) B's sub-fund is held on similar terms: income to be applied for the benefit of B or accumulated; capital to B at 25 with accrual to A if B dies under 25.

Suppose income is accumulated on A's sub-fund. It is relevant income in relation to A. Is it relevant income in relation to B? It is payable to B only on the contingency that A dies under 25. It is suggested that this income is not relevant income in relation to B. One would not, in normal language, say that the income "can" be used to benefit B just because A may die under 25. The contingency is too remote.

If A dies under 25:

(1) income of A's sub-fund arising after the death of A is (of course) relevant income in relation to B;

(2) income of A's sub-fund arising before the death of A subsequently becomes relevant income in relation to B if the "timing" issue discussed below is correctly answered.

If this is correct, the concept here is not the same as in s.624 ITTOIA, where the issue is whether income "may become payable" to the settlor *in any circumstances whatsoever*.[77] Applying (as one should) a purposive approach, this is the fair and just result and consistent with the general scheme of s.731. A settlor or transferor has the opportunity to exclude themselves completely in a straightforward manner, and is taxed if they fail to do so. A beneficiary (not the settlor/transferor) does not have the same opportunity. To tax B on income of A's fund (on the facts of the above

76 This was quite a common form before the abolition of relief for Accumulation and Maintenance trusts in 2006.

77 See Williams, *op. cit.* p.139; *may* (compared with *can*) "tends to convey a more hypothetical degree of possibility". It is reasonable to assume that the drafter of the transfer of assets provisions did not copy the language of the settlement provisions because a different result was intended.

example) would not be just or fair.[78]

### 27.19.4 *Income of discretionary trust*

Conversely, consider a common form discretionary trust. In principle, all trust income "can" (in the sense of "may possibly") be used to benefit any beneficiary, if the trustees exercise their discretion, and that is a contingency which naturally should be taken into account. Trust income is relevant income in relation to all beneficiaries.

Suppose, however, the trustees (perhaps guided by a letter of wishes) regard the fund as divided into (say) two shares for separate families. If there is no practical possibility that more than one half of the income will be used for one particular beneficiary, there is a reasonable argument that only one half of the income is relevant income in relation to that beneficiary.

Trustees of a common form discretionary trust have power to benefit anyone in the world. However, in practice the trustees will wish to identify a more limited class, and it is arguable that trust income is not relevant income in relation to other (theoretically) potential beneficiaries.

## 27.20 When does one ask? – the timing issue

One must ask whether income "can" be applied for the benefit of an individual. *At what moment in time does one ask this question?*

(1) It often happens that, at the moment it arises, income can be used to provide a benefit for a person, B, but at a later point in time it cannot be so used; for instance if income of a discretionary trust is:
    (a) distributed to another individual (not B);
    (b) transferred to another trust (under which B cannot benefit); or
    (c) retained by the trustees, but on terms under which B cannot benefit; or
    (d) used to pay trust expenses.
(2) The converse also sometimes happens: at the moment it arises income cannot be used to provide a benefit for B, but at a later time it can be

78 Some support can be found in the discussion of "can" (albeit in a different context) in *Mandla v Dowell Lee* [1983] 2 AC 548 at p.565. A similar unfairness does arise for CGT under s.87 TCGA. However, it is possible to avoid that by transfers to another settlement.

so used; for instance:

(a) if B is born after the income arises;

(b) if one share of a trust fund later accrues to another share (eg on the death of a beneficiary);[79] or

(c) (arguably) where a company within s.731, wholly owned by A, which has accumulated income during A's ownership, is later given to B or to a trust under which B can benefit.[80]

So it is often important to ask at what moment in time one puts the question. I refer to this as **"the timing issue"**. There are in principle several possible answers:

(1) the moment that the income arises;
(2) the moment that the benefit is provided, if later than (1);
(3) after a "reasonable" period (whatever that might be);
(4) the end of the tax year in which either (1) or (2) or (3) occurs;
(5) the earlier or later of some combination of the above.

An important consequence of all solutions except (1) is that trustees of a discretionary trust or company within s.731 would usually have some period of time after income has accrued, during which they may:

(1) distribute income; or
(2) apply the income in the payment of expenses.

Then the income will not be relevant income in relation to the beneficiaries because *at the moment when one asks the question* it is no longer income which "can" be applied for the benefit of the beneficiaries.

To answer the timing question we must return to the legislation. Section 733 ITA Steps (3) and (4) provide:

> *Step 3*
> Identify the amount of any income which—
> (a) arises in the tax year to a person abroad, and
> (b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.
> That amount is "the relevant income of the tax year" in relation to the individual and the tax year.
> *Step 4*
> Add together the relevant income of the tax year and the relevant income of earlier tax years in relation to the individual (identified as mentioned

79 See 27.19.3 (Income of trust only payable to B on remote contingency).
80 See 27.30 (Is income of company held by a trust relevant income?).

in Step 3).
The sum of those amounts is "total relevant income".

Steps 3 (taken with step 4) can be read in various ways:

> *Step 4*
> Add together
> [1] the relevant income of the tax year *being the amount of any income which—*
> *(a) arises in the tax year to a person abroad, and*
> *(b) as a result of the relevant transfer or associated operations can be used directly or indirectly for providing a benefit for the individual.*
> and
> [2] the relevant income of earlier tax years in relation to the individual *being the amount of any income which—*
> *(a) arises in the [earlier] tax year to a person abroad, and*
> *(b) as a result of the relevant transfer or associated operations can*
> *[i] [at any time in that earlier year]* **or**
> *[ii] [at the end of the earlier year]* **or**
> *[iii] [at the time that the benefit is conferred, or the time that the income arises if later]*
> *be used directly or indirectly for providing a benefit for the individual.*

(In this quote the words in normal font are the words of Step 4; the words in italics are the words of Step 3; the words underlined are added; note that some words must be added in any event.)

In clause [2][b] readings [i] [ii] [iii] are alternatives.

It is considered that one looks to the position at the later of:

(1) the end of the tax year in which the relevant income has accrued, or
(2) the end of the tax year in which the benefit accrues.

One asks whether *at that time* the income:

> can ... be used for providing a benefit for the individual.

Another way to put it is that one asks the question with the benefit of hindsight, taking into account facts known at the time that the question matters.

The main reason for this view is that it is more sensible to ask the question at the time it matters.

The moment the income arises is not a suitable moment to ask the question. In some cases it is impossible to ascertain the moment at which income arises and all that the tax system attempts is to attribute income to an accounting period or year of assessment.[81] In other cases it is only possible to ascertain a moment at which income arises by rules of a somewhat arbitrary kind.[82] Similarly, the moment that the benefit arises is not a suitable moment. Some benefits (such as interest free loans) also arise over a period. Moreover it is not practical to have to constantly compute relevant income every time that a benefit is provided during the year.

The legislation does not provide an express answer, but it does offer at least a hint in support of this view. Step 3 does not refer to "relevant income" in isolation. It refers to relevant income *of the tax year in relation to ... the tax year*. It is obviously necessary to attribute relevant income to a tax year, eg to deal with the situation where:

(1) an individual receives a benefit in year 1;
(2) the benefit is not taxed because there is no relevant income in year 1;
(3) relevant income arises in year 2.

There is only relevant income *of year 2* and so the s.731 charge arises in year 2 and not in year 1. However, the reference in Step 3 is to income of the tax year *in relation to the tax year*. These extra words suggest that the relevant income of tax year 2 in tax year 2 may be different from the relevant income of tax year 2 in tax year 3. In year 3 one must ask again what is the relevant income of year 2.[83]

The Tax Law Rewrite agree. ITA EN provides:

> It is therefore considered that surplus relevant income (*if it continues to be available*) has not been taken into account and so must be carried forward year by year until extinguished by a benefit or benefits.[84]

## 27.21 Relevant income used to pay expenses

HMRC practice is that income used to pay trust or company administration expenses will reduce relevant income. This is consistent with the approach

81 eg trading or property income.

82 eg the rules in ss.18–19 ITEPA (When general earnings are received).

83 I have considered whether any guidance is to be found in the principle that income tax is an annual tax. However, that does not shed much light on the problem.

84 The EN passage is discussed in 27.12.5 (Step 5: Available Relevant Income).

taken above. This applies even to income used for capital (rather than income) expenditure.

This is confirmed by (or at least consistent with) two HMRC statements. First, income used to meet a statutory indemnity ceases to be relevant income (even a CGT indemnity, ie a capital liability):

> **CIOT Letter (extract)**
> It would also be helpful if the Revenue could confirm that if the trustees do in fact make a payment to the settlor in response to a request for reimbursement, either under [s.646 ITTOIA] or under para 6 of Schedule 5 to TCGA, such a payment would not be regarded as: ...
> (b) Taken into account for [s.731 ITA] purposes...
>
> **The Revenue's reply**
> ...
> Using your lettering ...
> (b) *it will reduce the relevant income if paid out of income* but will not be a payment [ie not a benefit.][85]

Secondly, income used to pay a sum in lieu of interest ceased to be relevant income (even though the payment is of a capital nature). Tax Bulletin 8 provides:

> ESC D41 allowed, inter alia, demand loans made to offshore trustees on better than commercial terms before 19 March 1991 to be put on commercial terms after that date. This enabled a trust to remain outside the condition in para 9(3), Schedule 5, TCGA 1992. In order to meet the terms of this concession, it may have been necessary to pay a sum in lieu of interest in respect of periods ended 5 April 1992. Where this was the case, such a payment would ... qualify as a deduction both in determining the income of the life tenant *and for the purposes of [s.731 ITA] provided it was paid out of trust income.*
> Where the amount in lieu of interest was paid to a person who is not a beneficiary under the terms of the trust, it would nevertheless be treated as a capital payment to that individual under TCGA 1992, Section 97. If the amount in lieu of interest was paid by a company underlying the

85 *Taxation Practitioner*, April 1996 p.25 accessible *www.kessler.co.uk*, emphasis added. For other issues relating to reimbursement see 69.21 (Failure to exercise right of reimbursement). See too 27.4.10 (Reimbursement of tax under statutory indemnity).

trust, that payment would not qualify for a deduction from the profits of that company [because it is capital and not income].

Thus income used to pay interest ceases to be relevant income. Income used to repay borrowed capital also ceases to be relevant income; though if this principle was pushed to extremes in a tax avoidance scheme, the sum borrowed might be regarded as representing the relevant income: see 27.27 (Relevant income reinvested: tracing).

## 27.22 Relevant income of trust distributed as income in year it arises

Suppose income ("the trust income") accrues to trustees of a discretionary trust within s.731, and is distributed (as income) to a beneficiary, "B1", in the same tax year.

### 27.22.1 *Position of other beneficiaries*

The trust income is not relevant income in relation to any other beneficiary, since the income was distributed to B1. One cannot say that the income "can" be applied for the benefit of anyone else – if my answer to the timing issue is correct. This is significant for the other beneficiaries who receive a benefit within s.731 (whether before or after the year in which the income arises and is distributed). They will not pay tax on the benefit by reference to the distributed income, because it is not relevant income. (They may pay tax on the benefit by reference to other relevant income if there is any.)

That must be correct, because otherwise there could be double taxation (B1 taxed on trust income and another beneficiary taxed under s.731).[86]

### 27.22.2 *Position of recipient beneficiary*

It is suggested that the income is not relevant income in relation to B1: it is not income which *can* be used for B1's benefit; it is income which *is* used for B1's benefit.[87] This is significant for B1 if:

---

86 Arguably s.743 ITA would provide relief: see 28.6 (Double-counting relief). But this is not a satisfactorily solution as it is not clear who pays the tax.

87 The same argument as 27.16 (Is income of life tenant relevant income?) but not so strong.

(1) B1 is a remittance basis taxpayer, and
(2) B1 received a benefit in the UK, and
(3) the trust income is paid to B1 and not remitted to the UK.

B1 is taxed on the RFI remittance basis on the income B1 receives from the trust. B1 is not taxed on the benefit by reference to the distributed income, because it is not relevant income. (B1 may pay tax on the benefit by reference to other relevant income if there is any.)

## 27.23 Relevant income of trust distributed as income after year it arises

Suppose income accrues to trustees of a discretionary trust, within s.731, and is retained (without being accumulated) in that tax year, but is distributed (as income) to beneficiary B1 in a subsequent year. If:

(1) a UK resident beneficiary ("B2") had received benefits in a past year, and
(2) had not paid tax under s.731 in the past year, for lack of relevant income,

B2 will pay tax under s.731 in the year in which the income arises.

Suppose, however, that there have been no earlier benefits so this is not in point. The position is then the same as in the above paragraph, if my answer to the timing issue is correct:

(1) The income is not relevant income of B1.
(2) The income is not relevant income of any other beneficiary.

## 27.24 Relevant income of trust accumulated

### 27.24.1 *Income accumulated and retained on wide discretionary trusts*

If trustees of a common form discretionary trust accumulate income, it remains relevant income in relation to all beneficiaries as long as it is retained by the trustees, because the trust capital (which represents the accumulated income) can be used to benefit any beneficiaries.

### 27.24.2 *Income accumulated and retained on narrower trusts*

The position would be different if under the terms of the trust:

(1) B was in the class of beneficiaries to whom income could be paid; but
(2) B could not benefit in any way from income after it had been accumulated.

Accumulated income would cease to be relevant income in relation to B. This may happen automatically, eg a formerly common form of accumulation and maintenance trust provided:

(1) Income as it arises may be used for the benefit of any beneficiary under 25 ("B1", "B2" or "B3").
(2) If not so used, it is accumulated and added to the share of one particular beneficiary (B1) and can only be used for the benefit of B1 (not B2 or B3).

On receipt the income is relevant income in relation to B1, B2 and B3. After accumulation it is relevant income only in relation to B1.

A similar point arises in relation to a common form discretionary trust. Accumulated income is relevant income in relation to all the beneficiaries. Suppose the trustees exercise their overriding power to exclude B from the accumulated income, not from other trust capital. The income ceases to be relevant income in relation to B. It makes no difference whether this is done in the year of receipt or later.

Similar points arise if the income is transferred to a new trust, or if the income of a company within s.731 is capitalised by the issue of bonus shares.

### 27.24.3 *Income accumulated but later distributed as income*

It has been suggested that once income is accumulated, it is forever relevant income in relation to all the beneficiaries to whom it could have been paid. Subsequent distribution is irrelevant (unless it gives rise to a s.731 charge). This view gives rise to anomalies:

(1) Some receipts which are capital for trust law purposes are treated as income for s.731,[88] and these cannot be "accumulated" in the normal trust sense. It would be odd if they were treated differently from ordinary income for s.731 purposes.
(2) Income of a company within s.731 cannot be "accumulated" in the trust sense. It would be odd if companies were treated differently from trusts.

For my part I do not see why the process of accumulation should by itself make any difference to the s.731 position. If income of a common form

88 See 25.13 (Capital receipts deemed to be income).

discretionary trust is accumulated, and later distributed as income to B1, it ceases to be relevant income in relation to other beneficiaries. This only applies if the sum distributed is (or represents) the accumulated relevant income. This raises tracing issues discussed below.

### 27.24.4 *Income accumulated and distributed as capital*

Suppose income of a common form discretionary trust is accumulated and distributed as capital to a beneficiary, B. It is considered that the income ceases to be relevant income in relation to any beneficiary except B. (It is relevant income in relation to B so that B is in principle subject to tax under s.731 if B is ordinarily resident in the UK. Any other conclusion would be absurd.)

A capital distribution out of accumulated relevant income to a UK resident individual is taxable under s.731. It is not a capital payment and so does not reduce s.2(2) amounts. However the same payment to a charity or a non-resident individual will reduce s.2(2) amounts and relevant income.

## 27.25 Corporate income distributed to trust

Suppose a company within s.731 is held by a common form discretionary trust within s.731:

(1) the company receives income ("**corporate income**");
(2) the corporate income is distributed by way of dividend and retained by the trustees.

Thus:

| | |
|---|---|
| Trust | *Dividend* |
| \| | ↑ |
| $\boxed{\text{Company}}$ | *Corporate income* |
| \| | ↑ |
| Assets | |

The corporate income ceases to be relevant income so it is not counted twice. For one cannot say that the corporate income and the dividend income are *both* available to provide a benefit.[89]

Suppose:

(1) a company within s.731 is held by a common form discretionary trust;
(2) the company's income is distributed by way of liquidation and retained by the trustees.

Double counting relief does not apply. It is suggested that the trustees receipt represents the relevant income, so the liquidation does not affect the s.731 position. (Any other view would allow tax avoidance and not be attractive to a court.)

## 27.26 Distributed income: HMRC view

RI 201 states:

> For the purposes of Section 740(3) ICTA [now s.733 ITA] the measure of "relevant income" is treated as not including such part of the income as has already been genuinely paid away to a beneficiary or to a bona fide charity.
> Once relevant income has arisen *and continues to be available to provide a benefit*, it must in the Revenue's view be carried forward year by year until extinguished by such a benefit, even if it is capitalised in the accounts of the overseas person.
>
> (Emphasis added)

This does not address all the permutations discussed above, but it seems to be more consistent with the above than with any other interpretation.

## 27.27 Relevant income reinvested: tracing

The requirement is that "income" can be used to provide a benefit. However, "income" here includes any asset representing income, even if that asset does not constitute "income" (in any sense) of the person

89 Even if that were wrong, it is suggested that double counting relief prevents the corporate income and the dividend income from counting as relevant income; see 28.10 (Section 731 trust/company structure).

abroad.[90] Thus it makes no difference if the relevant income is invested in another asset.

Suppose:

(1) A non-resident company held by a trust has received relevant income ("**the corporate income**").

(2) The trustees sell the company to a purchaser.

It has been suggested that the corporate income ceases to be relevant income in relation to the beneficiaries, because (after the sale) that income can no longer be used to benefit them. That would be absurd, but there is no difficulty in construing the legislation to avoid that absurdity. The proceeds of sale represent the corporate income, so the sale has not affected the relevant income position at all: as long as those proceeds can still be used for the benefit of the beneficiaries there is still relevant income in relation to the beneficiaries.

## 27.28 Tracing: are distributions out of relevant income?

The principle that distributed income ceases to be relevant income applies only if the asset distributed constitutes the relevant income. Whether or not this is the case raises questions of tracing. The safest approach is for a trust or company within s.731 to keep trust income in a separate account so funds distributed can easily be identified as relevant income. But if we must enter this unchartered territory, it is suggested that the case law on pre-2008 remittance basis tracing principles provides helpful guidance.

### 27.28.1 *Cash distribution from trust within s.731*

Suppose:

(1) Trustees of a discretionary trust within s.731 receive relevant income and pay it to a mixed account (ie holding income and trust capital together).

(2) They pay a sum out of that account in exercise of a power over trust income.

---

90 Similar principles apply for the RFI remittance basis; see 9.3.5 (Capital/income terminology in remittance basis context) example 4. A similar principle applies in ascertaining what is income for the definition of power to enjoy; see 26.6.4 (Enjoyment Condition D: possibility of benefit).

It is considered that the sum distributed would be (or represent) the relevant income.

Suppose:

(1) The trustees receive relevant income, accumulate it and pay it into a mixed account (ie holding accumulated income and trust capital together).

(2) They pay a sum out of that account in exercise of a power to apply accumulated income as income.

It is suggested that the sum distributed would be (or represent) the relevant income.

Suppose:

(1) The trustees receive relevant income, accumulate it and pay it into a mixed account (ie holding accumulated income and trust capital together).

(2) They pay a sum out of that account in exercise of a power to distribute capital.

It is suggested that the trustees could by appropriate documentation identify the sum distributed as the relevant income.[91] Otherwise there must be an apportionment.

### 27.28.2 *Cash distribution from company within s.731*

Suppose:

(1) A company within s.731 receives relevant income and pays it to a mixed account (ie holding relevant income, capital profits and other company funds together).

(2) The company declares a dividend.

In the absence of documentation, it is arguable that income comes first out of a mixed fund: the alternative view is that the dividend represents the company's distributable profits *pro rata*. If the company has only received income (ie has not realised capital gains), the dividend represents that income.

Suppose:

91 See 11.14.1 (Remittance from mixture of taxed and untaxed income).

(1) A company within s.731 receives relevant income and pays it to a mixed account (ie holding relevant income and other company funds together).
(2) The company repays a loan out of that account.

It is tentatively suggested that the company could by appropriate documentation earmark the sum repaid as the relevant income. In that case the trustees could distribute it and it ceases to be relevant income.

### 27.28.3 *Distribution of company*

Suppose a non-resident company held by a trust has received relevant income ("**the corporate income**"). If the trust transfers the company to an individual, the corporate income ceases to be relevant to beneficiaries (except the individual). If the trust transfers the company to a new trust, the corporate income is relevant income in relation to the beneficiaries of the new trust but not in relation to beneficiaries of the old trust who cannot benefit under the new trust. This is a sensible rule as it allows different branches of a family to separate their interests fairly.

## 27.29 Distributing income: tax planning

A common strategy is:
(1) distribute all income (from a discretionary trust or underlying company within s.731) to a foreign domiciled settlor;
(2) the settlor may re-settle the income on the same trusts.

This avoids relevant income in the trust or company.[92] It would be better to have an interest in possession trust so income at the trust level will be distributed automatically. Watch *Furniss v Dawson*: it is best to avoid provocative circularity.

A variant of this idea is to distribute income to a beneficiary who is not the settlor/transferor, but who is non-resident (or domiciled) and so outside s.731. Watch *Furniss v Dawson* here.

92 Also this ensures that the settlor receives the benefit of distribution relief (if applicable); see 28.4 (Distribution relief).

## 27.30 Is income of company held by a trust relevant income?

### 27.30.1 *Income accruing while company held by trust*

Suppose a trust with a common form power of appointment holds a trust subsidiary company to which s.731 applies.[93] Income of the company is in principle relevant income in relation to all beneficiaries. It remains so as long as the company retains the income.

### 27.30.2 *Income accruing before company is acquired by trust*

Suppose:
(1) An individual ("T") owns all the shares of a company within s.731.
(2) T gives the shares to a trust with a common form power of appointment.
Income of the company arising after the gift of T is in principle relevant income in relation to the beneficiaries of the trust.

What is the status of income arising before the gift ("old income")? HMRC say that old income is also relevant income in relation to all the beneficiaries. HMRC's argument is simple: at the relevant time (when benefits are received) the old income "can" be used for the benefit of beneficiaries. The tax consequences of this are so severe that one feels it cannot be right, but what is the flaw in the argument?

At the time when the old income accrued to the company, that income "can" only be used to benefit T, the sole shareholder, so it is not relevant income in relation to anyone else. After the company has been given to the trust the same income "can" be used to benefit others. That is sufficient to meet the "can" condition, if my answer on the timing issue is correct.

However, it is not enough that income "can" be used to benefit a person. The definition of "relevant income" requires that the income can be used to benefit an individual:

> as a result of
> (i) the relevant transfer or
> (ii) associated operations.[94]

93 In practice the motive defence may apply to the transfer to the company; see 29.31 (Transfer of UK assets from non-resident trustees to non-resident trust subsidiary).
94 The reference here is to the reference to associated operations in s.732(1)(c).

I refer to this as "**relevant income causation conditions (i) and (ii)**".

Now, in this case there are two transfers:

(1) The transfer of assets to the company ("transfer 1").
(2) The transfer of the shares in the company to the trust (an associated operation) ("transfer 2").

It is suggested that where the two transfers are not part of a single arrangement, but entirely independent, transfer 2 is not an associated operation in relation to transfer 1. So relevant income causation condition (ii) is not satisfied. Relevant income causation condition (i) is not satisfied since transfer 1 is not the cause of the fact that the income can be used to benefit the beneficiaries. The reasoning is the same as 25.11.1 (Transfer from A to B followed by transfer from B to person abroad).

## 27.31 Individual not a beneficiary when income arises

### 27.31.1 *Beneficiary unborn when income arises*

Suppose:

(1) In Year 1 a discretionary trust within s.731 receives and accumulates relevant income.
(2) In Year 2 a beneficiary is born.

Is the income accumulated in year 1 before the birth relevant income in relation to that beneficiary? The answer depends on the timing issue. If my view is right, undistributed income accumulated before birth can be relevant income in relation to the newborn beneficiary, and that view does make more sense, having regard to the general scheme of the legislation.

### 27.31.2 *Individual in existence but not a beneficiary when income arises*

Suppose:

(1) In Year 1 a discretionary trust within s.731 receives and accumulates relevant income. The class of beneficiaries consists of the issue of the settlor and their spouses.
(2) In Year 2 an individual ("W") marries a beneficiary and so joins the

class of beneficiaries.[95]

Is the income accumulated in year 1 before the marriage relevant income in relation to W? The answer depends again on the timing issue. If my view is right, undistributed income accumulated before the marriage can be relevant income in relation to W. Those who take the view that pre-birth income is not relevant income might consistently take the view that this pre-marriage income is not relevant income. This is not quite a *reductio ad absurdum*, but it is surely a bold view. If necessary, a court would hold that W "can" benefit in year 1 because of the possibility that W may marry a beneficiary in year 2. See *IRC v Tennant* 24 TC 215. But this contingency may be very remote, so my preferred analysis is less artificial.

### 27.31.3 *Beneficiary dead when income arises*

Now suppose the opposite situation:

(1) Year 1: a beneficiary receives a benefit from a trust (which is not taxable for lack of relevant income).
(2) Year 2: the beneficiary dies.
(3) Year 3: relevant income accrues.

Here it is plain that there is no tax charge on the beneficiary. Income cannot be deemed to have accrued to them once they are dead.

The same applies in relation to income which accrues in the tax year of death, but after the death. One cannot say that income accruing after the death of a person "can" be applied for their benefit.

### 27.31.4 *Individual excluded from benefit*

Income arising after a former beneficiary is excluded from benefit cannot (on any view) be relevant income in relation to that beneficiary. It is not necessary that the beneficiary should be excluded from benefit altogether: just that they are excluded from benefit from the income.

---

95 It is assumed there is no power to add beneficiaries so the income could not be applied for the benefit of the individual before the marriage.

## 27.32 Transfer between trusts

Section 90 TCGA provides a code dealing with transfers between settlements for the purposes of s.87 TCGA.[96] This is needed because a s.2(2) amount is computed in relation to settlements. Each settlement has a s.2(2) amount attributed to it.

Section 731 by contrast has no such need. Relevant income is *not* computed in relation to settlements. It is computed in relation to individuals. Thus a transfer of relevant income from trust 1 to trust 2 does not reduce the relevant income if the beneficiaries of trust 1 and trust 2 are the same.

## 27.33 Tax and tax credits of person abroad

This topic is not difficult to understand – at least it does not seem difficult once one has understood it. But it is impossible to summarise briefly. In order to understand the law one must carefully distinguish three concepts:

(1) The actual income of the person abroad.
(2) Relevant income for s.731.
(3) The income which is deemed under s.731 to accrue to the UK resident individual who receives a benefit ("s.731 deemed income").

These must not be confused!

The *actual income* of the person abroad is taxed (if at all) under general principles.

*Relevant income* is not taxed as such: it is merely something computed as a part of the process of ascertaining the amount of s.731 deemed income.

*Section 731 deemed income* is taxed at the beneficiaries marginal rate. This section considers the complications which arise if the actual income of the person abroad is subject to UK tax or foreign tax. How does this affect the s.731 deemed income? What (if anything) is there to prevent double taxation: (1) tax on the person abroad and (2) tax on the beneficiary.

It is necessary to consider separately the position where the person abroad is:

(1) A discretionary trust.
(2) Any trust, on the purchase of own shares.

96 See 45.19 (Transfers between trusts).

(3) A company owned by an individual.
(4) A company owned by a non-resident trust.

### 27.33.1 *Tax and tax credits of non-resident discretionary trust within s.731*

A non-resident discretionary trust will normally pay tax on its actual UK source income at the rate applicable to trusts. The amount of tax paid reduces the relevant income so that if the gross income is £100 and tax is 50%, the relevant income is reduced to £50. However, s.731 makes no further allowance for a beneficiary. So if a beneficiary receives a benefit of £50, taxable under s.731, they pay tax at their marginal rate on the £50. The effective rate of tax on the actual income of the person abroad can therefore reach 75%. Section 743 ITA probably does not help. It would be much better if the beneficiary received an income receipt from the trust.[97] Then s.731 would not apply[98] and instead the beneficiary will effectively obtain some credit for the UK tax paid by the offshore trust under the regime of Chapter 7 Part 9 ITA.[99]

The same point applies where the income accruing to the offshore trustees is subject to foreign tax which can qualify for double taxation relief in the UK under ESC B18. It is best to arrange that the income is received by a UK resident beneficiary in the form of income, avoiding s.731 deemed income where the possibility of any double taxation relief is lost.

An IP trust is better still for dividend income.

### 27.33.2 *Purchase of own shares*

The receipt on a purchase of own shares by a UK company is income.

Any trust, discretionary or IP, is subject to additional rate tax on a purchase of own shares. This raises the same tax problems as income of a discretionary trust under ss.481, 482 ITA. One solution is to alter the terms of the trust before the purchase, so the proceeds of sale belong to the life tenant. Another solution may be to make the trust UK resident for income tax purposes.

---

97 As to how to achieve this, see 22.8 (Payment from discretionary trust: income or capital?).

98 See 27.10 (Benefit liable to IT defence).

99 Unfortunately the credit is less than full credit in the case of dividend income. The regime is too complex to set out here.

### 27.33.3 *Tax and tax credits of non-resident company within s.731*

A non-resident company will normally pay tax on its actual UK source income at the basic rate. The amount of tax paid reduces the relevant income so that if the gross UK source income is £100 and tax is 20%, the relevant income is reduced to £80. Once again, s.731 makes no further allowance. So if an individual receives a benefit of £80, on which they are taxed under s.731, they pay tax at the appropriate rate on the £80. The effective rate of tax on the actual income of the person abroad is therefore nearly 52% for a higher rate taxpayer and 60% for an additional rate taxpayer.

A similar point arises in relation to dividend income, which is not taxable in the hands of the company.

It would be slightly more efficient if the beneficiary received a dividend from the company. Then s.731 would not apply. The individual may still not receive any credit for the tax paid by the offshore company but their dividend income would at least be taxed at the slightly lower dividend rates.

### 27.33.4 *Tax planning by means of UK resident company*

Further tax planning is to make the company UK resident (or to acquire a UK resident company). Then the actual income of the company is paid out by way of dividend (assuming this is possible as a matter of company law) and taxed at the dividend upper rate with the benefit of the UK tax credit. Watch s.1071 CTA 2010. The benefit of this kind of planning varies with the applicable rates of tax which depend on the circumstances of the beneficiaries and whether it is s.731 or s.87 which would apply on a capital payment.

### 27.33.5 *Commentary*

In the 6th edition of this book I said:

> These are harsh rules, but the unfairness of s.731 is generally avoidable in practice and any other rule would certainly be extremely complicated to draft and to administer.

The complexity arises in matching s.731 deemed income with the taxable income of the person abroad. But now the FA 2008 has introduced matching rules. (Complexity was not a serious concern to the architects of the 2008 reforms.) What is sauce for the goose is sauce for the gander. If the matching rules must be retained, fairness requires that there should also be a system of credit for tax on the relevant income.

The better solution would be the rough and ready but simpler rules which took effect from 1981 to 2008, but at present we have the worst of both worlds: complexity and unfairness.

## 27.34 Section 731 remittance basis

Section 735 ITA[100] provides a relief which I call "**the s.731 remittance basis**". Section 735(1) provides:

> This section applies if—
> (a) income is treated under section 732 as arising to an individual in a tax year ("the deemed income"),
> (b) section 809B, 809D or 809E (remittance basis) applies to the individual for the year, and
> (c) the individual is not domiciled in the UK in the year.

In short, the relief applies to remittance basis taxpayers.

### 27.34.1 *"Foreign" income*

In order to understand the law one must carefully distinguish:
(1) relevant income (in short, income arising to the person abroad); and
(2) income treated under section 732 as arising to an individual. Statute calls this "the deemed income" but I use the term "**s.731 deemed income**" to distinguish it from the myriad types of deemed income in the taxes acts.

Further, the legislation distinguishes between two types of relevant income and two types of s.731 deemed income.

---

100 Flagged (somewhat unnecessarily) by s.731(2A) ITA:
"(2A) But see section 735 (non-UK domiciled individuals to whom remittance basis applies)."

(1) Relevant income may be:
  (a) foreign relevant income or
  (b) not foreign (which one might call UK relevant income).
(2) S.731 deemed income may similarly be:
  (a) foreign: the statutory term is "foreign deemed income" but I will use the term "**foreign s.731 deemed income**".
  (b) not foreign.

The crucial term is "foreign s.731 deemed income". Section 735(2) ITA provides:

> For the purposes of this section the deemed income is "foreign" if (and to the extent that) the relevant income to which it relates would be relevant foreign income if it were the individual's.

I deal with the concept of "relates" in the next section.

27.34.2 *Operation of the s.731 remittance basis*

Assuming we have identified foreign s.731 deemed income, we can turn to s.735(3) ITA which provides the relief:

> Treat the foreign deemed income as relevant foreign income of the individual.

This incorporates the RFI remittance basis. It would not work by itself as the s.731 deemed income (being fictional) does not exist and cannot be remitted. So s.735(4) ITA provides:

> For the purposes of chapter A1 of Part 14 (remittance basis) treat relevant income, or a benefit, that relates to any part of the foreign deemed income as deriving from that part of the foreign deemed income.

This means:

> For the purposes of the remittance basis provisions treat *both*
> [a] relevant income *that relates to any part of the foreign deemed*

*income*[101] *and*
[b] a benefit that relates to any part of the foreign deemed income as deriving from that part of the foreign deemed income.[102]

Thus we have three fictions. First we pretend that the individual receives s.731 deemed income. Secondly, we pretend that that s.731 deemed income is RFI. Thirdly, we pretend that certain relevant income *and* certain benefits derive from that RFI.[103] The third fiction feeds into remittance condition B. If anything derived from that benefit (or from that relevant income) is received in the UK by the individual or by a relevant person (in relation to the individual), there is a charge under the remittance basis.

### 27.34.3 *Transitional rules*

Para 170 Sch 7 FA 2008 provides:

> The amendments made by paras 161 to 179 have effect for the tax year 2008-09 and subsequent tax years.

Section 735 does not apply to benefits accruing to a person abroad before 2008/09 because the condition in s.735(1)(b) is not met.

## 27.35 Section 731 matching rules

In order to decide whether the remittance basis applies, we need to identify the foreign s.731 deemed income, so we need to identify the relevant income to which the s.731 deemed income "relates" to see if it is foreign relevant income.

In order to operate the remitttance basis if it applies, we need to identify

101 If relevant income relates to s.731 deemed income then the s.731 deemed income relates to the relevant income: that is, "relates" is a transitive concept and if A relates to B then B relates to A.

102 That is, the phrase "that relates to any part of the foreign deemed income" qualifies "relevant income" as well as "benefit".

103 Contrast the solution adopted for the s.87 remittance basis, where the capital payment (corresponding to the remittable benefit) is deemed to derive from the deemed s.87 gains, but the s.2(2) amount (corresponding to remittable relevant income) is not.

the benefits that relate to s.731 deemed income in order to see if it has been remitted.

Although statute uses the word "relate" the rules are more clearly described as matching rules.

These rules are set out in s.735A ITA. This works in four stages.

### 27.35.1 *Place benefits in date order*

Section 735A(1) ITA provides:

> For the purposes of section 735—
> (a) place the benefits mentioned in Step 1 [benefits within s.731][104] in the order in which they were received by the individual (starting with the earliest benefit received)

Some benefits are not received at any particular moment in time, eg the benefit of rent-free accommodation, and it is not possible to place them in the order in which they are received. Perhaps there should be a time apportionment.

One then makes certain deductions from the benefits:

> (b) deduct from those benefits so much of any benefit within section 734(1)(b) as gives rise as mentioned in section 734(1)(d) to chargeable gains or offshore income gains.

See 27.13 (Section 733 computation when benefit subject to CGT).

### 27.35.2 *Place UK/foreign relevant income in due order*

Section 735A(1) ITA continues:

> (c) place the income mentioned in Step 3 for the tax years mentioned in Step 4 ("the relevant income") in the order determined under subsection (3)

Note that Steps 3 and 4 here refer to the steps in s.733; confusingly the

104 Section 735A(2) ITA provides:
"In subsection (1) references to a step are to a step in section 733(1)."

reference is not to the steps in s.735A(3) which immediately follow.

This takes us to s.735A(3) ITA:

> The order referred to in subsection (1)(c) is arrived at by taking the following steps.
> *Step 1*
> Find the relevant income for the earliest tax year (of the tax years referred to in subsection (1)(c)) [ie the tax years where s.731 applies]
> *Step 2*
> Place so much of that income [relevant income] as is not foreign[105] in the order in which it arose (starting with the earliest income to arise).
> *Step 3*
> After that, place so much of that income as is foreign in the order in which it arose (starting with the earliest income to arise).

In order to carry out Steps 2 and 3 it is necessary to distinguish between:

(1) foreign relevant income; and
(2) other relevant income ("**UK relevant income**").

It is then necessary to ascertain the date that the relevant income arises. Some income is not received at any particular moment in time, eg trading and property income, where the income is computed as a net figure after allowing deductions. Section 735A(5) ITA deals with this:

> For those purposes [for purpose of putting relevant income into date order] treat income for a period as arising immediately before the end of the period.

TAH para 1234 provides:

> ... For example, business profits accrue over an accounting period to say 31 December so for the purpose of this provision the income would be treated as arising on 31 December. Therefore if in a tax year there was say interest income arising on 30 September and business profits accruing over an accounting period to 31 December, for the purpose of this provision they would be placed in the order interest first and profits

105 Section 735A(4) ITA gives a commonsense definition to "foreign" relevant income: "For the purposes of subsection (3) relevant income is 'foreign' where it would be relevant foreign income if it were the individual's."

second.

The author probably assumed that interest is not "income for a period" and so the interest is not affected by s.735A(5). In fact, interest is income for a period to which it relates, even though it is only charged when it arises. But normally interest is paid in arrears, ie interest arising on (say) 30 September is for a period ending 30 September, so the end result is the same.

Then one carries out Steps 1–3 for subsequent years, year by year::

> *Step 4*
> Repeat Steps 1 to 3.
> For this purpose, read references to the relevant income for the earliest tax year as references to the relevant income for the first tax year after the last tax year in relation to which those Steps have been undertaken.

Amended as step 4 requires, steps 1-3 provide:

> *Step 1*
> Find ~~the relevant income for the earliest tax year~~ *the relevant income for the first tax year after the last tax year in relation to which those Steps [Steps 1-3] have been undertaken* (of the tax years referred to in subsection (1)(c)) [ie the tax years where s.731 applies]
> *Step 2*
> Place so much of that income [relevant income] as is not foreign in the order in which it arose (starting with the earliest income to arise).
> *Step 3*
> After that, place so much of that income as is foreign in the order in which it arose (starting with the earliest income to arise).

### 27.35.3 *Deduction from relevant income*

Section 735A(1)(d) ITA provides:

> (d) deduct from that income any income that may not be taken into account because of section 743(1) or (2) (no duplication of charges),

Section 735A(6) ITA provides:

> Subsection (1)(d) does not apply if the income may not be taken into

account because the individual has been charged to income tax under section 731 by reason of the income.

### 27.35.4 *Place s.731 deemed income in date order*

Section 735A(1)(e) provides:

> place the income treated under section 732(2) as arising to the individual in respect of the benefits in the order in which it is treated as arising (starting with the earliest income treated as having arisen),

### 27.35.5 *The matching rule*

Having identified all these matters, and placed them in date order, we can at last turn to the matching rule itself. Section 735A(1)(f) ITA provides:

> treat the income mentioned in para (e) [s.731 deemed income] as related to—
> (i) the benefits, and
> (ii) the relevant income,
> by matching that income with the benefits and the relevant income (in the orders mentioned in paras (a), (c) and (e)).

### 27.35.6 *Summary*

In short, the matching rules are:

(1) Match to relevant income of earlier years before later years.
(2) Within the years, match to UK relevant income before foreign relevant income.

Why does the legislation not simply say that? For a discussion of the drafting issues see 45.10.7 (Commentary: step-based drafting).

The rule is arbitrary (but any matching rule is arbitrary).

### 27.35.7 *HMRC examples*

TAH gives a number of examples, most of which are self-evident, but two are worth setting out here. Para 1234 Example 10 involves UK and foreign relevant income (7 items of income altogether) and non-UK benefits (2 benefits altogether):

| | | | Relevant income | | Benefits |
|---|---|---|---|---|---|
| **Item** | **Date** | | *UK* | *Foreign* | **(non-UK)** |
| *1* | *Year 1* | 30 Sept | 500 | | |
| *2* | | 31 Dec | | 500 | |
| *3* | *Year 2* | 31 Dec | | 1,000 | 750 |
| *4* | *Year 3* | 30 Sept | | 500 | |
| 5 | | 31 Dec | 500 | | |
| *6* | *Year 4* | 30 Sept | | 500 | |
| 7 | | 31 Dec | 500 | | 750 *[or 1,500]* |

The HMRC analysis is:

> There are potential transfer of assets benefits charges in Yr 2 of 750 and Yr 4 of 750.

More analytically, the individual receives s.731 deemed income of £750 in years 2 and 4.

> In Yr 2, 250 will be foreign deemed income and ring fenced to be charged under Part 8 ITTOIA as and when there is an amount remitted to the UK. 500 is charged under transfer of assets.

More analytically, the £750 s.731 deemed income of year 2 is matched as follows:
£500 is matched to income item 1: that £500 is not deemed RFI and so is charged on an arising basis.
£250 is matched to income item 2: that £250 is deemed RFI and taxed on the s.731 remittance basis, ie on a future remittance of the benefit or the foreign relevant income. I would not use the term "ring-fenced" to describe this, but it might serve as a loose metaphor.

> In Yr 4 the whole 750 will be deemed foreign income [*recte* foreign deemed income].

More analytically, the £750 s.731 deemed income of year 4 is matched to the remaining unmatched £250 of item 2 and to the first £500 of item 3. The £750 is deemed RFI and taxed on the s.731 remittance basis.

> If however the benefit in Yr 4 was 1500, then only 1250 would be ring fenced as foreign deemed income and 250 would be charged under transfer of assets.

More analytically if the benefit in Yr 4 was 1500, the individual receives s.731 deemed income of £1,500 in year 4. That is matched as follows:
£250 is matched to the remaining unmatched part of income item 2.
£1,000 is matched to income item 3.
The total of £1,250 is deemed RFI and taxed on the s.731 remittance basis.
£250 is matched to income item 4 and is taxed on the arising basis.

TAH para 1236 Example 11 is a slightly more complex example with:
(1) UK and foreign relevant income - 12 items altogether.
(2) UK and foreign benefits - 4 benefits altogether.

An individual who is ordinarily resident, but not domiciled, in the UK has received cash benefits from an offshore structure in circumstances where the conditions for the transfer of assets provisions to apply are met. The 'remittance basis' of taxation applies for each year.

| | | | **Relevant income** | | **Benefits** | |
|---|---|---|---|---|---|---|
| **Item** | **Date** | | *UK* | *Foreign* | *UK* | *Foreign* |
| *1* | *Year 1* | 30 Sept | 500 | | | |
| *2* | | 31 Mar | | 800 | | 1,000 |
| *3* | *Year 2* | 31 Mar | 100 | | | 1,400 |
| *4* | | 31 Mar | | 1,000 | | |
| *5* | *Year 3* | 31 Mar | | 500 | | |
| *6* | | 31 Mar | 500 | | | |
| *7* | | 31 Mar | 500 | | | |
| *8* | *Year 4* | 30 Sept | 200 | | 1,000 | |
| *9* | | 31 Mar | | 500 | | |
| *10* | *Year 5* | 30 Sept | 500 | | | 600 |
| *11* | | 30 Sept | | 100 | | |
| *12* | | 31 Mar | | 400 | | |

The HMRC analysis is (to say the least) informal in its use of terminology and it should be recast along the lines of example 10. this is done here by adding only brief comments in italics as the text is long and the reader will have the idea.

**Year 1**
The potential benefits charge [*s.731 deemed income*] is 1000 (being the lesser of 1300 relevant income and 1000 benefits received).
As all of the conditions for Section 735 to apply are met, consider whether any

of the potential charge [*s.731 deemed income*] is foreign deemed income. The principles in Section 735A are used for this purpose.
- First match the 1000 with the UK [*relevant*] income of 500. As this income cannot be relevant foreign income then 500 cannot be foreign deemed income and thus is charged under the transfer of assets benefits charge [*on an arising basis*].
- The remaining benefit [*£500 s.731 relevant income*] is then matched with the foreign [*relevant*] income of 800. This [*relevant*] income would be relevant foreign income if it was the individuals and thus 500 of the deemed amount [*s.731 deemed income*] is foreign deemed income. This is treated as relevant foreign income and becomes potentially chargeable under Part 8 ITTIOA 2005 [*ie is taxed on the s.731 remittance basis*].
- There is a balance of 300 relevant income that remains unmatched.

Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

The total taxable amount for the year under transfer of assets benefits charge is therefore 500.

**Year 2**

The potential benefits charge [*s.731 deemed income*] is 1400 (being the lesser of the total relevant income 2400 and the total benefits 2400 less 1000 already charged).

Calculate how much of the total potential charge [*s.731 deemed income*] can be regarded as foreign deemed income applying Section 735A-

The potential chargeable amount [*s.731 deemed income*] is in effect matched with-

(a) 300 of foreign [*relevant*] income from year 1. This gives foreign deemed income of 300 chargeable [*on the s.731 remittance basis*] under Part 8.

(b) 100 UK income of year 2. As this income cannot be relevant foreign income this amount of 100 remains chargeable [*on an arising basis*] under the transfer of assets benefits charge.

(c) The foreign [*relevant*] income of year 2 of 1000. As this would be relevant foreign income if it were the individual's this amount can [*must*] be regarded as foreign deemed income and so chargeable [*on the s.731 remittance basis*] under Part 8.

The result is that of the potential charge [*s.731 deemed income*] of 1400, 100 is charged under transfer of assets benefits charge [*on the arising basis*] and 1300 is ring fenced and treated as relevant foreign income chargeable [*on the s.731 remittance basis*] under Part 8 ITTOIA.

The total charge under the transfer of assets benefits charge is therefore 100. Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.

**Year 3**
Although there is further relevant income in this year there are no unmatched benefits so there can be no potential charge [*s.731 deemed income*] under transfer of assets benefits charge so a consideration of S735 is not applicable.

**Year 4**
The potential charge [*s.731 deemed income*] is 1000 (being the lesser of the total relevant income 4100 and the total benefits 3400 less 2400 already charged).
Work out the deemed foreign income [*foreign s.731 deemed income*] applying Section 735A-
The potential chargeable amount [*s.731 deemed income*] is in effect matched with
(a) The UK relevant income 500 from year 3.
(b) The foreign [*relevant*] income of 500 from year 3.
The total amount charged under the transfer of assets benefits charge is therefore 500.
500 is ring fenced as foreign deemed income and treated as relevant foreign income *charged on the s.731 remittance basis*].
Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.
There is 700 of unmatched relevant income to take forward.

**Year 5**
The potential charge [*s.731 deemed income*] is 600 (being the lesser of the total relevant income 5100 and the total benefits 4000 less 3400 already charged).
Work out the deemed foreign income [*foreign s.731 deemed income*] applying Section 735A-
The potential chargeable amount [*s.731 deemed income*] is in effect matched with
(a) The UK relevant income 200 from year 4.
(b) 400 of the foreign relevant income from year 4.
The total amount charged under the transfer of assets benefits charge is therefore

200.
400 is ring fenced as foreign deemed income and treated as relevant foreign income.
Where any amount is remitted to the UK during that or any subsequent year which is a remittance for Chapter A1 Part 14 ITA 2007 (the Remittance Basis) then part or all of the ring fenced amount may be charged [*on the s.731 remittance basis*] under Part 8 ITTOIA in the year of remittance, subject as appropriate to the rules on remittances from mixed funds.
As the benefit was received in the UK a minimum of the ring fenced amount of this year will be charged under Part 8 ITTOIA and consideration would need to be given to whether there are further untaxed amounts of ring fenced income that would be charged for this year applying the relevant remittance basis rules.
There is 1100 of unmatched relevant income to take forward.

### 27.35.8 *Planning implications*

Where the s.731 remittance basis applies the best planning by far is to arrange that the person abroad (the foreign trust or company):
(1) does not have any UK source income and
(2) does not remit its foreign income.
Then there is no need to worry about the complex s.735A matching rules. The relatively simple position is that there is a remittance if the benefit is received in the UK.
This also avoids the double charge to UK tax which arises when benefits are matched to UK source relevant income.
The next best planning is to arrange that:
(1) UK source income arises in years where no s.731 benefit is provided; and
(2) In a year where a s.731 benefit is provided, the person abroad has no UK source relevant income *and* has foreign source relevant income of an amount sufficient to match the value of the benefit (ie the foreign source relevant income will frank the benefit). If the trust property is held through a trust subsidiary, a dividend from the subsidiary may conveniently achieve that.

### 27.35.9 *Commentary*

The reader who has closely followed the text to this point will agree that the s.731 remittance basis is unworkably complicated. The rule should simply be that there is a tax charge if the benefit is remitted, and the matching rules completely abandoned. That would be fairer, consistent with the principle of the remittance basis, consistent with the s.87 remittance basis, and a simplification.

## 27.36 Where is a benefit received?

The s.731 remittance basis requires one to identify:

(1) where a benefit is received (or at least, whether it is received in the UK); and

(2) where anything derived from that benefit is received.

To identify the place of receipt of a benefit is at least as hard (and arbitrary) as to identify the situs of property or the location of a source of income, problems to which wholly satisfactory answers do not exist.

It may be that some benefits are not received in any particular identifiable place but it is suggested that just as every asset has a situs (and only one situs), the better view is that every benefit should have one (and only one) place of receipt. However to identify that place will sometimes require an arbitrary selection of connecting factors.

The benefit of the transfer of money paid to a beneficiary's bank account is received where the account is kept.

The benefit of the transfer of a debt or shares might be received where the debt or shares are situated under private international law principles. Or it might be received in the jurisdiction whose law governs the transfer of the asset.

### 27.36.1 *Interest-free (or low-interest) loan*

Where is the benefit of an interest-free (or low-interest) loan received? The possible solutions are:

(1) where the money lent is received;

(2) where the debt is situate under private international law principles.[106]

The objection to solution (1) is that the benefit is not the money lent, it is the interest forgone. It is suggested that the best solution is that the benefit is received where the debt is situate.[107] It is arguable that the money lent

106 See 70.12 (Simple contract debt) and 70.13 (Specialty obligation).

107 Another possible solution is to ask where the situs of the source of the interest would be for IT purposes, if interest were payable on the loan. But this should be rejected since (1) the rules for identifying the source of interest are hopelessly unclear and

is derived from the benefit.[108]

The same solution would apply if the benefit was leaving outstanding a debt which was not a debt for money lent, for instance, if the offshore person sold an asset for full value to the individual and left the purchase price outstanding.

27.36.2 *Rent-free (or low-rent) use of chattel or land*

The position is different if the benefit is rent-free (or low-rent) use of a chattel or land. The chattel or land (unlike money in an interest-free loan) does not belong to the bailee, and the benefit is received where the land is situated or chattel is for the time being.

27.36.3 *Release of debt*

Suppose:
(1) money is lent to a beneficiary;[109]
(2) the loan is later released (a benefit).
Where is this benefit received? Again the choice is:
(1) where the money lent (or the proceeds representing it) was received or is situate;
(2) where the debt is situate.
The argument is similar to the discussion above on interest-free loans. The better view is that the place of receipt is where the debt is situate. The same applies on the waiver of interest, but there it is even clearer that solution (1) is not correct. The money lent is not, strictly, derived from the benefit.

27.36.4 *Receipt of benefit outside UK and subsequent remittance*

Suppose:
(1) a UK resident foreign domiciled individual receives a benefit in the

---

(2) when interest is not payable this would be a difficult hypothetical question to answer.

108 See 10.14.5 (T lends to R).

109 It makes no difference whether the loan is at a commercial rate (not a benefit), or an interest-free loan (which confers the separate benefit of interest foregone until the date of release).

form of the transfer of money (or a chattel) outside the UK, and

(2) later remits that money (or chattel) to the UK.

The benefit becomes taxable under the s.731 foreign domicile remittance basis. Before 2008 the contrary was arguable.

For this reason, the tax consequence of a benefit received by one beneficiary may depend on whether *other* beneficiaries have remitted their benefits (and so used up relevant income). One might expect one beneficiary (with access to trust documents) to be able to find out what benefits other beneficiaries have received and where. But a beneficiary is not entitled to find out and often will be unable to find out what benefits received by other beneficiaries have been remitted. The legislation is in many cases unworkable. But in 2008 workability was not regarded as a requirement of anti-avoidance legislation.

If the beneficiary is not ordinarily resident when they receive the benefit but ordinarily resident when it is received in the UK, there is no tax charge.

### 27.36.5 *Distribution of UK source income*

Suppose an offshore company ("OC") within s.731 is owned by a trust within s.731:

| | |
|---|---|
| *Discretionary trust* | *Trustees' dividend income (foreign source)* |
| \| | ↑ |
| *Offshore company* | *OC's income (UK source)* |
| \| | |
| *UK assets* | |

If OC receives and retains UK source income, that is not foreign relevant income. However, if OC distributes the income to the trust, OC's income ceases to be relevant income. Instead the income of the trust is relevant income (unless distributed), but this income is foreign source income and so in principle excluded relevant income. So where UK source income is received by a trust subsidiary company, the s.731 remittance basis can be made available by distribution of that income from the company. This seems anomalous. However, s.731 provides a rough justice in other areas where that favours HMRC, so it is not altogether surprising if on this occasion an anomaly may favour the taxpayer.

## 27.37 Section 720 and 731 remittance basis compared

Sections 720 and 731 both offer a form of remittance basis. The s.720 remittance basis is more generous. So a transferor (chargeable under s.720 but not s.731) will often be in a better position than other beneficiaries (chargeable under s.731)! For example:

(1) Suppose T (UK resident, foreign domiciled) creates a trust within s.720. T occupies a property owned by the trust. The trust also receives and accumulates foreign income. There is no tax charge. T is not subject to tax under s.720.

(2) Now suppose T dies and B occupies the same property. B is taxed on the benefit of the rent-free accommodation under s.731. The s.731 remittance basis does not help B because the benefit is received in the UK.

## 27.38 Summary of responses to s.731

(1) Avoid relevant income by
 (a) distributing income:
  (i) as it arises; or
  (ii) in a year before a beneficiary receives a benefit; or
 (b) using interest in possession settlements in preference to discretionary; or
 (c) not using trusts and companies where inappropriate.

(2) Motive defence.

(3) Remittance basis.

(4) Arrange that foreign domiciled beneficiaries receive benefits of an income nature (outside s.731).

## 27.39 Tax return – disclosure[110]

Box 42 in the Foreign pages (form SA 106) 2009/10 reads:

> If you have received a benefit from a person abroad, enter the value or payment received.

110 See too 29.45 (Tax return: disclosure of motive defence claim).

This rewording tacitly acknowledges the criticism of former wording, set out in the 8th edition of this work at 17.15.

The reference to a benefit is a reference to an income taxable benefit, so if a foreign domiciled individual received a benefit which is not subject to IT (because of the remittance basis or for lack of relevant income) then the figure here should be nil. HMRC agree. Helpsheet 262 (Income and benefits from transfers of assets abroad and income from non-resident trusts - 2009/10) provides:

> **How do you report benefits?**
> Unless you are completing box 46 – see 'How do you qualify for an exemption from charge on income or benefits?' on page 5 – you should enter the amount computed at Step 6, in box 42.
> Enter in the 'Any other information' box of your tax return the full name and address of the person abroad receiving the available relevant income, details of the relevant transactions that have given rise to the income and how you have calculated the benefits included on the return. Where the benefit has come from a UK resident trust in the circumstances described in the previous section, also give details of those circumstances including the full name of any other trust involved.

CHAPTER TWENTY EIGHT

# TRANSFER OF ASSETS ABROAD: DOUBLE TAXATION ISSUES

## 28.1 TAA reliefs – Terminology

The transfer of asset rules could often give rise to double taxation, and there are four reliefs to prevent this. Statute does not provide names for the reliefs, so I coin the following terminology:

| Name of Relief | ITA Section | Outline of Relief |
|---|---|---|
| Transferor's credit | 745(1) | Credit for tax paid by transferee |
| Transferee's concessionary credit | Concession | Credit for tax paid by transferor |
| Distribution relief | 743(4) | Relief on distribution to transferor |
| Double-counting relief | 743(1) | Vaguely worded DT relief |

For the separate issue of DTAs and foreign tax credit reliefs, see 50.12 (DT reliefs: Section 720 ITA) and 50.13 (DT reliefs: s.731 ITA).

## 28.2 Undistributed UK taxable income of offshore company

Suppose an offshore company ("OC") receives and retains UK taxable income,[1] say, rental income. If s.720 ITA did not apply, there would be one charge to tax: income tax borne by OC. However, if s.720 applies, it appears at first sight that there are two charges to tax:

(1) OC pays income tax at the basic rate under ordinary principles.

---

1 OC's income may be UK taxable because:
(1) the income has a UK source and so is subject to income tax; or
(2) OC is a UK resident foreign incorporated company and so is subject to corporation tax.

(2) The transferor ("T") pays income tax on the same income under s.720. What is there to prevent double taxation?

### 28.2.1 *Transferor's credit*

Section 745(1) ITA provides relief for T:

> Income tax at the basic rate, the starting rate for savings or the dividend ordinary rate shall not be charged by virtue of section 720 or 727 in respect of any income to the extent that it has borne tax at that rate by deduction or otherwise.[2]

I refer to this as "**transferor's credit**".

The credit is available where OC is a UK resident foreign incorporated company even though such a company is subject to corporation tax at CT rates (not income tax at the basic/savings/dividend ordinary rates). HMRC say:

> If tax has been paid on the income of the person abroad on which you are also liable to tax under these provisions and which you have entered in Column B before box 13 then you may be able to claim a deduction against your liability for that tax. You will only be entitled to relief for the tax paid by the person abroad if it is in effect tax on 'the same' income, and only to the extent that the tax has actually been paid by, and not refunded to, the person abroad. This could include in some circumstances, for example, UK Corporation Tax. Relief for the tax paid, including any UK Corporation Tax, should be included at Column C and you should note Column E of your claim. Full details of how you have calculated the amount of credit claimed, and details (name, address and, where appropriate, tax reference number) of the person or company which paid the tax should be given in the 'Any other information' box of your Tax Return. If you do not yet know the final amount of tax paid by the person abroad, you should estimate the amount of credit available and amend your Tax Return when the final details are known. You must draw attention to the estimate and explain the circumstances in the 'Any

---

2 This was considered in *R v Dimsey & Allen* 74 TC 263 at [53]:
"This provision would have dealt with the case where the transferee's income included income sourced in the UK and from which tax had already been deducted at source. But the words 'or otherwise' show that the provision would have covered also any case in which the transferee had paid tax on its income."

> other information' box of your Tax Return. If any additional tax becomes payable as a result of using an estimate the usual provisions for charging interest on tax paid late will apply.[3]

The guidance note for 2006/07 added:

> We will consider providing details of Corporation Tax paid upon receipt of written authority from the company concerned[!].[4]

### 28.2.2 *Transferee's concessionary credit*

The limitation of the transferor's credit was explained in *R v Dimsey & Allen* 74 TC 263 at [56]:

> Section [745(1)] ... is looking at the double taxation problem from the point of view of the transferor on whom the liability to pay tax on deemed income is being imposed. There is no comparable provision protecting the transferee in a case where, under s [720], the transferor has paid tax on his deemed income.

In the course of argument in *R v Dimsey & Allen*, HMRC announced a concession to solve this problem:

> **The Inland Revenue's Practice on section [720]**
> [1] If in any case tax is paid by the transferee, the Inland Revenue will give credit for that tax against any charge to tax on the transferor under section [720 ITA] on the same income;
> [2] and conversely, if in any case tax is paid on any income by the transferor under section [720], the Inland Revenue will not tax the transferee on that income.
> So that in every case, the Treasury received in all the full amount of tax chargeable on the transferor as if he were the only person liable.

Point [1] is the transferor's credit. I refer to point [2] as "**the transferee's**

---

3 Help sheet 262 (income and benefits from transfers of assets abroad) 2009/10. In *R v Dimsey & Allen* 74 TC 263 at [55] Lord Scott suggested (without deciding) that transferor's credit would apply in this case. But see 25.4.1 (UK resident foreign incorporated company) for an argument that s.720 does not apply here.

4 "Notes on Foreign" (the Notes on the Foreign pages of the tax return for the year ended 5 April 2007, under the heading "box 6.4A", page FN11).

**concessionary credit**". The consequence is that either:

(1) T pays all the tax on the income (and OC pays none); or
(2) (a) OC pays tax (usually basic or dividend ordinary rate); and
    (b) T has the credit for OC's tax (so T usually pays higher rate tax only).

This concession does not say whether (1) or (2) is to be the case. As far as HMRC are concerned it does not matter because the amount of tax collected will generally be the same. If T is the beneficial owner of OC, it may likewise not make much economic difference to T whether T or OC pay the tax. But T may have "power to enjoy" the income of OC while only having a remote and not particularly valuable interest in it.[5] One can imagine a situation where T and OC each ask HMRC to assess the other! There is no mechanism for tax paid by T to be recovered from OC or vice versa. HMRC have a broad discretion, subject to judicial review if they act unreasonably. How in practice should HMRC collect tax? It is suggested that HMRC's starting point should be that tax is to be borne by OC where tax is reasonably collectible from OC, ie if:

(1) the income is dividend income with a tax credit (in this case, of course, no one has any choice about the matter);
(2) tax is collectible under the non-resident landlord regulations, ie if OC complies with its duties under those regulations; or
(3) OC is prepared to complete UK tax returns and pay the tax on its income.

It is fair that OC, which receives the income, should pay the tax on it. Then only higher rate tax is normally collected from T. Only in cases where OC refuses to pay should all the tax be collected from T. This seems consistent with the extract from "Notes on Foreign" cited above.

It is arguable that double-counting relief also provides a defence to double taxation.[6] If this is correct, the transferee's concessionary credit is the law and not a concession.

## 28.3 Distribution to T of income of company within s.720

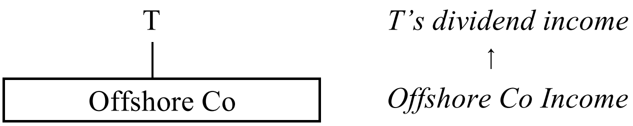
So far we have been considering undistributed income of OC. I now turn to consider the position where the income is distributed to T by way of

5 For instance, if OC owes T a small debt.

6 See 28.6 (Double-counting relief).

dividend. Suppose:

(1) An offshore company ("OC") within s.720 receives income ("OC's income").
(2) T owns all the shares in OC.[7]
(3) The income of OC is distributed by way of dividend to T ("T's dividend income"):



Possible charges to tax here are:

(1) IT on OC's income paid by T under s.720.[8]
(2) IT on the dividend (paid by T) on normal principles.

Is there any relief from economic double taxation?

## 28.4 Distribution relief

Section 743(4) ITA provides:

> If
> [a] income treated as arising to an individual is charged to income tax under section 720 or 727 and
> [b] the individual subsequently receives *that income*,
> it is treated as not being the individual's income again for income tax purposes.
> (Emphasis added)

I refer to this as "**distribution relief**". There are three conditions for this relief to apply:

(1) Income treated as arising to the individual is charged to income tax under s.720.
(2) The individual receives the income.

---

7 The position is not materially different if the shares in OC are held in a trust under which T has an interest in possession.

8 Or IT on OC's income paid by OC and T, but with credit to avoid double taxation: see above. That makes no difference for the purpose of this example. It is assumed here that T does not qualify for the remittance basis.

(3) The dividend income which the individual receives is "that income", ie the same as the income treated as arising to the individual.

Condition (1) would normally be satisfied.[9] Condition (2) is *ex hypothesi* satisfied.

### 28.4.1 *When is income "the same" for purposes of distribution relief?*

At first sight condition (3) is more doubtful. The income which the individual actually receives is the dividend income. The income which the individual is treated as receiving under s.720 is the income of OC.[10] The two are not the same. But if that is correct, then s.743(4) can never apply at all, which cannot be correct.

OC's income and the dividend income are in substance or economic reality the same income. It is true that they are usually regarded for tax as separate sources of income, not the same income. "The income of the company and the income derived from the company by the shareholders are two quite different incomes."[11] Nevertheless for this purpose one looks to the substance and does not apply a formalistic view. This would be reasonably clear even in the absence of authority, because (on the formalistic view of income identity) it is impossible for T to receive the "same" income as OC. The source must change when T receives it.

This view is directly supported by *Aykroyd v IRC*.[12] The facts were

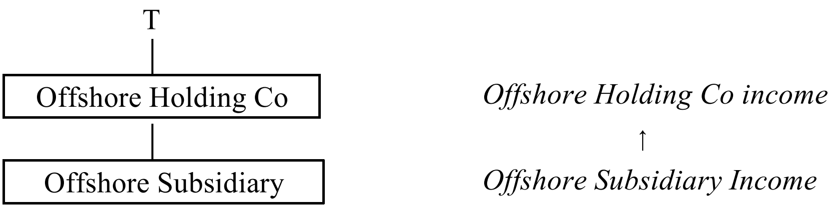
9 See 28.2 (Undistributed UK taxable income of offshore company); 28.7.2 (When is an individual "charged to tax" under s.720?).

10 Or on an alternative view, the income which the individual is treated as receiving is fictional, notional income, but for the purposes of distribution relief it does not matter if that view is correct.

11 *Vestey v IRC* 54 TC 503 at p.562. This is obvious but if further authority is needed, see *Canadian Eagle Oil Co v The King* 27 TC 205 at p.257: "for the purposes of Income Tax, the income of a foreign company and the income received from it in dividends by its British shareholders are not to any extent or effect one and the same income, but are two distinct incomes".

12 24 TC 515. The substance (as opposed to a formalistic) view of income identity is also applied in other contexts in the transfer of assets code. In *Vestey v IRC* Walton J held that a shareholder had no "power to enjoy" the income of the company in which he held shares because (applying the formalistic view of income identity) the shareholders had power to enjoy *different* income! However, this view was rejected in the House of Lords. See 26.6.4 (Enjoyment condition D: possibility of benefit). Similarly the court looked at the economic substance in order to determine whether two assets were "the same" (for the purposes of stamp duty subsale relief) see *Fitch*

relatively simple. T (UK domiciled) held an offshore holding company (within s.720) which held an offshore subsidiary (within s.720):[13]



(1) In 1936/7 the offshore subsidiary received income within s.720 (“the offshore subsidiary income”).
(2) In 1937/8 the offshore subsidiary paid that income by way of dividend to the offshore holding company (“the offshore holding co income”). This income was also within s.720.
(3) The transferor (“T”) was assessed on the offshore holding co income in 1937/8. T was not assessed on the offshore subsidiary income in 1936/7.

This was not an individual/company structure but a company/subsidiary structure, but in the context of distribution relief the issue is the same.

T argued that T could be assessed at stage (1) and so could not be assessed at stage (2). T relied on distribution relief. Macnaghten J accepted (rightly) that the relief could apply to the sequence of two dividends:

> If the Appellant had in fact been charged in the year 1936–37, he could not have been charged again in the year 1937–38.

That is, the offshore holding co income was (for the purposes of distribution relief) the same income as the offshore subsidiary income.

### 28.4.2 *Distribution relief: conclusion*

Thus, even though OC’s income is distributed to T:
(1) there is only one tier of income tax, the charge under s.720;

---

*Lovell v IRC* [1962] 1 WLR 1325.

13 More accurately, there were several holding and subsidiary companies, but nothing turns on that.

(2) T has the benefit of tax credits or DT Relief relating to OC's income.
At first sight this seems anomalous. If s.720 did not apply (eg because the individual owning OC was not the transferor or because the motive defence applied) then the position is quite different:

(1) there will be two charges to tax if OC's income is UK source:
    (a) income tax on OC's income paid by OC under ordinary principles; and
    (b) income tax on the dividend paid to T.
(2) T does not have the benefit of tax credits or DT Relief relating to OC's income.

On reflection, this is not an anomaly. The object of s.720 is to put the transferor in the same position as if they had not made the transfer: see *Chetwode v IRC* 51 TC 647.

### 28.4.3 *Identifying income qualifying for distribution relief*

It may happen that the income of OC for company law purposes is greater than the income of OC for tax purposes (eg because of capital allowances). Distribution relief applies only so far as the income of the company has been charged to tax under s.720. For example, OC may have taxable income of 10, but accounting profits of 100. If OC declares a dividend of 100, then the charges to tax are:

(1) IT on OC's income of 10 on T under s.720.
(2) IT on the dividend on the amount of 90 (ie 100–10).

In these circumstances, the use of an offshore company does give rise to tax on the distribution which would not have arisen if there were no company.

Suppose OC receives £100 and spends £20 on expenses, but, the company having spare assets available for distribution, £100 is nevertheless distributed. It is suggested that the dividend of £100 should be identified with OC's income of £100 and so qualifies for distribution relief in its entirety. The £20 spent on expenses is attributed to other assets, even though as a matter of tracing it was paid for out of the s.720 income. The position is analogous to the *Duke of Roxburghe* case.[14]

---

14 20 TC 711. See 11.14.1 (Remittance from mixture of taxed and untaxed income).

### 28.4.4 *Planning: distribution and re-settlement*

Where distribution relief can apply it is generally worthwhile distributing income to T; T may re-settle the income if T wishes. If this is not done during T's life, the benefit of the relief is lost later; see below.[15]

## 28.5 Distribution (*not* to T) of income of company within section 720

Suppose:
(1) An offshore company ("OC") within s.720 receives income ("OC's income");
(2) T is not a shareholder in OC but has "power to enjoy" the income;[16]
(3) P (a UK resident third party) owns all the shares;[17]
(4) The income of OC is distributed by way of dividend to P.
In these circumstances it appears that there is economic double taxation:
(1) OC's income is subject to tax in the hands of T (or T and OC) under s.720.
(2) P is subject to tax on the dividend.
Distribution relief does not apply because that relief only applies where OC's income is subsequently received by the transferor, T. The transferor credit and the concessionary transferee credit do not cover this situation. However, double-counting relief applies.

## 28.6 Double-counting relief

Section 743 ITA provides:

> **743 No duplication of charges**
> (1) No amount of income may be taken into account more than once in charging income tax under this Chapter.
> (2) If there is a choice about the persons in relation to whom any amount

15 This may also be done to avoid relevant income accumulating in a company held by a trust; see 27.30 (Is income of company held by a trust relevant income?).

16 T may have power to enjoy by reason, perhaps, of a debenture or through being a beneficiary of the trust which holds OC.

17 The position is not materially different if the shares in OC are held in a trust under which P is life tenant, and to which s.624 ITTOIA does not apply.

of income may be taken into account in charging income tax[18] under this Chapter, it is to be taken into account—

(a) in relation to such one or more of them as appears to an officer of Revenue and Customs to be just and reasonable, and

(b) if more than one, in such respective proportions as appears to the officer to be just and reasonable.

I refer to this as "**double-counting relief**". This provision is vaguely worded, but I suggest it prevents double taxation:

(1) Where T1 is charged under s.720 and T2 is charged under s.720; ie there are two transferors (but *Vestey* decided that there can only be one transferor).

(2) Where T1 is charged under s.731 and T2 is charged under s.731; eg where two different individuals receive benefits, the s.733 computation often prevents a double charge (but not always).[19]

(3) Where T1 is charged under s.720 and T2 is charged under s.731.[20]

---

18 Section 744 ITA provides:

"**744 Meaning of taking income into account in charging income tax for section 743**

(1) References in section 743(1) and (2) (no duplication of charges) to an amount of income taken into account in charging income tax are to be read as follows.

(2) In the case of tax charged on income under section 720 (charge where income enjoyed as a result of relevant transactions)—

(a) if section 724(1) (benefit provided out of income of person abroad) applies, they are references to an amount of the income out of which the benefit is provided equal to the amount or value of the benefit charged, and

(b) otherwise they are references to the amount of income charged.

(3) In the case of tax charged on income under section 727 (charge where capital sums received as a result of relevant transactions), they are references to the amount of that income.

(4) In the case of tax charged under section 731 (charge to tax on income treated as arising to non-transferors where benefit received as a result of relevant transfers), they are references to the amount of relevant income taken into account under section 733 (income charged under section 731) in calculating the amount to be charged in respect of the benefit for the tax year in question."

19 See 27.12.5 (Step 5: Available Relevant income).

20 Although the words in s.743(1) could be construed to apply to situation (3) only, that would be absurd. Indeed, it is unusual that income could be taxed under s.720 and s.731. An example might be if income accrues which is not within s.720 because it is not remitted to the UK, then there is a charge under s.731, and then there is a remittance. Another example might possibly be if s.720 does not apply (because the transferor has no "power to enjoy") but subsequently there is a capital payment within

(4) Where T1 is charged under general principles and T2 is charged under s.720 or s.731.

This therefore applies in the circumstances of the example of 28.5 (Distribution (*not* to T) of income of company within s.720). Before the enactment of double-counting relief in 1981, there was economic double taxation in these circumstances. Lord Greene did not regard this as double taxation. In an obiter comment in *Howard de Walden v IRC* 25 TC at 131, decided in 1940, he said:

> [Counsel] pointed out that in so far as the right to enjoy income of the four companies is vested in the Appellant's son, who holds the majority of the shares, income received by the son will be taxed in his hands in the ordinary way and at the same time the Appellant will be liable to tax on the whole income of the companies which is deemed to be his. This, said [Counsel], involves double taxation since no relief is afforded by [what is now s.726 ITA]. There is a short answer to this argument. There is no double taxation since the subject-matter of tax is different, the income of the son being one thing and the income of the companies being another.

Several passages of *Howard de Walden* exhibit an anti-taxpayer ethos which may be attributed to the war-time background; "as we are at war", as Darling J said in another context, "the ordinary mode of construing legislation has been suspended".[21]

Formalistically Lord Greene is right, the situation is one of economic rather than formalistic double taxation. However, since the purpose of distribution relief is to avoid economic double taxation, both fairness and the scheme of the Act suggest that double-counting relief should do the same work in this context. It is considered that Lord Greene's comment does not support the contrary view.

In practice this situation is rare as T either has no "power to enjoy" and so is outside s.720, or else T is life tenant/shareholder and receives the dividends personally and distribution relief applies.

---

s.727. Another possible case is in 27.18 (Is income within s.720 relevant income?).

21 Cited in David Foxton, "*R v Halliday* in Retrospect" [2003] LQR 455.

## 28.7 Section 720 trust/company and company/subsidiary structure

So far we have been considering the (relatively) simple situation of an offshore company (OC) held by an individual (or an IP trust). We now turn to consider the position where OC is held by a non-resident discretionary trust. That is, trustees of a discretionary trust within s.720 ITA and s.624 ITTOIA hold a non-resident company within s.720:

*Settlor/Transferor ("T")*

*Discretionary Trust* — *Trustees' Dividend Income*

↑

*Offshore Company* — *OC's Income*

*Assets*

Suppose:

(1) Income is received by the OC ("OC's income" at "stage (1)").

(2) OC's income is paid to the trustees as dividend income ("the trustees' dividend income" at "stage (2)").

In principle this might give rise to two tax charges on T:

(1) OC's income charged under s.720 at stage (1);

(2) The trustees' dividend income charged under s.720 or s.624 at stage (2).

What is there to prevent double taxation?

### 28.7.1 *Distribution relief*

It will be recalled that distribution relief applies if:[22]

(1) OC's income is within s.720;

(2) the trustees' dividend income is received by T;

(3) the trustees' dividend income is "that income" (ie the same income as OC's income);

(4) the individual is charged to income tax on OC's income under s.720.

Condition (1) is satisfied. Condition (2) is satisfied because income is treated as received by T. Condition (3) is also satisfied: see 28.4.1 (When

22 See 28.4 (Distribution relief).

is income "the same" for purposes of distribution relief?).

### 28.7.2 *When is an individual "charged to tax" under section 720?*

The next requirement of distribution relief is that the income treated as arising to the individual must be "charged to income tax under section 720". In *Aykroyd*[23] T failed because T had not been so "charged":

> It was suggested that, if the [offshore subsidiary's income] were liable to assessment for the year 1936–37, that provision [s.743(4)] prevented them being chargeable in the following year. But that argument depended on the substitution of the word "chargeable" for the word "charged". There is no ground that I can see for making any such substitution. ... as he had not been charged in the previous year, there was nothing to prevent him being charged in the year in question.

This is not obiter, but it is at first sight surprising and it certainly does not appear from the Judge's terse comment that the Court had the benefit of a full argument on the point.

Is it right? The word "charged" (like most words) takes its meaning from context. It may mean:

(1) declaration of liability by statute;
(2) assessment (including self-assessment);
(3) payment.[24]

It may or may not include unremitted income (un)taxed on the remittance basis, depending on the context.

The most common and primary sense of the word "charged" is that it refers to the declaration of liability. Every year, for instance, the FA provides that income tax shall be charged for that year: see eg s.31 FA 2000. This is the statutory declaration of liability. It is not referring to the making of assessments or collection of tax.

However, this meaning poses difficulties for HMRC who may not know

---

23 See 28.4.1 (When is income "the same" for purposes of distribution relief?).

24 These correspond to the three stages in the imposition of a tax:

> "there is the declaration of liability, that is the part of the statute which determines what persons in respect of what property are liable. Next, there is the assessment. ... assessment particularises the exact sum which a person liable has to pay. Lastly, come the methods of recovery, if the person taxed does not voluntarily pay."

*Whitney v IRC* 10 TC 87 at p.109.

that a s.720 liability arises or may be unable to make an assessment. So the *Aykroyd* interpretation that "charged" means "assessed" is probably correct. But in the case of unremitted foreign income where the remittance basis applies, it is suggested that the income should be regarded as "charged"

This does not mean that HMRC have an unfettered discretion:

(1) to assess T on the subsidiary company's income; or
(2) to assess T on the holding company's income.

Under self-assessment, T will normally self-assess T's income and should in principle return the income of the offshore subsidiary as T's income and distribution relief applies. However, where T does not pay tax due on the offshore subsidiary's income HMRC can collect tax on the offshore holding company's income and distribution relief does not apply.

Often it may not matter whether tax is charged on the offshore subsidiary's income or the offshore holding company's income. However, it may matter:

(1) For identifying the source of the income to which s.720 applies. Is the transferor taxed under s.720 in respect of the subsidiary's income or the holding company's income? This may affect:
    (a) rates of tax, eg if the underlying company receives interest or rental income it may makes a difference of 7.5% (the difference between the higher or additional rates and the dividend upper or dividend additional rates).
    (b) availability of transferor's credit for UK tax paid by the company and double tax relief.
    (c) source of income.
(2) It may also affect the year in which the income is subject to tax.

### 28.7.3 *Double-counting relief*

This provision is discussed in 28.6 (Double-counting relief). It will apply in a s.720 trust/company or company/subsidiary structure but where distribution relief covers the same ground it should not be needed.

### 28.7.4 *Trust/company structure: HMRC practice*

RI 201 provides:

> where income arises in an offshore company underlying a settlement

> and the income is not paid up immediately to that settlement the provisions of section [720 ITA] will be invoked where necessary to assess the income of the underlying company.

The position therefore depends on whether income is paid up "immediately".

(1) *If the income is not paid up immediately.* The provisions of s.720 will be invoked. This is clearly correct. RI 201 does not address the question (discussed above) of relief for a subsequent dividend by the underlying company.
(2) *If the income is paid up immediately.* RI 201 implies that:
    (a) s.720 will not be applied so OC's income (if non-UK source) will not be taxed; and
    (b) the settlor will be taxed on the trust income under s.624 ITTOIA in the normal way.

An important question is exactly the moment when one moves from (1) to (2). What is the meaning of "immediately"? Does it mean within a day? Or a week? Or at any time within the same tax year? Or at any time before the relevant returns are due or submitted? Do HMRC have a discretion? Does the answer depend on the type of income? One must bear in mind that some forms of income cannot be quantified until the end of an accounting period (eg trading and rental income).

If income is distributed immediately, RI 201 does not address the question whether the settlor is taxed (under s.624 ITTOIA) on the underlying company's income or on the dividend. It makes a difference if the underlying income has a tax credit.

This is a sorry muddle. In practice, the author suspects that HMRC apply the "immediately" concept with latitude and are not concerned as long as they can see that income comes into tax in one year or another, in one form or another.

### 28.7.5 *Trust/company structure: further example*

Suppose in the trust/company structure illustrated at 28.7 (Section 720 trust/company and company/subsidiary structure) the company:

(1) receives £100 income;
(2) spends £20 of the £100 it received on expenses (not deductible for the purposes of s.720); and
(3) distributes £80.

It is suggested that £100 is taxable at stage (1) and the £80 is tax free at stages (2) and (3). Close examination of RI 201 (see above) suggests HMRC might assess £20 at stage (1) and £80 at stage (2). It is doubtful whether the statement is meant to bear close examination, but it makes little difference in practice.

## 28.8 Life policies

In *IRC v Willoughby* 70 TC 57 Professor Willoughby ("T") transferred assets to a non-resident life insurance company as a premium for a life policy. T was not taxed on the income accruing to the insurance company as the motive defence applied. Had the defence failed, there would in principle have been double taxation:

(1) T would pay income tax on income arising to the life insurance company (to the extent that it arose as a result of T's premium); and
(2) T would pay income tax on the gain arising from the policy under the chargeable event provisions.

HMRC argued that relief was available under two provisions, s.547(2) ICTA and distribution relief.

The Special Commissioner rightly rejected the argument that distribution relief applied:

> ... s.743(4)[25] only relieves from tax income which is subsequently received by an individual whose income it has been deemed to be in earlier years under s.739(2).

The deemed s.720 income is not the same as the chargeable event income.

Section 547(2) ICTA then provided:

> Nothing in subsection (1) above [deeming chargeable event gains to be taxable income] shall apply to any amount which is chargeable to tax apart from that subsection.

The Commissioner rightly dismissed the argument that this conferred relief:

25 The reference is to ICTA but remarkably, perhaps uniquely, the reference is still the same: s.743(4) ITA.

> So far as double taxation is concerned, in my view s.547(2) [ICTA] and s.743(4) [ICTA] do not provide relief. The former gives relief if the amount of the gain arising in connection with a policy on the happening of a chargeable event, which is deemed to form part of the individual's total income for the year in which the event happens, is chargeable to tax apart from subs (1) of s 547. This does not provide relief for the taxation of income under s.739 [ICTA] in the years before the chargeable event occurs.

That is not the end of the story, as the tax law rewrite have expanded the scope of the relief: s.527 ITTOIA provides:

> (1) This section applies if the whole or part of any receipt or other credit item is taken into account in calculating both—
> (a) the amount of a gain treated as arising under this Chapter, and
> (b) an amount on which income tax is charged otherwise than under this Chapter or on which corporation tax is charged.
> (2) The amount of the gain on which tax is charged under this Chapter is reduced by so much of the amount of that receipt or other credit item as is taken into account in both those calculations.

It appears from EN ITTOIA change 95 that this change was intended to benefit traders in policies[26] but it could arguably apply here. There is a

---

26 "**Change 95: Gains from contracts for life insurance etc: reductions for sums chargeable to tax apart from section 547(1) of ICTA: section 527**
This clarifies the meaning of the exception from the charge to tax under section 547(1) of ICTA given by section 547(2) of ICTA for any amount chargeable to tax apart from section 547(1) of ICTA.
Section 547 of ICTA deals with the method of charging chargeable event gains to tax. This differs according to the person who is interested in the policy. For example, under section 547(1) of ICTA where the rights in a policy or contract are held by an individual as beneficial owner the gain forms part of the individual's total income. However, section 547(2) of ICTA states "Nothing in subsection (1) shall apply to any amount which is chargeable to tax apart from that subsection.".
In practice, the words "amount which is chargeable to tax" in section 547(2) of ICTA are taken to mean the amount of the receipts and credits taken into account for the purposes of ascertaining the overall taxable profit under another provision, rather than the actual amount that is charged to tax under another provision, which in the case of a trader, for instance, will be the net profits of the trade.
Section 527 which rewrites section 547(2) of ICTA makes it clear that the amount chargeable to tax under Chapter 9 of Part 4 of this Act is reduced by the amount of the receipt or other credit item that is taken into account in calculating the amount on

also hint in *Willoughby* at p.84 that relief may be available by concession, but that would obviously not bind HMRC. In practice, fortunately, it will be rare for the TAA rules apply to income arising as a result of payments of policy premiums or other payments to life companies.[27]

## 28.9 Section 731 charge followed by income distribution

I now turn to consider double taxation issues relating to s.731. The transferor's credit, the transferee's concessionary credit and distribution relief only apply to s.720, so they have no relevance here.

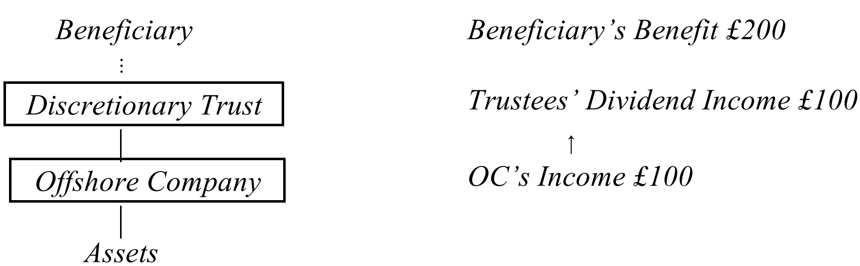
Suppose:

(1) trustees of a trust receive income and do not distribute it;
(2) a beneficiary receives a benefit taxable under s.731;
(3) the income is later distributed to the beneficiary as income.

It is understood that the distributed income is not taxed. This might be regarded as informal concession but the better view is that double-counting relief applies here.

## 28.10 Section 731 trust/company structure[28]

The problem is best illustrated by example:



Trustees of a discretionary trust within s.731 hold a non-resident company within s.731.

(1) £100 income is received by the company ("the company's income" at "stage (1)").

---

which income tax is charged otherwise than under Chapter 9 of Part 4 or the amount on which corporation tax is charged."

27 See 30.6.5 (Income accruing to life company).

28 Contrast 28.7 (Section 720 trust/company and company/subsidiary structure).

(2) The £100 is paid to the trustees as dividend income ("the trustees' dividend income" at "stage (2)").
(3) A beneficiary ("B") receives a benefit of £200.

Is the relevant income £100 or £200? That is, does the interposition of the company double the relevant income? If so, then the s.731 charge on B is in principle on £200.

It is suggested that double-counting relief applies; see 28.6 (Double-counting relief).[29]

29 If that is wrong, then a second argument is that after the company's income is distributed it ceases to be relevant income. See 27.25 (Corporate income distributed to trust). This argument will not avail if the facts are a variant of the above example:
(1) £100 income is received by the company;
(2) a beneficiary receives a benefit of £200;
(3) the £100 is subsequently paid to the trustees as dividend income.
For then even if the company's income ceases to be relevant income after being distributed, it does so too late.

CHAPTER TWENTY NINE

# TRANSFER OF ASSETS ABROAD: MOTIVE DEFENCE

## 29.1 Motive defence – Introduction

Sections 736 to 742 ITA provide a defence to the TAA provisions which I call "**the motive defence**".[1] This topic was never easy, but the FA 2006 made it twice as complicated: it introduced stricter and obscurer rules which apply to transactions from 2005, while retaining the old rules for earlier transactions.[2]

Section 736(3) ITA provides two self-explanatory terms:

> In this section and sections 737 to 742—
>
> "**post-4 December 2005 transaction**" means a relevant transaction effected on or after 5 December 2005, and
>
> "**pre-5 December 2005 transaction**" means a relevant transaction effected before 5 December 2005.

In this chapter:

(1) "**Old Conditions A and B**" are conditions A and B in s.739 ITA (applying to pre-5 December 2005 transactions).

(2) "**New Conditions A and B**" are conditions A and B in s.737 ITA (applying to post-4 December 2005 transactions).

References to Condition A or B (without more) means either the old or the

---

1 The word "motive" is not used in the legislation, but the label is convenient and reasonably accurate. It originates from the Inland Revenue's Notes on clause 18 Finance Bill 1936.

2 EN FB 2006 stated:

> "The new provisions recast the test for exemption in cases not involving a tax avoidance purpose to make its meaning clearer."

But no-one was intended to take that seriously.

new version of the Conditions.

There have been two explanations of the 2006 clauses: Explanatory Notes on the Draft Clauses, published 5 December 2005, and Explanatory Notes on the Finance Bill 2006. I refer to these as "**EN Draft Clauses (2005)**" and "**EN FB 2006**".

I distinguish between:

(1) An "**innocent**" transaction, one which satisfies Condition A or B (in short, no tax avoidance purpose); and

(2) a "**tainted**" transaction, one which does not satisfy Condition A or B.

For the definition of "**relevant transactions**" see 25.10 (Significance of associated operations).

## 29.2 Motive defence condition A

Section 737 ITA sets out New Condition A:

> (1) This section applies if all the relevant transactions are post-4 December 2005 transactions.
> (2) An individual is not liable to income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs—
> (a) that Condition A is met, or
> (b) in a case where Condition A is not met, that Condition B is met.
> (3) Condition A is that it would not be reasonable to draw the conclusion, from all the circumstances of the case, that the purpose of avoiding liability to taxation was the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

Section 739 ITA sets out Old Condition A:

> (1) This section applies if all the relevant transactions are pre-5 December 2005 transactions.
> (2) An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.
> (3) Condition A is that the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

## 29.3 Motive defence condition B

Section 737(4) ITA sets out New Condition B:

> Condition B is that—
> (a) all the relevant transactions were genuine commercial transactions (see section 738), and
> (b) it would not be reasonable to draw the conclusion, from all the circumstances of the case, that any one or more of those transactions was more than incidentally designed for the purpose of avoiding liability to taxation.

Section 739(4) ITA sets out Old Condition B:

> Condition B is that the transfer and any associated operations—
> (a) were genuine commercial transactions, and
> (b) were not designed for the purpose of avoiding liability to taxation.

## 29.4 Enactment history

The original wording was much simpler. It provided exemption if:

> the transfer and any associated operations were effected mainly for some purpose other than the purpose of avoiding liability to taxation.[3]

The Solicitor-General explained why the text was changed to (what is now) Old Conditions A & B:

> A taxpayer[4] transferred a large amount – he was not one of the small people for whom my hon. and learned Friend was pleading – of foreign securities to a trust company abroad on certain trusts under which the income was to be accumulated until the death of the taxpayer. There

3 Section 18 FA 1936. Section 28 FA 1938 substituted the text which is now Old Conditions A and B.

4 Presumably a UK resident and domiciled transferor. (HMRC did not contend at that time that (what is now) s.720 applied to a transferor unless UK resident at the time of the transfer, and a foreign domiciled transferor would have qualified for the remittance basis.) So one can see why HMRC found the case troubling

> was a discretion to the trustees to pay certain portions of the income to the taxpayer or to his son. The deed gives to the taxpayer and his son power, with the consent of the trustees, to revoke the trust, or, alternatively, they can withdraw all or any part of the trust property for their own benefit. The trust income has been accumulated, and none of it has been distributed. The vigilant Revenue authorities pursued this taxpayer, and he contended, successfully, as it transpired, on appeal, that the foreign trust was born because of his fears as to the financial position of this country and the dangers of the situation on the Continent ... in 1936. He stated that he wanted to find a stable country where he could make safe provision for his family. The Special Commissioners decided that the main purpose of the transaction was occasioned by A's pessimistic view of the European situation at the time; that, arising out of that, his main intention was to make provision for his family in a safer country; and that, if there was any intention of avoidance of taxation, it was incidental to the main purpose. They therefore decided that there was no liability under Section 18 FA 1936. That instance has only to be cited to the Committee for the Committee to realise that on this particular matter the hon. Member for Chesterfield (Mr. Benson) was a true prophet in 1936, when he said that the word "mainly" would be too wide.[5]

A case on similar facts might still succeed today, but the test is stiffer. The taxpayer would need (in short) to show that tax avoidance was not even one of the purposes of the transfer.

## 29.5 "Commercial" in Old Condition B

Commercial is a requirement for Condition B but not Condition A. In Old Condition B the term is not defined. "Commercial" is an imprecise word.[6] The epithet "genuine" does not make it any clearer. In New Condition B there is a complex definition which is considered in the next section.

It is submitted that there is no single factor which determines what is "commercial" but a number of factors may indicate one way or the other.

---

5 Hansard 27 June 1938, col 1610. It is impressive that an income tax dispute relating to 1936/7 was resolved by a Special Commissioners' decision early in 1938.

6 *IRC v Plummer* 54 TC 1 at p.48: "What exactly is comprehended in the phrase ... 'a bona fide commercial transaction', I do not know" (Viscount Dilhorne). Cf *IRC v Goodwin* 50 TC 583 at p.598.

### 29.5.1 *Transfer with element of bounty*

A transaction made with bounty (gratuitous intent) is not commercial.[7] The concept of bounty (unlike "commercial") is relatively clear. For instance, a gift to a trust for the benefit of the settlor's family is not commercial. The same applies even if the class of beneficiaries includes the settlor and the trust is revocable. By contrast, a transfer of assets to a company wholly owned by oneself may be a "commercial transaction" even if the transfer is for less than full (or nil) consideration, and a transfer to an employee trust may be commercial.[8]

### 29.5.2 *Non-business transaction*

In *Carvill v IRC* the Special Commissioner ventured this explanation:

> There was not much difference between the parties about what constituted a bona fide commercial transaction. [Counsel for the taxpayer] contended that this was any genuine transaction which implements or facilitates a business end; [Counsel for HMRC] contended that the transaction must be in furtherance of commerce, ie

---

7 *Bulmer v IRC* [1967] Ch 145, citing *IRC v Goodwin* 50 TC 583 at p.607. HMRC adopt this approach in Venture Capital Schemes Manual:

> **12140. Subscriptions for shares: Commerciality**
> For the EIS and CVS, an investor in a company is not eligible for relief unless the subscription is made for bona fide commercial purposes. This rules out any subscription which is motivated by considerations of benevolence. This could be the case if, for example, the company were the proprietor of an unsuccessful professional football club and a supporter of the club paid a large premium for shares in the company; that may well [interestingly, the text formerly said *would clearly*] not be a commercial subscription. Similarly, if the company is owned by a person whom the investor wishes to benefit, and the investor pays a large premium for the shares with the object of increasing the value of the other person's shares, that too would not be a commercial subscription."

Ambrose Bierce makes the same point in *The Devil's Dictionary* (1911) defining "Merchant": "A commercial pursuit is one in which the thing pursued is the dollar."

8 This is supported by *Wannell v Rothwell* 68 TC 719 at p.733B, a case on loss relief which uses the word "commercial". See too *IRC v Levy* 56 TC 68 at p.87. The issue arose in a case on the meaning of settlement-arrangement. The definition of settlement-arrangement does not include the word "commercial" but the case law "bounty" requirement overlaps with the concept of "commercial".

> a trade or business. I shall follow these two meanings.[9]

This seems a fair paraphrase though one should always beware of a paraphrase. At first sight it does not seem to take us very far because the word "business" is notoriously wide and slippery. Nevertheless, one can suggest examples of transactions which should not be classified as commercial because they are not in furtherance of a business. One is the transfer to a trust to avoid the hazards of war, discussed in 29.4 (Enactment history). Another example is a transfer to avoid claims by non-business creditors, eg a claim on divorce or forced heirship. These transfers may involve an element of bounty (and may be classified as non-commercial for that reason) but in any event they should be classified as non-commercial transactions because they are not in furtherance of a business purpose.

### 29.5.3 *Making or managing investments*

In HMRC's view:

> The expression "bona fide commercial" in [Old Condition B] is taken to apply [1] only to the furtherance of trade or business, and [2] not to the making or managing of investments.[10]

Proposition [2] (that "commercial" does *not* apply to making or managing investments) is untenable:

(1) The statement does not say what the position is if the making or management of investments constitutes a business. A transfer may be both in the furtherance of a business *and* in the course of making or

---

9 [2000] STC (SCD) 143 at p.166.

10 RI 201. This was perhaps the view of the drafter of s.724 CTA 2010 which refers to transactions:

> "(a) for genuine commercial reasons *or* (b) in the ordinary course of making or managing investments."

(Emphasis added). But para (b) might have been added for the avoidance of doubt, or for some exceptional case, and it is not clear that the drafter really thought that making or managing investments would not usually be commercial.

managing investments.[11] I guess that the intended meaning is, that investment transactions in the course of a business are commercial, but investment transactions which are not in the course of a business are not commercial. This (difficult) concept of business is entirely distinct from the concept of what is commercial.

(2) More fundamentally, making or managing investments *is* generally regarded as "commercial" even if it does not constitute a business. What can be more "commercial" than the management to maximise investment return? This point is recognised in *Lewis v IRC* [1999] STC (SCD) 349 at p.362:

> It is trite law that in exercising their duties trustees must use as much diligence as a prudent man of business ... Faced with the self-investment problem their duty was to act in a business-like manner: this they did. Put another way, they acted commercially as was their duty. In our view it would be construing the statute too narrowly to hold that they did not carry out the transactions for bona fide commercial reasons, unless an investment decision cannot be for commercial reasons.

(3) Section 738(4) ITA assumes that making/managing investments may be "commercial" (in the ordinary sense of the word).

Proposition [1] (that the expression "commercial" applies *only* to the furtherance of trade or business) was put to the Commissioners in *Carvill*, where it obtained some support, see above. Nevertheless, it is too narrow. In practice, commercial transactions will normally further trades or businesses so the issue will not often arise. But there are counter examples, as discussed above: making or managing investments is in principle a commercial transaction even if it is not in the course of a business.

The most that can be said is that a transaction which is not in furtherance of a trade/business is less likely to be commercial, but this factor is not decisive.

11 Making or managing investments often constitutes a business. For instance, s.105(3) IHTA refers to the business of making or holding investments; s.1218 CTA 2009 refers to "a company whose business consists wholly or partly of making investments".

### 29.5.4 *Commercial from whose viewpoint?*

From whose viewpoint does one assess commerciality? The answer is that it should be looked at from the viewpoint of the transferor, but it would be a rare arrangement under which one party is and the other party is not acting commercially. In *IRC v Willoughby* HMRC accepted that bonds were commercial transactions for Royal Life who issued them but argued that they were not for Professor Willoughby who acquired them. The Special Commissioner did not agree:

> If a contract is entered into by two people and it is a bona fide commercial transaction for one of them, it cannot be not a bona fide commercial transaction for the other party to the contract in the absence of any reason for impeaching the latter's good faith.[12]

The point was not discussed on appeal.

## 29.6 "Commercial" in New Condition B

Section 738 ITA contains a definition of "commercial" for the purposes of New Condition B. The definition is artificial in that it excludes some transactions that are "commercial" in the normal sense of the word. New Condition B is therefore rather narrower than Old Condition B.

Section 738(1) ITA provides:

> For the purposes of section 737, a relevant transaction is a commercial transaction only if it meets the conditions in subsections (2) and (3).

Is s.738 an *exhaustive* definition of "commercial" or is it merely a partial, exclusory definition? That is, if a transaction meets the requirements set out in the section, is it necessarily "commercial" or must the transaction also be "commercial" in the ordinary sense of the word? The wording in s.738(1) ("a ... transaction is a commercial transaction only if ...") could be read as an exhaustive or a partial exclusory definition. It is suggested that s.738 is an exhaustive definition because the legislation is intended to make the law clearer, and a partial definition does not do that. In practice it is difficult to think of a transaction which meets the definition

12 70 TC at p.86H.

which is not commercial in the ordinary sense of the word, so the issue may not arise.

### 29.6.1 *Course of business*

Section 738(2) ITA sets out the first requirement of "commercial":

> It [the relevant transaction] must be effected—
> (a) in the course of a trade or business and for its purposes, or
> (b) with a view to setting up and commencing a trade or business and for its purposes.

In the following discussion I use the word "business" to mean "trade or business".[13]

At first sight this more or less encapsulates the natural meaning of "commercial". But in fact it is restrictive. An individual may make an investment which is not in the course of a business, eg a purchase of a company. This is commercial in the general sense of the word, but it is not "commercial" within the new definition. Section 738(2) thus gives effect to HMRC's proposition [1] of the meaning of "commercial" in Old Condition B.[14]

If a transaction is made between X and Y, it may be in the course of a business of X but not in the course of a business of Y. For example, if Y (an individual) subscribes for shares in X Ltd, an investment company, the issue of shares is in the course of the business of X Ltd. That is sufficient to meet the requirement of s.738(2).

### 29.6.2 *Arm's length requirement*

Section 738(3) ITA sets out the second requirement of "commercial":

> It [the relevant transaction] must not—
> (a) be on terms other than those that would have been made between persons not connected with each other dealing at arm's length, or
> (b) be a transaction that would not have been entered into between such

---

13 For HMRC views on what constitutes a business, see CG Manual para 65715 and Shares and Assets Valuation Manual para 111110.

14 See 29.5.3 (Making or managing investments).

persons so dealing.

Taken literally, this would exclude an interest free loan to a wholly owned company (even if it is a trading company). Such loans are commercial in the normal sense of the word. One wonders whether that was foreseen by the drafter. EN Draft Clauses (2005) claims that the change merely "clarifies and confirms" the correct interpretation of the existing statute. It is suggested that the provisions should be construed purposively, not literally, so that an interest free loan to a wholly owned company *is* a commercial transaction. Otherwise even dividends are apparently non-commercial transactions, which is absurd.

### 29.6.3 *Investments restriction*

Section 738(4) ITA restricts the definition of commercial by providing an artificial definition of "trade or business":

> For the purposes of subsection (2), making investments, managing them or making and managing them is a trade or business only so far as—
> (a) the person by whom it is done, and
> (b) the person for whom it is done,
> are persons not connected with each other and are dealing at arm's length.

First one must identify: (a) "the person *by* whom it is done". "It" must refer to the making or managing of investments. Thus we must identify the person carrying on the business.

Next one must identify: (b) "the person *for* whom it (the business) is done". This is gibberish. A business is not in normal English "done for" anyone. Presumably the reference is to the customers of the business. For example, if the business is a property business perhaps it is done for the tenants? Is the business of buying and selling shares done for the vendors and purchasers?

If one can identify a person within (b), the making/managing of investments is only business "so far as" it is done for unconnected persons. Normally an activity is or is not a business: it cannot be a business to a limited extent? If it is, what follows: what if most but not all of the customers are unconnected?

While one might, charitably, rewrite the subsection so that it meant that the business must be substantially carried on between unconnected persons, the proper course would be for a court to dismiss it as meaningless.

The subsection does not apply to a company trading in financial assets since these are not "investments".

Suppose T subscribes for shares or debentures in (or makes a loan to) an investment company. The transaction satisfies s.738(2) since the company is carrying on a trade or business. The transaction satisfies s.738(3) if it is on arm's length terms. The business satisfies s.738(4) provided the business is conducted with third parties: it does not matter that T and the company are connected.

### 29.6.4 *Commentary*

When one contemplates the difficulties raised by the statutory definition, one appreciates the wisdom of the 1936 drafter in leaving "commercial" undefined. The word "commercial" is often used motive defence tests[15] and nowhere else is it defined. It is suggested that the statutory definition of commercial in s.738 ITA should be repealed.

## 29.7 "Avoidance", "mitigation", "tax reduction", "evasion": introduction[16]

I turn to discuss the complicated, emotionally charged, and in practice constantly abused term "tax avoidance." It is helpful to begin with a fourfold categorisation:

(1) *Tax evasion*: Conduct which constitutes a criminal offence (fraud on HMRC or similar offences). This normally involves dishonest submission of an incorrect tax return. Dishonesty is essential to the offence.
(2) *Honest misdeclaration*: The submission of an incorrect tax return without dishonesty. Those involved may be culpable (guilty of neglect or wilful default) but not dishonest.
(3) *Tax avoidance*: Arrangements that reduce tax liability in a manner contrary to the intention of Parliament (I come later to consider this

---

15 There are too many to give a full list but among the most important are s.138 TCGA; s.734 CTA 2010.

16 For further reading, see Nabil Orow, *General Anti-Avoidance Rules* (Jordans, 2000). This has an extensive bibliography.

concept in more detail).

(4) *Tax mitigation*: Conduct which reduces tax liabilities without "tax avoidance" (not contrary to the intention of Parliament).

The distinctions between these concepts (especially avoidance/evasion and avoidance/mitigation distinctions) are now commonplace. They may appear obvious. They are taught to every student. No policy debate would be possible without them. However, these concepts and their associated terminology have only emerged after a gradual process of development and even now the terminology is not always adopted. It is essential to bear this in mind on reading sources on this subject.[17]

For an assessment of subjectivity, morality and judicial criticism of the avoidance/evasion distinction see Kessler "Tax Avoidance Purpose and s.741 ICTA" [2004] BTR 375 at p.407.

### 29.7.1 *Avoidance/evasion distinction*

An avoidance/evasion distinction very similar to the present was recognised very early (and was surely self-evident at any time) but at first there was no terminology to express it. In 1860 Turner LJ suggested evasion/contravention (where evasion stood for the lawful side of the divide).[18] In 1900 the distinction was noted as two meanings of the word "evade".[19] The technical use of the words avoidance/evasion in the

17 eg the 1920 Royal Commission on the Income Tax Cmd. 615 discussed evasion, honest mis-declaration and avoidance in one chapter headed "The Prevention of Evasion". In this discussion the words "avoidance" and "evasion" were used quite indiscriminately, see para 625. It is an interesting question whether the absence of terminology hampered discussion of the issues or whether the lack of discussion or interest led to the absence of suitable terminology. I suggest the latter: in the 1920s, criminal prosecution for tax evasion was rare, and only in blatant cases. Thus the avoidance/evasion distinction was not relevant. Likewise, tax avoidance (in the modern sense) was then still in its infancy so the avoidance/mitigation distinction also had little relevance.

18 *Fisher v Brierly* (1860) 1 de G F&J 643 at p.663. It is a pity this terminology did not catch on because it is more transparent than avoidance/evasion.

19 *Bullivant v AG* [1901] AC 196 at p. 207:

> "The word 'evade' is ambiguous. ... there are two ways of construing the word 'evade': one is, that a person may go to a solicitor and ask him how to keep out of an Act of Parliament – how to do something which does not bring him within the scope of it. That is evading in one sense, but there is nothing illegal in it. The other is, when he goes to his solicitor and says, 'Tell me how to escape from the

modern sense originated in the USA where it was well established by the 1920s.[20] It was slow to be accepted in the UK. By the 1950s, knowledgeable and careful writers in the UK had come to distinguish the term "tax evasion" from "avoidance/mitigation".[21] A discussion of evasion in the criminal sense is outside the scope of this chapter. It is important for our purposes to note that the term "evasion" was regularly used (by modern standards, misused) in the sense of avoidance, in law reports and elsewhere, at least up to the 1970s.[22] Now that the

---

consequences of the Act of Parliament, although I am brought within it'. That is an act of quite a different character."

20 It is found in the scholarly Sears, *Minimising Taxes*, 1922, Vernon Law Book Co and can be traced to Oliver Wendell Holmes in *Bullen v Wisconsin* (1916) 240 US 625 at p.630. It is regarded as basic in Dennis Hartman, *Tax Avoidance*, Legal Publishing Soc, Washington (1930) which cites two textbook definitions in similar terms. The practice of tax avoidance was more advanced in the USA; the first published work on the subject in England was Moore, *The Saving of Income Tax Surtax and Death Duties*, (1935) (the publication of which lead to the enactment of the TAA provisions).

21 The 1955 Royal Commission Cmd. 9474 para 1016:

> "It is usual to draw a distinction between tax avoidance and tax evasion. The latter denotes all those activities which are responsible for a person not paying the tax that the existing law charges upon his income. *Ex hypothesi* he is in the wrong, though his wrongdoing may range from the making of a deliberately fraudulent return to a mere failure to make his return or to pay his tax at the proper time. By tax avoidance, on the other hand, is understood some act by which a person so arranges his affairs that he is liable to pay less tax than he would have paid but for the arrangement. Thus the situation which he brings about is one in which he is legally in the right, except so far as some special rule may be introduced that puts him in the wrong."

Note that "evasion" is used here (unlike present usage) to describe dishonest criminal evasion and honest mis-declaration. Lord Templeman used this (by then old-fashioned) terminology in *IRC v Challenge Corporation* [1986] STC 548: "Tax evasion occurs when the commissioner is not informed of all the facts relevant to an assessment of tax. Innocent evasion may lead to a re-assessment. Fraudulent evasion may lead to a criminal prosecution as well as re-assessment." It does aid clarity if the term "evasion" is restricted to what Lord Templeman terms "fraudulent evasion".

22 Examples include: *Coutts & Co v IRC* [1964] 1 AC 1393 at p.1420; *Jamieson v IRC* (1963) 41 TC 43 at p.70; *Cory v IRC* [1965] AC 1088 at p.1107; *Greenberg v IRC* (1971) 47 TC 240 at p.271: "Parliament attempted to prevent this and other methods of tax evasion by provisions in the Finance Act 1960". This usage seems to have stopped in the 1970s; at this time UK economists were giving increasing attention to the subject of tax avoidance and evasion (*Tax Avoision*, p.1, IEA 1979) and perhaps

terminology has received official approval in the UK[23] this usage can be condemned as erroneous (but it still happens).[24] But it is sometimes helpful to use the expressions "legal avoidance"[25] and "illegal evasion", to make the meaning clearer.

The distinction is now accepted internationally:

> 72. The terms "tax evasion" and "tax avoidance" have not always been used precisely or with a uniform meaning.[26] Strictly speaking, tax evasion is considered to consist of wilful and conscious non-compliance with the laws of a taxing jurisdiction. Tax evasion is an action by which a taxpayer tries to escape legal obligations by fraudulent or other illegal means. The illegal conduct might involve simply failing to report income or fabricating deductions, or it may involve highly sophisticated tax planning that is premised on false or intentionally deceptive representations to the tax authorities. Tax evasion may arise as a result

---

their work had an effect on legal usage. Note that this is purely a semantic and not a substantive point that is being made here. The old usage certainly does not reflect the view that the evasion/avoidance distinction is unreal or unclear or that one can shade into the other. The legal distinction between the two is tolerably clear since evasion involves dishonesty, a tolerably well defined and understood concept. The term "avoision" used in the IEA publication referred to was coined as a convenient term to mean avoidance/evasion. The book noted the lack of *economic* distinction between the two concepts; the economic similarity was the justification for the new coinage. (The book also noted the blurring of a moral distinction between the two concepts either because avoidance was seen by some as immoral or because evasion was seen by some as not immoral; the book did not suggest a lack of a legal distinction which was unquestioned then and still should be now.)

23 *Craven v White* 62 TC 1 at p.197; OED 2nd edition (1989) entry under "Taxation."

24 For example, see *R v Charlton* [1996] STC 1418 at p.1421.
This is particularly a problem in the context of EU law, as ECJ cases regularly use "evasion" where avoidance is meant; eg *Cadbury Schweppes v IRC* [2006] STC 1908 at [50]; *Thin Cap Claimants v HMRC* [2007] STC at [37] discussed 51.5.3 (Need to prevent tax avoidance). Either EU translators do not know the UK distinction or they do not know the UK terminology, being perhaps mislead by the French word *evasion* which means (in UK terminology) avoidance.
Similarly, s.482 United States Internal Revenue Service Code refers to allocation of income that "is necessary to prevent evasion of taxes" but the intended concept is one of avoidance.

25 "Legal avoidance" is a standard term in recent double tax conventions.

26 [Footnote original] Part of the problem is a linguistic one. In English, "tax evasion" is synonymous with tax fraud, and means criminal activity. In French, "evasion" means avoidance. Tax evasion should therefore be translated into French as "fraude fiscal". ...

of a failure to properly report income that is legally earned. It may also result from the evasion of tax on income that arises from illegal activities, such as smuggling, drug trafficking, and money-laundering. In a broader sense, tax evasion may encompass a reckless or negligent failure to pay taxes legally due, even if there is no deliberate concealment of income or relevant information.

73. Tax avoidance, in contrast, involves the attempt to reduce the amount of taxes otherwise owed by employing legal means.[27] However, the borderline between evasion and avoidance in specific cases may be difficult to define. For one thing, the criminal laws of countries differ, so that behaviour that is criminal under the laws of one country may not be criminal under the laws of another.[28] In addition, the definitions of civil and criminal tax fraud may overlap, so that it is within administrative discretion whether or not to pursue a criminal fraud case in a specific instance. In reality, there is a continuum of behaviour, ranging from criminal fraud on one extreme, to civil fraud, to tax avoidance that is not fraudulent but which runs afoul of judicial or statutory anti-avoidance rules and therefore does not succeed in minimizing tax according to law, and finally to tax-planning behaviour which is successful in legal tax reduction. ...[29]

### 29.7.2 *Avoidance/mitigation distinction*

The clear[30] articulation of the *concept* of an avoidance/mitigation distinction goes back only to the 1970s[31] and the concept originated from

27 [Footnote original] Black's Law Dictionary (Fifth Edition) has defined "tax avoidance" as: "The minimization of one's tax liability by taking advantage of legally available tax planning opportunities. Tax avoidance may be contrasted with tax evasion, which entails the reduction of tax liability by using illegal means".

28 [Footnote original] While most countries define criminal tax fraud fairly broadly, there are some exceptions. For example, Switzerland has a narrow concept of "tax fraud", which is an offence subject to imprisonment, defining it as the use of "forged, falsified or substantially incorrect documents". See Direct Federal Tax Law, art. 186.

29 United Nations Manual for the Negotiation of Bilateral Tax Treaties between developed and Developing Countries) 2003.

30 One can find some earlier examples: *Mangin v IRC* [1971] AC 739 is a moderately clear example; the concept is embryonically present in *Newton v Commissioner of Taxation of Australia* [1958] AC 450. But these cases do not draw the line as clearly or quite on the same basis as Sandford and modern cases following him.

31 In 1946, Wrottesley J was unaware of it. Discussing the motive defence, he said: "There cannot, I think, be two opinions as to what 'avoiding' means. Where what is to be avoided is a liability, it must mean to evade, or to keep out of the way of,

economists, not lawyers. In 1973 C.T. Sandford wrote:

> A government may have one of three attitudes to a particular 'avoidance' measure – using the wide definition of avoidance. It may welcome it; the government may have deliberately offered a tax concession to promote some objective, e.g. tax concessions on mortgage interest, combined with the abolition of Schedule A income tax, in order to encourage owner-occupation; or investment and initial allowances to stimulate new investment in development areas. Second, without having sought positively to encourage a particular 'avoiding' action the government may find it entirely acceptable as when an income tax payer reduces his tax liability by taking a wife or having children; or when a person on retirement transfers savings from a building society to some other form of investment in order to reclaim income tax. Third, the government may deplore certain actions as contrary to its intentions; the action is in accord with the letter of the law but not its spirit. *Only actions in this third category should rank as 'avoidance'.*[32]

The use of the terminology avoidance/mitigation to *express* this distinction is an innovation of Lord Templeman in 1986.[33] The expression "tax

---

whether it be as in Richard III, 'The censures of the carping world', or anything else unpleasant that might befall a man, such as a tax": *Congreve v IRC* 30 TC 163. This is describing avoidance in the loose or etymological sense (including mitigation).

32 *Hidden Costs of Taxation*, IFS, 1973, p.113 (emphasis added). Sandford proposed a second requirement of "avoidance" which he related to the taxpayer rather than to the legislature:

> "It is reasonable to confine 'avoidance' to action which results in the would-be avoiders substantially achieving the objective to which the tax had become an obstacle. Let us give some examples. If a man ceases to buy cigarettes because of tobacco tax he has not achieved his pre-tax objective, i.e. to smoke. Buying sweets instead of cigarettes therefore, is not avoidance. Again, if a taxpayer decides to use most of his wealth for a consumption spree because estate duty makes it not worth while saving for heirs, he is not 'avoiding' for he has abandoned his objective of passing property to heirs. On the other hand, if he reacts to estate duty by making *inter vivos* gifts (assuming he survives for seven years), this is avoidance; it has achieved, though by a more circuitous route, the objective of passing to heirs an intact property."

This is problematic, because there is no obvious way to identify the "objective to which the tax has become an obstacle", and it has not been adopted into the law.

33 *IRC v Challenge* [1986] STC 548. In accordance with the (according to Austin, "childish") declaratory theory of law, Lord Templeman did not say that he was describing a concept relatively new to tax jurisprudence and framing terminology

avoidance" has very often been used in the loose sense, meaning or including mitigation.[34] The reason may be either that the author does not have any avoidance/mitigation distinction in their mind or (if they do) that they are not using the modern terminology to express it. Even now, the term "tax avoidance" is sometimes still used in a loose or etymological sense to include mitigation but nowadays this usage is sometimes jocular, which suggests that the technical meaning is seeping into public consciousness.[35] Likewise "mitigation" was and sometimes still is used in the sense of "avoidance".[36]

In this book I use the words "avoidance" and "mitigation" in the strict sense. It would be convenient to have a neutral term to describe both avoidance and mitigation (what is described above as the loose etymological sense of "tax avoidance"). There is no agreed term, but "tax reduction",[37] "tax saving", "tax planning" and "tax advantage" might all be used in this sense. It may be less confusing if less elegant to refer to "avoidance/mitigation" where one wishes to refer to the two.

---

altogether new to describe it.

34 C.T. Sandford:

> "Amongst tax practitioners the generally accepted definition of avoidance ... is any legal method by which a person can reduce his tax bill... this definition can cover almost anything... I can legally reduce my income tax bill by buying a more expensive house (on which I get additional mortgage interest relief), getting married, having more children, taking out more insurance or simply stopping work."
> (*Hidden Costs of Taxation*, IFS, 1973).

35 The author once saw an advertisement for PEPs: "Be a tax avoider!" PEPs were a tax free investment now replaced by ISAs. For another example, see *Board of Inland Revenue v Hoe*, A.P. Herbert's *More Uncommon Law* : "Evidently those who do not smoke or drink are ... avoiding taxation."

36 eg C.T. Sandford wrote in 1973 that tax avoidance (in the strict sense) "is often referred to by expressions such as tax planning or tax mitigation": *Hidden Costs of Taxation*, IFS, 1973, p.104. *Craven v White* 62 TC at p.203 (a requirement of *Furniss v Dawson* is that a transaction "had no other purpose than tax mitigation").

37 See para 15E(4) Sch.25 ICTA (Controlled Foreign Companies). INT Manual provides Introduction to the CFC motive test:

**208010 Introduction to the motive test** [April 2009]

> ... Despite numerous valiant attempts there has never been a consensus about what is meant by 'tax avoidance' ...
>
> The [CFC] motive test attempts to solve the first problem by avoiding any mention of the term 'tax avoidance', settling instead for the rather more neutral concept of a 'reduction in tax' ...

## 29.8 Meaning of "avoidance" in motive defence

The House of Lords in *IRC Willoughby* decided that "avoidance" in motive defence meant tax avoidance in the strict sense and not mitigation:

> ... it was essential to understand what was meant by "tax avoidance" for the purposes of s 741 ICTA [now Conditions A and B]. Tax avoidance was to be distinguished from tax mitigation. ... My Lords, I am content for my part to adopt these propositions.[38]

This would have surprised those who framed the legislation in 1936/8; they were unaware of any avoidance/mitigation distinction. But the enormously increased complexity of the tax system since 1936 makes the distinction sensible, perhaps necessary. HMRC accepted that the purchase of an ordinary offshore bond should be taxed under the chargeable event provisions and not under the TAA provisions. One way[39] to reach that result is to give a narrow meaning to tax avoidance and so to widen the motive defence.

### 29.8.1 *Purpose of tax evasion*

Suppose an individual transfers assets abroad with the dishonest purpose of *evading* UK taxation. Can one apply the avoidance/evasion distinction and say that the individual did not intend to *avoid* taxation, so that – while they may be liable to criminal sanctions – the motive defence applies and excludes the transfer of assets rules? The answer is plainly no. The argument is anachronistic, since in 1936 and for 40 years afterwards, the word "evasion" was used in English jurisprudence to describe avoidance. More fundamentally, the context shows that the expression "tax avoidance" includes (criminal) tax evasion. This was assumed without argument in *R v Dimsey & Allen* 74 TC 263.

---

38 [1997] STC 995 at p.1003.

39 An alternative, less satisfactory, would be to refuse to recognise the tax purpose of the acquisition, by saying that it is merely incidental, or by applying a *Brebner* or choice principle: see 29.14.1 (A choice principle?). Another solution is to say there is no relevant transfer.

## 29.9 Meaning of "taxation" in the motive defence

"Taxation" in Old Conditions A and B means any form of UK taxation, and not only income tax: *Sassoon* v *IRC* 25 TC 154. HMRC agree. The International Manual provides:

> **600040 - Transfer of assets abroad** [October 2010]
> **Overview of ITA 2007/S736 - 742 - exemption from liability**
> ..In the context of this test "taxation" includes any UK tax liability, for example, Inheritance Tax, Capital Gains Tax, Corporation Tax as well as Income Tax.

*Sassoon*, though criticised,[40] is a decision of the Court of Appeal and should be taken to represent the law.

For the purposes of New Conditions A and B this rule is now statutory. Section 737(7) ITA provides:

---

40 For the following reasons:
(1) The rule that an intention to avoid (say) stamp duty should have *income* tax consequences gives rise to obvious anomalies. The usual principle is that each tax must be considered separately. This is the approach usually adopted by anti-avoidance provisions: eg s.682 ITA (transactions in securities), or s.137 TCGA. But see s.75(5)(a) FA 1986 for an exception.
(2) Since *Sassoon* was decided, the word "tax" has been given a limited definition. Section 989 ITA provides:
"'tax', if neither income tax nor corporation tax is specified, means either of those taxes".
There are two reasons why this statutory change does not affect the position:
(a) A definition of *tax* does not in principle determine the meaning of the cognate word *taxation*. (Would a definition of "engine" determine the meaning of the cognate word "engineer"?)
(b) The decision in *Sassoon* was given the implied approval of Parliament in the 1952 consolidation and it is not likely that the 1970 consolidation was intended to alter that.
(3) Section 720(1) ITA refers only to the avoidance of income tax; but see s.721(5)(c) ITA.
(4) Dicta in *Vestey v IRC* 54 TC 503 are said to be inconsistent with *Sassoon*; but this point was not an issue in *Vestey*.
(5) A reversal of *Sassoon* would cut down considerably the multitude of issues that the motive defence currently raises: see 29.21 (Practical examples: introduction).
While of course "context is king", *Sassoon* is supported by consideration of s.22 F(No 2)A 1931 where "taxation" plainly means any tax.

> In this section—
> "revenue" includes taxes, duties and national insurance contributions,
> "taxation" includes[41] any revenue for whose collection and management the Commissioners for HMRC are responsible.

Foreign tax is not "taxation" for this purpose. The House of Lords assumed that this was so without argument in *Herdman v IRC* 45 TC 394. This must be right since (1) it is illogical that the purpose of avoiding foreign taxes should have UK tax consequences and (2) it would be almost impossible to apply an avoidance/mitigation distinction to foreign taxes (where the distinction would depend on the foreign tax culture and attitudes).

## 29.10 Identifying and classifying purpose: the old conditions

It is considered that the identification of a tax avoidance purpose requires a two-stage approach: identifying and classifying purpose.

### 29.10.1 *Identify purpose: stage 1*

One must look into the mind of the transferor to ascertain whether their purpose was (to use the neutral term) to reduce tax. The issue is subjective in that it depends on what is in the mind of the transferor. If they had no purpose to reduce tax then the motive defence applies.

How does one ascertain the transferor's subjective purpose? All facts which may shed light on their purpose must be taken into account. Exemption is not due solely on the basis of an assertion by individuals that tax avoidance was not their subjective intention, because that (self serving) assertion may not be credible in the light of other relevant facts.

It is highly relevant to consider the objective questions:

(1) whether the transfer did reduce tax significantly; and
(2) whether the tax reduction was foreseeable at the time of the transfer.

If the tax reduction was not foreseeable, it is not likely to have been the

41 This is not an exhaustive definition. At present it is difficult to see what other tax may be caught, but this would be relevant if there was a change in the responsibilities of HMRC (eg a new tax was introduced which was managed by a different Government department).

purpose to achieve it. Conversely the fact that a tax advantage is objectively foreseeable as a consequence of the transfer may be cogent evidence of subjective purpose. We normally have the purpose of achieving the foreseeable consequences of our acts. However, this is not necessarily so. First the transferor may not have foreseen the advantage even though a "reasonable person" might have done so: no-one at all times acts with the foresight of the "reasonable man".[42] Secondly, the transferor may have been aware of (or even have wanted) the advantage but it may nevertheless not properly be classified as their "purpose".[43]

Before *Willoughby* identifying a purpose of reducing tax was the beginning and end of the matter because an avoidance/mitigation distinction had not been recognised in this context. Now there is a second stage.

### 29.10.2 *Classifying purpose: stage 2*

If the transferor did have the purpose of reducing tax, one must (applying *Willoughby*) categorise that purpose as "avoidance" or "mitigation". This is determined objectively (in the sense that the issue is independent of the mind of the transferor).

It would be wrong at stage (2) to ask whether the transferor subjectively thought their purpose was "tax avoidance" (as opposed to mitigation) because avoidance/mitigation is a question of law, a decision for the Court and not for them. Indeed, it would generally be pointless, since (unless the individual is a tax lawyer) they will not know the correct meaning of the terms.

The motive defence therefore involves a mixture of objective and subjective elements, as often happens.

Stage (1) – the mind of the transferor – is a question of fact, decided by the Tax Tribunal on evidence and the appellate courts have had little to say about it. Anything said on the subject of tax avoidance in motive defence cases before *Willoughby* needs to be reviewed because it will not have considered stage (2).

---

42 Contrast s.8 Criminal Justice Act 1967, the principle of which is also part of the common law: *Franklin v The Queen* [1987] AC 576.

43 See 29.13 (Foresight and purpose) and 29.14 (Consequence and purpose).

### 29.10.3 *HMRC view(s): objective purpose*

RI 201 states:

> [1] If a transaction involves tax avoidance, that is considered by the Revenue to be at least one of its purposes
> [2] even if the transferor did not form the subjective intention[44] of avoiding tax.[45]

This is a rejection of the stage (1) test set out above. In the HMRC view a transfer may have been effected for a tax avoidance purpose even though the transferor did not have the subjective purpose of obtaining a tax reduction. That must be wrong for several reasons. First, the natural meaning of "purpose" is to connote a subjective concept. This meaning is supported by high authority.[46] Of course context may show the word is used in an unusual sense, but that is not the case here. Secondly, this is

44 RI 201 is (I think) using "intention" as a synonym for the statutory word "purpose", but the difficulty of RI 201 becomes more apparent if one disallows that move. It is surely nonsense to say:

> "If a transaction involves tax avoidance, that is considered by the Revenue to be at least one of its purposes even if the transferor did not form the subjective purpose of avoiding tax."

45 This is loosely based on a dictum of Lord Nolan in *IRC v Willoughby* [1997] STC 995 at p.1003:

> "Where the taxpayer's chosen course is seen upon examination to involve tax avoidance (as opposed to tax mitigation), it follows that tax avoidance must be at least one of the taxpayer's purposes in adopting that course, whether or not the taxpayer has formed the subjective motive of avoiding tax."

46 "I shall begin by considering the word 'purpose', for both sides have relied on this word in different senses. Broadly, the appellants contend that it is to be given a subjective meaning and the Crown an objective one.

> I have no doubt that it is subjective. A purpose must exist in the mind. It cannot exist anywhere else."

*Chandler v DPP* [1964] AC 763 at p.804. *Dicta* apparently to the contrary in *Newton v Commissioner of Taxation* [1958] AC 450 at pp.465–466 are rightly criticised and distinguished in John Avery Jones [1983] BTR 22–24. Twenty years later, Avery Jones had the opportunity to make the same point judicially in *Carvill v IRC* [2000] STC (SCD) 143, 75 TC 477. A subjective test also applies for the escape clause in the transactions in securities rules; see *Addy v IRC* 51 TC 71 at p.81E.

the way that the motive defence has always been applied and understood.[47]

While the HMRC statement clearly rejects a subjective purpose test, it is not clear what test HMRC wish to apply instead. What is meant by a transaction "involving" tax avoidance? Sometimes HMRC have argued that the statute requires one to identify the "objective purpose" of the transfer. The attraction of putting the matter this way is that it is close to the wording of the statute. The difficulty is that the expression "objective purpose" is an oxymoron. If that means anything, it means, I think, the purpose which an ordinary reasonable person would have if they had made the same transfer in the circumstances of the transferor. It is difficult to identify purpose in this way because different people may do the same act with different purposes. And which circumstances are relevant? For instance, take the example of the transferor concerned as to the situation in Europe in 1936.[48] Their subjective purpose was not tax avoidance. Was their objective purpose tax avoidance? I do not know how to begin to answer the question.

The test that HMRC ultimately wanted to apply is that a transfer has a tax avoidance purpose if it has a tax saving *result*, if its *effect* has been to save tax, or at least if it was reasonably foreseeable that it would do so. This test does make sense (unlike "objective purpose") and it is practical to apply. The difficulty with this test is that it is not consistent with the wording of the statute. Purpose and result/effect are two entirely different concepts, and there is no getting away from that.

The ink had hardly dried on the HMRC statement when the Special Commissioners rejected it: *Beneficiary v IRC*,[49] *Carvill v IRC*.[50] Until

---

47 The drafter of s.33(3) FA 1944 and s.32(3) FA 1951 plainly agreed. This provided (in short) that where "the main benefit which might have been expected to accrue" from a transaction was tax avoidance, then tax avoidance "was *deemed* to have been the purpose of the transaction". This imposed an objective standard and only makes sense on the assumption that the word "purpose" (in text based on what is now Condition A) was otherwise determined subjectively. The point is made expressly in *Crown Bedding v IRC* 34 TC 107 at p.115.

48 See 29.4 (Enactment history).

49 "We reject counsel's submission that we should look at effect. Purpose is not effect and in our view it is essential to look into the minds of the actors to discover their purpose". But: "The question of whether there was tax avoidance must be looked at objectively". *Beneficiary v IRC* [1999] STC (SCD) 134 at [143].

50 [2000] STC (SCD) 143 at [9]–[13], 75 TC 477 (Special Commissioners). The dictum of Lord Nolan in *IRC v Willoughby* mentioned above which appears to favour an objective approach is, as *Carvill* demonstrates, inconsistent with a long line of

2008 HMRC contended that these cases were wrongly decided. However, HMRC sensibly abandoned that position before the Tribunal in *Burns v HMRC*,[51] where the Commissioner said:

> It seems to me to be settled law that what I must address is "purpose", rather than objectively ascertained effect, or presumed effect.

In practice the "objective purpose" argument is now (I think) resolved.

## 29.11 Identifying and classifying purpose: the New Conditions

Old Conditions A and B refer simply (?) to the purpose for which the transactions were effected or designed. New Condition A is that:

> *it would not be reasonable to draw the conclusion, from all the circumstances of the case*, that the purpose of avoiding liability to taxation was the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.

New Condition B is that:

> *it would not be reasonable to draw the conclusion, from all the circumstances of the case*, that any one or more of those transactions was more than incidentally designed for the purpose of avoiding liability to taxation.

The new words are italicised. What difference do they make? Perhaps we should look first to see what HMRC said they intended to achieve:

> 59. The new section 741A ICTA [New Conditions A and B] aims to ensure that all relevant factors are taken into account in deciding whether exemption is due. That is the normal way of applying any purpose test, but in relation to section 741 [Old Conditions A and B] the view is sometimes expressed by tax practitioners that the present test should be interpreted more narrowly. They contend that
> [1] it is only necessary to look at the subjective intentions of the individual, and

---

authority and has to be ignored (as in *Carvill*) or explained (as in *Beneficiary*).

51 [2009] STC (SCD) 165.

> [2] that no account need be taken of any other circumstances, even if they included for example the fact that a particular transaction might have been structured in such a way that it directly resulted in a significant tax reduction that was not on the face of it intended by Parliament.

There are two distinct "contentions" here. The first is correct. The second cannot be taken seriously: see 29.10.1 (Identify purpose: stage 1).

> 60. HMRC has consistently taken the view that such a narrow interpretation of section 741 is not a correct reading of the law. If such an interpretation is accepted, the purpose of the transfer of assets abroad legislation to prevent individuals avoiding income tax in the way defined [*sic*] in sections 739 and 740 could not be properly achieved. The new test makes it the condition for exemption that the individual must broadly show that it would not be reasonable to conclude from all the circumstances of the case that any of the transactions had a tax avoidance purpose. The wording of the test is intended to put it beyond doubt that exemption will not be due solely on the basis of an assertion by individuals that tax avoidance was not their subjective intention. Evidence of individuals' subjective intention will be one factor to take into account. However, all other relevant circumstances of the particular case must also be considered, including the actual objective outcome of the transactions.[52]

These paragraphs are somewhat muddled. I think it is making the point made at 29.10.1 (Identify purpose: stage 1). All relevant circumstances must be taken into account in order to identify an individual's purpose. A particularly significant fact is whether the transaction resulted in a significant tax reduction, that is, the actual objective outcome of the transactions.

I have wondered whether the drafter's aim here is something different: to replace the subjective purpose test (which clearly applies to the Old Conditions) with an objective results test. However this is inconsistent with what the EN actually said. First, the current (subjective) test is not the view "sometimes expressed by tax practitioners": it is the view of the two most distinguished Special Commissioners of the day and firmly grounded in the law. Moreover, if it were the intention to substitute a

52 EN Draft Clauses (2005). The point is made more briefly in EN FB 2006 para 66.

subjective purpose test with an objective results test, then "evidence of individuals' subjective intention" should cease to be "one factor to take into account". It will be completely irrelevant. However, the one thing that is clear is that the passage is unclear. It is wrong to try to construe a muddled explanatory note in order to understand a statutory provision. We do not wish to move to the position, sometimes said to apply in the USA, that "if the legislative history is unclear, you read the words of the statute".

Turning, as we must, to the legislation itself, we find that the test still depends on the purpose of the transactions. It is reasonably clear that:

(1) this means the purpose of those who carried out the transactions, and
(2) purpose means subjective purpose.

What the new legislation stresses (if only for the avoidance of doubt) is that all the circumstances of the case must be taken into account in order to ascertain the subjective purpose.

Had the drafter sought to replace a purpose test with an objective results test, then they would have used quite different wording, and, indeed, a precedent existed in s.33(3) FA 1944 and s.32(3) FA 1951.

## 29.12 Transfer made for tax and non-tax purposes

### 29.12.1 *Condition A*

Condition A depends on whether the purpose of avoiding liability to taxation was the purpose *or one of the purposes* for which the transfer or associated operations were effected.

If one of these purposes is tax avoidance, the transfer fails condition A. It does not matter what the other purposes are.[53]

### 29.12.2 *Old Condition B*

Old Condition B contains two requirements; both must be satisfied. The first is that the transfer and any associated operations were commercial transactions. Secondly that the transfer and associated operations were not designed for the purpose of avoiding liability to taxation.

What happens if a commercial transaction has two or more purposes? HMRC say in RI 201:

53 This is plain from the terms of the statute but if authority is needed, see *Philippi v IRC* 47 TC 75 at p.110.

> The Revenue's view is that one of the essential conditions of s 741(b) ICTA would not be satisfied where there was a significant element of tax avoidance purpose in the design of the transfer and any associated operations.

This paraphrase is rather[54] too generous to HMRC. The Special Commissioner stated:

> One must ask in para (b) whether the transfer was designed for the purpose of avoiding tax or not. This seems to me to require that the main purpose was not tax avoidance because if one has to categorise a transaction as being either designed for the purpose of tax avoidance or not, when it is clearly accepted that a transaction may be designed for more than one purpose, the only way to categorise the design into one purpose is to look at the main purpose of the design. I think, therefore, that the taxpayer's contention of sole purpose is too loose a test and the Revenue's contention of significant purpose is too stringent a test although it will in practice be difficult to determine the difference between a significant and a main purpose.[55]

The point of Condition B is that (if one passes the "commercial" requirement) the "no tax avoidance" requirement is easier to satisfy. Otherwise there is no reason to have two Conditions.

### 29.12.3 *New Condition B*

The wording has changed in New Condition B. The test is now whether:

> any one or more of those transactions was *more than incidentally* designed for the purpose of avoiding liability to taxation.

This brings the law into line with RI 201.[56] At first I thought (like the Special Commissioner) the difference is relatively slight. But (depending

54 Depending to an extent what nuance one gives to the malleable word "significant".
55 *Carvill v IRC* [2000] STC (SCD) 143 at [89], 75 TC 477. The same Special Commissioner cited and followed this passage in *4Cast v Mitchell* [2005] STC (SCD) 280 at [12].
56 I take "more than incidental" in New Condition B to have the same meaning as "significant" in RI 201.

what nuance is given to the malleable word "incidentally") the change does make a difference. Since a merely incidental motive is not likely to amount to a "purpose" at all, a claim which fails Condition A will rarely (if ever) qualify under Condition B. For this reason (and because the "commercial" requirement in New Condition B is so narrow) New Condition B is dead letter law.

### 29.12.4 *Commentary*

Why did Parliament not simply repeal Condition B, rather than amend it out of existence in a way which needs pages to analyse and discuss? Perhaps the full extent of what was done was not realised. Perhaps it was, but it was feared that repeal would raise fiercer objections. However that may be, the rational course would either be to repeal Condition B completely and gain the benefit of simplicity or to return to old Condition B, which had a role to play in aiding commercial life and the economy.

## 29.13 Foresight and purpose

### 29.13.1 *Two senses of purpose*

Clause 14(1) of the draft Offences Against the Person Bill (a 1998 Home Office consultation paper) defines intention in a way which illustrates one possible meaning of the word "purpose":

> A person acts *intentionally* with respect to a result if—
> (a) it is his *purpose* to cause it, or
> (b) although it is not his purpose to cause it, he knows that it would occur in the ordinary course of events if he were to succeed in his purpose of causing some other result.

This distinguishes between "intention" and "purpose".[57] Purpose is narrower. If a person has the purpose of causing another result, but knows the tax saving would occur if they succeed in their purpose of causing the

57 Bentham's terminology was direct and oblique intention: *The Principles of Morals & Legislation*, Chapter VIII (Of Intentionality). See Kaveny's excellent "Inferring Intention from Foresight" 120 LQR 81 and Bratman, "Intention, Plans & Practical Reason", (1987), Chapter 10 (Intention and expected side effects).

other result, they have the *intention* to obtain the tax saving but not the purpose.

"Purpose" is not always understood this way:

> The word [purpose] can be used to designate either
> [1] the main object which a man wants or hopes to achieve by the contemplated act, or ...
> [2] those objects which he knows will probably be achieved by the act, whether he wants them or not.
> I am satisfied that in the criminal law in general, and in this statute in particular, its ordinary sense is the *latter* one.[58]

Here the word "purpose" is understood in the same wider sense as "intention" (as defined above, ie foresight does count as purpose) and (I think) "object" is used in the narrower sense.[59]

### 29.13.2 *"Purpose" in the motive defence*

In RI 201 HMRC say:

> "Purpose" is taken to be the end it is sought to achieve by the transaction.[60]

This adopts (I think) the narrower concept of purpose and it is suggested that this is correct. Purpose in the motive defence is what a person wants

---

58 *Chandler v DPP* [1964] AC 763 at p.804, emphasis added.

59 But elsewhere "object" is said to have the same meaning as "purpose": *Ensign Tankers v Stokes* 64 TC 617 at p.723. These examples neatly illustrate Lord Simon's lament concerning the chaotic terminology in judgments, academic writing and statutes:

> "Will, volition, motive, purpose, object, view, intention, intent, specific intent or intention, wish, desire; necessity, coercion, compulsion, duress–such terms, which do indeed overlap in certain contexts, seem frequently to be used interchangeably, without definition ..."

*DPP v Lynch* [1975] AC 653 at p.688. See John Avery Jones "The mental element in anti-avoidance legislation" [1983] BTR 22.

60 This is based on *Newton v Commissioner of Taxation of the Commonwealth of Australia* [1958] AC 450 at p.465. Note by the way how use of the passive voice ("it is sought to achieve") ducks the issue of whose purpose one is looking for. See George Orwell's essay, "Politics and the English Language".

or hopes to achieve (not merely foresight). In practice, the issue arises in Condition A cases.[61]

## 29.14 Consequence and purpose

A consequence of a transaction is not necessarily its purpose. This was stated judicially in the "celebrated"[62] passage in *IRC v Brebner*:

> [1] My Lords, I would only conclude my speech[63] by saying, when the question of carrying out a genuine commercial transaction, as this was, is considered, the fact that there are two ways of carrying it out – one by paying the maximum amount of tax, the other by paying no, or much less, tax – it would be quite wrong, as a *necessary* consequence, to draw the inference that, in adopting the latter course, one of the main objects is, for the purposes of the section, avoidance of tax.
> [2] No commercial man in his senses is going to carry out commercial transactions except upon the footing of paying the smallest amount of tax involved.
> [3] The question whether in fact one of the main objects was to avoid tax is one for the Special Commissioners to decide upon a consideration of all the relevant evidence before them and the proper inferences to be drawn from that evidence.[64]

---

61 The issue should not arise in a Condition B case (commercial transactions). In a situation where one wanted the commercial transaction, and merely had foresight that a tax saving would follow, even if the tax saving was regarded as *a* purpose (as in the wide *Chandler* sense of purpose) it would not be the main (or significant) purpose.

62 *IRC v Willoughby* [1995] STC at [167], 74 TC at [89].

63 For completeness, the TC report reads "judgment" and the AC reads "speech". "Speech" is strictly the correct term.

64 *IRC v Brebner* 43 TC 705 at p.718; emphasis original but paragraph numbers added. Another way to read this passage in *Brebner* is to see it as an early recognition of an avoidance/mitigation distinction but that would be anachronistic because the distinction was not then made. It would also be wrong because that distinction is irrelevant in the transactions in securities code. (This is stated in *Marwood Homes v IRC* [1999] STC (SCD) 44 at [20]:

> "Taking steps to obtain relief under s 242 following payment of a dividend outside a group election is clearly within the spirit of the ACT code in the tax legislation. But the fact that a transaction has been carried out to achieve a benefit conferred by a statutory provision will not of itself exclude the application of s 703 [transactions in securities rules]. This follows from the

The point being made here is not (or not just) that mere foresight of a tax advantage is not a tax avoidance purpose.[65] Lord Upjohn goes further in point [3]: he states that where there is a "commercial transaction" knowledge and *choice* of the tax advantageous course over an alternative does not "necessarily" constitute the main purpose or even one of the purposes[66] of the transaction.

At what point does a conscious choice of a tax advantageous course become a tax avoidance purpose in its own right in addition to the commercial purpose? Lord Upjohn does not give an answer to this: to say at [3] that it is a question of fact for the Commissioners, if true, is not exactly helpful.

It is suggested that a useful test may be to ask: does the tax advantage form an incidental or subsidiary aspect of achieving the commercial transaction (as opposed to being an end in its own right)? If so, there is no tax avoidance purpose. This is an evaluative test which is perhaps easier to state than to apply, but it may sometimes be helpful. It overlaps with an avoidance/mitigation distinction, since an advantage which is judged to be incidental or ancillary to a commercial or family transaction is less likely to be contrary to the intention of Parliament: it is more likely to constitute mitigation than avoidance.

I suggest the point made in *Brebner* is really this: where one of the reasons for a transaction is a commercial (non-tax) reason, one should be

---

> definition of tax advantage in [what is now s.732 CTA 2010] which covers both everyday tax planning and transactions, such as traditional dividend stripping, which fall more obviously within the mischief that s 703 was introduced to counteract. The only safeguards available to the taxpayer are the clearance procedures and the escape clause. It cannot therefore avail Marwood to rest its case on the simple proposition that the dividends ... were directly within the spirit of s 242."

This does follow from a natural reading of the definition of "tax advantage" now in s.732 CTA 2010 (the income tax equivalent has changed). This term includes a relief from or repayment of tax, as well as the avoidance or reduction of a charge to tax. The concept thus includes both tax avoidance and mitigation.)

65 The point made at 29.13 (Foresight and purpose).

66 *Brebner* is a case on the transactions in securities motive defence. The wording is not quite the same as motive defence condition A: s.734(3) CTA 2010 refers to the "main objects" and Condition A refers to "purposes". However, it is considered there is no significant distinction between them. This was presumably the view adopted in *Willoughby* in the Court of Appeal where *Brebner* was cited in a Condition A context.

slower to conclude that another purpose is tax avoidance than in the case of a purely tax motivated transaction. This reflects the reasonable assumption that a purely tax motivated transaction is more likely to be contrary to the intention of Parliament and a commercial transaction is less likely to be. I refer to this as the *Brebner* principle.

The *Brebner* principle applies not only to commercial transactions, but also to any transaction carried out for primarily non-tax reasons including "ordinary family dealing", which would include most trust transfers, at least those where the settlor is excluded.[67] In practice, this issue arises in Condition A cases.[68] It is considered that the *Brebner* principle continues to apply to New Conditions A and B. It is true that the terms of New Condition B (that incidental purposes are to be disregarded) suggest that incidental purposes in New Condition A are *not* to be disregarded. But the *Brebner* principle is identifying matters that are not "purposes" at all.

### 29.14.1 *A choice principle?*

The *Brebner* dictum is sometimes regarded as supporting a "choice principle":

> Choosing between two alternatives – if one is carrying out a commercial or a family or an investment transaction, choosing the most tax-efficient – is not avoidance.[69]

But this formulation goes too far: if a UK settlor creates a trust for their family – a family transaction – they have to choose between UK and foreign trustees; but the choice of foreign trustees by the UK settlor is avoidance.[70]

One can accept a choice principle if it is combined with the concept of the intention of Parliament, ie if the settlor makes choices within the

---

67 *Mangin v IRC* [1971] AC 739 at p.751 and p.756, restating the *Brebner* principle in the context of an extremely free reading of a New Zealand provision.

68 Because in a commercial transaction, incidental tax avoidance purposes are in any event disregarded.

69 Baker "Tax avoidance, tax mitigation and tax evasion", accessible *www.taxbar.com*.

70 It seems that the choice principle has been abandoned in Australia, as a "false dichotomy": see Myers "Tax avoidance and the High Court since Sir Garfield Barwick" accessible *www.law.unimelb.edu.au/taxgroup/AllanMyers07-04-05Web.pdf*.

intention of Parliament, there is no tax avoidance; this is equivalent or very similar to the concept of "special tax regime".[71]

In an earlier edition I suggested a distinction between:

(1) a tax saving which arises because the transfer *is made* (ie it would not arise if the transfer had not been made)[72]; and

(2) a tax saving which arises because the transfer is made *in one particular way* (ie it would not arise if the transfer were made in some other way).[73]

This does not work, because classifying a transfer in category (1) or (2) is an arbitrary or evaluative exercise.

## 29.15 Purpose: advisors and agents of transferor

In a case where a transferor is acting by attorney, the purpose of the attorney should, on normal agency principles, be attributed to the transferor.

In the case where:

(1) a company makes a transfer, and

(2) there is no quasi transferor,[74]

usual company law principles must be applied to attribute to the company the purpose of the individuals acting on its behalf.

If a person relies wholly on advisors (eg parents, professionals) and executes documents without more than a vague idea of approving proposals put to them and not properly understood, they have adopted the purpose of their advisors or (which comes to the same thing) the purpose of their advisors is to be attributed to them. In *IRC v Pratt*, Mr. Lucas "did not understand the scheme: it was masterminded by his own professional advisors". Nevertheless, "he, *through his advisors*, was fully acquainted with the fact that what was to follow was a tax avoidance

---

71 See 29.16.2 (Special tax regime).

72 Such as the saving of the settlor's own tax liabilities arising from the transfer; see 29.22.1 (No avoidance of settlor's tax liabilities).

73 Such as the saving of the beneficiaries' tax liabilities on a transfer to foreign trustees (which would not arise on a transfer to UK trustees).

74 In such a case of course there would be no *individual* "transferor" who is within s.720: see 26.3.2 (Transfer procured by individual). The purpose of the company which makes the transfer is still relevant for the application of the motive defence to s.731 ITA.

scheme, he must fall fairly within the section".[75]

For the purposes of New Conditions A and B, s.737 ITA provides:

> (5) In determining the purposes for which the relevant transactions or any of them were effected, the intentions and purposes of any person within subsection (6) are to be taken into account.
> (6) A person is within this subsection if, whether or not for consideration, the person—
> (a) designs or effects, or
> (b) provides advice in relation to,
> the relevant transactions or any of them.

This only restates the law applicable to the Old Conditions A and B; it makes no difference to the position.

The significance of taking tax advice is discussed in *Ebsworth v HMRC* [2009] UKFTT 199 (TC):

> 13. Much was made, particularly in cross-examination, of certain of the notes made by Mr. Ebsworth's tax advisers. For the reasons discussed below I did not find them particularly illuminating in reaching my decision as they were what one would expect from a tax adviser engaged to advise on tax rather than as a commercial or other adviser. Taking tax

75 57 TC 1 at pp.47, 49. The same point is made in *Burns v HMRC* [2009] STC (SCD)165 at [20] and [39]. The same principle applies for the transactions in securities rules; see *Addy v IRC* 51 TC 71 at p.81g. Likewise for the settlement provisions: see 69.25 (Purpose of advisors and agents of settlor). In *Federal Commissioner of Taxation v Consolidated Press Holdings* (2001) 207 CLR 235 the High Court of Australia said it was "both possible and appropriate to attribute the purpose of a professional advisor to the taxpayer". I stress this because the opposite view was taken in *Philippi v IRC* 47 TC 75 where the Court of Appeal said at p.114:

> "Young Mr. Philippi ... said that he never had any idea of tax in his mind when he made that transfer. It was true that it was saving him a great deal in UK tax ... but that had not occurred to him; the only reason why he had made the transfer was because his father and other members of the family had told him that he ought to do so. He appears to have had no idea why they gave him that advice. The Commissioners accepted ... his evidence that what he had done he did on his father's advice."

Assuming that this implausible story is true (though "young Mr Philippi" was aged 23 at the time of the transfer) the Court should have held that he had adopted the (tax avoidance) purpose of his father. The point was not argued and *Philippi* should not be followed on this issue.

> advice does not of itself make tax avoidance one of the main objects of the transactions concerned....
> 62. The fact that Mr. Ebsworth sought tax advice (with Mrs. Ebsworth) does not of itself mean that tax avoidance was a main object of the transactions. [The paragraph then cites Lord Upjohn in *Brebner*].

## 29.16 Avoidance/mitigation distinction

This section sets out the most important judicial and other statements on the avoidance/mitigation distinction.

### 29.16.1 *Intention of Parliament*

*IRC v Willoughby* is now the authoritative general statement on the subject:

> Tax avoidance within the meaning of section 741 ICTA is a course of action designed to conflict with or defeat the evident intention of Parliament.[76]

The Tax Law Review Committee used a similar definition of "avoidance":

> We have regarded tax avoidance as action taken to reduce or defer tax liabilities in ways that Parliament plainly did not intend or could not possibly have intended had the matter been put to it.[77]

HMRC have also adopted this approach:

> Tax avoidance is any action taken to obtain a tax advantage in a way that Parliament did not intend or would not have intended had the matter been put before it. This definition is based upon the report on tax avoidance produced by the Tax Law Review Committee in 1997.[78]

---

76 70 TC 57 at p.117.

77 Tax avoidance: A Report by the Tax Law Review Committee (1997) para 1.13, citing *IRC v Willoughby*.

78 IR152 Trusts: An Introduction (withdrawn on 30/09/04) accessible *webarchive.nationalarchives.gov.uk/20070402085841/hmrc.gov.uk/pdfs/ir152.htm*. HMRC have altered the nuance by deleting the words "plainly" and "possibly" from the TLRC formulation, but that does not alter its essential nature.

There have been some attempts to be more specific.

### 29.16.2 *Special tax regime*

Morritt LJ said:

> The genuine application of the taxpayer's money in the acquisition of a species of property for which Parliament has *determined a special tax regime* does not amount to tax avoidance merely on the ground that the taxpayer might have chosen a different application which would have subjected him to less favourable tax treatment.
> (*IRC v Willoughby* [1995] STC at 183, emphasis added)

This repeats the test of the intention of Parliament (what Parliament has "determined" is, I think, the same as what Parliament has intended). It brings the added refinement of identifying the "special tax regime" which Parliament intended to apply. Professor Willoughby's offshore bonds seem a reasonably clear[79] example of a "species of property for which Parliament had determined a special tax regime".

This category can be generalised into all occasions where Parliament has determined a "special tax regime" (regardless of whether there is any particular "species of property" involved):

> The adoption of a course of action which avoids[80] tax should not fall within section 99 if the legislation, upon its true construction, was intended to give the taxpayer the choice of avoiding it in that way.[81]

The existence of a special relieving regime is neither a necessary nor a sufficient condition of tax mitigation. It is only a factor to consider. There is no relieving provision for bed and breakfast transactions, which are accepted as mitigation.[82] Conversely, as the Special Commissioner rightly said in *Carvill v IRC*:

---

79 Though it might be argued that Parliament had intended the chargeable events regime for normal bonds but not for personal portfolio bonds.

80 Lord Hoffmann has here used "avoid" in the loose etymological sense (to include mitigation). Section 99 provided that an arrangement was void as against the Commissioner for Income Tax if its purpose or effect was "tax avoidance".

81 *O'Neil v IRC* [2001] STC 742.

82 See 29.16.4 (Other indicia of tax avoidance).

> It is not enough to say that if you find a relieving provision then it is the evident intention of Parliament that the taxpayer should be entitled to use it whatever the circumstances. As *Furniss v. Dawson* [1984] AC 474 shows it is quite possible to mis-use a relieving provision. To give an example in the same area as this case, suppose the Appellant had formed Personal Holdings solely to give him a non-resident employer in order to obtain the foreign emoluments deduction. If that company had been funded entirely by the UK companies and had done nothing other than employ the Appellant, it might be the case that the Appellant would have been avoiding tax because he was misusing a relieving provision. That example of course is deliberately different from the facts of this case where Personal Services was funded from non-UK profits with no corporation tax deduction for services which benefited the UK companies. [Counsel for HMRC] went as far as claiming that Parliament's purpose in enacting the foreign emoluments deduction was to encourage, or at least not discourage, people from abroad to work in the UK so that someone in the Appellant's position who had spent all his working life in the UK, could never qualify. While this may have been in Parliament's mind, I cannot accept that the relief was not available to a non-domiciled person working for a non-UK resident employer whose remuneration is borne by a non-resident, however long the non-domiciled person has been resident (I note that the amount of relief was reduced after nine years' residence). ... the taxpayer must do more than point to the existence of a relieving provision; he must be using, rather than misusing, the relieving provision in a way consistent with Parliament's evident intention.[83]

### 29.16.3 *Economic consequences*

Lord Nolan said in *Willoughby*:

> The hallmark of tax avoidance is that the taxpayer reduces his liability to tax without incurring the *economic consequences* that Parliament *intended* to be suffered by any taxpayer qualifying for such reduction in his tax liability. The hallmark of tax mitigation, on the other hand, is that the taxpayer takes advantage of a fiscally attractive option afforded to him by the tax legislation, and genuinely suffers the *economic consequences* that Parliament *intended* to be suffered by

83 [2000] STC (SCD) 1543 at [91]

> those taking advantage of the option.[84]

This repeats the test of the intention of Parliament with the added refinement of identifying "economic consequences". This is based on two Templeman judgments:

> The material distinction in the present case is between tax mitigation and tax avoidance ... Income tax is mitigated by a taxpayer who reduces his income or incurs expenditure in circumstances which reduce his assessable income ...Income tax is avoided ... when the taxpayer reduces his liability to tax without involving him in the loss or expenditure which entitles him to that reduction. The taxpayer engaged in tax avoidance does not reduce his income or suffer a loss or incur expenditure but nevertheless obtains a reduction in his liability to tax as if he had.[85]

The non-recourse loan in *Ensign Tankers* is an example of a transaction without economic consequences and in *Challenge* Lord Templeman gave another example which will be particularly relevant to the practical examples considered below:

> When a taxpayer makes a settlement, he deprives himself of the capital which is a source of income and thereby reduces his income. If the settlement is irrevocable and satisfies certain other conditions the reduction in income reduces the assessable income of the taxpayer. The tax advantage results from the reduction of income.[86]

These are transactions with obvious economic consequences.

Professor Willoughby's investment in his bond had some "economic consequences" as compared to a direct investment in the underlying assets

85 *IRC v Challenge* [1986] STC 548 cited in *Ensign Tankers v Stokes* [1992] STC at p.240. (Lord Millett (whose decision in the High Court was reversed in *Ensign Tankers*) took the opportunity in *Collector of Stamp Revenue v Arrowtown Assets* [2003] HKCFA 46 accessible *www.ird.gov.hk/eng/pdf/facv4_2003.pdf* to cast doubt on the correctness of *Ensign Tankers*, but that does not affect the point here.)

86 *IRC v Challenge* [1986] STC at 554–555.

though one might have thought they were not very substantial.[87]

Incidentally, one wonders what economists would think of the term "economic consequences". One suspects it is what John Kay derides as "DIY economics".[88]

### 29.16.4 *Other indicia of tax avoidance*

It is suggested that "economic consequences" and "special tax regime" are categories of tax saving steps which do accord with the intention of Parliament but are not an exhaustive categorisation of mitigation. They should be regarded as indicia or "badges" of mitigation (like the badges of trade). One can think of others. The Tax Avoidance Schemes (Prescribed Descriptions of Arrangements) Regs (2004, 2006 and amended again in 2009) are interesting series of attempts to identify indicia of tax avoidance for the purposes of disclosure obligations. The indicia include:

(1) confidentiality from other promoters; and
(2) premium fees (typically linked to tax savings).

The OECD also identified secrecy[89] as a common characteristic of

---

87 Lord Nolan identified the following economic consequences:

> "The reality in truth is that the bond holder has a contractual right to the benefits promised by the policy, no more and no less. It is therefore quite wrong to describe the bond holder as having, in the words of the Appellants' printed case 'in substance all the advantages of direct personal ownership without the tax disadvantages'. The significance of this misdescription would become all too apparent if—perish the thought—Royal Life were to become insolvent and unable to meet its obligations to the bond holders."

Before 2008 I described this as unconvincing, as the insolvency of Royal Life seemed so remote a possibility as to be discounted. But the 2008 recession showed that Lord Nolan was right.

88 See Kay, *The Truth About Markets*, (2003). "Economic consequences" is, I suggest, a form *v* substance distinction under a more appealing name. This is a classification and not a criticism. There is nothing necessarily wrong with a form *v* substance distinction if it is recognised for what it is.

89 There are different types of secrecy:

(1) Secrecy (perhaps better described as confidentiality) against other tax advisers (the scheme vendor wishing to keep the profits of a scheme to himself).
(2) Secrecy against HMRC (as the OECD envisage) in order to postpone the time when HMRC are informed for as long as lawfully possible.
(3) Secrecy against HMRC in order to avoid or frustrate any investigation. Of course dishonest breach of a duty of disclosure marks a point where avoidance

avoidance:

> Secrecy may also be a feature of modern avoidance. In some cases tax advisers sell ready-made avoidance devices, one term of the contract of sale being that the taxpayer keeps the facts secret for as long as possible. It is in the interest of the avoiders to keep the administration from learning about new schemes because official and public knowledge may be followed by legislation to counter that kind of avoidance.[90]

Neither secrecy nor premium fees are normally associated with the commonplace transactions discussed below. But if, exceptionally, that was the case then it would be a factor suggesting that the transaction should be characterised as tax avoidance.

An important indicia is familiarity and use. Once a tax avoidance arrangement becomes common, it is almost always stopped by new legislation within a few years. If something commonly done is contrary to the intention of Parliament, it is only to be expected that Parliament will stop it. So that which is commonly done and not stopped is not likely to be contrary to the intention of Parliament. It follows that tax reduction arrangements which have been carried on for a long time are unlikely to constitute tax avoidance.

There are arguments against this view. It also seems strange that the same act might be stigmatised as tax avoidance if challenged by HMRC or Parliament shortly after it is first done; but if such acts become the general practice over a long period of time then the intention of Parliament is decided differently. Nevertheless, it is submitted that the better view is to have close regard to this factor. Judges have a strong intuitive sense that that which everyone does, and has long done, should not be stigmatised with the pejorative term of "avoidance". This, I suggest, is the

---

becomes evasion.

Concealment in category (3) is not primarily characteristic of tax avoidance schemes. It is a problem which may affect all aspects of tax collection (whether or not involving avoidance). The Keith Committee recognised this: Enforcement Powers of Revenue Departments (1983) Cmnd 8822 para 7.3.5. By contrast, lawful concealment in category (1) and (especially) category (2) is an indicia of tax avoidance.

90 OECD Report by Committee of Fiscal Affairs (1980 ) cited in OECD International Tax Avoidance and Evasion (1987), p.17.

true reason why the courts classify bed-and-breakfast transactions and back-to-back loans as mitigation and not tax avoidance.[91] An example in this category is a transfer to an offshore company to avoid IHT, a standard practice since the inception of CTT.

Professor Sandford drew another categorisation of tax savings which offers another indicia of avoidance. He refers to:

(1) Tax savings offered by government to induce a certain kind of behaviour or to fulfill what it feels to be an obligation.
(2) Methods of saving that a government dislikes, but allows to remain for administrative reasons.
(3) Tax savings deriving from technical loopholes unforeseen at the time of drafting.[92]

Category (1) is obviously mitigation and category (3) is obviously avoidance. It is suggested that category (2) should be classified as mitigation rather than avoidance. An example is a transfer of a land-owning company (instead of its land) to reduce the rate of stamp duty from land rates (in short, 4%) to share rates (0.5%). The Government considered imposing stamp duty at land rates on shares in land-owning companies to prevent this, but decided not to proceed with the idea.[93] Such transfers should be considered mitigation rather than avoidance. This category is particularly important to the practical examples considered below. An example is the use of offshore companies to hold UK assets to save IHT (even though the suggestion to impose IHT on such companies did not reach the level of formal discussion).

## 29.17 Failed indicia of tax avoidance

### 29.17.1 *Spirit of the statute*

Other approaches in distinguishing tax avoidance and tax mitigation are to seek to identify "the spirit of the statute" or "misusing" a provision. I take this to mean exactly the same as the "evident intention of Parliament"

---

91 *Ensign Tankers (Leasing) v Stokes* 64 TC 617 at 739. Back-to-back loans have been accepted by HMRC for decades: International Tax Handbook, para 1201.

92 *Tax Avoision* (1979, IEA) p.81.

93 Modernising Stamp Duty (HMRC, Consultative Document 2002) para 2.34. Contrast Australia where the transfer of shares in "land-rich" companies is subject to stamp duty at the rates applicable to land.

properly understood. If that is right, the expression adds nothing but rhetoric and confusion. If it means anything vaguer or more intuitive than that, then the concept deserves the ridicule expressed in *Norglen v Reeds Rains Prudential*.[94] Either way, the expression is best avoided in this context (and indeed in any context).

### 29.17.2 *Artificial transactions and devices*

Another approach is to seek to identify "artificial" transactions. But while tax avoidance frequently involves transactions that can be described as "artificial", this is not always the case. You can have tax avoidance without much (if any) artificiality[95] and, of course, artificiality without tax avoidance. That in itself would not be a fatal objection if we are merely seeking badges of avoidance and not a test which will work every time. However, the unlawyerlike term "artificial" is too vague to be useful even as a badge of tax avoidance. The 1955 Royal Commission on the Taxation of Profits and Income commented on s.44 F(No. 2)A 1915 ("A person shall not, for the purpose of avoiding payment of excess profits duty, enter into any fictitious or artificial transaction ..."):

> A transaction is not well described as "artificial" if it has valid legal consequences, unless some standard can be set up to establish what is "natural" for the same purpose. Such standards are not readily discernible.[96]

The Royal Commission is right. The problem is not that the word "artificial" is meaningless. But it can only be used where there are standards of what is non-artificial (or "natural"). For a striking illustration, see the comment of a MP opposing the proposal in the Married Women's Property Bill 1868, that a married woman should own property, as creating:

---

94 "It is not that the statute has a penumbral spirit which strikes down devices or strategies designed to avoid its terms or exploit its loopholes. There is no need for such spooky jurisprudence." [1999] 2 AC 1 at 14.

95 eg an appointment of non-resident trustees or a transfer to a non-resident company.

96 Cmd. 9474 para 1024.

> an *artificial* and an unnatural equality between men and women.[97]

The word "artificial" is of no use in marginal cases because there are no such standards. It is of no use in determining whether any of the practical examples considered below are tax avoidance.

In fact the word "artificial" is often used to describe a transaction carried out for tax avoidance purposes. A transaction is not categorised as tax avoidance because it is artificial: it is described as artificial because it is tax avoidance. For instance:

> such elaborate arrangements would not have been entered into other than for the purpose of tax avoidance. The arrangements had no genuine commercial purpose. ... The arrangements can, therefore, correctly be described as artificial.[98]

The same objection applies to that particular obstacle to clear thinking, the term "device".[99]

### 29.17.3 *"Genuine"*

The word "genuine" is often used to describe the antithesis to a tax avoidance transaction.[100]

## 29.18 Intention of Parliament v intention of Government

I suggest two broad approaches to "tax avoidance" can usefully be distinguished:

(1) "Tax avoidance" as politicians, civil servants (and perhaps most non-tax lawyers) use the term. This means a tax reduction arrangement which is contrary to the intention or wish of the *Government of the day* (ministers or civil servants, primarily HMRC). For a revealing example of this usage see the National Audit Office Report (Countering VAT Avoidance, 1992):

---

97 Cited in "Victorian Wives and Property" Lee Holford, in *A Widening Sphere* Ed Vicinus, Methuen, 1980. The proposal did not become law until 1882.

98 *R on the application of Huitson v HMRC* [2010] STC 715 at [11].

99 *Norglen v Reeds Rains Prudential* [1999] 2 AC 1 at 13: "I do not think that it promotes clarity of thought to use terms like stratagem or device."

100 For example see 29.25 (UK settlor and UK beneficiaries).

> Avoidance involves complex issues and the position is constantly changing. A policy change in the UK, or a ruling from the European Commission or European Court of Justice, can easily result in today's unacceptable avoidance becoming tomorrow's acceptable tax mitigation, and vice versa.

This is "tax avoidance" for the purposes of politics and administration.[101] Likewise the use of A&M trusts, which between 1974 and 2006 was a paradigm example of mitigation, suddenly became tax avoidance in the political vocabulary of the Government of the day.

(2) "Tax avoidance" in the sense used by tax lawyers. This means a tax reduction arrangement which is contrary to the intention of *Parliament*. The view of the Government or HMRC should not come into it.

This lawyer's concept of "tax avoidance" is better in law because it is consistent with the rule of law: the rule of law requires that tax liabilities are to be determined by settled rules derived from statute and other sources of law, and not by the opinion or decision of a civil servant or politician. This concept is also less volatile. It is right, indeed necessary, for it to be so. If the meaning of "tax avoidance" were "constantly changing" as a result of a mere "policy change in the UK or ruling from the European Commission" then the concept is unworkable for tax.

My distinction was openly accepted in the former ITH:

> **103. Avoidance in international context**
> *Within the Revenue we do not categorise avoidance in quite the narrow way that the Courts have done.* Of course we make a distinction between mitigation and avoidance. However, if a taxpayer takes advantage of the law to get a tax advantage which is not, *in our understanding*, within the spirit of the legislation, we tend to look on that as avoidance.
> (Emphasis added)

The avoidance/mitigation distinction is not self-explanatory, it is not a given. It is a construct defined and determined by reference to values and

101 A purist may say this usage is incorrect or debased; that takes us to the debate as to whether or not there is such a thing as "correct" English usage (where different groups use English differently) and how one determines it if there is. But the purist cannot stop the word being used in this political sense.

attitudes of the tax culture in which we live. The difference between the approaches (1) and (2) is partly: *whose* values and tax culture does one apply, and: *to what materials* does one refer to ascertain these values? The taxation of PETs offers an example. In 1973, C.T. Sandford wrote:

> At present gifts made more than seven years prior to death pay no tax (with the possible exception of capital gains tax). ... Is there evidence that such gifts are contrary to the intention of Parliament? Both circumstantial evidence and logic point to this conclusion. Thus if Parliament were indifferent to the making of gifts prior to death, would there have been successive increases in the gifts *inter vivos* period, which, since 1894, has risen in four successive stages from one to the present seven years?

Sandford considered and dismissed some policy arguments in favour of an estate duty and concluded:

> A reasonable interpretation would be that the gifts *inter vivos* provision was intended to prevent as many gifts as possible from circumventing estate duty.[102]

The repeal of CTT and return to an estate duty under the name of Inheritance Tax shows that lifetime giving since 1986 cannot now be regarded as "tax avoidance". I suggest that lifetime giving was not "avoidance" (in the strict sense) of estate duty even in 1973. If Parliament intended to tax all lifetime gifts it would *not* have increased the lifetime gift period to seven years. It is obvious that such an increase would not stop tax-free lifetime giving. Parliament would certainly not have enacted a taper relief under which gifts made more than four years before death pay a reduced rate! How then did Professor Sandford reach the wrong conclusion? Perhaps because he wished to advocate the imposition of a capital transfer tax. When one wishes to support a tax reform, the temptation to describe the old law as permitting "avoidance" is irresistible (as a tool of advocacy) and also has a certain underlying logic. There is tax avoidance in a political if not a lawyer's sense. If some future Government abolishes PETs, and returns to some form of CTT, it seems safe to predict that those supporting the reform will castigate lifetime

102 IFS, *Hidden Costs of Taxation*, 1973, p. 113.

giving as tax avoidance. One point to note is that a comment from the Government (or any proponent of a tax reform) that existing law permits "avoidance" needs especial scrutiny because it is easy to confuse the intention of Parliament with the intention of Government (or of the proponent).

Understood in this way the term "tax avoidance" is vague but not, I think, hopelessly so, as, for instance, the currently popular phrase "the right amount of tax".

## 29.19 How to ascertain "the evident intention of Parliament"?

This is the problem at the heart of the concept of "tax avoidance". If this term means an action contrary to the intention of Parliament, one must identify that intention. C.T. Sandford addressed the problem:

> But here we meet the major difficulty. ... As individuals we may feel certain that a particular action is contrary to the intention of the law; but the *objective* interpretation of that intention can only be found in the words the law uses.[103]

Sandford was right. The issue is statutory interpretation and the principles of statutory interpretation should be applied. The intention of Parliament should be decided primarily from the words of the statutes. Other material may be relevant on the usual principles of statutory interpretation: White and Green Papers, Royal Commission Reports, Hansard on *Pepper v Hart* principles, textbooks and the occasional learned article.

Lord Nolan refers to the *evident* intention of Parliament. Unless there *is* an "evident" intention, there is no tax avoidance. This qualification does not remove a penumbra of uncertainty, but perhaps it helps to reduce it.

### 29.19.1 *Two levels of intention*

Now, it may be objected that a concept of "tax avoidance" based on what is contrary to "the intention of Parliament" is not coherent. The object of statutory construction is always said to be to find "the intention of

---

103 IFS, *Hidden Costs of Taxation*, 1973, p.114 (emphasis in original).

Parliament".[104] A successful tax avoidance scheme, even as blatant a scheme as *Fitzwilliam*,[105] is a scheme where a Court has concluded that the intention of Parliament was not to impose a tax charge in the circumstances which the tax avoiders had placed themselves. A.A. Shenfield made this point:

> What is meant by the intentions of the law and in what sense does avoidance circumvent them? Courts of law in our system seek to find the intention of a law in the words it uses. In this sense the avoider does not circumvent its intentions but abides by them.[106]

The answer is that the expression "intention of Parliament" is being used in two senses. It is perfectly consistent to say that the *Fitzwilliam* scheme:
(1) escapes IHT (there being no provision to impose an IHT charge); and yet
(2) constitutes the avoidance of IHT.

One is seeking the intention of Parliament at a higher, more generalised level. A statute may fail to impose a tax charge, leaving a gap that even a court cannot fill even by purposive construction, but nevertheless one can conclude that there would have been a tax charge had the point been considered. An example is the notorious case of *Ayrshire Employers Mutual Insurance Association v IRC* 27 TC 331 where the House of Lords held that Parliament had "missed fire".[107] A.A. Shenfield recognised this (perhaps grudgingly):

> What the complainant against avoidance means by the intentions of a law is not what may be deduced from what it says, but what parliament

---

104 See *Cross on Statutory Interpretation*, Oxford University Press (3rd. ed, 1995), chapter 2.

105 67 TC 614.

106 A.A. Shenfield, *The Political Economy of Tax Avoidance*, Institute of Economic Affairs, Occasional Paper 24, 1968, pp.20–21.

107 It might be objected that this case is wrongly decided by modern standards of statutory interpretation: "I venture respectfully to suggest that if, as in this case, the Courts can identify the target of Parliamentary legislation their proper function is to see that it is hit: not merely to record that it has been missed"; "The Courts as Legislators", Presidential Address of Sir Kenneth Diplock, The Holdsworth Club, 1965 accessible *www.kessler.co.uk*. However, in *Cooper v Billingham* 74 TC 139 para 35 the Court of Appeal was prepared to say that the same result could happen today (albeit rarely).

> intended it to say, or what parliament ought in the complainant's opinion to have intended it to say, or what in his opinion it would have been equitable for it to say. Now I do not say that this can never have substance. We all know that, quite apart from outright errors of draftsmanship, there is a distinction between the letter and the spirit of a law. But the spirit of a law is elusive. It is tempting to believe that one has grasped the spirit of a law when in truth one is moved by prejudice or preconception. We ought to be extremely careful ...[108]

## 29.20 Reduction, deferral and unsuccessful avoidance

### 29.20.1 *Reduction*

The motive defence provisions refer to "avoidance" alone but comparable statutory provisions refer to "avoidance *or reduction*" of tax.[109] In this expression it could be that avoidance is used in the strict sense and reduction is referring to mitigation, but that is anachronistic (since the distinction was not known at the time). The word "reduction" was probably added to forestall an argument that the mere reduction of tax was not avoidance as long as some tax remained payable.[110] But nowadays a court would not be so literal and there is no doubt that (for the purposes of the motive defence) a reduction of tax from £10 to £6 amounts to the avoidance of £4.

### 29.20.2 *Deferral*

Arrangements to defer tax may constitute "avoidance".[111] Indeed the classic avoidance case *Furniss v Dawson* might be characterised as involving mere "deferral" of tax. However, the fact that tax is merely deferred, and will or may later be paid, may be a factor which supports the conclusion that the arrangement is to be characterised as mitigation and not avoidance.

---

108 *Ibid*, note 94.

109 The earliest of these was s.35 FA 1941 (Excess Profits Tax); the formula is found in modern provisions: s.773(2)(b) ITA and as part of the more lengthy formula in s.732 CTA 2010.

110 Contrast the statutory expression "mitigate or remit" a penalty.

111 The Special Commissioner so held in *IRC v Willoughby* 70 TC at p.84. There was wisely no appeal on this point.

### 29.20.3 *Unsuccessful avoidance*

The OECD correctly states:

> Successful tax reduction is neither a sufficient nor a necessary test of tax avoidance. It is not sufficient because this would cover acceptable tax planning [ie mitigation] and it is not necessary because an avoidance scheme designed to reduce tax may not succeed.[112]

## 29.21 Practical examples: introduction

We can test these general principles by trying to apply them in some practical cases. There is no test like the test of practice. I first consider transfers to six types of non-resident trust (here called "trust transfers"):

(1) Trusts where settlor is excluded:[113]
- (a) Foreign settlor: UK and foreign beneficiaries;
- (b) Foreign settlor: only UK beneficiaries;
- (c) UK settlor: UK beneficiaries;
- (d) UK settlor: foreign beneficiaries.

("Foreign" here refers to someone not resident or domiciled in the UK and not expecting to become resident or domiciled.)

(2) Trusts where the settlor is a beneficiary:
- (a) Settlor foreign domiciled but UK resident;
- (b) Settlor foreign domiciled and non-UK resident.

This by no means covers all the possible circumstances of trust transfers, but one can extrapolate from these to others which may arise.

It may be helpful to summarise the questions that arise on a trust transfer. One must ask: Is the purpose to avoid (1) income tax? (2) CGT? (3) inheritance tax? It is obviously necessary to consider each tax separately; I will consider CGT and IT first, and then IHT. Thus what seemed like a single issue (is there tax avoidance?) raises 3 sub-issues; that is an inevitable consequence of the rule that taxation includes any tax.[114]

However, a tax charge does not arise in isolation, but is charged in

---

112 OECD Report by Committee of Fiscal Affairs (1980) cited in OECD's International Tax Avoidance and Evasion (1987), p.17.

113 It is assumed that the spouse of the settlor is also excluded.

114 See 29.9 (Meaning of "taxation" in the motive defence).

different ways on the settlor, trustees[115] or beneficiaries. It is best to consider these three classes of taxpayer separately, though the issues partly overlap. So in the case of a trust transfer one must ask whether the purpose is avoidance of IT/CGT/IHT liabilities of (1) the settlor; (2) the trustees; (3) the beneficiaries. Thus what seemed like three issues raises nine sub-issues. Further, post-*Willoughby* one must consider whether there is a factual subjective purpose to reduce any of these tax liabilities and then whether the purpose (if present) is to be classified as avoidance or mitigation. So what seemed like a single issue (is the purpose of a trust transfer to avoid taxation?) actually turns out to raise 18 sub-issues (is the purpose to save IT/CGT/IHT by settlor/trustees/beneficiaries and, if so, is it mitigation or avoidance?).

## 29.22 Trust transfers where settlor excluded

Transfers to a trust from which the settlor is excluded have two common features which are relevant for the motive defence:

### 29.22.1 *No avoidance of settlor's tax liabilities*

The trust transfer will usually bring a tax advantage to the settlor (compared to the position if there is no transfer). As far as the settlor's tax liabilities are concerned, since she is excluded from the trust, any tax advantage she might obtain in this way is mitigation not avoidance. It is not in principle the intention of Parliament that she should pay tax in respect of income/gains/capital from which she is excluded.[116] However, HMRC rightly say that the purpose of a trust transfer may be to avoid tax liabilities of the trustees and beneficiaries and here closer investigation is needed.

### 29.22.2 *Non-tax reason for creating trust*

There will usually be non-tax reasons for the settlor to make a trust, rather

115 Although trustees are in economic reality paying tax on behalf of beneficiaries, the rules for taxation of trustees are distinct from the rules for taxation of beneficiaries so it is best to consider trustees separately.

116 See Lord Templeman's dictum in 29.16.3 (Economic consequences). The exceptional case of s.86 TCGA is discussed below.

than making absolute gifts. The advantages are asset protection in the broadest sense: protecting the trust fund from profligate beneficiaries, divorcing spouses, and sometimes forced heirship or foreign exchange control. These are good reasons but not commercial ones. So a trust transfer must pass Condition A, not Condition B, but it does so in the context of a transaction which is not usually wholly tax driven. In the absence of tax considerations the usual form would normally be (and in practice generally is) a discretionary trust.

## 29.23 Foreign settlor; UK and non-UK beneficiaries

This section considers a transfer to a trust whose beneficiaries include (but are not primarily) UK resident and domiciled beneficiaries, and exclude the settlor.

### 29.23.1 *Avoidance of trustees' tax*

In deciding whether the trust transfer yields a tax advantage for the trustees, one obviously cannot compare the actual position (appointment of foreign trustees) with the position if the transfer had not taken place. One must compare it with something else the settlor might have done (which in this context must be the appointment of UK trustees). That seems a reasonable comparable; the settlor has a choice: to transfer to trustees in the UK or elsewhere and they must do one or the other. In the absence of UK tax, there will often be no reason to prefer the one to the other.

The choice of UK trustees (rather than foreign trustees) would not in principle yield any greater CGT before 2007/08.[117] There is no question of CGT avoidance for dispositions before the FA 2006.

The position is slightly more complicated for dispositions after 2006. The choice of exclusively UK trustees of a discretionary trust will yield CGT (and income tax on foreign source income) not due from non-resident or mixed resident trustees.[118] However, if one trustee (even a

117 As long as the UK trustees were professionals: see the 4th edition of this book at 5.8 (Professional trustees treated as non-resident).

118 See 4.4 (Trustee residence for income tax and CGT). The IT position for trustees before 1989 was thought by HMRC to be the same, and was held in *Dawson v IRC* 62 TC 301 to be only slightly (and for present purposes not materially) different.

minority trustee) is resident outside the UK, the trustees are not (in short) subject to CGT or income tax on foreign income. Does that mean that the choice of non-resident trustees is income tax avoidance? It is submitted that the answer is plainly no. Section 475 ITA assists in the appointment of non-resident trustees, suggesting that this cannot be contrary to the intention of Parliament. To hold otherwise would be to suggest that the settlor has a duty to maximise UK income tax and CGT liability. Any tax saving here must be mitigation. It is relevant to note that the reason for the abolition of the rule that professional trustees should be regarded as non-resident was not to prevent avoidance: it was to satisfy a requirement of EU law.[119]

### 29.23.2 *Avoidance of beneficiaries' income tax liabilities*

In deciding whether the trust transfer yields an income tax advantage for the beneficiaries, one obviously cannot compare the actual position (transfer to trust) with the position if the transfer had not taken place. One must compare it with something else the settlor might have done.

The actual position of UK resident and domiciled beneficiaries is that they will pay tax on income distributions from the trust, but no tax on accumulated income and (in the absence of s.731 ITA) no income tax on capital payments. This is a clear income tax advantage if the transfer to a discretionary trust is compared with a transfer to the beneficiaries or to a transfer to an interest in possession trust.

Is the purpose of the transferor to obtain this advantage? Normally their purpose will be to obtain non-tax advantages, and even foresight of the tax advantage may not constitute purpose, but it depends on the facts.[120]

The actual position of UK resident foreign domiciled beneficiaries is that they will pay tax on remitted income distributions from the trust, and (in the absence of s.731 ITA) no income tax on capital payments even if remitted. This could be an income tax advantage if the transfer to a discretionary trust is compared with a transfer to the beneficiaries or to a transfer to an interest in possession trust, but the advantage may be small or nil.

Is the purpose of the transferor to obtain this advantage? Normally their

119 HMRC announcement 23 March 2006.

120 See 29.13 (Foresight and purpose).

purpose will be to obtain non-tax advantages, and even foresight of this somewhat attenuated tax advantage will not constitute purpose.

### 29.23.3 *If there is a tax saving purpose is it avoidance or mitigation?*

Returning to the practical example of a transfer to a trust by a foreign settlor, with both UK and foreign beneficiaries. Is the purpose (if it exists) of saving income tax by the beneficiaries to be classified as avoidance? The difference between being a beneficiary of a discretionary trust and owning capital outright is normally[121] a difference with "economic consequences". On an economic consequences test this should be mitigation.

There is another indication that the intention of Parliament is not infringed. If s.731 ITA applies, in this class of case, the result is unfair and sometimes extremely unfair. The UK beneficiaries will pay income tax on capital payments on an amount by reference to relevant income which may greatly exceed their "share" of the income of the trust computed on any just and reasonable basis.

If there is avoidance of UK tax there is likely to be avoidance of tax in every other jurisdiction where beneficiaries are resident;[122] it is impossible for the settlor to make a discretionary trust anywhere without tax avoidance elsewhere – which, if not absurd, is somewhat startling.

### 29.23.4 *Avoidance of beneficiaries' CGT liabilities*

The CGT position is complicated by tax reforms. Before 1998, capital payments from the trust would be free of tax to the beneficiaries (because the usual charge did not apply to a trust with a foreign domiciled settlor). This was expressly set out in s.87 TCGA.[123] One must take that as a special tax regime intended by Parliament. Pre-1998 transfers cannot be regarded as involving CGT avoidance by the beneficiaries.

After 1998, capital payments to UK domiciled beneficiaries give rise to CGT by reference to trust gains regardless of the domicile of the settlor and in 2008 the charge was extended further. This could be taken to

121 It would be different if the trustees (perhaps guided by a strongly worded letter of wishes) closely follow the wishes of a beneficiary.

122 Assuming they are in a jurisdiction with a tax system comparable to the UK.

123 And in the predecessor legislation: s.17 Capital Gains Tax Act 1979.

suggest that post-1998 transfers constitute CGT avoidance by the beneficiaries. But the points made in relation to IT avoidance/mitigation apply here too. For dispositions before 2006, s.69(2) TCGA is even stronger than it is now. So the better view is that any CGT saving is mitigation.

## 29.24 Foreign settlor; only UK beneficiaries

The next case to consider is a transfer to a trust whose beneficiaries are all UK resident and domiciled. A trust transfer primarily motivated by non-tax advantages (asset protection) should not normally be regarded as having the purpose of tax reduction.

In an unusual case, however, that might be one of the settlor's purposes. Indeed, it could be their primary purpose. It can happen be that the settlor creates a trust primarily for a UK beneficiary, and the only reason they do this is tax considerations. Asset protection does not concern every settlor. They would make an absolute gift to a UK beneficiary but for UK tax reasons only they make a transfer to a trust for their benefit. The transfer is solely UK tax driven.[124]

In these (factually unusual) circumstances the question arises whether the tax saving purpose is avoidance or mitigation. Section 69(2) TCGA and s.475 ITA show the intention of Parliament to be that the choice of foreign trustees by a non-resident and non-domiciled settlor should not be regarded as avoidance of trustees' IT or CGT. These sections apply regardless of the residence and domicile of the beneficiaries. The inference should probably be carried across that there is likewise mitigation not avoidance of beneficiaries' IT and CGT liabilities; but the point is arguable.

## 29.25 UK settlor and UK beneficiaries

Contrast now a settlor who is UK resident and domiciled, making provision for UK beneficiaries. Assume the settlor is not to be a beneficiary. Again, they will often prefer a trust to outright gifts, for non-

124 This might be made evidentially clear by contemporary correspondence, or if, perhaps, the settlor's gift to a UK child is settled and their gift to other children outside the UK is absolute; but such details only go to identify the settlor's purpose, and are not otherwise significant for tax.

tax reasons, and the choice is UK or non-resident trustees. If they choose the latter, their purpose (or one of their purposes) is likely to be to reduce CGT or Income Tax and this purpose will be tax avoidance rather than mitigation. This is not an invitation to partake in a statutory regime; we all know that this income tax saving is what s.731 is intended to stop.

The distinction is therefore between:

(1) foreign settlors (whose offshore trusts are not in principle regarded as tax avoidance), and
(2) UK settlors (whose offshore trusts are in principle regarded as tax avoidance).

This distinction is clearly drawn in the 1974 Green Paper on Wealth Tax:

> **Overseas trusts**
> 22. Trusts where the trustees are not resident in the UK and the administration of the trust is ordinarily carried on outside this country fall into two broad categories.
> **"Genuine" overseas trusts**
> 23. The first category includes all those trusts set up with non-resident trustees by settlors who have little or no connection with this country. *In such a case even if there are one or more beneficiaries or discretionary objects resident in this country there are no grounds on which it would be right to bring the trustees or the whole of the trust assets within the charge to the tax.* But a UK resident individual with an interest in such a trust, whether in possession or reversion, has a realisable asset which should be included in his personal wealth at its actuarial value. If such a trust is discretionary however its objects generally have no interests in the trust assets on which they should be assessed.
> **"Artificial" overseas trusts**
> 24. The second category includes those trusts where a *UK settlor* arranges for the trustees to be non-resident or where the administration of an existing resident trust passes overseas. The legal ownership of the settled property is thus vested in persons outside UK jurisdiction and *the arrangement is very frequently prompted by tax avoidance considerations*. Accordingly, where settled funds are provided directly or indirectly by a person who at the time the funds were provided was domiciled or ordinarily resident in the UK, the trustees will be liable to

the same extent as if the trust had been resident.[125]

While the Paper was addressing the issue of what the Wealth Tax should cover, this passage illustrates very well the general understanding of the concept of tax avoidance in the context of offshore trusts.

Note the terminology of genuine *v.* artificial to describe tax avoidance. The author of the Green Paper had sufficient intellectual rigour to recognise the difficulties in these words and put them in quotation marks accordingly.[126] If only this were done more often!

## 29.26 UK settlor; foreign beneficiaries

Now consider a UK settlor making a trust (from which they are excluded) for foreign beneficiaries.

What about liabilities of the beneficiaries? Since they are not UK resident, they are largely outside the scope of IT and CGT, so there is no avoidance.

In deciding whether the trust transfer yields a tax advantage for the trustees, one can again compare the actual position (appointment of foreign trustees) with the appointment of UK trustees. UK trustees would pay IT if the trust were discretionary but not (for all practical purposes) if it were interest in possession. Any IT saving must be mitigation. CGT is different: UK trustees will pay the tax, and foreign trustees will not. However, trustees are in economic reality paying tax on behalf of the beneficiaries. Where the beneficiaries are not within the scope of the tax then any tax saving by the trustees must be mitigation. This is consistent with the rule that the anti-avoidance provisions of s.87 TCGA and s.731 ITA will not in principle apply on payments to beneficiaries outside the scope of CGT and IT.

## 29.27 UK settlor; UK and foreign beneficiaries

Where there is a mixture of UK and non-UK beneficiaries I suggest the starting point is that one would expect the settlor to make their trust here, so a transfer to foreign trustees would be regarded as avoidance. (In such

125 Wealth Tax, Cmnd 5704, 1974 paras 22–4 (emphasis added). The fact that the Wealth Tax proposal was abandoned does not affect the relevance of the passage.

126 See 29.17 (Failed indicia of tax avoidance).

a case there is something to be said in income tax terms for the creation of two separate trusts for two separate classes of beneficiaries, the residents and the non-residents, so one at least qualifies for the motive defence. But CGT considerations point the other way.)

## 29.28 Transfer to trust; settlor a beneficiary

### 29.28.1 *Remittance basis taxpayer settlor-beneficiary*

The next case concerns remittance basis taxpayer settlor who transfers assets to a non-resident trust under which they are the principal beneficiary.

Income tax is not avoided since trust income continues to be taxed on a remittance basis under s.624 ITTOIA. There may be an IT reduction after the death or exclusion of the settlor but it will not (normally) be the purpose (or even one of the purposes) of the settlor to obtain that (normally very long term) advantage, quite apart from the question of whether the advantage is avoidance or mitigation.

There is in principle a CGT advantage that the settlor moves from the remittance basis to the s.87 capital payment remittance basis. To obtain that advantage may well one of the purposes of the trust. If so, is it CGT "avoidance"? It must have been a decision of Parliament *not* to apply s.86 TCGA to a foreign domiciled settlor and the decision was confirmed in 2008 (where a proposal to extend s.86 to foreign domiciled settlors was contained in FD Draft Clauses (January 2008) and dropped in the Finance Bill). It is suggested that there is no CGT "avoidance". This is a "statutory invitation" in plain terms.

### 29.28.2 *Non-resident non-domiciled settlor-beneficiary*

Where the settlor is the principal beneficiary and neither domiciled nor resident then UK tax saving is not likely to be a purpose during the life of the settlor, because no saving in fact arises. After the death of the settlor there may be a saving if there are UK beneficiaries. The position then becomes like that of a trust where the settlor is excluded, and the discussion above is relevant.

## 29.29 Appointing non-UK trustees of UK trust: avoiding IT or CGT?

Similar principles apply. One case is where the settlor and beneficiaries are wholly UK based, the settlor has created a UK trust, and foreign trustees are later appointed. The inference that the appointment has the purpose of saving UK income tax or CGT is very strong and this purpose is avoidance not mitigation.

At the other end of the scale is the case where the settlor and the principal beneficiaries have gone to live abroad permanently and local trustees are appointed. One reason for the export of the trust is that the settlor may (or may continue to be) a trustee. If so, the appointment may have no tax saving purpose at all. But if (as is likely) it has a tax saving purpose, that is mitigation and not avoidance.

What if all the beneficiaries are abroad but the settlor remains in the UK? The same tax savings could in principle be had by winding up the trust with outright appointment to beneficiaries, and that transfer is not likely to constitute avoidance. So the appointment of foreign trustees should not be avoidance.

What if the settlor goes abroad and the beneficiaries remain in the UK? It is tentatively suggested that a tax saving purpose (if it exists) is likely to be avoidance.

A more borderline case is where the settlor and beneficiaries go to live abroad for a medium term period (say five years[127]). Non-UK resident trustees are appointed with the intention that the trust will continue to be non-resident even after the settlor returns to the UK. This is probably to be classified as tax avoidance, albeit long-term tax avoidance, but views may differ, especially if the time spent abroad is longer than five years.

## 29.30 When is a trust transfer made for the purpose of avoiding IHT?[128]

### 29.30.1 *Change of situs without alteration of ownership*

The transfer of money by a foreign domiciled person from a UK bank to

127 There is no particular significance in selecting five years as illustrative of a medium term period, but it is consistent with the CGT temporary non-residence rules; see 8.1 (Temporary non-residence).

128 For transfers before 27 March 1974 it would be necessary to consider Estate Duty.

a foreign bank in order to make the money excluded property, is an act of tax mitigation, not avoidance. See *Beneficiary v IRC* [1999] STC (SCD) 134 at p.145. The same would apply if the transfer is made by trustees of a trust with a non-domiciled settlor. The same would apply to a sale of UK situate property and re-investment in non-UK situate property.

### 29.30.2 *Transfer to trustees*

The residence of trustees is almost wholly irrelevant for IHT.

A gift by a settlor to a trust from which they are excluded is mitigation of their own IHT[129] but it is also necessary to consider the IHT savings of trustees and beneficiaries.

If a foreign domiciled settlor gives, and the trustees retain, non-UK property, any IHT saving purpose which may exist is mitigation. This is so even if the beneficiaries are UK domiciled (so an absolute gift to them would have brought the trust property into the scope of IHT). Section 48 IHTA provides that foreign property in a trust made by a foreign domiciliary is excluded property. Any IHT advantage conferred by the trust, so far from being contrary to the evident intention of Parliament, would appear to be in accordance with Parliament's evident intention. The argument to the contrary amounts to an argument that the settlor has a duty to maximise IHT liabilities.[130]

A gift by a settlor to a trust from which they are not excluded, in circumstances where the settlor is anticipating becoming UK domiciled, is borderline. Section 48 IHTA makes it plain that such a gift carries substantial IHT advantages. But is it "contrary to the evident intention of Parliament" to enjoy these advantages? The author tentatively suggests that such a gift should be regarded as IHT mitigation not avoidance. This is consistent with the rule that the GWR provision does not apply here.[131]

---

129 See 29.22.1 (No avoidance of settlor's tax liabilities).

130 The avoidance/mitigation issue did not arise in connection with the gift to a trust in *Beneficiary v IRC*, because reducing tax was not a purpose in the mind of the transferor/settlor, even though it was a consideration for his advisers, and even though the principal beneficiary was UK resident at the time; see [1999] STC (SCD) 134 at [145h] - [146].

131 See 54.12 (GWR death charge: excluded property rules for settled property).

## 29.31 Transfer of assets from non-resident trust to non-resident trust subsidiary

By "**trust subsidiary**" I mean a company wholly owned by trustees, which holds beneficially what might in substance be regarded as trust assets.

### 29.31.1 *Is the transfer a commercial transaction?*

Transfers to trust subsidiaries arise in a wide variety of circumstances and may be made for the purpose of obtaining non-tax advantages:

(1) Advantages of trust administration:
   (a) Segregation of trust funds of trustee (or occasionally combining trust funds) for ease of management.
   (b) Avoiding conflict of law and other problems of trustees holding assets (especially land) in foreign jurisdictions. (The problem is most serious in civil law jurisdictions which may not understand or even recognise trusts, but problems could also arise in common law jurisdictions.)

(2) In the case of land (or other onerous property), avoiding personal liabilities of trustees arising from direct ownership.

(3) In the case of interest in possession trusts, to allow retention of income (to avoid distributing income to life tenant).

It is a question of fact in each case whether the purpose of a transfer to a company is to obtain these non-tax advantages and a question of law whether they should be regarded as commercial.

Purpose (1) is commercial: it arises in the ordinary course of managing investments. A transfer from trustees to a company is more often than not a commercial transaction, and for the motive defence one applies Condition B and not Condition A. Purpose (2) is rarer but certainly commercial when it occurs. Purpose (3) is not commercial. Where it is the policy of trustees that all its trust funds should be held in separate wholly owned trust subsidiaries,[132] the conclusion that the transfer has a

132 The Edwards report suggests that 80–90% of Jersey trusts hold their assets through underlying companies: Review of Financial Regulation in the Crown Dependencies Cm 4109 (1998) para 12.5.2 accessible *www.archive.official-documents.co.uk/document/cm41/4109/4109-i.htm*. Trusts managed in Switzerland generally use underlying companies for Swiss law

commercial purpose seems factually likely. But if one is looking at New Condition B, the additional statutory requirements must be met, in particular, the trustees must carry on a business.

29.31.2 *Is the transfer for tax avoidance?*

Transfer of UK assets[133] from trustees to a trust subsidiary may offer significant tax advantages. It is a question of fact whether any of these advantages are purposes of the transfer and a question of law whether the purpose is avoidance or mitigation.

I begin with a case where s.624 ITTOIA does not apply. There are three possible tax advantages

*(1) Obtaining IHT excluded property status (where the settlor was not domiciled in the UK).*

This should normally[134] be regarded as mitigation. There is of course no economic difference between owning a UK asset directly (non-excluded property) and holding it via a company (effectively converting it into excluded property). But the principle that companies are not transparent for tax purposes is very deep in the tax system. Planning of this kind has been possible since the repeal of the Mortmain Acts (which were enacted to prevent tax avoidance by vesting land in companies) and cannot be regarded as contrary to the intention of Parliament.

The transfer to a company also has a likely CGT disadvantage,[135] and a possible income tax disadvantage,[136] so any tax reduction may be regarded as part of a "package deal", with advantages and disadvantages. This does not savour of tax "avoidance".

The contrary view is taken in *Burns v HMRC* [2009] STC (SCD) 165 at [59]:

> I would certainly accept that if a non-domiciled person arranged to hold foreign situs, rather than UK situs, assets, and then died, no tax

---

reasons.

133 Similar considerations apply to a transfer of foreign assets with a view to realisation and re-investment in UK assets.

134 An exceptional case would be if the property was put in the company shortly before a ten year anniversary and taken out shortly thereafter.

135 See 45.35.4 (Should trustees hold assets through a trust subsidiary?)

136 Loss of tax credits and double taxation relief; sometimes, possible charge under income tax benefit in kind rules.

> advantage would have been sought. Thus if a UK house was sold, and a French house purchased, that would simply be a case of genuinely changing the assets held, and were some [TAA] point to hinge on whether the change was effected for the purpose of avoiding UK tax, the answer would be that it was not. And if UK bank deposits were withdrawn and deposits placed elsewhere, then again, that would be a pure investment switch, and not a step the purpose of which would involve the purpose of achieving a UK tax advantage. Indirectly retaining a UK real property, and simply achieving the technical change in status by putting the property into a non-UK resident company in a case where one of the purposes is to achieve the potential Inheritance Tax advantage, implicit by effecting those steps, does seem to me to cross the border between mitigation and tax avoidance. This is because it has involved no real change of investment, as in the two previous examples, but the retention of the UK property, accompanied by a step to change the normal tax consequences of that. Thus where it is shown that the CTT or IHT considerations were one of the purposes of the transfer, or other where the appellants have not displaced the reasonable presumption that UK advantages were one of the purposes, I conclude that those purposes involve tax avoidance and not merely mitigation.

This is obiter (for on the facts of the case there was clearly income tax avoidance). The relevant cases and materials are not discussed. The Commissioner has confused tax avoidance with tax advantage. At some time the point will need to be judicially considered in more depth.

*(2) Escaping additional rate income tax (on UK source income of discretionary trust)*

The striking thing about this tax is that there is generally[137] no effective method for HMRC to collect it and in practice no one expects it to be paid in cases where all the beneficiaries are outside the UK.[138] Perhaps this supports a conclusion of mitigation.

*(3) Escaping higher rate income tax (on income of interest in possession trust).*

I suggest that a distinction should be drawn between UK resident life tenants (tax advantage is avoidance) and non-residents (tax advantage is mitigation). In many circumstances, however, non-residents do not pay

---

137 Except in the case of UK land.

138 It is considered that non-payment is not in principle dishonest, and so not a fraud on HMRC, though this conclusion depends to some extent on the facts of the case.

income tax at the higher rate.
In *Burns v HMRC* [2009] STC (SCD) 165 at [58] the Special Commissioner said:

> I deal first with the feature of trying to cap the level of charge to income tax at the basic rate. This advantage seems to me to be in the category of tax avoidance. ... it seems to me to be difficult to argue that a transaction designed to reduce income tax by the mechanism of the transfer of UK property to a non-resident person (virtually a paraphrase of the opening wording of section 739) is mere mitigation.

### 29.31.3 *Transfer by trust to which s.624 applies*

If the purpose of the transfer to a trust subsidiary is to avoid a charge under s.624 ITTOIA, this is considered to be avoidance and not mitigation.

### 29.31.4 *Transfer of non-UK assets to trust subsidiaries*

When non-UK assets are transferred to a trust subsidiary, the UK tax advantage may be less or nil or there may only be tax disadvantages in the loss of double taxation reliefs. In the absence of an intention to re-invest in the UK the purpose cannot as a matter of fact be a tax reduction purpose.

## 29.32 Non-resident foreign domiciled individual transfers UK property to offshore company

A foreign domiciled non-UK resident individual who transfers UK assets to a non-resident foreign incorporated company may also enjoy comparable tax advantages:
(1) Obtaining IHT excluded property status.
(2) Avoiding higher rate income tax.
Such transfers also give significant advantages which have nothing to do with tax. In particular, in the case of UK land, avoiding personal liabilities arising from direct ownership. In such cases, the motive defence may well apply. But if a purpose of the transfer is to reduce IHT or IT, it is considered that this is mitigation not avoidance; the arguments are the same as above.

## 29.33 Transfer by UK resident foreign domiciled individual to offshore company

Suppose a foreign domiciled UK resident individual transfers UK assets to a non-resident foreign incorporated company.

If a purpose was to reduce IHT, the transfer is considered to be IHT mitigation. A transfer to reduce income tax (because the company pays only basic rate income tax) is considered to be IT avoidance.

## 29.34 Transfer to UK resident foreign incorporated company

There are many reasons why assets may be transferred to UK resident foreign incorporated companies.

A foreign domiciliary starting a new UK resident company for trade or investment would prefer a non-UK incorporated company so as to own non-UK situate property. This is a commercial transaction and clearly satisfies Old Condition B. New Condition B is (almost) a dead letter,[139] but in an appropriate case there is a reasonable case that New Condition A (or A and B) is satisfied.

A foreign domiciliary (F) wishing to sell a UK unincorporated business may enter into an arrangement under which:

(1) F gives the business to a UK resident foreign incorporated company.
(2) F sells the company (not UK situate property).

If the purpose is to avoid CGT (by utilising s.162 TCGA relief) then the claim for the motive defence is weak.

## 29.35 Transfer from one trust to another trust

There are many reasons why funds may be transferred between trusts. It is impossible to generalise as to whether such transfers are made for tax avoidance: one must look at the reason for the transfer.

One reason such transfers are made is where a single trust holds several sub-funds for different branches of a family. The transfer avoids the unfairness which arises under a single trust, that gains accruing to one share are taxable on a beneficiary of another share who receives a capital payment. It is considered that a transfer for this reason does not have the

139 See 29.12.3 (New Condition B).

motive of CGT “avoidance”.

## 29.36 Time to ascertain purpose of transferor

What matters is the purpose of the transferor at the time of the transfer.[140] It is quite common that a transfer is made by a foreign settlor for foreign beneficiaries, unimpeachably for non-UK tax reasons, and later some of the beneficiaries move to the UK. Then they will find the trust qualifies for the motive defence and is a useful vehicle for income tax purposes. There are three possibilities:

(1) The change of purpose may be accompanied by a new transfer of assets carried out for a tax avoidance purpose. In that case the transfer of asset provisions may apply in relation to the new transfer.
(2) There may be no further transfer of assets but there may be associated operations carried out for a tax avoidance purpose. The question whether this brings the transfer of asset rules into operation is discussed in para 29.38 (Associated operations: introduction).
(3) There may be a change of purpose without any new transfer or associated operation. In that case the motive defence remains available and the transfer of assets provisions do not bite at all.

## 29.37 Time to ascertain intention of Parliament and changes in law

The concept of tax avoidance as an act contrary to the intention of Parliament raises the question of *at what time* Parliament’s intention is to be ascertained. The intention of Parliament may change and the same act could be tax avoidance at one time but not at another. Of course, it needs an Act of Parliament to make this change. For the purpose of the motive defence, tax avoidance must mean an act contrary to the intention of Parliament at the time the transfer took place. This is consistent with the rule that one examines the purpose of the transferor at the time of the transfer.[141] Otherwise changes in the intention of Parliament would often have considerable retrospective effect: a transfer which was not tax avoidance when it was made would retrospectively be treated as made for a tax avoidance motive (or indeed vice versa).

---

140 The point was made in *Herdman v IRC* 45 TC 394; but it is plain from the terms of the statute.

141 See 29.36 (Time to ascertain purpose of transferor).

Of course this rule may also favour HMRC. A transfer to avoid (say) Selective Employment Tax would fail the motive defence and that would continue to be the case even after the abolition of that tax.

A distribution or disposal made in 2007/08 to avoid the new rules in the FA 2008 from 2008/09 is not tax avoidance because (1) it is not contrary to the intention of parliament to avoid *future* tax laws: the intention of Parliament is to be determined at the date of the transfer;[142] (2) Parliament clearly anticipated and accepted that such disposals and appointments would be made and took no steps to counteract them.

### 29.37.1 *Transfer by non-resident before 1996*

Parliament decided in 1936 not to apply s.720 ITA to transfers made by non-resident transferors, and that was (after some vacillation) held to be the law.[143] In principle, a transfer of assets by a non-resident between 1936 and 1996 could not be said to be contrary to the intention of Parliament, and so it could not constitute income tax avoidance.[144] However, the legislation which reversed *Willoughby* and brought transfers by non-residents into the scope of the transfer of asset provisions applies to pre-1996 transfers.[145] The explanation is that a transfer by a non-resident before 1996 does not normally involve income tax avoidance. However, there are special circumstances where a transfer by a non-resident may be for income tax avoidance[146] and, of course, a pre-1996

142 See 29.37 (Time to ascertain intention of Parliament and changes in law).

143 See 26.5.2 (Transferor not ordinarily resident when transfer made). For convenience, non-resident is used to mean non-ordinarily resident.

144 Contrast pre-1936 transfers by UK resident individuals; these were caught by the new 1936 legislation, but Parliament had never made a decision that such transfers should not be taxed so it would be correct to regard such transfers as made for tax avoidance purposes.

145 s.81 FA 1997. There is an exemption only for income arising before 1996.

146 Examples of special cases are:
(1) a transfer in anticipation of becoming UK resident or
(2) a transfer made just before the enactment of the new legislation (when the change of the law was predictable).
Another view could be that such transfers constitute tax avoidance from after the 1952 and 1970 consolidations, which Parliament enacted on the basis of the *Congreve* and *Herdman* decisions (later reversed) that transfers by non-residents were caught. But that offends common sense and the principle that a consolidation does not alter the law.

transfer made for CGT or IHT avoidance would also be caught.

### 29.37.2 *Transfer before 1981; transferor having no power to enjoy*

Similar considerations apply to a transfer before 1981 to which s.720 ITA did not apply (because the transferor had no power to enjoy the income of the asset transferred). Parliament decided in 1936 not to apply the transfer of asset provisions to transfers unless the transferor had power to enjoy, and that was (again after some vacillation) held to be the law.[147] So such a transfer should not constitute income tax avoidance. In 1981 Parliament brought in s.731 ITA which applied to pre-1981 transfers.[148] The better view is that a transfer outside s.720 made before the 1981 reforms is not to be regarded as income tax avoidance in the absence of special circumstances. A pre-1981 transfer may be within s.731 where it was made for IT avoidance (one example would be where the settlor did have power to enjoy but later died) or where it was made for CGT or IHT avoidance purposes.

## 29.38 Associated operations: introduction

The motive defence is relatively straightforward when there is a single transfer. It becomes more complicated if there are also associated operations to consider. It is necessary to consider separately the cases where:

(1) The transfer and associated operations are all made before 5 December 2005 (see the next section).
(2) The transfer and the associated operations are all after 4 December 2005.[149]
(3) The transfer is before 5 December 2005 and the operation is on or after that date.[150]

## 29.39 Associated operations and motive defence before 5 December 2005

Section 739 ITA provides:

147 See 24.3 (Meaning(s) of "settlor-interested").

148 s.45 FA 1981; there is an exception for income arising before 1981.

149 See 29.40 (Transfer and associated operations both after 4 December 2005)

150 See 29.44 (Transfer before and operation after 5 December 2005).

> (1) This section applies if all the relevant transactions are pre-5 December 2005 transactions.
> (2) An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.
> (3) Condition A is that the purpose of avoiding liability to taxation was not the purpose, or one of the purposes, for which the relevant transactions or any of them were effected.
> (4) Condition B is that the transfer and any associated operations—
> (a) were genuine commercial transactions, and
> (b) were not designed for the purpose of avoiding liability to taxation.

Old Condition A refers to any "relevant transactions" and Old Condition B refers to "the transfer and any associated operations" (which comes to the same thing).[151] I will use the expression "any associated operations".

The transfer and associated operations in issue must each separately satisfy the motive test if the motive defence is to apply. One does not group the transfer and the associated operations together, and look for a single main purpose of the group.

### 29.39.1 *Associated operations subject to motive test: Critical operations*

The first task to identify the associated operations to which the motive test must be applied. For pre-2005 transactions (which are not affected by the 2006 reforms) the statute refers to "*any* associated operations" but this is a reference only to associated operations as a result of which a charge arises under s.720 or s.731 ITA. That is, in other words, the associated operations which must be relied on in order to satisfy the conditions set out in those sections. That is, the transfer and operations as a result of which:

(1) (in any case) income accrues to the person abroad; and
(2) (a) (in a s.720 case) the transferor has power to enjoy; or
(b) (in a s.731 case) the individual receives a benefit, or income can

151 Because the term "relevant transactions" is defined to mean the transfer and associated operations; see 25.10 (Significance of associated operations). The difference in the wording of old condition A and B is just a quirk of the drafting, there is no difference in meaning.

be used to benefit them.

I refer to an associated operation which meets these criteria as a "**critical operation**".

There may and generally will be many operations associated with the transfer, but unless they are critical operations they are irrelevant and should be ignored.

In *Herdman v IRC* 45 TC 394:

(1) T transferred shares to an Irish company (the person abroad) in consideration of an issue of new shares and a loan. This was an innocent transfer (the purpose was to avoid Irish tax).

(2) The company accumulated income. This was (arguably) an operation associated with the transfer, and the purpose was (then) regarded as UK tax avoidance.[152]

The motive defence was upheld. Lord Reid said:

> [1] It was admitted by Counsel that [what is now s. 720] can only apply if [T] has "by means of" these operations "acquired any rights by virtue of which" he had "power to enjoy" this income during the relevant period. I think that Counsel was clearly right in making this admission.
>
> [2] I cannot see how it can be said that [T] acquired any rights at all by means of these associated operations. By means of the transfer of the shares to the new company he acquired two rights. He acquired shares in the new company in the Republic and he became an unsecured creditor of that company for over £76,000. Neither right gave him any right in or to particular assets of the new company. The way in which that company dealt with its assets did not alter either of these rights. It may have made them more valuable and it may have made it easier for the company to pay its debts, but it did not change [T's] rights.[153]

Point [1] states the general rule (only critical operations need pass the motive test) and point [2] applies it to the facts of the case. The statement of law at [1] needs to be translated to reflect the revised statutory wording, which was recast in 1969, and rewritten in 2007, but the principle that only critical operations need pass the motive test) survived the 1969

152 After *Willoughby* the purpose should be regarded as mitigation and not avoidance.

153 45 TC 394 at p.413.

reforms.[154] In fact, I think the principle is (slightly) more clearly stated under ITA than it was under ICTA, because of the words in s.739(2): An individual is not liable for income tax under this Chapter ... *by reference to the relevant transactions* if condition A or B is met. It is only the transactions *by reference to which the TAA provisions apply* which need to meet old condition A and B.

In *Carvill v IRC*[155]:

(1) T transferred T's majority shareholding in a company to a Bermudian company (B Ltd) in exchange for shares, so T was a majority shareholder in B Ltd ("the original transfer").
(2) T became a 100% shareholder in B Ltd by (a) purchasing shares and (b) B Ltd purchasing its own shares.
(3) B Ltd entered into arrangements to remunerate T via a personal services company and a brokerage sharing agreement.

Steps (2) and (3) were held not to be associated operations, but if they had been associated operations it would not have mattered as they were not critical operations. No income arose to B Ltd because of the operations and T did not acquire a power to enjoy because of them.[156]

HMRC accept this. RI 201 provides:

> The law was amended in 1969 following a decision of the Courts (in *IRC v Herdman* 45 TC 394) that only the transfer and any associated operations giving a power to enjoy at the outset were relevant for determining whether the terms of [the motive defence] were satisfied. The amendment to the legislation sought to bring all associated operations into consideration when [the motive defence] was invoked. Because of doubts[157] expressed as to the effectiveness of this amendment, it has been the Revenue's practice in considering whether a defence under [the motive defence] is available to *consider only the transfer and any associated operations which directly establish a power to enjoy the income of the overseas person under any particular sub-head in [s 723 ITA]*.

154 See 29.40.1 (The 1969 reforms).

155 [2000] STC (SCD) 143 at [80]–[85], 75 TC 477 (Special Commissioners).

156 See [81]-[83].

157 The "doubts" were in fact a decision of the Special Commissioners on the point; see 29.40.1 (The 1969 reforms).

The last sentence goes too far and is not to be taken literally. Suppose:
(1) T transfers assets to a UK trust by an innocent transfer, and
(2) Foreign trustees are appointed (an associated operation)[158] for tax avoidance purposes.

It may be said that the associated operation does not establish a power to enjoy the income of the trust. But the associated operation is a critical one (since it causes income to accrue to the person abroad) so the motive defence does not apply.

Suppose:
(1) T transfers assets to a non-resident company in return for shares in that company ("the first transfer"). Suppose the first transfer is innocent (no tax avoidance purpose). Income accruing to the company is not caught by the TAA provisions as the motive defence applies.
(2) T transfers the shares in that non-resident company to a non-resident trust ("the second transfer"). The second transfer has a tax avoidance purpose.

The second transfer is an operation associated with the first. But that associated operation is not a critical operation. Income accrues to the non-resident company as a result of the first transfer. It does not accrue as a result of the first transfer in conjunction with associated operations.[159]

Take the same transactions, but assume that the first transfer (to the company) had a tax avoidance motive, and the second transfer (to the trust) was innocent. Income of the company is within the TAA provisions. The motive defence does not apply. It is not enough to find an innocent associated operation. Dividends from the company to its shareholders are caught since the income arises by virtue of the tainted transfer to the company and an associated operation (the dividends).

158 See 25.11.4 (Transfer to UK trust followed by migration of trust before 6 April 2006) and 25.11.6 (Transfer to company followed by migration of company).

159 Of course income arising to the trustees as a result of the second transfer is caught by the TAA provisions. The fact that the first transfer was innocent does not help. This is self-evident but if authority is needed see the decision of the Special Commissioners in *IRC v McGuckian* [1994] STC 900. There was (wisely) no appeal on that point.

## 29.40 Transfer and associated operations both after 4 December 2005

### 29.40.1 *The 1969 reforms*

To understand the post-2005 regime, it is helpful to go back to 1969, when the first attempt at reform was made. Harold Lever (then Financial Secretary to the Treasury) argued:

> If we are to have a section [720 ITA], it has to bite on all settlements abroad which at any time are used for avoidance of tax even though originally started for innocent purpose. Supposing a man has transferred money to set-up a Bible society in Bulowayo and his heir being more sophisticated and perhaps more materialistic, finds himself with a settlement set up for unimpeachable purposes and decides that it would make a useful vehicle for the avoidance of all income tax and surtax. The *Herdman* decision meant that section [720] would not prevent this. Clause 27 therefore knocks out the *Herdman* decision and I think that the hon. and learned Gentleman would be fair enough to say that that is reasonable.[160]

The example is facetious (Lever was known for his wit). The common (if less exotic) example is that:
(1) a settlement is set up by a foreign settlor for foreign beneficiaries; and
(2) subsequently beneficiaries come to the UK.
If this was not envisaged at the time of the settlement, even HMRC must concede that condition A was satisfied by the original transfer. Nothing that happened later would alter that defence. So, as Morritt LJ commented (obiter) in *IRC v Willoughby* 70 TC at p.97:

> In the FA 1969, legislation was enacted, s.33, to nullify the [Herdman] decision ... on the point.

However, the Special Commissioners rejected this in an unreported decision.[161] Thus the 1969 Act failed to achieve its intention.

160 Hansard, 17 July 1969, cols 955–6.

161 I have been unable to obtain a copy of this decision, though no doubt HMRC have it in their files. If any reader could supply a copy, it would be most helpful to see it.

### 29.40.2 *The 2006 reforms*

HMRC tried again in what I call **"the 2006 reforms"** (because they were introduced in the FA 2006, though with effect from December 2005).

Section 737(8) ITA provides:

> If—
> (a) apart from this subsection, an associated operation would not be taken into account for the purposes of this section, and
> (b) the conditions in subsections (2) to (4) [New Conditions A and B] are not met if it is taken into account, because of—
> (i) the associated operation, or
> (ii) the associated operation taken together with any other relevant transactions,
>
> it must be taken into account for those purposes.

EN Draft Clauses (2005) explained:

> certain associated operations that might potentially be disregarded when applying the [pre-2005 motive defence] have to be taken into account for the purposes of the new test. These are associated operations that have an avoidance purpose, but might not directly affect the application of the charging provisions.[162]

A post-4 December 2005 transfer which qualifies for the motive defence loses that defence if:
(1) there is an associated operation;
(2) that operation does not satisfy New Condition A or B.
Trusts and companies which qualify for the motive defence must ensure that from 5 December 2005 any acts by them meet Condition A (or Condition B if relevant). In short, they should do no act which might be regarded as having a tax avoidance purpose. It is important that new associated operations do meet the New Conditions. The transitional rules are harsh.

These conditions are extremely difficult to apply; this may be why

162 Para 62.The explanation in EN FB 2006 is more curtailed. The provision alters the former law. EN Draft Clauses (2005) claimed (outrageously) that this change was "clarifying and confirming the correct interpretation of the existing statute" but that was inconsistent with RI 201 and EN FB 2006 more or less abandoned that position.

almost 40 years passed before the second attempt to alter law established in 1969. The Blair/Brown administrations, it seems fair to say, were unaware or unconcerned about uncertainty and complexity in tax legislation, particularly anti-avoidance legislation.

### 29.40.3 *Associated operations subject to motive test: Significant operations*

The first task to identify the associated operations to which the motive test must be applied. For post-2005 transactions the statute refers to "*an* associated operation" and it is clear that some operations which are not critical operations (under the old law) are now made subject to the motive test.

The task is to identify what counts as "an associated operation" for the purposes of s.737(8) ITA. The statutory definition of associated operation does not answer this as if it is read literally it is far too wide to be workable. Suppose in 1096 a Crusader transferred land to trustees to avoid feudal duties, and in 2000 the land is again transferred to trustees. At first sight the 1096 transfer is an operation associated with the 2000 transfer.[163] It cannot be that the Crusader's (arguable)[164] tax avoidance purpose would prevent the transfer in 2000 from qualifying for relief!

There must obviously be some connection between the associated operation, and the transfer: the mere fact that they relate to the same property cannot be enough. The position is reminiscent of the Settlement Provisions which define "settlement" as including any disposition, leaving the Courts to devise their own test for what is caught (in that case, the Courts eventually settling on a "bounty" test).

Here, it is suggested, the test that the Courts ought to impose should be that the transfer and associated operations form part of one arrangement, or are "put in train" by the transferor.[165] I refer to associated operations which meet that requirement as **"significant operations"**. Thus all significant operations must satisfy new conditions A and B, in order to qualify for the motive defence.

---

163 See 25.9 (Associated operation: definition).

164 Feudal duties would be "taxation"; see 29.9 (Meaning of "taxation" in the motive defence). I forbear to consider the question whether the 1096 transfer should be regarded as avoidance or mitigation of feudal duties (and would that depend on attitudes to taxation in the Middle Ages or contemporary attitudes?).

165 See 25.11.1 (Transfer from A to B followed by transfer from B to person abroad).

In short, in my terminology the effect of the 2006 reforms is to extend the motive test from critical operations to significant operations.

## 29.41 When do associated operations have a tax avoidance purpose?

Note the extreme consequences of an associated operation motivated by tax avoidance. Even if the associated operation concerns only a small amount, the *entire* trust may lose the benefit of the motive defence. This unfairness ought to colour the approach of the courts to construing the section.

### 29.41.1 *Investment strategy*

Buying and selling investments in the ordinary course of managing investments is not tax avoidance.

Suppose trustees wish to invest in UK equities, but do so via a UK unit trust or OEIC in order to hold property which is excluded property for IHT. The acquisition of a unit trust or OIEC is not tax avoidance. It is considered that the position is the same if the trustees acquire a non-UK unit trust or OEIC to avoid UK source income.

Suppose a trust, all of whose beneficiaries are abroad, wishes to invest in UK land. The trustees invest via a trust company in order to avoid inheritance tax and the trust rate of income tax on the rent. It is suggested that this is mitigation rather than avoidance. If this is not the case, then the effect on the UK economy could be quite remarkable. It would often be the case that well advised trustees would avoid investing in UK land in order to retain the motive defence. On the other hand, if the land was purchased using an artificial SDLT avoidance scheme, that would be caught.

### 29.41.2 *Distribution strategy*

It is considered that retention of income within a company is not an "operation" but even if it is, it would not be tax avoidance. It is considered that accumulation of income in a common form discretionary trust[166] is not an "operation" but even if it is, it would not be tax avoidance.

Suppose a discretionary trust is within the motive defence. A foreign domiciled beneficiary (not the settlor) is UK resident. If the trustees pay capital to that beneficiary instead of distributing income, in order to avoid an IT charge, this is not tax avoidance. If the trustees lend to the beneficiary interest free in order to avoid an income receipt or reduce the amount of a capital payment, this is not tax avoidance. If the loan is at interest, to avoid a capital payment, this is not tax avoidance. An arrangement might be avoidance if trustees lend unsecured to a beneficiary in circumstances where the beneficiary is either insolvent or so lacking in assets that the beneficiary is not in practice ever likely to be able to repay the sum lent.[167]

An arrangement may be avoidance where the trustees accumulate income and then immediately distribute it as capital, in circumstances where the straightforward course would be to distribute as income.[168]

Suppose a discretionary settlor-interested trust is within the motive defence, and the settlor comes to the UK. The trustees retain trust income abroad (if it was remitted to the UK there would be a tax charge under the s.624 remittance basis). This is not tax avoidance.

Suppose a non-resident company owned by a non-resident individual pays a large dividend the year before the individual becomes UK resident. That is not tax avoidance.[169] But if the individual lends the proceeds back to the company, that is a circular and artificial transaction, and the loan may be regarded as for a tax avoidance purpose.

### 29.41.3 *Inter-group transactions*

For company group transactions, it is useful to refer to the "white list" of

166 A trust to accumulate income with power to distribute. If there were a trust to distribute with power to accumulate, then accumulation would be an "operation".

167 Alternatively the loan in such a case may in fact be categorised as an outright distribution.

168 Alternatively the distribution may in fact be categorised as income.

169 That will be clearer from 2012/13 when the temporary non-resident rules govern this area.

transactions which HMRC accept as outside para 2(4A) Sch 7 FA 2003[170] (so they qualify for SDLT group relief). Para 23040 SDLT Manual provides:

> **23040. Restrictions on availability Paragraph 2(4A) Schedule 7 FA 2003** [September 2006]
> ... This guidance gives some examples of transactions where it is accepted that group relief is not denied by Para 2(4A) Schedule 7 FA 2003.
> It should be noted that the examples are intended only to give general guidance and do not use technical or statutory language, nor should they be interpreted as if they were a statute.
> They also assume that the transactions described do not form part of any larger scheme or arrangement which might have tax consequences....
> Examples of transactions where group relief is not denied by Para 2(4A) Schedule 7 FA 2003
> (1) The transfer of a property to a group company having in mind the possibility that shares in that company might be sold more than three years after the date of transfer
> (2) The transfer of a property to a group company having in mind the possibility that shares in that company might be sold within three years of the date of transfer, with a consequent claw-back of group relief, in order that any increase in value of the property after the intra-group transfer might be sheltered from SDLT
> (3) The transfer of property to a group company having in mind the possibility that either (1) or (2) might occur
> (4) The transfer of a property to a group company prior to the sale of shares in the transferor company, in order that the property should not pass to the purchaser of the shares
> (5) The transfer of property to a group company in order that commercially generated* rental income may be matched with commercially generated losses from a Schedule A business
> (6) The transfer of property to a group company in order that commercially generated* chargeable gains may be matched with

170 This provides:

> Group relief is not available if the transaction—
> (a) is not effected for bona fide commercial reasons, or
> (b) forms part of arrangements of which the main purpose, or one of the main purposes, is the avoidance of liability to tax.
> "Tax" here means stamp duty, income tax, corporation tax, capital gains tax or [SDLT].

commercially generated allowable losses

(7) The transfer of property to a non-resident group company in the knowledge that future appreciation or depreciation in value will be outside the scope of corporation tax on chargeable gains

(8) Transactions undertaken as part of a normal commercial securitisation

(9) The transfer of the freehold reversion in a property to a group lessee in order to merge the freehold and the lease, and thus prevent the lease being subject to the wasting assets rules as respects corporation tax on chargeable gains

(10) The transfer of property to a group company in order that interest payable on borrowings from a commercial lender on ordinary commercial terms may be set against commercially generated* rental income

(11) Borrowings on ordinary commercial terms
   (a) from a commercial lender, or
   (b) intra-group in circumstances which would have been commercial had they arisen between unconnected third parties

*Including income, gains and losses which are generated intra-group on transactions which would have been commercial had they been entered into by unconnected third parties

"Transfer" means the transfer of a freehold, in Scotland ownership of land, or the assignment, in Scotland assignation, of a lease.

Cases involving the grant of a lease will need to be considered on their facts.

It is difficult to take point (7) seriously, but even apart from that, it is clear that HMRC do not strain to classify ordinary tax planning as avoidance.

## 29.42 Consequences of tainted operation

Where there is a tainted operation associated with a transfer, all the income arising as a result of the transfer in principle comes within the scope of ss.720 and 731. If there is an innocent transfer of £10m, and a tainted operation of £10,000, all the income of the £10m comes into charge.

Section 741 ITA provides a very limited relief:

(1) Section 742 (partial exemption where later associated operations fail conditions) applies if—

(a) an individual is liable to tax[171] because of section 720 or 727 for a tax year (the "taxable year") because condition B in section 737(4) (genuine commercial transaction: post-4 December 2005 transactions) is not met, and
(b) subsections (2) and (3) apply.

The relief only applies for s.720 (and 727) and not for s.731 ITA. Section 741 continues:

(2) This subsection applies if—
(a) since the relevant transfer there has been at least one tax year for which the individual was not so liable by reference to the relevant transactions effected before the end of the year, and
(b) the individual was not so liable for that year because—
(i) condition B in section 737(4) was met, or
(ii) condition B in section 739(4) (genuine commercial transaction: pre-5 December 2005 transactions) was met.

The relief only applies if Condition B is satisfied; not if Condition A is satisfied. In practice New Condition B is hardly ever satisfied. Section 741 continues:

(3) This subsection applies if the income by reference to which the individual is liable to tax for the taxable year is attributable—
(a) partly to relevant transactions by reference to which one of those conditions was met for the last exempt tax year,[172] and
(b) partly to associated operations not falling within para (a).

Assuming the conditions of s.741 are satisfied one moves on to the relief in s.742:

---

171 "Liable to tax" is defined in s.741(5) ITA:
"References in this section to a person being liable to tax for a tax year because of section 720 or 727 include references to the individual being so liable had any income been treated as arising to the individual for that year under section 721 or 728."

172 Defined in s.741(4) ITA:
(4) For the purposes of this section a tax year is exempt if—
(a) it is one of the tax years mentioned in subsection (2), and
(b) there is no earlier tax year for which the individual was liable to tax because of section 720 or 727 by reference to the relevant transactions or any of them.
...

> (1) If this section applies, the individual is liable to tax under this Chapter only in respect of part of the income for which the individual would otherwise be liable.
> (2) That part is so much of the income as appears to an officer of Revenue and Customs to be justly and reasonably attributable to the operations mentioned in section 741(3)(b) in all the circumstances of the case.
> (3) Those circumstances include how far those operations or any of them directly or indirectly affect—
> (a) the nature or amount of any person's income, or
> (b) any person's power to enjoy any income.

The drafter has given up here.

## 29.43 Income arising before tainted operation

This section considers how the TAA provisions apply where an innocent post 4-December 2005 transfer is followed by a tainted operation subsequently.

The position where a pre-5 December 2005 transfer is followed by a tainted operation on or after 5 December 2005 raises additional issues discussed at 29.44 (Transfer before and operation after 5 December 2005).

### 29.43.1 *Income before tainted operation: s.720*

Suppose:

(1) an innocent transfer is made on or after 5 December 2005, and
(2) an associated operation made today fails the New Conditions ("the tainted operation").

At first sight *all* income back to the date of the transfer comes into charge under s.720 ITA.[173] HMRC say in a letter dated 7 April 2006 to the representative bodies that only income of the year in the year of the tainted operation and subsequent years is charged:

> **Transitional arrangements, whether income charged retrospectively**
> Representation: It is suggested that the transitional arrangements of

173 In practice HMRC would be limited to a four year period.

> [s.740 ITA] have the effect that income could be brought into charge retrospectively. [Section740(4) ITA] could be interpreted as meaning that if an associated operation after 5 December 2005 fails the exemption test in [s.737 ITA], all of the income arising from 5 December 2005 could be charged (even where the subsequent associated operation takes place many years later).
> Response: The legislation does not apply retrospectively in the manner suggested. [Section 741C ICTA][174] provides the general rule that section [720] applies in this type of case as it would apply apart from section [736 to 742 ITA]. In those circumstances section [720] would take the income arising in the relevant year of assessment.

This is far from clear in the legislation, but it is a sensible result.

### 29.43.2 *Income before tainted operation: s.731*

Suppose:

(1) An innocent transfer was made on or after 5 December 2005.
(2) A tainted associated operation is made subsequently.
(3) An individual (not the transferor) receives a benefit in the same year as the associated operation or subsequently.

The individual is taxable under s.731 ITA by reference to all the income which has arisen backdated to the date of the transfer.

Suppose the order of transactions were reversed:

(1) An innocent transfer was made on or after 5 December 2005.
(2) An individual (not the transferor) receives a benefit on or after 5 December 2005.
(3) A tainted associated operation is made in a tax year after the benefit is received.

That is, the benefit was received in the year before the tax motivated associated operation. Is the benefit retrospectively subject to tax? There is no indication either way but it is suggested that the answer is, no. This is consistent with how HMRC understand s.720 to work.

174 Now s.740(3) ITA. The wording is not quite the same, but that has not altered the position.

## 29.44 Transfer before and operation after 5 December 2005

Section 740 ITA provides:

> (1) This section applies if the relevant transactions include both pre-5 December transactions and post-4 December transactions.
> (2) An individual is not liable to tax under this Chapter for the tax year by reference to the relevant transactions if—
> (a) the condition in section 737(2) (exemption where all relevant transactions are post-4 December 2005 transactions) is met by reference to the post-4 December 2005 transactions, and
> (b) the condition in section 739(2) (exemption where all relevant transactions are pre-5 December 2005 transactions) is met by reference to the pre-5 December transactions.

Thus in principle one applies the New Conditions to post-4 December 2005 transactions and the Old Conditions to pre-5 December 2005 transactions.

An important question is whether the motive defence test must be met:
(1) by all significant associated operations; or
(2) only by critical operations (my terminology).
At first s.737(8) ITA appears to answer the question,[175] but it does not, because s.737(1) provides:

> This section applies if all the relevant transactions are post-4 December transactions.

It is suggested that the *Herdman* principle still applies to pre-5 December 2005 transfers even if the operation takes place subsequently. That is, only critical associated operations have to pass the motive test and other associated operations are ignored. This does not deprive s.740 ITA of meaning, for it now governs the position where there are post-4 December 2005 critical operations. For instance, suppose:
(1) there was a transfer to a UK trust (an innocent transfer) before 5 December 2005;
(2) non-resident trustees are appointed (a critical association operation) post-4 December 2005.

175 See 29.40.2 (The 2006 reforms).

In deciding whether the motive defence applies one asks whether the associated operation satisfies New Conditions A and B.

The position is not clear cut and HMRC could make the following points:

(1) Section 740(2)(b) incorporates s.737(2) the New Conditions A and B, but by doing so it necessarily incorporates s.737(3) to (7) which supplement s.737(2). So it is possible to say that s.740(2)(b) also incorporates s.737(8).

(2) The transitional rules in s.740, see below, arguably make better sense if s.727(8) is applied. But the rules are so harsh that it is suggested that the taxpayer-favourable construction is to be preferred.

### 29.44.1 *Transitional rules*

Section 740(3) ITA provides:

> If subsection (2)(b) applies but subsection (2)(a) does not, this Chapter applies with the modifications in subsections (4) to (6).

This brings in three transitional rules where:

(1) the pre-5 December 2005 transactions met the Old Conditions; but

(2) post-4 December 2005 transactions do not meet the New Conditions.

The provision in s.740(4) ITA is not discussed because it was spent even before the ITA took effect; see the 9th edition of this work para 28.44.2.

### 29.44.2 *Transitional rule: s.731*

Section 740(5) ITA provides a transitional rule for s.731 ITA:

> In determining the relevant income of an earlier tax year for the purposes of section 733(1) (see Step 4),[176] it does not matter whether that year was a year for which the individual was not liable under section 731 because of section 739 or this section.

Suppose:

(1) An innocent transfer was made before 5 December 2005.

(2) A tainted associated operation is made on or after 5 December 2005.

---

176 See 27.12 (Computation of charge).

(3) An individual (not the transferor) receives a benefit in the same year as the associated operation or subsequently.[177]

The beneficiary is taxable under s.731 ITA by reference to all the relevant income from the date of the transfer (or from 1981, if later). This harshly retrospective rule was actually intended. EN FB 2006 para 33 provides:

> [The effect of s.740(5) ITA is:] for the purposes of [s.731 ITA] where the individual receives a benefit in a year of assessment ending after 5 December 2005, the process of determining relevant income under the general rule for years up to and including that year must take account of relevant income that arose in years of assessment ending before that date, as well as later years.

It will often be impossible for the quantum of relevant income to be ascertained exactly, as the records will not exist. But the issue may in practice be fudged by agreement with HMRC.

Section 740(6)(7) ITA which deal with this were also spent before ITA took effect; see the 6th edition of this work para 19.48.3.

## 29.45 Tax return: disclosure of motive defence claim [178]

The motive defence does not require a formal claim. If there has been an innocent transfer, a taxpayer was formerly entitled (indeed required) to complete any tax return on the basis that the motive defence applied; one was not required to prove the motive defence applied to the satisfaction of the Board before completing the tax return on that basis. However, if an individual completes a self assessment return, it has been necessary since 1998/99 to indicate on that return that they have taken advantage of the motive defence.[179]

In the 2010/11 tax return, notification that the motive defence is in point

---

177 There is no charge if the benefit is received in a tax year before the operation: see 29.43.2 (Income before tainted operation: s.731).

178 See also for s.720 income, 26.16 (Tax return disclosure) and for s.731 income, 27.39 (Tax return disclosure).

179 RI 201 notes this point:
"Taxpayers are required to disclose clearly in their self-assessment return if there is any income or benefit assessable under [the TAA provisions], and whether reliance is being placed on [the motive defence] to exclude income or benefit from assessment."

is given by completing box 46 in the Foreign pages (form SA106). The words next to box 46 state:

> If you have omitted income from boxes 11, 13 and 42 because you are claiming an exemption in relation to a transfer of assets, enter the total amount omitted (and give full details in the 'Any other information' box on your tax return)

It is only correct to complete box 46 if the motive defence is needed. It is not correct to complete the box if the TAA provisions do not apply to impose a charge for some other reason, such as the remittance basis, because that is not an "exemption".[180]

The International Manual provides:

> **600040 - Transfer of assets abroad** [October 2010]
> **Overview of ITA2007/S736 - 742 - exemption from liability**
> ...There is no provision for a "clearance" or other advance ruling on the application of the exemption provisions. Details of the amount considered to be exempt from charge should be entered on the Foreign Pages of the Self Assessment tax return. In the "white spaces" of the return, the individual should enter particulars of transfers and associated operations that would result in a charge absent an exemption, and provide factual details about the transaction explaining the basis for considering a condition for exemption to be met.

There is strictly no legal obligation to give precise figures or indeed any figures for the income which (assuming the claim is valid) will not be

180 HMRC take this view. HMRC Foreign Notes (SA106 notes 2010/11) provide: "Box 46 If you have omitted income from boxes 11, 13 and 42 because you are claiming an exemption in relation to a transfer of assets, enter the total amount omitted. The provisions described at boxes 10 to 13 and 42 do not apply if you can show from all the circumstances that none of the purposes of the transfer and any associated operations was to avoid tax. But an exemption is only due if actual income would otherwise be chargeable. If you omit income *for this reason* from boxes 11, 13 and 42, you must enter the total amount of income you have omitted in box 46. You must also provide relevant details and an explanation in the 'Any other information' box of your tax return, or on a separate schedule, including details of the assets transferred and any associated operations, the person abroad concerned, the circumstances of the relevant transactions and the basis for your claim to exclusion."

taxable. However, a failure to give figures will no doubt lead to further enquiries. If estimated figures are given, this should be stated. On the occasion when the claim is first made, sufficient details should be given for HMRC to review the case. Once a claim is agreed, I see no reason to give any details at all in subsequent tax returns. I suggest the words "n/r" be put in box 46 and a note in the additional information section states that since the claim was agreed, no information need be provided as it is irrelevant.

It often happens that the box is left blank when it should be completed, as the need to do so in this very complicated area is overlooked. There is no tax penalty, provided the claim is valid, as no additional tax is thereby due. It is suggested that the box should be completed on the next tax return, with a note in the "additional information" box to explain the position.

### 29.45.1 *HMRC action when motive defence box is completed*

RI 201 provides:

> Where such a disclosure has been made and exemption under s 741 ICTA claimed, the Revenue will make any necessary enquiries about that exemption in the statutory period allowed, and will not seek to reopen that year's return on discovery grounds if the s 741 exemption has to be reconsidered in later years.

International Manual explains HMRC's administrative arrangements for dealing with a claim:

> **600050 - Transfer of assets abroad** [October 2010]
> **Mandatory referral to CAR Trusts & Estates Bootle**
> CAR Trusts & Estates (Technical) Bootle is responsible for the operation of the legislation contained in Chapter 2 Part 13 ITA 2007, the provision of Technical Advice thereon and any litigation involving transfer of assets legislation.
> All enquiry work involving possible application of the transfer of assets legislation is undertaken by or in conjunction with the specialist team in CAR Trusts & Estates (Compliance) Bootle. Special Investigations offices and CAR High Net Worth Units also undertake review work in this area in relation to cases handled by them.
> The individual Self Assessment tax return will often be the first point

> of identification of cases where the legislation may apply, and as such those handling receipt of returns have a vital role to play in identifying potential application of this legislation. Offices should not however attempt to determine liability to the Income Charge or the Benefits Charge or discuss the application of the provisions with agents without first contacting CAR Trusts & Estates Bootle.
> Any case in which it is identified that transfer of assets does or may apply must be referred to CAR Trusts & Estates (Technical) Bootle who will arrange any necessary risk assessment of the case and advise on whether and how this aspect is to be taken forward.
> CAR HNWU and Special Investigations offices do not have to make a referral of their own cases in accordance with the previous paragraph but should consult with CAR Trusts & Estates (Technical) Bootle for advice as necessary, and in every case where litigation may be a possibility....
> **(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**
> You must also submit your papers if you receive an application to exemption from liability under 'Income Charge' or 'Benefits Charge' . You should not enter into correspondence with the taxpayer or his agent on the application of the exemption provisions. Any enquiry from a taxpayer or professional adviser about the scope and effect of the legislation, or its application to a particular taxpayer, should be referred directly to CAR Trusts & Estates (Technical) Bootle.

In practice, expect an enquiry to be opened unless the issue has been resolved in earlier years.

## 29.46 Dealing with HMRC enquiries

The individual must "satisfy an officer of the Revenue and Customs" that Condition A or B is met.[181] This imposes the burden of proof on the taxpayer. That makes no difference as the burden of proof generally rests on the taxpayer, and in any event, disputes are rarely decided by the burden of proof.[182]

Contemporary correspondence and background documentation may be relevant to the factual issue of whether the transferor had the purpose of

181 ss. 737(2), 739(2) ITA.
182 See 2.4.3 (Proof of intention).

reducing tax. It will not shed much light on the issue of whether the purpose should be classified as avoidance or mitigation. Some factors such as confidentiality or tax related agreements may shed light on this, or at least, on whether the parties regarded the matter as tax avoidance.[183] In *IRC v Willoughby* 70 TC 57 for instance, the Special Commissioner reviewed sales literature relating to the offshore bonds. In practice, expect HMRC to ask for contemporary documentation. The advisors should review it before making a claim. In the case of a transfer to a trust, this includes:

(1) Trust documentation and letters of wishes.
(2) If not evident from the above, details of intended beneficiaries.
(3) Details of assets transferred.
(4) Contemporary correspondence between trustees, accountants and settlor. (Legal advice may be privileged.)

Often the issue arises many years after the transfer of assets, and the contemporary records have been lost. That should not matter, as secondary material and inferences from common sense should suffice, but efforts should be made to recover original documentation, if only to avoid the suspicion that damaging documents may have been suppressed.

## 29.47 Appeals

Section 751 ITA provides:

> On any appeal that is notified to the tribunal, the jurisdiction of the tribunal includes jurisdiction to affirm or replace any decision taken by an officer of Revenue and Customs in exercise of the officer's functions under—
> (a) section 737 (exemption: all relevant transactions post-4 December 2005 transactions),
> (b) section 738 (meaning of "commercial transaction"),
> (c) section 739 (exemption: all relevant transactions pre-5 December 2005 transactions),
> (d) section 742 (partial exemption where later associated operations fail conditions),
> (e) section 743(2) (no duplication of charges: choice of persons in relation to whom income is taken into account).

183 See 29.16.4 (Other indicia of tax avoidance).

The wording makes clear that jurisdiction of the tribunal is appellate and not supervisory. The wording of New Conditions A and B ("not be reasonable to draw the conclusion ...") does not impose a *Wednesbury* unreasonableness test.

A decision of the tax tribunal is, on ordinary principles, binding on the parties (subject to an appeal) only in relation to the assessments under appeal. It does not bind the parties in other respects, and in *Carvill v IRC* [2000] STC (SCD) 143, a Special Commissioner allowed a motive defence appeal even though a previous appeal relating to earlier years had been decided against the taxpayers. The taxpayers then sought to recover from HMRC the tax paid under the earlier assessments, but this rightly failed. There must be some finality in tax, even when wrong decisions are reached by the courts. See *Carvill v IRC (No. 2)* [2002] STC 1167 and *R (on the application of Carvill) v IRC* [2003] STC 1539. That issue will rarely, if ever, arise again in practice.

A more common problem is where tax has been paid under the TAA provisions for a number of years without consideration being given to the motive defence, and then it occurs to a taxpayer that a motive defence is applicable. It is considered that the principle in *Carvill (No. 2)* only applied where a motive defence had been litigated and decided by the tribunal, and in the absence of litigation on the point it should be possible to put in an error or mistake claim under usual principles.

An appeal will be made by the individual subject to tax (not the trustees or company within s.731 ITA who have no *locus standi*). If the trustees fund an appeal by the individual against assessment under s.731, will that funding constitute a benefit? (If so it will in turn be subject to income tax under s.731 if the appeal is unsuccessful?) The answer depends on the facts. If the reason the trustees fund the appeal is in order to sort out their tax planning for the future, or in order to benefit other beneficiaries, then no taxable benefit is received by the appellant, the benefit is received by all the beneficiaries and there is no rational means of apportionment. At the other extreme, if the trust fund is (more or less) wound up by a capital payment, and the appeal procedure is specifically to benefit one beneficiary, then the trustees financing the appeal would constitute a benefit.[184]

184 Or else it may be subject to CGT as a capital payment.

## 29.48 Can an individual disclaim the motive defence?

An interesting question (which would have surprised those who framed the transfer of asset provisions) is whether it is possible for an individual to disclaim the motive defence. There are at least two circumstances where the application of the TAA provisions may reduce a tax charge:

(1) A UK resident transferor who receives a distribution from a non-resident company may be more lightly taxed under s.720: they are taxed on the company's income but has the benefit of tax and tax credits paid by the company, and the distribution is tax free.

(2) A UK domiciled and resident beneficiary who received a capital payment from an offshore trust would until 2008/09 prefer to be taxed under s.731 than under s.87 TCGA, which may apply if s.731 does not, because the IT rates (40%) were lower than the effective CGT rates (64%).

It is arguable that the words "the individual satisfies an officer of HMRC" etc., indicate that the benefit of the motive defence can be disclaimed. The individual may choose not to satisfy an officer even though there was no tax avoidance purpose. If the motive defence is compulsory, we would have the surprising result that a transfer for tax avoidance may be less harshly taxed than one which was not.

However, this view would cause considerable difficulties. Suppose a non-resident trust has relevant income of £1m and trust gains of £1m, and capital payments of £1m are made in Year 1 to beneficiary A and in Year 2 to beneficiary B. A and B are both resident and domiciled in the UK. Suppose the trust is in principle within the motive defence because the transfer to it was not for tax avoidance purposes. Before 2008/09 A would probably wish to disclaim the motive defence, if A could, so the capital payment to A was subject to income tax, and they avoided the s.87 interest surcharge. However, it would be in the interest of B to argue that the motive defence did apply, so that the payment to A "washed" the capital gain and the payment to B was tax free. It is evident that the offshore trust rules simply do not work if the motive defence can be disclaimed by one beneficiary and claimed by another. Nor do they work fairly if it can be disclaimed by one beneficiary in a manner which binds all the others. So the better view is that the motive defence (if applicable on the facts) is compulsory and binds all parties.

The same applies where it suits HMRC to argue that the motive defence is satisfied, and the taxpayer argues that it is not. This in fact happened in *Swift v HMRC* where HMRC successfully argued that the motive defence applied.[185]

## 29.49 Motive defence: commentary

The reader who studies this long and difficult chapter will almost certainly agree with the author that the 2006 reforms were wrong headed in policy though clumsy drafting adds its mite to the confusion.

What should be done? The best solution would be to return to the (relatively) simple pre-2006 position.

185 The taxpayer argued unsuccessfully that he had a tax avoidance purpose, but did not take the point that the motive defence could be disclaimed: [2010] SFTD 553 at [22] - [28]. The case is not yet final.

CHAPTER THIRTY

# LIFE POLICIES AND CONTRACTS

## 30.1 Policies – Introduction

This chapter considers:
(1) policies of life insurance,
(2) life annuity contracts, and
(3) capital redemption policies.

ITTOIA refers to these as "policies and contracts" but I abbreviate the expression to **"policies"**.[1] The asset is often described in the insurance industry as a bond; statute has adopted that term in the expressions "personal portfolio bond" and "guaranteed income bond". I prefer not to use the word bond since it is also used to describe debentures and indeed strictly includes any obligation undertaken by deed.

Policies fall within Chapter 9 Part 4 ITTOIA, sometimes called the "chargeable event" regime. This contains almost 100 sections and is, I think, the longest chapter in ITTOIA. The reader will not be surprised if I say that a full discussion needs a very long book to itself. This chapter focuses on the matters closest to the theme of this work.

The provisions are sometimes very crude. Partial surrender is a particular

---

1 A note on terminology. IPT Manual provides:
**1115 Fundamental Concepts: what is a life policy** [February 2008]
The word policy in connection with insurance has a long history. It is the formal document in which an insurer (that is, insurance company or friendly society) sets out the terms of its obligations in consideration of the stipulated premiums. For an insurance contract to be made, or varied, between an insurer and policyholder requires the completion of the standard contract law offer and acceptance. There is no practical distinction between contract and policy; the latter simply evidences the former. Lord Donaldson confirmed this in the judgment referred to at IPTM1110. [*Scher v Policyholders Protection Bond* [1994] 2 AC 57.]

trap.[2] This is the only place I have seen in the HMRC Manuals where districts are warned "not to attempt any discussion or explanation as to the equity of the treatment for tax".[3]

It is common to structure an investment in the form of a life insurance policy (with only a nominal element of life insurance). So one can effectively opt into the chargeable event regime by choosing to invest in a policy rather than in some other form. This is popularly called a life insurance wrapper.

On situs for IHT see 70.19 (Insurance policy); on situs for CGT see 71.15 (Insurance policy).

The taxation of policies held by UK resident companies is not discussed.

## 30.2 Policies – definitions

### 30.2.1 *Meaning of "life insurance"*

The definition of life insurance[4] needs a long chapter to itself. IPT Manual provides:

> **1115. Fundamental concepts: what is a life policy?** [February 2008]
> According to the 1774 Life Assurance Act, a policy of life insurance is an insurance policy on life. There is no further definition in the Taxes Acts. If a policy pays benefits on the death of an individual, either whenever it happens, or within a specified term, then it is potentially within the scope of the chargeable event legislation.

---

2 In practice this is avoided by life companies issuing a cluster of separate policies, instead of one single policy.

3 In the former Assessment Procedures Manual para 3147a (withdrawn in 2009).

4 A note on terminology. The General Insurance Manual provides

"**1060. Legal basis of insurance: Indemnity** [January 2009]
It used to be said that there was a distinction between
[1] insurance, meaning insurance against a financial loss, and
[2] assurance, meaning the assurance of a fixed or minimum sum upon the occurrence of a specified event that is bound to occur.
The text of the [Policies of Assurance] Act 1601, however, shows that the term "assurance" was applied to what is manifestly indemnity insurance. More recently the distinction has faded further under the influence of the EU, where the official English texts of the relevant Directives consistently use the term "life insurance". For most practical purposes therefore insurance and assurance can be treated as interchangeable terms. In the Taxes Acts, however, the term "assurance" is usually confined to life business.

It is not relevant for tax purposes that such a policy may also provide insurance against other risks, such as disability and critical illness, although that might affect its regulatory or accounting treatment.
Funeral plan contracts where a customer pays a sum to a funeral provider to provide a funeral in due course are not contracts of insurance, although similar arrangements if made with an insurer as a whole of life policy are, according to the regulatory rules of the Financial Services Authority (FSA).[5]

## 30.2.2 *Meaning of "capital redemption policy"*

A full discussion of the term "capital redemption policy" (defined in s.473(2) ITTOIA) is not attempted here. IPT Manual provides:

**1120. Fundamental concepts: what is a capital redemption policy?**
Capital redemption policies, though issued by insurance companies, are not strictly speaking insurance products. They were once known as investment bond contracts, which is more descriptive but needs to be distinguished from the type of life policy investment bond described at IPTM1100. Under capital redemption policies, one or more fixed sums is paid to an insurer under a contract pursuant to which one or more specified amounts is paid out at some later time or times, on the basis of an actuarial calculation. Typically the contracts take the form of

- an annuity certain, where a capital sum is used to buy an annuity for a fixed term not contingent on life, see IPTM4200, or
- a sinking fund where regular sums are paid in to secure a capital sum at some later date, for example against the need to find a premium payment to renew a lease.

The statutory definition of capital redemption business is at Section 458(3) ICTA 1988. Contracts within such business are long term insurance business but not life business. A capital redemption policy that creates a debtor/creditor relationship, with an agreement to return the sum advanced, is known as a capital redemption bond and is similar in nature to a relevant or deeply discounted security, see SAIM3000. However, such bonds, which may only be sold by an insurer, are removed from the scope of the deeply discounted securities income tax charge of Section 427 ITTOIA onwards.[6]

---

5 There is also an interesting discussion in the General Insurance Manual para 1010, not set out here for reasons of space, and in part 7 of the Law Commission paper "Insurable Interest" (14 January 2008).

6 See too the explanatory notes to the draft legislation published in the Pre-Budget Report, 5 December 2005:
15. A capital redemption policy is a contract, issued by an insurer, which is made in the course of capital redemption business. Under a capital redemption policy, for consideration of a sum or sums of money, the issuer of the policy guarantees to pay out a larger sum on a specified future date or to make a series of payments. Payment is independent of any contingency linked to human life.

### 30.2.3 *Meaning of "annuity"*

A full discussion of the term "life annuity" (defined in s.473(2) ITTOIA) is not attempted here. IPT Manual discusses the meaning of "annuity", a word used in many tax contexts:

> **1130. Fundamental concepts: what is an annuity?**
> There is no single definition in the taxes acts. There is an ancient definition in Stroud's Judicial Dictionary, quoting Coke on Littleton:
>
> > An annuity is a yearly payment of a certaine summe of money granted to another in fee, for life, or yeares, charging the person of the grantor onely.
>
> From an early case called *Foley v Fletcher*[7] the judgment of Watson B at 784-5 is often quoted:
>
> > But an annuity means where an income is purchased with a sum of money, and the capital has gone and has ceased to exist, the principal having been converted into an annuity.
>
> From this and other cases, notably *Southern-Smith v Clancy*, 24 TC 1, the following factors emerge as needing to be present
> - the payments must be made under a legal obligation
> - those payments must be 'pure income profit'
> - they must be capable of being characterised as 'annual', so being capable of recurrence on a periodic basis by reference to an annual time frame
> - the purchase sum must pass absolutely to the provider
> - no debtor/creditor relationship is created in relation to that sum; it is replaced by the annuity
> - the annuitant's only right is to demand payments when due
> - the payments must not be instalments of pre-existing debt.

### 30.2.4 *Rights, parts and shares*

Section 464(3) ITTOIA provides:

> If there has been a surrender or assignment of only a part of or share in

---

Examples of such contracts include—
- an annuity certain - an annuity payable for a set period not contingent upon the survival of a life,
- a leasehold redemption policy - which builds up a fund to be used in some way on the expiry of a lease, and
- a sinking fund policy - this accumulates a fund for the eventual replacement of a wasting asset.

7 (1858) 157 ER 678; 28 LJ Ex 100; 3 H & N 769 accessible *www.commonlii.org/uk/cases/EngR/1858/1107.pdf*

rights under the policy or contract, the references in this section and those sections to the rights are references to that part or share.[8]

ITTOIA EN comments:

> 417. *Subsection (3)* provides that references in sections 464 to 467 to a surrender or assignment of rights refer, where appropriate, to a surrender or assignment of a part of, or share of, the rights. A *part* of the rights means one or more discrete rights provided by the policy or contract. A *share* in the rights means part of the ownership, where there are multiple owners, of such a discrete right or rights or of all the rights in the policy or contract.

## 30.3 Outline of provisions

ITTOIA EN summarises the layout of the provisions:

> 409. The Chapter is laid out as follows-
> • charge to tax under Chapter 9 (sections 461 to 463)
> • person liable etc. (sections 464 to 472)
> • policies and contracts to which Chapter 9 applies (sections 473 to 483)
> • when chargeable events occur: general (sections 484 to 490)
> • calculating gains: general (sections 491 to 497)
> • part surrenders and assignments: periodic calculations and excess events (sections 498 to 509)
> • transaction-related calculations and part surrender or assignment events (sections 510 to 514)
> • personal portfolio bonds (sections 515 to 526)
> • reductions from gains (sections 527 to 529)
> • income tax treated as paid and reliefs (sections 530 to 538)
> • deficiencies (sections 539 to 541)
> • supplementary (sections 542 to 546)

### 30.3.1 *The charge*

The charge is in s.461(1) ITTOIA:

8 This is repeated in s.468(6) ITTOIA. (If s.464(3) had ITTOIA-wide application this would have been unnecessary.)

> Income tax is charged on gains treated as arising[9] from policies and contracts to which this Chapter applies.

Section 463(1) ITTOIA provides:

> Tax is charged under this Chapter on the amount of the gains arising in the tax year.

### 30.3.2 *Policies and contracts to which provisions apply*

This takes us to s.473(1) ITTOIA:

> This Chapter applies to—
> (a) policies of life insurance,
> (b) contracts for life annuities, and
> (c) capital redemption policies.

Sections 478–483 ITTOIA (not discussed here) specify various types of policies to which the provisions do not apply.

### 30.3.3 *When gains arise*

Section 462(1) ITTOIA provides:

> For the purposes of this Chapter, a gain from a policy or contract arises when a chargeable event occurs in relation to the policy or contract (see section 484).

For full surrenders the gain arises in the tax year of the surrender. For partial surrenders the gain arises in the tax year of the policy anniversary.

### 30.3.4 *Chargeable event*

"Chargeable event" is a label which brings in a complex set of rules.

---

9 The general usage of the tax legislation is that chargeable gains "accrue" but income "arises". In the chargeable events legislation, gains are regarded as income and so the word used is "arise". There is no difference in meaning.
Under the chargeable events legislation gains are sometimes said to "arise" and sometimes described as "treated as arising".

Section 484(1) ITTOIA sets out the starting point:

> The following are chargeable events—
> (a) in the case of any kind of policy or contract—
> (i) the surrender of all rights under the policy or contract,
> (ii) the assignment of all those rights for money or money's worth,
> (iii) the falling due of a sum payable as a result of a right under a policy or contract to participate in profits, if there are no remaining rights under it,
> (iv) a chargeable event treated as occurring under section 509(1) (chargeable events in certain cases where periodic calculations show gains),
> (v) a surrender or assignment treated as a chargeable event under section 514(1) (chargeable events where transaction-related calculations show gains), and
> (vi) a chargeable event treated as occurring under section 525(2) (chargeable events where annual personal portfolio bond calculations show gains),
> (b) in the case of a policy of life insurance, a death giving rise to benefits under it,
> (c) in the case of a policy of life insurance or a capital redemption policy, its maturity,
> (d) in the case of a contract for a life annuity which provides for the payment of a capital sum on death, the death, and
> (e) in the case of a contract for a life annuity which provides for a capital sum to be taken as a complete alternative to the annuity payments (or any further annuity payments), taking the capital sum.

Thus there are ten types of chargeable event. They fall into two categories:

(1) **Calculation events.** Section 491(4) ITTOIA provides the terminology:

> In this Chapter—
> "calculation event" means an excess event, a part surrender or assignment event or a personal portfolio bond event,

Thus there are three types of calculation event: Section 491(4) then defines these three types:

[a] "excess event" means a chargeable event within section 509(1),

[b] "part surrender or assignment event" means a chargeable event within section 514(1), and

[c] "personal portfolio bond event" means a chargeable event within section 525(2).

The terminology of [a] and [b] is unhelpful, but it is hard to think of better labels for the tortuous rules in ss.509 and 514. Calculation events are therefore within s.484(1)(a)(iv), (v) or (vi).

(2) Other events: that is, chargeable events other than calculation events. It is useful to have a label for these, but no short label fits the bill. I call them "**the seven disposal-events**", because these events are disposals (in the natural sense or at least in the CGT sense of the word).

Sections 484-489 ITTOIA contain exemptions. These are not discussed here, but s.487 is important because it contains an exemption for inter-spouse transfers (based on the CGT spouse exemption).

Logically there should be two stages, first to ascertain whether there is a chargeable event and secondly to compute the gain. But the two stages overlap, because in three calculation event cases the question of whether there is a chargeable event depends on whether there is a gain.

It should be noted that an assignment for no consideration is not a chargeable event. This is the opposite of the CGT position.

### 30.3.5 *Computation of gains*

The computation of gains is complex and artificial and often bears no relation to the commercial gain. It is not the same as the computation of gains for CGT purposes, so one must take care not to confuse chargeable gains (the CGT term) and gains under the chargeable events legislation. It is confusing that the legislation calls them both "gains". The term "**chargeable event gains**" is useful when one needs to distinguish the two types of gains.

There are five different methods of computation for different types of chargeable events. The computation rules are not discussed here.

SA904(Notes) (headed Notes on Trusts & Estate Foreign for the year ended 5 April 2010) comments on how to deal with foreign currency gains:

> Gains on foreign life insurance policies, life annuities and capital redemption policies should be calculated in the currency in which the policy or life annuity is denominated and the gain converted into sterling at the rate of exchange applicable at the time of the chargeable event (which may not be at the time the transaction occurred).[10]

This is different from method of computation of chargeable gains.

Once one has identified a chargeable event, and computed the chargeable event gain, the next stage is to ascertain the person liable for the charge.

## 30.4 Liability of individuals and individual "creators"

Section 465(1) ITTOIA provides:

> An individual is liable for tax under this Chapter if the individual is UK resident in the tax year in which the gain arises and condition A, B or C is met.

I call these "**individual bond conditions A to C**" to distinguish them from the myriad other conditions in ITTOIA.

---

10 Similarly, the IPT Manual provides:

> **9220 Calculation of gains and other amounts for policies in foreign currencies**
> Where a tax representative or insurer reports a gain in sterling, it should compute the gain by calculating the amount of the chargeable event gain in the currency in which the policy is denominated and then convert it into sterling at the conversion rate on the date of the event. This method ensures that currency fluctuations during the life of the policy are disregarded.
> Where a tax representative or insurer reports other amounts in sterling, for instance the premiums paid where there has been an assignment, they should be translated at the rate applying on the date of the chargeable event.

Similarly, IPT Manual:

> **3700 Foreign policies: differences in treatment**
> Some policies are denominated in a foreign currency. In such cases, any chargeable event gain should be computed in the foreign currency and then converted to sterling at the rate that applies at the date of the chargeable event. This method should be adopted rather than any other method such as converting each transaction to sterling at the rate applying on the date the transaction occurred.
> For instance, if premium of €10,000 was paid into a policy on 10 May 2002 and the policy was surrendered for €12,500 on 3 January 2005, the chargeable event gain on the surrender is €2,500. This should then be converted to sterling at the conversion rate applying on 3 January 2005 to arrive at the amount of taxable gain.

### 30.4.1 *Individual bond condition A: individual beneficial owner*

Section 465(2) ITTOIA provides:

> Condition A is that the individual beneficially owns the rights under the policy or contract in question.

Individual bond condition A – gain charged on individual if they are beneficial owner – is natural and sensible.

Sections 469–471 ITTOIA deal with joint ownership.

### 30.4.2 *Individual bond condition B: trust ownership*

Section 465(3) ITTOIA provides:

> Condition B is that those rights are held on non-charitable trusts which the individual created.

There are two strange features about individual bond condition B, where a policy or contract is held in a trust. First, it does not refer to the "settlor", which is the normal tax terminology, but to trusts "created" by a person. In practice, the settlor will usually be the creator.[11]

Secondly, surprisingly, the creator is charged on the gain accruing to their trust regardless of the identity of the beneficiaries. The individual has a right of recovery against the trustees, so ultimately it is the beneficiaries who bear the burden of the charge, but they do so at the creator's marginal rates. This is wholly contrary to principle, which elsewhere only charges the settlor in this way if they or those closely connected to them are beneficiaries. But following the increase in the trust tax rate to 50%, this rule can favour the taxpayer in relation to UK resident trusts and in a very rough and ready way it can mitigate the unfairness of taxing lower rate beneficiaries at the top trust rate.

---

11 The reason for the non-standard term was, possibly, (1) to avoid the rule that a "settlor" must have provided an element of bounty or (2) a concern that a company may not be a "settlor"; see 69.32 (Trust made by company: are shareholders settlors?), or (most likely) (3) as a rough and ready way to deal with the two-settlor situation. That is, if A created a trust and B added property, A alone was the creator and was formerly subject to tax on the whole of the gain. But s.472 ITTOIA now provides a more sensible rule in this case.

Section 672 ITTOIA deals with trusts with two or more settlors.

### 30.4.3 *Individual bond condition C: debt charged on security*

Section 465(4) ITTOIA provides:

> Condition C is that those rights are held as security for the individual's debt.

Individual bond condition C – gain charged on individual if held as security for the individual's debt – is a rough and ready solution to the problem of imposing the tax charge where the economic ownership lies. CGT has the opposite rule: s.26 TCGA.

### 30.4.4 *Remittance basis taxpayer*

Section 465(5) ITTOIA provides:

> For the purposes of calculating the total income of an individual liable for tax under this Chapter, the amount charged is treated as income.

The drafting technique is that the gain is added to the individual's "total income". The gain is taxed on an arising basis. The remittance basis does not apply even if the individual is a remittance basis taxpayer and the gain arises from an offshore policy. This is a surprising inconsistency with the general scheme of taxation for foreign domiciliaries. I wonder if this was due to a historical oversight. However that may be, the law set out in ITTOIA is clear.

It follows that a policy or contract which will give rise to a gain under the chargeable event provisions is not a suitable form of investment for:
(1) an individual who is a remittance basis taxpayer; or
(2) a trust whose creator is a remittance basis taxpayer,[12]
unless the individual expects to be non-resident in the year of the chargeable event. If the individual has no short or medium term intention of realising a gain (ie the policy is a long term investment) then the tax disadvantage can be set against the practical convenience of the policy.

The RDR Manual correctly provides:

12 But it may be suitable if held by a non-resident company held by the trust: see below.

**33540 - Remittance Basis: Identifying Remittances: Specific Topics: Chargeable Event gains**

Gains arising on a chargeable event, for example, the surrender of all rights under a policy of life insurance are chargeable to tax on the arising basis regardless of whether the policyholder is domiciled in the UK or not. The remittance basis does not apply.

Under a special rule (ITTOIA05/s507) policyholders are able to make partial surrenders or assignments of broadly up to 5% of accumulated premiums with any tax charge postponed until maturity or other later realisation. This is known as the '5% deferral rule' or the 'excess rule'. When the policy comes to an end any earlier withdrawals are taken into account in calculating the end gain.

However when considering the position of a remittance basis user you will need to consider what income or gains they used to pay the premium due under the contract or policy. Where an individual purchases an overseas life insurance, or other income-generating, policy and subsequently part of that policy is surrendered for a cash payment and that money is brought to the UK, such payments will be treated as taxable remittances to the extent that the purchase of the original premium was made with the individual's untaxed foreign income and gains that would have been taxed on the remittance basis if remitted to the UK.

So if the premium was paid using the individual's foreign income or foreign gains that were untaxed when they arose, because the individual was a remittance basis user in that year, then any of the 5% withdrawal will be a taxable remittance if the money is brought to, or received or used in, the UK. The amount attributable to the '5% withdrawal' indirectly derives from the original premium paid, so Conditions A and B of s809L apply.

**Withdrawals in excess of 5% or full surrenders**

If the individual withdraws more than 5% of accumulated premiums then, the amount in excess of 5% or the actual gain if a full surrender, will be chargeable to income tax under the chargeable event legislation. It is charged on the arising basis whether it is remitted or not.

### 30.4.5 *Individual non-resident in year of chargeable event*

The charge only applies "if the individual is UK resident in the tax year in which the gain arises": s.465(1) ITTOIA.

Before ITTOIA, it was clear from ESC B53 that the split year concession did not apply. Now ESC B53 is obsolete, in relation to individuals, and this point is not expressly stated in ESC A11 which at face value applies a split year treatment in all cases including this one. However, it is likely that HMRC will not change their practice, and their decision to do that could not be challenged.

The temporary non-residence rule[13] does not apply. This is not an anomaly: it mitigates the unfairness of the lack of a remittance basis.

### 30.4.6 *Non-resident period relief*

There is a relief for the individual who is UK resident in the year that the gain arises (so they are within the charge) but who has formerly been non-resident. I refer to this as "**non-resident period relief**". The relief is set out in s.528 ITTOIA:

> (1) The gain from a foreign policy of life insurance or foreign capital redemption policy[14] is reduced for the purposes of this Chapter if the policy holder was not UK resident throughout the policy period.
> (2) The amount of the reduction is the appropriate fraction of the gain.
> (3) The appropriate fraction is (A ÷ B) where—
> A is the number of days on which the policy holder was not UK resident in the policy period, and
> B is the number of days in that period.

The relief applies where individuals are charged on the gain as beneficial owners or security owners (bond conditions A or C). It does not help individuals who have had non-resident periods but who are charged as creators of a trust (bond condition B). Section 529(1) ITTOIA provides:

> Section 528 does not apply if, when the chargeable event occurs or at any time during the policy period, the policy is or was held—
> (a) by a non-UK resident trustee,
> (b) by non-UK resident trustees,[15] or
> (c) by a foreign institution.[16]

13 See 8.1 (Temporary non-residence).

14 These terms are defined in s.476(3) ITTOIA.

15 It is clumsy and of course unnecessary to refer to trustee(s) both in the singular and the plural; but it does not matter.

16 For completeness, there is transitional relief for policies held on 19 March 1985: see para 106 Sch 2 ITTOIA.

## 30.5 Liability of UK trust

If the creator of the trust is alive and UK resident, they will be taxed on the gain.[17] Section 467 ITTOIA provides for the situations where the creator is not taxable:

> (1) Trustees are liable for tax under this Chapter if immediately before the chargeable event in question occurs they are UK resident and condition A, B, C or D is met.

I refer to **"trust policy conditions A, B, C or D"** to avoid confusion with the myriad other conditions in ITTOIA. It is considered that these conditions must be satisfied immediately before the event, ie "immediately before" governs the phrase"they are UK resident" and "condition A, B, C or D is met"

> (1A) If trustees are liable for tax under this Chapter, the gain is treated for income tax purposes as income of the trustees.

The rate of tax is in principle 50%.[18] An appointment to UK resident beneficiaries before the chargeable event may reduce the rate of tax and an appointment to non-resident beneficiaries may avoid tax altogether. A trust migration is effective if done before the chargeable event; it is not necessary to wait until the following tax year.

### 30.5.1 *Trust policy condition A (charitable trust)*

Section 467 ITTOIA provides

> (2) Condition A is that the rights under the policy or contract are held by the trustees on charitable trusts.

### 30.5.2 *Trust policy condition B (absent settlor)*

Section 467 ITTOIA provides

17 See 30.4 (Liability of individuals and individual "creators").
18 Section 482 ITA type 7: see 22.2.3 (Other income taxed at top rates).

(3) Condition B is that—
(a) those rights are held by the trustees on non-charitable trusts, and
(b) one or more of the absent settlor conditions is met.
(4) The absent settlor conditions are that the person who created the trusts—
(a) is non-UK resident,
(b) has died, or
(c) in the case of a company or foreign institution (see section 468(5)), has been dissolved or wound up or has otherwise come to an end.

### 30.5.3 *Trust policy conditions C and D*

Section 467 ITTOIA provides:

(5) Condition C is that—
(a) the rights under the policy or contract are held by the trustees on non-charitable trusts,
(b) condition B does not apply, and
(c) neither section 465 nor section 466 applies.
(6) Condition D is that the rights under the policy or contract are held as security for a debt owed by the trustees.

## 30.6 Non-resident trusts and companies

Non-resident trustees are outside the scope of the charge on a chargeable event because s.467 (which imposes the charge on trustees) applies only to UK resident trustees.

A non-resident company is outside the scope of the charge under ITTOIA (which does not apply to companies). It is outside the scope of the charges in CTA 2009 (which only apply to corporation tax).[19]

---

19 For completeness, ESC C33 provides:

**"Non-UK resident companies and chargeable event gains on life insurance policies, life annuity contracts and capital redemption policies**

1 A "gain" may be treated as arising in connection with a policy of life insurance, a life annuity contract or a capital redemption policy when a "chargeable event" occurs or is treated as occurring. Chapter 2 of Part 13 of ICTA defines "chargeable events" and sets out how a "gain" is calculated where the chargeable person is a company. It also contains the other provisions relating to chargeable events referred to below. A gain may also be treated as arising on a company in connection with a personal portfolio bond under the Personal Portfolio Bond (Tax) Regulations, SI

In the absence of express provision, the chargeable event gain would not fall within the TAA provisions because the receipt by the person abroad (assuming they are non-resident) is capital and not income or (more fundamentally) the chargeable event gain is not income.[20] However, s.468 ITTOIA deals with this. It is helpful to consider trusts and companies separately.

### 30.6.1 *Non-resident trust*

Section 468 ITTOIA provides:

> (1) This section applies if a gain is treated as arising under this Chapter and ...
> (a) trustees who are non-UK resident would be liable for tax in respect of the gain as a result of section 467 if the trustees were UK resident immediately before the chargeable event in question occurs, ...
> (2) Chapter 2 of Part 13 of ITA 2007 (which prevents avoidance of tax where an individual who is ordinarily UK resident benefits from a transfer of assets) applies with the modifications specified in subsection (3) or (4).

---

1999/1029 reg 5.
2 This concession is about the circumstances in which a gain may be treated as part of the total income of a company.
These are when—
– a company is the beneficial owner of the rights conferred by a policy or contract;
– the rights are held on trusts created by an individual or a company; or
– the rights are held as security for a debt owed by a company.
3 The provisions that deem a gain to be part of the income of an individual or a company are not restricted to UK residents. Except as set out in para 4, however, HMRC will not pursue liability to tax on a gain that is treated as income of a company that is not resident in the UK at any time during the period for which the gain would otherwise have been charged.
4 A tax liability may arise if a policy or contract is held as property used by, or held by, a UK branch or agency of a company that is not resident in the UK.
5 Nothing in this concession affects—
– a gain that is treated as constituting income payable to non-resident trustees or to a company or other institution resident or domiciled outside the UK; and
– the tax treatment of a benefit that an individual ordinarily resident in the UK receives from the trustees, the company or other institution."

The concession is now redundant following the rewrite of the ICTA provisions and the rule is statutory rather than concessionary.

20 See 25.13 (Capital receipts deemed to be income).

> (3) In a case within subsection (1)(a), Chapter 2 of Part 13 of ITA 2007 applies as if—
> (a) the gain were income becoming payable to the trustees, and
> (b) that income arose to the trustees in the tax year in which the gain arises. ...

This incorporates ss.720[21] and 731 ITA.

### 30.6.2 *Non-resident company or institution*

Section 468 ITTOIA provides (so far as relevant):

> (1) This section applies if a gain is treated as arising under this Chapter and ...
> (b) immediately before that event occurs—
> (i) a foreign institution[22] beneficially owns *a share* in the rights,
> (ii) the rights are held for the purposes of a foreign institution, or
> (iii) *a share* in them is held as security for a foreign institution's debt.
> (Emphasis added)

It is curious that (i) and (iii) refer to *shares* in rights. Contrast ss.465(2) and 467(2) ITTOIA.[23] On a traditional approach to statutory construction the (i) and (iii) do not apply if the foreign institution beneficially owns the *entire* policy. The gap is more or less filled by s.468(1)(b)(ii) as if a foreign company owns a policy, the rights are held for its purposes. If necessary a court might decide there was a slip in the drafting, which on a modern approach to construction could be corrected. Perhaps the drafting will be corrected some time.

Assuming s.468(1)(b) ITTOIA is satisfied, we read on:

---

21 Section 720 ITA is not needed here because a transferor within s.720 would normally be taxed as the creator of the settlement, but the overlap does not matter. It is similar to the overlap of s.624 ITTOIA and s.720 ITA.

22 "Foreign" is defined in s.468(5) ITTOIA: "In this Chapter 'foreign institution' means a company or other institution resident or domiciled outside the UK." The word institution is not defined.

23 See 30.4 (Liability of individuals and individual "creators") and 30.5 (Liability of UK trust).

> (2) Chapter 2 of Part 13 of ITA 2007 (which prevents avoidance of tax where an individual who is ordinarily UK resident benefits from a transfer of assets) applies with the modifications specified in subsection (3) or (4). ...
> (4) In a case within subsection (1)(b), Chapter 2 of Part 13 of ITA 2007 applies as if—
> (a) the gain were income becoming payable to the institution, and
> (b) that income arose to the institution in the tax year in which the gain arises.

Section 720 ITA is needed here, as the transferor would not otherwise be taxed on the gain. The extension of the scope of s.720 in 2005 caught those described in the 4th edition of this work as "bold enough to plan on the assumption that the current law will still apply when a policy is surrendered at some time in the future".

### 30.6.3 *Transferor's s.731 defence: gains arising before 5 December 2005*

Suppose:
(1) gains arose before 5 December 2005 to a foreign company or trust within s.731; the transferor was not subject to tax on those gains as they arose;[24] and
(2) the *transferor* receives a benefit.

A transferor is outside the scope of s.731: see 27.9 (Transferor's s.731 defence). Under the pre-5 December 2005 law, I suggested that the transferor's s.731 defence would not apply when s.720 did not apply. Now that s.720 does apply, the transferor's defence should apply even to pre-5 December 2005 gains. This could be something of a windfall for transferors; but since unrealised gains were brought within the s.720 charge from 5 December 2005, HMRC can hardly complain that realised gains now fall within the transferor's defence.

### 30.6.4 *Section 720 and s.731 remittance bases*

The s.720 remittance basis does not apply to a gain within s.720, because the gain does not meet the requirement that the income of the person

24 See the 4th edition of this book, para 20.5.

abroad "would be relevant foreign income if it were the individual's".[25]

For the same reason, a benefit which relates to the gain does not qualify for the s.731 remittance basis.[26]

### 30.6.5 *Income accruing to life company*

So far we have considered the taxation of chargeable event gains accruing to non-resident trusts or companies which hold policies.

The payment to a non-resident life company (or a subsidiary of such a company) is in principle a transfer of assets within the TAA provisions. The TAA provisions would in principle apply if:

(1) income arising as a result of the payment can be identified (ie if the sum paid is segregated); and

(2) the motive defence does not apply.

In a straightfoward case of the payment of a premium, the application of the motive defence is well established. However *IRC v Willougby* decided only that Professor Willoughby's bond was not taken out for tax avoidance purposes in the straightforward circumstances of his case. If there were tax avoidance in the true sense the TAA provisions will apply: the fact that a policy is taken out does not preclude the possibility of tax avoidance.

See 28.8 (Life policies).

## 30.7 Section 624 and chargeable event gains

Section 624 ITTOIA never applies to a chargeable event gain. To see why, it is helpful to distinguish:

(1) UK resident settlor;

(2) non-UK resident settlor:

   (a) non-resident trustees;

   (b) UK resident trustees.

Where the settlor is UK resident they are taxed on the gain under basic principles as a creator. Section 624 does not apply because the gain is not income of the trustees.

Where the settlor is non-resident and the trustees are non-resident,

25 See 26.14 (Section 720 remittance basis).

26 See 27.34 (Section 731 remittance).

section 624 does not apply because the gain is not "income" and so it is not "income arising under a settlement".

Where the trustees are UK resident, but the settlor is not resident, the gain is deemed to be income of the trustees. In these circumstances the s.624 non-resident settlor defence will apply.[27]

## 30.8 Liability of personal representatives

Section 466 ITTOIA provides:

> (1) Personal representatives are liable for tax under this Chapter if
> [a] the rights under the policy or contract are held by them and
> [b] the condition in subsection (2) is met
> (and accordingly the gain is treated for income tax purposes as income of the personal representatives in that capacity).
> (2) The condition is that if an individual were liable for tax on a gain in respect of the policy or contract, section 530(1) (individual treated as having paid tax at the basic rate) would be disapplied as a result of—
> (a) section 531(1) (exceptions from section 530 for policies and contracts specified in section 531(3)), or
> (b) para 109(2) of Schedule 2 (contracts in accounting periods beginning before 1st January 1992).
> (3) For cases where the condition in subsection (2) is not met, see section 664 of this Act and [section 947 of CTA 2009] (under which the gain is treated as part of the aggregate income of the estate for the purposes of Chapter 6 of Part 5 of this Act and [Chapter 3 of Part 10 of CTA 2009] respectively).

The condition in subsection (2)(b) is a transitional rule now of limited scope.

In order to understand the condition in subsection (2)(a) one needs to follow a trail of statutory provisions. First, ss.530 and 531 ITTOIA:

> **530 Income tax treated as paid etc.**
> (1) An individual or trustees who are liable for tax on an amount under this Chapter are treated as having paid income tax at the basic rate on

27 That is, the gain is such that if the settlor were actually entitled thereto, they would not be chargeable to income tax by reason of being non-resident: see 24.7 (Non-resident settlor).

that amount.

...

I refer to this as a "**s.530 tax credit**".

> **531 Exceptions to section 530**
> (1) Section 530 does not apply to gains from the kinds of policies and contracts specified in subsection (3), except for the purposes of calculating relief under section 535 (top slicing relief).
> (2) Subsection (1) is subject to—
> section 532 (relief for policies and contracts with European Economic Area insurers), and
> section 534 (regulations providing for relief in other cases where foreign tax chargeable).
> (3) The policies and contracts are—
> (a) a policy of life insurance issued or a contract for a life annuity made by a friendly society in the course of tax exempt life or endowment business[28],
> (b) a foreign policy of life insurance that does not meet conditions A and B,
> (c) a contract for a life annuity (other than one within para (a)) which has at any time not formed part of any insurance company's or friendly society's basic life assurance and general annuity business the income and gains of which are subject to corporation tax, and
> (d) a foreign capital redemption policy.

If we focus on foreign life policies, the relevant provision is (3)(b). The question is whether the foreign policy does not meet conditions A and B (which I will call "**foreign policy conditions A and B**"). Section 531(5) provides:

> Condition A is that the policy falls within para (a) of the definition of "foreign policy of life insurance" in section 476(3) (policy issued by a non-UK resident company).

So we turn to s.476(3) ITTOIA:

> In this Chapter—

28 Terms defined in subsection (4); the definitions need not be considered here.

> "foreign policy of life insurance" means—
> (a) a policy of life insurance issued by a non-UK resident company, and
> (b) a policy of life insurance which forms part of the overseas life assurance business of an insurance company or friendly society ...

A foreign policy will typically fall within that definition, so it will meet the condition in s.476(3)(a). The meaning of "overseas life assurance business" can be found in s.431D(1) ICTA:

> **431D Meaning of "overseas life assurance business"**
> (1) In this Chapter "overseas life assurance business" means so much of a company's relevant life assurance business as is with a policy holder or annuitant not residing in the UK (but not including the reinsurance of such business).

I think we conclude that most foreign policies will satisfy foreign policy condition A. That takes us to foreign policy condition B:

> (6) Condition B is that the conditions in para 24(3) of Schedule 15 to ICTA (conditions that are required to be met for certain policies issued by non-UK resident companies to be qualifying policies) are met throughout the period between—
> (a) the date on which the policy was issued, and
> (b) the date on which the gain arises.

It is easy to become tangled in the double double negatives, but I think the chain of reasoning goes as follows:

(1) Foreign policies will not (usually) satisfy condition B.
(2) So they fall within s.531(3)(b) ("a foreign policy of life insurance that does not meet conditions A and B").
(3) So they do not qualify for a s.530 tax credit.
(4) So they do meet the condition in s. 466(2).
(5) So that PRs are liable for the chargeable event gain.

This could be avoided by an assent to a beneficiary.

Section 466 ITTOIA is not expressed to be limited to UK resident PRs. However s.368 ITTOIA provides:

> (1) Income arising to a UK resident is chargeable to tax under this Part whether or not it is from a source in the UK.
> (2) Income arising to a non-UK resident is chargeable to tax under this

> Part only if it is from a source in the UK.
> (3) References in this section to income which is from a source in the UK include, in the case of any income which does not have a source, references to income which has a comparable connection to the UK.
> (4) This section is subject to any express or implied provision to the contrary in this Part (or elsewhere in the Income Tax Acts).

Thus non-resident PRs are not chargeable. ITTOIA EN confirms that this is intended:

> 421. Chapter 1 of Part 4 of this Act provides a general territorial limitation on the scope of the Part. As regards income arising outside the UK, it limits the charge to such income arising to a UK resident. See section 368 (territorial scope of Part 4 charges) and the related commentary on that Chapter. [Section 465 ITTOIA] overlaps and supplements that Chapter to ensure that a non-UK resident individual is not liable to tax under this Chapter on any gains, whether arising in the UK or elsewhere.

## 30.9 Planning for immigrant to UK

### 30.9.1 *Immigrant policyholder who has become resident in the UK*

The advisers of a foreign domiciled person who has recently come to the UK should check whether they or any trust they have created has a policy or contract. If so, the position needs to be reviewed.

An assignment of the policy or contract from an individual to a trust (resident or not) does not help, since the individual remains liable as creator.

One simple form of planning is to arrange there is no chargeable event in a year when the individual is UK resident. The partial surrender of up to 5% of the premium paid for the policy or contract per year is not a chargeable event. The surrender, assignment for money or money's worth and maturity of the policy or contract is normally a chargeable event but this can be anticipated and perhaps postponed to a year when the individual is non-resident. A death giving rise to benefits under the policy is also a chargeable event unless the policy is a qualifying policy. In such a case one would be at risk that the individual may die while UK resident, giving rise to the tax charge on their estate.

Another course is for the individual to surrender their policy shortly after becoming UK resident; most of the gain will qualify for non-resident period relief.[29]

If a chargeable event is anticipated, the policy or contract could be assigned to a non-resident company, perhaps held by a trust. This postpones the charge to the time that an ordinarily resident individual receives benefits.[30] An assignment for no consideration is not a chargeable event.

### 30.9.2 *Planning before becoming UK resident*

There are further possibilities if the individual acts before the tax year in which they become UK resident. One possibility is to surrender the policies.

## 30.10 Personal portfolio bonds

Urgent action needs to be taken if the individual (or trust created by them) holds a "personal portfolio bond" as defined in s.516 ITTOIA. This topic cannot be pursued here.

## 30.11 CGT exemption for policies

Sections 204 and 210 TCGA provide exemptions for policies and contracts. In outline, policies are exempt unless assigned for consideration (known as secondhand policies).

## 30.12 IHT on policy held by foreign domiciliary

The IHT Manual provides:

> **30039 - Policies effected by a person who dies domiciled outside the UK** [October 2007]
> Under the proviso to the [Revenue Act][31] 1884 s.11 as amended by the [Revenue Act] 1889 s.19 a grant of representation (IHTM05001) in the UK is not necessary in order to recover money payable under a policy

29 See 30.4.6 (Non-resident period relief).

30 See 30.6.2 (Non-resident company or institution).

31 The Manual wrongly refers to the Customs & Inland Revenue Acts.

of life assurance effected with any insurance company by a person who dies domiciled[32] outside the UK. For the purposes of this section, any policy under which a sum of money becomes payable on a death may be treated as a policy of life assurance, and any association of persons which issued policies in the ordinary course of its business, whether incorporated or not, may be treated as an insurance company.

These provisions do **not** confer any exemption from IHT. Where policy moneys are situate in the UK, tax is nonetheless payable though the moneys may be receivable without the production of a UK grant of representation.

The insurance company can however be liable for the tax where

[1] it retains policy moneys for the benefit of the beneficiary for investment purposes, outside the terms of the life assurance contract, in which case IHTA s.200(1)(c) may apply to the company as a vestee, or

[2] it received prior notice that the policy in question is subject to a statutory charge for tax under s.237 IHTA.[33]

Where there is other estate in the UK in respect of which a UK grant is necessary, but the UK representatives are only administrators acting under a power of attorney and in point of fact have not intermeddled with the policy moneys and, without knowledge of the claim for tax in respect of such moneys, have parted with the assets collected by them to their principal (the foreign executor), the claim in respect of the policy moneys should not be pursued against the UK administrators.

Similar conditions apply in Scotland to a Factor or Attorney authorised by executors abroad to give up an Inventory (in such cases it is the executors who are confirmed, not the Factor or Attorney).

Refer to TG [Technical Group] for consideration

- all enquiries on this topic
- any case where it is apparent that policy moneys have been paid out without a grant being produced.

**(This text has been withheld because of exemptions in the Freedom of Information Act 2000)**

The withheld text may well state that IHT in many cases is uncollectable and set out the circumstances in which no attempt should be made to collect it. In practice a well advised foreign domiciliary (not deemed domiciled) will not acquire or retain a UK situate policy. However a

32 The deemed domicile rule does not apply for this purpose.

33 In practice it is unlikely that either [1] or [2] will be the case.

person who is deemed UK domiciled may find this useful, as the executors can fund IHT more easily if they can first recover the money due under the policy and then pay the IHT and obtain a grant.

CHAPTER THIRTY ONE

# OFFSHORE FUNDS: DEFINITIONS

## 31.1 Offshore funds – Introduction

Before December 2009 I wrote that this subject needed a long book to itself. That is no longer the case: several volumes would now be needed to cover the subject properly.

I formerly added that it would be an unrewarding work because the rules are not well observed in practice. However this is true of many of the areas touched on by the FA 2008, so offshore funds are not now so different.

This chapter considers the definition of offshore fund and associated expressions. The following chapter considers the taxation of offshore funds.

The definitions discussed in this chapter were introduced in the FA 2008,[1] where they survived for two years before being rewritten into TIOPA.

The tax legislation is in the Offshore Funds (Tax) Regulations ("OFTR"). The OFTR naturally referred to the then current provisions of the FA 2008. Rewrite Acts did not update statutory references in secondary legislation so those references will remain indefinitely in the regulations. The obsolete references take effect as references to the corresponding new provisions[2] but readers need to work out for themselves what those are (I

---

1 The FA 2008 sensibly jettisoned the reform in the FA 2007, which was thoroughly botched. The 2007 definition (discussed at 23.3 of the 7th edition of this work) is still relevant for transitional relief.

2 Para 5(1) Sch 9 TIOPA provides:
"Any reference (express or implied) in any enactment, instrument or document to a superseded enactment in its application for relevant tax purposes is to be read, so far as is required for those relevant tax purposes, as including, in relation to times, circumstances or purposes in relation to which any corresponding rewritten provision has effect, a reference to the rewritten provision."
Para 9(1) Sch 9 TIOPA provides: "In this Part—

will insert them in brackets). The Offshore Funds Manual is similarly out of date though eventually its references might be updated.

While the drafting in the FA 2008 was not beyond criticism, the reader may well question whether this rewrite was worthwhile, and be grateful that the rewrite project has at last come to an end; but there it is.

The TIOPA definitions only apply for the purposes of Part 8 TIOPA so they need to be incorporated by reference when the same terms are used elsewhere.

## 31.2 Meaning of "participant"

Section 362 TIOPA provides a commonsense definition:

> (1) In this Part references to "participant", in relation to arrangements (or a fund), are to a person taking part in the arrangements (or the arrangements constituting the fund), whether by becoming the owner of, or of any part of, the property that is the subject of the arrangements or otherwise.
> (2) In this Part references (however expressed) to participation, in relation to arrangements (or a fund), are to be read in accordance with subsection (1).[3]

Offshore Funds Manual provides:

> **02600: Meaning of mutual fund: introduction**
> ... 'Participants' are those persons who take part in the arrangements – that is, the investors - and it makes no difference whether they directly own the underlying property of the arrangements or not. So, for example, there is no difference between a participant who has a share in a mutual

---

"enactment" includes subordinate legislation (within the meaning of the Interpretation Act 1978),
"relevant tax purposes" means, in relation to a superseded enactment, tax purposes for which the enactment has been rewritten by this Act, and
"superseded enactment" means an earlier enactment which has been rewritten by this Act for certain tax purposes (whether it applied only for those purposes or for those and other tax purposes)."

3 So reg.3(1) OFTR incorporates this definition by reference:
"In these Regulations "offshore fund" has the meaning given by section 40A(2) of FA 2008 (read with the provisions of the relevant group of sections)."

fund constituted by a company (in which case under most forms of company law the participant would not have an ownership interest in the underlying property) and on the other hand, an interest in a trust or other contractual arrangement which may well give the participant a direct ownership right (FA2008/S40A(5)).

## 31.3 Meaning of "offshore fund"

### 31.3.1 *Basic definition*

Section 355(1) TIOPA provides:

> In section 354 "offshore fund" means—
> (a) a mutual fund constituted by a body corporate resident outside the UK,
> (b) a mutual fund under which property is held on trust for the participants where the trustees of the property are not resident in the UK, or
> (c) a mutual fund constituted by other arrangements that create rights in the nature of co-ownership[4] where the arrangements take effect by virtue of the law of a territory outside the UK.

This definition only applies for the purposes of s.354, so it needs to be incorporated by reference when the expression "offshore fund" is used elsewhere.[5]

In this work:
(1) **"a corporate fund"** means an offshore fund within (a) - a company.
(2) **"a non-corporate fund"** means an offshore fund within (b) or (c) - a unit trust or co-ownership arrangement.

For completeness: Section 363A TIOPA provides a special residence rule for the benefit of EU offshore funds (in short, deeming such funds to be non-UK resident and thus disapplying the usual management and control

4 Section 355(3) TIOPA provides:
"In this section ... "co-ownership" is not restricted to the meaning of that term in the law of any part of the UK."

5 So reg.3(1) OFTR provides:
> "In these Regulations "offshore fund" has the meaning given by section 40A(2) of FA 2008 (read with the provisions of the relevant group of sections)."

The definition is similarly incorporated in s.378A(7) ITTOIA.

test.) EN FB 2011 provides:

> The UCITS IV directive provides that an investment fund authorised under the provisions of Article 5 of that directive may have a manager which is not resident in the same State as that in which the fund is established and regulated.
> 6. [Section 363A] ensures that the affected offshore funds and their investors will not be subject to any tax consequences in the UK as a result of having a UK resident management company.

### 31.3.2 *Power to vary definition*

The drafter (perhaps as a result of the lack of success of the earlier statutory definitions) did not have much confidence in the statutory definition, and conferred wide powers to vary the rules by statutory instrument. These powers have not yet been exercised.

### 31.3.3 *Partnerships*

A general or limited partnership might fall within limb (c) of the definition but s.355(2) TIOPA takes it out:

> Subsection (1)(c) does not include a mutual fund constituted by two or more persons carrying on a trade or business in partnership.

A LLP might fall within limb (a) of the definition but s.355(3) TIOPA takes it out:

> In this section—
> "body corporate" does not include a limited liability partnership.[6]

Partnerships are excluded because partnership income and gains accrue to the partners: there is no scope or need for offshore fund rules. SAI Manual provides:

> **6370 Offshore income gains: The tax charge** [August 2008]
> Where an offshore income gain is realised by a partnership, each partner should be separately assessed in respect of his share of the ... income.

6 This is otiose but it does not matter.

### 31.3.4 *Luxembourg Fonds Commun de Placement*

Offshore Funds Manual 02400 provides:

> Types of mutual funds that come within the definition of an offshore fund at FA2008/S40A(2)(c) would include, for example, contractual arrangements such as Luxembourg Fonds Commun de Placement ('FCPs')...

On this topic see 35.7 (Luxembourg Fonds Commun de Placement).

## 31.4 "Mutual fund"

The key term is "mutual fund". Section 356(1) TIOPA provides:

> (1) In section 355 "mutual fund" means arrangements with respect to property of any description (including money) that meet conditions A, B and C.
> (2) Subsection (1) is subject—
> (a) to the exceptions made by or under sections 357 and 359, and
> (b) to sections 360 and 361.

I refer to "**mutual fund conditions A to C**" to avoid confusion with any other conditions.

### 31.4.1 *Mutual fund condition A: mutuality*

Section 356(3) TIOPA provides:

> Condition A is that the purpose or effect of the arrangements is to enable the participants—
>
> (a) to participate in the acquisition, holding, management or disposal of the property, or
> (b) to receive profits or income arising from the acquisition, holding, management or disposal of the property or sums paid out of such profits or income.

The intention, broadly, is that mutual funds should have the characteristics of pooled investments.

### 31.4.2 *Mutual fund condition B: day-to-day management*

Section 356 TIOPA provides:

> (4) Condition B is that the participants do not have day-to-day control of the management of the property.
> (5) For the purposes of condition B a participant does not have day-to-day control of the management of property by virtue of having a right to be consulted or to give directions.

### 31.4.3 *Mutual fund condition C: realisation at NAV*

Section 356(6) TIOPA provides:

> Condition C is that, under the terms of the arrangements, a reasonable investor participating in the arrangements would expect to be able to realise all or part of an investment in the arrangements on a basis calculated entirely, or almost entirely, by reference to—
> (a) the net asset value of the property that is the subject of the arrangements, or
> (b) an index of any description.

Offshore Funds Manual 02725 provides:

> There is no definition within the legislation of 'almost entirely' as any sort of percentage limit of variation from NAV could be susceptible to arrangements seeking to avoid the intention of the offshore funds rules. It depends on what the arrangements are intended to provide. For example, buy-back arrangements normally take effect when there is a large discount to NAV, but may also be used in very exceptional circumstances to buy back at a very small discount or at NAV which, on its own, may not mean that the arrangements constitute a mutual fund. OFM05250 provides further guidance on share buy-backs and share issuance. ...
> **Realisation of investment on a basis calculated at or close to NAV**
> It is not necessary that the investor obtains NAV directly from the fund. Where a reasonable investor could expect to receive NAV on selling their interest on a secondary market the fund will be an offshore fund if all other conditions are satisfied. For example, Exchange Traded Funds (ETFs) are usually operated in such a way that the quoted prices are at NAV or very close to NAV because market makers are able to create or redeem units (and in that sense such funds are open-ended), and so ETFs would be expected to qualify as mutual funds. On the other hand, arrangements where a fund offered to buy back shares to keep a

discount on the share price within a reasonable limit would not make the fund a mutual fund unless it was clear to a reasonable investor at the time that they invested (or on alteration of the terms of an investment) that there were such arrangements and that they were intended to ensure that such purchases were at NAV or almost or very close to NAV.

**Shares trading close to NAV**

The mere fact that shares in a closed-ended arrangement sometimes trade at or close to NAV does not mean that Condition C is satisfied unless that is as a result of arrangements being in place such that a reasonable investor could expect to receive NAV or close to NAV on selling their interest.

**Warrants and options**

Warrants or options that give an investor the right to sell shares back to an issuer for a particular price will not cause Condition C to be satisfied unless the price is determined by reference to NAV so that the investment can be realised at or close to NAV. Similarly, rights that carry the option to convert to other classes of interest would only satisfy Condition C if the new rights themselves permitted an investor to realise their investment at or close to NAV.

**Realisation of investment by reference an index**

In some cases an investor may have a right to redeem an investment at an amount not representing the assets directly invested in, but which is expressed in terms of an index. The fund manager may then invest the assets so as to produce a return as nearly as possible matching the index which is offered. In such a case Condition C will also be met. Again, this is subject to exceptions where conditions 'X' or 'Y' apply....

Offshore Funds Manual 02300 provides:

It is expected that relatively few fixed share capital companies will fall within the new definition. So, for example, an investment in a trading or investment company or group with fixed share capital and that was not limited life (even if local law provides for continuation votes) would not come within the definition. But under the characteristics based approach, entities that have fixed share capital and that are structured in such a way that they share characteristics of open-ended share capital arrangements will be within the definition. So, fixed share capital companies that are predicated on the basis that investors will get a net asset value return or a return which is very close to net asset value may fall within the new definition. That will also be the case where there are no redemption rights but the arrangements have a limited life and a reasonable investor could expect to get a net asset value return on winding up (unless one of the exceptions in FA2008/S40E applies).

## 31.5 Winding up exemption

There are some exceptions to mutual fund condition C.

Section 357(1) TIOPA provides:

> Arrangements are not a mutual fund for the purposes of section 355 if—
> (a) condition D is met, and
> (b) condition E or F is met.

I refer to **"winding up conditions D to F"** to avoid confusion with the other conditions.

Offshore Funds Manual 02725 provides:

> **... Open-ended and closed-ended arrangements**
> Condition C, when read in conjunction with section 40E(1), provides a clear distinction between a mutual fund and a company organised in the way that, for example, an investment trust company in the UK is organised. Such a company is a closed-ended company, in the sense that it does not allow investors to redeem their shares on request, nor does it issue new shares on request (but see OFM05300 onwards where such closed-ended companies have a limited life). This contrasts with an open-ended investment company which is designed to enable investors to realise NAV and does so through its ability to issue or redeem shares.
> A reasonable investor in what may generally be regarded as a closed-ended company that meets Conditions A or B would normally only expect to be able to realise NAV on the liquidation of the company. So section 40E(1)(a) excludes from section 40B ('meaning of 'mutual fund' etc') any case where a reasonable investor would only be able to realise the investment in the arrangements in the event of a winding-up, dissolution or termination of the arrangements, and where certain other conditions (condition 'X' or 'Y') apply (section 40E(1)(b) - see OFM03100 onwards).

Offshore Fund Manual 03105 provides:

> ... Section 40E(1)(a) has the effect that 'open-ended' arrangements (i.e. those that enable investors to realise NAV by disposing of their interest to the fund manager) cannot come within the exceptions provided by 40E.
> The conditions 'X' or 'Y' do, however, except certain types of closed-ended arrangements from the meaning of a 'mutual fund'.
> The exceptions can also apply to arrangements where a reasonable investor could expect to realise their investment at or close to NAV as a result of the intention of a fund to dispose of its assets in tranches followed by a final distribution of any remaining assets, as opposed to a liquidation of all of the fund's assets on a winding-up (see OFM02730).

### 31.5.1 *Winding up condition D (no liquidation date)*

Section 357 TIOPA provides:

(2) Condition D is that, under the terms of the arrangements, a reasonable investor participating in the arrangements would expect to be able to realise all or part of an investment in the arrangements on a basis mentioned in section 356(6) only in the event of the winding up, dissolution or termination of the arrangements.....
(8) For the purposes of this section the fact that arrangements provide for a vote or other action that may lead to the winding up, dissolution or termination of the arrangements does not, by itself, mean that the arrangements are designed to wind up, dissolve or terminate on a date stated in or determinable under the arrangements.

Offshore Funds Manual 03110 provides:

The most important exception, provided by condition X (section 40E(2)), is that a reasonable investor cannot expect the arrangements to terminate on or by a date fixed in advance.
This condition means, for example, that ordinary shares in any company with defined share capital (that is, not an open-ended company with variable share capital) and which does not have a limited life, will not be an offshore fund.
Condition X requires that the arrangements are not such that they are designed to terminate on a date that is stated or determinable under the arrangements. As elsewhere "arrangements" has a wide meaning and is not limited to the documents establishing the fund, so can include all agreements and understandings. Similarly, "determinable" has a wide meaning. So for example, if a fund prospectus stated that the fund was intended to wind-up after it had realised all of its assets, but those assets consisted of debt instruments none of which was longer dated than 5 years then the termination date would be determinable (unless, of course, it was clear that the fund would reinvest the proceeds of asset realisations and was not 'limited life' in any other regard).
**Asset realisations**
It will not be sufficient to satisfy condition X for a fund to state that an intention to dispose of its assets on or by a certain date is subject to market conditions or some similar caveat where it is clear that a long-stop date exists, or there is no specific and realistic possibility that would lead a reasonable investor to conclude that the fund would not necessarily be able to dispose of its assets by the date stated. For example, if a fund's assets consist of short-dated debt instruments, or commercial leases with a life of 20 years then, unless the fund was reasonably likely to re-invest funds from disposals, condition X could not be satisfied. Where there is no such long-stop date implicit from the nature of the assets themselves then condition X may still not be satisfied if a fund stated an intention to dispose of its assets in, say, four years' time 'subject to market conditions' or some other broad statement.
HMRC will consider particular cases where a fund manager or its advisers believe that there are tangible and specific reasons why such a statement should lead to condition X being satisfied but this is expected to apply in exceptional

circumstances only. An example of the circumstances when a broad statement relating to whether assets could be realised on or by a given date may be sufficient to satisfy condition X would be if a fund held significant assets in a country about which there were real and significant concerns regarding any future government's policy in respect of the assets in question (such as public declarations of an intention to nationalise particular industries or companies in which the fund holds significant investments).

**Continuation votes**

Where arrangements provide for a continuation vote or similar action to determine whether they will persist beyond a given date that will not, in itself, mean that condition X is not met. So, if a reasonable investor, considering all of the facts, could not have any expectation that a continuation vote would fail then, provided the continuation vote was not for a determinable period and absent any other factors, the arrangements could not be said to have a determinable life and condition X could then be satisfied. HMRC accept that it could usually be expected that condition X would be satisfied where continuation votes are provided for because continuation resolutions may well be passed if a fund is performing well, and a reasonable investor would be expected to invest on the basis that a fund would be successful. However, if arrangements or understandings are in place so that it could be expected that a continuation vote would not be passed then there would be a determinable date..

### 31.5.2 *Winding up condition E (no fixed termination date)*

Section 357(3) TIOPA provides:

Condition E is that the arrangements are not designed to wind up, dissolve or terminate on a date stated in or determinable under the arrangements.

### 31.5.3 *Winding up condition F (no income)*

Section 357(4) TIOPA provides:

Condition F is that—
(a) the arrangements are designed to wind up, dissolve or terminate on a date stated in or determinable under the arrangements,
(b) subsection (5), (6) or (7) applies, and
(c) the arrangements are not designed to produce a return for participants that equates, in substance, to the return on an investment of money at interest.

### 31.5.4 *Subsection (5): no income-producing assets*

Section 357(5) TIOPA provides:

> This subsection applies if none of the assets that are the subject of the arrangements is a relevant income-producing asset (see section 358).

Section 358 TIOPA provides the definition:

> (1) This section has effect for the purposes of section 357.
> (2) An asset is a relevant income-producing asset if it produces income on which, if it were held directly by an individual resident in the UK, the individual would be charged to income tax (but see subsections (3) and (4)).
> (3) An asset is not a relevant income-producing asset if the asset is hedged, provided that no income is expected to arise from—
> (a) the asset (taking account of the hedging), or
> (b) any product of the hedging arrangements.
> (4) Cash awaiting investment is not a relevant income-producing asset, provided that the cash, and any income that it produces while awaiting investment, is invested as soon as reasonably practicable in assets that are not relevant income-producing assets (as defined by this section).

This is designed to exclude funds which invest in assets intended to give a purely capital growth based return.

Offshore Funds Manual 02725 provides:

> **Realisation of investment by reference an index**
> ...In many cases investments designed to produce an indexed return are likely to be non-income producing (that is, they reflect capital growth only) in which case the exception provided by FA2008/S40E(4) – condition Y1 – will apply (see OFM03100 onwards). Where an investment is by reference to an index that reflects both capital growth and income returns then condition Y1 would not apply, but condition Y3 might – see OFM03130.

### 31.5.5 *Subsection (6): no entitlement to income*

Section 357(6) TIOPA provides:

> This subsection applies if, under the terms of the arrangements, the participants in the arrangements are not entitled to the income from the

assets that are the subject of the arrangements or any benefit arising from such income.

Offshore Funds Manual 03125 provides:

An example of an arrangement satisfying this condition might be the capital shares or units in an arrangement which splits the rights to capital and income between the holders of different classes of interest, where the holders of capital shares or units are not entitled to any of the income or any benefit arising from the income.

### 31.5.6 *Subsection (7): income distributed*

Section 357(7) TIOPA provides:

This subsection applies if—
(a) under the terms of the arrangements, after deductions for reasonable expenses, any income produced by the assets that are the subject of the arrangements is required to be paid or credited to the participants, and
(b) a participant who is an individual resident in the UK would be charged to income tax on the amounts paid or credited.

## 31.6 Share buy backs and share issuance

Offshore Funds Manual provides:

**OFM05250 Particular arrangements: share buy-backs and share issuance**
The price or value of shares in fixed share capital companies may reflect either a discount or a premium to the net asset value of the underlying assets. It may also be the case in some circumstances that there is either directors' or investors' discretion to allow or require the buy-back of shares if there is a discount of a certain level between the net asset value of the arrangements and the share price. Provided the share buy-back arrangements are made to prevent the discount becoming too large by reference to net asset value, and provided a reasonable investor cannot expect to realise their investment either entirely or almost entirely by reference to net asset value (or by reference to an index), and there is no determinable termination date, then such arrangements will be outside the definition of an offshore fund for UK tax purposes (as Condition C at FA2008/S40B(5) will not be satisfied). Similar considerations apply where the shares trade at a premium.
For example, if a foreign equivalent of an investment trust was trading at a discount of 15% to NAV and bought its own shares on the open market to reduce the discount then, absent any factors that could lead to an investor being able to

expect to redeem their investment at or close to NAV, this would not cause Condition C at FA2008/S40B(5) to be satisfied: it is clear that before the company commenced to buy its own shares that some investors would not have been able to redeem their interest at NAV and that any subsequent reduction in the discount would be due to normal operation of the market. Without any factors indicating that the company would act to reduce the discount either having been in place prior to this market activity or at some point in the future, a reasonable investor could not expect to realise their investment at or close to NAV.

However, share buy-back arrangements that are specifically designed to provide tracking to net asset value will cause the company or share class to come within the definition of offshore fund. This would include any arrangements introduced as a result of changes to the constitution of a scheme. If a change in the terms of a scheme result in it coming within the definition of an offshore fund then UK investors are treated as if they had always held an interest in an offshore fund. If the fund becomes a reporting fund then investors may be able to make an election under regulation 48(2) to crystallise any offshore income gain at that point, with any subsequent gain being subject to chargeable gains treatment (provided the fund remains a reporting fund). See OFM 09100 and OFM11500 for further guidance.

When considering an investor's rights, account should be taken of all scheme documents, promotional documentation or communications to determine what guarantees or undertakings may have been given to the investor.

An undertaking or guarantee, etc, to buy back or redeem only a part of an investor's holding entirely or almost entirely by reference to the net asset value of the property or an index of any description can still constitute an expectation, so for example if the fund manager undertook to redeem or buy back an investor's shares in tranches the arrangements could still be within the definition.

Warrants or options that give an investor the right to sell shares back to an issuer for a particular price will not cause Condition C to be satisfied unless the price is determined by reference to NAV so that the investment can be realised at or close to NAV. Similarly, rights that carry the option to convert to other classes of interest would only satisfy Condition C if the new rights themselves permitted an investor to realise their investment at or close to NAV.

Where no guarantees or undertakings are given when the arrangements are set up or the scheme terms are amended, a subsequent buy-back or issue of shares would not, by itself, give rise to an expectation that a reasonable investor could realise their investment either entirely or almost entirely by reference to net asset value (or by reference to an index) and so such arrangements would fall outside the definition of an offshore fund.

## 31.7 Companies in course of liquidation

Offshore Funds Manual provides:

**OFM05330 Particular arrangements: limited life companies: company liquidations**

An investor may have invested in a company or other arrangement which subsequently goes into liquidation, at which point the investor might reasonably expect to realise their investment at net asset value. However, if a company or other arrangement is outside the definition of an offshore fund before it goes into liquidation, then being in liquidation will not by itself bring that company or arrangement into the definition of an offshore fund. This also applies in the case of self-managed wind downs with the subsequent appointment of a liquidator to complete the liquidation.

This treatment would also extend to the purchase of shares in a company after it has entered a self-managed wind down or liquidation. This may not be the case, though, for wind downs and liquidations that are intentionally extended or contrived.

Some overseas companies can be liquidated or reconstructed at any time. If there is a decision to do so, at the point of the approval of the reconstruction or liquidation the investors may obtain net asset value. However, the relevant point is whether a reasonable investor can expect the company to be liquidated or reconstructed in order to deliver net asset value. It is necessary to consider the reasonable investor's expectation to realise their investment either entirely or almost entirely by reference to net asset value (or by reference to an index) when the company was established (or when there was a change in the investor's rights).

## 31.8 Umbrella arrangements

### 31.8.1 *Meaning of "umbrella arrangements"*

Section 363 TIOPA provides:

(1) In this Part "umbrella arrangements" means arrangements which provide for separate pooling of the contributions of the participants and the profits or income out of which payments are made to them.
(2) In this Part references to a part of umbrella arrangements are to the arrangements relating to a separate pool.

### 31.8.2 *Treatment of "umbrella arrangements"*

Section 360 TIOPA provides:

(1) This section has effect for the purposes of this Part.
(2) In the case of umbrella arrangements (see section 363)—
(a) each part of the umbrella arrangements is to be treated as separate arrangements, and
(b) the umbrella arrangements are to be disregarded.

(3) Subsection (2)(a) is subject to section 361.

Regulation 5 OFTR provides:

In these Regulations, in relation to an offshore fund constituted by a part of umbrella arrangements (within the meaning of section 40C of FA 2008)—

(a) a reference to the assets of an offshore fund is to such of the assets of the umbrella arrangements as under the arrangements form part of the separate pool to which that part of the umbrella arrangements relates;
(b) a reference to the income of an offshore fund is to the income arising from those assets; and
(c) a reference to a participant in an offshore fund is to a person for the time being owning an interest in that separate pool.

Offshore Funds Manual 04000 provides:

'Umbrella arrangements' means arrangements which provide for separate pooling of the contributions of investors and the profits or income out of which payments are made to them. References to part of an umbrella arrangement are to the arrangements relating to a separate pool (or 'sub-fund'). Umbrella arrangements will not themselves be treated as an offshore fund. Instead –

• Each sub-fund and each class of interest is treated as an offshore fund in its own right,
• The umbrella fund is not treated as an offshore fund,
• The overall arrangements are disregarded.

The same approach applies to an individual cell of a protected cell company.
For umbrella arrangements and protected cell companies, it would usually follow that each sub-fund has the same residence status as the overall arrangement. In the case of a non-resident company it would be expected that each sub-fund would also be non-resident if it was under the "central management and control" of the directors of the company which constitutes the overall arrangement. In the case of a unit trust scheme, the trustees of the overall trust arrangements will usually also be the trustees of each separate arrangement, and so their residence status determines the residence of the fund, but where there are different trustees for each sub-fund then each must be considered separately. The "central management and control" test is also applicable to unit trusts.

## 31.9 Arrangements comprising more than one class of interest

Section 361 TIOPA provides:

(1) This section has effect for the purposes of this Part.

(2) Where there is more than one class of interest in arrangements (the "main arrangements")—
(a) the arrangements relating to each class of interest are to be treated as separate arrangements, and
(b) the main arrangements are to be disregarded.
(3) In relation to umbrella arrangements, "class of interest" does not include a part of the umbrella arrangements (but there may be more than one class of interest in a part of umbrella arrangements).

Regulation 6 OFTR provides:

In these Regulations, in relation to an offshore fund constituted by a class of interest in the main arrangements (within the meaning of section 40D of FA 2008)—

(a) a reference to the assets of an offshore fund is to the assets of the main arrangements;
(b) a reference to the income of an offshore fund is to such of the income of the main fund as is attributable to interests of that class under the arrangements constituting the main arrangements; and
(c) a reference to a participant in an offshore fund is to a person for the time being owning an interest of that class.

Offshore Funds Manual 04500 provides

"Class of interest" is not limited to share classes. There may be other forms of interest which entitle an investor to realise their investment on a basis calculated entirely or almost entirely by reference to the net asset value of the scheme property or an index. For example, certain types of loan may give a return which tracks NAV or is based on an index. A class of interest may also be created as a result of new issues or conversions of existing rights.
It is possible for an entity, particularly a company, to have a class of interest such as ordinary shares which does not constitute a mutual fund and another class of interest which does constitute such a mutual fund.
However, a particular class of shares can only constitute a single class of interest even if different types of holders of those shares enjoy different rights. For example, in the case of an exchange traded fund, the creation unit holders who act as market makers might have the right to redeem or issue shares directly but if that same class of shares were acquired by another investor on the secondary market then they would still form part of the same class of interest and satisfy Condition C because, as a consequence of the market makers' ability to redeem or create units, all other investors would expect to be able dispose of their interest at or close to NAV. (See also OFM05100 regarding exchange traded funds).

## 31.10 "Reporting" and "non-reporting" funds

Regulation 4 OFTR provides:

> (1) Offshore funds consist of—
> (a) non-reporting funds (see Part 2 of these Regulations), and
> (b) reporting funds (see Part 3 of these Regulations).
> (2) In a period of account, an offshore fund is a non-reporting fund unless it is a fund to which Part 3 of these Regulations applies...

Regulation 50 OFTR provides:

> In these Regulations a "reporting fund" means an offshore fund to which this Part applies for a period of account.

A discussion of the requirements to qualify as a reporting fund is not considered here. There is a list of reporting funds on *www.hmrc.gov.uk/collective/reportingfundlist.pdf*. At the time of writing this list is not very long.

CHAPTER THIRTY TWO

# OFFSHORE FUNDS: TAXATION

## 32.1 Taxation of offshore funds – Introduction

This chapter considers the taxation of offshore funds.

The tax legislation is mainly in the Offshore Funds (Tax) Regulations SI 2009/3001 ("OFTR"). The ink had hardly dried before that was amended, in 2009, with a more substantial round of amendments in 2011.

The OFTR's obsolete references to the FA 2008 take effect as references to the legislation now in TIOPA.[1]

For the temporary non-residence rules, see 8.12 (Offshore funds).

I do not consider the position of offshore funds held by UK resident companies.

## 32.2 Definitions

See 31.2 (Meaning of "participant"); 31.3 (Meaning of "offshore fund"); 31.4 ("Mutual fund").

### 32.2.1 *Meaning of "interest in an offshore fund"*

Regulation 8(1) OFTR provides a commonsense definition:

> For the purposes of these Regulations the interest of a participant in an offshore fund is the investment held by a participant taking part in arrangements (or arrangements constituting a fund) to which the relevant group of sections applies.

1 See 31.1 (Offshore funds – Introduction).

## 32.3 Charge to tax on OIGs

The legislation distinguishes:

(1) offshore income gains ("**OIGs**"), which arise on a disposal of a non-reporting offshore fund and fall within the offshore funds rules; and

(2) chargeable gains, within the scope of CGT. I refer to this for clarity as "**CGT chargeable gains**" though strictly the term "chargeable gains" is only applicable to CGT. The HMRC Manuals sometimes use the term "capital gains" which is slightly less accurate, but no less clear.

Regulation 17(1) OFTR provides the charge to tax:

> There is a charge to tax if—
> (a) a person disposes of an asset,
> (b) either condition A or condition B is met, and
> (c) as a result of the disposal, an offshore income gain arises to the person making the disposal.

This provision refers to a "person" so it applies to individuals, trustees, companies and PRs. Regulation 17 continues:

> (2) Condition A is that the asset is an interest in a non-reporting fund at the time of the disposal.

Condition B concerns funds changing from non-reporting fund to reporting fund status:

> (3) Condition B is that—
> (a) the asset is an interest in a reporting fund at the time of the disposal,
> (b) the reporting fund was previously a non-reporting fund (becoming a reporting fund as the result of an application under regulation 52),
> (c) the interest was an interest in a non-reporting fund during some or all of the material period,[2]
> (d) an election under regulation 48 was not prevented by paragraph (5)

---

2 Defined regulation 17(4):
"For the purposes of paragraph (3)(c) the "material period" means a period beginning with the day on which consideration was given for the acquisition of the asset or on 1st January 1984 (whichever is the later) and ending with the day on which the fund became a reporting fund."

> of that regulation, and
> (e) no election has been made under regulation 48(2).

Regulation 18(1) OFTR provides:

> The offshore income gain arising is treated for all the purposes of the Tax Acts as income which arises at the time of the disposal to the person making the disposal (or treated as making the disposal).[3]

An OIG is not income for trust law purposes, for instance proceeds of sale of an offshore fund represent a gain but are not payable to a life tenant.

> (2) The tax is charged on the person making the disposal (or treated as making the disposal).
> (3) In the case of a person chargeable to income tax, tax is charged under Chapter 8 of Part 5 of ITTOIA 2005 (miscellaneous income: income not otherwise charged) for the year of assessment in which the disposal is made ...

This incorporates s.687(1) ITTOIA:

> Income tax is charged under this Chapter on income from any source that is not charged to income tax under or as a result of any other provision of this Act or any other Act.[4]

This is the charge on miscellaneous income (formerly D VI income).

Regulation 18(3) continues:

> but sections 688(1) and 689 of ITTOIA 2005 (income charged and

---

3 In accordance with the principles of plain English drafting, reg.18(5) (somewhat unnecessarily) flags up some cross references:
"Paragraph (1) is subject to—
(a) regulation 19 (income treated as arising under regulation 17: remittance basis);
(b) regulation 20(1) (offshore income gain arising to non-resident trustees not treated as income of settlor);
(c) regulation 20(5) (application to gains of non-resident settlements);
(d) regulation 24(6) (application of section 13 of TCGA 1992)."

4 Similarly for CT, reg.18(4) OFTR provides:
"In the case of a person chargeable to corporation tax, tax is charged under Chapter 8 of Part 10 of CTA 2009 (miscellaneous income: income not otherwise charged) for the accounting period in which the disposal is made."

person liable) do not apply.

The disapplied sections provide:

> ***688 Income charged***
> *(1) Tax is charged under this Chapter on the amount of the income arising in the tax year.*
> *(2) Subsection (1) is subject to—*
> *(a) Chapter 1 of Part 7 (which provides relief on income from the use of furnished accommodation in an individual's only or main residence: see, in particular, sections 794 and 798),*
> *(b) Chapter 2 of that Part (which provides relief on income from the provision by an individual of foster care: see, in particular, sections 814 and 817), and*
> *(c) Part 8 (foreign income: special rules).*
> ***689 Person liable***
> *The person liable for any tax charged under this Chapter is the person receiving or entitled to the income.*

At first sight this is worrying since the disapplied sections (among other things) incorporate the remittance basis. However these sections are only disapplied because regulations 18(2) and 19 cover the same area.

## 32.4 Meaning of "disposal"

It will be recalled that there is a charge to tax if a person disposes of an offshore fund. Regulation 33 defines disposal:

> (1) There is a disposal of an asset for the purposes of these Regulations if there would be a disposal of an asset for the purposes of TCGA 1992.
> (2) Paragraph (1) is subject to the following provisions of this Chapter.

Special rules relating to reorganisations are not discussed here.

## 32.5 Death of individual

The CGT rule is that there is no disposal on death. Section 62 TCGA provides:

> (1) For the purposes of this Act the assets of which a deceased person was competent to dispose—

(a) shall be deemed to be acquired on his death by the personal representatives or other person on whom they devolve for a consideration equal to their market value at the date of the death, but
(b) shall not be deemed to be disposed of by him on his death (whether or not they were the subject of a testamentary disposition).

Regulation 34 OFTR undoes this and provides for a deemed disposal on death:

> 34.—(1) Notwithstanding anything in paragraph (b) of subsection (1) of section 62 of TCGA 1992 (general provisions applicable on death: no deemed disposal by the deceased), where a person dies and the assets of which the deceased was competent to dispose at the time of death include an interest in a non-reporting fund, then, for the purposes of these Regulations—
> (a) immediately before the acquisition referred to in paragraph (a) of that subsection, that interest shall be deemed to be disposed of by the deceased for such a consideration as is mentioned in that subsection; but
> (b) nothing in this regulation affects the determination, in accordance with regulation 32, of the question whether that deemed disposal is one to which this Chapter applies.

Regulation 34(2) incorporates other rules of s.62 TCGA:

> (2) Subject to paragraph (1), section 62 of TCGA 1992 applies for the purposes of these Regulations as it applies for the purposes of that Act, and the reference in that paragraph to the assets of which a deceased person was competent to dispose are to be construed in accordance with subsection (10) of that section.

The following provisions of s.62 therefore apply for OIGs:

> [(2) and (2A) deal with losses and need not be considered here.]
> (3) In relation to property forming part of the estate of a deceased person the personal representatives shall for the purposes of this Act be treated as being a single and continuing body of persons (distinct from the persons who may from time to time be the personal representatives), and that body shall be treated as having the deceased's residence, ordinary residence, and domicile at the date of death.
> (4) On a person acquiring any asset as legatee (as defined in section 64)—

(a) no chargeable gain shall accrue to the personal representatives, and
(b) the legatee shall be treated as if the personal representatives' acquisition of the asset had been his acquisition of it.

(5) Notwithstanding section 17(1) no chargeable gain shall accrue to any person on his making a disposal by way of donatio mortis causa.

[subsections (6) to (9) deal with IoVs and need not be set out here]

(10) In this section references to assets of which a deceased person was competent to dispose are references to assets of the deceased which (otherwise than in right of a power of appointment or of the testamentary power conferred by statute to dispose of entailed interests) he could, if of full age and capacity, have disposed of by his will, assuming that all the assets were situated in England and, if he was not domiciled in the UK, that he was domiciled in England, and include references to his severable share in any assets to which, immediately before his death, he was beneficially entitled as a joint tenant.

The OFM correctly provides:

**OFM08600 Investors in non-reporting funds: disposals of interests: death of participant – regulation 34**
...An offshore income gain arises and resulting tax becomes payable before the estate of the deceased person is valued for inheritance tax purposes.

There is scope for deathbed planning: a lifetime gift to charity or to a spouse avoids the OIG charge on death, because no OIG arises on the disposal (applying CGT rules which brings into effect the CGT spouse exemption and the CGT charity exemption). By contrast if there is a gift by will to charity or to a spouse the OIG comes into charge on the death.

## 32.6 OIG remittance basis

Regulation 19 OFTR provides:

(1) This regulation applies to income treated as arising under regulation 17 to an individual in a tax year if—
(a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
(b) the individual is not domiciled in the UK in that year.

(2) The income is treated as relevant foreign income of the individual.

The significance of treating the income as RFI is that the income can qualify for the remittance basis. I refer to this as "**the OIG remittance basis**".

The remittance basis applies even if the offshore fund is a UK situate asset (the CGT situs rules are not relevant) but in practice that is not likely to happen.

So long as the gain is not remitted, the foreign domiciled individual will not care if the gain is a chargeable gain or an OIG, ie they will not care whether or not the asset disposed of is an offshore fund.

Regulation 19(3) contains two rules:

> (3) For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis)—
> (a) any consideration obtained on the disposal of the asset[5] is treated as deriving from the income

At first sight it is not clear why reg.19(3)(a) is needed. It seems self-evident. There is no equivalent in the CGT charge on gains accruing to individuals. But a reason will emerge.[6]

Regulation 19(3) continues:

> For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis) ...
> (b) unless the consideration so obtained is of an amount equal to or exceeding the market value of the asset, the asset is treated as deriving from the income.

Regulation 19(3)(b) is the equivalent of the CGT rule for deemed gains.[7]

---

5 Reg 19(4) provides two somewhat unnecessary definitions:
"In paragraph (3)—
(a) "the asset" means the asset the disposal of which causes the income to be treated as arising, and
(b) "the disposal" means the disposal mentioned in sub-paragraph (a) of that paragraph."

6 See 32.12.6 (OIG s.87 remittance basis).

7 See 10.24 (CGT disposal not for market value).

## 32.7 OIG arising to UK trust

### 32.7.1 *UK resident trust (not settlor-interested)*

A UK resident trust is in principle subject to income tax on its OIGs.[8] Tax is charged at the trust rate, 50%: it falls within s.482 type 3, see 22.2.3 (Other income taxed at top rates).

### 32.7.2 *UK resident settlor-interested trust*

An OIG arising to UK trustees is not "income" in the general sense and in the absence of express provision it would not fall within s.624 ITTOIA which only applies to income. However reg.18 OFTR directs that the OIG is "treated for all the purposes of the Tax Acts as income" so it does fall within s.624 ITTOIA.

If the settlor is a remittance basis taxpayer the s.624 remittance basis applies, ie an unremitted OIG is not taxed on the settlor but on the trustees.[9]

The rate of tax in the absence of s.624 is 50%, so s.624 can only reduce the tax rate (or make no difference).

## 32.8 OIG non-residence defence

Regulation 22(1) OFTR provides a territorial limitation for non-residents:

> (1) The following enactments have effect in relation to income tax or corporation tax in respect of offshore income gains as they have effect in relation to capital gains tax or corporation tax in respect of chargeable gains—
> (a) section 2(1) of TCGA 1992 (persons chargeable to capital gains tax)
> ...

Extended as reg. 22(1) directs, s.2(1) TCGA provides (so far as relevant):

> ... a person shall be chargeable to *income tax* in respect of *offshore income gains* accruing to him in a year of assessment during any part of

8 See 32.3 (Charge to tax on OIGs).
9 See 24.5 (Section 624 remittance basis).

which he is resident in the UK, or during which he is ordinarily resident in the UK.

This incorporates the CGT territorial limitations by reference.[10] By implication, a person not resident (and not ordinarily resident) is not chargeable to IT on offshore income gains. I refer to this rule as "**the OIG non-residence defence**".

## 32.9 OIG arising to non-resident trust

Where an OIG arises to a non-resident trust, the trustees are not subject to tax on the gain because of the OIG non-residence defence.

### 32.9.1 *Non-resident settlor-interested trust*

An OIG arising to a non-resident settlor-interested trust is not within s.624 ITTOIA, unlike a UK resident trust. Regulation 20(1) OFTR provides:

---

10 For completeness: Regulation 22 OFTR also incorporates s.10 TCGA which would apply if a non-resident carried on a trade through a branch or agency and used the offshore funds for the purposes of the trade. This gives a neat symmetry with the CGT rules but it is hard to imagine that this will ever apply in practice. The regulation provides:

"(1) The following enactments have effect in relation to income tax or corporation tax in respect of offshore income gains as they have effect in relation to capital gains tax or corporation tax in respect of chargeable gains—

(a) section 2(1) of TCGA 1992 (persons chargeable to capital gains tax) ...

(b) section 10 of TCGA 1992 (non-resident with a UK branch or agency);

(c) section 10B of TCGA 1992 (non-resident company with UK permanent establishment).

(2) Paragraph (1) is subject to paragraphs (3) and (4).

(3) In the application of section 10 of TCGA 1992 in accordance with paragraph (1), paragraphs (a) and (b) of subsection (1) (assets on the disposal of which chargeable gains are taxable) have effect with the omission of the words "situated in the UK and".

(4) In the application of section 10B of TCGA 1992 in accordance with paragraph (1), paragraphs (a) and (b) of subsection (1) (assets on the disposal of which chargeable profits arise for the purposes of corporation tax) have effect with the omission of the words "situated in the UK and"."

Section 1015 ITA could also restrict the territorial scope of the OIG charge, but the rules discussed here leave it no room to operate.

> If an offshore income gain arises to a settlement in a tax year and the trustees of the settlement are neither resident nor ordinarily resident in the UK in the tax year, the gain is not regarded as income for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor).

The consequence is that a settlor who is liable under s.720 does not have an indemnity against the trust for the tax. One wonders if this has been thought through.

The whole of chapter 5 is disapplied, so where a capital payment is made to a minor child of the settlor, the settlor is not taxable under s.629 ITTOIA (instead the child would be taxable at the appropriate rate. This may lead to a significant saving).

## 32.10 Outline of OIG anti-avoidance provisions

The rule that non-resident trusts and companies are not subject to tax on OIGs presents an obvious means of tax avoidance. HMRC might have applied either the income tax TAA provisions or the CGT anti-avoidance provisions to deal with this. In fact they have applied both:
(1) The TAA provisions apply: reg.21
(2) The CGT anti-avoidance provisions apply (with some amendments):
    (a) Regulation 20 applies s.87 TCGA.
    (b) Regulation 24 applies s.13 TCGA.

Further rules are needed to deal with the many possible ways in which the anti-avoidance provisions may interact:
(1) Interactions between these IT and CGT anti-avoidance provisions potentially applying to the same OIG; and
(2) Interactions between:
    (a) the applicable anti-avoidance provision relating to an OIG and
    (b) s.731 or CGT s.87 (where a beneficiary receives a benefit and there is also relevant income or a CGT s.2(2) amount).

### 32.10.1 *Commentary*

The result of applying two sets of overlapping anti-avoidance provisions is so complicated that no-one could expect the rules which I seek to explain below to be applied in practice, except by the very largest trusts with a very large budget for UK professional advice. It also introduces a full set of anomalies and scope for tax planning.

Although it was the case before 2008 that both the TAA and the CGT anti-avoidance provisions applied, the 2008 reforms made both sets of provisions very much more complicated, so that the dual application presents much more complexity than before 2008.

The drafting of the OIG provisions was even more rushed than the rest of the 2008 legislation, leaving no time even for HMRC to properly consider the issues, let alone for consultation. There was an opportunity to rethink in the 2009 regulations, but HMRC had no desire to take it up. It seems to me that there can be no more devastating criticism of the rules than an attempt to explain them. The reader who labours through the next part of this chapter is likely to agree that the law ought to be simplified by applying either the income tax or the CGT anti-avoidance rules – CGT would be the better of the two, as OIGs are more like capital gains – but not both.

## 32.11 OIG TAA provisions

An OIG arising to a non-resident is not "income" so in the absence of express provision it would not fall within the TAA provisions even if it arose to a person abroad within s.720 or 731. Regulation 21(1) OFTR deals with this and thus applies the TAA provisions to OIGs:

> Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person.

It is helpful to distinguish the ordinary income tax transfer of asset rules and the rules as they apply to OIGs. I use the following terminology:

(1) "**OIG s.720**", the provisions of s.720 ITA which apply when a person abroad receives OIGs, deemed to be income within the scope of s.720.
(2) "**OIG s.731**", the provisions of s.731 ITA which apply when the person abroad receives OIGs which are deemed to be income and so relevant income, for the purposes of s.731; this may be contrasted with "**ordinary IT s.731**" which applies where the person abroad receives ordinary income which is relevant income.

Regulation 21(2) OFTR provides:

> Income treated as arising under that Chapter by virtue of paragraph (1) is regarded as "foreign" for the purposes of section 726, 730 or 735 of that Act.

This feeds into s.726 and 735 ITA which impose a remittance basis for OIG s.720 and OIG s.731. The motive defence may also apply.

There are only limited differences between the way that sections 720 and 731 work for OIGs and for ordinary income.

## 32.12 OIG s.87 charge

An OIG is not a chargeable gain, and so not a s.2(2) amount (trust gain), so in the absence of express provision it would not give rise to a charge under s.87 TCGA. Regulation 20(3) OFTR deals with this and applies the s.87 rules with modifications. Because there are modifications, there are significant differences between OIG s.87 and CGT s.87 rules.

### 32.12.1 *OIG s.87 charge*

Regulation 20(3) OFTR incorporates the s.87 TCGA rules in this manner:

> Sections 12, 87 to 90A and 96 to 98 of, and Schedule 4C to, TCGA 1992 apply in relation to OIG amounts as if—
> (a) references to section 2(2) amounts (except those in paragraph 7B(2)(b) and (4) of Schedule 4C) were to OIG amounts,
> (b) references to chargeable gains (except the one in paragraph 1(5) of Schedule 4C) were to offshore income gains,
> (c) references to anything accruing were to it arising[11] (and similar references, except the one in paragraph 1(5) of Schedule 4C, were read accordingly),
> (d) sections 87(4), 88(2) to (5) and 97(6) and paragraphs 1(3A), 3 to 7 and 12 of Schedule 4C were omitted, and
> (e) regulation 21 did not apply.

I do not set out all the these statutory provisions, as amended, because the

11 The terminology of the Taxes Acts is that CGT chargeable gains *accrue;* but OIGs *arise*. There is no difference in meaning so it seems somewhat pedantic to make the change of terminology when incorporating the CGT s.87 provisions for OIGs; but it does no harm.

text is far too long. The key provision is s.87(2)(3) TCGA which (amended as reg.20(3) directs) provides:

> [2][a] *Offshore income gains* are treated as *arising* in the relevant tax year to a beneficiary of the settlement
> [b] who has received a capital payment from the trustees in the relevant tax year or any earlier tax year
> [c] if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the *OIG amount* for the relevant tax year or any earlier tax year.
> (3) The amount of *offshore income gains* treated as accruing is equal to—
> (a) the amount of the capital payment, or
> (b) if only part of the capital payment is matched, the amount of that part.

It is necessary to distinguish the CGT s.87 rules and the OIG s.87 rules because the rules are not identical. I use the following terminology:

(1) "**CGT s.87**", the provisions of s.87 TCGA which apply when the trust has a "**CGT s.2(2) amount**" (trust gains); if the section applies, a CGT chargeable gain accrues to a beneficiary which I call "**the s.87 deemed CGT gain**".
(2) "**OIG s.87**", the provisions of s.87 as amended, which apply when the trust has "**OIG amounts**"; if the section applies, an OIG accrues to a beneficiary which I call "**the s.87 deemed OIG**".

For a full discussion of CGT s.87, see 45.1 (Gains of Non-resident Trusts: section 87). I concentrate here on points where OIG s.13 is different from CGT s.13. But note one area where the two rules are the same. If a trust with OIG amounts makes a capital payment to a non-resident beneficiary, a s.87 deemed OIG is treated as accruing to the beneficiary under OIG s.87(2). But no income tax charge arises since the beneficiary qualifies for the OIG non-residence defence.[12] Thus capital payments to non-resident beneficiaries reduce (or "wash") OIG amounts, as they do for CGT s.2(2) amounts.

I deal with the 2008 transitional rules elsewhere because they are best

12 See 32.8 (OIG non-residence defence).

considered together with the CGT s.87 transitional rules.[13]

### 32.12.2 *"OIG amount"*

Regulation 20(2) OFTR defines the term "OIG amount":

> If—
> (a) offshore income gains arise to the trustees of a settlement in a tax year, and
> (b) section 87 of TCGA 1992 (gains of non-resident settlements) applies to the settlement for that year,
>
> the OIG amount for the settlement for that year is the amount of the offshore income gains.

"OIG amount" is the OIG equivalent of the CGT concept "s.2(2) amount" (formerly called trust gains) though the definition is not identically worded.[14]

It is necessary to have a different definition, since the definition of s.2(2) amounts (trust gains) caters for losses, and for CGT chargeable gains within s.86 TCGA; the definition of OIG amounts does not do this because there is no relief for OIG losses and s.86 does not apply.

One (I expect, unintended) consequence of the difference in drafting is that there is no double taxation relief where the OIGs are subject to a foreign capital gains tax.[15]

The drafter has correctly provided in reg. 20(3)(d) OFTR that s.87(4) TCGA does not apply for OIG s.87, because it has no role in that context.

---

13 See 45.22.1 (Pre-2008 OIG amounts); 45.23 (Pre-2008 inter-trust transfer); 45.32 (Rebasing - OIG amounts).

14 Section 87 TCGA provides:

"(4) The section 2(2) amount for a settlement for a tax year for which this section applies to the settlement is—

(a) the amount upon which the trustees of the settlement would be chargeable to tax under section 2(2) for that year if they were resident and ordinarily resident in the UK in that year, or

(b) if section 86 applies to the settlement for that year, the amount mentioned in para (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

(5) The section 2(2) amount for a settlement for a tax year for which this section does not apply to the settlement is nil."

15 See 50.19 (DT reliefs: s.87 TCGA).

### 32.12.3 *"Capital payment"*

"Capital payment" is defined in s.97(1) TCGA. The OFTR does not amend this. It provides:

> In sections 86A to 96 and Schedule 4C and this section "capital payment"—
> (a) means
> [i] any payment which is not chargeable to income tax on the recipient
> [ii] or, in the case of a recipient who is neither resident nor ordinarily resident in the UK, any payment received otherwise than as income...

Suppose a trust within OIG s.87 makes a capital payment (or what appears to be a capital payment) to a UK resident beneficiary. The definition does not actually work for OIG s.87, since what would otherwise be a capital payment falling within OIG s.87 *is* chargeable to IT under OIG s.87! But for the purposes of OIG s.87 the definition must be taken to read that "capital payment" means:

> [i] any payment which is not chargeable to income tax on the recipient *[apart from OIG s.87]*
> [ii] or, in the case of a recipient who is neither resident nor ordinarily resident in the UK, any payment received otherwise than as income...

I refer to such a capital payment which is subject to income tax under OIG s.87 as an **"OIG capital payment"**.

### 32.12.4 *Deemed disposal*

If OIG s.87 applies, a beneficiary receives a s.87 deemed OIG. OIG s.87 does not directly impose a charge on that deemed OIG: the deeming feeds into reg.17 which imposes the charge when a gain accrues on the person making the disposal. A further deeming is needed, because the beneficiary to whom the s.87 deemed OIG accrues does not make a disposal. Therefore reg.20(5) OFTR provides for a deemed disposal, to bring the s.87 deemed OIG into charge under reg.17:

> If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

(The same rule applies for OIG s.13.)

### 32.12.5 *OIG s.87: miscellaneous points*

The deemed disposal rules of Schedule 4B TCGA do not apply to OIGs, but the harsh provisions of Schedule 4C TCGA may apply.

The interest supplement rule in s.91 TCGA applies only to CGT s.87 and not to OIG s.87.

A capital payment from a trust with OIG amounts does not give rise to an IHT exit charge as the exit charge income exemption applies.[16]

### 32.12.6 *OIG s.87 remittance basis*

If a remittance basis taxpayer receives a s.87 deemed OIG, s.87B TCGA applies to bring in a remittance basis just like the CGT s.87 remittance basis.

Reg.19(5) OFTR provides:

> This regulation does not apply for the purposes of regulation 20.

That disapplies the ordinary OIG remittance basis. That is needed because the OIG s.87B remittance basis applies instead.

### 32.12.7 *HMRC views*

HMRC agree with the above. The OFM provides:

> **OFM09315 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: section 87 (and 87A) TCGA attribution rules: effect of residence and domicile status of beneficiary**
> **... Beneficiary is UK resident but non-UK domiciled**
> Where attributions are made to a beneficiary who is UK resident or ordinarily resident but non-UK domiciled then, under section 87 (and

16 See 27.11.5 (Interaction with IHT exit charge income exemption.)

87A) TCGA rules, the full amount attributed may not be chargeable to income tax for the following reasons

• such an individual will not be chargeable to income tax on offshore income gains attributed to them to the extent that in the matching process

- a capital payment received before 6 April 2008 is matched, or
- an OIG amount for the tax year 2007-08, or earlier, is matched (paragraph 100 Schedule 7 FA 2008).

• If the trustees have made a "rebasing" election under paragraph 126 Schedule 7 FA 2008 then such an individual will not be chargeable on the pre-6 April 2008 element of the offshore income gain attributed to them (paragraph 101 Schedule 7 FA 2008).

• If such an individual is a remittance basis user they can have the benefit of the remittance basis via the rules in section 87B TCGA.

The full amount of the offshore income gain attributed to the individual reduces the OIG amount of the non-resident settlement structure that is available to match with future capital payments. That is so even though less than the full amount may be chargeable to income tax on the individual.

**Beneficiary is non-UK resident**

Offshore income gains can still be attributed to a beneficiary who is not resident or ordinarily resident in the UK using the section 87 TCGA attribution rules. This applies even though they may not be chargeable to tax on such an individual. Any such attribution reduces the OIG amount of the non-resident settlement structure that is available to match with future capital payments.

## 32.13 OIG s.13 charge

An OIG is not a chargeable gain, so in the absence of express provision it would not fall within s.13 TCGA. Regulation 24(1) OFTR deals with this and applies s.13 TCGA to OIGs with modifications:

(1) Section 13 of TCGA 1992 (chargeable gains accruing to certain non-resident companies) applies for the purposes of this Part with the following modifications.

(2) The section applies as if—

(a) for any reference to a chargeable gain there were substituted a reference to an offshore income gain; and

(b) for any reference to anything accruing there were substituted a reference to it arising[17] (with similar references being read accordingly).

(3) The section applies as if, in subsection (5), paragraphs (b) and (c) were omitted.

(4) The section applies as if, in subsection (7), for the reference to capital gains tax there were substituted a reference to income tax or corporation tax.

(5) The section applies as if subsection (8) were omitted. ...

I refer to this as **"the OIG s.13 charge"**. It is necessary to distinguish the CGT s.13 rules and the OIG s.13 rules because the rules (though similar) are not identical. I refer below to:

(1) "**CGT s.13**", the provisions of s.13 TCGA which apply where CGT chargeable gains accrue to the non-resident company; if the section applies, a CGT chargeable gain accrues to a participator which I call "**the CGT s.13 deemed gain"**.

(2) "**OIG s.13**", the provisions of s.13 as amended, which apply where OIGs arise to the non-resident company; if the section applies, an OIG accrues to a participator which I call "**the OIG s.13 deemed OIG"**.

Amended as reg.24 directs, s.13 TCGA provides:

**Attribution of [OIGs] to members of non-resident companies**

(1) This section applies as respects *offshore income gains arising* to a company—

(a) which is not resident in the UK, and

(b) which would be a close company if it were resident in the UK.

(2) Subject to this section, every person who at the time when the *offshore income gain arises* to the company is resident or ordinarily resident in the UK, and who is a participator in the company, shall be treated for the purposes of this Act as if a part of the *offshore income gain* had *arisen* to him.

(3) That part shall be equal to the proportion of the gain that corresponds to the extent of the participator's interest as a participator in the company.

17 The terminology of the Taxes Acts is that CGT chargeable gains *accrue;* but OIGs *arise*. There is no difference in meaning so it seems somewhat pedantic to make the change of terminology when incorporating the CGT s.13 provisions for OIGs; but it does no harm.

(4) Subsection (2) above shall not apply in the case of any participator in the company to which the *offshore income gain arises* where the aggregate amount falling under that subsection to be apportioned to him and to persons connected with him does not exceed one tenth of the gain.
(5) This section shall not apply in relation to—
~~(b) *an offshore income gain* accruing on the disposal of an asset used, and used only—~~
~~(i) for the purposes of a trade carried on by the company wholly outside the UK, or~~
~~(ii) for the purposes of the part carried on outside the UK of a trade carried on by the company partly within and partly outside the UK, or~~
~~(c) *an offshore income gain* accruing on the disposal of currency or of a debt within section 252(1), where the currency or debt is or represents money in use for the purposes of a trade carried on by the company wholly outside the UK, or~~
(d) to *an offshore income gain* in respect of which the company is chargeable to tax by virtue of section 10B.
[*Subsections 5A to 7A relate to company distribution relief and company disposal relief and need not be printed here.*]
~~(8) So far as it would go to reduce or extinguish chargeable gains accruing by virtue of this section to a person in a year of assessment this section shall apply in relation to a loss accruing to the company on the disposal of an asset in that year of assessment as it would apply if a gain instead of a loss had accrued to the company on the disposal, but shall only so apply in relation to that person; and subject to the preceding provisions of this subsection this section shall not apply in relation to a loss accruing to the company.~~
(9) If a person who is a participator in the company at the time when the *offshore income gain arises* to the company is itself a company which is not resident in the UK but which would be a close company if it were resident in the UK, an amount equal to the amount apportioned under subsection (3) above out of the *offshore income gain* to the participating company's interest as a participator in the company to which the gain *arises* shall be further apportioned among the participators in the participating company according to the extent of their respective interests as participators, and subsection (2) above shall apply to them accordingly in relation to the amounts further apportioned, and so on through any number of companies.
(10) The persons treated by this section as if a part of an *offshore income gain arising* to a company had *arisen* to them shall include the trustees of a settlement who are participators in the company, or in any

company amongst the participators in which the gain is apportioned under subsection (9) above, if when the gain *arises* to the company the trustees are neither resident nor ordinarily resident in the UK.
(10B) [*This relates to pension schemes and need not be set out here*]
(11) [*This confers relief where tax is paid by the company and need not be set out here]*
(11A) For the purposes of this section the amount of the gain or loss[18] *arising* at any time to a company that is not resident in the UK shall be computed (where it is not the case) as if that company were within the charge to corporation tax on *offshore income gains*.
[*Section 13(12) to (15) contain definition and administrative provisions which need not be set out here*]

For a full discussion of CGT s.13, see 47.1 (Gains of Non-resident companies). I concentrate here on areas where OIG s.13 is different from CGT s.13.

The most important difference is that a CGT s.13 deemed gain is subject to CGT at CGT rates; an OIG s.13 deemed OIG is subject to IT at IT rates.

The deletions in s.13(5)(8) make sense as those CGT rules would not be appropriate for OIG s.13.

DTA relief may apply where a UK resident trustee holds a treaty non-resident company to which an OIG applies: s.79B TCGA disapplies the relief for CGT[19] but not for OIG. Offshore group relief does not apply to OIG s.13 because reg.24 does not incorporate s.14 TCGA.

## 32.13.1 *Deemed disposal*

If OIG s.13 applies, a participator receives an OIG s.13 deemed OIG. OIG s.13 does not directly impose a charge on that deemed OIG: the deeming feeds into reg.19 which imposes the charge when an OIG arises on the person making the disposal. A further deeming is needed, because the participator to whom the s.13 deemed OIG accrues does not make a disposal. Therefore reg.24(6) OFTR provides for a deemed disposal, to bring the deemed OIG into charge under reg.17:

18 The words "or loss" are otiose here. Presumably the drafter overlooked the need to delete them as the legislation takes the trouble to delete them elsewhere. But nothing turns on that.

19 See 50.14.4 (Disallowance of DT relief for trust participator).

> If this regulation applies, the person to whom the offshore income gain arises is treated as the person making the disposal.

(The same rule applies for OIG s.87.)

### 32.13.2 *OIG s.13 remittance basis*

Section 14A TCGA provides the CGT s.13 remittance basis, but this section does not apply for the purposes of OIG s.13. Instead reg.19 applies, but the end result is the same. This explains reg.19(3)(a) which provides:

> (3) For the purposes of Chapter A1 of Part 14 of ITA 2007(10) (remittance basis)—
> (a) any consideration obtained on the disposal of the asset is treated as deriving from the income. ...

This is the equivalent of s.14A(3)(a) TCGA which similarly provides:

> (3) For the purposes of Chapter A1 of Part 14 of ITA 2007 (remittance basis)—
> (a) treat any consideration obtained by the company on the disposal of the asset as deriving from the deemed chargeable gain. ...

## 32.14 OIGs and s.86 TCGA

A settlor of a non-resident trust is not subject to tax on OIGs under s.86 TCGA 1992; s.720 may apply in this case.

Suppose a non-resident trust where:
(1) the settlor and spouse are excluded, but
(2) s.86 applies (because the settlor is UK domiciled and the settlor's children are beneficiaries)

It may be attractive for a trust to invest in offshore funds (which give rise to OIGs outside s.86) rather than other assets (which give rise to CGT chargeable gains within s.86). Similarly, the trustees may invest for income and not capital growth. It may however be a balancing exercise, as to do so does increase the rate of tax on capital payments.

## 32.15 Interaction of anti-avoidance provisions

### 32.15.1 *Priority between OIG s.87 and CGT s.87*

Suppose a capital payment is made to a beneficiary from a trust with OIG amounts and CGT s.2(2) amounts. This would in principle give rise to a charge under OIG s.87 and CGT s.87, or at least it might not be clear which of the two applied.

It matters which applies because in one case the OIG is taxed at income tax rates and in the other the CGT chargeable gain is taxed at CGT rates.

Regulation 20(4) OFTR deals with this:

> Section 87A of TCGA 1992 applies for a tax year by virtue of paragraph (3) before it applies for that year otherwise than by virtue of that paragraph.

In short, OIG s.87 has priority to CGT s.87. Where OIG s.87 applies to a capital payment, there is no "capital payment" for the purposes of CGT s.87 as the payment is subject to income tax.

The OFM offers the following example:

> **OFM09320 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: section 87 (and 87A) TCGA attribution rules: example**
>
> **Allocating capital payments between offshore income gains and chargeable gains arising in non-resident settlements – regulation 20(4)**
>
> **Example where both offshore income gains and capital gains received**
>
> A settlement with non-UK resident trustees has never been settlor interested and has never received any income. The following OIG amounts and capital gains have been received by the settlement:

| | OIG amount | Chargeable gains |
|---|---|---|
| 2008-09 | £30,000 | |
| 2009-10 | | £40,000 |
| 2010-11 | £50,000 | £60,000 |

> The first capital payment out of the settlement is made in 2010-11. That is a capital payment of £70,000 to a UK resident and domiciled beneficiary.

The HMRC analysis for 2010/11 is as follows:

> Regulation 20(4) tells you that you match any capital payments with OIG amounts arising in the non-resident settlement before matching with chargeable gains. This applies even if the OIG amount arose in an earlier year than the capital gain.
> Using the section 87A TCGA attribution rules the capital payment is matched first with the entire £50,000 OIG amount arising in 2010-11. Then the remaining £20,000 (£70,000 - £50,000) is matched with £20,000 of the £30,000 OIG amount arising in 2008-09.
> The beneficiary is treated as receiving £70,000 offshore income gains chargeable to income tax in 2010-11.

There are two errors here:

(1) The author has overlooked OIG s.731. In principle, the £30k OIG in 2008/09 is relevant income. The HMRC analysis is only correct if there are special circumstances which disapply OIG s.731, such as (1) the motive defence applies, or (2) if the beneficiary is resident but not ordinarily resident in the UK.

(2) The authors emphasises that the capital payment is matched with (1) the £50k OIG in 2010/11 and (2) £20k of the OIG in 2008/09. But it does not matter, as on the facts of the example, it makes no difference to which OIG the capital payment is matched. It matters for CGT chargeable gains, because of the interest surcharge, but that does not apply for OIG.

HMRC then turn to consider the position going forward:

> There are unmatched OIG amounts and chargeable gains in the settlement to carry forward at 5 April 2011 of:
> 2008-09 OIG amount £10,000 (£30,000 less £20,000 matched with capital payment)
> 2009-10 Capital gains £40,000
> 2010-11 Capital gains £60,000.

The HMRC example is an easier case as there was one capital payment which was less than the total OIGs. Suppose there was more than one, and the total amount exceeded the OIGs. For instance, on the facts of the above example, and assuming (as do HMRC) that s.731 is not applicable, suppose in the same year but on different days:
Capital payment (1): £80k

Capital payment (2): £20k.
Does one say:
(a) Capital payment (1) is matched with the OIG and capital payment (2) is matched with the CGT chargeable gains? or
(b) Each capital payment is matched with 80% of the OIG and 20% of the CGT chargeable gains?

It is considered that solution (b) is correct. That is consistent with the rule for s.2(2) amounts (trust gains).

### 32.15.2 *Priority between OIG s.13 & TAA provisions: company not held by trust*

Suppose an OIG accrues to a non-resident company (the company not being held by a trust). This could give rise to a charge under OIG s.720 (on the transferor) and under OIG s.13 (on the participators), or at least it might not be clear which of the two charges applies.

It may not matter which applies, as the OIG is taxed at income tax rates in either event, but it could matter eg if the transferor is not the sole participator or if some exemption to s.13 is in point.

Regulation 21(3) OFTR deals with this but it needs to be read with reg.21(1) to follow the sense:

> (1) Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person.
> (3) Paragraph (1) does not apply in relation to an offshore income gain if (and to the extent that) it is treated, by virtue of regulation 24 [OIG s.13], as arising to a person resident or ordinarily resident in the UK.

In short, a s.13 OIG charge has priority over the OIG TAA provisions. Regulation 24(7) OFTR provides:

> To the extent that an offshore income gain is treated, by virtue of this regulation, as having accrued to any person resident or ordinarily resident in the UK, that gain shall not be deemed to be the income of any individual for the purposes of Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad).

### 32.15.3 *Priority between OIG s.13 and TAA provisions: company held by trust*

Suppose an OIG accrues to a company held by a settlor-interested trust. Suppose the company is within s.720. The trustees make a capital payment to a UK resident beneficiary. This could give rise to
(1) a charge under OIG s.720 on the transferor and
(2) under OIG s.87 on the beneficiary, on the basis that the OIGs accrue to the trustees under s.13 and constitute OIG amounts which are matched to the capital payments.
Is relief available under reg. 24(7) OFTR? That provides:

> To the extent that an offshore income gain is treated, by virtue of this regulation, as having accrued to any person resident or ordinarily resident in the UK, that gain shall not be deemed to be the income of any individual for the purposes of Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad).

One would have to argue that the gain accruing to the individual is the same gain as that accruing to the company. It is suggested that this is the case, since otherwise there would be a strange anomaly between this case and the simple case where the OIG accrues to the trust directly (without a company). The purpose of s.13 is to put the taxpayer in the same position as if there were no company.

## 32.16 Priority between OIG s.87 and OIG TAA provisions

Suppose an OIG accrues to a non-resident trust which makes a capital payment to a beneficiary. This could give rise to a charge under OIG s.87 and the TAA provisions, or at least it might not be clear which of the two applies.

It matters which applies because:
(1) OIG s.87 qualifies for rebasing relief.
(2) OIG s.87 qualifies for 2008 transitional relief.
(3) Different mixed fund rules apply.
Regulation 21(5) deals with this but one first needs to read reg.21(4) OFTR which provides:

> The following provisions apply if regulation 20 applies in relation to an offshore income gain (the "relevant offshore income gain").

In short, the two provisions which follow – reg.21(5)(6) – apply where an OIG accrues to a non-resident trust.

Regulation 21(5) needs to be read with reg.21(1) to follow the sense:

> (1) Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person.
> (5) If—
> (a) by virtue of regulation 20 [OIG s.87] an offshore income gain is treated as arising in a tax year to a person resident or ordinarily resident in the UK, and
> (b) it is so treated by reason of the relevant offshore income gain (or part of it),
> for that and subsequent tax years paragraph (1) does not apply in relation to the relevant offshore income gain (or that part).

In short, the OIG s.87 charge has priority over the TAA provisions *if* the OIG amount is matched to a capital payment to a *UK resident*. I refer to this provision as "**OIG matching relief**". This applies even if the OIG s.87 charge is matched to a remittance basis taxpayer and (un)taxed on the OIG s.87 remittance basis, because an OIG is nevertheless treated as arising to a UK resident.

This rule applies for Chapter 2 of Part 13 of ITA 2007 but it is helpful to consider s.720 and s.731 separately.

### *32.17 Priority between OIG s.720 and OIG s.87*

The following examples are based on this situation:
(1) A non-resident settlor-interested trust is within s.720. The transferor/settlor (for the purposes of these examples the terms are interchangeable) is UK resident. The motive defence does not apply.
(2) The trust has realised an OIG in year 1 of £1m.
(3) The trust has no relevant income.

*Example 1*
*The trustees make no capital payment to any beneficiary in the year that*

*the OIG accrues.*
The settlor as transferor is taxed on the OIG under OIG s.720 (subject to the s.720 remittance basis if applicable).

Regulation 21(6) OFTR prevents a double charge to tax under OIG s.87, if there is a capital payment in a subsequent tax year. It provides:

> If, by virtue of paragraph (1) as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year, the OIG amount in question must be reduced (with effect from the following tax year) by the amount of the income.

*Example 2*
*The trustees make a capital payment of £1m to the settlor in year 1.*
The settlor is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis).
The TAA provisions are disapplied for the OIG because OIG matching relief applies.
It may make no difference whether it is OIG s.720 or OIGs.87 which is used to tax the settlor but it may matter for the following reasons:
(1) rebasing relief
(2) 2008 transitional relief
(3) mixed fund rules.

*Example 3*
*The trustees make a capital payment of £1m to a UK resident beneficiary (not the settlor) in year 1.*
The beneficiary is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis).
The TAA provisions are disapplied for the OIG.
So the result of the capital payment is to shift the tax charge from the settlor to the beneficiary. This would be particularly important if the beneficiary was a remittance basis taxpayer and the settlor was not. In such a case a capital payment to the beneficiary would save tax. The capital payment also affects the quantum of the charge if rebasing relief applies or 2008 transitional relief.

*Planning for trust within s.720 which realises an OIG*
In short, where an OIG arises to a trust within s.720, it is advantageous for

the trustees to make a capital payment matched to the OIG amount if:

(1) the settlor is not a remittance basis taxpayer and the a beneficiary is a remittance basis taxpayer; or
(2) if rebasing relief applies.

This planning point will often require a distribution to be made in the year that the OIG arises. The sum distributed need not be the proceeds representing the OIG. Other capital payments (eg the use of living accommodation) may suffice as that capital payment may be matched with the OIG.

If there is no time to make a payment in the form of a bank transfer, a resolution of the trustees to exercise their power to make a distribution will suffice. If the figures are not available, a resolution to distribute an amount equal to the offshore income gains will suffice. Inn order to make a distribution, it may be necessary to make a deed of appointment, or obtain consent of a protector: that depends of course on the terms of the trust.

### 32.17.1 *Priority between OIG s.731 and OIG s.87 over same OIG*

I turn to consider whether OIG s.87 TCGA 1992 takes precedence over OIG s.731.

Having regard to OIG matching relief:

(1) if the OIG amount is matched to a capital payment to a UK resident then an OIG is treated as arising in the year to that beneficiary and
(2) this disapplies OIG s.731.

In short, the OIG s.87 charge has priority over OIG s.731. This applies even if the OIG s.87 charge is (un)taxed on the OIG s.87 remittance basis because the s.87 deemed OIG is nevertheless treated as arising.

*Examples*

The following examples are based on this situation:

(1) A non-resident trust is within s.731 (UK resident beneficiaries) but not within s.720 (transferor has no power to enjoy or else is not UK resident.) The motive defence does not apply.
(2) The trust has realised an OIG in year 1 of £1m.
(3) The trust has no relevant income (leaving aside the OIG).

*Example 1*
*The trustees make a capital payment of £1m to a beneficiary in year 1.*
The beneficiary is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis).
The TAA provisions are disapplied, ie, the OIG does not become relevant income.

*Example 2*
*(1) The trustees make no capital payment to any beneficiary in the year that the OIG accrues*
No-one can be subject to tax in year 1 as OIG s.87 only applies if there is a capital payment and OIG s.731 only applies if there is a benefit (which for practical purposes means the same as a capital payment).
(2) *The trustees make a capital payment of £1m to a UK resident beneficiary in year 2.*
The beneficiary is taxed on the capital payment under OIG s.87 (subject to the s.87 OIG remittance basis).
I have considered regulation 21(6) OFTR which provides:

> If, by virtue of paragraph (1) as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year, the OIG amount in question must be reduced (with effect from the following tax year) by the amount of the income.

Does this apply in year 1? Only if *income is treated under Chapter 2 of Part 13 of ITA as arising* in year 1. Chapter 2 part 13 uses the expression *income is treated as arising* in s.731 (income treated as arising to a non-transferor) and in s.720 (income treated as arising to a transferor). However these sections do not apply in year 1. So reg.21(6) does not apply.

I have considered the argument that income is treated as arising in year 1 to the *person abroad* (the OIG) because of reg.21(1). But this is not correct, for such income is not treated as arising under Chapter 2 Part 13. This is confirmed, I think, by reg. 21(2) OFTR which uses the expression "treated as arising" where the reference is clearly to income treated as arising to the transferor under s.720 or to a beneficiary under s.731.

It follows that all capital payments are taxed under OIG s.87 and not OIG s.731. This is a fair and reasonable result.

## 32.17.2 *OFM example: OIG s.87 - 2008 transitional relief*

The OFM provides:

> **OFM09325 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: attribution rules: example of non-UK domiciled beneficiary not chargeable on offshore income gain arising prior to 6 April 2008**
> **Example showing how a UK resident but non-UK domiciled beneficiary may not be chargeable to tax on an offshore income gain arising in a non-resident settlement prior to 6 April 2008 – paragraph 100 Schedule 7 FA 2008**
> **Example of effect of paragraph 100 Schedule 7 FA 2008**
> A settlement with non-UK resident trustees has never been settlor interested. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any chargeable gains.
> The non-resident company held a material interest in an offshore fund. When that was disposed of in 2005-06 an OIG amount of £60,000 arose.
> The first capital payments to beneficiaries were made in 2010-11 which were:
> £40,000 to a UK resident and domiciled beneficiary
> £40,000 to a UK resident but non-UK domiciled beneficiary
> £40,000 to a non-UK resident beneficiary.
> There is a matching of £20,000 of each of these capital payments with the 2005-06 OIG amount. Each beneficiary has £20,000 of offshore income gain attributed to them via section 87 TCGA rules. There are no unmatched OIG amounts to carry forward within the non-resident settlement structure.
> The UK resident and domiciled beneficiary is chargeable to income tax in 2010-11 on the £20,000 offshore income gain attributed to them.
> The UK resident but non-UK domiciled beneficiary is not chargeable to income tax on any of the £20,000 offshore income gain attributed to them. This is because the OIG amount used in the section 87 matching process arose before 6 April 2008 - paragraph 100(2)(b) Schedule 7 FA 2008.
> The non-UK resident beneficiary is not chargeable to income tax on any of the £20,000 offshore income gain attributed to them.
> There are unmatched capital payments of £20,000 to each beneficiary to carry forward at 5 April 2011.

What is the position for s.731? Para 21(5) OFTR (OIG matching relief) provides:

> If—
> (a) by virtue of regulation 20 [OIG s.87] an offshore income gain is treated as arising in a tax year to a person *resident or ordinarily resident in the UK*, and
> (b) it is so treated by reason of the relevant offshore income gain (or part of it),
> for that and subsequent tax years paragraph (1) does not apply in relation to the relevant offshore income gain (or that part).

Of the £60k OIG, only £40k is treated as arising to persons resident in the UK, so one might think that £20k remained as relevant income, taxable on the UK resident beneficiaries. That is absurd, for contrast the situation where the same payments are made to the UK beneficiaries and no payment to the non resident. The UK domiciled resident is taxed on £30k and the foreign domiciled resident is not taxed. It seems strange if the tax should be more because of the payment to the non-resident. The author of the OFM presumably thought so.

The same point applies to the next example.

### 32.17.3 *OFM example: OIG s.87 - rebasing relief*

The OFM provides:

> **OFM09330 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: attribution rules: example of effect of 'rebasing' election**
> **Example showing how a UK resident but non-UK domiciled beneficiary may benefit from a 'rebasing' election – paragraph 101 Schedule 7 FA 2008**
> **Example of effect of 'rebasing' election - paragraph 101 Schedule 7 FA 2008**
> A settlement with non-UK resident trustees is settlor interested because the settlor can benefit. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any chargeable gains. The trustees have made a 'rebasing' election under paragraph 126 Schedule 7 FA 2008.

The non-resident company purchased a material interest in an offshore fund in 2000-01. This is disposed of in 2010-11 resulting in an OIG amount of £60,000. The post 5 April 2008 element of that OIG amount is £15,000.

The first capital payments made to beneficiaries were made in 2010-11. They were:

£40,000 to a UK resident and domiciled beneficiary

£40,000 to a UK resident but non-UK domiciled beneficiary

£40,000 to a non-UK resident beneficiary.

There is a matching of £20,000 of each of these capital payments with the 2010-11 OIG amount. Each beneficiary has £20,000 of offshore income gain attributed to them via section 87 TCGA rules. There are no unmatched OIG amounts to carry forward within the non-resident settlement structure.

The UK resident and domiciled beneficiary is chargeable to income tax in 2010-11 on the £20,000 offshore income gain attributed to them.

The UK resident but non-UK domiciled beneficiary (where the remittance basis is used) is only chargeable to income tax on £5,000 (£20,000×£15,000/£60,000) of the £20,000 offshore income gain attributed to them. That is the post 5 April 2008 element of the £20,000 offshore income gain attributed to them. This is by virtue of paragraph 101 Schedule 7 FA 2008.[20]

The non-UK resident beneficiary is not chargeable to income tax on any of the £20,000 offshore income gain attributed to them.

There are unmatched capital payments of £20,000 to each beneficiary to carry forward at 5 April 2011.

### 32.17.4 *OFM example: OIG s.720 - loss of rebasing relief*

The OFM provides:

**OFM09335 Non-reporting funds: charge to tax on disposal of an interest: non-resident settlements: attribution rules: example of ‘rebasing’ election having no effect**

**Example showing how a UK resident but non-UK domiciled beneficiary may not benefit from a ‘rebasing’ election – paragraph 101 Schedule 7 FA 2008**

**Example of ‘rebasing’ election having no effect - paragraph 101 Schedule 7 FA 2008**

20 [Author’s note:] it is assumed that the remittance basis does not apply.

> This example has similar facts as that in OFM09330 with the exception that capital payments are not made to beneficiaries until a year after that in which the OIG amount arises in the offshore trust structure. In such a case there may be no benefits of a 'rebasing' election to a non-UK domiciled beneficiary in respect of any offshore income gain attributed to them.
>
> A settlement with non-UK resident trustees is settlor interested because the UK resident and ordinarily resident, but non-domiciled, settlor can benefit. The trustees own all the share capital of a non-UK resident company. Neither the trustees nor the company has received any income nor made any capital gains. The trustees have made a 'rebasing' election under paragraph 126 Schedule 7 FA 2008.
>
> The non-resident company purchased a material interest in an offshore fund in 2000-01. This is disposed of in 2010-11 resulting in an OIG amount of £60,000. The post 5 April 2008 element of that OIG amount is £15,000.
>
> The first capital payments made to beneficiaries were made in 2011-12. They were:
>
> £40,000 to a UK resident and domiciled beneficiary
>
> £40,000 to a UK resident but non-UK domiciled beneficiary (who was also the settlor)
>
> £40,000 to a non-UK resident beneficiary.
>
> In 2010-11 there have been no capital payments in that year, or earlier years, to beneficiaries. So there can be no attribution of the OIG amount to beneficiaries under the section 87 attribution rules in regulation 20.
>
> We then have to consider if there can be an attribution under the transfer of assets rules in regulation 21 for 2010-11. The entire £60,000 OIG amount can be attributed to the settlor as an offshore income gain for that year. The non-UK domiciled settlor is chargeable to income tax in 2010-11 on the £60,000 offshore income gains attributed to them, subject to any remittance basis considerations. The 'rebasing' election has no effect on the amount chargeable to income tax as the attribution has not been made via the section 87 attribution rules.
>
> The OIG amount is reduced to Nil (regulation 21(6)). There are no unmatched OIG amounts to carry forward to 2011-12. There is nothing to match with the capital payments made in 2011-12 so the full amount of those payments are unmatched capital payments to carry forward at 5 April 2012.

Was this result intended in 2008? Since HMRC gave no indication of their thinking, it is hard to tell.

## 32.18 Interaction of OIG s.87 and OIG TAA provisions where motive defence applies

EN FB 2008 provides:

> 46. Offshore income gains that are not matched in that year [the year they arise] will be chargeable to tax by reason of the provisions relating to the transfer of assets abroad legislation in Chapter 2 of Part 13 of the Income Tax Act 2007. *There is an exception to this rule where the motive or purpose defence in sections 736 to 742 applies to the gain.*

The legislation has not however achieved this result. Regulation 21(6) disapplies OIG s.87:

> If, by virtue of paragraph (1) as it applies in relation to the relevant offshore income gain, income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year,...

We must ask whether "income is treated under Chapter 2 of Part 13 of ITA 2007 as arising" if the motive defence applies. In fact even where the motive defence does apply, income is treated as arising *to the person abroad*. Regulation 21(1) OFTR provides:

> Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) applies in relation to an offshore income gain arising to a person resident or domiciled outside the UK as if the offshore income gain were income becoming payable to the person.

But reg.21(6) is perhaps intending us to ask if income is treated as arising *to the transferor or to a non-transferor* under s.720 or s.731. Section 739(2) ITA provides the relief where the motive defence applies to pre-2006 transactions:

> An individual is not liable for income tax under this Chapter for the tax year by reference to the relevant transactions if the individual satisfies an officer of Revenue and Customs that condition A or B is met.

Section 737(2) ITA is identically worded for post-2006 transactions. Now, even though the individual is not liable for IT, the terms of reg.21(6) are still satisfied: "income is treated under Chapter 2 of Part 13 of ITA 2007 as arising in a tax year" even if the individual is not liable for income tax on that income. The result is not absurd, especially since the motive defence may be retrospectively lost by a tainted associated operation.

A court may find this too literal an approach. But as the legislation becomes more and more complex (and the OFTR is as complex as tax can get), it is less and less appropriate to apply anything but a literal interpretation to find what it means.

## 32.19 Computation of OIGs

Regulation 38 OFTR provides:

> (1) An offshore income gain arises to a person on the disposal of an asset if a basic gain arises on the disposal.
> (2) The disposal gives rise to an offshore income gain of an amount equal to the basic gain on the disposal.
> (3) The following provisions of this Chapter explain how the basic gain is computed.

So we move on to regulation 39:

> (1) In the case of a participant chargeable to income tax, the basic gain is a gain of the amount which would be the gain on that disposal for the purposes of TCGA 1992 if the gain were computed without regard to any charge to income tax arising under this Part.
> (2) In the case of a participant chargeable to corporation tax, the basic gain is a gain of the amount which would be the gain on that disposal for the purposes of TCGA 1992 if the gain were computed—
> (a) without regard to any charge to corporation tax arising under this Part, and
> (b) without regard to any indexation allowance on the disposal under TCGA 1992.

Following the abolition of CGT indexation and taper reliefs, the amount of an OIG accruing on a disposal by individuals or trustees is generally the same as the amount of a CGT chargeable gain would be had the asset not been an offshore fund. For UK companies, the gain is the same except that there is no indexation allowance.

There is no relief for tax credits or foreign tax paid by the offshore fund (except that such tax reduces the value of the fund and so reduces the

OIG). But this is also the case for CGT.

Regulation 39(3) flags up specific OIG rules:

> The computation of the basic gain is subject to—
> (a) regulation 34 (provisions applicable on death);
> (b) regulation 35 (application of section 135 of TCGA 1992);
> (c) regulation 36 (application of section 136 of TCGA 1992);
> (d) regulation 37 (exchange of interests of different classes);
> (e) regulation 40 (earlier disposal to which the no gain/no loss basis applies);
> (f) regulation 41 (modifications of TCGA 1992);
> (g) regulation 42 (losses);
> (h) regulation 43 (special rules for certain existing holdings).

I do not discuss regulations 35-39. Regulation 40 prevents indexation relief creeping in by the back door:

> **Earlier disposal to which the no gain/no loss basis applies**
> 40.—(1) This regulation applies if—
> (a) a participant is chargeable to corporation tax, and
> (b) the amount of any chargeable gain or allowable loss which would arise on the disposal would fall to be computed in a way which, in whole or in part, would take account of the indexation allowance on an earlier disposal to which section 56(2) of TCGA 1992 (disposals on a no gain/no loss basis) applies.
> (2) The basic gain on the disposal is computed as if—
> (a) no indexation allowance had been available on any such earlier disposal, and
> (b) subject to that, neither a gain nor a loss had arisen to the person making such an earlier disposal.

Regulation 41 disapplies rollover and holdover reliefs:

> (1) If the disposal forms part of a transfer to which section 162 of TCGA 1992 (roll-over relief on transfer of business) applies, the basic gain arising on the disposal is computed without regard to any deduction which falls to be made under that section in computing a chargeable gain.
> (2) If the disposal is made otherwise than under a bargain at arm's length and a claim for relief is made in respect of that disposal under section 165 or 260 of TCGA 1992 (relief for gifts), the claim does not affect the computation of the basic gain arising on the disposal.

## 32.20 Computation of CGT chargeable gain on disposal of offshore fund

A disposal for the offshore funds rules is generally also a disposal for CGT. The OFTR provides relief against a double charge. Regulation 44 sets the scene and provides terminology:

> (1) This Chapter applies if—
> (a) a material disposal[21] gives rise to an offshore income gain, and
> (b) that disposal also constitutes the disposal of the interest concerned for the purposes of TCGA 1992.
> (2) In this Chapter the disposal specified in paragraph (1)(b) is called the "TCGA disposal".

I adopt that terminology here. In practice a disposal of an offshore fund will generally be a TCGA disposal. Regulation 45 OFTR provides:

> (1) This regulation applies for the purposes of the computation of the chargeable gain arising on the TCGA disposal.
> (2) The provisions of this regulation have effect in relation to the TCGA disposal in substitution for section 37(1) of TCGA 1992 (deduction of consideration chargeable to tax on income).
> (3) In the computation of the gain arising on the TCGA disposal, a sum equal to the offshore income gain shall be deducted from the sum which would otherwise constitute the amount or value of the consideration for the disposal.

Regulation 45(2) disapplies s.37(1) TCGA which normally governs the overlap between IT and CGT. It introduces instead its own rules in reg.45(3). I am not sure why, because s.37 would have had the same effect.[22]

This may apply to disposals on which no OIG charge arises. A TCGA disposal includes:

---

21 Defined in reg.15: "In these Regulations a 'material disposal' means a disposal to which this Part applies." Since the expression "material disposal" is only used once in reg.44, it could have been more concisely expressed, but the meaning is clear.

22 Section 37(1) TCGA provides: "There shall be excluded from the consideration for a disposal of assets taken into account in the computation of the gain any money or money's worth charged to income tax as income of, or taken into account as a receipt in computing income or profits or gains or losses of, the person making the disposal for the purposes of the Income Tax Acts."

(1) A disposal by a non-resident individual, although the OIG non-residence defence applies.
(2) A disposal by a remittance basis taxpayer, although the OIG remittance basis applies.
(3) A disposal by a non-resident trust, although outside the scope of the OIG charge.
(4) A disposal by a non-resident company.

Regulation 45(5)(6) OFTR deals with part disposals:

> (5) Paragraph (6) applies if the TCGA disposal is of such a nature that, by virtue of section 42 of TCGA 1992 (part disposals), an apportionment falls to be made of certain expenditure.
> (6) No deduction is to be made by virtue of paragraph (3) in determining the amount or value of the consideration for the purposes of the fraction in section 42(2) of TCGA 1992.

The OFM provides:

> **OFM11100 Investors in non-reporting funds: deduction of offshore income gains in computing capital gains: treatment of the disposal - general – Regulation 45**
> Where there is a part-disposal so that section 42 of TCGA applies to determine the apportionment of acquisition costs to the disposal then the full amount of disposal consideration is taken into account for the purposes of the calculation required by that section – that is, the offshore income gain is not deducted from the disposal consideration for the purposes of calculating the part disposal fraction at section 42(2).

Why is that?

## 32.21 Losses

Regulation 42 OFTR provides:

> (1) If the effect of any computation under regulations 39 to 41 would be to produce a loss, the basic gain on the disposal is nil.
> (2) Paragraph (1) applies notwithstanding section 16 of TCGA 1992 (losses determined in like manner as gains).
> (3) Accordingly, for the purposes of these Regulations, no loss is to be treated as arising on the disposal.

An offshore income gain is charged to IT but where a loss arises on the disposal, there is no income tax relief.[23] The loss will be allowable for CGT if ordinary CGT principles permit. HMRC agree. The OFM provides:

> **OFM 09050 Investors in non-reporting funds: charge to tax on disposal of an interest: overview**
> ...Losses
> Where there is a loss on disposal then the gain for the purposes of tax on an offshore income gain is nil, that is there is no recognition of losses for the purposes of the regulations (regulation 42). Accordingly, in a case where there is also a disposal for the purposes of TCGA, any loss made (calculated in accordance with that Act) may be treated as a capital loss for the purposes of TCGA.

This means that remittance basis taxpayers and non-residents will generally have no loss relief.[24]

The loss (if allowable) is computed on CGT principles (not the OIG computation rules) but the amount is usually the same.

## 32.22 Exemptions

Chapter 3 part 2 OFTR set out 11 exemptions from the charge to tax on OIGs. The following are only mentioned here:

(1) UK companies owning offshore funds which are:
  (a) loan relationships (the loan relationship rules prevail)
  (b) derivative contracts (the derivative rules prevail)
  (c) intangible fixed assets (the intangible rules prevail)
(2) Excluded indexed securities
(3) Policies of insurance: the chargeable events regime prevails.
(4) Trading stock
(5) Exemption for insurance companies
(6) Offshore fund a loan other than a participating loan
(7) Transparent funds: see 32.22.1 (Exemption for transparent fund)
(8) Transitional relief; see 32.29 (2009 Transitional rules)
(9) Charities: see Kessler and Brown, *Taxation of Charities and Non-*

23 Section 152(8) ITA prevents miscellaneous losses being set against OIGs.
24 See 48.1 (Capital losses).

*Profit Organisations*, (8th ed, 2011), para 3.12.

### 32.22.1 *Exemption for transparent fund*

Regulation 29 OFTR provides an exemption:

> (1) No liability to tax arises under regulation 17 if—
> (a) the disposal is the disposal of an interest in an offshore fund falling within paragraph (b) or (c) of section 40A(2) of FA 2008, and
> (b) the fund is a transparent fund.
> This is subject to paragraphs (2) and (3).
> (2) But there is a charge to tax under regulation 17 if—
> (a) there is a disposal of an interest in a transparent fund, and
> (b) during a period beginning with the date the interest (or any part of it) was acquired and ending with the date of the disposal, the offshore fund has at any time held interests in other non-reporting funds which amounted in total to more than 5% by value of the offshore fund's assets.
> (3) And there is a charge to tax under regulation 17 if—
> (a) there is a disposal of an interest in a transparent fund,
> (b) the fund is a non-reporting fund, and
> (c) the fund fails to make sufficient information available to participants in the fund to enable those participants to meet their tax obligations in the UK with respect to their shares of the income of the fund.
> (4) If, on the disposal by an offshore fund of an interest in another non-reporting fund, no liability would arise under regulation 17 by virtue of this regulation, that interest is not taken into account for the purposes of paragraph (2)(b).

The OFM provides:

> **OFM10200 Investors in non-reporting funds: exceptions to the charge to tax: interests in certain transparent funds**
> ... Other types of arrangements that are transparent for income purposes but not transparent for capital gains purposes (Section 99 and 103A TCGA - see OFM03500 onwards) such as, for example, certain unit trusts (following the case of *Archer-Shee v. Baker*) or certain foreign contractual arrangements (such as Fonds Commun de Placement ("FCPs")) fall within the definition of an offshore fund. They are therefore subject to the Offshore Funds (Tax) Regulations 2009 (SI2009/3001) generally, with certain modifications as described below. The purpose of the offshore fund regime is to ensure that income cannot

be rolled up free of tax, with any subsequent gain on disposal being charged only as a capital gain. If a fund is transparent for income, such as would be the case for certain unit trusts and contractual funds, then any income arising to the fund is treated as arising to an investor in proportion to his rights. This means that income is charged to tax as it arises.

However, it might be the case that an income transparent fund that came within paragraph (b) or (c) of section 40A(2) of FA 2008 itself invested in a non-reporting fund, and if that were the case then income could be rolled up in the underlying fund, because income would only be credited to the top fund if it was distributed.

In order to counter potential roll-up of income by an income transparent fund in underlying non-reporting funds, whilst also preventing unnecessary administrative burdens for transparent arrangements coming within the definition of an offshore fund and for their investors, any gain on disposal of an interest in an income transparent offshore fund will not be taxed as an offshore income gain unless -

- during a period beginning on the date the interest (or any part of it) was acquired and ending on the date of the disposal, the offshore fund at any time held interests in other non-reporting funds (except for certain other transparent funds (see below) which amounted in total to more than 5% by value of the offshore fund's assets (Regulation 29(2)), or
- the transparent fund is a non-reporting fund, and the fund fails to make sufficient information available to participants in the fund to enable those participants to meet their tax obligations in the United Kingdom with respect to their shares of the income of the fund (Regulation 29(3)).

Whilst this does mean that transparent funds will have to monitor their underlying investments, it allows such funds to avoid the need to apply for reporting fund status (and for their UK investors to be charged only capital gains tax or corporation tax on an capital gain arising, rather than incurring an offshore income gain, provided the fund has complied with Regulation 29(2)).

It follows that if a transparent offshore fund is invested by more than 5% by value of its total investments in non-reporting non-transparent funds it may apply for reporting fund status in order to allow UK investors to be charged to tax on capital gains on disposal rather than to an offshore income gain. If reporting fund status is granted then the fund will be subject to the requirements of the regulations, including those relating to the calculation of income from non-reporting funds (see regulations 69 to 71).

Investments by transparent non-reporting funds in other transparent non-reporting funds - Regulation 29(4)

There is one important relaxation to the requirements of regulation 29(2). That is, if a transparent non-reporting fund ("TNRF1") invests in another TNRF (TRNF2) then, where a disposal of an interest in TNRF2 would not itself give rise to an offshore income gain (under regulation 17) for a UK investor, it is ignored in determining whether TNRF1 is invested in non-reporting funds by more than 5% of the value of its assets in total. This is because in such circumstances there can be no significant roll-up of income in the underlying fund(s).

This means that a TNRF's investments could, for example, consist wholly of interests in other underlying TNRFs that themselves held only, say, UK property. Or, a TNRF could be the top layer fund in a fund of funds structure with multiple layers of other TNRFs below the top fund, provided that each of those underlying TNRFs themselves did not hold more than 5% by value of their assets in total in other non-transparent, non-reporting funds.

In deciding whether the investee fund qualifies under this regulation this rule may be applied to the investee fund and to any funds in which it, in turn, holds investments.

**Provision of information to participants**

If a fund is unable to provide sufficient information to its UK investors to enable them to meet their UK tax obligations then an offshore income gain will be charged on any gains realised on subsequent disposals of relevant interests. The provision of "sufficient information" would include details of an investor¡|s proportionate share of both income arising to the fund and reported income or offshore income gains arising to it, as well as confirmation as to whether or not the fund has invested more than 5% by value of its assets in non-reporting funds. In practice, many existing income transparent funds with UK investors already provide vouchers to those clients detailing income arising to the fund, for example interest income, and foreign or UK dividends.

## 32.23 Distributed income of offshore fund

In the absence of express provision, the taxation of distributed income of reported funds would depend on the nature of the fund:

(1) Distributions from corporate funds would be taxed as dividends.

(2) Distributions from transparent funds would be taxed as the income of the underlying assets.

(3) Distributions from non-transparent non-corporate funds (ie non-

transparent unit trusts) would be taxed as annual payments.

In each case the income will be RFI and so can qualify for the remittance basis.

### 32.23.1 *Bond Funds*

The first dent in this position is s.378A ITTOIA which reclassifies some distributions as interest:

> (1) This section applies where—
> (a) a dividend[25] is paid by an offshore fund, and
> (b) the offshore fund fails to meet the qualifying investments test at any time in the relevant period.[26]
> (2) The dividend is treated as interest for income tax purposes.

Section 378A(3) defines the qualifying investments test:

> (3) For the purposes of this section, an offshore fund fails to meet the qualifying investments test if the market value of the fund's qualifying investments exceeds 60% of the market value of all of the assets of the fund (excluding cash awaiting investment)...
> "qualifying investments" has the meaning given in section 494 of CTA 2009.

I refer to offshore funds within s.378A as **"bond funds"**. EN FA 2009 explains:

---

25 Defined in s378A(7):
"In this section—
"dividend" includes any distribution that (but for this section) would be treated as a dividend for income tax purposes".

26 Defined in s.378A(4)(5):
(4) "The relevant period" means—
(a) the relevant period of account of the offshore fund, or
(b) f longer, the period of 12 months ending on the last day of that period.
(5) "The relevant period of account" means—
(a) the last period of account ending before the dividend is paid, in a case in which the profits available for distribution at the end of that period (and not used since then by distribution or otherwise) equal or exceed the amount of the dividend (aggregated with any other distribution made by the offshore fund at the same time), and
(b) the period of account in which the dividend is paid, in any other case.

> Certain distributions from offshore funds are economically similar to payments of yearly interest. Clause 39, from 22 April 2009, charges distributions of this type to tax as if they were yearly interest.
> ... The test in subsection (3) is similar to that which applies to corporate investors for the purposes of the loan relationships legislation. (See sections 490 and 493 CTA 2009). A distribution is treated as interest if the offshore fund, at any time during the 'relevant period', holds more than 60 per cent of its assets in the form of qualifying investments. The definition of a qualifying investment is set out in section 494 CTA 2009 and, in summary, refers to interest bearing and economically similar investments.
> ... The purpose of the clause is to prevent a tax advantage being gained by holding interest bearing assets within an offshore fund structure....
> From 22 April 2009, where a distribution from an offshore fund takes the form of a dividend the rate will be the dividend tax rate after taking into account the dividend tax credit. However, where the offshore fund is substantially invested in interest bearing, or economically similar, assets as described in paragraph 4 above then any distribution will be treated as interest for income tax purposes.

## 32.24 Undistributed income of reporting funds (deemed RF income)

In the absence of express provision, undistributed income of offshore funds would not be subject to tax. However the OFTR alters that. The legislation distinguishes between three types of funds:

(1) Non-transparent funds:
    (a) corporate funds (corporate funds cannot be transparent)
    (a) non-corporate non-transparent funds
(2) Transparent funds.

### 32.24.1 *Meaning of "transparent"*

Regulation 11 OFTR provides:

> For the purposes of these Regulations a fund is a "transparent fund" if, in the case of holders of interests in the fund who are individuals resident in the UK, any sums which form part of the income of the fund are of such a nature that those holders—
> (a) are chargeable to tax under a provision specified in section 830(2) of ITTOIA 2005 in respect of such of those sums as are referable to their

> interests, or
> (b) if any of that income is derived from assets within the UK, would be so chargeable had the assets been outside the UK.

What is the purpose of (b)?

### 32.24.2 *Undistributed income of non-transparent funds*

Regulation 94(1) OFTR provides:

> In the case of a reporting fund which is not a transparent fund, the Tax Acts have effect as if the excess (if any) of the reported income of the fund in respect of a reporting period over the distributions made by the fund in respect of the reporting period were additional distributions made to the participants in the fund in proportion to their rights.

I refer to this as **"deemed RF income".** Reg.94(3) identifies the date and recipient of deemed RF income:

> The excess specified in paragraphs (1) and (2) is treated as made, on the fund distribution date,[27] to participants holding an interest in the fund at the end of the reporting period.

The OFM provides:

> **OFM15600 Reporting funds: tax treatment of participants in reporting funds: general provisions**
> ...Where an investor holds some interests that are grandfathered (as a result of regulation 30) and some that are not, the excess specified in regulation 94 is reduced proportionately.

### 32.24.3 *Corporate funds*

Regulation 95 OFTR provides:

> (1) This regulation applies if—

---

27 This term is defined in reg.94(4) OFTR:
In these Regulations the "fund distribution date" for a reporting period of a reporting fund means the date six months following the last day of the reporting period.

> (a) a reporting fund makes a distribution to a participant chargeable to income tax in respect of a reporting period, and
> (b) the fund falls within section 40A(2)(a) of FA 2008.

That is, the regulation applies to corporate reporting funds.

> (2) This regulation also applies if some or all of the excess specified in regulation 94(1) is treated as made by such a fund to such a participant.
> (3) If section 378A of ITTOIA 2005 (offshore fund distributions) applies to any amount falling within paragraph (1) or (2), the amount is charged to income tax in accordance with that section.

This does not seem to need saying for distributed income, but it is necessary to classify deemed RF income as interest. So deemed RF income of bond funds is "treated as interest for income tax purposes." If the recipient is a remittance basis taxpayer, this type of income qualifies for the remittance basis, just like ordinary interest.

What about deemed RF income of corporate non-bond funds? This is treated as "distributions" so it is treated as a dividend. Reg.54, 95(4) assumes this and confers the right to tax credits as other dividends:

> (4) If paragraph (3) does not apply to any amount falling within paragraph (1) or (2), but the participant is entitled to a tax credit on receiving a distribution falling within paragraph (1), section 397A of ITTOIA 2005 (savings and investment income: dividends from non-UK resident companies) also applies to the excess falling within paragraph (2).

This income qualifies for the remittance basis just as ordinary dividends.

HMRC agree. The OFM provides:

> **OFM08400 Investors in non-reporting funds: income & distributions: the charge to tax: remittance basis**
> Where an investor in a (non-transparent) non-reporting offshore fund is taxed on the remittance basis then the remittance basis rules apply to income arising from the holding in that fund as they apply to other income from non-UK sources.
> Where the fund is transparent for tax-purposes, then the income will arise from the underlying assets and not from the fund. In such a case the income may sometimes arise in the UK (even though the fund itself is domiciled offshore). Where the income arises in the UK the

remittance basis does not apply. Where the income arises offshore then the remittance rules will apply.

### 32.24.4 *Non-corporate non-transparent funds*

Regulation 96 OFTR provides:

> (1) This regulation applies if—
> (a) a reporting fund makes a distribution to a participant chargeable to income tax in respect of a reporting period,
> (b) the fund falls within paragraph (b) or (c) of section 40A(2) of FA 2008, and
> (c) the fund is not a transparent fund.
> (2) This regulation also applies if some or all of the excess specified in regulation 94(1) is treated as made by such a fund to such a participant.
> (3) Any amount to which paragraph (1) or (2) applies is charged to income tax—
> (a) under section 378A of ITTOIA 2005 (offshore fund distributions), or
> (b) (if that section does not apply) under Chapter 8 of Part 5 of ITTOIA 2005 (miscellaneous income: income not otherwise charged) for the year of assessment in which the distribution is made ...

This does not apply to a non-resident participant as such a person is not chargeable to income tax.

Regulation 96(3) continues:

> but sections 688(1) and 689 of ITTOIA 2005 (income charged and person liable) do not apply.

The disapplied sections would have provided:

> ***688*** *(1) Tax is charged under this Chapter on the amount of the income arising in the tax year.*
> *(2) Subsection (1) is subject to—*
> *(a) Chapter 1 of Part 7 (which provides relief on income from the use of furnished accommodation in an individual's only or main residence: see, in particular, sections 794 and 798),*
> *(b) Chapter 2 of that Part (which provides relief on income from the provision by an individual of foster care: see, in particular, sections 814 and 817), and*

*(c) Part 8 (foreign income: special rules).*
*689 The person liable for any tax charged under this Chapter is the person receiving or entitled to the income.*

### 32.24.5 *HMRC views*

HMRC agree. The OFM provides:

**OFM15660 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: corporate funds**
Where a reporting fund takes corporate form, any sums distributed together with any excess of reported income will be treated as foreign dividends (unless the fund is a 'bond fund' – see below). Until 22 April 2009, dividends received from offshore funds did not carry any entitlement to a dividend tax credit but from that date they will do so unless the distribution is from a bond fund (section 378A ITTOIA 2005). Any sums treated as an excess of reported income also carry an entitlement to a foreign tax credit, unless the fund is a bond fund (regulation 95(4)).
**Bond funds**
From 22 April 2009 there is a change to the way dividends from offshore funds which are substantially invested in interest-bearing assets (commonly known as 'bond funds') are treated for tax purposes. Where an offshore fund holds more than 60% of assets in interest-bearing (or economically similar) form, any distribution or excess of reported income is treated as a payment of yearly interest (section 378A ITTOIA 2005 / regulation 95(3)). Such sums do not qualify for a dividend tax credit and the tax rates that apply are those applying to interest. Fund managers should be able to tell UK investors if a fund is a bond fund.
**Remittance basis users**
Where individuals not domiciled in the United Kingdom are taxed on the remittance basis then the normal remittance basis rules will apply to income arising from the reporting fund.
In the case of income that is reported but is not distributed then that income has not been remitted to the UK.
**OFM15670 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: other non-transparent funds**
Arrangements that are non-transparent for income purposes and that come within the definition of an offshore fund under section 40A(2)(b) FA 2008 (that is, funds that do not take corporate form) will be foreign

unit trusts. Foreign unit trusts that are not transparent for income purposes are sometimes referred to as 'Garland' unit trusts (following the case of *Garland v Archer-Shee* (15TC693)).

Non-transparent unit trusts

UK investors in foreign unit trusts that are non-transparent for income purposes are taxable on their proportionate share of income (as ascertained after the trustees have met the expenses of administering the trust) when it is indefeasibly allocated to them, regardless of whether the income is paid to them or accumulated. Unlike the position for transparent unit trusts, that income is taxable as miscellaneous foreign income (under Chapter 8 of Part 5 of ITTOIA 2005) and the tax rates applying will be those applying to such income.

If there is an excess of reported income over the amount allocated (for example if the unit trust has invested in another reporting fund and has itself received reports of income which was not actually distributed to it) then the excess must be treated by the participant in the same way as the allocated income (that is as miscellaneous foreign income (under Chapter 8 of Pat 5 of ITTOIA 2005).

**Remittance basis users**

Where individuals not domiciled in the United Kingdom are taxed on the remittance basis then the normal remittance basis rules will apply to income arising from the reporting fund.

In the case of income that is reported but is not distributed then that income has not been remitted to the UK.

**OFM15680 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to income tax: transparent funds**

**...Income: UK tax treatment of investors**

No matter what the legal form of a transparent reporting fund, for UK tax purposes the income of an income transparent fund is treated as arising directly to its investors (UK investors are charged to tax on income arising net of a deduction for proper expenses of the management of the fund in question, and this is the case for both unit trusts and contractual arrangements). So, for example, if a fund receives interest income then UK investors are charged to tax on their proportionate share of that income as it arises, irrespective of whether or not it is actually distributed to them. Investors should receive a voucher from the fund to tell them what proportion of the fund's income they are entitled to, and the split between interest, dividends, property income, etc. Investors should ask their fund manager for a voucher if they do not receive one.

If a transparent reporting fund holds investments in other reporting funds then investors are also taxable on their proportionate share of any income reported but not actually distributed by the underlying fund (regulation 94(2)). This will become part of the excess to be reported by the transparent reporting fund. Such excess reported income is charged to tax as miscellaneous foreign income under Chapter 8 of Part 5 ITTOIA 2005 (regulation 97(4)), and it is chargeable at investors' highest tax rate.

**Remittance basis users**

In a case where the reporting fund is transparent for UK tax purposes then the income will arise from the underlying assets and not from the fund. In such a case the income may sometimes arise in the UK (even though the fund itself is domiciled offshore). Where the income arises in the UK the remittance basis does not apply. Where the income arises offshore then the remittance rules will apply.

**OFM15700 Reporting funds: tax treatment of participants in reporting funds: participants chargeable to corporation tax**

Corporate investors in offshore funds will be chargeable to corporation tax on any distributions received from reporting funds under general principles, and on any excess of reported income of the fund invested in under regulation 94(1) and (2). Where such investors are taxable under regulation 94(1) on excess reported income, that amount will be treated as exempt if it would be exempt had it been an actual distribution.

The bond fund rules in Chapter 3 of Part 6 CTA 2009 (relationships treated as loan relationships) may apply if a reporting fund held more that 60% by value of its investments in debt type assets at any time during an investing company's accounting period – see the Corporate Finance Manual ('CFM')).

### 32.24.6 *Can deemed RF income be remitted?*

Legislation frequently deems an individual to receive income or gains (eg deemed s.13 gains, deemed s.624 income, deemed s.720 income). In these cases the legislation always has a provision which deems some actual funds to be derived from the individual's deemed income. So if those actual income or gains are received by the individual (or a relevant person) there is a taxable remittance. In this case however there is no such provision. So it appears at first sight that the deemed RF income cannot be remitted. While the actual income in the hands of the offshore fund could be received in the UK, those funds do not derive from the deemed RF income. The deemed RF income perhaps derives from those funds.

This does lead to a result that might be thought too good to be true. So it is more than possible that a court might read in an implied provision that the actual income of the offshore fund is derived from the deemed RF income, though that verges on legislation rather than construction.

HMRC may not agree. The OFM provides:

> **OFM15950 Reporting funds: tax treatment of participants in reporting funds: remittance basis**
> Where individuals not domiciled in the United Kingdom are taxed on the remittance basis then the normal remittance basis rules will apply to income arising from the reporting fund.
> In the case of income that is reported but is not distributed then that income has not been remitted to the UK.
> **Transparent Funds**
> In a case where the reporting fund is transparent for UK tax purposes then the income will arise from the underlying assets and not from the fund. In such a case the income may sometimes arise in the UK (even though the fund itself is domiciled offshore). Where the income arises in the UK the remittance basis does not apply. Where the income arises offshore then the remittance rules will apply.
> **Disposals**
> The proceeds of a disposal of a reporting fund will normally constitute a 'mixed fund' for the purposes of the remittance basis rules. This is because the proceeds may have been funded by undistributed reported income as well as by the original investment and any capital growth.

## 32.25 Transparent funds

Regulation 97 OFTR provides:

> (1) This regulation applies if—
> (a) a reporting fund is a transparent fund, and
> (b) some or all of the excess specified in regulation 94(2) is treated as income of a participant by virtue of that provision.
> (2) Any amount to which paragraph (1) applies is charged to income tax under Chapter 8 of Part 5 of ITTOIA 2005 as relevant foreign income within the meaning given by section 830 of ITTOIA 2005 for the year of assessment in which the distribution is made, but sections 688(1) and 689 of ITTOIA 2005 do not apply.

## 32.26 Non-reporting fund with interest in reporting fund

Regulation 16 OFTR provides:

> (1) This regulation applies if a non-reporting fund which is a transparent fund has an interest in a reporting fund.
> (2) In the case of any excess specified in regulation 94(1) or (2) which is treated, under that regulation, as made to the non-reporting fund, the Tax Acts have effect as if the excess were additional income of the participants in the non-reporting fund in proportion to their rights.
> (3) The additional income is treated as arising on the same date as the excess is treated as made to the non-reporting fund.
> (4) If a participant in the non-reporting fund is chargeable to income tax, the additional income is charged as relevant foreign income within the meaning given by section 830 of ITTOIA 2005.

The OFM provides:

> OFM08200 Investors in non-reporting funds: distributions: the charge to tax: 'transparent' funds
> ... Transparent non-reporting funds with interests in reporting funds (regulation 16)
> There is a further point to consider with regard to transparent non-reporting funds that hold interests in reporting funds. That is, where the underlying reporting fund does not distribute all of its 'reportable income' (see OFM14000 and OFM15500 onwards) then the excess would, if a UK investor held a direct interest in the fund, be treated as income (regulation 94). To ensure that principle is maintained, regulation 16 provides that where the interest is held by a non-reporting fund which is transparent for income purposes then the reportable excess will be similarly treated as additional income in proportion to each investor's rights.

## 32.27 Fund transactions treated as non-trading

This topic is dealt with in chapter 6 part 3 OFTR. A full discussion needs a long chapter to itself. In short, reg.80 OFTR provides:

> (1) This regulation applies if a diversely owned fund carries out an investment transaction in an accounting period.
> (2) The investment transaction is treated as a non-trading transaction.

The consequence of non-trading status is that the profit of the transaction is not income and need not be distributed by reporting funds.

The definitions of diversely owned and investment transaction are not considered here. HMRC argue that reg.80 is not to be taken to mean what it says:

> HMRC is aware that there has been recent industry speculation as to whether regulations contained within Chapter 6 of Part 3 of The Offshore Funds (Tax) Regulations 2009 (the 'regulations'), setting out when transactions by certain offshore 'reporting' funds are not treated as trading transactions for the purposes of computing 'reportable income', has any relevance to matters relating to the taxation of such funds potentially trading in the UK through a permanent establishment or agent. HMRC is therefore confirming that there is no such relevance.
>
> Regulation 80(2) of the regulations, which confirms that certain transactions are treated as non-trading transactions, applies only for the purposes of Chapter 5 of the regulations; that is for the purposes of computing an offshore fund's reportable income in order to establish the UK tax position of participants in the fund.
>
> The regulations are made under powers enabling provision to be made about the tax treatment of participants in an offshore fund (section 41 FA 2008) and they should be read in that context. Specifically, the regulations do not make or purport to make rules that affect the taxation of any of the funds referred to therein as 'offshore funds'; only to regulate the taxation of the returns from those funds to persons taxable under UK legislation. Funds that are taxable in the UK are dealt with by other legislation.
>
> It is a question of fact whether or not, for the purposes of that other legislation, a non-resident fund is carrying on a trade in the UK. Where such a fund is carrying on a trade in the UK through an investment manager operating here, the protection of the Investment Manager Exemption may be available in relation to any 'investment transaction' specified in the Investment Manager (Specified Transaction) Regulations 2009.[28]

## 32.28 Conversion from non-reporting fund to reporting fund

Regulation 48 OFTR provides:

> (1) This regulation applies if an offshore fund ceases to be a non-reporting fund and becomes a reporting fund.
> (2) A participant in the fund may make an election to be treated—
> (a) as disposing of the interest owned by the participant in the

---

28 Accessible *www.hmrc.gov.uk/ctsa/invest-man-exempt.htm* published 2 Feb 2010.

non-reporting fund at its market value on the disposal date, and
(b) as acquiring a holding in the reporting fund at the beginning of the reporting fund's first period of account.
This is subject to paragraph (5).
(3) Chapter 5 of this Part applies to determine the offshore income gain arising on the deemed disposal referred to in paragraph (2)(a).
(4) The deemed acquisition referred to in paragraph (2)(b) is treated as made for the same amount as the deemed disposal referred to in paragraph (2)(a).
(5) An election may not be made under paragraph (2) unless the offshore income gain arising on the deemed disposal referred to in paragraph (2)(a) (determined in accordance with paragraph (3)) is greater than zero.
(6) If the participant is chargeable to income tax, the election mentioned in paragraph (2) must be made by being included in a return made for the tax year which includes the disposal date.
(7) If the participant is chargeable to corporation tax, the election mentioned in paragraph (2) must be made by being included in the participant's company tax return for the accounting period which includes the disposal date.
(8) In this regulation—
"company tax return" has the same meaning as in Schedule 18 to the Finance Act 1998(a);
the "disposal date" means the final day of the last period of account before the fund becomes a reporting fund.

## 32.29 2009 Transitional rules

I do not attempt to discuss transitional rules in detail.[29]

---

29 Note also the following HMRC statement: "HMRC regrets that ... the Statutory Instrument (SI 2009/3139) ... contained an error with respect to long periods of account.
The intention was that the transitional rules, which provide for an existing fund to apply for distributing status for periods ended on or after 1 December 2009, would not apply to any period ending after 31 May 2012 (not 2011 as provided for in the instrument).
The government intends to amend the cut-off date given in sub-paragraph 3(3B) of Schedule 1 to The Offshore Funds (Tax) Regulations (SI 2009/3001 as amended by SI 2009/3139) to read 31 May 2012.
This announcement therefore gives notice of the intended amendment, which will be made at the first convenient opportunity."

Reg.30 OFTR provides:

> (1) No liability to tax arises under regulation 17 in respect of any rights in an offshore fund to which this regulation applies if the rights are acquired by a person—
> (a) before 1st December 2009, or
> (b) in accordance with paragraph (2).
> (2) Rights are acquired in accordance with this paragraph if—
> (a) the rights are acquired by the participant in accordance with a legally enforceable agreement in writing that was entered into by the participant before 30th April 2009,
> (b) in the case of an agreement which was conditional, the conditions are met before that date, and
> (c) the agreement is not varied on or after that date.
> (3) Rights of a person in a fund are rights in an offshore fund to which this regulation applies if, on the date on which the person acquired the rights, those rights did not constitute a material interest in an offshore fund within the meaning of that expression given by section 759 of ICTA.

Reg.43 OFTR provides for the case where a person holds an offshore fund before 2009 and purchases more of the same fund:

> (1) This regulation applies if—
> (a) a person acquired rights (the "protected rights") in an offshore fund—
> (i) before 1st December 2009, or
> (ii) in accordance with paragraph (2),
> (b) immediately before 1st December 2009 those rights did not constitute a material interest in an offshore fund within the meaning of that expression given by section 759 of ICTA, and
> (c) on or after 1st December 2009 the person acquires additional rights in the offshore fund (the "non-protected rights").
> (2) Rights are acquired in accordance with this paragraph if—
> (a) the rights are acquired by the participant in accordance with a legally enforceable agreement in writing that was entered into by the participant before 30th April 2009,
> (b) in the case of an agreement which was conditional, the conditions are met before that date, and
> (c) the agreement is not varied on or after that date.
> (3) For the purposes of tax in respect of chargeable gains—
> (a) section 104 of TCGA 1992 (share pooling: general

interpretative provisions) applies as if the protected rights were assets of a different class from the non-protected rights, and

(b) all the protected rights must be treated as disposed of before any of the non-protected rights may be so treated.

CHAPTER THIRTY THREE

# ACCRUED INCOME PROFITS

## 33.1 Accrued income profits – Introduction

This subject needs a book to itself. It would be an unrewarding labour since the rules are "widely ignored by both taxpayers, their advisors and within HMRC".[1] This chapter focuses on the questions closest to the themes of this book, but one can only approach those questions after understanding how the provisions operate, at least in the standard case (I do not consider specialist topics such as variable rate securities or conversions of securities).

The provisions apply on a transfer of securities. The AIP provisions do not apply for corporation tax.

## 33.2 AIP securities

Section 619(1) ITA defines "securities":

> In this Chapter "securities" includes—
> (a) any loan stock or similar security other than an excluded security, and
> (b) shares in a building society which are qualifying shares for the purposes of section 117(4) of TCGA 1992 (qualifying corporate bonds),

---

1 Responses to Consultation Exercise on Reform of the AIP, Inland Revenue, December 2004; consistent with that, several of the worked examples in the SAI manual are difficult to justify.
Reform was promised in 2006 but radical change was rejected and the matter was dropped.

but (subject to para (b)) it does not include any shares in a company.[2]

I refer to securities within this definition as "**AIP securities**". Section 619(3) ITA sets out seven categories of "Excluded securities":

(3) In this section "excluded securities" means—
- (a) national savings certificates (including Ulster Savings Certificates as defined in section 693(7) of ITTOIA 2005),
- (b) war savings certificates,
- (c) uncertificated eligible debt security units as defined in section 986,
- (d) certificates of deposit (see section 1019),
- (e) a security which is a right falling within section 552(1)(c) of ITTOIA 2005 at the time of the transfer in question,
- (f) a security that meets the redemption conditions (see subsection (5))[3], and
- (g) a security that is a deeply discounted security within the meaning of Chapter 8 of Part 4 of ITTOIA 2005.[4]

Thus deeply discounted securities are not AIP securities: (subject to the 2003 transitional rule) the DDS rules take priority over the AIP rules.

---

2 Section 619(2) ITA adds:
"(2) For the purposes of subsection (1)(a), it does not matter—
- (a) whether the security is of the government of the UK, any other government, any public or local authority in the UK or elsewhere, or any company or other body,
- (b) whether or not the security is secured,
- (c) whether or not the security carries a right to interest of a fixed amount or at a fixed rate percentage of the nominal value of the security, or
- (d) whether or not the security is in bearer form."

This can only be for the avoidance of doubt, because it only expresses the usual meaning of "security".

3 Defined s.619(5) ITA:
"The redemption conditions are that—
(a) the security is redeemable,
(b) the amount payable on its redemption exceeds its issue price, and
(c) no return other than the amount of that excess is payable on it."

4 Section 619(4) ITA contains a transitional exception: " But subsection (3)(g) does not include a security if, on its transfer, Chapter 8 of Part 4 of ITTOIA 2005 would apply subject to the rules in sections 454 to 456 of that Act (listed securities held since 26 March 2003)."

### 33.2.1 *Securities "of the same kind"*

This expression is strictly understood. Section 619(6) ITA provides:

> Securities are treated as being of the same kind for the purposes of this Chapter if they—
> (a) are treated as being of the same kind by the practice of a recognised stock exchange, or
> (b) would be so treated if dealt in on such an exchange.

SAI Manual provides:

> **4040 Accrued Income Scheme: what are "securities"** [August 2008]
> ... For example, Treasury 5% 2004 is not the same kind as Treasury 5% 2012. This is similar to the capital gains tax concept of securities of a particular class.

## 33.3 "Transfer"

In outline, the definition is in s.620(1) ITA:

> References in this Chapter to the transfer of securities are—
> (a) to the transfer of securities by way of sale, exchange, gift or otherwise,
> (b) to the conversion of securities in any case where there is no transfer of the securities within para (a),
> (c) to the redemption of variable rate securities in any case where there has been a transfer of the securities at any time before redemption, or
> (d) to a transaction or event treated as a transfer under—
> (i) section 648(1) or (3) (strips of gilt-edged securities),
> (ii) section 649(4) (new securities issued with extra return),
> (iii) section 650(2), (4) or (6) (trading stock appropriations etc),
> (iv) section 651(2) (owner becoming entitled to securities as trustee), or
> (v) section 652(2) (securities ceasing to be held on charitable trusts).

Thus there are altogether eight types of transfer. In this book I consider only the first type, which are transfers in the normal sense of the word. Section 620(2) provides one exception:

But subsection (1)(a) does not include—
(a) the vesting of securities in personal representatives on death...[5]

## 33.4 Transfer "with accrued interest"

### 33.4.1 *The commercial background*

The Debt Management Office explains the terminology **"clean"** and **"dirty"** price:

> The following example is taken from the DMO website for 30 November 2004 and shows close of business data for 5% Treasury Stock 2014:

**5TY145 | Treasury 2014 | GB0031829509 | 103.17 | 104.344033 | 4.592604**

> The first three fields are all means of identifying the gilt. The first is the DMO's internal identifier code and the second a shortened form of the gilt's name. The third field is the ISIN number (the International Security Identification Number – an identifier number used by the London Stock Exchange).
> The next three fields give price and yield information. The two prices shown of £103.17 and £104.344033 are known as the 'clean' and 'dirty' price respectively. Clean prices do not include accrued interest whereas dirty prices do (see the section on accrued interest on page 15). The clean price is typically the price, which is quoted when agreeing a purchasing or selling price. However, the actual amount of money which will change hands is based on the dirty price and will reflect settlement on the business day after the transaction.
> So, on the basis of the reference price on 30 November 2004, every £1,000 nominal of 5% Treasury Stock 2014 was worth £1,043.44.[6]

Note that for tax purposes the consideration for a gilt is "the actual amount of money which will change hands" - the dirty price.
SAI Manual explains the terminology ex-dividend and cum-dividend::

> **4020. Transfers "with accrued interest" and "without accrued interest"**

5 Paragraph (b) is a transitional rule for pre-2003 DDS (not discussed here).
6 A Private Investor's Guide to Gilts, Dec 2004, accessible *www.dmo.gov.uk*.

**... Sales with accrued interest ("cum div")**
Most sales of marketable securities are "cum div". That is, the buyer is entitled to the next interest due. As an interest payment date on a security approaches, its market price increases to reflect the increase in value of the buyer's right to the interest. In other words, the price reflects accrued interest.
For example, £100,000 8% Treasury Stock 2002–06 is transferred cum div on 19 April. 14 days' interest has accrued since interest was last paid on 6 April. Accrued interest is £307 (14/365 × 8% × 100,000)...
**Sales without accrued interest ("ex div")**
Not all sales of securities are "cum div". This is because gilt-edged securities, and some corporate bonds, have an "ex div" or "ex coupon" date. The next interest coupon is paid to the person who is registered as the holder of the security at that date. So if the security is sold in the "ex div" period, the seller collects and keeps the next interest due after the sale. For gilts, the "ex div" period is 7 business days before the coupon date (except for 3 ½% War Loan stock, for which it is 10 business days). Other securities may have a similar, or shorter, "ex div" period.
Consequently the market price of a security sold "ex div" reflects the fact that the purchaser will own the security for a short period from the date of purchase to the next interest payment date. This is a period over which interest accrues but for which the interest is received not by him but by the seller. The interest accrued over such a period is known as rebate interest. It is treated in the opposite way to the more normal accrued interest associated with a "cum div" sale.
For example, £100,000 8% Treasury Stock 2002–06 is transferred ex div on 29 March. 7 days' interest has accrued from the day after the transfer to the next interest date, 6 April. Accrued interest is £153 (7/365 × 8% × 100,000). ...

### 33.4.2 *Definition of with/without accrued interest*

Section 623(1) ITA provides a commonsense definition:

The general rule is that securities are transferred with accrued interest for the purposes of this Chapter if they are transferred with the right to receive interest payable—
(a) in a case where the settlement day is an interest payment day, on the settlement day, and
(b) in any other case, on the first interest payment day after the settlement day.

Section 624(1) ITA provides the corresponding definition of a transfer "without accrued interest":

> The general rule is that securities are transferred without accrued interest for the purposes of this Chapter if they are transferred without the right to receive interest payable as mentioned in section 623(1)(a) or (b).

The definitions are comprehensive so every transfer must be either with or without accrued interest, and they are simply English paraphrases of the technical expressions *cum dividend* and *ex dividend* (or cum-div and ex-div).

The terms "interest" "settlement day" and "interest period" are defined but the definitions are not considered here.

Thus whether a market sale is with or without accrued interest depends only on the date of the sale, whether it is before or after the ex div date. Vendors and purchasers have no choice in the matter except by timing the sale. Whether an off-market sale is with or without accrued interest is a matter for the parties to agree.

## 33.5 Deemed interest payment, credit and debit

Section 632(1) ITA provides:

> In the case of a transfer of securities with accrued interest, for the purposes of this Chapter a payment is treated as made by the transferee to the transferor in the interest period in which the settlement day falls.

It is useful to have some terminology to describe this. I refer to this payment as "**a deemed interest payment**". The transferor (deemed to receive the payment) has **"a deemed interest credit"**. The transferee (deemed to make the payment) has **"a deemed interest debit"**.

Section 632 then defines the amount of the deemed payment. In outline:

> (2) The amount of that payment depends on whether the transfer is under an arrangement by which the transferee accounts to the transferor separately—
> (a) for the consideration for the securities, and
> (b) for gross interest accruing to the settlement day.
> (3) If the transfer is under such an arrangement, the amount of the payment is the amount of gross interest which the transferee accounts for.

(4) If—

(a) the transfer is not under such an arrangement, and

(b) the settlement day is itself an interest payment day for the securities,

the amount of the payment is the amount of interest payable on the securities on that day.

(5) If—

(a) the transfer is not under such an arrangement, and

(b) the settlement day is not an interest payment day for the securities,

the amount of the payment is an amount equal to—

$I \times (A \div B)$

where—

I is the interest payable on the securities on the first interest payment day after the settlement day ("the payment day"),

A is the number of days in the period beginning with the first day on which that interest accrues and ending with the settlement day, and

B is the number of days in the period beginning with the first day on which that interest accrues and ending with the payment day.

Why are there two alternative methods of ascertaining the amount of the deemed interest payment, in subsections (3) and (4)(5)? SAI Manual provides:

**4140. Payments on transfers with accrued interest**

**...** The [deemed interest] payment is the amount of the gross interest accruing to the settlement day, which in most cases is shown separately from the consideration for the securities, under the arrangement (that is, the contract note) by which the transferee accounts to the transferor. This is commonly known as the "clean price" basis.

In exceptional cases – for example, sales off market, gifts, settlements, and deemed transfers – there will be no contract note and it will it be necessary to compute the amount of the [deemed interest] payment. Where this is done, the formula $I \times A/B$ is used...

The Manual offers a straightforward example of the two methods of computation on a single sale with accrued interest:

*Example*

Harriet sells corporate bonds to Howard on 15 March 2005. Interest is paid on the bonds on 31 March, 30 June, 30 September and 31 December. Howard will receive the interest coupon due on 31 March 2005, that is, the sale is cum div. The interest Howard receives is £200. If Harriet agrees to sell the bond to Howard for a "clean price" of £10,000 plus an additional £165 for accrued interest, she is taxable on accrued income profits of £165 in 2004–05. Howard will reduce his accrued income profits by £165.

Suppose that, instead, Harriet simply agrees to sell the bond to Howard for £10,165. The relevant interest period is 1 January to 31 March 2005, so B is 90 days. The number of days up to and including 15 March (A) is 74. So the "accrued amount" is £200 × 74/90 = £164.44. Again, Harriet's taxable accrued income will be £164, and Howard's reduced by £165 (following the principle of rounding in the taxpayer's favour).

In practice the two methods normally give the same result (as is the case in the HMRC example) though there could be cases where the parties account for accrued interest in some manner which is not the same as the formula I × A/B.

It is possible for the amount of the deemed interest payment to be nil, eg in the case of a transfer on the interest payment day.

Section 633 ITA contains corresponding rules on a transfer without accrued interest.

The SAI manual gives a straightforward example of a sale with accrued interest:

**4160. Examples of transfers with and without accrued interest**

*Example 1*

Anthony has a holding of £100,000 Treasury Stock 8¼% 2007, a British Government security which pays interest on 16 January and 16 July each year. He arranges for his holding to be sold on the Stock Exchange on 19 March 2006. The contract note from his stockbroker, dated 19 March 2006 contains the following information:

| | |
|---|---:|
| £100,000 Treasury Stock 8¼% 2007 sold @ 114 | £114,000 |
| Plus 56 days' accrued interest | £1,315 |
| Payable to you on 20 March 2006 | £115,315 |

The contract note contains all the information that is needed for the purposes of the AIS.

- Treasury Stock 8¼% 2007 falls within the definition of "securities" – Section 619 ITA 2007
- the securities have been transferred, and the transfer is treated as taking place on 19 March because there was a contract for their sale made on that date – Section 620 ITA 2007
- the settlement day for the transfer is 20 March because under Stock Exchange rules bargains in gilt-edged securities are settled on the next business day – Section 674 ITA 2007
- the transfer is with accrued interest because the purchaser gets the right to the interest payable on 16 July 2006, the next interest payment day to fall after 20 March 2006 – Section 623 ITA 2007

- under Stock Exchange rules, accrued interest on gilts is accounted for separately from the bargain price, so the accrued amount is £1,315 – Section 632 ITA 2007
- the interest period in which the settlement day falls is the period 17 January 2006–16 July 2006 – Section 673 ITA 2007.

Accordingly in this interest period Anthony (the transferor) is treated as having received a payment £1,315 and the transferee as having made a payment of £1,315 (Section 632 ITA 2007).

The manual then gives a straightforward example of a sale without accrued interest (ex-div):

*Example 2*

Facts as in Example 1, except that the sale takes place on 1 July 2006 which falls within the "ex-dividend" period for the stock.[7] The contract note from the stockbroker shows:

| | |
|---|---|
| £100,000 Treasury Stock 8¼% 2007 sold @ 114 | £114,000 |
| Minus 15 days' rebate interest | - £352 |
| Payable to you on 2 July 2006 | £113,648 |

The transfer of securities is treated as made on 1 July 2006. The settlement day is 2 July 2006. The transfer is without accrued interest because this is an "ex-div" sale where the seller retains the right to the interest payable on 16 July 2006 (Section 633 ITA 2007). The rebate amount is £352 and the relevant interest period is that from 17 January–16 July 2006

Accordingly in this interest period Anthony (the transferor) is treated as having made a payment of securities of £352 and the transferee as having received a payment of £352.

The manual then gives a straightforward example of an off-market sale with accrued interest (cum-div):

*Example 3*

Stuffed Dodos Ltd is a UK company which has issued unquoted unsecured loan stock paying interest each year on the Tuesday following Easter Day. Thus in 2005 interest is payable on 5 April and in 2006 interest is payable on 18 April. Joe Smith owns £10,000 nominal of this stock and agrees to sell £4,000 to his aunt Matilda. Under the agreement, which was made on 8 July 2005, Matilda is to pay £5,000 for the stock on 19 August. The interest payable on 18 April 2006 is at the rate of £5.50 per £100 nominal (5.5%).

Even though the loan stock is unsecured, it constitutes "securities" for the

7 This is not factually correct: a sale 15 days before the interest payment date would not be ex dividend. That does not spoil the illustrative force of the example but using correct figures would emphasise the triviality of the amounts involved, even in substantial transactions.

purpose of the scheme. The securities are treated as transferred on 8 July 2005 – Section 620(3) ITA 2007.
The settlement day is 19 August because that is the day Matilda has agreed to pay for the securities and it falls before the next interest payment day following the agreement – Section 674(3) ITA 2007. The transfer is with accrued interest (Section 623 ITA 2007).
Because the accrued interest is not accounted for separately, in calculating the accrued amount, the formula in Section 632(5) ITA 2007 is used. A is the period from 5 April 2005 to 19 August 2005. B is the period from 5 April 2005 to 18 April 2006. I is the interest applicable to the securities for the period (5.5% × £4,000 = £220). The accrued amount is thus 137/379 × £220 = 79.
The interest period in which the settlement day falls is that from 5 April 2005 to 4 April 2006. Accordingly in that interest period Joe is treated as receiving as payment of £79 and Matilda as having made a payment of £79.

## 33.6 Accrued income profits and losses

Tax is *not* charged on deemed interest credits. But armed with the concept of deemed interest payments, we can turn to the terms "accrued income profits" (and "accrued income losses") which are defined in ss.628 and 629 ITA:

**628 Making accrued income profits and losses: general rule**
(1) This section sets out the general rule for determining whether a person is treated as making accrued income profits or accrued income losses where securities are transferred by or to the person. ...
(3) A separate calculation is to be made for each kind of security that is transferred by or to the person and for each interest period of each such kind of security.
(4) Each such calculation is to find—
(a) the total amount ("A") of the payments treated under this Chapter as made to the person in the interest period in question in respect of transfers of securities of the particular kind, and
(b) the total amount ("B") of the payments treated under this Chapter as made by the person in that period in respect of such transfers.
(5) A person is treated as making accrued income profits in an interest period as a result of transfers of securities of a particular kind if A exceeds B.
(6) A person is treated as making accrued income losses in an interest period as a result of transfers of securities of a particular kind if B exceeds A. ...
**629 Calculating accrued income profits and losses where section 628 applies**

> (1) If section 628(5) applies, the amount of the accrued income profits treated as made is equal to the excess mentioned in section 628(5).
> (2) If section 628(6) applies, the amount of the accrued income losses treated as made is equal to the excess mentioned in section 628(6).

Thus deemed interest debits are first set against deemed interest credits of the interest period for securities of the same kind. If or so far as they cannot be set against those interest credits, they constitute accrued income losses.

## 33.7 Charge on AIP income

I refer to the accrued income profits treated as made under s.628 ITA as "**AIP income**".

Section 616 ITA imposes the charge on AIP income:

> Income tax is charged on accrued income profits.

## 33.8 Relief for accrued income losses

Section 679 ITA allows accrued income losses to be set against interest from securities of the same kind:

> (1) This section applies if—
> (a) a person is liable for income tax on interest on securities of any kind which is due at the end of an interest period of the securities,
> (b) in that period accrued income losses are made as a result of transfers of those securities, and
> (c) the period ends with an interest payment day.
> (2) No liability to income tax arises in respect of the interest to the extent that it does not exceed the losses.

SAI Manual provides:

> **4120. Calculating accrued income profits and losses: relief for losses**
> **...** In other words, the losses always reduce the interest subsequently received on those securities, and cannot be used to offset accrued income profits for earlier interest periods or arising on securities which have different interest periods. Where the interest period spans the tax year, losses are therefore not allowed until the interest on the securities

is taxed in the following tax year.

For the interaction of loss relief and DTR, see 33.16 (Double taxation relief).

### 33.8.1 *HMRC examples*

SAI Manual provides 3 examples. The first example is a straightfoward sale and purchase of one kind of security with accrued interest, looking at the position of the seller:

**4130 Calculating accrued income profits and losses: examples**
Antoinette has £100,000 Treasury Stock 7¾ % 2006, which has interest dates of 8 March and 8 September. She makes the following transactions in the stock.

| Transaction | Profit/loss[8] |
|---|---|
| 19 March 2006 sells £100,000 | £2,107 |
| 21 March 2006 buys £50,000 | (£1,361) |
| 12 May 2006 sells £50,000 | (£131) |
| | **£615** |

The aggregate [accrued income] profit is £615, taxable for 2006–07, the tax year in which the interest period ended, even though two of the transactions occur in 2005–06.

The second example includes purchases and sales, with and without accrued interest, and involving two different kinds of security, looking at the position of the seller:

Jean made the following transactions in securities between 28 February 2005 and 5 April 2006:

| | |
|---|---|
| 19 Mar 2005 | bought £100,000 Treasury Stock 7½% 2006 (interest payment dates 7 June and 7 December) |
| 26 May 2005 | bought £50,000 Treasury Stock 7½% 2006 ex div |
| 15 Sept 2005 | sold £20,000 Treasury Stock 7½% 2006 |
| 22 Sept 2005 | bought £50,000 Treasury Stock 4½ % 2007 (interest payment dates 7 March and 7 September) |

The [accrued income] profits and losses arising on these transactions are:

8 This refers to deemed interest credits/debits, not the commercial profit/loss but I am unable to see how the figures of 2107, 1361 and 131 are derived: can any reader explain?

| Transaction date | Interest period | Profit/loss |
|---|---|---|
| 19 March 2005 | 08/12/04–07/06/05 | (£1,395) |
| 26 May 2005 | 08/12/04–07/06/05 | £82 |
| 15 Sept 2005 | 08/06/04–07/12/05 | £271 |
| 22 Sept 2005 | 08/09/04–07/03/05 | (£778) |

The profits and losses for 2005–06 are:

- Loss of £1,313 (1,395 minus 82) against interest of £3,750 (£100,000 × 7½% × ½) received on Treasury Stock 7½% 2006 on 7 June 2005.
- Profit of £271 (Treasury Stock 7½% 2006, interest period 8 June 2005–7 December 2005)
- Loss of £778 against interest of £2,250 received on Treasury Stock 4½ % 2007 on 7 March 2006.

The third example is a straightforward sale of a security with accrued interest, looking at the position of the purchaser:

*Example 3*
See Example 3 in SAIM4160 [set out below]. Joe Smith sells £4,000 unsecured loan stock in Stuffed Dodos Ltd to his Aunt Matilda on 19 August 2005. Interest is payable on 5 April 2005 and 18 April 2006. Neither Joe nor Matilda had any other transactions in securities.
The settlement day falls within the interest period 5 April 2005 to 4 April 2006.
Joe is taxable on £79 for 2005–06 in respect of this interest period.
Matilda's loss of £79 is carried forward to 2006–07 to be set against the interest receivable for the period 5 April 2005 to 18 April 2006 (Section 637 ITA 2007 – see SAIM4120).

## 33.9 AIP remittance basis

Section 670A ITA provides:

(1) This section applies if—
(a) accrued income profits are made by an individual as a result of a transfer of foreign securities, and
(b) section 809B, 809D or 809E (remittance basis) applies to the individual for the tax year in which the profits are made.
(2) Treat the accrued income profits as relevant foreign income of the individual. ...
(4) For the purposes of this section securities are "foreign" if income from them would be relevant foreign income.

This brings in the remittance basis. AIP income is fictional, deemed income, which could not be remitted. This is dealt with by s.670A(3) ITA which provides different rules depending on whether the individual receiving the AIP income is the transferor (the usual case of a sale with accrued interest) or the transferee. It is helpful to consider these two cases separately.

For the transferor, s.670A(3) ITA provides:

> For the purposes of Chapter A1 of Part 14 (remittance basis)—
> (a) if the individual[9] is the transferor—
> (i) treat any consideration for the transfer as deriving from the accrued income profits...

Thus the proceeds of sale of the securities are treated as containing the AIP income.

> (ii) if on the transfer the individual does not receive consideration of an amount equal to or exceeding the market value of the securities, treat the securities as deriving from the accrued income profits

Section 670A(3)(a)(ii) is the equivalent of the CGT rule for deemed gains on non-market value disposals.[10]

For the transferee, s.670A(3) ITA provides:

> (b) if the individual[11] is the transferee, treat the securities as deriving from the accrued income profits.

If the taxpayer is the transferee, the AIP securities in the hands of the transferee are deemed to contain the AIP income. It makes no difference whether or not the sale is for market value.

The SAI Manual provides:

> **4380 - Accrued Income Scheme: remittance basis** [December 2009]
> ... In some cases, a remittance basis taxpayer will make an accrued income profit on a transfer of securities, but will not receive consideration equal to the market value of the securities.
> [1] This may happen when the securities are transferred 'ex-div' and the taxpayer is the transferee.

9 That is, the individual who makes the accrued income profits.
10 See 10.24 (CGT disposal not for market value).
11 That is, the individual who makes the accrued income profits.

> [2] It may also happen where the taxpayer is the transferor, and makes a gift of the securities, or where the AIS rules treat an event as a transfer (for example, an appropriation of securities to trading stock).
> In such cases s.670A(3) ITA 2007 provides that the securities themselves are treated as deriving from the accrued income profits. This means that a charge will arise on the taxpayer when they, or some other 'relevant person', either bring the securities to the UK (if they are held in bearer form) or remit money or property deriving from the securities.

### 33.9.1 *Relief for losses*

What about accrued income losses accruing to a remittance basis taxpayer? The SAI Manual provides:

> **4380 - Accrued Income Scheme: remittance basis** [December 2009]
> ... Remittance basis taxpayers are able to obtain relief for accrued income losses. Losses arising on transfers of securities of a particular kind are set against interest received on securities of the same kind at the end of the relevant interest period, and will therefore reduce the amount of an individual's interest on those securities. There is an example of the interaction of the accrued income loss rules and the remittance basis rules at SAIM4390.

### 33.9.2 *Mixed funds and separating income/capital: sale with accrued interest*

The consideration received by the transferor (vendor) for the sale of AIP securities with accrued interest will be a mixed fund, consisting in part of AIP income, and the mixed fund rules will apply. In strict law one cannot separate the AIP income from the other proceeds of sale. There are three reasons for this.

First, assume that:

(1) P will pay a single sum for the security to V's broker (the total price).
(2) The broker will then divide the total price into two parts (accrued interest and clean price) and pay the two parts into two separate accounts of the vendor.

There is already a mixed fund on receipt of the payment by the broker on behalf of the client at stage (1), and the broker's act in transferring the single payment into two accounts is an offshore transfer under the mixed fund rules. In theory one might avoid this difficulty if P could pay two separate sums, one in respect of accrued interest and one in respect of the clean price; but in practice on a market sale that would not be possible.

Secondly, the AIP income is a fictional, notional amount which is distinct from the sum paid for the accrued interest. It is like the CFC income in *Brikom*.[12]

Even if that were wrong, however, there is a third obstacle in s.670A(3) ITA, which provides:

> For the purposes of Chapter A1 of Part 14 (remittance basis)
> (a) if the individual is the transferor –
> (i) treat *any* consideration for the transfer as deriving from the accrued income profits.

Thus even if (contrary to my view) the amount that V, the transferor, received for the accrued interest could in principle be separated and did in principle constitute the AIP income, the effect of s.670A(4) is that any consideration for the securities sold by V is treated as deriving from the AIP income.

However HMRC do not take that view. The RDR Manual provides:

> **33550 - Remittance Basis: Identifying Remittances: Specific Topics: Accrued Income Scheme** [July 2010]
> Where a security is sold with accrued income and the proceeds paid into an account, the part of the proceeds representing accrued income will be taxable as income and subject to income tax under the Accrued Income Scheme (AIS)....
> Where an individual is chargeable on the remittance basis, accrued income profits arising from on transfers of a ‘foreign security’ are treated as relevant foreign income...
> For consistency of treatment between the AIS and the remittance basis regime, HMRC will follow the tax treatment delivered by the AIS and accept that an ‘income amount’ can be transferred to a separate ‘income account’ immediately upon transfer, that is, the proceeds are ‘split’ into two separate accounts immediately upon receipt into the individual’s account. This ‘income’ could then be identified and taxed as such, without creating a mixed fund....
> To the extent that the remainder of the proceeds consist of capital or UK or non-taxable income (as opposed to, say, untaxed foreign income or gains) originally used in the purchase of the security ... the remainder of

12 See 50.9 (The characterisation issue).

the proceeds could therefore be separately identified and remitted as such.[13]

### 33.9.3 *Mixed funds & separating income/capital: sale without accrued interest*

The manual does not expressly consider the alternative situation where a security is sold without accrued interest and the transferee makes an accrued income profit. There is no difference between the two situations, so the purchaser (transferee) could divide up the purchased securities into an AIP income fraction and a clean capital fraction and hold the two in separate security accounts. However the amounts involved will generally be trivial.

### 33.9.4 *Mixed funds and separating income/capital: actual interest payment*

A similar problem arises on receipt of the interest payment after the sale. I refer to this as **"the actual interest payment"**. The recipient will be the purchaser (on a sale with accrued interest) or the seller (on a sale without accrued interest). Either way, the recipient will not normally be subject to income tax on the full amount of the interest as an deemed interest debit will normally generate an accrued income loss which can be set against the interest. The actual interest payment will therefore be a mixed fund. It is suggested that one can separate the actual interest payment on receipt into income and capital elements.

## 33.10 *HMRC examples*

The SAI Manual provides:

---

13 Similarly SAI Manual:

> **4400. Remittance basis: Further examples** [December 2009]
> The disposal of a bond may be structured such that separate payment is made for the capital and the accrued income elements which may be paid into separate accounts. In this situation Section 632 ITA 2007 provides that the taxable amount shall be taken as the amount of gross interest accruing to the settlement day, which is separately identified as such.
> An individual who has received separate payments into two separate accounts in this way will not be regarded as having two mixed funds. In this situation a remittance of the capital element will not be regarded as a remittance of relevant foreign income."

**4390 - Accrued Income Scheme: remittance basis: examples**
[December 2009]
The application of the remittance basis to the AIS is not without complication.

The problem is identifying what is or represents the AIP income where there are deemed interest debits (in the statutory terminology, amount B's) to set against deemed income credits (amount A's.) There is no statutory solution.

The following examples set out line HMRC takes in particular circumstances.

*Example 1*

Ann holds foreign securities 'of the same kind' X and Y which are disposed of in an interest period. They realise the following A and B amounts.

| **Security** | **Proceeds** | **Amount A** | **Amount B** |
|---|---|---|---|
| X | 100,000 | 10,000 | |
| Y | 60,000 | | (5,000) |

There is an accrued income profit of £5,000 which will be treated as deriving from the proceeds of sale of security X. Assuming the proceeds are paid into a new bank account, there will be a mixed fund comprising capital of £95,000 and an accrued income profit of £5,000.

*Example 2*

Isabelle has 3 holdings of the same kind of foreign security, X, Y and Z. They are disposed of in an interest period and the proceeds are paid into separate accounts. They realise the following A and B amounts.

| **Security** | **Proceeds** | **Amount A** | **Amount B** |
|---|---|---|---|
| X | 100,000 | 7,000 | |
| Y | 200,000 | - | (10,000) |
| Z | 70,000 | 4,000 | |

In this situation there is an accrued income profit of £1,000. If the proceeds of disposal of all 3 bonds are paid into a single account there will be a mixed fund with capital of £369,000 and an accrued income profit of £1,000.

That is the easy case as there is only one possible answer.

If the proceeds were paid into separate accounts HMRC would expect the accrued income profit to be allocated pro rata in proportion to the Amount A of securities X and Z or, if this would create an unreasonable result, by any reasonable method.

Careful time of purchases and sales would avoid the problem. The last example is somewhat theoretical and I set it out for completeness only:

> **4400. Remittance basis: Further examples** [December 2009]
> It is unlikely that there are many situations where UK and foreign securities will be 'securities of the same kind' for the purposes of the AIS scheme. It may, however, happen in the case of bearer securities. The following example outlines such a situation.
> Sam has both overseas and UK bonds 'of the same kind' and they are disposed of in the same interest period with the following results.
> *Example 3*

| **Security** | **Proceeds** | **Amount A** | **Amount B** |
|---|---|---|---|
| X (overseas) | 100,000 | 7,000 | |
| Y (overseas) | 200,000 | - | (10,000) |
| Z (UK) | 70,000 | 4,000 | |

> In this case the accrued income profit of £1,000 does not arise as the result of a transfer of foreign securities. There is a net Amount B of £3,000 as the result of the transferred foreign securities. There is therefore no relevant foreign income which Sam might remit to the UK. There is a UK accrued income profit of £1,000 which is taxable on an arising basis.

There are several odd things in this example. First it is assumed that if the bearer security is in the UK, the interest is UK source. That is not the test of the location of a source of interest. Perhaps it is assumed that the income is received in the UK. Secondly, one would have expected the deemed interest debit (amount B) to be set against the deemed interest credits pro rata, not set against foreign income first. But since in practice the point will never arise, it is not necessary to pursue that further.

### 33.10.1 *Position before 2008 and transitional rules*

Until 2008/09 a foreign domiciled individual was wholly outside the scope of the AIP rules on foreign securities.

Para 160 Sch 7 FA 2008 provides:

> The amendments made by paras 156 to 159 have effect in relation to transfers of securities where the settlement day is on or after 6 April 2008.

The new rules therefore catch all AIP securities even if held before the law changed in 2008.

### 33.10.2 *Commentary*

When one contemplates the complications of the AIP remittance basis, one appreciates the wisdom of the rule, which applied from the inception of the accrued income scheme in 1985 until 2008, under which the accrued interest scheme did not apply to foreign securities of remittance basis taxpayers. CGT filled the gap. The problems were not discussed, and as far as is known were not even considered, when the law was changed in 2008.

Most if not all readers who have studied the text to this point will agree that the current rule does not give sufficient weight to the desiderata of simplicity and administrative workability. The pre-2008 rule ought to be restored.

## 33.11 Excluded persons

The AIP exemptions use the concept of excluded transferor/transferee.

Section 638 ITA provides:

> (1) This section applies if there is a transfer of securities in relation to which a person ("P") is an excluded transferor or excluded transferee.
> (2) In determining whether P has made accrued income profits or accrued income losses under section 628 (making accrued income profits and losses: general rule) and the amount of any such profits or losses, no account is to be taken of any payment treated as made by or to P on the transfer.

A person is not an excluded transferor/transferee in isolation. One is excluded in relation to a transfer of securities. An excluded person is broadly outside the AIP scheme.

## 33.12 AIP non-residence defence

Section 643 ITA provides:

> (1) A person is—
> (a) an excluded transferor in relation to a transfer by the person, and
> (b) an excluded transferee in relation to a transfer to the person,

> if the person is non-UK resident throughout the tax year in which the transfer occurs and is not ordinarily UK resident during that year.

The exemption avoids the AIP charge on UK and foreign AIP securities.[14] It also withholds the AIP relief. EN ITA explains the policy behind the rule:

> 1897. In practice it would be very difficult to apply the scheme to such non-residents consistently. While non-residents could take the benefit of relief for accrued income losses to get repayments of tax suffered if tax is deducted at source, it would be difficult to enforce the charge to tax on accrued income profits.

A person coming to or leaving the UK might time disposals to obtain AIP relief while UK resident, while making disposals on which a charge would apply while non-resident.

The temporary non-residence rules do not apply. However CGT may fill some of the gap left by the AIP non-residence defence. The gain on the disposal of AIP securities may be subject to CGT if the CGT temporary non-residence rules apply.

## 33.13 Trusts

### 33.13.1 *Application to trustees*

The TSE Manual provides:

> **3325. Do AIS provisions apply to trustee or beneficiary?** [August 2007]
> *Accrued Income Scheme charge*
> If trustees (other than bare trustee – TSEM3320) transfer securities, any Accrued Income Scheme charge is that of the trustees. The trustees are chargeable at the trust rate, under Sections 481 and 482 ITA.
> The transfer of securities does not form the income of any beneficiary. The trustee must not include it on the Trust and Estate Return as the income of a beneficiary.

14 Section 1015 ITA (if needed) could also restrict the territorial scope of the AIP charge, but the rules discussed here leave it no room to operate.

*Accrued Income Scheme allowance*
The treatment of the allowance depends on who received the income against which relief is due. If the trustees received the income, they are entitled to the relief. There are instructions at AP4910.
The trustees may have mandated the income to a beneficiary. The beneficiary should claim the allowance against the income.

### 33.13.2 *Transfer to trust*

The TSE Manual provides:

**3330.Securities go into trust: Accrued Income Scheme** [August 2007]
When securities go into trust there is a transfer, for Accrued Income Scheme purposes. The transfer is from the settlor to the trustee.
This includes
• a settlor creates a new trust by transferring securities to the trustee
• a person who holds securities for his own benefit declares he will in future hold them as trustee
• at the end of an administration period, a personal representative starts to hold securities as trustee of a will trust. There are instructions at AP4928.

### 33.13.3 *Transfer from trustees*

The TSE Manual provides:

**3335. Beneficial interest in trust changes: Accrued Income Scheme** [August 2007]
*Change results from the terms of the trust*
The terms of a trust may often result in changes in beneficial interests. For example, on the death of a life tenant the trust assets may pass absolutely to another beneficiary. Such changes in beneficial interest have no accrued income scheme consequences. Either there is no actual transfer, or the transfer simply produces self-cancelling deemed sums and reliefs.

SAI Manual makes the same point:

**4050. What is a transfer?** [August 2007]
... The AIS is based on transfers of the legal ownership of securities, not the transfer of the underlying beneficial ownership. Thus, for example,

there is no transfer for the purposes of the AIS if a beneficiary under a trust becomes absolutely entitled as against the trustees to securities forming part of the trust fund.

Returning to the TSE Manual:

**3335. Beneficial interest in trust changes: Accrued Income Scheme**
[August 2007] ...
*Change follows an action by the trustees*
Sometimes a change is not a direct result of the terms of the deed. Trustees can use their powers to advance interests or appoint property. The exercise of these powers can amount to a transfer.

That seems inconsistent with what was said above..

*'Stranded' Accrued Income Scheme Allowance*
A change in beneficial owner can result in an Accrued Income scheme allowance being 'stranded'. It is no longer available to set against the interest. For example, the trustee could have bought securities 'cum dividend' (with a right to the dividend). Shortly afterwards a beneficiary could become absolutely entitled to the trust assets following a contingency. The contingency does not involve any transfer for Accrued Income Scheme purposes. This means the trustee's Accrued Income Scheme allowance is lost. The beneficiary was never entitled to the allowance, so cannot set it against subsequent interest.

### 33.13.4 *Appointment of new trustees*

The TSE Manual provides:

**3340. Accrued income scheme: change of trustees**
*Trustees remain resident in the UK*
There are no accrued income scheme consequences when trustees change, but remain resident in the UK. The change simply produces self-cancelling deemed sums and reliefs.
*Trustees change from resident to non-resident*
As the new trustees are not resident, they do not satisfy the 'residence requirement' of the accrued income scheme. The appointment of non-resident trustees is a transfer of the securities by the resident trustees. ...

> *Trustees change from non-resident to resident*
> As the old trustees were not resident, they do not satisfy the 'residence requirement' of the accrued income scheme. The change of trustees is a transfer of securities to the resident trustees.

This may have been right before 2006, but now that trustees are treated as a single person (distinct from the actual trustees) it is considered that the appointment of new trustees (wherever resident) is not a transfer for AIS purposes.

## 33.14 Settlor-interested trusts

### 33.14.1 *UK resident settlor-interested trusts*

Section 667(1) ITA provides:

> If the trustees[15] of a settlement are treated as making qualifying accrued income profits,[16] those profits are to be taken to be income arising under the settlement for the purposes of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor).

I am not sure if this is necessary, but perhaps it could have been argued that although "tax is charged on accrued income profits" (s.616) such profits are nevertheless not "income arising under a settlement". Perhaps the provision is just for symmetry with the provision which follows for non-resident trusts.

The rate of tax in the absence of s.624 is 50%, so s.624 can only reduce the tax rate (or make no difference).

---

15 Defined in s.667(4)(b) ITA.

16 Defined in s.667(4)(a) ITA:

> "'qualifying accrued income profits' means accrued income profits which are treated as made—
> (i) under section 628(5), or
> (ii) under section 630(2) in respect of a transfer of variable rate securities."

The drafting is misleading: as far as I can see, all accrued income profits are "qualifying" accrued income profits.

### 33.14.2 *Non-resident trusts*

In the absence of express provision, AIP income of non-resident trustees would not fall within the settlement provisions because the trustees would qualify for the AIP non-residence defence. Section 667 ITA provides:

> (2) Subsection (3) applies if the trustees of a settlement—
> (a) are non-UK resident or domiciled outside the UK throughout a tax year in which an interest period or part of an interest period falls, and
> (b) would have been treated as making an amount or an additional amount of qualifying accrued income profits in the interest period if the trustees had been UK resident or domiciled in the UK during a part of each such tax year.
> (3) The amount or additional amount of qualifying accrued income profits that the trustees would have been treated as making is to be taken to be income arising under the settlement for the purposes of Chapter 5 of Part 5 of ITTOIA 2005.

Thus the AIP income of a settlor-interested trust is within the scope of s.624 ITTOIA. However, the s.624 remittance basis can apply.

Non-resident trustees would not qualify for AIP loss relief,[17] so s.680 ITA extends the relief:

> (1) This section applies if—
> (a) the trustees of a settlement are non-UK resident or domiciled outside the UK throughout a tax year in which an interest period or part of an interest period of securities falls,
> (b) the trustees' income is or includes interest from those securities,
> (c) the interest falls due at the end of that interest period, and
> (d) had the trustees been UK resident, or domiciled in the UK, during a part of each such tax year the interest would have been wholly or partly exempt from income tax under section 679.
> (2) No liability to income tax arises as a result of Chapter 5 of Part 5 of ITTOIA 2005 (settlements: amounts treated as income of settlor) in respect of so much of the interest as would have been exempt from income tax under section 679.

The references to domicile in ss.667 and 680 ITA is otiose because after

17 See 33.8 (Relief for accrued income losses).

the 2008 reforms domicile of trustees is irrelevant. The reference to "an additional amount" is also otiose. But no harm is done by these infelicities.

## 33.15 Transfer of assets abroad

In the absence of express provision, AIP income would not fall within the TAA provisions because the person abroad would qualify for the AIP non-residence defence (assuming the person abroad is non-resident). However, s.747 ITA deals with this:

> (1) This subsection applies if a person—
> (a) would have been treated as—
> (i) making qualifying accrued income profits, or
> (ii) making qualifying accrued income profits of a greater amount, in an interest period, but
> (b) is not so treated because of being resident or domiciled outside the UK throughout any tax year in which the interest period (or part of it) falls.
> (2) If subsection (1) applies, this Chapter applies as if the amount which the person would be treated as making or, as the case may be, the additional amount were income becoming payable to the person.
> (3) Accordingly, any reference in this Chapter to income of (or payable or arising to) a person abroad must be read as including a reference to such an amount.

It has been suggested that this leaves a gap where AIP securities are held by a non-resident company. Section 747(1) ITA applies only if the company would have fallen within the AIP rules but did not do so "because of being resident outside the UK". But if the company had been UK resident, it would be within the charge to corporation tax and outside the scope of AIP. That is correct on a literal construction. However, the context shows that the deeming is not intended to be applied that way, and a comparable argument in a CGT context was resoundingly dismissed in *de Rothschild v Lawrenson* 67 TC 300 ("I do not believe that our processes of statutory construction are so wanting in technique and imagination ...").

The reference to domicile is otiose from 2008 but it does no harm.

The person abroad (if non-resident) would not qualify for AIP loss relief, so s.747(4)(5) ITA extends the relief:

(4) This subsection applies if income consisting of interest which falls due at the end of an interest period—
(a) would have been income as respects which a person is entitled to an exemption, or an exemption of a greater amount, from liability to income tax under section 679 (interest on securities involving accrued income losses: general), but
(b) is not such income because it is income of a person who is resident or domiciled outside the UK throughout any tax year in which the interest period (or part of it) falls.
(5) If subsection (4) applies, for the purposes of this Chapter the interest is treated as reduced by the amount of the exemption or, as the case may be, the additional exemption.

## 33.15.1 *Definitions*

Section 747 ITA provides definitions for s.747:

(6) In this section—
(a) expressions which are also used in Chapter 2 of Part 12 (accrued income profits) have the same meaning as in that Chapter (but see subsection (7)), and
(b) "qualifying accrued income profits" means accrued income profits which are treated as made—
(i) under section 628(5), or
(ii) under section 630(2) in respect of a transfer of variable rate securities.
(7) In the case of qualifying accrued income profits within sub-paragraph (ii) of the definition of that expression in subsection (6)(b)—
(a) references in subsection (1)(a) to making qualifying accrued income profits in an interest period are to be read as making them in the tax year in which the settlement day falls, and
(b) the reference in subsection (1)(b) to the interest period is to the period—
(i) beginning with the day after the last day of the only or last interest period of the securities, and
(ii) ending with the settlement day.

The expression "qualifying" accrued income profits is misleading: as far as I can see, all accrued income profits are qualifying.

For the interaction with s.731, see 27.15.2 (Stock dividends and accrued income profits).

## 33.16 Double taxation relief

In the absence of express provision there would be no double taxation relief, as the AIP income is not taxable in the other state.

Section 10 TIOPA provides relief:

> (1) Subsection (2) applies if—
> (a) a person is treated under section 628(5) of ITA 2007 as making accrued income profits in an interest period,
> (b) the person would, were the person to become entitled in the relevant tax year[18] to any interest on the securities concerned, be liable in respect of the interest to tax chargeable under ITTOIA 2005 on relevant foreign income, and
> (c) the person is liable under the law of the territory to tax in respect of interest payable on the securities at the end of the interest period or the person would be so liable if the person were entitled to that interest.

I cannot see the need for (b) as it will be satisfied whenever (a) is satisfied. Section 10(2) provides the relief:

> (2) Credit is to be allowed against income tax calculated by reference to the accrued income profits.
> (3) The amount of the credit allowed under subsection (2) is given by—
> AIP × FTR
> where—
> AIP is the amount of the accrued income profits, and
> FTR is the rate of tax to which the person is or would be liable as mentioned in subsection (1)(c)...

Section 39 TIOPA restricts DTA relief where there is relief for accrued income losses.[19]

The SAI Manual provides:

> **4370. Double taxation relief** [December 2009]
> Where an AIS charge arises on a foreign stock on which the interest

18 Defined subsection (5): "In subsection (1)(b) 'the relevant tax year' means the tax year in which, under section 617(2) of ITA 2007, the accrued income profits are treated as made."

19 See 33.8 (Relief for accrued income losses).

would have suffered foreign tax eligible for credit relief if interest had been received, credit for foreign tax is allowable for the lower of

- the rate of UK tax charged on the accrued income profit, and
- the rate of foreign tax suffered on the interest payable at the end of the interest period for which the charge arises.

If there is an accrued income loss to be set against foreign interest, reduce the credit for foreign tax in the proportion which the allowance bears to the interest.

*Example*

Taxpayer holds foreign stock on which the interest suffers tax eligible for credit at 15%. Interest paid on 30 June and 31 December.

In the interest period to 30 June 2005, the taxpayer makes transactions resulting in an AIS loss of £200. He receives interest (gross) of £1,000 less £150 foreign tax.

In August 2006 he sells the entire holding and there is an AIS profit of £300. He is liable to UK tax at 22%. His double taxation relief is as follows

| | | | |
|---|---|---|---|
| Foreign interest | | £1,000 | |
| Less Accrued Income relief | | - £200 | |
| | | £800 | |
| Foreign tax deducted | £150 | | |
| Credit restricted to | £1000–£200 × £150/£1000 | | = £120 |
| Accrued income profit | | | £300 |
| Allow credit for foreign tax | | | |
| on AIS charge £300 @ 15% | | | = £45 |
| Total double taxation relief £120 + £45 | | | = £165 |

The double taxation relief given can exceed the foreign tax suffered (£165 exceeds the £150 suffered).

## 33.17 Interaction with CGT

Section 119(1) TCGA disapplies the normal CGT rules in ss.37 and 39 TCGA:

(1) Where there is a transfer of securities within the meaning of Chapter 2 of Part 12 of ITA 2007 (accrued income profits)—

(a) if a payment is treated as made to the transferor under section 632 of that Act or by the transferor under section 633 of that Act, section 37 shall be disregarded in computing the gain accruing on the disposal concerned;

(b) if a payment is treated as made by the transferee under section 632 of that Act or to the transferee under section 633 of that Act, section

> 39 shall be disregarded in computing the gain accruing to the transferee if he disposes of the securities;
>
> but subsections (2) and (3) below shall apply.

Section 119 TCGA goes on to set out its own rules:

> (2) Where the securities are transferred with accrued interest (within the meaning of that Chapter)—
>
> (a) if a payment is treated as made to the transferor under section 632 of ITA 2007, an amount equal to the amount of that payment shall be excluded from the consideration mentioned in subsection (8) below;
>
> (b) if a payment is treated as made by the transferee under that section, an amount equal to the amount of that payment shall be excluded from the sums mentioned in subsection (9) below. ...
>
> (8) The consideration is the consideration for the disposal of the securities transferred which is taken into account in the computation of the gain accruing on the disposal.

Section 119(3)(9) contains corresponding rules for a transfer without accrued interest:

> (3) Where the securities are transferred without accrued interest (within the meaning of that Chapter)—
>
> (a) if a payment is treated as made by the transferor under section 633 of ITA 2007, an amount equal to the amount of that payment shall be added to the consideration mentioned in subsection (8) below;
>
> (b) if a payment is treated as made to the transferee under that section, an amount equal to the amount of that payment shall be added to the sums mentioned in subsection (9) below...
>
> (9) The sums are the sums allowable to the transferee as a deduction from the consideration in the computation of the gain accruing to him if he disposes of the securities.

## 33.18 Foreign currency securities

SAIM provides:

> **4310. Special calculations: Foreign currency securities**
>
> Foreign securities: Translation into sterling
>
> Section 664 ITA 2007 provides rules for translation into sterling of the

payments made on the transfer of securities where the interest on securities is payable in a currency other than sterling.

If the interest is accounted for separately between transferor and transferee, and the parties specify in their contact what the sterling equivalent of the accrued or rebate interest is, the sterling amount so specified is to be used in the AIS calculations. Otherwise, the amount is to be determined in the foreign currency according to the usual rules, and then translated into sterling at the rate of exchange prevailing on the settlement day for the transfer, calculated by reference to the London closing rate of exchange for the day concerned.

The nominal value of foreign securities is also determined (under Section 677 ITA 2007) as the sterling equivalent of that value on any day, calculated by reference to the London closing rate for that day.

Where unrealised interest is payable in a foreign currency, Section 665 ITA 2007 provides that the amount the accrued income profits under Section 631 ITA 2007 is the sterling equivalent on the settlement day, or in the case of interest in default (SAIM4290), the value on the day of receipt.

Although the London closing rate should in strictness be used in all the above cases, figures of rates of exchange supplied by taxpayers or their agents should normally be accepted, provided that they come from a reputable source (for example, an exchange rate quoted by the taxpayer's bank for the day in question) and the basis is used consistently.

CHAPTER THIRTY FOUR

# DEEPLY DISCOUNTED SECURITIES

## 34.1 DDS – Introduction

A full discussion would need a half a book. The following is a general outline with a focus on the issues closest to the themes of this work. In particular, the following aspects are not discussed:
- securities issued in tranches
- earn-out rights
- strips
- exchanges and conversions

In outline, the effect of the rule is that profits arising on the disposal of a deeply discounted security ("DDS") are subject to income tax rather than CGT. The rules only apply to a holder of a DDS who is subject to income tax. They do not apply to the issuer and they do not apply for the purposes of corporation tax.

## 34.2 Meaning of "deeply discounted security"

### 34.2.1 *"Security"*

SAI Manual states:

> **3010 Introduction** [August 2008]
> The term 'security' is not defined in the legislation. It may be taken to have a broad meaning comparable to the definition in TCGA Section 132(3)(b) (CG53420) ...

### *34.2.2 "Deeply discounted"*

In outline, the definition is in s.430 ITTOIA:

**430 Meaning of "deeply discounted security"**
(1) The general rule is that a security is a "deeply discounted security" for the purposes of this Chapter if, as at the time it is issued, the amount payable on maturity or any other possible occasion of redemption ("A") exceeds or may exceed the issue price by more than A×0.5%×Y,
where Y is the number of years in the redemption period or 30, whichever is the lower.
(2) If the redemption period is not a number of complete years, for the purposes of subsection (1) the incomplete year is expressed as twelfths, treating each complete month and any remaining part of a month as one-twelfth.
(3) In this section "redemption period" means the period between the date of issue and the date of the occasion of redemption in question.
(4) Interest payable on an occasion of redemption is ignored in determining for the purposes of this section the amount payable on that occasion.

SAI Manual gives three examples:

**3020 Meaning of deeply discounted security**
*Example 1*
Company A issues securities for £1,000 which are redeemable in 10 years time for the subscription amount increased by the percentage movement in the Retail Price Index over the same period. As the linkage to the RPI may give more than a 5% increase in value (10 years × 0.5%) over that period, the securities are deeply discounted securities.
*Example 2*
Company B issues a 12-month security for £950. It is redeemable for £950 at maturity or, depending on events, for £1,000 after 6 months. The occasion of early redemption is not disregarded under Section 431 ITTOIA 2005 (SAIM3030). The difference between the issue and early redemption prices is more than £2.50 (£1,000 × 0.5% × 6/12). The security is therefore a DDS.
*Example 3*
Bank C issues a 5-year security that is linked to the FTSE 100 share index. Each security has a nominal value to £100. If the index rises, the investor receives on redemption £100 multiplied by the percentage rise in the index. For example, the index has risen to 150% of its starting value, the investor receives £150. If the index falls, the investor is guaranteed to receive back his or her £100, so the security is not an excluded indexed security (SAIM3050). Since the security may give more than a 2.5% increase in value over the period (5 years × 0.5%), it

is a DDS, even though there is no certainty as to the redemption amount.

### 34.2.3 *Securities dealt with under other regimes*

Section 432(1) ITTOIA provides:

> The following are not deeply discounted securities—
> (a) shares in a company,
> (b) gilt-edged securities that are not strips,
> (c) life assurance policies, and
> (d) capital redemption policies.[1]

### 34.2.4 *Securitised derivatives*

The SAI Manual provides:

> **3040. Securities which are not deeply discounted securities** [October 2010]
> ... In practice, therefore, most deeply discounted securities will be securities in the nature of debts, that is, where the issuer has an obligation to make some form of return to the investor.
> **Securitised derivatives**
> Securitised derivatives present particular problems. These are investment products where the amount which the investor gets back at the end depends on the performance of a share index, or a particular share or shares, or (less commonly) some other asset. The capital initially subscribed by the investor may be completely or partly protected, or it may be possible for the investors to lose the whole of their money.
> Some such products, properly analysed, are options, for which the investor pays a premium (these are often described as 'warrants'). Others may be contracts for differences, or other derivatives. These will not be deeply discounted securities; disposal of an option, or of a financial future within Section 143 TCGA 1992, will give rise to a capital gain or allowable loss. See also SAIM7000 on the tax treatment of derivatives that generate an interest-like return.
> Other securitised derivatives, however, create a debt (in technical terms, they are structured as a debt security plus one or more options or other

---

1 Section 432(3) ITTOIA provides:
"In this section 'capital redemption policies' has the same meaning as in Chapter 9 of this Part (see section 473(2))."

> derivatives). These will be deeply discounted securities, unless they fulfil the stringent conditions to be 'excluded indexed securities' (SAIM3050). You should seek advice from CT & VAT (Financial Products and Services Team) if it is unclear whether or not a particular instrument is a deeply discounted security.

There are some deep conceptual issues here.

## 34.3 Securities denominated in foreign currency

In the following discussion **"a foreign currency denominated security"** is one issued for a foreign currency and redeemable in that currency.

### 34.3.1 *Is a foreign currency denominated security necessarily a DDS?*

Consider for instance a US Treasury Note issued for $1,000 and redeemable on maturity at $1,000 and carrying interest at a market rate. Is a security of that kind deeply discounted? The question (in short) is whether:

> the amount payable on maturity may exceed the issue price

This raises a currency translation issue. If:
(1) "issue price" means the sterling equivalent of the issue price at the time of issue; and
(2) "the amount payable on maturity" means the sterling equivalent at the time of maturity

then a foreign currency denominated security is a DDS since currency fluctuations could lead to a gain measured by £sterling. If "issue price" means the dollar price and "the amount payable on maturity" means the dollar amount, then the two are equal and the security is not a DDS.

The statutory words could be understood either way, so the context must resolve the issue. The context shows that the second view is correct. This is for several reasons. First, the object of the DDS rules is to tax discounts, which are commercially similar to interest. It is not to tax currency fluctuations. The absence of relief on losses would operate very unfairly. Secondly, if that were not the case, all foreign currency denominated securities would be within the DDS regime.[2] That would be surprising (and indeed contrary to EU law).[3]

HMRC agree. SAI Manual provides:

> **3020 Meaning of deeply discounted security**
> The test for deep discount is carried out in the currency of issue.

### 34.3.2 *Foreign currency denominated DDS*

The above paragraph is considering a security whose dollar issue price equals its dollar maturity price. Of course, a foreign currency denominated security would in principle be a DDS if the redemption price may sufficiently exceed the issue price. It is understood that US treasury bills (which do not carry interest) are normally DDSs. I refer to such a security as **"a foreign currency denominated DDS".**

How does one compute the profit on the disposal of a foreign denominated DDS? The profit is:

> the amount by which the amount payable on the disposal exceeds the amount paid by the person to acquire the security.

This raises another currency translation issue. Suppose a person acquires a security on issue for dollars and redeems it for dollars. Is the amount paid to acquire the security:

(1) The sterling equivalent of the purchase price at the time of issue? Or
(2) The dollar amount? If so, it is deducted from the dollar amount payable on disposal, to give a dollar profit, translated into sterling at the time of disposal.

The statutory words could be understood either way, so the context must resolve the issue. The context shows that the second view is correct. This is consistent with the approach to the definition of a DDS: see above. The same point applies: the object of the DDS rules is to tax discounts, which are commercially similar to interest. It is not to tax currency fluctuations.

---

2 Unless they contained a cap to limit the gain to a sterling amount, which would not normally be the case.

3 The arguments are more fully set out in Ghosh, "Corporate Bonds: If The Cap Does Not Fit" *Taxation*, 7 Feb 2002 p.439 but since HMRC have accepted this view since the publication of Tax Bulletin 9, it is not necessary to consider that here.

The solution to the same problem for CGT is different.[4] The reason for this is explained in *Capcount Trading v Evans* 65 TC 545. One important factor in that decision was the provision in the CGT legislation that currency other than sterling is an asset for CGT. There is no similar provision for IT.

## 34.4 Excluded occasions of redemption

Section 431(1) ITTOIA provides:

> An occasion of redemption of a security other than maturity is ignored for the purposes of section 430(1) if the third-party option conditions or the commercial protection conditions are met.

### 34.4.1 *The third-party option conditions*

> (2) The third-party option conditions are that—
> (a) the security may be redeemed on the occasion at the option of a person other than its holder,
> (b) the security is issued to a person who is not connected with the issuer, and
> (c) the obtaining of a tax advantage by any person is not the main benefit, or one of the main benefits, that might have been expected to accrue from the provision in accordance with which the security may be redeemed on the occasion.

### 34.4.2 *The commercial protection conditions*

> (3) The commercial protection conditions are that—
> (a) the security may be redeemed on the occasion as the result of an exercise of an option that is exercisable only on the occurrence of—
> (i) an event adversely affecting the holder (see subsection (8))[5], or
> (ii) a default by any person, and
> (b) as at the time of the security's issue it appears unlikely that the option will be exercisable on the occasion.

---

4 See 49.2 (CGT: currency conversion date).

5 "(8) In this section "event adversely affecting the holder", in relation to a security, means an event the occurrence of which appears, as at the time of the security's issue, likely to have an adverse effect on the interests of its holder at the time of the event if there were no provision for redemption on its occurrence."

### 34.4.3 *Restrictions on conditions*

(4) Subsection (1) does not apply to an occasion just because the occasion coincides or may coincide with an occasion meeting the third-party option conditions or the commercial protection conditions.
(5) If—
(a) the only reason that a security is not a deeply discounted security is that an occasion on which it may be redeemed is ignored because the third-party option conditions are met, and
(b) at some time after its issue the security is acquired by, or its holder becomes, a person connected with the issuer,
in relation to that time and later this Chapter applies as if the security were a deeply discounted security.
(6) If a person ("P") who is not connected with the issuer acquires—
(a) a security which is only a deeply discounted security because it was issued to a person connected with the issuer and so fails to meet the condition specified in subsection (2)(b), or
(b) a security within subsection (5),
this Chapter applies in relation to P as if the security ceased to be a deeply discounted security on the acquisition.
(7) For the purposes of the application of this section to a security, the question whether persons are connected is determined without regard to the security or any other security issued under the same prospectus.

## 34.5 Meaning of "disposal"

Section 437(1) ITTOIA provides:

References in this Chapter to the disposal of a deeply discounted security are—
(a) to its redemption,
(b) to its transfer by sale, exchange, gift or otherwise, including a transfer treated as made by subsection (3), and
(c) so far as not covered by para (a) or (b), to its conversion under its terms into shares in a company or other securities (including other deeply discounted securities).

### 34.5.1 *"Person making a disposal"*

Section 437(2) ITTOIA provides:

The person treated as making a disposal is—
(a) in the case of a disposal within subsection (1)(a), the person entitled as the security's holder to any payment on the disposal,
(b) in the case of a disposal within subsection (1)(b), the transferor, and
(c) in the case of a disposal within subsection (1)(c), the person who would be entitled as the security's holder to any payment on the disposal, if such a payment were made.

### 34.5.2 *Death of holder*

Section 437(3) ITTOIA provides:

A person who dies while entitled to a deeply discounted security is treated as transferring it immediately before death to the personal representatives.

## 34.6 Meaning of "profit"

Section 439 ITTOIA provides:

(1) A person's profit on a disposal is the amount by which the amount payable on the disposal exceeds the amount paid by the person to acquire the security.
(2) No account is to be taken of any incidental expenses incurred in connection with the disposal or acquisition.

I refer to this as the DDS profit. The DDS profit is greater than a chargeable gain on a disposal because expenses are disallowed.

### 34.6.1 *Deemed DDS profit*

Section 440 ITTOIA provides:

(1) On the disposal of a deeply discounted security by a transfer of a kind specified in subsection (2), for the purposes of this Chapter an amount equal to the market value at the time of the disposal is treated as payable.
(2) The transfers are—
(a) a transfer made otherwise than by a bargain at arm's length,
(b) a transfer between connected persons,
(c) a transfer for a consideration which is not wholly in money or

money's worth,
(d) a transfer treated as made by section 437(3) (death), and
(e) a transfer by personal representatives to a legatee. ...

I refer to the profit on a disposal within this section as "**deemed DDS profit**".

## 34.7 Charge to tax on disposal of DDS

Sections 427 and 428 ITTOIA impose the charge:

> **427 Charge to tax on profits from deeply discounted securities**
> (1) Income tax is charged on profits on the disposal of deeply discounted securities.
> (2) The profits are treated as income for income tax purposes if they would not otherwise be income.
> **428 Income charged**
> (1) Tax is charged under this Chapter on the full amount of profits arising in the tax year.
> (2) The profits on a disposal are to be taken to arise when the disposal occurs.
> **429 Person liable**
> (1) The person liable for any tax charged under this Chapter is the person making the disposal.

## 34.8 DDS remittance basis

Section 428(3) ITTOIA provides:

> If the profits arise on a disposal of securities that are outside the UK—
> (a) they are treated for the purposes of section 830 (meaning of "relevant foreign income") as arising from a source outside the UK, and
> (b) subsection (1) is subject to Part 8 (foreign income: special rules).

This brings in the ITA remittance basis for a DDS that is outside the UK.
The section uses the words "treated as" because DDS income does not have a source, at least in the traditional sense.[6]

6 See 16.4.2 (Location of source of income when there is no source).

How does one decide whether a security is "outside the UK"? In the HMRC view the test is the residence of the issuer. The former Inspectors Manual para 1541 provided:

> Where the security was issued by a UK resident any profit is assessable under Case III of Schedule D. Where the security was issued by a non-UK resident, any profit is assessable under Case IV of Schedule D.

This is not obviously right, but it is as good a test as any other and (in relation to a non-resident issuer) at least we should know where we stand.[7] This passage is omitted in the SAIM but there is no indication that HMRC practice has changed.

An alternative approach is to say that a security is in the UK if income from it has a UK source and outside the UK if income from it has a non-UK source.[8] This will usually come to the same thing[9] and I doubt if the point will ever need to be decided.[10]

For completeness: another possible approach is that "outside the UK" means situated outside the UK applying common law situs rules. This too would usually come to the same thing, but it would allow some scope for tax planning. This view is less attractive since (1) common law situs is not generally relevant for IT; (2) one would have expected the drafter to use the word "situate" if it was intended to incorporate a situs rule.

Strictly, one cannot segregate income from capital (for no identifiable part of the proceeds represents the income). But since HMRC do not apply that rule for the accrued income scheme,[11] they should logically not

---

7 The position if the issuer changes residence is less clear, but perhaps this does not arise in practice.

8 This would be consistent with the AIP scheme, where the test is whether income from the security has a foreign source: see 33.9 (AIP remittance basis). However, the two cases are not the same, because a DDS may not yield any income, so the question whether income from the DDS has a foreign source could be a hypothetical question.

9 See 17.4.6 (Interest from securities). Because the rules concerning the location of the source of interest are so unclear, it is impossible to say in what (if any) circumstances the source of the income might be different from the residence of the issuer.

10 If it mattered, the view that income source was the test should be rejected, for if the drafter intended to apply an income-source test, one would have expected the wording to match that used elsewhere for income-source tests. The wording is not very far from the former case IV in s.18 ICTA 1988 ("income arising from securities out of the UK") but there the words "out of the UK" govern "arising" and not "securities".

11 See 33.9 (AIP remittance basis).

take the point in this context either. There is however no discussion in the RDR Manual.

A deemed DDS profit (eg on a gift) cannot be remitted and so is tax free.[12]

## 34.9 UK resident trust

### 34.9.1 *UK resident trust (not settlor-interested)*

A UK resident trust is in principle subject to income tax on its DDS profits. Tax is charged at the trust rate, 50%: s.482 ITA.

### 34.9.2 *UK resident settlor-interested trust*

A DDS profit accruing to UK trustees is not "income" in the general sense and in the absence of express provision it would not fall within s.624 ITTOIA which only applies to income. However s.427(2) ITTOIA directs that the profits are "treated as income for income tax purposes" so it does fall within s.624 ITTOIA. For good measure, s.457 ITTOIA provides:

> (1) This section applies if profits are taken to arise on a disposal of a deeply discounted security by trustees.
> (2) For the purposes of Chapter 5 of Part 5 (settlements: amounts treated as income of settlor), the profits are to be taken to be income arising under the settlement from the security. ...

Thus DDS profits do fall within the settlement provisions.

If the settlor is a remittance basis taxpayer the s.624 remittance basis is available, ie the settlor is not taxed on an unremitted foreign DDS profit.[13]

The rate of tax in the absence of s.624 is 50%, so s.624 can only reduce the tax rate (or make no difference).

## 34.10 Non-resident individual

Section 368 ITTOIA provides the necessary exemption for non-residents.[14]

---

12 The CGT rule does not apply here; see 10.26 (CGT disposal not for market value).
13 See 24.5 (Section 624 remittance basis).
14 See 16.4 (Why does location of source matter?).

In short non-resident individuals are not chargeable if the security is out of the UK. They are theoretically chargeable if the security is in the UK but non-residents IT relief is usually available.[15]

The temporary non-residence rules do not apply for DDS purposes because (1) these rules do not apply for IT (in particular, DDS) purposes and (2) the rules do apply for CGT purposes but no chargeable gain arises on the disposal of a DDS.[16]

## 34.11 Non resident trust

In the absence of express provision, non-resident trustees would not be charged on foreign DDS profits but could be charged on UK DDS profits. However s.458(1) ITTOIA provides:

> Tax is not charged under this Chapter if the disposal is made by the trustees of a settlement[17] and they are non-UK resident.

So non-resident trusts are not subject to tax on DDS, whether UK or foreign.

It is considered that s.624 applies to non-resident settlor-interested trusts as it applies to UK resident trusts. Section 458 does not provide relief since the charge on settlor-interested trusts is not a charge "under this chapter".

## 34.12 Transfers of assets abroad

A DDS profit accruing to a non-resident is not "income" so in the absence of express provision it would not fall within the TAA provisions even if it accrued to a person abroad within s.720 or 731. However s.427(2) ITTOIA directs that the profits are "treated as income for income tax purposes" so it does fall within the TAA provisions. For good measure, s.459 ITTOIA provides:

---

15 See 37.1 (Non-residents IT relief).

16 See 34.14 (Interaction with CGT).

17 "Settlement" here means settlement-arrangement: see s.458(3) which provides:
"In this section 'settlement' has the same meaning as in Chapter 5 of Part 5 (see section 620)."

> (1) This section applies if profits are taken to arise on the disposal of a deeply discounted security by a person resident or domiciled outside the UK ("A").
> (2) For the purpose of determining whether an individual ordinarily UK resident is liable for income tax in respect of the profits, Chapter 2 of Part 13 of ITA 2007 (transfer of assets abroad) has effect as if the profits, when arising, constituted income becoming payable to A.
> (3) For this purpose it does not matter if A is not liable to income tax under this Chapter because of section 458 (non-UK resident trustees).

Thus DDS profits do fall within the scope of the TAA provisions.

### 34.12.1 *Section 731 ITA*

The charge is on the actual profit, not a fictional profit. The proceeds of the disposal represent that profit.

How does the rule that distributed income is not relevant income[18] operate in this context? Is it necessary merely to distribute an amount equal to the DDS profit or is it necessary to distribute the entire proceeds of the transfer (sale) of the security? The matter is analogous to the CGT issue which arose when a UK resident foreign domiciled beneficiary sold a non-UK situate asset and realised a chargeable gain. Prior to the 2008 mixed fund rule, if the individual remitted (say) one-half of the proceeds of sale, their were regarded as remitting one-half of the gain.

Inspectors Manual para 1567 explained:

> This is because, whilst the income content of any fund is a separate and distinguishable part of that fund, a capital gain is merely part of the whole proceeds of a disposal transaction that has no separate identifiable existence within those proceeds.

The same reasoning would apply here. Thus the only way to avoid relevant income by distribution would be to distribute the entire proceeds of an arm's length disposal. It is conceivable that HMRC will not apply the law on this point strictly, but do not rely on this without clearance.

If there are only fictional profits, because the market value rule applies[19]

---

18 See 27.22 (Relevant income of trust distributed as income in year it arises) to 27.26 (Distributed income: HMRC view).

19 See 34.6 (Meaning of "profit").

then s.731 does not apply because fictional income cannot be used to benefit a beneficiary, so it cannot be relevant income.

## 34.13 Non-resident company

Section 368 ITTOIA provides the necessary exemption for non-residents.[20] In short, they are not chargeable if the security is outside the UK. They are theoretically chargeable if the security is in the UK, but see 37.1 (Limit of liability for non-residents). The company DDS income is within the scope of the TAA provisions. There is no group relief so an inter-group transfer may give rise to a charge.

## 34.14 Interaction with CGT

Section 117(1) TCGA provides the usual definition of corporate bond. Section 117(2AA) provides:

> For the purposes of this section "corporate bond" also includes any asset which is not included in the definition in subsection (1) above and which is a deeply discounted security for the purposes of Chapter 8 of Part 4 of ITTOIA 2005 (see section 430).

Section 117(7) TCGA defines qualifying corporate bond as (in short) any corporate bond issued after 13 March 1984. (The rules for pre-1984 bonds are not considered here.) Thus any DDS is in principle a qualifying corporate bond ("QCB"). Section 115(1) TCGA provides exemption for QCBs:

> A gain which accrues on the disposal by any person of—
> (a) gilt-edged securities or qualifying corporate bonds, or
> (b) any option or contract to acquire or dispose of gilt-edged securities or qualifying corporate bonds,
> shall not be a chargeable gain.

Thus a DDS is entirely outside the scope of CGT.

---

20 See 16.4 (Why does location of source matter?).

CHAPTER THIRTY FIVE

# UNIT TRUSTS

## 35.1 Unit Trusts - Introduction

This chapter considers unit trusts and Luxembourg Fonds Commun de Placement (which are treated in a similar way).

The taxation of unit trusts needs a book to itself. This chapter focuses on the matters closest to the themes of this book.

### *35.1.1 Definition(s) of "unit trust"*

The High Court of Australia rightly say:

> "unit trust" ... in the absence of an applicable statutory meaning, does not have a constant, fixed, normative meaning ... [1]

However for most tax contexts there is a statutory definition. Section 1007 ITA provides:

> (1) In the Income Tax Acts "unit trust scheme" has the meaning given by section 237 of FISMA 2000.
> This is subject to subsection (2).
> (2) The Treasury may, in relation to a unit trust scheme within the meaning given by section 237 of FISMA 2000 whose trustees are UK resident, by regulations provide that the scheme is not to be a unit trust scheme for the purposes of the definition in section 989 of "unauthorised unit trust" if it is within a specified description. ...

1 *CPT Custodian Pty Ltd v State Revenue* (2005) 221 ALR 196 at [15] accessible *www.austlii.org*.

CGT is effectively the same. Section 99 TCGA 1992 provides:

> (2) Subject to subsection (3) and sections 99A and 151W(a) below, in this Act—
> (a) "unit trust scheme" has the meaning given by section 237(1) of the Financial Services and Markets Act 2000
> ...
> (3) The Treasury may by regulations provide that any scheme of a description specified in the regulations shall be treated as not being a unit trust scheme for the purposes of this Act; and regulations under this section may contain such supplementary and transitional provisions as appear to the Treasury to be necessary or expedient.

So we turn to s.237(1) FISMA, which is pleasingly short:

> In this Part "unit trust scheme" means a collective investment scheme under which the property is held on trust for the participants.

The definition of "collective investment scheme" needs a book to itself and is not discussed here.

## 35.2 Income accruing to unit trust

### 35.2.1 *Authorised unit trusts*

Section 617(1) CTA 2010 provides:

> In respect of income arising to the trustees of an authorised unit trust, and for the purposes of the provisions relating to relief for capital expenditure, the Tax Acts shall have effect as if—
> (a) the trustees were a UK resident company; and
> (b) the rights of the unit holders were shares in the company.

So authorised unit trusts are not transparent for IT purposes.
ITTOIA EN Vol II discusses the situs of AUT income:

> 51. It is possible for the FSA to recognise a non-UK unit trust scheme for marketing into the UK. However, only those UK tax resident unit trusts that are "authorised" by the FSA come within section 468 of ICTA. Section 468(1) of ICTA provides that the Tax Acts apply to UK authorised unit trusts and shall have effect as if the trustees of the

> authorised unit trust were a company resident in the UK. Although the application of section 468(1) of ICTA is by reference to the trustees' income (and relief for capital expenditure), the treatment of the trustees as a UK resident company carries through for the purposes of taxing interest distributions treated as made to unit holders. That is because section 468L(2) of ICTA provides that the Tax Acts shall have effect as if such interest distributions were made "by the company referred to in section 468(1)". As these distributions are treated as made by such a company, that is a UK resident company, they can only be UK source income.

The taxation of AUTs is not discussed here.

### 35.2.2 *Unauthorised unit trust: UK trustees*

Section 504 ITA provides:

> **504 Treatment of income of unauthorised unit trust**
> (1) This section applies for income tax purposes in relation to an unauthorised unit trust if the trustees are UK resident.
> (2) If income arises to the trustees, the income is treated as the income of the trustees and not of the unit holders.
> ...
> (5) Sections 494 and 495 and 496B do not apply in relation to payments made by the trustees.

So unauthorised unit trusts with UK resident trustees are not transparent for IT purposes. The taxation of these unit trusts is not discussed here.

## 35.3 Unauthorised unit trust: foreign trustees

This leaves the question of unauthorised unit trusts with non-resident trustees. There is no statutory provision so we are thrown back to first principles. It is considered that ordinary interest in possession trust rules apply. Depending on the drafting and proper law, a unit trust may be a transparent, *Baker* style trust or non-transparent.[2] HMRC agree. The Life

---

2 See 23.1 (IP trusts: income tax). This view is supported by *Minister of National Revenue v Trans-Canada Investment Corporation* [1956] SCC 49 accessible *www.kessler.co.uk*, where the Canadian Supreme Court applied *Baker* to a unit trust arrangement.

Assurance Manual provides:

> **4C.312. Tax Transparency for Income but Not Gains**
> An offshore unit trust will not usually be an authorised unit trust (because of the requirements of section 243(5) FISMA 2000). Nor does section 469 ICTA (LAM 4C.302 above) apply to it. So ordinary trust rules apply and if it is of the transparent type (analogous to a "Baker" trust), a life company is chargeable on its share of the trust income as it arises. This transparency does not apply to capital gains because of section 99(1) TCGA 1992 (which treats all unit trust schemes as companies and hence opaque). ...[3]

The Offshore Funds Manual discusses *Baker* unit trusts::

> **OFM08200 Investors in non-reporting funds: distributions: the charge to tax: 'transparent' funds**
> ... Income: UK tax treatment of investors
> For UK tax purposes the income of an income transparent fund is treated as arising directly to its investors (UK investors are charged to tax on income arising net of a deduction for proper expenses of the management of the fund in question, and this is the case for both unit trusts and contractual arrangements[4]). So, for example, if a fund receives interest income then UK investors are charged to tax on their proportionate share of that income as it arises, irrespective of whether or not it is actually distributed to them. Investors should receive a voucher from the fund to tell them what proportion of the fund's income they are entitled to, and the split between interest, dividends or property income. Investors should ask their fund manager for a voucher if they do not receive one.

The OFM also discusses *Garland* unit trusts:

> OFM08300 Investors in non-reporting funds: distributions: the charge to tax: 'non-transparent' funds
> ... Foreign unit trusts that are not transparent for income purposes are sometimes referred to as 'Garland' unit trusts (following the case of Garland v Archer-Shee (15TC693))...
> Non-transparent unit trusts

3 The same point is made at 4C.401.

4 Author's note: the reference is to Fonds Commun de Placement.

> UK investors in foreign unit trusts that are non-transparent for income purposes are taxable on their proportionate share of income (as ascertained after the trustees have met the expenses of administering the trust) when it is indefeasibly allocated to them, regardless of whether the income is paid to them or accumulated. Unlike the position for transparent unit trusts (see OFM08200), that income is taxable as miscellaneous foreign income (under Chapter 8 of Part 5 of ITTOIA 2005, or Chapter 8 of Part 10 CTA 2009) and the tax rates applying will be those applying to such income. Corporation tax payers are subject to the rules in Chapter 3 of Part 6 of CTA 2009 if the fund is a bond fund.

Inspectors Manual provided:

> **1617 Foreign investment organisations: Unit trust** Published: 9/95
> Many unit trusts are established outside the UK (for example, in the Channel Islands, Isle of Man, West Indies and Australia) under arrangements identical with or similar to those operating in the UK. All such foreign unit trusts are unauthorised unit trusts (see IM4176) and are, therefore, outside the scope of Section 468 ICTA (see CT3930 onwards), but are unit trust schemes for the purposes of CGT (see TCGA, s 99(1), and CG41300 onwards).
> Normally, a UK resident shareholder in a foreign unit trust is assessable under Case V by reference to his share of the income of the fund[5] whether [1] this is paid out to him in cash or [2] used to purchase additional units.

Point [2] is correct if the income is applied voluntarily by the shareholder to purchase additional units. In other cases it is doubtful. HMRC recognise this in Offshore Funds Guide para 1070:

> **Reinvestment Mechanics** [November 2005]
> In order to meet the distribution test a fund will normally have to have "paid" a distribution which must be in a form that, to the extent that it does not form the profits of a trade, profession or vocation, would be chargeable, in the case of an individual resident in the UK, to Income Tax under a provision specified in Section 830(2) of ITTOIA 2005 or, in the case of a company resident in the UK, chargeable to Corporation Tax under Case III or Case V of Schedule D in accordance with Section

5 This assumes the unit trust is a non-transparent *Garland*-style trust; or else that it holds only foreign investments.

> 18 ICTA 1988. A fund with automatic reinvestment of "accumulation" shares may not be able to meet this criterion as there may be doubt about whether it has "paid" a distribution that is capable of being construed as income for UK tax purposes.
>
> Where such a fund nevertheless wishes to benefit from having distributing fund status it can reach agreement with HMRC that it will apply "reinvestment mechanics". The important point here is that the mechanics of reinvestment establish in principle the chargeability to UK tax of the distribution.
>
> We take the view that, it would satisfy "paid" for the purposes of the test, provided the distribution
>
> - passes out of the fund's control and
> - into the hands of a third party, who can **clearly be seen** to receive the distribution and
> - to reinvest it in further shares/units or increase in capital value of the existing shares/units on behalf of the relevant participator.
>
> This does require a physical separation of the distribution from the fund and its subsequent reinvestment, not just a paper transaction.
>
> (Emphasis original)

Everything depends on the documentation concerned.

### 35.3.1 *Baker or Garland?*

This depends on the applicable law[6] and the drafting. A standard unit trust form provides:

> On each Distribution Date the Trustee shall calculate and distribute among the Holders rateably in accordance with the number of Units held or deemed to be held by them respectively on the Distribution Date such amount as shall in the opinion of the Trustee represent the amount of income available for distribution and accordingly such income shall not form part of the Trust Fund. No amount payable to the Holder in respect of any distribution or redemption shall bear interest. Upon the expiry of the period of ten years after any such amount first becomes payable the Holder and any person claiming through, under or in trust for him shall forfeit any right thereto, and such amount shall be retained as part of the Trust Fund or otherwise dealt with in accordance with the provisions of this Instrument.

---

6 See 23.4 (Baker or Garland trust jurisdiction?).

It is suggested that this creates a *Garland*-style trust even in a *Baker* jurisdiction.

### 35.3.2 *Residence of trustees of unit trust*

The residence of the trustees of a unit trust is important for IT purposes, because the rules set out above depend on whether or not the trustees are UK resident. However, there is no definition of residence for this purpose. The common IT/CGT definition of residence of "trustees of a settlement"[7] does not apply, because a unit trust is not a "settlement".[8] Ordinary rules of residence apply to determine the residence of the trustees in their private capacities.

## 35.4 Gains accruing to unit trust

Section 99(1) TCGA provides:

> (1) This Act shall apply in relation to any unit trust scheme as if—
> (a) the scheme were a company,
> (b) the rights of the unit holders were shares in the company, and
> (c) in the case of an authorised unit trust, the company were resident and ordinarily resident in the UK,
> except that nothing in this section shall be taken to bring a unit trust scheme within the charge to corporation tax on chargeable gains.

Thus a UK resident unit trust is subject to CGT, but a non-resident one is not (unless carrying a trade in the UK through a branch or agency). The residence of a unit trust is important for CGT purposes. Statute states that authorised unit trusts are UK resident but does not define the test of residence for unauthorised unit trusts. Since a unit trust is treated as a company, it is considered that the test of residence for CGT is the corporate test, ie, central management and control.

Gains accruing to a non-resident close unit trust fall in principle within the scope of s.13 TCGA, and may be attributed to UK resident unit

7 See 4.1 (Residence of trustees).

8 The term "settlement" in this context is not expressly defined, but property in a unit trust is not "settled property" for the purposes of IT: s.466 ITA. It is considered that "settlement", in this context, requires settled property (as defined).

holders.[9]

## 35.5 Situs of unit

### 35.5.1 *Situs for IHT*

The situs of a unit in an authorised unit trust is not normally relevant for IHT.[10] The situs of a unit in an unauthorised unit trust is important for IHT.

A unit is quite unlike an equitable interest under a conventional trust. The rights of a unit holder arise from contract as well as trust, and a unit is in many ways analogous to a share in a company.[11] One should not apply rules governing other kinds of equitable interests without considering this.

It is considered that share/security situs rules should normally be applied, so that the place of the register is normally the determining factor. HMRC accept this.[12]

Another possible view is that situs depends on the residence of the trustees. In practice a situation where the place of residence of the trustees is different from the place of the register would be rare so the priority between the two tests may never need to be decided. Trustee residence determines whether a unit trust is treated as a company or offshore fund for IT and CGT purposes.[13] It might therefore be said to be consistent with the tax legislation if situs of a unit for IHT depends upon the residence of the trustees. However, situs for IHT is based on private

---

9 Julian Ghosh QC agrees: "When is a company not a company?" PTPR Vol 7 p. 241.

10 See 53.3 (Non-settled property: authorised unit trusts and OEICs).

11 Thomas & Hudson, *The Law of Trusts*, (1st ed., 2004), paras 51.26–28, says that the rights are *primarily* contractual, but to classify overlapping rights as "primary" and "secondary" seems to me somewhat arbitrary.

12 Press Release 16 October 2002 (OEICs and AUTs) para 9 stated (before the introduction of IHT relief for AUTs):

> "[OEICs and units in Authorised Unit Trusts] are treated as situated in the UK in the same way as other UK registered shares. That is so even if the 'underlying' assets of the collective investment fund are non-UK assets."

See too [1998] PCB 172. This conclusion is supported by *CPT Custodian Pty Ltd v Commissioners of State Revenue* (2005) 2 ALR 196 accessible *www.austlii.org* (unit trust holders not joint "owner" of land for purposes of Australian rating laws).

13 See 31.3 (Meaning of "offshore fund") and 35.2.2 (Unauthorised unit trust: UK trustees).

international law, not tax law, so the relevance of the unit trust tax provisions is very marginal.

What is reasonably clear is that situs of the unit does not depend on the situs of the underlying assets of the unit trust. The idea that one looks at the underlying assets, at first sight seems sensible, as it is consistent with the traditional test for situs of a bare trust. But it is unsound for two reasons:

(1) If the underlying assets are spread across different jurisdictions it would be impossible to ascertain the situs of the unit (if a unit is regarded as a single asset). The unit should not be regarded as several separate interests in as many assets as are held by the unit trust, looking through the unit trust like a bare trust, as this is to ignore the nature of the unit.[14]

(2) The proposal to look to the situs of the underlying assets is unworkable because the unit holder will not normally be able to ascertain what the underlying assets are at any particular moment. (Accounts of the unit trust may disclose the position at the end of an accounting period but that will not help as assets are normally bought and sold constantly by the trustees of the unit trust. The unit holder normally has no further right to information.)

Although the consequence is that one can alter situs by interposition of a unit trust, that is not so surprising: one can do the same with an OEIC.

### 35.5.2 *Situs of unit for CGT*

If the unit trust is governed by a foreign proper law, registered units are situate where they are registered, because that is the rule for shares[15] and the unit is deemed to be a share. This is the same as the private international law rule.

If the unit trust is governed by a UK proper law, a unit is probably UK situate under the UK law rule,[16] or under CGT situs rules for shares in UK incorporated companies.[17] However, a UK law unit trust will in practice

---

14 A similar argument applies in relation to the situs of an equitable interest under a substantive trust.

15 See 71.6 (Registered securities: non-UK company).

16 See 71.13.2 (The UK law rule).

17 See 71.5 (Securities of UK incorporated company). This assumes that a unit trust with a UK proper law should be regarded for CGT as a company incorporated in the UK. That seems the better view, though the contrary is arguable.

have a register here, so the question of priority between the place-of-register rule and the UK law rule will not arise.

The situs of the underlying assets is not relevant. Section 99 clearly overrides s.60 TCGA. A unit is an asset for CGT purposes, rather than an interest in an asset, so that the co-ownership rule is not relevant.[18]

### 35.5.3 *Residence of trustees and situs*

The residence of the trustees is not relevant for situs, though non-resident trustees are required if it is desired that the units are not to be chargeable securities for SDRT purposes.[19]

## 35.6 Gain accruing on disposal of unit

An offshore unit trust will be an offshore fund. It may qualify as a reporting fund. If it does not, a gain accruing on a disposal of a unit will be an offshore income gain.[20]

## 35.7 Luxembourg Fonds Commun de Placement

Section 103A TCGA provides:

> (1) This Act applies in relation to a relevant offshore fund as if—
> (a) the fund were a company, and
> (b) the rights of the participants in the fund were shares in the company.
> (2) An offshore fund is a relevant offshore fund if—
> (a) it is not constituted by a company or by two or more persons carrying on a trade or business in partnership, and
> (b) it is not a unit trust scheme (see section 99).
> (3) In this section and section 103B "offshore fund" has the meaning given in section 355 of TIOPA 2010; "participant", in relation to a fund, have the meanings given in section 362(1) of that Act.

Offshore Funds Manual provides:

---

18 See 71.3 (Co-ownership).
19 See s.99(5A) FA 1986.
20 See 31.1 (Offshore funds).

**OFM03550 Application of Taxation of Chargeable Gains Act (TCGA) 1992 to interests in arrangements that create rights in the nature of co-ownership – Section 103A TCGA 1992**

Certain contractual arrangements have historically been treated as transparent for both income and capital gains purposes (for example, Luxembourg Fonds Commun de placement ('FCPs')). But whilst such funds came within the previous definition of an offshore fund, the offshore funds regime for taxing offshore income gains was not applicable as investors were treated as holding, for capital gains purposes, interests in the underlying assets rather than in the fund itself. This led to considerable difficulties for investors when they disposed of their interests, or when new investors were admitted to the fund, as capital gains computations could become very complex. This is not the case for interests in offshore unit trusts which were and are subject to section 99 TCGA 1992, so that for the purposes of tax on chargeable gains a unit trust is treated as if the fund was a company, and the rights of the participants in the fund were shares in that company.

Section 103A TCGA 1992 was introduced by Part 2 of Schedule 22 Finance Act 2009 to align the treatment of interests in arrangements that create rights in the nature of co-ownership with that of interests in unit trusts. That is, those arrangements are treated as opaque for capital gains purposes from the operative date (see below), so that Section 103A shifts the taxation of gains arising to UK residents to the time when they dispose of their interest in a fund.

Section 103A does not change the tax treatment of such arrangements for income purposes – they remain fiscally transparent. Therefore, investors are entitled to income as it arises (from whatever source or country) and UK investors are taxable on such income as it arises, regardless of whether income is actually distributed. Income arising retains its character where arrangements are fiscally transparent, so for example if a fund receives income from property situated in the UK then UK investors would be chargeable to tax as if they had received that income directly. ...

CHAPTER THIRTY SIX

# PARTNERSHIPS

## 36.1 Partnerships - Introduction

A full discussion of partnership taxation would require a book to itself and in this chapter I focus on aspects relevant to the themes of this book.

I do not consider the position of corporate partners within the scope of corporation tax.

### 36.1.1 *Cross references*

This chapter considers aspects of partnerships which are more conveniently addressed in isolation. I have generally preferred to deal with partnership issues as they arise in the context of other topics.

For IHT, see 70.28 (Situs of partnership share). For POA issues see 66.22 (Partnerships). For categorisation, see 72.16 (Jersey general and limited partnerships) and 72.17 (Foreign limited liability partnership). For remittance issues, see 10.37 (Partnerships).

## 36.2 "Partnership" "person" "trade" and "firm"

### 36.2.1 *Partnership*

"Partnership" is not defined[1] in tax legislation so it has its general (partnership law) meaning.

### 36.2.2 *Is a partnership a "person"*?

The use of the word "person" requires some care when partnerships are

1 Except in relation to LLPs; see 36.7 (Limited liability partnership).

concerned.

A Scottish partnership is a legal person.

An English[2] partnership is not a legal person, that is, it is not a legal entity distinct from the partners and it is not a person in the ordinary sense of the word.

The rule that English partnerships are not legal persons could have been more or less undone by sch.1 Interpretation Act 1978 which provides that:

> "Person" includes a body of persons corporate or unincorporate.

A partnership is a "body of persons" in the ordinary sense of that phrase,[3] and is "unincorporate" and so an English partnership is a person in the Interpretation Act sense. Although the position strictly is that references to person in statutes prima facie include even an English partnership, the rule that English partnerships are not legal persons is very deeply ingrained and in practice only limited attention is given to the Interpretation Act definition; a judge may regard its application as more or less optional since it does not apply "where the context otherwise requires." I suspect that this definition is more important in the area of unincorporated associations than partnerships.

The difference between England and Scotland is not in practice as important as it might appear at first sight:

> In order that the Rule may be applicable there must first of all be "a person charged". The word "person" is in the singular but it includes the plural and also any body of persons corporate or unincorporate (Interpretation Act, 1889 [now Interpretation Act 1978]). In considering whether a partnership or a group of persons associated in partnership constitutes "a person charged" within the meaning of the Rule, I think it right to lay aside any preconceptions derived either from the law of England or from the law of Scotland as to the technical legal nature of a partnership. In Scotland a firm is "a legal person distinct from the partners of whom it is composed" (Partnership Act, 1890, Section 4 (2)),

---

2 The same applies to a Northern Ireland partnership. For the purposes of this chapter, I use the expression "English partnership" to include a general partnership and a limited partnership, as no difference is to be drawn between them.

3 "A partnership is, as a matter of the ordinary use of English, plainly a body of persons"; *Padmore v IRC* 62 TC 352 at p.377. However it appears that a partnership is not a "body of persons" within the definition in s.989 ITA: see at p.377.

> but this is not so under English law. For the present purpose this distinction should, in my opinion, be disregarded. The Income Tax Acts are Imperial Statutes equally applicable on both sides of the border and the language which they employ ought to be construed so as to have, as far as possible, uniform effect in England and in Scotland alike.[4]

Fundamentally, the context governs the sense and may show that the word person is used in a way which does or does not include a partnership.

In practice the starting point for the tax status of partnerships is to be found in s.848 ITTOIA and s.59 TCGA from which the principle of transparency can be deduced.

A LLP is a legal person and a body corporate but for tax purposes that is subject to similar principles: see 36.7.3 (Income tax treatment of LLP).

As to whether a partnership is a person for the purposes of the OECD model treaty, see 5.13.1 (Is a partnership a "person" for treaty purposes?).

### 36.2.3 *"Trade"*

Before discussing "firm" we need to consider ITTOIA's idiosyncratic definitions of "trade". Section 847 ITTOIA provides:

> (2) The provisions of this Part which are expressed to apply to trades also apply, unless otherwise indicated (whether expressly or by implication)—
> (a) to professions, and
> (b) in the case of this section and sections 849, 850, 857 and 858 to businesses that are not trades or professions.
> (3) In those sections as applied by subsection (2)(b)—
> (a) references to a trade are references to a business, and
> (b) references to the profits of a trade are references to the income arising from a business.

Thus the word "trade" in part 9 ITTOIA always includes profession (it would be appropriate to simplify the law by abolishing all distinctions between professions and trades). The word "trade" sometimes includes "business". Since it is not convenient to use the same word in two different senses, when trade is used in the wider sense, I refer to it as

4 *R v General Commissioners of Income Tax for The City of London ex p. Gibbs* 24 TC 221 at p.247; the point is also made at p.244.

“**trade (including business)**”.

### 36.2.4 *“Firm”*

We can now turn to the definition of “firm”. Section 847(1) ITTOIA provides:

> In this Act persons carrying on a trade [including business] in partnership are referred to collectively as a “firm”.

This is the same as the definition of “firm” in the Partnership Act 1890.[5] In practice “partnership” and “firm” are used interchangeably.

## 36.3 Transparency of partnership for IT

After a (somewhat unnecessary) overview in accordance with the principles of Plain English Drafting,[6] s.848 ITTOIA provides:

> **848 Assessment of partnerships**
> Unless otherwise indicated (whether expressly or by implication), a firm is not to be regarded for income tax purposes as an entity separate and distinct from the partners.

ITTOIA EN provides:

> 1711. This section makes it clear that, for income tax purposes, a firm is not an entity distinct from the partners in the firm. It is based on section 111(1) of ICTA.
> 1712. In the case of firms established under English law this provision merely confirms their position under that law. But Scottish firms, for example, are legal entities. This provision ensures that all firms are treated in the same way.

---

5 The Partnership Act 1890 provides:
“1(1) Partnership is the relation which subsists between persons carrying on a business in common with a view of profit. ...
4(1) Persons who have entered into partnership with one another are for the purposes of this Act called collectively a firm ...”

6 Section 846 ITTOIA provides: “This Part contains some special rules about partnerships.”

So partnerships are transparent for IT ie partnership income is regarded as income of the partners and not of the partnership as such.

IT transparency follows from basic principles, not from this statutory provision.[7] In England this is clearly the case. IT transparency is a necessary consequence of the partnership law rule that the partners are joint owners of the partnership assets, and that an English law partnership does not have legal personality, ie it is itself not a person. For unless partnership income accrued to the partners, it would not accrue to anyone, and the partnership income must accrue to some person or persons if it is to be taxed.

In Scotland too, IT transparency follows from basic principles and not from the statutory provision. The Law Commission Report on Partnership Law provides:[8]

> The Inland Revenue justify their approach to UK partnerships[9] by reference to the following three characteristics:
> (1) the partners carry on the business of the partnership with a view to profit;
> (2) every partner is liable jointly or jointly and severally with the other partners for all the debts and obligations of the partnership; and
> (3) the partners own the business, each having at least an indirect share in the net assets of the partnership.[10]

---

7 This provision only dates from the FA 1995. Yet the IT transparency of partnerships has been settled tax law since early times: *Dreyfus v IRC* 14 TC 560 The predecessor provision, s.111 ICTA 1988, perhaps assumed but did not prescribe IT transparency. ("Where a trade or profession is carried on by two or more persons jointly, income tax in respect thereof shall be computed and stated jointly, and in one sum, and shall be separate and distinct from any other tax chargeable on those persons or any of them, and a joint assessment shall be made in the partnership name.")

8 Law Com 283 (2003) para 4.18.

9 [Footnote original] This covers both the English law partnership and the Scots law partnership notwithstanding that the former has no separate legal personality and the latter has separate legal personality.

10 [Footnote original] See *Memec plc v IRC* 71 TC 77 and in particular Peter Gibson LJ at pp. 111-113. Neither the separate personality of the Scottish partnership nor the absence of mutual agency in Scots law prevented the conclusion that in substance the position of the partners in a Scottish partnership in relation to the profits was the same as in an English partnership (p. 113B–C).

That is, the fact that a Scots partnership does have legal personality does not necessarily require the conclusion that income accrues to the partners and not to the partnership. Underlying this issue is some vagueness or ambiguity in what the concept of legal personality means or entails. Of course, the Courts' natural inclination to minimise taxation differences between English and Scots partnerships has been an influence in reaching this legal analysis.

The practical reader might ask impatiently whether it matters that IT transparency follows from basic nature of a partnership or from the statutory provision. It does not matter so far as the settled rule is that partnership income or gains accrue to the partners, but identifying the nature of a partnership is the first step when any questions arise relating to partnerships, so the question often does matter.[11]

## 36.4 Partnership income: remittance basis

Section 857 ITTOIA provides:

> (1) This section applies if—
> (a) a firm carries on a trade [including business] wholly or partly outside the UK,[12]
> (b) the control and management of the trade [including business] is outside the UK, and
> (c) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to a partner for a tax year.
> (2) The partner's share of the profits of the trade [including business] arising in the UK is determined in accordance with sections 849 to 856.
> (3) The partner's share of the profits of the trade [including business] arising outside the UK is treated as relevant foreign income.

The significance of s.857(3) – treating partnership income as RFI – is that the income can qualify for the remittance basis.

---

11 See 10.37 (Partnerships).

12 Section 857(1)(a) appears to be otiose because if the condition in s.857(1)(b) is met the condition in s.857(1)(a) must be met. But it does not matter.

### 36.4.1 *Segregating partnership profits*

Suppose:

(1) profits of a partnership trade arise partly in and partly outside the UK; and

(2) a partner receives a share of those profits.

There is an apportionment to determine the profits arising in/outside the UK.[13] The profits that the partner receives constitute a mixed fund, partly RFI (mixed fund category (d)) and partly other income (mixed fund category (I)). A remittance from such a fund follows the mixed fund rule; later years before earlier, and RFI of a year before the other income of the year.

On the other hand, suppose:

(1) profits of a partnership trade arise partly in and partly outside the UK; and

(2) a partner receives a share of profits arising outside the UK only.

In that case all the income that the partner receives is RFI. If a partnership includes partners who are remittance basis taxpayers, it may therefore be important for a partnership, if it can, to segregate the two parts of its trade so it can identify which parts of its profits arise in and which parts arise outside the UK. The same point arises if a partnership includes non-resident partners.

### 36.4.2 *Control and management*

The test is control and management of the trade, not control and management of the partnership, but that will make not usually make any difference.

Normally a remittance basis taxpayer will want to argue that the trade is controlled abroad, to qualify for the remittance basis, and HMRC will want to argue that control is here. However, if the partnership makes losses the boot may be on the other foot: UK partners may argue for control in the UK, to obtain more generous loss relief.

The expression "control and management" is of course from the company residence test, and it is considered that it should be given the same meaning here. Thus the company residence case law gives

13 See 13.19 (Trade partly in UK: apportionment).

guidance.[14] The former ITH provided at para 1612:

> Generally speaking we follow the thinking on companies and look at the place of the highest level of management rather than day-to-day management. Outside textbooks follow the same line.
> In deciding the location of the control and management of a firm with both UK and overseas partners, we would usually regard as significant such factors as the comparative seniority of the partners in age and experience (a simple head count will not do of course), the extent of their interests in the firm, the source and control of the finance, the places of decision on policy and major transactions, the places and locations of partners' meetings and what was done at those meetings. The place of meetings incidentally is not a conclusive factor any more than it is – or ought to be – for companies. So the nature of the business done at the meeting is important. Is it really about control and management or just part of a facade to mislead us about the place of actual control and management?

The former ITH continued with another interesting point at para 1613:

> [Section 857 ITTOIA] refers simply to control and management being abroad and the view which we have, in general, adopted in determining whether the Section applies is that this means control etc must be wholly abroad. The strength of this view has never been tested in the Courts and the word 'wholly' does not appear in the Act. It is sometimes put to us that where control and management is partly abroad then [section 857] applies. On the other hand, we have argued that because the Section says 'is situated abroad' it means just that and if control is partly here then it is not abroad.

The Commissioners would normally adopt a broad approach, looking at the whole picture in order to identify one overall place of control where possible, and situations where control was located in the UK and abroad would be rare. If it did arise, the HMRC view seems sound.

In *Mark Higgins Rallying v HMRC* [2011] UJFTT 340 the First Tier Tribunal said:

---

14 There was a discussion in the former ITH at para 1614 as to whether "control and management" are two distinct tests with distinct meanings, or a composite phrase. If my approach is right, the words are a single composite phrase.

51. We consider the appropriate test for the location of control and management of the business of a partnership is that adopted by the courts in relation to residence of companies. We note the same conclusion was reached by HMRC and stated in their Manual; also that it was the one argued for before us by the Partnership.

52. We have found helpful the summary put forward by the Special Commissioners in *Untelrab*[15] (at [74]):

"From these authorities we have identified the following principles: that the residence of a company is where the directors meet and transact their business and exercise the powers conferred upon them; that if the directors meet in two places then the company's residence is where its real business is carried on and the real business is carried on where the central management and control actually abides; that a determination as to whether a case falls within that rule is a pure question of fact to be determined by a scrutiny of the course of business and trading; that the actual place of management, and not the place where a company ought to be managed, fixes the place of residence of a company; … and that when deciding the issue of residence one should stand back from the detail and make up one's mind from the picture which the whole of the evidence presents."

53. Also, the views of the Tribunal in *Laerstate*[16] (at [27]-[29]):

"There is no assumption that [central control and management] must be found where the directors meet. It is entirely a question of fact where it is found. Where a company is managed by its directors in board meetings it will normally be where the board meetings are held. But if the management is carried out outside board meetings one needs to ask who was managing the company by making high level decisions and where, even where this is contrary to the company's constitution.

It is significant, we think, that Lord Loreburn (in *De Beers*[17]) referred to the test as being where central management and control 'abides'. This is a test that does not confine itself to a consideration of particular actions of the company, such as the signing of documents or the making of certain board resolutions outside the UK if, in a given case, a more general overview of the course of business and trading demonstrates that as a matter of fact central management and control abides in the UK. As Lord Loreburn said (at 212-213), the factual question must be considered 'upon a scrutiny of the course of business and trading'.

This is consistent with the analogy with individual residence which was

15 *Untelrab Ltd v McGregor* [1996] STC (SCD) 1.

16 *Laerstate BV v HMRC* [2009] SFTD 551.

17 *De Beers Consolidated Mines Ltd v Howe* 5 TC 198.

the basis on which Lord Loreburn propounded the central management and control test. Just as for an individual, for example, where a temporary departure from the UK would not of itself give rise to a change of residence, the residence of a company will not fluctuate merely by reason of individual acts of management and control taking place in different territories. The whole picture must be considered in each case."...

55. The position must be considered for each tax year under appeal but, as per *Laerstate,* the place of residence of the Partnership will not fluctuate from year to year merely by reason of individual acts of management and control taking place in different territories....

62. We find that the place where certain contracts – even important ones such as the manufacturers' works team agreements – were signed is not in itself a determining factor. It is evidence towards where decisions were being made but it is the location of the decision-making, rather than where the contracts were signed, which is important.

### 36.4.3 *HMRC practice*

The former ITH provided:

**1622. Normal professional partnership: foreign partnership treatment**
In the *Frost* case[18] we tried to argue before the Commissioners that control and management was not abroad. That is our approach to any case where partnerships appear to have been set up for the purpose of avoidance and Case V is of advantage, which, as ITH1630 indicates, it may yet be though to a much lesser extent than in earlier years.

**1623. Foreign partnership treatment: artificial arrangements**
But a common situation in professions such as engineers and accountants is one where there is a UK partnership and a separate partnership formed abroad with one or more non-UK resident partners in which some or all of the UK partnership partners are members. Generally speaking where the non-resident partners are professionally qualified and the overseas partnership takes on work which is reasonably local to the place where the partnership is based, it is possible to take a fairly relaxed view and accept a claim to Section [857] treatment. That was so even when Case V was on the remittance basis. If, however, the prima facie evidence against this view were very strong, we would look much more closely.

It seems obvious that in these cases there will be some control in the UK – although proving that that is so is a different matter – but usually the UK resident partners will make visits to the overseas office and there is a case for saying that

18 *Newstead v Frost* 53 TC 525.

the management of the partnership is abroad. (This harks back to the Solicitor's Opinion considered in ITH1614.) It may be that some of the overseas partnership work is done in the UK by the UK partnership but this normally happens – or is said to happen – through the UK partnership acting as subcontractor for the overseas partnership.

**1624. Foreign partnership treatment: income that of partnership?**

If, however, one reaches the position that the ultimate control is in the UK and the bulk of the work is actually done here – albeit under subcontract – then that would be a case for a possible challenge. Cases have been seen where the arrangements were plainly offensive and amounted to no more than attempts to park UK-earned profits in a Section [857] partnership with the admitted intention of avoiding UK tax.

We would certainly want to attack these devices and argue, for example, that the work done in the UK by partners who were also members of the overseas firm was done in their capacity as members of that overseas firm. We could then establish that the profits from those activities could be assessed under Case II. Our Solicitor, on particular cases, has not been discouraging about the chances that we may succeed and in the days of the remittance basis there was some success in settling cases on Case II lines rather than Case V. However, these cases turn crucially on questions of fact and degree and there is the usual difficulty of obtaining information.

**1625. Foreign partnership treatment: income that of partnership?**

Sometimes we have had to consider whether there is in fact an overseas partnership and/or whether amounts claimed to be receipts of an overseas partnership are in fact receipts of the UK partnership which is seeking to avoid tax. We have had some success with the latter line under circumstances which gave grounds for quiet satisfaction. A firm of UK solicitors which had profited from its fees for advice about the setting up of a well-known tax avoidance scheme, sought to avoid tax on those fees by arranging to park them in a Channel Islands finance and brokerage partnership to which Section [857] was said to apply. This was insult added to injury with vengeance.

Our Solicitor's advice was that we could not challenge the view that control and management was abroad. However, there was considerable artificiality in the arrangements which led ultimately to the fees landing in the accounts of the Jersey partnership. We argued that the amounts were in fact receipts of the UK solicitor's practice and we were aided in this by the fact that it was probably improper for a UK solicitor to enter into a partnership with a non-solicitor to do what they claimed to do in Jersey. This line was eventually conceded and we got tax on the Channel Island profits accruing to the UK partners.

## 36.5 Partnership with resident and non-resident partners

Section 849 ITTOIA provides:

(1) If—

(a) a firm carries on a trade, and

(b) any partner in the firm is chargeable to income tax,
the profits or losses of the trade are calculated on the basis set out in subsection (2) or (3), as the case may require.
(2) For any period of account in which the partner is a UK resident individual, the profits or losses of the trade are calculated as if the firm were a UK resident individual.
(3) For any period of account in which the partner is non-UK resident, the profits or losses of the trade are calculated as if the firm were a non-UK resident individual.
(4) In calculating under subsection (2) or (3) the profits of a trade for any period of account no account is taken of any losses for another period of account.

ITTOIA EN explains:

1714. If some of a firm's partners are resident in the UK and some are not, the profits of the firm's trade must be calculated on different bases. For the resident partners, the calculation includes profits arising outside the UK; for the non-resident partners, the calculation is restricted to profits arising in the UK.
1715. Section 111 of ICTA is not explicit that the profits may have to be calculated on more than one basis. This section brings together the rules for resident and non-resident partners. Subsection (1) introduces the idea that more than one calculation may be needed.
1716. The source legislation refers to the computation of the profits from the actual trade "for any period". Profits are calculated for a period of account. So subsections (2) and (3) make it clear that the section applies to a period of account. It is possible for a partner to be both resident (for one tax year) and non-resident (for another) within a single period of account. In such a case, the firm's profit has to be calculated twice to arrive at the partner's share of the profits.
1717. Subsection (2) sets out the normal basis for calculating the profits, for an individual resident in the UK. The profits are calculated as if the firm were an individual resident in the UK.
1718. Subsection (3) sets out an additional basis for calculating the profits. If the partner (who may be a non-resident company liable to income tax) is not resident in the UK the profits of the firm are calculated as if the firm were an individual not resident in the UK.

## 36.6 Transparency of partnership for CGT

Section 59(1) TCGA provides:

> Where 2 or more persons carry on a trade or business in partnership—
> (a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately, and
> (b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.

This is somewhat scanty foundation for the CGT treatment of partnerships.[19] It is expanded by SP D12:

> **Disposals of assets by a partnership**
> Where an asset is disposed of by a partnership to an outside party each of the partners will be treated as disposing of his fractional share of the asset.

So partnerships are transparent for CGT and gains on disposals of partnership assets accrue to the partners (not to the partnership). For reasons similar to those discussed above for IT,[20] it is considered that this result follows from first principles, and not from the statutory provision.

In determining whether gains are foreign chargeable gains (which may qualify for the remittance basis) one has regard to the situs of the partnership assets; the situs of the partnership share is irrelevant.

The question then is to identify the fractional share of each partner, and that is more tricky as partners do not always have easily identifiable fractional shares. SP D12 continues:

> In computing gains or losses the proceeds of disposal will be allocated between the partners in the ratio of their share in asset surpluses at the time of disposal. Where this is not specifically laid down the allocation will follow the actual destination of the surplus as shown in the partnership accounts; regard will of course have to be paid to any agreement outside the accounts. If the surplus is not allocated among the partners but, for example, put to a common reserve, regard will be had to the ordinary profit sharing ratio in the absence of a specified asset-

---

19 The Law Commission put the point more tactfully: "The working out of this concept in practice has not been easy, and has had to be regulated by extra-statutory guidance;" Law Com 283, *Partnership Law* (2009) para 3.51.

20 See 36.3 (Transparency of partnership for IT).

surplus-sharing ratio. Expenditure on the acquisition of assets by a partnership will be allocated between the partners in the same way at the time of the acquisition. This allocation may require adjustment, however, if there is a subsequent change in the partnership sharing ratios (see para 4).

## 36.7 Limited liability partnership

### 36.7.1 *Definition of LLP*

Section 1 Limited Liability Partnerships Act provides the definition:

> (1) There shall be a new form of legal entity to be known as a limited liability partnership.
> (2) A limited liability partnership is a body corporate (with legal personality separate from that of its members) which is formed by being incorporated under this Act; and—
> (a) in the following provisions of this Act (except in the phrase "oversea limited liability partnership"), and
> (b) in any other enactment (except where provision is made to the contrary or the context otherwise requires),
> references to a limited liability partnership are to such a body corporate.

Thus LLP (in tax legislation in particular) in principle means a LLP incorporated under the LLPA 2000, and does not include a foreign LLP.[21]

### 36.7.2 *Nature of LLP*

A LLP is (as a matter of LLP law) a body corporate. A LLP (despite its name) is not a partnership in the strict sense of the word.[22] So a LLP is in principle classified as a company for tax purposes.[23] However this default position is subject to such wide exceptions that it hardly ever applies.

---

21 See 72.17 (Foreign limited liability partnership).

22 The drafter assumed this in s.863(2) ITTOIA. This view is also supported by s.1(5) Limited Liability Partnerships Act 2000 ("Accordingly, except as far as otherwise provided by this Act or any other enactment, the law relating to partnerships does not apply to a limited liability partnership.")

23 See 72.3 (Meaning of "company").

### 36.7.3 *Income tax treatment of LLP*

Section 863 ITTOIA provides:

> (1) For income tax purposes, if a limited liability partnership carries on a trade, profession or business with a view to profit—
> (a) all the activities of the limited liability partnership are treated as carried on in partnership by its members (and not by the limited liability partnership as such),
> (b) anything done by, to or in relation to the limited liability partnership for the purposes of, or in connection with, any of its activities is treated as done by, to or in relation to the members as partners, and
> (c) the property of the limited liability partnership is treated as held by the members as partnership property.
> References in this subsection to the activities of the limited liability partnership are to anything that it does, whether or not in the course of carrying on a trade, profession or business with a view to profit.
> (2) For all purposes, except as otherwise provided, in the Income Tax Acts—
> (a) references to a firm or partnership include a limited liability partnership in relation to which subsection (1) applies,
> (b) references to members or partners of a firm or partnership include members of such a limited liability partnership,
> (c) references to a company do not include such a limited liability partnership, and
> (d) references to members of a company do not include members of such a limited liability partnership.

Thus a LLP is treated like a general partnership (provided it is carrying on a business with a view to profit). Section 863 then deals with the position where the LLP ceases to do that:

> (3) Subsection (1) continues to apply in relation to a limited liability partnership which no longer carries on any trade, profession or business with a view to profit—
> (a) if the cessation is only temporary, or
> (b) during a period of winding up following a permanent cessation, provided—
> (i) the winding up is not for reasons connected in whole or in part with the avoidance of tax, and
> (ii) the period of winding up is not unreasonably prolonged.

> This is subject to subsection (4).
> (4) Subsection (1) ceases to apply in relation to a limited liability partnership—
> (a) on the appointment of a liquidator or (if earlier) the making of a winding-up order by the court, or
> (b) on the occurrence of any event under the law of a territory outside the UK corresponding to an event specified in paragraph (a).

### 36.7.4 *CGT treatment of LLP*

Section 59A(1) TCGA deals with limited liability partnerships:

> Where a limited liability partnership carries on a trade or business with a view to profit—
> (a) assets held by the limited liability partnership are treated for the purposes of tax in respect of chargeable gains as held by its members as partners, and
> (b) any dealings by the limited liability partnership are treated for those purposes as dealings by its members in partnership (and not by the limited liability partnership as such);
> and tax in respect of chargeable gains accruing to the members of the limited liability partnership on the disposal of any of its assets shall be assessed and charged on them separately.[24]

This puts a LLP in the same position as a general partnership. Section 59A(3)–(5) deal with the position where a limited liability partnership ceases to carry on a business with a view to profit, or is wound up; they are equivalent to s.863(3)(4) ITTOIA.

---

24 Section 59A(2) TCGA is the equivalent of s.863(2) ITTOIA:
"(2) For all purposes, except as otherwise provided, in the enactments relating to tax in respect of chargeable gains—
(a) references to a partnership include a limited liability partnership in relation to which subsection (1) above applies,
(b) references to members of a partnership include members of such a limited liability partnership,
(c) references to a company do not include such a limited liability partnership, and
(d) references to members of a company do not include members of such a limited liability partnership."

### 36.7.5 *HMRC practice*

SP D12 provides:

> The enactment of the Limited Liability Partnership Act 2000, has created, from April 2001, the concept of limited liability partnerships (as bodies corporate) in UK law. In conjunction with this, new capital gains tax provisions dealing with such partnerships have been introduced through s.59A TCGA. Section 59A(1) TCGA mirrors s.59 TCGA in treating any dealings in chargeable assets by a limited liability partnership as dealings by the individual members, as partners, for capital gains tax purposes. Each member of a limited liability partnership to which s 59A(1) applies has therefore to be regarded, like a partner in any other (non-corporate) partnership, as owning a fractional share of each of the partnership assets and not an interest in the partnership itself. This statement of practice has therefore been extended to limited liability partnerships which meet the requirements of s.59A(1) TCGA, such that capital gains of a partnership fall to charged on its members as partners. Accordingly, in the text of the statement of practice, all references to a "partnership" or "firm" include reference to limited liability partnerships to which s.59A(1) TCGA applies, and all references to "partner" include reference to a member of a limited liability partnership to which s.59A(1) TCGA applies.
>
> For the avoidance of doubt, this statement of practice does not apply to the members of a limited liability partnership which ceases to be "fiscally transparent" by reason of its not being, or its no longer being, within ss.59 and 59A(1) TCGA.

## 36.8 Residence of partnership

The residence of a partnership is not often important for tax, but it matters occasionally:

(1) The provision relating to the disallowance of partnership DTR refers to a firm which resides outside the UK.[25]

(2) In order to be a "foreign employer" (and so have chargeable overseas earnings) a partnership must be resident outside the UK and not resident in the UK.[26]

25 See 36.9 (DTA Relief for partnership).

26 See 12.12 (Foreign employer).

(3) One needs to identify domestic-law residence of a partnership in order to determine its treaty-residence.[27]

Until 1995 the position was governed by s.112(1) ICTA 1988:

> *Where a trade or business is carried on by two or more persons in partnership, and the control and management of the trade or business is situated abroad, ... the partnership shall be deemed to reside outside the UK ...*

This was absent-mindedly repealed, and now there is no statutory definition, but it is considered that the test of partnership residence is still control and management. This is consistent with the general scheme of UK taxation of partnerships. ITTOIA EN agrees, in the passage set out above ("For UK tax purposes, if it is necessary to consider where a firm is resident, the question is likely to be decided by the place where the firm's business is controlled and managed. ...").[28] HMRC agree. The former ITH provided:

> **1609. Residence**
> In English law a partnership is not a person and it has long been assumed that it cannot in fact have a residence. Although Scottish partnerships are persons we have not made any distinction. ... But there has been some nibbling away of the principle that a partnership does not have a residence. The concept of residence and partnerships appears in other Sections of the Taxes Acts. For example in [the definition of chargeable overseas earnings] there is the concept of a partnership, 'resident outside and not resident in the UK'. The transfer pricing provisions ... apply to partnerships but their effect may depend on whether or not the buyer or seller is resident in the UK. It is probable that if residence of a partnership in these contexts ever had to be put to the test the criterion of control and management would be used.
> More important is the case of *Padmore v IRC* 62 TC 352. This concerned the effect of the Double Taxation Agreement with Jersey on the liability of UK resident partners of a partnership controlled and managed in Jersey. Jersey law has a provision very similar to Section 112. Both the High Court and the Court of Appeal considered that it must be deduced from the respective Sections that both Jersey and UK

27 See 5.13 (Treaty residence: Partnerships). This is no longer relevant for UK tax because of the treaty override, but may be relevant for foreign tax.

28 See 36.9 (DTA relief for partnership).

law attach tax consequences to the residence of partnerships and that residence is determined by control and management.

## 36.9 DTA relief for partnership

For the question whether a partnership can be a treaty-resident for DTA purposes, see 5.13 (Partnerships).

Section 858 ITTOIA disapplies DTA relief on partnership income of UK residents. Section 858(1) provides:

> This section applies if—
> (a) a UK resident ("the partner") is a member of a firm which—
> (i) resides outside the UK, or
> (ii) carries on a trade [including business] the control and management of which is outside the UK, and
> (b) by virtue of any arrangements having effect under section 2(1) of TIOPA 2010 ("the arrangements") any of the income of the firm is relieved from income tax in the UK.

ITTOIA EN explains the need for s.858(1)(a)(ii):

> 1777. For UK tax purposes, if it is necessary to consider where a firm is resident, the question is likely to be decided by the place where the firm's business is controlled and managed. But it is possible that, under foreign law, a firm may be considered to be resident elsewhere, for example, by reference to where the firm was established. So the section uses both the "control and management" test and the "resides" test.

Section 858(2) ITTOIA provides:

> The partner is liable to income tax on the partner's share of the income of the firm despite the arrangements.

This disapplies treaty relief. It survived an attack in *Padmore v IRC (No 2)* [2001] STC 280.

ITTOIA EN provides:

> 1774. This section ensures that a UK resident partner's share of the income of a foreign firm remains liable to UK tax even though the income of the firm as a whole is exempt from UK tax in accordance with a double taxation agreement. It is based on section 112(4) and (5)

> of ICTA.
> 1775. The business profits article of the UK/Jersey double taxation arrangement exempts the profits of a Jersey firm from UK tax. In the case of *Padmore v IRC* 62 TC 352, the Court of Appeal decided that the exemption extended to the share of the profits arising to a UK resident individual. The rules in section 112(4) and (5) of ICTA were enacted in 1987 to remove the exemption.
> 1776. Subsection (1) sets out the type of individual and firm with which the section is concerned. It goes on to identify the sort of exemption from tax that was considered in the Padmore case. ...
> 1778. Subsection (2) makes it clear that the section does no more than remove any exemption under a double taxation arrangement. It does not deny other reliefs, such as tax credit relief. See Change 145 in Annex 1.[29]

This provision dates back to 1987. Interestingly, in those days retrospective legislation and breach of treaty obligations were thought to require special justification.[30]

---

29 Change 145 is as follows:
"This change enacts the Inland Revenue practice of giving a narrow interpretation to the word 'affect' in section 112(4) of ICTA.
The business profits article of the UK/Jersey double taxation agreement exempts the profits of a Jersey firm from UK tax. In the case of *Padmore v IRC* 62 TC 352 the Court of Appeal decided that the exemption covered the share of the profits arising to a UK resident partner. The rules in section 112(4) and (5) of ICTA were enacted in 1987 to remove the exemption.
It was intended, in the case of income tax, that the 1987 legislation should do no more than remove the exemption claimed in the *Padmore* case. The words used in section 112(4) of ICTA are 'shall not affect any liability to tax'. On the face of it, these words could deny the partner any relief, including tax credit relief, under a double taxation treaty. Section 858(2) of this Act makes it clear that it is only the partner's chargeability to tax that is preserved, overriding any provision to the contrary in a double taxation treaty. No other effect of the treaty is overridden.
This change is in principle in taxpayers' favour but is expected to have no practical effect as it is in line with current practice."

30 The former ITH para 1660 provided:
"The retrospective nature of the legislation [in 1987] provoked comment in the professional press and in Parliament. The Government, and later the House, were persuaded as to the propriety of this action because the Section does no more than restore the general understanding of the law and retrospection prevents third parties suddenly deriving a substantial windfall benefit for six years. Although the Section protects from retrospection only those taxpayers who gained a Commissioners' or

Section 858(3) ITTOIA provides:

> If the partner's share of the income of the firm consists of or includes a share in a qualifying distribution—
> (a) made by a UK resident company, and
> (b) chargeable to tax under Chapter 3 of Part 4,
> the partner (and not the firm) is, despite the arrangements, entitled to the share of the tax credit which corresponds to the partner's share of the distribution.

ITTOIA EN provides:

> 1779. Subsection (3) deals with UK tax credits. A double taxation arrangement may give a non-resident person an entitlement to payment of a tax credit on a distribution by a UK company. The entitlement is restricted to the share of the distribution that arises to a UK resident partner.

### 36.9.1 *"Members of a firm"*

Section 858(4) defines "members of a firm":

> For the purposes of this section, the members of a firm include any person entitled to a share of income of the firm.

Section 58(4) FA 2008 provides:

> The amendments made by subsections (1) to (3) are treated as always having had effect.

Retrospective legislation without limit of time! This is aimed at a tax avoidance scheme which involved trustees of 2 IP trusts trading in

---

Court decision before 17 March 1987, similar treatment was allowed to a small number of other taxpayers who were told by the Revenue that their cases would follow the Padmore decision. Criticism was also made because the legislation is intended to override the effect of the Jersey Arrangement and any other treaty which the Courts might have found to have similar effect. This 'treaty override' was defended on similar grounds – that it merely puts into effect what was generally understood to be the position. It has not met with any objection from treaty partners."

partnership.[31] The EN to the draft clause provided:

> 11. The users of the scheme claim that, under the terms of the relevant Double Taxation Treaty, the UK is not entitled to tax the partnership income of the foreign trustees. As that income is precisely the same income as that received by the UK individuals as beneficiaries of the trust, they argue that the UK is not entitled to tax the UK individuals on it.
> 12. Legislation was introduced in Finance (No 2) Act 1987, which provided that (as had almost universally been assumed to be the case until a High Court decision to the contrary,) a Double Taxation Treaty did not affect UK residents' liability to UK tax on their share of income or gains from a foreign partnership.
> This new avoidance scheme purports to get round that legislation by claiming that the foreign trustees are the partners rather than the UK individuals.
> 13. The Government believes that a partner for the purposes of that legislation has always included all those persons entitled to a share of income or capital gains of the partnership. As such, the UK individuals remain liable to UK tax despite the elaborate, artificial structure designed to exempt them. This clause will put it beyond doubt that the legislation has always had that effect.

This justification of the retrospective nature of the 2008 amendment raises questions of law, fact, policy, practice and human rights.

As a matter of law, was it the case (before the retrospective legislation) that "member of a firm" for the purposes of that legislation has always included all those persons entitled to a share of income or capital gains of

---

31 The EN to the draft clause published 12 March 2008 provides a somewhat untechnical explanation:

"8. An avoidance scheme purports to exempt from UK tax income received by UK resident individuals by using certain provisions in the UK's bilateral Double Taxation Treaties.

9.This scheme involves the establishment of offshore trusts, (of which the UK individuals are both settlors and beneficiaries) and partnerships (of which the foreign trustees of those trusts are partners).

10. The partnerships acquire the rights to receive the UK individuals' income but the terms of the trusts are such that, as beneficiaries of the trust, the UK individuals retain beneficial entitlement to the income – with the trustees obliged to remit the income to the UK individuals as it arises."

the partnership? The answer is, no.[32]

As a matter of fact, did the Government believe that to be the case? I think it is a safe bet that if HMRC received expert and impartial advice on the point, it would have been hedged with caveats such that the terms of EN para 13 would not represent a fair and accurate summary of the position.[33]

The question of policy is whether the reasons given justify retrospective legislation.[34] One might discern two reasons from the EN. The first is that the scheme will fail (or so the Government believe). If that is true, the 2008 change is unnecessary; if false (and it is certainly debatable) it is not a good reason. The only reason worth considering is that the scheme is "elaborate and artificial", or, HMRC might fairly have said, abusive (however that flexible term may be defined). Whether that justifies retrospective legislation is ultimately a political question on which views differ depending on how one values the rule of law. It is arbitrary and unfair in that this scheme was retrospectively stopped and others – no less elaborate, artificial and abusive – were not. Pragmatists (to whom constitutional proprieties such as the rule of law are of little interest) should bear in mind that retrospective legislation increases the "legal risk", a measure under which the UK falls low on international surveys, and the lowering of the UK's reputation in that regard has a significant albeit intangible cost. I suspect a major factor in picking on this arrangement, not mentioned in the EN, was the amount of money involved.

---

32 Partner is a term of partnership law, and in the partnership law sense a person who is entitled to income or gains of a partnership is not as such a partner. HMRC would have to argue that "partner" in s.858 was not used in its partnership law sense, which is a difficult line to take even in these times of purposive interpretation, though in a tax avoidance case nothing is impossible. This is confirmed in *R on the application of Huitson v HMRC* [2010] EWHC 97 (Admin) at [71]; the point will need review when the case is final.

33 In Parliament the statement was described as "disingenuous": Public Bill Cttee debate on Finance Bill, 22 May 2008 Hansard col 371. In *R on the application of Huitson v HMRC* [2010] EWHC 97 (Admin) HMRC wisely claimed legal professional privilege: at [71].

34 For an illuminating discussion of the policy issues in a US context, see Daniel Shaviro, *When Rules Change*, University of Chicago Press (2000). Taxpayers may on this point look with envy to the USA, where a norm opposing retrospective legislation is "strongly rooted in popular sentiment, legislative practice, and perhaps even the Constitution as the Courts are likely to interpret it" (p.104).

The question of practice is how often retrospective legislation will be used in the future. What advice can anyone give to clients seeking to know their position? The answer of course is that one cannot give a clear answer. Much depends on the politics of the day, but I guess that retrospective legislation will continue to be a rare response; a popular scheme carried out by many taxpayers and involving larger sums is certainly more at risk than others.

Lastly, does the retrospective legislation breach the Human Rights Act and (regardless of retrospectivity) is it EU law compliant? It will take years before a final decision is reached on these points. HMRC have won the first round, though in a case in which tax counsel was not instructed.[35]

### 36.9.2 *DT relief for partnership gains*

Section 59 TCGA sets out the same rules for CGT:

> (2) Subsection (3) applies if—
> (a) a person resident in the UK ("the resident partner") is a member of a partnership which resides outside the UK or which carries on any trade, profession or business the control and management of which is situated outside the UK, and
> (b) by virtue of any arrangements that have effect under section 2(1) of TIOPA 2010 ("the arrangements") any of the capital gains of the partnership are relieved from capital gains tax or corporation tax in the UK.
> (3) The arrangements (so far as providing for that relief) do not affect any liability to capital gains tax or corporation tax in respect of the resident partner's share of any capital gains of the partnership.
> (4) For the purposes of subsections (2) and (3) the members of a partnership include any person entitled to a share of capital gains of the partnership.

## 36.10 SD and SDLT position of partnerships

SD and SDLT are outside the scope of this book, but the HMRC statement

---

35 *R on the application of Huitson v HMRC* [2010] EWHC 97 (Admin) raises the HR point and *R on the application of Shiner v HMRC* [2010] EWCA Civ 558 will raise the EU law point which is based on free movement of capital.

published 11 October 2010 is of wider importance as it discusses the nature of partnerships which is relevant for many tax purposes.

### 36.10.1 *LLPs*

**Group relief for SDLT and Stamp Duty: partnerships**
**Stamp Duty Land Tax - a change in HMRC's view of the law**
Where land transactions take place between members of a group, relief for Stamp Duty Land Tax (SDLT) is available (Part 1 Schedule 7 Finance Act 2003). Companies are members of the same group for the purposes of the relief if one body corporate is a 75% subsidiary of another or if both are 75% subsidiaries of a third body corporate. Broadly, the 75% relationship refers to the beneficial ownership of the subsidiary company's issued ordinary share capital.
A 'company' for group relief purposes is defined in Schedule 7 FA 2003 as a 'body corporate'. HMRC did not consider that a 'body corporate' for the purposes of Part 1 Schedule 7 FA 2003 included a Limited Liability Partnership incorporated under the Limited Liability Partnership Act 2000 (LLP), so that LLPs were disregarded ('looked through') when considering whether a group relationship existed, the members of the LLP being treated as the beneficial owners of the LLP assets.
This view has recently been challenged. Following legal advice, HMRC now accepts that, for the purposes of SDLT group relief, a 'body corporate' does include an LLP. An LLP can therefore be the parent in a group structure. However, as an LLP does not itself have issued ordinary share capital it cannot be the subsidiary of other companies. This also means that any subsidiaries of the LLP cannot be grouped with the companies that are the corporate members of the LLP.
This revised view does not affect which party can claim group relief, but does affect which entities are regarded as forming part of a group. An LLP cannot claim group relief itself because its chargeable interests in land are treated as held by or on behalf of the individual members (Paragraph 2 Schedule 15 FA 2003), and this position is unchanged. As such, in broad terms, an LLP continues to be disregarded if it is the vendor or purchaser in a transaction. In such a transaction group relief may be, in part at least, available if some or all of its members (which are incorporated companies) are themselves grouped. It also follows that if an LLP transfers land to a company that it owns, and that is within the LLP headed group, no group relief will be available as the land is deemed to be owned by the members of the LLP, and those members are not within the same group as the company owned by the LLP.

If SDLT group relief has been incorrectly claimed solely as a result of an LLP in the group structure being disregarded or looked through for the purposes of establishing group relationships then HMRC will not seek to revisit the claim.

**Stamp Duty**
Group relief for Stamp Duty is available to bodies corporate that are associated (Section 42 FA 1930). Bodies corporate are associated if one is a 75% subsidiary of another or if both are 75% subsidiaries of a third body corporate. Broadly, the 75% relationship refers to the beneficial ownership of the subsidiary company's issued ordinary share capital. In general, HMRC has taken the view that an LLP, as a body corporate, can be the ultimate parent of a group for the purposes of Section 42 FA 1930. Furthermore, as an LLP does not itself have issued ordinary share capital it cannot be the subsidiary of another company.
Transfers of stock and marketable securities may be made to the parent LLP from a subsidiary body corporate in the same group and qualify for group relief and vice versa. Group relief cannot be claimed on the transfer of stock and marketable securities from a body corporate parent of an LLP to the LLP or to a body corporate subsidiary of the LLP.

### 36.10.2 *English partnerships*

**English partnerships**
As English limited and general partnerships do not have legal personalities separate from the persons who are the partners they must be 'looked through' when establishing bodies corporate that form a group for Stamp Duty Land Tax and Stamp Duty purposes. As such the companies that are the partners of an English general or limited partnership can, depending upon the facts, be grouped with those companies that are below the partnership in the group structure.

### 36.10.3 *Scottish partnerships*

**Scottish partnerships**
Both Scottish limited and general partnerships have legal personalities separate from the persons who are the partners. They cannot therefore be 'looked through' when establishing bodies corporate that form a group. But they are not bodies corporate and so cannot be the parent of a group of companies.

## 36.10.4 *Foreign partnerships*

**Non-UK partnerships**

The principles set out in the earlier section on UK partnerships will be applied case by case to non-UK partnerships.

CHAPTER THIRTY SEVEN

# NON-RESIDENTS INCOME TAX RELIEF

## 37.1 Non-residents IT relief – Introduction

This chapter considers the IT relief for UK source income of non-residents. The legislation is twice as long as it needs to be as it distinguishes unnecessarily between:
(1) non-resident individuals and trustees
(2) non-resident companies.

The two reliefs operate in more or less the same way. I refer to them together as "**non-residents IT relief**".

In short, the relief is that UK source interest, dividend and pension income of non-residents is not subject to UK tax beyond withholding tax (where applicable).

## 37.2 Relief for non-resident individuals and trustees

In the absence of relief, non-resident individuals and trustees are subject to tax on UK source income at the same rates as UK residents. Thus non-resident individuals are subject to income tax at the higher rate, and non-resident trustees are subject to tax at the trust rate. Section 811 ITA provides relief.

Section 811(1) ITA provides:

> This section applies to income tax to which—
> (a) a non-UK resident, other than a company, is liable, or
> (b) a non-UK resident company is liable as a trustee.[1]

---

1 Section 811(1)(b) is otiose since a trustee is a separate person for tax.

Section 811(3) ITA sets out the relief:

> The non-UK resident's liability to income tax for a tax year is limited to the sum of amounts A and B.

An individual must be non-resident throughout the year: the split year concession does not apply.[2]

There is no equivalent CGT relief but that is not needed as a non-resident is not usually subject to CGT. It is not difficult to envisage a case where a non-resident would be subject to CGT on gains made through an investment manager, though it is not common, in practice no-one would expect compliance, and HMRC would probably turn a blind eye. The former ITH stated at para 970:

> it would be very rare to find a situation where a non-resident would be liable on capital gains made through an investment manager.

## 37.3 Amount A (tax deducted at source)

Section 811(4) ITA defines amount A:

> Amount A is the sum of—
> (a) any sums representing income tax deducted from the non-UK resident's disregarded income for the tax year (see section 813),
> (b) any sums representing income tax that are treated as deducted from or paid in respect of that income, and
> (c) any tax credits in respect of that income.

In short, amount A is tax deducted at source or its equivalent.

## 37.4 Amount B (disregarded income and reliefs)

Section 811(5) ITA defines amount B:

> Amount B is the amount that, apart from this section, would be the non-UK resident's liability to income tax for the tax year, if the following were left out of account—
> (a) the non-UK resident's disregarded income for the tax year, and

2 See 6.10 (UK source investment income).

(b) any relief mentioned in subsection (6) to which the non-UK resident is entitled for the tax year as a result of—
   (i) section 56(3) or 460(3) of this Act (residence etc of claimants), or
   (ii) double taxation arrangements.

I refer to the reliefs within (b) as "**disregarded reliefs**". These reliefs are not disapplied. The individual can in theory claim them. But that increases amount B, so reduces the benefit of s.811 relief. A higher rate taxpayer will often be no better off, particularly after taking professional costs into account.

Section 811(6) ITA sets out the full list of disregarded reliefs:

> The reliefs referred to in subsection (5) are—
> (a) an allowance under Chapter 2 of Part 3 of this Act (personal allowance and blind person's allowance),
> (b) a tax reduction under Chapter 3 of Part 3 of this Act (tax reductions for married couples and civil partners),
> (c) relief under section 457 or 458 of this Act (payments to trade unions and police organisations),
> (d) a tax reduction under section 459 of this Act (payments for benefit of family members), and
> (e) relief under section 266 of ICTA (life assurance premiums).

The effect of "amount B" is that the UK retains tax on (1) non-disregarded income (eg UK property income) and (2) disallows disregarded reliefs.

## 37.5 Trusts: UK beneficiary rule

Section 812(1) ITA provides:

> Section 811 does not apply to income tax to which non-UK resident trustees are liable for a tax year, if there is a beneficiary of the trust who is—
> (a) an individual who is ordinarily UK resident, or
> (b) a UK resident company.

One UK beneficiary may disqualify the entire trust from the relief.

Section 624 saves the relief if the trust is settlor-interested and the settlor is non-UK resident.[3]

### 37.5.1 "*Beneficiary*"

Section 812 ITA defines "beneficiary":

> (2) For the purposes of subsection (1) a person is a beneficiary of the trust if—
> (a) the person is an actual or potential beneficiary of the trust, and
> (b) condition A or B is met in relation to the person.
> (3) Condition A is that the person is, or will or may become, entitled under the trust to receive some or all of any income[4] under the trust.
> (4) Condition B is that some or all of any income under the trust may be paid to or used for the benefit of the person in the exercise of a discretion conferred by the trust.

The definition is the same as 17.13.3 (Non-resident discretionary trust).
At first sight it appears that a trust with power to add beneficiaries would not qualify for relief, since residents of the UK are potential beneficiaries. But such powers are standard form in offshore trusts, so if that were right, offshore trusts would not normally qualify. In practice I understand that HMRC do not take that point.

## 37.6 Disregarded income

The definition of "disregarded income" is crucial. In practice, the most important categories are dividends and interest.
The full definition is complex. There are six categories of disregarded income. Section 813(1) ITA provides:

> For the purposes of this Chapter income arising to a non-UK resident is "disregarded income" if it is—
> (a) disregarded savings and investment income (see section 825),
> (b) disregarded annual payments (see section 826),

3 See 24.7.2 (Non-resident trust, non-resident settlor).

4 Income is in turn defined in s. 812(5) ITA:
"The references in subsections (3) and (4) to any income under the trust include a reference to any capital under the trust so far as it represents amounts originally received by the trustees as income."

> (c) disregarded pension income,
> (d) disregarded social security income,
> (e) disregarded transaction income (see section 814), or
> (f) income of such other description as the Treasury may by regulations designate for the purposes of this section.

Thus we have to turn to another five definitions. But first, s.813(2) ITA brings in an important exception:

> But income in relation to which the non-UK resident has a UK representative for the purposes of Chapter 2B is not disregarded income.

See 38.3 (UK representative).

## 37.7 Disregarded savings and investment income

Section 825 ITA provides the definition:

> (1) For the purposes of this Chapter income is "disregarded savings and investment income" if—
> (a) it is chargeable under Chapter 3 or 5 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies and stock dividends from UK resident companies), or
> (b) it is within subsection (2) and is not relevant foreign income.
> (2) Income is within this subsection if it is chargeable under—
> (a) Chapter 2 of Part 4 of ITTOIA 2005 (interest),
> (b) Chapter 7 of that Part (purchased life annuity payments),
> (c) Chapter 8 of that Part (profits from deeply discounted securities),
> (d) Chapter 10 of that Part (distributions from unauthorised unit trusts), or
> (e) Chapter 11 of that Part (transactions in deposits).

## 37.8 Disregarded annual payments

Section 826 ITA provides the definition:

> For the purposes of this Chapter income is "disregarded annual payments" if it is not relevant foreign income and is chargeable under—
> (a) section 579 of ITTOIA 2005, so far as it relates to annual payments (royalties etc from intellectual property),
> (b) Chapter 4 of Part 5 of that Act, so far as it relates to annual

payments (certain telecommunication rights: non-trading income), or

(c) Chapter 7 of Part 5 of that Act (annual payments not otherwise charged).

There are two types of royalty income:
(1) royalties which are annual payments ("AP royalties");
(2) royalties which are not annual payments ("non-AP royalties").
AP royalties are disregarded income (but they do not qualify for deductible expenses). Non-AP royalties are not disregarded income, but they do qualify for deduction for allowable expenses: s.582 ITTOIA. In practice DTA relief will often apply in which case the distinction will not matter.

## 37.9 Disregarded pension/social security income

Section 813 ITA provides:

> (3) Income is "disregarded pension income" if it is chargeable under Part 9 of ITEPA 2003 (pension income) because any of the following provisions of that Act applies to it—
> section 577 (UK social security pensions),
> section 579A (pensions under registered pension schemes) (but see subsection (4) below),
> section 609 (annuities for the benefit of dependants),
> section 610 (annuities under non-registered occupational pension schemes), or
> section 611 (annuities in recognition of another's services).[5]
>
> (5) Income is "disregarded social security income" if—
> (a) it is a taxable benefit listed in Table A in section 660 of ITEPA 2003, other than income support or jobseeker's allowance, and
> (b) it is chargeable under Part 10 of that Act (social security income).

---

5 Section 813(4) ITA provides:
"Income chargeable under Part 9 of ITEPA 2003 because section 579A of that Act applies to it is disregarded pension income only if the registered pension scheme in question—
(a) falls within para 1(1)(f) of Schedule 36 to FA 2004, and
(b) was, immediately before 6 April 2006, a retirement annuity contract to which section 605 of ITEPA 2003 applied."

## 37.10 Limit on liability: companies

### 37.10.1 *Income tax limit*

Non-resident companies are in principle subject to income tax on UK source income at the basic rate. Section 815 ITA provides relief:

> (1) This section applies to income tax to which a non-UK resident company is liable, otherwise than as a trustee.
> (2) The non-UK resident company's liability to income tax for a tax year is limited to the sum of amounts A and B.
> (3) Amount A is the sum of—
> (a) any amounts representing income tax deducted from the non-UK resident company's disregarded company income for the tax year,
> (b) any amounts representing income tax that are treated as deducted from or paid in respect of that income, and
> (c) any tax credits in respect of that income.
> (4) Amount B is the amount that, apart from this section, would be the non-UK resident company's liability to income tax for the tax year if the non-UK resident company's disregarded company income for the tax year were left out of account.

### 37.10.2 *Disregarded company income*

There are five categories of disregarded company income. Section 816 ITA provides:

> (1) For the purposes of this Chapter income arising to a non-UK resident company is "disregarded company income" if it is—
> (a) disregarded savings and investment income (see section 825),
> (b) disregarded annual payments (see section 826),
> [(c) and (d) relate to the IME, see 39.1 (Investment manager exemptions - Introduction).]
> (e) income of such other description as the Treasury may by regulations designate for the purposes of this section.

This is effectively the same as the definition of "disregarded income" which applies for s.811 relief (individuals and trusts). There are two apparent differences:
(1) It omits references to pension or social security income (which do not

apply to companies).

(2) There are differences in the wording of s.816(1)(c)(d) which are the equivalent of the individual's exemption for "transaction income" but I cannot see they are of any significance.

## 37.11 Commentary

Non-residents income tax relief originated in a long standing concession, put on a statutory basis in 1995. As far as I know, no thorough consideration of the reasons for non-residents IT relief has ever been published. However several reasons can be identified.

First of all is the practical difficulty in seeking to collect tax in excess of tax deducted at source (**"progressive rate tax"**). The rule that the person claiming the relief effectively loses the benefit of DTA relief, personal allowances and other minor reliefs ensures that the full amount deducted at source is retained, and simplifies administration for HMRC and for taxpayers. Nowadays the existence of tax collection treaties would make tax collection practical in most jurisdictions, so some other justification for the relief is needed.

Secondly there is the tax competition consideration that non-resident investors would not invest in UK securities if they had to pay progressive IT rates.

Thirdly, some policy considerations tend to suggest that progressive rates of UK tax are not appropriate for non-resident individuals:

(1) Progressive rates of UK tax would not be applied to all non-residents income (most of their income may be foreign source income and not subject to UK tax).
(2) Non-residents are likely to be taxed in their country of residence, with credit for UK tax.
(3) If every country applied its own progressive rates, wealthy taxpayers would have to fill in tax returns in as many countries as they held investments, which would be an enormously difficult exercise for a worldwide portfolio.

These considerations form the basis for a general international acceptance that progressive rates are mainly a matter for the country of residence.[6]

---

6 This view is expressed in "A Platform for Consultation" (Australia) para 30.61 December 2010 accessible *www.rbt.treasury.gov.au/publications/paper3/index.htm*.

The exclusion of UK employment income from the relief is understandable since PAYE makes collection of tax a practicality; also disparity compared to other employees might be regarded as unacceptable.

The exclusion of UK property income from the relief is strange. Deduction at source on rent is limited to the basic rate, though enforcement of progressive rates would normally be possible because of the situation of assets in the UK (not to mention international tax collection treaties). In the past, the Inland Revenue did not attempt to collect progressive rates on UK property income of non-residents.[7] This is not the current practice, at least officially. However one wonders how much tax notionally due is actually collected. Of course well advised non-residents will normally invest via non-resident companies so there may not often be much progressive rate tax even notionally due.

Logically:

(1) the collection of tax at source rules ought to extend to progressive rates, where land is vested in an individual or a trust; (though this may be difficult for agents) or

(2) non-residents income tax relief should be extended to property income.

On this point non-residents income tax relief reflects a lack of consistent thinking or a somewhat unhappy compromise between different policy considerations.

7 The point arose in *Burns v HMRC* [2009] STC (SCD) 165 where HMRC argued that transfers of land from (supposedly) non-resident individuals to non-resident companies in 1980 and 1982 were made to avoid higher rate income tax on UK property income. The taxpayers responded that that could not be correct since the Inland Revenue did not collect that tax. The Special Commissioner did not have to decide the issue but did accept that in the 1980's there was "a certain level of expectation" that HMRC did not seek to collect higher rate tax on UK source rental income of non-residents. The practice was perhaps one of HMRC routinely turning a blind eye, rather than anything more formal or express; though a thorough review of old Inland Revenue files would be needed to know the answer.

CHAPTER THIRTY EIGHT

# COLLECTION OF TAX FROM UK REPRESENTATIVES

## 38.1 Collection of tax directly from non-residents

The former ITH provided:

**903. Machinery of assessment: direct charge on non-residents**
It always was and still is possible to assess a non-resident directly if, in the words of the Courts, he can be reached. A simple example of such a situation arose in the case of *Tischler v Apthorpe* [2 TC 89]. Mr Tischler was not resident. He was a partner in a French wine firm who spent four months or so a year in England. He lived then in a London hotel and sold wine to English customers. His firm also employed London agents and the question was whether the English profits could be assessed directly on Mr Tischler or whether such assessments should, Mr Tischler being non-resident, be made only on the English agents. The High Court held that an assessment made directly on the firm was good and that Mr Tischler was obliged to make a return served on him. In the words of Mathew J 'If the principal can be got at there is no need to have recourse to Section 41 (of the 1842 Act which was consolidated in Section 78 TMA 1970).
An individual, clearly, can be physically present in this country without being resident here and we used to have to rely on the principle established by the Tischler case in reaching the profits made by overseas sportsmen and women and artistes who come to this country for quite brief engagements. The modern view certainly, is that a non-resident company which trades here equally is here and that it may similarly be reached. If the company has a branch presence here with all the physical trappings of its trade it is visibly here and will have a registered place of business, an address at which it may be found and at which legal notices may be served.
The principle of direct assessment is not confined to non-residents who actually come here. There is no bar on direct assessment of non-residents who are not here whether or not they have agents in the UK. This was made clear in the case of *Werle v Colquhoun* [2 TC 412]. The difficulty with direct assessment on a person who is not here lies in recovering the tax, although now that the Supreme Court rules allow service of writs abroad this may be a little easier provided there are assets in the UK. But it is still true to say that if a non-resident company

> acting through an agent has no such physical presence here and has nothing here the Revenue cannot, in practice, impose its charge effectively without more adequate machinery including that for the service of notices and returns as well as for the actual gathering of the tax. It was in such situations – where the non-resident had only an agent here – that the original form of Part VIII was intended to come to the Revenue's aid. In practice Part VIII is normally used today even in those cases where the taxpayer can be reached directly ...

This was written before the 1995 changes and before the mutual collection of tax agreements but the point is still valid.

## 38.2 Collection of tax from UK representative

The rules are set out three times:
(1) For IT the rules are in chapters 2B and 2C part 14 ITA. This does not apply to companies,[1] so effectively this applies to non-resident individuals and trusts.
(2) For CGT the rules are in part 7A TCGA.
(3) For CT the rules are in chapter 6 part 22 CTA 2010.
This does make a coherent discussion somewhat harder. In this chapter I set out the IT rules in full, and (in the absence of material differences) give the CGT and CT references in a footnote only.

Section 835U(1) ITA provides the basic rule:

> The obligations and liabilities of a non-UK resident are to be treated, for the purposes of the enactments to which this Chapter applies,[2] as if they were also the obligations and liabilities of the UK representative of the non-UK resident.

This is a collection provision (the metaphor often used is "machinery

---

1 Section 835D ITA provides:
"This Chapter does not apply in relation to income tax chargeable on income of a company otherwise than as a trustee."

2 This relates back to s.835T ITA which provides:
(1) This Chapter applies to the enactments relating to income tax so far as they make provision for or in connection with the assessment, collection and recovery of tax, or of interest on tax.
(2) Those enactments have effect in accordance with section 835U in relation to amounts in respect of which a branch or agency is to be treated as the UK representative of a non-UK resident under Chapter 2B.

provision") and not a charging provision: the UK representative is only subject to tax if there is a charge to tax on usual principles on the non-resident principal. The INT Manual provides:

> **268010 Introduction - What are the machinery provisions for assessment and collection?** [April 2010]
> The machinery provisions alone cannot create or extend a tax liability on the non-resident. There has to be a charge to tax in respect of the non-resident under the domestic provisions in the first place. The provisions work by treating the tax obligations and liabilities of the non-resident as though they were additionally the obligations and liabilities of the UK representative. This provides a practical assessment and collection mechanism for non-residents. Once either the non-resident or the UK representative has paid the liabilities both parties are treated as having met their liabilities.

Section 835U goes on to deal with the discharge of obligations:

> (2) Subsection (3) applies if—
> (a) the UK representative of a non-UK resident discharges an obligation or liability imposed by this section that corresponds to one to which the non-UK resident is subject, or
> (b) a non-UK resident discharges an obligation or liability that corresponds to one to which the non-UK resident's UK representative is subject by virtue of this section.
> (3) The corresponding obligation or liability—
> (a) of the non-UK resident (in a case within subsection (2)(a)), or
> (b) of the UK representative (in a case within subsection (2)(b)),
> is discharged.
> (4) A non-UK resident is bound, as if they were the non-UK resident's own, by acts or omissions of the non-UK resident's UK representative in the discharge of the obligations and liabilities imposed on the representative by this section. ...

## 38.3 UK representative

### 38.3.1 *Why does it matter who is a UK representative?*

A UK representative is important for the two reasons:

(1) A UK representative is liable for tax due from the non-resident principal, the topic of this chapter.

(2) Income in relation to which a non-UK resident has a UK representative falls outside non-residents IT relief: see 37.6 (Disregarded income).

### 38.3.2 *Definition of "UK representative"*

Section 835E ITA gives the basic definition for IT:

> (1) This section applies if a non-UK resident carries on (alone or in partnership) any trade, profession or vocation through a branch or agency in the United Kingdom.
> (2) The branch or agency is the UK representative of the non-UK resident in relation to—
> (a) the amount of any income from the trade, profession or vocation that arises (directly or indirectly) through or from the branch or agency, and
> (b) the amount of any income from property or rights which are used by, or held by or for, the branch or agency.

Thus for IT and CGT a UK representative is in short a branch or agency.

For CT, the term PE is used instead of branch/agency. Section 969(3) CTA 2010 provides:

> (3) For the purposes of this Chapter, the following rules apply to a permanent establishment in the United Kingdom through which a non-UK resident company carries on a trade.
> *Rule 1*
> The permanent establishment is the UK representative of the non-UK resident company in relation to chargeable profits of the company attributable to that establishment.

In the following discussion "**the non-resident principal**" is the person for whom the UK representative is a representative (who the statute calls "the non-UK resident").

The question whether the non-resident principal is trading is crucial for the UK representative rules because these rules only apply if the non-resident principal is carrying on a trade, profession or vocation.[3]

The INT Manual provides:

---

3 See 39.11 (When is there a trade in financial assets?).

**268030 Extent of UK representative's liability** [April 2010]
A person can only be the UK representative in respect of the permanent establishment/branch or agency with which they are linked. Where a non-resident has more than one UK permanent establishment/branch or agency, then it is possible that each will have a different UK representative. In those circumstances, each UK representative would only be responsible in respect of the part of their non-resident's liabilities and obligations arising from their own permanent establishment/branch or agency [*Neilsen Andersen & Co v Collins,* and *Tarn v Scanlan* 13 TC 91].

The former ITH explained "directly or indirectly" in s.835E(2)(a):

**914. General**
Section 79 [TMA 1970] is another 1915 amendment. It provides that a non-resident shall be chargeable on profits or gains arising directly or indirectly through any branch, agency etc here. The sort of thing that was happening, before this provision was introduced, was that an agent for a non-resident would negotiate a contract here and at the end of the oral negotiations the agent and the third party would agree to sign the formal documents abroad. The view the Revenue took, and defensibly so, was that in substance all had been done here apart from signing a piece of paper and that it was wrong for liability so to be avoided.
Problems of that sort are really problems of fact and proof as was mentioned in chapter 8 (ITH822). If the Revenue could have proved that there was an unwritten agreement made in London, it would have succeeded in a claim that the non-resident was trading here, and that is what we would argue today. Millions of pounds worth of business are done in the City of London every day on the basis of spoken agreements which are later confirmed in writing and nobody wishes to deny that the word is the contract. But, when the parties to the contract do not wish to act openly, proof is difficult to come by. What these words were meant to do was to enable the Revenue to say – "we must accept that this contract was made abroad because we cannot prove otherwise but a lot of negotiation took place in London and we want to look at the substance of the matter and the words 'directly or indirectly' will enable us to do that".

### 38.3.3 *Representative ceasing to act*

Rule 1 s.835E(3) ITA provides for the UK representative ceasing to act:

*Rule 1*
The UK representative continues to be the UK representative of the non-UK resident in relation to the amount even after ceasing to be a branch or agency through which the non-UK resident carries on the trade, profession or vocation concerned.

The INT Manual provides:

**268040 What assessments should be raised and how is that done?** [April 2010]
Where the trading activities in the UK have ceased the UK permanent establishment/branch or agency retains the obligations and liabilities as the UK representative even after the cessation. This provision is at Section 126(3) FA 1995 for income tax and at Section 150(2)(c) FA 2003 for corporation tax. So assessments can still be raised on the UK representative subject to the usual assessing time limits. Where however the trading was conducted through a branch or fixed place of business and that presence has discontinued there may be difficulties identifying any person as the UK representative or any assets within the UK upon which recovery may rely. It is therefore recommended that assessments for such UK branches are raised and tax brought into charge at as early a stage as possible.
Additionally, by EU Directive member states of the European Union are able to seek the assistance of another member state in the recovery of direct and indirect taxes (see the recovery guidance at REC1139).

### 38.3.4 *Separate personality*

Rule 2 s.835E(3) ITA provides for deemed separate personality:

*Rule 2*
The UK representative is treated in relation to the amount as a distinct and separate person from the non-UK resident (if the representative would not otherwise be so treated).

The SALF Manual provides:

**704 UK representatives of non-residents chargeable under Case I and II Schedule D** [February 2011]
*UK representative is treated as a separate person*
The UK representative and the non-resident are treated as separate

persons. This allows, for example, service of notices and collection to take place at the branch or agency/permanent establishment.

## 38.4 Partnerships

Rule 3 s.835E(3) ITA provides:

> *Rule 3*
> If the branch or agency is carried on by persons in partnership, the partnership, as such, is treated in relation to the amount as the UK representative of the non-UK resident.

Section 835F ITA provides:

> (1) Subsection (2) applies if a trade or profession carried on by a non-UK resident through a branch or agency in the United Kingdom is carried on by the non-UK resident in partnership.
> (2) The trade or profession carried on through the branch or agency is, for the purposes of section 835E and Chapter 2C, to be treated as including the notional trade or profession.
> (3) Subsection (4) applies (in addition to subsection (2) if that subsection also applies) if—
> (a) a trade or profession carried on by a non-UK resident in the United Kingdom is carried on by the non-UK resident in partnership, and
> (b) any member of the partnership is resident in the United Kingdom.
> (4) The notional trade or profession is, for the purposes of section 835E and Chapter 2C, to be treated as being a trade carried on in the United Kingdom through the partnership as such.
> (5) In this section "the notional trade or profession" means the notional trade from which the non-UK resident's share in the partnership's profits or losses is treated for the purposes of section 852 of ITTOIA 2005 as deriving.

The INT Manual provides:

> **268020 Who can be the non-resident's UK representative?** [April 2010]
> *Partnerships can be the UK representative of a non-resident*
> A partner in a partnership can be the UK representative of a non-resident. This will occur, for example, where a non-resident trades in the UK though the agency of a UK partnership (of which he or she is not a member). In such circumstances, the partners in the UK

partnership will be jointly liable, as UK representative, for the tax payable by the non-resident. This provision is at Section 126(5) FA 1995 for income tax and is implicit in Section 150 FA 2003 for corporation tax.

Where a business that is carried on by a partnership that includes non-resident partners is carried on in the UK through a permanent establishment/branch or agency, the permanent establishment/branch or agency is the UK representative of each non-resident partner. This provision is at Section 126(6) FA 1995 for income tax and is implicit in Section 150(2) FA 2003 for corporation tax.

Where a business is carried on in the UK by a partnership that includes both resident and non-resident partners, the partnership is treated as the UK representative of each non-resident partner. The partners are thus jointly liable for the tax payable by the non-resident partners on their shares of the partnership profit. This provision is at Section 126(7) FA 1995 for income tax and is implicit in Section 150 ICTA 1988 for corporation tax.

The SALF Manual provides:

**704 UK representatives of non-residents chargeable under Case I and II Schedule D** [February 2011]

*A partnership can be the UK representative of a non-resident*

A partner in a partnership can be the UK representative of a non-resident. This will occur, for example, where a non-resident trades in the UK though the agency of a UK partnership (of which he or she is not a member). In such circumstances, the partners in the UK partnership will be jointly liable, as UK representative, for the tax payable by the non-resident.

*Partnership, which includes non-resident partners, trading in the UK through a branch or agency/permanent establishment: the branch or agency/permanent establishment is treated as the UK representative of non-resident partners*

Where a business that is carried on by a partnership that includes non-resident partners is carried on in the UK through a branch or agency/permanent establishment, the branch or agency/permanent establishment is treated as the UK representative of each non-resident partner.

*Partnership trading in the UK which includes resident and non-resident members is treated as UK representative of non-resident partners*

Where a business is carried on in the UK by a partnership which includes both resident and non-resident partners, the partnership is treated as the UK representative of each non-resident partner. The partners are thus jointly liable for the tax payable by the non-resident partners on their shares of the partnership profit.

## 38.5 Agents not treated as UK representatives

Section 127(1) FA 1995 provides three exceptions which I call:
(1) "**the casual agent exemption**";
(2) "**the broker exemption**";
(3) "**the investment manager exemption**".
I consider the first of these here; for the IME and broker exemptions, see 39.1 (Investment manager exemptions).

## 38.6 Casual agent exemption

Section 835G ITA provides:

> (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an agent in the United Kingdom.
> (2) The agent is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) arising to the non-UK resident from—
> (a) so much of the non-UK resident's business as relates to disregarded transactions, or
> (b) property or rights which, as a result of disregarded transactions, are used by, or held by or for, the agent on behalf of the non-UK resident.
> (3) "Disregarded transactions" are transactions—
> (a) carried out through the agent in the United Kingdom, and
> (b) in respect of which the agent does not act in the course of carrying on a regular agency for the non-UK resident.

The INT Manual provides:

> **268020 Who can be the non-resident's UK representative?** [April 2010]
> Section 127(1) FA 1995 lists the persons who cannot be the UK representative for income tax and capital gains tax:
> 1) Agents who are not regular agents. In general if a non-resident is trading in the UK through an agent that agent should be regarded as a regular agent. This was considered in the cases of *Neilsen*

*Andersen & Co v Collins* and *Tarn v Scanlan* (13 TC 121–2) when Scrutton LJ considered "the contrast intended to be drawn is between casual employment, temporary employment, for a transaction or few transactions, and regular appointment of a permanent agent who is there as representing the foreigner". ...

The former ITH provided:

**942. NRs: accepting TMA 70 s.82 exemption: regular agency**
... casual agents are protected from assessment. As a general rule if there is UK source income and there is an agent we would want to assess the agent. A non-resident trading here through an agent will usually clearly do so through a regular agency.
It may be less clear whether an agent is a regular agent when he acts for his principal in only one transaction. This was the issue in the case of *Willson v Hooker* 67 TC 585. Acting for an Isle of Man company, Mr Willson instructed a firm of surveyors to bid for some land in the UK and instructed solicitors concerning the purchase and sale of the land. The Court said that a regular agency is any agency that is not a casual or occasional agency and that it was impossible to regard Mr Willson as a casual or occasional agent. He was the person through whom all the transactions of the company in the UK were carried out in the relevant period and so did not enjoy protection.

CT does not need the same exemption, as a casual agent is not within the concept of PE.

## 38.7 Subsidiary points

### 38.7.1 *HMRC procedures*

The INT Manual para provides:

**268040 What assessments should be raised and how is that done?** [April 2010]
As already explained above (INTM268030)) both the non-resident and their UK representative have a personal responsibility for the tax obligations and liabilities arising from the UK permanent establishment/branch or agency. Either party is able to discharge those obligations and liabilities. So we can assess either or both parties if necessary. Once one party has paid the personal responsibility on the other party lapses for that self assessment period. Obviously in cases where self assessments are returned by or for a non-resident taxpayer and tax payments are

made at the appropriate times no further action would be needed. This guidance concerns the practicalities of how to handle cases where obligations and liabilities are not met.

Because the UK representative is personally responsible for the non-residents tax obligations and liabilities, a unique tax reference should be allocated to the UK representative in that capacity. Where the UK representative is an agent (rather than a branch or fixed place of business permanent establishment) that unique tax reference should be a distinct and different reference to the one allocated to the agent for their own business. Non-resident companies intending to set up places of business in the UK are obliged to notify Companies House (see **Self assessment** at INTM261000). The consequential process in place automatically generates tax references and allocates them to the office responsible for the UK registered office address. Where that process has not happened, or for non-corporates, a taxpayer record with unique tax reference will need to be created on notification or discovery of liability.

The High Court held in the case of *Tischler v Apthorpe* [2 TC 89] that a non-resident could be assessed directly "wherever he could be reached" including the UK branch address. The decision in that case was that an assessment raised directly on the non-resident at the UK branch address was valid, even though there was also a UK representative who could have been assessed under the machinery provisions (the TMA 1970 version *see* INTM268010). It is probably unusual for a non-resident to have both a physical UK branch and an appointed UK agent but the reasoning in that case supports the equal validity of assessments made on the non-resident either directly at their UK branch or at the overseas address. In that case, of course, the UK agent could not be responsible for the tax assessed as he had not been notified.

So, on a practical level, assessments should be addressed in the manner most suited to the facts of the case and with the object of informing the relevant persons of the liability and securing the necessary payment of tax. Depending upon how near to expiry the assessing time limits are this could include any but possibly all of the following:

Assessment for a branch or fixed place of business in the UK
Assessment for UK trade carried out through an agent
Partners and partnerships
Recovery action

*Assessment for a branch or fixed place of business in the UK*

- Assess in the name of the non-resident individual or company at the UK business address.
- Send a copy also, for information, to the non-resident's address abroad if known.
- Assess any person who clearly has the capacity of "UK representative" e.g. the manager of the UK operations, as "Mr X as UK representative of XYZ".

*Assessment for UK trade carried out through an agent*

- Assess in the form "Mr X as agent for XYZ" sent to the agent's address.
- Send a copy of the assessment on the agent, for information, to the non-resident at their address abroad if known.
- Assess the non-resident individual or company at their address abroad if

known.

*Partners and partnerships*

Where the UK representative is a UK partnership the partnership itself is the UK representative. In such circumstances the partners in the UK partnership will be jointly liable for the tax payable by the non-resident. It follows that any assessment that is required should be made on the partnership as agent for the non-resident. Where a non-resident is a partner in a partnership which trades in the UK directly, typically through a UK branch or fixed place of business, the form of assessment depends on whether there is a partner resident in the UK. If there is a UK resident partner the assessment should be made on the partnership as a whole but the UK resident partner will be jointly liable for the tax payable by the entire partnership. Where there is no UK resident partner then assessments on the branch profits of the non-resident partners should be made on the UK branch of the partnership.

The SALF Manual provides:

**704 UK representatives of non-residents chargeable under Case I and II Schedule D** [February 2011]

*General rule for the obligations and liabilities of UK representatives*

The general rule is that UK representatives are jointly responsible with the non-resident for all the tax obligations and liabilities in relation to the trade, profession or vocation carried on through the branch or agency/permanent establishment.

This joint responsibility extends to all matters relating to the assessment of tax and to the collection and recovery of tax. For example, it extends to all the mechanisms of self assessment, including notification of chargeability, the obligation to make a tax return and self assessment, liability to make interim and final payments of tax, and liability to surcharges, interest and penalties in connection with those obligations and liabilities.

Either party is able to discharge the obligations and liabilities arising, but equally any acts or omissions of the non-resident are treated as acts or omissions of the UK representative (but see also the first two paragraphs under Offences below in relation to tax offences).

Where the trigger for an obligation or liability is the receipt of formal notification, then the obligation or liability only falls on the UK representative once they have received the relevant notification (or a copy).

### 38.7.2 *Notices and information*

Section 835V ITA provides:

(1) An obligation or liability attaching to a non-UK resident ("X") by reason of a notice or other document having been given or served on X does not also attach to the UK representative of X by virtue of section 835U unless the notice or other document (or a copy of it) has been given to or served on the representative.
(2) An obligation or liability attaching to X by reason of a request or demand having been received by X does not also attach to the UK representative of X by virtue of section 835U unless the representative has been notified of the request or demand.
(3) Subsection (4) applies to obligations relating to the provision of information that are imposed on the UK representative of X by section 835U in a case where the representative is X's independent agent.
(4) The obligations do not require the UK representative to do anything except so far as it is practicable for the representative to do so.
(5) For this purpose, the representative must act to the best of the representative's knowledge and belief after taking all reasonable steps to obtain the necessary information.
(6) An obligation of X to provide information is not discharged by virtue of section 835U in a case where the UK representative of X has discharged the obligation only so far as required by subsection (4) of this section.
(7) X is not bound by virtue of section 835U by mistakes in information provided by the UK representative of X in discharging, so far as required under subsection (4) of this section, an obligation imposed on the representative by section 835U unless—
(a) the mistake is the result of an act or omission of X, or
(b) the mistake is one to which X consented or in which X connived.
(8) In this section "information" includes anything contained in a return, self-assessment, account, statement or report required to be provided to the Commissioners for Her Majesty's Revenue and Customs or to any officer of Revenue and Customs.

The SALF Manual provides:

**704 UK representatives of non-residents chargeable under Case I and II Schedule D** [February 2011]
*Obligations and liabilities are limited where the UK representative is independent of the non-resident*
Paragraphs 4 and 7 Schedule 23 FA 1995 & Section 148(3) and Section 150(5) FA 2003
Where the UK representative is an independent agent of the non-resident acting in the ordinary course of business, its obligations to

provide information are limited to ones within its competence to act for the non-resident.

'Independent agent' is defined at Paragraph 7 Schedule 23 FA 1995. The definition is based on that used in the OECD Model Tax Convention and UK double taxation agreements. Broadly, to be an 'independent agent', the agent must be both legally and economically independent of the non-resident. As an independent agent is not within the definition of permanent establishment for corporation tax purposes such an agent could not become the UK representative of a non-resident company.

The rules recognise that, where the UK representative is an independent agent, the agent may not be able to provide complete information about the affairs of the non-resident. The agent is therefore required to provide any information requested, for example a return, to the best of its knowledge and belief after taking all reasonable steps to obtain the information. The non-resident remains responsible for completing or correcting the information where necessary.

However, the non-resident can correct any error or omission made by the UK representative provided the non-resident did not know about it or participate in it.

### 38.7.3 *Criminal offences and penalties*

Section 835W ITA provides:

(1) A person is not by virtue of section 835U liable to be proceeded against for a criminal offence unless the person— (a) committed the offence, or (b) consented to or connived in its commission.

(2) An independent agent of a non-UK resident is not by virtue of section 835U liable to any civil penalty or surcharge in respect of an act or omission if conditions A and B are met.

(3) Condition A is that the act or omission is not—

(a) an act or omission of the independent agent, or

(b) an act or omission to which the agent consented or in which the agent connived.

(4) Condition B is that the independent agent is able to show that the amount of the penalty or surcharge will not be recoverable out of the sums mentioned in section 835X(3) (after being indemnified for any other liabilities under section 835X).

The SALF Manual provides:

**704 UK representatives of non-residents chargeable under Case I and II Schedule D** [February 2011]
*Offences*
Paragraph 5 Schedule 23 FA 1995 & Section 150(6) FA 2003
The criminal and civil liabilities of a UK representative in respect of the non- resident's tax affairs are limited in certain circumstances.
UK representatives cannot be guilty of a criminal offence under these rules as a result of something done by the non-resident unless:
- they committed the offence
- consented to its commission, or
- connived in its commission.

The same applies for the non-resident in relation to the acts of the UK representative.
UK representatives who are independent agents are not liable to civil penalties and surcharges unless:
- they committed an act or omission or consented to, or connived in, its commission, or
- they will be able to recover the penalty out of monies of the non-resident.

### 38.7.4 *Indemnities*

Section 835X ITA provides:

> (1) An independent agent of a non-UK resident is entitled to be indemnified for the amount of any liability of the non-UK resident which the agent has discharged by virtue of section 835U.
> (2) An independent agent of a non-UK resident is entitled to retain, from the sums mentioned in subsection (3), amounts sufficient to meet any liabilities which by virtue of section 835U the agent has discharged or to which the agent is subject.
> (3) The sums are those which—
> (a) (ignoring subsection (2)) are due from the independent agent to the non-UK resident, or
> (b) are received by the independent agent on behalf of the non- UK resident.

## 38.8 Significance and meaning of "independent agent"

An "independent agent" has three advantages:
(1) Lower information requirements; see 38.7.2 (Notices and information)

(2) Lower liabilities for penalties: see 38.7.3 (Criminal offences and penalties)
(3) A right to an indemnity: see 38.7.4 (Indemnities)

Section 835Y ITA provides the definition:

> (1) In this Chapter "independent agent", in relation to a non-UK resident ("X"), means a person who is the UK representative of X in respect of any agency in which the person is acting on behalf of X in an independent capacity.
> (2) For this purpose a person does not act in an independent capacity on behalf of X unless the relationship between them, having regard to its characteristics, is a relationship between persons carrying on independent businesses dealing with each other at arm's length.

This is based on the definition in the IME rules; see 39.6.2 (Investment manager condition C: independent relationship) and 74.5 (Independent agent).

CHAPTER THIRTY NINE

# INVESTMENT MANAGER EXEMPTIONS

## 39.1 Investment manager exemptions - Introduction

This chapter considers three related exemptions where investment managers or brokers act for non-resident clients.

In order to understand the exemptions, it is helpful first to note the tax issues which a non-resident would face (in the absence of relief) if it carried on a trade in the UK through a UK investment manager. It is necessary to consider separately (1) a non-resident company and (2) a non-resident individual or trust.

In the absence of these exemptions, if a non-resident *company* carried on a trade in the UK through a UK investment manager, the non-resident company would face a UK tax charge arising from the fact that it might be trading in the UK through a PE (ie the investment manager might be an agency PE). If so:

(1) The non-resident company would be subject to corporation tax on its profits.

(2) The investment manager would be a "UK representative" and that tax would be collected from it.

Similarly, in the absence of these exemptions, if a non-resident *individual or trust* carried on a trade in the UK through a UK investment manager, the non-resident would face UK tax difficulties arising from the fact that it might be trading in the UK through a branch or agency (ie the investment manager might be a branch or agency). If so:

(1) The non-resident individual or trust would be subject to income tax and CGT on its profits.

(2) The investment manager would be a "UK representative" and that tax would be collected from it.

Alternatively the position might be that the investment manager was not a branch or agency or PE of the non-resident, but nevertheless the non-resident was trading in the UK. In that case (whether a company or an individual or trust) it would in principle[1] be subject to income tax on its trading profits.

Clearly, if there were no relief, non-residents would not use UK investment managers (at least if there were any risk that their activities might be characterised as trading). The investment management exemptions override these tax charges. Assuming the various requirements are met the exemptions are as follows:

(1) An investment manager is not a permanent establishment of a non-resident company. The main significance of this is:
  (a) to disapply the corporation tax charge which applies when a non-resident company trades through a UK PE.[2]
  (a) to disapply the provisions allowing collection of tax from a PE (as its "UK representative").[3]

  This exemption is set out in ss.1145-1151 CTA 2010. I refer to this as **"IME PE relief"**.

(2) An investment manager is not a UK representative for IT and CGT. The main significance of this is to disapply the rules allowing the collection of IT/CGT from UK representatives of non-residents.[4] This exemption is set out in chapter 2B part 14 ITA and chapter 7A TCGA. I refer to this as "**IME UK representative relief".**

(3) UK source income generated through investment managers is one of the classes of income which qualifies for non-residents IT relief. This exemption is part of the code of non-residents IT relief set out in Chapter 1 Part 14 ITA.[5] I refer to this as "**IME non-residents IT relief**".

I refer to the exemptions together as "**the investment manager exemptions"** abbreviated to "**IME**". (References to investment managers in this label include brokers.) The term used in the HMRC manuals is "investment management exemption", in the singular. There are however best regarded as three separate (though linked) exemptions.

The rules are written out *four* times in four different places. The rules for brokers are similar to investment managers, but are set out separately

1 In practice a DTA would often provide relief.
2 See 74.1 (Why does permanent establishment matter?)
3 See 38.2 (Collection of tax from UK representatives).
4 See 38.2 (Collection of tax from UK representatives).
5 See 37.1 (Non-residents IT relief).

each time, so there are eight sets of rules. This does make a coherent exposition rather difficult. Where the rules repeat or overlap, I set out the text of IME non-residents IT relief, giving the equivalents of the other rules in the footnotes only, unless there are material differences.

SP 1/01 explains the policy considerations behind the investment management exemptions:

> 1. There are two policy objectives underlying the tax treatment of UK resident investment managers and their overseas clients. These objectives are that overseas investors should not be charged to UK tax in relation to investment transactions conducted on their behalf and that any fees earned by a UK resident investment manager for services performed for the non-resident should be fully chargeable to UK tax.
> 2. The UK tax system seeks to achieve these objectives by granting what is termed the Investment Manager Exemption. The exemption enables non-residents to appoint UK-based investment managers without the risk of UK taxation and is one of the key components of the UK's continuing attraction for investment managers. HMRC is committed to maintaining this environment by improving the exemption to meet developments in the investment management industry through providing greater flexibility and better explanations for investment managers and expanding the scope of exempt activities.

Other countries take the same view:

> The highly mobile nature of the funds management business suggests that income from portfolio foreign investments flowing to non resident investors should not be taxed in Australia. Even modest amounts of Australian tax on these investors is likely to impede the growth of this business. Only the income of the Australian funds manager should be subject to Australian tax.[6]

## 39.2 IME PE relief

I discuss IME PE relief in this chapter, though to see the topic in the round one needs to be familiar with the definition of PE, for which see 74.2

6 This view is expressed in "A Platform for Consultation" (Australia) para 30.61 December 2010 accessible *www.rbt.treasury.gov.au/publications/paper3/index.htm*.

(Meaning(s) of "permanent establishment").

SP 1/01 explains:

> 10. The Investment Manager Exemption legislation now only has relevance for corporation tax by providing greater clarity about what constitutes independence of investment managers in relation to the non-residents for which they act.

Section 1142 CTA 2010 provides:

> (1) A company is not regarded as having a permanent establishment in a territory by reason of the fact that it carries on business there through an agent of independent status acting in the ordinary course of the agent's business.
> (2) Sections 1145 to 1151 apply for the purpose of supplementing subsection (1) in relation to transactions carried out on behalf of a non-UK resident company by a person in the United Kingdom acting as—
> (a) a broker (section 1145),
> (b) an investment manager (sections 1146 to 1150)...

Section 1145 CTA 2010 provides the relief for a broker:

> (1) This section applies if a transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the United Kingdom acting as a broker.
> (2) In relation to the transaction, the broker is regarded for the purposes of section 1142(1) as an agent of independent status acting in the ordinary course of the broker's business if (and only if) each of conditions A to D is met. ...

Section 1146 CTA 2010 provides the relief for an investment manager:

> (1) This section applies if an investment transaction is carried out on behalf of a non-UK resident company in the course of the company's trade by a person in the United Kingdom acting as an investment manager.
> (2) In relation to the investment transaction, the investment manager is regarded for the purposes of section 1142(1) as an agent of independent status acting in the ordinary course of the investment manager's business if (and only if) each of conditions A to E is met ("the independent

> investment manager conditions"). ...

If a broker/IM does not qualify for the broker/IM exemption then it is deemed to be not an agent of independent status, so it is deemed to be a domestic law PE. The broker might however still be an agent of independent status in which case it is not an OECD PE, so treaty relief might apply.

## 39.3 IME non-residents IT relief

I discuss the IME aspects of non-residents IT relief in this chapter, though to follow it one needs to be familiar with the background rules of non-residents IT relief, for which see 37.1 (Non-residents income tax relief).
SP 1/01 explains:

> 10. ... For income tax [the investment manager exemption] raises the threshold for chargeability so that the same criteria apply when there is no treaty protection in the form of a permanent establishment article.[7]

For individuals and trustees, non-residents IT relief applies to "disregarded income".[8] This term includes "disregarded transaction income". This is where the IME non-residents IT relief comes into play. For individuals and trusts, s.814(1)(2) ITA provides relief for a broker:

> (1) Subsection (2) applies if a non-UK resident carries on (alone or in partnership) a business through a broker in the UK.
> (2) Income is "disregarded transaction income", subject to subsection (6), if—
> (a) it is transaction income, and
> (b) the independent broker conditions are met in relation to the transaction in question.

For individuals and trusts, s.814(3)(4) ITA provides relief for an investment manager:

7 That is, the IME provides the same relief as article 7 OECD Model Treaty: "The profits of an enterprise carried on by a resident of a Contracting State shall be taxable only in that State unless the enterprise carries on business in the other Contracting State through a permanent establishment situated therein."

8 See 37.6 (Disregarded income).

> (3) Subsection (4) applies if a non-UK resident carries on (alone or in partnership) a business through an investment manager in the UK.
> (4) Income is "disregarded transaction income", subject to subsection (6), if—
> (a) it is transaction income, and
> (b) the independent investment manager conditions are met in relation to the transaction in question.

For non-resident companies the drafting is similar and the result is the same. Non-residents IT relief applies to "disregarded company income". Section 816 ITA provides:

> (1) For the purposes of this Chapter income arising to a non-UK resident company is "disregarded company income" if it is ...
> (c) income arising from a transaction carried out through a broker in the United Kingdom acting as an agent of independent status in the ordinary course of the broker's business,
> (d) income arising from a transaction carried out through an investment manager in the United Kingdom acting as an agent of independent status in the ordinary course of the investment manager's business,
> ...

## 39.4 IME UK representative relief

I discuss IME UK representative relief in this chapter, though to see it in the round one needs to be familiar with the UK representative rules, for which see 38.2 (Collection of tax from UK representative).

Section 835H ITA provides relief for brokers:

> (1) This section applies if a non-UK resident carries on (alone or in partnership) a business through a broker in the United Kingdom.
> (2) The broker is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
> (a) the amount is transaction income in relation to a transaction carried out through the broker in the United Kingdom on behalf of the non-UK resident, and
> (b) the independent broker conditions are met in relation to the transaction (see section 835L).

Section 835I ITA provides relief for investment managers:

(1) This section applies if a non-UK resident carries on (alone or in partnership) a business through an investment manager in the United Kingdom.
(2) The investment manager is not the UK representative of the non-UK resident in relation to an amount within section 835E(2) if—
(a) the amount is transaction income in relation to an investment transaction carried out through the investment manager in the United Kingdom on behalf of the non-UK resident, and
(b) the independent investment manager conditions are met in relation to the investment transaction (see section 835M).

## 39.5 Defined terms in IME legislation

### 39.5.1 *"Investment manager"*

Section 827(1) ITA provides a commonsense definition:

In this Chapter "investment manager" means a person who provides investment management services.

### 39.5.2 *"Broker"*

There is no statutory definition. The former ITH provided:

**926. NRs: Machinery of assessment: commodity markets: broker**
A few words are called for about an important market operator, the broker. London has been a great market for centuries. Until a few decades ago vast amounts of produce were landed in, or trans-shipped in London docks and it was here and in other ports that the markets grew. They are run by Trade Associations which lay down rules designed to secure a fair, orderly and open market; to provide for membership, and to consider things like rates of brokerage. The actual constitution of the different markets varies but one would normally find as members some big producers, some major users, both of whom may have a seat in the market ring, the place of business. But the central character is the broker. A broker is a negotiator for commission, who will sell or buy for clients. Brokers have a long history, but, in modern usage, Bowstead, the writer of the standard work on agency, describes the broker in this way–

"A broker is an agent whose ordinary course of business is to negotiate and make contracts for the sale and purchase of goods and other property of which he is not entrusted with the possession or control."

Payne, a writer on British Commercial Institutions, says this of an import broker–

"The function of a broker is to bring two parties together for the purpose of

> concluding a contract. Brokers are generally produce brokers with whose aid very large transactions take place at the chief importing ports. They are often specialists who, through long experience of markets ... are able to buy and sell to better advantage than could the general import merchant ... he (the broker) is not associated with the physical movement of the goods, nor with clearing them through Customs. After selling a consignment by auction, or by private treaty, the broker is paid a commission or fee (brokerage) which, with the other expenses of sale is deducted from the gross selling price."

Brokers are thus associated with the great commodity markets and exchanges, professional negotiators who will act for buyers and sellers and have nothing to do with the work-a-day business of handling or insuring the goods. They constitute an essential link in the market mechanism, in making the function of the market-place in determining price, available to their clients. Another odd quality of brokers is that the same broker can, by the custom of certain markets, act both for buyer and seller.

This means in practice that if A has asked a broker to sell something and B has asked the same broker to buy the same thing, the broker can match the two. The market rules would require that the broker does this business in the open (so that any other broker can step in if he wishes) and that preserves the idea of open market dealing and the natural protection which it gives to buyer and seller. Although the broker has acted for both parties the open nature of the market mechanism ensures that the price is a fair market price. ...

**939 NRs: when to accept the TMA 70 s.82 broker exemption - General**

Brokers and general commission agents take a very limited part in the marketing process. They are there to make the advantages of the market-place available to their clients. Whatever the terms mean, we do not accept as a broker or as a general commission agent a man who does everything the client himself would do in running the business were he himself here to do it, even if the agent acts for more than one client. Both expressions are primarily to do with commodity markets and that is what they were really intended for.

But over the years the application of the broker and general commission agent exemption has been extended. Stockbrokers, for example, will generally fall within Section 82(1) [TMA].[9] We have certainly accepted that there can be general commission agents and brokers in the field of shipping and that the exemption is sometimes appropriate. In insurance, on the other hand, we resist the suggestion that an underwriting agent can be a general commission agent. Insurance brokers will not normally be carrying on a non-resident's trade. If it seems that they do then they will arguably be acting in the capacity of underwriting agents and we would deny the exemption. If, in Districts, there are cases outside the usual commodity markets, where exemption under Section 82(1) appears to have been given but this treatment has not definitely and fairly recently, say within the last twenty years, been approved or condoned by

9 Section 82 (now repealed) provided: "Nothing in this Part of this Act shall render a non-resident person chargeable in the name of a broker ...In this subsection, 'broker' includes a general commission agent."

International Division, it would be sensible to consider asking for advice on the next convenient occasion.

### 39.5.3 *"Transaction income"*

Section 814(5) ITA provides the definition:

> In this Chapter "transaction income", in relation to a transaction carried out through a broker or investment manager in the UK on behalf of a non-UK resident, means income which arises to the non-UK resident from—
> (a) so much of the non-UK resident's business carried on (alone or in partnership) through the broker or investment manager as relates to the transaction, or
> (b) property or rights which, as a result of the transaction, are used by, or held by or for, the broker or investment manager on behalf of the non-UK resident.

### 39.5.4 *"Investment transaction"*

Section 827 ITA provides the definition:

> (2) In this section "investment transaction" means any transaction of a description specified for the purposes of this section in regulations made by HMRC.
> (3) Provision made in regulations under subsection (2) may, in particular, have effect in relation to the tax year current on the day on which the regulations are made.

The regulations are the Investment Manager (Specified Transactions) Regulations 2009. This is six pages long, so a full discussion would be a lengthy affair.

The label "investment transaction" is not strictly appropriate because the transaction will be a *trading* transaction and the so-called investment will be trading stock.

## 39.6 Investment manager conditions

Section 818(1) ITA provides:

> The independent investment manager conditions are met in relation to an investment transaction carried out on behalf of a non-UK resident by an investment manager in the UK if conditions A to E are met.

I refer to these as “**investment manager conditions A to E**”.

### 39.6.1 *Investment manager conditions A and B*: *investment manager*

Section 818 ITA provides:

> (2) Condition A is that at the time of the transaction the investment manager is carrying on a business of providing investment management services.
> (3) Condition B is that the transaction is carried out in the ordinary course of that business.

These are the equivalent of broker conditions A and B.

### 39.6.2 *Investment manager condition C: independent relationship*

Section 818(4) ITA provides:

> Condition C is that, when the investment manager acts on behalf of the non-UK resident in relation to the transaction, the relationship between them, having regard to its legal, financial and commercial characteristics, is a relationship between persons carrying on independent businesses dealing with each other at arm’s length.

The requirement is equivalent to the rule that an independent agent is not a PE. The reference to “legal financial and commercial characteristics” is draw from the INTM’s explanation of the PE rule and SP 1/01. So guidance on what is an independent agent for PE is relevant here.[10]
SP 1/01 provides:

> 35. The manager must act for the non-resident in an independent capacity. This means ascertaining whether, having regard to its legal, financial and commercial characteristics, the relationship between the manager and the non-resident is a

10 See 74.5 (Independent agent).

> relationship between persons carrying on independent businesses that deal with each other on arm's length terms.

This is imprecise, so the SP offers a bright line test which may offer a safe harbour for collective funds.[11] If this test is satisfied one is back to the

---

11 36. The relationship will be considered to be independent if the non-resident has the following characteristics:
(a) the non-resident is a widely held collective fund or, if not,
(b) the non-resident is not a widely held collective fund but is either being actively marketed with the intention that it become one or is being wound up or dissolved.
37. A fund will be regarded as widely held if either no majority interest in the fund is ultimately held by five or fewer persons and persons connected with them, or no interest of more than 20% is held by a single person and persons connected with that person. The fund may need to establish a track record before new investors are obtained and will therefore have 18 months from the commencement of trading in the UK to meet the widely held test. Where investment management services are provided to a collective investment scheme constituted as a partnership, participants in the scheme will not be regarded as connected persons for this purpose if their only connection is membership of the partnership. This means that if the investment manager is a partner in the fund it will not be treated as connected with the other partners in the fund for the purpose only of the Independent Capacity Test, although there may still otherwise be connection under s 839 TA 1988/s 993 ITA 2007 between the participants, for example as partners in another capacity.
38. Actively marketed means there must be evidence of ongoing genuine attempts to obtain third party investment into the fund in order to meet the widely held test and that the terms on which interests in the fund are offered are not prohibitive or discriminatory for that class of business.
39. If the fund has one of the above two characteristics the independent capacity test will be met without the need to refer to any other factors.
40. In other cases the independent capacity test will be met:
(a) where the provision of services to the non-resident and persons connected with the non-resident is not a substantial part of the investment management business. Where that part does not exceed 70% of the investment manager's business, either by reference to fees or to some other measure (where that would be more appropriate), it will not be regarded as substantial. Further, if in the first 18 months from the start of a new investment management business the services provided to the non-resident exceed 70% of the business, they will not be treated as a substantial part of the business provided that they are consistently below 70% in subsequent periods.
(b) where the provision of services to the non-resident represents more than 70% of the investment manager's business 18 months after the start of a new investment management business but that was for reasons outside the manager's control and the manager had taken all reasonable steps to bring it below 70%. The investment manager will be expected to provide all relevant information to support a contention that the services are a substantial part of the manager's business for reasons beyond

vagueness of the law:

> 41. If none of the above tests are satisfied HMRC will have regard to the overall circumstances of the relationship between the non-resident and the investment manager in determining whether they are carrying on independent businesses that deal with each other on arm's length terms. It is not possible to describe every scenario in which the relationship may still meet this test but the guidance in this Statement of Practice should provide certainty to the vast majority of non-residents trading in the UK through an investment manager and HMRC will also continue to provide advice for any other circumstances.
> 42. Some funds adopt a master/feeder structure. Where the investment manager manages an opaque master fund, eg a company, which has feeder funds then the independence test will be applied as if the master fund were transparent by looking at the beneficial ownership of each feeder fund to determine whether the master fund is independent.
> 43. Similarly, if the investment manager acts for one or more sub-funds owned by an umbrella fund it is the beneficial ownership of the latter that will determine whether the independence test is met.
> 44. It should be noted that a subsidiary may be considered independent of its parent company for the purposes of the test, notwithstanding the parent's ownership of the share capital.

### 39.6.3 *Investment manager condition D: 20% rule*

Section 818(5) ITA provides:

> Condition D is that the requirements of the 20% rule are met (see s.819).[12]

### 39.6.4 *Investment manager condition E: customary remuneration*

Section 818 ITA(6) provides:

> Condition E is that the remuneration which the investment manager receives in respect of the transaction for the provision of investment management services to the non-UK resident is not less than is customary for that class of business.

---

the manager's control and to demonstrate what steps have been taken to rectify that position.

12 See 39.7 (The 20% rule).

This is the equivalent of broker condition C. It overlaps with investment manager condition C since an arm's length relationship would normally involve customary remuneration.

SP 1/01 explains the meaning of "customary remuneration":

> 60. The UK investment manager must receive remuneration at a rate that is not less than customary for the services. The legislation does not define what is "customary" nor does it specify from whom remuneration must be received although, as already explained, HMRC will not regard a UK investment manager as acting in an independent capacity on behalf of the non-resident unless the relationship between them is that of persons carrying on independent businesses and dealing with each other at arm's length.
> 61. HMRC will be guided by the OECD Transfer Pricing Guidelines for Multinational Enterprises and Tax Administrations when determining whether a pricing structure applies the customary rate and will look at whether the net effect of any provision made or imposed by means of a transaction or series of transactions provides the UK investment manager with a level of remuneration which would have been achieved at arm's length. All circumstances will be taken into consideration, including whether that remuneration has been reduced below the arm's length rate in any way either before or after payment to the UK investment manager.
> 62. HMRC recognises that remuneration structures through which the non-resident pays fees in a particular class of investment management take numerous forms, with variations including, for example, investment terms intended to attract certain investors or to "lock in" an investment. The arm's length definition of customary rate for the independent investment manager means that such arrangements between unconnected parties would not jeopardise this test. Transactions made at arm's length may include directly or indirectly reduced or rebated fees for unconnected investors in the non-resident[.] Similarly, rebated, reduced or zero fee arrangements which are made between the manager and the unconnected non-resident for genuine commercial reasons, such as where the manager is receiving a separate fee in respect of the assets in which the non-resident is investing, would be regarded as transactions made at arm's length.
> 63. In determining whether remuneration has been reduced below the arm's length rate in any way HMRC will consider both the remuneration received by the UK investment manager and any amounts payable to any person:
> – for services provided to the non-resident, or
> – in connection with the non-resident, or
> – that relate to the performance of the non-resident.
>
> These amounts, which may be payable by either the non-resident or the UK investment manager, will be treated as reducing the remuneration received in the UK below the customary rate unless they can be shown to be at an arm's length rate.
> 64. HMRC consider that in order to meet the customary rate test fees payable to

a UK investment manager should be recognised for UK tax purposes when earned. A cash payment may be deferred or reinvested in the fund but this should not affect the recognition of the fee income. As a result, the UK manager would pay tax on the fee for the period when earned and no difficulty with the customary rate test is envisaged in these circumstances. If cash settlement of management fees is deferred the manager may have effectively made a loan to, or investment in, the non-resident, as a result of which the return on that loan or investment would be attributable to the manager and may need to be taken into account for the 20% test.

Paras 64 onwards do not stand up to much examination.

65. Where a UK investment manager, a partner, director or employee of that manager, or a person connected with any of these, acquires a security or an interest of some other kind, in the non-resident or in another entity, for services provided by the manager:

– to the non-resident, or
– in connection with the non-resident,

the customary rate test will only be met if it can be shown that the manager or partner brings the security or other interest into charge to UK tax at its market value or, in the case of a director or employee, that the security or other interest is taxed as employment income in accordance with Part 7 ITEPA 2003. The definition of "security" here will be that found in s420 ITEPA 2003. An interest is intended to apply to an interest in a security or securities and any other interest not within the s420 ITEPA definition.

66. Where an option is brought into UK tax charge at full market value at the time it is exercised HMRC will not regard this remuneration as less than the arm's length rate for the purposes of the customary rate test.

67. Preferential investment terms involving reduced or rebated fees for directors or staff of the investment manager may be a benefit provided by reason of employment and thus may give rise to an employee income tax charge under ITEPA 2003. Similarly, where the investment manager is a partnership, preferential fee terms may be offered to partners who acquire interests in the non-resident, in which case the ensuing personal tax consequences will apply. HMRC will not ordinarily regard these terms as reducing the investment manager's fees for services below the arm's length amount unless significant UK tax avoidance or evasion is suspected, in which case all the facts and circumstances will be considered to determine whether the rate of remuneration is below the arm's length amount.

68. The vast majority of non-residents easily meet the customary rate test. However, HMRC has occasionally encountered structures in which offshore arrangements have been used to evade or avoid UK tax. Commonly, such structures involve arrangements whereby fees charged to the non-resident are diverted to an offshore vehicle at a non-arm's length rate. Such arrangements

represent an abuse of the exemption, place compliant[13] UK managers at a competitive disadvantage and may result in a non-resident failing to meet the terms of the exemption unless remedial action is taken.

The SP then turns to consider what evidence may be required:

69. HMRC has published guidance in its International Manual on what documentation and evidence is required to demonstrate an "arm's length" reward. At the time of publication of this Statement that guidance appears at INTM433030 of the Manual which can be found at http://www.hmrc.gov.uk/manuals/intmanual/index.htm and it is advisable to check that the most up to date advice is being followed.
70. The legislation considers the obligations and liabilities of the non-resident and whether the non-resident is exempt from UK tax on its UK trading profits. A non-resident may be a taxable person and in considering whether that is the case, and whether the UK agent has been rewarded with an arm's length rate, it may be appropriate in some circumstances for HMRC to ask for information such as statutory financial statements of the non-resident and its agents and a full and factual functional analysis of all services provided to the non-resident.
71. In circumstances where such information is requested to ascertain whether the remuneration has been at the customary rate HMRC would normally ask the UK investment manager, but in some circumstances may ask the non-resident, to provide such information as may reasonably be considered necessary. The information powers available to HMRC would include those relevant to the tax liabilities of the non-resident but where reasonable cooperation is provided by the UK investment manager and/or, where appropriate, the non-resident it is intended that a reasonable opportunity will be given to supply the information voluntarily before the use of information powers is considered.
72. Where appropriate documentation, including a factual functional analysis and an acceptable transfer pricing methodology, is in place to support a tax return, the investment manager will have an opportunity to agree an adjustment to the return to meet the customary rate test or for any other reason, or to have adjustments determined through litigation where such an agreement has not been reached, without the non-resident having thereby failed the customary rate test.
73. However, where the investment manager does not have the appropriate

13 A note on terminology. The word "compliant" has now become an essentially contested concept, that is, it admits of two distinct conceptions that are a battleground for profound substantive disagreements. HMRC use the term to mean those who comply with the legal rules of taxation *and* a more insubstantial spirit of the legislation (of which one suspects HMRC consider themselves the final arbiter). This was a novel linguistic turn in 2001 and most practitioners would regard "compliant" as apt to describe everyone who comply with the legal requirements of taxation. Contrast the two views of the taxpayer/HMRC relationship discussed in 67.7 (Above-minimum disclosure for sake of good relations with HMRC).

documentation and methodology in place at the time of making a return and the remuneration for that period is less than the arm's length rate, it is possible that the customary rate test has not been met. HMRC would expect the non-resident and the investment manager to ensure that adequate measures are taken to prevent the fund or its investors being exposed to UK tax and will give reasonable notice of possible action, and the reasons for it, to both the non-resident and its agents if it discovers any circumstances in which the non-resident may not have met the Investment Manager Exemption tests.

74. Each case will be considered on its own facts and it is possible that appropriate corrective action through adjustment to the customary rate will still enable the test to be met. It is not possible to describe every scenario but this general approach is intended to provide certainty on what the legislation requires and to reassure non-residents that a disproportionate outcome will not arise from a corrected failure to meet the test.

## 39.7 The 20% rule

Section 819(1) ITA provides:

> The requirements of the 20% rule are met if conditions A and B are met.

I refer to these as "**20% rule conditions A and B**".

> (2) Condition A is that in relation to a qualifying period[14] it has been or is the intention of the investment manager and the persons connected with the investment manager that at least 80% of the non-UK resident's relevant disregarded income[15] should consist of amounts to which none

14 Section 820 ITA provides:

"(1) This section applies for the purposes of this Chapter.

(2) If section 819 applies for the purposes of section 813, a "qualifying period" means—

(a) the tax year in which the transaction income is chargeable to income tax, or

(b) a period of not more than 5 years comprising two or more tax years including that one.

(3) If section 819 applies for the purposes of section 816, a "qualifying period" means—

(a) the accounting period of the non-UK resident company in which the transaction in question is carried out, or

(b) a period of not more than 5 years comprising two or more complete accounting periods including that one."

15 Section 821 ITA provides:

"(1) This section applies for the purposes of this Chapter.

(2) If section 819 applies for the purposes of section 813, the "relevant disregarded

of them has a beneficial entitlement.
(3) Condition B is that, so far as there is a failure to fulfil that intention, that failure—
(a) is attributable (directly or indirectly) to matters outside the control of the investment manager and persons connected with the investment manager, and
(b) does not result from a failure by any of them to take such steps as may be reasonable for mitigating the effect of those matters in relation to the fulfilment of that intention.

### 39.7.1 *Beneficial entitlement*

Section 822(1) ITA provides:

> This section applies for the purposes of this Chapter.

In fact the expression "beneficial entitlement" only appears in the 20% rule condition A, s.819(2) ITA, so the definition is only needed for that purpose.

> (2) A person has a "beneficial entitlement" to relevant disregarded income if the person has or may acquire a beneficial entitlement that is, or would be, attributable to the relevant disregarded income as a result of having an interest or other rights mentioned in subsection (3).

---

income" of the non-UK resident for the qualifying period is the total of the non-UK resident's income for the tax years comprised in the qualifying period which derives from the transactions mentioned in subsection (4).
(3) If section 819 applies for the purposes of section 816, the "relevant disregarded income" of the non-UK resident company for the qualifying period is the total of the non-UK resident company's income for the accounting periods comprised in the qualifying period which derives from the transactions mentioned in subsection (5).
(4) The transactions referred to in subsection (2) are investment transactions—
(a) carried out by the investment manager on the non-UK resident's behalf, and
(b) in relation to which the independent investment manager conditions are met, ignoring the requirements of the 20% rule.
(5) The transactions referred to in subsection (3) are transactions—
(a) carried out by the investment manager on the non-UK resident company's behalf, and
(b) in relation to which the investment manager does not fall to be treated as a permanent establishment of the non-UK resident company, ignoring the requirements of the 20% rule."

(3) The interests and rights referred to in subsection (2) are—
(a) an interest (whether or not an interest giving a right to an immediate payment of a share in the profits or gains) in property in which the whole or any part of the relevant disregarded income is represented, or
(b) an interest in, or other rights in relation to, the non-UK resident.

### 39.7.2 *Position where 20% rule not met*

Section 823 ITA provides:

> (1) This section applies in the case of an investment transaction in relation to which the independent investment manager conditions are met, except for the requirements of the 20% rule.
> (2) This Chapter has effect as if the requirements of that rule were met in relation to the transaction but only in relation to—
> (a) so much of the transaction income of the non-UK resident as falls within subsection (3), if this section applies for the purposes of section 813, or
> (b) so much of the income of the non-UK resident company deriving from the transaction as falls within subsection (3), if this section applies for the purposes of section 816.
> (3) Income falls within this subsection if it does not represent income—
> (a) which is relevant disregarded income of the non-UK resident, and
> (b) to which the investment manager or a person connected with the investment manager has or has had any beneficial entitlement.

Section 824 ITA (non-resident collective investment scheme) is not discussed here.

### 39.7.3 *HMRC practice*

SP 1/01 provides:

> 45. In essence the requirement is that the investment manager and persons connected with it, including connected charities, must not have a beneficial entitlement to more than 20% of the non-resident's chargeable profit arising from transactions carried out through the investment manager. The definition of connected persons is that in s 839 TA 1988/s 993 ITA 2007.
> 46. Management fees paid to the investment manager and persons connected with it are not included in the chargeable profit provided they would be allowable in computing the profit of the non-resident were it chargeable to UK

tax. This applies equally to incentive fees, performance fees or incentive allocations which are calculated by reference to any increase in the net asset value or profits of the relevant non-resident. This treatment of incentive allocations is explained further below.

47. Where the 20% threshold is exceeded, the part of the income of the non-resident to which the investment manager and connected persons are beneficially entitled is excluded from the limitation of charge. The limitation of charge will apply to the part to which they are not beneficially entitled provided the other tests in the investment manager provisions are met.

48. The 20% test is treated as satisfied throughout any period, not exceeding five years, for which it is met in respect of the total taxable income of the period arising from transactions carried out through the investment manager. It is also treated as satisfied if the manager intended to meet that test but failed to do so, wholly or partly, for reasons outside the manager's control, having taken any reasonable steps to fulfil that intention. This means that the manager must fulfil the intention to keep its beneficial entitlement within 20% of the total taxable income for the period insofar as it is reasonable to do so, but is not required to get within that figure at any cost, for instance where there are good commercial reasons for not achieving that.

49. This is an example of how the test may be met throughout a period of five years:

| Years | 1 | 2 | 3 | 4 | 5 |
|---|---|---|---|---|---|
| Taxable income of non-resident | £100 | £200 | £200 | £250 | £250 |
| Entitlement of manager to above | £32 | £58 | £40 | £35 | £5 |
| Expressed as percentage for each year | 32% | 29% | 20% | 14% | 2% |
| Average % over qualifying period | 32% | 30% | 26% | 22% | 17% |

It may be assumed that the test is satisfied for year one because (a) in this example it was the manager's intention to have a beneficial entitlement to an average of 20% or less in aggregate over a five year period and (b) that intention was fulfilled. Had the 20% beneficial entitlement been achieved before the five years were up, then that shorter period would have been the qualifying period. A second qualifying period of up to five years could include years two, three, four, five and six and so on.

50. As with any other tests for the exemption, unless specified otherwise, the UK tax rules regard companies, including LLCs, as opaque and the FA 2003 rules apply, while partnerships are transparent and FA 1995 applies. In addition, the rule for non-resident companies at Schedule 26(5) FA 2003 treats partnership collective investment schemes in which they invest as assumed companies for the purposes of the 20% test.

51. In relation to a tax-transparent fund having overseas investors, the non-residents will be participants in the fund. In such circumstances the 20% test would be automatically broken where a non-resident participant is connected to the investment manager since this would mean that all the non-resident participants were connected under s 839(4) TA 1988/s 993(4) ITA 2007 by virtue of their being partners in the same partnership. The investment manager

and connected persons would then be entitled to all the income of that non-resident. Accordingly, where the investment management services are provided to a collective investment scheme (as defined in the Financial Services and Markets Act 2000) the 20% test is applied by looking at the scheme as a whole rather than at the individual participators. It is not then relevant that the investment manager may be connected to the non-resident as partner (s 127(10) and paragraph 5 Schedule 26 FA 2003) or that the non-resident participants themselves carry on a financial trade as the availability of the exemption is instead tested solely by reference to the nature of the activities of the notional company represented by the scheme.

52. In certain circumstances the investment manager may be connected with the participants because both are partners in one or more partnerships which have an interest in the fund in question. Where the 20% test is failed as a consequence of aggregating the manager's income with that of certain partners who are not connected persons otherwise than as a result of s 839(4) TA 1988/s 993(4) ITA 2007, ie by being partners in a partnership, the failure will be regarded as a failure under s 127(4)(b) FA 1995 and paragraph 4(b) Schedule 26 FA 2003 to fulfil an intention to satisfy the test. But in certain situations that failure will be considered as—

(a) attributable to matters outside the control of the manager and persons connected with it; and
(b) as not being the result of a failure to take reasonable steps to mitigate the effect of those matters in relation to the fulfilment of that intention.

In those situations the 20% test will be met. The legislation will be applied in this way where:

– the connected persons are partners other than solely in a fund under consideration; and
– partnership is the only reason that the manager is connected with them.

## A remarkable fudge.

53. Where overseas pension funds are set up under trust the trustees do not have beneficial ownership of the pension fund income although they may be the legal owners. The 20% test will not therefore apply where the trustee is connected to the UK investment manager. In practice it would be unusual for an overseas pension fund to be carrying on a financial trade. ...[16]

55. Some non-residents remunerate investment managers with profit or incentive allocations and in consultations HMRC, investment managers and advisors reached a consensus that these are performance fees in substance. As such, these are income in nature and where they are recognised by the UK manager as fee income the allocations may be treated as fees payable by the non-resident when computing the chargeable profit. Furthermore, where HMRC is satisfied that some of the allocations are due to an overseas service provider as remuneration

---

16 The paragraph omitted here discusses "control"; see 69.4.2 (Control over a company's affairs).

for those services at the arm's length rate those allocations will have the same treatment in computing relevant excluded income.

56. Deferred fees, or securities or interests provided as reward, may in turn generate some form of return. The legislation draws no distinction between the forms in which the profits of the fund are attributed to deferred fees or other investments as the test is based on beneficial entitlement to the chargeable profits of the non-resident and if the manager's beneficial entitlement to those profits, including the return on the securities, interests or deferred fees, exceeds 20% the test will not have been met.

57. Options to acquire any securities or interests in the non-resident, within the meanings at s 420 ITEPA 2003, need only be considered in the context of the 20% test when the options are exercised.

58. Some investments in a non-resident may be linked to structured products issued to customers which provide a return based on the performance of the non-resident, an example of which would be a bank investing in a non-resident fund and selling a product to a customer on which the return is linked to the performance of the fund. In such circumstances the beneficial entitlement to the income of the non-resident remains with the investor in the non-resident, in this example the bank, and not the holder of the structured product, ie the customer.

***Interaction of the 20% test and the independence test.***

59. The independence test and the 20% test apply quite separately. For example, a UK investment manager acts for an overseas trading fund constituted as a company. If the investment manager is not acting in an independent capacity in relation to the fund company then the whole of the income of the fund is liable to assessment. If the independence test is satisfied, then the 20% test must be separately addressed. If the investment manager's interest in the fund company is 25% then that share of the fund's trading income is liable to assessment.

## 39.8 Independent broker conditions

Section 817 ITA provides:

(1) The independent broker conditions are met in relation to a transaction carried out on behalf of a non-UK resident by a broker in the UK if—
(a) conditions A to D are met, if this section applies for the purposes of section 813 [individuals/trustees], or
(b) conditions A to C and E are met, if this section applies for the purposes of section 816 [companies].

I refer to these as **"broker conditions A to E"**, to avoid confusion with the myriad other conditions ITA.

### 39.8.1 *Broker conditions A and B: broker's business*

Section 817 ITA provides:

> (2) Condition A is that at the time of the transaction the broker is carrying on the business of a broker.
> (3) Condition B is that the transaction is carried out in the ordinary course of that business.

The former ITH provided:

> **940. NRs: accepting TMA 70 s82 broker exemption: in course of business**
> The exemption in Section 82(1) applies only to transactions which the broker carries out (on behalf of the non-resident) "in the ordinary course of his business as such". In modern times it has become common for brokers to extend their business beyond mere "broking" but it does not follow that, just because what they do is now customarily done by brokers, they do it in the ordinary course of their business as brokers. Thus stockbrokers and commodity brokers often provide investment management schemes for clients. But investment management does not thereby become an ordinary function of a broker. However, there are special provisions for investment managers which are considered in ITH951.

### 39.8.2 *Broker condition C: customary remuneration*

Section 817(4) ITA provides:

> Condition C is that the remuneration which the broker receives in respect of the transaction for the provision of the services of a broker to the non-UK resident is not less than is customary for that class of business.

### 39.8.3 *Broker condition D: UK representative*

Section 817(5) ITA provides:

> Condition D is that the broker does not fall for the purposes of Chapter 2B of this Part, or of Chapter 1 of Part 7A of TCGA, to be treated as a UK representative of the non-UK resident in relation to

> [1] any other income which is chargeable to income tax, or
> [2] amounts which are chargeable to capital gains tax,
> for the same tax year as the transaction income.

This condition applies to individuals/trustees and not to companies.

### 39.8.4 *Broker condition E: permanent establishment*

Section 817(6) ITA provides:

> Condition E is that the broker does not fall to be treated as a permanent establishment of the non-UK resident company in relation to any other transaction of any kind carried out in the same accounting period of the non-UK resident company as the transaction in question.

The wording is the equivalent of broker condition D for companies (using the company tax concept of PE rather than the individual/trustee concept of branch/agency). Of course it would be simpler if the two were aligned.

## 39.9 Transactions through brokers

Section 828 ITA provides:

> (1) For the purposes of this Chapter a person is regarded as carrying out a transaction on behalf of another if the person—
> (a) undertakes the transaction, whether on behalf of or to the account of the other, or
> (b) gives instructions for it to be so carried out by another.
> (2) In the case of a person who acts as a broker or investment manager as part of only of a business, this Chapter has effect as if that part were a separate business.

## 39.10 Relevance of financial trading to IME

The question whether the non-resident client is trading is crucial for the IME. Unless the non-resident client is trading, the three IME exemptions are not needed:

(1) In the absence of a trade, a non-resident company is not subject to CT even if it has a permanent establishment and so the company does not have to rely on IME PE relief.

(2) In the absence of a trade, there can be no UK representative and the non-resident does not need to rely on IME UK representative relief.
(3) In the absence of a trade, non-residents may qualify for non-residents IT relief and do not have to rely on IME non-residents IT relief.

SP 1/01 acknowledges this:

> 14. The Investment Manager Exemption legislation has no relevance unless the non-resident is trading in the UK.
> 15. If the transactions carried out through the investment manager are part of the trade carried on by the non-resident then, unless the [IME] tests ... are satisfied the income from that trade, including any profit from the realisation of securities, etc, is taxable. ...

## 39.11 When is there a trade in financial assets?

"Trade" has no short definition and the general question of what a trade is needs a book to itself. The question discussed in this section is when there is a trade of dealing in securities, options and futures (which I shall abbreviate to securities or "financial assets" or "stock exchange transactions"). The trading/non-trading distinction here is important but elusive.

### 39.11.1 *Terminology*

**"Investment"** or "investing" is a word with several meanings.[17]

In one sense all securities are "investments". We have investment managers, investment brokers, investment companies or trusts. This is a convenient and common usage. However various distinctions are sometimes drawn which narrow the meaning of investment.

In a tax context, one ought to distinguish between:
(1) investing in securities and
(2) *trading* in securities. (In tax terminology "dealing" is an informal synonym of trading, but I think it is clearer to use the statutory term.)

In correct tax terminology a trader is not "investing" and holds securities

17 There is a helpful discussion of this terminology in a commercial context Graham & Dodd, "Security Analysis" ($6^{th}$ ed., 2009) chap 4 (distinctions between investment and speculation). For a discussion in a UK tax context, see Kessler and Brown, *Taxation of Charities and Non-Profit Organisations* ($8^{th}$ ed, 2011), para 5.9 (Investment).

as trading stock and not as "investments". I stress this because one sometimes finds the word "investment" used in a trading context.[18] This is not surprising because in the finance industry, the terms "investing", "trading" and "dealing" are all used as synonyms because for brokers and investment managers the distinction is irrelevant.

A distinction is sometimes drawn between

(1) investing in securities and

(2) gambling or speculating.

I discuss the meaning of gambling or speculating further below. The important point here is that in this sense gambling or speculating (whatever that means) is not investing.

Nevertheless, in the absence of trade, the matter is usually investment, and the trading/non-trading tax distinction can be described as a trading/investment distinction. This is doubted in *Wannell v Rothwell* 68 TC 719 at p.730:

> [Counsel for HMRC] mildly criticised para 11 for having posed the question 'trade or no trade?' but then, having treated that as equivalent to 'trade or investment?' I think there is some force in that criticism, since the word 'investment' has many shades of meaning, both in taxing statutes and elsewhere, and it is not used in the statutory provisions now under consideration.

This is strictly correct. It is possible to acquire financial assets in a manner which is not trading but which is not necessarily described as investment. (In particular, financial transactions have sometimes been described as "gambling" and classified as neither trading nor investment.) However, for most practical purposes that can be disregarded in the present context, and 'trade or no trade?' can be regarded as equivalent to 'trade or investment?'.

This discussion of terminology does not identify the dividing line between trading and investment, but it is an essential start if we are to know what we are talking about.

### 39.11.2 *Principles*

The principles are summarised in *Cooper v C & J Clark*:

18 See 39.5.4 ("Investment transaction").

> [1] First, marketable securities, being income-yielding assets usually capable of appreciating in value, are prima facie purchased and sold by way of investment and not by way of trade.
> [2] Secondly, a series of purchases and sales may sometimes, if carried out pursuant to a deliberate and organised scheme of profit-making, amount to a trade.
> [3] Thirdly, it is easier to characterise a series of purchases and sales as a trade in a case where they are made by a trading entity[19] as opposed to an individual.
> [4] Fourthly, in the case of a trading entity that characterisation is more easily made where the purchases and sales are substantial in relation to its other activities, all the more so where they are of frequent occurrence and extend over a long period of time.[20]

This is uncontentious and helpful as far as it goes.

### 39.11.3 *"Speculative" transactions*

*Cooper v C & J Clark* continues:

> Fifthly, it is sometimes helpful, although not decisive, to ask whether a series of sales and purchases is speculative or not. The reason why the question is sometimes helpful is that the answer may throw light *in one direction or the other,* but it is not decisive because according to the circumstances either a trade or a course of investment may be speculative.[21]

What does speculative mean? Graham and Dodd canvas various possible definitions, and suggest the following "as in harmony with the popular understanding of the term and the requirements of reasonable precision":

---

19 By "trading entity" it is not entirely clear whether the judge had in mind:
(1) an entity actually carrying on a trade (such as the taxpayer company in *C&J Clark*, which was a shoe manufacturer); or
(2) any company with articles authorising it to carry on a trade, whether or not it carries on any activity apart the transactions in financial assets.
The general rule is that it is easier to characterise a series of purchases and sales as a trade in any case where they are made by any company with articles authorising it to carry on a trade. See 39.11.4 ("Gambling" and distinction between individuals and companies).

20 54 TC 670 at p.676.

21 54 TC 670 at p.676; emphasis added.

> An investment operation is one which, upon thorough analysis, promises safety of principal and a satisfactory return. Operations not meeting these requirements are speculative.[22]

In particular, a stock exchange transaction is described as "speculative" if it is risky and especially if the purchaser stands to make or lose money depending on how the market moves in the short term.

In that sense, stock exchange transactions are often if not mostly speculative (though it is a question of degree and some transactions are more speculative than others).

The passage from *C&J Clark*, while describing the issue of whether a transaction is speculative as "sometimes helpful" does not inform us whether a positive answer supports a conclusion of trading or non-trading, which somewhat undermines the helpfulness of the question. It is considered that to ask whether a transaction is speculative in the sense of high-risk is very rarely if ever going to be helpful. See *Lewis Emanuel v White*:

> The word 'speculation' is not, I think, as a matter of language, an

22 Graham & Dodd, "Security Analysis" (6th ed., 2009) p.106.
Fred Schwed Jr gives a similar explanation of this vague word in "Where are the Customers' Yachts?" (1940) Chapter 8:
"Investment and speculation are said to be two different things, and the prudent man is advised to engage in the one and avoid the other. This is something like explaining to the troubled adolescent that Love and Passion are two different things. He perceives that they are different, but they don't seem quite different enough to clear up his problems.
Investment and speculation have been so often defined that a couple more faulty definitions should do no harm, the science of economics having reached a point where further confusion is impossible. Thus,
- Speculation is an effort, probably unsuccessful, to turn a little money into a lot.
- Investment is an effort, which should be successful, to prevent a lot of money from becoming a little.
If you take a thousand dollars down to Wall Street and attempt to run it up to $25,000 in the course of a year, you are speculating. If you take $25,000 down there and attempt to earn a thousand dollars a year with it (by buying twenty-five four per cent bonds) you are investing. ..."
Sometimes the word "speculative" is used to describe a transaction made with a view to profit (as opposed to a transaction intended to hedge a financial risk). In that sense it is relevant to ask whether a transaction is speculative, since different principles apply to hedging transactions, but hedging is a rather special case.

> accurate antithesis either to the word 'trade' or to the word 'investment': either a trade or investment may be speculative.[23]

### 39.11.4 *"Gambling" and distinction between individuals and companies*

In order to avoid confusion in this area, it is essential to bear in mind that the word "gambling" may be used in two senses.

In the strict sense:

(1) gambling[24] contracts were unenforceable; and
(2) gambling activity is not a trade.

I refer to this as the gaming/wagering sense. The Gaming Act 2005[25] has abolished the former contract law rule that gaming/wagering contracts were invalid but the rule remains that the activity of gaming/wagering is not a trade and the profits (if any) are not subject to income tax, or CGT.[26]

In a loose sense, "gambling" means more or less the same as speculative, in the sense discussed above: that is, high-risk. The purchase of a future or option, say, may be a gamble in the loose (high-risk) sense, but it is not gambling in the strict (betting/wagering) sense.

In *Lewis Emanuel v White* the Judge said:

> ... it is certainly true, at any rate in the case of an individual, that he may carry out a whole range of financial activities which do not amount to a trade but which could equally not be described as an investment, even upon a short-term basis. These activities include betting and gambling in the narrow sense. They also include, it seems to me, all sorts of Stock Exchange transactions. For want of a better phrase, I will describe this class of activities as gambling transactions.

It seems a little strange to describe all sorts of stock exchange transactions as gambling, but the terminology makes a little more sense if one bears in mind that it was written in 1965, when the cult of the equity had only just

23 42 TC 369 at p.377; this passage was cited with approval in *Wannell v. Rothwell* 68 TC 719 at p.730.

24 Also called gaming, wagering and betting.

25 Section 63 Financial Services Act 1986 had already substantially restricted the rule that bets on stock market movements were void.

26 Section 51 TCGA. The rationale is that losses are more likely than profits, and one could not tax the profits without allowing some relief for losses.

begun, and before it had received judicial notice.[27] Before then, the only assets recognised as investments were gilts and mortgages, and stock exchange transactions would not normally be regarded as investments: they were felt to be too risky. They would not naturally be regarded as trading, so they were put into the category of non-trading non-investments.

Of course it does not matter for individuals whether one describes transactions in financial assets as investment or as gambling (in the loose high-risk sense), since the tax consequence is the same: the profits are subject to CGT and not IT.

This line of thinking is the historic basis for the rule that the test for whether a company is trading is different from the test of whether an individual is trading, and companies are more likely to be trading than individuals. The reason for the rule is said to be that companies (unlike individuals) are usually entitled only to trade or to invest. They cannot carry on non-trading non-investment activities of the kind that the judge categorised as "gambling" (in the sense of high-risk). The judge continued:

> It seems to me, however, that in general it is much more difficult to bring the activities of a company within this class of gambling transactions. An individual may do as he pleases: a corporation must act within the limitations of its memorandum of association. All companies have power to invest; many companies have power to deal [ie trade] in securities; few companies can have power to enter into gambling transactions - i.e., by [the judge's] definition, transactions otherwise than by way of investment or trade. Where a transaction can be brought within the scope of an authorised object - e.g., investment or dealing - one would not readily treat the transaction as having been carried out ultra vires in pursuit of an unauthorised object - e.g., gambling. In other words, one expects a trading company's activities, apart from capital investment, to be by way of trade.

The reasoning is now invalid:

(1) Nowadays one would not readily describe conventional stock exchange transactions as "gambling".

(2) Companies powers have increased.

The BI Manual notes the point (2). It cites *Lewis Emanuel v White* and

---

27 *Sinclair v Lee* [1993] Ch 497 at p.512: "The cult of the equity, ... did not really begin until the mid or late 1950s."

comments:

> **65701. By individuals and companies** [November 2005]
> ... Since then Company Law has been amended. [Section 39(1) Companies Act 2006 says:
>
> > 'The validity of an act done by a company shall not be called into question on the ground of lack of capacity by reason of anything in the company's constitution.'][28]

It is considered that the rule continues to be valid that companies (assuming their articles authorise trading) are more easily held to be trading than individuals.[29] However the basis of that rule cannot now be the reason given in *Lewis Emanuel* (that the transactions carried out by individuals should generally be classified as non-trading non-investment transactions but companies, unlike individuals, must either trade or invest, so they are more likely to be trading). One could simply say that the rule is now established and continues to hold even if its reasons have ceased to be sound. However, if needed the rule has another, sounder basis. This is that one badge or indication of trade is "trading structure" and companies (if their articles authorise trading) have that element of "trading

---

28 I have for convenience updated the text of the Manual which refers to the Companies Act 1985; there is no material difference.
The manual then quotes from *Cooper v C & J Clark* and continues with a passage which does not wholly address the problem it identified:
"Where companies undertake transactions in derivatives it is necessary to look at the context in which those transactions take place. In the case of *Morgan Grenfell Ltd v Welwyn Hatfield District Council* [1995] 1 All ER 1 the local authority entered into interest rate swaps with another local authority facilitated by Morgan Grenfell. One of the preliminary points in the case considered by the courts was whether or not the interest rate swaps were a gaming or wagering contract. The court held that in the context of interest rate swaps, for contracts entered into by parties or institutions involved in the capital market and the making or receiving of loans, the normal inference would be that such contracts were not gaming or wagering but were commercial or financial transactions.
It is therefore possible for a derivative contract entered into by a company to be part of the company's trading activities, if it is entered into to hedge exposure to risk in a commercial or financial transaction. See also CFM13580.
When all the facts have been gathered in a particular case it should be possible to conclude whether or not there is a trade. However any cases of doubt or difficulty, which cannot be resolved locally should be referred to Business Tax (Technical)."

29 See 39.11.2 (Principles) item [3].

structure" which individuals do not.

It is considered that to ask whether or not the transactions are gambling (in the loose sense of high-risk) is the same as to ask whether or not the transactions are speculative: it can never be helpful in determining whether or not transactions are to be classified as trading.

Since different tests apply to determine whether companies and individuals are trading, I consider the cases for individuals and for companies separately.

### 39.11.5 *Trading by individuals*

There have been two UK cases discussing whether individuals are trading in financial assets. The first is *Salt v Chamberlain* 53 TC 143 where Oliver J said:

> Where the question is whether an individual engaged in speculative dealings in securities is carrying on a trade, the prima facie presumption would be, as Pennycuick J. suggested in the Lewis Emanuel case 42 TC 369, that he is not. It is for the fact-finding tribunal to say whether the circumstances proved in evidence or admitted take the case out of the norm.

In *Salt v Chamberlain* the individual relied on the following matters to justify a conclusion of trading. There was a relatively large number of transactions, about 50 sale/purchase transactions per annum, over a four-year period. A substantial proportion of the transactions concerned options (rather than securities yielding income). One-third of purchases and sales were within the settlement period, and many others were within a short period thereafter. The purchases were financed in part by borrowing. On these facts the General Commissioners found that the taxpayer was not trading, and on appeal the judge held that the Commissioners were entitled to reach that conclusion.

A similar approach was applied in Hong Kong Inland Revenue Board of Review Decision *Case No. D 42/90.* The following aspects of the matter might have justified a conclusion of trading. The individual's transactions were in Hang Seng Index futures contracts which had a short lifespan and produced no income. The individual ran an "active" account (the number of transactions is not recorded). The Board held that the taxpayer was not trading.[30]

The second UK case is *Wannell v Rothwell* 68 TC 719. In this case there were about 60 sale/purchase transactions per annum. The assets traded were shares and commodities. Some of the money used was borrowed. The taxpayer was aiming at quick profits and had no intention of taking possession of the commodities or (with rare exceptions) of holding shares. The Special Commissioner did not decide whether the taxpayer was trading, but the Judge found that the Special Commissioner would have been "almost bound" to reach the conclusion that the taxpayer was trading.

In assessing the significance of the turnover of assets, one should in my view take into account that it is, I think, more common now to actively manage a portfolio than it was in the past.

Business income Manual provides:

> **65701. By individuals and companies** [November 2005]
> *Share Transactions by Individuals*
> Transactions by individuals in shares and securities are not generally trading transactions. Such transactions normally fall within the charge to Capital Gains Tax. This is also true of transactions in futures, options or other derivative contracts.
> [The Manual cites the passage from *Lewis Emanuel v White* 42 TC 369 discussed above[31] and continues:] Pennycuick did not accept that an individual speculating on the price movement in shares without intending to hold the shares even as short term investments was trading. He considered that such transactions are analogous to gambling, and so fall short of trading.

The rule that an individuals' transactions are not generally trading is sound; see 39.11.4 ("Gambling" and distinction between individuals and companies).

> The question of whether an individual is trading is a question of fact. And if agreement cannot be reached, an issue for the Commissioners to decide. It is therefore important that all the salient facts are obtained, when an individual claims to be carrying on a financial trade. Once the facts are established the position usually speaks for itself.
> The tax cases provide some useful pointers. But each case is dependent on its own facts. It is therefore vital to establish the facts first of all.
> The decided cases make it very clear that there is no definitive checklist for

30 Accessible *www.info.gov.hk/bor/eng/pdf/dv5_second/d4290.pdf.*

31 See 39.11.3 ("Speculative" transactions) and 39.11.4 ("Gambling" and distinction between individuals and companies).

determining whether an individual is trading or not. The 'badges of trade' are only a guide. The presence of one, two or more of them is not conclusive. The position is summed up by Oliver J in *Salt v Chamberlain* (1979) 53 TC 143 at page 154:

> '... I doubt whether the question whether in any given case a person is or is not carrying on a trade is capable of solution by the application of a logical progression of propositions culled from decided cases. The question is, I think, one of overall impression'.

In that case Mr Salt decided to put his expertise in computer technology for forecasting share movements to personal use speculating on the stock market. He effected some 200 purchases and sales of stocks and shares, financing himself by means of bank loans and insurance policies as well as personal means. The Commissioners determined that the Appellant was not trading and Oliver J upheld their decision.

It follows that reliance on the number and frequency of transactions, and the short term nature of the holdings of shares may be misleading. It is necessary to view these badges taking account of the fact that the assets are financial assets. To determine if a speculative activity is trading (or an adventure in the nature of trade), it is important to consider whether the operations are carried out in the same way as any ordinary trader in those assets operates. Established traders in shares operate to minimise, or limit, the exposure to chance. They do this in a variety of ways.

- They have customers who sell to them and buy from them regularly, to whom they market their services, and will quote prices for buying and selling. The prices quoted will be spread, so they can achieve profits. They make profits from moving huge volumes of shares very quickly.
- They hedge large holdings of a security with derivative instruments to ensure that if they hold on to positions for any length of time, they have only a limited exposure to general market movements.
- They have very strict rules about the degree of risk to which any trader is allowed to expose the firm.

So, while share traders do buy and sell shares to profit from anticipated market movements it is not the sole way in which they make a profit. Speculation is only part, and a strictly controlled part, of a more complex trading operation. Their operations are designed to make profits whichever way market prices move, by turning over stock as a wholesaler or as a retailer. Whether an individual operates in the same way as a share trader is a question of fact. So, it is necessary first of all to establish how the individual operates and what action he or she takes to minimise risk and secure profits.

*Derivatives Transactions by Individuals*

Individuals sometimes contend that options and futures are different to shares, because they are not income producing assets unlike shares which produce dividends, and they are usually dealt in by way of trade. However, financial futures and options are contracts closely tied to movement in prices of shares, interest rates or share indices. They are often used in exactly the same way as shares. It is therefore important to establish the facts when an individual contends that he or she is trading in derivatives. So, as for transactions in shares

> and securities, the question is whether the individual has organised his or her activities in a way that amounts to trading or is simply speculating on price movements.
> Derivative traders do not simply enter into contracts and await price movements, such traders operate in exactly the same way as stock market traders. They trade by turning over the assets in large volumes at a dealing margin. They buy and sell to those customers of the market who want to use the derivatives. Like share dealers, they will hedge against market movement so that their exposure to it is kept within strict limits. So, in determining whether an individual is trading in futures, options or contracts for differences, the factors which need to be considered are essentially the same as those for an individual trading in shares.
> Some of the derivative exchanges, including LIFFE, have now largely abandoned floor trading in favour of a screen based trading system, where prices are displayed and contracts can be made electronically. Some former LIFFE 'locals' now deal in derivatives in this way. They should still be considered to be trading given their background and involvement in the derivatives market, if there has not been a significant change in the nature of the activities. In cases where there has been a significant change in the nature of their activities, then a decision should be reached on the basis of the facts of the case.
> When all the facts have been gathered in a particular case it should be possible to conclude whether or not there is a trade. However, if once you have established the facts, there are doubts or difficulty, which cannot be resolved locally, you should refer the case to Business Tax (Technical) following ADM 6.109.

### 39.11.6 *Trading by trustees*

There are no tax cases on whether trustees of a private trust are trading, but it is considered that their position is in principle similar to individuals. In *Smith v Anderson* (a non-tax case discussing an early unit trust) James LJ said:

> In my opinion, nothing that is to be done under this deed by the trustees comes within the ordinary meaning of "business", any more than what is done by the trustees of a marriage settlement who have large properties vested in them, and who have very extensive powers of disposing of the investments, changing the investments, and selling them and reinvesting in other investments, according to their discretion and judgment, with or without the consent of their cestuis que trust. That is not a business. No doubt there is power ... to dispose of the investments and reinvest in some similar securities ... This appears to me to be no more than the power of varying investments which you would find in an

ordinary trust deed ...[32]

### 39.11.7 *Trading by companies*

There have been two cases discussing whether companies are trading in financial assets. Each concerned a trading company using spare cash to carry out stock exchange transactions.

In *Lewis Emanuel v White* 42 TC 369 the company carried out over 100 transactions per annum (described as "a very large number"). The majority were sold in the same year, often within a matter of weeks. It was held that the only possible conclusion was one of trading.

In *Cooper v C & J Clark* 54 TC 670 the company made only 13 transactions over nine months. The commissioners findings of trade were upheld, though only just (the judge would not have found there was a trade). So I think we can say that is an example of a non-trade.

It is considered the company's own classification of its activity as trading/non trading (in the company's constitution, board resolutions and accounts) is a matter of considerable weight which in an otherwise marginal case ought to be decisive. However an activity may constitute a trade even it the activity is ultra vires the company. *Lewis Emanuel* was such a case: 42 TC at p.377.

UK resident companies also need to consider the derivative contract rules in part 7 CTA 2009, which are not discussed here.

### 39.11.8 *SP 1/01*

SP 1/01 provides some heavily guarded generalities, and anyone who tries to use this guidance will find that it does not take them very far.[33] For what it is worth, the material is set out here:

> 16. Whether or not a taxpayer is trading is a question to be determined by reference to all the facts and circumstances of the particular case. This applies as much to financial transactions as to other activities.
> 17. In determining the question of trading, any transactions carried out through an investment manager are to be considered in the context of the status and world-wide activities of the non-resident. It is not possible

32 15 Ch D 247 at p.276.

33 There is similar (qualified) guidance in SP 3/02.

> in this statement to consider every possible set of circumstances but, for example, an individual is unlikely to be regarded as trading as a result of purely speculative transactions.[34]
> 18. For a company, a transaction will generally be either trading or capital in nature. (This may also be the case for non-corporate collective investment vehicles whether open-ended or closed.)

The point of para 18 is that the transaction will not give rise to non-trading income; see 39.11.9 (Transaction income (former schedule D case VI))).

> If the main business of a non-resident company is a trade outside the financial area, or an investment holding business, the activities in the UK would normally amount to trading only if they constituted or were part of a separate financial trade. But if, exceptionally, activities which are an integral part of the profit earning activities of a non-financial trade are carried out through a UK investment manager (eg hedging on the London terminal markets by a non-resident dealer in physical commodities) then that might amount to trading here. The view to be taken on a particular case will depend on all the facts of that case.
> 19. The active management of an investment portfolio of shares, bonds and money market instruments such as bills, certificates of deposit, floating rate notes and commercial paper does not constitute a trade.

The use of the term "investment" (if it carries its normal tax meaning) makes para 19 tautologous. Presumably the word is used in the wider sense, in which case the sentence makes an important point. But the author adds a qualification to neutralise that:

> But every case must be considered in the light of its own facts.
> 20. HMRC view short positions as conceptually the same as long positions and synthetic positions are conceptually the same as the equivalent 'real' positions. Neither going short nor taking synthetic positions using derivatives are in themselves indicative of trading. Furthermore, synthetic positions that give exposure to part of an asset are conceptually the same as synthetic positions that give exposure to the whole of an asset. Thus a synthetic position that gives exposure only to a bond's credit risk is no more or less likely to be a trading transaction than a synthetic or real position that gives exposure to the bond's coupon, liquidity, credit and currency risks. These techniques

34 Likewise SP 3/02 para 8.

may constitute investment in themselves or may form part of an investment activity.
21. Where futures and options are used by non-residents who are collective investment vehicles (whether open-ended or closed), pension funds and other bodies which either do not trade or whose client trade is outside the financial area, SP 03/02 "Tax Treatment of Derivative Transactions" will be applied.
22. ... [35] The criteria for deciding whether a non-resident financial company is an investment company or a trading company are the same as those which apply to a resident company.

BI manual expands on this:

**20250 - Trade: badges of trade: income producing assets** [April 2008]
... *Financial assets*
Normally transactions by individuals and companies in financial assets, such as shares, options and futures, do not amount to trading for tax purposes. Shares are generally held for investment, either to gain from income or capital growth. Short-term transactions, which cannot be classed as investments, usually fall short of trading, being in a class of transaction analogous to gambling or speculation. If you have a case of this kind please refer to BIM20252 and BIM65701.
**20252. Tax treatment of financial transactions** [April 2008]
Financial transactions include the acquisition, holding, dealing with and disposal of financial assets such as shares and bonds, but also include taking synthetic positions in relation to such assets or corresponding indices, or discrete components of them.
In our view, there is no conceptual difference between a 'real' and a synthetic financial transaction (for example, buying a share or entering into a derivative contract that replicates the risks and rewards of ownership). We also accept the following propositions:
a) Short positions are conceptually the same as long positions.
Buying a share because you take the view that its price will rise and shorting a share because you think its price will fall are conceptually the same. In simple terms, a view is merely being taken on the direction of movement. It follows that synthetic long and short positions are conceptually the same as one another and the equivalent real transactions.
b) Derivatives that give exposure to part of an asset are conceptually the same as derivatives that give exposure to the whole asset.
A view may be expressed on a bundle of components embedded in an

35 The omitted text discusses whether the financial trade is carried on in the UK; see 13.11.2 (Buying and selling through an agent). This is distinct from the question of whether there is a trade.

instrument, for example the coupon, liquidity, credit risk and currency of a bond, or alternatively a view may be expressed on one or a combination of these components. There is no conceptual difference between taking a view on all components by buying the instrument or entering a derivative contract that replicates ownership, or taking a view on one or a combination of the components via derivatives. There is no conceptual difference between taking a view on the direction of movement (as with simply long and short positions) or taking a view on the magnitude or timing of movements, or other components.

c) Multi-derivative or hybrid strategies should not be unbundled. Given the wide range of situations this principle can apply to, three examples are set out below. These are intended to be illustrative and not a definitive list.

In all cases involving any such "bundling" we would expect there to be evidence that the transactions were executed in pursuit of a clear prior strategy.

(i) Two or more derivatives

Where, for example, the view is that the price will increase but only within a certain band, and the most efficient way to express that single view is via a series of derivative transactions, those transactions should be considered as a whole and not each in isolation.

(ii) A derivative and another financial asset (e.g. shares)

Where the view is that an asset would not be acquired at current value but would be at a set lower value, a put option is written at that lower value, i.e. as a cost efficient method of acquisition. The writing of the option and the potential acquisition of the asset should be considered as a whole and not each in isolation.

(iii) A sequential series of similar derivative strategies

A derivative that is close to maturity generally has greater liquidity than a derivative identical in every way, other than having a longer period to maturity. 'Rolling' short dated derivative strategies such that there is a sequential series of similar derivatives should be viewed as a whole and not each in isolation.

In our view, taking short positions and using synthetics to express views on all or any of the components of risk associated with an asset or index are not in themselves indicative of trading. All of these approaches may form part of an investment strategy and some of them may constitute investment in themselves.

In our view, financial transactions such as those described in this guidance may constitute either investment, trading, or speculation which, whilst not amounting to investment even on a short-term basis, nevertheless falls short of trading. Where such transactions are undertaken pursuant to an organised strategy, the question may arise in particular cases whether that strategy is consistent with an investment or trading objective. This is always a question of fact to be decided by reference to all of the facts and circumstances of particular cases.

For further guidance on specific circumstances in which financial transactions are taxed as part of a trade, see the Corporate Finance Manual at CFM5301a, the General Insurance Manual at GIM5000+ and Chapter 2 of the Life Assurance Manual.

Outside of such arrangements, short-term transactions in financial instruments that are not integral to a financial trade, such as banking, or not undertaken pursuant to an organised trading strategy, are likely in our view to constitute speculation that amounts to neither investment nor trading.

### 39.11.9 *Transaction income (former schedule D case VI)*

One welcome rule is that stock exchange transactions must either be trading or non-trading, and cannot fall within any other category of trading income. Section 779(1) ITTOIA provides:

> No liability to income tax arises as a result of Chapter 8 of Part 5 (income not otherwise charged) in respect of a gain arising to a person in the course of dealing in—
> (a) commodity or financial futures,
> (b) traded options, or
> (c) financial options.[36]

This makes obsolete some difficult case law under which transactions in futures were held to be non-trading but to fall within the former Schedule D case VI. There is no scope for other stock exchange transactions to fall within this category: *Jones v Leeming* 15 TC 333.

### 39.11.10 *Commentary*

The trading/non-trading distinction in financial assets raises three difficulties:

(1) *Uncertainty:* The case law is old and investment practice has since changed considerably. It does not address the many varieties of transaction carried out by hedge funds and other sophisticated investors/traders, and even in the case of straightforward transactions, it is often unclear whether or not there is a trade.
(2) *Complexity:* There are some complex and narrow exemptions which

---

36 For completeness, this continues:
(2) The reference in subsection (1) to a gain arising in the course of dealing in commodity or financial futures includes a gain regarded as so arising under section 143(3) of TCGA 1992 (gains arising from transactions otherwise than in the course of dealing on a recognised futures exchange, involving authorised persons).
(3) In this section—
"commodity or financial futures" means commodity futures or financial futures that are for the time being dealt in on a recognised futures exchange,
"financial option" has the meaning given by section 144(8)(c) of TCGA 1992, and
"traded option" has the meaning given by section 144(8)(b) of that Act.

recognise and address this problem and (more or less) treat stock exchange transactions as non-trading:

(a) the IME discussed in this chapter;

(b) an exemption for authorised investment funds introduced in an attempt to stop funds relocating to Ireland or Luxembourg;[37]

(c) chapter 6 part 3 OFTR.[38]

(3) *Irrationality:* The line drawn between trading/non trading in transactions in financial assets (insofar as it is discernible) is arbitrary.

These three problems follow from one underlying problem: there is no clear *economic* line to be drawn between trading and non-trading, in the context of stock exchange transactions. There is an economic distinction between buying for short term and buying for long term holding[39] and to the extent that this intuition underlies the trading/non-trading distinction it is not wholly irrational. However this economic line is nowhere close to the tax trading/non-trading distinction; and there is no reason why the two activities should be taxed differently. As far as I am aware, competing jurisdictions sensibly do not attempt to draw any comparable distinction.

It is suggested that all transactions in financial assets, defined along the lines of the IME, should in principle be deemed non-trading.[40] The IME, AIF and OFTR exemptions can be repealed. That would be a simplification with little if any tax loss.

---

37 Authorised Investment Funds (Tax) (Amendment) Regulations, SI 2009/2036 (31 pages of regulations accompanied by 107 pages of draft guidance).

38 See 32.27 (Transactions treated as non-trading).

39 "We believe that according the name investors to institutions that trade actively is like calling someone who repeatedly engages in one-night stands a romantic." (Attributed to Warren Buffet - I would be grateful to any reader who could supply the reference).

40 There could be some limited exceptions, eg if a company elects for trading treatment, and the hedging of trading risks.

CHAPTER FORTY

# LOANS FROM NON-RESIDENT COMPANIES

## 40.1 Advantages of loans from non-resident companies

A dividend (or other income distribution) from a non-resident company will often cause income tax problems. If the dividend is received by a UK resident, directly or through an IP trust, it will be taxable on an arising basis or on the remittance basis. If it is received by a non-resident discretionary trust or company, it will be income within the scope of s.624 and the TAA provisions. By contrast a loan, even if interest-free, does not constitute an income receipt and will avoid these problems. Loans therefore seem an attractive method of extracting funds from companies. However, they raise tax issues of their own.

The following issues are discussed elsewhere. A loan may be a benefit for the purposes of s.731 and s.87.[1] Receipt of the loan in the UK may be a taxable remittance under s.624, s.720 or s.731;[2] or if the sum loaned represents foreign income/gains of the individual.[3] A loan to a transferor or settlor may bring s.727 ITA[4] and s.633 ITTOIA into effect which is important if the settlor has no power to enjoy or the trust is not settlor-interested.[5] A loan to trustees may give rise to a charge under Schedule 4B TCGA.[6] The liability to repay the loan may not be deductible for IHT purposes.[7]

---

1 See 27.4.4 (Interest-free loan and enjoyment of asset in kind).

2 See 24.5 (Section 624 remittance basis); 26.14 (Section 720 remittance basis); 27.34 (Section 731 remittance basis).

3 See 10.14.5 (T lends to R). Remittance condition D might also apply.

4 See 26.11 (Transferor receives capital sum).

5 See 24.14 (Settlor receives capital sum).

6 See 46.5 (Trustee borrowing).

7 See 56.1 (IHT deduction for debts).

Loans *to* non-resident companies raise different issues, not discussed here.

## 40.2 Non-tax aspects

The loan should be documented by a written agreement made at the time of the loan. It should be recorded in the company's accounts.

Take care the loan does not accidentally become statute-barred.

Company law restrictions on loans to directors and connected persons may need to be considered. This will depend on the applicable law of the company.

If the company is held by a trust, the trustees need to consider whether they can properly permit the company to make the loan.

## 40.3 Loans to participators

Section 455 CTA 2010 imposes a charge where a close company lends money to a participator. There is no charge under this section provided the company was not UK resident (and so not "close") at the time the loan was made. It does not matter if the company later becomes UK resident.

In this chapter I assume that the company is not UK resident when the loan is made.

## 40.4 Benefits to participators

Section 1064 CTA 2010 imposes a charge where a "close company incurs an expense in, or in connection with, the provision for any participator of ... benefits or facilities of any kind". However a close company does not "incur expense" in making a loan or in leaving the loan outstanding, and so there will be no charge under this section. Also a non-resident company is not "close".

## 40.5 Employment-related loan

Section 175(1) ITEPA provides:

> The cash equivalent of the benefit of an employment-related loan is to be treated as earnings from the employee's employment for a tax year if the loan is a taxable cheap loan in relation to that year.

This will in principle apply on a loan from a company to an employee, director, or shadow director.[8] A discussion of the meaning of "taxable cheap loan" and the quantum of the charge is outside the scope of this book. For DTA relief see 65.26 (DTA defence to BiK charge).

### 40.5.1 *Remittance basis employee*

The BiK earnings of an employment-related loan may be chargeable overseas earnings if (in short) the duties of the employment are performed wholly outside the UK. If so, it is suggested that the earnings cannot be remitted so no tax charge can arise.[9]

### 40.5.2 *Loan to shadow director: HMRC practice*

Where living accommodation is provided by a company, HMRC say that they are keen to take the point that the occupier of the property may be a shadow director of the company, so that a benefit in kind charge arises.[10] In relation to interest-free loans from offshore companies, the same technical point arises. However in this case HMRC do not seem to argue the point. There are various possible explanations for this discrepancy.

One reason may be that borrowers (unlike occupiers) are less likely to be shadow directors. Of course a person who borrows interest-free from a company is not necessarily a shadow director. Perhaps the person occupying a property purchased by the company is more at risk of becoming a shadow director, because the company's acts to acquire the property and licence the individual to occupy are more likely to be at the direction of the individual. By contrast, the decision to extract funds from the company by way of loan (as opposed, say, to distribution) may be less likely to be at the direction of the individual. But it is of course a question of fact in each case.

The motivation for (purporting to) take the living accommodation point may be to discourage IHT planning on the family home, not the collection of income tax. That is a second possible explanation.

---

8 See 65.11 (Who is a shadow director?).

9 See 65.24 (Benefit in kind: remittance basis taxpayer). If that is wrong, imponderable questions arise as to what happens if the money lent is remitted here and spent. Contrast 27.36.1 (Interest-free (or low-interest) loan).

10 See 65.10 (Shadow directors).

## 40.6 Meaning of "employment-related loan"

### 40.6.1 *"Loan"*

Section 173(2)(a) ITEPA provides:

> "loan" includes any form of credit,

EIM para 26108 provides:

> **26108. Meaning of loan** [March 2007]
> Loan means more than just lending money. It includes any form of credit. It follows that any kind of advance by reason of the employment is covered. For example, any amount shown in the employer's books or records as owed by an employee will count as a loan.
> *Grant v Watton*
> The case of *Grant v Watton* (71 TC 333) concerned credit extended by a company of which Grant was a director, to his sole trade and later to a partnership in which Grant was the general partner. In the High Court Pumfrey J. considered the meaning of credit –
>
> > "... credit is granted where payment is not demanded until a time later than the supply of goods to which the payment relates. Credit is the deferral of payment of a sum which, absent agreement, would be immediately payable."
>
> Regarding the application of Section 175 ITEPA 2003 to an overdrawn director's loan account see EIM26505.

### 40.6.2 *"Making" a loan*

Section 173(2)(b) ITEPA provides:

> references to making a loan (and related expressions) include arranging, guaranteeing or in any way facilitating a loan.

EIM 26110 [March 2007] summarises this and continues:

> **Loan made by a third party – employee benefit trust**
> It is not uncommon for a third party, such as an employee benefit trust (EBT), to make a loan to a beneficiary who is also an employee of the employer which is associated with the EBT. It is sometimes suggested that the loan is not an "employment-related loan" (EIM26113) because

> the definition of that term does not include a loan provided by a third party.
>
> Whilst it is true that the definition includes no reference to a third party loan provider, HMRC does not accept that the loan is not an employment-related loan. The definition of "employment-related loan" includes a loan made by an employee's employer. As "making" a loan includes "in any way facilitating" a loan, if the employer provides the money to fund the EBT, the employer is regarded as making the loan. Consequently for the purposes of the loan benefit rules, the EBT is ignored and the loan is treated as made directly by the employer to the employee. It follows that the loan is an employment-related loan.

Suppose:

(1) A company is held by a trust, and lends funds to the trustees ("loan 1").

(2) The trustees lend funds to a beneficiary who is a shadow director ("loan 2").

At first sight this would not be an employment-related loan because it is not made by the "employer". But if loan 1 is made in order to allow the trustees to lend to the beneficiary, it might be said that the company has facilitated loan 2. The same applies to a back-to-back loan, ie if the company deposits funds with a bank, the trustees borrow from the same bank on the security of that deposit, and the trustees then lend to the beneficiary.

Section 174(4) ITEPA provides:

> References in this section to a loan being made by a person extend to a person who—
>
> (a) assumes the rights and liabilities of the person who originally made the loan, or
>
> (b) arranges, guarantees or in any way facilitates the continuation of a loan already in existence.

EIM para 26111 provides:

> **Loans taken over from another person**
>
> If the rights over an existing loan are taken over by another person the loan will remain within the charge if it was within the charge when it was first made.
>
> A loan within the scope of the charge cannot be removed from it by the

original lender handing his or her rights over to another person. But a loan that was not within the charge when it was first made can be brought within it if it is taken over by a person mentioned in EIM26113.

### 40.6.3 *"Employment-related"*

"Employment-related" loan is defined in s.174 ITEPA:

> (1) For the purposes of this Chapter an employment-related loan is a loan—
> (a) made to an employee[11] or a relative of an employee, and
> (b) of a class described in subsection (2).
> (2) For the purposes of this Chapter the classes of employment-related loan are—
> *A* A loan made by the employee's employer.
> *B* A loan made by a company or partnership over which the employee's employer had control.
> *C* A loan made by a company or partnership by which the employer (being a company or partnership) was controlled.
> *D* A loan made by a company or partnership which was controlled by a person by whom the employer (being a company or partnership) was controlled.
> *E* A loan made by a person having a material interest[12] in—
> (a) a close company which was the employer, had control over the employer or was controlled by the employer, or
> (b) a company or partnership controlling that close company.
> (3) In this section—
> "employee" includes a prospective employee, and
> "employer" includes a prospective employer...

"Control" has the meaning in s.995 ITA: see s.719 ITEPA.

### 40.6.4 *Loan to relative of employee*

Section 174 ITA provides:

> (1) For the purposes of this Chapter an employment-related loan is a loan—
> (a) made to an employee or a relative of an employee...

---

11 For the definition of "employee" see 12.2.1 ("Employer", "employee" and "employment").

12 "Material interest" is defined in s.68 ITEPA.

Section 174(6) ITEPA defines "relative" quite widely:

> For the purposes of this section a person ('X') is a relative of another ('Y') if X is—
> (a) Y's spouse or civil partner,
> (b) a parent, child or remoter relation in the direct line either of Y or of Y's spouse or civil partner,
> (c) a brother or sister of Y or of Y's spouse or civil partner, or
> (d) the spouse or civil partner of a person falling within para (b) or (c).

However s.174(5) ITEPA brings in a wide exception:

> A loan is not an employment-related loan if—
> (a) it is made by an individual in the normal course of the individual's domestic, family or personal relationships, or
> (b) it is made to a relative of the employee and the employee derives no benefit from it.

In general therefore straightforward loans to relatives of employees or shadow directors are not caught.

### 40.6.5 *Change in employee status*

What if a loan is made to someone who is not an employee (as defined) but later becomes a shadow director? At first sight, leaving an existing loan outstanding would not give rise to a tax charge even after the borrower becomes a shadow director. However, if the loan is repayable on demand, not calling in the loan amounts to a "form of credit". Thus there will be an income tax charge on the benefit in kind of the interest-free loan if a borrower becomes a shadow director (and so becomes an "employee").

What is the position if a loan is made to a shadow director who ceases to be a shadow director? There is no charge on a loan to a former employee. This was deliberate. EN ITEPA provides:

> 76. Where the Schedule E legislation provides that an amount shall be treated as an emolument of an employment only if provided in a year when the employment is held, this Act reproduces that limitation. The sections in the benefits code make it clear that such amounts or benefits will only be treated as earnings if they are paid/provided in a year in

which the employment is held. If they are paid/provided at any other time they will not be treated as earnings and will be outside the "general earnings" to which section 17 [ITEPA] applies.

### 40.6.6 *Employee coming to work in the UK*

The EI Manual provides:

**26105. Loans in foreign currencies: Taxation of overseas loans** [March 2007]

...

*Taxation of overseas loans in foreign currencies*

An employment-related loan (see EIM26102) made to an employee who comes to work in the UK is within the scope of the beneficial loans rules if:

• the loan is made at a time when the employee's earnings are already chargeable to UK income tax as employment income (for example, if a loan is made after the employee has taken up employment in the UK and is resident and ordinarily resident in the UK for the year in which the loan is made); or

• the loan is made in contemplation of the employee working or living in the UK (for example, if the loan is made as part of a package with a view to the employee working in the UK); or

• the employee, at a time when the employee's earnings are chargeable to UK income tax as employment income, in any way facilitates the continuation of a loan which was already in existence before the employee came to work in the UK.

As far as the final bullet is concerned, this is relevant where, for example, the loan is made not by the employer but by a third party such as a bank which is not connected with the employer and where the capital repayments and interest are deducted from the employee's salary. In these circumstances, the question is whether the loan continues when the employee is in the UK without any further involvement by the employer, or whether the employer does something which makes it easier for the employee to continue to have the loan.

An employer would not be facilitating the continuation of a loan merely because

• the loan is conditional on the employee continuing in the employment, or

• the employer deducts the interest and repayments of capital from the employee's salary.

If the employer pays a subsidy to the lender – for example, by paying

annual interest on behalf of the employee – that would not necessarily mean that the employer was facilitating the continuation of the loan. The subsidy itself might however be taxable as an employment-related benefit under Section 201 ITEPA.
On the other hand the employer would be facilitating the continuation of the loan if
• the loan was conditional on the employer continuing to make regular payments to subsidise the interest which the employer might cease to make at any time, or
• the employer chose month by month or year by year whether to subsidise the loan.

## 40.7 Foreign currency loan

There is (somewhat miserly) provision for foreign currency loans. Section 181 ITEPA provides:

(1) "The official rate of interest" for the purposes of this Chapter means the rate applicable under section 178 of FA 1989 (general power of Treasury to specify rates of interest).
(2) Regulations under that section may make different provision in relation to a loan if—
(a) it was made in the currency of a country or territory outside the United Kingdom, and
(b) the employee normally lives in that country or territory, and has actually lived there at some time in the period of 6 years ending with the tax year in question.

The EIM provides:

**26106. Official rates for certain foreign currencies** [March 2007]

| Currency | Period from | Period to | Official Rate |
|---|---|---|---|
| Japanese Yen | 6 June 1994 | | 3.9% |
| Swiss franc | 6 June 1994 | 5 July 1994 | 5.7% |
| | 6 July 1994 | | 5.5% |

There has been no change in either rate since 1994.
[The manual summarises s.181 and continues:] The intention of these rules is to give relief for employees working temporarily in the UK, where interest rates in the overseas country are lower than interest rates in the UK. The relief does not apply to employees who come to the UK

and live here permanently.
The expressions "normally lives" and "lived" have their natural commonsense meaning. An employee who came to work in the UK for four years and who returned home after the four years can be said to "normally live" in the home country. It is not necessary to maintain a residence in the overseas country during the period of employment in the UK. The terms "lives" and "has lived" connote a degree of continuance if not permanence. A holiday in the home country for an employee working in the UK would not in itself be sufficient to establish that the employee had "lived" in the overseas country within the meaning of these rules. "Living" implies more than returning for a short holiday.

## 40.8 Transactions in securities

### 40.8.1 *Introduction*

The provisions relating to transactions in securities ("**the TIS provisions**") require a book to themselves. This chapter focuses on the points most relevant to the themes of this book.
Section 684 ITA provides:

(1) This section applies to a person where—
(a) the person is a party to a transaction in securities or two or more transactions in securities (see subsection (2)),
(b) the circumstances are covered by section 685 and not excluded by section 686,
(c) the main purpose, or one of the main purposes, of the person in being a party to the transaction in securities, or any of the transactions in securities, is to obtain an income tax advantage, and
(d) the person obtains an income tax advantage in consequence of the transaction or the combined effect of the transactions.

### 40.8.2 *"Transaction in securities"*

This expression is defined in s.684(2) ITA:

In this Chapter "transaction in securities" means a transaction, of whatever description, relating to securities, and includes in particular—
(a) the purchase, sale or exchange of securities,
(b) issuing or securing the issue of new securities,
(c) applying or subscribing for new securities, and

(d) altering or securing the alteration of the rights attached to securities.

A sale of shares is of course a transaction in securities. A redemption of debentures is caught.[13]

### 40.8.3 *"Securities"*

"Securities" is defined in s.713 ITA:

> "securities"—
> (a) includes shares and stock, and
> (b) in relation to a company not limited by shares (whether or not it has a share capital) also includes a reference to the interest of a member of the company as such, whatever the form of that interest.

## 40.9 "Income tax advantage"

"Income tax advantage" is defined in s.687 ITA:

> (1) For the purposes of this Chapter the person obtains an income tax advantage if—
> (a) the amount of any income tax which would be payable by the person in respect of the relevant consideration if it constituted a qualifying distribution exceeds the amount of any capital gains tax payable in respect of it, or
> (b) income tax would be payable by the person in respect of the relevant consideration if it constituted a qualifying distribution and no capital gains tax is payable in respect of it.
> (2) So much of the relevant consideration as exceeds the maximum amount that could in any circumstances have been paid to the person by way of a qualifying distribution at the time when the relevant consideration is received is to be left out of account for the purposes of subsection (1).
> (3) The amount of the income tax advantage is the amount of the excess or (if no capital gains tax is payable) the amount of the income tax which would be payable.
> (4) In this section "relevant consideration" has the same meaning as in section 685.

13 This is self-evident but if authority is needed, see *IRC v Parker* 43 TC 396 at p.434.

In what follows the expression is referred to as Income Tax Advantage (initial capitals) to remind readers that it is used in a defined and artificial sense.

Is a loan received "in consequence of a transaction in securities"? This must depend on the circumstances. The first step is to identify the transaction in securities.

## 40.10 The motive defence

Section 684(1)(c) ITA requires:

> the main purpose, or one of the main purposes, of the person in being a party to the transaction in securities, or any of the transactions in securities, is to obtain an income tax advantage

I refer to this as **"the motive defence"**.

## 40.11 The TIS circumstances

Section 685 ITA provides:

> (1) The circumstances covered by this section are circumstances where condition A or condition B is met.

I refer to "**TIS circumstances condition A and B**" to avoid confusion with the myriad other conditions in ITA.

> (2) Condition A is that, as a result of the transaction in securities or any one or more of the transactions in securities, the person receives relevant consideration in connection with—
> (a) the distribution, transfer or realisation of assets of a close company,
> (b) the application of assets of a close company in discharge of liabilities, or
> (c) the direct or indirect transfer of assets of one close company to another close company,
> and does not pay or bear income tax on the consideration (apart from this Chapter).
> (3) Condition B is that—
> (a) the person receives relevant consideration in connection with the transaction in securities or any one or more of the transactions in

securities,
(b) two or more close companies are concerned in the transaction or transactions in securities concerned, and
(c) the person does not pay or bear income tax on the consideration (apart from this Chapter).

The person need not receive the consideration directly from the company.[14]

### 40.11.1 *Relevant consideration*

Section 685 ITA provides:

> (4) In a case within subsection (2)(a) or (b) "relevant consideration" means consideration which—
> (a) is or represents the value of—
> (i) assets which are available for distribution by way of dividend by the company, or
> (ii) assets which would have been so available apart from anything done by the company,
> (b) is received in respect of future receipts of the company, or
> (c) is or represents the value of trading stock of the company.
> (5) In a case within subsection (2)(c) or (3) "relevant consideration" means consideration which consists of any share capital or any security issued by a close company and which is or represents the value of assets which—
> (a) are available for distribution by way of dividend by the company,
> (b) would have been so available apart from anything done by the company, or
> (c) are trading stock of the company.

"Consideration" has an artificial definition. Section 685(8) ITA provides:

> References in this section to the receipt of consideration include references to the receipt of any money or money's worth.

Section 685(6) ITA restricts the concept of assets:

14 This is self-evident but if authority is needed see *IRC v Wiggins* 53 TC 639.

> The references in subsection (2)(a) and (b) to assets do not include assets which are shown to represent a return of sums paid by subscribers on the issue of securities, despite the fact that under the law of the country in which the company is incorporated assets of that description are available for distribution by way of dividend.

Section 685(7) ITA restricts the concept of share capital:

> So far as subsection (2)(c) or (3) relates to share capital other than redeemable share capital, it applies only so far as the share capital is repaid (on a winding up or otherwise); and for this purpose any distribution made in respect of any shares on a winding up or dissolution of the company is to be treated as a repayment of share capital.

### 40.11.2 *Miscellaneous definitions*

Section 685(9) ITA provides:

> In this section—
> "security" includes securities not creating or evidencing a charge on assets;
> "share" includes stock and any other interest of a member in a company.

## 40.12 Discussion

### 40.12.1 *Loan to individual 100% shareholder*

Suppose a company is wholly owned by a UK resident individual ("B"), and the company lends interest-free to B.

B obtains an income tax advantage.

Are the TIS circumstances satisfied? B receives a non-taxable sum. There is a transfer of assets (the loan). However, does B receive the sum "in connection" with a transfer of assets? If the company already had the cash, then the only "transfer of assets" is the loan itself. Is the loan connected with itself? The answer must be, no. If the company had to sell assets in order to raise cash to make the loan, that sale would be a "transfer of assets" and the circumstances would be satisfied.

None of this matters unless there is a transaction in securities. The loan is not itself a transaction in securities.

If the company had to sell securities in order to raise funds to make the loan, then the loan may be said to be in consequence of that sale. If the company already possessed the cash, or acquired it without a transaction in securities, then s.684 does not apply.

Even if there is a transaction in securities, the escape clause may apply if the transaction is for commercial reasons.

40.12.2 *Loan to discretionary trust*

Suppose the company is held by a non-resident discretionary trust, and lends interest-free to the trustees. The trustees do not obtain an income tax advantage. The trustees would not have been taxable on a dividend.

Suppose the trust is settlor-interested. If the settlor ("S") is UK resident and domiciled S obtains an income tax advantage. (What if S was a remittance basis taxpayer? There is no IT advantage unless the proceeds are received in the UK.)

However, S does not receive distributable consideration so the TIS circumstances are not satisfied even if S does obtain an income tax advantage.[15]

15 *Hague v IRC* 44 TC 619.

CHAPTER FORTY ONE

# RATES OF TAX AND PERSONAL ALLOWANCES

## 41.1 IT rates – Introduction

A full discussion of rates of income tax would need a very long chapter. I concentrate on two common types of income: interest and dividends. Rates of tax on trustees and PRs are not considered here.

It may be helpful first of all to list the seven possible rates of income tax on individuals for which ITA provides terminology:

| **Name** | **Rate** | **Applicable to** |
|---|---|---|
| *Non-dividends* | | |
| Starting rate for savings | 10% | Savings income up to starting rate limit |
| Basic rate | 20% | Other income up to basic rate limit |
| Higher rate | 40% | Income above basic rate limit |
| Additional Rate | 50% | Income above higher rate limit |
| *Dividend income* | | |
| Dividend ordinary rate | 10% | Dividends up to basic rate limit |
| Dividend upper rate | 32.5% | Dividends above basic rate limit |
| Dividend additional rate | 42.5% | Dividends above higher rate limit |

The terminology is somewhat inapt. The (so called) "higher rate" is actually an intermediate rate between the basic rate and the top rate (unhelpfully named the "additional rate"). Similarly the dividend upper rate is an intermediate rate between the dividend ordinary rate (which is not "ordinary") and the top dividend rate (unhelpfully named the dividend additional rate). I reluctantly adopt the statutory terminology since anything else is even more confusing.

The effective rate on dividends is different from the rates set out above because one must allow for the tax credit and grossing up: the effective rates on net dividends are:

| Name | Effective Rate |
|---|---|
| Dividend ordinary rate | 0% |
| Dividend upper rate | 25% |
| Dividend additional rate | 36.11% |

## 41.2 Basic/higher/additional rates

Section 10 ITA introduces the basic/higher/additional rates:

> (2) Income tax on an individual's income up to the basic rate limit is charged at the basic rate (except to the extent that, in accordance with section 12, it is charged at the starting rate for savings).
> (3) Income tax is charged at the higher rate on an individual's income above the basic rate limit and up to the higher rate limit.
> (3A) Income tax is charged at the additional rate on an individual's income above the higher rate limit.

These rates apply unless disapplied by any other provisions. Section 10(4) provides:

> This section is subject to—
> section 13 (income charged at the dividend ordinary and dividend upper rates: individuals), and
> any other provisions of the Income Tax Acts which provide for income of an individual to be charged at different rates of income tax in some circumstances.

The important provisions for our purposes are ss.12 and 13 ITA.

## 41.3 Starting rate for savings income

Section 12(1) ITA provides:

> Income tax is charged at the starting rate for savings (rather than the basic rate) on so much of an individual's income up to the starting rate limit for savings as is savings income.

This replaces the basic rate with a different (more favourable) rate, the starting rate for savings.

### 41.3.1 *"Savings income"*

Savings income is defined in s.18 ITA:

> (1) This section applies for the purposes of the Income Tax Acts.
> (2) "Savings income" is income—
> (a) which is within subsection (3) or (4), and
> (b) which is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).

There are five categories of savings income within s.18(3) and (4):

> (3) Income is within this subsection if it is—
> (a) income chargeable under Chapter 2 of Part 4 of ITTOIA 2005 (interest),
> (b) income chargeable under Chapter 7 of Part 4 of ITTOIA 2005 (purchased life annuity payments), other than income from annuities specified in section 718(2) of that Act (annuities purchased from certain life assurance premium payments or under wills etc),
> (c) income chargeable under Chapter 8 of Part 4 of ITTOIA 2005 (profits from deeply discounted securities), or
> (d) income chargeable under Chapter 2 of Part 12 of this Act (accrued income profits).
> (4) Income is within this subsection if—
> (a) it is chargeable under Chapter 9 of Part 4 of ITTOIA 2005 (gains from contracts for life insurance etc), and
> (b) an individual is, or personal representatives are, liable for income tax on it (under section 465 or 466 of that Act).

"Savings income" does not properly describe these disparate categories of income, but it serves as a short label and there is no better term.

In short, the rates of tax on:
(1) UK interest; and
(2) foreign interest when the arising basis applies
are the starting/basic/higher/additional rates, 10%/20%/40%/50%.

### 41.3.2 *Rates of tax on interest under remittance basis*

If the remittance basis applies, foreign interest income[1] is taxed at the **basic**/higher/additional rates, **20%**/40%/50%. This is achieved by the clumsy but effective technique of providing that such income is not "savings income". How much is at stake? At most the difference between the starting rate and the basic rate, for income up to the starting rate limit. In 2010/11, this is 10% of £2,440 = £244.

Before the 2008 reforms I said:

> There is a (perhaps good) reason for dealing with foreign interest income in this way. A UK resident foreign domiciled individual will often have different types of foreign income. If he remitted only some of his income, it would be necessary, in the absence of this rule, to investigate whether the remitted income represents interest (taxable at 10%) or some other source of income (taxable at 20%). Because of this rule it is not necessary to ask this question.

Now that the ITA mixed fund rule requires precisely that investigation, this has ceased to be a valid reason. But the amount of tax involved is trivial.

## 41.4 Rates of tax on dividend income

### 41.4.1 *"Dividend income"*

Dividend income is defined in s.19 ITA:

> (1) This section applies for the purposes of the Income Tax Acts.
> (2) "Dividend income" is income which is—
> (a) chargeable under Chapter 3 of Part 4 of ITTOIA 2005 (dividends etc from UK resident companies),
> (b) chargeable under Chapter 4 of that Part (dividends from non-UK resident companies),
> (c) chargeable under Chapter 5 of that Part (stock dividends from UK resident companies),
> (d) chargeable under Chapter 6 of that Part (release of loan to participator in close company), or

1 Including the interest-like income of the other categories specified in s.18(4) ITA.

> (e) a relevant foreign distribution chargeable under Chapter 8 of Part 5 of ITTOIA 2005 (income not otherwise charged).
> (3) In subsection (2) "relevant foreign distribution" means a distribution of a non-UK resident company which—
> (a) is not chargeable under Chapter 4 of Part 4 of ITTOIA 2005, but
> (b) would be chargeable under Chapter 3 of that Part if the company were UK resident.

"Dividend income" does not properly describe these categories of income, but it serves as a short label. "Dividend-type income" would be slightly more accurate but it seems best to adopt the statutory terminology.

41.4.2 *Rates of tax on dividend income*

Section 13 ITA provides:

> (1) Income tax is charged at the dividend ordinary rate on an individual's income which—
> (a) is dividend income,
> (b) would otherwise be charged at the basic rate, and
> (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005 (relevant foreign income charged on the remittance basis).
> (2) Income tax is charged at the dividend upper rate on an individual's income which—
> (a) is dividend income,
> (b) would otherwise be charged at the higher rate, and
> (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005.
> (2A) Income tax is charged at the dividend additional rate on an individual's income which—
> (a) is dividend income,
> (b) would otherwise be charged at the additional rate, and
> (c) is not relevant foreign income charged in accordance with section 832 of ITTOIA 2005.

The scheme of s.13 is to replace the basic/higher/additional rates with different rates. Thus the rates of tax on UK dividend income are the dividend ordinary/upper/additional rates, 10%/32.5/42.5%. After allowing the tax credit and grossing up, the effective rates on net dividends are 0%/25%/36.11%.

Foreign dividend income is taxed at the dividend ordinary/upper rates, 10%/32.5% when the arising basis applies, and with benefit of a tax credit and grossing up if the complex conditions of s.397AA ITTOIA are met.

### 41.4.3 *Foreign dividend income under remittance basis*

If the remittance basis applies, foreign dividend income taxed on the remittance basis does not fall within s.13 as it does not meet the condition of s.13(1)(c) or s.13(2)(c) or s.13(2A)(c). This is consistent with the treatment of foreign interest income. However unlike foreign interest income, the amounts involved may be very substantial. The result is that for a remittance basis taxpayer who remits, foreign dividend income is taxed more heavily than UK dividend income. If the dividend income is from another MS, the discrimination is contrary to EU law.

## 41.5 Settlor-interested trust: rates of tax on settlor

Section 619 ITTOIA provides (so far as relevant):

> **619 Charge to tax under Chapter 5**
> (1) Income tax is charged on—
> (a) income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest), ...
> (2) For the purposes of Chapter 2 of Part 2 of ITA 2007 (rates at which income tax is charged), where income of another person is treated as income of the settlor and is charged to tax under subsection (1)(a) ... above, it shall be charged in accordance with whichever provisions of the Income Tax Acts would have been applied in charging it if it had arisen directly to the settlor.

This is a welcome simplification from the rules which applied before 2006. Unfortunately the old rules applied for the IT settlement provisions and for s.720. The FA 2006 simplified the settlement provisions but overlooked s.720! So the old rules still need to be considered in that context.

What about foreign dividend income which qualifies for the s.624 remittance basis, but is later remitted and becomes taxable under the s.624

remittance basis?[2] This is taxable at the dividend ordinary/upper/additional rates, 10%/32.5%/42.5%.

## 41.6 Rates of tax on transferor within s.720 ITA

Section 745 ITA provides:

> (1) Income tax at the basic rate, the starting rate for savings or the dividend ordinary rate is not charged under section 720 or 727 in respect of any income so far as it has borne tax at that rate by deduction or otherwise.
> (2) Subsection (1) does not affect the tax charged if section 724(2) applies (benefit provided out of income of person abroad charged in year of receipt).
> (3) Subsection (4) applies to any income that—
> (a) is treated as arising to an individual under section 721 or 728, and
> (b) apart from this Chapter is dividend income,
> so far as subsection (1) does not apply to the income.
> (4) The charge to income tax under section 720 or, as the case may be, section 727 operates by treating the income as if it were income within section 19(2) (meaning of "dividend income").

So there are two rules: one rule for dividend income; and another rule for other income. Dividend income is taxed at the rates usually applied to dividends: the dividend ordinary/dividend upper rates, with the benefit of the tax credit in the case of UK dividends. This also applies to foreign dividends of a foreign domiciled transferor if the usual s.720 remittance basis does not apply (because the dividends are received in the UK).

Section 745 ITA provides a special rule for dividend income. It says nothing about interest. Accordingly, interest within s.720 is taxed at the basic/higher/additional rates of 20%/40%/50%.

## 41.7 Entitlement to personal allowances

### 41.7.1 *Entitlement to personal allowances under UK domestic law*

There are eight categories of individuals who qualify for personal

---

2 See 24.5 (Section 624 remittance basis).

allowances under chapters 2 and 3 part 3 ITA. Section 56(2) ITA 2007 sets out the first of these (UK residents):

> The individual meets the requirements of this section if the individual—
> (a) is UK resident for the tax year, or
> (b) meets the condition in subsection (3).

Section 56(3) ITA 2007 sets out the next seven categories. The most important category is EEA nationals. These are presumably included because a relief for UK residents but not for EEA nationals would be incompatible with EU freedom of establishment.[3] The rest is a strange ragbag:

> An individual meets the condition in this subsection if, at any time in the tax year, the individual—
> (za) is a national of an EEA state,
> (a) is resident in the Isle of Man or the Channel Islands,[4]
> (b) has previously resided in the UK and is resident abroad for the sake of the health of—
> (i) the individual, or
> (ii) a member of the individual's family who is resident with the individual,
> (c) is a person who is or has been employed in the service of the Crown,
> (d) is employed in the service of any territory under Her Majesty's protection,
> (e) is employed in the service of a missionary society, or
> (f) is a person whose late spouse or late civil partner was employed in the service of the Crown.

*Commentary*

There is scope here for simplification: the case for repeal of the entire list, apart from EEA nationals, seems very strong.

### 41.7.2 *Commonwealth citizens*

Before 2010/11 there was an additional category, namely, Commonwealth

3 See 51.3 (Freedom of establishment).

4 This category has been included since 1910: I would be grateful for any reader who could suggest the reason.

citizens. The tax law rewrite considered that this rule was contrary to the Human Rights Act.[5] Accordingly this category was deleted by the FA 2009. EN FA 2009 provides:

> 14. Previously, there was an entitlement for some individuals to claim purely by virtue of being a Commonwealth citizen but by meeting no other condition. Commonwealth citizens will no longer qualify for personal allowances, married couple's allowance, blind person's allowance and relief for life assurance premiums by reference to their Commonwealth citizenship status alone. They may, of course, continue to qualify under the other conditions or through DTA provisions if appropriate.
> 15. This change will mainly affect citizens of the following countries: Bahamas; Cameroon; Cook Islands; Dominica; Maldives; Mozambique; Nauru; Niue; St Lucia; St Vincent & the Grenadines; Samoa; Tanzania; Tonga; and Vanuatu.

The objection was that granting personal allowances to an individual solely on the basis that they are a Commonwealth citizen would be discriminatory on the grounds of nationality.[6] The rewrite did not consider that there was the unlawful discrimination in providing allowances to EEA nationals, as the distinction between EEA nationals and the rest of the world is justified by the distinct legal relationship which the UK has with the EEA.[7]

This rule was just about the last remaining example of special treatment for commonwealth citizens in UK tax legislation, so the issue does not have immediate tax implications in other areas but it does illustrate two interesting points: a significant restriction on the UK's ability to impose tax; and the (in)significance of the commonwealth (at least in a Human Rights context); for the tax law rewrite rejected the argument that the legal relationship which the UK has with the commonwealth would justify the discrimination).

---

5 EN ITA para 135.

6 Art.14 ECHR (Prohibition of discrimination) in conjunction with Art.1 of 1st Protocol (Right to property).

7 Private correspondence.

### 41.7.3 *Personal allowances under DTAs: non-residents*

The last category of individuals entitled to personal allowances relates to DTAs.

The OECD model convention does not affect the rule that personal allowances are limited to UK residents (and other specific categories).[8] However some DTAs do this. For instance, art. 25(1) of the UK/Austria DTA provides:

> Subject to the provisions of paragraph (3) of this Article, individuals who are residents of Austria shall be entitled to the same personal allowances, reliefs and reductions for the purposes of UK tax as British subjects[9] not resident in the UK. ...

Non-resident British subjects qualify for personal allowances as they are nationals of an EEA state (the UK) so individuals who are treaty-resident in Austria will likewise do so.

Sometimes there is a restriction. Article 25(3) provides:

> Nothing in this Convention shall entitle an individual who is a resident of a Contracting State [Austria] and whose income from the other Contracting State [UK] consists solely of dividends, interest or royalties (or solely of any combination thereof) to the personal allowances, reliefs and reductions of the kind referred to in this Article for the purposes of taxation in that other Contracting State.

One could avoid the restriction by procuring income other than dividends, interest and royalties (maybe annual payments) but the amounts involved are small.

As far as I can see, the treaties which confer personal allowances are:

---

8 OECD model Convention art. 24(2) specifically so provides:
"This provision shall not be construed as obliging a Contracting State to grant to residents of the other Contracting State any personal allowances, reliefs and reductions for taxation purposes on account of civil status or family responsibilities which it grants to its own residents."

9 Defined in s.51 British Nationality Act 1981.

| | |
|---|---|
| Austria* | Myanmar (formerly Burma) |
| Belgium* | Namibia |
| Fiji | Netherlands* |
| Greece | Portugal* |
| Ireland | Swaziland |
| Kenya* | Sweden* |
| Luxembourg* | Switzerland* |
| Mauritius* | Zambia* |

* includes restriction where income consists solely of dividends, interest or royalties

This form is found only in a small group of older DTAs whose number will continue to diminish. However the RDR Manual provides:

> **10340 Non-resident individuals who may claim Personal Allowances under the provisions of Double Taxation Agreements** [March 2011]
> Non-resident individuals who satisfy one of the conditions below are entitled to United Kingdom Personal Allowances
> [1] an individual who is a national of Israel or Jamaica or
> [2] [EEA Nationals] or
> [3] an individual who is a national and also a resident of Argentina, Australia, Azerbaijan, Bangladesh, Belarus, Bolivia, Bosnia and Herzegovina*,Botswana, Canada, China, Côte d'Ivoire (Ivory Coast), Croatia*, Egypt, Gambia, India, Indonesia, Japan, Jordan, Kazakhstan, Korea, Lesotho, Malaysia, Montenegro*, Morocco, New Zealand, Nigeria, Oman, Pakistan, Papua New Guinea, Philippines, Russian Federation, Serbia*, South Africa, Sri Lanka, Sudan, Switzerland, Taiwan, Tajikistan, Thailand, Trinidad and Tobago, Tunisia, Turkey, Turkmenistan, Uganda, Ukraine, Uzbekistan, Venezuela, Vietnam, Federal Republic of Yugoslavia*, Zimbabwe
> (*Note: Entitlement continues under the Double Taxation Treaty the UK had with the former Yugoslavia until such time as a new agreement takes effect.) or
> [4] an individual who is a resident of Austria, Barbados, Belgium, Fiji, Germany, Greece, Ireland, Kenya, Luxembourg, Mauritius, Myanmar (Burma), Namibia, Netherlands, Portugal, Swaziland, Sweden, Switzerland, Zambia
> (Please note: If individual is a resident, but not a citizen of Austria,

Belgium, France,[10] Germany, Kenya, Luxembourg, Mauritius, Netherlands, Portugal, Sweden, Switzerland or Zambia, they are not entitled to personal allowances if their income consists solely of dividends, interest and royalties or any combination of them).

Category [3] is essentially the same as my list set out above, except that Germany should be deleted following the new DTA (dated 2010) and Barbados is also in the list in error. I do not understand why the countries in categories [1] and [2] are in this list, as their DTAs do not seem to provide for personal allowances. Yet this RDR passage was updated in March 2011. I would be grateful for any reader who could explain this.

The form to claim the relief is R43.

### 41.7.4 *Personal allowances under DTAs: remittance basis claimants*

Remittance basis claimants (who would otherwise qualify for personal allowances as they are by definition UK resident) lose their personal allowances (and CGT annual exemption) by making a remittance basis claim.[11] This disallowance is overriden (so the right to personal allowances and CGT annual exemption is restored) by a DTA if applicable.[12] The treaties which confer personal allowances are those set out in the list above, with the exception of Myanmar and Greece.[13]

This treaty relief only affects remittance basis taxpayers subject to the £30k remittance basis charge (ie long-term residents) where:

(1) the individual is UK resident (so a remittance basis claim is made); and
(2) the individual is treaty-resident in the jurisdiction concerned (so that DTA relief applies).

So this point will not be a common one, though it will arise from time to time.

---

10 France is listed here in error.

11 See 9.10 (Effect of remittance basis claim on personal allowances).

12 Jane Kennedy (Financial Secretary to the Treasury) accepted this in the public Bill committee debate on the Finance Bill, Hansard 19 June 2008 col 818, accessible *www.publications.parliament.uk/pa/cm200708/cmpublic/finance/080619/am/80619s05.htm*.

13 The antique treaties of Myanmar and Greece only grant personal allowances to residents of Myanmar/Greece who are not domestic-law UK resident; they do not help domestic-law UK residents even if also residents of Myanmar/Greece.

## 41.8 Rates of CGT

Section 4 TCGA (as introduced by para 2 Sch 1 F(No.2)A 2010) provides:

(1) This section makes provision about the rates at which capital gains tax is charged, but is subject to section 169N (rate in case of claim for entrepreneurs' relief).
(2) Subject to the following provisions of this section, the rate of capital gains tax in respect of gains accruing to a person in a tax year is 18%.
(3) The rate of capital gains tax in respect of gains accruing to—
(a) the trustees of a settlement, or
(b) the personal representatives of a deceased person,
in a tax year is 28%.
(4) If income tax is chargeable at the higher rate or the dividend upper rate in respect of any part of the income of an individual for a tax year, the rate of capital gains tax in respect of gains accruing to the individual in the year is 28%.
(5) If no income tax is chargeable at the higher rate or the dividend upper rate in respect of the income of an individual for a tax year, but the amount on which the individual is chargeable to capital gains tax exceeds the unused part of the individual's basic rate band, the rate of capital gains tax on the excess is 28%.
(6) [This relates to entrepreneur relief not discussed here]
(7) The reference in subsection (5) to the unused part of an individual's basic rate band is a reference to the amount by which the basic rate limit exceeds the individual's Step 3 income.
(8) For the purposes of this section, "the Step 3 income" of an individual means the individual's net income less allowances deducted at Step 3 of the calculation in section 23 of ITA 2007 for the purpose of calculating the individual's income tax liability.
(9) Section 989 of ITA 2007 (the definitions) applies for the purposes of this section as it applies for income tax purposes.

Para 18 Sch 1 F(No.2)A 2010 provides the transitional rule:

In relation to the tax year 2010-11—
(a) the reference in section 4(2), (3) and (4) of TCGA 1992 (as substituted by paragraph 2) to gains accruing in a tax year, and
(b) the reference in section 4(5) of that Act (as so substituted) to the amount on which the individual is chargeable to capital gains tax,
do not include gains accruing before 23 June 2010.

CHAPTER FORTY TWO

# NATIONAL INSURANCE CONTRIBUTIONS

## 42.1 NICs – Introduction

NICs should be regarded as a collection of seven more or less distinct taxes. Section 1(2) SSCBA classifies them semi-numerically:

> Contributions under this Part of this Act shall be of the following six classes—
> (a) Class 1, earnings-related, payable under section 6 below, being—
> (i) primary Class 1 contributions from employed earners; and
> (ii) secondary Class 1 contributions from employers and other persons paying earnings;
> (b) Class 1A, payable under section 10 below by persons liable to pay secondary Class 1 contributions and certain other persons;
> (bb) Class 1B, payable under section 10A below by persons who are accountable to the Inland Revenue in respect of income tax on general earnings in accordance with a PAYE settlement agreement;
> (c) Class 2, flat-rate, payable weekly under section 11 below by self-employed earners;
> (d) Class 3, payable under section 13 or 13A below by earners and others voluntarily with a view to providing entitlement to benefit, or making up entitlement; and
> (e) Class 4, payable under section 15 below in respect of the profits or gains of a trade, profession or vocation, or under section 18 below in respect of equivalent earnings.

Each class of NIC requires a book to itself, except for class 1 which requires many volumes. I focus on matters closest to the themes of this book. I do not consider the special rules for mariners, aircrew, diplomats and service personnel.

SSCBA does not apply in Northern Ireland[1] so it refers to "Great Britain". (Northern Ireland has its own equivalent legislation not discussed here.) SSCR applies in both jurisdictions, so it usually refers to the UK, or to "GB and Northern Ireland".

## 42.2 Meaning of "employed" and "self-employed"

Section 2(1) SSCBA provides:

> (1) In this Part of this Act and Parts II to V below—
> (a) "employed earner" means a person who is gainfully employed in Great Britain either under a contract of service, or in an office (including elective office)[2] with general earnings; and
> (b) "self-employed earner" means a person who is gainfully employed in Great Britain otherwise than in employed earner's employment (whether or not he is also employed in such employment).

The SSCBA, confusingly, (mis)defines the word "employment" to include trades and professions.[3] But in the definition the terms "employed" and "self-employed" are used in more or less their ordinary meanings. (To add to the confusion, the SSCER deems some persons actually self-employed to be employees for NIC purposes and vice versa.)

In this chapter I use the word "**employee**" to mean an "employed earner" and "**self-employed**" means a "self-employed earner".

## 42.3 Meaning of "secondary contributor"

Section 6(4) SSCBA provides:

> The primary and secondary Class 1 contributions referred to in subsection (1) above are payable as follows—

---

1 Section 177 SSCBA provides:
"(5) The following provisions extend to Northern Ireland—
section 16 and Schedule 2; section 116(2); and this section.
(6) Except as provided by this section, this Act does not extend to Northern Ireland."

2 The odd expression "elective office" is not defined and the words in brackets are otiose.

3 Section 122(1) SSCBA.

(a) the primary contribution shall be the liability of the earner; and
(b) the secondary contribution shall be the liability of the secondary contributor; …

The identity of the secondary contributor is clearly crucial.
Section 7(1) SSCBA provides:

> For the purposes of this Act, the "secondary contributor" in relation to any payment of earnings to or for the benefit of an employed earner, is—
> (a) in the case of an earner employed under a contract of service, his employer;
> (b) in the case of an earner employed in an office with general earnings, either—
> (i) such person as may be prescribed in relation to that office; or
> (ii) if no person is prescribed, the government department, public authority or body of persons responsible for paying the general earnings of the office.

SSCER reg. 5(1) prevents avoidance by foreign employers seconding to the UK:

> For the purposes of section 4 of the Act[4] (Class 1 contributions), in relation to any payment of earnings to or for the benefit of an employed earner in any employment described in any paragraph in column (A) of Schedule 3 to these regulations, the person specified in the corresponding paragraph in column (B) of that Schedule shall be treated as the secondary Class 1 contributor in relation to that employed earner.
> ...

| **Column (A)** | **Column (B)** |
|---|---|
| 9. Employment by a foreign employer where—<br>(a) in pursuance of that employment the personal service of the person employed is made available to a host employer; and<br>(b) the personal service is rendered for the purposes of the business of that host employer; and | 9. The host employer to whom the personal service of the person employed is made available. |

4 Section 4 Social Security Act 1975 is now s.7 SSCBA.

(c) that personal service for the host employer begins on or after 6th April 1994.

The identity of the employer is a question of contract/employment law.[5]

## 42.4 Territorial Limitation

Tax Bulletin 79 explains:

> For NIC purposes the world can be usefully divided into:
> **European Economic Area (EEA)**
> EC Treaty and EC Regulation [formerly 1408/71 and now 883/2004] applies to employees moving between EEA Member States to work. It modifies SSCBA 1992 and regulations.
> **RA/DCC Countries**[6]
> Bi-lateral Social Security agreements modify SSCBA 1992 and regulations.
> **Rest of The World** ("ROW")
> SSCBA 1992 and contributions regulations are unmodified.

Reciprocal agreements are not considered in this book. I first consider what the NI Manual calls "ROW" [rest of the world] rules, and then the EU rules.

---

5 Tax Bulletin 49 provides:
"We would not seek to claim in isolation that there is a place of business [in the UK] where the overseas provider legally, and in exchange for a payment commensurate with the service, sub-contracts services to a UK business. And similarly we would also not normally attempt to claim in isolation that the unconnected UK business is the employer if it is genuinely not paying the mariners directly." (This has been flagged as no longer current, however the author is not currently aware of this passage being moved elsewhere.)
This is only relevant to mariners as others are caught by the SSCER.

6 These countries are: Barbados, Bermuda, Bosnia-Herzegovina, Canada, Croatia, Guernsey, Israel, Jamaica, Japan, Jersey, Macedonia, Mauritius, Montenegro, New Zealand (Social Security Benefits only), Philippines, Republic of Korea, Serbia, Turkey, USA.

## 42.5 ROW: Employed in GB

Unless the individual is employed *in* GB, they are not an employed or self-employed earner, and so in principle no NIC liability arises.[7] I refer to this as the "**employed in GB rule**".

Tax Bulletin 79 explains:

> This requires that employment duties take place here. However, this is wide enough to allow for some temporary or incidental duties of the employment to be performed outside the UK, if the UK is the place where the employment duties are usually performed.

### 42.5.1 *First year abroad*

Reg. 146 SSCR provides an extension to the employed in GB rule:

> (1) Where an earner is gainfully employed outside the United Kingdom, and that employment, if it had been in Great Britain or Northern Ireland, would have been employed earner's employment, that employment outside the United Kingdom shall be treated as employed earner's employment for the period for which under para (2)(a) contributions are payable in respect of the earnings paid to the earner in respect of that employment provided that—
> (a) the employer has a place of business in Great Britain or Northern Ireland (as the case may be);
> (b) the earner is ordinarily resident in Great Britain or Northern Ireland (as the case may be); and
> (c) immediately before the commencement of the employment the earner was resident in Great Britain or Northern Ireland (as the case may be).
> (2) Where, under para (1), the employment outside the United Kingdom is treated as an employed earner's employment, the following provisions shall apply in respect of the payment of contributions—
> (a) primary and secondary Class 1 contributions shall be payable in respect of any payment of earnings for the employment outside the United Kingdom during the period of 52 contribution weeks from the beginning of the contribution week in which that employment begins to the same extent as that to which such contributions would

7 See 42.2 (Meaning of "employed" and "self-employed").

have been payable if the employment had been in Great Britain or Northern Ireland (as the case may be);

(b) subject to regulations 148 and 148A, any earner by or in respect of whom contributions are or have been payable under sub-para (a) shall be entitled to pay Class 3 contributions in respect of any year during which the earner is outside the United Kingdom from and including that in which the employment outside the United Kingdom begins until that in which he next returns to Great Britain or Northern Ireland (as the case may be);

(c) Class 1A contributions and Class 1B contributions shall be payable in respect of the period specified in sub-para (a).

Thus employment outside the UK is treated as employment in the UK (and so subject to NIC) for 52 weeks, provided the following conditions are satisfied:

(1) The employer has a place of business in the UK.
(2) The employee is ordinarily resident in UK.
(3) The employee was UK resident immediately before the employment commenced.

NI Manual provides:

**33027Class 1: Workers Going to and Coming from Abroad – ROW – Change of employment**

*Change of employment overseas with the same employer*

The 52 week period of continuing liability may cease when an employee changes employment. Whether or not an employee has entered into a new employment will be a question of fact. The contracts of employment will indicate if this were so.

*Example*

- Ralph was posted by the UK company to work in Australia for a period of 2 years as a General Manager of the Sydney office
- After 6 months he applied for promotion as a Overseas Sales Executive with a separate department of the UK company
- He was successful and immediately took up his new position in Malaysia

The subsequent posting from Australia to Malaysia would be considered to arise in connection with the new employment with the UK company. The 52 week period would cease.

Had the UK employer simply posted him to Malaysia in connection with the original occupation/employment as a General Manager then the 52 week period would have continued in full.

Whether or not this is actually right depends on the documentation relating to the contract of employment.

## 42.6 ROW: Residence requirements

Section 1(6) SSCBA provides:

> No person shall—
> (a) be liable to pay Class 1, Class 1A, Class 1B or Class 2 contributions unless he fulfils prescribed conditions as to residence or presence in Great Britain;
> (b) be entitled to pay Class 3 contributions unless he fulfils such conditions; or
> (c) be entitled to pay Class 1, Class 1A, Class 1B or Class 2 contributions other than those which he is liable to pay, except so far as he is permitted by regulations to pay them.

Reg. 145 SSCR provides five different sets of residence requirements. These apply in addition to the employed in GB rule.

### 42.6.1 *Primary Class 1 NIC*

Reg. 145(1)(a) SSCR provides that the requirement is:

> as respects liability of an employed earner to pay primary Class 1 contributions in respect of earnings for an employed earner's employment, that the employed earner is resident or present in Great Britain or Northern Ireland (or but for any temporary absence would be present in Great Britain or Northern Ireland) at the time of that employment or is then ordinarily resident in Great Britain or Northern Ireland (as the case may be).

There are four possible territorial connections, and if any one of them is satisfied Primary Class 1 NIC is in principle payable:
(1) Residence in UK.
(2) Presence in UK.
(3) Temporary absence from UK.
(4) Ordinary residence in UK.
Tax Bulletin 79 explains:

> The effect of Regulation 145 (1) SSCR 2001 is to provide for a kind of constructive presence for periods outside the UK which are merely a "temporary absence". This concept of temporary absence requires that:
> i. the person's absence be temporary,
> ii. that if he were not absent he would be present in the UK.
> This means that an employee who has employment based in the UK who goes abroad for a time on a short business trip or holiday abroad, and who departs from or returns to the UK, can continue to be within the UK scheme.
> An example of this would be the person who flies to a board meeting outside the UK and then returns to their UK based employment.

That seems obvious. The Bulletin continues:

> Taken together, Section 2(1)(a) SSCBA 1992 and Regulation 145 (1)(a) SSCR 2001 is enough to keep a person within Class 1 NIC if their employment is based here and their absence abroad is of a temporary or incidental nature. However, crucially, an employee who is not ordinarily resident in the UK and who normally works overseas cannot be said to be merely "temporarily absent" from employed earners employment in the UK if they are departing overseas for a time, to work for their foreign employer. In such a situation, the person is not performing duties which is merely incidental to the employed earner's employment in the UK but is returning to an employment based outside the UK. In the absence of an express contractual provision as to the attribution of the earnings, the earnings must be apportioned between the employed earner employment in the UK and the overseas duties for the foreign employer.

### 42.6.2 *First year in UK exemption*

Reg. 145(2) SSCR provides an exception:

> Where a person is ordinarily neither resident nor employed in the UK and, in pursuance of employment which is mainly employment outside the UK by an employer whose place of business is outside the UK (whether or not he also has a place of business in the UK) that person is employed for a time in Great Britain or Northern Ireland (as the case may be) as an employed earner and, but for the provisions of this paragraph, the provisions of sub-para (a) of para (1) would apply, the conditions prescribed in that sub-paragraph and in sub-para (b) of that

paragraph shall apply subject to the proviso that—

(a) no primary or secondary Class 1 contribution shall be payable in respect of the earnings of the employed earner for such employment;

(b) no Class 1A contribution shall be payable in respect of something which is made available to the employed earner or to a member of his family or household by reason of such employment; and

(c) no Class 1B contribution shall be payable in respect of any PAYE settlement agreement in connection with such employment,[8]

after the date of the earner's last entry into Great Britain or Northern Ireland (as the case may be) and before he has been resident in Great Britain or Northern Ireland (as the case may be) for a continuous period of 52 contribution weeks from the beginning of the contribution week following that in which that date falls.

Thus employment in the UK is not subject to NIC for 52 weeks provided the following conditions are satisfied:

(1) employee not ordinarily resident in UK;
(2) employee not ordinarily employed in UK;
(3) employment mainly outside the UK;
(4) employer has a place of business outside the UK.[9]

NI Manual provides:

**33023 ROW – Exemption** [November 2005]

The exemption lasts until the employee has been resident in GB for a continuous period of 52 weeks starting from the beginning of the contribution week following the week in which the worker arrives in GB to take up employment.

A further 52 week period may commence where an employee returns to the overseas employment and then commences a new secondment in GB.

The exemption does not apply to:

- EEA nationals as this would contravene the principle behind 1408/71 see NIM33005

---

8 I have corrected a disastrous typographical error in the SSCR by inserting a paragraph break here. The last paragraph (beginning "after the date") governs paras (a), (b) and (c). This can be seen to be correct from context and by comparing the predecessor, reg.119(2) SSCR 1979.

9 It might be inferred that the relief only applies if the employer's principal place of business is outside the UK, but the better view is that any place of business outside the UK is sufficient, and this is consistent with reg.146(2).

- RA countries where a person is treated as being ordinarily resident in the UK if they fall within UK domestic legislation see NIM33015
- Employees who intend to work in GB for 3 years or more at the outset. Such employees will be treated as being ordinarily resident.[10]
- To decide whether a person coming to the UK is ordinarily resident in the UK for NIC purposes, apply the tests suggested in NIM33031 and NIM33032.

**33024.**

**ROW - Exemption example**

A doctor works for a hospital in Egypt as a surgeon and sees an advert in a medical journal for surgeons position in Newcastle for a 2 year period. The position will enable him to obtain further advanced surgical qualifications.

He applies and is successful. The Egyptian employer agrees to keep his employment position open until he returns. The doctor signs a contract of employment with the hospital in Newcastle for two years.

In this case the 52 week exemption tests are satisfied. He is not ordinarily resident or employed in GB. He is employed for a time in GB as an employed earner. A major indicator in this example is the continuing employment in Egypt and the employee being able to return after the period of employment in GB.

In order to satisfy the "in pursuance of employment" test the employment in GB must be related to the particular employment that the employee has outside of GB. The fact that the employee may be pursuing their own goals is not relevant. It is characteristic of much skilled work that the employer's interests in a person's improved skills will coincide with the employee's interest in advancing their career and marketability. Provided that the facts support that the employment in GB and obtaining of advanced qualifications (in this case advanced surgical qualifications) are required for the employment abroad then the test may apply

A different conclusion may have been reached if the employment and qualifications obtained in GB were diverse from the employment in Egypt.

### 42.6.3 *Student exemption*

Reg. 145(3) SSCR provides an exception for students and apprentices:

---

10 [Author's Note] I have retained this sub-paragraph which was deleted (I think accidentally) in early 2006.

Where a person to whom para (1)(a) would otherwise apply is not ordinarily resident in the UK and is not a person to whom the provisions of para (2) apply, the proviso in para (2) shall nevertheless apply if either—

(a) during a vacation occurring in a course of full-time studies which that person is pursing [*sic*] outside the UK, that person is gainfully employed under a contract of service in Great Britain or Northern Ireland (as the case may be) in temporary employment of a nature similar or related to that course of studies; or

(b) there exists between him and some other person outside the UK a relationship comparable with the relationship between an apprentice and his master in Great Britain or Northern Ireland (as the case may be) and that person is gainfully employed under a contract of service in Great Britain or Northern Ireland (as the case may be) in employment which began before he attained the age of 25 and which is of a nature similar or related to the employment under the said relationship outside the UK.

### 42.6.4 *Secondary Class 1, Class 1A and 1B NICs*

Reg. 145(1)(b) SSCR provides that the requirement is:

as respect[11] liability to pay secondary Class 1 contributions, Class 1A contributions or Class 1B contributions that the person who, but for any conditions as to residence or presence in Great Britain or Northern Ireland (as the case may be and including the having of a place of business in Great Britain or Northern Ireland),[12] would be the secondary contributor or the person liable for the payment of Class 1B contributions (in this Case referred to as "the employer") is resident or present in Great Britain or Northern Ireland when such contributions become payable or then has a place of business in Great Britain or Northern Ireland (as the case may be), so however that nothing in this

---

11 This is a slip for "*as respects*" … but nothing turns on that.

12 The long phrase beginning "but for" (and continuing to the close of brackets which follows) appears to be otiose. The paragraph means:

"as respects liability to pay secondary Class 1 contributions, Class 1A contributions or Class 1B contributions that the person who is the secondary contributor or the person liable for the payment of Class 1B contributions (in this Case referred to as 'the employer') is resident or present in Great Britain or Northern Ireland when such contributions become payable or then has a place of business in Great Britain or Northern Ireland …"

paragraph shall prevent the employer paying the said contributions if he so wishes.

Thus there are three possible connecting factors and if any of them is satisfied, secondary Class 1 NIC is due:
(1) employer is resident in UK;
(2) employer is present in UK;
(3) employer has a place of business in UK.
The first year in UK and student exemptions may apply.

## 42.7 Primary and Secondary Class 1 NIC: HMRC examples

Tax Bulletin 79 provides:

**Example 1 (Angus)**
**Resident/Not Ordinarily Resident UK - Sent from ROW country to work in the UK - contractual employer in ROW country but seconded to the UK "host" employer.**
**An Australian employer assigns A, who normally works in Australia to the UK for 2 years. Residence status is resident in the UK but not ordinarily resident in years 1 and 2.**
A meets the criteria for a 52 weeks exemption from NIC because he is not ordinarily resident in the UK and he is not ordinarily employed in the UK and is working for his overseas employer and is in the UK in continuance of that employment. His Australian employer has no place of business in the UK.
Once the first 52 weeks period in Regulation 145(2) SSCR 2001 has expired, A will become liable for contributions in the UK. As his contractual employer has no place of business in the UK, the UK "host" employer to whom personal service is made available is the secondary contributor - liable for the employer part of the National Insurance. [Para 9 to Regulation 3, Social Security Categorisation of Earners Regulations 1978].
When he is in the UK, A is in employed earner's employment and meets the residence criteria in Regulation 145 (1) SSCR 2001 because he is present in the UK at the time of his employment.
**A makes a short trip back to Australia in year 2 to brief the Australian company.**
After 14 months in the UK, A returns to Australia for the month of June - 20 days holiday and 5 days working for the Australian company. He then returns to the UK to complete the rest of his assignment. A remains under contract to the Australian company and the costs of his employment in the UK is met by the Australian employer. There is no apportionment of salary specified in the contract. There can be apportionment of his salary for the days working outside the UK.
When A is in earners employment in the UK he is liable for NICs on his salary

because he meets the criteria of residence and presence in Regulation 145 (1) SSCR 2001.

When in Australia, A is not in employed earners employment in the UK - his employment is one which is normally based outside the UK - so that the days working in Australia are not an incidental part of employed earners employment in the UK.

**What if the employment had been funded by the UK company?**

We would consider this a strong indicator that A was performing his duties in Australia for the purposes of the business of the UK "host" employer and his time in Australia was merely a "temporary absence" from employed earner's employment for the purposes of Regulation 145(1) SSCR 2001.

What if there is a letter of secondment - attaching A to his UK employer?

We consider that this would be a strong indicator that A's normal base is the UK and he can be considered to be merely "temporarily absent" for the purposes of Regulation 145(1) SSCR 2001 - the duties in Australia are incidental to the employment in the UK for which he is paid his salary.

**What if A had travelled to China for 3 days to act on behalf of the UK company?**

A's normal base is the UK and he can be considered to be merely "temporarily absent" for the purposes of Regulation 145(1) SSCR 2001 - the duties in China are incidental to the employment in the UK. No apportionment is required.

**What if A had travelled to China for 3 days to act on behalf of the Australian company?**

The duties are not further to the employment in the UK and cannot be regarded as merely a temporary absence. An apportionment is required.

What if A has been sent to the UK and become ordinarily resident here?

If A's normal base is the UK he will be in employed earner's employment in Great Britain. As he is ordinarily resident he meets the residence criteria in Regulation 145(1) SSCR 2001 - the duties in Australia are merely incidental to the employment in the employed earner's employment in the UK for which he is paid his salary. No apportionment is required.

**Exactly how many days amounts to a "temporary absence"?**

Whether an absence is a temporary absence is a question of fact and degree, which depends upon the nature of the circumstances. Examples of what we would consider to be temporary absence would include short business trips or holidays.

**Method of Time Apportionment**

In the absence of contractual provision, there is to be an apportionment between UK and non-UK workdays under Section 2 of the Apportionment Act 1870. Under the Apportionment Act, salary accrues on a daily basis. The earnings are to be multiplied by a fraction where the numerator is the number of days working overseas in the overseas employer's business and the denominator is the total number of days in employment – in a full year this will be 365 days.

Where the employee is monthly or weekly paid, the computation has to take account of the "pay period" basis for computing NIC.

**Example 2 (Patel)**

Mrs P is ordinarily resident in India and is sent to the UK by her employer to work in the UK at the offices of a UK company which is part of the group. She remains under contract to the Indian employer and the Indian employer bears the cost of the employment. Her salary is £100,000. Her employer recalls her to India to advise on a hostile take-over for a period of 5 days - From 1 June until 5 June. The substantial part of 2 of those days is spent flying to India and back. The earnings are multiplied by a fraction where the numerator is the number of days working overseas in the overseas employer's business and the denominator is the total number of days in employment.

If Mrs P has an annual pay period, then the appropriate fraction can simply be applied to her annual salary.

Gross Pay £100,000×5/365

Amount attributable to overseas workdays less £1369.87

NIC is operated on the gross pay attributable to the UK £98,630.13

However, if Mrs P is monthly paid, the employer has to account for NIC each month as a payment is made, and is unable to "look back" over a year and know what percentage needs to be applied. So the apportionment has to be done in the monthly pay period.

In June, no NICs are due on the salary paid in respect of the work in India.

The earnings on which NICs are to be calculated are those for the month of June – after an apportionment to take account of the 5 days which were not in respect of the employed earners employment.

Monthly salary £8333.33×5/365×100,000 less £1369.87

Amount attributable to non-UK workdays £1369.87

NIC is operated on the monthly gross pay attributable to the UK **£6963.46**

**Holidays**

If Mrs P were to take a holiday in India, the holiday may need to be brought into the calculation of non-UK workdays in the apportionment – depending on the contractual provisions and whether the holiday is attributable to the UK or overseas employment.

In Example 2, if in June Mrs P took 10 days holiday in India – in the absence of contractual provisions setting out how holiday accrues, these would be added to the 5 days working in India:

Salary £8333.33×15/365×£100,000

amount attributable to non-UK workdays = £4109.59

Earnings in the Month on which NIC must be operated = £4223.74

*What about part of a day worked in the UK and part overseas?*

We operate the practice in SP 5/84 with regard to days spent working partly in the UK and partly outside the UK. That is to say, if a day is substantially worked overseas for the overseas business then it will count as a non-UK work day in the apportionment computation. Where an employee spends a whole day working in the UK but then leaves the country that evening on an overseas business trip, it would be difficult to say as a matter of contract that the employee's emoluments for that day were not attributable on a time apportionment basis to duties performed in the UK. It follows that the emoluments for a day spent working overseas before returning to the UK in the evening will be attributable to duties performed overseas.

**Records**

Employees are required to retain evidence such as travel documents and business diaries to demonstrate how they have calculated non-UK workdays for tax. Where records of "non-UK workdays" for tax have been kept, these may be used as the basis for identifying non-UK days for National Insurance.

## 42.8 ROW: Class 2 NIC

Reg. 145(1)(c) (d) SSCR provide that the requirements are:

> (c) as respects entitlement of a self-employed earner to pay Class 2 contributions, that that earner is present in Great Britain or Northern Ireland (as the case may be) in the contribution week for which the contribution is to be paid;
> (d) as respects liability of a self-employed earner to pay Class 2 contributions, that the self-employed earner is ordinarily resident in Great Britain or Northern Ireland (as the case may be), or, if he is not so ordinarily resident, that before the period in respect of which any such contributions are to be paid he has been resident in Great Britain [or Northern Ireland][13] (as the case may be) for a period of at least 26 out of the immediately preceding 52 contribution weeks under the Act, the Social Security Act 1975 or the National Insurance Act 1965 or under some or all of those Acts.

Thus there are two possible connecting factors and if either is present, Class 2 NIC is due:
(1) ordinary residence in UK;
(2) residence for 26 out of 52 contribution weeks.

## 42.9 ROW: Class 3 NIC

Reg. 145(1)(e) SSCR provides that the requirement is:

> as respects entitlement of a person to pay Class 3 contributions in respect of any year, either that—
> (i) that person is resident in Great Britain or Northern Ireland (as the case may be) throughout the year,
> (ii) that person has arrived in Great Britain or Northern Ireland (as the

13 These words are omitted (presumably accidentally) from the SSCR but the context requires them.

case may be) during that year and has been or is liable to pay Class 1 or Class 2 contributions in respect of an earlier period during that year,

(iii) that person has arrived in Great Britain or Northern Ireland (as the case may be) during that year and was either ordinarily resident in Great Britain or Northern Ireland (as the case may be) throughout the whole of that year or became ordinarily resident during the course of it, or

(iv) that person not being ordinarily resident in Great Britain or Northern Ireland (as the case may be), has arrived in that year or the previous year and has been continuously present in Great Britain or Northern Ireland (as the case may be) for 26 complete contribution weeks, entitlement where the arrival has been in the previous year arising in respect only of the next year.

## 42.10 Place of business in UK

Tax Bulletin 49 provides:

> **Place of business in UK**
> We would normally accept as a strong indication that there is a place of business in the UK if a company is registered under the Companies Act 1985.[14] But whether there is a place of business in the UK is a question of fact based on the individual case. Case law has shown that a company establishes a place of business in the UK if it carries on part of its business here. Such business activity need not be either a substantial part of, or more than incidental to, its main objects (*South India Shipping Corporation Ltd v Export-Import Bank of Korea* [1985] 2 AER 219). However there must be a more or less permanent location, not necessarily owned or leased by the company but associated with the company, from which its business is conducted habitually or with some degree of regularity (*Re Oriel Ltd* [1985] 3 AER 216). In Canadian law the premises of a group company are not sufficient in themselves to be a place of business for another group member (*Imperial Oil v Oil Workers International* 69 WWR 702).
> We would not seek to claim in isolation that there is a place of business where the overseas provider legally, and in exchange for a payment

14 [Author's Note] Regulations made under s.1043 Companies Act 2006 impose a registration duty on a foreign incorporated company which establishes a place of business in GB; Northern Ireland has equivalent legislation.

commensurate with the service, sub-contracts services to a UK business.[15]

## 42.11 Residence and ordinary residence

The NIC legislation does not define residence or ordinary residence. For residence, the NI Manual states:

> **29009 DL Conditions of domicile or residence**
> You should operate Residence Manual[16] guidance in deciding whether a person is domiciled or resident. Any difficulties on residence should be submitted to CNR [Centre for Non-Residents].

So the IT rules are applied.

For ordinary residence, the NI Manual states:

**33032 Special Cases: ROW – Meaning of "ordinarily resident" – Factors to consider** [July 2002]

... In considering whether a person is "ordinarily resident", you should:

- take into account the following factors
- in order to build up an overall picture of the person's position.

| Factor | Indication |
|---|---|
| 1. Will the person be returning to Great Britain or Northern Ireland during the period of employment abroad? | **Yes** – indicates ordinary residence continues during the period(s) abroad, especially the more frequent or longer the return visits.<br>**No** – indicates the person ceasing to be ordinarily resident. |
| 2. What will be the purpose(s) of the return visit(s)? | Visit(s):<br>to see family who have remained at the person's home in Great Britain or Northern Ireland; and/or as holidays spent at the home, indicate ordinary residence.<br>If the visit(s) is in connection with the employment abroad, for instance, training, this is not such a strong indication of ordinary residence. |

15 This has been flagged as no longer current, however the author is not currently aware of this passage being moved elsewhere.

16 This is presumably a reference to the former Residence Guide now replaced by the RDR Manual.

| | |
|---|---|
| 3. Will the person's family – spouse/partner and/or children – be going abroad as well? | **Yes** – indicates that the person is no longer ordinarily resident, especially if they do not maintain a home in Great Britain or Northern Ireland (see factor 4).<br>**No** – indicates ordinary residence continuing during period(s) abroad. |
| 4. Will the person retain a home in Great Britain or Northern Ireland during their period abroad? | **Yes** – indicates ordinary residence continuing during period(s) abroad.<br>**No** – indicates that the person is less likely to remain ordinarily resident. |
| 5. If the person retains a home, will it be available for their use when they return? | **Yes** – indicates ordinary residence continuing during period(s) abroad.<br>**No** – because, for instance, it is let on a long lease, then it is less likely that the person will remain ordinarily resident. |
| 6. Will the person be returning to Great Britain or Northern Ireland at the end of the period abroad? | **Yes** – indicates ordinary residence continuing during period(s) abroad.<br>**No** – indicates that the person is no longer ordinarily resident, especially if they do not retain a home in Great Britain or Northern Ireland during their absence abroad (see factor 4 above). |
| 7. How long has the person lived in Great Britain or Northern Ireland? | The longer the period, the stronger the indication that the person is ordinarily resident. |

For guidance on the definition of "ordinarily resident" for tax purposes, see the Residence Manual.

The seven factors are unhelpful, first as no guidance is given how to deal with the practical problems when different factors point in different directions, and secondly because the reader who turns (as directed) to the Residence Manual or its successor, HMRC 6, will find completely different guidance. Ordinary IT principles should be applied.

## 42.12 The EU Regulation

The position within the EU is governed by Regulation 883/2004 of 29

April 2004 on the coordination of social security systems. EU regulations do not have short titles (which were introduced in the UK in 1845) so this is here called "Regulation 883/04".

This chapter considers the position from 1 May 2010. Before then the position was governed by regulation 1408/71. I do not discuss the transitional rules.

HMRC have published guidance ("**NIC guidance**").[17]

The regulation covers social security benefits but this chapter only considers the NIC aspects. The NIC guidance provides:

> Where under the EU Regulations the UK's social security legislation applies, the employee and employer (or person treated as the employer) must pay UK Class 1 National Insurance contributions (and the employer pays Class 1A National Insurance on certain UK taxable benefits and Class 1B National Insurance where there is a PAYE Settlement Agreement.) All the earnings are treated as arising from activity in the UK.
> Where, under the EU rules, the social security legislation of another Member State applies then no UK National Insurance is due.

## 42.13 Persons covered by Regulation 883/04

Article 2 Regulation 883/04 provides:

> 1. This Regulation shall apply to
> [1] nationals of a Member State,
> [2] stateless persons and refugees residing in a Member State who are or have been subject to the legislation of one or more Member States,
> [3] as well as to the members of their families and to their survivors.[18]

NIC guidance provides:

> The new EU Regulations apply to nationals of the EU Member States. They also apply to stateless persons and refugees residing in a Member

17 *www.hmrc.gov.uk/nic/work/new-rules.htm*

18 In the UK, NICs (other than the voluntary Class 3 NIC) are only paid by employed or self-employed, so the reference to "members of their families and their survivors" is irrelevant for NIC, though it may be relevant for other purposes governed by the regulation.

State, members of their families and survivors if those people have previously been subject to the legislation of a Member State.

The UK has exercised its opt out in the Treaty of Amsterdam and will not be applying the new rules to people going to or from Iceland, Liechtenstein, Norway and Switzerland. The old rules in 1408/71 will continue to apply.

The UK has also opted out of applying the new EU rules to third country nationals legally resident in a Member State and will continue to apply the old rules.

### 42.13.1 Persons within Regulation 1408/71

The NIC guidance provides:

In the UK, the old EU rules in 1408/71 are being kept for third country nationals legally resident in a Member State. This is because the UK has chosen to opt out of laws extending the new regulations to third country nationals.
Example (Hank)
H is a US national who has lived and worked in the UK for ten years and pays Class 1 National Insurance. The UK Border Agency has agreed he can live and work legally in the UK. His UK employer Big Bank posts H to the Frankfurt office for six months. Because he is a US national legally resident in the UK, the new rules do not apply to H. H continues to be subject to the old rules. Big Bank should apply to HMRC Residency for a Form E101 for H and he remains subject to UK National Insurance in Frankfurt. He is exempt from German contributions.

This has made the position much more complicated. The old rules are not discussed here but I hope to cover them in a future edition.

### 42.13.2 *Forms*

The NIC guidance provides:

The EU Regulations provide for a system of forms so that employers and employees can demonstrate that they are entitled to operate the legislation of one Member State and be exempt contributions under the legislation of another. Under the old EU Regulations this was the E101 Form. Under the new EU Regulations the E101 will be replaced by Form

A1.
For employees coming to the UK from the other Member States, you should operate National Insurance contributions from the start of the employment unless you hold a valid E101 (or from 1 May 2010 Form A1 or an E101) showing that they are exempt National Insurance in the UK and subject to the legislation of another Member State.
For employees going to work in another Member State, you should apply to HM Revenue & Customs (HMRC) NIC&EO to find out whether the employee should remain in UK National Insurance and you can be issued Form E101 (or Form A1 after 1 May 2010). As long as the UK's legislation continues to apply, you should continue to operate employer and employee National Insurance rather than the contributions of the other Member State.

## 42.14 EEA: Tie-breaker rules

Article 11.1 sets out the principle of a tie-breaker rule:

> 1. Persons to whom this Regulation applies shall be subject to the legislation of a single Member State only. Such legislation shall be determined in accordance with this Title.

### 42.14.1 *Place of employment rule*

Article 11.3 Regulation 883/04 provides a place of employment rule for employees and self-employed:

> 3. Subject to Articles 12 to 16:
> (a) a person pursuing an activity as an employed or self-employed person in a Member State shall be subject to the legislation of that Member State;

The key phrase "pursuing an activity" is defined in article 11.2:

> 2. For the purposes of this Title, persons receiving cash benefits because or as a consequence of their activity as an employed or self-employed person shall be considered to be pursuing the said activity. This shall not apply to invalidity, old-age or survivors' pensions or to pensions in respect of accidents at work or occupational diseases or to sickness benefits in cash covering treatment for an unlimited period.

Article 11.3 continues with some more specialist rules:

> (b) a civil servant shall be subject to the legislation of the Member State to which the administration employing him/her is subject;...
> (d) a person called up or recalled for service in the armed forces or for civilian service in a Member State shall be subject to the legislation of that Member State;
> (e) any other person to whom subparagraphs (a) to (d) do not apply shall be subject to the legislation of the Member State of residence,[19] without prejudice to other provisions of this Regulation guaranteeing him/her benefits under the legislation of one or more other Member States.

## 42.14.2 *Year abroad rule for employees*

Article 12 Regulation 883/04 provides a rough equivalent of the year abroad rule for employees:

> 1. A person who pursues an activity as an employed person in a Member State on behalf of an employer which normally carries out its activities there and who is posted by that employer to another Member State to perform work on that employer's behalf shall continue to be subject to the legislation of the first Member State, provided that the anticipated duration of such work does not exceed 24 months and that he/she is not sent to replace another person.
> 2. A person who normally pursues an activity as a self-employed person in a Member State who goes to pursue a similar activity in another Member State shall continue to be subject to the legislation of the first Member State, provided that the anticipated duration of such activity does not exceed 24 months.

## 42.14.3 *Two places of employment*

The place of employment rule cannot act as a tie-breaker if there are two places of employment. In this case Art.13 Regulation 883/04 provides:

> 1. A person who normally pursues an activity as an employed person in two or more Member States shall be subject to:

19 Art.1(j) provides: "'residence' means the place where a person habitually resides."

> (a) the legislation of the Member State of residence if he/she pursues a substantial part of his/her activity in that Member State or if he/she is employed by various undertakings or various employers whose registered office or place of business is in different Member States, or
> (b) the legislation of the Member State in which the registered office or place of business of the undertaking or employer employing him/her is situated, if he/she does not pursue a substantial part of his/her activities in the Member State of residence....

What is "substantial"? NIC guidance provides:

> When determining whether a substantial part of the activity of an employed person is pursued in a Member State HMRC will take into account:
> · the working time and/or
> · the remuneration
>
> If less than 25 per cent of the person's working time is carried out in the UK and/or less than 25 per cent of the person's remuneration is earned in the UK this will be an indicator that a substantial part of all the activities of the worker is not pursued in the UK. Other criteria may also be taken into account. HMRC may look at the past but must also look at the position in the next 12 months. This will allow HMRC to take account of changing circumstances.

Regulation 883/04 continues with further tie-breakers:

> 3. A person who normally pursues an activity as an employed person and an activity as a self-employed person in different Member States shall be subject to the legislation of the Member State in which he/she pursues an activity as an employed person or, if he/she pursues such an activity in two or more Member States, to the legislation determined in accordance with paragraph 1.
> 4. A person who is employed as a civil servant by one Member State and who pursues an activity as an employed person and/or as a self-employed person in one or more other Member States shall be subject to the legislation of the Member State to which the administration employing him/her is subject.
> 5. Persons referred to in paragraphs 1 to 4 shall be treated, for the purposes of the legislation determined in accordance with these provisions, as though they were pursuing all their activities as employed or self-employed persons and were receiving all their income in the

Member State concerned.

## 42.15 EEA: Self-employed rules

### 42.15.1 *Year abroad rule for self-employed*

Article 13.2 Regulation 883/04 provides a year abroad rule for the self-employed:

> 2. A person who normally pursues an activity as a self-employed person in two or more Member States shall be subject to:
> (a) the legislation of the Member State of residence if he/she pursues a substantial part of his/her activity in that Member State; or
> (b) the legislation of the Member State in which the centre of interest of his/her activities is situated, if he/she does not reside in one of the Member States in which he/she pursues a substantial part of his/her activity.

## 42.16 Special cases by agreement

Article 16.1 provides:

> 1. Two or more Member States, the competent authorities of these Member States or the bodies designated by these authorities may by common agreement provide for exceptions to Articles 11 to 15 in the interest of certain persons or categories of persons.

## 42.17 Class 4 contributions

Section 15 SSCBA provides:

> (1) Class 4 contributions shall be payable for any tax year in respect of all profits which—
> (a) are immediately derived from the carrying on or exercise of one or more trades, professions or vocations,
> (b) are profits chargeable to income tax under Chapter 2 of Part 2 of the Income Tax (Trading and Other Income) Act 2005 for the year of assessment corresponding to that tax year and
> (c) are not profits of a trade, profession or vocation carried on wholly outside the UK.
> (2) Class 4 contributions in respect of profits shall be payable—

(a) in the same manner as any income tax which is, or would be, chargeable in respect of those profits (whether or not income tax in fact falls to be paid), and
(b) by the person on whom the income tax is (or would be) charged,
in accordance with assessments made from time to time under the Income Tax Acts.
(3A) Where income tax is (or would be) charged on a member of a limited liability partnership in respect of profits arising from the carrying on of a trade or profession by the limited liability partnership, Class 4 contributions shall be payable by him if they would be payable were the trade or profession carried on in partnership by the members. ...
(5) For the purposes of this section the year of assessment which corresponds to a tax year is the year of assessment (within the meaning of the Tax Acts) which consists of the same period as that tax year.

A trade carried on wholly outside the UK is exempt from class 4 NIC. This is almost impossible for a sole trader, though it may be possible for a partnership.[20] But in such a case the self-employed earner would not be employed in the UK, and so would be exempt anyway.

What about unremitted trading profits of a remittance basis taxpayer? The word "chargeable" is ambiguous in that although all trading profits are strictly chargeable under part 2 ITTOIA, the context may show that unremitted profits of a remittance basis taxpayer, (un)taxed on the remittance basis, do not count as "chargeable".[21] It is considered that that is the case here, so a remittance basis taxpayer pays class 4 NIC on taxable (remitted) profits only. That is consistent with the general scheme of the remittance basis.

## 42.18 Partnerships

Para 4 Sch 2 SSCBA provides:

(1) Where a trade or profession is carried on by two or more persons jointly, the liability of any one of them in respect of Class 4 contributions shall arise in respect of his share of the profits of that trade or profession (so far as immediately derived by him from carrying it on); and for this purpose his share shall be aggregated with his share of the

20 See 13.3 (Trading income of UK resident).
21 See 9.12 (Nature of charge on remitted RFI).

profits of any other trade, profession or vocation (so far as immediately derived by him from carrying it on or exercising it).

(2) Where sub-paragraph (1) above applies, the Class 4 contributions for which a person is liable in respect of the profits of the trade or profession carried on jointly (aggregated, where appropriate, as mentioned in that sub-paragraph) shall be charged on him separately.

CHAPTER FORTY THREE

# CAPITAL GAINS OF INDIVIDUALS

## 43.1 Territorial scope of CGT

### 43.1.1 *"Chargeable" gains*

Section 15(2) TCGA provides:

> Every gain shall, except as otherwise expressly provided, be a chargeable gain.

The expression "chargeable" gain is a label which brings in an uncountable number of rules, for wherever the drafter wishes to provide an exemption, they typically provide that gains of the specified nature are not chargeable. However, the term "chargeable" gain does not bring in a territorial limitation. All gains are in principle "chargeable" gains regardless of residence or domicile of the person to whom the gains accrue.

### 43.1.2 *Territorial scope of CGT*

Section 2(1) TCGA provides:

> [1] Subject to any exceptions provided by this Act, and without prejudice to sections 10 and 276,
> [2] a person shall be chargeable to capital gains tax in respect of chargeable gains accruing to him in a year of assessment
> [a] during any part of which he is resident in the UK, or
> [b] during which he is ordinarily resident in the UK.

This provision refers to a "person" and so applies to individuals and trustees, personal representatives and companies (but companies are taken out of the scope of CGT by the Corporation Tax Acts).

In principle, therefore, a person who is neither resident nor ordinarily resident in the UK during a tax year is not within the charge to CGT. The expression "neither resident nor ordinarily resident" is clumsy and the case of someone who is ordinarily resident but not resident is very rare, maybe wholly theoretical. I generally abbreviate the expression to "non-resident" and leave "and not ordinarily resident" to be understood.

A non-resident person is in principle outside the scope of CGT regardless of domicile and regardless of the situs of the asset disposed of. (By contrast income tax is charged on UK source income, and IHT is charged on UK situate property, regardless of the residence of the individual.)

Section 2[1] TCGA refers to two exceptions to the general rule:

(1) A non-resident trader with a UK branch or agency.[1]

(2) Exploration and exploitation assets on the continental shelf (not discussed in this book).

A third, important, exemption concerns temporary non-residents.[2]

It follows that an individual (wherever domiciled) can in principle avoid CGT if they dispose of an asset in the tax year before they acquires the status of UK resident or ordinarily resident – or if they postpone the disposal until the tax year after they have lost that status. A simple form of CGT planning for an individual whose stay in the UK is a short-term one is not to dispose of assets giving rise to chargeable gains while UK resident.[3]

On years of arrival and departure see 6.16 (CGT statutory split year principle).

## 43.2 CGT remittance basis

Section 12 TCGA provides:

> (1) This section applies to foreign chargeable gains accruing to an individual in a tax year ("the foreign chargeable gains") if—
> (a) s. 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the

1 See 43.8 (Non-resident trader with UK branch).

2 See 8.1 (Temporary non-residence). This is not technically an exception to the general rule, as the legislation does not impose a tax charge on gains accruing to a non-resident. It deems the gains to accrue later when the individual is resident. But it comes to the same thing.

3 See 6.20 (CGT planning – postponing disposals until non-resident).

individual for that year, and
(b) the individual is not domiciled in the UK in that year.
(2) Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign chargeable gains are remitted to the UK.
(3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year.
(4) In this section "foreign chargeable gains" means chargeable gains accruing from the disposal of an asset which is situated outside the UK.
(5) See Chapter A1 of Part 14 of ITA 2007 for the meaning of "remitted to the UK" etc.

The CGT remittance basis applies only to foreign domiciled individuals. (By contrast, the IT remittance basis also applies to individuals who are resident but not ordinarily resident.) The use of the word "individual" means that trustees and personal representatives do not qualify for the remittance basis.

The CGT remittance basis applies to foreign situate assets.[4] (By contrast, the RFI remittance basis applies to foreign source income, which is a different concept.)

What is the position if an individual changes domicile during a tax year? It might be logical if gains accruing during the non-domiciled part of the year qualify for the remittance basis but it is not possible to read s.12(1)(b) to give that result. It is considered that the remittance basis is not available.[5] But in practice perhaps this rarely happens.[6] See too 10.24 (CGT disposal not for market value).

### 43.2.1 *Date of disposal under remittance basis*

The gain is treated as accruing in the tax year of remittance. By implication the gain is to be treated as not accruing on the date of the actual disposal, when it actually accrues. This is relevant to EIS reinvestment relief. The time limits for EIS relief depend on the time that the gain accrued (not the time that the disposal takes place).[7]

4 See 71.1 (Situs of assets for CGT).
5 See 6.2.1 ("Residing in the UK in a tax year" and "for a tax year").
6 See 6.24 (Year of acquisition of UK domicile).
7 Para 1 Sch 5B TCGA 1992.

The time limits for rollover relief depend on the time of disposal.[8] The drafter of the former para 16(4) Schedule A1 TCGA clearly considered that the pre-2008 s.12(1)[e] TCGA altered the time of disposal so that the asset is regarded as disposed of at the time of remittance (not at the time of the actual disposal).[9]

### 43.2.2 *2010 CGT rate increase: transitional rules*

The F(No.2) A 2010 increased the CGT rate from 18% to 28% for gains accruing on or after 23 June 2010. Para 20(1) Sch 1 F(no.2)A 2010 provides:

> Chargeable gains treated as accruing to an individual under section 12(2) of TCGA 1992 (non-UK domiciled individuals to whom remittance basis applies) in the tax year 2010-11 are to be treated for the purposes of this Schedule as accruing on the day the related foreign chargeable gains are remitted.

Thus gains remitted before 23 June 2010 are taxed at 18% and gains remitted between 23 June 2010 and 5 April 2011 are taxed at the rate of 28%. even if the disposal took place before that date.

There is no express transitional rule where a disposal took place before 23 June 2010 and the gains are remitted after 2010/11, eg in 2011/12. The gains are deemed to accrue in the year of remittance so the new rate applies. (The transitional rule was only needed because it would not have been clear when within the tax year remitted gains were deemed to accrue.)

Para 20(2) provided a special rule where nominated gains are remitted:

> For the purposes of sub-paragraph (1), foreign chargeable gains under section 809J of ITA 2007 (section 809I: order of remittances) in the tax year 2010-11 are to be treated as remitted before 23 June 2010.

## 43.3 Interaction of remittance basis and abolition of taper

Para 56 Sch 2 FA 2008 provides:

8 Section 152(3) TCGA 1992.

9 See the 6th edition of this book para 29.4.

(1) The amendments made by para 31(2) and (3) have effect where the intervening year is the tax year 2008-09 or any subsequent tax year.
(2) The amendments made by paras 41 and 43 have effect where the eligible year is the tax year 2008-09 or any subsequent tax year.
(3) The other amendments made by paras 23 to 55 have effect in relation to chargeable gains accruing or treated as accruing in the tax year 2008-09 or any subsequent tax year.

The important provision here is para 56(3).[10] This removes taper and indexation relief on gains on disposals before 2008/09 which are remitted after 2008/09. All computations of unremitted gains made before 2008 will need to be recomputed.

CGT Draft Clauses FAQ provides:

**Q. How will the gain be calculated for a non-domiciled individual with overseas assets if the gain arises in this tax year but is remitted next tax year?**
A. A gain arising to a non-domiciled individual in the current tax year, 2007-08, will be calculated under the usual rules, and [indexation allowance][11] will be available where appropriate. But that gain is chargeable in the next tax year, 2008-09, because the individual remits the gain in that year. No taper relief will be available and the single 18% CGT rate will apply.[12]

### 43.3.1 *Disposals before 2008/09: transitional rules*

Suppose an asset was disposed of before 2008/09 for £300 with an indexed and tapered gain of £100 and an unindexed and untapered gain of £200.

If all the £300 is remitted before 2008/09 then £100 is subject to CGT (at an effective 40% rate).

If all £300 is remitted after 2008/09 then £200 is subject to CGT (at the 18% rate).

---

10 Sub-paras (1) (2) relate to specialist topics, s.56A, 279A and 279B TCGA.

11 *Sic*. Perhaps the author meant to say “taper relief” but confused that with indexation allowance.

12 Accessible *www.hmrc.gov.uk/cgt/faqs-cgt-reform.htm* 24 January 2008 [2008] STI 171.

What happens if (say) £150 is remitted before 2008/09 then £50 is subject to CGT at the then rate. If the remaining £150 is remitted after 2008/09 what happens? The one thing that is pretty certain is that the drafter did not ask himself this question.

## 43.4 Liquidation of offshore company

Suppose:
(1) F (not UK domiciled) owns non-UK situate shares in a company, and
(2) the company is put into liquidation and F receives a distribution from the liquidator of the company.

F is treated as if F had disposed of the shares in consideration of the distribution: s.122 TCGA. The gain is taxable if the liquidator transfers to the shareholder money in the UK. The same applies if the liquidator transfers assets (land or chattels) enjoyed *in specie* here. It should normally be possible to avoid this.

## 43.5 CGT planning: making property non-UK situate

### 43.5.1 *Moveable assets in UK*

Moveable assets could in principle be moved offshore prior to a disposal. Consider whether an export licence is needed.

### 43.5.2 *Unincorporated UK business carried on by foreign domiciliary*

A business could be transferred to a foreign incorporated company under s.162 TCGA and shares later sold. Watch stamp duty. Even if the company were subsequently to become non-resident on emigration of shareholder/directors, no tax would arise except on growth in value since transfer to the company.

### 43.5.3 *Debts*

There are two ways to deal with a UK situate debt on a security. It may be possible to make the asset non-UK situate. It might be possible to make the asset a simple debt (not a debt on a security) so it falls within the relief given by s.251 TCGA. It is important to do this by varying the existing debt, and not by ending the existing debt and creating a new one.[13]

## 43.6 Structure for UK trading company

It is not ideal for a foreign domiciled individual to carry on trade through a UK incorporated company which they own absolutely, as a disposal of that asset would give rise to CGT. If the foreign domiciliary does not want to go to the trouble and expense of using an offshore trust, what is the alternative? One possibility is to use a foreign incorporated UK resident company. The shares in the company will not be UK situate for CGT.[14] A possible drawback is that s.720 ITA may apply unless the motive defence can be used.[15] This may in fact be an advantage, because it allows distributions from the company to be made tax free. Thus the shareholder may be taxed as a sole trader but without NICs. However, if profits are to be retained in the company it is a disadvantage.

A possibility is to trade through a UK incorporated and resident trading company held by a UK resident but foreign incorporated holding company:

Foreign Domiciliary
|
Foreign Incorporated Co
|
UK Incorporated Co
|
Trade

The trading income will not be within the scope of s.720. The use of a holding company will not restrict small companies relief provided that it does not carry on a business. With a little care it can be arranged that a holding company does not carry on a business.[16]

---

13 See *Chitty on Contracts*, (29th ed, 2008) para 22-028 (Substituted contract).

14 See 71.6 (Registered shares/debentures: non-UK company)

15 See 25.4.1 (Foreign incorporated company) and 29.34 (Transfer to UK resident foreign incorporated company).

16 SP 5/94 provides:

> **(20 July 1994) Associated companies for small companies' relief and corporation tax starting rate: holding companies**
> Under TA 1988 s 13(4), a company which does not carry on any trade or business

## 43.7 UK resident trust

A UK resident trust is in principle subject to CGT even if the settlor is a foreign domiciliary. One might avoid this problem for the future by exporting the trust (appointing non-resident trustees) but there may in principle be a migration charge.[17] This applies even if the assets are not situated in the UK. The remittance basis does not apply as that only applies to "individuals"; trustees are not individuals.

One solution may be to transfer assets from the trust to foreign domiciled beneficiaries absolutely. Although this involves a disposal by the trustees, it may be possible to claim CGT hold-over relief. The relief applies on a disposition to a UK resident foreign domiciled beneficiary, even though that beneficiary may later be able to dispose of the asset without a CGT charge.

## 43.8 Non-resident traders with UK branch

Section 10 TCGA provides:

> (1) Subject to any exceptions provided by this Act, a person shall be chargeable to capital gains tax in respect of chargeable gains accruing to him in a year of assessment in which he is not resident and not ordinarily resident in the UK but is carrying on a trade in the UK

---

in an accounting period is disregarded in calculating the profits limits for the small companies' relief of any other company with which it is associated.

A holding company which does not carry on a trade, but which holds the shares in one or more companies which are its 51 per cent subsidiaries, may or may not be carrying on a business in respect of that holding. The Revenue's view is that a company is not carrying on such a business in an accounting period if, throughout that period, all of the following apply—

– it has no assets other than shares in companies which are its 51 per cent subsidiaries; and
– it is not entitled to a deduction, as charges or management expenses, in respect of any outgoings; and
– it has no income or gains other than dividends which it has distributed in full to its shareholders and which are, or could be, franked investment income received by that company (TA 1988 s 832(1), (4A)); and
– the 51 per cent subsidiaries are 51 per cent subsidiaries under TA 1988 s 247(8), (8A) and (9A), 13ZA(1)–(4).

17 See 7.5 (Liability of trustees for exit charge)

through a branch or agency, and shall be so chargeable on chargeable gains accruing on the disposal—

(a) of assets situated in the UK and used in or for the purposes of the trade at or before the time when the capital gain accrued, or

(b) of assets situated in the UK and used or held for the purposes of the branch or agency at or before that time, or assets acquired for use by or for the purposes of the branch or agency.

(2) Subsection (1) above does not apply unless the disposal is made at a time when the person is carrying on the trade in the UK through a branch or agency.

...

(5) This section shall apply as if references in subsections (1) and (2) above to a trade included references to a profession or vocation, but subsection (1) shall not apply in respect of chargeable gains accruing on the disposal of assets only used in or for the purposes of the profession or vocation before 14th March 1989 or only used or held for the purposes of the branch or agency before that date.

CHAPTER FORTY FOUR

# GAINS OF NON-RESIDENT TRUSTS: S.86

## 44.1 3 May 2011CGT on trusts – Introduction

A trust is in principle treated as a taxable unit. If the trustees are UK resident, they are in principle subject to CGT even if the beneficiaries have no connection with the UK. Non-resident trustees are not subject to CGT[1] even if their beneficiaries are resident in the UK. These rules present an obvious means of CGT avoidance. HMRC's first answer to this is the anti-avoidance rules in ss.86, 87 TCGA. In outline:

(1) A settlor who has an "interest in the settlement" (as widely and artificially defined) is liable to CGT on gains accruing to the non-resident trustees. I refer to this as the "**s.86 charge**".
(2) UK resident beneficiaries of a non-resident trust may be subject to tax if they receive capital payments from the trustees. I refer to this as the "**s.87 charge**".

A full discussion of these provisions requires a long book to itself. The discussion here focuses on the most common issues.

## 44.2 Fundamental s.86 conditions

Section 86(1) TCGA sets out five sets of conditions for s.86 to apply. I refer to these as "**the fundamental s.86 conditions**".

## 44.3 Qualifying settlement

Section 86(1) provides:

1 See 43.1 (Territorial scope of CGT).

> This section applies where the following conditions are fulfilled as regards a settlement in a particular year of assessment—
> (a) the settlement is a qualifying settlement in the year;

"Qualifying settlement" is a label for a set of rules not discussed here. "Settlement" is not expressly defined here so the standard IT/CGT definition applies.

## 44.4 Trustee residence condition

The next s.86 condition is in s.86(1)(b):

> (b) the trustees of the settlement fulfil the condition as to residence specified in subsection (2) below;

This takes us to s.86(2) TCGA which provides:

> The condition as to residence is that—
> (a) the trustees are neither resident nor ordinarily resident in the UK during any part of the year, or
> (b) the trustees are resident and ordinarily resident in the UK during any part of the year, but at any time of such residence and ordinary residence they fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK.

Condition (a) is that the trustees are non resident; for convenience I refer to condition (b) as that the trustees are **"dual resident"**. This is a slightly artificial use for the term "dual resident", which would naturally be used with a slightly wider meaning[2] but it is difficult to think of a better term and no difficulty arises as long as one bears that meaning in mind.

## 44.5 Settlor residence and domicile condition

The next s.86 condition is in s.86(1)(c):

> (c) a person who is a settlor in relation to the settlement ("the settlor"):
> [i] is domiciled in the UK at some time in the year and

---

2 On the terminology see 50.2.1 (Types of residence).

[ii] is either resident in the UK during any part of the year or ordinarily resident in the UK during the year;

Section 86 does not apply to a foreign domiciled settlor, whether or not they claim the remittance basis. This is a surprising inconsistency with the general scheme of the FA 2008. Where an individual does not wish to pay the £30,000 remittance basis charge, it may be worthwhile setting up a non-resident trust to ensure that gains are taxed on a s.87 capital payment basis and not on an arising basis.

## 44.6 Settlor-interested condition

The next s.86 condition is in s.86(1)(d):

(d) at any time during the year the settlor has an interest in the settlement;

The term "settlor-interested" in a s.86 context[3] is a label for a complex set of rules which are not discussed here.

If a settlement becomes (or ceases to be) settlor-interested, s.86 TCGA applies for the whole tax year, This is unlike the IT rules (where if a settlor is excluded s.624 ITTOIA ceases to apply from the date of the exclusion).[4] There is reason for the distinction, because the s.86 charge is on gains less losses for the entire year, and splitting the year would involve some trouble. The rule does however mean that CGT planning by excluding the settlor must be carried out well in advance.

## 44.7 Section 86 amount condition

The next s.86 condition is in s.86(1)(e):

(e) by virtue of disposals of any of the settled property originating from the settlor, there is an amount on which the trustees would be chargeable to tax for the year under section 2(2) if the assumption as to residence specified in subsection (3) below were made.

---

3 The same term is used in an IT context with a different meaning: see 24.3.1 (The concepts of "settlor-interested").

4 See 24.3.4 (Settlement ceasing to be settlor-interested).

I refer to this as the "**s.86 amount condition**".

### 44.7.1 *Assumption as to residence*

This takes us to s.86(3) TCGA which provides:

> [a] Where subsection (2)(a) above[5] applies, the assumption as to residence is that the trustees are resident and ordinarily resident in the UK throughout the year; and
> [b] where subsection (2)(b) above applies, the assumption as to residence is that the double taxation relief arrangements do not apply.

Para [a] deals with a non-resident trust and para [b] deals with a dual resident trust.

In para [b] the assumption is not in fact an assumption "as to residence": the assumption is a disapplication of treaty relief.

### 44.7.2 *Section 86 amount*

The condition in s.86(1)(e) is merely that there is an amount, which I call "**the s.86 amount**". The quantum of the s.86 amount matters because the amount of the charge depends on that.

Para 1(1) Sch 5 provides:

> In construing section 86(1)(e) as regards a particular year of assessment, the effect of section 3 shall be ignored.

This disapplies the trustee annual exemption (which seems fair because the settlor has their own annual exemption).

## 44.8 Year of death of settlor

The next s.86 condition is in s.86(1)(f):

> Para 3, 4 or 5 does not prevent this section applying.

5 See 44.4 (Trustee residence condition).

This sets out three conditions which are best considered separately.
Para 3 Sch 5 TCGA provides:

> Section 86 does not apply if the settlor dies in the year.

What is the reason for this rule? Presumably it was thought unfair to tax the settlor's estate on post-death gains, and too much trouble to split the year into disposals before/after the death.

## 44.9 Death or divorce of certain beneficiaries

The last two s.86 conditions are set out in paras 4 and 5 Sch 5 TCGA:

> 4(1)This paragraph applies where for the purposes of section 86(1)(d) the settlor has no interest in the settlement at any time in the year except for one of the following reasons, namely, that—
> (a) property is, or will or may become, applicable for the benefit of or payable to one of the persons falling within para 2(3)(b) to (db) above,
> (b) income is, or will or may become, applicable for the benefit of or payable to one of those persons, or
> (c) one of those persons enjoys a benefit from property or income.
> (2) This paragraph also applies where sub-para (1) above is fulfilled by virtue of 2 or all of paras (a) to (c) being satisfied by reference to the same person.
> (3) Where this paragraph applies, section 86 does not apply if the person concerned dies in the year.
> (4) In a case where—
> (a) this paragraph applies, and
> (b) the person concerned falls within para 2(3)(b), (d) or (db) above,
> section 86 does not apply if during the year the person concerned ceases to be married to, or a civil partner of, the settlor, child or grandchild concerned (as the case may be).
> 5 (1) This paragraph applies where for the purposes of section 86(1)(d) the settlor has no interest in the settlement at any time in the year except for the reason that there are 2 or more persons, each of whom—
> (a) falls within para 2(3)(b) to (db) above, and
> (b) stands to gain for the reason stated in sub-para (2) below.
> (2) The reason is that—
> (a) property is, or will or may become, applicable for his benefit or payable to him,
> (b) income is, or will or may become, applicable for his benefit or payable to him,
> (c) he enjoys a benefit from property or income, or
> (d) 2 or all of paras (a) to (c) above apply in his case.

> (3) Where this paragraph applies, section 86 does not apply if each of the persons concerned dies in the year.

I cannot see the point of this, though it does offer a kind of symmetry with para 3. I rather doubt if it ever has applied or ever will apply.

## 44.10 Application of s.86

Assuming all eight fundamental s.86 conditions are satisfied, we proceed to s.86(4) TCGA which provides:

> Where this section applies—
> (a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor in the year, ...

## 44.11 Interaction of s.86 and s.13 TCGA

Suppose a settlor-interested trust within s.86 TCGA owns a non-resident company within s.13 TCGA, and a gain accrues to the company. The gain is treated as accruing to the trustees. In the absence of express provision, this gain would not fall within s.86 because the s.86 amount condition would not be satisfied: the gain does not accrue "by virtue of disposals of any of the settled property".[6] The company property is not settled property. Para 1(3) Sch 5 TCGA deals with this:

> In a case where—
> (a) the trustees are participators in a company in respect of property which originates from the settlor, and
> (b) under section 13 gains or losses would be treated as accruing to the trustees in a particular year of assessment by virtue of so much of their interest as participators as arises from that property if the assumption as to residence specified in section 86(3) were made,
>
> the gains or losses shall be taken into account in construing section 86(1)(e) as regards that year as if they had accrued by virtue of disposals of settled property originating from the settlor.

6 See 44.7 (Section 86 amount condition).

## 44.12 Two settlors for CGT s.86 charge

The s.86 charge only applies to disposals of settled property "originating from the settlor". This expression is defined in TCGA Sch 5 para 8: see 69.3.5 (CGT s.86 definition of "settlor").

### 44.12.1 *Two direct settlors: A adds property to B's trust*

The position is straightforward if one individual ("A") creates a trust and another ("B") adds property to it. A and B are both settlors. If A is UK resident and B is non-resident, then A is not subject to CGT under s.86 and B is subject to tax on gains from the funds originating from B.

The same applies if B adds value indirectly to A's trust (eg by a gift to a company held by the trust). B is a "settlor" for s.86 purposes: see 69.14 (Provision of property for company held by trust). A "just apportionment" is practical, though it may not be easy.

The CG Manual contains the following unexceptionable guidance. It relates to s.77 TCGA (repealed 2008) but would still be applicable to s.86:

> **34893. Multiple settlors**
> Section 79 provides that trust gains are only to be attributed to each settlor to the extent that those gains accrue on property originating from that person. Where the assets provided by two or more settlors are managed as separate funds, there should be no difficulty in determining to which settlor the gains on the disposal of particular items of property should be attributed. Where the assets provided by different settlors are not appropriated into separate funds, the legislation provides for a just apportionment as between the settlors.
> **34894. Multiple settlors** [August 2007]
> If HMRC Trusts Head Office Bootle or Financial Intermediaries and Claims Office (formerly Claims Branch) have given advice on apportionment for Income Tax purposes, this should be followed for CGT. Otherwise, if settlors together make the settlement, the gains in such a case should be apportioned according to the amounts each put in. If a settlor adds to a settlement, then the amount put in should be compared with the value of the settlement at that time. Trust Offices should endeavour to reach a fair and easily worked solution.
> **34895. Multiple settlors**
> If one settlor is within Section 79 and the other is not, the gains are apportioned on the lines suggested, but those relating to the settlor who is outside Section 79 are assessed on the trustees in the normal way after deducting the trustees' annual exempt amount.
> **34900. Example 1** [April 2010]
> A and B each settle ordinary shares in X Limited on a trust under which both Mrs A and Mrs B have an interest as defined by the new provisions. A settles

500 such shares and B 1500. It is accepted that there is only one settlement for CGT purposes and the shares are not appropriated into separate funds.
In 1988-89 there is a gain of £2,000 on the sale of some of the shares, a loss of £400 on the sale in 1989/90 of further shares and in 1990-91 a gain of £500 on the sale of shares in Y Limited acquired with the sale proceeds of the shares in X Limited.
In 1988-89, as A and B settled property in the proportion 1:3, there is, on a just apportionment, a chargeable gain of £500(2000×1/4) accruing to A.
Similarly a gain of £1500 is treated as accruing to B. Each is assessed as appropriate.
The loss of £400 in 1989-90 is apportioned £100 to A and £300 to B.
The gain of £500 in 1990-91 is apportioned £125 to A and £375 to B.
The loss of £100 in respect of the property provided by A is set against the gain of £125, leaving a net gain of £25 to be attributed to A. Similarly the loss of £300 in respect of the property provided by B is set against the gain of £375 on the property provided by him, leaving a net gain of £75 assessable on B.
**34901. Example 2** [April 2010]
The facts are as in Example 1 except that by a deed executed during 1988-89 Mrs B irrevocably excludes herself from the class of beneficiaries. The gains of that year are apportioned and attributed as before because Mrs B had an interest in the settlement at some time during the year. The losses of 1989-90 and the gains of 1990-91 are apportioned in the same way, and the net gains of £25 for 1990-91 are attributed to A.
There can be no attribution to B in 1990-91 because neither he nor his spouse has an interest in the settlement in that year. Accordingly the gains on the assets deriving from the property provided by B are assessable on the trustees and the trustees can claim the annual exemption due to them. If this exceeds the gains of 1990-91 (£375), the losses brought forward of £300 do not need to be set against those gains, see CG18030. The losses of £300 will instead be carried forward and set against subsequent gains accruing on disposals of the settled property which derives from B, again making a just apportionment of the trust gains.

### 44.12.2 *Direct and indirect settlors*

The position is less clear where there is an arrangement under which:
(1) A makes a gift of property to B, and
(2) B gifts the property to a trust.
It seems at first that there are two settlors, an indirect settlor ("A") and a direct settlor ("B").[7] Both have provided the *same* property. No issue arises if A and B are both non-resident. What is the position if they are both UK resident? There is no clear provision how to apportion the gains between A and B and, since the gains cannot be subject to tax twice, it is

7 See 69.4 (Gift from A to B followed by gift to trust by B).

considered that there is no tax charge at all. The courts would have taken that view in the past: see *Lord Herbert v IRC* 25 TC 91. The best solution to the problem is to identify a "real" settlor (presumably B) and infer that A is not to be regarded as the settlor.

If A is UK resident and B is not (or *vice versa*) there is no double charge, but the argument just about still runs that A (the UK settlor) cannot be taxed; though in these circumstances the argument is less meritorious and one would not like to rely on it.

This issue usually arises in the context of failed tax planning of the kind discussed at 69.33 (Planning to create trust with foreign domiciled settlor).

If A is not UK resident and B is UK resident there is no double charge. B might argue that B is not the "real" settlor. In practice this factual situation should not arise.

## 44.13 Interaction of ss.86 and 87 TCGA

In the absence of relief, a gain accruing to a trust may be attributed to the settlor under s.86(4) and a s.2(2) amount under s.87(2). Section 87(4)(b) TCGA provides relief for s.87 and so prevents double taxation:

> (4) The section 2(2) amount for a settlement for a tax year for which this section applies to the settlement is—
> (a) the amount upon which the trustees of the settlement would be chargeable to tax under section 2(2) for that year if they were resident and ordinarily resident in the UK in that year, or
> (b) if section 86 applies to the settlement for that year, the amount mentioned in paragraph (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

I refer to this as "**s.86 current year credit**". In short, s.86 in principle has priority over s.87.

## 44.14 Corporate settlor

It is considered that s.86 TCGA does not apply to a company even if it does create a settlor-interested settlement and is the settlor. The context suggests that only individuals are intended to be caught. It appears that

HMRC may not accept this view.[8] The issue rarely arises in practice. In these cases HMRC may instead look to see if the shareholders are settlors.[9]

## 44.15 Role of non-resident trusts from 2008

Non-resident trusts may be useful where:

(1) s.86 TCGA does not apply; and
(2) the trust holds:
  (a) UK situate property; or
  (b) companies within s.13 TCGA which hold UK situate property.

For if the trust property is held by beneficiaries directly, disposals of the UK situate property are chargeable on an arising basis; if the same property is held on a trust, disposals by the trustees are taxable on a capital payments basis.

## 44.16 UK resident trust

A UK resident trust is in principle subject to CGT even if the settlor is a foreign domiciliary. This applies even if the assets are not situated in the UK. The remittance basis does not apply as that only applies to "individuals"; trustees are not individuals.

One might avoid this problem for the future by exporting the trust (appointing non-resident trustees) but there may in principle be a migration charge.[10]

One solution may be to transfer assets from the trust to foreign domiciled beneficiaries absolutely. Although this involves a disposal by the trustees,

---

8 The CG Manual provides:

> "**35020. Trusts for employees**
>
> There is nothing in Section 77 [TCGA] itself to prevent it being applied to a company. In particular, where a company has set up a settlement for its employees, the deed may provide that if all the trusts fail, the property may revert to the company. The most common cases are share option schemes and unapproved pension schemes."

Section 77 TCGA was repealed in 2008, the issue for s.86 is similar. For a further discussion, see Kessler & Brown, *Taxation of Charities and Non-Profit Organisations*, (8th ed, 2011) para 20.2.2 (Loan by company).

9 See 69.32 (Trust made by company: are shareholders settlors?).

10 See 7.5 (Liability of trustees for exit charge).

it may be possible to claim CGT hold-over relief. The relief applies on a disposition to a UK resident foreign domiciled beneficiary, even though that beneficiary may later be able to dispose of the asset without a CGT charge.

## 44.17 Rates of tax on s.86 charge

Para 21 Sch 1 F(No.2) A 2010 provides:

> Chargeable gains treated as accruing to a settlor under section 86(4)(a) of TCGA 1992 (attribution of gains to settlors with interest in non-resident or dual resident settlements) in the tax year 2010-11 are to be treated for the purposes of this Schedule as accruing before 23 June 2010.

This preserves the 18% rate for the whole of 2010/11. I am not quite sure why when in most other cases the year is divided into gains accruing before or after 23 June 2010, but settlors of settlor-interested non-resident trusts will not complain.

CHAPTER FORTY FIVE

# GAINS OF NON-RESIDENT TRUSTS: S.87

## 45.1 The s.87 charge – Introduction

This chapter considers the CGT charge on beneficiaries under s.87 TCGA, which I call the "**s.87 charge**". The charge is supplemented by a further charge in s.89 TCGA but I use the expression "s.87 charge" loosely to refer to both charges.

The FA 2008 rewrote the s.87 charge. In the following discussion the "**pre-2008 s.87**" means the section as it was before the 2008 amendments.

"**HMRC s.87 guidance note**" means the 54 page guidance note, first published 8 May 2009, 2nd version October 2009, entitled "FA 2008 changes to the CGT charge on beneficiaries of non-resident settlements".

### 45.1.1 *Cross references*

For s.87 gains accruing to charity, see Kessler & Brown, *Taxation of Charities and Non-Profit Organisations* (8th ed, 2011), Chap. 30 (Payments to charity from non-resident trusts).

For losses, see 48.6 (Disallowance of personal losses against s.87 gains) and 48.5 (Loss accruing to non-resident trustees).

For OIG s.87, see 32.12 (OIG s.87 charge).

For DT issues, see 50.19 (DT reliefs: s.87 TCGA).

## 45.2 "Settlement" and "trustee"

### 45.2.1 *"Settlement"*

Section 97(7) TCGA provides:

> In sections 86A to 96 and Schedule 4C and in this section—

> "settlement" has the meaning given by section 620 of ITTOIA 2005, and
> "settled property" and references (however expressed) to property comprised in a settlement shall be construed accordingly.

"Settlement" here means settlement-arrangement.

The estate of a deceased person is not a settlement-arrangement.[1]

In practice one is normally concerned with trusts in the classic sense. That is just as well, as the problems raised by other types of settlement (which I call **"non-trust settlement-arrangements"**) such as a foundation, have not been fully thought through.

### 45.2.2 *"Trustee" of non-trust settlement-arrangement*

A problem arises for an entity which is a settlement-arrangement (and so a settlement for s.87 purposes) but which (not being a classic settlement) has no trustees in the normal (trust law) sense of the word. For s.87 purposes one needs to identify trustees because:

(1) one needs to ascertain trustee residence;[2]
(2) one needs to identify s.2(2) amounts (trust gains), which are the amounts on which "the trustees of the settlement" would be chargeable to tax under s.2(2) if they were resident in the UK.

Accordingly s.97(7A) TCGA provides:

> [a] In this section, sections 86A to 96 and Schedule 4C "trustee", in relation to a settlement in relation to which there would be no trustees apart from this subsection, means any person in whom the settled property or its management is for the time being vested ... [3]

When this extended sense applies, I use the word "trustees" (using scare quotation marks).

An example is a Liechtenstein stiftung (foundation). The "trustees" are (a) the foundation itself (a body corporate in which the "settled property"

1 See 67.6.1 (Is an estate a "settlement" within s.87 TCGA?).
2 See 45.3 (Non-resident settlement condition).
3 There is a similar definition for IHT. Section 45 IHTA provides:
"In this Act "trustee", in relation to a settlement in relation to which there would be no trustees apart from this section, means any person in whom the settled property or its management is for the time being vested."

is vested) or (b) the members of the board of management (in whom its management is vested).

What about a civil law usufruct? There is no need for the s.87 rules: under ordinary principles the gain can come into charge on a disposal by the usufructuary or by the encumbered owner but since a usufruct is in principle a settlement-arrangement, what reason can one find that s.87 does not apply? The answer is that there is nothing which one can identify as "settled property". There are two items of property, one belonging to the usufructuary and the other belonging to the bare owner. So it is considered that there are no "trustees" and a usufruct is not within the scope of s.87.

### 45.2.3 *2006 transitional rules?*

Section 97(7A) was introduced by para 15 Sch 12 FA 2006. Para 15(3) provides:

> This paragraph shall come into force on 6th April 2006 (in relation to settlements whenever created).

This raises the interesting possibility that s.87 did not apply to a foundation[4] before 2006 as a foundation has no "trustees" in the normal (trust law) sense. But it is suggested that the context shows that the word "trustee" should be construed widely enough to include a foundation (bear in mind that the word "settlement" is given the wide and artificial meaning of settlement-arrangement). Section 97(7A) is only for the avoidance of doubt and the law before 2006 was the same as now.

## 45.3 Non-resident settlement condition

Section 87(1) TCGA sets out the fundamental condition for the application of s.87:

> This section applies to a settlement for a tax year ("the relevant tax year") if the trustees are neither resident nor ordinarily resident in the UK in that year.

---

4 Or any other settlement-arrangement which was not a classic settlement and so had no trustees in the strict sense.

Statute often refers to a settlement "to which s.87 applies"; from 1998/99 this means (in short) a non-resident settlement. In full, it means:

(1) a non-resident settlement; or
(2) a dual resident (more accurately, domestic-law UK resident treaty non-resident) settlement.[5]

### 45.3.1 *Residence of "trustee" of non-trust settlement-arrangement*

Section 97(7A) TCGA provides:

> [a] ... "trustee", in relation to a settlement in relation to which there would be no trustees apart from this subsection, means any person in whom the settled property or its management is for the time being vested
> [b] (and a person who is treated as a trustee of the settlement by virtue of this subsection shall be treated as a trustee of the settlement for the purposes of section 69).

The effect of s.97(7A)[b] is that the s.69 trustee test of residence applies.
In the case of a foundation, the "trustees" are (a) the foundation itself or (b) the members of the board of management. The residence of (a) and (b) will normally be the same so there is no need to consider the analysis if they were resident in different places but one would presumably look to the foundation itself, as that is the person (a body corporate) to which gains accrue on a disposal of foundation property.

## 45.4 The s.87 charge

Section 87(2) TCGA provides:

> [a] Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement
> [b] who has received a capital payment from the trustees in the relevant tax year or any earlier tax year
> [c] if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the s.2(2) amount for the relevant tax year or any earlier tax year.

5 See 45.17 (Dual resident trust).

The key terms here are "capital payment" "s.2(2) amount" and "matching". I refer to gains treated as accruing as "**deemed s.87 gains**".

A deemed s.87 gain accrues in the year that a capital payment is matched with a s.2(2) amount. That may be later than the year that the capital payment is made.

Section 87 is not strictly a charging section, it feeds into s.2 TCGA which imposes the charge. It is nevertheless convenient to use the expression "s.87 charge" as a shorthand.

## 45.5 Section 2(2) amount

Section 87(4) TCGA provides:

> The s.2(2) amount for a settlement for a tax year for which this section applies to the settlement is—
> (a) the amount upon which the trustees of the settlement would be chargeable to tax under s.2(2) for that year if they were resident and ordinarily resident in the UK in that year, or
> (b) if s.86 applies to the settlement for that year, the amount mentioned in para (a) minus the total amount of chargeable gains treated under that section as accruing in that year.

The term "s.2(2) amount" has more or less the same meaning as the term "trust gains" in the pre-2008 s.87. The old terminology was clearer, and EN FB 2008 itself uses the term "trust gains." It is usually better to adopt statutory terminology, rather than using a different term with the same meaning as a statutory defined term. However "s.2(2) amount" is so opaque that I sometimes clarify it by using the phrase *"s.2(2) amounts (trust gains)."* Some practitioners use the term "stockpiled gains" or describe a trust as having a pool of s.2(2) amounts.

There is a s.2(2) amount *for a tax year*: ie each s.2(2) amount must be linked to a specific tax year. The expression "s.2(2) amounts" (in the plural) is used to refer to the case where there are s.2(2) amounts for more than one tax year.

Section 87(4)(b) TCGA deals with the interaction of ss.86 and 87. Gains treated as accruing to the settlor under s.86 are deducted in computing the s.2(2) amount. This avoids double taxation.

Section 87(5) TCGA provides:

> The s.2(2) amount for a settlement for a tax year for which this section does not apply to the settlement is nil.

This makes sense, of course, since if s.87 does not apply the trustees must be UK resident and within the scope of CGT.

### 45.5.1 *Annual exemption*

HMRC say:

> The trustees compute gains as if they were resident in the UK. Any exemptions and reliefs due to resident trustees are included in this computation. But no annual exempt amount is available...[6]

The last sentence is wrong, as s.3 TCGA (extended to trustees by sch 1 TCGA) provides that trustees "shall not be chargeable to CGT" on the exempt amount. So "the amount upon which the trustees would be chargeable to tax under s.2(2) for that year if they were resident" is reduced by the exempt amount. The Courts might disapply the plain words if the result were absurd, but it is not absurd. One could even say it was sensible. Of course, there is not much tax at stake here.

### 45.5.2 *s.2(2) amount of foundation or other non-trust settlement-arrangement*

A foundation is in principle a settlement-arrangement and so a settlement for s.87 purposes. What is the s.2(2) amount, ie the amount on which the "trustees" of the settlement would be chargeable under s.2(2) if they were UK resident? If the "trustees" are the members of the board of the foundation, the amount is nil as no gains accrue to them. Assuming (which is a better analysis) the "trustees" are the foundation itself, the position would be that the foundation would be subject to CT and so at first sight, the amount chargeable under s.2(2) would be nil! The answer is that s.97(7A)[b][7] applies s.69 TCGA, which deems the "trustees" to be

---

6 "HMRC Residency: Non-resident trusts" published online at *www.hmrc.gov.uk/cnr/nr_trusts.htm* on 1 April 2008. The document is referring to the pre-2008 legislation (it became out of date 5 days after publication) but the current legislation is the same on this point.

7 See 45.3.1(Residence of "trustee" of non-trust settlement-arrangement).

a separate person which not a company; though one could reach the same result by construction even without reference to that provision.[8]

## 45.6 Capital payment

### 45.6.1 *Definition of capital payment*

"Capital payment" is defined in s.97(1) TCGA:

> In sections 86A to 96 and Schedule 4C and this section "capital payment" —
> (a) means
> [i] any payment which is not chargeable to income tax on the recipient
> [ii] or, in the case of a recipient who is neither resident nor ordinarily resident in the UK, any payment received otherwise than as income...[9]

### 45.6.2 *"Chargeable to income tax"*

What is the position if a remittance basis taxpayer receives income from a non-resident discretionary trust which is not remitted? It is considered that the income is "chargeable" to income tax even if no tax is paid because of the remittance basis.[10] Otherwise there could be double

---

8 *de Rothschild v Lawrenson* 67 TC 300.

9 As to what is an income/capital receipt from a trust, see 22.8 (Payment from discretionary trust: income or capital?).

10 Before 2005 the former s.65 ICTA drew a distinction between a "charge" and a "computation;" unremitted income was described as "chargeable" even though ignored in the computation of the charge. This is still the case: ITTOIA imposes a charge on all RFI and the remittance basis only affects the amount on which the charge is made. See 9.12 (Nature of charge on remitted RFI).
It was assumed by the drafter of s.37 TCGA (consideration chargeable to tax on income) that unremitted foreign income is "charged" to income tax. Otherwise there would be a charge to CGT on unremitted income of an asset to which the RFI remittance basis applies but the CGT remittance basis does not apply. That would apply to a UK domiciled and resident but not ordinarily resident individual. Another example would be income accruing to a foreign domiciliary from an asset which was UK situate for CGT purposes, but a foreign income source for income tax purposes. It is true that the word "chargeable" takes its meaning from the context, and in some contexts unremitted income is not regarded as chargeable to IT. But the context

taxation, a s.87 deemed gain and an IT charge on remittance of the income. Also whenever a trust distributed income to a UK resident foreign domiciliary before 2008/09 it made a "capital payment" (and reduced s.2(2) amounts); that would be very odd.

Similarly a benefit which is within s.731, or within s.731 subject to the s.731 remittance basis, is not a capital payment.[11]

Similarly, if a settlor within s.624 receives a payment of income from a non-resident discretionary trust, that is not a capital payment. There is no income on receipt of the payment, but the sum is treated for all purposes of income tax to be the income of the settlor and that deeming should be applied in order to determine whether the payment is chargeable to income tax for the purposes of the definition of capital payment.

Similarly, if a settlor within the s.624 remittance basis receives a payment of income from a non-resident discretionary trust, (applying the mixed fund rules to determine what is income): the payment is taxable on remittance, so is not a capital payment.

Similarly, if a transferor within s.720 receives a payment of income taxable under s.720, or if a transferor within the s.720 remittance basis receives a payment of income (applying the mixed fund rules to determine what is income): the payment is taxable on remittance, so is not a capital payment. (This issue arises in the exceptional case of a trust within s.720 and not within s.624, and in the more common case of a payment from a company held by the trust.)

### 45.6.3 *"Payment"*

Section 97(2) TCGA provides:

> In subsection (1) above references to a payment include references to
> [a] the transfer of an asset and
> [b] the conferring of any other benefit, and to
> [c] any occasion on which settled property becomes property to which s.60 applies.

The issues overlap with s.731 ITA so for the meaning of "benefit" see 27.4 (Benefit) and for valuation see 27.5 (Valuation of benefits).

---

shows that is not the case here.

11 See 27.11 (Is a benefit within s.731 a capital payment?).

### 45.6.4 *Arm's length transaction*

Section 97(1) TCGA provides:

> In sections 86A to 96 and Schedule 4C and this section "capital payment"—
> (b) does not include a payment under a transaction entered into at arm's length if it is received on or after 19th March 1991.

It is considered that a transaction at arm's length could not be a capital payment at all, and this provision was inserted only for the avoidance of doubt; even if (contrary to my view) it were a capital payment, the amount of the payment would normally be nil. But the issue now will not often arise.

### 45.6.5 *Termination of settlement*

The termination of a settlement constitutes a capital payment, so any s.2(2) amounts at that time will be attributed to the beneficiaries who become entitled to the trust property: s.97(2)[c] TCGA. This rule should not, in practice, affect well drafted settlements, whose life may extend for a century or more. If action is taken in time it will generally be possible to extend the life of poorly drafted settlements by appropriate exercise of trustees' powers. Trustees should if appropriate diarise the date when the settlement may come to an end so as to take action beforehand.

## 45.7 Receipt from the trustees

The s.87 charge applies where a beneficiary has received a capital payment from the trustees. There are two requirements here: a *receipt,* and a receipt *from the trustees.*

Section 97(5) TCGA expands on both these concepts:

> For the purposes of sections 86A to 90 and Schedule 4C a capital payment shall be regarded as received by a beneficiary from the trustees of a settlement if—
> (a) he receives it from them directly or indirectly, or
> (b) it is directly or indirectly applied by them in payment of any debt of his or is otherwise paid or applied for his benefit, or
> (c) it is received by a third person at the beneficiary's direction.

On the general meaning of "receipt" see 27.6 (Who is the recipient of a benefit?).

### 45.7.1 *Indirect receipt from trustees*

In *Herman v HMRC* [2007] STC (SCD) 571 there was an arrangement under which:

(1) Trust 1 transferred funds to trust 2.

(2) Trust 2 transferred the funds to a beneficiary ("B").

The Special Commissioner held that B had received funds directly from trust 2[12] *and* indirectly from trust 1. This is an unsatisfactory decision, because parts of the reasoning are obviously flawed;[13] because of its casual disregard of double taxation; but most of all because no attempt was made to explain where a capital payment is or is not received indirectly from trustees, thus leaving taxpayers (and indeed HMRC) none the wiser in other cases:

> 21 The right approach, I think, is to make an enquiry, using whatever signposts appropriate to the circumstances are available, and to determine whether the receipts of [B] can *properly* be linked to the disposition from [trust 1] as their indirect source.

Of course this begs the question of what is meant by the evaluative term *properly.*

> An obvious *signpost* will be the existence of a plan, if there is one. In the present circumstances the appointment by the trustees of [trust 1] was in pursuance of a scheme ...; it will be relevant to the enquiry to determine whether the plan as a whole envisaged that [B] should receive the amounts that they did. If the relevant receipt resulted by accident or on account of circumstances not envisaged by the scheme, then the linkage *may* not be there.

This is too tentative. A plan of the kind found in *Herman* is not the signpost but the end of the matter; conversely if the receipt resulted by accident (assuming trusts have accidents) then the linkage cannot be there.

---

12 [2007] STC (SCD) 571 at [17].

13 In particular, the reliance on *West v Trennery* at [17]; see below.

> The second signpost is to analyse the trust law and determine whether [trust 2] "served as a vehicle to receive and continue the act of bounty effected by" the trustees[14] of [trust 1] (see the words of Lord Walker in para 41 of *West v Trennery*)...

This is misconceived, for *all* transferee trusts "serve as a vehicle to receive and continue the act of bounty" effected by the settlor of the transferor trust.

The better view is that *Herman* was wrongly decided. If however it is regarded as right (and adopting the jurisprudence of legal realism, the temptation to knock down the tax avoidance scheme involved may prove irresistible) there is no point in looking to the decision to find the test of when a payment from trust 2 should also be regarded as an indirect payment from trust 1. The guidance is not there. We are therefore thrown back to first principles. On that basis it is considered that the concept of indirect receipt should be limited to cases where there is a tightly drawn up scheme (as in *Herman*) under which (in the absence of the most unlikely changes of circumstances) payments are inevitably to be made from trust 1 to trust 2, and from trust 2 to the beneficiary. The scheme of s.90 TCGA (and the double taxation consequences from any other view) show that this is the case.

## 45.8 Capital payments from companies

Section 96(1) TCGA provides:

> Where a capital payment is received from a qualifying company which is controlled by the trustees of a settlement at the time it is received, for the purposes of sections 87 to 90 and Schedule 4C it shall be treated as received from the trustees.

This is perhaps needed because s. 87 only applies if a beneficiary receives a capital payment from the trustees. It might perhaps have been argued that receipt from the company is not receipt indirectly from the trustees though if the trustees controlled the company, the argument seems somewhat implausible.

---

14 "Trustees" is a slip for settlor, for the trustees do not confer any bounty.

### *45.8.1 Qualifying company*

Section 96(6) TCGA provides:

> For the purposes of subsection (1) above a qualifying company is a close company or a company which would be a close company if it were resident in the UK.

### *45.8.2 Controlled by the trustees*

Section 96 TCGA provides:

> (7) For the purposes of subsection (1) above a company is controlled by the trustees of a settlement if it is controlled by the trustees alone or by the trustees together with a person who (or persons each of whom) falls within subsection (8) below.
> (8) A person falls within this subsection if—
> (a) he is a settlor in relation to the settlement, or
> (b) he is connected with a person falling within paragraph (a) above.

### 45.8.3 *"Control"*

Section 96(10) TCGA defines control with a slightly non-standard meaning:

> (10) For the purposes of this section—
> (a) the question whether a company is controlled by a person or persons shall be construed in accordance with sections 450 and 451 of CTA 2010, but in deciding that question for those purposes no rights or powers of (or attributed to) an associate or associates of a person shall be attributed to him under section 451(4) to (6) of CTA 2010 if he is not a participator[15] in the company;

## 45.9 Capital payments to companies

Section 96(2) TCGA provides:

15 "Participator" has the standard meaning. Section 96(10) TCGA provides: "For the purposes of this section ... (b) 'participator' has the meaning given by section 454 of CTA 2010."

> Where a capital payment is received from the trustees of a settlement (or treated as so received by virtue of subsection (1) above) and it is received by a non-resident qualifying company, the rules in subsections (3) to (6) below shall apply for the purposes of sections 87 to 90 and Schedule 4C.

The rules in ss. (3)-(6) depend on whether
(1) the company is controlled by one person alone.
(2) the company is controlled by 2 or more persons (taking each one separately).
(3) the company is controlled by 2 or more persons (taking them together).
Section 96 provides:

> (3) If the company is controlled by one person alone at the time the payment is received, and that person is then resident or ordinarily resident in the UK, it shall be treated as a capital payment received by that person.
> (4) If the company is controlled by 2 or more persons (taking each one separately) at the time the payment is received, then—
> (a) if one of them is then resident or ordinarily resident in the UK, it shall be treated as a capital payment received by that person;
> (b) if 2 or more of them are then resident or ordinarily resident in the UK ("the residents") it shall be treated as being as many equal capital payments as there are residents and each of them shall be treated as receiving one of the payments.
> (5) If the company is controlled by 2 or more persons (taking them together) at the time the payment is received-
> (a) it shall be treated as being as many capital payments as there are participators in the company at the time it is received, and
> (b) each such participator (whatever his residence or ordinary residence) shall be treated as receiving one of the payments, quantified on the basis of a just and reasonable apportionment,
> but where (by virtue of the preceding provisions of this subsection and apart from this provision) a participator would be treated as receiving less than one-twentieth of the payment actually received by the company, he shall not be treated as receiving anything by virtue of this subsection.

### *45.9.1 Non-resident qualifying company*

Section 96(9) TCGA provides:

> For the purposes of subsection (2) above a non-resident qualifying company is a company which is not resident in the UK and would be a close company if it were so resident.

### 45.9.2 *Interaction with temporary non-residence rules*

Section 96 TCGA provides:

> (9A) For the purposes of this section an individual shall be deemed to have been resident in the United Kingdom at any time in any year of assessment which in his case is an intervening year for the purposes of section 10A.
> (9B) If—
> (a) it appears after the end of any year of assessment that any individual is to be treated by virtue of subsection (9A) above as having been resident in the United Kingdom at any time in that year, and
> (b) as a consequence, any adjustments fall to be made to the amounts of tax taken to have been chargeable by virtue of this section on any person,
>
> nothing in any enactment limiting the time for the making of any claim or assessment shall prevent the making of those adjustments (whether by means of an assessment, an amendment of an assessment, a repayment of tax or otherwise).

### 45.9.3 *Disregard of capital payments to companies*

These are odd rules, to say the least. As often happens, the anomalies may favour the taxpayer. Section 87C TCGA was brought in to counteract this. It provides:

> (1) For the purposes of sections 87 and 87A as they apply in relation to a settlement, no account is to be taken of a capital payment (or a part of a capital payment) within subsection (2).
> (2) A capital payment is within this subsection if (and to the extent that) it is received (or treated as received) in a tax year from the trustees of the settlement by a company that—
> (a) is not resident in the UK in that year, and

(b) would be a close company if it were resident in the UK,
(and is not treated under any of subsections (3) to (5) of section 96 as received by another person).

SP 5/92 para 18 provides:

> In general, transactions between trustees and companies which they, directly or indirectly, wholly own, or between such companies, are … not treated as capital payments within TCGA 1992 s 97.

The paragraph sets out a commonsense definition of "wholly owned" and concludes with a qualification:

> This approach may not, however, be taken where, on the facts of a particular case, it appears that the transaction has been entered into solely or mainly for the purposes of obtaining a UK tax advantage.

## 45.10 Matching

### 45.10.1 *Why does matching matter?*

The matching of capital payments with s.2(2) amounts is important for many reasons:

(1) *Time of charge:* The deemed s.87 gains accrue in the year that a capital payment is matched with a s.2(2) amount.
(2) *Amount of charge:* The amount of the s.87 deemed gain is the amount of the capital payment or the amount matched, if less.
(3) *Which beneficiaries come into charge:* if
 (a) more than one beneficiary receives capital payments, and
 (b) there are not enough s.2(2) amounts to match all the capital payments
 the question which capital payment is matched with a s.2(2) amount makes all the difference as to which beneficiary receives deemed s.87 gains.
(4) *Which capital payments come into charge:* if
 (a) one beneficiary receives more than one capital payment, some in and some outside the UK; and
 (b) there are not enough s.2(2) amounts to match all the capital payments

the question which capital payment is matched with a s.2(2) amount matters for the remittance basis. If a UK benefit is matched, there is a charge; if a non-UK benefit is matched, the s.87 remittance basis offers a defence to the charge.

(5) *The interest surcharge,* which depends on the time gap between a capital payment and the s.2(2) amount with which it is matched.

(6) *2008 transitional relief,* which applies where post-2008 capital payments are matched to pre-2008 s.2(2) amounts.

Matching is carried out on a LIFO (last in first out) basis. EN FB 2008 provides a summary:

> 452. Where the s.2(2) amount is equal to or greater than the capital payments then all the capital payments are matched:
> [1] any surplus s.2(2) amount is carried back to the year preceding the current tax year and any unmatched capital payments of that earlier year are matched to the surplus s.2(2) amount;
> [2] any surplus s.2(2) amount is carried back to the preceding year and matched with unmatched capital payments of that year, and so on, until the s.2(2) amount has been reduced to nil or there are no unmatched capital payments left in any earlier year; and
> [3] any surplus s.2(2) amount left after matching to previous years is available to match against future capital payments.
> 453. Where the amount of capital payments for the latest relevant tax year is greater than the s.2(2) amount for that year, then the surplus capital payments are carried back in the same way as surplus s.2(2) amounts, matching the surplus capital payments against the unmatched trust gains of each earlier year, starting with the latest year first and only moving back to an earlier year where there are no unmatched trust gains left in the later year. Any capital payments that remain unmatched are carried forward from the current tax year to be matched against the s.2(2) amounts of future years. ...
> 455. Note that:
> [1] the matching rules are modified by new subs.(4) of s.762 ICTA in relation to offshore income gains; and
> [2] capital payments are matched to trust gains within a given tax year on a pro rata basis, not on a daily basis.

The rules changed from a FIFO to a LIFO basis in 2008. HMRC did not state why they made this change. I surmise that it was done to minimise the benefit of 2008 transitional relief, which applies if post-2008 capital payments are matched with pre-2008 s.2(2) amounts. The old rule would have maximised the benefit of the relief, so that very large trusts with substantial s.2(2) amounts may have been free of CGT for a substantial period of time. Had the reason been given, there might have been some debate about whether the benefit justified the change, but as it was, there was none. But there it is.

### 45.10.2 *The statute*

Section 87A TCGA provides:

> (1) This section supplements s.87.
> (2) The following steps are to be taken for the purposes of matching capital payments with s.2(2) amounts.
> *Step 1*
> Find the s.2(2) amount for the relevant tax year.
> *Step 2*
> Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

Armed with these figures we proceed to the matching rule:

> *Step 3*
> The s.2(2) amount for the relevant tax year is matched with—
> (a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount for the relevant tax year, each capital payment so received, and
> (b) otherwise, the relevant proportion of each of those capital payments.
> "The relevant proportion" is the s.2(2) amount for the relevant tax year divided by the total amount of capital payments received in the relevant tax year.

I refer to a case within (a) as a "**surplus s.2(2) amount**" and a case within (b) as a "**surplus capital payment**".

The next step is a recomputation of the s.2(2) amount and of the amount of capital payments

> *Step 4*
> [1] If para (a) of Step 3 applies—

That is, if there is a surplus s.2(2) amount—

(a) reduce the s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and
(b) reduce the amount of those capital payments to nil.

I refer to the s.2(2) amount after this reduction as "**the unmatched s.2(2) amount**".

[2] If para (b) of that Step applies—

That is the case of a surplus capital payment—

(a) reduce the s.2(2) amount for the relevant tax year to nil,
and
(b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

I refer to the amount of the capital payments after this deduction as "**the unmatched capital payments**".

Then one starts again at the beginning, but with modifications:

*Step 5*
[1] Start again at Step 1 (unless subs.(3) applies).
[2] If the s.2(2) amount for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—
(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

I again refer to a case within step 5[2] (where there is an unmatched s.2(2) amount) as a "**surplus s.2(2) amount**".

Amended as step 5[2] directs, Steps 1-4 become:

*Step 1*
Find the s.2(2) amount for the relevant tax year [ie the unmatched s.2(2) amount].
*Step 2*
Find the total amount of capital payments received by the beneficiaries from the trustees ~~in the relevant tax year~~ *in the latest tax year which—*

(a) *is before the last tax year for which Steps 1 to 4 have been undertaken, and*

(b) *is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.*

*Step 3*

The s.2(2) amount for the relevant tax year is matched with—

(a) if the total amount of capital payments received ~~in the relevant tax year~~ *in the latest tax year which—*

*(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and*

*(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.*

does not exceed the [unmatched ] s.2(2) amount for the relevant tax year, each capital payment so received, and

(b) otherwise, the relevant proportion of each of those capital payments.

"The relevant proportion" is the [remaining] s.2(2) amount for the relevant tax year divided by the total amount of capital payments received ~~in the relevant tax year~~ *in the latest tax year which—*

*(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and*

*(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.*

*Step 4*

If para (a) of Step 3 applies—

(a) reduce the [unmatched] s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and

(b) reduce the amount of those capital payments to nil.

If para (b) of that Step applies—

(a) reduce the [unmatched] s.2(2) amount for the relevant tax year to nil, and

(b) reduce the [unmatched] amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

Eventually the unmatched s.2(2) amount is reduced to nil (ie all the s.2(2) amount is matched). Then step 5[2] ceases to apply. The journey then takes us to step 5[3]:

*Step 5*

[3] If the s.2(2) amount for the relevant tax year (as so reduced) is nil, read references to the s.2(2) amount for the relevant tax year as the s.2(2) amount for the latest tax year—

(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and

(b) for which the s.2(2) amount is not nil.

I refer to a case within step 5[3] as a "**surplus capital payment**". This is a case where:

(1) there is no unmatched s.2(2) amount for the relevant year;

(2) there is a s.2(2) amount for an earlier year.

Amended as step 5[3] directs, steps 1-4 become:

> *Step 1*
>
> Find the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year —*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.2(2) amount is not nil.*
>
> *Step 2*
>
> Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.
>
> *Step 3*
>
> The s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.2(2) amount is not nil*
>
> is matched with—
>
> (a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount ~~for the relevant tax year~~, *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.2(2) amount is not nil.*
>
> each capital payment so received, and
>
> (b) otherwise, the relevant proportion of each of those capital payments.
>
> "The relevant proportion" is the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.2(2) amount is not nil.*
>
> divided by the total amount of capital payments received in the relevant tax year.
>
> *Step 4*
>
> If para (a) of Step 3 applies—
>
> (a) reduce the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
>
> *(b) for which the s.2(2) amount is not nil.*
>
> by the total amount of capital payments referred to there, and
>
> (b) reduce the amount of those capital payments to nil.
>
> If para (b) of that Step applies—
>
> (a) reduce the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*
>
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*

> *(b) for which the s.2(2) amount is not nil.*
>
> to nil, and
>
> (b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

## 45.10.3 *When to stop*

Section 87A(3) TCGA (incorporated at step 5[1]) states when one can stop repeating these steps:

> This subsection applies if—
>
> (a) all of the capital payments received by beneficiaries from the trustees in the relevant tax year or any earlier tax year have been reduced to nil, or
>
> (b) the s.2(2) amounts for the relevant tax year and all earlier tax years have been reduced to nil.

That is, one stops when there are no unmatched capital payments or s.2(2) amounts.

Section 87A(4) TCGA provides:

> The effect of any reduction under Step 4 of subsection (2) is to be taken into account in any subsequent application of this section.

That seems self-evident.

## 45.10.4 *HMRC example: surplus s.2(2) amount*

EN FB 2008 provide two examples. *Text in italics represents HMRC comments:*

> ***56. Section 87A: Example 1: section 2(2) amount is greater than the total amount of capital payments for latest tax year:***
>
> The facts assumed in the example are as follows:
>
> *2008-09: no surplus trust gains or surplus capital payments*

| ***Year*** | ***Capital payment*** | ***s.2(2) amount*** |
|---|---|---|
| *2009-10:* | *£100k* | *nil* |
| *2010-11:* | *£200k* | *nil* |
| *2011-12:* | *£500k* | *nil* |
| *2012-13:* | *£500k* | *£2m* |

I set out the text of the relevant steps in the analysis.

> *Step 1*
> Find the s.2(2) amount for the relevant tax year.
> *Step 2*
> Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

The relevant tax year is 2012/13 and we can take the figures from the table.

We move on to step 3. There is (in my terminology) a surplus s.2(2) amount, because "the total amount of capital payments received in the relevant tax year" (£500k) does not exceed "the s.2(2) amount for the relevant year" (£2m). Accordingly:

> *Step 3*
> The s.2(2) amount for the relevant tax year is matched with—
> (a) ... each capital payment so received,

Thus step 3 states that £2m (the s.2(2) amount for 2012/13) is matched with the £500k capital payment. There are two difficulties with this. First, the charge in s.87(2) requires us to ask whether the *capital payment* is matched with the s.2(2) amount, and step 3 tells us that the *s.2(2) amount* is matched with the capital payment. The answer is that matching is by implication a reflexive operation, ie if A is matched with B, then B is matched with A.

Secondly, applying step 3 literally, the capital payment (£500k) is matched with the *entire* s.2(2) amount (£2m). This does not matter because s.87(3) TCGA restricts the charge to the amount of the capital payment. In order to follow s.87(3) one needs to read it together with s.87(2):

> (2) Chargeable gains are treated as accruing in the relevant tax year to a beneficiary of the settlement who has received a capital payment from the trustees in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under s.87A as it applies for the relevant tax year) with the s.2(2) amount for the relevant tax year or any earlier tax year.
> (3) The amount of chargeable gains treated as accruing is equal to—
> (a) the amount of the capital payment, or

(b) if only part of the capital payment is matched, the amount of that part.

But the HMRC analysis is as follows:

*Match as follows:*
*a. 2012-13 capital payments £500,000 match to £500,000 gains.*

The HMRC analysis (wisely) does not try to refer to the statutory steps which authorise this conclusion. (Indeed, there is no reason to think that the author of the HMRC example read the legislation.) But the end result is the same.

We move on to step 4. Ours is a surplus capital payment case, so step 4 provides:

*Step 4*
If para (a) of Step 3 applies—
(a) reduce the s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and
(b) reduce the amount of those capital payments to nil.

So our revised table becomes:

| ***Year*** | ***Capital payment*** | ***s.2(2) amount*** |
|---|---|---|
| *2009-10:* | *£100k* | *nil* |
| *2010-11:* | *£200k* | *nil* |
| *2011-12:* | *£500k* | *nil* |
| *2012-13:* | *£0 ~~£500k~~* | *£1.5 ~~£2m~~* |

The HMRC analysis is as follows:

*[1] 2012-13 capital payments reduced to nil.*
*[2] Unmatched 2012-13 trust gains reduced to £1.5 million.*
*[3] Refer unmatched trust gains to preceding year.*

Point [1] is correct. Points [2] and [3] are a fair paraphrase.

Our journey takes us to step 5:

*Step 5*
[1] Start again at Step 1 (unless subsection (3) applies).
[2] If the s.2(2) amount for the relevant tax year (as reduced under Step

> 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—
> (a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
> (b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries.

There is still a surplus s.2(2) amount (the s.2(2) amount for the relevant tax year is not nil, it is now £1.5m).

We revert to step 2 which now reads:

> *Step 2*
> Find the total amount of capital payments received by the beneficiaries from the trustees ~~in the relevant tax year~~ *in the latest tax year which—*
> *(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and*
> *(b) is a tax year in which capital payments (the amounts of which have not been reduced to nil) were received by beneficiaries*

The "latest tax year" is now 2011-12 and we can take the figures from the revised table.

We move on to step 3. This is a surplus s.2(2) amount case, because "the total amount of capital payments received in the latest tax year" (£500k) does not exceed "the s.2(2) amount for the relevant year" (£1.5m). Accordingly:

> *Step 3*
> The s.2(2) amount for the relevant tax year is matched with—
> (a) ... each capital payment so received,

Thus step 3 states that £1.5m (the unmatched s.2(2) amount) is matched with the £500k capital payment. But the HMRC analysis is as follows:

> *b. 2011-12 unmatched capital payments £500,000 match to £500,000 gains.*

As noted, this is a loose paraphrase of step 3, but it does not matter.

We move on to step 4. Ours is a step 3(a) case, so step 4 provides:

> *Step 4*
> If para (a) of Step 3 applies—
> (a) reduce the s.2(2) amount for the relevant tax year by the total amount of capital payments referred to there, and
> (b) reduce the amount of those capital payments to nil.

So:
(a): reduce the s.2(2) amount for the relevant year thus: £1.5m-£500k = £1m.
(b): reduce the capital payment for the latest year [2011-12] to nil.
The HMRC analysis is as follows:

> *2011-12 capital payments reduced to nil.*
> *Unmatched 2012-13 trust gains reduced to £1 million.*
> *Refer unmatched trust gains to preceding year.*

The process repeats once again, but "the latest tax year" now becomes 2009-10. It is not necessary to set out the steps. The reader will by now have the idea. The HMRC analysis (or paraphrase) is as follows:

> *2010-11 unmatched capital payments £200,000 match to £200,000 gains.*
> *2010-11 capital payments reduced to nil.*
> *Unmatched 2012-13 trust gains reduced to £800,000.*
> *Refer unmatched trust gains to preceding year.*

The process repeats once again, but "the latest tax year" now becomes 2009-10. It is not necessary to set out the steps. The HMRC analysis (or paraphrase) is as follows:

> *d. 2009-10 unmatched capital payments £100,000 match to £100,000 gains.*
> *2010-11 capital payments reduced to nil.*
> *Unmatched 2012-13 trust gains reduced to £700,000.*
> *Refer unmatched trust gains to preceding year.*

At this point s.87A(3) TCGA applies because "all of the capital payments received by beneficiaries from the trustees in the relevant tax year or any earlier tax year have been reduced to nil". Accordingly the steps come to an end. The HMRC analysis is:

*e. No unmatched capital payments in 2008-09 or earlier years.*

Lastly, the HMRC analysis provides:

*Carry forward unmatched trust gains of 2012-13 of £700,000 to be matched against capital payments of 2013-14 and subsequent years.*

This is a reference to step 1 as amended by step 5[3] but the point does not actually arise under the facts of the HMRC example.

It is noteworthy that in order to deal with the facts of the HMRC example (which is a simplication of the facts of a typical case in real life because there is only one s.2(2) amount) one has to carry out 15 steps.

### 45.10.5 *HMRC example: surplus capital payment*

HMRC's second example is as follows

***57. Section 87A: Example 2: capital payments are greater than section 2(2) amount for latest tax year: The facts assumed in the example are as follows:***

*2008-09: no surplus trust gains or surplus capital payments*

| ***Year*** | ***Capital payment*** | ***s.2(2) amount*** |
|---|---|---|
| *2009-10:* | *nil* | *£100k* |
| *2010-11:* | *nil* | *£200k* |
| *2011-12:* | *nil* | *£500k* |
| *2012-13:* | *£2m* | *£500k* |

I set out the text of the relevant steps in the analysis.

*Step 1*
Find the s.2(2) amount for the relevant tax year.
*Step 2*
Find the total amount of capital payments received by the beneficiaries from the trustees in the relevant tax year.

The relevant tax year is 2012/13 and we can take the figures from the table.

We move on to step 3. There is (in my terminology) a surplus capital payment because "the total amount of capital payments received in the relevant tax year" (£2m) does exceed "the s.2(2) amount for the relevant year" (£500k). Accordingly:

> *Step 3*
> The s.2(2) amount for the relevant tax year is matched with—
> (b) ... the relevant proportion of each of those capital payments.

"The relevant proportion" is the s.2(2) amount for the relevant tax year (£500k) divided by the total amount of capital payments received in the relevant tax year (£2m) = 0.25.

Thus step 3 states that £500k (the s.2(2) amount) is matched with one quarter of the capital payment = £500k. As noted, the charge in s.87(2) requires us to ask whether the *capital payment* is matched with the s.2(2) amount, and step 3 tells us that the *s.2(2) amount* is matched with the capital payment. The solution is that matching is a reflexive operation, ie if A is matched with B, then B is matched with A.

The HMRC analysis is as follows:

> *Match as follows:*
> *a. 2012-13 capital payments £500,000 match to £500,000 gains.*

We move on to step 4. Ours is a surplus capital payment case, so step 4 provides:

> *Step 4*
> [2] If para (b) of that Step [step 3] applies—
> (a) reduce the s.2(2) amount for the relevant tax year to nil, and
> (b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.

So our revised table becomes:

| **Year** | **Capital payment** | **s.2(2) amount** |
|---|---|---|
| 2009-10: | nil | £100k |
| 2010-11: | nil | £200k |
| 2011-12: | nil | £500k |
| 2012-13: | £1.5 ~~£2m~~ | £0 ~~£500k~~ |

The HMRC analysis is as follows:

*Unmatched 2012-13 capital payments reduced to £1.5 million.*
*Refer unmatched capital payments to preceding year.*

Our journey takes us to step 5.

> *Step 5*
> [1] Start again at Step 1 (unless subs.(3) applies)....
> [3] If the s.2(2) amount for the relevant tax year (as so reduced) is nil, read references to the s.2(2) amount for the relevant tax year as the s.2(2) amount for the latest tax year—
> (a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and
> (b) for which the s.2(2) amount is not nil.

This is a surplus capital payment case, (the s.2(2) amount for 2012–13 is now nil).

We revert to step 3 which now reads:

> *Step 3*
> The s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year—*
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken, and*
> *(b) for which the s.2(2) amount is not nil*
> is matched with—
> (a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount ~~for the relevant tax year~~, *for the latest tax year—*
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken,*
> *(b) for which the s.2(2) amount is not nil.*
> each capital payment so received, and
> (b) otherwise, the relevant proportion of each of those capital payments.
> "The relevant proportion" is the s.2(2) amount ~~for the relevant tax year~~ *for the latest tax year*
> *(a) which is before the last tax year for which Steps 1 to 4 have been undertaken,*
> *(b) for which the s.2(2) amount is not nil*
> divided by the total amount of capital payments received in the relevant tax year.

The "latest tax year" is now 2011-12. This is a surplus capital payment case because "the total amount of capital payments received in the relevant tax year" (now £1.5m) does exceed "the s.2(2) amount for the latest year" (£500k). Accordingly:

> *Step 3*
> The s.2(2) amount for the latest tax year is matched with—
> (b) ... the relevant proportion of each of those capital payments.

The relevant proportion is one third.

The process repeats again and again. It is not necessary to set out the steps. The reader will by now have the idea. The HMRC analysis (or paraphrase) is as follows:

> *2012-13 trust gains reduced to nil.*
> *b. 2011-12: match 2012-13 capital payments £1.5 million to £500,000 gains.*
> *2011-12 trust gains reduced to nil.*
> *Unmatched 2012-13 capital payments reduced to £1 million.*
> *Refer unmatched capital payments to preceding year.*
> *c. 2010-11: match 2012-13 capital payments £200,000 to £200,000 gains.*
> *2010-11 trust gains reduced to nil.*
> *Unmatched 2012-13 capital payments reduced to £800,000.*
> *Refer unmatched capital payments to preceding year.*
> *d. 2009-10: match 2012-13 capital payments £100,000 to £100,000 gains. 2010-11 trust gains reduced to nil.*
> *Unmatched 2012-13 capital payments reduced to £700.000.*
> *Refer unmatched capital payments to preceding year.*
> *e. No unmatched trust gains in 2008-09 or earlier years.*
> *Carry forward unmatched capital payments of 2012- 13 of £700,000 to be matched against trust gains of 2013-14 and subsequent years.*

It is noteworthy that in order to deal with the facts of the HMRC example (which is a simplication of the facts of a typical case in real life for there is only one capital payment in five years) one has to carry out 15 steps.

### 45.10.6 *Year of death of beneficiary*

If a beneficiary dies in a tax year, all gains accruing to the trustees in that year are s.2(2) amounts, which can be matched to capital payments made to the beneficiary, even post-death gains. However gains of a subsequent tax year cannot be matched. Section 87 does not say so expressly but the beneficiary could not be subject to CGT on s.87 deemed gains, as the charge is limited to UK residents (s.2 TCGA) and a deceased person is not resident in the UK. That has to be the rule: otherwise it could happen that an estate of a beneficiary who received capital payments could not be completely administered, as there might be a possibility of gains accruing at any time in the future.

Contrast the rule for s.86 which does not apply to gains accruing to the trustees in the year that the settlor dies, even pre-death gains.[16] Perhaps the reason for the s.87 rule is that it works (slightly) more fairly when two beneficiaries receive capital payments in a tax year and one of them dies during that year.

### 45.10.7 *Commentary: step-based drafting*

The pre-2008 s.87 provided:

> *(4) Subject to the following provisions of this section, the trust gains for a year of assessment shall be treated as chargeable gains accruing in that year to beneficiaries of the settlement who receive capital payments from the trustees in that year or have received such payments in any earlier year.*
> *(5) The attribution of chargeable gains to beneficiaries under subsection (4) above shall be made in proportion to, but shall not exceed, the amounts of the capital payments received by them.*
> *(6) A capital payment shall be left out of account for the purposes of subsections (4) and (5) above to the extent that chargeable gains have by reason of the payment been treated as accruing to the recipient in an earlier year.*

No reader who labouriously works through the almost endless iterative steps of s.87A will consider the new style of wording is an improvement on the old. I first speculated whether the legislation was drafted by someone who trained to write computer programs rather than legislation. The correct explanation seems to be that "step-based drafting" was an innovation of the tax law rewrite project in the search for new and clearer methods of drafting; the drafter of the FA 2008 sought to adopt the same technique, but in more clumsy hands the technique delivered obscurity rather than clarity.

16 See 44.8 (Year of death of settlor).

This does not necessarily mean that step-based drafting is a bad technique, but it certainly demonstrates how it can be used to bad effect. Finance Bills are generally drafted in a hurry (the FA 2008 was a mad panic) and clarity was a victim of the process.

The fundamental problem however is not the drafting, but the need to match capital payments with trust gains for a year.

## 45.11 Planning by matching

Matching is a rough and ready rule and trustees need to plan carefully to avoid unfairness.

### 45.11.1 *Planning to obtain remittance basis*

Suppose:

(1) Years 1–10: A beneficiary ("B") occupies a UK house held by a trust. This is a capital payment.

(2) Year 11: The house is sold for £1m gain and a s.2(2) amount arises.

In principle the s.2(2) amount in year 11 is matched with the capital payments in years 1–10. The deemed s.87 gain is taxed on an arising basis of the benefit received in the UK. If B is UK resident in year 11, this is an expensive matter. Suppose:

(3) Year 11: The trustees make a capital payment of £1m to B outside the UK.

The s.2(2) amount is matched with the £1m capital payment and the deemed s.87 gain is taxed on the remittance basis.

### 45.11.2 *Planning to avoid interest surcharge*

Since the surcharge matches on a LIFO basis, the charge can be avoided by realising gains in the year that any capital payment is made, so as to frank any capital payment with current year gains. If gains are not actually realised, the rules in schedule 4B TCGA make it fairly easy to realise deemed gains which will do just as well.[17]

17 See 46.1 (Borrowing by non-resident trust: Sch 4B TCGA).

## 45.12 Capital payment received by non-beneficiary

Chargeable gains are treated as accruing in the relevant tax year to *a beneficiary of the settlement* who has received a capital payment from the trustees.

One might think that the charge only applies to beneficiaries so if a capital payment is made to a non-beneficiary there is no charge. However, s.97(8) TCGA provides:

> In a case where—
>
> (a) at any time on or after 19th March 1991 a capital payment is received from the trustees of a settlement or is treated as so received by virtue of section 96(1),
>
> (b) it is received by a person, or treated as received by a person by virtue of section 96(2) to (5),
>
> (c) at the time it is received or treated as received, the person is not (apart from this subsection) a beneficiary of the settlement, and
>
> (d) subsection (9) or (10) below does not prevent this subsection applying,
>
> for the purposes of sections 86A to 90 and Schedule 4C the person shall be treated as a beneficiary of the settlement as regards events occurring at or after that time.

The drafting is clumsy: the charge applies to a beneficiary but every person is treated as a beneficiary: it would have been easier just to say that the charge applies to a person! One can identify four permutations:

| Case No. | Time of capital payment | Time deemed gain accrues |
|---|---|---|
| 1 | B | B |
| 2 | NB | B |
| 3 | B | NB |
| 4 | NB | NB |

Key: B: Beneficiary
NB: Non-beneficiary

Case 1 (beneficiary status at all times) is caught by s.87(2) directly.

Cases 2 and 4 (not a beneficiary at time of capital payment) are caught by s.87(8). This leaves case 3: the individual is a beneficiary at the time of the capital payment but not when the s.87 deemed gain accrues.

Section 97(8) does not apply because the condition in s.97(8)(a) does not apply. It is considered that s.87(2) should be construed widely so as to catch this case, otherwise there would be a strange anomaly in the legislation.

### 45.12.1 *Exceptions*

There are two exceptions to the rule in s.97(8). Section 97(9) TCGA provides:

> Subsection (8) above shall not apply where a payment mentioned in para
> (a) is made in circumstances where it is treated (otherwise than by subsection (8) above) as received by a beneficiary.

I cannot understand this.

Section 97(10) provides:

> Subsection (8) above shall not apply so as to treat—
> (a) the trustees of the settlement referred to in that subsection, or
> (b) the trustees of any other settlement,
> as beneficiaries of the settlement referred to in that subsection.

## 45.13 Interest surcharge

Section 91(1) TCGA provides:

> This section applies if—
> (a) chargeable gains are treated under s.87 or 89(2) as accruing to a beneficiary by virtue of the matching (under s.87A) of all or part of a capital payment with the s.2(2) amount for a tax year ("the relevant tax year"),
> (b) the beneficiary is charged to tax by virtue of that matching, and
> (c) the capital payment was made more than one year after the end of the relevant tax year.

It is not enough that chargeable gains to accrue to a beneficiary, and that the beneficiary is charged to tax; this must be "by virtue of the matching". But since gains never accrue unless there is matching, and the beneficiary is never charged unless there is matching, the words appear to be otiose. Section 91 continues to deal with part matching:

> (1A) Where part of a capital payment is matched, references in subsections (2) and (3) to the capital payment are to the part matched.

We then turn to the tax increase:

> (2) [a] The tax payable by the beneficiary in respect of the payment shall be increased by the amount found under subsection (3) below,
> [b] except that it shall not be increased beyond the amount of the payment;
> [c] and an assessment may charge tax accordingly.

Para 2[b] stops the Treasury increasing the rate of tax beyond 100%. One would hope it is not necessary.

Para 2[c] is otiose.

Section 91 continues to set out the amount of the increase:

> (3) The amount is one equal to the interest that would be yielded if an amount equal to the tax which would be payable by the beneficiary in respect of the payment (apart from this section) carried interest for the chargeable period at the rate of 10 per cent per annum.

Thus we have a notional 10% interest – the rate bears no relation to actual interest rates – for a period called a chargeable period.

> (4) The chargeable period is the period which—
> (a) begins with the later of the 2 days specified in subsection (5) below, and
> (b) ends with 30th November in the year of assessment following that in which the capital payment is made.
> (5) The 2 days are—
> (a) 1st December in the tax year immediately after the relevant tax year, and
> (b) 1st December falling 6 years before 1st December in the year of assessment following that in which the capital payment is made.

Thus the chargeable period cannot exceed 6 years and the maximum surcharge is 60% of the tax. As the top CGT rate is 28% the maximum rate of tax on a capital payment is therefore 44.8%.

I call this the "**interest surcharge.**" It is not in fact interest but the wording is designed to give it the some of the appearance of interest.

For completeness, the Treasury may alter the rules;[18] but they have never done so.

What is the position if the s.87 remittance basis applies? Section 12(2) TCGA (applied by s.87B TCGA, discussed below) provides:

> Chargeable gains are treated as accruing to the individual in any tax year in which any of the foreign [deemed, s.87] chargeable gains are remitted to the UK.

One might argue that there is no interest surcharge, because the gains are not charged to tax by virtue of matching; they are charged by virtue of the remittance. But the better view is the charge applies (by reference to the year of capital payment, not by reference to the year of remittance), and this is the HMRC view: see 45.15.1 (HMRC examples).

### 45.13.1 *Commentary*

What is the reason for the interest surcharge? It is to counter the perceived advantage that UK trusts pay CGT on an arising basis, but non-resident trusts (outside s.86) pay CGT on a capital payments basis, which is more favourable. But it works very oddly and unfairly, particularly after the extension of s.87 to foreign domiciled settlors and beneficiaries in 2008. For instance, consider a trust set up some years ago by an Australian for Australian beneficiaries; one beneficiary comes to the UK and receives a capital payment here. Why should there be a surcharge?

Following the 2008 reforms the surcharge is not likely to bring in sufficient tax to justify the complications that it causes. The case for repeal of the rule is very strong.

---

18 Section 91 TCGA continues:

"(6) The Treasury may by order substitute for the percentage specified in subsection (3) above (whether as originally enacted or as amended at any time under this subsection) such other percentage as they think fit.

(7) An order under subsection (6) above may provide that an alteration of the percentage is to have effect for periods beginning on or after a day specified in the order in relation to interest running for chargeable periods beginning before that day (as well as interest running for chargeable periods beginning on or after that day)."

## 45.14 Non-resident beneficiary

It does not matter that s.87 deemed gains accrue to a beneficiary who is non-resident (unless the temporary non-residence rules apply) since the gains are not subject to CGT. But the time which matters is when the gains accrue, so the matching rules need to be considered and pose something of a trap.

Suppose:

(1) Year 1: A capital payment is made to a beneficiary ("B") when B is non-resident. There are no s.2(2) amounts so that the capital payment is not matched.

(2) Year 2: A s.2(2) amount accrues when B is UK resident.

The capital payment is matched in year 2, so the s.87 deemed gain is chargeable (subject to the s.87 remittance basis).

### 45.14.1 *Planning for beneficiary coming to UK*

This problem arises if a beneficiary has an unmatched capital payment before coming to the UK. In this situation the trustees should trigger gains in year 1. The capital payment will then be matched in year 1, and will not come into charge in year 2.

### 45.14.2 *Commentary*

It is suggested that (subject to the temporary non-residence rules) a gain accruing to a non-resident should not come into charge. The charge only affects those who fail to take the necessary planning, and in many of those cases it is likely that it will be overlooked or tacitly ignored by non-compliant taxpayers.

## 45.15 Section 87 remittance basis

Before 2008/09 a beneficiary who is not domiciled in the UK was altogether exempt from the s.87 charge regardless of their residence and regardless of the domicile of the settlor. This rule was abolished from 2008/09. Section 87B TCGA provides a relief which I call the "**s.87 remittance basis**". Section 87B(1) provides:

> This section applies if—
> (a) chargeable gains are treated under s.87 as accruing to an individual in a tax year,
> (b) s.809B, 809D or 809E (remittance basis) applies to the individual for that year, and
> (c) the individual is not domiciled in the UK in that year.

In short, the relief applies to remittance basis taxpayers. Section 87B(2) provides the relief:

> The chargeable gains are foreign chargeable gains within the meaning of s.12 (non-UK domiciled beneficiaries to whom remittance basis applies).

The effect of s.87B(2) is to incorporate the ITA remittance basis. Section 87B continues:

> (3) For the purposes of Chapter A1 of part 14 of ITA 2007 (remittance basis) treat relevant property or benefits as deriving from the chargeable gains.
> (4) For the purposes of subsection (3) property or a benefit is "relevant" if the capital payment by reason of which the chargeable gains are treated as accruing consists of—
> (a) the payment or transfer of the property or its becoming property to which s.60 applies, or
> (b) the conferring of the benefit.

A rule of this kind is needed because deemed s.87 gains (being fictional) could not be remitted. The drafting of s.87B(4) is somewhat clumsy because a capital payment will always fall within (a) or (b) so every capital payment gives rise to relevant property or benefits. But it does not matter.

A capital payment still reduces the s.2(2) amount even though the payment is (un)taxed under the s.87 remittance basis. This is sensible because other beneficiaries (and the trustees) could not know what the position was.

It does not matter whether the s.2(2) amounts arise on disposals of UK or foreign assets. All that matters is whether the capital payment is remitted to the UK. HMRC agree. FAQ Residence & Domicile – NR trusts provides:

> **Does it make any difference if the assets in the non-resident trust or underlying non-resident company owned by the trust are UK situated?**
> There is no difference in the Capital Gains Tax treatment of UK situated vs foreign situated assets when these are owned by a non-resident trust or underlying non-resident company. However, as under current law, any UK source income produced by the trust or company will be taxed on the UK resident settlor or transferor on an arising basis irrespective of whether he has received any benefit if he has power to enjoy such income at the date it arises.

HMRC s.87 guidance provides:

> 43. The remittance basis applies to the section 87 gain not the gain that created the section 2(2) amount. For example, trustees dispose of an asset held outside the UK creating a section 2(2) amount. In the same year they make a capital payment outside the UK to a non-domiciled beneficiary. The capital payment is matched against the section 2(2) amount. A section 87 gain accrues to the beneficiary who has claimed the remittance basis for that year. The trustees apply the proceeds of the disposal in buying investments in the UK. This remittance of the gain which created the section 2(2) amount is not treated as a remittance of the section 87 gain by the beneficiary.

A capital payment may be remitted to the UK in a year before the s.87 deemed gains accrue, due to the quirky matching rules. Suppose:
(1) Year 1: a beneficiary receives a benefit; there are no s.2(2) amounts so the benefit is not matched and no s.87 deemed gains accrue.
(2) Year 2: the beneficiary remits the benefit to the UK. There is still not tax charge.
(3) Year 3: s.2(2) amounts accrue to the trustees and a deemed s.87 gain accrues to the beneficiary.
This gain is deemed to be remitted in the year it arises (year 3) and not before.[19]

### 45.15.1 *HMRC examples*

HMRC s.87 guidance note provides:

---

19 See 10.27 (Remittance before income or gains arise).

**Example 8 – New section 87B - remittance of capital payment: payment**
A is a UK resident and domiciled beneficiary of a non-UK resident settlement. B is a UK resident but non-UK domiciled beneficiary of the same settlement. The settlement owns shares in X Inc. X Inc is an American company registered on the New York Stock Exchange.[20]
In 2008-09 the trustees sell shares in X Inc for $120,000 when the spot rate is £1 = $1.50. The acquisition cost of the shares was $20,000 when spot was also £1 = $1.50. This creates a section 2(2) amount of £66,666 for 2008-09, ie $100,000 @ 1.50.
In 2010-11 the trustees make capital payments of $40,000 into the US bank accounts of each beneficiary. The spot rate of the US dollar at the date of the payment is £1 = $1.75. Chargeable gains of £22,857 accrue to each beneficiary under section 87 in 2010-11 in respect of these capital payments. $40,000 @ $1.75 = £22,857.
At the time of writing the annual exempt amount and rate of Capital Gains Tax are not known for 2010-11 and 2012-13. This example assumes the rate of Capital Gains Tax is 18% for both years and the annual exempt amount was £10,000 in 2010-11 and £11,000 in 2012-13.
Beneficiary A has other gains in 2010-11. The overall position is as follows.

- Section 87 gains £22,857
- Other personal gains £40,000
- Other personal losses £20,000
- Annual exempt amount £10,000

The amount on which Capital Gains Tax is chargeable is £32,857. The personal losses can be set only against the other personal gains but the annual exempt amount is allocated first to the section 87 gain leaving £12,857 of that part of the gain chargeable at 18%. The tax due on £12,857 is £2,314 (£12,857 @ 18%). This is increased by £462 (£2,314 @ 20%) because there is a delay of over one year in making the capital payment.
Beneficiary B claims the remittance basis for 2010-11 and leaves the $40,000 in the US bank account. B also has other gains in 2010-11. These gains and losses arise on the disposal of assets situated in the UK. The overall position is as follows.

- Section 87 gains £22,857
- Other personal gains on UK assets £40,000
- Other personal losses on UK assets £20,000

B does not have an annual exempt amount in 2010-11 because they have claimed the remittance basis. B is not liable to Capital Gains Tax on the section 87 gain of £22,857 because of section 87B. B is liable to CGT at 18% on the full amount of the other net personal gains £20,000.
Because B has claimed the remittance basis they also have to decide whether or not to make an election under section 16ZA TCGA. The effect of that election is allow losses on the disposal of assets situated outside the UK to be set-off against gains, either foreign chargeable gains or gains on the disposal of assets

20 This sentence is irrelevant, as the situs of the asset does not matter for s.87 purposes.

> situated in the UK. Unless the election is made the foreign losses will be lost. An effect of the election is that the annual exempt amount cannot be set foreign chargeable gains remitted to the UK, section 16ZB(4). B makes a valid election within the time limit, 31 January 2017.
> In 2012-13 B remits \$30,000 of the \$40,000 from the US bank to their UK bank where it is converted to sterling at a rate of £1 = \$2.00 ie £15,000. B is not a remittance basis user in 2012-13. The rate of Capital Gains Tax is 18%. The annual exempt amount is £11,000. The remittance is a disposal of foreign currency in the US bank account giving a loss of £2,142 [\$30,000 @ \$2.00 = £15,000 - \$30,000 @ 1.75 = £17,142].
> B is liable to Capital Gains Tax in 2012-13 on the following elements.
> The section 87 gain is a foreign chargeable gain. Section 12(2) and (3) TCGA provides this chargeable gain is treated as accruing in 2012-13 equal to the full amount of the gains remitted in 2012-13. B has remitted 75% of the £22,857 chargeable gain (30,000/40,000×£22,857) = £17,142. Section 2(4) TCGA prevents the personal losses, £2,142, being set against this gain. Because of the election under s16ZA neither can the annual exempt amount be set against this part of the gain. Tax is due at 18% on £17,142 = £3,085. This tax is subject to the increase in section 91 TCGA. This is calculated by reference to the year the gain was matched ie 2010-11 not the year the gain was remitted. The rate charged, 20%, will be the same that applied to beneficiary A. The total tax charged on this part of the gain is £3,085 + £617 = £3,702.
> If B had not made the election under s16ZA the annual exempt amount could be set against the remitted gains reducing the amount liable to the increase under s91. But they would lose the benefit of losses on any assets situated the UK.
> Additionally for 2012-13 B has other personal gains on UK assets of £18,000. Because of the election under s16ZA the personal losses £2,142 can be set against these gains as can the annual exempt amount £11,000. With a tax rate of 18% the total tax charged on the net gains of £4,858 is £971. The total Capital Gains Tax payable for 2012-13 is £4,673 (£3,702 + £971).

The next example concerns capital payments which take the form of benefits (use of accommodation) rather than transfer of cash. Omitting irrelevant detail, the example is as follows:[21]

---

21 The example in full, including its irrelevant detail, is as follows:

> "C is a UK resident but non-UK domiciled beneficiary of a non-UK resident settlement. C claims the remittance basis. The settlement owns 100% of the issued share capital of a Gibraltarian holding company which in turn owns 100% of the issued share capital of a Gibraltarian company. That company owns a property in Spain. Both companies are non-UK resident.
> The company sells the property in Spain creating a section 2(2) amount of £120,000 through section 13 TCGA. The company invests some of the proceeds in the purchase of a smaller property in Spain. C is allowed to use the property rent-free. C is also allowed rent-free use of a cottage in Devon owned by the settlement."

*Example 9 - New section 87B - Remittance of capital payment: benefit*
C is a UK resident but non-UK domiciled beneficiary of a non-UK resident settlement. C claims the remittance basis. The settlement has s.2(2) amounts.
The trustees (or underlying companies) allow C to use rent-free:
(1) a property outside the UK and
(2) a property in the UK.

The HMRC analysis is as follows:

The use of both properties by C gives rise to a capital payment equal to the value of the benefit. These capital payments are matched against the section 2(2) amount and a section 87 chargeable gain accrues to C. Section 87B(2) TCGA provides this is a foreign chargeable gain.
The use of the UK property meets condition A in section 809L. Because section 87B(3) TCGA provides the benefits derive from the chargeable gains the use of that property also meets condition B in section 809L(3)(b) ITA 2007. C is treated as remitting the capital payment created [by] the use of the Devon property to the UK and C is liable to CGT on that payment.
The use of the property outside the UK is not treated as a remittance to the UK and C is not liable to CGT on that payment.

## 45.16 Migrant settlements

### 45.16.1 *UK resident trust becomes non-resident*

Section 89(1) TCGA provides:

Where a period of one or more years of assessment for which s.87 applies to a settlement (“a non-resident period”) succeeds a period of one or more years of assessment for each of which s.87 does not apply to the settlement (“a resident period”), a capital payment received by a beneficiary in the resident period shall be disregarded for the purposes of sections 87 and 87A if it was not made in anticipation of a disposal made by the trustees in the non-resident period.

### 45.16.2 *Non-resident trust becomes UK resident*

Section 89 TCGA provides:

(1A) Subsection (2) applies to a settlement if—
(a) a non-resident period is succeeded by a resident period, and
(b) in relation to the last tax year in the non-resident period ("the last non-resident tax year"), s.87A(3) applied by virtue of para (a) of that provision (exhaustion of capital payments).[22]
(2) Chargeable gains are treated as accruing in a tax year (in the resident period) to a beneficiary of the settlement who receives a capital payment from the trustees in that year if all or part of the capital payment is matched (under s.87A as it applies for that year) with the s.2(2) amount for the last non-resident tax year or any earlier tax year.
(3) Section 87(3) and (4) and ss.87A to 87C apply for the purposes of subsection (2) as if the relevant tax year were the tax year mentioned in subsection (2).
(4) Section 87B (remittance basis) applies in relation to chargeable gains treated under subsection (2) as accruing as it applies in relation to chargeable gains treated under s.87 as accruing.

## 45.17 Dual resident trust – s.88 TCGA

In the context of s.88 TCGA, **"dual resident"** is used as a shorthand to describe a trust which is:
(1) domestic-law UK resident; and
(2) treaty-resident in a state with a DTA which has an article conferring CGT relief.

This is a slightly artificial use for the term "dual resident", which would naturally be used with a slightly wider meaning[23] but it is difficult to think of a better term and no difficulty arises as long as one bears that meaning in mind.

A dual resident trust would not be within s.87.[24] This gap is filled by s.88 TCGA:

**88 Gains of dual resident settlements**
(1) Section 87 also applies to a settlement for any year of assessment beginning on or after 6th April 1991 if—
(a) the trustees are resident and ordinarily resident in the UK during any

22 See 45.10.3 (When to stop).
23 On the terminology see 50.2.1 (Types of residence).
24 See 45.3 (Non-resident settlement condition).
For trusts which are not domestic law UK resident but which are treaty non-resident, see 50.19 (DT reliefs: s.87 TCGA).

part of the year, and

(b) at any time of such residence and ordinary residence they fall to be regarded for the purposes of any double taxation relief arrangements[25] as resident in a territory outside the UK.

### 45.17.1 *Revised definition of s.2(2) amount*

The usual definition of s.2(2) amount would not work for a dual resident trust, so s.88 TCGA provides:

> (2) The section 2(2) amount for a tax year for which section 87 applies by virtue of this section is what it would be if the amount mentioned in section 87(4)(a) were the assumed chargeable amount.
> (3) For the purposes of subsection (2) above the assumed chargeable amount in respect of a year of assessment is the lesser of the following 2 amounts—
> (a) the amount on which the trustees would be chargeable to tax for the year under section 2(2) on the assumption that the double taxation relief arrangements did not apply;
> (b) the amount on which, by virtue of disposals of protected assets, the trustees would be chargeable to tax for the year under section 2(2) on the assumption that those arrangements did not apply.

### 45.17.2 *Protected Assets*

Section 88 TCGA provides:

> (4) For the purposes of subsection (3)(b) above assets are protected assets if—
> (a) they are of a description specified in the double taxation relief arrangements, and
> (b) were the trustees to dispose of them at any relevant time, the trustees would fall to be regarded for the purposes of the arrangements as not liable in the UK to tax on gains accruing to them on the disposal.
> (5) For the purposes of subsection (4) above—
> (a) the assumption specified in subsection (3)(b) above shall be ignored;
> (b) a relevant time is any time, in the year of assessment concerned, when the trustees fall to be regarded for the purposes of the arrangements as resident in a territory outside the UK;

25 For the meaning of this term, see 8.4.3 ("DTR arrangements" – CGT).

(c) if different assets are identified by reference to different relevant times, all of them are protected assets.

45.17.3 *Commentary*

It is best to avoid dual resident (ie, UK domestic law resident, treaty non-resident) trusts because they involve tax in the UK (so far as the treaty does not provide relief), tax in the treaty jurisdiction, and tax liabilities under s.87. In practice such trusts only arise by accident.

## 45.18 Four basic strategies for the s.87 charge

In outline the position is as follows:

45.18.1 *Indefinite deferral*

Beneficiaries are only liable to the s.87 charge if they receive a capital payment. But there may be no need for a capital payment to be made. Instead, the capital of the trust fund may be retained. The beneficiaries of the settlement would enjoy a trust fund unreduced by the burden of CGT. In this way the charge may be postponed until further tax planning becomes possible – or indefinitely.

45.18.2 *Non-resident beneficiary*

Section 2(2) amounts are treated as chargeable gains accruing to a beneficiary who receives capital payments. But a beneficiary who is neither resident nor ordinarily resident in the UK is not subject to CGT on those gains. Such a beneficiary may therefore receive capital payments from the trust tax free, just as they can realise capital gains of their own without incurring any tax charge. The temporary non-residence rules need to be considered, see 8.1 (Temporary non-residence).

45.18.3 *Mixed UK and foreign beneficiaries: simple capital payments*

Section 2(2) amounts which have been matched with a capital payment to a beneficiary in an earlier tax year cease to be available for the purpose of the s.87 charge in the following year. This principle applies whether or not the beneficiary was subject to the s.87 charge. Suppose that s.2(2) amounts are matched with capital payments to a non-resident beneficiary and the capital payments equal the total s.2(2) amounts. Those s.2(2) amounts are sometimes said to have been "washed". In subsequent tax years these are not taken into account and a capital payment may be made to a UK beneficiary without incurring any tax charge under s.87. Careful timing is essential. The payment to the exempt beneficiary must be made in one tax year and the payment to a UK beneficiary must be postponed until the following tax year. Section 2(2) amounts accruing in a subsequent tax year may be taxed on the UK beneficiary.

### 45.18.4 *Mixed UK and foreign beneficiaries: capital payment/resettlement*

If one or more of the beneficiaries of the settlement are not UK resident, the trustees might consider advancing trust capital to those beneficiaries absolutely. The beneficiaries might then independently resettle the property and may gain additional inheritance tax advantages. The CGT position would be substantially improved for the other beneficiaries by washing s.2(2) amounts equal to the advancement. But successfully implementing arrangements of this kind is easier said than done. See 69.33 (Planning to create trust with foreign domiciled settlor).

## 45.19 Transfer between trusts

Section 90(1) TCGA provides:

> This section applies if the trustees of a settlement ("the transferor settlement") transfer all or part of the settled property to the trustees of another settlement ("the transferee settlement").

In short, s.90 applies on a transfer between trusts.

The section only applies on a transfer of trust capital: if trustees of a discretionary trust distribute trust income to another trust, it is suggested that s.90 does not apply, because the income is not "settled property".

Section 90 TCGA provides:

> (3) Treat the s.2(2) amount for the transferee settlement for any tax year

> (not later than the year of transfer)[26] as increased by—
> (a) the s.2(2) amount for the transferor settlement for that year (as reduced under s.87A as it applies in relation to that settlement for the year of transfer and all earlier tax years), or
> (b) if part only of the settled property is transferred, the relevant proportion of the amount mentioned in para (a).
> (4) "The relevant proportion" is—
> (a) the market value of the property transferred, divided by
> (b) the market value of the property comprised in the transferor settlement immediately before the transfer.

Section 90(5) TCGA provides corresponding relief for the transferor settlement:

> Treat the s.2(2) amount for the transferor settlement for any tax year as reduced by the amount by which the s.2(2) amount for the transferee settlement for that year is increased under subs.(3).
> ...
> (7) The increase under subs.(3) has effect for the year of transfer and subsequent tax years.
> (8) The reduction under subs.(5) has effect for tax years after the year of transfer.

It is interesting to compare the technique of s.81 IHTA (deeming transferred property to remain in the original trust). While that is not without its problems, it is a more effective anti-avoidance rule. The reason may be that s.90 is not (or not just) an anti-avoidance provision. It is intended to facilitate inter-trust transfers. Such transfers may be desirable for family reasons or to avoid unfairness which otherwise follows from the operation of s.87. Suppose trustees hold a trust fund worth £2m with s.2(2) amounts of £1m and they wish to make a capital payment of £1m to beneficiary A. If they do so then a subsequent distribution to beneficiary B would be tax free, and that would not be fair as between A and B. A transfer of one half of the trust fund to a separate trust, followed by a capital payment to A, solves this unfairness: A pays tax on one half of the s.2(2) amounts and B in due course may pay tax on the other half.

---

26 Section 90(2) TCGA gives this term a commonsense definition: "In this section 'the year of transfer' means the tax year in which the transfer occurs."

Section 90(6) TCGA deals with a transfer to a UK resident settlement:

> If neither s.87 nor s.89(2) would otherwise apply to the transferee settlement for the year of transfer—
> (a) s.89(2) to (4) apply to the settlement for that year (and subsequent tax years), and
> (b) for this purpose, references there to the last non-resident tax year are to be read as the year of transfer.

Amended as s.90(6) directs, s.89(2) to (4) provides:

> (2) Chargeable gains are treated as accruing in a tax year (in the resident period) to a beneficiary of the settlement who receives a capital payment from the trustees in that year if all or part of the capital payment is matched (under section 87A as it applies for that year) with the section 2(2) amount for the ~~last non-resident tax year~~ *year of transfer* or any earlier tax year.
> (3) Section 87(3) and (4) and sections 87A to 87C apply for the purposes of subsection (2) as if the relevant tax year were the tax year mentioned in subsection (2).
> (4) Section 87B (remittance basis) applies in relation to chargeable gains treated under subsection (2) as accruing as it applies in relation to chargeable gains treated under section 87 as accruing.

Section 90(9) TCGA deals with valuation:

> When calculating the market value of property for the purposes of this section or s.90A in a case where the property is subject to a debt, reduce the market value by the amount of the debt.

A transfer between trusts triggers the deadline for a rebasing election.[27]

### 45.19.1 *Transfer for consideration*

Section 90A TCGA provides:

> (1) Section 90 does not apply to a transfer of settled property made for consideration in money or money's worth if the amount (or value) of

27 See 45.28 (Rebasing: the election).

that consideration is equal to or exceeds the market value of the property transferred.

(2) The following provisions apply if—

(a) s.90 applies to a transfer of settled property made for consideration in money or money's worth, and

(b) the amount (or value) of that consideration is less than the market value of the property transferred.

(3) If the transfer is of all of the settled property, for the purposes of s.90 treat the transfer as being of part only of the settled property.

(4) Deduct the amount (or value) of the consideration from the amount of the market value referred to in s.90(4)(a).

Section 90 does not apply to a loan from trust 1 to trust 2 on commercial terms. It does not apply to an interest free loan repayable on demand, because the promise to repay is full consideration.

### 45.19.2 *Interaction with schedule 4B*

Section 90(10) TCGA provides:

This section does not apply to—

(a) a transfer to which Schedule 4B applies, or

(b) any s.2(2) amount that is in a Schedule 4C pool (see para 1 of Schedule 4C).

See 46.1 (Borrowing by non-resident trust: Sch 4B TCGA).

## 45.20 1981 transitional relief

Para 116 Sch 7 FA 2008 provides:

For the purposes of sections 87 and 87A of TCGA 1992, no account is to be taken of—

(a) any capital payment received before 10 March 1981, or

(b) any capital payment received on or after that date but before 6 April 1984, so far as it represents a chargeable gain which accrued to the trustees before 6 April 1981.

All capital payments before 10 March 1981 are disregarded. Capital payments before 6 April 1984 are disregarded if they represent a chargeable gain which accrued to the trustees before 6 April 1981. How does one decide whether a capital payment represents a pre-1981 gain? Fortunately this problem will not often arise now.

## 45.21 1998 transitional relief

Para 118 Sch 7 FA 2008 provides:

> (1) This paragraph applies if—
> (a) s.87 of TCGA 1992 applies to a settlement for the tax year 2008-09 or any subsequent tax year ("the tax year"),
> (b) the settlement was made before 17 March 1998,
> (c) none of the settlors fulfilled the residence requirements when the settlement was made, and
> (d) none of the settlors fulfils the residence requirements in the tax year.
> (2) For the purposes of that section as it applies to the settlement for the tax year, no account is to be taken of—
> (a) any gains or losses accruing to the trustees of the settlement before 17 March 1998, or
> (b) any capital payments received before that date.
> (3) A settlor "fulfils the residence requirements" when the settlor is—
> (a) resident or ordinarily resident in the UK, and
> (b) domiciled in any part of the UK.

I refer to this as "**1998 transitional relief**". In principle, (inter alia) for foreign domiciled settlor settlements, one disregards gains and capital payments before 17 March 1998. But if in any year there is a UK resident and domiciled settlor, even only one of several, the relief is lost in that year. Thus, the "tainting" principle applies. A small, even nominal contribution from a UK resident and domiciled settlor will forfeit the transitional relief for all years that that settlor is UK resident and domiciled.

One can envisage a case where it is better that this relief does not apply, in which case it would be possible to arrange to forfeit the relief, but this will not be common and in practice it might never arise.

## 45.22 Ascertaining s.2(2) amounts as at end 2007/8

The concept of s.2(2) amount was introduced in the FA 2008 with effect from 2008/9 but it is necessary to compute the s.2(2) amount for earlier years in order to know what s.2(2) amount is carried forward to 2008/09 and subsequently.

Para 120 Sch 7 FA 2008 provides:

> (1) This paragraph applies to a settlement if s.87 or s.89(2) of TCGA 1992 applied to it for the tax year 2007–08 or any earlier tax year.
> (2) The following steps are to be taken for the purposes of calculating the s.2(2) amount for the settlement for the tax year 2007-08 and earlier tax years.
> *Step 1*
> Calculate (in accordance with s.87 and, where appropriate, s.88) the s.2(2) amount for the settlement for the tax year 2007-08 and earlier tax years.
> For this purpose, references in s.87(4) and (5) of TCGA 1992 (as substituted) to s.87 of that Act applying to a settlement for a tax year are to be read as references to s.87 of that Act (as it had effect before that substitution) applying to a settlement for a tax year.
> *Step 2*
> Find the total amount of chargeable gains treated under s.87 or 89(2) as accruing to beneficiaries of the settlement in the tax year 2007-08 or any earlier tax year ("the total deemed gains").
> *Step 3*
> Find the earliest tax year for which the s.2(2) amount is not nil.
> If the s.2(2) amount for that year is less than or equal to the total deemed gains, reduce that s.2(2) amount to nil.
> Otherwise, reduce that s.2(2) amount by the amount of the total deemed gains.
> *Step 4*
> Reduce the total deemed gains by the amount by which the s.2(2) amount was reduced under Step 3.
> *Step 5*
> If the total deemed gains is not nil, start again at Step 3.
> For this purpose, read references to the earliest tax year for which the s.2(2) amount is not nil as references to the earliest tax year—
> (a) which is after the last tax year for which Steps 3 and 4 have been undertaken, and
> (b) for which the s.2(2) amount is not nil.

EN FB 2008 provides an example:

> 60. Example: determining the s.2(2) amount for years preceding

> 2008-09:
> The s.2(2) amounts of a settlement were:
> 2004-05: £100,000
> 2005-06: £50,000
> 2006-07: £200,000
> 2007-08: £200,000
> Total deemed gains were £450,000.
> a. Subtract the s.2(2) (£100,000) amount for the earliest year from the total deemed gains. Section 2(2) amount for 2004-05 reduces to nil. Total deemed gains reduced to £350,000.
> b. Subtract the s.2(2) (£50,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2005-06 reduces to nil. Total deemed gains reduced to £300,000.
> c. Subtract the s.2(2) (£200,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2006-07 reduces to nil. Total deemed gains reduced to £100,000.
> d. Subtract the s.2(2) (£200,000) amount for the next earliest year from the total deemed gains carried forward. Section 2(2) amount for 2007-08 reduces to £100,000. Total deemed gains reduced to nil.
> The s.2(2) amount for the settlement for 2007-08 is therefore £100,000.

In short, pre-2008 deemed gains are deducted from pre-2008 s.2(2) amounts on a FIFO basis (first in first out). It is expressed in just about the most obscure way possible.[28]

Para 120(3) provides for Schedule 4B cases, though the drafter does not try very hard:

> If, before 6 April 2008, the trustees of the settlement made a transfer of value to which Schedule 4B to TCGA 1992 applied, sub-para (2) has effect subject to such modifications as are just and reasonable on account of Schedule 4C to that Act having applied in relation to the settlement.

### 45.22.1 *Pre-2008 OIG amounts*

Para 99 Sch 7 FA 2008 applies the same rule to OIG amounts:

28 For a discussion of the drafting technique, see 45.10.7 (Commentary: Step-based drafting).

Paragraphs 120 and 121 apply in relation to offshore income gains as if—

(a) references to section 2(2) amounts were to OIG amounts,
(b) references to chargeable gains were to offshore income gains, and
(c) Step 1 of paragraph 120(2) provided that OIG amounts are to be calculated in accordance with—
  (i) section 762(2) of ICTA (the reference in the second sentence of that Step to section 87(4) of TCGA 1992 being read as a reference to section 762(2) of ICTA), or
  (ii) section 87(5) of TCGA 1992 as applied by section 762(3) of ICTA.

Section 762 ICTA is now repealed. The OFTR should have updated the references but somewhat negligently failed to do so. It is considered that the slip can be corrected by construction, ie references to the new provisions should be implied.

## 45.23 Pre-2008 inter-trust transfer

Para 120(4) Sch 7 FA 2008 disapplies the rules in para 120 where there was an inter-trust transfer before 2008/09[29] and para 121 Sch 7 FA 2008 sets out its own set of rules:

> (1) If s.90 of TCGA 1992 (as originally enacted) applied to a transfer of settled property made before 6 April 2008, this paragraph applies in relation to the transferor settlement and the transferee settlement.
> (2) In this paragraph "the year of transfer" means the tax year in which the transfer occurred.
> (3) The following steps are to be taken for the purpose of calculating the s.2(2) amount for the transferor and transferee settlements for the tax year 2007-08 and earlier tax years.
> *Step 1*
> Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount (at the end of the year of transfer) for the transferor settlement for the year of transfer and earlier tax years.
> For this purpose, read references there to the tax year 2007-08 as references to the year of transfer.

29 Para 120(4) provides:
This paragraph does not apply if s.90 of TCGA 1992 applied to a transfer of settled property by or to the trustees of the settlement that was made before 6 April 2008 (see para 121).

*Step 2*
Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount (before the year of transfer) for the transferee settlement for the tax year before the year of transfer and earlier tax years.
For this purpose, read references there to the tax year 2007-08 as references to the tax year before the year of transfer.
*Step 3*
Calculate the s.2(2) amount for the transferee settlement for the year of transfer.
*Step 4*
Treat the s.2(2) amount for the transferee settlement for the year of transfer or any earlier tax year (as calculated under Step 2 or 3) as increased by—
(a) the s.2(2) amount for the transferor settlement for that year (as calculated under Step 1), or
(b) if part only of the settled property was transferred, the relevant proportion of the amount mentioned in para (a).
"The relevant proportion" here has the same meaning as in s.90(4) of TCGA 1992 (as substituted by this Schedule).
*Step 5*
Treat the s.2(2) amount for the transferor settlement for any tax year as reduced by the amount by which the s.2(2) amount for the transferee settlement for that year is increased under Step 4.
*Step 6*
Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount for the transferor settlement for the tax year 2007-08 and earlier tax years.
For this purpose—
(a) treat the s.2(2) amount for the year of transfer or any earlier tax year as the amount calculated by taking Steps 1 and 5 above, and
(b) reduce the total deemed gains by the amount of the total deemed gains calculated by taking Step 1 above.
*Step 7*
Take the steps in para 120(2) for the purpose of calculating the s.2(2) amount for the transferee settlement for the tax year 2007-08 and earlier tax years.
For this purpose—
(a) treat the s.2(2) amount for the year of transfer or any earlier tax year as the amount calculated by taking Steps 2 to 4 above, and
(b) reduce the total deemed gains by the amount of the total deemed gains calculated by taking Step 2 above.

The drafter felt something should be done about multiple transfers, and Sch 4B, but did not know what:

(4) This paragraph applies with any necessary modifications in relation to a settlement as respects which more than one relevant transfer was made.
(5) In sub-para (4) "relevant transfer" means a transfer—
(a) made before 6 April 2008, and
(b) to which s.90 of TCGA 1992 applied.

(6) If, before 6 April 2008, the trustees of the transferor or transferee settlement made a transfer of value to which Schedule 4B to TCGA 1992 applied, this paragraph has effect subject to such modifications as are just and reasonable on account of Schedule 4C to that Act having applied in relation to the settlement.

Para 99 Sch 7 FA 2008[30] applies the same rules for OIG amounts.

## 45.24 Pre-2008 capital payments

In order to follow the present legislation, one needs to have in mind the original terms of s.87(6) TCGA and in order to follow that, one needs to read all of the pre-2008 s.87(4)-(6) TCGA:

*(4) Subject to the following provisions of this section, the trust gains for a year of assessment shall be treated as chargeable gains accruing in that year to beneficiaries of the settlement who receive capital payments from the trustees in that year or have received such payments in any earlier year.*
*(5) The attribution of chargeable gains to beneficiaries under subsection (4) above shall be made in proportion to, but shall not exceed, the amounts of the capital payments received by them.*
*(6) A capital payment shall be left out of account for the purposes of subsections (4) and (5) above to the extent that chargeable gains have by reason of the payment been treated as accruing to the recipient in an earlier year.*

Para 122 Sch 7 FA 2008 provides:

(1) If all of a capital payment would (in the tax year 2008-09) have been left out of account by virtue of s.87(6) of TCGA 1992 as originally enacted, the amount of that capital payment is reduced to nil.
(2) If part of a capital payment would (in the tax year 2008-09) have been left out of account by virtue of s.87(6) of TCGA 1992 as originally enacted, the amount of that capital payment is reduced by the amount of that part.

The point of this is to prevent double counting of a capital payment: it is set against s.2(2) amounts under para 120 and not a second time.

30 Set out at 45.22.1 (Pre-2008 OIG amounts).

(3) If—
(a) chargeable gains were treated under s.87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 as accruing in the tax year 2007-08 or any earlier tax year to a beneficiary,
(b) more than one capital payment that the beneficiary had received was taken into account for the purposes of determining the amount of chargeable gains treated as accruing to the beneficiary, and
(c) the amount of those chargeable gains was less than the total amount of capital payments taken into account,
for the purposes of this paragraph treat s.87(6) of TCGA 1992 as originally enacted as having effect in relation to earlier capital payments before later ones.

Para 122 then imposes the same rules for OIGs:

(4) References in this paragraph to s.87(6) of TCGA 1992 include that provision as it would (but for the amendments made by this Schedule) have applied by virtue of s.762(3) of ICTA (offshore income gains).
(5) References in this paragraph to chargeable gains include offshore income gains.

Section 762 ICTA is now repealed. The OFTR should have updated the reference but (somewhat negligently) failed to do so. It is considered that the slip can be corrected by construction, ie references to the new provisions should be implied.

## 45.25 Pre-2008 trust immigration

In order to follow the present legislation, one needs to have in mind the original terms of s.89(2) TCGA and in order to follow that it needs to be read with s.89(1):

*(1) Where a period of one or more years of assessment for which section 87 applies to a settlement ("a non-resident period") succeeds a period of one or more years of assessment for each of which section 87 does not apply to the settlement ("a resident period"), a capital payment received by a beneficiary in the resident period shall be disregarded for the purposes of section 87 if it was not made in anticipation of a disposal made by the trustees in the non-resident period.*
*(2) Where*
*(a) a non-resident period is succeeded by a resident period, and*

> *(b) the trust gains for the last year of the non-resident period are not (or not wholly) treated as chargeable gains accruing in that year to beneficiaries,*
>
> *then, subject to subsection (3) below, those trust gains (or the outstanding part of them) shall be treated as chargeable gains accruing in the first year of the resident period to beneficiaries of the settlement who receive capital payments from the trustees in that year; and so on for the second and subsequent years until the amount treated as accruing to beneficiaries is equal to the amount of the trust gains for the last year of the non-resident period.*

Para 123 Sch 7 FA 2008 provides:

> Section 89(2) of TCGA 1992 as substituted applies to a settlement for the tax year 2008-09 (and subsequent tax years) if s.89(2) of that Act as originally enacted would (but for the amendments made by this Schedule) have applied to the settlement for the tax year 2008-09.

## 45.26 Matched pre-2008 capital payments/s.2(2) amounts: Non-Dom relief

Para 124 Sch 7 FA 2008 provides:

> (1) This paragraph applies if—
> (a) chargeable gains are treated under s.87 or 89(2) of TCGA 1992 as accruing to an individual in the tax year 2008-09 or any subsequent tax year, and
> (b) the individual is not domiciled in the UK in that year.
> (2) The individual is not charged to capital gains tax on the chargeable gains if and to the extent that they are treated as accruing by reason of—
> (a) a capital payment received (or treated as received) by the individual before 6 April 2008, or
> (b) the matching of any capital payment with the s.2(2) amount for the tax year 2007-08 or any earlier tax year.

Para (2)(a) provides relief for pre-2008 capital payments to foreign domiciliaries. Para (2)(b) provides relief for post 2008 capital payments matched with pre-2008 s.2(2) amounts.

EN FB 2008 summarises the matter this way:

> 440. The overall effect of these new rules is that: ...
> [1] there will be no charge to tax in respect of capital payments made

to non-UK domiciled beneficiaries who:

[a] receive capital payments before 6 April 2008 that are matched to trust gains accruing on or after 6 April 2008; or

[b] receive capital payments on or after 6 April 2008 that are matched to trust gains accruing before 6 April 2008.

This will be so irrespective of whether the non-UK domiciled beneficiary is a remittance basis user;

### 45.26.1 *Pre-2008 capital payments and pre-2008 OIG amounts*

Para 100 Sch 7 FA 2008 provides the same rules for OIG amounts:

> (1) This paragraph applies if—
> (a) by virtue of section 87 or 89(2) of, or Schedule 4C to, TCGA 1992 as applied by regulation 20 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001), income is treated under such regulations (regulation 17 of those Regulations[)] as arising to an individual in the tax year 2008–09 or any subsequent tax year, and
> (b) the individual is not domiciled in the UK in that year.
> (2) The individual is not charged to income tax on the income if and to the extent that it is treated as arising by reason of—
> (a) a capital payment received (or treated as received) by the individual before 6 April 2008, or
> (b) the matching of any capital payment with the OIG amount for the tax year 2007–08 or any earlier tax year.

### 45.26.2 *Capital payments between 12 March and 5 April 2008*

Para 125 Sch 7 FA 2008 provides a special rule for these capital payments:

> (1) This paragraph applies in relation to a settlement for the tax year 2008-09 or any subsequent tax year ("the relevant tax year") if—
> (a) an individual who was resident or ordinarily resident, but not domiciled, in the UK in the tax year 2007-08 received a capital payment from the trustees of the settlement on or after 12 March 2008 but before 6 April 2008, and
> (b) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.
> (2) For the purposes of sections 87 to 89 of TCGA 1992 as they apply in relation to the settlement for the relevant tax year, no account is to be

taken of the capital payment.

One might refer to capital payments made between 12 March and 5 April 2008 as post-budget 2008 capital payments. There is no matching for post-budget 2008 capital payments, so such payments do not reduce s.2(2) amounts.

January 2009 Qs & As provides:

> **Q4**: Paragraph 125(2) appears to disregard payments between 12 March and 5 April altogether, which is different to the treatment proposed in the Budget documentation published on 12 March.
> **A**: The original intention set out in the Budget documentation of 12 March and legislation was to allow the matching of capital payments between 12 March 2008 and 5 April 2008 with any gains relating to the period up to 5 April 2008 arising to the trustees after 5 April 2008. However, this proposal was dropped because it would have introduced additional and unnecessary complexity to the legislation.

This rule is not extended to offshore income gains. It is not clear if that was deliberate or an accident.

## 45.27 Rebasing - introduction

Paragraph 126 Sch 7 FA 2008 provides a relief which I call "**rebasing**". HMRC s.87 guidance note provides:

> 80. The election is commonly known as a "rebasing" election ... But it is not rebasing as that term applies to section 35 TCGA and assets held at 31 March 1982. There is no across the board revaluation of the assets in the trust fund as at 6 April 2008.

## 45.28 Rebasing: the election

### 45.28.1 *Need for rebasing election*

Para 126 Sch 7 FA 2008 provides:

> (1) The following provisions apply to a settlement if—
> (a) s.87 applies to the settlement for the tax year 2008-09, and
> (b) the trustees of the settlement have made an election under this

> subparagraph. ...
> (5) An election under sub-para (1) is irrevocable.

EN FB 2008 provides:

> 63. The provisions of para [126] are subject to an election rather than being mandatory because:
> [1] depending on the assets comprised in the settlement as at 6 April 2008 it may not be advantageous for the paragraph to apply; and
> [2] the trustees will be required to provide additional information to HMRC about trust assets. Trustees of non-resident settlements have been assured in a letter from the Acting Chairman of HMRC, Dave Hartnett, dated 12 February 2008 that in applying the provisions set out in this Schedule, HMRC will not require any additional disclosure.

As far as [1] is concerned, it can never be disadvantageous for para 126 to apply (the election cannot in any circumstances increase the tax liability). HMRC s.87 guidance note provides:

> 79. The election ... cannot increase the tax payable by a beneficiary. Whether it improves the position of the beneficiary depends on the history of the assets disposed of.

Subject to point [2] (confidentiality) an election should be made in every case where it might be useful, which is generally the case where there are or might be UK resident foreign domiciled beneficiaries. I understand however that an election in relation to a trust unknown to HMRC will generally lead to protracted enquiries.

### 45.28.2 *Requirements for valid rebasing election*

HMRC s.87 guidance note provides:

> 82. The election can be made only if the settlement was non-UK resident throughout 2008-09.

This follows from para 126(1)(a). The guidance note continues:

> Paragraph 126(1) requires that the election be made by the trustees of the

settlement. It must be made by all the trustees or by a majority of them if they are permitted to act through a majority. It cannot be made by a beneficiary. If the beneficiary's Self Assessment tax return is taken up for enquiry an election may require additional disclosure to HMRC about assets held by the trustees in order to agree the valuation.

Para 126(6) sch 7 FA 2008 provides:

> An election under that sub-paragraph must be made in the way and form specified by the Commissioners for HMRC.

The HMRC s.87 guidance note provides:

> 89. The election must be made in the way and form specified by HMRC, paragraph 126(6). HMRC have provided a form RBE1 to satisfy this requirement and all elections must be made on that form. The form asks for the name of the settlement and the date it was created. The date is used to distinguish between settlements with similar names in particular those created by settlors with a prevalent surname. The form also asks the trustees to identify if and when a trigger event has occurred. The RBE1 can be downloaded from the HMRC website[31] or can be ordered by phoning HM Revenue and Customs CAR Residency on 0151 472 6384 or +44 151 472 6384 if you are calling from abroad.
> 90. Some trustees may have made the election by writing to CAR Residency before the form was available. That election remains valid and there is no need to make a further election on the form.

### 45.28.3 *Time limit for election*

Para 126(2) sch 7 FA 2008 provides:

> An election under sub-para (1) may only be made on or before the first 31 January to occur after the end of the first tax year (beginning with the tax year 2008-09) in which an event within either of the following paragraphs occurs—
> (a) a capital payment is received (or treated as received) by a

31 Accessible *www.hmrc.gov.uk/cnr/rbe1.pdf.*

beneficiary of the settlement,[32] and the beneficiary is resident in the UK in the tax year in which it is received, and

(b) the trustees transfer all or part of the settled property to the trustees of another settlement, and s.90 of TCGA 1992 applies in relation to the transfer.

The time limit is crucial. HMRC s.87 guidance note provides:

> 83. The relief is given only to individuals, paragraph 126(7), but the time limit is triggered if a capital payment is received by any UK resident beneficiary.

"Capital payment" is not defined in sch 7. The term is of course defined in s.97 TCGA but only "for the purposes of s.86A to 97 (and sch 4C)". Strictly that definition does not apply for the purposes of sch 7. It is considered however that the context shows that the usual definition is intended to be incorporated, notwithstanding the absent-minded omission of a provision to that effect. If that is right, a benefit within s.731 is not a capital payment so does not trigger the deadline for an election. It is well arguable that a benefit within the scope of OIG s.87 (which is chargeable to income tax) is not a "capital payment" for the purposes of para 126,[33] but it would be best not to rely on that point and to make the election in good time.

The December 2008 Qs & As provide:

> The earliest deadline for trustees to make an election for rebasing will be 31 January 2010 where a trigger such as a capital payment is made to a UK resident beneficiary in 2008-09 or the trustees transfer property in another settlement.

The HMRC s.87 guidance note provides:

---

32 Para 126 expands on this in Sch 4C cases:

"(3) For a tax year as respects which the settlement has a Schedule 4C pool, the reference in sub-para (2)(a) above to a capital payment received (or treated as received) by a beneficiary of the settlement is to be read as a capital payment received (or treated as received) by a beneficiary of a relevant settlement from the trustees of a relevant settlement.

(4) Para 8A of that Schedule (relevant settlements) applies for the purposes of sub-para (3) above."

33 See 32.12.3 ("Capital payment").

> 87. An election may be made before a triggering event happens.

This is important as it is convenient and (in offshore fund cases, may be necessary) to make the election before there is any capital payment. The HMRC s.87 guidance note continues:

> There is no requirement that the beneficiary receiving the payment was a beneficiary of the settlement as at 6 April 2008. The recipient may become a beneficiary at some later time. The time limit in paragraph 126(2) of Schedule 7 runs from the time the trustees first make a capital payment to a UK resident beneficiary. If the trustees make such a payment and do not make the election they may be out of time for making the election if they make a payment to a UK-resident but non-domiciled beneficiary at a later time. The election can be made even if there are no non-UK domiciled beneficiaries when the payment is made.
> 88. Any election made late will be considered in accordance with the guidance in paragraph 13801 onwards in HMRC's Capital Gains Tax manual [*recte* Capital Gains Manual].

**45.29 Rebasing: the relief**

Assuming an election has been made, we can move on to consider the relief. Para 126 Sch 7 FA 2008 provides:

> (7) Sub-para (8) applies if—
> (a) by virtue of the matching of a capital payment with the s.2(2) amount for the settlement for the tax year 2008-09 or any subsequent tax year ("the relevant tax year"), chargeable gains are treated under s.87 or 89(2) of, or para 8 Schedule 4C to, TCGA 1992 as accruing to an individual in a tax year, and
> (b) the individual is resident, but not domiciled, in the UK in that year.
> (8) The individual is not charged to capital gains tax on so much of the chargeable gains as exceeds the relevant proportion of those gains.

EN FB 2008 provides:

> 64. It should be noted that para [126] does not affect the computation of the s.2(2) amount under s.87 for a year. It simply provides a mechanism for identifying an amount of the chargeable gain treated as accruing to a non-UK domiciled beneficiary that is not chargeable to tax because an

element of the underlying s.2(2) amounts are attributable to the period before 6 April 2008, when non-UK domiciled beneficiaries were not chargeable to tax in respect of chargeable gains attributed to them under s.87.
65. Para [126] applies to all non-UK domiciled beneficiaries of a settlement, the trustees of which have made a valid election. The non-UK domiciled beneficiary does not need to be a remittance basis user. Only once the provisions of para [126] have been applied is it necessary to see whether the amount of tax that is left in charge is chargeable on the arising basis, in the year in which the gains are treated as having accrued to the beneficiary, or on the remittance basis where one of s.809B, [809D or 809E] applies.
66. ... Although there is only one s.87 pool for each tax year, where an election has been made under para [126](1) trustees will need to keep track of the separate elements of gains attributed to the period before and after 6 April 2008 within the pool.
67. There are no special rules to deal with assets where the market value as at 6 April 2008 was either higher or lower than both the cost of acquisition of the asset and the disposal proceeds....
81. The election has no effect on the matching of capital payments to section 2(2) amounts or the reduction of capital payments and section 2(2) amounts. It has no effect on gains accruing to UK domiciled beneficiaries.

### 45.29.1 *Relevant proportion*

Para 126(9) Sch 7 FA 2008 provides:

> The relevant proportion is A÷B where—
> A is what would be the s.2(2) amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and
> B is the s.2(2) amount for the settlement for the relevant tax year.

In short, rebasing relief applies to relevant assets.

### 45.29.2 *Relevant asset*

Para 126(10) provides:

> For the purposes of sub-para (9) an asset is a "relevant asset" if—
> (a) by reason of the asset, a chargeable gain or allowable loss accrues to the trustees in the relevant tax year, and
> (b) the asset has been comprised in the settlement from the beginning of 6 April 2008 until the time of the event giving rise to the chargeable gain or allowable loss.

HMRC s.87 guidance provides:

> 79. ... It is not possible to make the election only in respect of assets which have increased in value since 6 April 2008...
> 97. You consider only the assets whose disposal gave rise to the section 2(2) amount. Any assets held at 6 April 2008 which are not disposed of are not included in the comparison. This means that assets held at 6 April 2008 need be valued only when they are disposed of.

Para 126(11) extends rebasing relief to assets held by companies held by trusts:

> For those purposes, an asset is also a "relevant asset" if—
> (a) by reason of the asset, chargeable gains are treated under s.13 of TCGA 1992 as accruing to the trustees in the relevant tax year,
> (b) the company to whom the chargeable gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those chargeable gains, and
> (c) had the company disposed of the asset at any time in the relevant period,[34] part[35] of the chargeable gains (if any) accruing on the disposal would have been treated under s.13 of TCGA 1992 as accruing to the trustees.

A company's asset is not a relevant asset if a loss accrues on the disposal. But a trust asset can be a relevant asset even if a loss accrues on the disposal. It follows that one can envisage cases where the fraction A/B is greater than 1 (because an asset which gives rise to a loss on an actual disposal may be such that a gain would arise if the asset had been disposed of on 6/4/2008). However it does not matter if this is so. The relief is that:

34 Para 126(12) provides: "In sub-para (11)(c) "the relevant period" means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the chargeable gains."

35 The context shows that this must mean: *all or* part...

The individual is not charged to capital gains tax on so much of the chargeable gains as exceeds the relevant proportion of those gains.

So if the relevant proportion is greater than one, no relief applies but the tax charge is not increased.

## 45.30 Rebasing - HMRC examples

EN FB 2008 provides some examples. Example 1 is relatively straightforward.

68. *Example 1: basic mechanism of para [126(8)(9)]*:
The trustees of a settlement make an election under para [126](1).
In 2009-10 the trustees dispose of a property for £10 million. The chargeable gain accruing to the trustees is £8 million.
The chargeable gain that would have accrued to the trustees if the gain had been computed using the market value of the property as at 6 April 2008 as the cost of acquisition is £1 million.
The trustees make a capital payment to beneficiaries X and Y of £4 million each.
X and Y are both resident in the UK but X is also domiciled in the UK whereas Y is not.
There are no unmatched capital payments or trust gains relating to earlier years.

The HMRC analysis is as follows:

a. Match the capital payments to the s.2(2) amount for the year. Capital payments total £8 million and match to the s.2(2) amount of £8 million.
Chargeable gains of £4 million are treated as accruing to X and Y for 2009-10.
X is chargeable to CGT in 2009-10 under s.87 on the gains of £4 million.
Y is non-UK domiciled so para [126](1) applies to determine how much of the chargeable gains of £4 million is chargeable to tax.
b. The s.2(2) amount for 2009-10 is £8 million ("B" in para [126(9)].
c. The s.2(2) amount that would have applied if the trustees had sold the property and reacquired it immediately before 6 April 2008 is £1 million ("A" in para [126(9)].
d. A/B is 1/8.
e. Apply A/B to the chargeable gains of £4 million accruing to Y: the amount of the gains that is chargeable to tax under para [126(8)] is £4 million/8, i.e. Y is chargeable to capital gains tax on £500,000. If Y is a remittance basis user there will be no charge to tax until Y remits gain to the UK.
There are no surplus capital payments or trust gains for 2009-10.

Example 2 is more challenging.

69. *Example 2: matching capital payments across years and s.13 gains*
The trustees of a settlement make an election under para [126](1)]. The beneficiaries of the settlement are X, who is UK domiciled, and Y, who is not. Both X and Y are resident in the UK.
There are no unmatched trust gains or capital payments relating to earlier years.
In 2010-11 the trustees dispose of two assets:
a. the chargeable gains are £8 million: the pre 6 April 2008 gains are £7 million and the post 5 April 2008 gains are £1 million;
b. the overall loss is £5 million: the pre 6 April 2008 gain is £1 million and the post 5 April 2008 loss is £6 million.
A capital payment of £5 million is made to beneficiary Y.
In 2011-12 the trustees dispose of an asset. The chargeable gain is £5 million: the pre 6 April 2008 gain is £4 million and the post 5 April 2008 gain is £1 million.
Capital payments are made to beneficiaries X and Y of £2 million each.
In 2012-13 an underlying company within s.13 wholly owned by the trustees disposes of an asset.[36] The loss on the asset is £2 million.[37] But substituting the market value as at 6 April 2008 creates a post 5 April gain of £1 million. The trustees also dispose of an asset. The chargeable gain is £3 million: the pre 6 April 2008 gain is £2 million and the post 5 April 2008 gain is £1 million.
Capital payments are made to beneficiaries X and Y of £2 million each.

The EN sets out a table to summarise these facts which for ease of reference I set out here slightly expanded. It is easier to follow the example with the fuller spreadsheet which is available on *www.kessler.co.uk* (not set out here because it requires an A4 sheet).

| | **Pre 6/4/08 gain/loss** | **Post 5/4/08 gain/loss** | **"A"** | **s.2(2) amount "B"** | **A/B** | **Cap P't to X** | **Cap P't to X** |
|---|---|---|---|---|---|---|---|
| 2010-11 | £8m | (£5m) | £0 | £3m | 0 | - | £5m |
| 2011-12 | £4m | £1m | £1m | £5m | 1/5 | £2m | £2m |
| 2012-13 | £2m | £2m | £2m(?) | £3m | 2/3(?) | £2m | £2m |

The HMRC analysis is as follows:

***2010-11***
The s.2(2) amount is £3 million. Match capital payment of £5 million against trust gains of £3 million: chargeable gains of £3 million treated as accruing to Y. But Y is not UK domiciled so para [126] applies.

36 The example confusingly adds that the disposal is for £5m. But that is irrelevant, as what matters for tax is the gain or loss on the disposal, not the amount of the sale proceeds.
37 [Author's Footnote] This loss is not allowable; careful planning might have avoided that result.

Only £3 million×(A÷B) of the matched capital payment is chargeable to tax. However, the s.2(2) amount based on the market value of the assets as at 6 April 2008 is £0. Therefore A÷B is zero and none of the chargeable gains treated as accruing to Y is chargeable to tax.

2010-11: £2 million unmatched capital payments to Y.

***2011-12***

The s.2(2) amount is £5 million. Match capital payments of £4 million in the year against trust gains of £5 million; chargeable gains of £2 million treated as accruing to each of X and Y.

There are £1 million trust gains of 2011-12 unmatched. Step 5 of s.87A(2) applies.

Match 2011-12 £1 million trust gains to unmatched capital payments of £2 million to Y of 2010-11.

Chargeable gains of £1 million treated as accruing to Y. Unmatched capital payment to Y of 2010-11 reduced to £1 million.

X is chargeable to tax on £2 million in respect of 2012-13.

Y has chargeable gains of £3 million in respect of 2012-13. But Y is not UK domiciled so para [126] applies.

Under para [126(8)(9)]£3 million×(A÷B) of the matched capital payment is chargeable to tax.

A÷B is 1/5 so £600,000 of the chargeable gains treated as accruing to Y in 2011-12 are taxable.

£1 million unmatched capital payments to Y originating from 2010-11 to carry forward.

***2012-13***

The s.2(2) amount is £3 million. The disposal of the asset by the underlying company does not form part of the s.2(2) amount because only s.13 gains are brought into s.87. However, by applying the market values to the assets as at 6 April 2008 there is a gain attributable to the disposal of the asset by the company.

Match the capital payments of £4 million to the s.2(2) amount. Chargeable gains are treated as accruing to X and Y of £1.5 million each under part (b) of Step 3 of s.87A(2).

X is chargeable to tax on £1.5 million in respect of 2012-13.

Y has chargeable gains of £1.5 million in respect of 2012-13. But Y is not UK domiciled so para [126] applies.

*Under para [126(8)(9)], £1.5 million×(A÷B) of the matched capital payment is chargeable to tax. A÷B is 2/3 so £1 million of the chargeable gains treated as accruing to Y in 2012-13 are taxable. While the kink in the value of the company's asset has increased the proportion of gains on which Y is chargeable to tax, Y is still better off than if no election had been made.*

This assumes that the company's asset is a "relevant asset". However it is not a relevant asset, as it is not the case that "by reason of the asset, chargeable gains are treated under s.13 TCGA as accruing to the trustees in the relevant tax year." The correct figure for A/B is 1/3 and not 2/3 and the taxable gain after rebasing relief is £0.5m and not £1m.

There are £1.5m unmatched capital payments to Y to carry forward - £1m from 2010-11 and £0.5m from 2012-13.
There are £0.5m unmatched capital payments to X to carry forward all originating from 2012-13.

70. *Example 3: keeping track of pre 6 April and post 5 April gains and losses.* The trustees of a settlement make an election under para [126](1). The beneficiaries of the settlement are X, who is UK domiciled, and Y, who is not. Both X and Y are resident in the UK. There are no unmatched trust gains or capital payments relating to earlier years.
In 2010-11 the trustees dispose of an asset. The chargeable gain is £8 million: the pre 6 April gain is £7 million and the post 5 April 2008 gain is £1 million.
A capital payment of £2 million is made to each of beneficiaries X and Y.
In 2011-12 the trustees make a further capital payment to X and Y of £2 million each.

The example may be easier to follow if the facts are set out in a table:

| | **Pre 6/4/08 gain/loss** | **Post 5/4/08 gain/loss** | **"A"** | **s.2(2) amount "B"** | **A/B** | **Cap P't to X** | **Cap P't to X** |
|---|---|---|---|---|---|---|---|
| 2010-11 | £7m | £1m | £1m | £8m | 1/8 | £2m | £2m |
| 2011-12 | 0 | 0 | n/r | £5m | n/r | £2m | £2m |

The HMRC analysis is as follows:

***2010-11***

The s.2(2) amount is £8 million.
Match capital payments of £4 million in the year against trust gains of £8 million: chargeable gains of £2 million treated as accruing to each of X and Y. X is chargeable to tax on £2 million in respect of 2010-11.
Y has chargeable gains of £2 million in respect of 2010-11. But Y is not UK domiciled so para [126] applies.
Under para [126(8)(9)] £2 million×(A÷B) of the matched capital payment is chargeable to tax.
A÷B is 1/8 so £250,000 of the chargeable gains treated as accruing to Y in 2010-11 are taxable.
The reduced s.2(2) amount for 2010-11 for the purposes of matching with future capital payments is £4m.

***2011-12***

There is no s.2(2) amount for the year. Apply s.87A matching rules to earlier year.
Match capital payments of £4 million in 2011-12 to s.2(2) amount (as reduced) for 2010-11 of £4m:
chargeable gains of £2 million treated as accruing to each of X and Y.

X is chargeable to tax on £2m in respect of 2011-12.
Y has chargeable gains of £2 million in respect of 2011-12. But Y is not UK domiciled so para [126] applies.
Under para [126(7)(8)] £2 million×(A÷B) of the matched capital payment is chargeable to tax.
A÷B is 0.5/4 so £250,000 of the chargeable gains treated as accruing to Y in 2011-12 are taxable.
The table below shows how the s.2(2) amount for the year and the underlying gains (or losses) relating to the period before and after 6 April 2008 are matched.

| **2010-11 matching of capital payments** | **Pre 6 April gain/loss** | **Post 5 April gain/loss** | **Total trust gains (section 2(2) amount)** |
|---|---|---|---|
| 2010-2011 | £7m | £1m | £8m |
| Less matched to capital payment in 2010-11 | £3.5m | £500,000 | £4m |
| Unmatched in 2010-11 | £3.5m | £500,000 | £4m |
| Less matched to capital payments in 2011-12 | £3.5m | £500,000 | £4m |
| Unmatched in 2011-12 | £0 | £0 | £0 |

## 45.31 Rebasing - supplementary provisions

Para 126(13) Sch 7 FA 2008 extends the relief where one asset is derived from another asset; this will not be very common:

If— (a) by reason of an asset which would not otherwise be a relevant asset ("the new asset"), chargeable gains or allowable losses accrue, or are treated under s.13 as accruing, to the trustees in the relevant tax year,
(b) the value of the new asset derives wholly or in part from another asset ("the original asset"), and
(c) s.43 of TCGA 1992 applies in relation to the calculation of the chargeable gains or allowable losses,
the new asset (or part of that asset) is a "relevant asset" if the condition in sub-para (10)(b) or the conditions in sub-para (11)(b) and (c) would be met were the references there to the asset to be read as references to the new asset or the original asset.

Para 126(14)(15) extends the relief where there is an inter-group transfer:

(14) If—
(a) on or after 6 April 2008, a company ("company A") disposes of an

asset to another company ("company B"), and

(b) s.171 of TCGA (transfers within groups) (as applied by s.14(2) of that Act) applies in relation to the disposal,

for the purposes of sub-para (11) (and this sub-paragraph) treat company B as having owned the asset throughout the period when company A owned it.

(15) If an asset is a relevant asset by virtue of sub-para (14), for the purposes of sub-para (9)—

(a) treat the chargeable gains as having accrued to the company which owned the asset at the beginning of 6 April 2008, and

(b) treat the proportion of those chargeable gains attributable under s.13 of TCGA 1992 to the trustees as being the proportion of the chargeable gains actually accruing that are so attributable.

Para 126(16) to (18) deals with the situation where an asset is held by a company, and the trustees have held different interests in the company at different times:

(16) If—

(a) an asset would otherwise be a "relevant asset" within sub-para (11), and

(b) the proportion of chargeable gains treated under s.13 of TCGA 1992 as accruing to the trustees by reason of the asset ("the relevant proportion") is greater than the minimum proportion,

for the purposes of sub-para (9) treat the appropriate proportion of the asset as a relevant asset and the rest of the asset as if it were not a relevant asset.

(17) "The minimum proportion" is the smallest proportion of chargeable gains (if any) that would have been attributable to the trustees on a disposal of the asset at any time in the relevant period (as defined by sub-para (12)).

(18) "The appropriate proportion" is the minimum proportion divided by the relevant proportion.

This does not work. Suppose for example a trust held 50% of the shares in a non resident company, T Ltd before 2008, and later acquired all the shares. T Ltd realises a gain of £100 on an asset (the company's asset) held before 2008. The gain is deemed to accrue to the trust under s.13. The terms of subpara 16 are met:

(a) the company's asset would otherwise be a "relevant asset" within sub-para (11), and

(b) the proportion of chargeable gains treated under s.13 of TCGA 1992 as accruing to the trustees by reason of the asset ("the relevant proportion" - 100%) is greater than the minimum proportion (which under the definition in 126(17) is 50%.

So subpara 16 directs:

> for the purposes of sub-para (9) treat the appropriate proportion of the asset as a relevant asset and the rest of the asset as if it were not a relevant asset.

We need to ascertain the appropriate proportion. That is one half divided by the relevant proportion. So we need to know the relevant proportion. That is:

> A÷B where—
> A is what would be the s.2(2) amount for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and
> B is the s.2(2) amount for the settlement for the relevant tax year.

B is £100. In order to work out A we need to know what is the relevant asset, but we do not know what is a relevant asset until we have applied subpara 16. Presumably we are to ignore the subpara 16 reduction, in which case the company asset is the relevant asset. Assume that the company asset was worth £50 on 6 April 2008, so the relevant proportion is one half. Then the appropriate proportion is one half divided by one half, = one. I suspect that the drafter has confused "divided" with "multiplied". What a shambles! But there it is. Fortunately the problem may not often arise.

## 45.32 Rebasing – OIG amounts

Paragraph 101 Sch 7 FA 2008 provides equivalent rebasing relief for OIGs:

> (1) This paragraph applies if—
> (a) the trustees of a settlement have made an election under paragraph

126(1) (re-basing election),

(b) income is treated under regulation 17 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001) as arising to an individual in the tax year 2008–09 or any subsequent tax year ("the relevant tax year") by reason of the matching, under section 87A of TCGA 1992 as applied by regulation 20 of those Regulations, of an OIG amount with a capital payment received by the individual from the trustees, and

(c) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.

(2) The individual is not charged to income tax on so much of the income as exceeds the relevant proportion of that income.

(3) Sub-paragraphs (9) to (18) of paragraph 126 (meaning of "the relevant proportion") apply for the purposes of sub-paragraph (2) above as if—

(a) references to section 2(2) amounts were to OIG amounts,

(b) references to chargeable gains were to offshore income gains,

(c) references to allowable losses were omitted, and

(d) references to anything accruing were to it arising (and similar references were read accordingly).

Amended as para 101(3) requires, para 126(9) to (13) provide:

(9) The relevant proportion is A÷B where—

A is what would be the ~~section 2(2) amount~~ <u>OIG amount</u> for the settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the trustees (or the company concerned) and immediately re-acquired by them (or it) at the market value at that time, and

B is the ~~section 2(2) amount~~ <u>OIG amount</u> for the settlement for the relevant tax year.

(10) For the purposes of sub-paragraph (9) an asset is a "relevant asset" if—

(a) by reason of the asset, ~~a chargeable gain or allowable loss accrues~~ <u>an offshore income gain arises</u> to the trustees in the relevant tax year, and

(b) the asset has been comprised in the settlement from the beginning of 6 April 2008 until the time of the event giving rise to the chargeable gain or allowable loss.

(11) For those purposes, an asset is also a "relevant asset" if—

(a) by reason of the asset, ~~chargeable gains~~ <u>offshore income gains</u> are treated under section 13 of TCGA 1992 as ~~accruing~~ <u>arising</u> to the trustees in the relevant tax year,

(b) the company to whom the ~~chargeable gains~~ offshore income gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those ~~chargeable gains~~ offshore income gains, and

(c) had the company disposed of the asset at any time in the relevant period, part of the ~~chargeable gains~~ offshore income gains (if any) accruing on the disposal would have been treated under section 13 of TCGA 1992 as ~~accruing~~ arising to the trustees.

(12) In sub-paragraph (11)(c) "the relevant period" means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the ~~chargeable gains~~ offshore income gains.

(It is not necessary to set out the rest of para 126, as amended).

## 45.33 Rebasing - transfers between trusts

Para 127(1) Schedule 7 FA 2008 provides:

This paragraph applies if—

(a) in the tax year 2008-09 or any subsequent tax year, the trustees of a settlement ("the transferor settlement") transfer all or part of the settled property to the trustees of another settlement ("the transferee settlement"),

(b) s.90 of TCGA 1992 applies in relation to the transfer,

(c) the trustees of the transferor settlement have made an election under para 126(1),

(d) by virtue of the matching of a capital payment with the s.2(2) amount for the transferee settlement for the tax year 2008-09 or any subsequent tax year ("the relevant tax year"), chargeable gains are treated under s.87 or 89(2) of, or para 8 of Schedule 4C to, TCGA 1992 as accruing to an individual in a tax year, and

(e) the individual is resident, but not domiciled, in the UK in that year.

### 45.33.1 *Transferee trust makes rebasing election*

Para 127(2) Sch 7 FA 2008 provides:

If the trustees of the transferee settlement have made an election under para 126(1), para 126(7) to (9) have effect in relation to the transferee settlement for that year as if the reference in para 126(9) to relevant assets included relevant assets within the meaning of this paragraph.

### 45.33.2 *Transferee trust does not make rebasing election*

Para 127 Sch 7 FA 2008 provides:

> (3) If the trustees of the transferee settlement have not made an election under para 126(1), the individual is not charged to capital gains tax on so much of the chargeable gains mentioned in sub-para (1)(d) above as exceeds the relevant proportion of those gains.
> (4) The relevant proportion is—
> where—
> A is what would be the s.2(2) amount for the transferee settlement for the relevant tax year, if immediately before 6 April 2008 every relevant asset had been sold by the company concerned and immediately re-acquired by it at the market value at that time, and
> B is the s.2(2) amount for the transferee settlement for the relevant tax year.
> (5) For the purposes of this paragraph an asset is a "relevant asset" if—
> (a) by reason of the asset, chargeable gains are treated under s.13 of TCGA 1992 as accruing to the trustees of the transferee settlement in the relevant tax year,
> (b) the company to whom the chargeable gains actually accrue has owned the asset from the beginning of 6 April 2008 until the time of the event giving rise to those chargeable gains,
> (c) had the company disposed of the asset at any time in the relevant period, part of the chargeable gains (if any) accruing on the disposal would have been treated under s.13 of TCGA 1992 as accruing to—
> (i) the trustees of the transferor settlement (if the disposal had been made before the transfer), or
> (ii) the trustees of the transferee settlement (if it had not).
> (6) In sub-para (5)(c) "the relevant period" means the period beginning at the beginning of 6 April 2008 and ending immediately before the event giving rise to the chargeable gains.
> (7) Sub-paras (13) to (18) of para 126 apply for the purposes of this paragraph (with such modifications as are necessary) as they apply for the purposes of that paragraph.

January 2009 Qs & As provides:

**Q7** In applying the allocation rules to transfers between settlements, the transferor trust gains carried across will be treated as having accrued to the transferee trust in the year in which they in fact accrued to the transferor trust. Those gains that have been matched with capital payments out of transferor trust in the year of transfer or previous years will be left out of account. Gains carried across will be allocated to a capital payment from the transferee trust on a 'last in first out' (LIFO) basis. Gains on such assets will be governed by whether or not the transferor trust has made a rebasing election under paragraph 126 sch 7 FA 2008.

If the transferor settlement has made a rebasing election by the time of the transfer of the transferee settlement, then pre and post April 2008 gains which are deemed to have accrued on the actual disposal of an asset go across *pro rata*.

If the transferor settlement has not made a rebasing election by the 31 January following the year of the transfer, then even if no capital payment has yet been made, the right to rebase is lost in relation to the transferred assets and any assets retained in the transferor trust.

However, it should be noted that any transfers between settlements made prior to 6 April 2008 will not trigger a time limit on rebasing and any assets moving over to the transferee settlement as a result of a transfer made prior to 6 April 2008 will not be affected by any subsequent election for rebasing made by the transferor trust. If the asset appointed over to the transferee settlement before 6 April 2008 includes shares in a company within s.13 TCGA 1992, then the transferee settlement may wish to elect for rebasing in its own right. An election made by the transferee settlement may cover gains made by such a company – see para 127 Sch 7 FA 2008. Transferee settlements which receive property on or after 6 April 2008 cannot elect for rebasing in relation to the transferred assets – the decision is solely that of the transferor settlement.

Example

Trust 1 –- £300,000 gains made

Capital payment made of £10,000 to a remittance basis user.

Election for rebasing made: 90% (£270,000) of gains relate to the period pre 6 April 2008 and 10% (£30,000) post 5 April 2008.

The capital payment is matched only to post 5 April 2008 gains and taxed on remittance basis. £290,000 gain carried forward (£270,000 pre 6 April and £20,000 post 5 April 2008). So now 6.90% is post 5 April 2008 gain and 93.10% is pre 6 April 2008 gain.

Trust 1 appoints cash to Trust 2 of £2.5m at a time when Trust 1 is worth £20m (i.e. 12.5% of fund). £36,250 gains are transferred to

Trust 2 (12.5% of £290,000). 93.1% of these relate to the period pre 6 April 2008 and 6.9% after.

Trust pool in Trust 1 reduced to £253,750 (93.1% pre 6 April and 6.9% post 5 April 2008).

### 45.33.3 *Transfer between trusts: OIG amounts*

Para 102 Sch 7 FA 2008 provides equivalent rules for OIG amounts:

(1) This paragraph applies if—

(a) in the tax year 2008–09 or any subsequent tax year, the trustees of a settlement ("the transferor settlement") transfer all or part of the settled property to the trustees of another settlement ("the transferee settlement"),

(b) section 90 of TCGA 1992 applies in relation to the transfer,

(c) the trustees of the transferor settlement have made an election under paragraph 126(1),

(d) by virtue of the matching (under section 87A of TCGA 1992 as applied by regulation 20 of the Offshore Funds (Tax) Regulations 2009 (S.I. 2009/3001)) of a capital payment with an OIG amount of the transferee settlement, income is treated under such regulations (regulation 17 of those Regulations [)] as arising to an individual in a tax year ("the relevant tax year"), and

(e) the individual is resident or ordinarily resident, but not domiciled, in the UK in the relevant tax year.

(2) If paragraph 101 applies in relation to the transferee settlement, paragraph 126(9) as applied by paragraph 101(3) has effect as if the reference there to relevant assets included relevant assets within the meaning of paragraph 127(4) (as modified by sub-paragraph (4)(b) below).

(3) If paragraph 101 does not apply in relation to the transferee settlement, the individual is not charged to income tax on so much of the income mentioned in sub-paragraph (1)(d) above as exceeds the relevant proportion of that income.

(4) Sub-paragraphs (4) to (7) of paragraph 127 (meaning of "the relevant proportion") apply for the purposes of sub-paragraph (3) above as if—

(a) references section 2(2) amounts were to OIG amounts,

(b) references to chargeable gains were to offshore income gains, and

(c) references to anything accruing were to it arising.

## 45.34 Record keeping

HMRC s.87 guidance note provides:

> 133. Before 6 April 2008 trustees of non-UK resident settlements that have no UK domiciled beneficiaries, or beneficiaries who may become UK domiciled, will not have had to consider the possible UK Capital Gains Tax liabilities of the beneficiaries. From 6 April 2008 they will have to consider the possibility that a charge under section 87 or Schedule 4C TCGA may accrue to UK resident but non-UK domiciled beneficiaries.
> 134. In relation to pre 6 April 2008 transactions HMRC recognise that in such cases trustees
> - May not have kept sufficient records to calculate precisely the post 5 April 2008 Capital Gains Tax liabilities that may accrue on UK resident but non-UK domiciled beneficiaries, or
> - May not want to incur the expense of searching through old records to obtain all the necessary information to calculate precise Capital Gains Tax liabilities.
>
> 135. In such cases HMRC will consider any reasonable solution suggested to them. Usually proposed solutions will have to be considered on a case by case basis.

The guidance note concludes:

> One solution that HMRC will accept generally is that all assets held by trustees or underlying companies at midnight on 5 April 2008 are treated as having a zero acquisition cost. Provided the trustees make a valid election under paragraph 126 of Schedule 7 there will be no disadvantage to the beneficiaries. This is because the chargeable gain is restricted to the growth in the value of asset since 6 April 2008.

If a rebasing election is made, historic gain does not often matter, but there are situations in which it does.

## 45.35 CGT planning aspects of non-resident trusts

When are non-resident trusts advantageous? One situation is to maximise use of losses, but no-one *plans* to realise losses so that is not generally a planning point.

### 45.35.1 *Where capital payment basis better than arising basis*

Non-resident trusts are in principle better than absolute ownership of UK situate property by UK resident foreign domiciled individuals. Suppose:

(1) s.86 TCGA does not apply (eg settlor foreign domiciled, non-resident or dead);
(2) The trust holds:
    (a) UK situate property; or
    (b) Companies within s.13 TCGA which hold UK situate property.

If the trust property is held by foreign domiciled beneficiaries directly, disposals of the UK situate property are chargeable on an arising basis; if the same property is held in a non-resident trust, disposals by the trustees are taxable on a capital payments basis.

For beneficiaries who are arising basis taxpayers, similar points apply regardless of the situs of the trust property.

### 45.35.2 *Where capital payment basis better than remittance basis*

Non-resident trusts may be better than absolute ownership of foreign situate property by remittance basis taxpayers as they may avoid the application of the mixed fund rule.

*Example 1 (trust better than absolute ownership)*
Suppose a foreign situate asset is acquired for £1m, sold for £2m, giving a gain of £1m. If the asset is held by a remittance basis taxpayer (T) who remits £1m, there is a CGT charge on £1m as the remitted sum is all gain. By contrast, suppose:

(1) the asset is held in a non-resident trust.
(2) the trust makes a capital payment of £1m to T offshore.
(3) in the following year, the trust makes a capital payment of £1m to T onshore.

The offshore payment has reduced the s.2(2) amount to nil, so the second payment is free of CGT.

However to take advantage of this requires careful timing of gains and payments that is often not practical. Often, the remittance basis will be better than the capital payments basis.

*Example 2 (trust worse than absolute ownership)*
Suppose 3 foreign situate assets are each acquired for £1m, sold for £2m,

giving a gain of £1m each. If the assets are held by a remittance basis taxpayer (T) who remits the £2m proceeds of one of the assets, there is a CGT charge on £1m only. (Assume the proceeds are not paid into a singe account, ie are not mixed.)

By contrast, suppose:

(1) the assets are held in a non-resident trust.

(2) the trust makes a capital payment of £2m in the UK.

There is then a CGT charge on £2m.

### 45.35.3 *Where non-resident trusts not desirable*

Non-resident trusts are not desirable where the settlor is non-UK resident, since trust gains are s.2(2) amounts and gains accruing to the settlor are in principle CGT free.

### 45.35.4 *Should trustees hold assets through a trust subsidiary?*

Trustees may hold trust assets directly or through a wholly owned non-resident company (here called "a trust subsidiary"). Which is better?

For CGT a trust company has no CGT advantage and some disadvantages as there may be a double CGT charge:

(1) Gains accruing to the company are attributed to the trustees under s.13[38] and so constitute s.2(2) amounts.

(2) In addition, there may be a chargeable gain when the offshore trustees dispose of the company's shares and so further s.2(2) amounts.

There is normally no relief for that double charge.[39]

Losses of the trust company are restricted and easily lost altogether.

If the property is a residence, CGT private residence relief is lost by use of a company.[40]

So a company should not be used unless there is some good reason (which might be IT or IHT or some other reason.)[41]

---

38 See 47.1 (Gains of non-resident companies).

39 There are some reliefs: see 47.18 (Company distribution relief). However these only help the person who pays tax under s.13, so would only be relevant to a settlor-interested trust within s.86.

40 See 47.24 (Private residence relief).

41 See too 29.31 (Transfer of assets from non-resident trust to non-resident trust subsidiary)

CHAPTER FORTY SIX

# BORROWING BY NON-RESIDENT TRUST: SCH 4B TCGA

## 46.1 Flip-flop schemes

This chapter considers sch. 4B and 4C TCGA which are designed to counter a set of tax avoidance schemes popularly known as flip-flop schemes.

In order to understand the law it is helpful to review these schemes, which were designed avoid ss.86, 77 and 87 TCGA.

The s.86 version of the scheme was as follows. Suppose non-resident trustees wished to dispose of an asset on which a gain would accrue within s.86 TCGA. The following steps could be taken:

(1) The trustees borrow money equal to the value of the asset.
(2) They transfer the borrowed money to a second settlement.
(3) The trustees use their powers to exclude the settlor and designated persons from the first settlement so that s.86 ceases to apply to it.
(4) In the following tax year, the trustees of the first settlement sell the asset and realise a gain to which s.86 does not apply. They may then repay the loan.

This scheme was never challenged in court; I infer it was successful (though in practice it was often combined with a payment to the settlor from the second settlement, which turned out to be taxable under s.87.)

The s.77 version of the scheme was designed to avoid s.77 TCGA. It involved the same steps as the s.86 version. In this case however the legislation was (slightly) differently worded, and the scheme was eventually held to be unsuccessful in *West v Trennary* 76 TC 713, where the result (appropriately) flip-flopped through taxpayer success before the Commissioners, failure in the High Court, success in the Court of Appeal, to eventual failure in the House of Lords. Section 77 is now repealed, so this is now of historic interest only, though the background explains one or two features which survive in the present legislation.

The s.87 TCGA version of the scheme was as follows. Suppose non-resident trustees wished:

(1) to dispose of an asset on which a s.2(2) amount (trust gain) would accrue, and
(2) to make a payment to beneficiaries, which would be chargeable under s.87.

The following steps could be taken:

(1) The trustees of the first settlement borrow money equal to the value of the asset.
(2) They transfer the borrowed money to a second settlement.
(3) The trustees of the second settlement made a capital payment to the beneficiary.
(4) In the following tax year, the trustees of the first settlement sell the asset and realise the gain which is not a s.2(2) amount (trust gain) in relation to the second settlement. They may then repay the loan.

This was held to be unsuccessful in *Herman v HMRC*.[1]

It is striking that the majority of these widely marketed schemes eventually failed, contrary (I think) to the general expectation of the profession at the time. What lessons should be learned from that debacle? I leave readers to ponder over that.

The key features of the schemes were trustee borrowing and a transfer of trust property in year 1, followed by a disposal in a subsequent year. Schedule 4B produces a deemed disposal in year 1, which counteracts the s.86 version of the scheme. Schedule 4C contains special rules to tax the gain on beneficiaries, which counteracts the s.87 version.

The provisions were introduced in 2000 and revised in 2003 and 2008.

For the 2008 transitional rules, see 45.22 (Ascertaining s.2(2) amounts as at end 2007/8); 45.23 (Pre-2008 inter-trust transfer). For IHT issues which arise where trustees borrow, see 56.9 (Deduction for debts of trustees).

### 46.1.1 *What about income tax flip-flop schemes?*

Since schedule 4B only applies for CGT and OIG purposes, the reader may wonder if the schemes could work for IT. Suppose non-resident

1 See 45.7.1 (Indirect receipt from trustees).

trustees of a settlor-interested discretionary trust wished to receive income (for instance by surrendering a life policy or receiving dividends) which would fall within s.624 or s.720. Could the following steps be taken:
(1) The trustees borrow money equal to the anticipated income.
(2) They transfer the borrowed money to a second settlement.
(3) The trustees use their powers to exclude the settlor and spouse from the first settlement so that the settlement ceases to be settlor-interested.
(4) In the following tax year, the trustees of the first settlement receive the income and repay the borrowing.

The answer is that the capital payment provisions, s.633 ITTOIA and s.727 ITA, fill that gap.

Similarly, planning of this kind would not work for s.731 as transfers between trusts do not isolate relevant income; see 27.32 (Transfer between trusts).

## 46.2 The key conditions

Para 1 Sch 4B TCGA provides:

> (1) This Schedule applies where trustees of a settlement—
> (a) make a transfer of value (see paragraph 2) in a year of assessment in which the settlement is within section 86 or 87 (see paragraph 3), and
> (b) in accordance with this Schedule the transfer of value is treated as linked with trustee borrowing (see paragraphs 4 to 9).

Thus the three key conditions, or sets of conditions, are:
(1) a Sch4B-transfer of value
(2) trustee borrowing.
(3) the transfer of value is "linked" with trustee borrowing.

## 46.3 Sch4B-transfer of value

The term "transfer of value" is unfortunate. Firstly the term is normally used with a specific IHT meaning. Secondly, the term is artificially defined to include loans and other transactions which do not involve any transfer of value in the normal sense of the term. I therefore use the term **"sch4B-transfer of value"**.

There are three types of sch4B-transfer of value. Para 2(1) Sch 4B TCGA provides:

> For the purposes of this Schedule trustees of a settlement make a transfer of value if they—
> (a) lend money or any other asset to any person,
> (b) transfer an asset to any person and receive either no consideration or a consideration whose amount or value is less than the market value of the asset transferred, or
> (c) issue a security of any description to any person and receive either no consideration or a consideration whose amount or value is less than the value of the security.

The CG Manual does not add much to the statute but I set it out for completeness:

> **35124. Anti-avoidance provisions: Disposals of interests for consideration: Transfer of value**
> Under TCGA 1992, SCH 4B, para 2(1) trustees make a transfer of value if they
> (a) lend money or any other asset, regardless of whether a commercial rate of interest or hire is charged, or
> (b) transfer an asset, including cash, see paragraph 13(1), for no consideration or a consideration less than its market value, or
> (c) issue a security for no consideration or a consideration less than its value.
> **35125. Anti-avoidance provisions: Disposals of interests for consideration: Transfer of value**
> References to transfers of value include everything that is or is treated as a disposal under TCGA 1992, and also include transfers or loans of money, and loans of other assets. Note that this includes disposals of assets such as government stock or a dwelling house occupied as a beneficiary's principal private residence, even though there would be no chargeable gain on the disposal. It also includes the occasion of a beneficiary becoming absolutely entitled as against the trustee but in this context see CG35128.
> Some part disposals involve the creation of a new asset. In this situation any reference in the legislation to the transfer of an asset refers to the (part) disposal of the old asset.
> CG35124(b) above makes it clear that a sale of an asset, whether to an unconnected person or a beneficiary, is not a transfer of value provided it is for full consideration.

### 46.3.1 *Sch4B-transfer of value type (b): actual transfer*

This is the most important type of transfer of value.

RI 259 provides:

> **B1 Paragraph 2(1)(b)—cash distributions which are income**
> Where trustees of a discretionary trust make a distribution which is income of the recipient for UK tax purposes, this is not a "transfer of value" within para 2, which is concerned with capital transactions.

### 46.3.2 *Sch4B-transfer of value type (a): loans*

I cannot see the reason for sch4B transfer of value type (a) (loans). An effective flip-flop scheme would require a transfer which must fall within (b). There is no scope for tax avoidance via a loan. I would be grateful to any reader who could explain.

RI 259 provides:

> **B2 Paragraph 2(1)(a)—beneficiary exercising rights under [TLATA][2] 1996 s 12**
> In certain circumstances a beneficiary's occupation of property, instead of being the consequence of the volition of the trustees, may result from personal rights under Trusts of Land and Appointment of Trustees Act 1996 s 12. Our view is that if the rights of the beneficiary arise as a consequence of the wording of the deed or will, then the occupation does not give rise to a transfer of value. It may be otherwise where the rights have arisen as a consequence of the exercise by the trustees of a power of appointment or advancement.

RI 259 provides:

> **B7 What happens when trustees put money into a conventional current or deposit account at a bank or building society?**
> Although in general law this is regarded as a loan from the customer to the bank, in the context of this legislation we do not consider that this comes within the meaning of "lend" for the purposes of para 2(1)(a). The currency in which the deposit is made is immaterial.

This is purposive, bordering on wishful, thinking; but since it usually suits the taxpayer, it will not usually be challenged.

2 The original refers erroneously to the "Trustee etc Act".

### 46.3.3 *Sch4B-transfer of value type (c): issuing a security*

It is normally companies rather than trustees who issue securities so this is of somewhat theoretical interest. RI 259 provides:

> **B3 Paragraph 2(1)(c)— "issue a security"**
> We have been asked what the expression "issue a security" covers. It caters for those exceptional circumstances where trustees issue to a beneficiary or to the trustees of another trust a document acknowledging liability. Schedule 4B para 13(2) provides that references to the transfer of an asset include everything that is or is treated as a disposal of an asset. The issue of a security is not in itself the disposal or part disposal of an asset. Therefore para 2(1)(b) does not apply to it, and it was necessary to have a specific provision to cover this possibility.

I find the idea that any flip flop scheme could be carried out by issuing a security somewhat implausible. Assuming it was necessary, a neater solution would have been to define transfer to include the creation of an asset (as for the TAA provisions); but it does not do much harm.

### 46.3.4 *Amount of value transferred*

Para 2 Sch 4B TCGA provides:

> (3) In the case of a loan, the amount of value transferred is taken to be the market value of the asset.
> (4) In the case of a transfer, the amount of value transferred is taken to be—
> (a) if any part of the value of the asset is attributable to trustee borrowing, the market value of the asset;
> (b) if no part of the value of the asset is attributable to trustee borrowing, the market value of the asset reduced by the amount or value of any consideration received for it...
> (5) In the case of the issue of a security, the amount of value transferred shall be taken to be the value of the security reduced by the amount or value of any consideration received by the trustees for it.
> (6) References in this paragraph to the value of an asset are to its value immediately before the material time, unless the asset does not exist before that time in which case its value immediately after that time shall be taken.

## 46.4 Settlement "within section 86 or 87"

Para 3 Sch 4B TCGA provides commonsense definitions.

### 46.4.1 *Within s.86*

Para 3 Sch 4B TCGA provides:

> (1) This paragraph explains what is meant in this Schedule by a settlement being "within section 86 or 87" in a year of assessment.
> (3) A settlement is "within section 86" in a year of assessment if, assuming—
> (a) that there were chargeable gains accruing to the trustees by virtue of disposals of any of the settled property originating from the settlor, and
> (b) that the other elements of the condition in subsection (1)(e) of that section were met,
> chargeable gains would, under that section, be treated as accruing to the settlor in that year.
> Expressions used in this sub-paragraph have the same meaning as in section 86.

### 46.4.2 *Within s.87*

Para 3 Sch 4B TCGA, as inserted by s.92(2) FA 2000, used to provide:

> *(4) A settlement is "within section 87" in a year of assessment if, assuming—*
> *(a) there were trust gains for the year within the meaning of subsection (2) of that section, and*
> *(b) that beneficiaries of the settlement received capital payments from the trustees in that year or had received such payments in an earlier year,*
> *chargeable gains would, under that section or section 89(2), be treated as accruing to the beneficiaries in that year.*
> *Expressions used in this sub-paragraph have the same meaning as in section 87.*

Para 3 Sch 4B TCGA was then amended by the para 130 Sch 7 FA 2008:

> In paragraph 3 of Schedule 4B (transfers of value by trustees linked with

> trustee borrowing: settlements), for sub-paragraph (4) substitute—
> "(4) A settlement is "within section 87" for a tax year if—
> (a) section 87 applies to the settlement for that year, or
> (b) chargeable gains would be treated under section 89(2) as accruing in that year to a beneficiary who received a capital payment from the trustees of the settlement in that year.
> (5) The reference in subsection (4)(b) to chargeable gains treated as accruing includes offshore income gains treated as arising."

The drafter absentmindedly repealed the sentence "Expressions used in this sub-paragraph have the same meaning as in section 87".[3] It is considered, however, the context shows that the expressions in para 3(4)(5) are nevertheless to be construed with their s.87 meanings.

## 46.5 Trustee borrowing

Para 4(1) Sch 4B TCGA provides a wide definition of borrowing:

> For the purposes of this Schedule trustees of a settlement are treated as borrowing if—
> (a) money or any other asset is lent to them, or
> (b) an asset is transferred to them and in connection with the transfer the trustees assume a contractual obligation (whether absolute or conditional) to restore or transfer to any person that or any other asset.
> In the following provisions of this Schedule "loan obligation" includes any such obligation as is mentioned in paragraph (b).

A loan to a trust from a company wholly owned by the trust constitutes "trustee borrowing" for the purposes of sch 4B TCGA. RI 259 states that HMRC take this unmeritorious point:

> **B4 Paragraph 4(1): meaning of "borrowing"**
> It is not unusual for the trustees of a non-resident trust to borrow money from a non-resident company which they control. In this situation, if the company were resident in the UK, [s.455 CTA 2010] might well be applicable. It has been suggested that in this situation the trustees are

3 Some databases have failed to notice this (accidental) repeal and include this sentence in para 3 Sch 4B TCGA.

> effectively "borrowing" from themselves and therefore outside para 4(1). We consider this incorrect, particularly in the light of *Chamberlain v IRC*, 25 TC 357. It does not matter whether the borrowing is from a company controlled by the trustees or their associates, or from an entirely unconnected company. What matters is the use to which the borrowing is put.

Sympathetic courts have allowed trustees to avoid the unfairness by setting aside loans made in (understandable) ignorance of these daft rules.[4]

RI 259 continues:

> The fact that money was borrowed before 21 March 2000 does not prevent it from being outstanding trust borrowing.
> Where trustees are presented with a bill, for example for repairs to trust property, bona fide delay in payment would not convert this into a borrowing for the purposes of paragraph 4.

The last paragraph is wrong, since a debt on a bill for *repairs* cannot fall within para 4 at all; para 4 only applies on a loan or transfer of "assets".

### 46.5.1 *Amount borrowed*

Para 4(2) Sch 4B TCGA provides:

> The amount borrowed (the "proceeds" of the borrowing) is taken to be—
> (a) in the case of a loan, the market value[5] of the asset;
> (b) in the case of a transfer [ie a transaction within para 4(1)(b)], the

---

4 *Re Leumi Overseas Trust* [2007] JRC 248; *Barclays Private Bank v Chamberlain* 9 ITELR 304. It is an interesting question how offshore courts will react to the decision of the Court of Appeal in *Pitt v Holt* [2011] STC 809 which (more or less) abolishes the rule in *Hastings-Bass* on which these decisions were based.

5 Defined para 4(3):
"References in this paragraph to the market value of an asset are to its market value immediately before the loan is made, or the transfer is effectively completed, unless the asset does not exist before that time in which case its market value immediately after that time shall be taken.
The effective completion of a transfer means the point at which the person acquiring the asset becomes for practical purposes unconditionally entitled to the whole of the intended subject matter of the transfer."

market value of the asset reduced by the amount or value of any consideration received for it.

## 46.6 Transfer of value "linked" with trustee borrowing

### 46.6.1 *Terminology*

The expression "linked with trustee borrowing" is defined in paras 5-8 Sch 4B. These paragraphs employ the following terms:
(1) **"Linked with trustee borrowing"**
(2) **"Outstanding trustee borrowing"**
(3) **"Normal trust purposes"**
(4) **"Ordinary trust assets"**
Each of these four expressions are best regarded as a labels for complex sets of rules. In each case the label is not particularly apt and the definition can be described as artificial; the labels taken literally would be misleading. The cosy expressions conceal the arbitrary and complex nature of the concepts to which they refer. However it is difficult to think of better terms, and for the purposes of discussion it is best to adopt the statutory terminology *faute de mieux*.

### 46.6.2 *"Linked" with trustee borrowing*

Para 5(1) Sch 4B TCGA provides:

> For the purposes of this Schedule a transfer of value by trustees is treated as linked with trustee borrowing if at the material time there is outstanding trustee borrowing.

### 46.6.3 *"Outstanding trustee borrowing"*

Para 5(2) Sch 4B TCGA provides:

> For the purposes of this Schedule there is outstanding trustee borrowing at any time to the extent that—
> (a) any loan obligation[6] is outstanding, and
> (b) there are proceeds of trustee borrowing that have not been either—

6 Defined in para 4(1): see 46.5 (trustee borrowing).

(i) applied for normal trust purposes, or
(ii) taken into account[7] under this Schedule in relation to an earlier transfer of value.

### 46.6.4 *The material time*

Para 2(2) Sch 4B TCGA provides:

> References in this Schedule to "the material time", in relation to a transfer of value, are to the time when the loan is made, the transfer is effectively completed or the security is issued.
> The effective completion of a transfer means the point at which the person acquiring the asset becomes for practical purposes unconditionally entitled to the whole of the intended subject matter of the transfer.

The CG manual provides:

> **35128. Anti-avoidance provisions: Disposals of interests for consideration: The material time**
> The expression 'the material time' is important for two reasons.
> The first is that the test whether the transfer of value is linked with trust borrowing is applied at the material time.
> The second is that the deemed disposal by the trustees occurs at the material time.
> [The Manual sets out para 1(2) and continues] So if say trustees appoint a cash sum to a beneficiary, he would become unconditionally entitled when the money had been transferred to his bank account, not when the cheque was handed to him, for at that stage the trustees might have no funds to meet the cheque.

7 Para 5(3) Sch 4B TCGA provides a commonsense definition:
"An amount of trustee borrowing is "taken into account" under this Schedule in relation to a transfer of value if the transfer of value is in accordance with this Schedule treated as linked with trustee borrowing.
The amount so taken into account is—
(a) the amount of the value transferred by that transfer of value, or
(b) if less, the amount of outstanding trustee borrowing at the material time in relation to that transfer of value."

## 46.7 Normal trust purposes

Para 6(1) Sch 4B TCGA provides:

> For the purposes of this Schedule the proceeds of trustee borrowing are applied for normal trust purposes in the following circumstances, and not otherwise.

There are three types of "normal trust purposes":
(1) Payment for ordinary trust assets
(2) Repayment of loan
(3) Payment of expenses
Para 9 Sch 4B TCGA provides power to amend paras 6-8 by regulation. Presumably HMRC were worried that they might have left some loophole for future tax avoiders. In practice no regulations have been made.

## 46.8 Normal trust purposes: Payment for ordinary trust assets

Para 6(2) Sch 4B TCGA provides:

> They are applied for normal trust purposes if they are applied by the trustees in making a payment in respect of an ordinary trust asset and the following conditions are met—
> (a) the payment is made under a transaction at arm's length or is not more than the payment that would be made if the transaction were at arm's length;
> (b) the asset forms part of the settled property immediately after the material time or, if it does not do so, the alternative condition in paragraph 8 below is met; and
> (c) the sum paid is (or but for section 17 or 39 would be) allowable under section 38 as a deduction in computing a gain accruing to the trustees on a disposal of the asset.

### 46.8.1 *Ordinary trust assets*

Para 7 Sch 4B TCGA provides:

> (1) The following are "ordinary trust assets" for the purposes of this Schedule—

(a) shares or securities;[8]
(b) tangible property, whether movable or immovable, or a lease of such property;
(c) property not within paragraph (a) or (b) which is used for the purposes of a trade, profession or vocation carried on—
  (i) by the trustees, or
  (ii) by a beneficiary who has an interest in possession in the settled property;
(d) any right in or over, or any interest in, property of a description within paragraph (b) or (c).

Thus shares or securities are ordinary trust assets but interests in shares or securities are not. The distinction between securities and interests in securities raises some deep questions, though there is no reason to think that the drafter gave any thought to them.

RI 259 provides:

> **B6 Paragraph 7— "ordinary trust assets"—futures contracts**
> We have been asked to say whether a futures contract relating to commodities is an "ordinary trust asset". Such a contract is not a tangible asset nor does it give the holder an interest in such an asset. Therefore, it is not an "ordinary trust asset".

### 46.8.2 *Grant of lease*

RI 259 provides:

> **B8 What happens when money is borrowed to purchase the freehold interest of a property which is then rented on a commercial basis?**
> ... Under para 13(2) references to the transfer of an asset include references to anything that is a disposal, and under TCGA 1992 s 21(2) references to a disposal include references to a part disposal. Paragraph 13(3) provides that references to a transfer of an asset do not include the transfer of an asset which is created by the part disposal of another asset. The grant of a lease is a part disposal of the freehold interest and therefore the grant of a lease is a transfer of the freehold interest for the purposes of para 2(1)(b) and is not regarded as the transfer simply of the lease. If the freehold interest was bought with borrowed money it meets

8 Defined (after a fashion) in para 7(2): "In sub-paragraph (1)(a) "securities" has the same meaning as in section 132."

the test in para 2(4)(a), and the amount of value transferred equals the market value of the freehold.

Assuming that there is outstanding trustee borrowing at "the material time", which is defined in para 2(2) as the time the transfer is effectively completed, it is then necessary to consider whether the transfer of value is linked with trustee borrowing. Under para 7 tangible property, and any interest in such property falls within the expression "ordinary trust assets". However the property concerned must under para 6(2)(b) either form part of the settled property immediately after the material time, or meet the alternative condition in para 8(1)(b) that it is represented by ordinary trust assets which form part of the settled property immediately after the material time. Paragraph 6(2)(b) and para 8(1)(b) may be looked at together. In this situation we say that the reversion to the lease is still part of the settled property, and the lease itself is represented by the right to the rental stream.

Therefore where trustees borrow money to acquire the freehold interest in a property which is then let commercially and, at the material time, there are no outstanding trustee borrowings other than those which have been applied for normal trust purposes, Sch 4B does not apply. But the position will be different if at that moment there are outstanding trustee borrowings applied for other purposes.

The same considerations apply where trustees acquire a long lease which is sublet, and where the asset in question is a chattel rather than land or buildings.

### 46.8.3 *Asset becoming valueless*

Para 8 Sch 4B TCGA provides:

(1) The alternative condition referred to in paragraph 6(2)(b) in relation to an asset which no longer forms part of the settled property is that—

(a) the asset is treated as having been disposed of by virtue of section 24(1), or

(b) one or more ordinary trust assets which taken together directly or indirectly represent the asset—

  (i) form part of the settled property immediately after the material time, or

  (ii) are treated as having been disposed of by virtue of section 24(1).

(2) Where there has been a part disposal of the asset, the condition in paragraph 6(2)(b) and the provisions of sub-paragraph (1) above may be applied in any combination in relation to the subject matter of the part disposal and what remains.

(3) References in this paragraph to an asset include part of an asset.

## 46.9 Normal trust purposes: Repayment of loan

Para 6(3) Sch 4B TCGA provides:

> They are applied for normal trust purposes if—
> (a) they are applied by the trustees in wholly or partly discharging a loan obligation of the trustees, and
> (b) the whole of the proceeds of the borrowing connected with that obligation (or all but an insignificant amount) have been applied by the trustees for normal trust purposes.

## 46.10 Normal trust purposes: Payment of expenses

Para 6(4) Sch 4B TCGA provides:

> They are applied for normal trust purposes if they are applied by the trustees in making payments to meet bona fide current expenses incurred by them in administering the settlement or any of the settled property.

RI 259 provides:

> **B5 Paragraph 6(4)—application of proceeds to meet current expenses**
> We have been asked whether trustee borrowings to meet payments on account or provision for future or past expenses are covered by the expression "current expenses". One circumstance in which borrowings are applied for "normal trust purposes" (para 6) is where they are applied by the trustees in making payments to meet bona fide current expenses incurred by them.
> One may note that there are three tests to be met—
> – The borrowings have been applied by the moment of the transfer of value (para 5(2)(b)(i)).
> – They have been applied to meet bona fide "current expenses".
> – The expenses are expenses of "administering" the settlement or any of the settled property.
> In the case of borrowing to meet future expenses it is hard to see how the borrowings can be said to have been applied. But the time for making the test is not when the money is borrowed, but the time of the transfer of value (this is "the material time", as defined in para 2(2)). In the case of

payments on account there would be the requisite application and the liability to pay would have been incurred.

We do not regard "current" as restricting qualification to expenditure which for accounting purposes must fall in the year of borrowing, but we should regard it as excluding borrowing to make a provision for future expenditure or to meet expenditure that was incurred long before but left unpaid. In general where contracts for repairs of an ordinary kind have been entered into, we should regard the expenditure anticipated under those contracts to be current expenses at the moment of borrowing. Where trustees as the owner or tenant of a flat are obliged by contract or under the terms of the lease to make payments into a common fund to meet future maintenance or repair expenditure this would be regarded as a current expense.

The expression "administering the settlement or any of the settled property" should be construed widely to cover not only those expenses properly chargeable to income, or which would be so chargeable but for express provisions of the trust deed, but also capital expenditure such as capital taxes in the UK or elsewhere, or legal costs of a reorganisation, in particular the costs of an application under the Variation of Trusts Act. Other capital expenditure would often be expenditure on the asset itself, and therefore qualify under para 6(2). Contributions to the day-to-day running costs of a nominee company controlled by the trustees would also qualify.

### 46.10.1 *Unproductive expenditure*

RI 259 provides:

**B9 What happens when money is spent unproductively, for example on a planning application that fails?**

Under para 6(2) there are three conditions that must be met by a payment in respect of "an ordinary trust asset" if it is to be regarded as applied for normal trust purposes. The third, in para 6(2)(c), is that the sum is allowable under TCGA 1992 s 38 (or would be but for s 17 or 39) as a deduction in computing a gain accruing to the trustees on a disposal of the asset. If an application for planning permission fails, then when the land is actually sold the costs relating to the application are generally not allowable; this is because they are not "reflected in the state or nature of the asset at the time of the disposal". Paragraph 6(2)(c) however must be referring to a notional disposal not to a real one. In the context of para 6 we consider that the reference can only be to a notional disposal taking place at the time when the expenditure is incurred.

> Although one could not lay down as a universal rule that the expenditure would always qualify, the test is whether the existence of the current application for planning permission is reflected in the state or nature of the asset at the time of the notional disposal.

## 46.11 Sch 4B deemed disposal

Para 1(2) Sch 4B TCGA provides:

> Where this Schedule applies the trustees are treated as disposing of and immediately reacquiring the whole or a proportion of each of the chargeable assets that continue to form part of the settled property (see paragraphs 10 to 13).

I refer to this as a **"schedule 4B deemed disposal"**. Para 10 Sch 4B TCGA provides the details

> (1) Where in accordance with this Schedule a transfer of value by trustees is treated as linked with trustee borrowing, the trustees are treated for all purposes of this Act—
> (a) as having at the material time[9] disposed of, and
> (b) as having immediately reacquired,
> the whole or a proportion (see paragraph 11) of each of the chargeable assets that form part of the settled property immediately after the material time ("the remaining chargeable assets").
> (2) The deemed disposal and reacquisition shall be taken—
> (a) to be for a consideration equal to the whole or, as the case may be, a proportion of the market value of each of those assets, and
> (b) to be under a bargain at arm's length.[10]

The key term here is "chargeable asset". Para 10(3) Sch 4B provides:

> For the purposes of sub-paragraph (1) an asset is a chargeable asset if a gain on a disposal of the asset by the trustees at the material time would be a chargeable gain.

---

9 See 46.6.4 (The material time).

10 This deeming prevents hold-over relief (relevant to a UK resident trust only).

### 46.11.1 *The extent of the disposal*

Para 11 Sch 4B TCGA provides:

> (1) This paragraph provides for determining whether the deemed disposal and reacquisition is of the whole or a proportion of each of the remaining chargeable assets.
> (2) If the amount of value transferred—
> (a) is less than the amount of outstanding trustee borrowing, and
> (b) is also less than the effective value of the remaining chargeable assets,
> the deemed disposal and reacquisition is of the proportion of each of the remaining chargeable assets given by:
> VT÷EV
> where—
> VT is the amount of value transferred, and
> EV is the effective value of the remaining chargeable assets.
> (3) If the amount of value transferred—
> (a) is not less than the amount of outstanding trustee borrowing, but
> (b) is less than the effective value of the remaining chargeable assets,
> the deemed disposal and reacquisition is of the proportion of each of the remaining chargeable assets given by:
> TB÷EV
> where—
> TB is the amount of outstanding trustee borrowing, and
> EV is the effective value of the remaining chargeable assets.
> (4) In any other case the deemed disposal and reacquisition is of the whole of each of the remaining chargeable assets.
> (5) For the purposes of this paragraph the effective value of the remaining chargeable assets means the aggregate market value of those assets reduced by so much of that value as is attributable to trustee borrowing.
> (6) References in this paragraph to amounts or values, except in relation to the amount of value transferred, are to amounts or values immediately after the material time.

### 46.11.2 *HMRC example computation on part disposal*

RI 259 provides an example (I have slightly amended the layout for enhanced clarity):

**B10 How should we compute the base cost of assets for future disposals?**
... Suppose that an asset cost £600, the trustees are treated as disposing of two thirds of the asset at the material time (paragraph 10(1)), and the respective values of two thirds and one third immediately after that time are £900 and £450.

HMRC compute the sch 4B deemed disposal is:

| | | |
|---|---|---|
| Deemed Proceeds | | 900 |
| Cost | [two thirds of 600] | -400 |
| Gain | | 500 |

HMRC compute the base cost for a future disposal as:

| | | |
|---|---|---|
| Remaining original cost | 600 – 400 | 200 |
| Deemed Acquisition | | 900 |
| Revised base cost | | 1100 |

## 46.12 Value attributable to trustee borrowing

Para 12 Sch 4B TCGA provides:

(1) For the purposes of this Schedule the value of an asset is attributable to trustee borrowing to the extent determined in accordance with the following rules.
(2) Where the asset itself has been borrowed by trustees, the value of the asset is attributable to trustee borrowing to the extent that the proceeds of that borrowing have not been applied for normal trust purposes.
This is in addition to any extent to which the value of the asset may be attributable to trustee borrowing by virtue of sub-paragraph (3).
(3) The value of any asset is attributable to trustee borrowing to the extent that—
(a) the trustees have applied the proceeds of trustee borrowing in acquiring or enhancing the value of the asset, or
(b) the asset represents directly or indirectly an asset whose value was attributable to the trustees having so applied the proceeds of trustee borrowing.
(4) For the purposes of this paragraph an amount is applied by the trustees in acquiring or enhancing the value of an asset if it is applied wholly and exclusively by them—

(a) as consideration in money or money's worth for the acquisition of the asset,
(b) for the purpose of enhancing the value of the asset in a way that is reflected in the state or nature of the asset,
(c) in establishing, preserving or defending their title to, or to a right over, the asset, or
(d) where the asset is a holding of shares or securities that is treated as a single asset, by way of consideration in money or money's worth for additional shares or securities forming part of the same holding.

(5) Trustees are treated as applying the proceeds of borrowing as mentioned in sub-paragraph (4) if and to the extent that at the time the expenditure is incurred there is outstanding trustee borrowing.
(6) In sub-paragraph (4)(d) "securities" has the same meaning as in section 132.

## 46.13 Schedule 4C

Para 1(1) Schedule 4C TCGA provides:

> (1) This Schedule applies where the trustees of a settlement ("the transferor settlement") make a transfer of value to which Schedule 4B applies ("the original transfer")....
> (5) References in this Schedule to a transfer to which Schedule 4B applies include any such transfer, whether or not any chargeable gain or allowable loss accrues under that Schedule by virtue of the transfer.

Schedule 4C repeats (with some differences) the usual s.87 rules.

## 46.14 Schedule 4C pool

Para 1 Schedule 4C TCGA continues:

> (2) The transferor settlement is regarded for the purposes of this Schedule as having a "Schedule 4C pool".
> (3) The Schedule 4C pool contains the section 2(2) amounts for the settlement that are outstanding at the end of the tax year in which the original transfer is made (see paragraph 1A).
> (3A) The section 2(2) amount for that tax year is increased by—
> (a) the amount of Schedule 4B trust gains accruing by virtue of the original transfer (see paragraphs 3 to 7), and

(b) the total amount of any further Schedule 4B trust gains accruing by virtue of any further transfers of value to which that Schedule applies that are made by the trustees in that tax year.

## 46.15 "Outstanding section 2(2) amounts"

Para 1A Sch 4C TCGA provides:

> (1) The following steps are to be taken for the purpose of calculating the section 2(2) amounts for a settlement that are outstanding at the end of a tax year ("the relevant tax year").
> *Step 1* Find the section 2(2) amount for the settlement for the relevant tax year and earlier tax years, as reduced under section 87A as it applies for the relevant tax year and earlier tax years....
> (2) For the purposes of Step 1 of sub-paragraph (1) take into account the effect of section 90 in relation to any transfer of settled property from or to the trustees of the settlement made in or before the relevant tax year.

See 45.5 (Section 2(2) amount).

### 46.15.1 *Capital payment to non-resident beneficiary*

Para 1A(1) Sch 4C TCGA provides:

> *Step 2* This Step applies if, by virtue of the matching of the section 2(2) amount for the settlement for a tax year ("the applicable year") with a capital payment, chargeable gains are treated under section 87 or 89(2) as accruing in the relevant tax year to a beneficiary who is not chargeable to tax for that year.
> Increase the section 2(2) amount for the applicable year (found under Step 1) by the amount of the chargeable gains....
> (3) For the purposes of this Schedule a beneficiary is "chargeable to tax" for a tax year if the beneficiary is resident or ordinarily resident in the UK in that year.

Capital payments to non-residents do not take schedule 4B gains out of the schedule 4C pool. This is different from the usual s.87 rule: contrast 45.18.3 (Mixed UK and foreign beneficiaries: simple capital payments). There is no good reason for this, except a desire to penalise those who make sch.4B deemed disposals.

## 46.16 "Schedule 4B trust gains"

Para 3 Sch 4C TCGA provides:

> (1) This paragraph explains what is meant for the purposes of this Schedule by "Schedule 4B trust gains".
> (2) The Schedule 4B trust gains are computed in relation to each transfer of value to which that Schedule applies.
> (3) In relation to a transfer of value the amount of the Schedule 4B trust gains for the purposes of this Schedule is given by—
> CA -SG -AL
> where—
> CA is the chargeable amount computed under paragraph 4 or 5 below,
> SG is the amount of any gains attributed to the settlor that fall to be deducted under paragraph 6 below, and
> AL is the amount of any allowable losses that may be deducted under paragraph 7 below.

### 46.16.1 *Chargeable amount: non-resident trust*

Para 4 Sch 4C TCGA provides:

> (1) If the transfer of value is made in a year of assessment during which the trustees of the transferor settlement are at no time resident and ordinarily resident in the UK the chargeable amount is computed under this paragraph.
> (2) Where this paragraph applies the chargeable amount is the amount on which the trustees would have been chargeable to tax under section 2(2) by virtue of Schedule 4B if they had been resident and ordinarily resident in the UK in the year (and had made the disposals which Schedule 4B treats them as having made).

The wording is based on the s.87 definition of s.2(2) amount: see 45.5 (Section 2(2) amount).

### 46.16.2 *Dual resident trust*

Para 5 Sch 4C TCGA provides:

> (1) If the transfer of value is made in a year of assessment where—
> (a) the trustees of the transferor settlement are resident and ordinarily

resident in the UK during any part of the year, and
(b) at any time of such residence and ordinary residence they fall to be regarded for the purposes of any double taxation relief arrangements as resident in a territory outside the UK,

the chargeable amount is computed under this paragraph.
(2) Where this paragraph applies the chargeable amount is the lesser of—
(a) the amount on which the trustees would be chargeable to tax under section 2(2) by virtue of Schedule 4B on the assumption that the double taxation relief arrangements did not apply (and the disposals which Schedule 4B treats them as having made were made), and
(b) the amount on which the trustees would be so chargeable to tax by virtue of disposals of protected assets.

(3) For this purpose "protected assets" has the meaning given by section 88(4).

The wording is based on the s.87 rules for dual resident trusts: see 45.17 (Dual resident trust).

### 46.16.3 *Gains attributed to settlor*

Para 6(1) Sch 4C TCGA provides:

> For the purposes of this Schedule the chargeable amount in relation to a transfer of value shall be reduced by the amount of any chargeable gains arising by virtue of that transfer of value that—
> (a) are by virtue of section 86(4) treated as accruing to the settlor,

The wording is based on the s.87 rules: see 45.5 (Section 2(2) amount).

> or
> (b) where section 10A applies, are treated by virtue of that section (as it has effect subject to paragraph 12 below) as accruing to the settlor in the year of return.

For the s.87 equivalent rules, see 46.22.1 (Temporarily non-resident settlor: s.86 charge).

### 46.16.4 *Losses of trust within s.86*

Para 6(2) Sch 4C TCGA provides:

> In determining for the purposes of sub-paragraph (1)(a) the amount of chargeable gains arising by virtue of a transfer of value that are treated as accruing to the settlor, there shall be disregarded any losses which arise otherwise than by virtue of Schedule 4B.

This is needed for the case where a trust within s.86 has losses and then realises gains on a sch.4B deemed disposal. The losses are set against the gains, so no gains are treated as accruing to the settlor. This provision is needed to ensure that those gains are not added to the sch.4C pool.

## 46.17 Allowable losses

Para 7 Sch 4C TCGA provides:

> (1) An allowable loss arising under Schedule 4B in relation to a transfer of value by the trustees of a settlement may be taken into account in accordance with this paragraph to reduce for the purposes of this Schedule the chargeable amount in relation to another transfer of value by those trustees.

This would always be the case.

> (2) Any such allowable loss goes first to reduce chargeable amounts arising from other transfers of value made in the same year of assessment.
> If there is more than one chargeable amount and the aggregate amount of the allowable losses is less than the aggregate of the chargeable amounts, each of the chargeable amounts is reduced proportionately.
> (3) If in any year of assessment the aggregate amount of the allowable losses exceeds the aggregate of the chargeable amounts, the excess shall be carried forward to the next year of assessment and treated for the purposes of this paragraph as if it were an allowable loss arising in relation to a transfer of value made in that year.
> (4) Any reduction of a chargeable amount under this paragraph is made after any deduction under paragraph 6.

Why does this matter?
In the HMRC view, if a Sch4B-transfer of value is deliberately made to trigger a loss on a sch.4B deemed disposal, the loss is disallowed under

s.16A TCGA.[11] CG Manual Appendix 9 provides:

> **Example 18 - trustees make a deliberate transfer of value**
> 1. A body of trustees who fall within the terms of Schedule 4B have outstanding borrowing which has not been used for trust purposes (Schedule 4B is a measure introduced to discourage trustees avoiding capital gains tax by incurring debt and advancing funds from the settlement). The trustees intentionally make a transfer of value which triggers off a charge under Schedule 4B, and as they expect this transaction results in a capital loss. The trustees have realised chargeable gains in the same year, and claim to set the loss against those gains.
> 2. It is necessary to look at the arrangements which have been entered into by the trustees to determine whether these have been entered into with a main purpose of securing a tax advantage. There are arrangements in this case, so the question is whether or not those arrangements were entered into with a main purpose of securing a tax advantage, and to decide this it is necessary to take account of all the circumstances surrounding the transactions. It will be relevant to consider what the trustees' overall economic objective was, and whether that objective is being fulfilled in a straightforward way, or whether additional, complex or costly steps have been inserted. It is significant that Schedule 4B is itself anti-avoidance legislation, intended to counter avoidance of tax on gains by contrived arrangements between settlements. The fact that the trustees have deliberately triggered the operation of the schedule is an indicator that one of their main purposes was to secure the advantage of the capital loss. In such a case, the TAAR will apply and the loss will not be an allowable loss.

## 46.18 Subsequent Sch4B-transfer of value

Para 7B Sch 4C TCGA provides:

> (1) This paragraph applies if the trustees of the transferor settlement make a further transfer of value to which Schedule 4B applies in a tax year ("the year of the transfer") after the tax year mentioned in paragraph 1(3).
> (2) If the settlement has a Schedule 4C pool at the beginning of the year of the transfer—
> (a) the section 2(2) amounts in the Schedule 4C pool are increased by

11 Discussed in more detail in 48.12 (Inter-spouse transfer).

the section 2(2) amounts for the settlement that are outstanding at the end of the year of the transfer, and

(b) the section 2(2) amount in the pool for the year of transfer is increased (or further increased) by the amount of Schedule 4B trust gains accruing by virtue of the further transfer.

(3) If the settlement does not have a Schedule 4C pool at the beginning of the year of the transfer, this Schedule applies in relation to the further transfer as it applied in relation to the original transfer.

(4) For the purposes of this paragraph a settlement has a Schedule 4C pool until the end of the tax year in which all section 2(2) amounts in the pool have been reduced to nil.

## 46.19 Attribution of Schedule 4C gains to beneficiaries

Para 8 Sch 4C TCGA[12] provides:

(1) Chargeable gains are treated as accruing in a tax year ("the relevant tax year") to a beneficiary who has received a capital payment from the trustees of a relevant settlement in the relevant tax year or any earlier tax year if all or part of the capital payment is matched (under section 87A as it applies for the relevant tax year) with the section 2(2) amount in the Schedule 4C pool for the relevant tax year or any earlier tax year.

(2) The amount of chargeable gains treated as accruing is equal to—

(a) the amount of the capital payment, or

(b) if only part of the capital payment is matched, the amount of that part.

This is based on the s.87 rules.

(3) Section 87A applies for a tax year for the purposes of matching capital payments received from the trustees of a relevant settlement with section 2(2) amounts in the Schedule 4C pool as if—

(a) references to section 2(2) amounts were to section 2(2) amounts in the Schedule 4C pool,

(b) references to a capital payment received from the trustees by a beneficiary were to a capital payment received from the trustees of a relevant settlement by a beneficiary who is chargeable to tax for that year, and

---

12 Flagged (somewhat unnecessarily) in para 1(4): "Paragraphs 8 to 9 provide for the attribution of gains in a settlement's Schedule 4C pool."

(c) for section 87A(3)(b) there were substituted—
"(b) all section 2(2) amounts in the Schedule 4C pool have been reduced to nil."

Amended as para 8 directs, s.87A provides:

(1) This section supplements s.87.
(2) The following steps are to be taken for the purposes of matching capital payments with s.2(2) amounts in the Schedule 4C pool.
*Step 1*
Find the s.2(2) amount in the Schedule 4C pool for the relevant tax year.
*Step 2*
Find the total amount of capital payments received by the beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement in the relevant tax year.
*Step 3*
The s.2(2) amount in the Schedule 4C pool for the relevant tax year is matched with—
(a) if the total amount of capital payments received in the relevant tax year does not exceed the s.2(2) amount in the Schedule 4C pool for the relevant tax year, each capital payment so received by the beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement, and
(b) otherwise, the relevant proportion of each of those capital payments.
"The relevant proportion" is the s.2(2) amount in the Schedule 4C pool for the relevant tax year divided by the total amount of capital payments received in the relevant tax year.
*Step 4*
[1] If para (a) of Step 3 applies—
(a) reduce the s.2(2) amount in the Schedule 4C pool for the relevant tax year by the total amount of capital payments referred to there, and
(b) reduce the amount of those capital payments to nil.
[2] If para (b) of that Step applies—
(a) reduce the s.2(2) amount in the Schedule 4C pool for the relevant tax year to nil,
and
(b) reduce the amount of each of the capital payments referred to there by the relevant proportion of that capital payment.
*Step 5*
[1] Start again at Step 1 (unless subs.(3) applies).
[2] If the s.2(2) amount in the Schedule 4C pool for the relevant tax year (as reduced under Step 4) is not nil, read references to capital payments received in the relevant tax year as references to capital payments received in the latest tax year which—
(a) is before the last tax year for which Steps 1 to 4 have been undertaken, and
(b) is a tax year in which capital payments (the amounts of which have not

been reduced to nil) were received by beneficiaries.
(3) This subsection applies if—
(a) all of the capital payments received by beneficiaries who are chargeable to tax for that year from the trustees of a relevant settlement in the relevant tax year or any earlier tax year have been reduced to nil, or
(b) all section 2(2) amounts in the Schedule 4C pool have been reduced to nil. ~~the section 2(2) amounts for the relevant tax year and all earlier tax years have been reduced to nil~~.
(4) The effect of any reduction under Step 4 of subsection (2) is to be taken into account in any subsequent application of this section.

### 46.19.1 *Priority between OIG Sch 4C and CGT Sch 4C*

Para 8 Sch 4C provides:

> (4) Section 87A applies for a tax year by virtue of this paragraph before it applies for that year otherwise than by virtue of this paragraph; but this is subject to sub-paragraph (5).
> (5) If section 87A applies for a tax year by virtue of section 762(3) of the Taxes Act[13] (offshore income gains), it applies for that year by virtue of that provision before it applies for that year by virtue of this paragraph.

## 46.20 "Relevant settlements"

Para 8A Sch 4C TCGA provides:

> (1) This paragraph specifies what settlements are relevant settlements in relation to a Schedule 4C pool.
> (2) The transferor and transferee settlements in relation to the original transfer of value are relevant settlements.
> (3) If the trustees of any settlement that is a relevant settlement in relation to a Schedule 4C pool—
> (a) make a transfer of value to which Schedule 4B applies, or
> (b) make a transfer of settled property to which section 90 applies,
> any settlement that is a transferee settlement in relation to that transfer is also a relevant settlement in relation to that pool.
> (4) If the trustees of a settlement that is a relevant settlement in relation to a Schedule 4C pool make a transfer of value to which Schedule 4B

13 The reference to ICTA is obsolete as the tax law rewrite did not update statutory references in statutory instruments. See 31.1 (Offshore funds – Introduction).

applies, any other settlement that is a relevant settlement in relation to that pool is also a relevant settlement in relation to the Schedule 4C pool arising from the further transfer.

### 46.20.1 *Disregard of certain capital payments*

Para 9 Sch 4C TCGA provides:

> (1) For the purposes of paragraph 8 (and section 87A as it applies for the purposes of that paragraph), no account is to be taken of a capital payment to which any of sub-paragraphs (2) to (4) applies (or a part of a capital payment to which sub-paragraph (4) applies).
> (2) This sub-paragraph applies to a capital payment received before the tax year preceding the tax year in which the original transfer is made.
> (3) This sub-paragraph applies to a capital payment that—
> (a) is received by a beneficiary of a settlement from the trustees in a tax year during the whole of which the trustees—
> (i) are resident and ordinarily resident in the UK, and
> (ii) are not Treaty non-resident,
> (b) was made before any transfer of value to which Schedule 4B applies was made, and
> (c) was not made in anticipation of the making of any such transfer of value or of chargeable gains accruing under that Schedule.
> (4) This sub-paragraph applies to a capital payment if (and to the extent that) it is received (or treated as received) in a tax year from the trustees by a company that—
> (a) is not resident in the UK in that year, and
> (b) would be a close company if it were resident in the UK,
> (and is not treated under any of subsections (3) to (5) of section 96 as received by another person).

### 46.20.2 *Residence of trustees from whom capital payment received*

Para 10(1) Sch 4C TCGA provides:

> Subject to paragraph 9(3), it is immaterial for the purposes of paragraph 8 that the trustees of any relevant settlement are or have at any time been resident and ordinarily resident in the UK.

## 46.21 Remittance basis

Para 8AA Sch 4C TCGA provides:

> Section 87B (remittance basis) applies in relation to chargeable gains treated under paragraph 8 as accruing as it applies in relation to chargeable gains treated under section 87 as accruing.

This incorporates the s.87 remittance basis: see 45.15 (Section 87 remittance basis).

## 46.22 Temporary non-resident rules

### 46.22.1 *Trust within s.86 TCGA*

Para 12 Sch 4C TCGA provides:

> (1) This paragraph applies if—
> (a) by virtue of section 10A, an amount of chargeable gains within section 86(1)(e) that accrued in an intervening year to the trustees of a settlement would be treated as accruing to a person ("the settlor") in the year of return, and
> (b) after paragraph 8 has applied for the year of return, the section 2(2) amount for the intervening year that is in the Schedule 4C pool for the settlement is less than the amount mentioned in paragraph (a).
> (2) The amount of chargeable gains treated as mentioned in sub-paragraph (1)(a) as accruing to the settlor in the year of return is limited to the section 2(2) amount referred to in sub-paragraph (1)(b).
> (4) Where the property comprised in the transferor settlement has at any time included property not originating from the settlor, only so much (if any) of any capital payment taken into account for the purposes of paragraph 8 above as, on a just and reasonable apportionment, is properly referable to property originating from the settlor shall be taken into account in computing the amount charged to beneficiaries.
> (5) Expressions used in this paragraph and section 10A have the same meanings in this paragraph as in that section; and paragraph 8 of Schedule 5 shall apply for the construction of the references in sub-paragraph (4) above to property originating from the settlor as it applies for the purposes of that Schedule.

### 46.22.2 *Trust within s.87*

Para 12A Sch 4C TCGA provides:

> (1) This paragraph applies where by virtue of section 10A an amount of gains would (apart from this Schedule) be treated under section 87 as accruing to a person ("the beneficiary") in the year of return by virtue of a capital payment made to him in an intervening year.
> (2) Where this paragraph applies, a capital payment equal to so much of that capital payment as exceeds the amount otherwise charged shall be deemed for the purposes of this Schedule to be made to the beneficiary in the year of return.
> (3) The "amount otherwise charged" means the total of any chargeable gains attributed to the beneficiary under section 87(2) or 89(2) by virtue of the capital payment.
> (4) For the purposes of paragraph 13(5)(b) a deemed capital payment under this paragraph shall be treated as made when the actual capital payment mentioned in sub-paragraph (1) above was made.
> (5) Expressions used in this paragraph and section 10A have the same meanings in this paragraph as in that section.

## 46.23 Interest supplement

Para 13 Sch 4C TCGA provides:

> (1) This paragraph applies if—
> (a) chargeable gains are treated under paragraph 8 as accruing to a beneficiary by virtue of the matching (under section 87A) of all or part of a capital payment with the section 2(2) amount for a tax year ("the relevant tax year"), and
> (b) the beneficiary is charged to tax by virtue of the matching.
> (1A) Where part of a capital payment is matched, references in sub-paragraphs (2) and (3) to the capital payment are to the part matched.
> (2) The tax payable by the beneficiary in respect of the payment shall be increased by the amount found under sub-paragraph (3) below, except that it shall not be increased beyond the amount of the payment; and an assessment may charge tax accordingly.
> (3) The amount is one equal to the interest that would be yielded if an amount equal to the tax which would be payable by the beneficiary in respect of the payment (apart from this paragraph) carried interest for the chargeable period at the specified rate.

The "specified rate" means the rate for the time being specified in section 91(3).
(4) The chargeable period is the period which—
(a) begins with the later of the 2 days specified in sub-paragraph (5) below, and
(b) ends with 30th November in the year of assessment following that in which the capital payment is made.
(5) The 2 days are—
(a) 1st December in the tax year immediately after the relevant tax year, and
(b) 1st December falling 6 years before 1st December in the year of assessment following that in which the capital payment is made.

## 46.24 Settlement ceasing to exist after Sch4B-transfer of value

Para 13A Sch 4C TCGA provides:

Where a settlement ceases to exist after the trustees have made a transfer of value to which Schedule 4B applies, this Schedule has effect as if a year of assessment had ended immediately before the settlement ceased to exist.

## 46.25 Definitions

### 46.25.1 *Assets and market value*

Para 13(1) Sch 4B TCGA provides:

In this Schedule any reference to an asset includes money expressed in sterling.
References to the value or market value of such an asset are to its amount.

### 46.25.2 *Transfer*

Para 13 Sch 4B TCGA provides:

(2) Subject to sub-paragraph (3), references in this Schedule to the transfer of an asset include anything that is or is treated as a disposal of the asset for the purposes of this Act, or would be if sub-paragraph (1) above applied generally for the purposes of this Act.

(3) References in this Schedule to a transfer of an asset do not include a transfer of an asset that is created by the part disposal of another asset.

### 46.25.3 *Schedule 4C definitions*

Para 14 Sch 4C TCGA provides:

(1) In this Schedule—
(a) "transfer of value" has the same meaning as in Schedule 4B; and
(b) references to the time at which a transfer of value was made are to the time which is the material time for the purposes of that Schedule.
(2) In this Schedule, in relation to a transfer of value—
(a) references to the transferor settlement are to the settlement the trustees of which made the transfer of value; and
(b) references to a transferee settlement are to any settlement of which the settled property includes property representing, directly or indirectly, the proceeds of the transfer of value.
(3) References in this Schedule to beneficiaries of a settlement include—
(a) persons who have ceased to be beneficiaries by the time the chargeable gains accrue, and
(b) persons who were beneficiaries of the settlement before it ceased to exist,
but who were beneficiaries of the settlement at a time in a previous year of assessment when a capital payment was made to them.

## 46.26 Commentary

HMRC would regard schedule 4B as successful, as it has successfully stopped the schemes at which it is addressed.

Measured by any other criteria it is a failure. It is extremely wide (applying to many arrangements where there is no avoidance). It is so wonderfully complicated that one could not expect even reasonably conscientious trustees to comply with it, except the largest trusts with large budgets for UK professional advice. A full analysis - which would be several times the length of this long chapter - will never be written. It is in practice almost entirely ignored, by HMRC and by taxpayers. It remains like unexploded ammunition from a distant war: exceptionally careful taxpayers avoid it; others disregard it, generally with impunity as HMRC will neither know nor greatly care. While it was never satisfactory, the problems have been made worse by the extension of the scope of the s.87 charge in 2008.

In all these respects, of course, schedule 4B is not very different from other anti-avoidance legislation of its time.

If a serious attempt is ever made to rationalise the UK taxation of offshore trusts, something much better could be devised.

CHAPTER FORTY SEVEN

# GAINS OF NON-RESIDENT COMPANIES

## 47.1 Section 13 TCGA – Introduction

Non-resident companies generally pay no UK tax on chargeable gains. This presents an obvious means of CGT avoidance. HMRC's first answer to this is s.13 TCGA. The same problems arise for income of non-resident companies and for income and gains of non-resident trusts, but the statutory solutions are entirely different.

Section 13(1) TCGA provides:

> This section applies as respects chargeable gains accruing to a company—
> (a) which is not resident in the UK, and
> (b) which would be a close company if it were resident in the UK.

For the definition of close company see 73.17 (Definition of "close company"). In this chapter when I refer to a company I assume it is close (or that it would be close if UK resident).

### 47.1.1 *Cross references*

For s.13 gains accruing to offshore unit trusts, see 35.4 (Gains accruing to unit trust). For s. gains accruing in the year of arrival and departure see 6.16.1 (Section 13 TCGA). For double taxation relief see 50.14 (DT relief: s.13 TCGA).

For s.13 gains accruing to charities, see Kessler & Brown, *Taxation of Charities and Non-Profit Organisations*, (8th ed, 2011) para 4.6 (Section 13).

## 47.2 Attribution of gains to participator

Section 13(2) TCGA provides:

> Subject to this section, every person
> [a] who at the time when the chargeable gain accrues to the company is resident or ordinarily resident in the UK, and
> [b] is a participator in the company,
> shall be treated for the purposes of this Act as if a part of the chargeable gain had accrued to him.

The sidenote to s.13 calls this "attribution" of gains. Section 13(4)(9)(10) refers to gains "apportioned" to participators. The terms "attribute" and "apportion" are interchangeable. I refer to the gain treated as accruing to a participator under s.13 as "**the s.13 gain**" or "**the s.13 deemed gain**".

## 47.3 Non-resident trustees

Non-resident trustees would not be within s.13(2) TCGA because that only applies to UK residents. However, s.13(10) TCGA provides:

> The persons treated by this section as if a part of a chargeable gain accruing to a company had accrued to them shall include the trustees of a settlement who are participators
> [a] in the company, or
> [b] in any company amongst the participators in which the gain is apportioned under subsection (9) above,
> if when the gain accrues to the company the trustees are neither resident nor ordinarily resident in the UK.

Section 13(10) was added to the legislation in 1981, and the clumsy drafting raises some difficulties, discussed below.

## 47.4 Computation of gains accruing to non-resident company

It is necessary to ascertain the amount of the chargeable gains accruing to the non-resident company.

Section 13 only applies to chargeable gains, so reliefs (including substantial shareholding relief) which prevent a gain from being a chargeable gain apply for the purposes of s.13.

Section 13(11A) TCGA provides:

> For the purposes of this section the amount of the gain or loss accruing at any time to a company that is not resident in the UK shall be computed (where it is not the case) as if that company were within the charge to corporation tax on capital gains.

Indexation relief is applicable because a company within the charge to CT qualifies for that relief.

Section 295(1) CTA 2009 provides:

> The general rule for corporation tax purposes is that all profits arising to a company from its loan relationships are chargeable to tax as income in accordance with this Part.

Gains on debts and other loan relationships (including life policies and foreign exchange gains) are not within s.13. Applying the deeming provision of s.13(11A) they are chargeable to tax as income, so no chargeable gain accrues on the disposal.[1] The same applies to derivative contracts which are chargeable to corporation tax as income under part 7 CTA 2009. For a participator who is an individual or a trust, this seems too good to be true, which raises the question whether a court should construe the deeming provision purposively so as to avoid that result.[2] However, s.13 also applies to a participator which is a company. It would be anomalous if a corporate participator did *not* obtain indexation relief, and somewhat surprising if loan relationship gains were treated as chargeable gains. The battle of the anomalies does not give a clear result, and the deeming provision should be given full effect.

HMRC agree. They say:

> As a consequence of the application of the loan relationship rules, a gain which accrues to a non-UK resident company on disposal of a debt represented by a balance in a non-sterling bank account will not be a chargeable gain. If the company has no chargeable gain, section 13 is not engaged, and therefore UK resident participators cannot be liable to tax in respect of such disposals. This difference in treatment between non-sterling bank accounts held directly and those held indirectly via a

1 Section 37 TCGA 1992.

2 As was done in *De Rothschild v Lawrenson* 67 TC 300.

> non-UK resident company is long standing and there are no plans for its amendment.[3]

Gains on debts or policies often qualify for other CGT reliefs, so the question whether such gains could fall within s.13 may not arise.

## 47.5 Identifying the participators

It is necessary to identify the participators in the non-resident company. Section 13(12) TCGA provides:

> In this section "participator", in relation to a company, has the meaning given by section 454 of CTA 2010.

This takes us to the elaborate standard definition; see 73.15 (Definition of participator). It was not drafted with s.13 in mind. One company can have too many participators for s.13 to cope with easily. I refer to this as the problem of "**overlapping participators**".

The problem may arise in the case of trusts,[4] loan creditors[5] and chains of companies.[6] The problem is solved in different ways in each case.

## 47.6 Overlapping participators: trustees and beneficiaries

Suppose a company is owned by a trust. The trustees are participators. The beneficiaries, except perhaps discretionary beneficiaries, are participators under s.454(1) CTA 2010 since they have an interest in the trust property. See 73.15.3 (Trustees and beneficiaries).

The difficulties this would cause for s.13 TCGA were recognised, and beneficiaries are taken out of s.13 by s.13(14) TCGA:

> For the purposes of this section, where—
> (a) the interest of any person in a company is wholly or partly represented by an interest which he has under any settlement ("his

---

3 Statement published online 9 Dec 2009 *www.hmrc.gov.uk/cnr/remittance-basis.htm*.

4 See 47.6 (Overlapping participators: trustees and beneficiaries).

5 See 47.8 (Overlapping participators: loan creditors).

6 See 47.10 (Chains of companies).

beneficial interest”), and

(b) his beneficial interest is the factor, or one of the factors, by reference to which that person would be treated (apart from this subsection) as having an interest as a participator in that company,

the interest as a participator in that company which would be that person’s shall be deemed, to the extent that it is represented by his beneficial interest, to be an interest of the trustees of the settlement (and not of that person), and references in this section, in relation to a company, to a participator shall be construed accordingly.

The CG Manual correctly provides:

> **57222 Basic conditions for Section 13 TCGA 1992: Beneficiaries: Section 13(4) TCGA 1992** [April 2009]
> Where the trustees of a settlement, whether resident in the UK or not, are participators in a non-resident company then in certain circumstances a beneficiary of the settlement will also be within the definition of participator. The effect of Section 13(14) is that once you reach shares or other interests held by trustees, except in the case of a bare trust, see CG34300, you stop there. In deciding how the chargeable gain of the company should be apportioned, you treat the trustees as if they were the beneficial owners of their shares or other interests and apportion the gain to them as appropriate, ignoring the interests of the beneficiaries. If the trustees are resident then their share of the gain is assessed on them, [or on the settlor under TCGA 1992, S 77 in relevant cases].[7] If the trustees are non-resident then the gain is subject to TCGA 1992, S 86 and TCGA 1992, S 87, see CG57395. Any interest as a participator in the non-resident company which the beneficiary holds in their own right, for example by a personal holding of shares in the non-resident company, will remain within Section 13.

## 47.7 *Foundations*

At first sight, a foundation may be a close company within s.13. At first sight, s.13(14) does not apply to a foundation as “settlement” in s.13(14) has the IT/CGT meaning: a foundation is not a settlement in that sense..

If that is right, two questions arise:

(1) are beneficiaries of a foundation participators?[8]

---

7 Words in square brackets are out of date since 2008.

8 See 73.15.3 (Trustees and beneficiaries).

(2) assuming they are participators, what is the extent of their interest under s.13(3)?

These questions raise imponderable and unexplored sub-issues: what are the rights of the beneficiaries (a matter of the construction of the foundation constitution under the law of the foundation); and do those rights amount to "interests" for these purposes (a matter of UK law)?

It is suggested that the presumption against double taxation applies: since a foundation is a settlement for the purposes of s.87, it should not fall within the scope of s.13. The better view is that a foundation is a settlement within the protection of s.13(14); but an alternative route to the same destination is that a foundation is not a company within the meaning of s.13.

In practice HMRC accept that foundations should be taxed as trusts so these questions do not arise.[9]

## 47.8 Amount of gain attributed to each participator

Once one has identified the participators, one asks how much of the company's gain is attributed to each of them. Section 13(3) TCGA provides:

> That part shall be equal to the proportion of the gain that corresponds to the extent of the participator's interest as a participator in the company.

This takes us to s.13(13) TCGA:

> In this section—
> (a) references to a person's interest as a participator in a company are references to the interest in the company which is represented by all the factors by reference to which he falls to be treated as such a participator;...

That is, "interest" in s.13(3) is not construed in a narrow or technical manner. The section continues:

> (b) references to the extent of such an interest are references to the proportion of the interests as participators of all the participators in

9 See 72.6.4 (HMRC view).

> the company (including any who are not resident or ordinarily resident in the UK) which on a just and reasonable apportionment is represented by that interest.

What is just and reasonable? The CG Manual starts with general comments:

> **57260 Section 13 TCGA 1992: Participators' fractional interests** [October 2009]
> ...
> *The just and reasonable requirement*
> It is quite possible for the different criteria by which persons are participators to produce different percentages for one person's interest in a company. So under one test, for example entitlement to income, A may have 60% and B have 40% and under another test, for example entitlement to capital, A have 36%, B have 54% and C have 10%. This can happen even with relatively simple company structures, for example where there are preference shares, or loans. The total amount of gains apportioned cannot exceed the chargeable gain of the non-resident company. In this situation the gain has to be apportioned as is just and reasonable. This includes taking into account the interests of non-residents.
> In considering a just and reasonable apportionment you should take into account all relevant factors, and not simply make an arithmetical adjustment. It would not usually be correct merely to average out the interests using the different factors. The aim of the provisions is to ensure that the gain is attributed to the participators who have the real economic interest in the non-resident company and who will derive the benefit of the gain however indirectly. The just and reasonable apportionment prevents an inappropriate part of the gain being attributed to persons without real economic interests, for example commercial loan creditors, see below.

## 47.9 Overlapping participators: loan creditors

The problem of overlapping participators including loan creditors is solved, or fudged, by a just and reasonable apportionment. The CG Manual provides:

> **57260. Section 13 TCGA 1992: Participators' fractional interests** [October 2009]
> *Loan creditors*
> Any loan creditor of the non-resident company is within the definition of

participator as applied for the purposes of Section 13. The aim of the provisions is to ensure that the gain is attributed to the participators who have the real economic interest in the non-resident company. There will be cases where a loan creditor will be a person or institution (such as a bank or similar financial institution) which has loaned money to the non-resident company as a matter of business on commercial terms. The interest of such a loan creditor acting at arms length will be limited to an expectation of repayment of the amount loaned together with payments of interest at a commercial rate. There will be no expectation that the loan creditor can or will benefit from the profits or gains of the non-resident company. In such a case it would not be just and reasonable to apportion any of the gain to a loan creditor of this type. The attribution should be made to those participators who have a real economic interest in the capital gains.
Where there are participators who are loan creditors it will be necessary to review all of the circumstances to satisfy yourself that the interests of the loan creditors can be excluded for the reasons in the preceding paragraph.
In some cases the persons with the real economic interest in the non-resident company will be loan creditors whether or not they are participators under one or more of the other tests set out in CG57221. In such cases, where there is participation in more than one way, it may be appropriate, depending on the facts of the case, to aggregate their interests of those persons in reaching an apportionment that is just and reasonable.
In other cases the persons with the real economic interest in the non-resident company may be providing the funds which the loan creditor has loaned to the company, and may be persons who are entitled to secure that income or assets (whether present or future) of the company will be applied directly or indirectly for their benefit, see the test in CG57221, and may be participators in their own right by virtue of that test.

## 47.10 CG Manual examples: shareholders v. loan creditors

### 47.10.1 *Non-resident shareholder*

The CG Manual starts with a very simple example:

**57280. Computation of TCGA 1992, S 13 charge** [April 2009]
Facts

- a non-resident company has issued share capital of 100 Ordinary shares
- A, B, C and D each own 25 shares
- A, B, C are all R/OR and domiciled in the UK. D is NR/NOR
- the non-resident company realises a gain of 200,000

CGT computations

You compute the TCGA 1992, S 13 charge as follows.

***STEP 1***

Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 200,000.[10]

***STEP 2***

Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances. In this case each of the four participators has a 25 per cent interest.

***STEP 3***

Calculate the proportion of the gain apportionable to the interests of each participator. Calculate the interests of all participators, including any who are not resident in the UK. In this case the proportion for each participator is 25% of 200,000 = 50,000

***STEP 4***

Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is just and reasonable. Gains of 50,000 are attributed to each of A, B and C and treated as gains accruing to them on the date on which the gain actually accrued to the company.

D is not liable to UK taxation. But it would not be just and reasonable to reapportion D's gain of 50,000 to A, B and C as D has a real economic interest in the non-resident company.

### 47.10.2 *Examples with loan creditors*

The CG Manual then gives two examples involving loan creditors. The first involves a loan on commercial terms:

**57281. Computation of TCGA 1992, S 13 charge** [October 2009]

Facts

- A and B each own 50 shares
- A and B are both R/OR and domiciled in the UK
- C is a loan creditor for 400,000. The loan is an arm's length commercial transaction and interest is payable at a fully commercial rate on the loan
- the non-resident company realises a gain of 500,000
- the total capital of the non-resident company after the gain is 1,000,000

The solution is to disregard the loan creditor, though the Manual takes many lines to reach this conclusion:

---

10 Chargeable gains can accrue whether or not a company is UK resident. See 43.1 (Territorial scope of CGT), but the method of computation of the gain is different for a UK resident company. However this does not make any difference to the examples.

CGT computations
You compute the TCGA 1992, S 13 charge as follows.
STEP 1
Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 500,000.[11]
STEP 2
Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.
A is a 50% participator by reference to the shareholding of 50 shares
B is a 50% participator by reference to the shareholding of 50 shares
C is a participator as a loan creditor, being entitled to an amount of 400,000 out of the total capital of 1,000,000
STEP 3
Calculate the proportion of the gain apportionable to the interests of each participator. In this case the proportion for each participator is
A (as shareholder) 500,000×50% = 250,000
B (as shareholder) 500,000×50% = 250,000
C (as loan creditor) 500,000×40% = 200,000
STEP 4
Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is not just and reasonable as the total of the gains under the initial apportionment exceeds the actual gain. C is a participator only by virtue of being a commercial loan creditor, see CG57265. C's entitlement as loan creditor should be ignored, subject to a review of the circumstances to establish that C is merely a commercial loan creditor and has no entitlement to a share of profits or gains, and that there are no other arrangements. In this example it is assumed that there are no other arrangements and therefore the whole of the gain should be apportioned by reference to the interests in shares. The final apportionment becomes
A (as shareholder) 500,000×50% = 250,000
B (as shareholder) 500,000×50% = 250,000

The second example is the same but the loan is interest-free and from a shareholder:

**57282. Computation of TCGA 1992, S 13 charge** [April 2009]
Facts
- a non-resident company has issued share capital of 100 Ordinary shares
- A and B each own 50 shares
- A and B are both R/OR and domiciled in the UK
- A is a loan creditor for 200,000. No interest is payable on the loan
- the non-resident company realises a gain of 500,000.
- the total capital of the non-resident company after the gain is 1,000,000

11 See above footnote.

The solution is *still* to disregard the loan creditor, though the Manual is not quite so confident in its answer:

> CGT computations
> You compute the TCGA 1992, S 13 charge as follows.
> STEP 1
> Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 500,000.[12]
> STEP 2
> Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.
> A is a 50% participator by reference to the shareholding of 50 shares
> B is a 50% participator by reference to the shareholding of 50 shares
> A is also a participator as a loan creditor, being entitled to an amount of 200,000 out of the total capital of 1,000,000. If all of the assets of the company were to be distributed immediately after the accrual of the gain the entitlements of A and B would be
> A: 200,000 (as loan creditor) plus 50% of the balance of 800,000 (as shareholder), a total of 600,000 or 60% of the assets.
> B: 400,000, 50% of the balance of 800,000 (as shareholder), or 40 % of the assets.
> STEP 3
> Calculate the proportion of the gain apportionable to the interests of each participator. In this case there are two possible apportionments.
> A: 500,000×50% = 250,000
> B: 500,000×50% = 250,000
> or
> A: 500,000×60% = 300,000
> B: 500,000×40% = 200,000
> STEP 4
> Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. As there are at least two possible apportionments we must consider all of the facts relating to the arrangements under which A's loan was made and the arrangements regarding profits and gains of the company.
>
> - Does the loan agreement give A any preferential rights to profits or gains, or simply to a repayment of the capital?
> - Is B entitled to an equal share of profits or gains?
>
> In such cases there is no easy answer and a full consideration of all of the relevant circumstances is necessary. On the bare facts of this example A has no preferential rights and consequently an apportionment by reference to the shareholdings, effectively excluding A's participation as loan creditor, may be just and reasonable. If so, the gain would be attributed

12 See above footnote.

A: 500,000×50% = 250,000
B: 500,000×50% = 250,000

## 47.10.3 *Two classes of shares*

The CG Manual's next example concerns a company with two classes of shares:

> **57283. Computation of TCGA 1992, S 13 charge** [April 2009]
> Facts
> - a non-resident company has issued share capital of 100 A shares and 100 B shares.
> - both classes of shares carry equal voting rights but the B shares carry no entitlement to dividends or distributions in a winding-up.
> - the A shares are owned by X who is R/OR and domiciled in the UK
> - the B shares are owned by Y who is NR/NOR
> - the non-resident company realises a gain of 200,000.
>
> CGT computations
> You compute the TCGA 1992, S 13 charge as follows.
> STEP 1
> Calculate the gain that would have arisen if the non-resident company had been resident in the UK. This is 200,000.[13]
> STEP 2
> Determine the interests of all participators, including any who are not resident in the UK, by applying the tests of participation appropriate to the circumstances.
> voting rights distributions
> X 50% 100%
> Y 50% 0%
> X is a 50% participator by reference to voting rights attached to the shareholding in A shares.
> Y is a 50% participator by reference to voting rights attached to the shareholding in B shares.
> X is a 100% participator by reference to rights to dividends and distributions attached to the shareholding in A shares.
> STEP 3
> Calculate the proportion of the gain apportionable to the interests of each participator.
> X (rights to income and capital) 200,000×100% = 200,000
> Y (voting rights) 200,000×50% = 100,000
> STEP 4
> Consider whether the gains calculated in Step 3 represent a just and reasonable apportionment. In this case the apportionment is not just and reasonable as the total of the gains under the initial apportionment exceeds the actual gain. A full

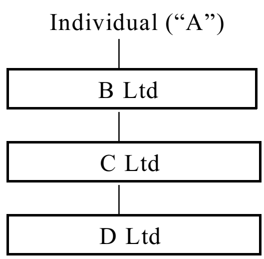
13 See above footnote.

review of all of the circumstances would be necessary. It appears that the true economic interest in the non-resident company is held solely by X. Y's entitlement should be ignored, and the whole of the gain apportioned to X.

## 47.11 Chains of companies

### 47.11.1 *Overlapping participators: chains of wholly owned companies*

Suppose a chain of wholly owned companies:



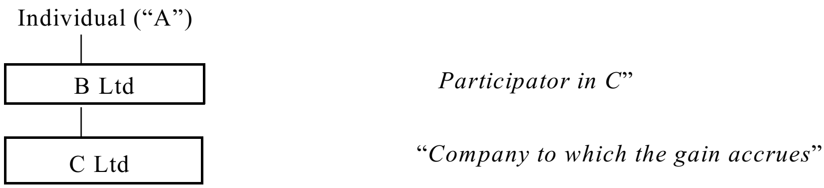
C Ltd is a participator in D Ltd under s.454(1) CTA 2010. But A and B Ltd are also participators, under s.454(2)(c) CTA 2010.[14] This is so wherever the companies are resident. Chains of wholly owned companies raise the problem of overlapping participators.

Section 13(9) TCGA provides:

> [a] If a person who is a participator in the company at the time when the chargeable gain accrues to the company is itself a company which
> [i] is not resident in the UK but which
> [ii] would be a close company if it were resident in the UK,
> [b] [i] an amount equal to the amount apportioned under subsection (3) above out of the chargeable gain to the participating company's interest as a participator in the company to which the gain accrues
> [ii] shall be further apportioned among the participators in the participating company according to the extent of their respective interests as participators, and
> [c] subsection (2) above shall apply to them accordingly in relation to the amounts further apportioned,
> [d] and so on through any number of companies.

14 See 73.15.1 (Chain of wholly owned companies).

Suppose a simple chain of two wholly owned non-resident companies:



If a gain accrues to C, what is apportioned to A? Under s.13(9)[b][i] it is "an amount equal to the amount apportioned under s.13(3)" to B as a participator in C. This is not well drafted, as nothing is apportioned under s.13(3) to B. No apportionment can be made since B is not UK resident![15] But the courts must correct that infelicity and construe the words to mean, the amount that would have been apportioned to B, had it been UK resident.

The CG Manual provides:

> **57290. Indirect interests : Introduction** [April 2009]
> Without special rules UK resident shareholders or participators could avoid the TCGA 1992, S 13 charge by placing another non-resident company between themselves and the company making the gain. TCGA 1992, S 13(9) prevents this by allowing the Revenue to look through a chain of non-resident companies. The gain is apportioned to the first tier of UK residents or non-resident trusts in the chain of interests. For TCGA 1992, S 13(9) to apply each company in the chain must itself satisfy the basic conditions outlined in CG57220.
> Therefore each company must be
> - a company that is not resident in the UK and
> - a company that would be a close company if it was resident in the UK.

The CG Manual begins with a straightforward example:

EXAMPLE 1[16]

15 One might also argue that apportionment is under s.13(2) and not s.13(3).
16 I have added the diagrams to increase clarity.

| | |
|---|---|
| Mr A | *UK resident and domiciled shareholder* |
| B Ltd | *non-resident close company* |
| C Ltd | *non-resident close company* |
| D Ltd | *non-resident close company* |

Gains accruing to D Ltd are not attributed to C under s.13(2) because C is not UK resident. See s.13(2)[a]. But the CG Manual correctly notes:

> Any gains of D Ltd can be apportioned to Mr A because TCGA 1992, S 13(9) allows you to look through the chain of non-resident closely controlled companies.

The next example concerns a chain including a resident company:

EXAMPLE 2

| | |
|---|---|
| Mr A | *UK resident and domiciled shareholder* |
| B Ltd | *UK resident company* |
| C Ltd | *non-resident close company* |
| D Ltd | *non-resident close company* |

The Manual analyses this as follows:

> Any gains of D Ltd can be apportioned to B Ltd but not Mr A. This is because B Ltd is the first UK resident shareholder in the chain.

This was correct before 1995, when s.13(2) and (9) TCGA only apportioned gains to a *shareholder* in a non-resident company. A is not a shareholder of D Ltd. But why can't A be assessed now under s.13(2) or (9)? A *is* a participator in D Ltd. Perhaps this restricted rule is implied by s.13(9) TCGA. Or if not, perhaps it would be just and reasonable to apportion under 13(2) to company B and to no-one else. One way or the other, the problem of overlapping participators in chains of companies is solved by stopping at the first UK resident company.

EXAMPLE 3

| | |
|---|---|
| Mr A | *UK resident and domiciled shareholder* |
| B Ltd | *closely controlled*[17] *non-resident company* |
| C Ltd | *UK resident close company* |
| D Ltd | *non-resident close company* |

Any gains of D Ltd can be apportioned to C Ltd but not Mr A even though Mr A owns shares in B Ltd a closely controlled non-resident company. (Gains which accrue to B Ltd in its own right on disposal of its own assets can be apportioned to Mr A.)

The next Manual example is a straightforward variation on the above:

**57291. Indirect interests: UK resident shareholder in the chain of participators** [April 2009]
When considering the operation of TCGA 1992, S 13(9) each chain of shareholdings must be considered separately.
Example

| | |
|---|---|
| Mr A | *UK resident and domiciled shareholder* |
| B Ltd | *UK resident company* |
| C Ltd | *non-resident close company* |
| D Ltd | *non-resident close company* |

| | |
|---|---|
| Mrs B | *UK resident and domiciled shareholder* |
| E Ltd | *non-resident close company* |

The gains of [E Ltd][18] can be apportioned to Mrs B because she is the

17 The express "closely controlled" is used here (somewhat unhelpfully) as a synonym of "close".

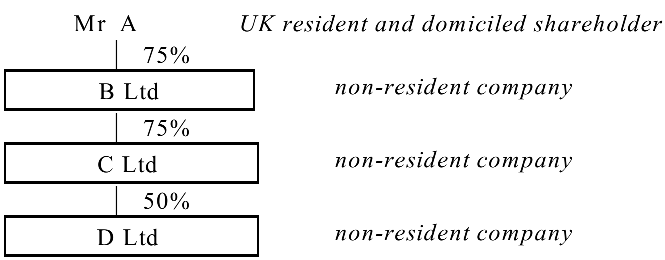
18 The original reads "D Ltd" which must be a slip for "E Ltd", if the diagram is correct.

first UK resident shareholder in that chain of shareholdings. The gains of D Ltd cannot be apportioned to Mr A because B Ltd is the first UK resident shareholder in that chain of shareholdings.

## 47.12 Chains of companies not wholly owned

We have so far considered simple chains of wholly owned companies. The CG manual continues with an example of a less than 100% chain:

> **57291. Indirect interests: UK resident shareholder in the chain of participators** [April 2009]
> ... You calculate the extent of a person's indirect interest on a particular test of participation by multiplying the proportional interest in the assets of each company in the chain.
>
> EXAMPLE



> If D Ltd makes gains of 100,000 the TCGA 1992, S 13 charge on Mr A is £100,000×50%×75%×75% = £28,125.

Mr A is a participator in B Ltd. Mr A is not a participator in D Ltd but that does not matter because C Ltd is a participator in D Ltd, B Ltd is a participator in C Ltd, and gains of D Ltd are attributed to Mr A under s.13(9) TCGA. It is assumed for the purposes of the example that D Ltd is close, which is not necessarily the case; it depends on the other shareholdings, which are not specified in the example.

## 47.13 Section 13 remittance basis

Section 14A TCGA provides a relief which I call "**the s.13 remittance basis**". Section 14A(1) provides:

> This section applies if—

> (a) by virtue of section 13, part of a chargeable gain that accrues to a company on the disposal of an asset is treated as accruing to an individual in a tax year, and
> (b) the individual is not domiciled in the UK in that year.

In short, the relief applies to a remittance basis taxpayer. Section 14A(2) provides the relief:

> The part of the chargeable gain treated as accruing to the individual ("the deemed chargeable gain") is a foreign chargeable gain within the meaning of section 12 if (and only if) the asset is situated outside the UK.

I refer to those deemed chargeable gains as "**s.13 deemed gains**" to distinguish them from other deemed chargeable gains.

Section 14A(3) TCGA provides for the remittance basis:

> For the purposes of Chapter A1 of Part 14 of ITA 2007 (Remittance Basis)—
> (a) treat any consideration obtained by the company on the disposal of the asset as deriving from the deemed chargeable gain, and
> (b) unless the consideration so obtained is of an amount equal to the market value of the asset, treat the asset as deriving from the deemed chargeable gain.

In the absence of express provision, the s.13 deemed gain could not be remitted as it does not exist. Section 14A(3)(a) deals with that problem.

Section 14A(3)(b) is necessary since the equivalent rule in s.809T ITA only applies to gains accruing on a disposal by an individual.

Suppose:

(1) A non resident company ("OC") disposes of a foreign situate asset and realises a gain.
(2) The gain (or part) is deemed to accrue to F (an individual taxable under the remittance basis).

F is subject to tax on the gain if OC brings/receives/uses the sum in the UK, if a company is a relevant person in relation to F. A company within s.13 will be a relevant person.

If OC distributes the sum by way of dividend and F brings/receives/uses the sum in the UK then F is subject to two charges:

(1) CGT on the s.13 gain (for what F receives is derived from the gain)

and

(2) IT on the distribution.

Company distribution relief may apply. The same applies if OC is held by an IP trust.

Likewise if OC is wound up and the liquidator distributes the sum by way of capital distribution, and F brings/receives/uses the sum in the UK then F is subject to two charges:

(1) CGT on the s.13 gain (for what F receives is derived from the gain) and

(2) CGT on the disposal of the shares in OC.

Company distribution relief may apply.

## 47.14 10% *de minimis* exemption

Section 13(4) TCGA provides:

> Subsection (2) above shall not apply in the case of any participator in the company to which the gain accrues where the aggregate amount falling under that subsection to be apportioned
> [a] to him and
> [b] to persons connected with him
> does not exceed one tenth of the gain.

I refer to this as **"the 10% *de minimis* exemption".**

Suppose a non-resident trust holds less than 10% of a non-resident company. Can the trust qualify for the *de minimis* exemption? The difficulty is that s.13(4) does not in terms disapply the whole of s.13: it disapplies s.13(2). The provision governing a non-resident trust is s.13(10) which provides:

> The persons treated *by this section* as if a part of a chargeable gain accruing to a company had accrued to them shall include the trustees of a settlement who are participators
> [a] in the company, or
> [b] in any company amongst the participators in which the gain is apportioned under subsection (9) above,
> if when the gain accrues to the company the trustees are neither resident nor ordinarily resident in the UK.

The words "by this section" must refer in particular to section 13(2), for that is the provision which treats persons as a part of the chargeable gain accruing to the non-resident company had accrued to them. Accordingly, the disapplication of s.13(2) in a *de minimis* case must also disapply the attribution in subsection (10).

### 47.14.1 *Aggregation of connected person's interest*

In order to be satisfied that a participator ("A") in a non-resident company ("OC") qualifies for the 10% *de minimis* exemption, it is necessary to identify all persons connected with A (ie co-participators in OC) to whom gains fall to be apportioned under s.13(2).

In deciding whether A qualifies for the *de minimis* exemption, one does not add up the interests in OC of A and *all* persons connected with A and ask if that amounts to more than 10% of OC. One only counts connected persons *to whom gains fall to be apportioned under s.13(2)*. One ignores connected co-participators if gains do not fall to be apportioned to them under that subsection.

For example, assume OC is a straightforward non-resident company and:

(1) A owns 8% of the shares in OC. (Unless the connected person rule applies, A would qualify for the 10% *de minimis* exemption.)
(2) C (the only participator in OC who is connected with A) owns 3% of the shares in OC. (So if the interest of C is aggregated with the interest of A, A does not qualify for the *de minimis* exemption.)[19]

It is necessary to consider separately the cases where C is an individual, a company and a trust, and the cases where C is resident and non-resident, so there are at least six possibilities.

A does not qualify for the 10% *de minimis* exemption if C is

(1) a UK resident individual taxed on the arising basis[20]
(2) a UK resident company, or
(3) a UK resident trust.

In all these cases the gains of OC do fall to be apportioned to C under s.13(2).

A does qualify for the *de minimis* exemption if C is a *non-resident individual*. In this case, gains cannot be apportioned to C under s.13(2).

---

19 Similarly, C would not qualify for the *de minimis* exemption, but we focus on the position of A.

20 Further consideration would be needed if C were a remittance basis taxpayer who did not remit the s.13 deemed gain.

This is the case even if C is within the temporary non-residence rules.

A does qualify for the *de minimis* exemption if C is a non-resident *company*. In this case, gains of OC might be apportioned to participators in C, but that does not prevent A from qualifying for the *de minimis* exemption unless those participators are themselves connected with A.

Lastly, does A qualify for the 10% *de minimis* exemption if C is a non-resident *trust*? The question is whether gains of OC fall to be apportioned to the trust, under s.13(2). Section 13(10) says (or assumes) that the trustees are treated *by this section* as if gains of OC had accrued to them. The gains are attributed to the trustees under the combined effect of subsection (2) and subsection (10). Whether or not that could be described as an attribution *under s.13(2)* is a matter that could be answered either way, depending on context. In this context, it is suggested that A does qualify for the *de minimis* exemption. This result is consistent with the position for non-resident companies and non-resident individuals. If this result was contrary to common sense (particularly in a tax avoidance context) a court might construe section 13(4) more loosely. But there may be many connected co-participators and A may not be able to know whether they are trustees or not, particularly in the case of non-residents. So it is sensible to disregard the interests of non-resident trustees for the purposes of the aggregation test.

Even adopting this approach, it will often not be possible for a participator to know whether the 10% *de minimis* exemption applies or not, but one must do the best one can.

Interests held by pension funds cannot be aggregated for the 10% *de minimis* exemption. See 47.16 (Pension schemes).

## 47.15 Non-resident trading company

Section 13(5) TCGA provides some relief for a non-resident trading company:

> This section shall not apply in relation to ...
> (b) a chargeable gain accruing on the disposal of an asset used, and used only—
>   (i) for the purposes of a trade carried on by the company wholly outside the UK, or
>   (ii) for the purposes of the part carried on outside the UK of a trade carried on by the company partly within and partly outside the

> UK,
>
> (c) a chargeable gain accruing on the disposal of currency or of a debt within section 252(1), where the currency or debt is or represents money in use for the purposes of a trade carried on by the company wholly outside the UK...

I cannot see the point of s.13(5)(c) which duplicates s.13(5)(b)(i), but it does not matter.

Gains on debts are in any case outside the scope of s.13 because of the loan relationship rules.

## 47.16 Non-resident company within CT

Section 13(5) TCGA provides:

> This section shall not apply in relation to ...
> (d) to a chargeable gain in respect of which the company is chargeable to tax by virtue of section 10B.[21]

Thus the CT charge has priority over a s.13 charge.

## 47.17 Pension schemes

Pension schemes qualify for CGT relief under s.271(1)(c) and (1A) TCGA:

> (1) The following gains shall not be chargeable gains—
> ...
> (c) any gain accruing to a person from his acquisition and disposal of assets held by him as part of a fund—
> (i) mentioned in section 614(2) of the Taxes Act,
> (ii) to which section 615(3) of the Taxes Act applies, or
> (iii) mentioned in section 648, 649, 650, 651 or 653 of ITEPA 2003;
> ...
> (1A) A gain accruing to a person on a disposal of investments held for the purposes of a registered pension scheme is not a chargeable gain.

This does not confer relief from s.13 deemed gains but s.13(10B) TCGA

21 See 74.1 (Why does permanent establishment matter?).

provides relief:

> A chargeable gain that would be treated as accruing to a person under subsection (2) above shall not be so treated if—
> (a) it would be so treated only if assets that are assets of a pension scheme[22] were taken into account in ascertaining that person's interest as a participator in the company, and
> (b) at the time the gain accrues a gain arising on a disposal of those assets would be exempt from tax by virtue of section 271(1)(c) or (1A).

A beneficiary of a pension scheme might be a participator in a non-resident company held by the scheme, but they are protected by the exclusion for beneficiaries.[23]

Section 13(10B) also prevents aggregation of a pension scheme's interest with the interest of a person connected with the trustees of the pension scheme, for the purposes of the 10% *de minimis* exemption. That will not normally arise, as trustees of a pension scheme are not usually connected to other persons, but it could happen, eg if the trustees were partners in an investment partnership.

## 47.18 Partnership holding non-resident company

Suppose a partnership holds a non-resident company to which a gain accrues. Section 59(1) TCGA provides:

> Where 2 or more persons carry on a trade or business in partnership—
> (a) tax in respect of chargeable gains accruing to them on the disposal of any partnership assets shall, in Scotland as well as elsewhere in the UK, be assessed and charged on them separately, and
> (b) any partnership dealings shall be treated as dealings by the partners and not by the firm as such.

This does not apply to a s.13 gain, which is not a gain on the disposal of

---

22 This expression is defined in s.13(10B):
"In para (a) above 'assets of a pension scheme' means assets held for the purposes of a fund or scheme to which any of the provisions mentioned in para (b) above applies."

23 See 47.6 (Overlapping participators: trustees and beneficiaries).

a partnership asset. But the partners are participators in the company, and it is just and reasonable (because it fits the scheme of the TCGA) to attribute the s.13 gain to the partners under s.13(2) TCGA. That is, HMRC do not need s.59 TCGA to tax the partners.

## 47.19 Company distribution relief

Section 13 could often give rise to double taxation and there are three reliefs to prevent this. Statute does not provide names for the reliefs, so I coin the following terminology:
"**Company distribution relief**": s.13(5A) relief on distribution by non-resident company.
"**Company disposal relief**": s.13(7) relief on disposal of interest in non-resident company.
"**Reimbursement relief**": s.13(11) relief on reimbursement by non-resident company.

Section 13(5A) TCGA provides:

> Where—
> (a) an amount of tax is paid by a person in pursuance of subsection (2) above, and
> (b) an amount in respect of the chargeable gain is distributed (either by way of dividend or distribution of capital or on the dissolution of the company) before the end of the period specified in subsection (5B) below,
>
> the amount of tax (so far as neither reimbursed by the company nor applied as a deduction under subsection (7) below) shall be applied for reducing or extinguishing any liability of that person to income tax, CGT or corporation tax in respect of the distribution.

In short, the s.13 tax is set against tax on the distribution.

The CG manual provides:

> **57351. Gains accruing on/after 28/11/95: Outline of tax credit relief**
> [October 2009]
> [The manual summarises s.13(5A) and continues] It is important to note that relief under Section 13(5A) TCGA 1992 is only due where a charge arises under Section 13 in respect of a gain and a further charge arises in respect of a distribution of an amount in respect of the same gain, and that both charges arise on the same person. Where a gain is attributed to

> participator A and the distribution is made to participator B no relief can be given to B as B has not paid tax under Section 13...
>
> **57360. Quantifying tax set-off available following capital dividends or distributions** [April 2009]
>
> ... Once capital gains tax has been paid under section 13(2), then the whole of that tax is available for set-off against any tax liability on a subsequent distribution where the conditions for relief are met. Should only half of the gain be distributed this does not mean that only half of the section 13 capital gains tax can be set off. The section 13 tax represents a pool of tax credit to be used up against tax liability arising from appropriate distributions in respect of the same gain. Thus if only half of the gain is distributed but the tax liability on the distribution is at a higher rate than the tax on the section 13 gain, the tax credit relief will be more than half of the Section 13 tax.
>
> **57362. Need to have paid tax under Section 13(2)** [April 2009]
>
> It is a condition of section 13(5A) relief that the tax arising on the gain attributed under section 13 must have been paid. In some cases the liability on the section 13 gain and on the distribution will arise in the same year of assessment or accounting period, and in other cases the tax on the section 13 gain will not have been paid.
>
> In practice relief may be given by set off providing that the only reason preventing relief being given is that tax on the section 13 gain is unpaid.

For the purpose of s.13(5A) it is necessary to ascertain the liability of the participator to income tax in respect of the distribution from the company.

Section 13(7A) TCGA provides:

> In ascertaining for the purposes of subsection (5A) or (7) above the amount of CGT[24] or income tax chargeable on any person for any year

24 The reference to CGT is not appropriate after the FA 2008 repealed s.13(7A)(b) (c) (d) because s.13(7A) now deals with income tax only. Similarly, the reference to s.13(7) is not appropriate as from 2008, s.13(7A) is only relevant for the purposes of company distribution relief in s.13(5A) and does not apply to company disposal relief in s.13(7). The references made sense before the former paragraphs (b) to (d) were part of s.13(7A). Before 2008, s.13(7A) continued:

> "(b) any gain accruing in that year on the disposal by that person of any asset representing his interest as a participator in the company shall be regarded as forming the highest part of the gains on which he is chargeable to tax for that year;
> (c) where any such distribution as is mentioned in subsection (5A)(b) above falls to be treated as a disposal on which a gain accrues on which that person is so chargeable, that gain shall be regarded as forming the next highest part of the gains

on or in respect of any chargeable gain or distribution—

(a) any such distribution as is mentioned in subsection (5A)(b) above and falls to be treated as income of that person for that year shall be regarded as forming the highest part of the income on which he is chargeable to tax for the year;

## 47.19.1 *HMRC examples*

The CG Manual tries to provide two straightforward worked examples. The first sets s.13 tax against a dividend. The second sets it against a capital distribution:

**57365. Examples of relief under Section 13(5A) TCGA 1992 on a distribution to participators** [April 2009]
This example illustrates the operation of Section 13(5A) TCGA 1992 if the company realises a gain and distributes an amount in respect of the gain to participators.

---

on which he is so chargeable, after any gains falling within para (b) above; and
(d) any gain treated as accruing to that person in that year by virtue of subsection (2) above shall be regarded as the next highest part of the gains on which he is so chargeable, after any gains falling within para (c) above."

The CG Manual provides:

**57375. Tax adjustment and reliefs: Tax relief ordering rules: Section 13(7A) TCGA 1992** [April 2009]
Before tax year 2008-09, where the events which could give rise to relief under section 13(5A) and (7) occurred within a single tax year, there could, in certain circumstances, be computational problems. To prevent this subsection (7A) set out the order of priority to be given to each tax charge. In ascertaining for the purposes of subsections (5A) and (7) the amount of CGT or IT which is chargeable on a person for a year, the order was
a. any distribution which is chargeable as income is treated as the top slice of income for that year
b. any gain accruing on the disposal of any asset representing the participator's interest in the non- resident company is treated as the top slice of gains for that year
c. any gain accruing on a capital distribution is treated as the second slice of gains for that year
d. the gain attributed to the participator under Section 13 is treated as the third slice of gains for that year.
In 2008-09 and later years Capital Gains Tax is charged at a fixed rate regardless of an individual's income and so these priority rules are not necessary. [Author's note: the provision might have been retained to deal with the CGT annual exemption, but that is trivial.]

***Facts***

- A UK resident shareholder owns half the shares in a non-resident close company. The company structure is straightforward and the UK resident is a 50% participator. The shareholder does not claim the remittance basis.
- In January 2009 the non-resident company sells an asset realising a gain of £100,000.
- The UK resident has no other gains in 2008-09 but is chargeable to Capital Gains Tax at 18%.
- In June 2009 the company makes a distribution of £100,000 to its shareholders. The UK resident is chargeable at 40% on the amount received.[25]

***Capital Gains Tax treatment***

January 2009 - The ordinary rules of Section 13 TCGA 1992 apply. Half the gain of £100,000 is attributable to the shareholder and is chargeable to Capital Gains Tax in 2008-09. The tax due is

| | |
|---|---|
| Section 13 gain | £50,000 |
| less annual exempt amount | -£ 9,600 |
| Gain | £40,400 |
| **CGT @ 18%** | **£ 7,272** |

June 2009 – The tax paid under section 13(2) is available for set off. The Income Tax due on the distribution for 2009-10 is

| | |
|---|---|
| Distribution | £50,000 |
| IT @ 40% | £20,000 |
| less Section 13 tax | -£ 7,272 |
| Tax due | £12,728 |

**57366. Examples of relief: Section 13(5A) TCGA 1992: Company dissolved: Payment to participators** [April 2009]

This example illustrates the operation of Section 13(5A) TCGA 1992 if the company realises a gain, is then dissolved and there is a payment to the participators.

***Facts***

A UK resident shareholder owns half the shares in a non-resident close

25 The rate of tax would not normally be 40%. The error arose because the author amended the dates of the text of the example in order to appear up to date (the earlier text is preserved in the 7th edition of this work) but (somewhat negligently) did not make the consequential amendment which should follow from the change of date.

company. The company structure is straightforward and the UK resident is a 50% participator.

- The shares cost £10,000 in July 2009.
- In March 2010 the non-resident company sells an asset realising a gain of £100,000.
- The UK resident has no other gains in 2009-2010 but is chargeable to Capital Gains Tax at 40%.[26]
- In July 2011 the non-resident company is dissolved. There is an excess of assets over liabilities. The liquidator makes a capital distribution to shareholders. The total sum distributed to shareholders is £200,000.
- The UK resident has no other gains in 2011-12 but is chargeable to Capital Gains Tax at 18%.

**Capital Gains Tax treatment**

March 2010 - The ordinary rules of Section 13 TCGA 1992 apply. Half the gain of £100,000 is attributable to the shareholder and is chargeable to Capital Gains Tax in 2009-10. The tax due is

| | |
|---|---|
| Section 13 gain | £50,000 |
| Less annual exempt amount (say) | -£10,000[27] |
| | £40,000 |
| CGT @ 18% | £ 7,200 |

June 2011 - As an amount in respect of the whole of the gain has been distributed, the whole of the tax paid is available for set off. But a capital gain has now accrued to the shareholder because a capital distribution has been received from the liquidator. Section 122 TCGA 1992 applies. The Capital Gains Tax liability for 2011-12 is

| | |
|---|---|
| Proceeds | £100,000 |
| Less cost | - £ 10,000 |
| Gain | £ 90,000 |
| Less annual exempt amount (say) | -£ 10,500 |
| | £ 89,500[28] |

26 See above footnote for the reason for this.

27 The correct figure is 10,100 but the author presumably composed the example before the amount of the annual exemption was known.

28 The author of the manual appears to have made a careless arithmetical mistake here. The reader is invited to speculate what penalties HMRC would think appropriate if a tax return contained as many errors as the two worked examples in the HMRC manual.

| | |
|---|---|
| CGT @ 18% | £ 16,110 |
| Less Section 13 tax | -£ 7,200 |
| Tax due | £ 8,910 |

47.19.2 *Time limit for distribution*

Section 13(5B) TCGA sets out the time limit for company distribution relief:

> The period referred to in subsection (5A)(b) above is the period of three years from—
> (a) the end of the period of account of the company in which the chargeable gain accrued, or
> (b) the end of the period of twelve months beginning with the date on which the chargeable gain accrued,
> whichever is earlier.

The drafting is convoluted, but in plain English the time limit is the earlier of:
(1) three years from the end of the accounting period; or
(2) four years from the date of the gain.

47.19.3 *Remittance basis taxpayer participator*

Company distribution relief applies to foreign s.13 gains which are taxed on a remittance basis, but the relief only sets tax on the s.13 gain against tax on the distribution, so the relief does not apply unless the s.13 gain is remitted (so tax is paid on it), and the distribution is remitted (so tax actually paid on the distribution qualifies for relief). Thus suppose:
(1) Year 1: A company realises a gain deemed to accrue to a remittance basis taxpayer under s.13 but not taxed as it is not remitted.
(2) Year 3: The company declares a dividend in respect of the gain. The dividend is RFI but not taxable as it is not remitted.
(3) Year 10: the gain and the dividend are remitted.
The relief applies. The time limit is met as the distribution was within 3 years of the relevant time, the time that the gain accrued to the company. The date of the remittance is not relevant.

## 47.20 Company disposal relief

Section 13(7) TCGA provides:

> The amount of CGT paid by a person in pursuance of subsection (2) above (so far as neither reimbursed by the company nor applied under subsection (5A) above for reducing any liability to tax) shall be allowable as a deduction in the computation under this Act of a gain accruing on the disposal by him of any asset representing his interest as a participator in the company.

This sets tax against the gain, so it is not generous. The CG Manual provides:

> **57370. Tax adjustment and reliefs: disposal of interest by UK resident participator: Section 13(7) TCGA 1992** [April 2009]
> [The manual summarises s.13(7) and continues] No deduction is due if the tax was paid by the non-resident company, see CG57390. Indexation allowance is not given on the tax paid. Although the tax is allowed as a deduction in computing the gain it is not expenditure within Section 38(1)(a) TCGA 1992 or Section 38(1)(b) TCGA 1992. Therefore it is not relevant allowable expenditure for indexation allowance purposes, see CG17240.
> NOTE. If a taxpayer is within the charge to Capital Gains Tax, neither indexation allowance nor taper relief apply to disposals of assets on or after 6 April 2008. Previously indexation allowance had been frozen at April 1998. For indexation allowance see CG17207+ and for taper relief see CG17895+.

The point about indexation would only be relevant to a corporate taxpayer.

> **57371 Disposal of interest/shares by UK resident** [April 2009]
> This example illustrates the deduction under Section 13(7) TCGA 1992 if the taxpayer sells shares in a non-resident company whose gains have been apportioned under Section 13 TCGA 1992.
> **Facts**
> - June 2008 a taxpayer buys 500 out of the 750 issued shares in X Ltd, a non-resident close company, at a cost of £100,000.
> - March 2009 X Ltd realises a gain of £6,000. 500/750×£6,000 = £4,000 is apportioned to the taxpayer. The amount is included in the 2008-09 Capital Gains Tax assessment. The taxpayer is liable at 18% and tax of £720 is due.
> - August 2010 the taxpayer sells the shares for £130,000.

**Chargeable Gain**

| | | £ |
|---|---|---|
| Disposal proceeds | | 130,000 |
| less Cost | 100,000 | |
| less Section 13(7) deduction | 720 | -100,720 |
| **Chargeable gain** | | **29,280** |
| less Annual exempt amount (say) | | -10,200 |
| Amount chargeable | | 19,080 |

NOTE. If a taxpayer is within the charge to Capital Gains Tax, neither indexation allowance nor taper relief apply to disposals of assets on or after 6 April 2008. Previously indexation allowance had been frozen at April 1998. For indexation allowance see CG17207+ and for taper relief see CG17895+.

This is wholly theoretical as in this situation the taxpayer would and should claim company distribution relief under s.13(5A). The only possible use of company disposal relief would be
(1) to increase an allowable loss, or
(2) in cases where the disposal gave rise to a loss or relief for other losses would obviate the gain.

## 47.21 Reimbursement by non-resident company

Tax on the s.13 gain is due from the UK resident participator and not from the company. The participator has no statutory right of indemnity against the company. But it is possible that the company might pay the tax on the s.13 gain voluntarily, or perhaps a participator might protect himself by entering into a contract requiring the company to pay the tax.

Section 13(11) TCGA provides:

> If any tax payable by any person by virtue of subsection (2) above is paid
> [a] by the company to which the chargeable gain accrues,
> [b] or in a case under subsection (9) above is paid by any such other company,
> the amount so paid shall not for the purposes of income tax, CGT or corporation tax be regarded as a payment to the person by whom the tax was originally payable.

The CG Manual provides a précis:

> **57390. Payment of UK tax by NR company**
> The non-resident company may pay the UK tax due from a UK resident

> when gains have been apportioned to him under TCGA 1992, S 13. If so, TCGA 1992, S 13 (11) provides that the payment of the tax on behalf of the UK resident does not give rise to any further liability in the hands of the UK resident. You do not treat the payment as income of the resident or as a capital distribution in respect of the shares in the non-resident company. TCGA 1992, S 13 (11) will also apply if the liability arises because a UK resident has an indirect shareholding in the non-resident company. The liability can be paid by any of the non-resident close companies in the chain.

Reimbursement is better than an income distribution in respect of the gain as the reimbursement is tax free, whereas an income distribution is subject to income tax (at income tax rates) with the benefit of CGT relief (at CGT rates). Of course, the non-resident company will need to consider whether it would be proper to make the reimbursement as a matter of company law (eg are there other shareholders who may be prejudiced?).

## 47.22 Loss accruing to non-resident company

### 47.22.1 *Arising basis participator*

Section 13(1)(2) TCGA only attributes gains (not losses) to a participator, so in the absence of further provision a participator would have no relief for losses accruing to the non-resident company. Section 13(8) TCGA provides some relief for losses:

> [a] So far as it would go to reduce or extinguish chargeable gains accruing by virtue of this section to a person in a year of assessment this section shall apply in relation to a loss accruing to the company on the disposal of an asset in that year of assessment as it would apply if a gain instead of a loss had accrued to the company on the disposal,
> [b] but shall only so apply in relation to that person;[29]
> [c] and subject to the preceding provisions of this subsection this section shall not apply in relation to a loss accruing to the company.

The CG Manual correctly provides:

---

29 I do not understand the words in [b] and would be grateful if any reader could explain why they are there. Perhaps they are just otiose.

**CG57295 - NR companies: losses: - general** [April 2009]
S13 TCGA 1992 is concerned with the apportionment of gains not losses. If the disposal by the non-resident company gives rise to a loss then that loss cannot be apportioned to UK residents for them to set it off against their other gains. However, the loss can be set-off

- against gains made by the same company in the same year of assessment
- against gains made by other non-resident companies which have been apportioned to the taxpayer in the same year of assessment.

*Losses of the same company (S13(8) TCGA 1992)*
If the non-resident company makes gains and losses in the same year of assessment the losses can be set off against the gains. Any surplus losses cannot be carried forward or back to set-off against gains arising in a different year of assessment.
*Losses of different companies*
If the UK resident is a participator in more than one non-resident company the proportion of the gains and losses of those companies apportioned to the UK resident can be set off against each other in the same year of assessment. Any surplus loss cannot be carried forward or back to set against the gains arising in different years of assessment.

Careful timing of disposals is needed to ensure that the loss relief is used: s.13 losses should not exceed s.13 gains in any year.

47.22.2 *Remittance basis participator*

Section 14A(4) TCGA 1992 provides:

If—
(a) the deemed chargeable gain is a foreign chargeable gain (within the meaning of section 12),
(b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the year mentioned in subsection (1), and
(c) any of the deemed chargeable gain is remitted to the UK in a tax year after that year,
the chargeable gain treated under section 12(2) as accruing may not be reduced or extinguished under section 13(8).

Careful planning is needed to ensure that loss relief is available.

### 47.22.3 *Non resident trust participator*

The position is similar as for a UK participator. The aim should be that company losses should not exceed s.13 gains in any year, so that the losses can be set against the gains under s.13(8) TCGA.

## 47.23 Negligible value claims

Section 24 TCGA provides:

> (1A) A negligible value claim may be made by the owner of an asset ("P") if condition A or B is met.

The usual case is condition A:

> (1B) Condition A is that the asset has become of negligible value while owned by P.[30]

The claim should be made by the non-resident company, though in practice HMRC have accepted claims by UK resident participators.[31] It is possible that the non-resident company might authorise a person to make claims on its behalf, especially if that person is the direct or indirect owner and subject to tax under s.13 on 100% of the company's gains.
Section 24(2)(a) TCGA provides the relief:

> Where a negligible value claim is made:
> (a) this Act shall apply as if the claimant had sold, and immediately reacquired, the asset at the time of the claim or (subject to paragraphs (b) and (c) below) at any earlier time specified in the claim, for a consideration of an amount equal to the value specified in the claim.

Section 24(2)(b) TCGA specifies the limit of the carry back:

> (b) An earlier time may be specified in the claim if:
> (i) the claimant owned the asset at the earlier time; and
> (ii) the asset had become of negligible value at the earlier time; and

30 Condition B (not discussed) arises when the disposal by which P acquired the asset was a no gain/no loss disposal.

31 Private correspondence.

either

(iii) for capital gains tax purposes the earlier time is not more than two years before the beginning of the year of assessment in which the claim is made; or

(iv) for corporation tax purposes the earlier time is on or after the first day of the earliest accounting period ending not more than two years before the time of the claim.

The time limit here is that in (iv), on or after the first day of the earliest accounting period of the non-resident company ending not more than two years before the time of the claim, since s.13(11A) TCGA provides:

> For the purposes of this section the amount of the gain or loss accruing at any time to a company that is not resident in the UK shall be computed (where it is not the case) as if that company were within the charge to corporation tax on capital gains.

## 47.24 Non-resident group relief

A full discussion of group relief requires a book to itself. The discussion here must be somewhat curtailed.

### 47.24.1 *Meaning of "non-resident group"*

Section 14(4) TCGA provides:

> For the purposes of this section—
> (a) a "non-resident group" of companies—
> (i) in the case of a group, none of the members of which are resident in the UK, means that group, and
> (ii) in the case of a group, 2 or more members of which are not resident in the UK, means the members which are not resident in the UK;
> (b) "group" shall be construed in accordance with section 170.

In outline, the definition of group is in s.170(3) TCGA:

> Subject to subsections (4) to (6) below—
> (a) a company (referred to below and in sections 171 to 181 as the "principal company of the group") and all its 75 per cent subsidiaries form a group and, if any of those subsidiaries have 75

per cent subsidiaries, the group includes them and their 75 per cent subsidiaries, and so on, but

(b) a group does not include any company (other than the principal company of the group) that is not an effective 51 per cent subsidiary of the principal company of the group.

The CG Manual provides:

**57401. NR group**

For the purposes of TCGA 1992, S 13 TCGA 1992, S 14(4)(b) amends the definition of group in TCGA 1992, S 170 by omitting the references to companies resident in the UK and particular types of company. It then defines a non-resident group as being either

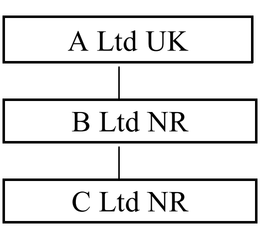
- two or more members of the same group, using the amended definition, both of which are non-resident. A UK resident company cannot be a member of the non-resident group. A non-resident company cannot be a member of the UK group. But a UK resident company can group two non-resident companies, see Example 1

or

- the whole of the group if none of the members are resident in the UK.

FA 2000, Sch 29, Para 1 amended TCGA 1992, S 170 to remove the requirement that members of a group had to be resident in the UK. For the purposes of TCGA 1992, S 14, the definition of a non-resident group remains unchanged by this amendment.

EXAMPLE 1[32]

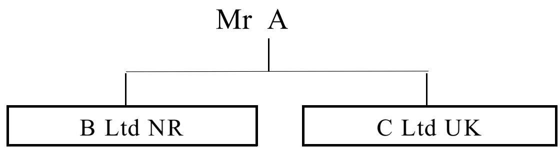


B Ltd and C Ltd form a non-resident group.

A Ltd is not a member of the non-resident group but it does have the effect of overseas “grouping” B Ltd and C Ltd.

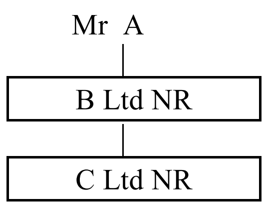
32 I have added the diagrams to increase clarity.

EXAMPLE 2



B Ltd and C Ltd do not form a non-resident group because they are not members of any group.

EXAMPLE 3



B Ltd and C Ltd form a non-resident group because all of the companies in the group are not resident.

47.24.2 *Group relief*

Section 14 TCGA provides:

**Non-resident groups of companies**

(1) This section has effect for the purposes of section 13.

(2) The following provisions—

(a) section 41(8),

(b) section 171 (except subsections (1)(b) and (1A)),

(c) section 173 (with the omission of the words “to which this section applies” in subsections (1)(a) and (2)(a) and “such” in subsections (1)(c) and (2)(c) and with the omission of subsection (3)),

(d) section 174(4) (with the substitution of “at a time when both were members of the group” for “in a transfer to which section 171(1) applied”), and

(e) section 175(1) (with the omission of the words “to which this section applies”),

shall apply in relation to non-resident companies which are members of a non-resident group of companies as they apply in relation to companies which are members of a group of companies.

This incorporates group relief for UK groups by reference.

Section 171(1) TCGA confers the relief. Amended as s.14 TCGA directs, this provides:

> Where—
> (a) a company ("company A") disposes of an asset to another company ("company B") at a time when both companies are members of the same group,
> company A and company B are treated for the purposes of corporation tax on chargeable gains as if the asset were acquired by company B for a consideration of such amount as would secure that neither a gain nor a loss would accrue to company A on the disposal.

Section 171 goes on to set out 11 exceptions where the relief does not apply; these are not discussed here.

The CG Manual provides:

> **57404. Section 14 – UK resident** [April 2007]
> As shown in Example 3 in CG57401 Section 14 TCGA 1992 applies even if the UK resident shareholder[33] is not a company. Some taxpayers and tax advisers are uncertain about this because Section 171 TCGA 1992 includes the words 'so far as relates to Corporation Tax on chargeable gains'.[34] They suggest this means Section 14 can only apply if the Section 13 TCGA 1992 charge would be to Corporation Tax on chargeable gains. We do not take this restrictive view. This practice was published in Tax Bulletin, Issue 7, page 74.[35]

---

33 This should read: "participator".

34 The Manual is a decade out of date, because since 2000 the wording is "for the purposes of corporation tax on chargeable gains" but the revised wording does not alter the position.

35 Now classified as RI 43 which provides:

"**Non-resident companies: attribution of gains to UK shareholders: 'non-resident groups': TCGA 1992 ss13, 14, 171–174, 175(1), 178–180**
In some circumstances gains realised by non-resident companies may be attributed to shareholders who are resident or ordinarily resident in the UK. The main provisions are in TCGA 1992 s 13. The scope of the legislation is not quite as wide ranging as it may seem because some of the group provisions which apply to UK groups for the taxation of gains—for example those relating to intra-group transfers—are imported for s 13 purposes from elsewhere in TCGA 1992 (see s 14). An intra-group transfer by members of a 'non-resident group' would thus be treated as taking place at no gain and no loss so there would be no gain on the disposal to

This is a somewhat cavalier view. Normally it will favour the taxpayer and so will not be challenged. But there are cases where it will be in the taxpayer's interest to argue that group relief does not apply.

### 47.24.3 *Clawback charge*

Section 14(3) TCGA provides:

> Section 179 (except subsections (1)(b) and (1A)) shall apply for the purposes of section 13 as if for any reference therein to a group of companies there were substituted a reference to a non-resident group of companies, and as if references to companies were references to companies not resident in the UK.

This incorporates the clawback rules for groups by reference. Amended as s.14(3) directs, s.179 TCGA in outline provides:

> (1) This section applies where—
> (a) a company not resident in the UK ("company A") acquires an asset from another company not resident in the UK ("company B") at a time when company B is a member of a non-resident group,
> ...
> (c) company A ceases to be a member of that non-resident group within the period of six years after the time of the acquisition.
> References in this section to a company not resident in the UK ceasing to be a member of a non-resident group of companies not resident in the UK do not apply to cases where a company not resident in the UK ceases to be a member of a non-resident group in consequence of another member of the non-resident group ceasing to exist.
> ...
> (2) Where 2 or more associated companies not resident in the UK cease to be members of the non-resident group at the same time, subsection (1) above shall

---

attribute to UK shareholders.

In relation to the application of the no gain/no loss rule in these circumstances [HMRC] have been asked whether the words 'so far as relates to corporation tax on chargeable gains' in TCGA 1992 s 171 limit its application to situations where the gain on the intra-group transaction would otherwise be within the charge to corporation tax.

In [HMRC's] view the no gain/no loss rule is not limited in this way. The benefit of the rule is given whether the shareholder is assessable to CGT or to corporation tax. A similar view is also taken when considering the operation of any of the other sections referred to in TCGA 1992 s 14."

not have effect as respects an acquisition by one from another of those associated companies not resident in the UK.

(2A) Where—

(a) a company not resident in the UK ("company A") that has ceased to be a member of a non-resident group of companies not resident in the UK ("the first non-resident group") acquired an asset from another company not resident in the UK ("company B") which was a member of that non-resident group at the time of the acquisition,

(b) subsection (2) above applies in the case of company A's ceasing to be a member of the first non-resident group so that subsection (1) above does not have effect as respects the acquisition of that asset,

(c) company A subsequently ceases to be a member of another non-resident group of companies not resident in the UK ("the second non-resident group"), and

(d) there is a connection between the two non-resident groups,

subsection (1) above shall have effect in relation to company A's ceasing to be a member of the second non-resident group as if it had been the second non-resident group of which both companies not resident in the UK had been members at the time of the acquisition.

(2B) For the purposes of subsection (2A) above there is a connection between the first non-resident group and the second non-resident group if, at the time when company A ceases to be a member of the second non-resident group, the company not resident in the UK which is the principal company of that non-resident group is under the control of—

(a) the company not resident in the UK which is the principal company of the first non-resident group or, if that non-resident group no longer exists, which was the principal company of that non-resident group when company A ceased to be a member of it;

(b) any person or persons who control the company not resident in the UK mentioned in para (a) above or who have had it under their control at any time in the period since company A ceased to be a member of the first non-resident group; or

(c) any person or persons who have, at any time in that period, had under their control either—

    (i) a company not resident in the UK which would have been a person falling within para (b) above if it had continued to exist, or

    (ii) a company not resident in the UK which would have been a person falling within this paragraph (whether by reference to a company not resident in the UK which would have been a person falling within that paragraph or to a company not resident in the UK or series of companies not resident in the UK falling within this subparagraph).

(2C) This section shall not have effect as respects any asset if, before the time when company A ceases to be a member of the non-resident group or, as the case may be, the second non-resident group, an event has already occurred by virtue of which the company not resident in the UK falls by virtue of section 101A(3) to be treated as having sold and immediately reacquired the asset at the time specified in subsection (3) below.

(2D) This section shall not have effect as respects any asset if, before the time when company A ceases to be a member of the non-resident group or, as the case may be, the second non-resident group, an event has already occurred by virtue of which the company not resident in the UK falls by virtue of section 101C(3) to be treated as having sold and immediately reacquired the asset at the time specified in subsection (3) below.

(3) If, when company A ceases to be a member of the non-resident group, company A, or an associated company not resident in the UK also leaving the non-resident group, owns, otherwise than as trading stock—

(a) the asset, or

(b) property to which a chargeable gain has been carried forward from the asset on a replacement of business assets,

then, subject to subsection (4) below, company not resident in the UK A shall be treated for all the purposes of this Act as if immediately after its acquisition of the asset it had sold, and immediately reacquired, the asset at market value at that time.

(4) Any chargeable gain or allowable loss accruing to company A on the sale referred to in subsection (3) above shall be treated as accruing to company A at whichever is the later of the following, that is to say—

(a) the time immediately after the beginning of the accounting period of that company not resident in the UK in which or, as the case may be, at the end of which the company not resident in the UK ceases to be a member of the non-resident group; and

(b) the time when under subsection (3) above it is treated as having reacquired the asset;

and sections 138 to 142 of CTA 2010 have effect accordingly as if the actual circumstances were as they are treated as having been.

(5) Where, apart from subsection (6) below, a company not resident in the UK ceasing to be a member of a non-resident group by reason only of the fact that the principal company of the non-resident group becomes a member of another non-resident group would be treated by virtue of subsection (3) above as selling an asset at any time, subsections (6) to (8) below shall apply.

(6) The company in question shall not be treated as selling the asset at that time; but if—

(a) within 6 years of that time the company in question ceases at any time ("the relevant time") to satisfy the following conditions, and

(b) at the relevant time, the company in question, or a company not resident in the UK in the same non-resident group as that company, owns otherwise than as trading stock the asset or property to which a chargeable gain has been carried forward from the asset on a replacement of business assets,

the company in question shall be treated for all the purposes of this Act as if, immediately after its acquisition of the asset, it had sold and immediately reacquired the asset at the value that, at the time of acquisition, was its market value.

(7) Those conditions are—

(a) that the company not resident in the UK is a 75 per cent subsidiary of one or more members of the other non-resident group referred to in subsection (5) above, and

(b) that the company not resident in the UK is an effective 51 per cent subsidiary of one or more of those members.

(8) Any chargeable gain or allowable loss accruing to the company not resident in the UK on that sale shall be treated as accruing at the relevant time.

(9) Where—

(a) by virtue of this section a company not resident in the UK is treated as having sold an asset at any time, and

(b) if at that time the company not resident in the UK had in fact sold the asset at market value at that time, then, by virtue of section 30, any allowable loss or chargeable gain accruing on the disposal would have been calculated as if the consideration for the disposal were increased by an amount,

subsections (3) and (6) above shall have effect as if the market value at that time had been that amount greater.

(9A) Sections 450 and 451 of CTA 2010 (meaning of control) shall have effect for the purposes of subsection (2B) above as it has effect for the purposes of Part 10 of CTA 2010; but a person carrying on a business of banking shall not for the purposes of that subsection be regarded as having control of any company not resident in the UK by reason only of having, or of the consequences of having exercised, any rights of that person in respect of loan capital or debt issued or incurred by the company not resident in the UK for money lent by that person to the company not resident in the UK in the ordinary course of that business.

(10) For the purposes of this section—

(a) 2 or more companies not resident in the UK are associated companies not resident in the UK if, by themselves, they would form a non-resident group of companies not resident in the UK,

(b) a chargeable gain is carried forward from an asset to other property on a replacement of business assets if, by one or more claims under sections 152 to 158, the chargeable gain accruing on a disposal of the asset is reduced, and as a result an amount falls to be deducted from the expenditure allowable in computing a gain accruing on the disposal of the other property,

(c) an asset acquired by company A shall be treated as the same as an asset owned at a later time by that company not resident in the UK or an associated company not resident in the UK if the value of the second asset is derived in whole or in part from the first asset, and in particular where the second asset is a freehold, and the first asset was a leasehold and the lessee has acquired the reversion.

(13) Where under this section company A is to be treated as having disposed of, and reacquired, an asset, all such recomputations of legibility in respect of other disposals, and all such adjustments of tax, whether by way of assessment or by way of discharge or repayment of tax, as may be required in consequence of the provisions of this section shall be carried out.

## 47.25 Private residence relief

Suppose T owns a non-resident company, which holds a house that is T's main residence. If the company disposes of the house, and a gain accrues to T, does private residence relief apply? Section 222(1) TCGA provides:

> This section applies to a gain accruing to an individual so far as attributable to the disposal of, or of an interest in—
> (a) a dwelling-house or part of a dwelling-house which is, or has at any time in *his* period of ownership been, his only or main residence, or
> (b) land *which he has* for his own occupation and enjoyment with that residence as its garden or grounds up to the permitted area.
> (emphasis added)

The gain does accrue to an individual, and it is attributable to the disposal of the dwellinghouse. However, no relief applies because:
(1) the condition in (b) is not met: there is no land which T *has*;
(2) the condition in (a) is not met: the company's period of ownership is not *his* period of ownership.
T might argue that the section should be read non-literally, but it is not absurd to deny private residence relief when a house is held through a company. The policy is consistent with s.13(11A) TCGA which computes gains as if the company were within the charge to CT, and no-one suggests a UK resident company qualifies for private residence relief.

Likewise if the company is held by a trust, no relief applies to the trustees and the gain on the disposal is a s.2(2) amount or a s.86 amount.

## 47.26 Administration and appeals

The CG Manual provides:

> **57270. Liaison: other offices** [April 2009]
> As you are required to make an apportionment that is just and reasonable by reference to the interests of all of the participators, you will need to liaise with other officers dealing with participators in the non-resident company. In appropriate cases you should agree that a single nominated officer co-ordinate the progress of the enquiries, or conduct the enquiry in respect of some or all of the participators, for example, where all of the participators are represented by the same agent. In any case where a non-resident trust is involved, CAR (Residence), see CG57395, should be notified and will normally act as the office co-ordinating HMRC's enquiries.
> ... It will usually be appropriate to ensure that all appeals relating to the

extent of the interests of participators with regard to a particular gain are heard at the same hearing, see AH1795.

CHAPTER FORTY EIGHT

# CAPITAL LOSSES

## 48.1 Deduction of losses

Section 2(2) TCGA provides for the deduction of losses:

> Capital gains tax shall be charged on the total amount of chargeable gains accruing to the person chargeable in the year of assessment, after deducting—
> (a) any allowable losses accruing to that person in that year of assessment, and
> (b) so far as they have not been allowed as a deduction from chargeable gains accruing in any previous year of assessment, any allowable losses accruing to that person in any previous year of assessment (not earlier than the year 1965–66).

Section 2 refers to a "person", so it applies to individuals, trustees, companies and PRs.

Section 2(2)(a) deducts current year losses and s.2(2)(b) deducts brought forward losses. Section 2(3) TCGA disallows carry-back of losses (unnecessarily) and provides two commonsense restrictions on loss relief:

> [a] Except as provided by section 62,[1] an allowable loss accruing in a year of assessment shall not be allowable as a deduction from chargeable gains accruing in any earlier year of assessment, and
> [b] relief shall not be given under this Act more than once in respect of any loss or part of a loss, and
> [c] shall not be given under this Act if and so far as relief has been or may be given in respect of it under the Income Tax Acts.

---

1 See 45.4 (Carry-back of losses on death).

The restriction on carry-back of losses means that careful timing of disposals may make the difference between losing and using the losses.

In this chapter:

"**Personal losses**" means losses accruing to individuals.

"**Trust losses**" means losses accruing to trustees.

For offshore fund losses, see 32.21 (Losses). For losses in the year of arrival and departure from the UK, see 6.18.1 (Losses). For losses of temporary non-residents see 8.5 (Gains and losses accruing in intervening years). For s.13 losses see 47.21 (Loss accruing to non-resident company). For interaction of loss relief and foreign tax credits, see 50.5.6 (HMRC practice: quantum of relief).

## 48.2 Allowable loss

Section 2 TCGA refers to "allowable" losses. This is a label which brings in a large number of rules; for whenever the drafter wishes to disallow a loss they direct that it is not allowable. The starting point is s.16 TCGA which provides:

> (1) Subject to sections 261B, 261D and 263ZA and except as otherwise expressly provided the amount of a loss accruing on a disposal of an asset shall be computed in the same way as the amount of a gain accruing on a disposal is computed.
> (2) Except as otherwise expressly provided, all the provisions of this Act which distinguish gains which are chargeable gains from those which are not, or which make part of a gain a chargeable gain, and part not, shall apply also to distinguish losses which are allowable losses from those which are not, and to make part of a loss an allowable loss, and part not; and references in this Act to an allowable loss shall be construed accordingly.

Section 16(2A) TCGA requires a claim to be made when the loss accrues (which may be some years before the loss is used):

> A loss accruing to a person in a year of assessment shall not be an allowable loss for the purposes of this Act unless, in relation to that year, he gives a notice to an officer of the Board quantifying the amount of that loss; and sections 42 and 43 of the Management Act shall apply in relation to such a notice as if it were a claim for relief.

In this chapter I assume losses are allowable unless otherwise stated.

## 48.3 Loss accruing to non-resident

Section 16(3) TCGA provides:

> [a] A loss accruing to a person in a year of assessment during no part of which he is resident or ordinarily resident in the UK shall not be an allowable loss for the purposes of this Act
> [b] unless, under section 10 or 10B, he would be chargeable to tax in respect of a chargeable gain if there had been a gain instead of a loss on that occasion.[2]

In short, a loss accruing to a person who is neither resident nor ordinarily resident in the UK is not an allowable loss. This gives a symmetry with the principle that a gain accruing to such a person is not in principle subject to CGT. Section 16(3) refers to a "person", so it applies to individuals, trustees, companies and PRs. However, there is some relief for non-resident trusts within s.86, 87 TCGA; see below; there is also some relief for losses of non-resident companies within s.13 TCGA.[3]

The realisation of losses outside the scope of CGT is wasteful. Unless the temporary non-residence rules apply:

(1) An individual leaving the UK may consider realising losses before they become non-resident.
(2) An individual planning to come to the UK may postpone the disposal of assets with inherent losses until they acquire UK resident status.

## 48.4 Carry-back of losses on death

Section 62(2) TCGA provides for carry-back of losses on death:

> Allowable losses sustained by an individual in the year of assessment in which he dies may, so far as they cannot be deducted from chargeable gains accruing in that year, be deducted from chargeable gains accruing to the deceased in the 3 years of assessment preceding the year of

---

2 The situation in s.16(3)[b] is very rare: see 43.8 (Non-resident trader with UK branch).

3 See 47.21 (Loss accruing to non-resident company).

> assessment in which the death occurs, taking chargeable gains accruing in a later year before those accruing in an earlier year.

Section 62(2A) TCGA provides:

> Amounts deductible from chargeable gains for any year in accordance with subsection (2) above shall not be so deductible from any such gains so far as they are gains that are treated as accruing by virtue of section 87 or 89(2) (read, where appropriate, with section 10A).

Thus the disallowance of personal losses against s.87 deemed gains continues on death. That is consistent with the general rule.

## 48.5 Loss accruing to non-resident trustees

### 48.5.1 *Section 87 and trust losses*

Section 87(4) TCGA provides:

> The section 2(2) amount for a tax year for which this section applies to the settlement is—
> (a) the amount upon which the trustees would be chargeable to tax under section 2(2) for that year if they were resident and ordinarily resident in the UK in that year ...

Under this definition, losses accruing to trustees in a tax year could be set against gains accruing to the trustees in the same year, in computing the s.2(2) amount. But losses of an earlier year in which the trustees were not resident could not be carried forward and set against gains of a later year, because s.16(3) TCGA disallows such losses.[4] However s.97(6) TCGA allows losses to be carried forward:

> Section 16(3) shall not prevent losses accruing to trustees in a year of assessment for which section 87 of this Act or section 17 of the 1979 Act applied to the settlement from being allowed as a deduction from chargeable gains accruing in any later year (so far as they have not previously been set against gains for the purposes of a computation under either of those sections or otherwise).

4 See 48.3 (Loss accruing to non-resident).

Carried forward losses will usually be used to reduce s.2(2) amounts of a subsequent year. But if the trust became UK resident they could be set against gains to reduce the trustees' own liability. A trust is therefore sometimes better than absolute ownership by a remittance basis taxpayer, whose personal losses may be disallowed.

### 48.5.2 *Section 86 and trust losses*

Under s.86 TCGA the settlor is taxed on what I call "**the s.86 amount**", which is the amount on which trustees would be charged to tax if UK resident.[5] Under this provision losses accruing to trustees in a tax year could be set against gains accruing to the trustees in the same year, in computing the s.86 amount. But losses of an earlier year in which the trustees were not resident could not be carried forward and set against gains of a latter year because s.16(3) TCGA disallows such losses. However para 1(2) sch 5 TCGA provides:

> In construing section 86(1)(e) as regards a particular year of assessment [that is, in order to ascertain the s.86 amount] —
> (a) any deductions provided for by section 2(2) shall be made in respect of disposals of any of the settled property originating from the settlor, and
> (b) section 16(3) shall be assumed not to prevent losses accruing to trustees in one year of assessment from being allowed as a deduction from chargeable gains accruing in a later year of assessment (so far as not previously set against gains).

### 48.5.3 *Loss accruing before s.86 conditions satisfied*

Para 1(6) sch 5 TCGA provides:

> The following rules shall apply in construing section 86(1)(e) as regards a particular year of assessment ("the year concerned") in a case where the trustees fall within section 86(2)(a)—
> (a) if the conditions mentioned in section 86(1) are not fulfilled as regards the settlement in any year of assessment falling before the year concerned, no deductions shall be made in respect of losses accruing before the year concerned;

5 See 44.7 (Section 86 amount condition).

(b) if the conditions mentioned in section 86(1) are fulfilled as regards the settlement in any year or years of assessment falling before the year concerned, no deductions shall be made in respect of losses accruing before that year (or the first of those years) so falling,

but nothing in the preceding provisions of this sub-paragraph shall prevent deductions being made in respect of losses accruing in a year of assessment in which the conditions mentioned in section 86(1)(a) to (d) and (f) are fulfilled as regards the settlement.

### 48.5.4 *Loss on disposal before 19 March 1991*

For completeness, para 1(7) Sch 5 TCGA provides:

> In construing section 86(1)(e) as regards a particular year of assessment and in relation to a settlement created before 19th March 1991, no account shall be taken of disposals made before 19th March 1991 (whether for the purpose of arriving at gains or for the purpose of arriving at losses).

## 48.6 Disallowance of personal losses against s.87 gains

Section 2(4) TCGA provides:

> If chargeable gains are treated by virtue of section 87 or 89(2)[6] as accruing to a person in a tax year ("the relevant deemed gains")—
> (a) subsection (2) has effect as if the relevant deemed gains had not accrued, and
> (b) the amount on which the person is charged to capital gains tax for that year is the sum of—
> (i) the amount given by subsection (2) as it has effect by virtue of para (a), and
> (ii) the amount of the relevant deemed gains.

This is clumsily expressed.[7] The drafting technique is to isolate the

6 Section 2(5) TCGA provides: "In subsection (4) the reference to section 87 or 89(2) is to that section read, where appropriate, with section 10A."

7 Section 62(2A) TCGA illustrates how the point could be clearly expressed; see 48.4 (Carry-back of losses on death).
Obscurity in statutory drafting *does* matter. In *Futter v Futter* [2011] STC 890 trustees made an appointment in the mistaken belief that personal losses could be set

"relevant deemed gains" (ie the s.87 deemed gains) from the loss relief in s.2(2) TCGA. The effect is that personal losses may not be set against s.87 deemed gains accruing to the individual.

### 48.6.1 *Commentary*

The disallowance of personal losses against s.87 deemed gains was introduced in 1998 because of the difficulties of interaction with taper relief. The CG Manual provides:

> **34272 Personal losses [June 2005]**
> ... For 1998–99 onwards the beneficiary's personal allowable losses are not available to reduce these attributed gains. It is not possible to identify any particular gain with a capital payment and so the changes introduced for Section 77 and Section 86 gains, see CG34865+, for 2003–04 onwards could not be extended to Section 87 gains.

The repeal of taper in 2008 should have allowed personal losses to be set once again against s.87 deemed gains. Presumably this point was overlooked or perhaps the deliberate decision was made to discourage the use of trusts. It is submitted that the rule disallowing personal losses against s.87 deemed gains should be repealed.

## 48.7 Personal losses and s.86 gains

Personal losses can be set against s.86 gains under s.2(2) TCGA.

For completeness, s.2(7) TCGA deals with the situation where a settlor has made two or more settlements:

> Where in any year of assessment—
> (a) there are amounts treated as accruing to a person by virtue of section 86,
> (b) two or more of those amounts, or elements of them—
> (i) relate to different settlements,
> (c) losses are deductible from the amounts or elements mentioned in para (b) above but are not enough to exhaust them all,

---

against s.87 deemed gains. If s.2 had been clearly drafted, it is unlikely that the mistake would have been made.

> the deduction applicable to each of the amounts shall be the appropriate proportion of the aggregate of those losses.
> The "appropriate proportion" is that given by dividing the amount in question by the total of the amounts.

This is only necessary to ascertain what amount can be recovered under the settlor's indemnity against each settlement.

## 48.8 Loss accruing to remittance basis taxpayer

### 48.8.1 *"Foreign loss" and "UK loss"*

The legislation distinguishes between foreign losses and other losses. Section 16ZA(6) TCGA gives "**foreign loss**" a commonsense meaning:

> In this section "foreign loss" means a loss accruing from the disposal of an asset situated outside the UK.

In this discussion, "**UK loss**" means a loss which is not a foreign loss, ie a loss on a disposal of a UK situate asset.

### 48.8.2 *History*

The complex rules can be better understood if one understands the constraints faced by the drafter. It is difficult to think of a satisfactory rule for losses of a remittance basis taxpayer. Relief for all losses is too generous when only some gains are taxable. Relief for foreign losses remitted to the UK is not satisfactory, as it would usually be easy to remit the losses to the UK, so that amounts to a relief for (almost) all losses, at least for a well advised taxpayer. Moreover in the case of the extinction of an asset there may be nothing to remit.

The pre-2008/09 solution was to disallow relief on foreign losses on foreign domiciliaries (to whom the remittance basis applied compulsorily – there was no claim needed). The CGT remittance basis was a package with advantages and this disadvantage. This was a rough and ready solution, but simple and workable. However the introduction of the claim for the CGT remittance basis in 2008 changed the situation. If foreign losses of foreign domiciliaries were disallowed only in years that the individual claimed the remittance basis, then individuals may claim the remittance basis in the year that they realise gains and not in the year that they realise losses. On the other hand, the failure to claim would often be expensive in other ways, and as a simple and pragmatic solution it has much to commend it.

The FD draft clauses 2007 proposed to disallow all foreign losses of foreign domiciliaries, but that was EU non-compliant (not to mention unfair). HMRC presumably agreed, and a new solution had to be devised in the rushed weeks between publication of the FD draft clauses and the Finance Bill, allowing insufficient time for HMRC to consider the issues, and none at all for consultation.

### 48.8.3 *Summary*

EN FB 2008 provides this summary:

> 355. The overall effect of these new rules is that:
> [1] on the first occasion when a non-UK domiciled individual claims remittance basis for a tax year, the individual may make an election in relation to their foreign losses;
> [2] if the individual does not make an election, foreign losses of that tax year and all future tax years will not be allowable losses; and
> [3] if the individual makes an election, special rules apply to the deduction of allowable losses where there are foreign chargeable gains.
> 356. The effect of the special rules is that:
> [1] where foreign chargeable gains are remitted to the UK in a tax year later than that in which the asset was disposed of,
> [a] no losses of that later year, or of any year later than that in which they arose, are deductible from those gains, and
> [b] they may not be covered by the AEA [annual exempt amount] of the year in which they are remitted; and
> [2] if remittance basis is claimed for the tax year in which foreign chargeable gains arise, the allowable losses available for deduction from gains of that year are deducted
> [a] first from foreign chargeable gains that both arise and are remitted in that year,
> [b] then against foreign chargeable gains arising but not remitted in that year, and
> [c] only then from any other (non-foreign) chargeable gains arising in that year.

### 48.8.4 *Relevant tax year*

The legislation uses the expression "**relevant tax year**". Section 16ZA(1) TCGA provides:

> In this section "the relevant tax year", in relation to an individual, means the first tax year for which—
> (a) section 809B of ITA 2007 (claim for remittance basis) applies to the individual, and
> (b) the individual is not domiciled in the UK.

In short, the relevant tax year is the first year that the individual claims the remittance basis (it does not matter whether or not the individual is a long-term resident, ie whether or not the £30k remittance basis charge is due). One can put off the relevant year by not making a remittance basis claim but that is not generally going to be worthwhile. In most cases the relevant tax year will be 2008/09 or the earliest year of UK residence if later.

An individual within s.809D or 809E (sub £2k taxpayer or non-taxpayer) is not within s.809B so all losses are allowable in the usual way.

### 48.8.5 *Loss election*

Section 16ZA TCGA provides:

> (2) An individual may make an election under this section for the relevant tax year (in which case sections 16ZB and 16ZC have effect in relation to the individual for the relevant tax year and all subsequent tax years). ...
> (4) Sections 42 and 43 of the Management Act (procedure and time limit for making claims), except section 42(1A) of that Act, apply in relation to an election under this section as they apply in relation to a claim for relief.
> (5) An election under this section is irrevocable.

Thus a taxpayer claiming the remittance basis has a once in a lifetime opportunity to make an election under s.16ZA (which I call a "**loss election**") and this election (if made) applies for the rest of their life. It is impossible to know what will be the best choice and the taxpayer will have to guess. This is almost unprecedented in tax legislation.

RDR Manual provides:

> **41170 - Foreign Losses**
> The election should be made for the first year for which the remittance basis is claimed, irrespective of whether the individual has any foreign chargeable gains or overseas losses in that year. The election will usually be made within the white space in the Capital Gains supplementary pages of the same SA Return as the first remittance basis claim is made. The election is irrevocable.
> The usual time limits for claims/elections at TMA70/s42 and 43 apply.

## 48.9 Disallowance of foreign losses if no election is made

Section 16ZA(3) TCGA provides:

> If an individual does not make such an election, foreign losses accruing to the individual in
> a the relevant tax year, or
> b any subsequent tax year except one in which the individual is domiciled in the UK
> are not allowable losses.

In short, if no election is made, foreign losses accruing to a foreign domiciliary are not allowable. UK losses are allowable in the usual way.

Section 16ZA(3) only applies to foreign losses accruing in the relevant tax year. What about foreign losses accruing to a UK resident foreign domiciled individual before 2008/09? The answer is that such losses would normally be disallowed under s.16(4) TCGA as it had effect before 2008/09:

> In accordance with section 12(1), losses accruing on the disposal of assets situated outside the UK to an individual resident or ordinarily resident but not domiciled in the UK shall not be allowable losses.[8]

8 This wording is confusing. It means that losses accruing to a foreign domiciliary on a disposal by the foreign domiciliary of foreign situated property are not allowable. It does not mean that losses are not allowable on a disposal (by any person) to a foreign domiciliary.

### 48.9.1 *Planning*

It may sometimes be possible for a foreign domiciliary in this position to avoid this problem by taking action before disposing of an asset on which a loss will accrue. Consider:
(1) making assets UK situate prior to disposal;[9]
(2) an inter-spouse transfer.[10]
A foreign domiciliary who claims the remittance basis may be worse off than if they had not made the claim, if (1) they fail to make the loss election (2) they realise disallowed foreign losses; and (3) they remit sufficient gains to the UK.

## 48.10 Position if loss election is made

In the following discussion:

**"Promptly remitted gains"** means foreign gains taxed on the remittance basis which are remitted in the year that the gains accrue.
**"Postponed remitted gains"** means foreign gains taxed on the remittance basis which are remitted in a year after the gains accrue. Statute calls these "relevant gains." (It is generally better to adopt statutory terminology, for better or for worse, but my terminology is so much clearer than "relevant gains" that it makes the discussion easier to follow.)
**"Unremitted gains"** means foreign gains taxed on the remittance basis which are not remitted (and so not subject to CGT).

Section 16ZB TCGA provides:

> **16ZB Individual who has made election under section 16ZA: foreign chargeable gains remitted in tax year after tax year in which accrue**[11]
> (1) This section applies to an individual for a tax year ("the applicable tax year") if—
> (a) the individual has made an election under section 16ZA,

9 Contrast 43.5 (CGT planning: making property non-UK situate).
10 See 48.12 (Inter-spouse transfer).
11 *Sic*: the heading is incoherent.

(b) foreign chargeable gains[12] accrued to the individual in or after the relevant tax year (within the meaning of section 16ZA) but before the applicable tax year, and
(c) by reason of the remission[13] of any of the foreign chargeable gains to the UK, chargeable gains are treated under section 12 as accruing to the individual in the applicable tax year ("the relevant gains").

The key terms here are
– *relevant tax year* (the first year the remittance basis is claimed).[14]
– *relevant gains*. Relevant gains are in my terminology **postponed remitted gains**.
– *applicable tax year* (the year – after the relevant tax year – in which the postponed remitted gains are remitted).

In short, s.16ZB applies if there are postponed remitted gains. At this point the drafting becomes exceptionally clumsy.[15]

Section 16ZB(2) TCGA continues:

> Section 2(2) or (4) has effect for the applicable tax year as if the relevant gains had not accrued.

Section 16ZB(2) isolates the postponed remitted gains from the loss relief in s.2(2) TCGA. Section 16ZB(3) TCGA goes on:

> The amount on which the individual is charged to capital gains tax for the applicable tax year is (instead of the amount given by section 2(2) or (4)(b), as reduced under section 3) the sum of—
> (a) the adjusted taxable amount, and
> (b) the amount of the relevant gains.

12 This expression has its usual commonsense meaning. Section 16ZB(5) TCGA provides: "In subsection (1) 'foreign chargeable gains' has the meaning given by section 12(4)." (If the drafter had made this a TCGA-wide definition, s16ZB(5) would not have been necessary.)

13 Section 16ZB(6) TCGA provides (somewhat unnecessarily): "For the purposes of subsection (1)(c) foreign chargeable gains are remitted to the UK if they are regarded as so remitted for the purposes of section 12."

14 See 48.8.4 (Relevant tax year).

15 The drafter had adopted the clumsy drafting technique of s.2(4) TCGA which it is helpful to read first, in order to understand s.16ZB; see 48.6 (Disallowance of personal losses against s.87 gains).

### 48.10.1 *The adjusted taxable amount*

Section 16ZB(4) TCGA provides:

> "The adjusted taxable amount" is—
> (a) if section 3(1) (annual exempt amount) does not apply to the individual for the applicable tax year, the amount given by section 2(2) or (4)(b) as it has effect by virtue of subsection (2), and
> (b) otherwise, so much of that amount as exceeds the exempt amount for the applicable tax year (within the meaning of section 3).

In short, the adjusted taxable amount is the amount of gains less losses (and less the CGT annual exemption if available) apart from the postponed remitted gains.

So in short, if one makes the loss election:

(1) all losses (UK and foreign losses) are allowable against:
  (a) UK gains
  (b) foreign gains if
    (i) taxed on an arising basis (because no remittance basis claim is made in the year that the gains accrue); or
    (ii) promptly remitted gains (remitted in the year that the gains accrue).
(2) under s.16ZB postponed remitted gains do not qualify for:
  (a) *any* loss relief (either UK losses or foreign losses) or
  (b) the CGT annual exemption.

Section 16ZC TCGA relaxes the rule in (2)(a) by allowing some losses against postponed remitted gains:

> **16ZC Individual who has made election under section 16ZA and to whom remittance basis applies**
> (1) This section applies to an individual for a tax year if—
> (a) the individual has made an election under section 16ZA for the tax year or any earlier tax year,
> (b) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for the tax year, and
> (c) the individual is not domiciled in the UK in the tax year.

In short, the section applies to a remittance basis taxpayer who makes a loss election.

Section 16ZC continues:

> (2) The following steps apply for the purpose of calculating the amount on which the individual is to be charged to capital gains tax for the tax year.
> *Step 1* Deduct any relevant allowable losses from the chargeable gains referred to in subsection (3) in the order in which they appear there (starting with para (a) of that subsection).

"Relevant allowable losses" simply means allowable losses. (The drafter is overfond of the word "relevant".) Section 16ZC(7) TCGA provides:

> In this section "relevant allowable losses" means the allowable losses that section 2(2) provides may be deducted from chargeable gains accruing to the individual in the tax year, ...

48.10.2 *The loss deduction order*

This takes us to s.16ZC(3) TCGA which sets out the deduction order:

> The chargeable gains are—
> (a) foreign chargeable gains[16] accruing to the individual in the tax year, to the extent that they are remitted[17] to the UK in that year,
> (b) foreign chargeable gains accruing to the individual in that year, to the extent that they are not so remitted in that year, and
> (c) chargeable gains accruing to the individual in that year (other than foreign chargeable gains).[18]

So in my terminology, losses are set against gains in this order:
(a) promptly remitted gains;
(b) unremitted foreign gains;
(c) UK gains.

16 Section 16ZC(7) TCGA provides the standard definition: "In this section ... 'foreign chargeable gains' has the meaning given by section 12(4)".

17 Section 16ZC(6) TCGA provides (somewhat unnecessarily): "For the purposes of subsection (3) foreign chargeable gains are remitted to the UK if they are regarded as so remitted for the purposes of section 12."

18 For completeness, s.16ZC(5) TCGA provides: "Chargeable gains treated as accruing under s.12 are not within subsection (3)(c)" – though I do not see why it was necessary to say that – it seems clear in any event.

Losses set against (2) are not wasted but they are not used until the unremitted gains are remitted.

48.10.3 *Use of deductions*

Our journey takes us to Step 2:

> *Step 2* Treat the amount referred to in section 2(2) or (4)(a) or 16ZB(3)(a) as being equal to—
> (a) the amount it would be if there were no relevant allowable losses, minus
> (b) the total amount deducted under Step 1 from chargeable gains within subsection (3)(a) or (c).

For completeness, s.16ZC(4) TCGA provides:

> Chargeable gains treated as accruing under section 87 or 89(2) (read, where appropriate, with section 10A) are not within any paragraph of subsection (3).

This maintains the disallowance of personal losses against s.87 gains.[19] Section 16ZD TCGA provides:

> (1) This section applies if section 16ZC applies to an individual for a tax year.
> (2) Any allowable loss deducted under step 1 of section 16ZC(2) is to be regarded (for the purposes of section 2(2)(b)) as allowed as a deduction from chargeable gains accruing to the individual in the tax year.
> (3) If a deduction is made under step 1 of section 16ZC(2) from a foreign chargeable gain within section 16ZC(3)(b), the amount of the foreign chargeable gain is reduced by the amount deducted.

48.10.4 *Insufficient losses*

Step 1 continues:

19 See 48.6 (Disallowance of personal losses against s.87 gains).

> If allowable losses are deductible from the chargeable gains referred to in subsection (3)(b) but are not enough to exhaust them all—
> (a) those chargeable gains are to be ordered according to the day on which they accrued,
> (b) the losses are to be deducted from those gains in reverse chronological order (starting with the last chargeable gain to accrue), and
> (c) if allowable losses are deductible from chargeable gains that accrued on a particular day but are not enough to exhaust all of the chargeable gains that accrued on that day, the amount deducted from each of those chargeable gains is the appropriate proportion of the losses.
> In para (c) "the appropriate proportion", in relation to a chargeable gain, is the amount of that gain divided by the total amount of the chargeable gains that accrued on the day in question.

### 48.10.5 *Record-keeping*

The record-keeping from 2008 is extremely onerous. Before 2008 a taxpayer had only to keep a total of brought forward losses and remitted gains. But now (if a taxpayer makes a loss election) they need to keep track of which year losses accrue, and which day and year postponed remitted gains accrue, in order to apply these loss rules.

## 48.11 When is a loss election worthwhile?

Careful timing of realisation of losses and of remittances is necessary in order to maximise loss relief if a loss election is made. A few general points can be made.

A person who will realise UK losses and not foreign losses should not make a loss election.

A person who will realise UK losses and foreign losses, but can use inter spouse transfers to avoid disallowable foreign losses should not make an election.

A person who will realise foreign losses and not UK losses should make an election.

In other cases is it a matter of guesswork.

## 48.12 Inter-spouse transfer

Suppose a foreign domiciled individual ("H") owns a foreign situate asset which will give rise to a loss. It will often happen that:

(1) The loss on the disposal by H will not be allowable.

(2) If

(a) H gives the asset to H's spouse ("W") and

(b) W disposes of the asset

then W will realise an allowable loss (for instance W may not have made a remittance basis claim).

In principle, W can realise an allowable loss. However s.16A TCGA provides:

> (1) For the purposes of this Act, "allowable loss" does not include a loss accruing to a person if—
> (a) it accrues to the person directly or indirectly in consequence of, or otherwise in connection with, any arrangements, and
> (b) the main purpose, or one of the main purposes, of the arrangements is to secure a tax advantage...
> (3) For the purposes of subsection (1) it does not matter—
> (a) whether the loss accrues at a time when there are no chargeable gains from which it could otherwise have been deducted, or
> (b) whether the tax advantage is secured for the person to whom the loss accrues or for any other person.[20]

"Tax advantage" has the standard definition. Section 16A(2) TCGA provides:

> "tax advantage" means—
> (a) relief or increased relief from tax,
> (b) repayment or increased repayment of tax,
> (c) the avoidance or reduction of a charge to tax or an assessment to tax, or

20 What is the point of s.16A(3)(b) TCGA? How can a tax advantage be secured for any person *other* than the person to whom the loss accrues? The answer is if the loss accrues to a non-resident company or trustee, for the tax advantage might be enjoyed by a settlor (under s.86) or a beneficiary (under s.87) or a participator (under s.13). But this is not relevant to inter-spouse transfers.

> (d) the avoidance of a possible assessment to tax,
> and for the purposes of this definition "tax" means capital gains tax, corporation tax or income tax.

Looking at the words of the section, one would think that the position was as follows. An allowable loss is a relief and so a "tax advantage." So if one of the main purposes of an inter-spouse transfer is to obtain the loss, the loss is disallowed. Of course it depends on the precise facts whether that is actually a main purpose, but in many (I think, most) cases it would be so. HMRC rightly say in relation to identifying the main purpose:

> 16. Hence it will be relevant to draw a comparison in order to consider whether, in the absence of the tax considerations:
> • the transaction giving rise to the advantage would have taken place at all;
> • if so, whether the tax advantage would have been of the same amount; and
> • whether the transaction would have been made under the same terms and conditions.

It will very often be the case that the inter-spouse transfer is made only for tax reasons and would not be made in the absence of tax. However, HMRC say:

> 17. ... Nor will the new legislation *ordinarily* prevent a genuine loss on a real disposal of an asset from being set off against a person's own gains, including the case where, before the real disposal that gives rise to the genuine loss, the person acquires the relevant asset from a spouse or civil partner at no gain/no loss under section 58 [TCGA].[21]

---

21 "Avoidance of tax through the creation and use of capital losses: HMRC Guidance." This guidance passed through various drafts to versions of 21 March 2007 and the current guidance of 19 July 2007, accessible *www.hmrc.gov.uk/cgt/cgt-recent-developments.pdf* and reprinted (with variations) in the CG Manual Appendix 9. See too example 5:

"40. Mr H has shares in S plc which are standing at a loss. Mrs H has shares in a separate company, T plc, standing at a gain. Mr H transfers his shares to Mrs H under the no-gain, no-loss rule in section 58 TCGA, and she then sells both holdings of shares. The loss on the shares in S plc covers the gain arising from the shares in T plc, and so no CGT is payable by Mrs H.

41. Taking the spouses together, Mr and Mrs H each have shares which they want

> (Emphasis added)

According to this, s.16A does not apply to genuine losses, and the loss in the case under discussion is genuine.

The first question this raises is: what is meant by genuine loss and why is the spouse's loss genuine? At first the unlawyerlike term "genuine" seems almost impossible to pin down, but I suggest that the concept intended here is the tax avoidance/mitigation distinction.[22] A loss is genuine (in the intended sense) if it is in accordance with the intention of Parliament, a special tax regime, and has economic consequences. The inter-spouse transfer in principle meets those criteria. This view is confirmed by para 13 of the Guidance Note:

> The straightforward use of a statutory relief does not of itself bring arrangements within the TAAR.

The straightforward use of a statutory relief could obviously be and frequently is done with the purpose of obtaining a tax advantage, but it is

---

> to sell. What happens in fact is that they do sell their shares, and the economic consequence is that they realise a gain on one set of shares and a loss on the other set. To decide whether or not the TAAR applies, it is necessary to consider whether there have been arrangements, and whether a main purpose of those arrangements was the securing of a tax advantage. In this case, it seems clear that there have been arrangements, namely the transfer of the shares from Mr H to Mrs H. It is then necessary to look at what the main purpose of Mr and Mrs H in entering into these arrangements was. This can be determined only by looking at all the circumstances surrounding the arrangements. In the present example, Mr and Mrs H wanted to dispose of their shareholdings, and they did this in a straightforward way. They made use of the provisions of section 58 TCGA, which provides the opportunity for spouses (or civil partners) to bring together gains and losses, but again the straightforward use of a statutory relief in this way does not (of itself) bring arrangements within the TAAR. Moreover, the tax outcome of the transactions reflects the economic reality of Mr and Mrs H's situation. In all the circumstances, this suggests that there was no main purpose of achieving a tax advantage, and where there is no such main purpose the rule does not apply."

But the factual inference in the last sentence is implausible, for the reasons explained above.

22 See 29.17.3 ("Genuine").

not tax avoidance.[23]

The guidance at para 17 uses the word "ordinarily". When will it not apply? An example is if there is an arrangement under which the donee spouse immediately returns the proceeds of the disposal to the donor spouse. In that case the inter-spouse gift has no "economic consequences".

The next difficulty is to reconcile that guidance with the words of the statute. One might simply give up at this point:

> We think that the words "**tax avoidance**" should be substituted for "**tax advantage**"... the guidance contradicts the legislation. Some transactions (such as transfers between spouses) are stated in the guidance not to be caught by the TAAR,[24] when it is strongly arguable that they are caught.[25]

If that is right, then the decision whether or not to apply the legislation in relation to inter-spouse transfers (and indeed many other cases) is made by HMRC with no redress by the taxpayer (outside judicial review discussed below). However, it is suggested, having regard to *Pepper v Hart*, that the reference to "tax advantage" should be read to mean tax avoidance in the strict sense. The fact that the definition here is based on words which in other contexts have been understood differently[26] does not determine the issue.

The reader may wonder whether this discussion matters, given that

---

23 Para 5 of the Guidance Note issued on 27 March 2007 stated this expressly:
"5. The effect of the legislation will be to restrict the use of capital losses resulting from the arrangements where *tax avoidance* is the main purpose or one of the main purposes of the arrangements." But presumably HMRC noticed the inconsistency and the guidance note of 19 July 2007 was unhelpfully amended to read: "The legislation is intended to have effect where a person enters deliberately and knowingly into arrangements to gain a tax advantage."

24 A note on terminology. The label which HMRC give to anti-avoidance provisions of the s.16A type is *targeted* anti-avoidance rule ("**TAAR**"). This terminology was coined by HMRC and first used in a press release of 5 December 2005. The term has become so degraded that the Institute for Fiscal Studies can say without obvious irony that "TAARs need to be well targeted ... costs can outweigh the expected amount of lost revenues when a poorly targeted TAAR is compared with a well-targeted TAAR". The same report refers later to a "wide-ranging TAAR". Countering Tax Avoidance in the UK, TLRC discussion paper no.7, March 2009, para 8.18 accessible *www.ifs.org.uk/comms/dp7.pdf*.

25 Response of CIOT to consultation (8 February 2007).

26 See 29.14 (Consequence and Purpose).

HMRC have stated that they will not normally challenge the transfer of losses by inter-spouse transfers. On a constitutional level it matters to those who believe that tax should be based on law and not concession and discretion. On a practical level it matters if HMRC later decide to change their practice (which as the IR20 debacle shows is not a theoretical possibility) or if they choose to apply it inconsistently.

The IFS commentary deserves to be set out in full:

> 7.4 However, the width of this relatively simple provision [s.16A TCGA] meant that HMRC needed to publish 17 pages of detailed Explanatory Notes to explain how the legislation would be applied. So, considering the example of the person who sells shares standing at a loss in order to set the loss against a gain on another disposal, the Explanatory Notes explain that this transaction will not be prevented, albeit that the legislation could be used to prevent this.
> 7.5 There are several problems with this approach. First, the Explanatory Notes are not themselves subject to the scrutiny and care in drafting given to legislation. By their nature, Explanatory Notes are not drafted in the precise way required for legislation.
> 7.6 Second, HMRC does not have the power to legislate: taxation can only be imposed by the legislature[27] and while HMRC may decide upon its own interpretation of the legislation, that interpretation is not binding on taxpayers save to the extent confirmed by the courts. 'HMRC's role is to administer the UK's tax and customs systems.'
> 7.7 Third, the ability of taxpayers to rely on the guidance depends upon the type of transaction involved: if it is a single transaction entered into in reliance on specific guidance, the taxpayer can rely on the guidance (although enforcement may be cumbersome, for the reasons explained below). In contrast, if the taxpayer is seeking to rely on guidance in relation to a continuing state of affairs, the taxpayer is exposed to changes in that guidance. ...

### 48.12.1 *Is the HMRC guidance binding?*

The reader may regard these constitutional fundamentals as irrelevant to practice, but the IFS then turn to discuss the important issue of whether

27 [footnote original] Article 4 Bill of Rights 1689: ["That levying money for or to the use of the Crown by pretence of prerogative, without grant of Parliament, for longer time, or in other manner than the same is or shall be granted, is illegal."]

the guidance is enforceable:

> 7.8 To enforce guidance, the taxpayer must seek judicial review. Judicial review is a process that is costly and time consuming and which is not easily achieved. In order for a taxpayer to seek judicial review, an application for leave to apply for judicial review must be made within three months of the decision that is being challenged. The application is made to the High Court by a form setting out the grounds of the application and an affidavit setting out the factual background. Clearly, three months is an extremely short deadline even for the well-advised taxpayer. If the judge considers that the papers show an arguable case, leave to apply for judicial review is granted, but after this initial tight timescale matters may then move very slowly.
> 7.9 Consequently, a major drawback of judicial review at present is that it is effectively unavailable to most potential applicants: they do not know about it, cannot understand it, cannot afford it, or find the prospect of going to the High Court too daunting. This situation would be improved if the new Tribunals, which will handle tax appeals from 2009, have jurisdiction to review the exercise of discretionary acts by HMRC and review the application of HMRC guidance.[28]
> 7.10 In addition to the procedural and costs issues, the ability of taxpayers to use judicial review in the context of non-legislative rule-making is not always clear. It is beyond the scope of this paper to set out in detail the present state of the law with regard to the use of judicial review in relation to the exercise of powers by HMRC. However, certain points are addressed below, as the limits of challenge may be increasingly important as new ways of tackling avoidance are explored by the government.
> 7.11 In the context of this paper, the key issues limiting the ability to challenge by way of judicial review concern the application of judicial review to situations where HMRC has issued guidance to taxpayers generally regarding the application of legislation.
> 7.12 First, there are situations where HMRC guidance appears to differ from the conclusion that would be reached just by reading the legislation. An example of this arises in connection with the wide-ranging capital gains tax TAAR found in Section 16A TCGA 1992, where the legislation could be read to apply much more widely than HMRC maintains is the case in its Explanatory Notes. Where the HMRC treatment is recognised by HMRC as being a concession from

28 The hope that the new Tribunals will improve the position has not been realised.

the strict reading of the law, then there is the system of extra-statutory concessions. Even these raise issues of enforcement. The judiciary has frequently indicated that it is uncomfortable with the concessions system: for example, “One should be taxed by law and not be untaxed by concession”.[29]

7.13 That said, extra-statutory concessions have been upheld by the courts (although they are not enforceable in cases of avoidance). At the same time, the courts have decided that the power to grant them should only be exercised as part of HMRC’s duty of care and management. This was made clear in the case of *R (on the application of Wilkinson) v. IRC* where the Court of Appeal held that the Inland Revenue had no power to grant a concession to overrule an unequivocal piece of legislation unless this could be said to “facilitate the overall task of collecting taxes”. As a result of this case, the government announced that the power to make concessions from the strict application of tax law is not as wide as had previously been thought and consequently the concessions are being reviewed to determine those that are not within HMRC’s powers of “collection and management”. Section 160 of the Finance Act 2008 gives the Treasury power to make any existing concession statutory by order. In so doing, it defines an existing concession to include a statement of any sort – whether it is described as an extra-statutory concession, a statement of practice, an interpretation, a decision, a press release or in any other way – that provides a concession that a taxpayer would not, or may not, be entitled to under the law. This power of the Treasury only applies to existing concessions. Going forward, HMRC’s administrative powers have been limited by the Wilkinson case.

7.14 More difficulty is posed by statements made by HMRC that explain the legislation and are not considered by HMRC to deviate from the legislation. What if a taxpayer considers that HMRC’s guidance is wrong in law? The taxpayer could rely on making their argument through the courts, but that raises enormous cost issues and risk issues for the taxpayer. Alternatively, the taxpayer could seek judicial review on the basis that the HMRC treatment as shown by the guidance was “ultra vires”. However, in order to seek judicial review, the taxpayer also needs to show that they have sufficient interest in the matter to qualify them to make the application. These are high hurdles (albeit not impossible, as cases such as *R v Department of Social Security ex p.*

29 [Footnote original] Walton J in *Vestey v IRC (No. 2)* [1979] 3 WLR 915.

*Overdrive Credit Card Ltd*[30] show) and it must be asked whether many taxpayers would feel confident of passing these hurdles or be prepared to spend the money in order to do so. If the answer to that is that very few would, then effectively HMRC is legislating by default.
7.15 The other potential source of problems in HMRC guidance is the guidance changing. Usually, the reason given for a change in guidance is that HMRC has been advised that its guidance is wrong in law. Again, judicial review is potentially available, but the case of *R v C&E Commissioners ex parte F & I Services* held that while a taxpayer could rely on the legitimate expectation generated by guidance, that expectation is limited to circumstances where reliance has been placed on the changed statement. In that case, a VAT clearance for a voucher scheme was withdrawn following a change in view of the Customs and Excise as to the operation of the law. The taxpayer had incurred expense on the introduction of the scheme. It was stated by Lord Justice Sedley that "the law recognises no legitimate expectation that a public authority will act unlawfully. It is only where the expectation is of a particular exercise of managerial discretion that the court will begin to examine its legitimacy."[31]
7.16 Consequently, this paper maintains that the more tax rules are dealt with by way of non-legislative methods, the more exposed taxpayers become to these limited forms of redress. Government should only permit the increased use of non-legislative rule-making if the problems highlighted here are adequately tackled. ... [32]

Scope for judicial review is in my view even weaker than the IFS here suggest, for Guidance Note para 26 is intended to give HMRC freedom to disregard their own guidance note (or at least to give freedom to decide when it should or should not apply, which comes to the same thing):

> Examples of how the legislation will apply in particular circumstances are set out below. These examples are intended to show how different factors will be taken into consideration in deciding whether or not the TAAR applies in a given set of circumstances. They are not designed as templates for deciding whether a loss is or is not caught by the TAAR in any particular case.

32 Countering Tax Avoidance in the UK, TLRC discussion paper no.7, March 2009, accessible *www.ifs.org.uk/comms/dp7.pdf*.

Thus unless my view on the construction of s.16A TCGA is adopted, the guidance is for all practical purposes unjusticiable. The position is not so much that HMRC are above the law, but that there is no law, only discretion. The uncertainty caused by provisions such as s.16A (which apply to corporation tax as well as CGT) is a major factor which encouraged companies such as WPP, Shire, Regus, Henderson, Charter, Beazley, Brit Insurance and UBM to leave the UK for Ireland or Switzerland.[33] Nevertheless, HMRC regard the provision as "successful"[34] (which if the only measure of success is preventing avoidance it no doubt is). So the current position will continue until HMRC change their view that preventing tax avoidance is a priority that trumps other policy considerations such as certainty and the rule of law.

33 A majority of Main Survey respondents expressed exasperation with the complexity and unpredictability of current anti-avoidance rules, all but one asserting that this was a phenomenon hindering the competitiveness of the UK economy. Freedman et al, Alternative Approaches to Tax Risk and Tax Avoidance: analysis of a face-to-face corporate survey (September 2008) accessible *ideas.repec.org/p/btx/wpaper/0814.html*.

CHAPTER FORTY NINE

# FOREIGN CURRENCY ISSUES

## 49.1 Foreign currency issues – introduction

It is generally accepted that UK tax is assessed in sterling. For instance, the RDR Manual provides:

> **31190 Exchange Rates**
> All entries on the SA Return should be in pounds sterling.

Foreign currency must be translated into sterling. For this purpose it is obviously necessary to decide the date(s) on which the exchange rate is determined ("**the currency conversion date**").

HMRC have put their views in a technical note dated 12 October 2009 ("**the HMRC currency technical note**").

Once one has identified the currency conversion date, one needs to ascertain the exchange rate on that date. Exchange rates at 31 March and 31 December can be found on the HMRC website.[1] Daily rates can be found on commercial websites. These may use slightly different criteria, and disagree slightly among themselves, but I expect in practice any published rate would be acceptable.[2]

---

1 *www.hmrc.gov.uk/exrate*. This will not assist in the matters discussed in this chapter except for transactions which happen to occur on 31 March or 31 December.

2 The BI Manual provides:
"**39507. Exchange rate for tax purposes** [July 2009]
... Traders may use London closing rates (BIM39505) when translating foreign currency amounts into sterling in their accounts. Equally they may use other exchange rates, such as an exchange rate quoted by their bank, or the monthly average rates published by HMRC for VAT purposes. You only need to query the rate of exchange used if, exceptionally, it diverges markedly from rates obtained from reputable sources of this nature."
Similarly, the SAI Manual provides:

For life policies in foreign currency, see 30.3.5 (Computation of gains). For deeply discounted securities in foreign currency, see 34.3 (Securities denominated in foreign currency). For the (somewhat academic) IHT relief see 53.17 (Non-residents foreign currency bank accounts).

The position of UK resident companies is not considered.

## 49.2 CGT: Currency conversion date

There are two possible ways to compute the gain where an asset is purchased and sold in a foreign currency.

*Method 1*:

(a) Compute the gain using the foreign currency prices. For instance, suppose an asset is purchased for \$100 and sold for \$200; the gain is the \$ sale price less the \$ acquisition price = \$100;

(b) then convert that foreign currency gain to sterling at the date of disposal.

*Method 2*: Compute:

(a) The sale price converted to sterling at the rate on the date of disposal; less

(b) The acquisition cost converted to sterling at the rate on the date of acquisition.

---

"**4310. Special calculations: Foreign currency securities**

...Although the London closing rate should in strictness be used in all the above cases, figures of rates of exchange supplied by taxpayers or their agents should normally be accepted, provided that they come from a reputable source (for example, an exchange rate quoted by the taxpayer's bank for the day in question) and the basis is used consistently."

Similarly, International Manual provides:

"**162160. Rate of exchange to use** [January 2011]

... Any reasonable established basis of conversion which has previously been applied in any particular case may continue to be used in that case if the taxpayer agrees to its consistent application. If there is a dispute which cannot be resolved within the terms of the established practice, the general basis described above should be adopted."

Where the official rate of exchange is different, it is considered that one should use commercial (black market) rates; this view is adopted in the USA: *Cinelli v. Commissioner of Internal Revenue* (1974) 502 F2d 695 United States Court of Appeals, Sixth Circuit.

For CGT it is well settled that the second solution is correct. In *Bentley v Pike* 53 TC 590 the taxpayer inherited German property when it was worth DM132k, and later sold it for DM152k. She argued that the gain was the difference between the two Deutschmark values, ie DM30k, and the currency conversion date was the date of disposal. The Court held that the gain was the sterling equivalent of the DM proceeds (currency conversion date at the date of disposal) less the value of the property at the time of acquisition. This decision was upheld in *Capcount Trading v Evans* 65 TC 545 where the issue was argued more fully before the Court of Appeal. In short, the taxpayer acquired shares for $85m and sold them for $50m. The taxpayer argued that they made a loss of $35m. That was rejected. The gain was calculated as the value of the proceeds (converted into sterling at the date of disposal) less the acquisition cost (converted into sterling at the date(s) of acquisition).

The CG Manual provides:

> **25391 - Remittance basis: gains to be computed in Sterling** [April 2010]
> Sterling is the currency in which capital gains computations are carried out (see *Bentley v Pike,* (53 TC 590) and *Capcount Trading v Evans* (65 TC 545)). You should therefore carry out a computation of the gain arising on the disposal of the foreign assets in sterling. Where transactions take place in foreign currency you should convert each separate entry for the computation into sterling using the spot rate applying at the date that part of the transaction occurred.

This approach is used whether the gain is taxed on an arising or the remittance basis. The RDR Manual provides:

> **31190 Exchange Rates**
> *Foreign Chargeable Gains*
> Foreign chargeable gains are calculated using sterling translations at the date of acquisition and the date of disposal. So the consideration received will be translated into sterling using the exchange rate at the time of disposal and allowable deductions will be translated using the exchange rate(s) at the time the expenditure was incurred (for example, when the asset was acquired). Thus the gain will be denoted in pounds sterling and will be the same whether taxed on the arising or the remittance basis.
> If the gain is held as foreign currency, the taxable sterling amount of the gain will not change, but separate gains or losses may accrue if the

foreign currency gains or loses value with respect to sterling before the gain is remitted.

## 49.3 Trading income and property income

The position for trading income is governed by SP 2/02 (not discussed here).

Property income is computed on the accountancy principles, just like trading income, so the same practice ought to apply.

## 49.4 Income taxed on arising basis: currency conversion date

The RDR Manual 31190 provides:

> **31190 Exchange Rates**
> *Foreign Income*
> Foreign income taxed on the arising basis is converted to pounds sterling at the exchange rate applicable on the day that it arose overseas.

This is not controversial. HMRC accept the use of the average rate for a tax year where income arises regularly through the year.[3]

## 49.5 Sterling income converted to foreign currency

The HMRC currency technical note provides:

> 6. Income that is regarded as 'foreign income' may be received offshore in sterling. It may later be converted into a foreign currency, for example if paid into a non-sterling account. In such cases the amount of a remittance basis user's foreign taxable income will be the amount actually due and originally received in sterling. It is of no relevance whether the eventual 'taxable remittance' that is, or that is derived from, that income is made in a foreign currency or is converted back into sterling before being remitted.

This is not controversial.

3 Private correspondence.

## 49.6 Income taxed on remittance basis: currency conversion date

Where income is taxed on the remittance basis, there are two possible views:

(1) The currency conversion date is the date of remittance. I refer to this as "**the HMRC view**".

(2) The currency conversion date is the date that the income arises. I refer to this as "**the practitioners view**" since it is adopted by the ICAEW and the great majority of practitioners.

### 49.6.1 *HMRC view*

The RDR Manual 31190 provides:

> **31190 Exchange Rates**
> *Foreign Income*
> ... Foreign income taxed on the remittance basis ... is subject to UK tax only when it is remitted to the UK. This remitted income should be translated into sterling at the exchange rate prevailing on the date of remittance.

The Manual gives a straightforward example.[4]

Similarly, the EI Manual provides:

> **40033: General earnings taxable when remitted to the UK** [December 2008]
> For earnings that are taxable when remitted to the UK the conversion should be made at the date they were remitted.

### 49.6.2 *Basis for HMRC view*

The HMRC currency technical note sets out HMRC's arguments in

4 "*Example (remittance) - Christophe*
C is a remittance basis user and has €8,000 income paid into his French bank account in June 2011 when the exchange rate is €0.705 to the pound, the equivalent of £5,642. He remits all €8,000 of this foreign income on 1 May 2013 when the exchange rate was €0.681.
He uses this 1 May exchange rate to convert this amount, giving a remitted amount of foreign income of £5,453; this is the amount he is taxed on."

support of the view that the currency conversion date is the date of remittance and not the date of receipt.

> 5. [1] Remittance basis users may receive income offshore in a foreign currency.
> [2] Such foreign income and earnings which are chargeable to tax on the remittance basis only become chargeable to UK tax when they are remitted to the UK. The remittance to the UK is the event that triggers the UK tax charge.
> [3] It is only at this point that it is necessary to ascertain the taxable amount (in sterling) remitted to the UK that is taxable as foreign income.
> [4] It follows that it is the date on which that amount is treated as remitted to the UK that the translation to sterling should occur.

Para 5[2] is not correct in relation to RFI. RFI is chargeable whether or not remitted, though the amount of the charge is limited to what is remitted.[5] The same applies for RFE. It is arguable that chargeable gains are only chargeable on remittance but HMRC do not say that gains are converted at the date of remittance

Para 5[3] is correct but [4] does not follow from it. For CGT it is likewise only necessary to ascertain the taxable amount when there is a remittance but no-one suggests that gains are converted at the date of remittance.

The HMRC technical note contains a lengthy discussion of case law, but there are no cases which address the issue, and analogies from CGT and IT cases in other contexts are not decisive. HMRC say:

> 15. There is little case law that addresses this point directly. Some early case law from the 1920s and 1930s deals with the taxation of companies and whether foreign exchange gains or losses should be regarded as capital or investment items, or form part of the company's trade. It is possible to draw only tentative principles from this, especially as in many cases the issue of arising or remittance basis was not in point.
> 16. The 1933 case of *Magraw v Lewis* (18 TC 222) concerned a pension of 229 South African pounds, paid to a UK resident, which had been awarded by the Government of the Union of South Africa and was paid by them through the High Commissioner of the Union Government in London. At the time such foreign income was chargeable when received in the UK. The case concerned

5 See 9.12 (Nature of charge on remitted RFI).

certain deductions made by the SA Government from the pension, but during the case the issue of how much should be taxed in British pound sterling was raised. In Magraw, the *pension was actually paid to the appellant in the UK in sterling,* so the exchange issue was a little different.[6] In the course of his judgement at the High Court Finlay J said, at page 225,

> What happened was this. The Appellant was paid a particular sum in UK pounds and by reason of the state of the exchange, the amount which he was paid in UK pounds was larger-a greater number of pounds-than the pension awarded to him in South Africa reckoned in South African pounds.
>
> He says that he ought not to pay Income Tax upon the amount which he has received in this country. I am bound to say that in regard to that the law appears to be as plain as in the other case...It is clear that the Income Tax authorities can have regard only to what is paid. What is paid is a pension of a particular amount in UK pounds, £268 I think it is -but the exact amount does not matter- that is paid to the Appellant.
>
> That is what he has to pay tax upon, and he has to pay on that in the appropriate number of pounds in British currency. As I say, about that point there does not appear to be any legal difficulty-indeed, I do not think there is any legal difficulty about either point...I cannot myself see that any one, even a layman, could conceive that there was any grievance when he gets a particular income in UK pounds, in paying tax in UK pounds at the appropriate rate upon that income.

17. In *Thomson v Moyse* 39 TC, whilst addressing a point about whether a remittance required a transmission from abroad, at the House of Lords Lord Reid said at p329 (bold emphasis added)

> Before considering these authorities, I think it well to see what the effect would be if this view were right. I take a case which no one has ever even suggested would not be within the scope of these provisions - the case of a bank acting as a collecting agent. If a customer hands to an English bank for collection a cheque drawn on a foreign bank, the English bank will send the cheque abroad for collection and, when notified that the money has been collected, it will give to the customer in this country the equivalent in sterling **at the current rate of exchange.**

18. References to other case law have been made to HMRC with regard to this issue.

*Bentley v Pike* [1981] STC 360 and *Capcount Trading v Evans* [1993] STC 11 - these concern Capital Gains Tax on chargeable gains accruing on the disposal of an asset, and therefore have no bearing on the issue of overseas income. They state that where there is an acquisition and disposal in a foreign currency the taxable capital gain is calculated by deducting the sterling value of the acquisition at the time of acquisition from the sterling value of the sale proceeds at the time of sale.

*Pattison v Marine Midland* 57 TC 219 related to tax on trading profits and the

6 [Author's note] Since the pension was paid in sterling, the exchange issue did not arise at all.

House of Lords upheld the decision of the Court of Appeal rejecting HMRC's contention that, with respect to a loan made by a company, the difference in sterling terms between the value of the dollars at the time of the loan and the time of the repayment represented a taxable trading profit of the company.
In *Capcount* the Court of Appeal specifically distinguished *Marine Midland* on the basis that it was concerned with trading profits whereas *Capcount* was concerned with capital gains. Nolan LJ states:

> "Against that background I do not find it surprising that, in the case of trading companies operating abroad the commercial accounting procedures which, it seems, commonly result in the profit being first computed in the particular overseas currency and then translated into sterling for tax purposes should be adopted and accepted by the Revenue...the income tax legislation, unlike the capital gains tax legislation, is not generally concerned with the measurement of a gain or loss on a single disposal but with a balance at the year end and computed on accounting principles."

19. The calculation of gains arising on non-sterling acquisitions and/or disposals in sterling is different from the calculation of the amount of taxable income in sterling; it is clear from *Bentley v Pike* that the sterling translation must be made using the exchange rate in force at the dates of the transaction (i.e. date of acquisition for acquisition cost, and disposal for disposal proceeds) and the calculation completed in sterling. This is understandable for CG calculation purposes, as CG is fundamentally a transaction-based tax.
20. Apart from the £2,000 threshold (see below), this note only concerns remittances of foreign income. *Bentley* and *Capcount* concern capital gains, not income, and are therefore not relevant. *Marine Midland* supports the approach taken by HMRC in the guidance. *Marine Midland* concerned trading profits rather than income but an individual's income is more on a par with the profits of a business than with capital gains because neither an individual's income nor the profits of a business require individual disposals. Consequently, there is no conflict between the principles established in *Marine Midland* and HMRC's position on the treatment of an individual's income.

For completeness, the HMRC currency technical note also states:

7. In all cases HMRC will tax the individual's foreign income as income; the question is simply what sterling value to give that income, and more importantly, when is it necessary to calculate that value. HMRC will never tax an amount greater than the income received; for example, if $50,000 US dollars are received then only $50,000 US dollars will ever be subject to tax - that is, the sterling equivalent of that $50,000 for income tax purposes at the time at which the UK tax liability occurs.
8. For a remittance basis user whose foreign income is received offshore in, say, dollars, there is no requirement to value the dollars twice (that is on date of receipt offshore and on the date an amount becomes taxable by virtue of being remitted to the UK). In other words, for income tax purposes, in order to tax the income received in dollars the conversion into sterling should only be made

> once, namely on the occasion that the income comes into charge...
> 12. This approach is in the remittance basis user's favour. This is because, whether the exchange rate on the date the income arises or the date it is remitted is used to translate the foreign income into sterling, there has to be consistency between the two - it has to be one or the other. An individual has an element of control over the date of remittance and can choose to remit income when the exchange rate is in his favour or not to remit income when the exchange rate is not in his favour. An individual does not generally have similar control over the date on which foreign income arises.

These are not arguments, or at least not arguments to be taken seriously.

### 49.6.3 *Currency conversion date: the correct view*

Since there is no statutory guidance and no clear guidance from the case law, the right answer is that which best suits the scheme of the provisions. It is considered that the correct view (which I have called "the practitioners view") is that the currency conversion date is the time the income arises not the date of remittance.

The HMRC view gives rise to many anomalies. Firstly, contrast the arising basis where the currency conversion date is the date income arises. Secondly, contrast the CGT remittance basis where the currency conversion date is (in short) when the gain arises. The anomaly is more striking when one bears in mind that some offshore income gains are computed on CGT principles but subject to income tax on remittance. Thirdly, contrast the IT remittance basis where income is received in sterling and immediately converted into a foreign currency.[7] Fourthly, contrast tax credits in a foreign currency where the currency conversion date is the date the income arises, or near that date.[8]

The next set of problems arises on the HMRC view if a remittance basis taxpayer receives foreign currency income and converts it into another asset, rather than paying it directly into a bank account. Suppose T receives income in euros and converts the euros into sterling and remits the sterling.

(1) Does T adopt the euro rate at the time of conversion into sterling?

---

7 The HMRC view assumes that one always knows what currency income is received, but in the case of deemed income that is not the case, and in the case of trading income it may depends on the arbitrary choice or accounting practice.

8 See 49.10 (Tax credit relief: currency conversion date).

Then tax depends on administrative acts such as how the receipt is dealt with.

(2) Does T then adopt the euro rate at the time of remittance? That would be absurd and also gives rise to this further problem: Suppose T receives equal amounts of (a) foreign interest in euros and (b) foreign interest in sterling; T converts the euros to sterling and pays all the interest into one foreign sterling account, and later remits one half of the account to the UK. If one converts at the time of remittance T needs to decide whether T has remitted the sterling or the (formerly) euro interest. The answer is far from clear. On the practitioners view of course no problem arises.

Section 731 raises further problems on the HMRC view. If relevant income arises in a foreign currency, when does one convert that to sterling? If one converts at the time the income arises there is a further anomaly between s.731 and ordinary income. If one converts at the time there is a benefit, then a currency conversion may have to be done every time a benefit is conferred, which is unworkable.

### 49.6.4 *Problems arising when foreign currency depreciates against sterling*

HMRC say that their view (currency conversion date is the date of remittance) produces the right result where foreign currency depreciates against sterling, whereas the practitioners view causes an additional tax charge for taxpayers which they are concerned to avoid. The technical note provides:

> 13. ... Compare two taxpayers: Mr A is taxed on the arising basic. Mrs R on the remittance basis. Both receive RFE:
>
> *Exchange rates:*
>
> 1 May Year 1 $1 = £1.20.
> 1 May Year 2 $1 = £1.10.
> 1 May Year 3 $1 = £1.50
>
> Mr A and Mrs R receive $100,000 on 1 May in Year 1.
>
> Mr A will have to pay tax on £120,000 in Year 1. Whether he brings the $100,000 in to the UK on 1 May in Year 1 when it is worth £120,000, or on 1 May in Year 2 when it is worth £110,000, or on 1 May in Year 3, when it is worth £150,000, has no impact on Mr A's income tax liabilities.
>
> If Mrs R, on the other hand, translates her foreign income into sterling on 1 May Year 1 she will, on [the practitioners view], be said to have taxable RFE of £120,000.
>
> • In Year 2, she could remit every one of the $100,000 dollars received, which would translate only to £110,000 and yet still pay tax on £120,000 - which would

> appear that we are taxing an additional $9090,[9] or we are applying a tax rate of c.43.5%.
> 14. ...Theoretically, given large fluctuations in currency exchange rates, or with changes in higher tax rates, a situation could arise in which the tax due is actually more than the monies the individual actually receives in the UK ...

It is indeed unfair for a remittance basis taxpayer to be taxed on a sum larger than the sum which they remits to the UK. But this observation does not much support the HMRC view. First, this is in the HMRC view the position in relation to CGT. For CGT, HMRC appear to have no compunction in taxing a larger amount than remitted. In the HMRC view "a situation could arise in which the tax due is actually more than the monies the individual actually receives in the UK."

The RDR Manual provides an example where the essential facts[10] are as follows:

> **35030 Conditions A and B - remittances derived from foreign income or gains**
> *Example 4 (Marianne)*
> M used £25,000 of her foreign chargeable gains to purchase a car.
> M kept the car outside the UK.
> M later brings the car to the UK. The market resale value of the car is then £14,000.

The HMRC analysis is as follows:

> The amount remitted is still £25,000, that being the amount equal to the chargeable gains from which the property – the car – derived.

If - which is open to doubt - the HMRC CGT analysis is right, there is (on the practitioners view) a consistent unfairness and on the HMRC view an

---

9 The correct figure appears to be $10,000.

10 The example in full (including its irrelevant detail) is as follows:
In example 1 above, Marianne, a remittance basis user, used £25,000 of her foreign chargeable gains to purchase a car. The car is regarded as derived from foreign income and gains.
Instead of bringing it straight to the UK, Marianne kept the car at her Italian villa for use on her visits to Italy. A few years later she then decides to bring the car to the UK for her and her daughter to use. At this time the approximate market resale value of the car is £14,000.

anomalous distinction between CGT and IT.

More fundamentally, HMRC have overlooked the mixed fund rules. The remittance is a transfer from a mixed fund, and s.809Q(3) ITA defines the extent to which such a remittance is to be regarded as income or capital. The rule is that such a remittance is to be regarded as income first, not income *and* capital gain. Further, under the mixed fund rule, the amount of the remittance does not exceed the value of the sum remitted.

The most serious set of problems with the HMRC view concern the interaction between IT and CGT, to which I now turn.

## 49.7 IT/CGT interaction - remittance from foreign currency bank account

Suppose:

(1) T (a remittance basis taxpayer) receives foreign currency income, say FC100, at a time when the exchange rate is FC1 = £1.

(2) T remits all the income when the exchange rate is (say) FC1 = £2.

On the practitioners view (currency conversion date is that of receipt) the interaction with CGT causes no difficulty. The remittance consists of £100 income and on the remittance (assuming there is a disposal) there is a remitted chargeable gain of £100.

On the HMRC view, considerable difficulties arise. It is necessary to consider separately

(1) the original HMRC view

(2) the revised HMRC view of the position before 16 December 2009

(3) the position after 16 December 2009

### 49.7.1 *Original HMRC view*

The RDR Manual (1st and 2nd editions) note took the view that there was a double charge to tax on the remittance:

(1) Income tax was charged on £200 (value of the currency when remitted); *and*

(2) CGT was taxed on the gain on the remittance. The gain was computed as the disposal proceeds (£200) less the acquisition cost (£100) = £100.

This had never been suggested before the publication of the RDR Manual, and (though the point would have been the same before the 2008 reforms) I doubt if anyone in the history of taxation ever put in a tax return on that basis.

### 49.7.2 *Revised HMRC view: position until 16 December 2009*

The HMRC currency technical note sought to defend its original view.[11] However HMRC announced a radical change of position on 16 December 2009:

> ... HMRC now accepts that section 37 TCGA applies in this situation to exclude from the calculation of the capital gain or loss arising on disposal (or part-disposal) of the FCBA [foreign currency bank account] the whole of, or the relevant part of, the withdrawal that is taxable as remitted income.[12]

HMRC continue:

> The exclusion of consideration from the capital gains computation under section 37 can[13] produce an anomalous result.
> By way of illustration, suppose the individual paid salary in foreign currency of FC20,000 into a FCBA abroad at a time when FC1.00 = £0.50.
> For CGT purposes, the cost of acquiring the FCBA is £10,000.
> In the next tax year he transfers the whole FC20,000 to the UK at a time when FC1.00 = £0.60, receiving a credit of £12,000 in his UK sterling bank account.

The HMRC analysis is as follows:

---

11 "10. For capital gains tax purposes, the gains/losses on disposals of foreign currency and debits from foreign currency bank accounts occur simply because foreign currency and non-sterling debts with banks are chargeable assets (s21(1)(b) and s252 TCGA). For this reason, when funds are withdrawn from a non-sterling bank account, there is a disposal (or part-disposal) of an asset (that is, the debt owed by the bank). This does not preclude the withdrawn funds having the character of the income originally credited to the account. For example, if a non-domiciled remittance basis user was paid his salary (consisting totally of his relevant foreign earnings) of £25,000 into his Jersey account he might immediately purchase a painting with that £25,000 to decorate his Jersey holiday home. At that point it is clear that the untaxed income is both 'within' the painting and that the individual holds an asset as well. So it is with bank debts receivable: they are simply assets acquired using income and in which the character of the original income can clearly be discerned."

12 Accessible *www.hmrc.gov.uk/cnr/fcba-technical-note.pdf.*

13 [Author's note]. "Can" is inapt as the result on the HMRC revised view will always be anomalous.

> For income tax purposes the taxable amount is £12,000 (the value of FC20,000 at the time of remittance).
> For CGT purposes the computation is as follows:
>
> | | |
> |---|---|
> | Consideration for disposal of the FCBA | £12,000 |
> | Less exclusion under section 37 TCGA | £12,000 |
> | | nil |
> | Acquisition cost | £10,000 |
> | Loss | £10,000 |
>
> This loss for CGT purposes is excessive, because the individual has incurred no real loss in these circumstances. It arises because the TCGA rules adjust the consideration for the disposal of the FCBA, but there is no requirement to remove the relevant income element from the allowable cost of the FCBA. The loss is an arithmetical anomaly.[14]

The consequence of the revised HMRC view is as absurd as the original view, though under-taxation (through an artificial loss) has replaced double taxation, so taxpayers may be content.

### 49.7.3 *Does s.37 apply on remittance from FCBA?*

The revised HMRC view is based on the premise that s.37 TCGA applies

14 The passage identifies another anomaly:
"Where a remittance comprises only part of the funds in the FCBA, so there is only a part-disposal of the account, a second anomaly arises. The normal rule for apportioning the allowable cost of the asset between the part disposed of and the remainder (the familiar A/(A + B) formula in section 42 TCGA) is distorted by the exclusion of the taxable income from the consideration for the disposal (the A element of the formula). The consequence is that the cost attributable to the remainder under the A/(A + B) formula is greater than the amount that is proportionate to the size of the remainder.
By way of illustration of this second anomaly, where (say) 40% of the FCBA is remitted to the UK and that 40% is wholly taxable as a remittance of income, the consideration for the disposal is reduced by section 37 TCGA to nil, as in the example above. As the A element of the A/(A + B) formula is nil, the result is that the whole of the cost of the account is attributed to the remainder of the account, whereas under a properly proportionate formula only 60% of the total allowable cost should be attributed."
This is not a separate anomaly but simply a working through of the first anomaly, but nothing turns on that.

where income is remitted from a foreign currency bank account.

Section 37(1) TCGA provides:

> There shall be excluded from the consideration for a disposal of assets taken into account in the computation of the gain any money or money's worth
> [a] charged to income tax as income of, or
> [b] taken into account as a receipt in computing income or profits or gains or losses of,
> the person making the disposal for the purposes of the Income Tax Acts.

Section 37 TCGA does *not* apply. The proceeds of the disposal of the bank account are not "charged to tax as income" (any more than if the receipt had been taxed on the arising basis).[15] RFI is chargeable whether or not remitted, though the amount of the charge is limited to what is remitted.

### 49.7.4 *HMRC view from 16 December 2009: Sch 8A TCGA*

From 16 December 2009 it is necessary to consider sch 8A TCGA (introduced by the F(no.1)A 2010). The key concepts in the legislation are "the s.37 amount" and its counterpart, "the unreduced amount".

In order to see the definition of "the s.37 amount" we need to read the whole of para 1(1) sch 8A TCGA:

> This Schedule applies where—
> (a) an individual makes a disposal of a debt to which section 252(1) applies ("the relevant disposal"),

That is, a disposal of a foreign currency bank account. Para 1(1) continues:

> (b) the debt ("the section 252 debt") is not situated in the UK, and

That is, a disposal of a foreign bank account. Para 1(1) continues:

---

15 See 9.12 (Nature of charge on remitted RFI).

(c) money or money's worth which is remitted foreign income[16] ("**the section 37 amount**") is excluded under section 37 from the consideration for the relevant disposal.

On (what I call) the practitioners view none of the consideration is excluded under s.37 and the s.37 amount is nil. On the HMRC view, the s.37 amount is the amount subject to income tax (applying the currency conversion date at the date of remittance).

Para 4 Sch 8A TCGA provides a commonsense definition of "the unreduced consideration":

> "the unreduced consideration" means the consideration for the relevant disposal ignoring the exclusion of the section 37 amount.

On the practitioners view the actual consideration always equals the unreduced consideration as the s.37 amount is nil.

We can now turn to the rules in para 2 and 3. (To anticipate, it will in due course appear that on the practitioners view these provisions will have no effect.)

> *Section 37 operates to exclude the whole consideration*
> 2 (1) This paragraph applies where the section 37 amount constitutes the whole of the unreduced consideration.
> (2) If the relevant disposal is a part disposal of the section 252 debt, section 42 applies as if the reference in subsection (2)(a) of that section to the consideration for the disposal were a reference to the unreduced consideration for the disposal.
> (3) Any loss accruing to the individual on the relevant disposal is not an allowable loss.
> *Section 37 operates to exclude part of the consideration*
> 3 (1) This paragraph applies where the section 37 amount constitutes part of the unreduced consideration.
> (2) For the purposes of this Act the relevant disposal is to be treated as if it were—
> (a) a disposal of so much of the section 252 debt as is represented by the

16 Para 1(2) provides a commonsense definition of "remitted foreign income":
"For this purpose 'remitted foreign income' means income of the individual which is chargeable to income tax on the alternative basis of charge set out in Chapter A1 of Part 14 of ITA 2007 (remittance basis)."

section 37 proportion of the sum mentioned in sub-paragraph (3) ("debt A"), and

(b) a separate disposal of so much of the section 252 debt as is represented by the remainder of that sum ("debt B").

(3) That sum is—

(a) if the relevant disposal is a disposal of the whole of the section 252 debt, the sum referred to in section 252(1), and

(b) if the relevant disposal is a part disposal of that debt, the proportion of the sum referred to in section 252(1) to which that part disposal relates.

(4) Sub-paragraphs (5) to (9) apply for the purposes of—

(a) the computation of the gain accruing on the disposals under sub-paragraph (2), and

(b) the application of Chapter 3 of Part 2 of this Act in relation to the part of the debt (if any) which remains undisposed of.

(5) The consideration for the disposal (before any exclusion under section 37) is—

(a) in the case of debt A, the section 37 amount, and

(b) in the case of debt B, the remainder of the unreduced consideration.

(6) If the relevant disposal is not a part disposal of the section 252 debt—

(a) the section 37 proportion of the debt costs and the disposal costs is to be attributed to debt A, and

(b) the remaining debt costs and disposal costs are to be attributed to debt B.

(7) Sub-paragraphs (8) and (9) apply if the relevant disposal is a part disposal of the section 252 debt.

(8) Section 42(2) applies as if it provided for the debt costs to be apportioned between debt A, debt B and the remainder of the section 252 debt in the proportions which those parts of the section 252 debt bear to one another.

(9) The section 37 proportion of the disposal costs is to be attributed to debt A and the remaining disposal costs are to be attributed to debt B.

(10) Any loss accruing to the individual on the disposal of debt A is not an allowable loss.

Para 4 provides some definitions:

In this Schedule—

"debt costs" means the sums which under section 38(1)(a) and (b) are attributable to the section 252 debt;

"disposal costs" means the costs within section 38(1)(c) in relation to the

relevant disposal;
"the section 252 debt", "the relevant disposal" and "the section 37 amount" are to be construed in accordance with paragraph 1;
"the section 37 proportion" means the proportion of the unreduced consideration which constitutes the section 37 amount;

HMRC explain these rules as follows:[17]

**Proposed changes to the TCGA rules**
For disposals on or after 16 December 2009, where the disposal is a withdrawal of funds from a FCBA that comprises in whole or in part an amount that is liable to tax as remitted income, the gain or loss arising will be calculated using the following steps:

- Identify the part of the withdrawal that is taxable as remitted income and, accordingly, excluded from the consideration for the disposal by virtue of section 37 TCGA ('the section 37 amount').
- Then proceed under A or B below, depending on whether the amount remitted is wholly or partially the section 37 amount.

***A – Remittance is wholly the section 37 amount***

a. Where the section 37 amount is the whole of the balance on the account, so there is a full disposal of the account, the loss arising on the disposal will not be an allowable loss for CGT purposes.
b. Where the section 37 amount is only part of the account, so there is a part-disposal of the account, disapply the normal part-disposal formula in section 42 TCGA.
    - Instead, apportion the allowable cost of the account between the part disposed of and the remainder in proportion to the amounts withdrawn and retained, and compute the loss on the part disposed of accordingly (so that section 37 reduces the consideration to Nil but the proportionate cost is deducted).
    - The loss arising on the disposal will not be an allowable loss for CGT purposes.

***B – Remittance is partially the section 37 amount***

a. Treat the disposal as, in effect, two disposals, one comprising the section 37 amount and the other comprising the rest of the remittance.
b. Where the two disposals are of the whole of the balance on the

17 Capital Gains Tax: Gains and Losses on Foreign Currency Bank Accounts held by Remittance Basis Users, accessible *www.hmrc.gov.uk/cnr/fcba-technical-note.pdf.* This is referred to in EN F(No.1)A 2010.

account, so there is altogether a full disposal of the account:

- Apportion the allowable cost of the account between the two disposals in proportion to the sums comprised in each disposal (disregarding the exclusion of the section 37 amount from the consideration for one of the disposals) and compute the gain or loss on each disposal accordingly.
- The loss arising on the disposal related to the section 37 amount will not be an allowable loss for CGT purposes (this is bound to be a loss because the effect of section 37 is to reduce the consideration to Nil but the proportionate cost is deducted).
- The gain or loss arising on the other disposal will be chargeable or allowable in the normal way.

c. Where the two disposals together comprise only part of the account, so that there is a part-disposal of the account:
   - Disapply the normal part-disposal formula in section 42 TCGA.
   - Instead, apportion the allowable cost of the account between the two disposals and the remainder in proportion to the sums comprised in each disposal (disregarding the exclusion of the section 37 amount from the consideration for one of the disposals) and the balance remaining in the account and compute the gain or loss on each disposal accordingly.
   - The loss arising on the disposal related to the section 37 amount will not be an allowable loss for CGT purposes (this is bound to be a loss because the effect of section 37 is to reduce the consideration to Nil but the proportionate cost is deducted).
   - The gain or loss arising on the other disposal will be chargeable or allowable in the normal way.

**Examples**

The following examples illustrate how the new rules will work.

*Example 1 – Remittance wholly income, whole account remitted (sterling depreciates)*

Account contains foreign currency (FC) 20,000, cost £10,000. FC 20,000 is remitted at a time when its value is £12,000. The entire remittance is chargeable to income tax.

There is no split between a section 37 amount and another amount because section 37 applies to the whole remittance.

| | |
|---|---|
| Gross consideration | £12,000 |
| Less section 37 adjustment | £12,000 |
| Net consideration | Nil |
| Allowable expenditure | £10,000 |
| Loss | (£10,000) |

Loss of £10,000 is not an allowable loss.

*Example 2 – Remittance partly income, whole account remitted (sterling depreciates)*

Account contains FC 20,000, cost £10,000. FC 20,000 is remitted at a time when its value is £12,000. FC 12,000 of the remittance, with a value of £7,200, is chargeable to income tax.

The section 37 amount is £7,200 (representing FC 12,000). The non-section 37 amount is £4,800 (representing FC 8,000).

Expenditure is allocated pro-rata:

| | |
|---|---|
| To the section 37 amount, 12/20 × £10,000 | = £6,000 |
| To non-section 37 amount, 8/20 × £10,000 | = £4,000 |

The section 37 amount computation:

| | |
|---|---|
| Gross consideration | £7,200 |
| Less section 37 adjustment | £7,200 |
| Net consideration | Nil |
| Expenditure | £6,000 |
| Loss | (£6,000) |

Loss of £6,000 is not an allowable loss.

Non-S37 amount computation:

| | |
|---|---|
| Consideration | £4,800 |
| Allowable expenditure | £4,000 |
| Chargeable gain | £800 |

The chargeable gain £800 is liable to CGT in the normal way.

*Example 3 – Remittance wholly income, whole account remitted (sterling appreciates)*

Account contains FC 30,000, cost £30,000. FC 30,000 is remitted when its value is £27,000. The entire remittance is chargeable to income tax.

There is no split between a section 37 amount and another amount because section 37 applies to the whole remittance.

| | |
|---|---|
| Gross consideration | £27,000 |
| Less section 37 adjustment | £27,000 |
| Net consideration | Nil |
| Expenditure | £30,000 |

| | |
|---|---|
| Loss | (£30,000) |

Loss of £30,000 is not an allowable loss.

*Example 4 – Remittance partly income, whole account remitted (sterling appreciates)*

Account contains FC 30,000, cost £30,000. FC 30,000 is remitted when its value is £27,000, of which FC 20,000, with a value of £18,000, is chargeable to income tax.

The section 37 amount is £18,000 (representing FC 20,000). Non-section 37 amount is £9,000 (representing FC 10,000).

Expenditure is allocated pro rata:

| | |
|---|---|
| To the section 37 amount 20/30 × £30,000 | = £20,000 |
| To non-section 37 amount 10/30 × £30,000 | = £10,000 |

The section 37 amount computation:

| | |
|---|---|
| Gross consideration | £18,000 |
| Less section 37 adjustment | £18,000 |
| Net consideration | Nil |
| Allocated expenditure | £20,000 |
| Loss | (£20,000) |

Loss of £20,000 is not an allowable loss.

Non-section 37 amount computation:

| | |
|---|---|
| Consideration | £ 9,000 |
| Allowable expenditure | £10,000 |
| Loss | (£ 1,000) |

Loss of £1,000 is allowable in the normal way.

*Example 5 – Remittance wholly income, part account remitted (sterling depreciates)*

Account contains FC 80,000, cost £60,000. FC 30,000 is remitted when its value is £30,000. The entire remittance is chargeable to income tax.

There is no split between a section 37 amount and another amount because section 37 applies to the whole remittance.

The part-disposal A/(A+B) formula does not apply. Instead, expenditure is allocated pro-rata:

| | |
|---|---|
| To the section 37 amount, 30/80 × £60,000 | = £22,500 |
| To the remainder, 50/80 × £60,000 | = £37,500 |

The section 37 amount computation:

| | |
|---|---|
| Gross consideration | £30,000 |
| Less section 37 adjustment | £30,000 |
| Net consideration | Nil |
| Expenditure | £22,500 |
| Loss | (£22,500) |

Loss of £22,500 is not an allowable loss.

The allowable expenditure remaining for the balance of the bank account is £37,500, apportioned as above.

*Example 6 – Remittance wholly income, part account remitted (sterling appreciates)*

Account contains FC 50,000, cost £40,000. FC 30,000 is remitted when its value is £18,000. The entire remittance is chargeable to income tax.

There is no split between a section 37 amount and another amount because section 37 applies to the whole remittance.

The part-disposal A/(A+B) formula does not apply. Instead, expenditure is allocated pro-rata:

| | |
|---|---|
| To the section 37 amount, 30/50 × £40,000 | = £24,000 |
| To the remainder, 20/50 × £40,000 | = £16,000 |

The section 37 amount computation:

| | |
|---|---|
| Gross consideration | £18,000 |
| Less section 37 adjustment | £18,000 |
| Net consideration | Nil |
| Expenditure | £24,000 |
| Loss | (£24,000) |

Loss of £24,000 is not an allowable loss.

The allowable expenditure remaining for the balance of the bank account is £16,000, apportioned as above.

*Example 7 – Remittance partly income, part account remitted (sterling*

*depreciates)*
Account contains FC 200,000, cost £160,000. FC 120,000 is remitted when its value is £120,000, of which FC 20,000, with a value £20,000, is chargeable to income tax.

The remittance is split between a section 37 amount of £20,000 (representing FC 20,000) and a non-section 37 amount of £100,000 (representing FC 100,000).

The part-disposal A/(A+B) formula does not apply. Instead, expenditure is allocated pro-rata:

| | |
|---|---|
| To the section 37 amount, 20/200 × £160,000 | = £16,000 |
| To the non-section 37 amount, 100/200 × £160,000 | = £80,000 |
| To the remainder, 80/200 × £160,000 | = £64,000 |

The section 37 amount computation:

| | |
|---|---|
| Gross consideration | £20,000 |
| Less section 37 adjustment | £20,000 |
| Net consideration | Nil |
| Expenditure | £16,000 |
| Loss | (£16,000) |

Loss of £16,000 is not an allowable loss.

Non-section 37 amount computation:

| | |
|---|---|
| Consideration | £100,000 |
| Allowable expenditure | £80,000 |
| Chargeable gain | £20,000 |

Total chargeable gain £20,000.

The allowable expenditure remaining for the balance of the bank account is £64,000, apportioned as above.

*Example 8 – Remittance partly income, part account remitted (sterling appreciates)*
Account contains FC 50,000, cost £35,000. FC 15,000 is remitted when its value is £9,000, of which FC 5,000, with a value of £3,000, is chargeable to income tax.

The remittance is split between a section 37 amount of £3,000 (representing FC 5,000) and a non-section 37 amount of £6,000 (representing FC 10,000).

The part-disposal A/(A+B) formula does not apply. Instead, expenditure is allocated pro-rata:

| | |
|---|---|
| To the section 37 amount 5/50 × £35,000 | = £ 3,500 |
| To the non-section 37 amount 10/50 × £35,000 | = £ 7,000 |
| To the remainder 35/50 × £35,000 | = £24,500 |

The section 37 amount computation:

| | |
|---|---|
| Gross consideration | £3,000 |
| Less section 37 adjustment | £3,000 |
| Net consideration | Nil |
| Expenditure | £3,500 |
| Loss | (£ 500) |

Loss of £500 is not an allowable loss.

Non-section 37 amount computation:

| | |
|---|---|
| Consideration | £6,000 |
| Allowable expenditure | £7,000 |
| Loss | (£1,000) |

Loss of £1,000 is allowable in the normal way.

The allowable expenditure remaining for the balance of the bank account is £24,500, apportioned as above.

### 49.7.5 *Commentary: how did we get into this mess?*

The reader who has followed the text to here will probably agree with the author that this is a simply appalling mess. How it could have been allowed to arise? Like most disasters, there are multiple causes. First HMRC's mistaken (though longstanding) view on the currency conversion date. Secondly HMRC's mistaken (and recent) change of view on s.37. Thirdly, HMRC's refusal to expose to the test of public scrutiny the technical advice that said to have been received from Counsel on the currency conversion date (and perhaps - who knows? - on the s.37 issue). Fourthly, HMRC's contemptuous dismissal of the concerns raised by the ICAEW and other professional bodies and refusal to contemplate even the possibility that they may be right and the HMRC view wrong. Fifthly, rushed announcement of proposals (taking effect from the date of their announcement) to counteract the pro-taxpayer anomalies arising from the HMRC revised s.37 view. Sixthly, the rushed enactment of the same without a pause which would have required the above to be defended in Parliament. Seventhly, the disregard for practicalities and failure to consider whether the law as enacted is one that can reasonably be complied with. Eighthly the failure to look at the position more broadly and ask what the law in this area ought to be. (Even if the HMRC view were right on the currency conversion date and the s.37 issue, the reform of sch 8A was the wrong way to proceed. I suggest that anyone who seeks to defend it should be given three (not exceptionally complex) sets of bank statements in three currencies, say 100 sheets overall, with (say) 30 entries on each sheet, and invited to carry out the computations which would be necessary.)

For what could be done to improve the law, see 49.18 (Commentary: Solution to foreign currency problems). The procedural changes to avoid such problems happening again in other areas require significant cultural shifts in the Treasury and HMRC in favour of transparency and consultation with professional bodies. It will be interesting to see whether the coalition government will succeed in bringing this about.

## 49.8 Sub-£2k taxpayer: currency conversion date

### 49.8.1 *HMRC practice: 2008/09*

The 1st edition of the RDR Manual (published 31 March 2009) provided:

> For the purposes of determining whether the amount of an individual's foreign income which is 'not remitted' in a tax year is below £2,000 they obviously cannot apply [what HMRC regard as] the usual principle for remittance basis users of using the exchange rate at time of remittance. So, and only for the purposes of deciding whether ITA07/s809D applies, the individual's foreign income amounts should be converted to pounds sterling at the rate of exchange prevailing *on the date that the unremitted income arose.* Foreign gains are always calculated in pounds sterling.

Thus the currency conversion date was the date the income or gains arose. The Manual continued with a practical concession on computing that rate. The concession (in short) allowed an average annual exchange rate:

> However, where income credits are frequent throughout the year, you can accept calculations where the individual has chosen to convert their income using the average, or ‘mean’ rate of exchange for the tax year in question. The amount of unremitted income arrived at using this method must not differ greatly from an amount which would be arrived at using ‘spot’ rates, for example in times of high exchange rate volatility. If adopted, this method must be used consistently in future tax years for income from this source.
> This applies only to unremitted income (not gains) which is received in frequent instalments throughout the tax year and where a ‘spot rate’ calculation would be an excessive undertaking, for example bank interest received daily or weekly.

The practice only applied for the purposes of the £2k test:

> Note - If any of this foreign income is later remitted to the UK, it will be liable to UK tax at that point. The rate of exchange that should be used when declaring the remittance is the actual rate of exchange on the date of remittance into the UK. This will mean that the same foreign income may be converted at different exchange rates, depending on the reason for the conversion.

The 2nd edition of the RDR Manual announced that HMRC changed their mind, but the old view is still allowed for 2008/09:

> **31190 Exchange Rates**
> ... HMRC revised its practice regarding the calculation of ‘unremitted foreign income’ in guidance August 2009. For tax year 2008-09 this manual and other published guidance advised that for the purposes of ITA07/s809D only, foreign income should be converted to pounds sterling at the rate of exchange prevailing on the date that the unremitted income arose. It also allowed that, where income credits were frequent throughout the year, the individual could convert their income using the average, or ‘mean’ rate of exchange for the tax year in question. This is no longer the practice, but individuals wishing to use the remittance basis under ITA07/s809D may continue to follow the previous guidance to determine whether they are ‘below the £2,000 threshold’ for tax year 2008-09 only, if they so wish.

Thus in 2008/09, a taxpayer has a choice over the currency conversion date:

(1) the time that the income arises (with an option to use the year's average exchange rate); or
(2) 5th April 2009.

### 49.8.2 *HMRC view from 2009/10*

The RDR Manual now provides:

> **31190 Exchange Rates**
> *Remittance basis users below the "£2,000 threshold"*
> ... For the purposes of determining whether the amount of an individual's foreign income which is "not remitted" in a tax year is below £2,000 they obviously cannot apply [what HMRC regard as] the usual principle for remittance basis users of using the exchange rate at time of remittance. Instead the balance of the unremitted foreign income is converted to pounds sterling *at the rate of exchange prevailing on the date last day of the tax year.*
> ITA07/s809D(2) provides that the amount of an individual's "unremitted" foreign income and gains for a tax year is-
> (a) the total amount of what would (if this section applied) be the individual's foreign income and gains for that year, minus
> (b) the total amount of those income and gains that are remitted to the UK in that year.
> So the above formula may be carried out in the foreign currency, looking at total income received and total income remitted, per currency, during the tax year. The balance which is left is the "unremitted foreign income". This is translated into sterling using the exchange on the last day of the tax year (5 April) to ascertain whether the 'unremitted foreign income' is below the £2,000 limit.

Thus the currency conversion date is that on 5th April of each year. I refer to this as "**the 5 April conversion view**". This practice only applied for the purposes of the £2k test and only for income, not for gains:

> This practice applies for the purposes of deciding whether ITA07/s809D applies ONLY. All of the individual's foreign income amounts for a tax year must be taken into account.
> *Example: Michaela*
> M received foreign income on 10 April of $5,000 when the exchange rate was (£1=$2).

> She remitted \$1,500 to the UK on 15 May when the exchange rate was £1=\$1.50 She will pay tax on the sterling amount of £1,000.
> At the end of the tax year, M's 'unremitted foreign income' will be calculated using the exchange rate at the end of the tax year, which is £1=\$1.80.
> This is calculated as follows:
>
> | | |
> |---|---|
> | Total foreign income and gains for that year | \$5,000 |
> | less | |
> | Amount of that foreign income remitted during year | (\$1,500) |
> | Unremitted foreign income | \$3,500 |
>
> If the exchange rate at the end of the year was £1=\$1.50 then the \$3,500 unremitted foreign income would be £2,333, which is above the threshold. ...

The HMRC currency technical note provides the reason for the 5 April conversion view:

> 29. On further consideration of the wording of s809D, HMRC took the view that for foreign income, this calculation can only be made on the last day of the tax year, as that is the only date an individual's total and unremitted foreign income for a tax year can be ascertained. Consequently the foreign currency should be translated into sterling on that date also, for both the total foreign income and the remitted foreign income for the purposes of s.809D only.
> 30. Although UK income tax is charged on sterling amounts, it does not follow that the calculations to get to an income threshold such as this in s809D necessarily have to be made in sterling. Consequently the formula of deducting the remitted income from the total income can be carried out in the foreign currency on the last day of the tax year and then the balance which is left namely the "unremitted foreign income" can be translated into sterling on that date to ascertain whether it is below the £2,000 limit.

Thus the basis for the 5 April conversion view is the (erroneous) HMRC view that the currency conversion date for remitted income is the date of remittance. If the practitioners view is accepted, that the currency conversion date is the date that the income arises, s.809D does not raise any problem, as obviously the same approach should apply there also.

## 49.9 Nominated income and gains: currency conversion date

The RDR Manual provides:

> **31190 Exchange Rates**
> *Nominated income and gains*
> Nominated income and gains are charged to UK tax on the arising basis... This means that any foreign income that is nominated for the purpose of the Remittance Basis Charge is converted to pounds sterling at the exchange rate that applied on the date the income arose.
> Foreign chargeable gains are always calculated in pounds sterling at the rate of exchange that applied on the date the gain is realised.

The Manual gives a straightforward example.[18]

## 49.10 Tax credit relief: currency conversion date

International Manual provides:

> **162160. Rate of exchange to use** [January 2011]
> For the purpose of computing tax credit relief, foreign tax, payable directly or by deduction, should be converted into sterling at the rate of exchange obtaining on the date when the foreign tax for which credit is to be allowed becomes payable.
> *In practice*
> a. Offices need not make enquiries in all cases in order to establish the precise date on which the foreign tax became payable under the foreign country's laws. Where the date is not known, the date of payment of the tax can normally be taken as the payable date. Where the foreign tax has been deducted at source from income, for example, from dividends, interest or royalties, the payable date will normally be the same date as the date on which the income is paid. If, however, the taxpayer objects, or a substantial amount of tax is involved, the actual payable date should be determined. In many cases the date can be obtained from the demand note, provided that there has been no appeal against the foreign charge. If any difficulty arises in determining the payable date, in a case where such date is material, or if the taxpayer objects to this basis, the case should be submitted to the Offshore Personal Tax Team (part of Charity, Assets & Residence) in the case of individuals and to Business

18 "*Example (Francoise)*
F is a non-domiciled individual who is subject to the Remittance Basis Charge. She decides to nominate €20,000 of foreign income. The exchange rate on the date the income arose was €0.744 to the pound. She uses this rate to calculate the equivalent nominated amount of foreign income in sterling, which is £14,880."

> International, Outward Investment Team in all other cases...

The Manual does not distinguish between an arising basis taxpayer and a remittance basis taxpayer. So on the HMRC view, the currency conversion date for remitted income is the date of remittance, but the currency conversion date for the tax credit on the same income is the date that the tax was paid, which may not even be close. That is yet another anomaly arising from the HMRC view that the currency conversion date is the date of remittance.

## 49.11 Foreign currency bank accounts: CGT

The legislation deals separately with foreign currency bank accounts and foreign currency not in a bank account (notes and coins). But bank accounts are the usual way to hold money, so that is the more important area.

A bank account is a debt, and a chargeable gain does not usually arise from a debt. Section 251 TCGA provides:

> Where a person incurs a debt to another, whether in sterling or in some other currency, no chargeable gain shall accrue to that (that is the original) creditor or his personal representative or legatee on a disposal of the debt...

However this relief is disapplied for foreign currency bank accounts.[19] Section 252(1) TCGA provides:

> Subject to subsection (2) below,[20] section 251(1) shall not apply to a debt owed by a bank which is not in sterling and which is represented by a sum standing to the credit of a person in an account in the bank.

This rule applies to all bank accounts whether in the UK or not. However

19 Another exception concerns a debt on a security but that is not relevant to bank accounts.

20 This relates to the personal expenditure exemption, see 49.16 (Foreign currency for personal expenditure).

it only applies to FC bank accounts.[21]

For sterling bank accounts, the general rule is that no chargeable gain can arise. Of course, no chargeable gain or loss would normally arise from a sterling account in any case, so the relief is somewhat theoretical.

## 49.12 Meaning of "disposal" of bank account

Since CGT is charged on a disposal of a bank account (and certain other debts) we need to know the meaning of "disposal". Section 251(2) TCGA provides:

> Subject to the provisions of sections 132, 135 and 136[22] and subject to subsection (1) above, the satisfaction of a debt or part of it (including a debt on a security as defined in section 132) shall be treated as a disposal of the debt or of that part by the creditor made at the time when the debt or that part is satisfied.

The CG Manual sets out the basic principle:

> **78330. Foreign currency bank accounts** [April 2010]
> When foreign currency is deposited in a bank account there is, for CGT purposes, a disposal of the currency for its sterling value at that time. ... each withdrawal from the currency account is a (part) disposal of the debt for the sterling value of the currency obtained.

### 49.12.1 *Transfer between accounts: SP 10/84 concession*

SP 10/84 provides:

> **Foreign bank accounts**
> 1. At present [ie before 1984], under TCGA 1992 s 252(1), direct transfers from one foreign[23] bank account to another are treated as a

21 The CG Manual 78330 formerly provided: "Foreign currency certificates of deposit in bearer form are not within TCGA 1992, s.252." The passage was deleted in April 2010. One is left to speculate as to whether HMRC have changed their view. The issue would require an examination of the nature of certificates of deposit.

22 These exceptions are not relevant here.

23 The same applies to UK bank accounts if not denominated in sterling: perhaps the author assumes that all UK bank accounts are sterling accounts.

disposal and an acquisition of assets for CGT purposes.

This is correct if the transfer is from one bank to another.

If the transfer is from one account to another at the same bank, the question is whether the two accounts constitute two separate assets or one single asset. This will depend on the bank documentation but it is suggested that they should normally be regarded as a single asset. A bank (as a matter of banking law, assuming English law principles apply) owes only a single debt to a customer even if the customer has two accounts. If two accounts at the same bank were separate assets, a routine sweep facility between a deposit account and a current account would result in a regular series of disposals, which would be surprising.

SP 10/84 provides a concession:

> 2. Except in relation to an account to which TCGA 1992 s 275(l) applies (accounts held by non-domiciled individuals), a taxpayer may treat all bank accounts in his name containing a particular foreign currency as one account and disregard direct transfers among such accounts for CGT purposes. This practice once adopted must be applied to all future direct transfers among bank accounts in that taxpayer's name containing that particular foreign currency until such time as all debt represented in the bank accounts has been repaid to the taxpayer.

Although labelled a statement of practice, this is obviously a concession[24] and I refer to it as "**the SP 10/84 concession**".

### 49.12.2 *Transfer between accounts by foreign domiciliary: extended SP 10/84 concession*

The SP 10/84 concession does not apply "in relation to an account to which TCGA 1992 s 275(l) applies". This is a reference to what is now s.275(1)(l) which provides:

> a debt which—
> (i) is owed by a bank, and
> (ii) is not in sterling, and

24 HMRC agree: they describe it as a "non-statutory practice" in their comments on the extended concession, below.

> (iii) is represented by a sum standing to the credit of an account in the bank of an individual who is not domiciled in the UK,
>
> is situated in the UK if and only if that individual is resident in the UK and the branch or other place of business of the bank at which the account is maintained is itself situated in the UK.[25]

Thus the SP 10/84 concession does not apply to a foreign bank account of a UK resident foreign domiciliary, though it does apply to a UK bank account of a UK resident foreign domiciliary. (The SP could have been more lucidly expressed, but there it is.)

The SP 10/84 concession does apply to non-resident trusts (important for s.87 purposes) because the s.275(1)(l) exception only concerns individuals.

HMRC say:

> It has been suggested that this non-statutory practice [the SP 10/84 concession] should be extended to include overseas bank accounts held by individuals who are not domiciled in the UK. Our initial analysis has shown that such a change would be outside HMRC's administrative discretion, and would therefore require primary legislation...[26]

HMRC sensibly did not attempt to explain why the SP 10/84 concession was outside their discretion for foreign domiciliaries when it could be applied for everyone else. But on 27 January 2010 HMRC announced that the change shown to be impossible in December turned out to be possible after all:

> **Extension of the SP10/84 practice**
>
> An individual who is not domiciled in the UK may treat all bank accounts which:
>
> - are in his name
> - are in a particular foreign currency
> - are not situated in the UK for the purposes of the Taxation of Chargeable Gains Act 1992 and are therefore not within the scope of SP10/84
>
> as one account and disregard direct transfers among such accounts for capital gains purposes.

25 See 71.12 (Bank account).

26 Statement published online 9 Dec 2009 *www.hmrc.gov.uk/cnr/remittance-basis.htm*.

> Once adopted this practice must be applied to all future direct transfers among such bank accounts in that taxpayer's name containing that particular currency.
>
> **Comments on the extended practice, and examples**
>
> A non-UK domiciled individual with FCBAs in a particular currency both in the UK and overseas may treat all the UK accounts as one 'aggregated' account and all the overseas accounts as a second, distinct, 'aggregated' account.

I refer to this as "**the extended SP 10/84 concession**". HMRC continue:

> A direct transfer from an overseas account to a UK account, or vice versa, even if in the same currency, will not be disregarded for capital gains purposes and the individual will need to consider whether a computation of his or her capital gain or loss will be necessary in order to make a correct tax return.

There is still a difference between a UK domiciliary (governed by the original SP 10/84 concession) and a foreign domiciliary (governed by the extended SP 10/84 concession). A UK domiciliary may transfer from a foreign account to a UK account (or vice versa) without a disposal. A foreign domiciliary may not do so. This is so whether or not the individual is a remittance basis taxpayer. The reason for this anomaly is not clear and HMRC did not consider it necessary to offer an explanation. The discrimination against foreign domiciliaries (who are caught by this rule whether or not they claim the remittance basis) is contrary to EU law.

HMRC give three examples:

> **Example 1**
>
> Peter is UK domiciled and resident in the UK and has a Euro-denominated bank account in London and two Euro-denominated bank accounts in Paris and Munich. Under SP10/84 Paul has been, and will remain, able to treat all three accounts as a single account and disregard direct transfers between them for capital gains tax purposes. Paul is unaffected by the changes described in this note.
>
> **Example 2**
>
> Peter is domiciled in Germany but is resident in the UK. He has two Euro accounts in London and two in Berlin. Until now Peter has been able to treat the two UK-based accounts as a single account, but the German accounts had to be treated as separate assets in their own right. Under the [extended SP 10/84 concession], Peter will continue to treat

> his two UK-based accounts as one account but, from 6 April 2008, may treat his two non-UK accounts as a different single account so that direct transfers between the German Euro accounts will be disregarded. However, transfers from either German account to one of the London accounts, or to any other account not denominated in Euros, will be a disposal for capital gains tax purposes.
>
> **Example 3**
>
> Mary is domiciled in Poland but is resident in the UK and has the following bank accounts:
>
> • Euro accounts in London, Manchester, Paris and Krakow
>
> • US Dollar accounts in London, Seattle, Philadelphia, Zurich and St Helier (Channel Islands)
>
> Until now Mary has been able to treat the two UK-based Euro accounts as a single account. Under the [extended SP 10/84 concession], she is able to treat each of the following groups of accounts a single account and to disregard direct transfers between accounts within each group for capital gains tax purposes:
>
> • The London and Manchester Euro accounts
>
> • The Paris and Krakow Euro accounts
>
> • The US Dollar accounts in Seattle, Philadelphia, Zurich and St Helier (but not the account in London)
>
> Transfers between accounts in different groups (for instance between the London and Paris Euro accounts, or between the Paris Euro account and the Zurich Dollar account) will be disposals for capital gains tax purposes.[27]

HMRC do not specify a commencement date for the extended SP 10/84 concession. It appears from example 2 above that they envisage it taking effect from 2008/09, which is logical though the announcement came too late for those putting in tax returns in that year.

## 49.13 Share matching rules or part disposal rules?

### 49.13.1 *Outline of share matching rules*

Sections 104-106A TCGA provide a set of rules known as "**share matching rules**".[28] A constant series of amendments over the years has

---

27 Accessible *www.hmrc.gov.uk/cnr/cgt-transfers-fc.htm*.

28 A note on terminology. The statutory term is "share pooling" but "share matching" is a more accurate label.

resulted in scrappy drafting. A full discussion of these rules needs a short book to itself. Fortunately an outline will suffice for the purposes of this chapter and EN FB 2008 provides one. Before 2008/09:

> These rules apply when "fungible assets" (identical assets which cannot therefore be readily separately identified, such as shares of the same class in a company) are disposed of. Where someone disposes of some of their shares (or similar fungible assets), which they have acquired at different times and at different prices, the rules are necessary to determine what expenditure is allowed...
> To apply the existing [pre-2008] rules, it is potentially necessary to identify fungible assets disposed of with assets acquired in the following order:
> • assets acquired on the date of disposal;
> • assets acquired in the 30 days following the date of disposal (this is an anti-avoidance provision, intended to prevent "bed and breakfasting", under which people disposed of assets and reacquired them within the next few days, to realise losses or to realise gains to utilise their annual exempt amount while still, in effect, holding the assets);
> • assets acquired between 6 April 1998 and the date of disposal, on a "last in, first out" (LIFO) basis;
> • assets acquired between 1 April 1982 and 5 April 1998 (these assets are treated as a single asset, known as a "section 104 holding");
> • assets acquired between 7 April 1965 and 31 March 1982 (also treated as a single asset, a "1982 holding"); and
> • assets held at 6 April 1965, on a LIFO basis.

From 2008/09:

> 68. The abolition of the kink test, indexation allowance, and taper relief provides the opportunity to simplify these rules considerably. The single "section 104 holding" can in future include all fungible assets acquired before the date of disposal, and the order of matching can be reduced to:
> • assets acquired on the date of disposal;
> • assets acquired in the 30 days following the date of disposal; and
> • assets in the enlarged section 104 holding.

### 49.13.2 *The statutory provisions in outline*

In outline, s.104(1) TCGA provides the basic rule:

> Any number of securities of the same class acquired by the same person in the same capacity shall for the purposes of this Act (subject to express provision to the contrary) be regarded as indistinguishable parts of a single asset growing or diminishing on the occasions on which additional securities of the same class are acquired or some of the securities of that class are disposed of. ...

Section 105(1) TCGA provides the same day rule:

> Paragraphs (a) and (b) below shall apply where securities of the same class are acquired or disposed of by the same person on the same day and in the same capacity—
> (a) all the securities so acquired shall be treated as acquired by a single transaction and all the securities so disposed of shall be treated as disposed of by a single transaction, and
> (b) all the securities so acquired shall, so far as their quantity does not exceed that of the securities so disposed of, be identified with those securities.

Section 106A(5) TCGA provides the 30 day rule:

> Subject to subsection (4) above, if within the period of thirty days after the disposal the person making it acquires securities of the same class, the securities disposed of shall be identified—
> (a) with securities acquired by him within that period, rather than with other securities; and
> (b) with securities acquired at an earlier time within that period, rather than with securities acquired at a later time within that period.

### 49.13.3 *Do the share matching rules apply to foreign currency bank accounts?*

A bank account is not a "security" but the word here is given an artificially wide meaning. Section 104(3) TCGA provides:

> For the purposes of this section and sections 105, 107, 110 and 114 ... "securities" does not include relevant securities as defined in section 108 but, subject to that, means—
> (i) shares or securities of a company; and
> (ii) any other assets where they are of a nature to be dealt in without identifying the particular assets disposed of or acquired;...

The same definition is incorporated into s.106 and 106A TCGA by reference: see s.106A(10) TCGA. I refer to "securities" within the definition of s.104(3) as "**s.104(3) securities**" to distinguish them from "securities" in the usual sense of the word.

CG Manual before April 2010 stated clearly (and in some places still states) that the share matching rules apply to foreign bank accounts, ie a bank account was regarded as a s.104(3) security. The Manual provides:

> **78332. Identification of disposals with acquisitions** [April 2010]
> The debt represented by a credit balance in a bank account is a single asset for chargeable gains purposes. [*See CG50500+ for further advice on the pooling rules generally*]...

The words in italics were deleted in April 2010. However in the discussion of the share matching rules, the CG Manual still provides:

> **50220. Meaning of 'security' and 'securities'** [April 2010]
> '*Security' for the purposes of share identification rules*
> ... The definition in TCGA 1992, Section 104(3) includes the word that it is seeking to define. The reason for this is that the share identification rules are intended to apply to all fungible assets such as shares, securities *and foreign currency*.[29]

HMRC now say:

> **Calculation of gains and losses: share matching and part disposal rules**
> The Residence, Domicile and Remittances Manual (RDRM) was published on the HMRC website in August 2010 and includes some guidance on foreign currency bank accounts. The simplified examples in the RDRM used the part disposal rules in section 42 TGCA 1992 to calculate gains and losses arising from withdrawals from such accounts. *Although both lead to the same result mathematically,* concerns have been expressed that this is contrary to HMRC guidance at paragraph

29 Similarly CG Manual para 78316 [April 2010]: "Foreign currency [in the context this means foreign currency bank accounts as well as foreign currency notes and coins] is subject to the same rules of identification and pooling as unquoted shares and securities."

> CG78332 of the Capital Gains Manual which suggests that these gains and losses should be calculated on the basis of the share matching rules in Chapter 4 Part 1 TCGA 1992 (section 104 onwards).

It is not the case that the share matching rules and part disposal rules lead to the same result mathematically (if they did why have two sets of rules?). It is true to say that the post-2008 rules will quite often lead to the same result.

> The basis of the view expressed in the RDRM is that a debt represented by a credit in an individual's bank account is a single asset, rather than a series of fungible assets. Therefore any withdrawal of part of the funds in a bank account will be a part disposal of a single asset to which the share matching rules cannot apply. However, the guidance at CG78332 is not wholly explicit on this point and has given rise to possible misinterpretation.

The guidance at CG78332 was in fact clear though the author did not like what it said. The statement discloses a certain lack of candour (a less charitable commentator would use a stronger expression) but there it is.

> HMRC are currently in the process of revising this guidance to remove any ambiguity on this point.
> In the meantime, HMRC will not insist that any tax computations of gains and losses arising from movements between foreign currency bank accounts which were carried out for years up to and including 2007-08 using the share matching rules need to be revisited. However, the part disposal rules should be followed from 2008-09 onwards, unless that is not a practical proposition, for instance, because IT systems were in place to calculate gains and losses using the share matching rules. In such cases the change to using part-disposal rules should be made from 2009-10.

Presumably no-one seriously expects 2008/09 computations (which would have been made by the time of the HMRC statement) to be revised. Incidentally, the author at this point has (rightly) forgotten the earlier comment that the share matching rules and part disposal rules lead to the same result mathematically.

> In any case, where it is necessary to use share matching rules for 2008-09, the rules must be the revised ones introduced in Finance Act

> 2008. Continuing to use the old LIFO (last in, first out) and other rules that ceased to apply for disposals after 5 April 2008 will not be acceptable.[30]

Is the current HMRC view (part disposal rules rather than share matching rules) correct? The question is whether the asset is a s.104(3) "security" ie whether the asset is "of a nature to be dealt in without identifying the particular assets disposed of or acquired". Foreign currency not in a bank account (notes and coins) are certainly s.104(3) securities though it would be relatively unusual for that to matter. But HMRC are strictly right to change their mind and argue that a bank account is not a s.104(3) security.[31]

In favour of the former HMRC view, it could be said that bank accounts raise the same problems as fungible assets, and it is appropriate that the share matching rules should be construed loosely so as to encompass them. Before 2008, the rules also provided a much more practical way of dealing with the problems raised by foreign currency bank accounts though that largely ceased to be the case after the 2008 reforms; see below.

The applicable rule is therefore the part disposal rule in s.42 TCGA which provides:

> (1) Where a person disposes of an interest or right in or over an asset, and generally wherever on the disposal of an asset any description of property derived from that asset remains undisposed of, the sums which under paragraphs (a) and (b) of section 38(1) are attributable to the asset shall, both for the purposes of the computation of the gain accruing on the disposal and for the purpose of applying this Part in relation to the property which remains undisposed of, be apportioned.
> (2) The apportionment shall be made by reference—
> (a) to the amount or value of the consideration for the disposal on the

30 Statement first published online 9 Dec 2009 *www.hmrc.gov.uk/cnr/remittance-basis.htm*.

31 If a bank account were a security, it would be "securities of the same class". This expression is partly defined in s.104(3)
"shares or securities of a company shall not be treated as being of the same class unless they are so treated by the practice of a recognised stock exchange or would be so treated if dealt with on a recognised stock exchange."
A bank account (if a s.104(3) security) is probably a security of a company since a bank will be a company.

one hand (call that amount or value A), and

(b) to the market value of the property which remains undisposed of on the other hand (call that market value B),

and accordingly the fraction of the said sums allowable as a deduction in the computation of the gain accruing on the disposal shall be

A÷(A+B)

and the remainder shall be attributed to the property which remains undisposed of....

## 49.14 Concessions for bank account computations in practice

The operation of the CGT rules strictly requires a computation (generally very complex) for every withdrawal from a bank account. This is obviously unworkable, and in the past HMRC took a realistic approach. CG Manual para 25420 provided that any reasonable guess would do:

> ***Practical Approach***
> *Where there have been a large number of transactions in a bank account and sums have been traced through a number of investments and/or transfers between bank accounts it may[!] be very difficult to carry out the analysis necessary to arrive at the correct figure for assessment. Because of this you may adopt any method suggested by, or acceptable to, the taxpayer which seems likely to produce a reasonable approximation to the liability which would result from the strict application of the rules.*

In the 7th edition of this work I referred to this passage and said:

> This passage was quietly deleted 31 March 2009, but one hopes that HMRC practice has not changed.

That hope was not fulfilled but HMRC have responded to pressure from the ICAEW by issuing or revising some limited concessions.

### 49.14.1 *Annual accounting*

The CG Manual sometimes allows the option of annual accounting:

> **78316 Identification of disposals with acquisitions** [April 2010]
> ...If the taxpayer agrees, you may adopt a simplified method for

> computing gains or losses on currency[32] acquired and disposed of in the course of buying and selling overseas investments. You may treat all disposals of any one currency, or 'class' of currency, in the year of assessment or accounting period as a single disposal. You should compute the gain or loss by reference to the average price of the pool from which the currency derived.

Thus annual accounting is allowed for purchases and sales of investments.

### 49.14.2 *Monthly accounting*

Formerly, the CG Manual sometimes allowed the option of monthly accounting:

> ***CG78333 - Currency: identification of disposals with acquisitions***
> *There are often large numbers of transactions on bank accounts. ... Provided the practice is followed consistently and produces a reasonable overall result, you may accept that a net figure for deposits and withdrawals be computed for each calendar month or part month within a tax year or accounting period. To find the acquisition costs and disposal proceeds, each monthly deposit or withdrawal thus computed should be converted into sterling at the average rate of exchange for the month; any reasonable method of arriving at this average is acceptable, again provided it is followed consistently...*

On 9 December 2009 HMRC announced slight restrictions on this practice (under the heading "*Simplifying the compliance burden*").[33] The CG Manual now provides:

> **78333 Foreign currency bank accounts: Aggregation of debits and credits** [April 2010]
> There are often large numbers of transactions on bank accounts. It can be a formidable task to compute gains or losses on numerous withdrawals because each withdrawal is a part-disposal of an asset (the debt represented by the credit balance on the account). Providing it is

32 This must include foreign currency bank accounts, not just notes and coins, as notes and coins are not in practice acquired or disposed of in the course of buying and selling overseas investments.

33 Statement first published online 9 Dec 2009 *www.hmrc.gov.uk/cnr/remittance-basis.htm*.

> followed consistently and produces a reasonable overall result, the following practice may be adopted when computing foreign exchange gains and losses on withdrawals from accounts denominated in a currency other than sterling.
>
> The practice involves aggregating debits from and credits to an account over a period. Usually the period of aggregation will be a calendar month, but part of a month will be used at the beginning or end of a tax year, or if the account is opened or closed during the tax year. For these purposes, when the balance on an account becomes negative the account is treated as having been closed because the asset it represents no longer exists, and when an overdrawn account returns to credit it is treated as an account newly opened because an asset - a debt receivable - comes into existence. In what follows we assume the aggregation period is a month.

Thus at least 13 computations are required each year. Assuming the account never goes down to zero or deficit, there are two computations for April 1-5, (one for April 6-31, and one for April 1-5) and one for each other month.

> The foreign exchange gain or loss is computed by taking the consideration as being the total of debits (withdrawals) from the account translated into sterling using the average rate of exchange for the month. The allowable cost to be deducted from this consideration is computed using the part disposal formula A/(A+B) × Total Cost. The Total Cost is the allowable cost of the total foreign currency debt represented by the account at the start of the month (a sterling amount) plus the cost in sterling of credits to the account during the month, derived from the total foreign currency credits translated at the average rate of exchange for the month. In the formula A/(A+B), A is the total withdrawals from the account in the month, expressed in the foreign currency and B is the balance of the account at the start of the month plus the net credits to (or minus the net debits from) the account in the month ie the total credits less the total withdrawals (both in the foreign currency). Note that for these purposes B itself cannot be less than zero because the allowable costs to be deducted would then exceed the Total Cost (the fraction A/(A+B) would be greater than one). In the real world, this would mean the account had become overdrawn: the asset represented by the credit balance would have ceased to exist because it would have been disposed of in full and the part-disposal provisions for apportioning costs would not in fact be applicable.
>
> The allowable cost used in computing the foreign exchange gain is

deducted from the Total Cost and the resulting figure carried forward to form the opening base cost of the balance in the account at the start of the next month.

The example at CG78333A illustrates this.

Monthly average exchange rates may be based on daily rates published or made generally available by any reputable organisation. Weighting of daily rates is not acceptable.

Where this practice is adopted it must be used for all accounts in a particular foreign currency and must be used for the whole of a tax year.

**8333A Foreign currency bank accounts: Aggregation of debits and credits** [April 2010]

*Example*

CG78333 describes an approach to computing gains and losses in connection with a foreign currency bank account where there are many transactions. This paragraph provides a worked example to illustrate that approach.

Consider an account denominated in US dollars to which s252(2) TCGA 1992 (sums representing currency acquired for personal expenditure) does not apply. The account is subject to many credit and debit entries in the course of a year. The monthly totals of credits and debits are as shown below. Also shown is the monthly average exchange rate for sterling to dollars.

| | **Total credits/$** | **Total debits/$** | **Avge exchange rate** |
|---|---|---|---|
| April | 7520 | 5000 | 0.504400 |
| May | 8100 | 6500 | 0.508768 |
| June | 7570 | 7575 | 0.508343 |
| July | 9230 | 6800 | 0.502694 |
| August | 6730 | 9250 | 0.528316 |
| September | 8210 | 5420 | 0.554933 |
| October | 7970 | 6400 | 0.589352 |
| November | 6990 | 7500 | 0.651597 |
| December | 15730 | 17650 | 0.672184 |
| January | 5580 | 4530 | 0.690832 |
| February | 7260 | 7240 | 0.692636 |
| March | 8340 | 7950 | 0.704384 |
| TOTAL | 99230 | 91815 | |

The dollar (credit) balance at the start of April is $75,425 and the total allowable cost of the asset is £49,383.

The period of aggregation is one month. The computation begins with April.

Actually the computation should begin with the period 6 -30 April, with another set of computations for the period 1-5 April in the following year.

The results of computations are rounded to the nearest whole number before being used in further computations.

**April gain/loss**

**Step 1**: Add the total of the dollar credits in April to the opening balance:

\$75,425 + \$7,520 = \$82,945

**Step 2**: Determine the expenditure allowable in respect of this by translating the April credits into sterling using the average exchange rate:

£49,383 + (7,520 × 0.5044) = £53,176

**Step 3**: Determine the dollar balance carried forward by deducting the total of the debits in April:

\$82,945 - \$5,000 = \$77,945

**Step 4**: Determine the allowable expenditure attributable to the debit amount using the A/(A+B) fraction applied to the total allowable expenditure as computed above:

5000/(5000+(75,425 + 7,520 - 5,000)) × £53,176 = £3,205

**Step 5**: Compute the gain or loss on the disposal:

| | | |
|---|---|---|
| Proceeds | £2,522 | (5,000 × 0.5044) |
| Allowable expenditure | £3,205 | see above |
| Loss | £683 | |

**Step 6**: Compute the allowable expenditure in respect of the \$77,945 balance carried forward by deducting the expenditure allowed in this computation:

£53,176 – £3,205 = £49,971

Repeat the process for each successive month, carrying the dollar balance and the remaining allowable expenditure forward to the next month:

**May gain/loss**

**Step 1 (Dollar balance before debits):** \$77,945 + \$8,100 = \$86,045

**Step 2 (total allowable expenditure):** £49,971 + (8,100×0.508768) = £54,092

**Step 3 (Dollar balance carried forward):** \$86,045 – \$6,500 = \$79,545

**Step 4 (apportion allowable exp.):** £54,092 × 6,500/(6,500+ 77,945+8,100–6,500) = £4,086

**Step 5 (compute gain or loss):** (6,500 × 0.508768) – £4,086 = LOSS £779

**Step 6 (allowable expenditure carried forward):** £54,092 – £4,086 = £50,006

The results of the computations are shown in the following table:

| | **Step 1** $ bal. | **Step 2** Total all. exp | **Step 3** $ bal. c/f | **Step 4** Exp. re all disp. | **Step 5** Gain (loss) c/f | **Step 6** All exp. |
|---|---|---|---|---|---|---|
| Apr | $82,945 | £53,176 | $77,945 | £3,205 | (£683) | £49,971 |
| May | $86,045 | £54,092 | $79,545 | £4,086 | (£779) | £50,006 |
| Jun | $87,115 | £53,854 | $79,540 | £4,683 | (£832) | £49,171 |
| Jul | $88,770 | £53,811 | $81,970 | £4,122 | (£704) | £49,689 |
| Aug | $88,700 | £53,245 | $79,450 | £5,553 | (£666) | £47,692 |
| Sept | $87,660 | £52,248 | $82,240 | £3,230 | (£222) | £49,018 |
| Oct | $90,210 | £53,715 | $83,810 | £3,811 | (£39) | £49,904 |
| Nov | $90,800 | £54,459 | $83,300 | £4,498 | £389 | £49,961 |
| Dec | $99,030 | £60,534 | $81,380 | £10,789 | £1,075 | £49,745 |
| Jan | $86,960 | £53,600 | $82,430 | £2,792 | £337 | £50,808 |
| Feb | $89,690 | £55,837 | $82,450 | £4,507 | £508 | £51,329 |
| Mar | $90,790 | £57,205 | $82,840 | £5,009 | £591 | £52,196 |
| TOTAL | | | | | (£1,025) | |

The computation requires six steps for each month or part of month, ie at least 6 × 13 = 78 steps. The reader is invited to speculate the professional cost of these computations (including the time needed to extract the data needed which requires preparation of a spreadsheet of every bank account entry and ascertaining the foreign currency figures) and then to compare it with the amounts involved on the figures of the example.

### 49.14.3 *Ascertaining the acquisition cost of currency*

It will often not be possible to calculate the chargeable gains on foreign currency bank accounts as the base cost information will not be available. HMRC allow the following concession:

> **Acquisition costs of non-sterling bank accounts**
> Difficulties can arise in calculating the base cost for disposals and part disposals of non-sterling bank accounts in situations where it cannot be ascertained which exchange rate was in force at the time the debt was originally acquired or increased.
> To reduce these difficulties, HMRC will permit a simplified approach whereby the acquisition cost, as at 6 April 2008, of a debt represented by a non-sterling account can be calculated by means of an average exchange rate over a period of time up to 6 April 2008. Under this method, individuals can establish the base or acquisition cost of their non-sterling bank accounts by reference to the average foreign currency exchange rates which were in force over the six years up to April 2008. These rates can be found on the HMRC website at Exchange rates.

> For the sake of simplicity[!] HMRC have calculated the average exchange rate for the six years to April 2008 for US dollars and euros, namely £1 = US$0.560275917 and €0.68058106 respectively.

It appears that after ascertaining the rate for two currencies HMRC's resources were exhausted.

> Where such an account has been established for less than six years at 6 April 2008, HMRC will permit individuals to calculate the base or acquisition cost by reference to the average exchange rates in force over the number of years, to the nearest year, that the account has been established.
> This simplified averaging approach is entirely optional: individuals can still calculate base or acquisition costs by using the actual exchange rates which were in force at the date on which the currency was deposited into the bank account in question. However, any approach will always need to be followed on a consistent basis.[34]

It is obvious that this does not go far to meet the difficulty raised in practice.

### 49.14.4 *£500 de minimis concession*

HMRC say:

> Where the amount of net gains from transfers from overseas non-sterling bank accounts which an individual remits to the UK is less than £500 in any tax year, it will not be necessary to report such gains to HMRC.[35]

The reader is invited to speculate what the average accountancy cost will be of ascertaining whether or not an account gives rise to gains of less than £500, in the (I think unlikely) event that serious attempts are made to apply these rules.

---

34 Statement first published online 9 Dec 2009 *www.hmrc.gov.uk/cnr/remittance-basis.htm*.

35 Accessible *www.hmrc.gov.uk/cnr/cgt-transfers-fc.htm*.

## 49.15 Foreign currency not in a bank account

Foreign currency is an asset on which a gain may accrue. CG Manual provides:

> **78316 Identification of disposals with acquisitions** [April 2010]
> Foreign currency is subject to the same rules of identification and pooling as unquoted shares and securities. See CG50500+.

Here the share matching rules do apply. In practice this is not important as it would be unusual for a person to hold substantial foreign currency outside a bank account (except perhaps as trading receipts outside CGT.)

## 49.16 Foreign currency for personal expenditure

There are two exemptions for foreign currency needed for personal expenditure abroad. These are not likely to affect remittance basis taxpayers, as gains on disposals of this kind are not likely to be remitted, but it is important for others. Section 269 TCGA provides:

> A gain shall not be a chargeable gain if accruing on the disposal by an individual of currency of any description acquired by him for the personal expenditure outside the UK of himself or his family or dependants (including expenditure on the provision or maintenance of any residence outside the UK).

Section 252(2) TCGA is the corresponding provision for bank accounts:

> Subsection (1) above shall not apply to a sum in an individual's bank account representing currency acquired by the holder for the personal expenditure outside the UK of himself or his family or dependants (including expenditure on the provision or maintenance of any residence outside the UK).

The CG Manual provides:

> **78330 Personal expenditure of individuals** [April 2010]
> The general rule in s.252(1) TCGA 1992 that a debt represented by a foreign currency bank account is a chargeable asset does not apply to a sum in **an individual's** bank account representing currency acquired by

> the holder for the personal expenditure outside the UK of the holder or the holder's family or dependants. This includes expenditure on the provision or maintenance of any residence outside the UK. This provision is similar to TCGA 1992, s.269 and the guidance at CG 78315 applies to it also.

Where an individual receives foreign currency income or gains the exemption is not likely to apply, as one cannot easily say that the currency is acquired for personal expenditure outside the UK. The relief might apply if (exceptionally) the individual could say that the reason they worked was to acquire foreign currency for personal expenditure. The relief would apply if the individual received foreign currency income, and then pays it into a designated personal expenditure account.

## 49.17 Interaction with mixed fund rules and HMRC examples

The CG Manual provides examples of the following:
(1) Remittance of part of FC account holding capital gain (Fatima)
(2) Ditto with previous offshore transfer (example 2)
(3) Remittance of part of FC account holding income & gain (example 3)
The RDR Manual provides examples of the following:
(4) Remittance of part of FC account holding income (Julius).
(5) Remittance of part of FC account holding RFI and RFE (Tom)
(6) Ditto with previous offshore transfer (Gelda)
I set out the examples below but have altered the wording a little for enhanced clarity. However examples (3) to (6) are wrong since
(1) they adopt the HMRC view that the currency conversion date on the remittance of income is the date of remittance; and
(2) they adopt the former HMRC view that there is a double charge to CGT and IT (which HMRC now accept is wrong).
(3) The HMRC method of dealing with bank accounts is also wrong. This is best seen by examining the example of "Fatima".

### 49.17.1 *Example (Fatima): FC account holds capital gain; currency fluctuates; remittance of part of account*

The facts of this example are simple. The CG Manual provides:

**25392. Remittance basis: Accounts denominated in foreign currencies** [April 2010]

...

***Example*** (Fatima)

F is a remittance basis taxpayer in all relevant years.

In March 2007 F bought foreign property for €260,000.

In August 2009 she disposes of the property for €400,000. She banks the proceeds in a new account in Germany.

In November 2010 F transfers €100,000 from the account to a UK account denominated in Sterling.[36]

The Sterling: Euro exchange rates were:

| | |
|---|---|
| March 2007 | 0.571 (ie, £ = € × 0.571) |
| August 2009 | 0.909 (ie, £ = € × 0.909) |
| November 2010 | 0.966 (ie, £ = € × 0.966) |

Thus F has made two disposals and one remittance:

(1) A disposal of the foreign property in August 2009.

(2) A part disposal of the € bank account in November 2010.

(3) A remittance of €100,000 in November 2010.

The disposal of the foreign property gives rise to a gain and the computation is straightforward. HMRC say:

Foreign chargeable gain arising in August 2009:

| | | |
|---|---|---|
| Proceeds | £363,600 | (€400,000 × 0.909) |
| Less cost | -£148,460 | (€260,000 × 0.571) |
| Gain | £215,140 | equivalent to €236,677 (£215,140/0.909) |

This gain is computed once and for all in Sterling at the time of the [disposal][37], but as the foreign currency representing the gain is held in bank account there is the possibility[38] that a further gain or loss will arise when there is a withdrawal from that account.

### 49.17.2 *James Kessler's analysis*

The position is (relatively) simple.

36 [Author's note] In fact, the position is the same if the UK account is denominated in Euros.

37 The original erroneously reads: "at the time of the exchange".

38 [Author's note] In fact, a gain or loss is not a "possibility" but a near-certainty, since it is highly improbable that the rates of exchange will be the same on any two dates.

The amount remitted is £96,600 (€100,000 × 0.966, currency conversion date is date of remittance).

Under the mixed fund rules, that is regarded as gain before tax free capital, and since the gain is more than £96,600, the remitted sum is all gain.

The € account is still a mixed fund, but now holds £215,140 - £96,600 = £118,540 gains which may be remitted on another day.

As will be seen, HMRC will agree with the above two paragraphs.

Next, the part disposal of the bank account. At this point my analysis is different from that of HMRC. The correct approach is that this disposal gives rise to a gain computed thus:

| | | |
|---|---|---|
| Proceeds | £96,600 | (€100,000 × 0.966) |
| Less cost | -£90,900[39] | |
| Gain | £ 5,700 | |

It is considered that applying the mixed fund rules that amount is not remitted since the gain deemed remitted is treated as £96,600. That gain cannot be remitted, since the remaining bank account does not represent the gain (it is not, and is not derived from, that gain).

In reality this gain of £5,700 has actually been remitted. It might seem sensible to say that the £96,600 remitted consists of:

(1) £5,700 capital gain (arising on the withdrawal of funds) plus
(2) £90,900 capital gain (part of the gain in the mixed account) leaving [£215,140 - £90,900] yet to be remitted.

But that is not consistent with the statutory mixed fund rules as s.809Q refers to the amount of income or capital of the individual for the relevant tax year in the mixed fund *immediately before* the transfer.

Also, suppose the facts were that

(1) the bank account held purely income (not gains and clean capital).
(2) (as before) €100,000 = £96,600 was remitted from the account, and a gain of £5,700 arose on that withdrawal.

In that case it might be surprising to find that a remittance consisted in part of capital gain £5,700 and was not wholly income. It would not be in the interests of HMRC to accept that analysis.

39 See s.42 TCGA. The acquisition cost of the entire € account is £363,600 (€400,000 × 0.909) - currency conversion date at time of acquisition.
Multiply that by the part disposal fraction A/(A+B) ie
£96,600/(£96,600 + £289,800) = 1/4

### 49.17.3 *HMRC analysis*

> As at August 2009 the bank account is a mixed fund containing:
> foreign chargeable gains £215,140 (€236,677) and
> Clean capital £148,461 (€163,323, ie €400,000– €236,677).
> By November 2010 this [sterling] gain is equivalent to €222,712 (215,140/0.966)

This is correct.

> ie there is an unrealised foreign exchange loss of £13,490 (ie €(236,677-222,712) = €13,965 expressed in Sterling).

This is not correct. There is no unrealised loss. The taxpayer's asset is the *€ account* which has *appreciated* in value (as against sterling). It is not correct to say that the taxpayer owns an asset (the chargeable gain) which has depreciated in value. The chargeable gain is not an asset. It is merely a figure computed for tax purposes.

> Under the mixed fund rules (see CG25385+) the amount transferred out of the mixed fund is treated as containing only foreign chargeable gains.

This is correct. (Under the mixed fund rules the amount transferred out of the mixed fund is treated as chargeable gains before tax free capital, and since the amount transferred is less than the amount of capital gains, it is treated as wholly chargeable gains.)

> The proportion of the gain remitted is the Sterling equivalent of the amount transferred as fraction of the total foreign chargeable gain: (100,000 × 0.966)/215,140 = 44.9%.

It is of course correct that the gain which has been remitted (£96,600) is 44.9% of the total gain (£215,140). But on my analysis we do not need to know that. All we need to know is the amount of the gain left in the offshore mixed fund, which is obviously the original gain (in sterling, £215,140) less the remitted gain (in sterling, £96,600).

> The same proportion of the loss due to exchange rate movements (ie 44.9% of £13,490) may be an allowable loss: see CG25330+ for information on losses under the remittance basis.

There is no loss. (If there were a loss, it may or may not be allowable, according to the rules for losses but that does not arise.)

> So the amount of the original gain remitted is £96,600 and, going forward, the mixed fund contains £118,540 foreign chargeable gain (£215,140 - £96,600) ...

This is correct.

> giving it an overall composition of €122,712 gains plus €177,288 capital (€300,000 total less the euro equivalent of the remaining gain)....

But on my analysis we do not need to know the equivalent figures in euros, as that has no fiscal significance.

### 49.17.4 *Example: FC account holds capital gain; offshore transfer; remittance of part of account; no currency fluctuation*

The CG Manual provides:

> **25430. Disposal of assets situated abroad** [April 2010]
> ***Example 2***
> An individual resident but not domiciled in the UK has a foreign bank account in a foreign currency, F. The rate of exchange is 2F = £1 throughout this example. The account contains the following entries:

| **Date** | **Item** | **Credit (debit)** | **Balance** |
|---|---|---|---|
| Jan 2009 | - | Nil | |
| Jan 2009 | sale of foreign shares A (cost 48,000F Dec 2005) | 90,000F | 90,000F |
| Feb 2009 | Withdrawal: purchase of foreign shares B | (30,000F) | 60,000F |
| Mar 2009 | Withdrawal: brought to UK | (30,000F) | 30,000F |

Thus F has made three disposals:
(1) A disposal of the foreign shares A in Jan 2009.
(2) A part disposal of the bank account in Feb 2009.
(3) A part disposal of the bank account in Mar 2009.
However no gain or loss arises on the second or third disposal since (on the simplified facts of the example) the currency has not fluctuated.[40]
The first disposal gives rise to a gain and the computation is

40 The reader is invited to contemplate how complicated the analysis would be if the facts were not simplified in this way.

straightforward. HMRC say:

> The gain arising is first calculated in sterling, thus:

| | |
|---|---|
| Proceeds 90,000F | £45,000 |
| less Cost 48,000F | - £24,000 |
| Gain | £21,000 |

### 49.17.5 *James Kessler's analysis*

The bank account is a mixed fund. There have been two transfers:
(1) An offshore transfer from the mixed fund in Feb 2009.
(2) An onshore transfer (remittance) from the mixed fund in Mar 2009.
The offshore transfer contains gain and clean capital pro-rata.

| | Before offshore transfer | Offshore transfer | Remaining in a/c |
|---|---|---|---|
| gain: | £21,000 = 47% | £7,000 | £14,000 |
| clean capital: | £24,000 = 53% | £8,000 | £16,000 |
| total: | £45,000 = 100% | £15,000 | £30,000 |

The remittance is treated as gain before capital, so is treated as £14k gain and £1k clean capital.

HMRC agree, though their method of working is more complicated:

> Next, the account is analysed into capital and gains to give the composition of the balance of the account (90,000F – 30,000F = 60,000F) immediately before the March transfer, turning the gain back into foreign currency thus:

| **Date** | **Item** | **Capital** | **Capital Gain** | **Total** |
|---|---|---|---|---|
| Jan 2009 | Deposit | 48,000F | 42,000F | 90,000F |
| Feb 2009 | Withdrawal to buy foreign shares | 16,000F | 14,000F | 30,000F |
| | Balance | 32,000F | 28,000F | 60,000F |

> The transfer of 30,000F is then split between capital and foreign chargeable gains according to the mixed fund rules (see CG25380+), so it is treated as containing 28,000F (£14,000) of gains and 2000F (£1000) capital. There is therefore a remittance of £14,000 of the gain on foreign shares A.

### 49.17.6 *Example: FC bank account holding income and gain; remittance of part; currency fluctuates*

The CG Manual provides:

**25431. Disposal of assets situated abroad** [April 2010]
***Example 3***
An individual, resident but not domiciled in the UK, has a foreign bank account in a foreign currency, F. The account contains the following entries:

| **Date** | **Item** | **Credit (debit)** | **Balance** |
|---|---|---|---|
| Nov 2008 | | | Nil |
| Dec 2008 | Partnership profits (RFI subject to foreign tax)[41] | 10,000F | 10,000F |
| Jan 2009 | sale of shares (cost 10,560F in Dec 1998) | 15,000F | 25,000F |
| Feb 2009 | Withdrawal – brought to UK | (20,000F) | 5,000F |

The sterling: FC exchange rates are assumed to be:

| | |
|---|---|
| Dec 98: 2.2 | (ie, £ = FC ÷ 2.2) |
| Dec 08: 2.1 | (ie, £ = FC ÷ 2.1)[42] |
| Jan 09: 2.0 | (ie, £ = FC ÷ 2.0) |
| Feb 09: 2.5 | (ie, £ = FC ÷ 2.5) |

Thus the individual has made 2 disposals and one remittance:
(1) a disposal of the shares in Jan 2009.
(2) a part disposal of the bank account in Feb 2009.
(3) a remittance of 20,000F in Feb 2009.
First one computes the chargeable gain on the disposal of the shares, which is straightforward. HMRC say:

... the capital gain on the shares is first computed in sterling by reference to the rates of exchange ruling at the dates of acquisition and disposal respectively: thus:

| | | |
|---|---|---|
| Disposal proceeds | 15,000F ÷ 2.0 | £7,500 |
| Less cost | 10,560F ÷ 2.2 | £4,800 |
| Gain | | £2,700 |

41 Author's note: On the facts of the example, the result would turn out the same if the RFI were not subject to foreign tax.

42 I have added this "fact" as no figure is supplied in the HMRC example (it is not needed on the HMRC analysis).

### 49.17.7 *James Kessler's analysis*

At the time of the remittance the account contains:

| **Type** | **Mixed fund category** | **amount** |
|---|---|---|
| chargeable gains | para (e) | £2700 |
| foreign-taxed RFI | para (g) | £4762 (F10,000 ÷ 2.1)[43] |
| clean capital | para (i) | £2538 |
| Total | | £10,000 (F25,000 ÷ 2.5) |

The remittance is £8,000 (F20,000 ÷ 2.5). Matching in the mixed funds priority order, the remittance consists of:

| **Type** | **amount** |
|---|---|
| chargeable gains | £2,700 |
| foreign-taxed RFI | £4,762 |
| clean capital | £ 538 |
| Total | £8,000 |

There is also a part disposal of the FCBA. A loss accrues, computed thus:

| | | |
|---|---|---|
| Disposal proceeds | 15,000F ÷ 2.0 | £7,500 |
| Less cost | | £9,810[44] |
| Loss | | £2,700 |

### 49.17.8 *HMRC analysis*

> Next, as in Example 2, we analyse the account. But this time we analyse it into income, capital and foreign chargeable gains.
> Sterling is the only appropriate measure of capital gains ... We must therefore decide on the amount of capital gains in the account on the date the remittance is made by converting the sterling figures of gains back into the foreign currency at the rate of exchange applying at the remittance date ([in the] example 2.5F = £1). So the £2,700 gains are represented by 6,750F at this date.
> We then deduct the figures of foreign currency representing income and capital gains from the total foreign currency balance in the account. The

43 Adopting the exchange rate at the time the income arose.

44 Total base cost = (F10,000÷ 2.1) + (F15,000 ÷ 2.0) = £12662.
Apportioned base cost = 12662*20/25 = 9810.

figure we arrive at is normally called a figure of capital. However it is in reality only a balancing figure and it cannot be reconciled with amounts of capital that have been deposited in the account. Thus, in the present example:

| | **Income** | **Capital** | **Capital gains** | **Total** |
|---|---|---|---|---|
| Deposit Dec 2008 | 10,000F | | | 10,000F |
| Amount of Gains | | | 6,750F | 6,750F |
| Subtotal | | | | 16,750F |
| Figure of capital to balance | | 8,250F | | 8,250F |
| | | | | 25,000F |

The transfer of 20,000F is then matched with the contents of the mixed fund under the rules described in CG25380+:
£2,700 (6,750F) is foreign chargeable gains
£4,000 (10,000F) is relevant foreign income (partnership profits)
£1,300 (3,250F) is capital
The first two components are remittances taxable in the UK.

### 49.17.9 *Example: remittance of part of FC account holding income.*

The RDR Manual formerly provided:

**33580** *Example (Julius)*
J is a UK resident, but is not domiciled within the UK. He has a Euro bank account in a French bank in Paris.
In Year 1 there are two direct credits, in Euro, of RFI (dividend income & investment interest) into that account:

| Date of credit | € | Exchange Rate |
|---|---|---|
| Year 1 30 June | €1,000 | €1=£1 |
| 31 August | €2,000 | €1=£1.20 |

For capital gains purposes the cost of acquisition of the debt will be £1,000 on 30 June and £2,400 on 31 August.
In Year 2, J arranges an electronic transfer of €500 to his UK current (Sterling) bank account.[45] The exchange rate on the date of transfer was €1 = £1.30. J's disposal proceeds are €500 × 1.30= £650.
The market value of the remainder of the debt receivable (€2,500) will also need to be converted to sterling, and using the same exchange rate (£3,250).

45 [Author's note] However the position is the same if the UK account is denominated in Euros.

Applying the p/disposal formula:
J's allowable expenditure = £3,400 × (£650/(£650 + £3,250) = £567
Calculating the gain:
Disposal proceeds less allowable expenditure = £650 - £567 = £83
J has a foreign exchange capital gain of £83.
J now has a credit in his UK bank account (an asset = a debt receivable), the acquisition costs of which will be £650. This is a sterling debt, so there will be no chargeable gain on any future part disposal/withdrawal from the UK account (TCGA92/s251(1) and 252(2)).
If J does not choose to use the remittance basis this foreign gain is simply chargeable in the UK as any other foreign gain.
If J chooses to use the remittance basis then this foreign chargeable gain will be subject to UK tax when it is 'remitted' to the UK. J's disposal proceeds on his part-disposal of his Euro 'debt receivable' were, in this case, received in the form of another 'debt receivable', that is, the debt with his UK bank. In layman's terms the sterling values of the proceeds is the £650 'credit'. The gain is contained therein so has been remitted to the UK.
NOTE: In the above example, assuming J was also a remittance basis user in Year 1 he has also remitted €500 (that is £650) of Relevant Foreign Income and will be liable to income tax on that amount...

This example has been deleted from the current manual.

### 49.17.10 *Account holding RFI and RFE: Remittance of part*

The next example concerns a remittance of part of FC account holding RFI and RFE. The RDR Manual provides:

**33580 Foreign Currency Bank Accounts - Interaction with Mixed Funds Rules**
*Section 809Q – Mixed funds and remittances*
The capital gains rules for foreign currency accounts held by non-domiciled remittance basis users may[46] interact with the mixed fund rules at ITA07/s809Q. Where the foreign currency account is held offshore, any gain arising will be a foreign chargeable gain
Looking at this through an example:

46 [Author's note] In fact the mixed fund rules will always interact.

*Example (Tom):*

T is a UK resident and ordinarily resident, but non-UK domiciled remittance basis user. He has a Euro bank account in a German bank.

Between 6 April and 4 July Year 1 there are Euro credits of

- €4,000 to this account on the 1st of each month, from T's German employer for duties carried out wholly in Germany (Relevant Foreign Earnings)
- Credits paid on 3rd of each month from various investments, which total €3,000 each month (Relevant Foreign Income).

On 5 July, in Year 1, T decides to make an electronic transfer of €15,000 from this account to his UK sterling current account. The relevant exchange rates in Year 1 (assume relevant for the entire month) are:

May € 1 = £0.90
June € 1 = £1.20
July € 1 = £1.10

The account contains both Relevant Foreign Income and Relevant Foreign Earnings, so it is a mixed fund and the rules at ITA07/s809Q apply. These rules require an analysis of the account immediately before the transfer, to identify amounts in each of the s809Q(4) categories for each year.

In T's case, on 5 July immediately before the transfer he has, from Year 1:

- €12,000 credits from his German employment income (para (b)) and
- €9,000 from RFI (para (d))

T's €15,000 remittance of income is subject to UK income tax in the UK; it consists of €12,000 RFE and €3,000 RFI. This amount is translated into sterling on date of remittance (€ 1 = £1.10); so T has remitted £13,200 RFE and £3,300 RFI.

There is also a foreign exchange gain/loss on the withdrawal/transfer which crystallises immediately after the money is withdrawn, because that is the point at which the part disposal of the debt occurs. The gain will be a foreign chargeable gain, arising on the disposal of a non-UK situs 'debt receivable'.

The acquisition costs are computed using the exchange rates applicable on the date of each credit, and the disposal proceeds using the exchange rate applicable on date of disposal. This latter figure will be the sterling 'credit' that appears on T's UK bank account, using that day's rate of exchange (assumed here to be €1 = £1.10). The remainder of the account (€21,000 less €15,000 = €6,000) is translated to sterling market value too, on the same day (€6,000 =£6,600).

T's original 'expenditure' on acquiring the debt/asset is:

May € 7,000 × £0.90 = £6,300
June € 7,000 × £1.20 = £8,400
July € 7,000 × £1.10 = £7,700
£22,400

T's allowable exp = £22,400 × (£16,500/(£16,500 + £6,600) = £16,000
The capital gain computation = £16,500 - £16,000 = £500 gain
So in July, when T brings in his €15,000 he has a taxable remittance of RFE of £13,200 and RFI totalling £3,300. He has also remitted the proceeds of a disposal; which contain a foreign chargeable gain of £500 which is also taxable.

### 49.17.11 *Example: Offshore transfer followed by remittance from transferee account (Gelda)*

G is a UK resident and ordinarily resident, but non-UK domiciled remittance basis user. She has a Euro bank account in a German bank.
Between 6 April and 31 July in Year 1 there are Euro credits of

- €4,000 to this account on the 1st of each month, from G's German employer for duties carried out wholly in Germany (Relevant Foreign Earnings)
- Credits paid on 3rd of each month from various offshore investments, which total €3,000 each month. (Relevant Foreign Income).

There are then no further credits to the account.
The relevant exchanges rates in Year 1 (assume relevant for the entire month) are:
May € 1 = £0.90,
June € 1 = £1.20,
July € 1 = £1.10
On 20 August in Year 2, G decides to make an electronic transfer of €15,000 from this account to another Euro account with another bank in Spain.
This would be an offshore transfer within ITA07/s809R.
Under the rules at section 809R an offshore transfer is treated as containing an appropriate proportion of each kind of income/capital in the transferring mixed fund immediately before the transfer.
As at 20 August in Year 2 G's German account held

- €12,000 RFE and
- €9,000 RFI

The exchange rate for August in Year 2 is €1 = £1.15
So the offshore transfer contains RFE and RFI in a 4:3 proportion, that is €8,571 RFE and €6,429 RFI. There is no remittance to the UK at this point, so no need to translate this income to sterling for income

remittance purposes.
There would also be a chargeable gain in the Spanish account. The €15,000 funds credited are also disposal proceeds as G has made a part disposal of the 'debt receivable' asset she held in Germany in return for another asset – the 'debt receivable' from the Spanish bank.

This would not be the case now because of the extended SP 10/84 concession.

G's original 'expenditure' on acquiring the debt/asset is:
May € 7,000 × £0.90 = £6,300
June € 7,000 × £1.20 = £8,400
July € 7,000 × £1.10 = £7,700
£22,400
G's Allowable exp = £22,400 × (£17,250/(£17,250 + £6,900) = £16,000
The capital gain computation = £17,250 - £16,000 = £1,250 gain
G is a remittance basis user; but there has been no remittance of this gain at the time the transfer occurs. The Spanish account is now regarded as a mixed fund. It has a balance of €15,000, in which is contained the income and now the £1,250 chargeable gain.
There are no further transactions (credits/debits) with the Spanish account. On 31 July in Year 6 G decides to remit €10,000 from the Spanish account to her UK sterling current account. The exchange rate at that time is €1 = £1.45.
The mixed fund rules at ITA07/s809Q now apply. The first step is to analyse the Spanish account immediately before the transfer, to identify amounts in each of the s809Q(4) categories:
Year 2:
s809Q(4) (e) Foreign chargeable gains - £1,250
Year 1.
s809Q(4) (b) RFE - €8,571
s809Q(4) [d][47] RFI - €6,429
Note: This analysis appears to shows the Spanish account/ mixed fund as having more money in it than the balance (€15,000) would suggest it actually contains; this is because of the inclusion of the FOREX gain.
The s809Q mixed-fund rules treat anything remitted as coming from the earliest paragraph first, on a year by year basis and then the next paragraph and so forth.
In G's case, the €10,000 that she remitted in Year 6 consists of a £1,250 chargeable gain, €8,571 RFE (£12,428) and €566 RFI (£822).

47 The original erroneously reads: s809Q(4) (c).

G's remittance of the €10,000 from the Spanish account is also a part disposal of a debt receivable. The cost of acquisition of the Spanish 'debt receivable' is the same as the disposal proceeds of the German 'debt receivable' (£17,250).
The disposal proceeds, in sterling are £14,500 (€10,000 × 1.45).
Applying the p/disposal formula:
Allowable exp = £17,250 × (£14,500/(£14,500 + £7,250) = £11,500
So the capital gain computation = £14,500 - £11,500 = £3,000 gain
This £3,000 gain is a foreign chargeable gain that crystallises when the money leaves the Spanish account; it is 'within' the 'proceeds of disposal (£14,500) and so is regarded as remitted at that time.
So on the occasion of the transfer on 31 July in Year 6, G is subject to income tax on RFE of £12,428 and RFI of £822 and to capital gains tax on her remitted foreign chargeable gain of £1,250 plus her foreign exchange gain of £3,000.

## 49.18 Commentary: solution to foreign currency problems

### 49.18.1 *Problems*

In computing gains on disposals of bank accounts the legislation requires unworkable computations in all but the simplest cases. This is obvious to anyone whose knowledge of financial affairs exceeds that of an undergraduate who has just opened their first bank account.

The examples in the HMRC manuals are fantastic oversimplifications of what may be expected in real life. Yet the analysis runs for pages, HMRC accept that their first set of answers were wrong, and I should be very surprised if the second set of answers is right.

Although the pre-2008 situation was not satisfactory, it became materially worse after 2008 for the following reasons:

(1) Many UK resident foreign domiciliaries are now arising basis taxpayers as they will not make a remittance basis claim. So (subject to the annual exemption) a CGT computation has to be carried out for every withdrawal from a foreign currency bank account.
(2) Remittance basis taxpayers do not now have the benefit of a CGT annual exemption. So (subject to the derisory £500 exemption) a CGT computation has to be carried out for every remittance to the UK derived from foreign currency.
(3) Non-resident trusts with foreign domiciled beneficiaries now need to compute s.2(2) amounts (trust gains) for the purpose of s.87 TCGA so

a CGT computation is needed on every withdrawal from a foreign currency trust bank account.

(4) Until 2010 it was accepted that the share matching rules applied. Matching was (in short) generally to acquisitions in the last year so the records were available. Now, (regardless of whether the share matching or part disposal rules apply) to calculate base costs accurately one will have to have details of the history of the foreign currency bank accounts going back to the date they were opened or 31 March 1982.

(5) Base cost records will not usually be available in the case of individuals who have recently come to the UK, or long term UK resident foreign domiciliaries, or trustees of trusts with foreign domiciled beneficiaries, as they would in no case have been thought necessary.

### 49.18.2 *Solutions*

Foreign currency raises three problems, all of which are soluble.

*Relief for foreign currency bank accounts* The first problem (for arising basis and remittance basis taxpayers) is the vast number of computations required when (almost) every withdrawal from a bank account is a disposal. The solution is to repeal s.252 TCGA so that gains and losses from foreign currency bank accounts cease to be chargeable gains, and allowable losses cease to be allowable losses. This would have no serious cost implications as on balance gains should equal losses.

*Yearly exchange rate averaging* The second problem (for arising basis and remittance basis taxpayers) is the general impracticability when there are a significant number of transactions of converting foreign currency to sterling at a variety of moments during the year: the moment that income arises, the moment that gains arise, and the moment that capital expenditure is incurred. The solution is in the HMRC practice to allow use of an annual average rate in any currency during the year and to average out acquisitions and disposals. HMRC should publish rates each year for every currency. Provided taxpayers are not allowed to switch adventitiously between accurate and average exchange rates, this would have no significant cost implications.

*Currency conversion date* The third set of problems (for remittance basis taxpayers only) arise from HMRC's mistaken view that the currency conversion date for income of a remittance basis taxpayer is the date of remittance. The solution is to recognise the existing law, or (if that is not accepted) to amend the law to the practitioners view. This would have no cost implications.

Until these three changes are made, it will be impossible, for even the most assiduous taxpayers with substantial foreign currency accounts to complete their tax returns accurately.

What happens in practice? Who would stand up and say publically what they do? My impression is this: If the amounts are relatively small, no return is made. If the amounts are large and the advisors assiduous, a very approximate stab may be made. HMRC raise no enquiries.

A sad state of affairs for those who believe that taxation should be governed by law; but there it is.

### 49.18.3 *A new relief from 2012/13*

The remittance consultation paper provides:

> **Foreign currency bank accounts**
> 2.75 Individuals who operate bank accounts denominated in a currency other than sterling face particular issues relating to CGT because foreign currency bank accounts (FCBAs) are chargeable assets for the purposes of CGT.
> 2.76 There is an exemption from CGT where sums are deposited in an individual's FCBA in order to be used for personal expenditure outside the UK. This means that a withdrawal of funds from such an account constitutes a part disposal of the account on which a capital gain or loss can arise.
> 2.77 The calculations of gains and losses can often become extremely complicated and require detailed records to be kept until all deposits in the account have been withdrawn, which may be for very long periods. However, over time capital gains and losses on FCBA transactions tend to broadly balance each other: as a consequence, in many cases the administrative burden is disproportionate to the final tax payable or losses allowable. However, the exemption does not extend to all sums in FCBAs. This means that, whenever a withdrawal is made from a FCBA and the exemption does not apply, fluctuations in exchange rates are almost certain to give rise either to a chargeable gain or an allowable loss.
> 2.78 These problems are particularly relevant to individuals taxed on the remittance basis as they are more likely than other people to make regular use of FCBAs and cannot rely on the Annual Exempt Amount (AEA) to

> cover smaller net chargeable gains arising on the accounts. The Government acknowledges these difficulties and believes they should be addressed.
> 2.79 It therefore proposes a straightforward and comprehensive solution whereby all sums within an individual's FCBA will be removed from the scope of CGT. This would apply to nondomiciled and domiciled individuals alike.
> 2.80 It is likely that such a measure would require some rules to protect the Exchequer, for instance, to counter the effect of arrangements that are neutral in economic terms but result in an exempt gain on an FCBA being matched by an allowable loss on another asset.[48]

Whether the proposed new relief achieves anything useful must remain to be seen, but the text at 2.80 is not altogether encouraging.

48 HMT & HMRC, "Reform of the taxation of non-domiciled individuals: a consultation" (June 2011) accessible *www.hm-treasury.gov.uk/d/consult_condoc_non_domicile_individuals.pdf.*

CHAPTER FIFTY

# DOUBLE TAXATION RELIEFS FOR INCOME TAX AND CGT

## 50.1 DT reliefs - Introduction

The UK has more than 100 double tax treaties. The discussion in this chapter is mainly by reference to the OECD Model Double Taxation Convention on Income and on Capital ("**the OECD model**") though I refer at points to the US treaty and others. This is practical because the OECD model has been the basis for tax treaties between developed countries since it was first published, in draft in 1963 and finally in 1977. In any particular case the DTA concerned would need to be reviewed.

A full discussion of the OECD model would need a volume for every article (except article 7 which would require several volumes).

I only consider the UK side of the matter, ie whether a DT exemption provides exemption from UK tax and whether foreign tax can be used as a credit against UK tax. In any particular case it will also be necessary to consider the foreign tax position.

### 50.1.1 *Cross references*

In this chapter I concentrate on the general aspects of the treaty rules and their interaction with UK tax legislation.

Specific DT exemptions are considered in the chapter on that type of income; see: 13.20 (DT relief for trading income).

See too 5.1 (Treaty-residence); 36.9 (DTA relief for partnership); for the accrued income scheme, see 33.16 (Double Taxation relief); 16.8 (Alimony and maintenance income). For DT reliefs and discretionary trusts, see 22.9 (Discretionary trusts treated as transparent to allow beneficiaries reliefs); 22.11 (UK trust - non resident beneficiary: DTA relief); 22.12 (Are discretionary trusts "beneficial owners" for DTA purposes?). For IP trusts, see 23.3 (DT reliefs). For DT relief and the EU Savings Directive, see 17.15.1 (Credit for special withholding tax).

For the position of charities, see Kessler & Brown, *Taxation of Charities*, (8th ed., 2011), Chapter 15 (Double Taxation Treaties and Charities).

### 50.1.2 *Treaty terminology*

A note on treaty terminology.

The terms DT treaty/convention/arrangement/agreement are synonymous. The OECD Model use the word "convention" and UK tax legislation uses the term "double taxation arrangements". I prefer the word "treaty" as it seems clearest, but I adopt the abbreviation DTA which has become standard usage.

Treaties commonly refer to income (or gains) **"derived by"** a person where the usual UK tax terminology would be that the income (or gains) arise or accrue to the person; but the meaning is the same. Treaties similarly refer to income **"derived from"** a state where the usual UK tax terminology would be income arising in a state. In American English the verb can be used transitively, eg: "*a resident is treated as deriving the income.*"

DTAs refer to "contracting states" but I abbreviate this to **"treaty state"** or just **"state"** and where that state is not the UK, I refer to it as **"the other state"**.

## 50.2 *Types of DT relief*

We need terms for the various types of DT relief, and in this chapter I use the following terminology.

"**DT exemption**" applies where a DTA provides an exemption from tax.

"**Foreign tax credit relief**" arises where foreign tax is set against UK tax. This may be

(a) "**DTA tax credit**" where a DTA confers a credit or
(b) "**Unilateral tax credit**" where UK tax law (not a DTA) confers a credit.

"**IT/CGT computation deduction**" applies where foreign tax is deducted in computing income or gains.

I refer to all these reliefs together as "**DT reliefs**".

### 50.2.1 *Types of residence*

We need terms for the various types of residence, and in this chapter I use the following terminology.

"**Domestic-law residence**" means residence for UK tax purposes. Where a person is resident in the UK for UK law purposes, I describe them as "**domestic-law UK resident**".

"**Treaty-residence**" means residence for the purposes of a DTA.[1] Where a person is a resident of the UK for treaty purposes I describe them as "**treaty-resident in the UK**". Where they are resident in the other state, I describe them as "**treaty-resident outside the UK**". The statutory terminology sometimes used here is *"treaty non-resident"* but I think my term is clearer.

"**Dual residence**" means residence in two countries, but is an ambiguous term until one specifies what type(s) of residence are involved. In its widest sense it means a person who is domestic-law UK resident and also resident in another state for the purposes of foreign tax. A dual resident person in that sense may be:

(a) treaty-resident outside the UK
(b) treaty-resident in the UK or
(c) not treaty-resident anywhere (if there is no applicable DTA).

(The term dual resident is sometimes used specifically to mean a person within (a)[2] but that usage is not adopted in this chapter.)

"**Domestic-law UK resident only**" means a person who is domestic-law UK resident and not resident in another state (ie not dual resident even in the widest sense.) Such a person cannot be treaty-resident outside the UK.

These are clumsy terms but it is difficult to think of better.

### 50.2.2 *Significance of DT reliefs*

DT reliefs matter to all individuals, but different classes of individual are interested in different aspects of the reliefs. The permutations can be summarised thus:

Case (1): Individuals who are domestic-law UK resident only. Where

1 See 5.1 (Treaty-residence).
2 See 45.17 (Dual resident trust).

there is an applicable DTA they will also be treaty-resident in the UK.

Case (2): Individuals who are dual resident.

Case (3): Individuals who not domestic-law UK resident. These may be:
(a) treaty-resident outside the UK
(b) not treaty-resident anywhere (if there is no applicable DTA).

*Case 1: Individuals who are domestic-law UK resident only.* These do not directly qualify for any DT exemption but they may qualify for foreign tax credit relief (or IT/CGT computation deduction). They may also qualify for indirect DT relief if income or gains accruing to a trust or company which is treaty-resident outside the UK are deemed to accrue to them under an anti-avoidance provisions such as s.624, TAA, s.13, etc.
*Case (2)(a): Individuals who are dual resident and treaty-resident outside the UK.* As UK residents they are in principle subject to IT or CGT on all UK and foreign income and gains (subject where applicable to the remittance basis). However as treaty-resident outside the UK they may qualify for DT exemptions from UK and foreign source income and gains. This category has become much more important from 2008/09, for two reasons. First, many individuals who would formerly have simply claimed the remittance basis will now claim treaty relief, as a remittance basis claim will incur the remittance basis charge. Secondly following the withdrawal of IR20 and its replacement by the hopelessly vague HMRC 6, many more individuals find that they may possibly be domestic-law UK resident and since they may be UK resident they claim treaty relief just in case.
*Case (2)(b)(c): Individuals who are dual resident and treaty-resident in the UK or not treaty-resident anywhere.* These are in the same position as case 1.
*Case (3)(a): Individuals who not domestic-law UK resident and treaty-resident outside the UK.* As non-residents they are in principle subject to IT on UK source income only. As treaty-resident outside the UK they may qualify for some DT exemptions (eg the OECD other income article and relief for UK source interest under the some treaties).
*Case (3)(b) Individuals who not domestic-law UK resident and not treaty-resident anywhere.* As non-residents they are in principle subject to IT on UK source income (though the non-residents exemption will mitigate this). They will not qualify for any DT exemptions.

## 50.3 Incorporation of DTAs into UK law

International treaties (including DTAs) do not automatically become part of UK law, but must be incorporated into UK law by statute. Accordingly, s.2 TIOPA provides:

> (1) If Her Majesty by Order in Council declares—
> (a) that arrangements specified in the Order have been made in relation to any territory outside the UK with a view to affording relief from double taxation in relation to taxes within subsection (3), and
> (b) that it is expedient that those arrangements should have effect,
> those arrangements have effect.
> (2) If arrangements have effect under subsection (1), they have effect in accordance with section 6.
> (3) The taxes are—
> (a) income tax,
> (b) corporation tax,
> (c) capital gains tax,
> (d) petroleum revenue tax, and
> (e) any taxes imposed by the law of the territory that are of a similar character to taxes within paragraphs (a) to (d)...

Section 3 TIOPA extends this:

> (1) Section 2(1) gives effect to arrangements even if the arrangements include—
> (a) provision for relief from tax for periods before the passing of this Act, or
> (b) provision for relief from tax for periods before the making of the arrangements.
> (2) Section 2(1) gives effect to arrangements even if the arrangements include—
> (a) provision as to income that is not subject to double taxation,
> (b) provision as to chargeable gains that are not subject to double taxation ...

Under s.2 TIOPA a DTA has effect "in accordance with s.6" so we turn to s.6 TIOPA. Section 6(1) provides that DTAs override domestic legislation:

> Subject to this Part and Part 18 of ICTA, double taxation arrangements

> have effect in accordance with subsections (2) to (4) despite anything in any enactment.

Section 6(2) sets out seven matters which a DTA can achieve:

> (2) Double taxation arrangements have effect in relation to income tax and corporation tax so far as the arrangements provide—
> (a) for relief from income tax or corporation tax,

This is what one would expect. Section 6(2) continues:

> (b) for taxing income of non-UK resident persons that arises from sources in the UK,
> (c) for taxing chargeable gains accruing to non-UK resident persons on the disposal of assets in the UK,

In practice DTAs are not used to impose taxes.

> (d) for determining the income or chargeable gains to be attributed to non-UK resident persons,
> (e) for determining the income or chargeable gains to be attributed to agencies, branches or establishments in the UK of non-UK resident persons,
> (f) for determining the income or chargeable gains to be attributed to UK resident persons who have special relationships with non-UK resident persons, or
> (g) for conferring on non-UK resident persons the right to a tax credit under section 397(1) of ITTOIA 2005 in respect of qualifying distributions made to them by UK resident companies.

Section 6(3) TIOPA provides equivalent rules for CGT:

> Double taxation arrangements have effect in relation to capital gains tax so far as the arrangements provide—
> (a) for relief from capital gains tax,
> (b) for taxing capital gains accruing to non-UK resident persons[3] on the disposal of assets in the UK,
> (c) for determining the capital gains to be attributed to non-UK resident

3 Defined by reference in ss(7): "In subsection (3) 'UK resident person' and 'non-UK resident person' have the meaning given by section 989 of ITA 2007."

persons,

(d) for determining the capital gains to be attributed to agencies, branches or establishments in the UK of non-UK resident persons, or

(e) for determining the capital gains to be attributed to UK resident persons who have special relationships with non-UK resident persons.

### 50.3.1 *Claims*

Section 6(6) TIOPA provides:

> Relief under subsection (2)(a), (3)(a) or (4) requires a claim.

The claim is made on form HS302.

## 50.4 Interaction of DT reliefs and the remittance basis

The commentary to Art.1 of the OECD model treaty provides:

> 26.1 Under the domestic law of some States, persons who qualify as residents but who do not have what is considered to be a permanent link with the State (sometimes referred to as domicile) are only taxed on income derived from sources outside the State to the extent that this income is effectively repatriated, or remitted, thereto. Such persons are not, therefore, subject to potential double taxation to the extent that foreign income is not remitted to their State of residence and it may be considered inappropriate to give them the benefit of the provisions of the Convention on such income. Contracting States which agree to restrict the application of the provisions of the Convention to income that is effectively taxed in the hands of these persons may do so by adding the following provision to the Convention:
>
> "Where under any provision of this Convention income arising in a Contracting State is relieved in whole or in part from tax in that State and under the law in force in the other Contracting State a person, in respect of the said income, is subject to tax by reference to the amount thereof which is remitted to or received in that other State and not by reference to the full amount thereof, then any relief provided by the provisions of this Convention shall apply only to so much of the income as is taxed in the other Contracting State."

Although this text was only added to the OECD Commentary in 2003, some provision of this kind is standard in UK DTAs. A provision of this kind is included in the US/UK DTA, on which the IRS comment:

> For example, if a UK resident who is not domiciled in the UK maintains a brokerage account in Ireland into which is paid $100 in U.S.-source dividend income, the United States may impose withholding tax at the statutory rate of 30% because the dividend income will not be taxed in the UK as it has not been remitted to the UK. If the dividend income instead is paid into a brokerage account in London, the UK resident will be subject to tax in the UK and the United States will reduce the rate of withholding tax to 15%.[4]

Note that it is US tax, not UK tax, which is in issue here. UK tax issues only arise where the UK has a treaty with another state where the *other* state has a remittance basis. The only example of which I am aware is the treaty with Ireland under which DT relief from UK tax is restricted to income/gains remitted to Ireland.[5]

## 50.5 Foreign tax credit relief

### 50.5.1 *DTA tax credit*

For example, art.22 Australia DTA provides (with immaterial exceptions):

> Australian tax payable under the laws of Australia ... on income or chargeable gains from sources within Australia ... shall be allowed as a credit against any UK tax computed by reference to the same income or chargeable gains by reference to which the Australian tax is computed;

### 50.5.2 *Unilateral tax credit*

Section 9(1) TIOPA provides the rule for IT:

> Credit for tax—
> (a) paid under the law of the territory,

4 Department of the Treasury Technical Explanation of the Convention, accessible *www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

5 Ireland/UK DTA art.6 (Limitation of relief) and art.14(5) (gains).

(b) calculated by reference to income arising, or any chargeable gain accruing, in the territory,[6] and
(c) corresponding to UK tax,
is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.

Section 9(2) TIOPA is the equivalent for CGT:

(2) Credit for tax—
(a) paid under the law of the territory,
(b) calculated by reference to any capital gain accruing in the territory, and
(c) corresponding to UK tax,
is to be allowed against any capital gains tax calculated by reference to that gain.

Section 8(1) TIOPA provides statutory terminology (not used in this book):

In this Part "unilateral relief arrangements", in relation to a territory outside the UK, means the rules set out in sections 9 to 17.

I prefer the term "**unilateral tax credit**", which seems clearer.

### 50.5.3 *"Corresponding to UK tax"*

Section 9 TIOPA provides:

(4) For the purposes of subsection (1)(c), tax corresponds to UK tax if—
(a) it is charged on income and corresponds to income tax, or
(b) it is charged on income or chargeable gains and corresponds to corporation tax.
(5) For the purposes of subsection (2)(c), tax corresponds to UK tax if it is charged on capital gains and corresponds to capital gains tax.
(6) For the purposes of subsections (4) and (5), tax may correspond to income tax, corporation tax or capital gains tax even though it—
(a) is payable under the law of a province, state or other part of a country, or

6 For the issue of where income arises, see 13.5 (Trading income of non-resident) or the chapters on the type of income concerned.

(b) is levied by or on behalf of a municipality or other local body.

### 50.5.4 *Channel Islands and Isle of Man*

Section 9(7) TIOPA provides:

> If the territory is the Isle of Man or any of the Channel Islands, subsections (1)(b) and (2)(b) have effect with the omission of "in the territory".

Amended as these subsections direct, this provides:

> (1) Credit for tax—
> (a) paid under the law of the territory,
> (b) calculated by reference to income arising, or any chargeable gain accruing, ~~in the territory~~, and
> (c) corresponding to UK tax,
> is to be allowed against any income tax or corporation tax calculated by reference to that income or gain.
> (2) Credit for tax—
> (a) paid under the law of the territory,
> (b) calculated by reference to any capital gain accruing ~~in the territory~~, and
> (c) corresponding to UK tax,
> is to be allowed against any capital gains tax calculated by reference to that gain.

Since the Channel Islands and the IoM do not have a CGT, it is not immediately obvious what is the role of s.9(2).

### 50.5.5 *Quantum of income/gains*

The INT Manual provides:

> **165030 Computation – assessable amount** [January 2011]
> Where credit is claimed against UK Income Tax for foreign tax paid on income from a foreign source, the amount of that income for all UK tax purposes is:
> ***a) Foreign income assessable on the arising basis***
> No direct foreign tax is to be deducted. Where, exceptionally, the double taxation agreement provides for relief for underlying tax on a dividend

(see INTM164410) the underlying tax should be added to the amount of the income. Treat the whole of a foreign pension as chargeable to UK tax notwithstanding the deduction of one tenth under Section 65(2) ICTA 1988.

*Example:*

An individual receives a dividend of 100 from which 15 foreign withholding tax was deducted. The amount of income assessable is 100.

***b) Foreign income assessable on the remittance basis***

Add the amount of direct foreign tax attributable to the amount of income remitted. Where, exceptionally, the agreement provides for relief for underlying tax on a dividend (see INTM164410), the underlying tax should also be added to the amount of the dividend remitted. If you have difficulty in determining the amount of foreign tax attributed to income remitted, refer to the Personal Tax Team International - Advisory (part of Charity, Assets & Residence).

*Example*

| | |
|---|---|
| [Gross foreign income] | £1,000 |
| Foreign tax | £400 |
| Net foreign income | £600 |
| Remitted to UK | £300 |

*UK measure of the income*

| | |
|---|---|
| Income remitted | £300 |
| Plus foreign tax (300/600×400) | £200 |
| Therefore UK measure is | £500 |

This summarises the rules in s. 31, 32 TIOPA. Similarly for CGT. The INT Manual provides:

**169080. Remittance basis** [January 2011]

An individual who is resident or ordinarily resident but not domiciled in the UK and who makes a chargeable gain on the disposal of an asset situated outside the UK is only liable on the amount of the gain received in the UK (Section 12 TCGA 1992 see CG25300 onwards). When such an individual is chargeable on the gain received in the UK and claims credit for foreign tax charged on the same gain, the liability in the UK will be on the sum of the amount remitted to the UK plus the foreign tax attributable to the amount remitted.

Any difficulty in determining the correct addition for the foreign tax, should be referred to the Offshore Personal Tax Team (part of Charity, Assets & Residence).

### *50.5.6 HMRC practice: quantum of relief*

The INT Manual provides:

> **169100. Amount of foreign tax credit relief – general** [January 2011]
> Similar principles to those set out in INTM161210 onwards for Income Tax apply to Capital Gains Tax. The amount of credit for foreign tax is not to exceed the lesser of the foreign tax charged on the foreign gain and the UK tax charged on the doubly taxed gain at the taxpayer's marginal rate.
> If the foreign tax exceeds the UK tax, the excess can neither be deducted from the amount of the gain chargeable to Capital Gains Tax, nor can it be repaid.
> The foreign tax should not be increased by any indexation allowance.
> A taxpayer's marginal rate for Capital Gains Tax is the rate at which the tax is charged for the year of assessment.
> **169110. Amount of foreign tax credit relief – more than one gain** [January 2011]
> The amount of foreign tax credit relief must be calculated separately for each gain. An excess of foreign tax over UK tax on one gain cannot be credited against UK tax on another foreign gain or on the gain on the disposal of a UK asset.
> **169120. Amount of foreign tax credit relief – losses** [January 2011]
> Allowable losses should be set firstly against chargeable gains on which no foreign tax credit relief is due. It would normally be to the taxpayer's advantage to set any balance of losses, in order, against the gains on which the lowest level of foreign tax has been paid. This should secure the maximum amount of foreign tax credit relief.
> **169130. Amount of foreign tax credit relief – exemption from tax** [January 2011]
> Where the total of the chargeable gains in any year of assessment exceeds the exempt amount provided by TCGA 1992 Section 3, the exempt amount should, as far as possible, consist of gains on which no foreign tax has been charged. This will enable credit for foreign tax charged on the gains to be allowed against the UK Capital Gains Tax charged on those gains.
> The following example demonstrates the application of this paragraph and of INTM169120
> In 2002–03, an individual has the following chargeable gains:

| | | |
|---|---:|---|
| UK | £8,000 | |
| Country X | £20,000 | Foreign tax £4,000 |
| Country Y | £6,000 | Foreign tax £2,700 |

He has losses of £6,000 available for deduction. The exemption limit for 2002–03 is £7,700. The computation of his liability is as follows:

| | UK Gain | Country X Gain | Country Y Gain |
|---|---|---|---|
| | £8,000 | £20,000 | £6,000 |
| Less Loss | £6,000 | | |
| | £2,000 | £20,000 | £6,000 |
| Less Exempt Amount | £2,000 | £5,700 | |
| | 0 | £14,300 | £6,000 |
| Tax at 40% | 0 | £5,720 | £2,400 |
| Less Foreign Tax Credit Relief | 0 | £4,000 | £2,400 |
| Tax Payable | Nil | £1,170 | Nil |

The balance of Country Y's tax of £300 (2,700 less 2,400) cannot be set off against the Capital Gains Tax payable on the Country X gain and cannot be repaid.

**169140. Amount of foreign tax credit relief – extent to which a gain is doubly taxed** [January 2011]

As mentioned in INTM169100, credit for foreign tax cannot exceed the UK tax due on the doubly taxed gain. There may be situations where the amount of the UK gain is different from the amount of the gain that is taxed in the other country; or where the period of ownership of the asset that is taken into account in computing the UK gain is different from the period of ownership of the asset that is taken into account in computing the gain in the other country. In either case, the amount of the foreign tax allowable for foreign tax credit relief may need to be restricted. For further details on this, see CG14395 –CG14425.

**169150. Amount of foreign tax credit relief – basis of allowance** [January 2011]

Credit may be claimed for the foreign tax paid on foreign capital gains against the UK tax due on the same gain, irrespective of the tax year in which the foreign tax is charged.

Where credit is claimed on any other basis or where there are difficulties in determining the amount of foreign tax credit relief due, advice may be sought from the Offshore Personal Tax Team (part of Charity, Assets & Residence).

However HMRC changed their minds in Revenue & Customs Brief 17/10:

**Introduction**

The purpose of this brief is to publicise a change to the established practice of restricting the amount of Foreign Tax Credit Relief (FTCR) that can be deducted when calculating the amount of UK tax due on a chargeable gain.

**Background**

Where a gain is chargeable to UK Capital Gains Tax or UK Corporation Tax and the same gain has also been taxed in another country then FTCR can be claimed in respect of the foreign tax paid.

Our practice has been to restrict the amount of FTCR if different periods of ownership of the asset are considered when arriving at the gain assessable in the UK and the foreign gain, or if the amount of the UK gain is less than the foreign gain.

We have reconsidered our view and are revising our practice so that the whole of the foreign tax is allowable as FTCR up to the amount of the UK tax on the gain.

**The current practice**

The established practice has been to restrict the amount of FTCR in the following two situations:

**Situation one**

The amount of gain charged to foreign tax may be calculated by reference to a longer period of ownership than the period on which the gain charged to UK tax is based. The most common instance is where assets were acquired before the 31 March 1982 and the gain chargeable in the UK is based only on the period from 31 March 1982 onwards. In such cases the established practice has been to restrict the FTCR due by the following calculation:

period of time assessed by UK divided by period of time assessed by foreign authority multiplied by foreign tax equals allowable FTCR

For example, where the asset was acquired on 31 March 1971 and disposed of on 31 March 1993, with foreign tax of £10,000 charged then the maximum amount of FTCR would be restricted as follows:

31 March 1993 minus 31 March 1982 equals 11 years divided by 31 March 1993 minus 31 March 1971 equals 22 years multiplied by £10,000 equals £5,000

**Situation two**

Where the gain charged in the UK is less than the gain charged to foreign tax, the established practice has been to restrict the maximum amount of FTCR due by the following calculation:

amount of UK assessment divided by amount of foreign assessment multiplied by foreign tax equals allowable FTCR

For example, where the UK assessed a gain of £55,000, the gain charged to foreign tax was £75,000 and the foreign tax was £15,000 then the FTCR would be restricted as follows:

£55,000 divided by £75,000 multiplied by £15,000 equals £11,000

**How we intend to implement the revised practice**

From 19 March 2010 the practices described above that restrict the allowable FTCR will end. In all cases where FTCR is claimed against UK tax on chargeable gains, the whole of the foreign tax will be allowable up to the amount of the UK tax on the gain, provided that the gain charged in both countries relates to the same disposal.

In the examples above, the maximum allowable FTCR would now be the full £10,000 of foreign tax in the first case and the full £15,000 of foreign tax in the second, provided, in each case, that this amount was less than or equal to the UK tax.

This change will bring the chargeable gains practice in line with the Income Tax practice, which does not restrict the amount of FTCR allowed where the amount assessed in the UK is less than the amount of income assessed to foreign tax.

**Implications**

If tax returns were submitted with a claim to FTCR on the basis that the FTCR should be restricted, and those returns are still open or within the self-assessment window for amendment, they may be amended to reflect the change in practice. In other cases where FTCR has been restricted a claim can be made for additional relief within the normal time limits.

The current time limit for claims and assessments for Income Tax and Capital Gains Tax is five years from the 31 January immediately following the tax year and for assessments to Corporation Tax six years from the end of the accounting period to which the claim relates.

However, following changes announced in the 2008 Budget, from 1 April 2010 there will be a standard limit of four years from the end of the tax year for making claims of repayments to Income Tax and Capital Gains Tax and four years from the end of the accounting period for Corporation Tax.

Under these rules claims resulting from this change of practice that relate to Income Tax and Capital Gains Tax for the tax year 2004-05 would have to be made before 1 April 2010 and claims for the tax year 2005-06 must be made before 6 April 2010. Similarly, companies would have until 31 March 2010 to make claims for accounting periods ending before 1 April 2006, provided such claims are within the current six year time limit.

Because publication of this brief leaves so little time for such claims to be made within the statutory time limits, we will, exceptionally, accept late claims for the tax years 2004-05 and 2005-06 or accounting periods ending on dates between 19 March 2004 and 29 June 2006, provided that those claims are for additional tax credit relief resulting from this change of practice and are made no later than 30 June 2010.

**Further Information**

Guidance on the current practice can be found at CG14380 onwards. The Capital Gains Manual will shortly be updated to reflect the change in practice.

See too 49.10 (Tax credit relief: currency conversion date).

## 50.6 Foreign tax credit relief: property income

The Property Income Manual provides:

**4703. IT cases for 2005-06 onwards** [February 2007]

**Credit for foreign tax**

If the overseas income has suffered foreign tax and a claim to tax credit relief is made, it will be necessary, for the purposes of the source by source rule (see INTM161210) to identify the amount of UK tax attributable to income from each particular property. Where, therefore, tax credit relief is claimed separate computations of profits and losses for each property will be required. For the purposes of calculating tax credit relief, losses should be deducted in the order most favourable to the company's claim. Normally this will mean that losses should be allocated first against the source which has suffered at the lowest rate of foreign tax.

A company's flexibility in deciding how to allocate the deduction set out in Section 797(3) ICTA 1988, subject to the limitations in respect of deficits on non-trading loan relationships set out at Section 797(3)(A) and (B) ICTA 1988, is unaffected by any of the changes.

## 50.7 CGT/IT computation deduction

Section 112 TIOPA provides:

**112 Deduction from income for foreign tax (instead of credit against UK tax)**

(1) The amount of any income arising in any place outside the UK is reduced for the purposes of the Tax Acts—

(a) by any amount which has been paid in respect of non-UK tax on that income in the place where the income arose, or

(b) if subsection (2) applies, by the lesser amount mentioned in that subsection.

(2) This subsection applies if credit would, were it allowable in respect

of the income, be reduced under section 39 (reduction by reference to accrued income losses) to the lesser amount given by section 39(5).

(2A) But if X is less than Y, an amount equal to the difference between X and Y must be subtracted from the amount by which any income of a person ("the relevant income") is reduced under subsection (1)(a).

(2B) In subsection (2A)—

X is the amount of the relevant income that the person would (disregarding this section) be required to bring into account for income tax or corporation tax purposes, less any deduction that the person would be allowed to make for the amount paid in respect of non-UK tax, and

Y is the amount of the relevant income (that is to say, the amount on which the amount in respect of non-UK tax is paid).

(3) If—

(a) income of any person ("P") is reduced under subsection (1) by an amount paid in respect of tax on that income in the place where the income arose, and

(b) a payment is made by a tax authority to P, or any person connected with P, by reference to that tax, the amount of P's income is increased by the amount of the payment.

(4) Subsection (1)—

(a) has effect subject to section 31(2)(a) (no deduction for foreign tax if credit allowed and UK tax calculated otherwise than by reference to the amount received in the UK),

(b) has effect subject to section 143(5) and (6) (no deduction for special withholding tax if UK tax calculated otherwise than by reference to the amount received in the UK),

(c) does not apply to income the tax on which is to be calculated by reference to the amount of income received in the UK, and

(d) does not require any income to be reduced by an amount of underlying tax which, under section 60(3), is to be left out of account for the purposes of section 57.

(5) Subsection (1) has effect for corporation tax purposes despite—

(a) section 464(1) of CTA 2009 (matters to be brought into account in the case of loan relationships only under Part 5 of that Act), and

(b) section 906(1) of that Act (matters to be brought into account in respect of intangible fixed assets only under Part 8 of that Act).

(6) In subsection (1) "non-UK tax" means tax under the law of a territory outside the UK.

(7) For the purposes of subsection (3), whether a person is connected with P is determined in accordance with section 1122 of CTA 2010.

Section 113 TIOPA has the equivalent rule for CGT:

> **113 Deduction from capital gain for foreign tax (instead of credit against UK tax)**
> (1) Subsection (2) applies to tax if it is—
> (a) chargeable under the law of any territory outside the UK on the disposal of an asset, and
> (b) borne by the person making the disposal.
> (2) The tax is allowable as a deduction in the calculation of the gain.
> (3) Subsection (2) is subject to—
> (a) Chapters 1 and 2 so far as they apply for corporation tax purposes (see, in particular, section 31),
> (b Chapters 1 and 2 so far as they apply for capital gains tax purposes (see, in particular, section 31), and
> (c) section 143 (which includes provision about taking account of special withholding tax when calculating a gain for capital gains tax purposes).
> (4) In subsection (1) "asset" and "disposal" have the same meaning as in TCGA 1992 (see, in particular, section 21 and the following provisions of TCGA 1992).

Thus foreign tax credit relief (if claimed) has priority over a CGT computation deduction.

At first sight it is not obvious when a CGT computation deduction would be better than foreign tax credit relief. One case is where foreign CGT is payable but UK CGT is not (because of a difference in valuation rules or because some UK relief applies). In such a case the computation deduction may increase the loss allowable for UK CGT purposes (similarly for IT). But that must be a rare case.

The INT Manual provides:

> **169090. Deduction not credit**
> A deduction for the foreign tax should be made in the computation of the gain or loss when there is no claim to foreign tax credit relief or when no UK tax is chargeable on a gain; for example, when the UK computation shows a loss on the disposal and consequently there is no UK tax against which credit for any foreign tax can be given. No deduction is due, however, when credit relief is claimed, for any part of the foreign tax paid on a gain which does not qualify for credit because it exceeds the UK tax chargeable on the same gain.

INT Manual provides:

> **161050. Deduction instead of credit** [January 2011]
> It may sometimes be to the taxpayer's advantage not to make a claim to tax credit relief, for example where a business's trading profits are wholly covered by capital allowances so that there is no Income Tax or Corporation Tax payable on those profits, or where the trading results show a loss. If, for any reason, tax credit relief is not claimed, the foreign tax paid must be deducted from the income from the foreign source in computing the amount of the income for UK tax purposes (Section 112 ICTA 1988). This may serve to create or increase a loss which can be dealt with under the normal provisions for losses.
> Section 112 refers to 'any sum which has been paid in respect of non-UK tax' on income. This means tax alone and not, for example, interest paid in the foreign country for late payment of the foreign tax. Nor may a deduction be allowed for 'tax spared' (INTM161270) as it is not tax which has been paid; nor for underlying tax (INTM164060 and INTM164360) as it is not paid on the dividend in question; nor for taxes similar to UK VAT (see, however, INTM161080). Refer to Business International (Outward Investment Team), any case where it is not clear that the tax for which a deduction is sought under Section 112 is a tax on income.
> Section 112 allows a deduction for foreign tax paid on income 'in the place where the income arose'. Refer to Business International (Outward Investment Team), any case where a deduction is sought for foreign tax paid on income which arises wholly or partly from work carried out in the UK.
> Some foreign taxes, if not deductible under sections 112 to 115, may still be allowable expenses in computing the profits of a trade or profession (see INTM161080, BIM45900 onwards).
> There are special rules relating to the deduction of foreign tax for life insurance companies, including overseas life insurance companies – see the Life Assurance Manual.

## 50.8 Indirect DT reliefs

### 50.8.1 *Can a third party claim a DT exemption?*

DT exemptions are not in principle restricted to the person who is treaty-resident outside the UK. If (as is standard form) a DT exemption provides that income shall be taxable only in the foreign state, a settlor or transferor in the UK cannot be taxable on that income. Sections 2 and 6 TIOPA authorise DT exemptions to apply in this way, for they simply provide "relief", ie relief for anyone.[7] I refer to this as "**indirect DT exemption**".

This is self-evident, but authority can be cited if necessary. In *Lord Strathalmond v IRC*,[8] US source income arose to Lady Strathalmond. The rule at that time (only repealed in 1988) was that income of a married woman was deemed to accrue to her husband, so in the absence of treaty relief, Lord Strathalmond would have been taxable. The wife was treaty-resident in the US but the husband was not. Nevertheless he was entitled to DT exemption. The treaty exempted the income, not the treaty-resident individual, so a third party otherwise taxed on the income could claim the benefit of treaty relief even though not treaty-resident. Lord Millett summarised the point:

> [*Strathalmond*] shows that the relief from UK tax accorded by a double taxation agreement can enure for the benefit of a third party.[9]

Again, in *Padmore v IRC*[10] a partner was entitled to DT exemption on income of a Jersey partnership where the partnership was a person treaty-resident in Jersey but the partner was not.

I stress this because there is a comment to the contrary by the Special Commissioner in *IRC v Willoughby*[11] but that must be dismissed as erroneous.

Indirect DT exemption is restricted in the case of trading income: see 13.20.2 (Treaty override for trading income).

### 50.8.2 *Can a third party claim foreign tax credit relief?*

The position is the same for DTA tax credit. The position is the same for unilateral tax credit, because s.9(1) TIOPA allows "relief" or "credit" ie relief and credit for anyone.

---

7 One might also refer to s.6(2)(f) TIOPA; but DTAs usually take the form of providing relief, rather than the form of disattributing income otherwise attributable to a settlor or transferor.

9 *Bricom v IRC* 70 TC at p.290.

10 62 TC 352.

11 [1995] STC 143 at p.169.

The former ITH provided:

**Tax charged on different person**
**618. General**
There is no requirement in the credit rules that the person charged to the UK tax is to be the same as the person charged to the foreign tax. The rules simply demand that the income or gains subjected to the foreign tax be the same income or gains as are subject to the UK tax.
**619. Capital gains**
An example of this situation is found in Section 140 TCGA 1992 which deals with the charge on capital gains where a branch or agency overseas is domesticated, that is to say transferred to a non-resident company in exchange for shares. In those circumstances a charge on the gains on branch assets transferred is deferred until either the transferor sells the shares or the transferee sells the assets (in the latter case the sale has to be within six years of the acquisition). In that latter instance where the transferee sells the asset, any foreign tax on the gains is paid by the transferee. But the UK company is charged in respect of the capital gains on those same assets and qualifies for credit relief because the gain has been taxed abroad, although the tax has actually been charged on the transferee.
A similar situation could occur with transfers under Section 171 TCGA 1992 between UK group companies. If the assets involved are situated abroad and the foreign tax authority taxes the UK company making the transfer, the benefit of that tax can be taken by the transferee group company when there is a disposal outside the group generating a UK tax charge on the relevant asset.
**620. Income**
On the income side a similar situation could occur where a UK resident is required to be assessed on income which in fact is the income of some other person and has been taxed abroad.

The INT Manual makes the same point:

**169040. Gain taxed UK/abroad** [January 2011]
In determining whether UK tax is computed by reference to the same gain on which the foreign tax is charged, there is no necessity that the respective tax liabilities should arise at the same time or that they should be charged on the same person. Thus, the same gain is regarded as taxed both overseas and in the UK where, for example:
- overseas tax is payable on a no gains/no loss disposal within a UK group of companies and liability to UK tax arises on the subsequent

disposal of the asset taking in the uplift in value to the date of the first disposal under s.171 TCGA 1992

- where an overseas trade carried on through a UK branch or agency is transferred to a local subsidiary the gain on the related disposal of the chargeable assets may immediately be crystallised for local tax purposes but deferred under s.140 TCGA 1992 until the shares in the local subsidiary are sold (or the subsidiary disposes of the assets within six years) thus giving rise at that point to a gain chargeable to UK tax computed in whole or in part by reference to the earlier uplift in value
- overseas tax is payable by reference to increases in the value of assets although there has been no disposal and there is a subsequent disposal attracting UK liability
- overseas tax is payable in its country of residence by a non-resident company on the disposal of an asset and in the UK the gain is charged on a UK resident individual under s.13 TCGA 1992 (see INTM169060).

In each case, the amount of relief may need to be restricted under the rules set out in INTM169100 onwards.

Where, by contrast, it is not possible to identify the gain subject to overseas tax with that on which UK liability arises, no credit relief is due. Thus, where overseas tax is charged on a disposal covered by rollover relief under s.152 TCGA 1992 and liability to UK tax arises on the disposal of the replacement asset, the gain on that disposal cannot be identified with the gain on the earlier disposal and no credit relief is due. A deduction for the overseas tax may, however, be allowed under s.113 TCGA 1992 (INTM169090) in computing the gain for rollover purposes.

SP 6/88 provides:

**Double taxation relief: chargeable gains**

**General**

[The SP cites the relevant statutory provisions and continues:]

3 The principal requirement for the granting of credit for overseas tax against liability to capital gains tax (or corporation tax on chargeable gains) is therefore that the overseas tax should be computed by reference to the same gain as the UK tax. There is no requirement that the respective tax liabilities should arise at the same time nor that they should be charged on the same person.

**Specific examples**

4 The Revenue's view is that the following sets of circumstances fall within the terms of the standard credit article and TA 1988 s 790 and may therefore give rise to a credit for overseas tax against UK capital

gains tax or corporation tax on chargeable gains.

(i) The overseas tax charges capital gains as income.

(ii) Overseas tax is payable on a disposal falling within TCGA 1992 s 171 (transfers within a group of companies treated as taking place on a no gain/no loss basis) and a liability to UK tax arises on a subsequent disposal.

(iii) An overseas trade carried on through a branch or agency is domesticated (ie transferred to a local subsidiary) and relief is given under TCGA 1992 s 140. There is a subsequent disposal of the securities (or the subsidiary disposes of the assets within six years) giving rise to a liability to UK tax and overseas tax is charged in whole or in part by reference to the gain accruing at the date of domestication.

(iv) Overseas tax is payable by reference to increases in the value of assets although there has been no disposal. There is a subsequent disposal of the assets on which a liability to UK tax arises.

5 It will be seen that relief is conditional upon the subject of the overseas tax being identified with the gains on which the UK tax liability arises. In contrast, where roll-over relief is claimed, for example under TCGA 1992 s 152, the gain on disposal of the old asset is not subjected to UK tax. The gain on realisation of the new asset remains a gain separate from that realised on sale of the old asset and overseas tax payable as a result of the sale of the old asset is not creditable against UK tax payable on the gain realised on sale of the new asset. However, in such circumstances TCGA 1992 s 278 allows the overseas tax to be claimed as a deduction in computing the gain for roll-over relief purposes.

This raises the issue of characterisation.

## 50.9 The characterisation issue

DT reliefs provide relief for particular types of income, and so relief only applies if the taxpayer receives that type of income. The characterisation of income in the hands of the UK taxpayer is a central question. I refer to this as "**the characterisation issue**".

*Hughes v Bank of New Zealand*[12] concerned exemption for interest on FOTRA securities, not a DTA, but the characterisation issue is not

12 21 TC 472.

restricted to DT reliefs: it can arise wherever an exemption applies to a particular type of income. This case concerned a non-resident bank with a UK branch whose profits were taxable. The branch's trading receipts included interest from FOTRA securities (exempt from UK tax in the hands of a non-resident). The interest retained its exemption. Lord Millett summarised:

> [*Hughes*] is authority for the proposition that exempt interest retains its character as interest even when it is taxable as a component element of the recipient's trading profits. ... Interest from exempt securities does not cease to be such by being included as a component element of the recipient's taxable profit.[13]

On the other side of the line, according to Lord Millett, is *IRC v Australian Mutual Provident Society*.[14] This concerned a non-resident life assurance company with a UK branch whose profits were taxable. The taxable profits were calculated in an unusual way: the relevant rule provided that an unidentifiable portion of the world-wide income of the company derived from the investment of its life assurance fund, calculated in accordance with a mathematical formula, should be charged to tax as income derived from business in the UK. It was held that the rule did not tax the company's investment income as such but something different, described as "a conventional sum calculated in accordance with the rule"; the sum to be taxed was not interest, even though interest from FOTRA securities constituted one of the elements in the calculation.

The characterisation issue often arises in cases where indirect DTA exemption is sought (though it is not restricted just to such cases). Assuming the income in the hands of the treaty-resident recipient third party qualifies for DT relief, is the income which the UK taxpayer receives (or better, is deemed to receive) the *same* income? Or has the income "changed its character" (in which case DT reliefs do not apply)?

*IRC v Willoughby* offers an example. Here the transferor ("T") paid a premium to a life assurance company which was treaty-resident in the Isle of Man. Under s.720 T was (in principle) subject to tax on the income

13 *Bricom v IRC* 70 TC 270 at p.290. Nowadays the FOTRA exemption is restricted so as not to apply in this type of case.

14 28 TC 388 "as explained by Lord Radcliffe" in *Ostime v Australian Mutual Society* [1960] AC 459 at p.479, 38 TC 492.

arising to the life assurance company from the premium. The IOM DTA provided relief for the commercial profits of the life assurance company; but the income on which T was subject to tax could not be characterised as the commercial profits of the life assurance company; T's income was merely one (in the context of the whole, trivial) element by reference to which those profits were computed. So for this reason (there could be others) T could not claim indirect DTA exemption.[15]

Millett LJ summarised:

> ... the question turns on the nature of the statutory process... where tax is charged on a conventional or notional sum which exists only as the product of a calculation, the fact that one of the elements in the calculation is measured by reference to the amount of exempted income does not make the exempted income the subject of the tax: *Australian Mutual Provident Society.*[16]

### 50.9.1 *The correct approach to characterisation*

Where income accrues to A, and a statutory provision provides that income is deemed to accrue to B, the provision may or may not change the character of the income, that is, B's income may or may not be a different type from A's income. It is a question of construction.

In straightforward cases, where B's deemed income is exactly equivalent to A's actual income, it is suggested that the courts should normally conclude that the legislation does not change the character of the income. That is, if there is a change in the character of the income, the legislation needs to say so directly or by implication. One reason that this is the case is that otherwise there would be a breach of the treaty. DTAs are not construed technically: if a DTA provides income is exempt, Parliament has power to breach the treaty and tax that income; it may do so expressly or by implication. But legislation changing the character of the income is as much a breach of the treaty as directly taxing the income. While the UK can deliberately breach a treaty, tax legislation should be construed consistently with a treaty where possible.

A second reason is that in a simple case where B's deemed income is

---

15 Though this is not quite the way that the Special Commissioner dealt with the point: 70 TC 57 at p. 90. The taxpayer wisely did not appeal on the DTA issue.

16 *Bricom v IRC* 70 TC 272 at p.290..

exactly equivalent to A's actual income, there is no rational distinction to be drawn between A's income and B's equivalent income.

This is consistent with a purposive approach. Lord Steyn said:

> The tendency should therefore generally speaking be against literalism. What is literalism? It will depend on the context. But an example is given in The Works of William Paley... the tyrant Temures promised the garrison of Sebastia that no blood would be shed if they surrendered to him. They surrendered. He shed no blood. He buried them all alive. This is literalism. If possible it should be resisted in the interpretative process.[17]

It is worth stepping back to remember that the purpose of double tax treaties is to allocate taxing rights between countries.

### 50.9.2 *Bricom*

*Bricom v IRC* concerned a claim for indirect DT exemption where:

(1) Income accrued to a subsidiary company treaty-resident outside the UK.
(2) The parent company was domestic-law UK resident and not treaty-resident outside the UK.
(3) The parent company was in principle subject to tax under the Controlled Foreign Company ("CFC") provisions.

The CFC provisions operate in three stages:

> Stage 1. *Ascertainment:* the CFC's chargeable profits are ascertained .
> Stage 2. *Apportionment:* the CFC's chargeable profits (less any creditable tax) are apportioned among its shareholders. In *Bricom* the CFC was a wholly-owned by the taxpayer, so all its chargeable profits were attributed to the taxpayer.
> Stage 3. *Assessment:* The taxpayer is assessed on "a sum equal to corporation tax at the appropriate rate on that apportioned amount of profits" (less the apportioned amount of creditable tax) and the sum assessed is recoverable from the taxpayer "… as if it were an amount of

17 *Sirius International Insurance v FAI General Insurance* [2004] 1 WLR 3251 at [19]. But for a defence of Temures see Goldberg, "The Problem is the Perception" GITC Review Vol. 4 No. 2 accessible *www.taxbar.com* ("Of course, the garrison should have been advised by a lawyer before accepting the surrender terms.")

> corporation tax chargeable on the taxpayer".

The Special Commissioners held that interest received by the CFC lost its character as interest at stage 1. Millett LJ disagreed:

> It is ... a reflection of the Revenue's unsuccessful argument in *Hughes,* viz: that interest from exempt securities loses its character as income by being included in the computation of the recipient's trading profits.

So far so good. But the interest lost its character at stage 2:

> The correct analysis is that the interest received by Spinneys [the CFC] is not included in the sum apportioned to the taxpayer on which tax is chargeable. It merely provides a measure by which an element in a conventional or notional sum is calculated, and it is that conventional or notional sum which is apportioned to the taxpayer and on which tax is charged. ...

The CFC case was on the wrong side of the distinction because "the chargeable profits" as defined by s.747(6)(a) are *a notional sum.* Why are they more notional than the profits of any company?

> They do not represent any profits of Spinneys on which UK corporation tax is chargeable, for there are no such profits.

Obviously correct, but not relevant. The question is not whether the CFC income of the taxpayer represents profits of the CFC *on which UK corporation tax is chargeable*. The question is whether it represents the profits of the CFC (or more accurately, whether its type is the same as those profits). The judgment then turns to this:

> Nor do they represent any actual payments or receipts of Spinneys, whether of interest or anything else.

Why not?

> They are merely the product of a mathematical calculation made on a

> hypothetical basis and making counterfactual assumptions.[18] The "chargeable profits" which are defined by s.747(6)(a) exist only as a measure of imputation. What is apportioned to the taxpayer and subjected to tax is not Spinneys' actual profits but a notional sum which is the product of an artificial calculation.

The mere fact that taxable profits are ascertained by a mathematical calculation does not by itself change the character of the profits. The amount of profits on which corporation tax is charged is in every case the product of a mathematical calculation.

The decision in *Bricom* is authority for the following propositions:

(1) The application of DT reliefs requires that the income of the taxpayer is the same income as that which qualifies for relief. (This is right and could not be doubted.)
(2) The characterisation issue is a matter of construction of the relevant provisions.
(3) The CFC provisions did alter the character of the income received by the taxpayer. This decision does not, it is submitted, shed a great deal of light on the question of construction of the other provisions considered in this chapter.

One would like to think that the unfairness of *Bricom* was a factor in the ECJ decision that the CFC legislation was contrary to EU law.[19] That would have been just.

### 50.9.3 *Four types of deeming*

Tax provisions often use the word "deem" or its plain English equivalent, "treated as". When considering the characterisation issue in relation to deeming provisions, it is important to bear in mind that there are several different fictions that deeming provisions may be used to achieve:

(1) *Deeming as to recipient:* Statute may deem that whereas income actually arose to A, it is deemed to arise to B.
(2) *Deeming as to time:* Statute may deem that whereas income actually arose at one time, it is deemed to arise at another time.
(3) *Deeming as to quantum:* Statute may deem that whereas the amount

---

18 Millett wisely does not state what the hypothetical and counterfactual assumptions are: one must assume that the CFC is UK resident.

19 See 51.3.3 (Public policy exemption).

of income which actually arose to A was £x, it is deemed to be of a different amount, £y.

(4) *Deeming as to character:*
   (a) Statute may deem that whereas income which actually arose was of type A, the taxpayer is deemed to receive income of another type (type B).
   (b) Statute may deem that whereas what arises is gains, it is deemed to be income.
   (c) Statute may deem that whereas no income or gains arise to anyone, the taxpayer is deemed to receive income or gains.

Case (1) does not by itself change the character of the income. This is (I think) self-evident, but there is authority:

> Exempt income does not change its character or lose its exemption merely because it is deemed to be the income of another person or is imputed to him: *Strathalmond.*[20]

The same applies if the UK provision apportions income to the taxpayer: "apportion" has the same meaning as "deems to accrue to" or "impute".[21] The term "attribute" is also the same.[22]

Likewise in cases (2) and (3) DT reliefs will still apply.

In case (4)(a) DT relief applicable to type A income only (not type B income) will not exempt the taxpayer. Cases (4)(b)(c) need further consideration.

So the mere fact that the legislation uses the terminology or technique of deeming does *not* mean that DT reliefs cease to apply. One must ask what is the deeming, and in particular, is it deeming as to the character of the income?

### 50.9.4 *"An amount equal to" the income*

In Bricom:

> The taxpayer lays stress on the fact that what is apportioned under

20 *Bricom v IRC* 70 TC 272 at p.290.
21 *Bricom v IRC* 70 TC 272 at p.290.
22 The terms "apportion" and "attribute" are used synonymously in s.13 TCGA; see 47.2 (Attribution of gains to participator).

> s.747(3) is not "a sum equal to the chargeable profits" but the chargeable profits themselves; and that the subject of the charge to tax in s.747(4)(a) is not "a sum equal to the apportioned part of the chargeable profits" but the apportioned part of the chargeable profits itself.

The distinction proposed is between the profits and an amount equal to the profits. The taxpayer (it seems) raised this distinction but it did not help. The characterisation of income may be altered even though the statute does not use the expression "an amount equal to". That is, the absence of that expression does not determine the characterisation issue. The issue is one of construction, and must be decided in the context of the provisions as a whole. Conversely, the use of the expression "an amount equal to" does not conclude the characterisation issue. While it is apt to describe a change of character, it does not necessarily do so. The entire provisions must be considered. I identify below some cases where this phrase is used without changing the character of the income. Indeed, a distinction between income and an amount equal to the income strikes me as a distinction without a difference, a foolish distinction to introduce into tax jurisprudence, which is bound to lead to confusion, muddle and uncertainty. This distinction is criticised in *Huitson*:

> [The DTA] issue has spawned a somewhat metaphysical debate as to whether the "notional" income under section 739 is different from the "real" income in the hands of the foreign resident, so that taxation of the "notional" does not conflict with relief of the "real".[23]

## 50.10 DT reliefs and gains of remittance basis taxpayer

After this lengthy theoretical discussion, we can turn to some practical questions. Section 12 TCGA provides:

> (1) This section applies to foreign chargeable gains accruing to an individual in a tax year ("the foreign chargeable gains") if—
> (a) section 809B, 809D or 809E of ITA 2007 (remittance basis) applies to the individual for that year, and
> (b) the individual is not domiciled in the UK in that year.
> (2) Chargeable gains are treated as accruing to the individual in any tax

---

23 *R on the application of Huitson v HMRC* [2010] EWHC 97 (Admin) at [64].

> year in which any of the foreign chargeable gains are remitted to the UK.
> (3) The amount of chargeable gains treated as accruing is equal to the full amount of the foreign chargeable gains so remitted in that year.

Art.13(5) OECD Model Convention provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

Suppose:
(1) a remittance basis taxpayer is domestic-law UK resident and treaty-resident outside the UK.
(2) the taxpayer gains which are in principle subject to CGT.
Can the individual claim DT relief? This raises a characterisation issue. (The individual is not claiming indirect treaty relief but as noted, the characterisation point is not restricted to that.) However, everyone agrees that DT exemption applies to gains taxable on the remittance basis. Section 12(2) TCGA imposes a deeming as to time, that is, the gains which actually accrue on disposal are deemed to accrue when remitted. Section 12(3) imposes a deeming as to amount. The character of the gains is not altered. That is, the chargeable gains which are "treated as accruing" are the actual gains which accrued to the individual, and not different (notional) gains.

50.10.1 *Timing: interaction with remittance basis*

DT relief requires in principle that the alienator is treaty-resident outside the UK at the time the gain accrues.[24] What if the gain is a foreign gain of a remittance basis taxpayer? The gain is deemed to accrue at the time that the gain is remitted. If that deeming applies for DT purposes, then odd consequences would follow. In the following examples, assume that foreign gains accrue to a remittance basis taxpayer who is domestic-law UK resident throughout. Suppose two cases:
(1) The individual is not treaty-law resident outside the UK when the

24 *Smallwood v HMRC* [2009] STC 1222. This will need to be reviewed when the case is final.

gains accrue but is treaty-law resident when the gains are remitted.
(2) The individual is treaty-law resident outside the UK when the gains accrue but is not treaty-law resident when the gains are remitted.

If the timing rule applies for DT purposes, DT relief applies in case (1) and not in case (2). That is absurd. It would often lead to double taxation or double non-taxation. So it is considered that the timing rule does not apply for DT purposes, so DT relief can apply in case (2) but not in case (1).

## 50.11 DT reliefs: s.624 ITTOIA

This section considers the position of a settlor-interested trust whose settlor is domestic-law UK resident. There are four states potentially involved:

(1) the state where the settlor is resident (here assumed to be the UK)
(2) the state where the trustees are resident
(3) the state where a beneficiary is resident
(4) the state where the source of the income arises

Thus there are many ways s.624 could lead to double taxation. In addition to the settlor's UK tax liability under s.624:

(1) The trustees may be subject to foreign tax in another state
    (a) on income with a source in that state
    (b) on any income if they are resident in that state.
(2) In the case of an IP trust, the life tenant may be subject to foreign tax in another state
    (a) on income with a source in that state
    (b) on any income if they are resident in that state.

### 50.11.1 *Foreign tax credit relief*

Where trust income is subject to a foreign tax, foreign tax credit relief in principle applies for the benefit of a settlor within s.624. That follows from first principles but if authority were needed, see s.623 ITTOIA.[25]

The INT Manual considers the position where a beneficiary is taxed in the UK and a settlor is taxed in some other country under a foreign equivalent of s.624:

25 See 24.2.7 (Settlor's deductions and reliefs).

**161040. Same income** {January 2011]
The credit Article in an agreement and the corresponding provision for unilateral relief in s.9 TIOPA 2010 are concerned with relief from double taxation on income or gains. For credit to be allowed, it is not a requirement that the foreign tax on income or gains has to be borne by the same person who is liable to UK tax on the same income or gains. For example, if the foreign country taxes a settlor on the income of a UK resident beneficiary, who is chargeable to UK tax on that income, credit may be given to the beneficiary for the foreign tax paid by the settlor. However, it must be the same income which is being taxed in both countries. ...

50.11.2 *Trustees treaty-resident outside UK*

This section considers whether DT exemptions are available where:
(1) income accrues to a settlor-interested trust whose trustees are treaty-resident outside the UK.
(2) the settlor is domestic-law UK resident and not treaty-resident outside the UK.

The settlor is subject to tax under s.624. It is considered that the settlor can claim indirect DT exemption.

Section 619 and 624 ITTOIA must be read together:

**619(1)** Income tax is charged on ... (a) income which is treated as income of a settlor as a result of section 624 (income where settlor retains an interest) ...
**624(1)** Income which arises under a settlement is treated for income tax purposes as the income of the settlor and of the settlor alone...

Section 624 imposes a deeming as to the recipient, that is, the income which actually arises to the trustees is deemed to accrue to the settlor. The character of the income is not altered. That is, the income which is "treated as the income of the settlor" is the actual income of the trustees, and not different (notional) income.[26]

It follows that the settlor can in principle claim indirect DT exemption provided that the income is of a type which qualifies for DTA relief.

Why in fact is there a charge to tax under s.619? If the settlor is treated

26 See 50.8.1 (Can a third party claim a DT exemption?).

as receiving (say) interest income, the income would be chargeable to tax under the charging provisions relating to interest. No separate charge to tax is needed. The drafter is in my view slightly muddled as to whether the income of the settlor is the settlement income or notional income. The confusion is understandable, for it is not rational to try to draw a distinction between the two, they amount to exactly the same thing.

It might be argued that since the income is deemed to be the income of the settlor and of the settlor alone, it is deemed not to be the income of the trustees, so the deeming disapplies the DT exemption. But that construction would put the UK in breach of the treaty, so it should not be regarded as correct. In any case, in the HMRC view, s.624 is not a defence to trustees from an assessment.

### 50.11.3 *Settlor treaty-resident outside UK*

This section considers whether DT exemptions are available where:

(1) income accrues to a settlor-interested trust whose trustees are not treaty-resident outside the UK (so the settlor cannot claim indirect treaty relief).

(2) The settlor is domestic-law UK resident but treaty-resident outside the UK.

The settlor is in principle subject to tax under s.624. It is considered that the settlor can claim DT exemption directly.

In some cases, DT exemption only applies if the income is "beneficially owned" by the settlor. In the case of a common form settlor-interested discretionary trust, the income is not "beneficially owned" by the settlor as a matter of property law. But since for tax purposes it is deemed to be the income of the settlor, this requirement is deemed to be satisfied. The OECD Commentary is helpful here:

> 12 ... The term "beneficial owner" is not used in a narrow technical sense, rather, it should be understood in its context and in light of the object and purposes of the Convention, including avoiding double taxation and the prevention of fiscal evasion and avoidance.[27]

In the US/UK DTA, this is expressly dealt with: see 50.21.1 (Section 624, 720 income; s.13, 86 gains).

---

27 See 22.12.2 (Discretionary trusts: beneficial owners for DTA purposes).

## 50.11.4 *HMRC view*

The TSE Manual provides:

> **3665. Relief for overseas tax: trust income deemed not to be the beneficiary's**
> For tax purposes, income may be deemed to be that of someone other than a beneficiary. For example, the anti-avoidance provisions may treat trust income as that of the settlor. The trustees can claim tax credit relief on the income.
> If the trustees do not claim relief, the overseas income chargeable is the net amount after deduction of overseas tax.

The International Manual raises some of these questions but does not tell us what HMRC regard as the answers:

> **339550 - DT applications and claims: Applicants/claimants - Trusts** [March 2007]
> **Claims by non-resident trustees of discretionary trusts**
> You may receive a claim or application from non-resident trustees of a discretionary trust. For specific information about claims by non-resident trustees see the country specific pages. If the trust's entitlement to claim is not clear from previous papers, you will need to ask for details of the trust to establish whether relief is due. The necessary information is requested on the form 4467(trustee)/FD.
> **What to do if the settlor of a discretionary trust is not excluded from benefit under the trust**
> Where the settlor of a non-resident discretionary trust is not excluded from benefit under the trust, the trust may be subject to the provisions of ICTA88/S660. In this situation the trust may be described as a 'caught settlement'. The settlor will be chargeable on the income of the trust as their own personal income, regardless of whether the income is accumulated or distributed.
> Where we have a claim or application from trustees of a discretionary trust from which the settlor is not excluded from benefiting, Technical Advice Group will need to refer the papers to CNR (Non-resident trusts) in Bootle for advice. They will also consider whether the settlor or the trustees need to make a UK tax return.
> If the settlement is caught, a claim by the trustees will not be valid.
> (This text has been withheld because of exemptions in the Freedom of Information Act 2000)

## 50.12 DT reliefs: section 720 ITA

### 50.12.1 *Foreign tax credit relief*

Where income of the person abroad is subject to foreign tax, foreign tax credit relief in principle applies for the benefit of the transferor. That follows from first principles but if authority were needed, see s.746 ITA.[28]

### 50.12.2 *Person abroad treaty-resident outside UK*

This section considers whether DT exemptions are available where:
(1) Income accrues to a person abroad who is treaty-resident outside the UK.
(2) The transferor is domestic-law ordinarily UK resident and not treaty-resident outside the UK.
(3) The transferor is in principle subject to tax under s.720.[29]
Under the pre-ITA wording, it is considered that the s.739 ICTA deemed income of the transferor was the same as the income of the person abroad.[30] It follows that the transferor could in principle claim DT exemptions provided that the income qualifies for the relief.[31]

What is the position now under ITA? Sections 720(2) and 721(1) ITA must be read together:

> **720(2)** Income tax is charged on income treated as arising to such an individual under section 721 (individuals with power to enjoy income as a result of relevant transactions).
> **721(1)** Income is *treated as arising* to such an individual as is mentioned in section 720(1) in a tax year for income tax purposes if

28 See 24.2.7 (Settlor's deductions and reliefs); 26.9.3 (Transferor's deductions and reliefs).

29 Similar points apply to s.727; see 26.11.1 (Nature of s.727 charge).

30 This was view for which *HMRC* argued, and which was accepted by the Special Commissioners, in *Carvill v IRC* [2000] STC (SCD) 143, 75 TC 477 at [100] - [102], cited at 25.14.1 (Dividend income of person abroad: net or grossed up?).

31 See the quote from 26.9.1 (Power to enjoy part of income of person abroad). David Goy QC agrees: "Double Tax Treaties and ss.739 and 740 ICTA 1988", GITC Vol. V no.2, accessible *www.taxbar.com*. See too Venables, "Double Taxation Treaties: the Antidote to Anti-avoidance Provisions" (1996) OTPR Vol. 6 p.151.
This view is adopted in *R on the application of Huitson v HMRC* [2010] EWHC 97 (Admin) at [64] though the position will need to be reviewed when the case is final.

conditions A and B are met.

I refer to income treated as arising under s.721 as "**s.720 deemed income**". The question is whether this is the same as the income of the person abroad.

At first sight the reference to income being *treated* as income of the transferor might be taken to suggest that the s.720 deemed income is different from the income of the person abroad. However this is not the case: the expression "treated as" is neutral, and the deeming may simply be a deeming as to recipient: that the transferor is (contrary to the actual position) treated as entitled to the actual income of the person abroad. The wording is the same as s.624 where that is indeed the position. One needs to review all the provisions to see if there is a deeming as to the character of the income.

HMRC have argued that the s.720 deemed income is *not* the same income as that arising to the person abroad, so treaty relief is in principle not available for s.720. The former provided:

> [1] The anti-avoidance provisions of [sections 720 and 731 ITA] go in that direction, but not far enough to get within the credit rule [foreign tax credit relief], either because
> [a] the income which is assessed on the UK resident cannot be identified with any particular part of the income which the non resident has received or
> [b] because the resident is charged by reference to a benefit received out of the assets rather than on the income itself.
> [2] We take the view that where the UK charge is made on deemed income or gains, such income or gains are not the same income or gains charged abroad.

The argument at [1][a] is not convincing because the s.720 deemed income can easily be identified with the particular part of the income of the person abroad which arises from as a result of the transfer. The argument at [1][b] relates only to s.731, considered below. The argument at [2] is based on the use of the word "deemed" in s.739 (or "treated" in s.720) and is clearly invalid.

I refer to this as the official HMRC view, but it appears that HMRC accept that their position is wrong, at least in relation to the pre-ITA legislation.[32]

It is necessary to look at the entire TAA code to see if the s.720 deemed income is the same as the income of the person abroad.

Rebecca Murray[33] refers to s.721 ITA which continues:

> (2) Condition A is that the individual has power in the tax year to enjoy *income of a person abroad* as a result of … a relevant transfer …
> (3) Condition B is that *the income* would be chargeable to income tax if it were the individual's and received by the individual in the UK.
> (4) For the purposes of subsection (2), it does not matter whether *the income* may be enjoyed immediately or only later.
> (5) It does not matter for the purposes of this section—
> (a) whether *the income* would be chargeable to income tax apart from section 720 …
> (Emphasis added)

She argues:

> ... s.721(5) ... appears to close the issue. If the income chargeable under s.720 were only an amount equal to income, it would be impossible to ask the question whether it would be chargeable apart from s.720, since it would just be an amount equal to income only chargeable by virtue of s.720. It must be the same income in order to ask this question.[34]

The references in s.721(2)(3)(4) and (5) are to the actual income of the person abroad, but this does not show that the reference to the s.720 deemed income is the same income.

The pre-2008 s.726 ITA (foreign domicile defence) is more helpful. This provided:

> *(1) An individual is not chargeable to income tax under section 720 in respect of any income treated as arising to the individual under section 721 if conditions A and B are met. ...*

---

32 The author of "Technical Exchange" - Issue 63 of 31 July 2002 (a HMRC document) thought that it was "extremely unlikely" that HMRC could apply s.739 where the person abroad was treaty non-resident; see *R on the application of Huitson v HMRC* [2010] EWHC 97 (Admin) at [61]. The HMRC's "Technical Exchange" is not public; an interested person might try a FOI application to obtain it.

33 Murray, "Tax Avoidance: Transfers Abroad" Taxation 7 Jun 2007 p. 638.

34 *Taxation* Vol. 159, 7 June 2007 at p.640.

*(3) Condition B is that if the income had in fact been the individual's income, because of being so domiciled the individual would not have been chargeable to income tax in respect of it.*

This did seem to equate the income treated as arising with the actual income of the person abroad. However, the post-2008 s.726 does distinguish between the income of the person abroad and the deemed income:

(1) This section applies in relation to income treated under section 721 as arising to an individual in a tax year ("the deemed income") if—
(a) section 809B, 809D or 809E (remittance basis) applies to the individual for the year, and
(b) the individual is not domiciled in the UK in the year.
(2) For the purposes of this section the deemed income is "foreign" if (and to the extent that) the income mentioned in section 721(2) would be relevant foreign income if it were the individual's.
(3) Treat the foreign deemed income as relevant foreign income of the individual.

Section 726(3) is drafted on the assumption that the s.720 deemed income is different from the original income of the person abroad.

Does s.746 ITA (set out above) shed any light on the issue? This supports the argument that DT reliefs to apply to s.720 deemed income because if the income is different the deductions and reliefs would not apply. Section 743(4) ITA also assumes that the s.720 deemed income is the same as the income of the person abroad.

My conclusion is that under the former ICTA 1988 and under the pre-2008 ITA the deemed s.720 income is the same as the actual income of the person abroad. The 2008 reforms move one step towards separating the two types of income, based no doubt on the HMRC official (but in their own view mistaken) position of the pre-2008 legislation. The current legislation is for this reason confused and inconsistent on the issue of whether the income treated as arising to the transferor is the actual income of the person abroad or fictional income.

### 50.12.3 *Transferor treaty-resident outside UK*

This section considers whether DT reliefs are available where:
(1) income accrues to a person abroad who is not treaty-resident outside

the UK

(2) the transferor is domestic-law ordinarily resident in the UK but treaty-resident outside the UK

(3) the individual is in principle subject to tax under s.720.

As the person abroad is not treaty-resident outside the UK the transferor cannot claim indirect treaty relief. Can the transferor claim DT exemptions directly? If the official HMRC view is correct, the transferor may do so under the "other income" article, regardless of the type of income which accrued to the person abroad; even if, say, the income of the person abroad is of a type which would not normally qualify for DT exemption.[35] If my view is correct, the DT exemption is available if the type of income of the person abroad qualifies for the exemption.

In some cases DT exemption only applies if the income is "beneficially owned" by the transferor. The point is the same as for s.624.[36] In a s.720 case the income is not "beneficially owned" by the transferor as a matter of property law. But since for tax purposes it is deemed to be the income of the transferor, this requirement is deemed to be satisfied.

In the US/UK DTA, this is expressly dealt with: see 50.21.1 (Section 624, 720 income; s.13, 86 gains).

## 50.13 DT reliefs: s.731 ITA

### 50.13.1 *Person abroad treaty-resident outside UK*

This section considers whether DT reliefs are available where:

(1) income accrues to a person abroad who is treaty-resident outside the UK

(2) an individual (not the transferor) is domestic-law ordinarily resident in the UK and not treaty-resident outside the UK

(3) the individual is in principle subject to tax under s.731.

DT exemption is not applicable for s.731 ITA. ITA EN provides:

> 2170. The method statement [s.733 ITA 2007] makes it clear that "relevant income" in relation to an individual is not actually taxable income of the individual, but is an element in the calculation of taxable income. "Relevant income" is actual income arising to a person abroad;

35 See 50.13.2 (Individual treaty-resident outside UK).

36 See 50.11.3 (Settlor treaty-resident outside UK)

> the income charged under section 731 is income treated as arising to the individual in question. This deemed income may be more or less than "the relevant income of the tax year" in relation to the individual and the tax year identified at Step 3.

That was also the position under the pre-ITA wording. The former ITH passage cited above showed that HMRC took this view. Section 731 may be regarded as a charge on a benefit, or a charge on fictional income, but it is not a charge on the income arising to the person abroad.

There is no foreign tax credit relief. However, income used to pay foreign tax is not relevant income as it cannot be used to benefit a beneficiary.

### 50.13.2 *Individual treaty-resident outside UK*

This section considers whether DT reliefs are available where
(1) an individual (not the transferor) is domestic-law UK ordinarily resident and treaty-resident outside the UK
(3) the individual is in principle subject to tax under s.731.
Can the individual claim treaty relief directly? It is considered that exemption is available under OECD Model Convention Art.21(1) (other income):

> Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

Most UK treaties restrict this relief by adding: *other than income paid out of trusts or the estates of deceased persons in the course of administration*. That exclusion does not prevent relief for s.731 deemed income. It has an entirely different purpose.[37] S.731 deemed income is fictional income and not "paid out of trusts" even if relevant income accrues to a trust.

Some DTAs restrict this relief to income *beneficially owned* by a resident of a Contracting State.[38] That restriction does not prevent relief for s.731 deemed income for one of two reasons:
(1) As a matter of property law, s.731 deemed income is not

37 See 22.11.2 (DTAs with restriction on "other income" article).
38 Eg art.22 US/UK DTA.

"beneficially owned" by the individual or anyone else: it is fictional income which does not exist. But since for tax purposes it is deemed to be the income of the individual, this requirement is deemed to be satisfied.[39]

(2) Section 731 deemed income is "beneficially owned" by the individual because s.731 is a tax by reference to a benefit which is beneficially owned by the individual.[40]

Suppose s.731 deemed income arises where a beneficiary enjoys the benefit of occupying land in the UK. Article 6 OECD Model provides (so far as relevant):

> 1. Income derived by a resident of a Contracting State from immovable property ... situated in the other Contracting State may be taxed in that other State...
> 3. The provisions of paragraph 1 shall apply to income derived from the direct use, letting, or use in any other form of immovable property

It is considered that s.731 deemed income is not "income derived from immovable property" even if the charge is by reference to the occupation of UK land.

## 50.14 DT relief: s.13 TCGA

In the following discussion I distinguish between 3 types of company residence:

| **Type of residence** | **Domestic-law UK resident** | **Treaty-resident in State with DTA with CG article** |
|---|---|---|
| Treaty non-resident | No[41] | Yes |
| Simple non-resident | No | No |
| UK resident | Yes | No |

In this terminology, for instance, a Jersey resident company is *simple* non-resident (the Jersey DTA has no CG article) but a US resident company is *treaty* non-resident.

39 See 27.11.1 (Benefit giving rise to s.731 charge in year of receipt)

40 This point is the same as for s.624. See 50.11.3 (Settlor treaty-resident outside UK).

41 A treaty non-resident company must be domestic law non-UK resident so only three types of residence need to considered.

### 50.14.1 *Close company treaty non-resident*

Suppose an individual (or a company) owns a treaty non-resident company which realises a gain:

| | |
|---|---|
| Individual (or company) ("A") | *UK resident* |
| B Ltd | *Treaty non-resident* |

Section 13(2) TCGA provides that A:

> shall be treated for the purposes of this Act as if a part of the chargeable gain had accrued to him.

The sidenote to s.13 calls this "attribution" of gains. The text of s.13 refers to gains "apportioned" to participators. Section 13(10A) TCGA (repealed) used the words "treated as".[42] It all comes to the same thing. This is a deeming as to recipient, and the gain treated as received by A is the same gain as the gain received by B Ltd. A can claim DT relief for gains accruing to B Ltd (deemed to accrue to A) under s.13 TCGA.

HMRC agree. The CG Manual provides:

> **57380 Double taxation agreements**
> You should always check whether there is a double taxation agreement between the UK and the country in which the company making the gain is resident. If there is no double taxation agreement any TCGA 1992, s.13 charge is unaffected. Similarly if the agreement does not refer to capital gains or CGT the charge under TCGA 1992, s.13 is unaffected. But, if the agreement provides that gains of the type realised by the non-resident company are only taxable in that company's country of residence TCGA 1992, s.13 cannot apply. For example, Article 15(4) of the Kenya/UK Double Taxation Agreement[43] would prevent TCGA 1992, s.13 applying to the disposal of stocks and shares by a company resident in Kenya. Agreements will often treat gains on the disposal of

---

42 Section 13(10A) provided: *A gain which is treated as accruing to any person by virtue of this section shall not be eligible for taper relief.*

43 The Kenyan DTA follows the OECD Model, so what is stated here of Kenya is generally true for DTAs which have a capital gains article.

particular types of asset differently.[44]

The FA 2008 introduced new terminology. Section 14A(2) TCGA provides:

> The part of the chargeable gain treated as accruing to the individual *("the deemed chargeable gain")* is a foreign chargeable gain within the meaning of section 12 if (and only if) the asset is situated outside the UK.

This does not alter the DTA position: the use of the expression "deemed chargeable gain" does not show that the gain changes its character. The wording reflects the deeming as to recipient and in that sense the gain accruing to the participator can be called a deemed gain. The character of the gain is not altered. That is, the gain deemed to accrue to the participator is the actual gain accruing to the company, and not a different (notional) gain.

---

44 Likewise INT Manual provides:

> **169060 Resident shareholders in non-resident companies - Section 13 TCGA 1992** [January 2011]
>
> This Section enables the UK, in certain circumstances, to tax a UK resident in respect of gains made by a non-resident company in which he is a shareholder (participator where the gains accrue on or after 28 November 1995 - Section 174 FA 1996)(see CG57200 onwards). However the Capital Gains Articles in double taxation agreements may override it.
>
> If the non-resident company disposes of immovable property; for example, land, buildings etc, in the UK, double taxation agreements normally provide that any gain can be taxed in UK. Although UK domestic law may prevent a capital gains tax charge on the non-resident company (see Section 10 TCGA 1992), Section 13 TCGA 1992 can be applied to tax the UK resident shareholder.
>
> If the asset disposed of is not immovable property in the UK; for example, immovable property situated outside the UK, shares etc, then the Capital Gains Article will normally prevent a charge to tax under Section 13 TCGA 1992 being made on the shareholder.
>
> The text of the Capital Gains Article in the agreement with the country concerned will need to be examined to see whether there are any variations from the general principles outlined above.
>
> See Statement of Practice D23, where liability arises under Section 13 TCGA 1992 and the non-resident company pays overseas tax on its gains in the country where it is resident.

The wording does perhaps suggest that the drafter was not conscious of the distinction between the actual gain and an equivalent notional gain, but that is understandable since it is a distinction without a difference.

50.14.2 *Participator treaty non-resident*

Suppose an individual who is domestic-law UK resident but treaty non-resident owns a simple non-resident company which realises a gain:

| | |
|---|---|
| Individual ("A") | *UK resident treaty non-resident* |
| B Ltd | *Simple non-resident* |

The gain treated as received by A is the same gain as the gain received by B Ltd. But art.13(5) OECD Model Convention provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the *alienator* is [treaty-resident].

It appears that A does not qualify for treaty relief on a gain accruing to B Ltd. A (though treaty non-resident) is not the alienator. B Ltd is the alienator but (on the facts of this example) B Ltd is not treaty resident in another state which confers DT reliefs. So the terms of art.13(5) are not satisfied. The US treaty is wider and DT exemption applies to individuals who are treaty-resident in the US.[45] Even under the OECD Model, the same result is arguable on the grounds that the gain is treated as accruing to A, so A should be deemed to be the alienator; or the word "alienator" does not require that one must alienate property, only that the gain on the alienation accrues to the person.

50.14.3 *Chain of companies*

Suppose there is a chain of companies:

45 See 50.21.1 (Section 624, 720 income; s.13, 86 gains).

Individual (or company) ("A") - *UK resident*

B Ltd

C Ltd

Suppose a gain accrues to C ("C's gain"). We have the following possibilities:

| | **Case 1** | **Case 2** | **Case 3** |
|---|---|---|---|
| B Ltd | UK resident | simple non-resident | treaty non-resident |
| C Ltd | treaty non-resident | treaty non-resident | simple non-resident |

*Case 1:* If B Ltd is UK resident, and C Ltd is treaty non-resident:

(1) C's gain is deemed to accrue to B Ltd; B Ltd may claim DT relief, as noted above.

(2) A does not need to claim relief, as
- (a) C's gain is not deemed to accrue to A under s.13(9) and
- (b) apparently C's gain is not deemed to accrue to A under s.13(2) (but if it did, DT relief would be available.)

*Case 2:* If B Ltd is simple non-resident and C Ltd is treaty non-resident, C's gain in principle accrues to A. Section 13(9) TCGA provides:

> [a] If a person who is a participator in the company at the time when the chargeable gain accrues to the company is itself a company which
> [i] is not resident in the UK but which
> [ii] would be a close company if it were resident in the UK,
> [b] [i] *an amount equal* to the amount apportioned under subsection (3) above out of the chargeable gain to the participating company's interest as a participator in the company to which the gain accrues
> [ii] shall be further apportioned among the participators in the participating company according to the extent of their respective interests as participators, and
> [c] subsection (2) above shall apply to them accordingly in relation to the amounts further apportioned,
> [d] and so on through any number of companies.

HMRC accept that A can claim DT relief. This is so even though s.13(9) refers to "an amount equal to" the gain. The words do not show there is a change in the character of the gain (though they do perhaps show some confusion on the point).

If C Ltd is simple non-resident, but B Ltd is treaty non-resident, C's gain is deemed to accrue to A, but A cannot claim DT relief.

### 50.14.4 *Disallowance of DT relief for trust participator*

Section 79B TCGA provides:

> (1) This section applies where the trustees of a settlement are participators[46]—
> (a) in a close company, or
> (b) in a company that is not resident in the UK but would be a close company if it were resident in the UK...
> (2) Where this section applies, nothing in any double taxation relief arrangements shall be read as preventing a charge to tax arising by virtue of the attribution to the trustees under s.13, by reason of their participation in the company mentioned in subsection (1) above, of any part of a chargeable gain accruing to a company that is not resident in the UK.

Suppose a UK trust owns a treaty non-resident company which realises a gain:

| | |
|---|---|
| Trust | *UK resident* |
| B Ltd | *Treaty non-resident* |

DT relief is disallowed under s.79B(1)(b) and the trustees are taxable.

Similarly if a non-resident trust within s.86 owns a treaty non-resident company which realises a gain: DT relief is disallowed under s.79B(1)(b) and the settlor is taxable.

In these circumstances the UK is in breach of the treaty, but there it is.

I am unable to see the point of s.79B(1)(a). If the trustees are participators in a *close* company, gains accrue to that company and are not

46 Section 79B(1) provides: "For this purpose 'participator' has the same meaning as in section 13".

attributed to the trustees. I would be grateful if any reader could offer an explanation.

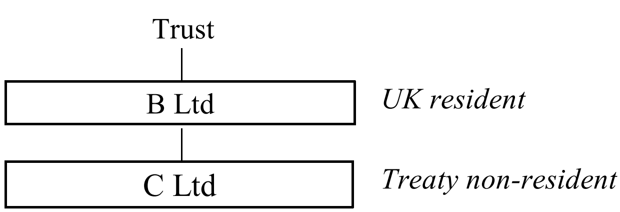
Section 79B(3) TCGA provides:

> Where this section applies and—
>
> (a) a chargeable gain accrues to a company that is not resident in the UK but would be a close company if it were resident in the UK, and
>
> (b) all or part of the chargeable gain is treated under section 13(2) as accruing to a close company which is not chargeable to corporation tax in respect of the gain by reason of double taxation arrangements, and
>
> (c) had the company mentioned in para (b) (and any other relevant[47] company) not been resident in the UK, all or part of the chargeable gain would have been attributed to the trustees by reason of their participation in the company mentioned in subsection (1) above,
>
> section 13(9) shall apply as if the company mentioned in para (b) above (and any other relevant company) were not resident in the UK.

Section 79B(3) addresses the more challenging case where:

(1) a trust owns a holding company ("B Ltd") which is UK resident;

(2) B holds a treaty non-resident subsidiary ("C Ltd"):



B Ltd is not taxed under s.13 on C's gain as B can claim DT relief. In the absence of s.79B(3), C's gain apparently cannot be apportioned to the trust under s.13(9) or s.13(2). The trust does not need DT relief. Section 79B(3) treats B Ltd as non-resident, so that the gain accruing to C can be attributed to the trust under s.13(9).

---

47 Section 79B(4) TCGA provides:

> "The references in subsection (3) above to 'any other relevant company' are to any other company which if it were not resident in the UK would be a company in relation to which section 13(9) applied with the result that all or part of the chargeable gain was attributed to the trustees as mentioned in that subsection."

## 50.15 oreign tax credit: s.13 TCGA

SP D23 provides:

**Non-resident company: TCGA 1992 s 13**

[1] Where a UK participator in a non-resident company which would be a close company if resident in the UK is chargeable to CGT on a proportion of a capital gain accruing to that company, tax credit relief may be given against UK CGT for the appropriate proportion of any overseas tax payable by the company in the country where it is resident in respect of its gain TCGA 1992 s 277;

[2] alternatively, under TCGA 1992 s 278, the appropriate proportion of the overseas tax may be deductible in computing the shareholder's gains to the extent that the overseas tax has not qualified for relief under TCGA 1992 s 277.

This relates to two reliefs:
(1) Foreign tax credits
(2) CGT computation deduction
The CG Manual summarises these two reliefs and gives a worked example:

**57381. Overseas tax payable by NR SP D23**
The non-resident company may have to pay tax on the gain in its country of residence. UK residents to whom the gain is apportioned will get relief for this tax. The two methods of giving relief are set out in SP D23.

- Either the UK resident can claim tax credit relief, see CG57382 or
- a proportionate part of the tax can be claimed in computing the apportioned gain, see CG57383.

**57382. Tax credit relief**
The UK resident can claim tax credit relief under TCGA 1992, s.277. Relief is given on a proportion of the foreign tax equal to the proportion of the total gain attributable to the UK resident. This amount is set-off against the charge to CGT or Corporation Tax on the relevant chargeable gains. See the example at CG57384. If tax credit relief is allowed no deduction under TCGA 1992, s.278 can be allowed in computing the chargeable gain. See CG57383.

**57383. Tax deducted in computing gain**
If the UK resident does not want to claim tax credit relief, the tax can be

deducted in computing the gain, TCGA 1992, s.278. The foreign tax paid does not qualify for indexation allowance. Although it is an allowable deduction in computing the gain it is not a deduction within TCGA 1992, s.38(1)(a) or TCGA 1992, s.38(1)(b). This means it is not relevant allowable expenditure for indexation allowance purposes, see CG17240. In all other respects you compute and apportion the gain in the usual way allowing the foreign tax paid as a deduction. See the example in CG57384. For further guidance on TCGA 1992, s.278 see CG14410+.

The Manual gives a worked example:

**57384. Foreign tax paid by a NR company**
This example illustrates the differences between allowing any foreign tax paid by the non-resident company as tax credit relief or as a deduction in computing the gain.
Facts

- The non-resident company realises a gain of £20,000 computed under the normal CGT rules.
- It has to pay £5,000 tax on this gain in its country of residence.
- 75 % of the gain is attributable to a UK resident.

**CGT treatment**
A TCGA 1992, s.13 [gain][48] of £20,000 @ 75 % = £15,000 is apportioned to the UK resident. Relief for the tax paid can be claimed in two ways.
- TAX CREDIT RELIEF, SEE CG57382.
Suppose the UK resident is liable to CGT at 40 %. The tax payable would be £6,000. The UK resident can claim tax credit relief on the foreign tax of £5,000 paid by the company in the same proportion as the gain is apportioned. £5,000 @ 75 % = £3,750. The total tax payable by the UK resident becomes £2,250.
- DEDUCTION IN COMPUTING THE GAIN, SEE CG57383.
The foreign tax paid of £5,000 can be deducted in computing the gain. No indexation allowance is due on this deduction. The gain to be apportioned becomes £20,000 –£5,000 = £15,000. The taxpayer's share is £15,000 @ 75 % = £11,250. At a rate of 40 % the tax payable would be £11,250 @ 40 % = £4,500.
In this example you would expect the taxpayer to claim tax credit relief.

48 The original erroneously says: charge.

## 50.16 DT reliefs: offshore income gains

### 50.16.1 *OIGs accruing directly to treaty-resident individual*

Suppose an individual who is UK resident and treaty-resident outside the UK disposes of offshore funds so that OIGs accrue directly to them.

Article 13(5) OECD Model Convention provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

Article 21(1) OECD Model Convention provides:

> Items of income of a resident of a Contracting State, wherever arising, not dealt with in the foregoing Articles of this Convention shall be taxable only in that State.

It is an interesting question whether the individual claims relief under Art.13 or Art.21. At first sight OIGs are "gains" which arise from the alienation of property, even though not chargeable gains and even though subject to income tax rather than CGT. But OIGs are also "income" if that word is given its normal UK tax meaning. Of course it does not normally matter which of the articles apply, if the treaty has both. But if a particular treaty has an equivalent of art.21 (other income) but no capital gains article, then it is considered that treaty relief is still in principle available.

### 50.16.2 *s.13 OIGs: close company treaty-resident outside UK*

Suppose OIGs accrue to a company which is treaty-resident outside the UK and so are deemed to accrue to a UK resident participator under s.13 TCGA. In principle, DT reliefs apply to OIGs deemed to accrue under OIG s.13 just as they do for chargeable gains deemed to accrue under CGT s.13.[49]

I have considered reg. 24(6) OFTR which provides:

> If this regulation applies, the person to whom the offshore income gain

49 For this terminology, see 32.13 (OIG s.13 charge).

arises is treated as the person making the disposal.

This does not disapply treaty relief, either because it has no application for the purposes of the treaty or because (while deeming the participator to be the disponor) it does not say that the non-resident company is not the alienator.[50]

### 50.16.3 *s.13 OIGs: participator treaty-resident outside UK*

In the case of CGT s.13 gains, the participator has a difficulty in obtaining relief under a CG article, in that they are not at first sight the "alienator". See 50.14.2 (Participator treaty non-resident). However it is considered that the other income article provides relief, in the case of OIGs. If the capital gains article is in point, it is arguable that reg. 24(6) OFTR deems the participator to be the alienator.

### 50.16.4 *s.87 OIGs: beneficiary treaty-resident outside UK*

In the case of CGT s.87 gains, the beneficiary has a difficulty in obtaining relief, in that they are not at first sight the "alienator" and the gain is not "from the alienation of any property". See 50.19.2 (Beneficiary treaty-resident outside the UK). However in the case of OIGs it is considered that the other income article provides relief. If the capital gains article were in point, it is arguable that reg.20(5) OFTR deems the beneficiary to be the alienator but the problem remains that the gain is not "from the alienation of any property".

## 50.17 DT reliefs: s.86 TCGA

### 50.17.1 *Trustees treaty-resident outside UK*

Assume the fundamental conditions in s.86(1) TCGA are satisfied. Section 86(4) TCGA provides:

> Where this section applies—
> (a) chargeable gains of an amount equal to that referred to in subsection (1)(e) above shall be treated as accruing to the settlor in

50 For the reason for this provision, see 32.12.4 (Deemed disposal).

the year ...

The HMRC view is the fact that the trustees are resident in another state with standard form DTA CGT relief does not allow the settlor to claim relief from s.86. HMRC raise two arguments in the manuals. The first is a categorisation, *Brikom*-type argument. The CG Manual provides:

> **38313 Double taxation relief**
> The gain which is chargeable on the settlor is not the same gain as that which accrues to the trustees, but only an amount equivalent to that gain.
> Therefore articles in particular Double Taxation agreements, under which chargeable gains from the alienation of particular property are exempt from UK tax, will not operate to exempt the settlor from liability under [TCGA] Schedule 5.

I think this argument is very doubtful. However HMRC have a better argument, at which the CG Manual provides a hint. The Manual first explains why DTA relief applied to the former s.77 TCGA when trustees were treaty-resident in a state with a CGT DTA article

> **34912. Double taxation relief** [August 2007]
> A settlor may be able to claim exemption [from s.77 TCGA] on some or all of the attributed trust gains, but this depends on the terms of the particular double taxation agreement. The gain which is chargeable on the settlor is not the same as the gain which accrues to the trustees. Therefore Articles which exempt trustees from UK tax on gains accruing on the disposal of particular property do not necessarily operate to exempt the settlor from liability under Section 77. However section 77(1)(b) requires there to be an amount on which the trustees would have been chargeable for the year in respect of the gains in question. So if the correct interpretation of the Double Taxation Agreement by reference to the relevant acts is that the trustees would be exempt if they were chargeable then there is no liability.[51]

---

51 Section 77(1) TCGA (now repealed) provided, so far as relevant:
(1) Where in a year of assessment—
(a) chargeable gains accrue to the trustees of a settlement from the disposal of any or all of the settled property,
(b) after making any deduction provided for by section 2(2) in respect of disposals of the settled property there remains an amount on which the trustees would be

This argument does not run for s.86 because the legislation is differently worded:

> This is by way of contrast with section 86 where there is a hypothesis in subsections (1)(e)(i) and (3) that the trustees are in fact resident in determining whether the section applies and therefore one cannot take into account the actual non-residence. Compare *Bricom Holdings v CIR* 70 TC 272.

The point is that s.86(3) envisages a charge in a case where trustees are dual resident in the sense of being domestic-law UK resident but treaty-resident outside the UK. In that case the treaty is intended to be overridden. By implication the same should apply where the trustees are treaty-resident outside the UK and not UK resident at all.

HMRC accept that foreign tax credit relief is available. The CG Manual provides:

> **38313 Double taxation relief**
> ... Where, however, the particular article provides for the allowance, as a credit, of overseas tax payable on gains, that tax can be allowed as a credit. This is because UK tax is computed by reference to the same chargeable gains in respect of which the overseas tax is computed. If there is no Double Taxation agreement, then unilateral relief is available on the same basis.

### 50.17.2 *Settlor treaty-resident outside UK*

Suppose the settlor is domestic-law UK resident but treaty-resident outside the UK. Can the settlor claim direct relief? The point is the same as for s.13 gains. Art.13(5) OECD Model Convention provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the

---

chargeable to tax for the year in respect of those gains ... , and
(c) at any time during the year the settlor has an interest in the settlement,
[i] the trustees shall not be chargeable to tax in respect of those gains but
[ii] instead chargeable gains of an amount equal to that referred to in para (b) shall be treated as accruing to the settlor in that year.

Contracting State of which the *alienator* is [treaty-resident].

It appears that the settlor does not qualify for treaty relief because (though treaty non-resident) the settlor is not the alienator. The trustees are the alienator but (on the facts of this example) the trustees are not treaty non-resident. So the terms of art.13(5) are not satisfied. The US treaty is wider and DT exemption applies to a settlor who is treaty-resident in the US.[52] Even under the OECD model, the same result is arguable on the grounds that the gain is treated as accruing to the settlor, they should be deemed to be the alienator; or the word "alienator" does not require that one must alienate property, only that the gain on the alienation accrues to the person.

### 50.17.3 *Trust owns company which is treaty-resident outside UK*

If a non-resident trust within s.86 owns a treaty non-resident company which realises a gain DT relief is disallowed and the settlor is taxable; see 50.14.4 (Disallowance of DT relief for trust participator).

## 50.18 Restriction on DTR for gains of trustees and settlors

It is easiest to understand the legislation if one bears in mind the tax avoidance schemes it was intended to block. Suppose a non-resident settlor-interested trust within s.86 TCGA. The trustees would take two steps:

(1) arrange to dispose of an asset at a time when they are treaty-resident in another state with a DTA with a CGT article and

(2) become UK resident later in the same tax year.

In the absence of anti-avoidance rule, this works as s.86 does not apply and the trustees (although with the charge to CGT) claimed DTR.[53]
This arrangement is counteracted by s.83A TCGA.

> (1) This section applies if a chargeable gain accrues to the trustees of a

52 See 50.21.1 (Section 624, 720 income; s.13, 86 gains).

53 The reader may have considered a similar arrangement where the non-resident trust was not within s.86 but is within s.87. In the absence of an anti-avoidance provision, the same steps would be taken in order to avoid a s.2(2) amount. But this is caught by s.88 TCGA; see 45.17 (Dual resident trust)

> settlement on the disposal by them of an asset in a year of assessment and the trustees—
> (a) are within the charge to capital gains tax[54] in that year of assessment, but
> (b) are non-UK resident at the time of the disposal.

The expression "non-UK resident" in (b) is defined in s.83A(4) TCGA:

> For the purposes of this section the trustees of a settlement are non-UK resident at a particular time if, at that time,—
> (a) they are neither resident nor ordinarily resident in the UK, or
> (b) they are resident or ordinarily resident in the UK but are Treaty non-resident.

This is a slightly artificial definition, but it is difficult to think of a better label.

If these conditions are satisfied, s.83A(2) TCGA overrides DT relief:

> Where this section applies, nothing in any double taxation relief arrangements shall be read as preventing the trustees from being chargeable to capital gains tax (or as preventing a charge to tax arising, whether or not on the trustees) by virtue of the accrual of that gain.

EN FA 2005 explains the words in brackets:

> 4. Subsection (2) of section 83A has effect to provide that where section 83A applies, nothing in the terms of any Double Taxation Agreement (DTA) can be read as preventing the trustees being chargeable to capital gains tax, or of preventing a charge to tax arising (whether on the trustees or another person), by virtue of the accrual of the gain.
> 5. The reason for the reference to "another person" in paragraph 4 above is that, in certain circumstances where the trustees of a settlement are within the charge to capital gains tax in a tax year, the rules in section 77 TCGA provide that the trustees do not actually suffer a tax charge in respect of chargeable gains which arise to them on the disposal of settled

54 Section 83A(3) gives this expression a commonsense definition:

"(3) For the purposes of this section the trustees of a settlement are within the charge to capital gains tax in a year of assessment—
(a) if, during any part of that year of assessment, they are resident and ordinarily resident in the UK and not Treaty non-resident".

> property which originates from a UK resident or ordinarily resident settlor who has an interest in the settlement at any time in the year. Chargeable gains are instead treated as arising to the settlor, who is then chargeable to tax in respect of them.

Now that s.77 has been repealed, the words in brackets in s.83A(2) should be repealed, as they can never apply, but they do not do any harm. Section 83A is still needed in order to deal with the s.86 scheme.

Section 83A is somewhat wider than it needed to be in order to deal with these two schemes, and considerable care is needed where trustees become or cease to be treaty non-resident, but in practice difficulties are fairly rare.

## 50.19 DT reliefs: s.87 TCGA

### 50.19.1 *Trustees treaty-resident outside UK*

This section considers whether DT reliefs are available where:

(1) Gains accrue to a trust which is treaty-resident outside the UK.

(2) A UK resident beneficiary receives a benefit so a s.87 deemed gain accrues to them.

The DTA offers no defence to the charge on the beneficiary. The gain accruing to trustees meets the requirements for DTR but the s.87 deemed gain accruing to the beneficiary under s.87 TCGA is not the same gain as the gain accruing to the trustees. Section 87 may be regarded as a charge on the capital payment or a charge on fictional gains but it is not a charge on the gains accruing to the trustees.

This has always been a potential cause of injustice, but since the extension of s.87 to foreign domiciliaries in 2008 it has become a major cause of injustice, indeed a national embarrassment.

### 50.19.2 *Beneficiary treaty-resident outside UK*

Suppose now the beneficiary is UK resident but treaty-resident outside the UK, in another state with a DTA with a common form CGT article. Can the beneficiary claim treaty relief directly? Art.13(5) OECD Model Convention provides (with immaterial exceptions):

> Gains from the alienation of any property ... shall be taxable only in the Contracting State of which the alienator is a [treaty-resident].

It is suggested that the beneficiary cannot claim DT relief because:
(1) The beneficiary is not the alienator.[55]
(2) The gain is not "from the alienation of any property".
However, a CGT computation deduction is available so foreign tax paid by the trustee is deducted in computing the s.2(2) amount. This is because:
(1) The s.2(2) amount is the amount on which trustees would have been chargeable to tax if UK resident; and
(2) UK resident trustees would qualify for a CGT computation deduction, which reduces the amount on which trustees would be chargeable to tax.

## 50.20 US/UK DTA

The US/UK DTA follows the US model which differs significantly from the OECD model. A full discussion would require a book to itself.

For the US/UK DTA definition of treaty residence, see 5.17 (US/UK treaty).

### 50.20.1 *US/UK DTA: savings clause*

Article 1(4) US/UK DTA provides:

> Notwithstanding any provision of this Convention except paragraph 5 of this Article, a Contracting State may tax its residents (as determined under Article 4 (Residence), and by reason of citizenship may tax its citizens, as if this Convention had not come into effect.

This is called **"the savings clause"**.

So subject to the art 1(5) exceptions:
(1) US may tax US citizens and US treaty-residents ignoring treaty relief.
(2) UK may tax UK treaty-residents ignoring treaty-relief.
On the other hand, UK must allow treaty relief to US treaty-residents, and US must allow relief to UK treaty-residents who are not US citizens.

The US Department of the Treasury Technical Explanation of the

55 See 50.14.2 (Participator treaty non-resident).

Convention[56] provides:

> Paragraph 4 contains the traditional saving clause found in U.S. tax treaties. The Contracting States reserve their rights, except as provided in paragraph 5, to tax their residents and citizens as provided in their internal laws, notwithstanding any provisions of the Convention to the contrary. For example, if a resident of the UK performs professional services in the United States and the income from the services is not attributable to a permanent establishment in the United States, Article 7 (Business Profits) would by its terms prevent the United States from taxing the income. If, however, the resident of the UK is also a citizen of the United States, the saving clause permits the United States to include the remuneration in the worldwide income of the citizen and subject it to tax under the normal Code rules (i.e., without regard to Code section 894(a)). However, subparagraph 5(a) of this Article preserves the benefits of special foreign tax credit rules applicable to the U.S. taxation of certain U.S. income of its citizens resident in the UK. See paragraph 6 of Article 24 (Relief from Double Taxation).
>
> For purposes of the saving clause, "residence" is determined under Article 4 (Residence). Thus, an individual who is a U.S. resident under the Internal Revenue Code but who is deemed to be a resident of the UK under the tie-breaker rules of Article 4 would be subject to U.S. tax only to the extent permitted by the Convention. For example, if an individual who is not a U.S. citizen is a resident of the United States under the Code, and is also a resident of the UK under its law, and that individual has a permanent home available to him in the UK and not in the United States, he would be treated as a resident of the UK under Article 4 and for purposes of the saving clause. The United States would not be permitted to apply its statutory rules to that person if they are inconsistent with the treaty.[57]

56 Accessible *www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

57 The treaty continues with a comment that UK treaty-residence does not preclude US domestic-law residence, a point only relevant to the US (though a comparable rule applies in the UK): " However, the person would be treated as a U.S. resident for U.S. tax purposes other than determining the individual's U.S. tax liability. For example, in determining under Code section 957 whether a foreign corporation is a controlled foreign corporation, shares in that corporation held by the individual would be considered to be held by a U.S. resident. As a result, other U.S. citizens or residents might be deemed to be United States shareholders of a controlled foreign corporation subject to current inclusion of Subpart F income recognized by the corporation. See Treas. Reg. section 301.7701(b)-7(a)(3). The application of the

### 50.20.2 *Article 1(5) exceptions*

The list of exceptions in art 1(5) is quite limited:

> The provisions of paragraph 4 of this Article shall not affect—
> (a) the benefits conferred by a Contracting State under
> [i] paragraph 2 of Article 9 (Associated Enterprises),
> [ii] sub-paragraph (b) of paragraph 1 and paragraphs 3 and 5 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support),
> [iii] paragraphs 1 and 5 of Article 18 (Pension Schemes) and
> [iv] Articles 24 (Relief From Double Taxation),
> [v] [Art] 25 (Non-discrimination), and
> [vi] [Art] 26 (Mutual Agreement Procedure) of this Convention; ...

The US Department of the Treasury Technical Explanation of the Convention[58] provides:

> Some provisions are intended to provide benefits to citizens and residents even if such benefits do not exist under internal law. Paragraph 5 sets forth certain exceptions to the saving clause that preserve these benefits for citizens and residents of the Contracting States.
> Subparagraph (a) lists certain provisions of the Convention that are applicable to all citizens and residents of a Contracting State, despite the general saving clause rule of paragraph 4:
> (1) Paragraph 2 of Article 9 (Associated Enterprises) grants the right to a correlative adjustment with respect to income tax due on profits reallocated under Article 9.
> (2) Subparagraph 1(b) and paragraphs 3 and 5 of Article 17 (Pensions, Social Security, Annuities, Alimony, and Child Support) provide exemptions from source or residence State taxation for certain pension distributions, social security payments and child support.
> (3) Paragraph 1 of Article 18 (Pension Scheme) provides an exemption for certain investment income of pension schemes located in the other State, while paragraph 5 provides benefits for certain contributions by

---

saving clause to former citizens and long-term residents is addressed not in paragraph 4 but in paragraph 6."

58 Accessible *www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

> or on behalf of a U.S. citizen to certain pension schemes established in the UK.
> (4) Article 24 (Relief from Double Taxation) confirms the benefit of a credit to citizens and residents of one Contracting State for income taxes paid to the other, even if such a credit may not be available under the Code.
> (5) Article 25 (Non-Discrimination) requires one Contracting State to grant national treatment to nationals of the other Contracting State in certain circumstances. Excepting this Article from the saving clause requires, for example, that the United States give such benefits to a national of the UK even if that person is a citizen of the United States.
> (6) Article 26 (Mutual Agreement Procedure) may confer benefits on residents or nationals of the Contracting States. For example, the statute of limitations may be waived for refunds and the competent authorities are permitted to use a definition of a term that differs from the internal law definition. As with the foreign tax credit, these benefits are intended to be granted by a Contracting State to its citizens and residents.

The list of exceptions in art 1(5) continues:

> The provisions of paragraph 4 of this Article shall not affect ...
> (b) the benefits conferred by a Contracting State under
> [i] paragraph 2 of Article 18 (Pension Schemes) and
> [ii] Articles 19 (Government Service),
> [iii] Art 20 (Students),
> [iv] Art 20A (Teachers), and
> [v] Art 28 (Diplomatic Agents and Consular Officers)
> of this Convention, upon individuals who are neither citizens of, nor have been admitted for permanent residence in, that State.

The US Department of the Treasury Technical Explanation of the Convention[59] provides:

> Subparagraph (b) of paragraph 5 provides a different set of exceptions to the saving clause. The benefits referred to are all intended to be granted to temporary residents of a Contracting State (for example, in the case of the United States, holders of non-immigrant visas), but not to citizens or to persons who have acquired permanent residence in that

59 Accessible
*www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

> State. If beneficiaries of these provisions travel from one of the Contracting States to the other, and remain in the other long enough to become residents under its internal law, but do not acquire permanent residence status (i.e., in the U.S. context, they do not become "green card" holders) and are not citizens of that State, the host State will continue to grant these benefits even if they conflict with statutory rules. The benefits preserved by this paragraph are: the host country exemptions for the following items: government service salaries and pensions under Article 19 (Government Service); certain income of visiting students, trainees, teachers, professors, and researchers under Articles 20 (Students) and 20A (Teachers); the income of diplomatic agents and consular officers under Article 28 (Diplomatic Agents and Consular Officers); and the beneficial tax treatment of pension fund contributions under paragraph 2 of Article 18 (Pension Schemes).

Green card holders are at a disadvantage compared to US citizens since they pay US taxes but do not have the same benefits under the treaty. HMRC say:

> HMRC explained that the UK was not obliged to give credit where the US taxed a green card holder on a world wide basis and the taxpayer was not tax resident in the US, but where we see a recharge to the US for US workdays we will accept the US has the primary taxing rights in the same way as for US citizens and we will give credit for the US tax paid on those US workdays by green cardholders. In the US a green card holder is debarred from claiming relief under a treaty. HMRC suggested that an individual who is taxed in the US on their world wide income because he retains his green card and so is treated as a resident of the US for the purposes of Article 1(4) even though they would be treaty resident in the UK may not have taken all reasonable steps to minimise their US liability, as required by s.795A ICTA if he were to qualify for credit relief. As such, although strictly Article 24(6) may not apply to green card holders in these circumstances, the effect of the minimisation requirement is that the UK will limit relief given in the UK under the treaty to that which would be given if Article 24(6) did apply. Representatives pointed out that giving up the green card might trigger expatriation taxes in the US.
>
> The HMRC position is that we will not give relief in the UK for tax paid in the US as a result of Article 1(4). We believe that the US will give unilateral relief for the UK tax paid on their income at least to the extent it arises in the UK so as far as we know this should not lead to double taxation although it could lead to higher tax payable in the US as a result

of the alternative minimum tax provisions.[60]

## 50.21 US/UK DTA: fiscally transparent bodies

Article 1(8) of the US/UK DTA provides:

> An item of income, profit or gain derived through a person that is fiscally transparent under the laws of either Contracting State shall be considered to be derived by a resident of a Contracting State to the extent that the item is treated for the purposes of the taxation law of such Contracting State as the income, profit or gain of a resident.

It is essential to have in mind which state is which; the paragraph is easier to follow if it is expanded to read:

> An item of income./gain derived through a person that is fiscally transparent under the laws of either Contracting State shall be considered
> [i] to be derived by a resident of the UK to the extent that the item is treated for the purposes of the taxation law of the UK as the income/gain of a resident of the UK and
> [i] to be derived by a resident of the US to the extent that the item is treated for the purposes of the taxation law of the US as the income/gain of a resident of the US.

This is not in the OECD Model Treaty but it is in the US Model Income Tax Convention from 1996 and is now standard in US treaties.

If both the UK and the USA regard an entity as transparent (eg a partnership) then this provision is not needed, for (say) partnership income would in any event be regarded as income of the partners. The provision is needed for a hybrid entity, ie an entity which is regarded as transparent in one state but not in the other. The IRS explain:[61]

> Paragraph 8 addresses special issues presented by fiscally transparent entities such as partnerships and certain estates and trusts. In general, paragraph 8 relates to entities that are not subject to tax at the entity level, as distinct from entities that are subject to tax, but with respect to

60 Accessible at http://www.hmrc.gov.uk/consultations/expat-mins-160409.htm

61 US Department of the Treasury Technical Explanation of the Convention, accessible *www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*

> which tax may be relieved under an integrated system. This paragraph applies to any resident of a Contracting State who is entitled to income derived through an entity that is treated as fiscally transparent under the laws of either Contracting State. Entities falling under this description in the United States include partnerships, common investment trusts under section 584 and grantor trusts. This paragraph also applies to US limited liability companies ("LLCs") that are treated as partnerships for US tax purposes.
> Under paragraph 8, an item of income, profit or gain derived by such a fiscally transparent entity will be considered to be derived by a resident of a Contracting State if a resident is treated under the taxation laws of that State as deriving the item of income.

The IRS give some examples:

> [1] For example, if a UK company pays interest to an entity that is treated as fiscally transparent for US tax purposes, the interest will be considered derived by a resident of the US only to the extent that the taxation laws of the United States treats one or more US residents (whose status as US residents is determined, for this purpose, under US tax law) as deriving the interest for US tax purposes. In the case of a partnership, the persons who are, under US tax laws, treated as partners of the entity would normally be the persons whom the US tax laws would treat as deriving the interest income through the partnership.
> [2] Also, it follows that persons whom the United States treats as partners but who are not US residents for US tax purposes may not claim a benefit for the interest paid to the entity under the Convention, because they are not residents of the United States for purposes of claiming this treaty benefit. (If, however, the country in which they are treated as resident for tax purposes, as determined under the laws of that country, has an income tax convention with the UK, they may be entitled to claim a benefit under that convention.)
> [3] In contrast, if, for example, an entity is organized under US laws and is classified as a corporation for US tax purposes, interest paid by a UK company to the US entity will be considered derived by a resident of the United States since the US corporation is treated under US taxation laws as a resident of the United States and as deriving the income.
> [4] The same result obtains even if the entity were viewed differently under the tax laws of the UK (e.g., as not fiscally transparent in the first example above where the entity is treated as a partnership for US tax purposes). Similarly, the characterization of the entity in a third country is also irrelevant, even if the entity is organized in that third country. The

results follow regardless of whether the entity is disregarded as a separate entity under the laws of one jurisdiction but not the other, such as a single owner entity that is viewed as a branch for US tax purposes and as a corporation for UK tax purposes. These results also obtain regardless of where the entity is organized (i.e., in the United States, in the UK, or, as noted above, in a third country).
[5] For example, income from US sources received by an entity organized under the laws of the United States, which is treated for UK tax purposes as a corporation and is owned by a UK shareholder who is a UK resident for UK tax purposes, is not considered derived by the shareholder of that corporation even if, under the tax laws of the United States, the entity is treated as fiscally transparent. Rather, for purposes of the treaty, the income is treated as derived by the US entity.
[6] These principles also apply to trusts to the extent that they are fiscally transparent in either Contracting State. For example, if X, a resident of the UK, creates a revocable trust in the United States and names persons resident in a third country as the beneficiaries of the trust, X would be treated under US law as the beneficial owner of income derived from the United States. In that case, the trust's income would be regarded as being derived by a resident of the UK only to the extent that the laws of the UK treat X as deriving the income for UK tax purposes by application of the UK "settlor trust" rules.

An Exchange of Notes between the Governments of the UK and USA discusses the relation of of para 1(8) (transparency) and para 1(4) (savings clause):

*With reference to paragraph 8 of Article 1 (General scope)—*
[1] it is understood that where an item of income, profit or gain is derived through a person which is a resident of a Contracting State the provisions of the paragraph shall not prevent that Contracting State from taxing the item as the income, profit or gain of that person.

The IRS continue:[62]

[7] Paragraph 8 is not an exception to the saving clause of paragraph 4.[63] Accordingly, the notes confirm that paragraph 8 does not prevent a

62 US Department of the Treasury Technical Explanation of the Convention, accessible *www.treasury.gov/resource-center/tax-policy/treaties/Documents/teus-uk.pdf*
63 See 50.20.1 (US/UK DTA: Savings clause).

Contracting State from taxing an entity that is treated as a resident of that State under its tax law. For example, if a US LLC with UK members elects to be taxed as a corporation for US tax purposes, the United States will tax that LLC on its worldwide income on a net basis, without regard to whether the UK views the LLC as fiscally transparent. The portion of the notes relating to Article 24 (Relief from Double Taxation) provides rules for determining which Contracting State has the primary right to tax and which State must provide a credit in such circumstances.

I do not find this easy to follow, but think one can draw out 6 examples from the 7 paragraphs of the IRS explanation (my numbering):

| | **Entity** | | | | | | **resid. of person with interest in ent'y** | | | **For DT, item derived by:** | | **IRS para** |

| 4 | n | | | | | corp'n | y | | | n | y | [5] |
| 5 | y[65] | | | | | revoc. trust | y | | | y[66] | | [6] |
| 6 | n[67] | | n/r | | | revoc. trust | y | | | n[68] | n/r | [6] |

The Exchange of Notes continues:

[2] It is further understood that, where, by virtue of [para 1(8)],
[a] an item of income, profit or gain is considered by a Contracting State to be derived by a person who is a resident of that Contracting State, and
[b] the same item is considered by the other Contracting State to be

64 US will tax corporation under savings clause.
65 So far as s.624 applies.
66 So far as s.624 applies.
67 So far as s.624 applies.
68 So far as s.624 applies.

> derived [by that person or][69] by a person who is a resident of that other Contracting State,
>
> the paragraph shall not prevent either Contracting State from taxing the item as the income, profit or gain of the person considered by that State to have derived the item of income, profit or gain.

It is essential to have in mind which state is which; the paragraph is easier to follow if it is expanded to read:

> It is further understood that, where, by virtue of para 1(8),
> [a] an income/gain is considered by the UK to be derived by a person who is a resident of the UK, and
> [b] the same item is considered by the US to be derived by that person or by a person who is a resident of the US,
> the paragraph shall not prevent
> [i] the UK from taxing the item as the income/gain of the person considered by the UK to have derived the item;
> [ii] the US from taxing the item as the income/gain of the person considered by the US to have derived the item.

50.21.1 *Section 624, 720 income; s.13, 86 gains*

The Exchange of Notes continues:

> [3] It is further understood that, in applying [para 1(8)], the UK shall, exceptionally, regard an item of income, profit or gain arising to a person as falling within the paragraph where another person is charged to UK tax in respect of that item of income, profit or gain—
> (a) under [what is now s.624 ITTOIA & s.720 ITA]; or
> (b) under section [77][70] or 86, TCGA 1992.
> [4] It is further understood that, in applying the paragraph, a person shall be regarded as fiscally transparent under the laws of the UK in relation to an item of income, profit or gain where a charge is made on another person on that item either—
> (a) by virtue of section 13, TCGA 1992; or
> (b) because that other person has (or, under [what is now s.464 ITA[71]],

69 I do not understand the words in brackets and would be grateful to any reader who could explain.

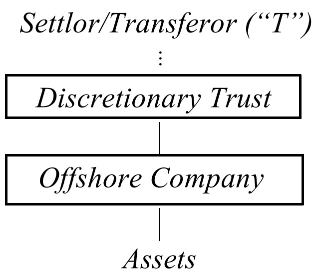
70 [Author's note. Section 77 is now repealed.]

71 See 23.1.4 (Scots trusts).

is treated as having) an equitable right in possession in a trust.

Thus trusts within s.624 and companies within s.720 are regarded as fiscally transparent for IT; trusts within s.86 and companies within s.13 are regarded as fiscally transparent for CGT.

Take a standard structure:



Suppose:

(1) T is domestic-law ordinarily UK resident but treaty-resident in the US.

(2) The entities are transparent for US tax so T regarded for US purposes as receiving OC's income.

(3) S.720 applies so T is taxed for UK tax purposes on OC's income

This is a straightforward case within example 1 of my table. For US/UK treaty purposes, T is treated as receiving OC's income.

### 50.21.2 *Relationship to art.24 (foreign tax credit )*

The Exchange of Notes continues:

> *With reference to Article 24 (Relief from double taxation)—*
> it is understood that, under paragraph 4 or 8 of Article 1 (General scope), the provisions of the Convention may permit the Contracting State of which a person is a resident (or, in the case of the United States, a citizen), to tax an item of income, profit or gain derived through another person (the entity) which is fiscally transparent under the laws of either Contracting State, and may permit the other Contracting State to tax
> (a) the same person;
> (b) the entity; or
> (c) a third person
> with respect to that item. Under such circumstances, the tax paid or accrued by the entity shall be treated as if it were paid or accrued by the first-mentioned person for the purposes of determining the relief from

> double taxation to be allowed by the State of which that first-mentioned person is a resident (or, in the case of the United States, a citizen), except that, in the case of an item of income from real property to which paragraph 1 of Article 6 (Income from real property) of the Convention applies, or a gain from the alienation of real property to which paragraph 1 of Article 13 (Gains) applies, the tax paid or accrued by the person who is a resident of the Contracting State in which the real property is situated shall be treated as if it were paid or accrued by the person who is a resident of the other Contracting State.
> In the case where the same item of income, profit or gain derived through a trust is treated by each Contracting State as derived by different persons resident in either State, and
> (a) the person taxed by one State is the settlor or grantor of a trust; and
> (b) the person taxed by the other State is a beneficiary of that trust,
> the tax paid or accrued by the beneficiary shall be treated as if it were paid or accrued by the settlor or grantor for the purposes of determining the relief from double taxation to be allowed by the State of which that settlor or grantor is a resident (or, in the case of the United States, a citizen), except that, in the case of an item of income from real property to which paragraph 1 of Article 6 (Income from real property) of the Convention applies, or a gain from the alienation of real property to which paragraph 1 of Article 13 (Gains) applies, the tax paid or accrued by the person who is a resident of the Contracting State in which the real property is situated shall be treated as if it were paid or accrued by the person who is a resident of the other Contracting State.
> It is further understood that paragraphs 2 and 5 of Article 24 shall apply to such an item of income, profit or gain to the extent necessary to provide relief from double taxation.

### 50.21.3 *US partnerships and LLCs*

In the Double tax guidance note 3: Partnerships and LLCs claiming relief under the 2002 UK/USA DTC, HMRC say:

> **How the DTC treats US partnerships and LLCs**
> [HMRC set out Art.1(8) of the DTC and continue:] A transparent concern itself is therefore not given the right to found a claim for relief.

The reason that a transparent entity does not claim DT relief is that it is not "liable to tax" in a state which regards it as transparent, and so is not treaty-resident in that Contracting State.[72]

> Instead, that right is given individually to those 'qualifying persons' defined by the General Definitions Article [4][73]; and as further qualified by the Limitation on Benefits Article [23][74], who have derived their beneficial entitlement to income, profit or gain through their participation in the transparent concern.[75]

The text throughout erroneously refers to "qualifying persons;" the correct expression is *qualified* persons. HMRC continue with a concession:

> **What this would mean for partners and LLC members**
> Strictly speaking, HMRC should accept claims only from those partners and members who themselves fall to be regarded as 'qualifying persons' in their own right.
> In practice, this would mean as many separate claims for one item of UK-source income paid to a transparent concern such as a partnership or LLC[76] as there are beneficial owners to whom it is then being paid on or distributed.
> HMRC recognises that applying the DTC provisions in such a literal way would be unwelcome to its customers and could possibly hamper the business interests of both countries. It would be a retrograde step in customer service terms, and would not be justified on either an assessment of risk to the UK Exchequer or on compliance grounds. HMRC wants to keep a proper balance between the ease with which US residents should be able to claim relief with the administrative procedures and paperwork that must be employed by the UK Revenue to verify and give effect to such a claim.
> **HMRC's approach to partnerships and LLCs**
> Accordingly, HMRC intends to continue its previous practice of taking claims in the names of both partnerships and LLCs.
> These concerns should use the form US/Company 2002, and should provide (as before) a list of the names and addresses of the partners or members, with details of their respective shares of income. This is covered by the second bullet of the form's own Guidance Note 2.
> This form is tailored for use by the majority of those non-individual businesses and concerns which are covered by detailed provisions of the DTC - most notably by the Limitations on Benefit Article 23, which lays down very specific

---

72 See 5.13 (Treaty Residence: Partnerships).
73 The original erroneously refers to article 3.
74 The original erroneously refers to article 27.
75 HMRC add: "It will be noted that this is not so very different from the situation that obtained under Article 4(1)(b)(i) of the 'old' 1980 DTC." I am not sure about that, but the point does not now arise.
76 The manual is considering a LLC which is transparent under US law.

tests for defining the 'qualified persons' who can benefit under the treaty. There is therefore no separate section for transparent concerns such as partnerships or LLCs.

**What partnerships and LLCs are asked to do**

HMRC Residency ask partnerships and LLCs to complete the US/Company 2002 as follows

* Parts A and B in full
* Part C in full, as appropriate
* Part D if repayment of UK tax is claimed
* Part E if appropriate
* Part F in full, with the general or managing partner/member signing the declaration
* With the additional details as requested in the US-Company 2002 Notes, which is part of the claim form.

Claimants are also free to attach any statement or schedule in support of the claim, as they believe would help explain their circumstances or the basis of the claim.

**What HMRC will do**

HMRC will consider the replies to all the above, and the information supplied. Consistent with previous practice, where the facts allow the reasonable conclusion that all beneficial owners of the income for whose shares relief is being claimed are 'qualifying persons' within the meaning of the DTC, then HMRC will process things in the normal way. This will more often than not involve a reference to the tax office for the UK payer, under normal internal liaison arrangements.

If the information given in with the claim form does not allow this conclusion, considering in particular the tests set out in Article 23, HMRC will probably have to contact claimants with further specific questions and requests for information before it can consider finalising processing of things.

HMRC do not want to add to the time taken to resolve matters. Where possible, it will start processing the claim, on a 'without prejudice' basis and pending satisfactory conclusion of any correspondence.

HMRC will be as quick as possible, with due consideration for customers' business needs, and with sympathy and understanding for any compliance difficulties that the process might cause them.

As with any claim, letting HMRC have an advance copy of the form US/Company 2002 (at the time it is submitted to the IRS for certification) may allow it to flag up any points of difficulty at an early stage, and opens up the possibility of anticipating what is needed or might be done before the certified form arrives.

No doubt some high level lobbying has taken place. In relation to claims for relief from deduction at source, HMRC say (inconsistently) that they adopt a strict approach.[77]

## 50.22 "Subject to tax"

Some treaties provide exemption for income which is "subject to tax". So far as the issue concerns foreign tax it would ultimately be decided by foreign tax authorities and courts, but the HMRC view may well represent an international consensus. So it is relevant to note that INT Manual provides:

> **162020. 'Subject to tax'** [January 2011]
> The terms of some agreements provide that a resident of the UK will be entitled to exemption or relief from the foreign tax on certain types of income only if he is subject to tax on that income in the UK.
> A person is regarded as subject to tax if, for example ...
> e) the remittance basis applies (see RDRM30005 onwards): he is subject to tax only on the sums remitted.

Similarly, in the context of the lower-paid employee exemption, the RDR Manual provides:

> **32070 - Remittance Basis: Accessing the remittance basis: Claiming the remittance basis: Calculation of income tax liability - exemption for non-domiciles with small amounts of foreign employment income**
> ...*Subject to Foreign Tax*
> Although 'subject to a foreign tax' might in some circumstances mean that the individual has actually paid some tax on the foreign income to a foreign tax authority, actual payment is not a necessary requirement to take advantage of this exemption.
> For example, given the levels of foreign income involved there might be nothing due to be paid on part or all of the income, as a result perhaps of a foreign countries' own personal allowances systems, or similar tax provisions which are akin to such allowances, such as a tax rate band of 0 per cent. Such income would still be considered to be 'subject to a foreign tax' in the context of this exemption.

---

77 See 17.10.3 (Relief when borrower is a partnership).

CHAPTER FIFTY ONE

# EU LAW AND UK TAXATION

## 51.1 EU law and UK taxation – Introduction

This chapter considers the effect of EU law on UK tax law and in particular whether three anti-avoidance provisions are consistent with EU law:

(1) s.13 TCGA
(2) s.720 ITA
(3) s.86 TCGA

A full discussion would require a book to itself, but it would never be up to date because of constant new case law, and almost everything in this chapter will need review when the cases discussed here become final.

In this chapter I refer to a company established in another Member State as a "**MS company**".

It may be helpful to set out the former and present article numbers in a table:[1]

| Subject | EC Treaty | TFEU | EEA agreement |
|---|---|---|---|
| Freedom of establishment | 43 | 49 | 31 |
| - public policy exception | 45 | 51 | 32 |
| - for companies | 48 | 54 | 34 |
| Free movement of capital | 73b | 63 | 40 |
| - justification | 73d | 65 | |

See too 7.9 (EU restriction on exit taxes).

For further discussion, see Mullen and Harriet, *The Application of EU*

1 For a complete table, see A Comparative Table of the Current EC and EU Treaties as Amended by the Treaty of Lisbon, Cm7311, accessible *www.official-documents.gov.uk/document/cm73/7311/7311.pdf*.

*Law to UK Direct Taxes* (forthcoming 2011).

### 51.1.1 *Relationship of EU law and UK law*

There is a "tension, if not an inconsistency between national jurisdiction over direct taxation and EC Treaty freedoms, at least once those freedoms are interpreted as prohibiting unjustified differential tax treatment of national and foreign EU companies."[2]

In the legal battle EU law will prevail. The primacy of EU law over UK domestic law hardly needs to be stated, but to begin at the beginning: in *Thoburn v Sunderland City Council*, Laws LJ stated the fundamental proposition:

> All the specific rights and obligations which EU law creates are by the 1972 Act[3] incorporated into our domestic law and rank supreme: that is, anything in our substantive law inconsistent with any of these rights and obligations is abrogated or must be modified to avoid the inconsistency. This is true even where the inconsistent municipal provision is contained in primary legislation.[4]

The ECJ put it this way:

> although direct taxation falls within the competence of the Member States, the latter must none the less exercise that competence consistently with Community law.[5]

### 51.1.2 *Nature of ECJ case law*

ECJ case law is unlike case law in common law jurisdictions such as the UK.[6] The ECJ gives one short, single judgment. This contains a set of

---

2 *Thin Cap Claimants v HMRC* [2011] STC 738 at [7].

3 The reference is to s.2 European Communities Act 1972 which provides:
"All such rights, powers, liabilities, obligations and restrictions from time to time created or arising by or under the Treaties, and all such remedies and procedures from time to time provided for by or under the Treaties, as in accordance with the Treaties are without further enactment to be given legal effect or used in the UK shall be recognised and available in law, and be enforced, allowed and followed accordingly."

4 [2003] QB 151 at [69].

5 *Stauffer* at [15].

6 In this respect Scotland is like a common law jurisdiction.

short, broad propositions repeated verbatim from earlier cases.[7] There is little detailed consideration of earlier cases. There is little consideration of the precise words of the EU treaties. The language of the treaties is of course different from UK statutory drafting, and typically contains vague evaluative terms which give the ECJ freedom to develop its own principles. Decisions are based on policy considerations, to a far greater extent than is the case, or at least than is expressed to be the case, in the common law. Because the judgment is translated into English, the prose is unidiomatic and sometimes contains errors of translation.

## 51.2 EC infringement proceedings

The European Commission has formally requested the UK to amend two anti-avoidance rules: the TAA provisions and s.13 TCGA. The requests take the form of Reasoned Opinions (the second step of the infringement procedure (Art.258 TFEU). In the absence of a satisfactory response the Commission may refer the UK to the ECJ.

The text of the request is not published, but its content is not hard to guess. An EC press release provides the essential details. The first point relates to s.720 ITA:

> The first infringement relates to the UK's "transfer of assets abroad" legislation. Under this legislation, if a UK resident individual invests in a company by transferring assets to it, and if this company is incorporated and managed in another Member State, then the investor is subject to tax on the income generated by the company to which he/she contributed the assets. However, if the same individual invested the same assets in a UK company, only the company itself would be liable for tax.

The second point relates to s.13 TCGA:

> The second infringement relates to the attribution gains to member of non-UK resident companies regime. Under this legislation, if a UK-resident company acquires more than a 10% share of a company in another Member State, and the latter company realises capital gains from the sale of an asset, the gains are immediately attributed to the UK

7 A large number of cases are then cited for the propositions. I do not set out the cases in the quotations in this book as they can be found by referring back to the original case.

company, which becomes liable for corporation tax on these capital gains. If, on the other hand, the UK company had invested in another UK resident company, only the latter would be taxable on its capital gains.

The EC analysis is as follows:

> In both cases, the Commission considers there to be discrimination, seeing as investments outside the UK are taxed more heavily than domestic investments. The difference in tax treatment between domestic and cross-border transactions restricts two fundamental principles of the EU's Single Market, namely of the freedom of establishment and the free movement of capital contrary to Articles 49 and 63 TFEU and Articles 31 and 40 of the EEA Agreement.
> The Commission is of the opinion that both restrictions are disproportionate, in the sense that they go beyond what is reasonably necessary in order to prevent abuse or tax avoidance and any other requirements of public interest.[8]

The invalidity of these important anti-avoidance rules ought to be a matter of considerable public concern. It should not however be a matter of surprise, since practitioners have taken this view for some years, and the CIOT have publically lobbied the European Commission to take this step.[9]

Where the EU defence is in point taxpayers should not pay the tax, and where they have paid tax in the past they should now put in repayment claims.

## 51.3 Freedom of establishment

Article 49 TFEU provides:

> [1] Within the framework of the provisions set out below, restrictions on the freedom of establishment of nationals of a Member State in the territory of another Member State shall be prohibited.

### 51.3.1 *What is "establishment"?*

Article 49 TFEU continues:

8 IP/11/158, 16 February 2011.

9 Letters from CIOT to EC dated 6 Feb 2009 (s.720) and 10 Feb 2009 (s.13).

> [2] Such prohibition shall also apply to restrictions on the setting-up of agencies, branches or subsidiaries by nationals of any Member State established in the territory of any Member State.
> [3] Freedom of establishment shall include
> [a] the right to take up and pursue activities as self-employed persons and
> [b] to set up and manage undertakings, in particular companies or firms within the meaning of the second paragraph of Article 48,
> under the conditions laid down for its own nationals by the law of the country where such establishment is effected, subject to the provisions of the chapter relating to capital.

In *Stauffer*[10] an Italian charity (tax exempt in Italy) received rent from property in Germany. German law allowed charity tax exemption only for charities established in Germany. Accordingly the German authorities sought to impose German tax on the rental income.

The ECJ held that there was no breach of freedom of establishment:

> 18 According to the case-law of the Court, the concept of establishment within the meaning of the Treaty is a very broad one, allowing a Community national to participate, on a stable and continuous basis, in the economic life of a Member State other than his State of origin and to profit therefrom, so contributing to economic and social interpenetration within the Community in the sphere of activities as self-employed persons.[11]
> 19 However, in order for the provisions relating to freedom of establishment to apply, it is generally necessary to have secured a permanent presence in the host Member State and, where immovable property is purchased and held, that property should be actively managed. It is clear from the account provided by the national court that the foundation does not have any premises in Germany for the purposes of pursuing its activities and that the services ancillary to the letting of the property are provided by a German property management agent.
> 20. It must therefore be concluded that the provisions governing freedom of establishment are not applicable in circumstances such as those in the dispute in the main proceedings.

10 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

11 The ECJ referred to case law not set out here.

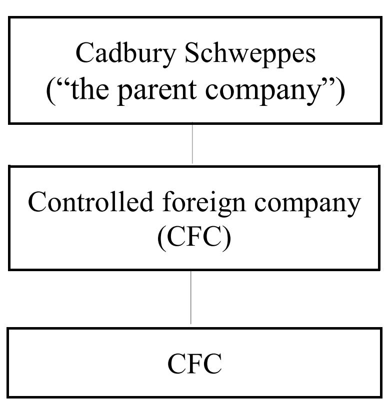
The charity did not have or seek to have an "establishment" in Germany: it did not carry out any charitable work in Germany and did not actively manage its German investment property. Had it wanted to, it could no doubt have done so.

While the premiss seems correct, the conclusion that FoE is not applicable is far from self-evident. There was a restriction of Stauffer's freedom to establish itself *outside* Germany. Because the foundation was established in Italy, it incurred a German tax burden which would not have been paid if it had been established in Germany. However the argument was not put on this basis and the ECJ did not consider it.

Suppose the foundation had had an establishment in Germany - for instance if it ran a college there or provided services to its tenant rather than using a German property management agent. In that case it would have had an establishment in Germany. Assuming Germany would have denied the charity exemption, would it then have succeeded under this head? Since it succeeded under free movement of capital, the point seems somewhat academic.

### 51.3.2 *What is a restriction on freedom of establishment?*

*Cadbury Schweppes v IRC* [2006] STC 1908 concerned this corporate structure:



The ECJ summarised the CFC legislation thus:

> 44 Where the resident company has incorporated a CFC in a Member State in which it is subject to a lower level of taxation within the meaning of the legislation on CFCs, the profits made by such a

> controlled company are, pursuant to that legislation, attributed to the resident company, which is taxed on those profits. Where, on the other hand, the controlled company has been incorporated and taxed
> [1] in the UK or
> [2] in a State in which it is not subject to a lower level of taxation within the meaning of that legislation,
> the latter is not applicable and, under the UK legislation on corporation tax, the resident company is not, in such circumstances, taxed on the profits of the controlled company.

It is not self-evident that the CFC legislation restricted the parent company's FoE, but the ECJ held that it did:

> 45 That difference in treatment creates a tax disadvantage for the resident company to which the legislation on CFCs is applicable. Even taking into account ... the fact ... that such a resident company does not pay, on the profits of a CFC within the scope of application of that legislation, more tax than that which would have been payable on those profits if they had been made by a subsidiary established in the UK, the fact remains that under such legislation the resident company is taxed on profits of another legal person. That is not the case for a resident company with
> [1] a subsidiary taxed in the UK or
> [2] a subsidiary established outside that Member State which is not subject to a lower level of taxation.
> 46 ... the separate tax treatment under the legislation on CFCs and the resulting disadvantage for resident companies which have a subsidiary subject, in another Member State, to a lower level of taxation are such as to hinder the exercise of freedom of establishment by such companies, dissuading them from establishing, acquiring or maintaining a subsidiary in a Member State in which the latter is subject to such a level of taxation. They therefore constitute a restriction on freedom of establishment within the meaning of Articles [49 & 54 TFEU].

The CFC rules only applied to companies in some member states, namely, those subject to a lower level of taxation (as defined). Because of this selective operation the CFC rules clearly restricted FoE, since given the choice in siting a subsidiary in:
(1) a MS with a lower level of taxation or
(2) a MS with a higher level of taxation (but less than the UK)
one would in principle prefer to choose the latter. But the point made at

44[1] and 45[1] shows that the CFC rules would restrict freedom of establishment even if they applied to every MS, regardless of the level of taxation just because they did not apply to a UK subsidiary. At first sight that seems surprising. But the income of the CFC is subject to foreign tax as well as UK tax. Although UK tax allows a credit for the foreign tax, the burden of dealing with two tax systems is a significant one.[12] This may be a deterrent against a UK parent establishing a CFC in any other MS.

### 51.3.3 *Who is entitled to claim freedom of establishment?*

Article 49 prohibits restrictions on the freedom of establishment of "nationals of a Member State" ie establishment of non-nationals may be restricted.

Article 54 TFEU extends the right to companies and firms:

> [1] Companies or firms formed in accordance with the law of a Member State and having their registered office, central administration or principal place of business within the Community shall, for the purposes of this Chapter, be treated in the same way as natural persons who are nationals of Member States.

Article 54 goes on to define "companies or firms":

> "Companies or firms" means companies or firms constituted under civil or commercial law, including cooperative societies, and other legal persons governed by public or private law, save for those which are non-profit-making.

### 51.3.4 *Public policy exemption*

Article 52 TFEU provides an exception for public policy:

> The provisions of this Chapter and measures taken in pursuance thereof shall not prejudice the applicability of provisions laid down by law, regulation or administrative action providing for special treatment for foreign nationals on grounds of public policy, public security or public health.

12 DTA relief was (unfairly) denied: see 50.9.2 (*Bricom*).

### 51.3.5 *Abuse and justification compared*

In *Cadbury Schweppes* the ECJ considered separately (1) whether there was abuse of EU law and (2) whether the CFC legislation was justified. I would have thought that the two questions were linked, for provisions to prevent abuse would necessarily be justified.

Perhaps the distinction is:

(1) in cases of abuse, the EU law defence fails (even if UK provisions are unlawful in EU law);

(2) in the absence of abuse, the EU law defence succeeds (assuming the UK's provisions are contrary to EU law).

### 51.3.6 *Abuse*

*Cadbury Schweppes* dealt with abuse quite shortly:

> 35 It is true that nationals of a Member State cannot attempt, under cover of the rights created by the Treaty, improperly to circumvent their national legislation. They must not improperly or fraudulently take advantage of provisions of Community law.[13]

Here of course everything depends on the meaning of the elastic term "improperly". ("Fraudulently" adds nothing since anything which is fraudulent must also be improper.)

> 37 As to freedom of establishment, the Court has already held that the fact that the company was established in a Member State for the purpose of benefiting from more favourable legislation does not in itself suffice to constitute abuse of that freedom ...[14]
> 38 ... it follows that the fact that in this case Cadbury Schweppes decided to establish [its CFCs] in [Ireland] for the avowed purpose of benefiting from the favourable tax regime which that establishment enjoys does not in itself constitute abuse.

---

13 The ECJ refers to Case 115/78 *Knoors* [1979] ECR 399, para 25; Case C-61/89 *Bouchoucha* [1990] ECR I-3551, para 14; and Case C-212/97 *Centros* [1999] ECR I-1459, para 24.

14 The ECJ refers to *Cadbury Schweppes at* [27], and Case C-167/01 *Inspire Art* [2003] ECR I-10155, para 96.

We do not know what abuse is, but we know what it is not, and if this is not abuse then use of a MS company for tax avoidance is never an abuse.

### 51.3.7 *Justification*

The ECJ next considered whether there was a justification for the CFC legislation:

> 55 ... in order for a restriction on the freedom of establishment to be justified on the ground of prevention of abusive practices, the specific objective of such a restriction must be to prevent
> [1] conduct involving the creation of wholly artificial arrangements which do not reflect economic reality,
> [2] with a view to escaping the tax normally due on the profits generated by activities carried out on national territory.

There are two requirements for justification: [1] is a conduct requirement and [2] is an intention requirement. Both must be present but the conduct requirement is the more important because if there are "wholly artificial arrangements which do not reflect reality" then the intention requirement is likely to be satisfied. "Artificial" is of course vague.[15] What is the conduct requirement?

> ... objective circumstances showing that, despite formal observance of the conditions laid down by Community law, the objective pursued by freedom of establishment, as set out in paras 54 and 55 of this judgment, has not been achieved.[16]

When is the objective of FoE not achieved?

> 65 In those circumstances, in order for the legislation on CFCs to comply with Community law, the taxation provided for by that legislation must be excluded where, despite the existence of tax motives, the incorporation of a CFC reflects economic reality.

What is economic reality?

---

15 See 29.17.2 (Artificial transactions and devices).

16 The ECJ refers to Case C-110/99 *Emsland-Stärke* [2000] ECR I-11569, paras 52 and 53, and Case C-255/02 *Halifax and Others* [2006] ECR I-0000, paras 74 and 75.

> 66 That incorporation must correspond with an actual establishment intended to carry on genuine economic activities in the host Member State, as is apparent from the case-law recalled in paras 52 to 54 of this judgment.

The expression "genuine economic activities" does not take us much further.

> 67 ... that finding must be based on objective factors which are ascertainable by third parties with regard, in particular, to the extent to which the CFC physically exists in terms of premises, staff and equipment.
> 68 If checking those factors leads to the finding that the CFC is a fictitious establishment not carrying out any genuine economic activity in the territory of the host Member State, the creation of that CFC must be regarded as having the characteristics of a wholly artificial arrangement. That could be so in particular in the case of a "letterbox" or "front" subsidiary.[17]

The metaphors of "letterbox" and "front" and the epithet "fictitious" and "artificial" are conclusions rather than indications or useful tests of what is "economic reality". The use of the words "genuine", "reality" and "artificial" is normally a sign of intellectual desperation. The ECJ offers a comment on "artificial":

> 69 On the other hand, as pointed out by the Advocate General in point 103 of his Opinion, the fact that the activities which correspond to the profits of the CFC could just as well have been carried out by a company established in the territory of the Member State in which the resident company is established does not warrant the conclusion that there is a wholly artificial arrangement.

On the other hand, "premises, staff and equipment" are easily understood. The question is: how large a premises, how many staff and how much equipment is needed?

My conclusion is that what constitutes "genuine economic activities" is

---

17 The ECJ refers to Case C-341/04 *Eurofood* IFSC [2006] ECR I-0000, paras 34 and 35).

still at present a fairly open question.[18] The answer should become clearer when the *Cadbury Schweppes* litigation is complete.

## 51.4 Free movement of capital

Article 63 TFEU provides:

> 1. Within the framework of the provisions set out in this Chapter, all restrictions on the movement of capital between Member States and between Member States and third countries shall be prohibited.
> 2. Within the framework of the provisions set out in this Chapter, all restrictions on payments between Member States and between Member States and third countries shall be prohibited.

### 51.4.1 *Meaning of "movement of capital"*

The TFEU does not define "movement of capital" or "payments between member states". In practice the ECJ has regard to the list in directive

18 For HMRC views see "Taxation of the foreign profits of companies: a discussion document" (June 2007) accessible *www.hm-treasury.gov.uk/consult_foreign_profits.htm*:

"In *Cadbury Schweppes,* the ECJ confirmed that there is a legitimate role for CFC rules under the Treaty, so long as the rules do not tax the profits of genuine economic activities in overseas subsidiaries.
The Government considers that, in making this judgment, the Court intended to draw a meaningful distinction between profits from a genuine commercial activity and profits that have been artificially divorced from the activity that creates them. So CFC rules should not be protectionist: but at the same time they may permit the fair allocation of taxing rights between Member States, so respecting the Treaty.
Commentators who have criticised the changes the Government has made in [s.751A ICTA] claim that in the light of Cadbury Schweppes only highly artificial transfers may be targeted by CFC rules. Subsequent rulings from the Court (e.g. on the thin capitalisation case) support the Government's wider reading – but full certainty on this point is unlikely to be achieved in the short term."

But the EC did not agree with HMRC: Reference: IP/11/606, 19 May 2011:

"Despite the corrective measures taken by the UK, the Commission considers that the UK is still not fulfilling its obligations under Articles 49 and 63 (freedom of establishment and free movement of capital) of the Treaty on the Functioning of the EU and Articles 31 and 40 of the European Economic Area Agreement. Indeed, UK provisions may lead, in certain cases, to an additional taxation of profits made by subsidiaries engaged in genuine economic activities in other EU Member States or EEA countries.."

88/361/EEC (now repealed).[19] The list - too long to set out here - is not exhaustive.[20]

51.4.2 *What is a restriction on free movement of capital?*

In *Stauffer*[21] the ECJ held that the rule exempting only German charities from German income tax constituted a restriction on free movement of capital (which one might have thought a clear case).

Similarly in *Persche*, an income tax relief for gifts to German charities only constituted a restriction on free movement of capital. This was just a rerun of the arguments in *Stauffer* and the conclusion was inevitable.

The point was followed again in *Missionswerk* at [24]- [26] where the Belgian succession duty relief restricted to Belgian non-profit organisations was held to be a restriction on free movement of capital.

51.4.3 *Free movement of capital to non-EU countries*

Free movement of capital applies not just between member states but also between member states and non-EU countries. There is however a transitional relief in the case of non-EU countries. Article 64 provides:

> 1. The provisions of Article 63 shall be without prejudice to the application to third countries of any restrictions which exist on 31 December 1993 under national or Union law adopted in respect of the movement of capital to or from third countries involving direct investment — including in real estate — establishment, the provision of financial services or the admission of securities to capital markets. ...

The UK rules discussed in this chapter existed in 1993, so this would preclude relief for a non-EU country.

## 51.5 Justification

Article 65 TFEU provides an exception to the general principle of free

---

19 24 June 1988, Directive for the implementation of Article 67 of the Treaty.

20 See *Missionswerk Werner Heeukelbach eV v 'État belge* Case C-25/10 at [15].

21 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439.

movement of capital:

> 1. The provisions of Article 63 shall be without prejudice to the right of Member States
> (a) to apply the relevant provisions of their tax law which distinguish between taxpayers who are not in the same situation
> [i] with regard to their place of residence or
> [ii] with regard to the place where their capital is invested.
> (b) to take all requisite measures to prevent infringements of national law and regulations, in particular in the field of taxation and the prudential supervision of financial institutions, or to lay down procedures for the declaration of capital movements for purposes of administrative or statistical information, or to take measures which are justified on grounds of public policy or public security.
> 2. The provisions of this Chapter shall be without prejudice to the applicability of restrictions on the right of establishment which are compatible with this Treaty.

One might have thought that article 65.1 must be in point, as UK and non-UK entities are not "in the same situation with regard to their place of residence." However the provision is limited by what follows:

> 3. The measures and procedures referred to in paragraphs 1 and 2 shall not constitute a means of arbitrary discrimination or a disguised restriction on the free movement of capital and payments as defined in Article 63.

It is not the case that *any* discrimination on the ground of residence is permitted as restrictions must not be "arbitrary" or "disguised restrictions on free movement of capital". These vague and evaluative terms have left the ECJ free to devise its own principles and that has been the main issue in the ECJ case law.

*Stauffer* states where the ECJ draw the line:

> 32. According to the case law, for national tax legislation such as that at issue in the main proceedings, ... to be regarded as compatible with the Treaty provisions on the free movement of capital, the difference in treatment must concern situations which are not objectively comparable...

The ECJ are fond of the word "objectively" but it adds rather little.

"Comparable" is a vague and evaluative word. The ECJ continue:

> ... or be justified by overriding reasons in the general interest, such as the need to safeguard the coherence of the tax system or effective fiscal supervision ... In order to be justified, moreover, the difference in treatment between charitable foundations with unlimited tax liability [ie qualifying for tax exemption] in Germany and foundations of the same kind established in other member states must not go beyond what is necessary in order to attain the objective of the legislation in question.[22]

### 51.5.1 *Excessive tax cost of abolishing restrictions on free movement of capital*

The ECJ does not think much of this argument. In *Thin Cap Claimants v HMRC:*

> It is settled law that reduction in tax revenue does not constitute an overriding reason in the public interest which may justify a measure which is in principle contrary to a fundamental freedom.[23]

### 51.5.2 *Need to prevent tax avoidance*

The need to prevent avoidance is accepted as a reason for a restriction on EU freedoms only if the legislation is targeted so that it is limited to cases of tax avoidance. The idea that tax avoidance legislation should be limited in this way is something to which the government have paid lip-service but but it has not been reflected in practice:

> ... at the moment [anti-avoidance] works like a drive-by shooting. You might hit your objective but you also hit a lot of other people.[24]

It will be no surprise to tax practitioners that when legislation is put to this test, it regularly fails. This is not just a UK problem:

> 37. As regards more specifically the justification based on the risk of tax

22 *Stauffer* at [32].
23 [2007] STC 326 at [36].
24 Ussher and Walford, *National Treasure* (Demos, 2011) accessible *www.demos.co.uk/files/National_treasure_-_web.pdf?1299511925*.

> evasion,[25] it is important to note that the legislation at issue here does not have the specific purpose of preventing wholly artificial arrangements, designed to circumvent German tax legislation, from attracting a tax benefit, but applies generally to any situation in which the parent company has its seat, for whatever reason, outside the Federal Republic of Germany. Such a situation does not, of itself, entail a risk of tax evasion, since such a company will in any event be subject to the tax legislation of the State in which it is established ....[26]

### 51.5.3 *Need for effective supervision of taxpayers/to prevent fraudulent evasion*

This has not helped national governments. The ECJ takes the view that the mutual assistance directive, now 2010/24/EU allows national governments "to obtain all the information that may be necessary to effect a correct assessment of a taxpayer's liability to tax".[27]

### 51.5.4 *Ensuring a balanced allocation between members states of the power to tax*

This was recognised as a possible justification in the *Thin Cap* case [2011] STC 738 at [55].

### 51.5.5 *Cohesion*

In *Stauffer* the ECJ said:

> 52 In that regard, the Court has acknowledged that the need to safeguard the cohesion of a tax system may justify a restriction on the exercise of the fundamental freedoms guaranteed by the Treaty.[28]

I am not sure what is meant by the terms "coherence" or "cohesion" of the tax system, if it is anything other than a general term for the more specific needs set out above: the need to collect enough tax, and to prevent

---

25 The meaning is "avoidance": see

26 *Lankhorst-Hohorst GmbH v. Finanzamt Steinfurt* [2003] STC 607.

27 *Centro di Musicologia Walter Stauffer v Finanzamt München für Körperschaften* [2008] STC 1439 at [50].

28 The ECJ refers to (Case C-204/90 *Bachmann* [1992] ECR I-249, paragraph 28, and Case C-300/90 *Commission v Belgium* [1992] ECR I-305, paragraph 21).

avoidance and evasion. However the concept does not justify much. It did not help the German government in *Stauffer*. In *Thin Cap Claimants v HMRC* the Court of Appeal concluded:

> The permissible scope of the justification of the need to maintain the coherence of the tax system was held to be very narrow indeed, so narrow as to approach vanishing point.[29]

## 51.6 Freedom to provide services

Article 56 TFEU provides:

> Within the framework of the provisions set out below, restrictions on freedom to provide services within the Union shall be prohibited in respect of nationals of Member States who are established in a Member State other than that of the person for whom the services are intended.

In *Cadbury Schweppes* the Advocate General considered and dismissed arguments based on this:

> 34 The applicants submit that the provisions of the Treaty on freedom to provide services also apply in this case. They claim that the legislation at issue makes the supply of financial services by [the CFCs] to their UK resident parent company more difficult. ...
> 35 I am not convinced by the applicants' argument....
> 36. Admittedly, if the legislation at issue has the result that a resident company is dissuaded from establishing a subsidiary in another Member State, it also has the result that the supply of services by such a subsidiary out of that Member State is prevented. However, that latter restriction is a consequence of the hindrance to establishment. In the present case, it is exactly the freedom to establish a subsidiary in that Member State which is at the core of the proceedings. I do not therefore see the relevance of reliance on the rules on freedom to provide services as well. In any event, I do not believe that examination of the legislation at issue in the light of that freedom, in addition to freedom of establishment, can change the result of my analysis.

29 [2011] STC 738 at 26. The point will need to be reviewed when the case is final.

## 51.7 Other aspects of EU law

### 51.7.1 *Free movement of persons*

Article 45 TFEU provides:

> 1. Freedom of movement for workers shall be secured within the Union.
> 2. Such freedom of movement shall entail the abolition of any discrimination based on nationality between workers of the Member States as regards employment, remuneration and other conditions of work and employment..."

### 51.7.2 *Discrimination on grounds of nationality*

Article 18 TFEU provides:

> Within the scope of application of the Treaties, and without prejudice to any special provisions contained therein, any discrimination on grounds of nationality shall be prohibited...

State Aid rules may also need consideration.

### 51.7.3 *Generalising from CFCs to other anti-avoidance rules*

The CFC legislation attributes income of a non-resident to a UK resident. The attribution of income or gains of a non-resident to a UK resident is also a feature of all the anti-avoidance rules discussed in this chapter.

## 51.8 Section 13 TCGA

Section 13 TCGA is a restriction on FoE of an individual who owns a non-resident company established in a MS. That is less than self-evident, since:

(1) A UK company pays tax on its chargeable gains at the corporation tax rate;
(2) An individual setting up a foreign company, pays tax on its gains at the personal CGT rate.

From 2010/11 the personal CGT rate is lower than the mainstream corporation tax rate.[30] Far from being a restriction on FoE, the rule is one which may encourage foreign establishment! But if one focuses on the individual alone and not on the structure as a whole, there is a FoE restriction.

What if the individual owns less than 100% of the MS company? FoE confers only a right to "set up and manage".

What if the company is owned by a trust? The right to FoE is a right of nationals of a MS (extended to companies and firms). What is the nationality of a trust? One might look to the nationality of the trustees in their private capacities, or treat the trust as an entity with a nationality.

There can be no question of justification, because the CFC legislation has a motive exemption[31] but s.13 TCGA has none.

## 51.9 Transfer of assets abroad

Section 720 ITA restricts FoE where:
(1) the transferor is a national of a MS.
(2) the person abroad is a MS company.
In fact (unlike the CFC case) the restriction on FoE is self-evident: if an individual sets up a foreign company within s.720 they would pay income tax on the profits of the company, and the amount of tax was more than would have been if the company had been UK resident because income tax rates generally exceed corporation tax rates.

Is the restriction justified? Only if one can construe the motive defence in a manner compatible with the ECJ guidelines. Obviously by ordinary principles of construction that is not possible, but that did not stop the Court of Appeal in *Vodafone 2 v HMRC (No 2)* [2009] STC 1480.

If the person abroad is a trust in another MS, s.720 is incompatible only if the trust is an undertaking within the meaning of Article 49 TFEU. But in such cases s.624 ITTOIA will usually apply, and as that applies to UK as well as non-resident trusts, it does not restrict freedom of establishment.

## 51.10 Section 86 TCGA

Section 86 TCGA constitutes a restriction on FoE where the settlor is a

30 Though that was not so before 2008/09 when the top personal CGT rate was 40%.

31 Which might be stretched to meet the conduct requirement; see *Vodafone 2 v HMRC* [2009] STC 1480.

MS national, provided the trust is an undertaking within the meaning of Article 49 TFEU.[32]

## 51.11 IHT and EU law

IHT is gradually becoming EU law compliant, with recent changes including the extension of agricultural property relief to land in the EU (recognised by IHT domestic law in 2009) and the extension of IHT relief to EU charities.[33]

The EU provide a helpful summary of case law relevant to IHT as at August 2010 of which the following may be noted here.

*Barbier*:[34] Free movement of capital and persons apply to inheritance taxes.

*Van Hilten-Van Der Heijden*:[35] Member State taxes the estate of a national who dies within 10 years of ceasing to be resident in that MS: rule compatible with free movement of capital, particularly if the legislation in question allowed relief for inheritance taxes levied by other States. Thus the IHT deemed domicile rules are EU law compliant.

*Maria Geurts and Dennis Vogten*:[36] Member States denies an exemption to inheritances of family undertakings which employed at least five workers in another MS when it would allow such an exemption from inheritance tax if the five workers had been employed in the same Member State: rule not compatible with FoE.

*Jager*:[37] Member States allows a favourable valuation and partial exemption for assets located in that MS while calculating the value of assets situated in other Mss according to market value: rule not compatible

32 As to whether a trust is an "undertaking" see Dennis Weber, *Tax Avoidance and the EC Treaty Freedoms*, Kluwer Law International, (2005), p.27.

33 See Kessler & Brown, *Taxation of Charities and Non-profit Organisations* (8th ed, 2011) para 2.4 (New tax definition of charity).

34 Case C-364/01.

35 Case C-513/03.

36 Case C-464/05.

37 Case C-256/06.

with tree movement of capital.

*Eckelkamp*:[38] a Belgian rule disallowing a deduction for charges on immovable Belgium property owned by non-resident was held in breach of EU free movement of capital.

*Arens-Sikken*:[39] For the purposes of assessing the compatibility with EC law of domestic inheritance tax legislation, the existence of a tax advantage (ie tax credit) granted unilaterally by another Member State is not relevant.

*Mattner*:[40] A gift tax provision according to which the tax allowance for non-residents is smaller than for residents: rule not compatible with free movement of capital.

38 Case C-11/07.
39 Case C-43/07.
40 Case C-510/08.

CHAPTER FIFTY TWO

# DEEMED DOMICILE FOR IHT

## 52.1 Three classes of domicile for inheritance tax

In principle, an individual must have either a UK domicile or a foreign domicile; there is no middle way.[1] But a foreign domiciliary could often secure effective exemption from inheritance tax and live almost indefinitely in the UK without acquiring a UK domicile of choice. The inheritance tax code therefore seeks to identify foreign domiciliaries who have close UK connections and provides that for most (but not all) purposes, such individuals are treated as if they were UK domiciliaries. The IHTA does not supply suitable terminology. In this book I refer to three classes of individuals as:

(1) actual UK domiciliaries;
(2) deemed UK domiciliaries (or deemed domiciliaries); and
(3) actual foreign domiciliaries.

For visiting forces, see App. 3.5 (Deemed domicile).

## 52.2 Deemed UK domicile

Section 267(1) IHTA provides:

> A person not domiciled in the UK at any time (in this section referred to as "the relevant time") shall be treated for the purposes of this Act as domiciled in the UK (and not elsewhere) at the relevant time if—
> (a) he was domiciled in the UK within the three years immediately preceding the relevant time, or

1 See 2.1 (Domicile).

(b) he was resident in the UK in not less than seventeen of the twenty years of assessment ending with the year of assessment in which the relevant time falls.

I refer to condition (a) as "**the 3 year domicile rule**" and condition (b) as "**the 17-year residence rule**".

### 52.2.1 *3-year domicile rule*

The first rule concerns the person who is actually UK domiciled and who loses their UK domicile. Such a person is deemed domiciled in the UK for three years from the date of their change of domicile. Unlike rule (b) this period is not related to years of assessment.

### 52.2.2 *17-year residence rule: time of acquisition of deemed domicile*

The second rule concerns the person who is not actually UK domiciled but who becomes resident here. Once they have been resident in the UK for 17 out of the last 20 years of assessment they become deemed domiciled here under the 17-year residence rule. In the discussion below I abbreviate "years of assessment" to "tax years".

Note that the immigrant foreign domiciliary does not need to be present in the UK for 17 full years. In an extreme case, fifteen years and two days may suffice. An individual who arrives in the UK on 5 April 1983 may arguably be resident in the UK in the tax year 1982/83. (Although this seems surprising, this would be the HMRC view, if the individual came to the UK to live here permanently or intending to stay for three years or more.) If they were still here on 7 April 1998 they may be resident in the tax year 1998/99. The 17-year residence condition would then be satisfied.

### 52.2.3 *17-year residence rule: time of loss of deemed domicile*

Once an individual is UK resident continuously for a block of 17 tax years, the individual must reach their fourth year of non-residence before ceasing to be deemed domiciled under the 17-year residence rule. The matter is best illustrated by a table:

| **Year** | **Resident Years** | **20 years ending year where transfer made in:** | | | | |
|---|---|---|---|---|---|---|
| | | 1999/00 | 2000/01 | 2001/02 | 2002/03 | 2003/04 |
| 1980/81 | *Not relevant* | 1 | | | | |
| 1981/82 | *Not relevant* | 21 | | | | |
| 1982/83 | *Not relevant* | 3 | 21 | | | |
| 1983/84 | Resident 1 | 4 | 3 | 2 | 1 | |
| 1984/85 | Resident 2 | 5 | 4 | 3 | 2 | 1 |
| 1985/86 | Resident 3 | 6 | 5 | 4 | 3 | 2 |
| 1986/87 | Resident 4 | 7 | 6 | 5 | 4 | 3 |
| 1987/88 | Resident 5 | 8 | 7 | 6 | 5 | 4 |
| 1988/89 | Resident 6 | 9 | 8 | 7 | 6 | 5 |
| 1989/90 | Resident 7 | 10 | 9 | 8 | 7 | 6 |
| 1990/91 | Resident 8 | 11 | 10 | 9 | 8 | 7 |
| 1991/92 | Resident 9 | 12 | 11 | 10 | 9 | 8 |
| 1992/93 | Resident 10 | 13 | 12 | 11 | 10 | 9 |
| 1993/94 | Resident 11 | 14 | 13 | 12 | 11 | 10 |
| 1994/95 | Resident 12 | 15 | 14 | 13 | 12 | 11 |
| 1995/96 | Resident 13 | 16 | 15 | 14 | 13 | 12 |
| 1996/97 | Resident 14 | 17 | 16 | 15 | 14 | 13 |
| 1997/98 | Resident 15 | 18 | 17 | 16 | 15 | 14 |
| 1998/99 | Resident 16 | 19 | 18 | 17 | 16 | 15 |
| 1999/00 | Resident 17 | **20** | 19 | 18 | 17 | 16 |
| 2000/01 | Non-resident 1 | | **20** | 19 | 18 | 17 |
| 2001/02 | Non-resident 2 | | | **20** | 19 | 18 |
| 2002/03 | Non-resident 3 | | | | **20** | 19 |
| 2003/04 | Non-resident 4 | | | | | **20** |
| **Deemed domicile in 2003/04** | | **Yes** | **Yes** | **Yes** | **Yes** | **No** |

Suppose an individual is resident in the UK throughout the block of 17 tax years from 1983/84 to 1999/00. We have to identify a relevant time. We then have to identify the tax year in which the relevant time falls. The table considers transfers of value in each of the 5 years 1999/00 to 2003/04.

We then have to identify "the twenty years of assessment ending with the year of assessment in which the relevant time falls". For each of the years 1999/00 to 2003/04 those 20 years include the 17-year block (shaded in the table), so the individual is deemed UK domiciled.

### 52.2.4 *Comparison of the two rules*

It is easy to envisage cases where a person is caught by one rule and not by the other.

For instance, consider a person who has always been UK resident and domiciled and who ceases to be UK domiciled on 1 August 1998. They cease to be caught by the 3-year domicile rule on 1 August 2001. However, as they were UK resident in 1998/99, they will still be deemed UK domiciled under the 17-year residence rule until 6 April 2002 (the start of the year 2002/03).

Again, a UK domiciled person may reside outside the UK for twenty years and then acquire an actual foreign domicile. Such a person is not affected by the 17-year residence rule. But three more years must pass before they cease to be UK domiciled under the 3 year domicile rule.

### 52.2.5 *Meaning of "residence" for 17-year residence rule*

Section 267(4) IHTA provides:

> For the purposes of this section the question whether a person was resident in the UK in any year of assessment shall be determined as for the purposes of income tax.

Thus in this context "residence" has its normal income tax meaning, whatever that is.

For years prior to 1993/94 s.267(4) IHTA provided:

> For the purposes of this section the question whether a person was resident in the UK in any year of assessment shall be determined as for the purposes of income tax *without regard to any dwelling house available in the UK for his use*.

This excluded the (supposed) available accommodation rule but it went further and disregarded available accommodation for all residence purposes.[2] This remains significant when determining residence for the years up to 1992/93 which will feature as part of the 17-year calculation until 2010. IHT Manual provides:

> **13024. Deemed Domicile**
> We follow any residency rulings made by CNR with one qualification. For the tax years before 6 April 1993, someone was

2 See 3.6 (Accommodation in the UK).

considered to be resident in the UK if they set foot here during the year and had a dwelling house in the UK, which was available for their use. However, availability of a dwelling house was ignored for the purposes of our 17/20 rule (Section 267(4) IHTA 1984). In the absence of any information, you should assume that residency rulings for Income Tax made prior to 93/94 were **not** made on the basis of this rule alone.

It is considered that the split year concession (ESC A11) does not apply, so years of arrival and departure are counted as full years of residence.

## 52.3 Deemed domiciliary leaving the UK

Suppose:
(1) A person who is not actually UK domiciled becomes deemed UK domiciled, having spent 17 tax years resident here.
(2) They then cease to be resident in the UK. In the fourth tax year after departure, they cease to satisfy the 17-year residence rule.

Is the person still treated as domiciled here for three years under the 3-year domicile rule? In other words, does the deemed domicile rule in (a) apply to a person who was only a deemed domiciliary under (b)? The answer is, no. It is considered that (a) and (b) are independent rules dealing with separate circumstances. If that were wrong, then the following absurdity arises. Suppose T, non-resident for many years, ceases to be UK domiciled. In year 1 T becomes deemed domiciled. In year 4 T ceases to be deemed domiciled. HMRC could argue that since T was (deemed) domiciled in year 3, T must wait three more years before T can cease to be deemed domiciled. Then, of course, three years later T is still deemed domiciled. T can never throw off the deemed domicile. This shows that "domicile" in s.267(1)(a) means actual domicile and not deemed domicile. The word should have the same meaning throughout the section.[3]

## 52.4 Domicile of child of a deemed domiciliary

A child usually acquires the domicile of their father at the time of their birth as a domicile of origin; and if the father's domicile changes while the

3 This is consistent with *Russell v IRC* [1988] STC 195.

child is under 16, the child acquires the father's new domicile as a domicile of dependency. Does one have regard to the deemed domicile rule for this purpose? Suppose:

(1) F is actually foreign domiciled but deemed UK domiciled when a child is born; or
(2) F is not deemed UK domiciled when the child is born but becomes deemed UK domiciled while the child is under 16.

It is suggested that the deemed domicile rule does not affect the child's domicile: in each case the child is not deemed UK domiciled (until the child has spent 17 yeas resident in the UK. Applying s.267, it is only the person actually resident in the UK who is deemed UK domiciled. The deemed domicile of the father does not affect the domicile of the child. Of course, the question will not often arise, since the domicile of children and young persons only rarely needs to be ascertained.

## 52.5 When deemed domicile does not matter: FOTRA securities and DTAs

There are two situations where a deemed domicile rule does not apply:
(1) exempt gilts and qualifying certificates of Islanders (discussed here);
(2) pre-CTT double tax treaties.[4]
Section 267(2) IHTA provides:

> Subsection (1) above shall not apply for the purposes of section 6(2) or (3) or 48(4) above ...

That is, the deemed domicile rules do not apply for the purposes of the exemptions conferring excluded property status on FOTRA securities[5] and qualifying certificates of Islanders.[6]

The reason is historical. The concept of deemed domicile was introduced with CTT in 1974. At that time gilts had been issued free from taxation (including Estate Duty) if the owner was not (actually) UK domiciled. The deemed domicile rule could not have been applied to those gilts. All that the drafter needed to do was to disapply the deemed domicile rule to exempt gilts in issue at the time of the introduction of

---

4 See 60.4 (Domicile requirement of treaty IHT exemption).
5 See 53.4 (Non-settled property: FOTRA securities) and 53.10 (Trusts: FOTRA Securities).
6 See 53.7 (Individual domiciled in Channel Islands or Isle of Man).

CTT (now IHT). It was not necessary to disapply the deemed domicile rule to gilts issued later. But that is the rule. Presumably the intention was to avoid having two classes of exempt gilts governed by different rules; or to encourage foreigners to continue to invest in exempt gilts issued after 1975.

No doubt the same reasoning applied to qualifying certificates of Islanders.

This rule gives some scope for IHT planning by individuals who are deemed UK domiciled but who qualify for these exemptions (ie non-UK ordinarily residents and Islanders).

## 52.6 1974 transitional rules

Section 267(3) contains five transitional rules:

> Para (a) of subsection (1) above shall not apply in relation to a person who (apart from this section) has not been domiciled in the UK at any time since 9th December 1974 ...

This disapplies the 3-year domicile rule only. It would only apply in a relatively rare case of someone who was actually UK domiciled and ceased to be so before 9 December 1974.

> and para (b) of that subsection shall not apply in relation to a person who has not been resident there at any time since that date ...

This disapplies the 17-year residence rule only. It would only apply to someone who had been UK resident for 17-years and ceased to be so before 9 December 1974.

> and that subsection shall be disregarded—
> (a) in determining whether settled property which became comprised in the settlement on or before that date is excluded property,

This applies to pre-9 December 1974 settlements.

> that subsection shall be disregarded— ...
> (b) in determining the settlor's domicile for the purposes of section 65(8) above in relation to settled property which became comprised in the settlement on or before that date, and

(c) in determining for the purpose of section 65(8) above whether the condition in section 82(3) above is satisfied in relation to such settled property.

This applies to the exemption for exempt gilts.

## 52.7 Tax planning for the deemed domiciliary

(1) The emigrant deemed domiciliary
An individual who has emigrated from the UK (ie acquired a foreign domicile of choice) remains an "emigrant" deemed domiciliary for three years. The individual's inheritance tax planning, if in good health, is simple; they should refrain from making any gifts until they have ceased to be deemed UK domiciled. If they wish to make substantial gifts before then, they might consider purchasing exempt gilts or some other property which qualifies as excluded property. Deathbed planning would be the same. In addition they might consider taking out a loan to purchase excluded property: see 56.6 (Individual borrows and acquires excluded property).

(2) The immigrant deemed domiciliary
The immigrant deemed domiciliary is the foreign domiciliary who has resided for a long period in the UK and become deemed UK domiciled. Their scope for planning is greatly restricted; they should really take proper steps before the statutory deadline when their deemed domicile arises.

If the individual is actually domiciled in the Isle of Man or in the Channel Islands then he has some scope for acquiring excluded property in the form of exempt saving certificates.[7] Otherwise it may be possible to cease to be UK resident for the necessary period of three tax years so that the deemed domicile rules cease to apply.

7 See 53.7 (Individual domiciled in Channel Islands or Isle of Man).

CHAPTER FIFTY THREE

# EXCLUDED PROPERTY FOR IHT

## 53.1 Excluded property – Introduction

"Excluded property" is broadly[1] outside the scope of inheritance tax.

There are nine classes of excluded property:

(1) Non-settled property:[2]
  - (a) foreign situate property;
  - (b) AUTs and OEICs;
  - (c) FOTRA securities.

(2) Settled property:
  - (a) foreign situate property;
  - (b) AUTs and OEICs;
  - (c) FOTRA securities.

(3) Qualifying certificates of Islanders (Channel Islands/Isle of Man domiciliaries).

(4) Property of visiting forces.[3]

(5) Reversionary interests in settled property.

Thus with an economy of language the exemptions for excluded property are used to serve several purposes:

(1) A territorial exemption.

(2) Limiting the scope of IHT:
  - (a) in order to encourage UK investment by foreigners (FOTRA securities, UK funds);
  - (b) to fit the scheme of the Act or avoid double taxation (relief for

---

1 See 53.14 (Occasions where excluded property is relevant for IHT).

2 A note on terminology. I use the term "non-settled property" to describe property which is not comprised in a settlement for IHT purposes. The term used in the IHT Manual is "unsettled property".

3 See App. 3.4 (Excluded property).

reversionary property, etc).

This chapter sets out the definitions of excluded property. It also considers works of art, foreign bank accounts and foreign pensions, which (though not excluded property) qualify for some similar exemptions.

See too 55.1 (IHT consequences of transfers between trusts).

## 53.2 Non-settled property: foreign situate property

Section 6(1) IHTA provides:

> Property situated outside the UK is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.

Excluded property status depends on the domicile of the individual at the time the disposition is made. Likewise, excluded property status depends on the location of assets at that time only. It is irrelevant that the assets may previously have been situate in the UK. If a foreign domiciled individual transfers their property out of the UK the moment before they die, or the moment before they make a gift of the property, they obtain the full benefit of excluded property status: see *Kwok Chi Leung Karl v Commissioner of Estate Duty* [1988] STC 728. On the situs of assets, see 70.1 (Concepts of situs).

### 53.2.1 *Gift from foreign bank account to UK account*

What is the position if a foreign domiciled donor makes a gift from their foreign bank account (ie, not a UK situate asset) to a UK bank account of the donee? In general, as a matter of banking law, the donor's cheque or other instruction to the bank to transfer funds from the donor's account to another account is revocable until it is carried out (though in any particular case it would be relevant to consider the documentation and proper law concerned.) So the gift will be regarded as taking effect when completed, namely when the money is credited to the donee's UK account. Nevertheless the gift is not a transfer of value for IHT purposes. When funds are held in A's account, A has an asset (a debt). When funds are transferred from A's account to B's account, A's asset comes to an end and B acquires a new asset (a debt). "It is something of a misnomer to speak of the transfer of funds, as there is no actual transfer of coins and bank notes from the payer to the payee, and no assignment of the debt owed to the payer by their own bank."[4]

Section 3 IHTA provides:

> (1) ... a transfer of value is a disposition made by a person (the transferor) as a result of which the value of his estate immediately after the disposition is less than it would be but for the disposition; and the amount by which it is less is the value transferred by the transfer.
> (2) For the purposes of subsection (1) above no account shall be taken of the value of excluded property which ceases to form part of a person's estate as a result of a disposition.

The terms of section 3(2) are met, so the gift is not a transfer of value. I stress this because the contrary has been suggested, but the position is perfectly clear.

## 53.3 Non-settled property: authorised unit trusts and OEICs

Section 6(1A) IHTA provides:

> [a] A holding in an authorised unit trust[5] and
> [b] a share in an open-ended investment company[6]
> is excluded property if the person beneficially entitled to it is an individual domiciled outside the UK.

AUTs and OEICs will generally be UK situate assets. I refer to them together as **"UK funds"**. These are excluded property for all IHT purposes.

The relief only applies to a *holding* in an AUT or a *share* in an OEIC so other interests in AUTs and OEICs (for instance, options) are not excluded

4 Brindle & Cox, *The Law of Bank Payments* (4th ed 2010), para 3-002. See *R v Preddy* [1996] AC 815.

5 Defined in s.272 IHTA:
"'authorised unit trust' means a scheme which is a unit trust scheme for the purposes of the Income Tax Acts (see section 1007 of the ITA 2007) and in the case of which an order under section 243 of the Financial Services and Markets Act 2000 is in force."

6 Defined in s.272 IHTA:
"'open-ended investment company' means an open-ended investment company within the meaning given by section 236 of the Financial Services and Markets Act 2000 which is incorporated in the UK."

property. Perhaps that does not arise in practice.

The exemption for UK funds uses the expression “beneficially entitled” and the exemption for FOTRA securities uses the expression “beneficial ownership” but it is considered that the two have the same meaning; for a discussion see 53.5 (Beneficial ownership).

## 53.4 Non-settled property: FOTRA securities

The next category of excluded property consists of FOTRA securities[7] (certain UK government securities popularly called exempt gilts). FOTRA securities are UK situate assets. Section 6(2) IHTA provides:

> Where securities have been issued by the Treasury subject to a condition authorised by section 22 of the F(No.2)A 1931 (or section 47 of the F(No. 2)A 1915) for exemption from taxation so long as the securities are in the beneficial ownership of persons of a description specified in the condition, the securities are excluded property if they are in the beneficial ownership of such a person.

FOTRA securities issued from 1 April 2005 are titled “Treasury Gilts”. Earlier securities have one of the following names:

– Treasury Loan/Stock
– Conversion Loan/Stock
– Exchequer Loan/Stock
– Consolidated Loan/Stock
– War Loan

The different names have only historic significance.

Products issued by National Savings and Investments are not FOTRA securities.

### 53.4.1 *Conditions for exemption*

FOTRA securities were first issued under s.47 F(No 2)A 1915. This was a temporary measure:

> The Treasury may, if they think fit, during the continuance of the present

7 “Free of Tax to Residents Abroad”.

> war and a period of twelve months thereafter, issue any securities which they have power to issue for the purpose of raising any money or any loan with a condition that neither the capital nor the interest thereof shall be liable to any taxation, present or future, so long as it is shown in manner directed by the Treasury that the securities are in the beneficial ownership of persons who are neither domiciled nor ordinarily resident in the UK, and securities issued with such a condition shall be exempt accordingly.

This section was repealed in 1927, but the repeal did not affect tax exemptions for securities previously issued and War Loan 1952 Or After is still in existence.

Section 22(1) F(No.2)A 1931 provides:

> Any securities issued by the Treasury under any Act may be issued with the condition that -
> (a) so long as the securities are in the beneficial ownership of persons who are not ordinarily resident in the UK, the interest thereon shall be exempt from income tax; and
> (b) so long as the securities are in the beneficial ownership of persons who are neither domiciled nor ordinarily resident in the UK, neither the capital thereof nor the interest thereon shall be liable to any taxation present or future.

Subsequent statutory provisions do not specify the condition for exemption: they give the Treasury a discretion to specify the condition in the terms of the issue. Section 60 FA 1940 provides:

> The power of the Treasury under s.22 F(No.2)A 1931 to issue securities with the condition as to exemption from taxation specified in that section shall extend to the issuing of securities with that condition so modified, whether as to the extent of the exemption or the cases in which the exemption is to operate, as the Treasury may specify in the terms of the issue.

So the details must be found in the prospectus for each gilt concerned.[8] Section 154(1) FA 1996 provides:

---

8 Prospectuses can be found on *www.dmo.gov.uk/rpt_parameters.aspx?rptCode=D8E&page=Prospectuses*

> The modifications which, under s.60 of the FA 1940, may be made for the purposes of any issue of securities to the conditions about tax exemption specified in s.22 of the F(No.2)A 1931 shall include a modification by virtue of which the tax exemption contained in any condition of the issue applies, as respects capital, irrespective of where the person with the beneficial ownership of the securities is domiciled.

It is hard to see the need for this, but it does no harm.

Before 6 April 1998 some gilts were issued without FOTRA conditions. These have now been given the benefit of FOTRA conditions by s.161 FA 1998:

> (1) Subject to the following provisions of this section, any gilt-edged security[9] issued before 6 April 1998 without FOTRA conditions shall be treated in relation to times on or after that date as if—
> (a) it were a security issued with the post-1996 Act conditions; and
> (b) those conditions had been authorised in relation to the issue of that security by virtue of s.22 of the F(No. 2)A 1931.
> [(2)(3) are transitional provisions now spent]
> (4) In this section "FOTRA conditions" means any such conditions about exemption from taxation as are authorised in relation to the issue of a gilt-edged security by virtue of section 22 of the Finance (No 2) Act 1931...
> (5) In this section "the post-1996 Act conditions" means the FOTRA conditions with which 7.25% Treasury Stock 2007 was first issued by virtue of s.22 of the F(No. 2)A 1931.[10]
> (7) This section does not apply to any 3½% War Loan 1952 Or After which was issued with a condition authorised by virtue of s.47 of the F(No. 2)A 1915.

So all UK government securities have had FOTRA status, irrespective of the original terms of issue but there are two classes of FOTRA securities with different conditions attached:

9 "Gilt-edged securities" has the CGT definition: see s.161(6) FA 1998.

10 This was one of the first gilts issued in 1996/97. The condition provides: "the Stock will be exempt from all UK taxation, present or future, so long as it is shown that the Stock is in the beneficial ownership of persons who are not ordinarily resident in the UK".

(1) Gilts where the condition requires the individual to be domiciled[11] and ordinarily resident outside the UK. These include:
    (a) 3½% War Loan 1952 Or After, issued under s.47 F(No.2)A 1915.
    (b) Gilts issued under s.22 F(No.2)A 1931, where this was the condition set out in the prospectus.
(2) Where the condition requires the beneficial owner to be ordinarily resident outside the UK but domicile is irrelevant. This applies to:
    (a) Gilts issued before 6 April 1998 without FOTRA conditions; these now have the benefit of "post-1996 Act conditions" under s.161 FA 1998.
    (b) Gilts issued after 1996, where the prospectus set out this condition. I understand that all gilts issued after 29 April 1996 contain this condition.

IHT Manual 27243 sets out a list of gilts where the requirement is that the beneficial owner is ordinarily resident outside the UK (domicile irrelevant). Para 27244 sets out a list of the gilts where the requirement is that the beneficial owner is neither domiciled nor ordinarily resident in the UK. However, it would be wise to check the prospectus in each case.

## 53.5 Beneficial ownership of FOTRA securities

The gilts must be in the "beneficial ownership" of the individual. The expression here has its English law/trust law meaning.[12] In the following discussion I abbreviate the term to "ownership".

There have been many cases discussing "ownership" in the context of company groups, and the reader who wishes to research this area further should refer to the discussion on group relief in corporation tax and SD textbooks.[13] Unfortunately the case law is in disarray and a number of contradicting dicta can be found. But two propositions seem reasonably clear. Gilts remain in the ownership of a person even if they have granted

11 Deemed domicile is irrelevant for this purpose: see 52.5 (When deemed domicile does not matter: FOTRA securities and DTA).

12 See 22.12.1 (Meaning(s) of "beneficial ownership").

13 The expression "beneficial ownership" is used in DTAs, but there it has an international fiscal law sense distinct from the usual English law sense. See John F. Avery Jones et al, "The Origins of Concepts and Expressions used in the OECD Model" [2006] BTR 695 at p.747. It is considered that discussion of the DTA meaning is no assistance to ascertain the meaning in the present context, or generally in English law.

a mortgage or charge.[14] Gilts are not in the ownership of a person if they have entered into a contract of sale, even a conditional contract.[15]

Gilts remain in the ownership of an individual even if they have granted put and call options, according to *Sainsbury v O'Connor* 64 TC 208.

Ownership is not a precise term in English law and is used with a variety of meanings. Its common meaning is to denote the sum of all the rights which a person has over an asset; that is, ownership is a bundle of rights, or if you prefer, ownership has a number of incidents.[16] In the case of gilts the bundle (or incidents) consists of the right to dividends, capital on redemption and rights of disposal.

Clearly, one can make some dent in the usual array of rights or incidents and still be regarded as an owner. This explains why one remains beneficial owner after granting a charge or licence. Where does one draw the line? The courts answer to this question has been confused because they insist that ownership must (with limited exceptions) be regarded as vested in one person or another.

This causes artificial results when property is subject to a contract of sale and it is said that ownership must be vested in either the vendor or purchaser. There is no reason why that should be so, if one remembers that ownership is no more than a convenient term for a bundle of rights. The better analysis is that ownership rights are split between vendor and purchaser. Neither should be regarded as "the" beneficial owner.[17] Likewise for property subject to an option. On this analysis, *Wood Preservation* was rightly decided but for the wrong reasons, and *Sainsbury* was wrongly decided. But however unconvincing the reasoning, the law on this point is settled below the Supreme Court.

---

14 *English Sewing Cotton v IRC* [1947] 1 All ER 679.

15 *Wood Preservation v Prior* 45 TC 112.

16 See Turner, "Some Reflections on Ownership in English Law" (1941) 19 Can. Bar Review 342; Harris *Property and Justice* (1996) p.125.

17 Likewise the courts have come to reject the dogma that "where ownership is vested in a trustee, equitable ownership must necessarily be vested in someone else because it is an essential requirement of a trust that it confers upon individuals a complex of beneficial legal relations which may be called 'ownership'". See *CPT Custodian Pty Ltd v Commissioner of State Revenue* [2005] 2 ALR 196 at [25] accessible *www.austlii.org*. Of course, the context in which the expression "beneficial owner" is used should always be considered.

### 53.5.1 *Beneficial ownership in Scotland*

The IHT Manual at 04031 discusses the expression "beneficially entitled", in a passage which sheds a little light on beneficial ownership:

> The use of the words 'beneficially entitled' means broadly that the estate includes only property
> - to which a person is entitled, or
> - in which they have an interest for their own benefit.
>
> In England, Wales and Northern Ireland this includes property which a person owns either legally or beneficially (IHTM04441).

So far, the text is unexceptionable. The discussion then turns to Scotland:

> In Scotland, the term 'ownership' does not necessarily equate to beneficial entitlement, for example where the land that is being transferred is subject to missives of sale [or][18] there is an unrecorded disposition. This is because of the Scottish system of unitary ownership. Any case where the question is in point should be referred to TG (IHTM01081) for advice.

The text raises the interesting suggestion that the position in Scots law is not the same as in English law.[19] The passage concludes:

> A person is not beneficially entitled to property held
> - purely in a fiduciary capacity (for example as a trustee)
> - in a representative capacity (for example as an executor or a trustee in bankruptcy), or
> - by way of security (for example as a mortgagee prior to foreclosure).
>
> ...

This is clearly right.

18 The original reads "of". The emendation to "or" makes sense, though it might be that some text is missing here.

19 I would be grateful to any Scots reader who could direct me to relevant authority. Barr and Eden, *Inheritance Tax in Scotland* (Butterworths), or McDonald and Pagan, *Inheritance Tax in Scotland: Tax Annual* (Bloomsbury) may help here.

### 53.5.2 *Registration*

IHTM04294 [September 2008] provides:

> If a government security is a FOTRA gilt (IHTM04291) you will have to consider who is beneficially entitled (IHTM04031) to that security to work out whether it is excluded property for IHT purposes..
> If a worthwhile amount is at stake[20] you should investigate the possibility of a last-minute purchase. Except where the available information (e.g. inclusion of sufficient income/interest) reasonably rules out that possibility, you should seek specific confirmation that the securities concerned were in fact registered in the transferor's, or the trustee's, name(s) at the date of the relevant transfer.
> (This text has been withheld because of exemptions in the Freedom of Information Act 2000)

I do not think that the IHT Manual means to say that relief only applies if the securities are registered in the name of the individual or the trustees. The point is that no relief applies if the securities are purchased but not paid for. The purchaser is not the beneficial owner until payment, or even if they were, securities not paid for have no value because of the vendor's lien. So if the gilts are not registered in the name of the individual, further evidence may be needed to show that the individual actually is the beneficial owner.

In practice, register the gilts in the name of the individual or the trustees to avoid possible dispute. Perhaps the withheld text instructs Inspectors how to identify false claims for relief.

### 53.5.3 *Interest on FOTRA securities*

The IHT Manual provides:

> **27260 Exclusion of interest on exempt securities**
> The exclusion for exempt securities can also apply to certain payments etc of interest on the securities. Payments that qualify for the exclusion are:

---

20 Understandably, the HMRC view on what is "worthwhile" in this context is not in the public domain.

> [1] warrants or coupons for interest already received but not encashed at the date of the relevant chargeable event
> [2] apportionment of interest due up to, but receivable after, the date of the chargeable event
> [3] in the case of a trust, any interest payments already encashed but held – at the date of the chargeable event – by the trustees pending distribution in the administration of the trust. This is so even if no separate moneys can be identified as relating directly to interest on exempt securities.
>
> The **exclusion for interest does not apply** to any warrants or coupons already encashed, or payments of interest already received, by the beneficiary in his lifetime, in connection with any chargeable event occurring after the encashment or the receipt. This is so whether he is the absolute owner of the exempt securities or a beneficiary under a trust.

This is correct, but point [3] seems generous.[21]

### 53.5.4 *Practical use of FOTRA securities*

The exemption is useful for individuals who are:

(1) UK domiciled (or deemed domiciled);
(2) not ordinarily resident in the UK (so they can satisfy the conditions for exemption).

---

21 For completeness, the Manual continues:
**"27261 Exclusion of repayment of IT on exempt securities**
Repayment of income tax relating to interest on exempt securities also falls within the exclusion for such securities:
if an existing warrant for repayment remains uncashed at the date of the relevant chargeable event
in the case of a trust, if the proceeds of an encashed warrant are held – at the date of the chargeable event – by the trustees pending distribution in the administration of the trust or
if the repayment due up to the date of the chargeable event is receivable after the date.
A repayment encashed – before a chargeable event – by the person beneficially entitled to the repayment is not eligible for the exclusion on that event."
Before 1998 interest was generally paid subject to deduction of tax. But now interest is paid without deduction of tax (unless the owner asks for tax to be deducted) so this point will not arise.

## 53.6 UK funds *v* foreign funds

As far as tax is concerned, which is better for the foreign domiciliary: UK funds or foreign funds?

(1) A remittance basis taxpayer will prefer a foreign fund to a UK one, so that income and gains from the fund will be taxed on the remittance basis.[22] Likewise a settlor-interested trust whose settlor is a remittance basis taxpayer will prefer a foreign fund to a UK one; similarly if the transfer of asset rules may apply, as UK source income from the fund may be taxed where foreign source income in principle will not.

(2) A non-resident non-domiciled individual will not mind (for IHT, CGT or IT) whether they purchase a UK or a foreign fund. However, taxation at fund level is another matter, and the additional burden on UK funds, particularly SDRT, has encouraged fund managers to set up new funds offshore.[23]

Thus the IHT exemption for UK funds represents a pragmatic decision by the Government, but, like so much in the tax system, falls short of consistency or joined-up thinking.[24]

## 53.7 Individual domiciled in Channel Islands or Isle of Man

Section 6(3) IHTA provides:

> Where the person beneficially entitled to the rights conferred by any of the following, namely—
> (a) war savings certificates;
> (b) national savings certificates (including Ulster savings certificates);
> (c) premium savings bonds;
> (d) deposits with the National Savings Bank or with a trustee savings bank;

---

22 If the individual plans to remit income from the fund, it may be better to have a UK fund. But that is a special case.

23 See "Taxation and the Competitiveness of UK Funds" (October 2006) accessible *www.investmentUK.org/press/2006/jointkpmg-imataxreport.pdf*. The report also notes that the uncertainty and instability of the UK tax regime is regarded as making the UK an unsuitable location.

24 See 1.2.2 (Attitudes to the economic argument).

> (e) a certified SAYE savings arrangement within the meaning of section 703(1) ITTOIA;
>
> is domiciled in the Channel Islands or the Isle of Man, the rights are excluded property.

In the following discussion:
(1) "**Qualifying certificates**" are investments within (a) to (e).
(2) "**Islanders**" are persons domiciled in the Channel Islands or the Isle of Man.
The deemed domicile rule does not apply for the purposes of this section: see s.267(2) IHTA.

The IHT Manual para 27270 correctly states:

> Other points to note are:
> [1] the exclusion applies not only to securities etc owned by a domiciled Islander absolutely but also to any settled securities in which he has a beneficial interest in possession[25]
> [2] the exclusion does not extend to settled securities in which there is no interest in possession, i.e. which are held on discretionary trusts
> [3] the relevant domicile is that of the transferor (and not the transferee) of the securities, at the time of the transfer

Points [2] and [3] are obvious but point [1] is important.

The exemption could be particularly useful for an individual who is:
(1) domiciled in the Channel Islands or the Isle of Man, and
(2) deemed UK domiciled (so in principle within the scope of IHT), and
(3) ordinarily resident in the UK (so the FOTRA securities exemption is not available).
The exemption is also useful for a trust with such a person as life tenant.

The exemption dates back to 1931[26] and was presumably an attempt to market the certificates to Islanders, who would otherwise not find them an attractive choice. It seems surprising that the exemption is limited to Islanders; no doubt there were reasons.

25 [Author's note] From 2006 this will now only apply to an estate IP.
26 Section 41 FA 1931. The exemption for FOTRA securities was revived in the same year.

## 53.8 Trusts: foreign situate property

Section 48(3) IHTA provides:

> Where property comprised in a settlement is situated outside the UK—
> (a) the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the settlement was made ...

This is the main category of settled excluded property, roughly corresponding to the main category of non-settled excluded property. Three important consequences arise from the definition.

First, the resident and domicile status of the beneficiaries is irrelevant for this purpose. The residence of the trustees is similarly irrelevant.

Secondly, excluded property status depends on the domicile of the settlor at the time the settlement was made. The domicile at the time of the transfer or chargeable event is ignored.[27] Contrast the IT and CGT position. The identity of the settlor is therefore crucial: see 69.3.4 (IHT definition of settlor).

Thirdly, the location of the assets comprised in the settlement matters only at the moment a charge arises; provided the assets are then situated abroad, it is irrelevant that they may previously have been situated in the UK. So trustees could transfer the settled property out of the UK the moment before the death of a life tenant, or the occasion of a ten-year charge, and obtain the full benefit of excluded property status: see *Kwok Chi Leung Karl v Commissioner of Estate Duty* [1988] STC 728.

HMRC accept this. IHT Manual provides:

> **4274. Identifying settled property** [September 2008]
> The expression 'property comprised in a settlement' in Section 48(3) IHTA 1984 means the items of property (IHTM04030) held in the settlement (IHTM16000) at the time of the chargeable event that you are considering. In determining the locality (IHTM27071) of any particular property, therefore, you should consider the property in its current form and not its previous history.
> *Example*

27 See 53.12 (Initial interest of settlor or spouse) for an exception where the settlor or their spouse has an initial interest in possession in the settled property.

S, when domiciled in Germany, settles some German realty[28] and some securities then situated in the UK on X for life with remainder to Y. On X's death the life interest comes to an end and the settled fund consists of

a. a villa in Spain, or
b. land in the UK, or
c. a house in Spain and some English securities.

With a., the villa is excluded property even though it partly represents the proceeds of what was previously UK property (the securities). The land in b. is not excluded property although it is partly derived from the German realty. In c., the house is excluded property but the securities are not.

## 53.9 Trusts: authorised unit trusts and OEICs

Section 48(3A) IHTA provides:

> Where property comprised in a settlement is a holding in an authorised unit trust or a share in an open-ended investment company—
> (a) the property (but not a reversionary interest in the property) is excluded property unless the settlor was domiciled in the UK at the time the settlement was made, and
> (b) section 6(1A) above applies to a reversionary interest in the property but does not otherwise apply in relation to the property;[29]
> but this subsection is subject to subsection (3B) below.[30]

### 53.9.1 *Exit charge on purchase of UK funds?*

Suppose a discretionary trust with a foreign domiciled settlor uses UK situate property to purchase UK funds. This section considers whether this gives rise to an IHT exit charge. Section s.65(1) IHTA provides:

> There shall be a charge to tax under this section-
> (a) where the property comprised in a settlement or any part of that property ceases to be relevant property (whether because it ceases to

28 [Author's footnote] The question whether this is possible as a matter of German law is ignored for the purposes of the example.

29 For a discussion of s.48(3A)(b), see 53.11.2 (Foreign situate property and UK funds in estate IP trust).

30 For the subsection 3B exception, see 53.16.3 (Purchased equitable interests).

> be comprised in the settlement or otherwise)...

The question is whether trust property has "ceased to be relevant property" within the meaning of s.65(1). It is helpful to approach this question historically. The position before the 2003 reforms was straightforward. Section 58 IHTA provides (so far as relevant):

> (1) In this Chapter "relevant property" means settled property in which no qualifying interest in possession subsists, other than ...
> (f) excluded property.

The trust property is "settled property in which no qualifying interest in possession subsists" and so is relevant property unless it is excluded property. If UK trust property becomes non UK situate, it ceases to be relevant property. However in that event, s.65(7) IHTA provides relief:

> Tax shall not be charged under this section by reason only that property comprised in a settlement ceases to be situated in the United Kingdom and thereby becomes excluded property by virtue of section 48(3)(a) above.

Press Release 16 October 2002 (OEICs and AUTs) para 6 explained the reason for the 2003 reforms:

> Overseas investors are in theory liable to inheritance tax on their OEIC and AUT holdings, because they are regarded as being situated in the UK for tax purposes on the investors' death. Competing centres do not charge tax in parallel circumstances. Removing the potential inheritance tax charge will help UK managers compete on an equal footing with overseas fund providers.[31]

Accordingly, s.186 FA 2003 provides:

---

31 Similarly, EN FB 2003 provides:
"8. This clause is one of two measures to boost the competitiveness of UK authorised funds announced by Treasury press notice (105/02) dated 16 October 2002. From that date, holdings by non-UK domiciled investors or their trusts in authorised unit trusts and open-ended investment companies will not be chargeable to IHT."

> (1) The Inheritance Tax Act 1984 (c. 51) is amended as follows....
> (3) [This inserts s.48(3A) IHTA] ...
> (8) This section has effect in relation to transfers of value or other events occurring on or after 16th October 2002.

Thus on 10 July 2003 (when the FA 2003 came into force), and with effect in relation to transfers of value or other events occurring on or after 16th October 2002, UK funds became excluded property. If a discretionary trust with a foreign domiciled settlor held UK funds on 10 July, the assets ceased to be relevant property and became excluded property.

The drafter of the 2003 provisions copied the wording of s.48(3). Unfortunately the drafter did not copy the words of s.65(7). If one construes the words of the section literally, then there are three consequences:

(1) A foreign trust holding UK funds on 10 July 2003 became subject to an exit charge under s.65 IHTA.
(2) A foreign trust became retrospectively subject to an exit charge if it had acquired AUTs or OEICs out of UK situate property between 16th October 2002 and 10 July 2003.
(3) A foreign trust became prospectively subject to an exit charge if it acquired AUTs or OEICs out of UK situate property after 10 July 2003.

I think it is safe to say that HMRC did not seek to collect tax under category 1 or 2 in 2003, and would not do so now. It would be inconsistent to seek IHT in a category 3 case. The point is the same in each of the three cases. Is section 65 to be construed literally? The issue raises in a very pure form the question of how the courts construe taxing statutes. The reader will, I think, hardly need to be told that the House of Lords/Supreme Court have vehemently rejected the literal approach.[32]

There can be no doubt about the purpose of the legislation. If there were a charge on the coming into force of the FA 2003, or on the acquisition of UK funds out of UK situate property, then that would directly obstruct the purpose.
